

Epson EB-G6800

DATASHEET

The Epson EB-G6800 professional installation projector is ideal for rental markets and digital signage. Important presentations are delivered with rich, vivid colours - even in daylight. This is thanks to Epson's 3LCD technology, delivering an equally high White and Colour Light Output of 7,000 lumens, and an XGA resolution.

The Epson EB-G6800 boasts superb picture quality, ensuring the best possible delivery of presentations. The Colour Uniformity function compensates for unequal colour distribution by adjusting the intensity of RGB on individual areas of the screen.

New and innovative presenting features include 'curved surface' and 'corner wall' correction for image projection onto uneven surface areas without distortion. The projector can also be rotated vertically by 360 degrees allowing image movement around the room.

Set-up and installation is simple and straightforward. User-friendly features include pixel alignment for setting up a clear and correctly aligned picture. Edge-blending enables the projection of a large, widescreen image from a number of projectors working together seamlessly. In addition, a powerful zoom lens, as well as manual vertical keystone correction and centred lens, make it easy to set-up in various positions without blurring or distortion.

With the HDMI input, you have the flexibility to connect high definition devices, ensuring this projector is compatible with more input sources. You can also connect up to five different devices through a 100m cable with the HD-BaseT input.

For simpler integration with existing equipment, this model is also compatible with the Epson EB-G5 series lenses¹.
