Acknowledgments

Data collection and dataset preparation for the 1995 Armed Forces Sexual Harassment Survey were performed by Data Recognition Corporation (DRC) under contract DASW01-94-H-0006, Delivery Order 0002. Contributing staff at DRC include the Federal Government Team (Lee Brekke, Jim Fisher, Bryan LaSell, Jane Allen, Allison Schultz, Jill Tegg), the Comment Processing Team (Paula Eckel, Jean Wiley, Val Erickson, Barb Anderson), and the Survey Operations Team (Barb Roff, Dan Murphy) in the Survey Division, as well as the staffs of the Clerical Operations (Diane Hambrick, Diane Burmis, Penny Johnson, Dave Maurek, Dan Reid, Rosie Albrecht, Rhonda Robeck, Karen DuChene, Jeni DeStasio, Carol Meyer, Annette Kline, Judy Sirny), Laser Printing (Dan Sawatzky and staff), Inserting (Gary Hummel and staff), and Warehousing (Bob Tanke and staff) departments.

Design of the survey instruments was directed by Deborah L. Edwards, who is now at the U.S. General Accounting Office. We also want to thank Mary H. Weltin who helped with question edits and pretesting. We especially appreciate the reviews and thoughtful discussions with Louis E. Fitzgerald of the University of Illinois at Urbana-Champaign on our adaption of the *Sexual Experiences Questionnaire (SEQ)* (Fitzgerald et al., 1988).

Special thanks to the Service members who helped with our pretesting of the instruments and to all the reviewers who helped us sharpen and refine the items in the questionnaires.

Timothy W. Elig
Chief, Survey and Program
Evaluation Division

Executive Summary

Defense Manpower Data Center (DMDC) conducted the first Joint-Service, active-duty sexual harassment survey in 1988. In 1994-95, DMDC updated and re-administered the survey. Updating the survey accomplished two important objectives: addressing current Department of Defense (DoD) policy concerns and incorporating recent advances in the understanding and measurement of sexual harassment. This codebook and two others (Edwards, Elig, Edwards, & Riemer, 1997a; 1997b; 1997c) document the survey-administration procedures that were used and the datasets that resulted from the 1995 survey.

Survey Instruments

Three surveys were developed and administered. *Form A* (see Appendix A) replicated the DoD-wide 1988 *Survey of Sex Roles in the Armed Forces* that produced the initial baseline data on sexual harassment in the active-duty Services (Martindale, 1990). The sole purpose of administering the *Form A* survey was to compare 1988 and 1995 incidence rates.

Form B (see Appendix B) differed from *Form A* in three major ways. It provided (a) an expanded list of 25 potential harassment behaviors; (b) an opportunity to report on experiences that occurred outside normal duty hours, not at work, and off the base, ship, or installation; and (c) expanded and updated measures of service members' perceptions of complaint processing, reprisal, and training. The main purposes of the *Form B* survey were to assess:

- what subgroups of the active-duty military experienced unwanted, sex/gender-related behaviors;
- the context, location, and circumstances under which such experiences occurred;
- the extent to which these experiences were reported and, if reported, members' satisfaction with the complaint process and outcome;
- the extent to which those attempting to report harassment experienced reprisal;
- the amount of training on sexual harassment and members' assessment of the effectiveness of that training; and
- service members' views of leadership commitment and of progress in reducing the incidence of sexual harassment.

Although many *Form B* items were based on those used in the 1988 DoD-wide survey, *Form B* was developed specifically for the 1995 survey and incorporated recent measurement and theoretical advances in sexual harassment research. *Form B* items measuring sexual harassment were largely based on work by Fitzgerald and her colleagues and were modeled after the *Sexual Experiences Questionnaire* (*SEQ*; Fitzgerald et al., 1988). The *SEQ* is widely used and is generally considered the best instrument available for assessing sexual harassment experiences (Arvey & Cavanaugh, 1995). The large number of new and revised items in *Form B* required

developing and pretesting several iterative versions of the questionnaire. *Form B* was pretested at six sites using 18 focus groups with a total of approximately 130 participants.

Form C (see Appendix C) was created from parts of *Forms A* and *B* and was administered to a smaller sample of active-duty members. It was developed to assess the overlap of the incidence measures in the two *Forms*. *Form C* was administered solely to aid in the transition to using *Form B* in future research.

Survey Administration

The survey population included the worldwide distribution of Army, Navy, Marine Corps, Air Force, and Coast Guard military personnel who had approximately six or more months of active-duty service. Except for *Form A*, the survey population also included members of the National Guard and Reserve Components on active assignments of more than 179 days (AGR/TARs). Flag and general officers were excluded because they are such a small group that their confidentiality could not be assured.

Information for constructing the sampling frame was taken from DMDC's October 1994 Active Duty Master File (ADMF) and DMDC's September 1994 Reserve Components Common Personnel Data System (RCCPDS). The ADMF and RCCPDS provided the information for constructing sampling strata and determining the sample size and allocation.

A non-proportional stratified random sample of 91,006 personnel were selected: 30,756 for *Form A*, 50,394 for *Form B*, and 9,856 for *Form C*. The sample consisted of approximately 4 women to each man to allow for finely defined reporting domains for women. This oversampling of women was necessary to insure sufficient power for analyses of the subgroups most at risk for sexual harassment.

Data collection was by mail. An introductory letter explaining the survey and soliciting cooperation was sent to the sample starting 15 February 1995. The introductory letter was followed about six weeks later by a package containing a questionnaire and instructions for completing and returning the survey. About three weeks after the survey was first sent, another letter was sent (a) to thank individuals who had already returned the questionnaire and (b) to ask nonresponders to complete and return the questionnaire. At approximately four weeks and eight weeks after the initial survey mailing, second and third questionnaires (with letters stressing the importance of the survey) were sent to individuals who had not responded to previous mailings.

Usable surveys were returned by 47,255 Service members (13,599 for *Form A*, 28,296 for *Form B*, and 5,360 for *Form C*). The weighted response rate was 54% overall (46% for *Form A*, 58% for *Form B*, and 56% for *Form C*). Responses were weighted up to population totals, adjusting for differential sampling and response rates in demographically homogenous groups. Details on sampling and weighting are reported by Mason et al. (1996).

Care was taken in the preparation of analysis files to provide public-access to data from these surveys with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity.

THE 1995 ARMED FORCES SEXUAL HARASSMENT SURVEY: ADMINISTRATION, DATASETS, AND CODEBOOK

Introduction

Purpose

Defense Manpower Data Center (DMDC) conducted the first Joint-Service, active-duty sexual harassment survey in 1988. In 1994-95, DMDC updated and re-administered the survey. Updating the survey accomplished two important objectives: addressing current Department of Defense (DoD) policy concerns and incorporating recent advances in the understanding and measurement of sexual harassment. This codebook and two others (Edwards, Elig, Edwards, & Riemer, 1997a; 1997b; 1997c) document the survey-administration procedures that were used and the datasets that resulted from the 1995 survey.

Background

General History of DoD-wide Sexual Harassment Assessment

In the 1988 DoD-wide assessment (Martindale, 1990) of sexual harassment in the military, questionnaires were sent to approximately 38,000 active-duty military personnel in the four DoD Services and the Coast Guard. The resulting data were weighted to compensate for over- and under-sampling and nonresponse so that findings could be projected to the population and subgroups within the population. Several important findings emerged. For instance, 22% of military members reported experiencing at least one form of sexual harassment in the year prior to the survey. Female personnel (64%) were almost four times more likely than were males (17%) to experience some form of sexual harassment. Experiences ranged from sexual teasing and jokes (7% of females), attempts at touching or cornering (25% of females), pressure for sexual favors (12% of females), and actual or attempted rape or sexual assault (5% of females).

Discussions regarding re-administering the survey began during 1992, but no decision was made to do so until 1993. When discussions were resumed in early 1993, two conflicting needs surfaced. One consideration was the desire to update the questionnaire by addressing current policy concerns and incorporating recent advances in the understanding and measurement of sexual harassment. The second consideration was the need to compare findings from the proposed survey to 1988 findings.

The two considerations noted above were at cross purposes. Revision of the 1988 instrument could affect how respondents would answer. Furthermore, even without any changes in the instrument, events that had occurred during the intervening five years would influence the results of any comparison between the two surveys. For example, awareness of sexual harassment had increased in both the military and civilian organizations through events such as

Tailhook and the Clarence Thomas confirmation hearings. In addition, DoD and the Services issued new, stronger policies on sexual harassment and began requiring extensive training on the prevention of sexual harassment.

In 1994, in an effort to obtain the advantages of a new instrument while preserving the ability to compare across years, Edwin Dorn, the Under Secretary of Defense (Personnel and Readiness), approved administering three forms of the sexual harassment survey.

- *Form A* is a re-administration of the 1988 survey; it provides researchers with data for a fairly unambiguous comparison of 1988 and 1995 sexual harassment incidence rates.
- *Form B* builds on the content of the 1988 survey, includes current policy issues, and incorporates recent advances in the understanding and measurement of sexual harassment.
- *Form C* is a research form that links the sexual harassment behavior list in the 1988 survey and *Form A* to the behavior list in *Form B*.

Preliminary Issues in the Assessment of Sexual Harassment

Central to all three versions of the survey is the issue of how to measure sexual harassment in a manner conforming to DoD policy. At the time the surveys were developed and fielded, DoD policy (Secretary of Defense, 1994) stated that, "Sexual harassment is a form of sex discrimination that involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

- (1) submission to such conduct is made either explicitly or implicitly a term or condition of a person's job or career, or
- (2) submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person, or
- (3) such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creates an intimidating, hostile, or offensive working environment."

In *Sexual Harassment: Illegal, Repugnant, Undermining* (1994), Edwin Dorn noted that DoD was developing a definition to be consistent with the Supreme Court decision in *Harris v. Forklift Systems, Inc.* (1993). In that decision, the Supreme Court maintained that even without causing psychological harm an "abusive work environment" can detract from employees' job performance, discourage them from staying in the job, or keep them from advancing in their careers.

Investigation of sexual harassment within DoD could have been performed with either of two approaches that have appeared in the research literature. The direct-question approach asks respondents if they have experienced sexual harassment during some specified time frame (e.g., 6 or 12 months). The more common behavioral-list approach presents respondents with a list of specific, sex-related behaviors and asks them if they experienced the behaviors during a specified time.

Civilian research (e.g., see Arvey & Cavanaugh, 1995, for a review of methodological problems encountered when assessing sexual harassment) and DMDC field tests showed that respondents often consider many factors (e.g., their relationship to the perpetrator, their perception of the perpetrator's intent, and their own ideas about the culture of the environment), in addition to the behavior, before labeling an experience as sexual harassment. For many respondents, the set of *behaviors reported as unwanted, inappropriate, and sex-related* appears to be much larger than is the set of *behaviors labeled as sexual harassment*. Research (Culbertson & Rosenfeld, 1994) on active-duty Navy personnel has shown that the behavior-list method results in a considerably higher sexual harassment incidence rate than does the direct-questioning approach.

Choice of one method over the other method must consider constraints associated with these measurement procedures. The problem with the direct-question method is that respondents are sometimes reluctant to use the label of sexual harassment. That is, they report experiencing unwanted sex-related behavior but do not call those behaviors sexual harassment. The behavior-list technique also has a major disadvantage. It never directly asks the individual to conclude whether an experience/behavior was, or was not, interpreted as sexual harassment.

The 1988 DoD-wide survey of sexual harassment (and therefore 1995 *Form A*) was patterned after the U.S. Merit Systems Protection Board's (1981) sexual harassment survey in that it used the behavior-list approach in determining sexual harassment incidence rates. Respondents were presented with nine categories of behaviors such as "actual or attempted rape or sexual assault" and "sexual teasing, jokes, remarks or questions." Incidence rates were calculated based on the number of respondents who answered that they had experienced at least one of these behaviors.

With two major modifications, the behavior-list approach was selected for *Form B* of the 1995 DoD-wide assessment. If respondents marked having experienced any of the listed behaviors, they were asked if they considered any of the marked behaviors to have been sexual harassment. In this way, both of the previously discussed methods of measuring sexual harassment were used in a single instrument. A second major modification was that the 1988 DoD behavior list was completely revised and the new list was modeled after the *Sexual Experiences Questionnaire (SEQ)*; Fitzgerald et al., 1988). The new, more precise list was used to decrease the ambiguity associated with the behavior groupings used in 1988 DoD behavior list. The new list limited the type of behavior contained in each item, thereby providing a more precise categorization of sexual harassing behaviors.

Comparison of Forms and Procedures: 1995 Versus 1988

Several other methodological differences are found in the 1995 versus 1988 approaches. These differences are identified here so that researchers, analysts, and other readers can keep them in mind while studying the 1995 survey findings and comparing 1995 results to 1988 statistics. Many of the 1988 versus 1995 differences were the result of a need to use similar methods across the three 1995 forms. The following list identifies the major differences.

- All 1995 forms used optical-mark-read formatting rather than the printed, key-entry format of the 1988 form. Also, *Forms B* and *C* were printed in color (rather than black and white) and included highly detailed versions of the Service logos on the front cover.
- Some of the demographic questions (e.g., race/ethnicity and marital status) and their response alternatives were slightly different across the 1988 and 1995 administrations. All three 1995 forms contained the standardized set of demographic questions currently employed in DoD-wide surveys.
- Admirals and generals (paygrades O7 and above) were included only in the 1988 sample.
- The 1995 sample included members with missing values on stratification variables (e.g., for gender and paygrade) and unit addresses. The 1988 sample included only members who had complete data on the stratifying variables and the unit address.
- In 1995, the order of preference for sending a survey was home address, unit (i.e., work) address, and as a last resort, one or more home addresses supplied by a credit-reporting firm. In 1988, all surveys were sent to unit addresses.
- To enhance response rates, the 1995 survey used up to five different contact attempts: a notification letter, an initial survey, a reminder/thank-you letter, and two follow-up survey mailings. In contrast, the 1988 survey used only one survey mailing and a follow-up letter.
- A telephone help line was used only in 1988.
- Respondents returned completed 1995 surveys directly to a commercial mailing/scanning firm. The completed 1988 forms were returned to DMDC which then sent them to a key-entry firm.

The impact of these differences on survey results (e.g., incidence rates) cannot be separated from differences that resulted from non-methodological effects such as new policies, enhanced training, and a heightened awareness of sexual harassment in military and civilian work environments. Recognition of this concern is especially important when comparing findings between the 1988 survey and the 1995 *Form A*.

Method

Survey Instrument

Form A

As previously mentioned, *Status of the Armed Forces Surveys: 1995 Form A—Sex Roles in the Active-Duty Military* was a re-administration of *1988 Survey of Sex Roles in the Armed Forces*. The 1988 survey was modeled after U.S. Merit Systems Protection Board sexual harassment surveys (e.g., see U.S. Merit Systems Protection Board, 1981; 1988; 1995). Martindale (1990) provided no additional details regarding the development and pretesting of the 1988 survey.

Form A is a 16-page survey containing 56 questions. Many of the questions have multiple items. Except for the demographic items, the same wording was used for both the 1988 survey and 1995 *Form A*. The need to keep the items and instructions for *Form A* and the 1988 survey alike made *Form A* pretests a moot issue.

Appendix A contains an annotated copy of *Form A*. The annotations indicate variable names, values for the alternatives, and numbered notes to describe where in Appendix E additional variable-coding information can be found.

Form B

Status of the Armed Forces Surveys: 1995 Form B—Gender Issues is a 16-page, 133-question (some with multiple items) instrument. Appendix B contains an annotated copy of *Form B*. This survey addressed a wider range of issues than did *Form A*. Bastian, Lancaster, and Reyst (1996, p. 3) noted that *Form B* was designed to assess six aspects of sexual harassment:

- what elements of the active-duty military population had unwanted, gender-related experiences;
- the context, location, and circumstances under which such experiences occurred;
- the extent to which these experiences were reported and, if reported, members' satisfaction with the complaint process and response;
- the extent to which those attempting to report harassment experienced reprisal;
- the amount of training on sexual harassment and members' assessment of the effectiveness of training received;
- service members' views of current policies designed to prevent, reduce, or eliminate sexual harassment; of leadership commitment; and of progress in reducing the incidence of sexual harassment.

In addition to addressing aspects of the sexual harassment experience, *Form B* also included questions about demographics, identification with and commitment to the organization, current mental and physical health, career issues, characteristics of the workplace, and job satisfaction. Because of the unique nature of this survey effort, only three sets of items could be adapted from scales that had appeared in the civilian research literature. *Form B* items measuring sexual harassment were largely based on work by Fitzgerald and her colleagues and were modeled after the *SEQ*, (Fitzgerald et al., 1988). The *SEQ* is widely used and is generally considered the best instrument available for assessing sexual harassment experiences (Arvey & Cavanaugh, 1995). The *SEQ* list of sexual harassment behaviors (see Question 71 in *Form B*) were modified to make the behaviors more applicable to the military sample. The modifications included adding items and providing examples to explain the behaviors. RAND's 36-item health survey (Hays, Sherbourne, & Mazel, 1993) was reduced to the 15 items (see Questions 24 - 33b3 in *Form B*) which had the most relevance for the sample and the purposes of the survey. Third, items from Mowday, Steers, and Porter's (1979) organizational commitment questionnaire were abstracted and modified.

Additional *Form B* items were generated using a variety of methods: item extraction from the 1988 DoD sexual harassment survey, identification of concerns by Defense policy officials, discussions with Service personnel who worked in the equal opportunity offices, and focus groups conducted with military personnel similar to those in the sample. An in-depth discussion of the focus groups is provided because they played such a significant role in the development and refinement of *Form B* items.

The large number of new and revised items in *Form B* required developing and pretesting several iterative versions of the questionnaire. *Form B* was pretested at six installations using 18 focus groups with a total of approximately 130 participants. To ensure the applicability of the items for the population of inferential interest, versions of the survey were pretested on members from all five Services. The layout of the surveys used in the pretests closely approximated that found in the final instrument. The focus groups were conducted in homogeneous groups (female officers, male officers, female enlisted personnel, and male enlisted personnel) of 7 to 10 members from a single Service.

In the 60- to 90-minute focus-group sessions, participants were instructed to imagine that they had received the survey in the mail and to complete it accordingly. Also, participants were asked to write notes on the survey where they had concerns about items, alternatives, or instructions so that these issues could be discussed after the survey was completed. Survey completion typically took from 20 to 40 minutes. After everyone had completed the survey, the focus-group facilitator reviewed the instrument section-by-section, asking for specific comments on each section.

After focus groups at an installation were completed, the facilitator modified the survey to address participants' concerns. In subsequent focus groups, the facilitator probed for further comments from participants to determine whether the implemented changes had corrected the problem or whether additional modifications were warranted. For other items, the facilitator probed to see if all respondents were interpreting the items and contexts similarly. After the

section-by-section review was completed, focus-group participants were asked to give general comments about the survey (e.g., survey length and whether respondents would feel free to answer the questions honestly). At the end of the session, the facilitator gathered the questionnaires to preserve the notes that participants had written.

Form C

Status of the Armed Forces Surveys: 1995 Form C—Gender Issues is a 12-page survey that has 35 questions, many of which have multiple items. Appendix C contains an annotated copy of *Form C*. All of the items in *Form C* were taken from Forms A and B. *Form C* was pretested on only 2 focus groups of approximately 20 participants. Additional focus groups were not warranted because wording of the questions had been previously determined in the 1988 questionnaire and in the pretests for *Form B*. The *Form C* pretests were performed to investigate the layout of the material in *Form C*.

Using the Crosswalks

Appendix D contains crosswalks that identify whether an item or a topic was addressed in more than one survey form. Although the crosswalks are similar, they are not identical. The first three columns of each crosswalk provide form-specific information for the three 1995 forms. Entries provide both the item number and the variable name. The fourth column contains a short item description.

The column corresponding to the crosswalk name (e.g., the *Form B* column in the *Form B* crosswalk) is listed first and the rows are sorted according to the numerical order in which items appear in the survey (e.g., *Form B*). The second and third columns in each of the three crosswalks show items that are identical or similar to the item in the first column.

A crosswalk is used by first identifying the item number for a topic of interest. The item number may be determined using any of three methods: looking at the annotated surveys in Appendices A through C, deciphering the item number from the variable name, or examining the tables contained in Appendix G. The item number is then used to locate the crosswalk row(s) that contains the referenced item and the same or any similar item included on another survey. If neither the second nor third columns has an entry for that row, it means that the other two forms do not address that issue. If an entry in either of these columns is followed by an asterisk (*), the asterisk tells the user that the form contains an item that addresses the same issue, but the other form uses either different item wording or context. If there is an entry in either of these columns and the entry is not followed by an asterisk, the user is informed that the item, alternatives, and context are the same as the item in the first column.

An example is provided to clarify the procedures for using the *Form A* crosswalk in Appendix D. A researcher wants to know if the issue assessed in *Form A* Item 13g is addressed in the other survey forms. The first column of Table D-1 contains the ordered sequence of *Form A* items. Turning to the third page of the listing and locating the rows with 13g in the first column shows that *Form A* Item 13g has 3 similar or identical counterparts on the other survey

instruments. The asterisks after *Form B* Item 97e and *Form C* Item 16e indicate that these items address a similar concern (to *Form A* Item 13g) or the same concern in a different context. *Form C* Item 24g is, however, identical in context and wording to *Form A* Item 13g.

Sample

Stratification Variables

The sampling frame was constructed using five stratification variables: Service, paygrade, gender, race/ethnicity, and duty location. Since in-depth documentation of the sample stratification, selection, and weighting is reported by Mason et al. (1996), only the general levels of the stratification variables are reviewed here.

Service has six levels of stratification: Army, Navy, Marine Corps, Air Force, Coast Guard, and members of the National Guard and Reserves in active-duty assignments in AGR/TARs programs. The paygrade¹ variable constructed for stratification has three levels: E1-E4, E5-E9, WO1-O6. Gender has two levels: male and female. Race/ethnicity has six levels: non-Hispanic White, non-Hispanic Black, Hispanic (any race), non-Hispanic American Indian/Alaskan Native, non-Hispanic Asian/Pacific Islander, and non-Hispanic Other.

The duty location variable has two levels: U.S. (a duty station in any of the 50 states or the District of Columbia) and overseas (anywhere not in the U.S.). Records on approximately 30,000 Navy personnel did not include full location information. For this survey, those 30,000 members were coded U.S. if they were assigned to a shore unit and overseas if they were assigned to a ship.

Using data from the October 1994 Active-Duty Master File (ADMF) and the September 1994 Reserve Components Common Personnel Data System (RCCPDS), the number of Service personnel was determined for each cell (i.e., stratum) in the fully crossed design. Cell sizes were too sparse in some cases for the fully crossed stratification. In such cases, cells defined by race/ethnicity were collapsed. Table B-4 in Mason et al. (1996) shows the final sampling strata.

Constructing the Frame and Drawing the Sample: An Overview

This section provides readers with an overview of the multi-step process used in identifying the sample. Greater detail on this process can be found in the methodological report (Mason et al., 1996).

The reasons that led to the creation of three 1995 survey forms also led to defining two slightly different populations of inferential interest. For *Forms B* and *C*, the population of interest was all DoD and Coast Guard personnel below flag rank (i.e., below general or admiral) who were on active duty for the entire time between October 1994 and April 1995. For *Form A*, the

¹ Paygrades included in the population for the survey are the nine enlisted ranks (E1-E9), the five warrant officer ranks (WO1-WO5), and the first six commissioned officer ranks (O1-O6).

population was further restricted to exclude active-duty National Guard and Reserve personnel (because the 1988 survey did not include such members).

Researchers identified subgroup breakouts (i.e., domains) that would be important when survey results were provided to policy makers. These reporting domains were captured by the five previously specified stratification variables plus one additional variable—occupational class. Occupational class is a variable that was created specifically for this survey. It is based on the percentage of women in a DoD occupational group—a general family of military occupational specialties (see Department of Defense, 1993, for a list of occupations and codes). The percentage of women in each 2-digit occupational group was determined using the August 1994 ADMF. Occupational classes were somewhat arbitrarily created by combining occupational groups into six classes that had similar percentages of female representation, plus an unknown occupation category. The seven enlisted occupational classes were 0 to 2.9%, 3.0 to 4.9%, 5.0 to 9.9%, 10.0 to 10.9%, 11.0 to 17.7%, 17.9 to 24.4%, and 25.0 to 38.0%. The seven officer occupational classes were 0 to 2.9%, 3.0 to 4.9%, 5.0 to 7.9%, 8.0 to 9.9%, 10.0 to 15.7%, 15.8 to 25.9%, and 27.4 to 74.0%. (Gaps are present between some classes because no occupation fell within the missing intervals.) See Appendix K for the occupational groups in each class.

Next, researchers determined the number of people who would be sampled for each stratum. Determination of cell sizes balanced several competing concerns to get the sample that would achieve at the minimal cost the desired precision levels (e.g., $\pm 5\%$) required for the purpose of each survey form. A formal mathematical procedure (Chromy, 1987) based on Karush-Kuhn-Tucker theory was used to determine an optimized sample size and allocation. The Kuhn-Tucker solution provides an optimal solution to satisfy precision constraints imposed on estimates of prevalence rates in key reporting domains. Researchers iteratively modified the inputs to the sample-planning tool to arrive at acceptable precision levels for reporting domains that would be of particular interest to policy makers. Mason et al. (1996) provided details of the precision constraints imposed on the sample designs. Table 1 shows the number of people in the population and in the sample for each survey form by Service, gender, and paygrade.

Sample Sizes: Drawn, Eligible, and Locatable Samples

The first row of Table 2 shows that a worldwide sample of 91,006 active-duty DoD and Coast Guard members was selected to receive one of the three 1995 sexual harassment instruments. The numbers of members selected to receive these surveys were 30,756 for *Form A*, 50,394 for *Form B*, and 9,856 for *Form C*. In contrast, Martindale (1990) noted that the 1988 survey sample included “approximately 38,000” and “approximately 20,400 personnel responded.” Other 1988 values in the table are not discussed in this report since they are estimates developed on (a) the two rounded numbers cited above and (b) projections from the ineligibility rates found in the 1995 survey. The 1988 estimates are provided for gross comparisons only.

Losses from the sample are displayed hierarchically in Table 2. When personnel fit into more than one loss category, the sampled members were assigned to the loss category appearing

Note. Rounding results in some entries in the "% of Drawn" column not summing to 100%.
^a These values for the 1988 survey are extrapolated using (a) known but general values from the technical report (Martindale, 1990) documenting that effort and (b) ineligibility rates found in the 1995 survey.

first in Table 2. For example, if the database indicated that an individual was ineligible because both DMDC and the individual reported that the individual was no longer in the military, the sample member was assigned to the "Separated from Service (master files)" category rather than to the "Self-reported ineligibility" category.

The patterns of losses for ineligibility, unlocatability, and various subcategories of nonresponse were similar across the three forms. To avoid redundancy, the remainder of the discussion regarding Table 2 findings concentrates on the results for the total sample.

A total of 2,796 (3%) of the members was lost from the 1995 sample because of ineligibility. Most ineligibility losses (2,571) occurred when mailing addresses were updated with the 14 January 1995 and 4 April 1995 Defense Enrollment Eligibility Reporting System (DEERS) files². The remaining ineligibility losses (203) occurred when people either sent a letter or fax to Data Recognition Corporation (DRC), the operations contractor, to indicate that they were ineligible (self-report ineligibility). Of the DEERS ineligibility losses, most occurred because the member was not shown as being on active-duty (2,571). The 22 people in the other reasons category were individuals who had died or were incarcerated, hospitalized, etc. There were probably additional ineligible sample members among the nonrespondents; however, this number was probably small since there were few self-report ineligibility losses among the respondents. Elimination of the 2,796 ineligibles resulted in decreasing the eligible sample to 97% ($n = 88,210$) of the drawn sample size.

