POLYBAG + HARDWARE + DISPLAY **RETAIL PROGRAM**

RACK700  
WITH HEADER STICKERS

**GET NOTICED**

Benefits of the retail program... We know you love our product, now let us help you display it. Now you can display all of your Install Bay polybag bulk products on custom, free-standing displays. These black, powder-coated metal racks look great in any environment. They are sturdy, but lightweight and easy to move around the retail area. The familiar Install Bay logo is placed on top with metal pegboard holes on the display section for easy placement of all bag sizes.

With two sizes available, these displays will meet your needs for offering a full range of Install Bay products. The smaller RACK700 is 20" wide by 72" tall with a display area of 20" x 49". The larger RACK750 is 40" wide by 78" tall with a display area of 40" x 59". Organized neatly in one spot, generating more sales with these everyday products is great for the bottom line!

**MIX & MATCH**

Make your own planogram...Have dedicated racks for specific part categories or mix it up. Now you can use these displays by themselves, use multiple racks in different areas around the store, or build a massive parts center with a large display in the center flanked by the smaller ones. Set up each rack as it's own category for easy product placement or build it over time starting with one rack - It's totally up to you!

SLATWALL WITH FOAMBOARD HEADER

RE-SEALABLE RETAIL POLYBAGS!

**HOW IT WORKS**

- Step 1:** Select the Install Bay rack size that works for your store.
- Step 2:** Order your desired Install Bay parts.
- Step 3:** Set it up & take a picture! Send it to your IB representative - we would love to see it!

Custom displays are more important than ever for today's retailers. Studies show that about 70% of all brand purchase decisions are made in-store and that in-store sales have increased as much as 65% when custom display materials are used. The study also compared sales of one brand that consistently uses stock materials to another that uses custom displays. The custom display delivered a 28% sales lift while the standard materials generated only 13% - a 2:1 advantage!

The FLEXO® Original braided from 10 mil polyethylene terephthalate (PET) monofilament yarns. The material has a wide operating temperature range, is resistant to chemical degradation, UV radiation and abrasion. Used in electronics, automotive, marine and industrial wire harnessing applications where cost efficiency and durability are critical.

- Economical and easy to install
- Resists gasoline, engine chemicals and cleaning solvents
- Expands up to 150%
- Cut and abrasion resistant
- FMVSS 302 approval

**PROTECTION PAINT TAPE**

**IB50530** 14" X 220 YDS **EA**  
 tesa Bodyguard® 50530 PV3 is the best protection solution for freshly painted car bodies. Applied after the painting process, tesa Bodyguard® 50530 PV3 provides reliable protection for painted surfaces susceptible to damage. Due to the good UV-resistance and perfect paint compatibility, tesa Bodyguard® 50530 PV3 is the most reliable way to protect cars during the transportation process.

- Reliable protection
- Secure adhesion during transport
- Cost savings as polishing or repair after demasking is eliminated
- Paint protection during outdoor storage up to 12 months
- Easy to apply and remove
- Easy disposal - both the film and the adhesive system are environmentally friendly

**INTERIOR PROTECTION TAPE**

**IB51136** 9.5" X 72 YDS **EA**  
 tesa® 51136 is a self-adhesive polyethylene tape with an acrylic adhesive for masking large areas of plastic parts during professional painting processes. The color of the tape provides a good contrast to dark surfaces making for easier and faster positioning. Furthermore, tesa® 51136 is an interior protection tape for slightly structured surfaces. tesa® 51136 PV2 is a higher adhesion version for rough surfaces and carpets.

- Masking during painting applications
- Protection of various surfaces against dirt and damage

**PREMIUM INTERIOR HARNESS TAPE**

**IB51608** 3/4" X 82.5' **8/SLV**

tesa® 51608 is the universal tape for wire harness bundling in the passenger compartment. It combines important features as noise dampening, abrasion resistance, and bundling strength while keeping harnesses flexible supporting an easy harness assembly process at the OEM. tesa® 51608 a PET fleece wire harness tape with a rubber based adhesive that is optimized for manual application.

