# Physical Security for Dell Client Systems

**41%**

of data breaches  
are caused by  
hacking, malware  
& physical device  
loss<sup>1</sup>

**85%**

Reduction in  
laptop theft  
when physical  
security is well-  
implemented<sup>2</sup>

**Advantage:**  
On-site IT control with individual user keys.

**Ideal for:**  
Upgrades, relocation, replacement or misplaced/lost keys - IT managers can use the Master Key to lock down a device when left unlocked to improve user compliance.

Register & Retrieve™

[www.kensington.com/register&retrieve](http://www.kensington.com/register&retrieve)

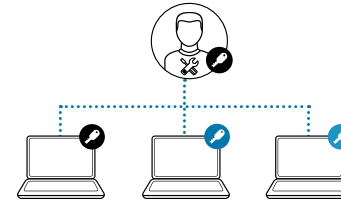

The industry-leading Register & Retrieve™ Lock Management Portal is a smart cloud-based platform for the management of all Kensington locks, combination codes and fobs.

Providing IT managers and users with individual accounts and on-demand access to support services, the simple registration process helps ensure records stay up to date following personnel changes and offers free key / fob replacements.

Sources: 1. 2018 Data Breaches - Privacy Rights Clearinghouse. 2014. 2. Kensington, Survey: IT Security & Laptop Theft, 2016

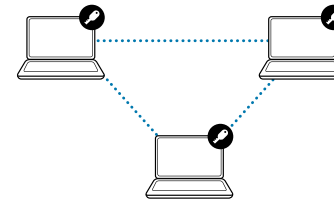

**Master Keyed**

**Admin Access with User Keys**  
The Kensington Master Keyed locking system gives IT administrators universal access to unlock any piece of equipment with a master key while allowing employees to carry their own individual locks and keys. This gives employees the power to protect their laptops with personal locks that can be used anywhere in the office or on the go.

**Like Keyed**

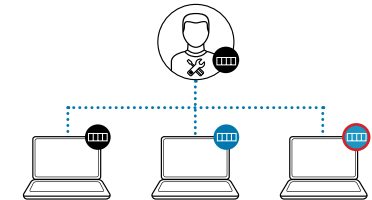

**Each Key Opens Every Lock**  
Provide wider flexibility and freedom to access equipment by offering a department, office or lab identical shared keys. This solution offers a solid layer of security against non-employee theft without restricting employee access and productivity, making efficient use of department budgets.

**Single Keyed**

**Admin-Only Access**  
Implement high-level, convenient on-site security by physically securing company equipment using identical locks with keys that are restricted to IT staff. One master key opens them all, giving the IT manager ultimate control and access.

**Master Coded**

**Admin Access with User Combination**  
Combination locks are ideal for field based staff or remote locations where keyed locks aren't practical. ClickSafe® Master Coded Locks allow users to set their own unique combination code. Administrators can overcome the users code using a ClickSafe® ComboGenie.

## Privacy Screen Filter Selector

[www.kensington.com/protectmyscreen](http://www.kensington.com/protectmyscreen)

We've taken the pain out of finding the right solution with our Privacy Screen Filter selector. Narrow down the options by choosing the manufacturer, device type or just enter the device model.

### Why Biometric Authentication?

As physical features such as fingerprints and pupils are so difficult to forge, biometrics is a strong security solution, though we see biometrics as part of a comprehensive security solution that might also include a password and/or physical devices such as a key, card or token.

In the workplace, biometrics can be part of a strong security protocol for access to internal systems, files, information and data. It can be as simple as touching a finger or looking into a camera lens.