Slightly more than 5% ($n = 4,986$ of 91,006) of the drawn sample was lost because the sampled members could not be located. Personnel records for this 5% of the sample had either an incomplete or out-of-date address, and other steps designed to obtain addresses were not fruitful. Sending surveys to military personnel is complicated because military personnel are very mobile. Relative to their counterparts in most civilian organizations, military personnel move much more frequently, often to or from foreign locations. This fact coupled with the size of the military (approximately 1.5 million active-duty members) makes it difficult to maintain up-to-date addresses. As a result, DMDC and DRC developed an elaborate address-update procedure (reviewed in a later section of this codebook) to minimize the number of people who would be lost from the survey because of outdated addresses.

Ninety-two respondents contacted DRC (by mail, fax, or telephone) and asked to have their names removed from the survey-mailing list. Another 131 people returned surveys that were entirely blank. A third group returned surveys, but they left key sexual harassment items blank. Partially completed surveys were treated as nonresponses if the following conditions occurred.

² The database for the sample was constructed using information from the October 1994 ADMF and September RCCPDS. Information in the database included social security numbers, names, addresses, eligibility status, stratification variables, etc. The names and social security numbers were then used to verify the eligibility and addresses of the sampled members in January 1995 against the data in a more current but less readily accessible database (DEERS). This verification identified 1,320 personnel who had been selected for the sample but were no longer in the population of interest. These 1,320 former members were not sent any survey materials. When researchers later prepared an updated eligibility file from DEERS in April 1995, other sampled members were declared ineligible because they had left active-duty after the sample was drawn.

- *Form A*: The respondent did not mark either the last item in Question 11 (“No, I have NEVER experienced any UNINVITED and UNWANTED sexual attention from someone at work while in the active-duty military”) or any of the 11 behaviors listed in Question 12.
- *Form B*: The respondent did not complete any of the 25 items in Question 71 (“Unwanted sex-related attention is sex/gender-related talk and/or behavior that was unwanted, uninvited, and in which you did not participate willingly”).
- *Form C*: The respondent did not mark any of the 36 behaviors listed in Question 11 and 23, and did not mark the last item in Question 22 (“No, I have NEVER experienced any UNINVITED and UNWANTED sexual attention from someone at work while in the active-duty military”).

All sampled members who were not assigned to any earlier loss categories or who did not return a usable survey were placed in the category, “Did not otherwise return a survey.” This nonresponse group ($n = 34,451$) was composed of those individuals who had been sent at least one survey without it being returned to DRC and for whom no information (on ineligibility or a completed survey) had been obtained.

At the conclusion of the survey fielding, 47,255 eligible personnel had returned usable questionnaires.

Location, Completion, and Response Rates

The Council of American Survey Research Organizations (CASRO, 1982) noted that varying operational definitions of response rates can lead to problems when interpreting the results of a survey. As a result, CASRO formed a Task Force to recommend guidelines for standardizing the operational definitions of response rates. Beginning in 1995, DMDC standardized its methods for calculating response rate and completion rate, using procedures closely patterned after those advocated by CASRO (1982). More specifically, the new DMDC procedures most closely follow CASRO’s Sample Type II design.

Prior to DMDC’s standardization, Martindale (1990) reported a corrected response rate of 60% for the 1988 survey. She defined the corrected response rate as “returned questionnaires as a percent of targeted respondents from which the number of losses (i.e., postal non-deliverables [PNDs] and separations) have been removed” (p. 5). This operational definition closely corresponds to DMDC’s new definition of completion rate, not response rate. Using the new DMDC operational definition of response rate and the information from Table 2 of this volume, the 1988 response rate was estimated to be about 5% lower—55%.

Table 3 provides rate information on the three 1995 surveys and estimated rates for the 1988 survey. In this table, *response rates* are shown to have separate components of the *rate at which individuals can be located* and the *rate at which located individuals complete the survey*. All of these rates are corrected for ineligibility in the numerator and the denominator as recommended by CASRO (1982). CASRO (1982) indicated that nonrespondents for whom

eligibility has not been determined need to be distributed to ineligibility status at the rate that ineligibility was found as a result of screening. In this survey, screening occurred in the form of sample members self-reporting ineligibility. Self-report ineligibility occurred 203 times in the sample. The self-report ineligibility adjustment was achieved by adding the self-report ineligibles in the numerator and denominator of the location rate proportion. This process is intuitively appealing because the self-report ineligibles were in fact located. Mason et al. (1996) presented a response rate based on this approach called the pre-mailing eligible response rate, indicating that eligibility was taken into account after the DEERS ineligibles were removed from the sample.

Table 3.
Location Rates, Response Rates, and Completion Rates

	1995 Sexual Harassment Survey				1988
	<i>Form A</i>	<i>Form B</i>	<i>Form C</i>	Total	Survey
Location rate ^a	93%	95%	95%	94%	92% ^d
Completion rate (for locatables) ^b	49%	61%	60%	57%	60%
Response rate ^c (Location rate x Completion rate)	46%	58%	56%	54%	55% ^d

Note. The rates in this table are computed from the information in Table 1.

^a Location rate = (Located eligible sample + Self-report ineligibles) divided by (Eligible sample + Self-report ineligibles)

^b Completion rate = (Usable eligible surveys + Self-report ineligibles) divided by (Located eligible sample + Self-report ineligibles)

^c Response rate = (Usable eligible surveys + Self-report ineligibles) divided by (Eligible sample + Self-report ineligibles)

^d These values for the 1988 survey are extrapolated using (a) known values from the technical report (Martindale, 1990) and (b) ineligibility rates found in the 1995 survey.

The data in Tables 2 and 3 represent observed or unweighted counts of sample members, which are useful for monitoring the survey when it is in the field. But because these surveys have unequally distributed samples, weighted response rates are needed for making comparisons among surveys.

Table 4 shows the weighted response rates which are estimates of the population propensities to respond to a particular survey effort. While *Form B* and the 1988 survey do not differ significantly, all other response rates are statistically different. Most of the differences are, however, small and only achieve significance due to the large sample sizes. Notably, *Form A* had a significantly lower response rate than did the other surveys. *Form A* differed from the 1988 survey in (a) occurring a little over six years later, (b) being a scannable form rather than a form that had to be keypunched, and (c) having more mailing attempts. It seems likely that the difference in response rates for these two surveys is an indication of declining response rates to surveys in general. Just to stay even in response rates (*Form B* and the 1988 survey), 1995 administration methods had to be more elaborate. The 1995 response rates were obtained using

five mailings (i.e., a notification letter, a survey mailing, a reminder letter, two additional survey mailings), rather than the two mailings used in the earlier survey (i.e., two survey mailings).

Table 4.
Weighted Response Rates

Survey Form	Rate	Standard Error
<i>Form A</i>	49.5%	0.7%
<i>Form B</i>	53.4%	0.5%
<i>Form C</i>	56.7%	0.6%
1988	53.9%	0.7%

Note. Populations estimated for *Forms B* and *C* included members of the AGRs/TARS who were excluded from the other two populations. All rates were significantly different ($p < .05$) except for *Form B* and the 1988 survey.

In recent years, civilian and military surveys have generally experienced decreased response rates (e.g., see Kalton, 1988). For example, P. Rosenfeld (personal communication, December 4, 1995) stated that the "adjusted response rate" for the *Navy Equal Opportunity and Sexual Harassment Survey* has decreased by about one-third over the last six years: 60% in 1989, 48% in 1991, and 41% in 1993. This decrease occurred despite using the same sample-selection and mailing procedures across all three administrations. It appears that the added mailings for the 1995 administration helped keep the survey response rates comparable to those for the 1988 survey. Another survey-methodology concern is that response rates may drop most precipitously when going back to the same population too often with the same topic, if not the same questions.

The most noticeable differences in *Form A* versus *Forms B* and *C* is that (a) high-quality color graphics with logos of the Service emblems were used on only *Forms B* and *C*, (b) color was used to indicate response areas on only *Forms B* and *C*, and (c) an updated content was included on only *Forms B* and *C*. The 3-percentage-point difference between *Forms C* and *B* could be an indication of the increased response rate for a shorter booklet (12 pages versus 16 pages) despite the fact that the shorter booklet was objectively less appealing with repeated coverage of topics by different versions of questions.

Survey Materials and Their Distribution

All eligible sample members (regardless of survey-form sample) could have received up to five different mailings: notification letter, a wave 1 letter and survey, a reminder/thank-you letter, a wave 2 letter and survey, and a wave 3 letter and survey. The 4.5" x 9.5" window envelopes for the notification and reminder/thank-you mailings contained only a letter. The 9" x 12"

window envelopes for the other three mailings included a cover letter, a survey, and a folded pre-addressed business-reply envelope.

Letters

DMDC provided DoD and Coast Guard officials with a draft set of five letters—one for each of the five different mailings. These letters contained information describing why the survey was being conducted, how the information would be used, and why participation was necessary. DoD and Coast Guard officials modified the five core letters to reflect points that the officials wanted to stress. Thus, the final text of the DoD letters differed from the final text used in the Coast Guard letters. (See Appendix I for a copy of the letters.) Two versions of a DoD or Coast Guard letter were printed whenever the letter mentioned the survey by name because the name appearing on the front of *Form A* was different from that on the front of *Forms B* and *C*.

All letters to DoD personnel included Edwin Dorn's reproduced signature and the letterhead for his position: Under Secretary of Defense (Personnel and Readiness). Coast Guard personnel received all of their correspondence on letterhead from the Office of the Coast Guard. Their notification letters included the reproduced signature of Commandant Robert E. Kramek, and their letters for the other four mailings were sent using the reproduced signature of W. R. Somerville, Chief, Office of Civil Rights. All DoD and Coast Guard letters included signatures printed in blue. All DoD correspondence was printed with blue letterhead, whereas all Coast Guard correspondence was printed with black letterhead.

The text and recipient information of all letters were printed in black. In addition to including a name and address (which was also used as the mailing information for the window envelopes), each letter included a personalized salutation. The salutation addressed each member by his/her general or specific rank. For example, a letter to a Navy E5 with the last name Smith would have included the salutation, "Dear Petty Officer Smith". Similarly, an Army O3 named Jones would have received a letter starting, "Dear Captain Jones".

Survey Control System (SCS)

The SCS is a relational database that was used to monitor all data transactions over the course of the project. The datasets in the SCS do not contain any data obtained with the survey instruments. Because of privacy concerns, the SCS datasets are not available for public release and personal identifying information has been deleted from existing copies of the data.

DRC used the SCS to store and update project data, monitor mailings, respond to documents returned PND, and determine survey participation and eligibility status. The SCS was created from the DMDC-provided data on all 91,006 sample members. The SCS is composed of four SAS[®] datasets: SAFSDAT, CURRENT, HISTORY, and LITHO. Information in these relational datasets are linked by the INRECNO, a unique individual record number that DRC assigned to each sample member when the four SCS files were created.

The SAFSDAT dataset consists of 91,006 records—one for each member in the drawn sample. Each SAFSDAT record includes an INRECNO, member name, paygrade, and up to two addresses: residential and unit/office. To ensure that the SCS read and stored all DMDC-supplied data correctly, DRC compared SCS-generated frequencies to DMDC-supplied paper copies of the frequencies.

Immediately preceding the second round of survey mailing, DMDC provided DRC with an updated file. The updated file contained each sample member's social security number, abbreviated rank, name, addresses, and eligibility codes. The updated data were appended to the corresponding record in the SAFSDAT dataset. In each SAFSDAT record, the updated residence address was compared to the original residence address to see if the updated residence address was the same as or different from the original residence address. If different, the record was flagged in the CURRENT dataset as having an updated address.

The CURRENT dataset also contains one record for each sample member. Initially, CURRENT records were extractions from the SAFSDAT dataset. Each CURRENT record contained only the highest priority address from the SAFSDAT dataset, identification of which address it was (e.g., residence or unit), and the lithographic code of the survey (if any) sent to the address. When the address in a record was found to be invalid (e.g., resulted in a PND), the SCS updated the address field in the CURRENT dataset by pulling in the next highest priority address from the SAFSDAT dataset. Alternatively, the CURRENT dataset was updated by key entry when sample members faxed or mailed updates (changes in addresses, paygrades, etc.). Address updates received from Trans Union³ were entered automatically through the SCS. When updated information was recorded in the CURRENT dataset, the outdated information in CURRENT automatically created a new record in the HISTORY dataset.

The HISTORY dataset contains 57,091 records; each record is a subset of an outdated CURRENT record. That is, a HISTORY record was created when there was a name, address, paygrade, or eligibility status change in the CURRENT dataset. Information on the source (e.g., fax) of the revision and the record's INRECNO were also included in the HISTORY record. As new HISTORY observations were created, the SCS constructed a unique identifying variable, HISRECNO, and attached it to the record.

The LITHO dataset contains 209,401 observations—one for each printed survey. Each record in the LITHO dataset includes a unique lithographic serial number, the INRECNO, and the mailing status (e.g., whether or not the survey/lithographic serial number had been mailed, and whether or not it had been returned PND) for the lithographic serial number. The three survey forms used the following non-overlapping lithographic serial numbers: 000,002 to 072,368 for survey *Form A*; 100,052 to 215,337 for *Form B*; and 300,002 to 322,803 for *Form C*. Within those ranges, some surveys/serial numbers were never assigned. Several copies of each survey

³ Trans Union is an outside vendor with a consumer-credit-information database. Social security numbers of sample members with incomplete or out-of-date address information were forwarded to Trans Union for address updates when the CURRENT dataset contained no other address.

form were used as samples, and random printing errors and quality checks caused the retirement of other lithographic serial numbers.

Address-update Procedures

DMDC instructed DRC to mail letters/surveys using the following order of preference: DMDC-supplied home address, DMDC-supplied unit (i.e., office) address, and Trans Union-supplied home address. These three addresses were sometimes supplemented by address corrections forwarded from the Service member or the U.S. Postal Service. Whenever a new home address was received (e.g., in the DMDC-provided update file), the new address was given the highest preference.

Twice during the survey fielding, letters (notification and reminder/thank you) to the respondents included the address and fax number of DRC, along with a request for corrections to address or demographic information. Respondent-supplied updates made by fax or regular mail (and a few telephone calls) generally did not result in a re-mailing of prior-sent materials to the new address. Instead, the new address was used in subsequent mailings of new materials. It was assumed that the previous letters, and possibly surveys, had reached the individual. If, however, the respondent-supplied update included a request for a survey, the individual was included in a re-mail. In other cases, the postal service provided address-correction information (a photocopy of the forwarded envelope with change-of-address information). In these cases, survey materials were mailed to the new address during the next re-mail.

Figure 1 shows the process that DRC used to mail survey materials. The first step in the process was to read the DMDC-provided information into the SCS. Next, DRC ran mailing-list-preparation (Group 1) software to identify problem addresses (e.g., no street address or a street that does not exist in a city), clean usable addresses, add ZIP+4 bar coding for each address, and sort the addresses by ZIP code to minimize outbound postage costs. If a sampled member had neither a home nor unit address, DRC included the member's name and social security number on a data tape sent to Trans Union with a request for the credit-check firm's addresses for the individual.

Assuming that DRC had a home (or unit) address on a member, the mailing process began with that address. DRC modified the SCS and used a new home address in the next re-mailing or mailing if (a) a member self-reported a new address by fax or letter, (b) the postal service forwarded an address correction, or (c) Trans Union provided a new address. When an undeliverable letter/survey was returned PND without forwarding information, DRC altered the SCS and made the unit (if available) the address of choice. A letter that did not result in one of these three invalid-address conditions was assumed to have been addressed correctly. All subsequent mailings were sent to that address unless one of the three invalid-address conditions occurred later.

Except for PNDs, returned surveys (completed, partially completed, or blank) were documented in the SCS so that those members were not sent any additional surveys. If the member neither returned a survey nor requested to be dropped from the study, the next mailing

was sent to the respondent at the same address. Individuals who requested to be dropped from the survey received, at minimum, the first three sets of mailings (the notification letter, the wave 1 survey, and the reminder/thank-you letter).

Figure 1 shows that this cyclical process was the same when unit and Trans Union addresses were used. Throughout the entire mailing phase of the survey administration, DRC was able to document every address, name, or paygrade change by modifying the CURRENT and HISTORY datasets. The prior section on those datasets described how each was modified when a change was entered into the SCS.

General Mailing Procedures

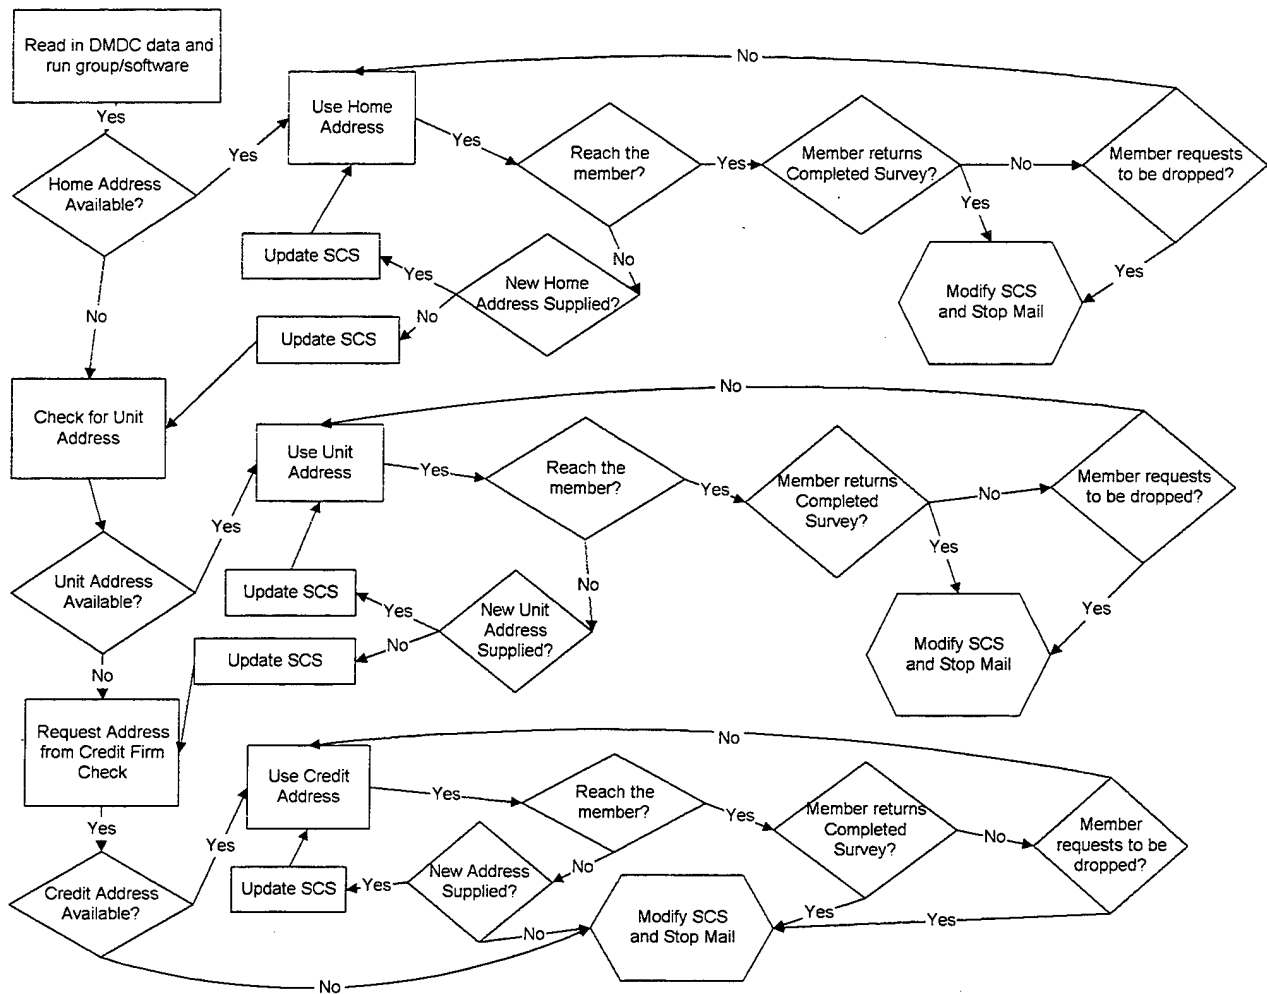

Prior to every mailing, the SCS searched the 91,006 records in the CURRENT dataset to identify which records should be excluded (e.g., members flagged as ineligible for survey participation, members who had already returned a survey form, and members with no valid address available). For the re-mails (as opposed to the regular mailings), the SCS identified only those records that had been updated since the prior mailing. More specifically, the SCS identified records that had resulted in a PND or had been manually flagged for re-mailing (e.g., when a sample member faxed a note to DRC after receiving a reminder/thank-you letter without receiving a survey).

Once all records for a mailing or re-mailing were identified, the SCS processed them based on whether or not the mailing would include a survey form. The addresses for mailings and re-mailings that did not include a survey were first standardized with Group 1 postal software. After this procedure, letters were generated with the record's unique INRECNO printed in the lower right-hand corner, machine inserted into envelopes, and mailed first class.

For mailings and re-mailings that included a survey, the SCS first sorted all of the included records according to which survey form was to be included in the envelope. Each survey-form group was processed separately with Group 1 postal software. Each record within a survey-form group was then assigned a survey/lithographic serial number. (For example, the SCS accessed the LITHO dataset for *Form A* records, found the next unassigned lithographic serial number, and assigned a number to each *Form A* eligible record. This process was repeated for records slated to receive *Forms B* or *C*.) For each record in the mailing or re-mailing, the SCS recorded the lithographic number and the date the survey was mailed in both the LITHO and CURRENT datasets. Upon completion of the prior step, letters were generated and printed in lithographic-number order with the corresponding lithographic-number printed on each letter. Each cover letter was paired with its matching lithographic-numbered survey, machine inserted into an envelope, and mailed first class.

During the matching of surveys to cover letters, DRC visually checked 5% of the letters and surveys to determine whether the code numbers matched. This quality assurance process minimized the possibility of mismatching surveys to INRECNOs and cover letters.

Figure 1.
Address Updating Process

Description of Each Mailing or Re-mailing

Tables 5 through 8 show information on the 11 mailings and re-mailings for the three forms collectively and separately. For each mailing and re-mailing, Table 5 provides the dates when the survey materials were delivered to the U.S. Postal Service, the numbers of members who were sent materials during the mailing or re-mailing, the number of surveys that were eventually returned by respondents, and the number of PNDs that occurred during the mailing or re-mailing. To avoid redundancy, this section reviews only the information for the three forms collectively (Table 5). Analysts, researchers, and other readers can use this explanation to understand the form-specific information presented in Tables 6-8.

Table 5.
Mailings for All Three Forms: Dates, Numbers of Pieces Sent, and Outcomes

Mailing Sequence and Content	Date	Sent	Returns	PND
1. Mail notification: Main	2/15	88,989	N/A	16,466
2. Re-mail notification: Main	3/11	9,478	N/A	1,345
4. Mail notification: Late	4/11	4,862	N/A	1,031
3. Mail wave 1 survey: Main	3/27 - 3/30	83,658	34,106	6,733
6. Mail wave 1 survey: Late	4/17	4,911	1,500	1,004
7. Re-mail wave 1 survey: Main	4/24	1,311	346	244
5. Mail reminder/thank-you letter: Main	4/11	83,701	N/A	8,049
9. Mail reminder/thank-you letter: Late	5/12	3,809	N/A	589
8. Mail wave 2 survey: Main	4/27 - 5/01	60,269	8,725	4,613
10. Mail wave 3 survey: Main & late	5/26 - 6/01	49,717	4,883	3,557
11. Re-mail wave 3 survey: Main/late PNDs	6/27	1,775	214	417

Note. Mailings are grouped by content of the mailing. The number indicates the sequence in the mailing process.

6. Mail wave 1 survey: Late	4/17	534	155	106
7. Re-mail wave 1 survey: Main	4/24	94	32	16
5. Mail reminder/thank-you letter: Main	4/11	9,048	N/A	880
9. Mail reminder/thank-you letter: Late	5/12	414	N/A	62
8. Mail wave 2 survey: Main	4/27 - 5/01	6,486	1,023	534
10. Mail wave 3 survey: Main & late	5/26 - 6/01	5,165	553	378
11. Re-mail wave 3 survey: Main/late PNDs	6/27	195	23	41

Note. Mailings are grouped by content of the mailing. The number indicates the sequence in the mailing process.

On 15 February 1995, DRC delivered the first mailing to the U. S. Postal Service. The first mailing contained 88,989 survey-notification letters. Letters were not sent to the 1,320 members who became ineligible before the mailing started or to the 697 members whose CURRENT records had either incomplete or no address information. A total of 16,466 (19%) of the 88,989 notification letters were eventually returned to DRC as PNDs.

DMDC makes heavy use of notification letters for three reasons.

- Contacting potential respondents multiple times (e.g., by supplementing survey mailings with notification letters) is perhaps the most effective means of increasing survey response rates (Fox, Crask, & Kim, 1988; Yammarino, Skinner, & Childers, 1991).
- The U.S. Postal Service does not always forward the large envelopes that are used to mail surveys despite the envelopes' first class postage and request to forward. Forwarding is, however, more routine for mail in standard, business-sized envelopes.
- It is cheaper to send an initial notification letter and have that letter returned PND, correct the address, and re-mail the notification letter to the correct, updated address than to start the process by mailing the survey.

About four weeks after mailing the initial batch of notification letters, an additional 9,478 notification letters were sent. Most of the Mailing 2 letters ($n = 8,960$) were addressed to members whose original letters resulted in PNDs and postal service-supplied address updates. The remainder ($n = 518$ of the original 697 invalid addresses) of the letters were sent to sample members for whom Trans Union provided addresses.

Mailing 3 was the first mailing that included surveys; these survey materials were sent to 83,662 members. Relative to Mailing 1, Mailing 3 was sent to 5,331 fewer members. The large difference was due to several factors: the number of notification letters that were returned PND without an updated address, members who contacted DRC to say that they were no longer on active duty, members who were supposed to receive a letter during Mailing 2 but did not due to a printing error, and members who were slated to receive a notification letter in Mailing 4. About 41% of the Mailing 3 surveys were eventually returned by respondents. Another 8% of Mailing 3 surveys were returned PND despite the address updating that had occurred in the first two rounds.

In Mailing 4, notification letters were again mailed. This late contingent of 4,863 members included individuals (a) from Mailing 2 who were not sent a notification letter due to a shortage of letterhead, (b) whose Mailing 3 letter had resulted in a PND with an updated address, and (c) for whom Trans Union supplied new addresses. This late group was put on a shortened mailing schedule which skipped all wave 2 survey mailings and was incorporated into the wave 3 mailing and re-mailing schedule.

A reminder/thank-you letter (Mailing 5) encouraged individuals from Mailing 3 to return their wave 1 surveys. This mailing did not include any members from Mailing 2—the late contingent.

In Mailing 6, wave 1 surveys were sent to an additional 4,911 members. The majority ($n = 4,862$) of the members in Mailing 6 were the same people who had been included in the late wave group (Mailing 4). The other 49 members of Mailing 6 had been part of the group receiving Mailing 3. These 49 members were added to the late wave group because their Mailing 3 surveys had been mutilated during the mail-insertion process. These additional members remained in the late mailing group for the remainder of the survey fielding.

The wave 1 survey re-mailing (Mailing 7) was sent to 1,311 members who had originally been in the wave 1 survey mailing (Mailing 3). All of the members in Mailing 7 were follow-ups to PNDs that were returned with forwarding addresses.

The major wave 2 survey mailing (Mailing 8) was sent to 60,269 members. This mailing excluded people who (a) requested to be dropped from the survey, (b) had their "completed" surveys scanned and entered into the SCS, or (c) were included in Mailings 6 or 7. Respondents returned 14% of the Mailing 8 surveys. Another 8% of the wave 2 surveys were returned PND.