- Flexible and smooth
- Tear resistant
- Stable unwind force
- Age-resistant
- Strong adhesion
- Hand-tearable

**TRANSPARENT DOUBLE SIDED TAPE**

**IB4965** 12MIL X 80' **EA**

Double-sided tape with high shear and temperature resistance. tesa® 4965 is a flagship product with the tesa portfolio! This product is comprised of a polyester backing coated on both side with a transparent modified acrylic adhesive.

- Reliable bonding, even to low surface energy substrates
- Very high bonding strength immediate right after assembly
- Applicable for most the demanding applications those including heavy stress, high temperatures or critical substrates

**DOUBLE SIDED PE-FOAM MOUNTING TAPE**

**IB62934** 1" X 50 M **EA**

tesa® 62934 is a double-sided PE-foam tape for constructive mounting applications. It consists of a highly conformable PE-foam backing and a tackified acrylic adhesive.

- Versatile adhesive for high immediate adhesion on numerous substrates
- High ultimate adhesion level for a secure bonding performance
- UV, water and age resistant
- Compensates for differing thermal expansion of dissimilar materials
- High immediate bonding strength even at low bonding pressure
- Very good cold shock absorption

**EXTERIOR HARNESSING TAPE**

**IB51026** 3/8" X 82.5' **16/SLV**

**IB51036** 3/4" X 82.5' **16/SLV**

For wrapping exterior harnesses. This tape is a PET cloth wire harness tape with an acrylic based adhesive.

- High temperature resistance 150°C/3000h
- High abrasion resistance

# INSTANT CURE GLUE + ACCELERATORS

## INSTANT CURE GLUE

**MAXI-CURE1** 1 OZ.

**MAXI-CURE2** 2 OZ.

MAXI-CURE™ bonds fiberglass, hardwood, metal and rubber better than any other hobby adhesive. For gluing to the inside, cloth textured surface of fiberglass, scrape the area to be bonded with a razor blade or coarse sandpaper before using MAXI-CURE™ or any other adhesive. It also is best for bonding the tires for R/C cars.

## INSTANT CURE GLUE

**INSTA-FLEX** 1 OZ.

INSTA-FLEX™ flexible thin CA is ideal for many applications, including the installation of CA hinges. When cured INSTA-FLEX™ does not turn brittle and remains clear, even if accelerated with INSTA-SET™. It has superior shock resistance. INSTA-FLEX™ has also proven to be superior when bonding using anodized aluminum.

## INSTANT CURE GLUE

**INSTA-FLEX+** 1 OZ.

INSTA-FLEX+™ clear rubber toughened has similar Qualities to our black IC-2000™ but can be used in applications where you do not want the adhesive to be seen. The carbon components of IC-2000™ that gives the CA its black color also contributes to its unsurpassed strength. When esthetics are important and a flexible bond is required, INSTA-FLEX+™ is your best choice. It forms superior bonds to soft urethane and vinyl plastics.

## INSTANT CURE GLUE

**IC-2000** 1 OZ.

IC-2000™ is a rubber-toughened cyanoacrylate that forms superior shock resistant bonds on non-porous surfaces. The black colored CA has added flexibility for the bonding of metals, fiberglass, rubber, carbon fiber and other materials.

## INSTANT CURE GLUE

**IC-GEL** .7 OZ.

IC-GEL™ is a cyanoacrylate paste that is extremely thick which comes in an applicator tube like toothpaste. It has the same bonding and curing time characteristics as MAXI-CURE™; IC-GEL™, however, can be applied to a vertical surface and will stay in place. IC-GEL™ is excellent putty for plastic models. It will fill any void and can be formed to many shapes. Applying Insta-Set allows IC-GEL™ to be sanded or filed to final shape in less than 20 seconds.

## INSTANT CURE GLUE

A higher viscosity CA for loose fitting joints in which the adhesive must bridge gaps. Normally, the thicker CA is applied to one surface and then the parts are held tightly together for about 5 to 15 seconds.

