

Intent to EOL Announcement

Legacy Product Line: Eaton 9130 Tower

New Product Line: Eaton 9SX

Replacement Launch: June 2018

Tentative EOL Date: August 2018

Regions: Global

Eaton is announcing our intent to refresh the Eaton 9130 tower in Q2 of 2018 after ten years of outstanding service. Tentatively launching June 12th, 2018, the new model, the Eaton 9SX, is set to be a form, fit, function replacement, while upgrading components and communication protocols necessary to keep up with our supply chains and customer needs.

Eaton is looking to secure last time buys by February 15th, 2018 for projects requiring inventory past Q3 2018. Eaton understands that the Eaton 9130 tower is used in unique applications that can require months of qualification before gaining approval in customer systems. Eaton is committed to working with our partners in forecasting and securing inventory to assist our partners through this transition. Please work with your local Eaton representative to begin actions for understanding new product, securing inventory, and managing the transition.
