Hi and welcome to N&O #203. N&O is filled with lots of transcripts and logs submitted by a number of faithful Numbers DXers. Special thanks to JPL, Danix and Topol for the large amount of logs and transcripts. Your logs and info are greatly appreciated, so mail me what you hear !!!

The numbers scene is still very much alive and kicking. I regularly receive requests to write columns or get interviewed about the subject. Good that so many people are still following these stations. Starting this month a series of articles about the numbers stations will be published in the bulletins of the Benelux DX-Club and DX-Antwerp. The articles are in Dutch.

This month I included again an item about two Cold War stations and Maciej provided more info about the transmitter sites of the Polish numbers stations. I published some of the info already a year ago in N&O but new info is now available, so I included part of the item again in this month's edition.

So, let's start with the Cold War item.....

Cold War Radio

Der Deutsche Freiheitssender 904

Der Deutsche Soldatensender 935

Der Deutsche Freiheitssender 904

The Deutsche Freiheitssender 904 was an East German propaganda station. It was active in the Cold War, during the period 1956-1971. The station used the first bars of Beethoven's Ode to Joy as their interval signal and started each transmission with the announcement "Hier ist der Deutsche Freiheitssender 904 – der einzige Sender der Bundesrepublik, der nicht unter Regierungskontrolle steht" (Here is the German Freedom Station 904. The only station of the Federal Republic, which is not under government control").

The station was an initiative of the East German KPD, the Kommunistische Partei Deutschlands (German Communist Party) and started on 17-8-1956 on 904 kHz. DFS 904 transmitted from Burg, DDR but they tried to give the impression that they operated a clandestine station. DFS stated that it transmitted from a cellar, somewhere in the Bundesrepublik, persecuted by the State Security Forces and the police. They also stated that DFS was the only station in the Federal Republic that was not under government control. To emphasize that the station was illegally transmitting from a cellar, they even added some noise to the signal and often also a hum was added, which sounded like they were jammed by the BRD. In order to sound like a western station DFS 904's programs consisted of conversations and Western hit records like the ones that Radio Luxemburg transmitted. The music that DFS played was prohibited in the DDR. The announcers spoke with a West German accent. DFS 904 tried to get regular listeners in the BRD but most of their listeners were in the DDR.

DFS 904 was famous for its coded messages between the records, the so-called "Eidechsen", allegedly aimed at agents or underground groups of the KPD in West Germany. They were often announced as follows:

Hier ist der Deutsche Freiheitssender 904.

Achtung!

Wir bitten in wenigen Minuten um Aufmerksamkeit für eine wichtige Durchsage.

Here is the German Freedom Station 904.

Attention!

In a few minutes we ask for your attention for an important announcement.

As we know now, the announcements were not agent announcements, but yet another way to convince the listeners and the West German authorities that DFS was operating from the BRD and that the messages were warnings for secret agents of the DDR and underground groups of the KPD in the Bundesrepublik. West German authorities however soon found out that the

station was not on its territory but that it was using the transmitter site in Reesen near Burg in the DDR.

A German listener sent me several recordings of these Eidechsen. Interesting messages as you can see below ☺

*Hier ist der Deutsche Freiheitssender 904.
Achtung! Achtung!
Wir rufen den Postschaffner.
Das dritte Wort im Telegramm ist die Lösung.
Ich wiederhole.
Wir rufen den Postschaffner.
Das dritte Wort im Telegramm ist die Lösung.
Ende der Durchsage.*

This is the German Freedom Station 904.

I repeat:
Attention! Attention!.
We call night lights.
Tonight it's even darker

Attention! Attention!
We call crocodile.
Teeth grinding
I repeat:
Attention! Attention!
We call crocodile.
Teeth grinding

Besides the fact that the cost for the station was very high, the number of listeners had dropped to almost nil in 1969. Therefore the daily transmissions were shortened to three broadcasts of 30 minutes. On September 30, 1971 DFS 904 ceased its operations.