**INSTGL2** 2 OZ. EA

**INSTGL4** 4 OZ. EA

**INSTGL8** 8 OZ. EA

**YORKER2** CA CAPS FOR ALL .5 OZ., 1 OZ. AND 2 OZ. BOTTLES 12/PK

**YORKER** TOP FOR INSTGL8 EA

## ACCELERATORS

**INSTAC** INSTANT SET ACCELERATOR 2 OZ.

Accelerator for quick curing of cyanoacrylates results in fast drying times and strong bonds between materials and surfaces of all kinds.

## UN-CURE™

**INSTAUN** 1 OZ.

Debonder will soften cured CA. If parts are bonded incorrectly or your fingers are stuck together, a few drops of UN-CURE™ will dissolve the CA in about a minute. Apply on bonded skin and roll apart fingers. Once unstuck, use acetone to clean off softened CA, then wash off with soap and water.

## ACCELERATORS & GLUE

Accelerates Super Glue cure time. Best working accelerator for ZAP and all other super glues you'll find! Sets in just a few seconds.

**PT-50** KICKER CA GLUE ACCELERATOR 5 OZ.

**PT-15** KICKER CA GLUE ACCELERATOR 2 OZ.

**QUICK-CURE 9 OZ.**  
 Epoxy cures to a slightly flexible consistency. This lack of brittleness allows it to form a lasting bond in areas subjected to high vibration or stress. QUIK-CURE™ shouldn't be used in areas that are subject to long-term immersion in water; however, it works fine for the internal structure of wood framed boats. QUIK-CURE™ is our only epoxy on which you can apply polyester resins. It can be mixed with microballoons to form a quick setting putty. Items bonded with QUIK-CURE™ can be handled after 15 minutes. Full strength is reached in 1 hour.

## GET NOTICED

Now you can display all of your Install Bay Wire Spools on a custom free-standing display. This black powder-coated metal rack looks great in any environment. It is sturdy but lightweight and easy to move around the retail area. The familiar Install Bay logo is displayed on top by a foam board custom diecut header.

Keeping your wire spools organized neatly in one spot, generating more sales is great for the bottom line! Custom displays are more important than ever for today's retailers. Studies show that about 70% of all brand purchase decisions are made in-store and that in-store sales have increased as much as 65% when custom display materials are used. The study also compared sales of one brand that consistently uses stock materials to another that uses custom displays. The custom display delivered a 28% sales lift while the standard materials generated only 13% - a 2:1 advantage!

5-Way and 4-Way pins allow for the transfer of power for the lighting as well as auxiliary functions such as an electric trailer brake controller, backup lights, or a 12V power supply for a winch or interior trailer lights. Choose a connector that has the required number of pins for the functions required for your trailer.

Connector	Function	Color	Suggested Minimum Wire Gauge		Where to Attach Vehicle Side	Where to Attach Trailer Side
			4-Way & 5-Way	6-Way & 7-Way		
5-Way	Right Turn	Green	18	16	Right turn of vehicle's wiring harness	Trailer's right turn signal
	Left Turn	Yellow	18	16	Left turn of vehicle's wiring harness	Trailer's left turn signal
	Ground	White	16	12	Vehicle ground point: metal & uncoated	Trailer ground point: metal & uncoated
	Tail/Marker	Brown	18	16	Tail light of vehicle's wiring harness	Trailer's tail lights
	Brake	Blue	18	12	Electric brake control, power for brakes	Break away switch

This chart is a typical guide, wire colors may vary based on manufacturers. Use a circuit tester to verify connections.

**4-WAY ALL COPPER TRAILER WIRING PLUG**

4-Way connectors allow the basic hookup of the three lighting functions (running, turn, and brake lights) plus one pin is provided for a ground wire. Most standard light duty trailers will use a 4-pole flat connector.

**NEW IBTH4P** 18GA 5PK

**5-WAY ALL COPPER TRAILER WIRING PLUG**

5-Way connectors allow the basic hookup of the three lighting functions (running, turn, and brake) and, besides the ground, one pin is available to provide support for another function. Typically the 5-Way Flat is used for trailers with surge brakes or hydraulic brakes.