Mailing 9 was a reminder/thank-you letter sent to the late subgroup. The size of the mailing had been reduced by approximately 22% since Mailing 6 (using the conditions listed for Mailing 8).

Nearly 50,000 sampled members were mailed a wave 3 survey (Mailing 10). The intended recipients of wave 3 consisted of all eligible sample members (including the late group) who had neither returned a survey nor indicated that they did not want to participate in the survey.

The last survey mailing was the wave 3 survey re-mailing (Mailing 11). Nearly four months after the start of the survey-fielding period, DRC still needed to re-mail surveys to 1,775 addresses that the U. S. Postal Service forwarded in response to PNDs.

The cutoff for data receipt was originally scheduled for the first week in July 1995. Because a substantial number of returned surveys were still being received at that time, DMDC extended the data cutoff date until 18 September 1995. At the end of the survey mailing period, DRC had sent a total of 392,480 pieces of mail: 190,839 notification or reminder/thank-you letters and 201,641 packets containing surveys, cover letters, and a return envelope. Across the entire fielding period, 44,048 of the 392,480 pieces of mail were returned as PNDs.

Processing Returned Surveys

This phase of the survey process can be divided into three general steps. In the first step, DRC performed two tasks: scanning raw data from every optic-read area on the first 150 returned surveys and using a DMDC-supplied coding scheme to write software that converted the raw data to scored data. In the second step, DRC revised their programs after the test with the first 150 records, scanned surveys in batches as they were returned, and created a SAS[®] program containing variable and value labels. Interspersed among these tasks was the delivery of three (preliminary, interim, and final) datasets and tables showing the frequency of response for each variable in the datasets. This step provided DMDC with an opportunity to monitor data

collection and begin preliminary analyses. In the third stage of processing returned surveys, DRC created files that contain narrative information (e.g., comments) from the surveys. These three stages of processing returned surveys are more fully described in the remainder of this section.

Preparing the Scoring Software and Coding Scheme

As soon as DRC received a scannable copy of each survey form, programmers began writing and testing programs to capture the data from the surveys. The first step was to prepare the scanner to capture data from every optic-read bubble or box on the form. DRC scanned the first 150 returned surveys for each form to begin developing raw data files (SCANA.3 for *Form A*, SCANB.3 for *Form B*, and SCANC.3 for *Form C*).

DRC provided DMDC with paper and electronic copies of the first 150 cases. DMDC performed a check to determine if (a) the scanner was able to pick up lightly marked bubbles and (b) respondents were consistently answering in an unexpected manner (e.g., marking more than one bubble for a single-answer item such as highest education level completed). DMDC's check of the output verified that the scanner was functioning properly and that members were generally responding as expected.

At the same time, DRC began writing software to convert raw data to scored data. To start this task, DMDC provided DRC with annotated copies of the three survey forms and the coding notes contained in Appendix E. A guiding assumption in designing the coding scheme was that the analysts creating the dataset would not be the only people analyzing the data. DMDC datasets are analyzed repeatedly over time by people in governmental, private-sector, and academic organizations. Care is taken in organizing and documenting DMDC surveys so that secondary analysts can use the data and be reasonably certain that they understand how the data are coded and what limitations exist. Moreover, every attempt is made to preserve all information from completed surveys so that secondary analysts can later construct variables that were not anticipated by the original DMDC researchers.

DMDC uses "backward" coding to capture inconsistent answers that are given in skip patterns. For example, a respondent's answer to the first item in a skip pattern might indicate that the remaining items in the pattern should be skipped, but the respondent then answers one or more items within the skip pattern. Using DMDC backward coding, that answer to the first item would be coded "-2" (i.e., implied continuation) in the scored-data file. This coding allows data to be preserved for the remaining items in the skip pattern. The use of such painstaking coding preserves as much data as possible and allows future data analysts to decide how to recode such answers. For example, each analyst can decide whether to accept the stored values for the remaining skip-pattern items or to recode the data to "-6" (i.e., not applicable [valid skip]).

Creating the Scored Datasets

Prior to scanning bubbled answers and key entering narrative answers, returned surveys were visually checked and separated into two groups: blank forms versus surveys with one or more items completed. Blank forms were further divided into batches according to the reason (e.g., separation from the military, transitioned from active duty to the Guard or Reserve, death,

or no reason given) that the form was returned blank. The reason was captured in BLKREAS in the SCS. All blank forms were optically scanned so that lithographic serial numbers could be tracked and the number of returns could be updated.

Approximately 2% (fewer than 1,000 surveys) of the respondents returned surveys that were mutilated in the mail or completed in ink. DRC re-gridded the bubbles for these respondents to ensure that all usable data were captured.

Once these preliminary steps were taken, DRC scanned the surveys, edited surveys that were flagged by the scanner because the pencil marks were too light, scored the data, and created two types of data files: SAS[®] files and ASCII flat files (OS files). All DMDC survey data are stored in SAS[®] files for DMDC's official use. Recognizing that many analysts use other statistical packages for their analyses, DMDC also provides ASCII flat files.

In addition to the previously mentioned 150-record check of raw data, DRC provided DMDC with preliminary, interim, and final datasets and codebook tables (like those shown in Appendix G) for the three forms of the survey. DMDC used the preliminary and interim datasets and codebook tables to finalize the information to be documented in the tables, identify out-of-range errors (e.g., a respondent marked on the survey a current age of 15 years, but military service requires that an individual be at least 17 years of age), create additional flag variables (e.g., a total score for the number of sexually harassing behaviors that a person experienced), and begin preliminary analyses. The final version of the datasets and tables also went through a similar fine tuning before they were published in their present form.

Capturing Respondent-supplied Statements

After each batch of surveys was scanned, the surveys were transferred to key-entry personnel for comment entry. These personnel manually checked each page of the survey to determine if a respondent had supplied narrative answers to "Other, please specify" items or the general comments section at the end of the survey. "Other, please specify" items offered respondents a space for writing an answer when the pre-specified options did not fully cover all alternatives. For this type of item, DRC entered the first 51 characters of the written response. For the general comments at the end of the survey, 100% of information on the comments page was captured. Additional materials (letters, documentation on complaints, etc.) sent back with the survey were read by DMDC staff, but the material was not added to the comments file.

The text of both types of narrative information was key entered verbatim into ASCII files and spell-checked. Proper names were replaced with "(name)" and expletives were changed according to the following rules.

- If the questionable word referred to a body part and was used to explain a situation, the data-entry person substituted a formal name for the slang/expletive word. The substituted word was enclosed in brackets.
- If the questionable words were used in any other manner (e.g., to call a person a derogatory name or to swear as part of a statement), the word was replaced with "(expletive)".

These ASCII files contain INRECNOs to allow DMDC personnel to relate narrative responses to all other variables in the sexual harassment databases. Because of privacy and confidentiality concerns, these files are not available for public release.

Three files were created for the text of all "Other, please specify" responses. These files were named SPECIFYA (for *Form A* text), SPECIFYB (for *Form B* text), and SPECIFYC (for *Form C* text). Within each file, responses were tied to a survey by the lithographic number and the "Other, please specify" question number.

Individual files were created for the text of all the open-ended general comment responses. The name of the comment file was the lithographic code of the survey from which the comment was taken.

When the scanner detected text in an "Other, please specify" or general comment area, it placed a "1" in the corresponding field in the scanned data files. These "1" flags were used during the survey field period to monitor the occurrence of write-ins and to help verify that all general comments and "Other, please specify" answers were keyed and associated with the appropriate sample member. Because the scanner could make false detections from printed text on the reverse side of the page, scanned detection of narrative answers may not be reliable for indicating that written text was entered.

Survey Analysis Files

This section of the report (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files created for *Forms A-C*, (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

Care was taken in the preparation of survey analysis files to provide public-access to data from these surveys with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the public-release files either because (a) they are typically needed only to analyze survey methods and not needed to analyze the survey data or (b) they provide too great a chance of identifying an individual. For the latter reason, some demographic variables are available on public files only in a collapsed version.

Estimation

Data for *Forms A-C* were collected from non-proportional stratified random samples. Responses were weighted up to population totals adjusting for differential sampling and response rates in demographically homogenous groups. In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions, tests of hypotheses and regression relations) and their associated variances are derived from the probability structure that gives rise to the observations. As with other surveys that involve complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the *coefficient of variation* [$SE_{(x)}/x$] of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Approximations must, however, be found for the variances. The approximations commonly take the form of Taylor series linearizations or replicate methods such as those based on resampling methods. Variables have been included in the analyses files so that variance estimates can be based on Taylor series linearizations computed by SUDAAN[®] for a stratified, without replacement design. Mason et al. (1996) provided more detail on variance estimation and examples of analyses of these data using SUDAAN[®]. Replicate methods can also be used to estimate the variances; however, replicate weights (required for many of these approaches) have not been prepared.

Many of the standard statistical software packages, such as SPSS® and SAS®, do not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Analyzing the sexual harassment datasets with the proper use of FINAL_WT as the weighting factor in standard statistical programs (e.g., SAS® and SPSS®) will result in accurate point estimates but will *not* result in accurate variance estimates. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys including replication, Taylor series approximation, and analytic methods.

Data Structure

Three analysis files have been prepared for each survey form: (a) the *Survey Analysis File*, which is the public-release file; (b) the *Methods Analysis File*, which is for internal DMDC use only and contains a more complete set of variables; and (c) the *Duplicates Analysis File*, which is structured like the Survey Analysis File but contains records for extra surveys returned from some survey participants. These files were prepared as SAS® system files. OS or flat files were also prepared from the SAS® system files. The OS files can be read as input by other statistical packages such as SPSS®, some of which can also use SAS® system files as input. File names are indicated in Table 9.

Table 9.
Analysis File Names

	Form A	Form B	Form C
Survey Analysis File	SHS95AS.SD2	SHS95BS.SD2	SHS95CS.SD2
Methods Analysis File	SHS95AM.SD2	SHS95BM.SD2	SHS95CM.SD2
Duplicates Analysis File	SHS95AD.SD2	SHS95BD.SD2	SHS95CD.SD2

Note. The file extension .SD2 is for the SAS® system files. The file extension .DAT is used for the OS files.

Survey Analysis File

Because DMDC is unable to foresee all possible analyses that external analysts might want to conduct, every effort has been made to provide access to the vast majority of the data related to this project. The exception is that data for some variables have been either collapsed into broader categories or left out of the database to protect the anonymity of the respondents and nonrespondents.

The total of the three Survey Analysis Files is 50,051 records—14,658 *Form A*, 29,687 *Form B*, and 5,706 *Form C*. Two types of records are included in these files: records for study subjects determined to be ineligible (known ineligible), and records for study subjects who returned usable surveys and are assumed to be eligible (eligible respondents). Both the eligible respondents and known ineligible are included because they are needed to develop accurate weights that sum to the population total and to compute accurate variance estimates by the Taylor

series linearization method implemented by SUDAAN[®]. For all records in the Survey Analysis Files, WGHT_FLG = 1, which is an indicator that the appropriate information was available to assign a non-zero final weight to the study subject. WGHT_FLG is not an indicator of whether a completed survey was returned.

Figure 2 depicts the public-release Survey Analysis Files as a stack that includes these two types of records. Assignment of a record to one of those two subgroups was based on whether or not (a) a member returned a “completed” survey and (b) the person was eligible to be included in the population of interest (i.e., was found to be on active-duty in the DEERS files on 14 January 1995 and 4 April 1995, and did not contact DRC to indicate that they were ineligible, as discussed above).

Figure 2.
The Structure of the Survey Analysis Files

Subgroups	Number of Records	Form(s) Completed
Known Ineligible Sample Members (WGHT_FLG = 1 and ELIG_FLG = 0)	1,059	<i>Form A</i>
	1,391	<i>Form B</i>
	346	<i>Form C</i>
	2,796	Total
Respondents, assumed eligible (WGHT_FLG = 1 and ELIG_FLG = 1)	13,599	<i>Form A</i>
	28,296	<i>Form B</i>
	5,360	<i>Form C</i>
	47,255	Total

The bottom portion of Figure 2 depicts those individuals assumed to be eligible (ELIG_FLG = 1) who returned a survey. The bottom row of Table 2 shows that 47,255 usable surveys were returned for *Forms A, B, and C* from eligible respondents.

The top portion of Figure 2 represents those individuals drawn for the sample from the October ADMF and the September RCCPDS who later became ineligible (ELIG_FLG = 0) to be included in the survey. For some of these individuals, the ineligibility was determined by DMDC record checks in January and April 1995; and for others, it was determined by self-report (see Table 2). Only 2,796 people from the entire sample of 91,006 fit into this category.

Only records with ELIG_FLG = 1 contribute to accurate point estimates, and only these records should be used with statistical software other than SUDAAN[®]. Although records with ELIG_FLG = 0 do not contribute to point estimates, they do contribute to the accuracy of variance computations by SUDAAN[®]. Appendix A in Mason et al. (1996) provided examples of using the ELIG_FLG variable in the SUDAAN[®] SUBPOPN statement.

Methods Analysis File

The Survey Analysis File is a subset of the records and variables that are included in the Methods Analysis File. The Methods Analysis File cannot be released to the public because of anonymity requirements.

The combined Methods Analysis Files contain 90,006 records, one for every sampled person. In addition to the two types of respondent records included in the Survey Analysis Files, Figure 3 shows that the Methods Analysis Files also contain records for the nonrespondent subgroup. This subgroup includes all records indicated by WGHT_FLG = 0, where no response was received and no information was received to indicate ineligibility. More specifically, it includes all members who are in two Table 2 subcategories—*Total: Not located* and *Total: Nonresponse*. The total number of records in these two subcategories is 40,955.

All variables in the Survey Analysis File for a particular form are documented in Appendix G of the report for that form. Intermediate weighting variables that appear only in the Methods Analysis Files are documented in Appendix E of the *Statistical Methodology Report* (Mason et al., 1996). Variables that appear in collapsed form in the Survey Analysis File and in a fuller version in the Methods Analysis File are discussed later.

Duplicates Analysis File

A total of 694 duplicate surveys were returned. In many cases, duplicate surveys were blanks returned by individuals who had received a follow-up mailing after they had returned a completed survey. These blanks are represented in the Duplicates Analysis File. Also in the Duplicates Analysis Files is the later returned survey if more than one completed survey was returned. These files are for use in internal methodological research.

Guide to Using the Public-release Files

Variables in the Survey Analysis Files

The variables in the public-release files fall into four categories: (a) derived from survey responses, (b) created by DRC to document survey operations and data quality, (c) created by Mason et al. (1996) to develop weights for the statistical analyses, and (d) provided to DRC by DMDC. Variables are grouped in these categories in Appendix F and on the dataset documented in Appendix G. Additional variables in each category appear only in the confidential Methods Analysis Files.

Figure 3.
The Structure of the Methods Analysis Files

Subgroups	Primary Analysis Variables	Confidential and Intermediate Weighting Variables	Number of Records	Form(s) Completed
Nonrespondents, eligibility unknown (WGHT_FLG = 0 and ELIG_FLG = .)			16,098	Form A
			20,707	Form B
			4,150	Form C
			40,955	Total
Known Ineligible Sample Members (WGHT_FLG = 1 and ELIG_FLG = 0)			1,059	Form A
			1,391	Form B
			346	Form C
			2,796	Total
Respondents, assumed eligible (WGHT_FLG = 1 and ELIG_FLG = 1)			13,599	Form A
			28,296	Form B
			5,360	Form C
			47,255	Total

Note. The shaded portion represents the subset of the Methods Analysis File that is contained in the Survey Analysis File.

Survey-derived variables. These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality as documented later. The annotated surveys (see Appendices A through C) contain the item names, the values used to code the pre-specified alternatives, and references to applicable Appendix E coding notes. Appendix J gives information on how DMDC evaluated the special values used for variables in survey skip patterns and documents the treatment of these values in DMDC analyses reported by Bastian et al. (1996).

Although the first part of Appendix E extensively documents the conventions that DMDC uses to name survey variables, a brief overview of the naming convention is also given here. In general, survey-derived variables can be subclassified as variables that begin with either "G" or

“SR.” (The one survey-derived variable that begins with something other than G or SR is “COMMENT.” Coding for this variable indicates whether the respondent wrote anything in the general comments box at the end of the survey.)

Naming of “G” variables is reviewed using the example variable, “GA95003A.” The first character in the name specifies the name of the survey. In the present case, the survey is the Gender Issues/Sex Roles survey. The second character denotes which survey form (i.e., *Form A*) the respondent completed. The third and fourth characters indicate the year (1995) in which the survey was administered. The last four digits indicate the item number—Item A in Question 3. Appendix E provides exceptions to this general convention.

The remainder of the survey-derived variables in this section of the dataset begin with “SR”—a mnemonic for self-reported or survey reported. The SR variables are a set of primarily demographic items that are named the same across all three forms. (For example, SRSVC is the variable name for the Service item included on all three forms.) Although all survey data—including responses for variables beginning with G—are self-reported, the SR is used to distinguish the survey-reported information from DMDC-provided information (e.g., SRSVC from the survey versus SVC from the DMDC databases).

Operations contractor-generated variables. DRC created three types of variables: missing, identifying, and matching. The missing variables listed in Table 10 were created to track the number of times that sample members skipped questions or gave invalid responses to survey items. (The latter part of Appendix E contains information on the survey-wide and item-specific codes that were used to indicate missing data.) The variables that begin with “MISS_” provide the sum of how many times a respondent’s record contains each type of missing data. For the MISS_totals, mark-all-that-apply items were only counted once; and imputed variables were not counted.

Table 10.
Variables Indicating How Many Times Missing Codes Were Found on Each Record

Variable Name	Variable Label	Definition
MISS_9	Count of -9/.	Invalid skip (i.e., no response) was given.
MISS_8	Count of -8/.A	Multiple responses were given when one answer was requested.
MISS_7	Count of -7/.0	Specified value is out of the normal range of expected values.
MISS_6	Count of -6/.N	Based on prior answer(s), an item was validly skipped.
MISS_4	Count of -4/.I	Respondent incompletely gridded an answer (e.g., left a column blank).
MISS_2	Count of -2/.	Continuation was implied based on the answer to another item.
MISS_TOT	Sum of MISS variables	This variable is the total number of MISS_ “X” entries on a record.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. LITHO is the lithographed serial number scanned from the survey. BATCH and SERIAL are the

codes printed on the survey during scanning to identify the scan batch number and scan order of each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). SCANDATE is the date the survey was scanned, and INRECNO is a unique identification number that DRC assigned to each record/member. MAILING identifies which survey (e.g., the first wave mailing or the third wave re-mailing) the respondent returned.

The matching variables were used as a quality-control check. More specifically, matching variables (i.e., variables beginning "MAT") were created for some demographic variables to indicate whether or not survey-supplied information matched DMDC-provided data. The demographics used to create matching variables were gender, race, branch of Service, and paygrade. If either the DMDC-supplied or survey-derived information was missing, then the respondent was assigned a value for missing for that matching variable. A value of "1" was assigned if the survey- and DMDC-supplied data matched. Conversely, a value of "0" was assigned when the two types of data did not match.

Analytic weighting variables. The derivation and use of these variables are discussed in detail in the *Statistical Methods Report* (Mason et al., 1996), particularly Appendices A and E. The Survey Analysis Files have five analytic weighting variables:

WCSTRAT	Weighting class strata formed by aggregation of the sampling strata
WGHT_FLG	Flag indicating records weighted as respondents or known ineligible sample members—called RESP_FLG by Mason et al. (1996)
ELIG_FLG	Eligibility flag used to exclude ineligible sample members when computing point estimates
NWCSTRAT	Frame count within each weighting class stratum
FINAL_WT	Analysis weight

DMDC-provided variables. Before the first mailing, DMDC provided DRC with a tape containing information extracted from large, multi-purpose databases (i.e., DEERS, ADMF, and RCCPDS). The tape also included project-specific variables that were created from the extracted information. Three demographic variables that were not modified from record data are included in the Survey Analysis Files: gender (SEX), Service (SVC), and component (COMP).

Three other variables constructed from record data for sample planning are also in the Survey Analysis File. RSERVICE was formed from SVC and COMP to define a stratification variable—For stratification, all members in AGR/TAR programs, regardless of Service, were classified as AGR/TARs as if it were a Service. LOCATION is the stratification variable that was used to represent whether members were (a) stationed in the contiguous 48 states plus the District of Columbia, excluding Navy personnel and assigned to ships; or (b) stationed elsewhere, including all Navy personnel assigned to ships. As discussed previously, a third variable (OCCLS) was constructed to group duty occupations in terms of the percentage representation of women in the occupation group (also see Appendix K). This variable was not used to stratify the sample but was used to establish domains for the *Form B* survey sample plan.

Certain demographic variables, including some information collected on the survey form, had to be censored to preserve the anonymity promised to survey respondents. For example, R_SRAGE, R_SRED, and RGB95035, are recodings of SRAGE, SRED, and GB95035. The codebook page in Appendix G for each variable shows how it was collapsed from the fuller variable. Double asterisks (**) on entries in Appendix D show which survey items were censored and the recoded version of the items.

Certain key demographic variables that were constructed for DMDC analyses (Bastian et al., 1996) are also included on the file. These variables (e.g., XSEX) are distinguished by names beginning with an "X". These analytic variables are based primarily⁴ on self-reported information from the survey. In cases where the self-reported information was missing, the missing value was imputed from the member's record. Also, other imputations were made so that race and ethnicity could be reported in accordance with Office of Management and Budget (OMB, 1977) Statistical Directive 15 on standards for reporting Federal statistics. For members who self-reported "Other" as their race, race was imputed from record data; further, if the record data did not include a valid race value, then race was treated as missing. The SAS[®] code used in constructing these analytic variables is included in Appendix J.

The final variables on the Survey Analysis Files were constructed to indicate whether members reported that they had experienced unwanted/uninvited behaviors. Many of these variables were used in the analyses reported by Bastian et al. (1996). For Items GA95012A through GA95012J in *Form A*, two summary variables were constructed to indicate if the member marked that one or more behaviors was experienced. The first variable, INCTYP_A, was used by Bastian et al. (1996) to maintain continuity with the calculation reported by Martindale (1990) which includes GA95015A through GA95015J in the calculation. Because items GA95015A through GA95015J were not included in *Form C*, a slightly different summary variable, INCTYP_C, was also calculated. INCTYP_C was calculated for the Survey Analyses Files for *Forms A* and *C* to allow comparisons of these two forms. INCTYP_C was not reported in Bastian et al. (1996). The SAS[®] code used in constructing these analytic variables for the 1995 survey is included in Appendix J.

For Items GB95071A through GB95071X in *Forms B* and *C*, five category-specific variables and one overall summary for any type of behavior are included: CRDEBVR1 (Crude/Offensive Behaviors, Items 71a-d, f, g, l, m), SXSTBVR1 (Sexist Behaviors, Items 71e, h, i, k), SEXATTN1 (Unwanted Sexual Attention, Items 71j, n, q, r), SEXCOER1 (Sexual Coercion, Items 71o, p, s-v), SEXASSA1 (Sexual Assault, Items 71w, x), and INCTYPE1 (Any Incident, Items 71a-x)⁵. The SAS[®] code used in constructing these analytic variables for *Form B* is included in Appendix J.

Appendix J also documents many decisions made in analyses reported by Bastian et al. (1996). For a large number of survey items, analysts must make decisions on the treatment of

⁴ The most important reason for giving primacy to self-reported data for analysis is that demographics (e.g., paygrade) on the survey are current with the collection of the other information on the survey.

⁵ Item 71y (other) was excluded from analyses because it was rarely reported, and almost never was it the sole item marked in Question 71.

special codes used to indicate inconsistencies in the survey data, especially on respondent failures to follow skip pattern directions. Although the Survey Analysis Files do not contain recoded variables for these items, DMDC evaluations of the special codes for these items are included in Appendix J.

A Description of the Information in Appendix G

Regardless of whether analysts use all or only portions of the database, all analysts should start their analyses by replicating the results found in the tables in Appendix G. It is only by replicating these results that analysts can be sure that they are reading the data correctly. We especially recommend that frequencies be done for ELIG_FLG and WGHT_FLG. All cases should have a value of "1" for WGHT_FLG indicating that the data are the set of records considered to be representative of the entire population for weighting and variance estimation. ELIG_FLG should show the correct number of ineligible records which are to be excluded from all point estimates, but who will contribute to SUDAAN[®] variance estimations. An example of the tables in Appendix G is depicted in Figure 4. Thirteen aspects of the example are indicated by superscripted numbers and described in the following paragraphs that correspond to those numbers.

1. The codebook title. The title is the same for every page in Appendix G of this codebook. It lists both the survey and the specific Form.

2. Variable name. The variable name is up to eight characters in length and corresponds to the variable name that is used in the SAS[®]-based, public-release data file. The conventions for naming survey-derived variables are documented in Appendix E. Appendix F contains a full listing of these and other variables and short descriptions of what the variables document.

3. Statement of survey item text. The text is the verbatim quote of the item wording. In a very few cases, some of the text was deleted because of space limitations. When this occurred, analysts are alerted to this fact by a message at the end of the statement.

4. Location of the item on the OS data file. This information provides analysts with the location of the variable on the flat data files. The OS location provides information on (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy. See Appendix H for further information on the file layout.

5. Information on the variable in the version 6.11 SAS[®] data file. Information on the SAS[®] version 6.11 system file. The length reported here may change for files that have been converted through transport files to other versions of SAS[®].

6. Counts of respondents represented by each value. The count indicates the number of respondents who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running frequencies on the accompanying database. Before running complex statistical analyses, analysts are encouraged to recreate the frequency tables in Appendix G. Recreating the

Figure 4.
Example of a Page from Appendix G

¹1995 Status of the Armed Forces Surveys (SAFS) - Form B

²SRSVC - ³In what Service are you?

⁴OS DATA

COLS	LENGTH
0006-0007	2

⁵SAS DATA

FORMAT NAME	TYPE	LENGTH	INFORMAT
B SRSVC	NUM	4	STDOS2

⁶ FREQ	⁷ PERCENT	⁸ OS VALUE	⁹ SAS VALUE	¹⁰ MEANING
197	0.7	-9	.	No response
1187	4.0	-1	.B	No survey returned
9241	31.1	1	1	Army
6108	20.6	2	2	Navy
2855	9.6	3	3	Marine Corps
7830	26.4	4	4	Air Force
2269	7.6	5	5	Coast Guard
¹¹ 29687	¹¹ 100.0	Totals		

¹²PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

¹³The Same Item in Other Forms

A	B	C	88
SRSVC		SRSVC	SRSVC

¹⁴G-4

counts minimally ensures that the data are being correctly read by the analysts' computers and programs.

7. Percentages of respondents represented by each value. The percentages are calculated by dividing the number in the "FREQ" column (on the same row) by the total number at the bottom of the "FREQ" column. The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running frequencies on the accompanying database.

8. Actual (or recoded) OS file response values. The values appearing in this column are for the OS (flat file) version. Interpretation of these values and the rules for their assignment are found in the annotated survey form and the coding notes included in Appendix E.

9. Actual (or recoded) SAS[®] file response values. The values appearing in this column are for the SAS[®] system file. Interpretation of these values and the rules for their assignment are found in the annotated survey form and the coding notes included in Appendix E.

10. Explanation of the response value codes. The verbal explanations of the coding are found in either the annotated survey form or in Appendix E. If the verbal explanation of the coded information pertains to a response alternative in the annotated survey, the text in the table is the verbatim response from the form.

11. Total of response frequencies and percents. The number appearing at the bottom of the "FREQ" column is the total number of individuals in the public-release database. The number is the same for every table in this codebook. That is, every individual in the database is accounted for on every variable, even if the variable indicates only that the information was missing for the member.

The number appearing at the bottom of the "PERCENT" column is typically 100.0. Rounding of the percentages for the individual values in the table, however, occasionally causes the total percentage to be slightly above or below 100.