Der Deutsche Soldatensender 935

DFS 904 had a sister station called the Deutscher Soldatensender 935 (German Military Station 935). DSS 935 was an East German military propaganda station. It started on 1 October 1960 and also transmitted from Burg. On 1 June 1965 the name of the station changed to "9. Abteilung der 10. Verwaltung der Politischen Hauptverwaltung der NVA" (9th Division of the 10th administration of the Main Political Administration of the National People's Army), an impossible name for a radio station. The station closed down on 30 June 1972.

Below the DSS 935 QSL card:

See <http://www.deutscher-soldatensender.de/> for more info.

E11/ E11a

As a result of a discussion about the Polish numbers stations on UDXF this month I decided to re-publish a part of an item that was also in N&O 191. This item plus the additional info that was discussed on UDXF give a nice overview of the various transmitter sites of E11/S11a/M03.

I'd like to thank all who participated in the discussion and in particular Maciej and the people from Priyom.org for their invaluable information.

The three sites that have been found are:

- Ojca Augustyna Kordeckiego in Chotomow 52°42'94.1"N 20°88'1"E
- Pyry (Dąbrówka),Karmazynowa 1, Warszawa 52°06'42.1"N 21°01'28.8"E
- Janki-Puchaly 52°8'33.77"N 20°53'59.68"E

Interesting information about the site Ojca Augustyna Kordeckiego in Chotomow was found by Maciej. Here is a pdf describing last works done there: fence and others

<http://www.jablonna.pl/gmina/pliki/aktualnosci/2013/sierpien/obwieszczenie%20wojewody%20ul.%20Kordeckiego.pdf>

The owner of this place is Służba Wywiadu Wojskowego – SWW (Military Intelligence Service)

SWW's website en wiki: <http://www.sww.gov.pl/en/index.html>

http://pl.wikipedia.org/wiki/S%C5%82u%C5%BCba_Wywiadu_Wojskowego

Here is a dispute between MIS and local authorities http://ug.jablonna.ibip.pl/public/get_file_contents.php?id=249362

A local press article about citizens of Chotomow and other villages protesting against military antennas (it is said that 2 radar antennas are to be placed in CHotomow but it is more likely that the antennas are for the nearby air defence site

http://tustolica.pl/nie-chcemy-wojskowych-anten-w-chotomowie_63767

In the past the Polish numbers transmissions were most probably aired via the transmitters of Warszawa Radio or Gdynia Radio and also the MFA / intelligence transmitter site near Karmazynowa / Warszawa was and still is used by E11. Check Google Maps. There is a street view picture at this point. The link to the Google map is below.

<https://www.google.nl/maps/place/Karmazynowa,+Warszawa,+Polen/@52.11173,21.026255,575m/data=!3m1!1e3!4m2!3m1!1s0x47192df9f266d243:0x8e4e4e76295a0f20b?hl=nl> (picture below)

Warszawa Radio was as you remember a very strong station and was heard all over the globe. After 1989 it was sold (in mid 90s) to Telekomunikacja Polska S.A. which was sold to a French company that decided that Poland needed no global HF station. This was the end of Warszawa Radio. The location and pictures of the ruins can be found here in Radiowek, the old Warszawa Radio site: <http://tinyurl.com/oc365ca> and the pictures of the deserted station: <https://www.facebook.com/media/set/?set=a.168968706504184.46157.137181089682946&type=1>

This was one of Polish military RX/TX sites... but was dismantled:
<https://maps.google.com/maps?saddr=52.108983,20.986921&daddr=52.108798,20.987554&hl=pl&sl=52.109319,20.986848&spn=0.005594,0.013937&t=h&mra=mift&mrsp=1&sz=17&z=17>

This is one of the active sites used by E11
<https://www.google.nl/maps/place/52%C2%B008'33.8%22N+20%C2%B053'59.7%22E/@52.1426309,20.9000719,413m/data=!3m1!1e3!4m2!3m1!1s0x0:0x0>