**NEW IBTH5P** 18GA 5PK

**ALL COPPER TRAILER HARNESS**

The IB80 handles 80 amps continuous and 150 amp surges. Perfect for "show systems" utilizing lighting and motorized enhancements.
- IB200** 200 AMP RELAY, IP67 RATING **EA**  
Handles 200 amps continuous and 300 amp surges. Durable weatherproof construction. A must for multi-battery systems, allows for longer battery life and control over which battery is being used. Great for isolating second battery in boats making it dedicated only to the stereo system. Keeps primary starting battery from being drained to the point of stranding you in the middle of lake, river or ocean. Unlike dual battery isolators, the IB200 does not create any voltage drop to the secondary battery.
- IB500** 500 AMP RELAY, IP67 RATING **EA**  
Handles 500 amps continuous. Durable weatherproof construction. A must for multi-battery systems, allows for longer battery life and control over which battery is being used. Great for isolating second battery in boats making it dedicated only to the stereo system. **IB59001** 13 INCREMENTS FRACTIONAL: 1/8" - 1/2" **EA**  
 Double fluted design eliminates skidding and makes for easier resharpening. Also features laser etched hole sizes, anti-skid tip and drill points so there is no pilot hole needed. Works with most metals.

SKEWDRIVER

**SKEWDRIVER PRO®**

**HW-9001** **EA**  
 The Skewdriver® is a bevel gear offset screwdriver that uses the rotary handle action of a regular screwdriver to access awkward and hard to reach places. The sturdy removable hollow handle allows use with any cord free 1/4" drill and acts as a handy storage for bits.

**OFFSET HI-SPEED HEAD**

**HD-105** HEAVY DUTY 105° OFFSET HI-SPEED HEAD **EA**  
 Here's the same award-winning design as our smaller 105° head, but made for heavy-duty power units. Rated at more than 500 in/lbs of torque/2000rpm. It lets you get your power unit into tight spots with drills, spade drills, grinders, buffers, nuts and screws. Heavy-duty die-cast construction with high capacity hardened gears and rings. It permits use with all 6.3mm (1/4") cordless drivers (maximum performance 57nm at 2000 rpm). Its 12-position locking stabilizer arm provides ergonomic control. Made in the USA with a lifetime warranty.

# TESTERS + GENERATORS + PROBES + MULTIMETERS

## HANDY CIRCUIT TESTER

**IB25600** EA  
Hooded probe protects your fingers and automatically centers the wires. Small size allows easy use even in the tightest places. Works up to 28 volts.

## CIRCUIT TESTER

**IB27450** COMPUTER SAFE EA  
Works without damaging sensitive electronic components. Safe for use on 12 volt automotive computer circuits. Tool draws less than 21 M.A. at 12 volts D.C. With an operating range of 3-12 Volts.  
• Red glow - positive  
• Green glow - negative

NAVONE  
ENGINEERING

## STONE GENERATOR

**IBN-899** EA  
Will quickly help you isolate noise problems and locate the correct speaker wires in a car. Runs on a single 9v battery and has both RCA and alligator clipped outputs.

## TEST LIGHT / CIRCUIT TESTER

**3410** EA  
Helps to quickly identify if there is voltage present on wiring and circuits. Ergonomic grip design with 6-foot test leads.

Transparent handle shows bright LEDs to identify connections:

- Green = Ground Present
- Red = Voltage Present

## PISTOL & VOLT PROBE

**76600** HI-VIS VOLTPRO CIRCUIT TESTER EA  
High visibility, simple to use, one handed dynamic voltage testing. Indicates power and grounds. Test the circuit's ability to deliver current and identify loose, corroded or broken wires. Capture intermittent spikes or drops in voltage. Take voltage snapshots in any mode, any time.  
• Dynamic voltage drop testing • Computer safe  
• Power and ground LED indicators • Voltage snapshot  
• Min/max glitch capture

## AUTO-RANGING DMM

**3320** 10 MEGOHM/WL EA  
Auto-Ranging™ scales eliminate the need to dial in the correct range when making electronic measurements. 10 MegOhm input impedance for safe automotive and household uses. Large digital display. Single-setting resistance function for voltage (AC & DC). Color-coded LED's display battery quick check. Protective rubber corner guards for drop protection. Includes attachable test leads, holders and stand.