12. Messages to analysts. These messages alert analysts to a number of situations including (a) rounding errors resulted in a total percentage that was not equal to 100%, (b) the variable could assume values that were "Too numerous to list", (c) the variable was extracted from another specified database, (d) the variable documented in the table was created from multiple variables as specified in the message, and/or (e) an explanation is given to clarify further the statement (see numbered paragraph 3 above) about what the variable is.

13. Crosswalk reference. The crosswalk reference identifies whether or not other survey forms contain the same or a similar item. The reference provides a separate column for each of the three 1995 forms and the 1988 form. The first row of each column lists the form name, whereas the second row provides information about whether the same or a similar item can or cannot be found in another form. If an item name is specified in the second row, the

same item is included in the form appearing above the item name. If only an asterisk appears in a second row cell, a similar item appears in the form listed above the asterisk. To locate the similar item(s), the analyst must use the crosswalk in Appendix D. (The large number of cross references for some items prevented the listing of all similar items in the crosswalk tables in Appendix G.)

14. Codebook page number. This information is the page number corresponding to a specific variable. To locate a variable quickly, analysts can use Appendix F. In addition to providing the variable name and a short description of the variable, Appendix F also identifies the page number in Appendix G where the variable can be found.

STATUS OF THE ARMED FORCES SURVEYS 1995 Form A—Sex Roles in the Active-Duty Military

SURVEY PURPOSE

This is a worldwide scientific survey of how men and women work together in the four DoD Active-duty Military Services and the Coast Guard being conducted for the Office of the Secretary of Defense by the Defense Manpower Data Center (DMDC). The purpose of this survey is to ask you about your observations, opinions and experiences with ALL KINDS of sexual talk and behavior that can occur at work. IT IS IMPORTANT THAT PERSONS WHO HAVE NOT BEEN SEXUALLY HARASSED, AS WELL AS THOSE WHO HAVE BEEN SEXUALLY HARASSED, RESPOND.

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 United States Code, Sections 136 and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be used to sample attitudes and perceptions of military members about personnel relationships, programs, and policies. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies. Reports will be provided to the Secretaries of Defense and Transportation, each Military Service, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

ROUTINE USES: None

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

DMDC Survey No. 95-007a

- THIS IS NOT A TEST, SO TAKE YOUR TIME.
- SELECT ANSWERS THAT BEST FIT YOU.
- MARK ONLY ONE ANSWER FOR EACH QUESTION UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

RIGHT MARK ●

WRONG MARKS ⊗ ⊗ ⊗ ⊗

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALLPOINT, OR FELT TIP PENS.

PLEASE READ THIS BEFORE YOU BEGIN

- This survey deals with sexual talk and behavior which can range from apparently casual remarks (like "Mary (or Joe) looks sexy today") to the serious crimes of sexual assault and rape. Sometimes this sexual talk and behavior is considered sexual harassment and sometimes it is not.
- Certain kinds of UNINVITED and UNWANTED sexual talk and behavior occurring at work can be considered sexual harassment. Examples are:
Actual or attempted rape or sexual assault.
Unwanted, uninvited pressure for sexual favors (Example: Someone tried to talk you into performing a certain sexual act with or for them, maybe promising a reward).
Unwanted, uninvited touching, leaning over, cornering, pinching or brushing against of a deliberately sexual nature.
Unwanted, uninvited sexually suggestive looks, gestures or body language (Example: Someone at work kept staring at your sexual body parts).
Unwanted, uninvited letters, telephone calls, or materials of a sexual nature (Examples: Someone at work called you and said foul things; someone at work brought nude pictures for you to look at; someone sent you letters suggesting that you and the person have sex).
Unwanted, uninvited pressure for dates (Example: a superior kept pressuring you to go out).
Unwanted, uninvited sexual teasing, jokes, remarks or questions (Examples: Someone told you that you have a nice body; someone asked you how your sex life is; someone told crude jokes to embarrass you; someone jokingly made some comment about how you might perform in bed).
Unwanted, uninvited whistles, calls, hoots or yells of a sexual nature (Example: One or more persons whistled at you or yelled some sexual things at you from a window or from a car driving past you).
Unwanted, uninvited attempts to get your participation in any other kinds of sexually oriented activities (Examples: Someone tried to get you involved in group sex, or pose for nude films, or to seduce someone for fun).
- BOTH MEN AND WOMEN CAN BE VICTIMS OF SEXUAL HARASSMENT; BOTH WOMEN AND MEN CAN BE SEXUAL HARASSERS; PEOPLE CAN SEXUALLY HARASS PERSONS OF THEIR OWN SEX.
- Your frank and honest answers will help give us an accurate picture of the situation, and assist in the evaluation and development of policies. Please read all questions and instructions CAREFULLY before responding. We appreciate your time.

THANK YOU

U.S. GOVERNMENT PRINTING OFFICE: 1994-586-754/00013

STATUS OF THE ARMED FORCES SURVEYS

1995 Form A—Sex Roles in the Active-Duty Military

SECTION 1

In this section, we ask you some general questions about sexual harassment in the active-duty military environment and your perceptions about official actions and policies concerning such harassment.

- GA95001
1. If you have worked outside the active-duty military, would you say that there is more or less unwanted sexual attention in non-military jobs?
- 1 I have never held a nonmilitary job
- 2 There is more in nonmilitary jobs
- 3 There is about the same in military and nonmilitary jobs
- 4 There is less in nonmilitary jobs
- 99 Don't know/Can't judge
- φ I have never observed unwanted sexual attention in either active-duty military or non-military jobs
- GA95002
2. Please read the statements below and select the one which best represents the attitude toward sexual harassment of the commanding officer at your base/post.
- 1 The CO very ACTIVELY DISCOURAGES sexual harassment
- 2 The CO has spoken out against it AND does seem to want it stopped
- 3 The CO has NOT spoken out against it BUT seems to want it stopped
- 4 The CO HAS spoken out against it BUT really seems not to care about it
- 5 The CO seems uninformed about sexual harassment
- 6 The CO may or may not have spoken out against sexual harassment but really seems to condone it
- 7 The CO has NOT spoken out against it AND seems not to care about it
- 8 The CO seems to actually encourage sexual harassment
- 9 The CO's attitude is unknown/The CO is new/The subject hasn't come up

3. For each person or organization given below, please give your opinion about whether it or they make honest and reasonable efforts to stop sexual harassment in the active-duty military, regardless of what is said officially.

MAKE REASONABLE EFFORTS?

PERSON OR ORGANIZATION	1 Yes	No Opinion	φ No	Not Applicable
a. Senior leadership of my Service GA95003A	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Senior leadership on my installation/ship GA95003B	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. My immediate supervisor/commanding officer GA95003C	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Other <u>unit</u> commanders I've had GA95003D	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. My training instructor(s) GA95003E	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f. Commanding officers at my other assignment stations GA95003F	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

PLEASE DO NOT WRITE IN THIS AREA

72382

4. Have you ever requested a transfer or considered leaving the active-duty military because someone was bothering you sexually? *Mark all that apply.*

- A No GA95004A - GA95004F
- B No, but I have considered asking for a transfer
- C Yes, I have requested a transfer and have been transferred
- D Yes, I have requested a transfer but am awaiting transfer
- E Yes, I have considered leaving the military due to sexual harassment but decided to stay
- F Yes, I am considering leaving now due to sexual harassment

Note 20

5. Do you, from your own knowledge or from what the person(s) said, know anyone who has experienced sexual harassment while on duty? *Mark one answer. Do not include yourself.*

- 0 No, I don't know anyone GA95005
- 1 I know one person
- 2 I know two people
- 3 I know three people
- 4 I know four or more people

6. In most cases, how effective do you think it is for personnel to take each action given below to make others stop bothering them sexually? *Mark one answer for each action.*

GA95006A - GA95006L

1 2 3 4 5
HOW EFFECTIVE IS THE ACTION?

ACTION:

- a. Ignoring the behavior
- b. Avoiding the person(s)
- c. Asking or telling the person(s) to stop
- d. Threatening to tell or telling co-worker(s)
- e. Threatening to tell the person(s)' unit commander(s)
- f. Reporting the behavior to the person(s)' unit commander(s) or others up the chain
- g. Filing a formal complaint
- h. Threatening to tell the person(s)' spouse(s)
- i. Threatening to tell your own spouse or mate
- j. Threatening some drastic action outside channels if the person(s) doesn't (don't) stop
- k. Becoming extra firm and professional at work
- l. Other (Specify: _____)

Makes Things Worse	Not Effective	Somewhat Effective	Effective	Very Effective
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
1	2	3	4	5

GA95006SP
Note 21

7. Do you personally know anyone in the active-duty military who, in your opinion, was unfairly accused of sexual harassment (officially or unofficially) in the past year?

- 1 Yes
- 2 Not sure
- 0 No

GA95007

8. Was there any sexual talk or behavior at work during the past year that, overall, created an offensive, hostile or intimidating environment for you?

- 4 Always
- 3 Most of the time
- 2 Sometimes
- 1 Rarely
- 0 Never

GA95008

9. Listed below are some actions which might be taken in an effort to reduce sexual harassment. We ask you to indicate whether any of these actions has been taken at your current duty station. Mark one answer for each action.

GA9509A - GA9509J

HAS THE ACTION BEEN TAKEN AT YOUR BASE/POST?

ACTIONS:

- a. Establishing policies prohibiting sexual harassment
- b. Providing swift and thorough investigation of sexual harassment complaints
- c. Enforcing penalties against unit commanders or other superiors who allow sexual harassment to continue
- d. Enforcing penalties against sexual harassers
- e. Publicizing the availability of formal complaint channels
- f. Providing counseling services for victims of sexual harassment
- g. Providing awareness training for active military personnel
- h. Providing awareness training for unit commanders and Equal Opportunity officials
- i. Establishing a specific office at each base/post which has the authority to investigate complaints regarding sexual harassment, to provide remedies for victims and/or penalties against harassers
- j. Other action (Specify: GA9509SP)

72382

SECTION 2

This section asks about any experience YOU have had with UNINVITED and UNWANTED sexual attention in the course of performing your duties in the active-duty military. ALTHOUGH THE SECTION WILL TAKE SOME TIME TO COMPLETE, IT WILL PROVIDE THE MOST IMPORTANT INFORMATION BEING GATHERED BY THIS SURVEY.

Please Note: Sexual attention can be welcome or unwelcome. "UNINVITED AND UNWANTED TALK AND BEHAVIOR" is talk and behavior which you did NOT provoke, did NOT ask for, are NOT responsible for and do NOT participate in willingly or jokingly. Keep the examples of sexual attention given below in mind as you answer the rest of the survey.

11. Have **YOU EVER RECEIVED** any of the following kinds of UNINVITED and UNWANTED sexual attention from someone AT WORK while serving in the active-duty military? *Mark all that apply.*

TYPE OF UNINVITED, UNWANTED SEXUAL ATTENTION

G A95011A - GA95011K

- Note 24
- A Actual or attempted rape or sexual assault
 - B Unwanted, uninvited pressure for sexual favors
(Example: Someone tried to talk you into performing a certain sexual act with or for them, maybe promising a reward)
 - C Unwanted, uninvited touching, leaning over, cornering, pinching or brushing against of a deliberately sexual nature
 - D Unwanted, uninvited sexually suggestive looks, gestures or body language
(Example: Someone at work kept staring at your sexual body parts)
 - E Unwanted, uninvited letters, telephone calls, or materials of a sexual nature
(Examples: Someone at work called you and said foul things, someone at work brought nude pictures for you to look at, someone sent you letters suggesting that you and the person have sex)
 - F Unwanted, uninvited pressure for dates
(Example: A superior kept pressuring you to go out)
 - G Unwanted, uninvited sexual teasing, jokes, remarks or questions
(Examples: Someone told you that you have a nice body, someone asked you how your sex life is, someone told crude jokes to embarrass you, someone jokingly made some comment about how you might perform in bed)
 - H Unwanted, uninvited whistles, calls, hoots or yells of a sexual nature
(Example: One or more persons whistled at you or yelled some sexual things at you from a window or from a car driving past you)
 - I Unwanted, uninvited attempts to get your participation in any other kinds of sexually oriented activities
(Examples: Someone tried to get you involved in group sex, or to pose for nude films, or to seduce someone for fun)
 - J Other unwanted, uninvited attention of a sexual nature (Specify: GA9511SP)
 - K No, I have **NEVER** experienced any UNINVITED and UNWANTED sexual attention from someone at work while in the active-duty military

Note 25

IF YOU HAVE NEVER RECEIVED ANY FORM OF SEXUAL ATTENTION THAT WAS UNWANTED AND UNINVITED FROM SOMEONE AT WORK WHILE IN THE ACTIVE-DUTY MILITARY, GO TO SECTION 3 ON PAGE 14. OTHERWISE, GO TO QUESTION 12 BELOW.

12. Have you received any of the following kinds of UNINVITED AND UNWANTED sexual attention DURING THE LAST 12 MONTHS from someone where you work in the active-duty military? (If you have served less than 1 year, answer for your entire service period.)

GA95012A - GA95012K

FREQUENCY IN THE LAST 12 MONTHS

TYPE OF UNINVITED, UNWANTED SEXUAL ATTENTION

Note 27

- a. Actual or attempted rape or sexual assault
- b. Pressure for sexual favors
- c. Sexual touching, leaning over, cornering, pinching or brushing against
- d. Sexually suggestive looks, gestures or body language
- e. Letters, telephone calls or materials of a sexual nature
- f. Pressure for dates
- g. Sexual teasing, jokes, remarks or questions
- h. Sexual whistles, calls, hoots or yells
- i. Attempts to get your participation in any other sexual activities
- j. Other sexual attention (Specify: GA9512SP)
- k. No, I have NOT experienced any unwanted, uninvited sexual attention from someone at work IN THE LAST 12 MONTHS

Note 26

	0 Never	1 Once	2 Once a Month or Less	3 2-4 Times a Month	4 Once a Week or More
a.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
f.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
g.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
i.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
j.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
k.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

IF YOU HAVE NOT RECEIVED ANY UNWANTED, UNINVITED SEXUAL ATTENTION FROM SOMEONE WHERE YOU WORK IN THE LAST 12 MONTHS, GO TO SECTION 3 ON PAGE 14. OTHERWISE, GO TO QUESTION 13 BELOW.

If uninvited and unwanted sexual attention HAS happened to you while AT WORK in the active-duty military within the last 12 months: SELECT THE ONE EXPERIENCE THAT HAD THE GREATEST EFFECT ON YOU AND ANSWER THE REST OF THE QUESTIONS IN THIS SECTION IN TERMS OF THAT EXPERIENCE.

13. Describe the experience you have in mind.

Mark all that apply.

GA95013A - GA95013H

Note

- A This was my only experience
- B This was my most recent experience
- C This experience is still continuing
- D This experience permanently damaged my career
- E This experience caused me to lose friends
- F This experience caused me to transfer
- G This experience may cause me to leave the Service
- H This did not actually occur (only) at the work site

28

GA95014

14. Did this experience take place at the duty station where you are now assigned, at some other assignment location, while you were on temporary duty elsewhere (TDY), or on recruit (basic) training? Mark one.

- 1 This experience took place here
- 2 This experience took place at another duty station
- 3 This experience took place on recruit (basic) training elsewhere
- 4 This experience took place while I was on TDY

PLEASE DO NOT WRITE IN THIS AREA

72382

15. During the experience you have in mind, which of the following UNINVITED, UNWANTED sexual attention happened to you? *Mark all that apply.*

- A Actual or attempted rape or sexual assault
 - B Pressure for sexual favors
 - C Sexual touching, leaning over, cornering, pinching or brushing against
 - D Sexually suggestive looks, gestures, or body language
 - E Letters, telephone calls, or materials of a sexual nature
 - F Pressure for dates
 - G Sexual teasing, jokes, remarks or questions
 - H Whistles, calls, hoots or yells of a sexual nature
 - I Attempts to get your participation in other sexually oriented activities
 - J Other unwanted, uninvited sexual attention
- (Specify: GA95155P)

GA95015A - GA95015d

Note 28

Note 29

16. How did you respond to this sexual attention and what effect did your action(s) have? FOR EACH ACTION BELOW, please FILL IN EITHER the "Did Not Do This" circle OR the circle below the effect your action had.

GA95016A - GA95016K

ACTION

- a. I ignored the behavior or did nothing
- b. I avoided the person(s)
- c. I asked or told the person(s) to stop
- d. I threatened to tell or told others
- e. I reported the behavior to the unit commander or other official(s)
- f. I made a joke of the behavior
- g. I went along with the behavior
- h. I transferred, disciplined or gave a poor fitness report to the person(s)
- i. I got someone else to speak to the person(s) about the behavior
- j. I threatened to harm the person(s) if the behavior continued
- k. I did something else (Specify: GA95055P)

EFFECT OF ACTION

You Did Not Do This	Made Things Worse	Made No Difference	Made Things Better
<input type="radio"/> 0	<input type="radio"/> 1	<input type="radio"/> 2	<input type="radio"/> 3
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

17. Over what period of time did you keep receiving this uninvited, unwanted sexual attention?

Mark one. GA95017

- 1 It was a single event (GO TO QUESTION 19)
- 2 Less than one week
- 3 1 to 4 weeks
- 4 1 to 3 months
- 5 4 to 6 months
- 6 More than 6 months

18. During this period of time, how frequently did the person(s) involved sexually bother you?

- 1 Once a month or less
- 2 2 to 4 times a month
- 3 Every few days
- 4 Every day
- 5 It varied—sometimes a lot, sometimes not often
- 6 Every time the person(s) saw me

GA95018

EE

• 3 •

19. As a result of your response to the uninvited, unwanted sexual attention, did any of the following changes happen in your work situation? Mark all that apply. GA95019A - GA95019H

- A My work assignments or conditions got worse
- B I was denied a promotion or good fitness report
- C I transferred to another location
- D I was reassigned/transferred to another location
- E I transferred to another work site at the same installation
- F My working conditions got better
- G I received a promotion or good fitness report
- H No changes occurred in my work situation

Note 31

Note 31

20. Did you take any formal (official) action(s) against the person(s) who victimized you?

- 0 No (GO TO QUESTION 21) GA95020
- 1 Yes (GO TO QUESTION 22)

Note 32

21. What were your reasons for not taking any formal (official) actions? Mark all that apply. GA95021A - GA95021M

- A I took care of the problem myself/thought I could take care of it
- B The person(s) was (were) not at my duty station
- C Didn't know the person(s) who did it
- D Someone else took action for me or said something in my behalf
- E I did not know what actions to take
- F I saw no need to report it
- G I did not want to hurt the person(s) who bothered me
- H I was too embarrassed
- I I did not think anything would be done
- J I thought it would take too much time and effort
- K I thought that it would be held against me or that I would be blamed
- L I thought it would make my work situation unpleasant
- M I thought I would be labelled a troublemaker

NOW GO TO QUESTION 24 ON PAGE 10.

22. What formal action(s) did you take, and what effect did each have? FOR EACH ACTION BELOW, please FILL IN EITHER the "Did Not Do This" circle OR the circle below the effect your action had.

GA95022A - GA95022H

ACTION

- a. I requested an investigation by my unit commander
- b. I requested mast
- c. I requested an investigation by the special office for handling these kinds of complaints, such as Equal Opportunity, Social Actions
- d. I requested a judicial board to review the case
- e. I requested an investigation by a person above my unit commander
- f. I requested an investigation by the Inspector General's Office
- g. I requested a temporary assignment elsewhere
- h. Other (Specify: _____)

EFFECT OF ACTION

	You Did Not Do This	Made Things Worse	Made No Difference	Made Things Better
a.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c.	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

g.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
h.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Note 33 GA9522SP

23. How did your unit commander or other officials respond to the formal action you took? Mark all that apply.

- A Found my charge to be true
- B Found my charge to be false
- C Corrected the damage done to me
- D Took action against the person(s) who bothered me
- E Were hostile or took action against me
- F Unit commander/other officials did nothing
- G The action is still being processed
- H I don't know whether anyone did anything

Note 34

GA95023A - GA95023H

29. Please describe the person(s) who sexually bothered you. Mark one circle in sections a-c below. Mark all circles that apply in sections d and e.

a. Sex of Person(s)

- 1 Male
- 2 Female
- 3 Two or more males
- 4 Two or more females
- 5 Both sexes
- 6 Unknown

GA95029A

b. Age of Person(s)

- 1 Older
- 2 Same age
- 3 Younger
- 4 Mixed
- 5 Unknown

GA95029B

c. Race of Person(s)

- 1 Same as yours
- 2 Different
- 3 Some same, some different
- 4 Unknown

GA95029C

d. Marital Status of Person(s)

Mark all that apply.

- 1 Married
- 2 Single
- 3 Divorced, separated, widowed
- 4 Unknown

GA9529D1 -
GA9529D4

Note 28

If item numbers, not codes

e. Military/Civilian Status of Person(s)

Mark all that apply.

- 1 U.S. military
- 2 DoD/Service civilian employee
- 3 Civilian contractor
- 4 DoD/Service foreign-national employee
- 5 Local civilian resident
- 6 Local foreign-national resident
- 7 Unknown

GA9529E1 -
GA9529E7

Note 29

30. How long had you been in the active-duty service when the incident or episode occurred or began?

- 1 Less than 6 months
- 2 6 months but less than 1 year
- 3 1 year but less than 2 years
- 4 2 years but less than 5 years
- 5 5 years or more

GA95030

31. Do you know whether the person(s) who bothered you has (have) sexually bothered other military personnel during duty hours?

- 1 I don't know if the person(s) has (have) done this
- 2 I know one person has; I don't know about others
- 3 The only person involved has not bothered others
- 4 The only person involved has bothered others
- 5 Most or all involved have bothered others
- 6 Most or all involved have not bothered others

GA95031

32. Did you receive medical assistance or emotional counseling from a trained professional as a result of the sexual attention?

- 1 Yes, I received medical assistance
- 2 Yes, I received counseling from a trained professional
- 3 Yes, I received both medical assistance and emotional counseling
- 4 No, but emotional counseling might have been helpful
- 5 No, but medical assistance might have been helpful
- 6 No, I did not need either medical assistance or emotional counseling

GA95032

33. Aside from other actions you might have taken, did you discuss the situation privately with family, friends or others, or seek advice about what to do? Mark all that apply.

- A No, I did not discuss it or seek advice
- B I talked with one or more friend(s) briefly
- C I talked with one or more family members briefly
- D I talked at length with friend(s), about it
- E I talked at length with one or more family members about it
- F I talked with one or more co-worker(s) about it
- G I talked "off the record" with my unit commander
- H I asked for advice from one or more friend(s)
- I I asked for advice from one or more family member(s)
- J I asked for advice from one or more co-worker(s)
- K I talked to a chaplain, priest, rabbi, minister or other church-related person about it
- L Other (Specify: _____)

GA95033
Note 36

34. If you used any annual leave or were ever out sick as a result of the unwanted, uninvited sexual attention, please indicate how many days you were absent. GA95034

- None
- One day
- Two days
- Three to five days
- Six to ten days
- More than 10 days

35 In comparison to your normal job performance, was your productivity (that is, either how much work you did or how well you did it) affected by the unwanted, uninvited sexual attention? If so, please indicate the extent your productivity was affected. (In responding, do not count time lost due to use of sick or annual leave.) GA95035

- My productivity was not affected (GO TO QUESTION 37)
- 99 Don't know/Can't judge (GO TO QUESTION 37)
- 1 My productivity was slightly reduced (10% or less)
- 2 My productivity was noticeably reduced (11%-25%)
- 3 My productivity was markedly reduced (26%-50%)
- 4 My productivity was dramatically reduced (more than 50%)

Note 37

36. If your productivity was reduced, how long did this reduction continue? GA95036

- 1 Only when the uninvited, unwanted behavior was occurring
- 2 Only during the TDY
- 3 Less than 1 week
- 4 1 week but less than 1 month
- 5 1 month but less than 4 months
- 6 4 months but less than 6 months
- 7 6 months or more
- 99 Don't know/Can't judge

37. At the time this unwanted, uninvited sexual attention occurred or began, who was in your normal work group (that is, the people you worked with every day)? (If you were on TDY, answer for the group you worked with daily while at the temporary location.) GA95037

- 1 All men
- 2 More men than women
- 3 Equal numbers of men and women
- 4 More women than men
- 5 All women

38. At the time this unwanted, uninvited sexual attention occurred or began, was your immediate supervisor male or female? (If you were on TDY and were not traveling with your usual supervisor, answer for the person in charge at the TDY location.) GA95038

- 2 Female
- 1 Male

39. At the time this unwanted, uninvited sexual attention occurred or began, were you one of the first of your sex to be doing your kind of work (that is, your specific MOS/AFSC/rating/designator) in the unit where you were assigned? (If you were on TDY, please answer for the group you were working with at that location.) GA95039

- 1 Yes, I was the first and only of my sex
- 2 Yes, I was in the first group of my sex along with some others
- 3 Yes, I was in one of the first groups of my sex to be doing the work but not in the very first group
- 4 No, members of my sex had been doing the work for a while
- 5 No, members of my sex had been doing the work for a long time
- 6 No, members of my sex have always been doing that work in the unit
- 99 Don't know

PLEASE DO NOT WRITE IN THIS AREA

08 O E-8		28 OO-8
09 O E-9		29 OO-9

41. At the time the unwanted, uninvited sexual attention occurred or began, were you a supervisor who gave fitness reports to others?

1 O Yes
0 O No GA95041

42. At the time the unwanted, uninvited sexual attention occurred or began, how many people were in your immediate work group (that is, the people you saw and worked with every day)? (If you were on TDY, answer for your work group at that temporary location.)

1 O 1-5 persons
2 O 6-15 persons GA95042
3 O 16-25 persons
4 O More than 25 persons

43. At the time the unwanted, uninvited sexual attention occurred or began, did you have your own private work space? (If you were on TDY, answer for your temporary situation at that location.) GA95043

4 O Yes, a private office with a door that could be closed
3 O Yes, a semiprivate office with a door that could be closed
2 O Yes, but I could be seen from one to three sides (include cubicles)
1 O Yes, but I could be seen from four sides
0 O No, I just worked in a common working area

44. At the time the unwanted, uninvited sexual attention occurred or began, what was your marital status? GA95044

1 O Married for the first time
2 O Remarried
3 O Legally separated
4 O Informally separated
5 O Widowed
6 O Divorced
7 O Single, never married

45. Did the unwanted, uninvited sexual attention occur in CONUS (Continental United States), overseas or at sea? GA95045

1 O CONUS (Continental United States)
(GO TO QUESTION 47 ON THIS PAGE)
2 O Overseas
(GO TO QUESTION 46 ON THIS PAGE)
3 O At sea
(GO TO SECTION 3 ON PAGE 14)

Note 38

46. If the unwanted, uninvited sexual attention occurred overseas, please indicate the specific location below. Mark one. GA95046

1 O Alaska and Hawaii
2 O Pacific Trust Territories
3 O Other Pacific
4 O The Mediterranean
5 O Other Europe
6 O Atlantic Islands
7 O Other Latin America

Note 39

47. If you were in CONUS, what was the general location where the uninvited, unwanted sexual attention occurred? GA95047

1 O WEST COAST (California, Oregon, Washington)
2 O ROCKY MOUNTAIN STATES (Arizona, Nevada, Utah, Idaho, Wyoming, Colorado, Montana, New Mexico)
3 O SOUTHWEST (Texas, Oklahoma, Arkansas, Louisiana)
4 O MIDWEST (N. Dakota, S. Dakota, Nebraska, Kansas, Minnesota, Wisconsin, Illinois, Indiana, Ohio, Missouri, Iowa, Michigan)
5 O SOUTHEAST (Kentucky, Tennessee, Mississippi, Alabama, Georgia, Florida, North Carolina, South Carolina)
6 O MID-ATLANTIC (West Virginia, Virginia, Pennsylvania, Maryland, Delaware, New Jersey, District of Columbia)
7 O NEW ENGLAND (New York, Connecticut, Massachusetts, New Hampshire, Vermont, Rhode Island, Maine)

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 United States Code, Section 136 and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be used to sample attitudes and perceptions of military members about personnel relationships, programs, and policies. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies. Reports will be provided to the Secretaries of Defense and Transportation, each Military Service, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

ROUTINE USES: None.

