

MILSATCOM

ROBERT E. TARLETON, SES, DAF
Director
MILSATCOM Systems Directorate

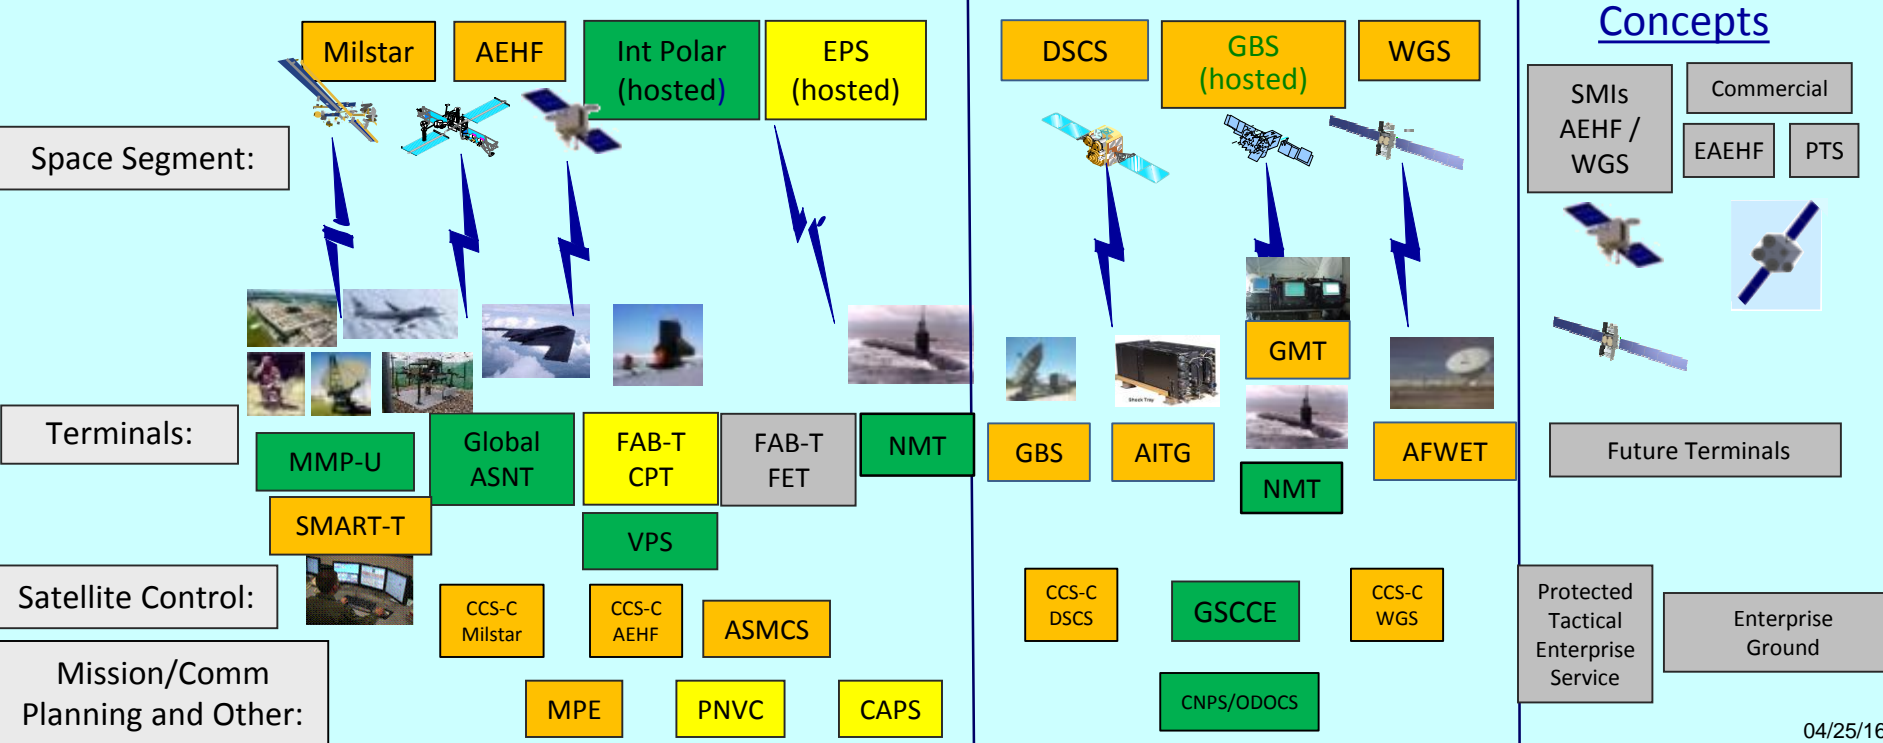

MILSATCOM Mission Area Overview

SPACE AND MISSILE SYSTEMS CENTER

Protected Communications

Wideband Communications

Advanced Concepts

04/25/16

In Development/Production
 In Sustainment Post-Initial Operational Capability
 Not in MILSATCOM Portfolio
 Future Programs