## PHASE TESTER

**EA-PT9A** EA  
The PT-9A allows the install technician to verify the absolute phase of each speaker in the system, both individually and as a group. Features a built-in microphone and comes with a test CD that includes in polarity and out of polarity pulses (in addition to 11 other useful test tracks). Adds a built in pulse generator for both speaker level and low level connections directly to a component (speaker amplifier, signal processor, etc). The PT-9A also comes with a protective carrying case and test leads.

## MANUAL MULTIMETERS

**NEW MM300** MANUAL RANGING EA  
• Measures up to 600V AC/DC voltage, 10A AC/DC current and 2MΩ resistance  
• Tests batteries, diodes and continuity  
• CAT III 600V safety rating

## AUTO MULTIMETERS

**MM400** AUTO RANGING EA  
• Measures up to 600V AC/DC voltage, 10A AC/DC current and 40 MΩ resistance  
• Measures capacitance, temperature, frequency, duty-cycle, and test diodes and continuity  
• CAT III 600V safety rating

## G.D.I. Tools VINYL AND TINT ACCESSORIES

**TINT SLIME**  
**GT2013** TINT SLIME APPLICATION FLUID **EA**  
 Tint Slime is a window tint mounting & cleaning solution. Tint Slime can be used to install automotive window tint, paint protection film, flat glass film and vinyl. Tint Slime is free of particulates and won't separate. Tint Slime is safe for use on interiors, biodegradable, and of course, tint safe. Concentrate, mix 1 ounce per 1 gallon of water.

**SPRAY BOTTLE**  
**GT090** SPRAYMASTER BOTTLE AND TRIGGER **EA**  
 An overall heavy duty sprayer, this spray bottle comes with a 5 year warranty and is chemically resistant. It is equipped with a strong trigger and holds 32 ounces.

**RAPIDTAC II**  
**GT1041** CLEANER & APPLICATION FLUID **32 OZ**  
 For wet application of decals, graphics and film. Formulated for intermediate, calendared and specialty films. Great for cold applications. Aids in application problems such as bubbles, wrinkles, repositioning, dirty surfaces and rough weather conditions. Not for use with acrylic with flame polished edges.

**MANGO SMART CARD**

**GT2005** WITH FELT EDGE **EA**  
 Smart Cardz are the modern version of the hard card squeegee but they're better because they are 25% wider and their tapered tip, comfortable grip, great flex and thin squeegee edge make it the smartest tool in your apron! Smart Cardz feature a grip-handle molded right into its body so they're easy to manipulate. The felt edge makes this the perfect tool for paint protection, vinyl signs and graphics.

**GT1085** WITH FELT EDGE **EA**  
 This four pack applicator set includes the Mango Rebel, Bump Card, Smart Card and Little Foot all with extreme glide felt edge making them perfect for paint protection, vinyl signs and graphic installs.

**UNGER (SCREW) HANDLE**

**NEW GT050A** PRO HANDLE **EA**  
 Will hold any 5 inch squeegee.

**FUSION GRIP HANDLE**

**NEW GT1047** PRO HANDLE **EA**  
 Designed to optimize your leverage in removing mounting solution. Great for high performance automotive films and smaller residential windows. Will hold any 5 inch squeegee.

**4" BUMP CARD**

**GT1064** WITH FELT EDGE **EA**  
 Four inch hard card with two ridges or "bumps." One edge is wrapped in felt.

**DIAMOND CARD**

**GT1025Y** REBEL YELLOW DIAMOND CARD **EA**  
 A hybrid of the bump card and Diamond Tip. Great as an applicator to use as a trim guide on flat glass. Rebel has a unique diagonal shape, reaching corners easily. The parallel grip ridges makes holding on to the Rebel easy.

**WET EDGE SQUEEGEE**

**GTWES** **EA**  
 Wrap your vehicles faster and better. The only squeegee applicator made to use wet. No scratches, no marks, just smooth motions that easily glides across vinyl films and painted surfaces without worry of mistakes or damage. The Wet Edge™ Squeegee is a Teflon squeegee with a unique microfiber bonded to it. Can be used either wet or dry. This is the top of the line applicator in the business. Colors will vary.