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

THIS IS NOT A TEST, SO TAKE YOUR TIME.

SELECT ANSWERS THAT BEST FIT YOU.

MARK ONLY ONE ANSWER FOR EACH QUESTION
UNLESS THE QUESTION SAYS TO MARK ALL THAT APPLY.

- MAKE HEAVY BLACK MARKS THAT FILL THE RESPONSE CIRCLES.
- DO NOT MAKE ANY MARKS OUTSIDE OF THE RESPONSE CIRCLES OR WRITE-IN BOXES.
- IF YOU CHANGE YOUR MIND, ERASE OLD MARKS COMPLETELY.
- DO NOT USE INK, BALLPOINT, OR FELT TIP PENS.

WRONG MARKS ✓ ✗ ○

ABOUT THIS QUESTIONNAIRE

This survey is one of several surveys DoD and the Coast Guard are administering to assess personnel issues and the state of the Armed Forces. These surveys ask questions about job demands, job stress, job satisfaction, physical and personal well-being, and current personnel issues such as relations between men and women in the Armed Services. You will also be asked your feelings about the effectiveness of certain military policies intended to ensure fair treatment and equal opportunity for all military members.

WHY ME?

You have been selected at random to be part of a sample of people who represent members of the Armed Services. The only information used to sample individuals for this survey was to group them by Service, rank, gender, military occupation, race/ethnic group, and location (CONUS, OCONUS). Enough people were scientifically sampled for this survey so that valid conclusions can be made about the views and experiences of Service members overall and by demographic subgroups. **The survey results will not be valid if you allow or ask someone else to fill it out for you.**

WHY SHOULD I BOTHER? DO SURVEYS CHANGE ANYTHING?

Statistics from surveys provide valuable information to policy makers and planners. **While no decisions about you alone will be made based on this survey, survey results will influence policy discussions and may result in changes that affect you and other Service members like you.** You may not see the changes directly since policy statements do not list sources of information considered in adoption. And, policy changes often impact the future with the affected personnel unaware of a survey completed a few months or even years earlier. **Your response counts.** If you don't respond, your views and the views of other members like you will not be considered in personnel policy reviews and changes.

WILL MY SURVEY RESPONSES BE KEPT PRIVATE?

Yes. Under no circumstances will any information about identifiable individuals be released. Identifiable information is only being used by persons engaged in conducting the survey and building the survey databases to represent the Armed Forces. Your responses will be combined with information from many other members to report the views and experiences of groups of members. Comments may be reported word for word but never with identifiable information. **Do not use any personal, unit, or place names anywhere on this survey.**

AREN'T SOME OF THE QUESTIONS VERY PERSONAL?

Yes. Although people will have different views on what is or is not personal, most people will consider some of the questions in this survey to be very personal. We are asking these questions to evaluate the success of current personnel policies of the Armed Services. Good estimates can be made only if most people answer all the questions on the survey that apply to them. However, you can choose not to answer particular items. **Please do not discard the entire survey because there are some particular items that you want to skip.**

III. GENDER-RELATED EXPERIENCES

In this section you will be asked about experiences you have had in the past 12 months that were related to your gender, including unwanted sex-related attention.

71. Unwanted sex-related attention is sex/gender-related talk and/or behavior that was unwanted, uninvited, and in which you did not participate willingly.

How often during the past 12 months have you been in situations involving ...

- military personnel
- on or off duty
- on or off base/post

and/or

- civilian employees and contractors employed in your workplace

where one or more of these individuals (of either gender) ...

Note 7

The One Situation with the Greatest Effect

~~GB95073A~~ GB95073Y

73. Think about the situation(s) you experienced during the past 12 months that involved unwanted sex/gender-related attention. Now pick the SITUATION THAT HAD THE GREATEST EFFECT ON YOU. Which of the behaviors in Question 71 happened during this situation? Blacken the bubbles below for the behaviors that apply to THIS SITUATION that had the greatest effect on you.

-
-
-
- Note 8

THE REST OF THE QUESTIONS IN THIS SECTION ASK ABOUT THIS SITUATION THAT HAD THE GREATEST EFFECT ON YOU.

GB95074

74. Did this situation that had the greatest effect on you occur at a military installation (for example, a base or post)?
- 3 All of it occurred at a military installation
- 2 Most of it occurred at a military installation; some at other place(s)
- 1 Some of it occurred at a military installation; most at other place(s)
- 0 None of it occurred at a military installation; all at other place(s)

GB95075

75. Did this situation occur at work (the place where you perform your military duties) or some other place?
- 3 All of it occurred at work
- 2 Most of it occurred at work; some at other places
- 1 Some of it occurred at work; most at other places
- 0 None of it occurred at work; all at other places

GB95076

76. Did this situation occur during duty hours or while you were off-duty?
- 3 All of it occurred during duty hours
- 2 Most of it during duty hours; some off-duty
- 1 Some of it during duty hours; most off-duty
- 0 None of it occurred during duty hours; all off-duty

Questions 77 through 80 ask about the PERSON OR PERSONS from whom you experienced unwanted sex/gender-related attention in this situation that had the greatest effect.

GB95077

77. How many people were responsible for the unwanted behavior(s) in this situation that had the greatest effect on you?

- 1 One person
2 A group (more than one person)

78. Was the person(s) ... Mark all that apply.

- A Your immediate military supervisor
B Your immediate civilian supervisor
C Your unit commander
D Other military personnel of higher rank/grade than you
E Other civilian employee of higher rank/grade than you
F Your military co-worker(s)
G Your civilian co-worker(s)
H Your military subordinate(s)
I Your civilian subordinate(s)
J Your military training instructor
K Your civilian training instructor
L Other military person(s)
M Other civilian person(s)
N Other or unknown person(s)

79. Was the racial/ethnic background of the person(s) ...

- 1 The same as your own
2 Different from your own
3 Some were the same, and some were different
99 Don't know

80. Was the gender of the person(s) ...

- 1 The same as your own
2 Different from your own
3 Some were the same, and some were different
99 Don't know

81. During the course of the situation you have in mind, how often did you experience unwelcome sex/gender-related attention from the person(s)?

- 1 Once
2 Once a month or less
3 2-4 times a month
4 Every few days
5 Every day

82. How long did this situation last (or, if continuing, how long has it been going on)?

- 1 Less than one week
2 One week to less than one month
3 One to six months
4 More than six months

GB95083

83. Is this situation still going on?
1 Yes 0 No

84. Using the following scale, indicate the degree to which you found this situation to be ...

Extremely Very Moderately Slightly Not at all

- a. Annoying GB95084A 0 1 2 3 4
b. Offensive GB95084B 0 0 0 0 0
c. Disturbing GB95084C 0 0 0 0 0
d. Threatening GB95084D 0 0 0 0 0

130. In total, about how much training have you had during the past 12 months on topics related to sexual harassment? **GB95130**

- 66 ○ I haven't received any training → Go to Question 132 **Note 17**
- 1 ○ Less than 1 hour
- 2 ○ 1 hour-4 hours
- 3 ○ More than 4 hours but less than 8 hours
- 4 ○ 1-2 days
- 5 ○ More than 2 days but less than 5 days
- 6 ○ 5 days or more

131. In your opinion, how effective was the training you received in ...

GB95131A
a. making personnel aware of behaviors which might be seen as sexual harassment?

- 1 ○ Not at all effective
- 2 ○ Slightly effective
- 3 ○ Moderately effective
- 4 ○ Very effective

GB95131B
b. actually reducing/preventing sexual harassment?

- 1 ○ Not at all effective
- 2 ○ Slightly effective
- 3 ○ Moderately effective
- 4 ○ Very effective

GB95132
132. In your opinion, how often does sexual harassment occur in the military now, as compared with a few years ago?

- 99 ○ Don't know—I have been in Service less than 2 years
- 1 ○ Much less often
- 2 ○ Less often
- 3 ○ About the same
- 4 ○ More often
- 5 ○ Much more often

ABOUT THIS QUESTIONNAIRE

This survey is one of several surveys DoD and the Coast Guard are administering to assess personnel issues and the state of the Armed Forces. These surveys ask questions about job demands, job stress, job satisfaction, physical and personal well-being, and current personnel issues such as relations between men and women in the Armed Services. They also ask about certain military policies intended to ensure fair treatment and equal opportunity for all military members.

WHY ME?

You have been selected at random to be part of a sample of people who represent members of the Armed Services. Based on your responses and the responses of others who receive the same questionnaire, conclusions may be drawn about the views and experiences of Service members overall, and of demographic subgroups. The validity of our conclusions depends, in part, on our receiving enough completed surveys from individuals like yourself. **The survey results will not be valid if you allow or ask someone else to fill it out for you.**

WHY SHOULD I BOTHER? DO SURVEYS CHANGE ANYTHING?

Statistics from surveys provide valuable information to policy makers and planners. **While no decisions about you alone will be made based on this survey, survey results will influence policy discussions and may result in changes that affect you and other Service members.** If you don't respond, your views and the views of other members like you will not be considered in personnel policy reviews and changes.

WILL MY SURVEY RESPONSES BE KEPT PRIVATE?

Yes. Under no circumstances will any information about identifiable individuals be released. Your responses will be combined with information from many other members to report the views and experiences of groups of members. Comments may be reported word for word but never with identifiable information. **Do not use any personal, unit, or place names anywhere on this survey.**

PRIVACY NOTICE

In accordance with the Privacy Act of 1974 (Public Law 93-579), this notice informs you of the purpose of the survey and how the findings will be used. Please read it carefully.

AUTHORITY: 10 United States Code, Sections 136 and 2358.

PRINCIPAL PURPOSE: Information collected in this survey will be used to sample attitudes and perceptions of military members about personnel relationships, programs, and policies. This information will assist in the formulation of policies which may be needed to improve the military working environment and relevant personnel policies. Reports will be provided to the Secretaries of Defense and Transportation, each Military Service, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or professional journals, or reported in manuscripts presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

ROUTINE USES: None

DISCLOSURE: Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey instrument will be treated as confidential. Identifying information will be used only by persons engaged in, and for the purposes of, the survey. Only group statistics will be reported.

II. GENDER-RELATED EXPERIENCES

In this section you will be asked about experiences you have had in the past 12 months that were related to your gender, including unwanted sex-related attention.

11. Unwanted sex-related attention is sex/gender-related talk and/or behavior that was unwanted, uninvited, and in which you did not participate willingly.

How often during the past 12 months have you been in situations involving ...

- military personnel
- on or off duty
- on or off base/post

and/or

- civilian employees and contractors employed in your workplace

where one or more of these individuals (of either gender) ...

12. Do you consider ANY of the behaviors (a-y) which YOU MARKED AS HAPPENING TO YOU in Question 11 to have been sexual harassment?
- None were sexual harassment
 - Some were sexual harassment; some were not sexual harassment
 - All were sexual harassment
 - Doesn't apply—I marked "never" to every item in Question 11 → Go to Section III on page 7

Note bc (also see start of GB95071)

The rest of this section asks about those behaviors in Question 11 which you marked as happening to you.

13. To what degree did these behaviors that happened to you occur at work (the place where you perform your military duties) or some other place? GC95075
- All of them occurred at work
 - Most of them occurred at work; some at other places
 - Some of them occurred at work; most at other places
 - None of them occurred at work; all at other places
14. Did these behaviors occur during duty hours or while you were off-duty? GC95076
- All of them occurred during duty hours
 - Most of them during duty hours; some off-duty
 - Some of them during duty hours; most off-duty
 - None of them occurred during duty hours; all off-duty
15. When any of these behaviors occurred, were you . . .

PLEASE DO NOT WRITE IN THIS AREA
300003

17. Did you REPORT any of the unwanted sex-related attention you received to any of the following individuals or organizations?

- No, I did not report it to this person/office.
- Yes, and it made things worse.
- Yes, but it made no difference.
- Yes, and it made things better.

- GC95100A - GC95100J 3 2 1 0
- a. My immediate supervisor.....
 - b. The supervisor of the person who was bothering me.....
 - c. Someone else in my chain of command.....
 - d. Law enforcement officials (for example, military police)
 - e. A special office responsible for handling these kinds of complaints (such as Equal Opportunity, Social Actions, Military Civil Rights Office, etc.).....
 - f. The Commanding Officer.....
 - g. The Inspector General (IG) office
 - h. Judge Advocate General (JAG).....
 - i. A member of Congress.....
 - j. Other person or office with responsibility for follow-up. If you answer "yes," please specify below.....

Note 11c GC9500SP Note 10c

IF YOU ANSWERED "NO" TO EVERY ITEM IN QUESTION 17, GO TO QUESTION 21. OTHERWISE, CONTINUE WITH THE NEXT QUESTION.

GC95101A - GC95101M

18. What action(s) did the organization take in response to your reporting? *Mark all that apply.*
- A The person who bothered me was talked to about the behavior
 - B My complaint was/is being investigated
 - C I was encouraged to drop the complaint
 - D My complaint was discounted or not taken seriously
 - E My supervisor (or others in my chain of command) was hostile toward me
 - F My co-workers were hostile toward me
 - G I requested and was granted a reassignment or transfer
 - H I was reassigned against my will
 - I The person who bothered me was transferred or reassigned
 - J The person who bothered me was counseled
 - K Other (Specify in the box below)
- GC9501SP Note 13c
- L I don't know what action was taken
 - M No action was taken

19. How satisfied are you with the complaint process as it relates to your experience with reporting unwanted sex/gender-related attention? GC95105

- 5 Very satisfied
- 4 Satisfied
- 3 Neither satisfied nor dissatisfied
- 2 Dissatisfied
- 1 Very dissatisfied

20. Do you feel that your chances of having a successful military career will be affected by your making a report? GC95106

- 3 Yes, my chances are improved
- 1 Yes, my chances are worse
- 2 No, my career will not be affected

Note 15c

21. If you have experienced unwanted sex-related attention in the past 12 months but DID NOT report to someone in Question 17, what were your reasons for not reporting? *Mark all that apply.* GC95107A - GC95107T

- A Does not apply—I DID report all unwanted sex-related attention in the past 12 months to someone specified in Question 17
- B I did not think it was that important
- C I did not know what to do
- D I took care of the problem myself
- E I did not think anything would be done
- F I was too afraid
- G I was too embarrassed
- H I thought I would not be believed
- I I thought it would make my work situation unpleasant
- J I thought it would take too much time and effort
- K The person(s) was (were) not assigned to my duty station
- L I thought I would be labeled a troublemaker
- M I was talked out of making a formal report by a PEER
- N I was talked out of making a formal report by a SUPERVISOR
- O I did not want to hurt the person who bothered me
- P I wanted to fit in with my work group
- Q I didn't know the person(s) who did it
- R I thought my performance evaluation or chances for promotion would suffer
- S The person who bothered me was my supervisor
- T Some other reason (Specify in the box below)

GC9507SP Note 16c

III. UNWANTED SEXUAL TALK/BEHAVIOR

PLEASE READ THIS BEFORE YOU BEGIN THIS SECTION

- This section of the survey deals with sexual talk and behavior which can range from apparently casual remarks (like "Mary (or Joe) looks sexy today") to the serious crimes of sexual assault and rape. Sometimes this sexual talk and behavior is considered sexual harassment and sometimes it is not.
- Certain kinds of UNINVITED and UNWANTED sexual talk and behavior occurring at work can be considered sexual harassment. Examples are:
 - Actual or attempted rape or sexual assault.
 - Unwanted, uninvited pressure for sexual favors (Example: Someone tried to talk you into performing a certain sexual act with or for them, maybe promising a reward).
 - Unwanted, uninvited touching, leaning over, cornering, pinching or brushing against of a deliberately sexual nature.
 - Unwanted, uninvited sexually suggestive looks, gestures or body language (Example: Someone at work kept staring at your sexual body parts).
 - Unwanted, uninvited letters, telephone calls, or materials of a sexual nature (Examples: Someone at work called you and said foul things; someone at work brought nude pictures for you to look at; someone sent you letters suggesting that you and the person have sex).
 - Unwanted, uninvited pressure for dates (Example: a superior kept pressuring you to go out).
 - Unwanted, uninvited sexual teasing, jokes, remarks or questions (Examples: Someone told you that you have a nice body; someone asked you how your sex life is; someone told crude jokes to embarrass you; someone jokingly made some comment about how you might perform in bed).
 - Unwanted, uninvited whistles, calls, hoots or yells of a sexual nature (Example: One or more persons whistled at you or yelled some sexual things at you from a window or from a car driving past you).
 - Unwanted, uninvited attempts to get your participation in any other kinds of sexually oriented activities (Examples: Someone tried to get you involved in group sex, or pose for nude films, or to seduce someone for fun).
- BOTH MEN AND WOMEN CAN BE VICTIMS OF SEXUAL HARASSMENT; BOTH WOMEN AND MEN CAN BE SEXUAL HARASSERS; PEOPLE CAN SEXUALLY HARASS PERSONS OF THEIR OWN SEX.
- Your frank and honest answers will help give us an accurate picture of the situation, and assist in the evaluation and development of policies. Please read all questions and instructions CAREFULLY before responding. We appreciate your time.

Some of the questions that follow may seem repetitive, but in order to get the most complete information, we need to ask several questions about your experiences of working in the military. Every response is important in guaranteeing the overall quality of information we gather, so please continue to answer all the following questions, even though they may seem similar to previous ones.

Thank you for your cooperation.

This section asks about any experience YOU have had with UNINVITED and UNWANTED sexual attention in the course of performing your duties in the active-duty military. ALTHOUGH THE SECTION WILL TAKE SOME TIME TO COMPLETE, IT WILL PROVIDE THE MOST IMPORTANT INFORMATION BEING GATHERED BY THIS SURVEY.

Please Note: Sexual attention can be welcome or unwelcome. "UNINVITED AND UNWANTED TALK AND BEHAVIOR" is talk and behavior which you did NOT provoke, did NOT ask for, are NOT responsible for and do NOT participate in willingly or jokingly. Keep the examples of sexual attention given below in mind as you answer the rest of the survey.

GA95011A - GA95011K

22. Have YOU EVER RECEIVED any of the following kinds of UNINVITED and UNWANTED sexual attention from someone AT WORK while serving in the active-duty military? Mark all that apply.

TYPE OF UNINVITED, UNWANTED SEXUAL ATTENTION

- A Actual or attempted rape or sexual assault
- B Unwanted, uninvited pressure for sexual favors
(Example: Someone tried to talk you into performing a certain sexual act with or for them, maybe promising a reward)
- C Unwanted, uninvited touching, leaning over, cornering, pinching or brushing against of a deliberately sexual nature
- D Unwanted, uninvited sexually suggestive looks, gestures or body language
(Example: Someone at work kept staring at your sexual body parts)
- E Unwanted, uninvited letters, telephone calls, or materials of a sexual nature
(Examples: Someone at work called you and said foul things, someone at work brought nude pictures for you to look at, someone sent you letters suggesting that you and the person have sex)
- F Unwanted, uninvited pressure for dates
(Example: A superior kept pressuring you to go out)
- G Unwanted, uninvited sexual teasing, jokes, remarks or questions
(Examples: Someone told you that you have a nice body, someone asked you how your sex life is, someone told crude jokes to embarrass you, someone jokingly made some comment about how you might perform in bed)
- H Unwanted, uninvited whistles, calls, hoots or yells of a sexual nature
(Example: One or more persons whistled at you or yelled some sexual things at you from a window or from a car driving past you)
- I Unwanted, uninvited attempts to get your participation in any other kinds of sexually oriented activities
(Examples: Someone tried to get you involved in group sex, or to pose for nude films, or to seduce someone for fun)
- J Other unwanted, uninvited attention of a sexual nature (Specify: GA9511SP)

K No, I have NEVER experienced any UNINVITED and UNWANTED sexual attention from someone at work while in the active-duty military

Note 24

IF YOU HAVE NOT RECEIVED ANY UNWANTED, UNINVITED SEXUAL ATTENTION FROM SOMEONE WHERE YOU WORK IN THE LAST 12 MONTHS, GO TO SECTION IV ON PAGE 11. OTHERWISE, GO TO QUESTION 24 BELOW.

If uninvited and unwanted sexual attention HAS happened to you while AT WORK in the active-duty military within the last 12 months: SELECT THE ONE EXPERIENCE THAT HAD THE GREATEST EFFECT ON YOU AND ANSWER THE REST OF THE QUESTIONS IN THIS SECTION IN TERMS OF THAT EXPERIENCE.

24. Describe the experience you have in mind.
Mark all that apply.
GA95013A - GA95013H *Note 28*
- A This was my only experience
 - B This was my most recent experience
 - C This experience is still continuing
 - D This experience permanently damaged my career
 - E This experience caused me to lose friends
 - F This experience caused me to transfer
 - G This experience may cause me to leave the Service
 - H This did not actually occur (only) at the work site

25. Did this experience take place at the duty station where you are now assigned, at some other assignment location, while you were on temporary duty elsewhere (TDY), or on recruit (basic) training? *Mark one.* GA95014
- 1 This experience took place here
 - 2 This experience took place at another duty station
 - 3 This experience took place on recruit (basic) training elsewhere
 - 4 This experience took place while I was on TDY

26. Over what period of time did you keep receiving this uninvited, unwanted sexual attention? Mark one. GA95017

- 1 It was a single event
- 2 Less than one week
- 3 1 to 4 weeks
- 4 1 to 3 months
- 5 4 to 6 months
- 6 More than 6 months

27. Was/were the person(s) who sexually bothered you: Mark all that apply. GA95027A - GA95027K

- A Your immediate military supervisor
- B Your immediate civilian supervisor
- C Your unit commander
- D Other higher level military personnel
- E Your military co-worker(s)
- F Your civilian co-worker(s)
- G Your military subordinate(s)
- H Your civilian subordinate(s)
- I Other military person(s)
- J Other civilian person(s)
- K Other or unknown

Note
28

28. Please describe the person(s) who sexually bothered you. Mark one circle in section a and one in section b.

a. Sex of Person(s)

- 1 Male
- 2 Female
- 3 Two or more males
- 4 Two or more females
- 5 Both sexes
- 6 Unknown

GA95029A

b. Race of Person(s)

- 1 Same as yours
- 2 Different
- 3 Some same, some different
- 4 Unknown

GA95029C

29. At the time this unwanted, uninvited sexual attention occurred or began, who was in your normal work group (that is, the people you worked with every day)? (If you were on TDY, answer for the group you worked with daily while at the temporary location.)

- 1 All men
- 2 More men than women
- 3 Equal numbers of men and women
- 4 More women than men
- 5 All women

GA95037

30. At the time this unwanted, uninvited sexual attention occurred or began, was your immediate supervisor male or female? (If you were on TDY and were not traveling with your usual supervisor, answer for the person in charge at the TDY location.)

GA95038

- 2 Female
- 1 Male

31. At the time this unwanted, uninvited sexual attention occurred or began, were you one of the first of your sex to be doing your kind of work (that is, your specific MOS/AFSC/rating/designator) in the unit where you were assigned? (If you were on TDY, please answer for the group you were working with at that location.)

GA95039

- 1 Yes, I was the first and only of my sex
- 2 Yes, I was in the first group of my sex along with some others
- 3 Yes, I was in one of the first groups of my sex to be doing the work but not in the very first group
- 4 No, members of my sex had been doing the work for a while
- 5 No, members of my sex had been doing the work for a long time
- 6 No, members of my sex have always been doing that work in the unit
- 99 Don't know

32. At the time the unwanted, uninvited sexual attention occurred or began, what was your marital status?

- 1 Married for the first time
- 2 Remarried
- 3 Legally separated
- 4 Informally separated
- 5 Widowed
- 6 Divorced
- 7 Single, never married

V. COMMENTS

Thank you very much for your cooperation in this survey. If you have comments or concerns that you were not able to express in answering this survey, please write them in the space provided.

COMMENT Note 19

Handwritten text: COMMENT Note 19

Below the handwritten text are approximately 20 horizontal lines for writing a comment.

Any comments you make on this questionnaire will be kept confidential, and no follow-up action will be taken in response to any specifics reported. If you want to report a harassment problem, information about how to do so is available through your command Equal Opportunity, Social Action, or Civil Rights Office.

V. COMMENT	Sect 4. COMMENT	V. COMMENT	Did respondent write other comments

Note. Table is sorted by the order of the items in the first column. Each entry in the first three columns is the item number on the survey and the variable name used in the SAS® system files. The short descriptions of the items are based on the variable labels used in the SAS® system files.

* Indicates an item that is similar, not identical, to the item in the first column.

** Indicates an item that is removed from the public-use Survey Analysis File in order to preserve respondent confidentiality.

Note. Table is sorted by the order of the items in the first column. Each entry in the first three columns is the item number on the survey and the variable name used in the SAS[®] system files. The short descriptions of the items are based on the variable labels used in the SAS[®] system files.

* Indicates an item that is similar, not identical, to the item in the first column.

** Indicates an item that is removed from the public-use Survey Analysis File in order to preserve respondent confidentiality.

Appendix E

Coding Scheme for the Status of the Armed Forces Surveys: 1995 Forms A-C

The guiding premise of coding this and other DMDC surveys is that the analysts creating the dataset will not be the only ones analyzing the data. This premise is historical fact for DMDC since DMDC rarely collects data only for immediate use or to answer one question. DMDC datasets are analyzed repeatedly over time by different people at both DMDC and other organizations (governmental and private). Care is taken in organizing and documenting DMDC surveys so that secondary analysts can use the data and be reasonably certain that they understand how the data are coded and the limitations of the data. This appendix describes (a) variable naming conventions, (b) how data are captured from the survey instruments, and (c) the edit process to create survey response variables for the analysis files.

Variable Naming

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic could be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in sexual harassment responses that were provided on a single form in 1988 and on all three surveys in 1995. Conventions discussed below are being used as a means for facilitating such analyses.

Non-survey-derived Variables

Variables names for non-survey-derived variables tend to be character strings that aid in remembering the meaning of the variable. Two important conventions were used in naming variables.

- A variable name from DMDC record files was used only if the data, values, and value-labels were identical to those from an official DMDC data file. When data were added to an analysis file unchanged from record data, the same variable name, values, and value labels were used. For example, "SVC" is a field in the ADMF and RCCPDS that indicates the member's Service; since the variable in the survey data file is identical to that in the record data from the month that the sample was drawn, the same variable name and labels were used. In contrast, the constructed variable RSERVICE was given a variable name that is not used in the official records so as not to confuse analysts who work routinely with record data.
- Beginning a variable name with "X" indicates that it is a special crossing (marginal) variable for key analyses. "X" variables typically involve using record data to impute values for missing data in survey items. "X" variables may also be used to mask data. In such cases, collapsing or recoding to missing is performed in order to preserve confidentiality of respondents. (See Appendix J for the programming that was used to compute "X" variables.)

Survey-derived Variables

Identical demographic items are used across many DMDC surveys. Each time that these items are used, identical variable names and values are used. The variable names for this group of demographic items start with SR (mnemonic for self-reported or survey-reported). In the present set of surveys, the following items fall into this category: SRSEX, SRAGE, SRED, SRHISPAN, SRRACE, SRRACESP, SRMARST, SRSVC, and SRGRADE. Two other variables: SRDATE (see p. 14 of *Form A*, p. 15 of *Form B*, and p. 11 of *Form C*) and COMMENT (see p. 15 of *Form A*, p. 16 of *Form B*, and p. 12 of *Form C*), are also found across multiple DMDC surveys.

