Shredding - Don't become a victim of identity theft

WHAT TO SHRED?

Bank Statements, Credit Card Statements, Receipts, Utilities Bills, Confidential Reports, Address Lists

Our Shredders conform to the Document Security Levels set in **DIN 727 57**. The quality and durability of our shredders means that you can shred with peace of mind.

WHICH MACHINE IS RIGHT FOR YOU?

When choosing a shredder it is important that you first answer the following two questions:

1. HOW CONFIDENTIAL IS THE INFORMATION YOU WISH TO SHRED?

The security a shredder provides is determined by how small the paper is shredded.

Cross Cut provides a higher level of security than **Straight Cut** but the straight cut machines can shred more sheets of paper in one go than its cross cut equivalent.

DIN Level 2 - S2
Ideal for everyday level of security.

DIN Level 3 - S3
Ideal for confidential documents, waste also compacts down improving bin capacity.

2. HOW FREQUENTLY WILL THE SHREDDER BE USED?

The environment in which the shredder is placed is usually the best guide to how much shredding a machine will do.

- Home**
 - Ideal for a single user who works from home
 - Designed for light use - typically 20 sheets per day
 - Economical way to ensure homeworkers can shred confidential business information
- Home & Office**
 - Ideal for home use or in an office environment with 1-2 users
 - Designed for light to medium use - typically 50 sheets per day
- Work**
 - Ideal for shared use in an office with 3+ users
 - Designed for medium duty use - typically 50-100 sheet per day
 - Heavy-duty design to withstand everyday office use
- Commercial**
 - High performance, high volume machines designed for continuous use
 - Ideal as a centralised machine for all company users or in departments such as Accounts or IT, where continuous shredding is needed.

EPSON® Inkjet Cartridges

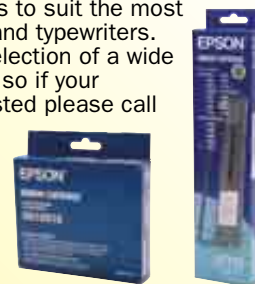

Epson inkjet cartridges are tested to the highest standards to ensure a first class performance on a day to day basis. Epson's specially developed inks penetrate and dry faster than conventional inks - drying in less than a tenth of a second, therefore eliminating smudging and wet output.