**6" BLOCK SQUEEGEE**

**GT148** **EA**  
 Combination squeegee/hard card used for finishing during film installation. Can be cut to various angle shapes to reach tight sharp corners.

**GASKET PUSH STICK**

**GT194** **EA**  
 The Gasket Push Stick is a tinter's favorite. Sometimes called a Dog Bone, this tool is used for pushing down door window gaskets to assist in film installation on roll down windows.

**FIRM FLEX**

**GT200GLD** EZ REACH ULTRA GOLD FIRM FLEX **EA**  
 Stop cutting down hard card squeegees and use this versatile tool instead. These triangular cards with flat edges are perfect for putting down those little corners of film in hard to access areas.

**FOOT SQUEEGEE**

**GT044BLUE** BLUE LITTLE FOOT SQUEEGEE **EA**  
 This squeegee measures about 6" (15 cm) along the usable edge. The pointed edge of this tool allows the installer to squeegee in very tight areas. The Little Foot has plenty of room to keep a good grip on the squeegee.

**G.D.I. Tools** APPLICATION + REMOVAL

**THE CONQUERER SQUEEGEE**

**GT202** EA  
The Conquerer is the original corner reach tool. Features a soft squeegee blade along one edge and point hard card tips on the ends making it a versatile staple to any tool kit.

**HAND SQUEEGEE**

**GT117B** BLUE MAX 5" EA  
Ideal for installing security film.

**SQUEEGEE BLADE**

**GT203** SUPER CLEAR MAX SQUEEGEE BLADE EA  
Softer version of the Blue Max Squeegee, more flexible for back window installations.

**SLIP TAPE**

**GT2021-4** 3/4" X 4YD ROLL  
Slip Tape is the ultimate product for making your application squeegees smoothly and safely glide across window film, paint protection, and car wrap and vinyl graphic applications. No more tearing or scratching the material you are working with.

**STROKE DOCTOR SQUEEGEE**

**GT1022** EA  
This handled squeegee allows you to reach areas behind brake lights and lower rear windows.

**GT1022B** STROKE DOCTOR REPLACEMENT BLADES EA

**4" BUFFER SQUEEGEE**

**GTSQBUFF4** EA  
Sold individually, these pre-cut buffers fit any standard 4" squeegee. They are far superior to standard felt strips and will help prevent scratches to the wrap material during installation. Give your hard plastic squeegees a soft and smooth side with the Squeegee Buffer Strip. Note: This buffer comes with a self-adhesive back that should stick to any flat squeegee surface.

**SOOPER CLIP**

**GTSC50** 50/PK  
Keeps vinyl and print media properly wound. Simple on/off design with finger hole pull design. Durable plastic design for longest life and ease of use and doesn't scratch or leave marks on your delicate rolls.  
• 25 large and 25 small

**GO DOCTOR BLUE SQUEEGEE**

**GT2056B** EA  
A fully integrated squeegee system where all of its components have been designed together, to work together. The I-beam handle fits comfortably in your hand and is wrapped with a comfortable, non-slip material that provides secure grip. Go Doctor's unique frame construction was specifically designed to transfer more of your energy to the blade's point-of-contact for greater efficiency and reduced installer fatigue.

**3M SQUEEGEE**

**GT079** 4" 3M GOLD SQUEEGEE EA  
**GT080** 4" 3M BLUE SQUEEGEE EA

**YELLOW TURBO BLADE**

**GT147** 18 1/2" SQUEEGEE REPLACEMENT BLADE EA

**RIVET BRUSH**

**GTRB** EA  
Made of stiff bristle synthetic fiber, the rivet brush for fleet graphic installers helps form flexible cut and printed vinyl over the rivet surface.

**XTREME MAGNET**

**GTXMH EA**

These handy body magnets make applying vinyl and vehicle wraps faster and easier by acting as another hand to hold the material. You can also use them in the place of masking tape or pre-mask to position the material on the vehicle. Xtreme Magz are 1-5/8" in diameter and come with the magnet completely covered with a super-soft rubber coating to eliminate any damage to the vehicle, graphics or sign substrates.