Variable names for items that are not standardized across DMDC surveys start with 1 or 2 letters to represent the survey, followed by 2 digits to represent the year that data are gathered, and end with 4 numbers/letters corresponding to the questionnaire item. Because of how sorting is done, leading zeros are used so that items are ordered from "001" through "999". Typically, the last of the 4 item-number digits is blank or contains a letter representing one of the sub-items within the question. (Exceptions are sometimes necessary. For example, variables GB9533A1 through GB9533B3 follow GB95032 and precede GB95034 in the gender/sexual harassment surveys. In this case, the exceptions were caused by item "033" having an "A" and a "B" section and each section having multiple sub-items.) The basic naming conventions are implemented as follows for *Forms A-C*:

- The first digit is "G" to indicate that the data come from the gender/sexual harassment surveys. Recoded variables are named for the basic survey item and have an "R_" or at least an "R" inserted in front of the base-variable name to indicate that it is a recoded variable.
- The second digit tells the survey form (*A*, *B*, or *C*) on which the item first appeared. Most variable names start with "GA" or "GB" to indicate that an item appeared first on *Form A* or *B*, respectively. Few items start with "GC" because few items in *Form C* are not identical to an item in *Form A* or *B*.
- The third and fourth digits of the variable names are "95" to indicate that these data come from surveys administered in 1995.
- For *Forms A* and *B*, the fifth through eighth digits of the variable name represent the item number (as previously described). For *Form C* items that are identical to items in another form, the variable name is identical to the variable name in the other form. For the few "GC95xxxx" items, each is based on an item in *Form B*⁶; and the question number part of the variable name cross-references the *Form B* item number, not the item number in *Form C*.
- Specify flags (variables whose names end in a "SP") document whether information has been written in a specify box. For example, if respondents to *Form B* indicated on Question 71y that they experienced some other sex-related behavior, they were directed to specify what

⁶ The difference between the items is that *Form B* references the "situation with the greatest impact" during the past year and *Form C* references "all behaviors" in the past year.

they experienced. GB9571SP is a flag variable that indicates whether text was entered in the write-in area. Specify flag variables are based on scanning the area of the survey for pencil marks. These variables are subject to scan errors because the scanner occasionally detects black print from the reverse side of the page.

Value Coding and Formats

Datasets were prepared as SAS[®] system files; OS or flat files were then prepared from the SAS[®] system files. This section describes how values were treated in creating the SAS[®] system files and notes any differences in the flat file.

In the SAS[®] system files, variables were declared as numeric unless they contain true alphabetic characters. Although numeric variables can take more storage space, many statistical and logical operations can only be done with variables that are declared as numeric. Values for alphabetic variables were input with \$CHARww. formats to preserve leading, embedded, and trailing blanks.

Raw-Data Encoding Process

The first step in creating the SAS[®] system files involved the scanning of the surveys and resolution of problems based on visual inspection of problem surveys. All returned surveys were optically scanned to create raw data files containing "0" and "1" coding for every unmarked and marked scannable space on the survey. Problems often arise from grid items (e.g., years of service). Data editors attempted to resolve every grid problem (no scanned response, an incomplete response, or multiple responses) by visually inspecting the surveys and manually verifying the data.

Survey responses were then edited for the analysis files in three coding steps.

1. Survey-derived variables for each item in the survey were created from the raw data. Each variable was coded with (a) valid response option values (shown in the coding annotations on the survey forms in Appendices A-C) or (b) missing data value codes (discussed below).
2. Specify flag variables were created, and codes were assigned to indicate if respondents wrote-in responses according to the direction for items with fill-in boxes.
3. Skip patterns were evaluated, and codes were assigned to variables for items initiating skips. The codes for items initiating skips indicate if respondents failed to complete the skip pattern correctly. Other codes for valid skips were assigned to variables within skip patterns using a "forward coding" process.

In the first coding step, each item is evaluated individually, and codes are assigned according to only what is marked in that item. These codes are based on the position of mark(s) in only one item and are found on the annotated forms in Appendices A-C. In the coding

sequence outlined above, coding in the second and third steps build on prior steps and usually involve values in multiple items to resolve edits.

The next sections discuss the assignment of missing value codes, the special treatment of date variables, and the editing of skip patterns during steps 2 and 3.

Missing Data Codes

The codes presented in Table E-1 are general missing data codes that have been adopted recently for use on all DMDC surveys. This table has separate columns for values used for SAS[®] system files and the flat files. The biggest difference between the flat files and SAS[®] system files is in the treatment of missing values. The flat file codes differ from the SAS[®] codes because SAS[®] implements special missing codes and formats that may not be compatible with other statistical analysis software such as SPSS[®]. SAS[®] can represent up to 27 missing data values for numeric variables as either a period or a period-letter combination. While SAS[®] can read alphas representing missing data in a raw data field declared to be numeric, other programs such as SPSS[®] do not accept alpha characters in numeric fields. Missing numeric data are represented in the flat files by negative numbers that can be declared as missing values. For example, a multiple-response error in flat files is coded as a “-8”, which can be declared as a missing value when the data are input in SPSS[®]—In the SAS[®] file, the value “.A” is used to represent a multiple response error.

Many types of missing data are common to scannable surveys and are self-explanatory. In general, missing data are coded as “-9” (SAS[®]: .) when respondents *invalidly* skip the item; and multiple response errors are coded as “-8” (SAS[®]: .A). Incompletely gridded responses that could not be resolved by visual inspection are coded as “-4” (SAS[®]: .I). Out of range responses in grids (e.g., a current age less than minimum entry age for the military) are coded as “-7” (SAS[®]: .O).

For a *single item* that contains a response alternative of “Not applicable”, a missing data code of “-6” (SAS[®]: .N) is typically used. When *multiple items* can be affected by a skip pattern or when item(s) have *multiple ways* to be not applicable, specific codes are used. This type of coding is discussed later in the section entitled “Skip Pattern Coding”. That later section also explains using the code “-2” (SAS[®]: .M) to denote implied continuations.

Multiple survey forms are sometimes used in a single effort, and the data from all the related forms may be combined into a single dataset for analysis. In a combined dataset, a code of “-5” (SAS[®]: .F) indicates missing data for variables not on the form completed by a respondent. This code is not used on the analysis files for the separate survey forms.

Records are included in the Survey Analysis Files for sampled members who are known to be ineligible, regardless of whether or not they returned a survey. If an ineligible member did not return a survey or returned a blank survey, every survey variable is assigned a value of “-1” (SAS[®]: .B). This code is also used for survey variables for nonrespondents in the methods analysis files and for blank surveys in the duplicates files.

Table E-1.
Basic SAS® and Flat File Missing Data Codes

SAS®		Flat File		Description
Numeric	Alpha	Numeric	Alpha	
.	.	-9	.	<i>No response (invalid skip)</i>
.A	.A	-8	.A	<i>Multiple response error</i>
.O	.O	-7	.O	<i>Out-of-range error</i>
.N	.N	-6	.N	<i>Not applicable (valid skip)</i>
.F	.F	-5	.F	<i>Variable not on survey form.</i> This value is suggested when combining data from different forms.
.I	.I	-4	.I	<i>Incomplete grid error</i>
.G	.G	-3	.G	<i>No match on official records.</i> Rare code for master file variables when surveys could not be matched back to the sample file or where no match was found on some official records such as DEERS.
.M	.M	-2	.M	<i>Implied continuation.</i> Respondent's answer to this item is inconsistent with his/her answering items in a skip pattern started with this item.
.B	.B	-1	.B	<i>Blank/no survey.</i> This filler value is used for survey variables when either a blank survey is returned or no survey is returned.
98	NS	98	NS	Not sure*
99		99		Don't know or Other*

Notes. *Use of "Don't know" or "Not sure" as a response is not exactly missing data. It is, however, given special treatment because it lacks precision and is sometimes excluded when calculating percentages. If an analyst decides to exclude this response when calculating percentages, the value should be recoded as missing; in SAS® datasets the value .D is suggested for use.

In very rare cases, a match might not be able to be made to official records. For example, some records might not have been found in the DEERS system for members sampled from the ADMF. In other cases, a duplicate survey might be returned that was marked as being completed by someone other than the member to whom it was sent. In such cases, a value of “-3” (SAS®: .G) would be assigned to the official record variables; this code indicates that the survey could not be matched back to the sample file or to other official records.

Special codes are also used for certain responses that are not missing data but do lack precision. A code of “98” is used for a response of “Not sure”, while “99” is used for responses of “Don’t know” or “Other”.

Date Codes for Missing Data

Exact dates were formatted YYYYMMDD⁷ (SAS® input format YYMMDD8.) in anticipation of the turn of the century. Because SAS® stores dates as the number of days from a standard date of 1 January 1960, special dates have to be used to indicate specific types of missing or error data (see Table E-2). The column headed YYYYMMDD shows how special missing data values for SRDATE are formatted in the flat file for this survey.⁸ When SAS® reads a date value from a flat file, it stores that date as the value in the column headed “Value read from input.” SAS® “if-then” statements were used to recode those values to the special missing value codes in the first column of Table E-2.

Table E-2.
SAS® and Flat File Missing Data Codes for Dates

SAS®		Flat File		Description
Recoded value	Value read from input	YYYYMMDD	MONYYYY	
.	-54908	18090901	SEP1809	<i>No response (invalid skip)</i>
.A	-55304	18080801	AUG1808	<i>Multiple response error</i>
.O	-55701	18070701	JUL1807	<i>Out-of-range error</i>
.N	-56096	18060601	JUN1806	<i>Not applicable (valid skip)</i>
.F	-56492	18050501	MAY1805	<i>Variable not on survey form</i>
.I	-56887	18040401	APR1804	<i>Incomplete grid error</i>
.B	-58073	18010101	JAN1801	<i>Blank/no survey</i>

⁷ Similarly, dates given as months and years would be formatted as MONYYYY (e.g., AUG1993). When input by SAS® format MONYY7., month/year dates are stored as if they specified the first day of the month.

⁸ While there are no variables in this survey where only a month and year are entered, the column MMMYYYY is included in this table to illustrate how the coding works for this type of variable in other surveys.

Skip Pattern Coding

A single item might have multiple codes for not applicable—each uniquely identified with a separate reason. Special not-applicable codes for the gender/sexual harassment surveys are given in Table E-3. Different reasons for an item being not applicable have been preserved by distinct codes. Data analysts might want to recode or reformat special value codes for different types of missing or not-applicable data. The analysts might then use these transformed data to tabulate percentages that represent only respondents to whom the question applied. Some not-applicable reasons might be considered valid in calculating percentages, while others might not.

“Backward”⁹ coding was used to assign the not-applicable codes from Table E-3 to indicate when a respondent skipped a series of items. The backward coding was based on the consistency or inconsistency of a respondent’s answer to the *first* item in a series of related items. The rules followed in editing the skip patterns are included in the coding notes in Table E-4.

Table E-4 provides specific coding notes for items involving skip patterns or other non-obvious coding. The number of the coding note is keyed to the text written on the survey forms contained in Appendices A through C. Annotations on the survey forms also provide specific numeric codes used for survey responses that are not specified in Tables E-1 through E-4.

Generally, if the answer to the first item in a skip pattern indicated that the remaining items in the pattern should be skipped but the respondent answered the other skip-pattern items, the answer to the first item was coded “-2” (SAS[®]: .M), “Implied continuation”. This coding allows the data to be preserved for the remaining items in the skip pattern. It is then up to the data analyst to investigate the data pattern and decide how to recode the answer for the first item. Also, the analyst must decide whether to accept the data for the remaining skip-pattern items or recode the data to “-6” (SAS[®]: .N), “Not applicable (valid skip).” Appendix I shows how Bastian et al. (1996) handled variables with multiple not-applicable codes.

Mark-all-that-apply questions were treated as if they were a series of yes/no items. Each item in the series is treated as an individual variable with codes of “1” for “Marked” and “0” for “Not marked”—similar to codes of “1” for “Yes” and “0” for “No”. Such items occasionally have a response option (e.g., “None of the above”) or other ways to indicate that all other response options are not applicable. Such items are treated as if they contained a skip pattern. That is, if the “None of the above” or “Not applicable” response is marked and any other response is marked, then the “None of the above” or “Not applicable” response is re-coded as “-2” (SAS[®]: .M), “Implied continuation.” The other answers are coded as marked/not marked.

⁹ In contrast to backward coding, forward coding accepts the data (as marked) on the starting question, and all data for the remaining items are ignored. Furthermore, answers to all subsequent items in the forward-coded skip pattern are stored irretrievably as “-6” (SAS[®]: .N), “Not applicable (valid skip)”. Given these limitations of forward coding, backward coding was used unless a respondent *only* marked not-applicable alternatives within the skip pattern. In such case, it was assumed that the respondent went on to read the items within the skip pattern and “helped” by continuing to mark not applicable when there was no need to do so.

Table E-3.
Special Not Applicable Codes for SAFS Forms A-C

Codes	Description
60	Not applicable—Used when NA's might be counted as valid responses.
61	Doesn't apply—I marked "Never" to every item on incidences (GB95071A through GB95071Y).
62	Person marked a frequency greater than "Never" for one or more items on incidences (GB95071A through GB95071Y) but marked "Doesn't apply—I marked 'Never' to every item in GB95071A through GB95071Y" for item GB95072.
63	Does not apply—I did NOT report the behavior to someone specified in GB95100A through GB95100J.
64	Does not apply—I DID report the behavior to someone specified in GB95100A through GB95100J.
65	Not applicable—The action is still being processed.
66	Doesn't apply—I haven't received any training.
67	Doesn't apply—Respondent didn't receive unwanted, uninvited sexual attention during the last 12 months.
68	Doesn't apply—Respondent filed a formal action.
69	Doesn't apply—Respondent didn't file a formal action.
70	Doesn't apply—No one else in the unit knew.
71	Doesn't apply—Productivity was not affected, or respondent didn't know/couldn't judge affect.
72	Doesn't apply—Unwanted, uninvited sexual attention occurred in CONUS or at sea.
73	Doesn't apply—Unwanted, uninvited sexual attention occurred overseas or at sea.
74	Doesn't apply—Respondent received unwanted, uninvited sexual attention only once during the last 12 months

Table E-4.
Coding Notes

Note	Coding instructions and codebook specifications
1	<p>SRAGE, R_SRAGE, R_SRAGE2</p> <p>Values of 16 and less are recoded as -7 (out-of-range error) since a person must be at least 17 years of age to enter the military.</p> <p><i>Codebook page for SRAGE should note:</i> A -7 (OUT-OF-RANGE ERROR) WAS ASSIGNED FOR RESPONDENTS REPORTING AN AGE LESS THAN 17. RESPONSES WERE NOT CHECKED FOR VALID VALUES AT THE UPPER END OF THE RANGE.</p> <p>SRAGE is available only on the Methods Analysis Files. R_SRAGE and R_SRAGE2 on the Survey Analysis Files was created by collapsing the two ends of the distribution.</p>
2	<p>SRRACE, SRRACESP, XRCE, XRACETH</p> <p>SRRACE is a regular “mark-one-response” item that is coded:</p> <ul style="list-style-type: none"> 1 to 5 depending upon the response that is marked, or -9 (No response, invalid skip) if no response is marked, or -8 (Multiple response error) if more than one of the 5 bubbles is marked. <p><i>Codebook page for SRRACE should note:</i> CODING REPRESENTS WHAT WAS REPORTED IN THE FIVE OPTION BOXES WITHOUT CONSIDERATION OF ANYTHING WRITTEN IN THE “PLEASE SPECIFY BELOW” BOX.</p> <p>SRRACESP is coded:</p> <ul style="list-style-type: none"> 1 (Text entered) if the scanner detects something written in the specify box and SRRACE equals 5, or 0 (No text entered) if the scanner detects nothing written in the specify box and SRRACE equals 5, or -2 (Implied continuation) if the scanner detects something written in the specify box and SRRACE is NOT equal to 5, or -6 (Not applicable, valid skip) if the scanner detects nothing written in the specify box and SRRACE is NOT equal to 5. <p><i>Codebook page for SRRACESP should note:</i> CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE “PLEASE SPECIFY BELOW” BOX FOR OTHER RACE.</p> <p>SRRACE and SRRACESP are available only on the Methods Analysis Files. XRCE and XRACETH on the Survey Analysis Files are based on SRRACE and SRHISPAN with missing values imputed from record data. Appendix J details the construction.</p>

3 **GB95009, GB9509FL**

Codebook page for GB95009 should note:

THIS FIELD IS NOT CHECKED FOR UNLIKELY VALUES; ENTRIES UP TO 49 YEARS ARE ACCEPTED. NOTE, THE MASTER FILE VARIABLE "TAFMS" (WHICH IS CALCULATED IN MONTHS) IS EDITED SUCH THAT VALUES OVER 35 YEARS AND LESS THAN OR EQUAL TO 40 YEARS ARE RECODED TO 35 YEARS WHILE VALUES OVER 40 YEARS ARE RECODED TO MISSING.

Codebook page for GB9509FL should note:

THIS FIELD IS NOT CHECKED FOR UNLIKELY VALUES; ENTRIES UP TO 49 YEARS ARE ACCEPTED. NOTE, THE MASTER FILE VARIABLE "TAFMS" (WHICH IS CALCULATED IN MONTHS) IS EDITED SUCH THAT VALUES OVER 35 YEARS AND LESS THAN OR EQUAL TO 40 YEARS ARE RECODED TO 35 YEARS WHILE VALUES OVER 40 YEARS ARE RECODED TO MISSING. GB9509FL EXAMINES WHETHER THE INCOMPLETE GRID ERROR WAS IN THE ONES OR TENS COLUMN FOR GB95009. IF THE MISSING GRID WAS IN THE TENS COLUMN, GB9509FL ASSUMES THAT THE RESPONDENT DID NOT GRID A ZERO (TO INDICATE LESS THAN 10 YEARS).

4 **GB9534FL**

Codebook page for GB9534FL should note:

GB9534FL EXAMINES WHETHER THE INCOMPLETE GRID ERROR WAS IN THE ONES OR TENS COLUMN FOR GB95034. IF THE MISSING GRID WAS IN THE TENS COLUMN, GB9534FL ASSUMES THAT THE RESPONDENT DID NOT GRID A ZERO (TO INDICATE LESS THAN 10 MONTHS).

5 **GB9571SP**

GB9571SP is coded:

1 (Text entered) if the scanner detects something written in the specify box and GB95071Y is a value of 1-4, or

0 (No text entered) if the scanner detects nothing written in the specify box and GB95071Y is a value of 1-4, or

-2 (Implied continuation) if the scanner detects something written in the specify box and GB95071Y is NOT a value of 1-4, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify box and GB95071Y is NOT a value of 1-4.

Codebook page for GB9571SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR OTHER SEX-RELATED BEHAVIOR NOT LISTED ABOVE.

6 **GB95072 (also affects GB95071A - GB95071Y)**

If codes -8 (Multiple response error) or -9 (No response, invalid skip) do not apply:

Code GB95072 as 0, 1, or 2 when one of the first 3 responses is marked and one or more of items GB95071A through GB95071Y is/are coded as 1-4, or

Code GB95072 as 10, 11, or 12 when one of the first 3 responses is marked and NONE of items GB95071A through GB95071Y is coded as 1-4.

If only the fourth response is marked in GB95072:

Code GB95072 as 61(Doesn't apply--I marked "never" to every item on incidences--GB95071A through GB95071Y) when NONE of GB95071A through GB95071Y is marked in the range of 1-4 and NONE of GB95073A through GB95108 is marked, or

Code GB95072 as 62 (Person marked a frequency greater than "Never" for one or more items on incidences--GB95071A through GB95071Y--but marked "Doesn't apply--I marked 'Never' to every item in GB95071A and GB95071Y" and for item GB95072) when one or more of GB95071A through GB95071Y is/are coded in the range of 1-4 but NONE of GB95073A through GB95108 is 1 (Marked)

Code GB95072 as -2 (Implied continuation) when one or more of GB95071A through GB95071Y is/are coded in the range of 1-4 and one or more of GB95073A through GB95108 is/are (1) (Marked).

Code GB95072 as -2 (Implied continuation) when NONE of GB95071A through GB95071Y is coded in the range of 1-4 and one or more of GB95073A through GB95108 are marked. Also, code every item in GB95071A through GB95071Y that was marked never by the person as -2 (Implied continuation).

6C **GB95072 (also affects GB95071A - GB95071Y) IN FORM C**

If codes -8 (Multiple response error) or -9 (No response, invalid skip) do not apply:

Code GB95072 as 0, 1, or 2 when one of the first 3 responses is marked and one or more of GB95071A through GB95071Y is/are coded in the range of 1-4, or

Code GB95072 as 10, 11, or 12 when one of the first 3 responses is marked and NONE of items GB95071A through GB95071Y is coded in the range of 1-4.

If only the fourth response is marked in GB95072:

Code GB95072 as 61(Doesn't apply--I marked "Never" to every item on incidences--GB95071A through GB95071Y) when NONE of GB95071A through GB95071Y is marked in the range of 1-4 and NONE of GC95075 through GC9507SP is marked, or

Code GB95072 as 62 (Person marked a frequency greater than "Never" for one or more items on incidences--GB95071A through GB95071Y--but marked "Doesn't apply--I marked 'Never' to every item in GB95071A and GB95071Y" and for item GB95072) when one or more of GB95071A through GB95071Y is/are coded in the range of 1-4 but NONE of GC95075 through GC9507SP is marked.

Code GB95072 as -2 (Implied continuation) when one or more of GB95071A through GB95071Y is/are coded in the range of 1-4 and one or more of GC95075 through

GC9507SP is/are marked.

Code GB95072 as -2 (Implied continuation) when NONE of GB95071A through GB95071Y is coded in the range of 1-4 and one or more of GC95075 through GB9507SP are marked. Also, code every item in GB95071A through GB95071Y that was marked never by the person as -2 (Implied continuation).

7 GB95073A - GB95108

If GB95072 is coded 61, then all responses from GB95073A through GB95108 are also coded 61.

If GB95072 is coded 62, then all responses from GB95073A through GB95108 are also coded 62.

For any other coding of GB95072, responses to GB95073A through GB95108 are coded as below.

7C GC95075 - GC9507SP) IN FORM C

If GB95072 is coded 61, then all variables from GC95075 through GC9507SP are also coded 61.

If GB95072 is coded 62, then all variables from GC95075 through GC9507SP are also coded 62.

For any other coding of GB95072, variables GC95075 through GC9507SP are coded as below.

8 GB95073A - GB95073Y, GB95078A - GB95078N

These are treated as standard "mark all that apply."

If at least one item is marked, then all are coded as 1 (Marked) or 0 (Not marked).

If none are marked (and Note 7 does not apply), then all are marked as -9 (No response, invalid skip).

9 GB9599SP

GB9599SP is coded:

1 (Text entered) if the scanner detects something written in the specify box and GB95099L is in range of 1-3, or

0 (No text entered) if the scanner detects nothing written in the specify box and GB95099L is in range of 1-3, or

-2 (Implied continuation) if the scanner detects something written in the specify box and GB95099L is NOT in range of 1-3, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify box and GB95099L is NOT in range of 1-3.

Codebook page for GB9599SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR OTHER ACTION TAKEN.

10 **GB9500SP**

GB9500SP is coded

1 (Text entered) if the scanner detects something written in the specify box and GB95100J is in range of 1-3, or

0 (No text entered) if the scanner detects nothing written in the specify box and GB95100J is in range of 1-3, or

-2 (Implied continuation) if the scanner detects something written in the specify box and GB95100J is NOT in range of 1-3, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify box and GB95100J is NOT in range of 1-3.

Codebook page for GB9500SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR REPORTING TO OTHER PERSON OR OFFICE WITH RESPONSIBILITY FOR FOLLOW-UP.

10C **GC9500SP IN FORM C**

GC9500SP is coded

1 (Text entered) if the scanner detects something written in the specify box and GC95100J is in range of 1-3, or

0 (No text entered) if the scanner detects nothing written in the specify box and GC95100J is in range of 1-3, or

-2 (Implied continuation) if the scanner detects something written in the specify box and GC95100J is NOT in range of 1-3, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify box and GC95100J is NOT in range of 1-3.

Codebook page for GC9500SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR REPORTING TO OTHER PERSON OR OFFICE WITH RESPONSIBILITY FOR FOLLOW-UP.

11 **GB95101A - GB95106 (also affects GB95100A - GB95100J)**

If NONE of items GB95100A through GB95100J is coded in the range of 1-3 and NONE of items GB95101A through GB95106 is marked, then code GB95101A through GB95106 as 63 (Does not apply--I did NOT report the behavior to someone specified in GB95100A--GB95100J).

If NONE of items GB95100A through GB95100J is coded in the range of 1-3 but one or more of items GB95101A through GB95106 is/are marked, then code as -2 (Implied continuation) each item (if any) in GB95100A through GB95100J that was marked "No, I did not report it to this person/office."

If one or more of items GB95100A through GB95100J is/are coded in the range of 1-3, nothing special needs to be done. Items GB95101A through GB95106 are coded as marked, even if none are marked and all of GB95101A through GB95106 are coded as -9 (No response, invalid skip).

11C GC95101A - GC95106 (also affects GC95100A - GC95100J) IN FORM C

If NONE of items GC95100A through GC95100J is coded in the range of 1-3 and NONE of GC95101A through GC95106 is marked, then code GC95101A through GC95106 as 63 (Does not apply--I did NOT report the behavior to someone specified in GC95100A--GC95100J).

If NONE of items GC95100A through GC95100J is coded in the range of 1-3 but one or more of GC95101A through GC95106 is/are marked, then code as -2 (Implied continuation) each item (if any) in GC95100A through GC95100J that was marked "No, I did not report it to this person/office."

If one or more of items GC95100A through GC95100J is/are coded in the range of 1-3, nothing special needs to be done. Items GC95101A through GC95106 are coded as marked, even if none are marked and all of GC95101A through GC95106 are coded as -9 (No response, invalid skip).

12 GB95101A - GB95101M

This is a "mark all that apply with embedded skip." If codes 61-63 do not apply:

If none of items GB95101A through GB95101M are marked, then all are coded -9 (No response, invalid skip).

If at least one item is marked in items GB95101A through GB95101L and GB95101M is not marked, then all of GB95101A through GB95101L are coded 1 (Marked) or 0 (Not marked) while GB95101M is coded 0 (Not marked).

If at least one item is marked in items GB95101A through GB95101L and GB95101M is marked, then all of items GB95101A through GB95101L are coded as 1 (Marked) or 0 (Not marked) while GB95101M is coded -2 (Implied continuation).

If none of GB95101A through GB95101M is marked except for GB95101M being marked, then all of items GB95101A through GB95101L are coded as 0 (Not marked) while GB95101M is coded 1 (Marked).

12C GC95101A - GC95101M IN FORM C

This is a "mark all that apply with embedded skip." If codes 61-63 do not apply:

If none of items GC95101A through GC95101M is marked, then all are coded -9 (No response, invalid skip).

If at least one item is marked in items GC95101A through GC95101L and GC95101M is not marked, then all of items GC95101A through GC95101L are coded 1 (Marked) or 0 (Not marked) while GC95101M is coded 0 (Not marked).

If at least one item is marked in items GC95101A through GC95101L and GC95101M IS marked, then all of GC95101A through GC95101L are coded 1 (Marked) or 0 (Not marked) while GC95101M is coded -2 (Implied continuation).

If none of items GC95101A through GC95101M is marked except for GC95101M being marked, then all of items GC95101A through GC95101L are coded as 0 (Not marked) while GC95101M is coded 1 (Marked).

13 **GB9501SP**

If codes 61-63 do not apply, GB9501SP is coded:

1 (Text entered) when the scanner detects something written in the specify box and GB95101K is marked, or

0 (No text entered) when the scanner detects nothing written in the specify box and GB95101K is marked, or

-2 (Implied continuation) when the scanner detects something written in the specify box and GB95101K is NOT marked, or

-6 (Not applicable, valid skip) when the scanner detects nothing written in the specify box and GB95101K is NOT marked.

