- Eight 720p Bullet Cameras
- Night Vision Capabilities
- Real-time 720p and 1080p Recording Resolutions
- Mobile Surveillance Via Q-See Apps
- HDMI Port for High Resolution Viewing
- Preinstalled 2TB Hard Drive
- Scan N' View For Easy Remote Access
- Start-UP Wizard
- PC and Mac Compatibility

Complete 720p Protection

Head to work confidently knowing that when you lock the door behind everything will remain as it is because you have a state-of-the-art Q-See system monitoring your property. Featuring powerful mobile surveillance features that always keep you connected, this system lets you know what is happening on your property no matter how close or far you are. This advanced system comes with eight cameras, one for each available channel, you'll be able to guard every entrance and blind spot. Every essential detail is captured when you record in real-time resolution. These larger resolutions translate to video with a high pixel count for images with added detail and clarity. Secure the entrance to your business or simply keep an eye on your backyard. Regardless of your needs, Q-See protects in full color clarity.

HD Recording Resolution

Recording video in high definition 720p & 1080p, this DVR gives you twice the clarity that 960H offers for even more image detail. Confidently monitor your home or small business with a resolution that allows you to distinguish between people, objects and actions, all in superb HD resolution.

720p Camera Resolution

This advanced system records in 720p resolution, 1280x720 pixels. This larger picture size translates to a high definition image with added detail and recognition.

True 30 Frames Per Second (FPS) Recording

This DVR records at a verified 30 FPS in 720p resolution, allowing completely smooth playback with continuous motion in order to ensure every detail is captured.

Additional Camera Features

1/3" Image Sensor

Expect clear, crisp images day or night thanks to the quality camera sensors. The large 1/3" sensors capture and process enough light to reproduce stunning recorded images.

3.6mm Lens

Each included camera offers a 3.6mm lens for a wider 65 degree to 70 degree field of view. Easily see more of what matters.

Night Vision Capabilities

Each camera comes with high quality LEDs that allows them to record in complete darkness for continued protection well into the night.

Secure Mounting Hardware

Versatile 3-axis bullet mounting brackets allow each bullet camera to be mounted to just about any surface, such as a wall, ceiling or flat surface, for optimal visibility. The included mounting hardware also prevents vandalism by fully protecting sensitive camera wires behind the brackets where they can be safely passed through walls.

Camera Cable

All you need to set up your system is included! Each camera comes with standard BNC cable so you can begin installing your system right out of the box. Plus, long distance transmission is not an issue with this system since each BNC cable can be extended to a single run length of over 1000ft with no lag or deterioration. An RG-59 cable is required for distances over 200ft.

Additional DVR Features

High Resolution Viewing Options

With the HDMI® port and included standard HDMI® cable, easily display video on any 19" or larger TV or monitor to take full advantage of the security system's clarity.

Scan N View

Scan N' View is a new quick connect technology built right into Q-See's DVR and mobile app that allows you to easily connect to your DVR for instant live viewing on a compatible device. This revolutionary new feature makes remote monitoring the easiest part of setting up your system.

Start-Up Wizard

Installing a surveillance system has never been easier with Q-See's integrated Start-Up Wizard. The wizard is automatic and begins assisting you as soon as the DVR is powered up for the first time. The on-screen guide advances step-by-step to help ensure your DVR settings are optimized for your particular situation.

2TB Hard Drive

A sturdy A/V rated, high capacity hard drive comes pre-installed with the DVR. The amount of footage you can save on the hard drive before needing to over-write footage will depend on the recording and resolution settings you select. The system can support 1 SATA hard drive of up to 3 TB.

Convenient Backup

Transfer video files from the surveillance system to a PC, Flash Drive or USB Hard Drive in order to free-up space for new video while retaining important footage.

Customizable Recording Modes

With three recording modes to choose from, the DVR is easily customized to suit your individual surveillance recording needs.

1. Record continuously: Manually start and stop recording
2. Schedule: Trigger recording to start and end at specific times with a daily timer
3. Motion: Trigger recording to start when motion is detected

1, 4, 8, Auto-sequence Viewing Options

View 4 or 8 cameras at once on a split-screen or view 1 camera at a time on full screen mode with the option to cycle through each of the cameras at a customizable speed.

Easy Search Options

To easily pinpoint an event, this DVR allows you to search recorded video by time or motion detection event.

Additional System Specifications

Cameras