AEHF: Advanced EHF
 AFWET: Air Force Wideband Enterprise Terminals
 AITG: Airborne Integrated Terminal Group
 ASMCS: AEHF Sat Msn Control Subsystem
 ASNT: Aircrew Strategic Network Terminal
 CAPS: Control and Planning Segment
 CCS-C: Command & Control System-Consolidated
 CNPS: Common Network Planning Software
 CPT: Command Post Terminal
 DSCS: Defense Satellite Communication System

EAEHF: Evolved Advanced EHF
 EPS: Enhanced Polar System
 FAB-T: Family of Advanced Beyond Line of Sight – Terminals
 FET: Force Element Terminal
 GBS: Global Broadcast Service
 GSCCE: Global Satellite Command & Control Element
 GMT: Ground Multi-Band Terminal

MMP-U: Minuteman MEECN Program-Upgrade
 MPE: Mission Planning Element
 NMT: Navy Multiband Terminal
 ODOCS: Objective DSCS Operational Control Subsystem
 PNVC: Presidential and National Voice Conferencing
 PTS: Protected Tactical Services
 SMI: Space Modernization Initiative
 SMART-T: Secure Mobile Anti-jam Reliable Tactical Terminal
 VPS: VIP Special Airlift Mission
 WGS: Wideband Global SATCOM

Traditional View of SATCOM

PROTECTED

MILSTAR/AEHF

EHF

- ❑ LDR/MDR/XDR
- ❑ C2 range extension
- ❑ AJ, LPI, LPD, EMP
- ❑ Crosslinks - (No ground relay stations)
- ❑ Survivable

WIDEBAND

DSCS/WGS

SHF X/Ka-Band

- ❑ DSCS – X-band only
- ❑ WGS – X & Ka Band
- ❑ High Data Rates
- ❑ Limited AJ protection

BROADCAST

(GBS)
UFO/WGS

Ka-Band

- ❑ Ka payload on UFO and WGS satellites
- ❑ High throughput
- ❑ Small antennas
- ❑ Smart push/pull data broadcasts

NARROWBAND

UFO/MUOS

UHF

- ❑ Lightweight, mobile users
- ❑ Foliage Penetration
- ❑ No AJ
- ❑ DAMA access

COMMERCIAL

Commercial

C, Ku, Ka-Band

- ❑ Growing capability
- ❑ High throughput –No protection
- ❑ Pay for on Demand services

Military satellite systems are essential to provide assured comm for the deployed Warfighter, with augmentation from Commercial systems to meet surge requirements

Current View of SATCOM

PROTECTED

MILSTAR / AEHF
EPS / UFO 4-11 (Hosted)

EHF

- ❑ LDR / MDR / XDR
- ❑ C2 range extension
- ❑ AJ, LPI, LPD, EMP
- ❑ Crosslinks - no ground relay
- ❑ NC3 / PNVC

WIDEBAND

DSCS / WGS

SHF X / Ka-Band

- ❑ DSCS – X-band
- ❑ WGS – X & Ka-band
- ❑ Medium Data Rates
- ❑ Tactical theater / broadcast
- ❑ USG owned / operated

Commercial

C / Ku / Ka-Band

- ❑ Leased/pay on demand
- ❑ High data rates
- ❑ Min protection for military use
- ❑ Pred / Reaper / Global Hawk AISR relay
- ❑ "Pathfinders" demo economical acquisition

