- 5mm keying system
- Hidden Pin™ technology reduces picking risk
- T-Bar™ locking technology attaches to standard Kensington
5mm Keying System

Why a Physical Security Policy is Integral to GDPR Compliance

GDPR requires organisations to apply sound security practices to electronic and paper-based data and, in the case of a data breach, notify affected or potentially affected individuals. The GDPR's reach extends globally to all organisations that control or process personally identifiable data about people in the EU, regardless of the geographic footprint of those organisations. GDPR requirements apply to both electronic and paper-based personal data and means that all organisations should address GDPR requirements if they handle EU-originated personally identifiable data.

Securing data against hacking and malware is rightly top of mind for many organisations, however many fail to adequately address the physical security of IT hardware. More than half fail to use a physical lock for IT equipment.** This puts organisations at risk for non-compliance with GDPR and data subjects at risk from fraud and identity theft.

GET GDPR COMPLIANT*

To find out more about Kensington's solutions for supporting GDPR compliance, go to www.kensington.com/en-gb/gdpr

* Laptop security locks and privacy filters support GDPR Compliance

Custom Keyed Solutions

Custom Keyed Solutions are the most popular option for any business or institution. They give you more control over equipment while safeguarding employees from laptop and data theft. Choose from one of the distinct options for the kind of access and control that is right for you:

Master Keyed
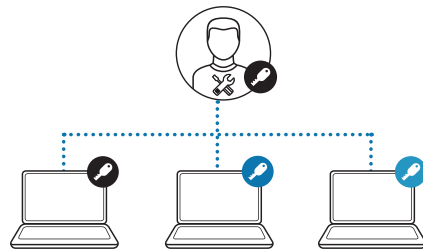

Unique, individual keys and locks for devices; master key opens all locks. Allows individuals access to own equipment while IT manager has control of all the equipment and data.

Single Keyed
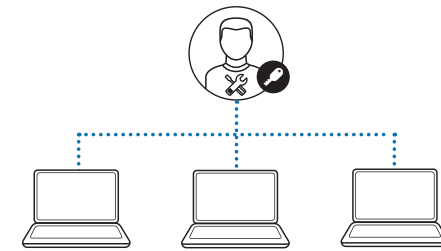

All locks are alike; only one master key will open locks. No individual keys provided. Designed to reduce risk in classroom, lab, or library environments. Computer can be locked in place with IT manager access only.

Like Keyed
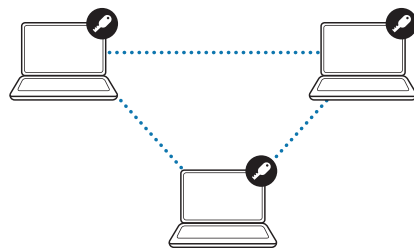

All locks are alike; all users can open all locks. The ideal solution for companies where the risk of internal theft of data and devices is low. All employees have access to all devices.

Master Coded
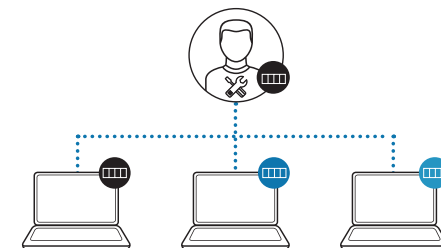

Combination locks are ideal for field based staff or remote locations where keyed locks aren't practical. ClickSafe® Master Coded locks allow users to set their own unique combination code. Administrators can overcome the users code using a ClickSafe® ComboGenie.

K-Fob™ Smart Lock

Adjustable Arms

Best-in-class docking with next generation locking

Kensington delivers two game-changing 2-in-1 locking and docking solutions.

Both docks utilise keyless K-Fob™ Smart Locking Technology to keep your device secure.

LD5400T Thunderbolt™ 3 Docking Station with K-Fob™ Smart Lock

AA463759 Single User