**DID YOU KNOW?**

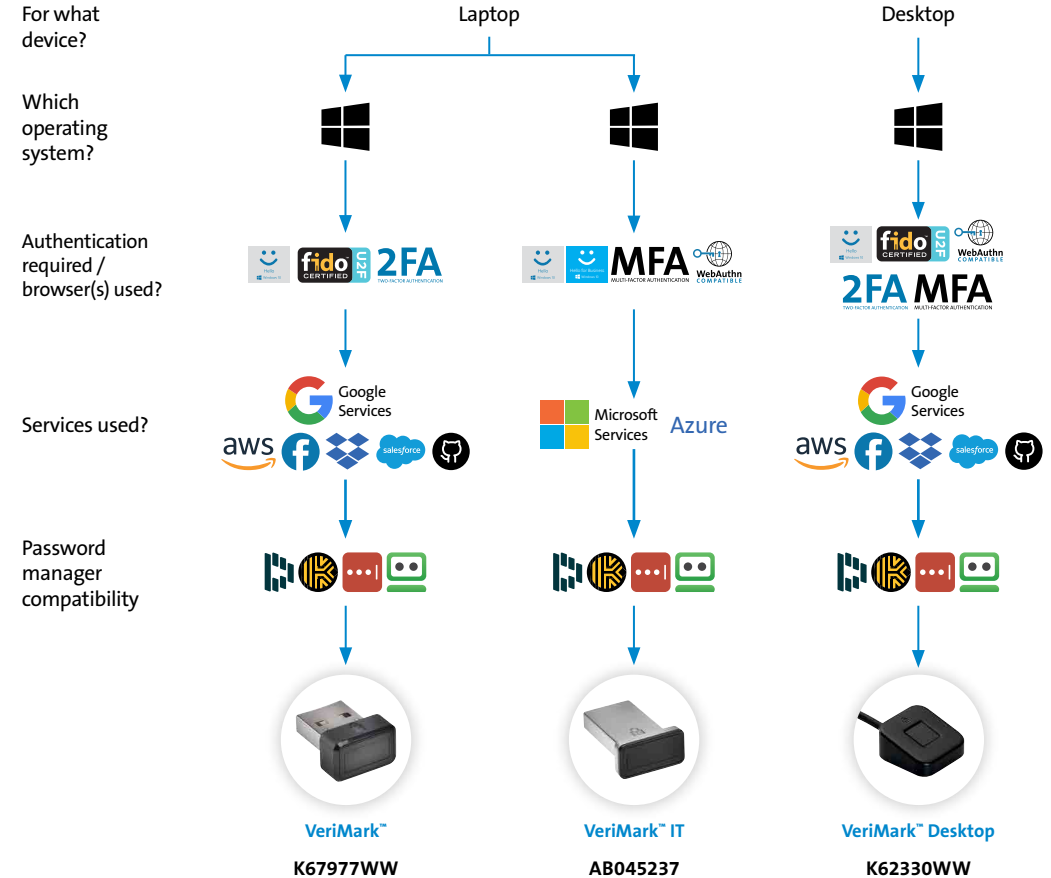

**81%** of **hacking-related breaches** leveraged either **stolen and/or weak passwords**

2020 Verizon Data Breach Investigation Report

**DID YOU KNOW?**

**Multifactor Authentication (MFA)** blocks a staggering **99.9%** of **enterprise account hacks**

2019 Microsoft Study

The **Advanced Encryption Standard (AES)** is a security specification established by the National Institute of Standards and Technology (NIST) in the early 2000s. When used with wireless technology, it encrypts the packets of data before they're sent from the device. This is called end-to-end encryption, and it ensures that your data remains safe at all points during transit. AES encryption is a necessity for any business relying on wireless input devices. Fortunately, we've got you covered with everything you need.

**AB684350**  
Pro Fit® Ergo Wireless Mouse - Left-handed

**AB179810**  
Pro Fit® Ergo Wireless Mouse - Right-handed

**K75502UK/DE/FR/ES/IT/PN/WW**  
Multi-Device Dual Wireless Compact Keyboard

**AB179790**  
Pro Fit® Ergo Vertical Wireless Mouse - Right-handed

Combine the ergonomic benefits of raising your screen height with the technological benefits of increased air circulation for your laptop. The sleek 2-in-1 design is height and angle adjustable to improve posture, promote proper eye alignment and support neck and shoulder comfort while keeping the laptop's internal components cool. Anti-slip foot pads prevent the stand from sliding forward, padded inserts provide a secure fit for your device, and the slim foldable design is made for travel. Use with an external keyboard and mouse (sold separately).