This Polish site is also still active but probably not used by E11:
<https://maps.google.com/maps?q=Falenty&hl=pl&ll=52.142326,20.90032&spn=0.00559,0.013937&sl=52.429121,20.882778&sspn=0.002777,0.006968&t=h&hnear=Falenty,+pruskowski,+mazowieckie,+Polska&z=17&layer=c&cbll=52.142326,20.90032&panoid=YUu167guJenm5DKomLC9lw&cbp=12,296.6,,0,9.7>

This one is active and is used by E11 & Co:

<https://maps.google.com/maps?saddr=52.429455,20.881726&daddr=52.429389,20.881871&hl=pl&sl=52.429121,20.882778&spn=0.002777,0.006968&t=h&mra=mift&mrsp=1&sz=18&z=18>

This large site at Leżajska, Warszawa, was active a while ago too:

<https://maps.google.com/maps?saddr=52.189715,20.973214&daddr=52.189671,20.97319&hl=pl&sl=52.189394,20.973203&spn=0.001396,0.003484&t=h&mra=mift&mrsp=1&sz=19&z=19>

576/00 with a Windows XP shutdown sound 20 seconds into the transmission. A recording can be found on the N&O website. This was reported by GU and Danix. Danix wrote me the following: *"On Fridays there is S11a at 19:55 on 4870 kHz, which tends to overlap with the E11 at 20:00 if it sends a message. They definitely use two separate computers for such situations, with the E11/S11a audio being modulated into one stereo channel at a time, then mixed *as-is* with some other hardware (rather than audio from each computer being put into only one channel). At the transmitter site it is received, then split into two separate channels, each directed to different transmitting equipment. If they do it that way, that means we could hear operating system sounds from one of the computers on both simultaneous transmissions. And then what we heard was the machine used for S11a at 19:55 shutting down."*

14975 kHz, 06-08/10-08/13-08, 0805 UTC

Note: unusual third repeat

S06s

Starting this month I will list S06s separately as it is not sure who is sending these messages. It is certain that the transmissions come from Ukraine but they still might originate from Russia. The format is the same as S06 and other Russian stations.

We copied a lot of messages. You can find them in the logs section. Some comments by Danix and Ary:

16320 kHz, 10-08, 0630 UTC

Extremely loud noise (70 kHz wide) during the startup of the transmitter at 0623 UTC, then just the carrier remained on the air with a test at 0624 UTC. The transmission in AM was extremely loud and over modulated. A recording is available on the N&O website.

14580 kHz, 20-08, 1000 UTC

Extremely loud noise (70 kHz wide) during the startup of the transmitter on 14580 kHz at 0948 UTC. The sound stopped, carrier still on at 0955 UTC. Test "729 729" at 0955 UTC. The transmission was in AM.

16380 kHz, 25-08, 0900 UTC

Again the very loud noisy startup of the transmitter on 16380 kHz, 25-08, 0900 UTC

11165/12530 kHz, 28-08, 0950/1000 UTC

Noisy overmodulated transmitter

Id 524 and Id 374:

The message on the 19th/26th is very popular:

* 2014-02-04/11, 07:00, 5250kHz: 374 928 5 88620 58069 61732 74537 57440

15388 kHz	0700-0730 kHz	New Star 4			

V24

A note from Token re V24: "V24 activity seems greatly reduced, I hope it is not going the way of M94. This month I monitored all time slots and all known V24 frequencies, attempting to update my V24 schedule. I found fewer transmissions this month than when I put together the current schedule. Since some V24 transmissions are tied to the month (some time slots are even months, other are odd months) the schedule cannot be close to complete until after monitoring 2 complete months of activity, I will put it out at the end of next month. I only copied 6 transmissions total for the month of August, 2014

I did have more time this month to look for additional V24 frequencies, and did not locate one. Of course that does not mean there is not one, however I think it less likely now than before. Another note, I did not log a single transmission on the relatively new frequency of 5290 kHz."

MORSE STATIONS

An oldie to start with. The now defunct M29 was one of the first Morse numbers stations that I decoded with my Commodore 64 and SWL-decoder. This copy is from 17-2-1986, 2215 UTC on 4014 kHz.