Codebook page for GB9501SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR OTHER ACTIONS TAKEN BY ORGANIZATION.

13C **GC9501SP IN FORM C**

If codes 61-63 do not apply, GC9501SP is coded:

1 (Text entered) when the scanner detects something written in the specify box and GC95101K is marked, or

0 (No text entered) when the scanner detects nothing written in the specify box and GC95101K is marked, or

-2 (Implied continuation) when the scanner detects something written in the specify box and GC95101K is NOT marked, or

-6 (Not applicable, valid skip) when the scanner detects nothing written in the specify box and GC95101K is NOT marked.

Codebook page for GC9501SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR OTHER ACTIONS TAKEN BY ORGANIZATION.

14 **GB95104A - GB95104H, GB105**

This is a "mark all that apply with embedded skip". It also starts a skip pattern for one additional item. If codes 61-63 do not apply and:

If none of items GB95104A through GB95104H is marked, then all are marked as -9 (No response, invalid skip), and GB95105 is coded as marked.

If at least one item is marked in items GB95104B through GB95104H and GB95105 and GB95104A are not marked, then all items GB95104B through GB95104H and GB95105 are coded 1 (Marked) or 0 (Not marked) while GB95104A is coded 0 (Not marked).

If at least one item is marked in items GB95104B through GB95104H and GB95105 and GB95104A IS marked, then all items GB95104B through GB95104H and GB95105 are coded 1 (Marked) or 0 (Not marked), while GB95104A is coded -2 (Implied continuation).

If none of items GB95104A through GB95104H and GB95105 is marked except for GB95104A, then all items GB95104B through GB95104H and GB95105 are coded as 65 (Not applicable--the action is still being processed) while GB95104A is coded 1 (Marked).

15 **GB95107A - GB95107T**

This is a "mark all that apply with embedded skip." If codes 61-62 do not apply and:

If none of items GB95107A through GB95107T is marked, then all are coded -9 (No response, invalid skip).

If at least one item is marked in GB95107B through GB95107T and GB95107A is not marked, then all of items GB95107B through GB95107T are coded 1 (Marked) or 0 (Not marked) while GB95107A is coded 0 (Not marked).

If at least one item is marked in GB95107B through GB95107T and GB95107A IS marked, then all of GB95107B through GB95107T are coded 1 (Marked) or 0 (Not marked) while GB95107A is coded -2 (Implied continuation).

If none of items GB95107A through GB95107T are marked except for GB95107A, then all of items GB95107B through GB95107T are coded 64 (Does not apply--I DID report the behavior to someone specified in GB95100A through GB95100J) while GB95107A is coded 1 (Marked).

Codebook pages for GB95107A--GB95107T should note:

THIS ITEM HAS NOT BEEN CHECKED FOR CONSISTENCY WITH ITEMS GB95100A THROUGH GB95100J.

15C **GC95107A - GC95107T IN FORM C**

This is a "mark all that apply with embedded skip." If codes 61-62 do not apply:

If none of items GC95107A--GC95107T is marked, then all are coded as -9 (No response, invalid skip).

If at least one item is marked in GC95107B through GC95107T and GC95107A is not marked, then all of items GC95107B through GC95107T are coded as 1 (Marked) or 0 (Not marked) while GC95107A is coded 0 (Not marked).

If at least one item is marked in GC95107B through GC95107T and GC95107A IS marked, then all of items GC95107B through GC95107T are coded as 1 (Marked) or 0 (Not marked) while GC95107A is coded -2 (Implied continuation).

If none of items GC95107A through GC95107T is marked except for GC95107A, then all of items GC95107B through GC95107T are coded as 64 (Does not apply--I DID report the behavior to someone specified in GC95100A--GC95100J) while GC95107A is coded 1 (Marked).

Codebook pages for GC95107A--GC95107T should note:

THIS ITEM HAS NOT BEEN CHECKED FOR CONSISTENCY WITH ITEMS GC95100A--GC95100J.

16 **GB9507SP**

If codes 61-62 do not apply, GB9507SP is coded:

1 (Text entered) when the scanner detects something written in the specify box and GB95107T is marked, or

0 (No text entered) when the scanner detects nothing written in the specify box and GB95107T is marked, or

-2 (Implied continuation) when the scanner detects something written in the specify box and GB95107T is NOT marked, or

-6 (Not applicable, valid skip) when the scanner detects nothing written in the specify box and GB95107T is NOT marked.

Codebook page for GB9507SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR SOME OTHER REASON FOR NOT REPORTING.

16C **GB9507SP IN FORM C**

If codes 61-62 do not apply, GB9507SP is coded:

1 (Text entered) when the scanner detects something written in the specify box and GB95107T is marked, or

0 (No text entered) when the scanner detects nothing written in the specify box and GB95107T is marked, or

-2 (Implied continuation) when the scanner detects something written in the specify box and GB95107T is NOT marked, or

-6 (Not applicable, valid skip) when the scanner detects nothing written in the specify box and GB95107T is NOT marked.

Codebook page for GC9507SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" BOX FOR SOME OTHER REASON FOR NOT REPORTING.

17 **GB95130 - GB95131B**

If codes -8 (Multiple response error) or -9 (No response, invalid skip) do not apply and:

If the first response in GB95130 is marked, then items GB95131A and GB95131B are coded 66 (Doesn't apply--I haven't received any training).

If the first response in item GB95130 is marked (but nothing else in GB95130 is marked) and items GB95131A and/or GB95131B is/are marked, then item GB95130 is coded -2 (Implied continuation) and GB95131A through GB131B are coded as marked.

18 **SRDATE, SRDATEFL**

See Table E-2 for coding. Note, "1995" is inserted in respondent-specified month and day. The data are to be code in the numeric format YYYYMMDD.

Dates that are before 17 February 1995 were changed to -7 (out-of-range error) since the surveys were not delivered to the U.S. Postal Service until 15 February 1995.

Codebook page for SRDATE should note:

IN THE SAS DATASET, A 18070701 (OUT-OF-RANGE ERROR) WAS ASSIGNED FOR RESPONDENTS WHO REPORTED COMPLETING THE SURVEY ON A DATE LESS THAN 2 DAYS AFTER THE FIRST SURVEY MAILING. RESPONSES WERE NOT CHECKED FOR VALID VALUES AT THE UPPER END OF THE RANGE. VALUES WERE NOT CHECKED FOR A VALID RANGE IN THE OS DATA, BUT WERE CHECKED BY THE DDMMYY FORMAT IN THE SAS DATASET.

Codebook page for SRDATEFL should note:

IN THE SAS DATASET, A 18070701 (OUT-OF-RANGE ERROR) WAS ASSIGNED FOR RESPONDENTS WHO REPORTED COMPLETING THE SURVEY ON A DATE LESS THAN 2 DAYS AFTER THE FIRST SURVEY MAILING. RESPONSES WERE NOT CHECKED FOR VALID VALUES AT THE

UPPER END OF THE RANGE. VALUES WERE NOT CHECKED FOR VALID RANGE IN THE OS DATA, BUT WERE CHECKED BY THE DDMMYY FORMAT IN THE SAS DATASET. THIS VARIABLE WAS CREATED USING THE ASSUMPTION THAT A MISSING VALUE IN THE TENS COLUMN OF THE DAY GRID WAS ZERO.

19 **COMMENT**

COMMENT is coded:

1 (Text entered) if the scanner detects something written in space provided for comments, or

0 (No text entered) if the scanner detects nothing written in space provided for comments.

20 **GA95004A - GA95004F**

These items are treated as standard "mark all that apply."

If at least one item is marked, then each answer is coded as either 1 (Marked) or 0 (Not marked).

If no answer is marked, then all answers are coded as -9 (No response, invalid skip).

21 **GA9506SP**

GA9506SP is coded

1 (Text entered) if the scanner detects something written in the specify area and GA95006L is in range of 1-5, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95006L is in range of 1-5, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95006L is NOT in range of 1-5, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95006L is NOT in range of 1-5.

Codebook page for GA9506SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR ACTIONS TAKEN TO MAKE OTHERS STOP BOTHERING THEM SEXUALLY.

22 **GA9509SP**

GA9509SP is coded

1 (Text entered) if the scanner detects something written in the specify area and GA95009J is 1, 0, or -1

0 (No text entered) if the scanner detects nothing written in the specify area and GA95009J is 1, 0, or -1

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95009J is NOT 1, 0, or -1

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95009J is NOT 1, 0, or -1.

Codebook page for GA9509SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR ACTIONS TAKEN AT THE RESPONDENT'S CURRENT DUTY STATION TO REDUCE SEXUAL HARASSMENT.

23 **GA95010A - GA9010F**

These items are treated as standard "mark all that apply."

If at least one item is marked, then each answer is coded as either 1 (Marked) or 0 (Not marked).

If no answer is marked, then all answers are coded as -9 (No response, invalid skip).

24 **GA95011A - GA9011K**

These items are treated as standard "mark all that apply."

If at least one item is marked, then each answer is coded as either 1 (Marked) or 0 (Not marked).

If no answer is marked, then all answers are coded as -9 (No response, invalid skip).

25 **GA9511SP**

GA9511SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95011J is marked, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95011J is marked, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95011J is NOT marked, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95011J is NOT marked.

Codebook page for GA9511SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER UNWANTED, UNINVITED ATTENTION OF A SEXUAL NATURE (EVER WHILE SERVING IN THE ACTIVE-DUTY MILITARY).

26 **GA9512SP**

GA9512SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95012J is in range of 1-4, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95012J is in range of 1-4, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95012J is NOT in range of 1-4, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95012J is NOT in range of 1-4, or

-1 (Not sure--Text was entered, but the respondent marked "never") if the scanner detects something written in the specify area and GA95012J is 0.

Codebook page for GB9512SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER SEXUAL ATTENTION DURING THE LAST 12 MONTHS.

27 **GA95012K, GA9512FL, GA95013A - GA95047**

GA95012K is coded 0-4 as marked.

GA9512FL is imputed to establish a baseline for GA95012A through GA95012J

-9 (No response, invalid skip) if nothing is marked in GA95012A through GA95012K and nothing is marked in GA95013A through GA95047, or

0 (NOT experienced) if [none of GA95012A through GA95012J is in range of 1-4 and nothing is marked in GA95013A through GA95047] and [at least one is marked as 0 (Never) in GA95012A through GA95012J or something is marked in GA95012K], or

1 (Experienced) if at least one of GA95012A through GA95012J is coded as 1-4, or

-2 (Implied continuation) if the conditions for codes -9 or 0 would apply except for something marked in GA95013A through GA95047.

Code GA95013A through GA95047 as 67 (Doesn't apply--Respondent didn't receive unwanted, uninvited sexual attention during the last 12 months.) if GA9512FL is coded 0 (NOT experienced).

Codebook page for GB9512K should note:

CODING REPRESENTS HOW THIS ITEM WAS MARKED WITHOUT RESPECT TO ANY OTHER ITEM.

Codebook page for GB951FL should note:

CODING REPRESENTS AN IMPUTATION BASED ON RESPONSES TO ITEMS GA95012A--GA95012K AND GA95013A--GA95047.

28 **GA95013A - GA95013H, GA95015A - GA95015J, GA95027A - GA95027K, GA9529D1 - GA9529D4, GA9529E1 - GA9529E7**

If the answers are not coded 67, these seven sets of items are treated as standard "mark all that apply." In each set:

If at least one item is marked, then each answer is coded as either 1 (Marked) or 0 (Not marked).

If no answer is marked, then all answers are coded as -9 (No response, invalid skip).

29 **GA9515SP**

GA9515SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95015J is marked, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95015J is marked, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95015J is NOT marked, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95015J is NOT marked.

Codebook page for GA9515SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER UNWANTED, UNINVITED ATTENTION OF A SEXUAL NATURE (ONE EXPERIENCE THAT HAD THE GREATEST EFFECT) .

30 **GA9516SP**

GA9516SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95016K is in range of 1-3, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95016K is in range of 1-3, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95016K is NOT in range of 1-3, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95016K is NOT in range of 1-3.

Codebook page for GA9516SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER RESPONSES TAKEN.

31 GA95019A - GA95019H

This is a "mark all that apply with embedded skip." If code 67 does not apply,:

If none of items GA95019A through GA95019H is marked, then all are coded -9 (No response, invalid skip).

If at least one of items GA95019A through GA95019G is 1 (Marked) and GA95019H is 0 (Not marked), then all of GA95019A through GA95019G are coded 1 (Marked) or 0 (Not marked) while GA95019H is coded 0 (Not marked).

If at least one item is marked in items GA95019A through GA95019G and GA95019H is 1 (Marked), then all of items GA95019A through GA95019G are coded as 1 (Marked) or 0 (Not marked) while GA95019H is coded -2 (Implied continuation).

If none of GA95019A through GA95019H is marked except for GA95019H being marked, then all of items GA95019A through GA95019G are coded as 0 (Not marked) while GA95019H is coded 1 (Marked).

32 GA95020, GA95021A - GA95021M, GA95022A - GA95023H

GA95021A through GA95021M are treated as "mark all that apply" with a skip in the preceding item. If code 67 does not apply:

If nothing is marked in GA95020 and GA95021A through GA95021M, then all are coded as -9 (No response, invalid skip).

If nothing is marked in GA95021A through GA95021M and GA95020 is marked 1 (Yes), then GA95021A through GA95021M are coded 68 (Doesn't apply-- Respondent filed a formal action).

If GA95020 is marked 1 (Yes) and one or more of items GA95021A through GA95021M are 1 (Marked), then GA95020 is coded -2 (Implied continuation).

GA95022A through GA95023H are also coded with respect to a skip in item 20. If code 67 does not apply:

If nothing is marked in GA95022A through GA950223H and GA95020 is marked 0 (No), then GA95022A through GA95023H are coded 69 (Doesn't apply-- Respondent didn't file a formal action)

Codebook page for GA95020 should note:

ITEM GA95020 HAS BEEN CHECKED FOR CONSISTENCY WITH ONLY ITEMS GA95021A THROUGH GA95021M.

33 **GA9522SP**

If codes 67 and 69 do not apply, GA9522SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95022H is in range of 1-3, or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95022H is in range of 1-3, or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95022H is NOT in range of 1-3, or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95022H is NOT in range of 1-3, or

-1 (Not sure--Text was entered, but respondent marked "You did not do this") if the scanner detects something written in the specify area and GA95022H is 0.

Codebook page for GA9522SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER FORMAL ACTIONS TAKEN.

34 **GA95023A - GA95023H**

This is a "mark all that apply with embedded skip." If codes 67 and 69 do not apply:

If none of items GA95023A through GA95023H are marked, then all are coded -9 (No response, invalid skip).

If at least one item is marked in items GA95023A through GA95023G and GA95023H is not marked, then all of GA95023A through GA95023G are coded 1 (Marked) or 0 (Not marked) while GA95023H is coded 0 (Not marked).

If at least one item is marked in items GA95023A through GA95023G and GA95023H is marked, then all of items GA95023A through GA95023G are coded as 1 (Marked) or 0 (Not marked) while GA95023H is coded -2 (Implied continuation).

If none of GA95023A through GA95023H is marked except for GA95023H being marked, then all of items GA95023A through GA95023G are coded as 0 (Not marked) while GA95023H is coded 1 (Marked).

35 **GA95026**

If the first response in GA95025 is marked and no response is marked in GA95026, then GA95026 is coded 70 (Doesn't apply--No one else in the unit knew.)

If a response other than the first response in GA95025 is marked and no response is marked in GA95026, then GA95026 is coded -9 (No response, invalid skip).

36 **GA95033A - GA95033L, GA9533SP**

This is a "mark all that apply with embedded skip." If code 67 does not apply:

If none of items GA95033A through GA95033L are marked, then all are coded -9 (No response, invalid skip).

If at least one item is marked in items GA95033B through GA95033L and GA95033A is not marked, then all of GA95033B through GA95033L are coded 1 (Marked) or 0 (Not marked) while GA95033A is coded 0 (Not marked).

If at least one item is marked in items GA95033B through GA95033L and GA95033A is marked, then all of items GA95033B through GA95033L are coded as 1 (Marked) or 0 (Not marked) while GA95033A is coded -2 (Implied continuation).

If none of GA95033A through GA95033L is marked except for GA95033A being marked, then all of items GA95033B through GA95033L are coded as 0 (Not marked) while GA95033A is coded 1 (Marked).

GA9533SP is coded:

1 (Text entered) if the scanner detects something written in the specify area and GA95033L is 1 (Marked), or

0 (No text entered) if the scanner detects nothing written in the specify area and GA95033L is 1 (Marked), or

-2 (Implied continuation) if the scanner detects something written in the specify area and GA95033L is 0 (NOT marked), or

-6 (Not applicable, valid skip) if the scanner detects nothing written in the specify area and GA95033L is 0 (NOT marked).

Codebook page for GA9533SP should note:

CODING REPRESENTS WHETHER PERSON ENTERED ANYTHING IN THE "PLEASE SPECIFY BELOW" AREA FOR OTHER INFORMAL ACTIONS TAKEN BY THE RESPONDENT.

37 **GA95035, GA95036**

If either the first or second response in GA95035 is marked and no response is marked in GA95036, then GA95036 is coded 71 (Doesn't apply--Productivity was not affected or respondent didn't know/couldn't judge affect).

If a response other than the first or second response in GA95035 is marked and no response is marked in GA95036, then GA95036 is coded -9 (No response, invalid skip).

38 **GA95046**

If the first or third response in GA95045 is marked and no response is marked in GA95046, then GA95046 is coded 72 (Doesn't apply--Unwanted, uninvited sexual attention occurred in CONUS or at sea.)

If the second response in GA95045 is marked but no response is marked in GA95046, then GA95046 is coded -9 (No response, invalid skip.)

If the second response in GA95045 is marked and one response is marked in GA95046, then GA95046 is coded as indicated on Form A.

39 **GA95047**

If the second or third response in GA95045 is marked and no response is marked in GA95046, then GA95046 is coded 73 (Doesn't apply--Unwanted, uninvited sexual attention occurred overseas or at sea.)

If the first response in GA95045 is marked but no response is marked in GA95046, then GA95046 is coded -9 (No response, invalid skip.)

If the first response in GA95045 is marked and one response is marked in GA95046, then GA95046 is coded as indicated on Form A.

40 **GA95018**

If codes -8 (Multiple response error) or -9 (No response, invalid skip) do not apply, GA95018 is coded

74 (Doesn't apply--Respondent received unwanted, uninvited sexual attention only once during the last 12 months) if GA95017 is equal to 1 and GA95018 is unmarked.

1-6 depending upon the respective response that was marked.

Codebook page for GA95018 should note:

ITEM GA95018 HAS BEEN CHECKED FOR CONSISTENCY WITH ONLY ITEM GA95017.

41 **GB9571FL**

Codebook page for GB9571FL should note:

THIS VARIABLE WAS CREATED BY DETERMINING THE NUMBER OF TIMES THAT A RESPONDENT INDICATED A FREQUENCY GREATER THAN "NEVER" FOR VARIABLES GB95071A - GB95071Y. RESPONDENTS WERE ASSIGNED A "-9" OR "-2" ONLY WHEN THE RESPONSES TO ALL ITEMS IN QUESTION 71 WERE "-9" OR "-2", RESPECTIVELY. RESPONDENTS WHO BLACKENED A BUBBLE FOR AT LEAST ONE ITEM IN QUESTION 71 WERE

ASSIGNED A VALUE OF 0 TO 25 (REGARDLESS OF THE TOTAL NUMBER OF
“-9”S FOR THE ITEMS IN QUESTION 71).

42 **GB9500FL**

Codebook page for GB9500FL should note:

THIS VARIABLE WAS CREATED BY DETERMINING THE NUMBER OF
TIMES THAT A RESPONDENT INDICATED AN ANSWER OTHER THAN “NO, I
DID NOT REPORT IT TO THIS PERSON/OFFICE” FOR VARIABLES GB95100A-
GB95100J. RESPONDENTS WHO ANSWERED “YES...” TO AT LEAST ONE
ITEM IN QUESTION 100 WERE ASSIGNED A VALUE OF 0 TO 10.
RESPONDENTS WERE ASSIGNED A “-9”, “-2”, “61”, OR “62” ONLY WHEN
THEY LEFT ALL 10 ITEMS (GB95100a - GB95100J) BLANK.

5706	99.7	TOTALS		

PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

IN THE SAS DATA SET, A 18070701 (OUT-OF-RANGE ERROR) WAS ASSIGNED FOR RESPONDENTS WHO REPORTED COMPLETING THE SURVEY ON A DATE LESS THAN 2 DAYS AFTER THE FIRST SURVEY MAILING. RESPONSES WERE NOT CHECKED FOR VALID VALUES AT THE UPPER END OF THE RANGE.

VALUES WERE NOT CHECKED FOR VALID RANGE IN THE OS DATA (ASCII OR EBCDIC), BUT WERE CHECKED BY THE DDMMYY FORMAT IN THE SAS DATA SET.

5706	99.9	TOTALS		

PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

IN THE SAS DATA SET, A 18070701 (OUT-OF-RANGE ERROR) WAS ASSIGNED FOR RESPONDENTS WHO REPORTED COMPLETING THE SURVEY ON A DATE LESS THAN 2 DAYS AFTER THE FIRST SURVEY MAILING. RESPONSES WERE NOT CHECKED FOR VALID VALUES AT THE UPPER END OF THE RANGE. VALUES NOT CHECKED FOR VALID RANGE IN OS DATA (ASCII OR EBCDIC), BUT ARE CHECKED BY THE DDMYY FORMAT IN SAS DATA SET.

THIS VARIABLE WAS CREATED USING THE ASSUMPTION THAT A MISSING VALUE IN THE TENS COLUMN OF THE DAY GRID WAS ZERO.

PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

A STRATIFIED RANDOM SAMPLING DESIGN WAS USED FOR EACH OF THE THREE SURVEYS. THE SAMPLING FRAME WAS STRATIFIED FOR EACH FORM BY SERVICE, LOCATION (CONUS/OCONUS), PAY GRADE GROUPINGS, GENDER, AND RACE/ETHNICITY GROUPINGS. OPTIMUM ALLOCATION TECHNIQUES WERE USED TO ALLOCATE THE SAMPLE ACROSS THE STRATA. VARIANCE ESTIMATION REQUIRES AT LEAST TWO ANALYSIS RECORDS WITHIN EACH SAMPLING STRATUM. PRECISION OF THE ESTIMATES IMPROVES AS THE AVERAGE NUMBER OF ANALYSIS RECORDS WITHIN THE STRATA INCREASES. SINCE NONRESPONSE CAUSES A DECREASE IN THE NUMBER OF RECORDS, SEVERAL STRATA WERE COLLAPSED. STRATA WERE COMBINED BASED ON THE STRATUM VARIABLES AND THE RESPONSE PATTERN WITHIN THE STRATA. THUS WEIGHTING CLASS STRATA (WCSTRAT) WERE FORMED BY COLLAPSING THE SAMPLING STRATA. APPROXIMATELY, 70 STRATA WERE COLLAPSED EITHER BEFORE THE SAMPLE WAS DRAWN OR AFTER DATA COLLECTION WAS COMPLETE FOR FORM A. FORMS B AND C HAVE 50 AND 102, RESPECTIVELY, COLLAPSED. SAMPLING FRAME COUNTS WERE CALCULATED WITHIN THE WEIGHTING CLASS STRATA FOR ANALYSIS PURPOSES (NWCSTRAT). APPENDIX A IN DMDC REPORT 96-016, "THE 1995 ARMED FORCES SEXUAL HARASSMENT SURVEY: STATISTICAL METHODOLOGY REPORT" GIVES THE RECOMMENDED USES OF THE VARIABLE DURING ANALYSIS.

1995 Status of the Armed Forces Survey (SAFS) - Form C

WGHT_FLG - Record weighted as respondent flag

OS DATA			SAS DATA			
COLS	LENGTH	FORMAT	NAME	TYPE	LENGTH	INFORMAT

5706	100.0	1	1	1
5706	100.0	TOTALS		

WGHT_FLG IS A CONSTANT ON THE SURVEY ANALYSIS FILE BECAUSE THIS FILE DOES NOT CONTAIN ANY NONRESPONDENTS. HOWEVER, WGHT_FLG HAS TWO VALUES ON THE METHODS ANALYSIS FILE WHICH CONTAINS BOTH RESPONDENTS AND NONRESPONDENTS. FINAL ANALYSIS WEIGHTS WERE DEVELOPED FOR SAMPLE MEMBERS WHO PROVIDED USABLE RESPONSES AND FOR SAMPLE MEMBERS WHO WERE FOUND TO BE INELIGIBLE. THE FINAL ANALYSIS WEIGHTS REFLECT POST-STRATIFIED, NONRESPONSE ADJUSTED SAMPLING WEIGHTS WHICH ARE NOT APPLICABLE FOR NONRESPONDENTS. ELIG_FLG IS USED TO IDENTIFY THE ELIGIBLE RESPONDENTS WHEN ANALYZING THE SURVEY DATA.

1995 Status of the Armed Forces Survey (SAFS) - Form C

ELIG_FLG - Eligibility flag

5706	100.0	TOTALS		

INELIGIBLE SUBJECTS ARE INCLUDED ON THE DATA SET FOR ANALYSIS PURPOSES BECAUSE THEY ARE REPRESENTATIVE OF OTHER INELIGIBLE SUBJECTS WHO DID NOT RESPOND. THE POPULATION TOTALS USED FOR POST-STRATIFICATION ADJUSTMENTS ALSO CONTAINED INELIGIBLES (SEE FINAL_WT DISCUSSION). DURING ANALYSES USING THE DESIGN-SPECIFIC PACKAGE SUDAAN, ELIGIBLE SUBJECTS SHOULD BE IDENTIFIED WITH THE SUBPOPN STATEMENT. HOWEVER, THE RECORDS FOR THE INELIGIBLE RESPONDENTS SHOULD BE ELIMINATED PRIOR TO ANALYSES USING OTHER STATISTICAL PACKAGES SUCH AS SAS. APPENDIX A OF DMDC REPORT 96-016, "THE 1995 ARMED FORCES SEXUAL HARASSMENT SURVEY: STATISTICAL METHODOLOGY REPORT" GIVES RECOMMENDED USES OF THIS VARIABLE DURING ANALYSIS.

SAMPLING WEIGHTS ARE CALCULATED AS THE INVERSE PROBABILITY OF SELECTION FOR EACH SAMPLE MEMBER. WEIGHTING CLASS ADJUSTMENTS ARE APPLIED TO THE SAMPLING WEIGHTS TO ACCOUNT FOR THE STUDY NONRESPONDERS. POST-STRATIFICATION ADJUSTMENTS ARE FURTHER APPLIED TO THE WEIGHTS TO CREATE THE FINAL ANALYSIS WEIGHTS (FINAL_WT). BY SUMMING THE SAMPLING WEIGHTS FOR A PARTICULAR DOMAIN, SUCH AS MALES, AN ESTIMATE OF THE TOTAL NUMBER OF MALES IS CALCULATED. DUE TO SUBJECT NONRESPONSE AND FLUCTUATIONS IN THE WEIGHTS, THIS ESTIMATE OF THE TOTAL DIFFERED FROM THE TOTAL CALCULATED FROM THE SAMPLING FRAME. THE POST-STRATIFICATION ADJUSTMENT SCALED THE SAMPLING WEIGHTS SO THAT THE SUM WOULD CLOSELY MATCH THE SAMPLING FRAME TOTAL. APPENDIX A IN DMDC REPORT 96-016, "THE 1995 ARMED FORCES SEXUAL HARASSMENT SURVEY: STATISTICAL METHODOLOGY REPORT" GIVES RECOMMENDED USES OF THE VARIABLE DURING ANALYSIS.