**INSTALLER'S PRIMER PEN**

**GTIPEN EA**

Introducing the Adhesive Primer 94 Installer's Pen (IPEN), the world's best application tool specifically designed using Primer 94. The Installer's Primer Pen is easy to keep in your tool pouch, pocket or tool box. Fast and easy to use on all your applications that require precise application of Primer 94. Works with any brand of vinyl film and can be used anywhere Primer 94 is required.

- Durable aluminum construction casing
- 2 extra tips included
- The easiest way to apply adhesive primer

**BUBBLE POPPER PEN**

**GTBPOP EA**

The Bubble Popper Pen is a must have tool for any vinyl graphics installer or car wrapper. This pen is the right tool for the job and it is easy to hang on to since it clips to your shirt pocket like a "ball-point pen". The needle point offers an ultra-sharp round tip that retracts and extends just like a "ball point pen". This tool is used to put a pin hole (never a knife slit) into your vinyl, printed graphics or car wrap where a bubble or rivet might be to release the air and flatten the film graphic on to the substrate.

**WHITE SCRUB PAD**

**GT085 EA**

Great for cleaning windows prior to installation.

**LIL' CHIZLER HARD CARD**

**GT083 EA**

Ideal for removing decals, film or adhesive from sensitive surfaces. Use for pressing down small film creases or air bubbles.

**EMBLEM REMOVAL TOOL**

**GTER1 EA**

The ERI Emblem Removal Tool is the fastest and easiest way to remove vehicle emblems and logos from a vehicle. This tool is used before the vehicle wrap/vehicle graphic application to remove emblems and logos and badges from your vehicle. The handles feature a "loop-lock" no-scratch cutting cord that locks into the handle. The reusable and replaceable cutting cord allows you to cut through the automotive grade adhesives used on vehicle emblems and logos without risk of damaging vehicle paint. Each ERI comes with 100 replaceable cords.

**RAPID REMOVER**

**GT1039 32 OZ**

A non-toxic, water-soluble adhesive remover that breaks down and removes adhesive fast.

**PLEXUS PLASTIC POLISH**

**GT176 130Z**

Anti-static plastic polish- safe for all window films. Leaves behind a protective sheen on any plastic surface.

**BLACK OUT TAPE**

**GT157 1/2" 150' ROLL**

Used to hide light gaps.

GT109

GT138

### SCRAPERS

**GT109** 1" CLIP SCRAPER **EA**  
This effective scraper will accommodate standard or stainless steel single edge blades.

**GT138** HEAVY DUTY 1" RAZOR SCRAPER **EA**  
Retractable safety scraper, intermediate blade position keeps the blade from sliding out while in use.

### GLASS EDGE TRIMMER

**GT944** AUTOMOTIVE GLASS EDGE TRIMMER **EA**  
Use along the top edge of roll down windows for a precise "micro-edge" finish (1/8").

### PLASTIC RAZOR BLADES

**GT139P** 1" PLASTIC BLADES **100 PK**  
Perfect for removing adhesive and leftover film from surfaces that can be easily damaged, such as rear window defrosters or other sensitive glass surfaces.

### SNAP BLADES

**GT116** OLFA AB-50S STAINLESS STEEL **50 PK**  
The industry standard when it comes to snap blades for film and pattern cutting. Thirteen cutting edges per blade. Use in most standard duty knives.

GTWCKNIFE

GTWCBLADE

### WRAP CUT LINE KNIFE

**GTWCKNIFE** THE ULTIMATE VEHICLE WRAP KNIFE! **EA**  
The Wrap Cut Knife by Image 1 Impact is made specifically to cut through just the liner side of any pressure sensitive vinyl graphic and wrap film. This knife will only cut through the paper release liner of the vinyl, so there is no more risk of damaging your film or adhesive or cutting through the film side of your vinyl while on its backing paper. This knife will leave no marks or cut lines in the film when used properly. Don't be fooled by look-alike imitators, The Wrap Cut Knife by Image 1 Impact is made with a solid steel shaft with a special Teflon coating on the bottom surface to protect the vinyl and adhesive. This Teflon coating allows the knife to slide across the adhesive side of the vinyl, giving you a clean and easy cut through the release liner. Use while film is on the vehicle, boat, etc. or while on the cutting table inside the shop. This knife works anywhere and is compatible with most adhesive types and all brands of pressure sensitive vinyls and release liners.