MX **Russian Military beacons**

Current cluster frequencies:

3594, 4558, 5154, 7039, 8495, 10872, 13528, 16332, 20048 kHz

Other frequencies:

L 6917.5, 8497.8 kHz

V 3658, 4150, 6809, 6928, 7027.5 kHz

R 4325.9, 5465.9 kHz (seldom reported these days)

W 5835, 8112, 8162 kHz (Air Force)

Cluster beacon slots:

.7 "D", Sevastopol

.8 "P", Kaliningrad

.9 "S", Severomorsk

.0 "C", Moscow

.1 "A", Astrakhan

.2 "F", Vladivostok

.3 "K", Petropavlovsk Kamchatskiy

.4 "M", Magadan

Something unusual happened during the second transmission. Danix reports *“The 21:00 transmission went fine. The 21:20 transmission failed at 21:26. First the audio went lower in volume, then stopped completely. At 21:29, op chatter in Russian started on 6922 USB. From what I understood, someone was mad at his operatives and ordered them to get back to work. M12 didn't come back on 6923 CW, but went up as normal at 21:40 on 5823 CW, while the op chatter continued.*

When I heard the chatter, I started recording. Long periods of silence were removed.

VARIOUS MODES

HM01

Dirección General de Inteligencia

Notes:

9330 kHz, 18-08, 0700 UTC

Starts with "53417 14343 75581 03352 85804 73241". Stopped at 0705 UTC with "85", restarted during RDFT, stopped and restarted with 033752. Stopped at 0710 UTC. Transmitter off and back with much weaker signal. Transmitter off and back with stronger signal with 75581. Off again and back with low signal. Then restarts the complete transmission at 0714 UTC with weak signal. At 0718 UTC sudden power boost and transmitter off again. Restarts at 0724 UTC with "534"; stops; restarts at 0729 UTC. I stopped listening at 0733 UTC. It looks like they were switching transmitters and/or antennas.

5855 kHz, 20-08, 0459 UTC. Again a nice start of HM01 today.

Carrier followed by M08a at 0459 UTC: "NRN NNWTA DWTNN AGNRN NNWTA DWTNN AGNRN NNWTA DWTNN AGNRN NNWTA DWTNN AGNRN NNWTA T", then into RDFT-voice-RDFT and restarted the HM01 transmissions at 0504 UTC with "53419 14345 75582 03354 85806 73242".

Unid stations

This unid beacon was found by JP via the Siberia remote. It sends slowly 2x "RO" then 3 secs pause and again 2x "RO". The pattern sounds like the Novosibirsk/Tolmachevo airport NDB "RO" which is on 310 kHz. It might be a kind of the front end overloading. Thanks to all who replied to my mail about the subject. Recording available on the UDXF website.

I could only receive this net via the Hong Kong remote receiver.

RUSSIAN MILITARY TRANSCRIPTS

The following compilation of Russian military intercepts includes loggings from Wolfgang, Topol, Devoider, Tom, Jim, Ary, Peter, Antonio

Note:
Callsign "WEGI" has a long history. We now see > this callsign mainly in flash messages. Originally it was the used in messages to pass the coordinates of the presidential plane. The messages were on perforated tapes, fed into the KTSOS system and then transmitted to WEGI. KTSOS is a system for technical message processing, technical standard AUVYU.466514.001 TU. Callsign "LDBO" is a broadcast-only system for an organization within the SRF. LDBO is the everybody audience, the "clones" using other callsigns on LDBO frequencies are for more specific, narrower audiences. They sometimes used to open up separate Morse nets using only single calls and (often) 4LG messages.

Two Russian Tu-95 (Bear) bombers approached the Dutch boundary on 19-08. They were accompanied by two Danish F-16 planes. A Dutch fighter jet accompanied the Tu-95s over the Dutch territory up to the British area of responsibility. RAF Eurofighters accompanied the bombers further.

9128 kHz, 19-08 Bear Net (Air freq). Logged by Topol when the Bear planes approached the UK boundary.