ANYTOWN WA 99999-9999

Dear Sergeant Sample:

In March 1994, the Secretary of Defense requested the unwavering support of the Department's senior leaders in ensuring all Defense employees are provided the opportunity to carry out their jobs without discrimination or harassment. Recently, I approved a series of surveys of active duty military members to determine if DoD sexual/gender harassment policies and programs designed to ensure fair treatment of military personnel are effective and to identify areas where improvements may be needed.

You were randomly selected to receive one of these surveys. In a few weeks, you will receive a copy of the "1995 Status of the Armed Forces Surveys: Gender Issues." Your responses will be confidential. Survey answers will be combined so that individual responses cannot be identified. Only group statistics will be reported, and no data identifying individuals will be released to anyone.

If the address on this letter is incorrect or your address will soon change, please take a moment to inform us of the corrected address. Return this letter, with your correct address, to the DMDC Survey Processing Activity, c/o Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967, or by fax to 612-945-7279.

I urge you to complete your survey when it arrives. This is your opportunity to provide input into the formulation of policies which directly affect you and other Service members.

Thank you for your time and assistance in this important effort.

Sincerely,

Edwin Dorn

Dear Sergeant Sample:

In a few weeks, you will receive a copy of the 1995 Status of the Armed Forces Surveys: Gender Issues. This survey is one of several surveys the Department of Defense is conducting this year for all the Armed Services, including the Coast Guard, to gather information on a variety of personnel issues. You were randomly selected to participate in this survey involving gender issues.

The questionnaire you will receive asks about policies designed to ensure fair treatment of all military personnel and about Coast Guard procedures for carrying out these policies. Your responses to this questionnaire will help assess the effectiveness of these policies and will identify areas that may need improvement.

The information you provide on this survey is confidential. Your identity will be closely guarded. Only group statistics will be reported and no data that could identify individuals will be released.

If the address on this letter is incorrect or your address will change soon, please take a moment to inform us of the correct address. Return this letter, with your correct address, to the DMDC Survey Processing Activity, c/o Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967, or by fax to 612-945-7279.

I urge you to complete your survey as soon as it arrives. This is your opportunity to provide input in the formulation of policies that directly affect you and your fellow Coast Guard members.

Thank you in advance for your participation.

SSGT JOSEPH SAMPLE USAF 09999999
123 ANY STREET
ANYTOWN WA 99999-9999

Dear Sergeant Sample:

The Department of Defense is seeking your help in gathering important information about sexual and gender harassment issues in the Armed Forces. You were selected in a random sample of Service members to participate in this study. The information you and other Service members provide will be used both to evaluate sexual/gender harassment policies and programs and to identify areas where improvements are needed.

Enclosed is your copy of the survey, "1995 Status of the Armed Forces Survey: Gender Issues." Completing this questionnaire should take about 15 to 25 minutes. This is your opportunity to provide input into the evaluation and formulation of policies which directly affect you and other Service members.

Sometimes concern is expressed about the risks of responding frankly to such surveys. I assure you that your responses will be kept confidential and only group statistics will be reported. While survey processing is underway, the survey center must know your identity in order to provide you survey materials. However, only the survey center will have access to this information, and they will use it only in administering the survey. When data collection and data preparation are complete, all information which could be used to identify individuals will be removed.

Please return your completed survey in the enclosed postage-paid envelope at your earliest convenience. Your time and cooperation are appreciated.

Sincerely,

Edwin Dorn

Dear Sergeant Sample:

The Coast Guard and the Department of Defense are seeking your help in gathering important information about personnel issues in the Armed Forces. You were selected in a random sample of active duty Service members to participate in this study. The information you and other sampled Coast Guard and Department of Defense members provide will be used both in formulating military personnel policies and in providing information to Congress on personnel issues.

Enclosed is your copy of the 1995 Status of the Armed Forces Survey: Gender Issues. Completing this survey should take about 15 to 25 minutes of your time. Your responses will help the Coast Guard and Department of Defense assess efforts to promote equal treatment and fairness in the military and identify areas where improvements may be needed. Because not every military member will receive this questionnaire, your responses will represent not only your own feelings and concerns, but those of many other military members as well. This is your opportunity to provide input in the formulation of policies which directly affect you and other Coast Guard members.

The information you provide on this survey is confidential. Your identity will be closely guarded. Only group statistics will be reported and no data that could identify individuals will be released.

At your earliest convenience, please return your completed survey in the enclosed pre-addressed, postage-paid envelope.

Your cooperation is appreciated.

SSGT JOSEPH SAMPLE USAF 09999999
123 ANY STREET
ANYTOWN WA 99999-9999

Dear Sergeant Sample:

Recently you were mailed the "1995 Status of the Armed Forces Survey: Gender Issues." I want to emphasize two things about this survey.

First, this survey is important. It allows military members to report first-hand on their workplace environments and the personnel programs that impact all Service members. Findings will be used to improve Department of Defense personnel programs and formulate personnel policies. Results of this survey will influence decisions directly related to the quality of life of all military members.

Second, your participation in this survey is important. You may feel that no one individual could be very important to the success of this survey. However, that is not the case. Because not every member receives a questionnaire, your answers also represent the views of many other Service members.

You may have already completed and returned your survey. If so, thank you for your participation. If you have not, please take approximately 15-25 minutes to complete the survey, and return it in the postage-paid envelope provided. Your responses will be held in strictest confidence.

If you have not received a copy of the survey, please return this letter to the DMDC Survey Processing Activity, c/o Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967, or by fax to 612-945-7279. Before you return this letter, please correct the address above.

Again, I appreciate your time and cooperation.

Sincerely,

Edwin Dorn

Dear Sergeant Sample:

Recently, you were mailed the 1995 Status of the Armed Forces Survey: Gender Issues. I want to emphasize two things about this survey.

First, this survey is important. It allows military members to report firsthand on the workplace environments and personnel programs that impact all Coast Guard members. Findings will be used to identify problem areas in Coast Guard and Department of Defense personnel programs and in the formulation of personnel policies. Results of this survey will influence decisions directly related to the quality of life of all military members.

Second, your participation in this survey is important. You may feel that no one individual could be very important to the success of this survey. However, because not every member receives a questionnaire, your answers represent the views of many other Coast Guard members. When individuals who have been selected to participate do not complete and return their surveys, the results are less useful and do not represent the opinions and concerns of the entire work force as well as they could.

You may have already completed and returned your survey. If so, thank you for your participation. If you have not, please take 15 to 25 minutes to complete it now and return it in the pre-addressed, postage-paid envelope provided. Your responses will be held in strict confidence.

If, on the other hand, you have not received a copy of the survey, please return this letter to the DMDC Survey Processing Activity, c/o Data Recognition Corporation, 5900 Baker Road, Minnetonka, MN 55345-5967, or by fax to 612-945-7279. Before you return this letter, please correct the address above.

Again, I appreciate your cooperation and time.

Dear Sergeant Sample:

Several weeks ago, you were asked to participate in the "1995 Status of the Armed Forces Surveys." Your participation is very important and, at the time of the writing of this letter, we had not received a response from you.

While participation is voluntary, your views are important to the success of the survey. Your responses will help the Department of Defense to assess its progress in promoting equality and fairness in the military and to identify areas where improvements are needed. Because not every military member will receive the questionnaire, your responses will represent not only your own feelings and concerns, but those of many other military members as well. This is your opportunity to provide input in the formulation of policies which directly affect you and other Service members.

A duplicate survey is enclosed in case you misplaced your original questionnaire. If you have already completed and returned your questionnaire, please discard this duplicate survey and accept my thanks. If you have not completed the survey, please fill out the questionnaire and return it in the provided postage-paid envelope.

Because of the scientific sampling methods used to select survey participants, the survey results will be invalid if you have someone else complete the survey sent to you. It should not be given to someone else to complete.

Your time and cooperation are appreciated.

Sincerely,

Edwin Dorn

Dear Sergeant Sample:

Recently you were asked to participate in the "1995 Status of the Armed Forces Survey: Gender Issues." Your completed questionnaire had not been received by the Survey Processing Center at the time this letter was mailed. Because your views and opinions are important, I want to offer you this final opportunity to add your input to the findings which will be reported from this survey.

Because these findings will be reported to Congress and used in the formulation of policy, I want them to represent accurately the opinions and attitudes of the entire military force. The sample was scientifically selected in such a way to ensure this representation, but the success of this method is dependent on you, and others like you, who are willing to complete and return the questionnaire.

If you have not already done so, please take time to complete the questionnaire and return it in the postage-paid envelope. For your views to be included in survey results, your questionnaire must be received within the next three weeks.

Thank you for your participation.

Sincerely,

Edwin Dorn

Appendix J

Notes on Analysis of the 1995 Datasets

Lisa D. Bastian and Mary Sue Hay

Appendix J Notes on Analysis of the 1995 Datasets

Lisa D. Bastian and Mary Sue Hay

Preparation of the Data for Analysis

The Survey Analysis Files have cases with an ELIG_FLG (eligibility flag) of both zero and one. Where WGHT_FLG=1, cases with ELIG_FLG=0 will have (non-zero) weights and are required by SUDAAN[®] to estimate variances precisely. These cases represent the ineligible portion of the original population and are part of the variance structure estimated by SUDAAN[®]; but these cases are not part of the point-estimate structure. Keep cases with ELIG_FLG=0 in analysis files intended for use with SUDAAN[®]. However, in runs by SAS[®], SPSS[®], LISREL[®], etc., cases where ELIG_FLG=0 can and should be dropped out. (Note that any SAS[®] system file intended to be used with the SUDAAN[®] software must have been created using the SAS[®] V604 engine and sorted by the variable WCSTRAT [weighting class stratum]. Survey Analyses Files produced by DMDC have been sorted by WCSTRAT.)

Some cases with ELIG_FLG=0 will have non-missing survey and Survey Control System (SCS) variables. These are cases where a survey was returned but the person was determined to be non-eligible (i.e., they were eligible when selected for the sample from the October 1994 ADMF or September 1994 RCCPDS, but had become ineligible [left the military or AGR/TAR status] when eligibility was checked in 14 January and/or 4 April 1995 DEERS files). Other cases with ELIG_FLG=0 will have missing data for all survey and SCS variables. These cases are people who did not return a survey, but who were determined from DMDC records to be ineligible (as above) or they reported to DRC that they were ineligible (e.g., they were incarcerated or had left the military).

Demographic Variables

Where self-report data was missing, values were imputed through the use of master file data extracted from the October 1994 ADMF for Active Duty personnel and from the September 1994 RCCPDS for AGR/TAR personnel. These imputed variables are referred to as X (crossing) variables in the SAS[®] code. Figure J-1 shows the SAS[®] coding used to construct the X variables.

OMB Statistical Directive 15 mandates that all Federal statistics with racial and/or ethnic categories be reported in a consistent manner. The Directive says that Federal reporting can use either of two designations: (1) a single designation of non-Hispanic White/ non-Hispanic Black/Native American/Asian & Pacific Islander/Hispanic (XRACETH in the code); or (2) using separate variables for reporting White/Black/Native American/Asian & Pacific Islander (XRCE in the code) and Hispanic/non-Hispanic (which can be derived from a collapsing of XRACETH). Only if data are too sparse to report a finer gradation can the minimally acceptable reporting of minority/non-minority be used. The non-minority group is comprised of non-Hispanic Whites.

Figure J-1.
SAS® Code for Constructed Demographic Variables

```

/*****
The following creates crossing variables from self-reported data.
When self-reported data is missing, a value is imputed, if
possible, from record data.

Xpopgrp is coded for compliance with OMB Directive 15 on
Federal statistics. This Directive precludes the use of an
'Other' category. xpopgrp is based on self-reports using items
based on 1990 Census items. However, while the Census imputes a
race for those marking 'Other' based on demographics of neighbors
and elaborate coding of the Specify write-in, for xpopgrp the
imputation is based on record data on the individual.

USING 2 VARIABLES (XRACE AND XHISPAN) IS THE PREFERRED WAY TO
COMPLY WITH OMB DIRECTIVE 15 GUIDANCE ON CATEGORIES FOR
REPORTING. xmingrp is minimally acceptable under OMB 15 - for
use when finer distinctions of xpopgrp or xrace-xhispan cannot be
supported by the data.

```

Variables Constructed for Incident Reporting

Figure J-2 shows the SAS[®] coding used to construct the variables used to summarize the reporting of experiences by Bastian et al. (1996). As discussed above in the methodology section, a returned survey was not considered to be a completed usable survey unless at least one of the key experience items on the form was answered by the respondent.

Editing

The edits presented here are those that were done for analyses of *Form B* reported by Bastian et al. (1966) and are considered to be *suggestions* of how data editing might be approached; it is expected that other analysts will draw their own conclusions as to data quality and editing. Please refer to the coding scheme (Appendix E) and the annotated *Form B* questionnaire (Appendix B) when assessing the following edits. Figure J-3 shows code that was used in preparation of Bastian et al. (1996); this code has not been applied to the Survey Analysis File dataset.

Item GB95072 Special Codes

Codes 10-12. Definition: These codes represent cases in which respondents had marked 0, 1, or 2 on GB95072 (None, Some, or All behaviors were sexual harassment), but NONE of the GB95071a-GB95071y behaviors were marked as occurring. There were 484 cases coded 10-12 on GB95072.

Of the total 484 cases, 395 (82%) were missing on all 36 items ranging from GB95073a-GB95098. The remaining 89 cases (82 code 10's and 7 code 12's) had some information in items GB95073a-GB95098. However, crossing GB95073a-GB95073y by a count of the number of missing items per case on all items from GB95073a through GB95098 showed that 54 of the 82 code 10's (66%) with some information and 2 of the 7 code 12's (40%) were missing on all Q73 behavior items. Without any information from Q71 or Q73 on behaviors experienced, all of these 451 cases must be excluded from analyses of harassment.

Of the remaining 33 cases, 17 were missing on at least 33 of the 36 items from GB95073a through GB95098. The results of these crosstabulations challenge the validity/usefulness of the data available for cases with codes 10-12 on GB95072.

Decision/recommendation: The 484 total cases were coded as (valid) skips and excluded from all items GB95073a-GB95108. A recoded variable—RB95072, which excludes these cases—was used in place of GB95072 in analyses.

Code 61's. Definition: These cases are true valid skips. This code represents cases in which NONE of items GB95071a-GB95071y were marked as occurring, and on item GB95072 the respondent indicated: "Doesn't apply—I marked 'never' to ever item in Question 71". Additionally, NONE of items GB95073a through GB95108 was marked. There were 8177 cases coded 61 on GB95072 as well as on GB95073a-GB95108.

Decision/recommendation: These 8177 cases were coded as valid skips and excluded from all items GB95073a-GB95108. A recoded variable—RB95072, which excludes these cases—was used in place of GB95072 in analyses.

Code 62's. Definition: This code represents cases in which one or more items in GB95071a-GB95071y were marked as occurring, yet on item GB95072 the respondent indicated:

"Doesn't apply—I marked 'never' to ever item in Question 71". Additionally, NONE of items GB95073a through GB95108 were marked. There were 1275 cases coded as 62 's on GB95072 as well as GB95073a-GB95108.

For these codes, about two-thirds (782) of the respondents reported only one behavior in item 71 as occurring (crossing GB9571f by GB95072); an additional 493 reported more than one. Since all other items were marked "Never" (or were missing), it may be reasonable to assume that those reporting only one behavior (782 respondents) mismarked one of the individual items in GB95071a-GB95071y. Under this assumption, these cases would be treated as valid skips or missing data.

The remaining 493 cases are more ambiguous. There is no way of knowing how these respondents might otherwise have answered GB95072 (assuming the current response on this item is incorrect); by definition, there is no additional information on items GB95073a-GB95108 for any of the 1275 respondents.

Crossing GB95072 by each individual harassment behavior (GB95071a-GB95071y) in item 71 for all 1275 respondents revealed that the less serious behaviors were more often marked compared to the most serious behaviors. For example, the number of respondents marking "Never" for items W and X (Sexual Assaults) was 1215 and 1211, respectively. By contrast, those marking "Never" on item A (sexual jokes) was 771. However, one should not necessarily assume that only the most serious behaviors were perceived to be sexual harassment.

Decision/recommendation: These 1275 cases were coded as (valid) skips and excluded from all items GB95073a-GB95108. A recoded variable—RB95072, which excludes these cases—was used in place of GB95072 in analyses.

Items GB95101A-GB95106 Special Codes

Code 63's. Definition: This code represents cases in which NONE of GB95100a-GB95100j were marked as having been reported to, and NONE of items GB95101a-GB95106 were marked. These cases were coded with a 63—"Does not apply—I did NOT report the behavior to someone specified in GB95100a-GB95100j". There were 12338 cases of code 63 on items GB95101a-GB95106.

Decision/recommendation: These 12338 cases were coded as valid skips and excluded from all items GB95101a-GB95106.

Code 65's. Definition: This code represents cases in which respondents marked only GB95104a across items GB95104a-GB95104h and GB95105, indicating that the outcome of a complaint could not be stated because the action was still being processed. These 223 cases were assigned a code 65—"Not applicable—the action is still being processed" on items GB95104b through.

Decision/recommendation: These 223 cases were coded as valid skips on all items GB95104b-GB95105 and excluded from analyses.

Item GB95107A-GB95107T Inconsistencies and Special Codes

Items GB95107a-GB95107t (reasons for not reporting) had not previously been checked for consistency against items GB95100a-GB95100j (reporting status). Crossing the sum of responses across items GB95100a-GB95100j by each individual item GB95107a-GB95107t revealed the following:

A number of respondents (1041) reported unwanted sex related attention to at least one individual or organization listed in items GB95100a through GB95100j but also marked at least one of GB95107b through GB95107t—reasons for not reporting. Additionally, another 171 respondents who had reported unwanted attention were missing cases (implied continuations) on GB95107a, but marked one or more of GB95107b through GB95107t.

Frequencies for these cases showed that respondents generally answered items GB95101a through GB95106, with missing data ranging only from 17% to 32%.

Decision/recommendation: Because of the large number of cases involved (1212), at least one response on items GB95100a-GB95100j (reporting status), and the appearance of “good” data for these respondents in items GB95101a-GB95106, these cases were recoded on items GB95107a-GB95107t: Item GB95107a is marked and all items GB95107b-GB95107t are not marked. This recoding was the preferred for briefings, etc., but does not exclude the option of conducting separate analyses of these cases as situations which were “partially reported”.

A small number of respondents (44) who did not report unwanted sex related attention to any individual or organization in items GB95100a-GB95100j erroneously marked GB95107a—”Does not apply—I DID report the behavior to someone specified in Question 100”. None of GB95107b-GB95107t (reasons for not reporting) were marked.

On items GB95101a through GB95106, these respondents were coded as 63’s—”Does not apply—I did NOT report the behavior to someone specified in GB95100a-GB95100j.

Decision/recommendation: There is no way of knowing what reasons for not reporting these respondents might have given had items GB95107b-GB95107t been marked in a manner consistent with previous responses on items GB95100a-GB95100j (reporting status). These cases were set to missing on all items GB95107a-GB95107t.

Code 64’s. Definition: This code represents cases in which respondents marked only GB95107a across items GB95107a-GB95107t (reasons for not reporting). These 2380 cases were assigned a code 64—”Does not apply—I DID report the behavior to someone specified in GB95100a through GB95100j” on items GB95107b through GB95107t.

Decision/recommendation: These cases were coded as valid skips on all items GB95107b-GB95107t and excluded from analyses with these items.

Items GB95130-GB95132

Code 66's. Definition: This code represents cases in which respondents who marked the first response option on item GB95130 (amount of training) were coded 66—"Doesn't apply—I haven't received any training" on each item GB95131a and GB95131b. There are 5300 cases coded 66 on each item.

Decision/recommendation: These 5300 cases were coded as valid skips on both GB95131a and GB95131b and excluded from analyses with these items.

Occupation Groups Classification

Table K-1.
Occupation Groups Classified by Density of Females in the Group

% Female	Enlisted Occupation Group and Definition	% Female	Officer Occupation Group and Definition
<i>Class 1</i>			
0.0 to 2.9	01. Infantry - Includes weapons specialists, ground reconnaissance specialists, special forces, and military training instructors.	0.0 to 2.9	1A. General and Flag - Includes all occupations where individuals involved are of General or Flag rank.
	02. Armor and Amphibious - Includes land and amphibious tank crews and leaders.		2A. Fixed-Wing Fighter and Bomber Pilots - Includes pilots of various types of fighter, attack, and bomber aircraft.
	03. Combat Engineering - Includes specialists in hasty and temporary construction of airfields, roads and bridges, and in demolition, field illumination, and chemical warfare.		2B. Other Fixed-Wing Pilots - Includes non-fighter and bomber fixed-wing pilots such as those engaged in transport, supply and reconnaissance.
	04. Artillery/Gunnery, Rockets, and Missiles - Includes conventional field, anti-air and shipboard guns and artillery, and rocket and missile specialists.		2C. Helicopter Pilots - Includes pilots of various types of helicopters.
	11. Fire Control Electronic Systems (Non-Missile) - Includes the maintenance and repair of electronic fire control and bomb navigation equipment, excluding missile and underwater fire control equipment.		2D. Aircraft Crews - Includes navigators, bombardiers, radar intercept officers, and other officer aircraft crew personnel.
	43. Ordnance Disposal and Diving - Includes the excavation and rendering safe of explosive ordnance and of chemical and nuclear agents, and underwater demolition and other types of diving.		2E. Ground and Naval Arms - Includes infantry, artillery, armor and close support officers, and Naval ship commanders and other warfare-related officers.
	75. Industrial Gas and Fuel Production - Includes specialists in the production of liquid oxygen, hydrogen, nitrogen, and carbon dioxide.		4L. Automotive and Allied - Includes engineers and maintenance officers whose primary concern is with automotive and related equipment.
	85. Auxiliary Labor - Includes unskilled laborers and their supervisors.		4H. Ship Machinery - Includes officers who perform functions similar to those listed in 4G with respect to ships' main propulsion and auxiliary machinery; also includes officers involved in the operation of such machinery.
			5N. Scientists and Professionals, N.E.C. ^a - Includes scientists and professionals that are not readily classifiable in one of the previous groups.

Table K-1. (Continued)

% Female	Enlisted Occupation Group and Definition	% Female	Officer Occupation Group and Definition
<i>Class 2</i>			
3.0 to 4.9	14. Nuclear Weapons Equipment - Includes specialists in the maintenance and repair of nuclear weapons control and test equipment.	3.0 to 4.9	4B. Electrical/Electronic - Includes electrical and electronic engineers and equipment maintenance officers not classified under Group 4C.
	21. Sonar - Includes specialists in the operation of sonar and related detection equipment.		4F. Aviation Maintenance and Allied - Includes aircraft maintenance officers and aeronautical engineers.
	25. Combat Operations Control - Includes specialists in forward area tactical operations and intelligence and in command post control activities.		4G. Ship Construction and Maintenance - Includes officers concerned with design, development, construction, production, alteration, maintenance, and repair of ships and their equipment.
	60. Aircraft and Aircraft Related - Includes aircraft engines, electrical systems, structural components and surfaces, and launch equipment.		4J. Safety - Includes ground, aviation, weapons, and nuclear safety officers.
	61. Automotive - Includes construction equipment and other wheeled and tracked vehicles.		4N. Other - Includes engineering and maintenance officers that are not readily classified in one of the previous groups.
	63. Missile Mechanical and Electrical - Includes missiles and missile systems and related components.		5E. Psychologists - Includes all psychologists and human performance engineers.
	65. Shipboard Propulsion - Includes marine main engines, boilers and auxiliary equipment.		5G. Chaplains - Includes ordained and other certified clergymen.
	66. Power Generating Equipment - Includes nuclear power reactors and primary electric generating plants.		5L. Research and Development Coordinators - Includes research and development directors, coordinators, and administrators.
	70. Metalworking - Includes specialists in the machining, shaping, and forming of metal and in the fabrication of metal parts.		
	92. Undesignated Occupations - Includes personnel or authorizations for personnel serving in duties of a special or otherwise undesignated nature.		

Table K-1. (Continued)

% Female	Enlisted Occupation Group and Definition	% Female	Officer Occupation Group and Definition
<i>Class 3</i>			
5.0 to 9.9	05. Air Crew - Includes pilots and navigators, flight engineers, and other air crewmen.	5.0 to 7.9	2G. Operations Staff - Includes combat, operations, and intelligence staff officers.
	07. Installation Security - Includes specialists who guard weapon systems, defend installations, and protect personnel, equipment, and facilities.		4A. Construction and Utilities - Includes civil engineers, architects, and other construction and utilities officers.
	10. Radio/Radar - Includes fixed and mobile radio, air traffic and tracking radar; communication, navigation, and electronic countermeasure gear.		4D. Aviation Maintenance and Allied - Includes aircraft maintenance officers and aeronautical engineers.
	12. Missile Guidance, Control and Checkout - Includes specialists in guidance, control and checkout equipment for guided and ballistic missiles.		4E. Ordnance - Includes weapons engineering and maintenance officers, excluding missile officers.
	13. Sonar Equipment - Includes specialists in underwater detection and fire control systems, oceanographic equipment, and related anti-submarine gear.		4M. Surveying and Mapping - Includes surveying, topographic and geodetic engineers, and cartographic and aerial mapping officers.
	15. ADP Computers - Includes all digital and analog computers.		5D. Social Scientists - Includes historians, economists, sociologists, and other social scientists except psychologists
	16. Teletype and Cryptographic Equipment - Includes teletype and associated on-and-off line encryption devices.		5J. Mathematicians and Statisticians - Includes mathematicians, statisticians, operations research analysts, and other mathematical scientists.
	19. Other Electronic Equipment - Includes training devices, inertial navigation systems, and electronic instruments specialists.		7L. Inspection - Includes Inspector General and technical inspection positions.
	49. Technical Specialists, N.E.C. - Includes physical science laboratory analysts, specialists in memorial activities, safety, NBC warfare, and firefighting and damage control, and other technical specialists and aids such as scientific and engineering assistants.		

Table K-1. (Continued)

% Female	Enlisted Occupation Group and Definition	% Female	Officer Occupation Group and Definition
	52. Clerical/Personnel - Includes combined personnel and administrative specialists and senior enlisted personnel whose primary responsibilities are non-technical.		
	62. Wire Communications - Includes specialists in the installation and maintenance of telephones, switchboards, and central office and related interior communications equipment.		
	64. Armament and Munitions - Includes small arms, artillery, mines, bombs and associated mountings, nuclear weapons, and ammunition renovation.		
	71. Construction - Includes specialists in construction trades and construction equipment operation.		
	72. Utilities - Includes plumbers, heating and cooling specialists, and electricians.		
	79. Other Craftworkers, N.E.C. -Includes specialists in trades such as molding, camouflage, and plastic work, which are not readily classifiable elsewhere in this section.		
	86. Forward Area Equipment Support - Includes specialists in parachute packing and repair, in aerial delivery operations, and in flight equipment fitting and maintenance.		
	90. Patients and Prisoners - Includes personnel holding patient or prisoner designations.		

Table K-1. (Continued)

% Female	Enlisted Occupation Group and Definition	% Female	Officer Occupation Group and Definition
<i>Class 4</i>			
10.0 to 10.9	22. Radar and Air Traffic Control - Includes the operation of surveillance, target acquisition and tracking radars, fire distribution devices, and air traffic control visual and electronic navigational aids.	8.0 to 9.9	7B. Training Administrators - Includes officers engaged in the planning, management, and operation of training programs.
	69. Other Mechanical and Electrical Equipment - Includes specialists in the maintenance and repair of mechanical and electrical equipment which is not readily classifiable in another group.		7N. Morale and Welfare - Includes band, recreation, and special services officers.
	83. Law Enforcement - Includes military police, protective and corrections specialists, and criminal and non-criminal inspectors and investigators.		8A.