**GTWCBLADE** REPLACEMENT BLADES **10/PK**  
FOR WRAP CUT KNIFE

### APRON

**GT176** WAIST APRON **EA**  
Heavy duty waist apron for easy access to tools while on the job.

### RED DOT KNIFE

**GT027** NT PRO A-1 RED DOT KNIFE **EA**  
Regarded by many installers as the finest professional knife available. The blade can be advanced in 1/2" segment increments for precision control. Right or left handed use.

### KNIFELESS TAPE

**GT2017** FINISH LINE KNIFELESS TAPE **EA**  
1/8" X 50M (164')

The knifeless tape has a high strength filament that acts as the cutting device. The tape/filament is laid out on the vehicle and the bulk vinyl material is installed over the tape/filament. Then, the filament is pulled through the material leaving behind the desired design. The edge is clean and sharp just like a knife cut but without the risk of cutting the paint.

### GLOVES

**GTWGI** WRAP GLOVES **PAIR**  
The vehicle wrap glove is sold in pairs and is a must have for anyone installing vinyl graphics and vehicle wraps. Installing with your bare hands can cause over stretching and puckering of the vinyl as well as potential damage from the transfer of oils on your skin. These lint free and durable Wrap Gloves reduce friction while handling the material and give you great results every time.

# SOUND DAMPING

INSTALLATION HARDWARE

# SOUND DAMPING

## InstallBay™

INSTALLATION HARDWARE

Ballistic is a proprietary butyl rubber composite with an aluminum constraining layer for vibration damping. Designed and engineered in the United States, Ballistic is extremely efficient at converting vibration to thermal energy. This unique formula allows the material to easily conform and adhere to sheet metal and most other hard surfaces.

**SIZE MATTERS**

Ballistic Sound Damping Material is thicker and has more mass per ft<sup>2</sup> than any other damping product available. Ballistic is up to 30% thicker than the other guy's stuff. And we all know, the thicker material and more mass per ft<sup>2</sup> the more effective the product will be at eliminating road noise and vibrations.

**NO SMELL**

Most sound damping materials smell like a road paving project! Ballistic is specifically designed to eliminate this odor problem without sacrificing effectiveness. Don't just take our word for it, pick up the other guy's stuff and take a big whiff.

**STICK IT & FORGET IT**

Ballistic's revolutionary adhesive - Perma-Stick makes it easy to apply Ballistic material to almost any surface. Humidity and temperature extremes can play havoc on inferior sound damping. Perma-Stick's chemical make up is designed specifically to work in the harsh automotive environment.

**BALLISTIC HOLLOW POINT** KITS

Ballistic Hollow Point is a unique butyl rubber composite with an aluminum constraining layer for vibration damping. Ballistic Hollow Point is developed to deliver incredible performance at entry level price point. The light weight construction allows the material to stick great and work in a variety of applications.

**SIZE MATTERS**

Ballistic Hollow Point is the perfect synergy of weight, performance and cost. Ballistic Hollow Point still delivers more mass per ft<sup>2</sup>. The use of Ballistic's proven virgin butyl composite guarantees a significant improvement in reducing road noise and vibrations.

**NO SMELL**

Most sound damping materials smell like a road paving project! Ballistic is specifically designed to eliminate this odor problem without sacrificing effectiveness. Don't just take our word for it, pick up the other guy's stuff and take a big whiff.

**STICK IT & FORGET IT**

Ballistic's revolutionary adhesive - Perma-Stick makes it easy to apply Ballistic material to almost any surface. Humidity and temperature extremes can play havoc on inferior sound damping. Perma-Stick's chemical make up is designed specifically to work in the harsh automotive environment.

**HOW DOES BALLISTIC WORK?**

The image above represents a typical door speaker installed in your car. The road noise and vibrations cause the speaker to distort and alter your music. Once Ballistic is applied, the unwanted road noise and vibrations are converted into thermal energy. With Ballistic applied speakers are installed on a solid reinforced mounting surface. The result is speakers are able to perform as they were originally designed, so you experience more music and less noise.