NARROWBAND

UFO / MUOS / Milstar

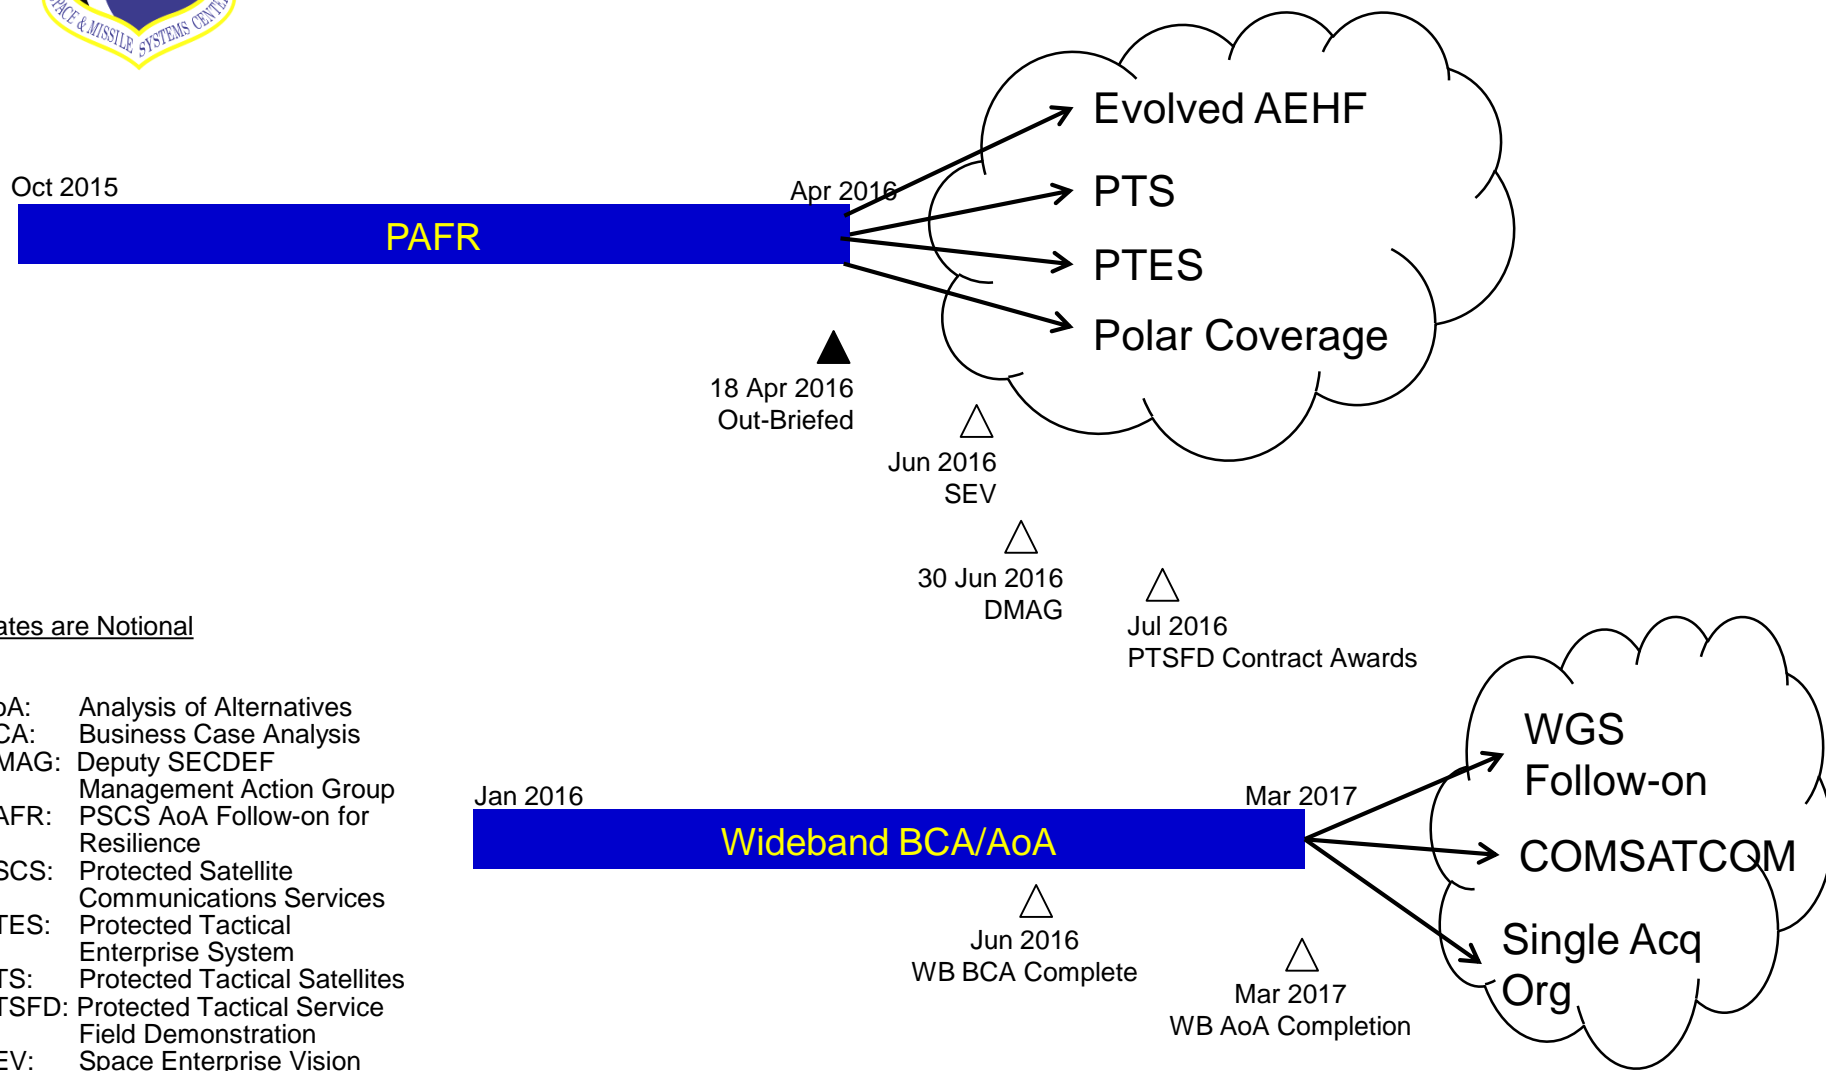

UHF

- ❑ Lightweight, mobile users
- ❑ Foliage Penetration
- ❑ DAMA access
- ❑ COTM
- ❑ Large user base

MILSATCOM systems provide end-to-end services for military and USG users

Next Generation MILSATCOM Programs

Dates are Notional

- AoA: Analysis of Alternatives
- BCA: Business Case Analysis
- DMAG: Deputy SECDEF Management Action Group
- PAFR: PSCS AoA Follow-on for Resilience
- PSCS: Protected Satellite Communications Services
- PTES: Protected Tactical Enterprise System
- PTS: Protected Tactical Satellites
- PTSFD: Protected Tactical Service Field Demonstration
- SEV: Space Enterprise Vision

Potentially Four to Six New ACAT I Programs

Current and Planned MILSATCOM ACAT I Programs

SPACE AND MISSILE SYSTEMS CENTER

Fiscal Year	FY 2016				FY 2017				FY 2018				FY 2019				FY 2020				FY 2021				FY 2022			
Quarter	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4	Q1	Q2	Q3	Q4
GBS (ACAT I)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
WGS (ACAT I)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
EPS (ACAT I)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
AEHF (ACAT I)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
FAB-T CPT (ACAT I)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
FAB-T FET (ACAT I)	[Yellow bar]				[Yellow bar]				[Yellow bar]				[Yellow bar]				[Light Blue bar]				[Blue bar]							
Polar Gapfiller (ACAT I)	[Yellow bar]				[Yellow bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
Protected Tactical Enterprise Service (ACAT I)	[Yellow bar]				[Yellow bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
Protected Tactical Satellite (ACAT I)	[Yellow bar]				[Yellow bar]				[Light Blue bar]				[Light Blue bar]				[Blue bar]				[Blue bar]							
Evolved AEHF (ACAT I)	[Yellow bar]				[Yellow bar]				[Light Blue bar]				[Light Blue bar]				[Blue bar]				[Blue bar]							
Wideband Follow-On (ACAT I)	[Yellow bar]				[Yellow bar]				[Yellow bar]				[Yellow bar]				[Light Blue bar]				[Light Blue bar]							
AFWET (II), PNVC (III), CACE (III), AJ (III)	[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]				[Blue bar]							
PTSFD/PKMA/International	[Light Blue bar]				[Light Blue bar]				[Light Blue bar]				[Light Blue bar]				[Light Blue bar]				[Light Blue bar]							

- Ongoing Program - Development
- Pre-Risk Reduction – Program Establishment
- Risk Reduction effort or shared program

- AoA: Analysis of Alternatives
- AFWET: AF Wideband Enterprise Terminals
- AJ: Anti-Jam
- CACE: CCS-C Assurance and Capacity Enhancement
- CCS-C: Command and Control System Consolidated
- CPT: Command Post Terminal

- EPS: Enhanced Polar System
- FET: Force Element Terminals
- GBS: Global Broadcast Service
- MDD: Materiel Development Decision
- PKMA: Protected Key Management Architecture
- PNVC: Presidential and National Voice Conferencing
- PTSFD: Protected Tactical Service Field Demonstration
