# EXONENT

## MSU well-prepared for millennium bug

Erigen Bergman  
Columnist Writer

Are you ready for Y2K? Even if you aren't, MSU is.

"We think we're in pretty good shape for Y2K," said

David Todd, director of information services and chair-

man of the Y2K Compliance Team.

A team of staff members at MSU has been working to insure

MSU will not be hit by the so-called millennium bug."

Many computer software systems, the year 2000 will bring a host of problems related to software programs that record the year usually only the last two digits. This will affect all equipment that require date sensitive programming.

According to Patricia Denison, assistant director of university relations, the Y2K

compliance team, which formed early in March of 1998, was divided into five areas, each covering a different aspect of the university's facilities: heating, power, telephones, networking and computers.

"We're not concerned with the electricity and heating aspect of it," said Todd. "We believe Montana Power when they say that they have run their tests."

"Some minor problems were found, but they are known problems with known solutions."

—David Todd, director of information services

Todd also said the university has a backup system that is ready to kick in on Dec. 31 and that facility staff has

planned to be on the auxiliary system. Denison noted that much of the equipment used for heating, ventilation and air-conditioning is date insensitive, meaning that it does not recognize dates. She said other equipment needed only minor adjustments.

## MSU senior is among new Rhodes scholars

Associated Press

A senior biochemistry major at Montana State University, Chelsea Elander, was among 32 American students named Sunday as Rhodes scholars for 2000. Elander, of Missoula, has said she plans to attend medical school and is interested in women's health, public health and oncology.

Earlier this year Elander also was named a Truman Scholar, one of 65 selected from 657 candidates nationwide.

Rhodes scholarships provide for two or three years' study at Oxford University in England.

The Rhodes program, the oldest of international study awards available to American scholars, was created in 1902 by the will of British philanthropist and colonialist Cecil Rhodes.

Including the 2000 class, a total 2,886 Americans have won Rhodes scholarships. This year's entries were judged from 935 applicants representing 323 colleges and universities.

Other Rhodes scholars announced Sunday included two paratroopers from the U.S. Military Academy, AIDS researchers from William and Mary in Virginia and Kentucky's Centre College, and the University of South

## NASA satellite will carry UM researchers' software

Associated Press

A satellite that NASA plans to launch on Dec. 16 will carry computer software designed by a University of Montana research team.

The Terra satellite is designed to provide daily, detailed information about the health of Earth. The craft is the flagship of the National Aeronautics and Space Administration's Earth Observing System, a series of satellites equipped

to scan the world.

At the university, researchers used a \$7.9 million grant to design software for Terra. The project began in 1992.

"This launch represents a milestone in one of the most significant research projects on the campus of the University of Montana," said UM President George Dennison.

The university team headed by Steve Running contributed software for a satellite

## Forbes behind, but opponents still wary — of his money

by Carolyn Barta  
Knight-Ridder Newspapers

DALLAS — Steve Forbes is behind.

In the race for the Republican presidential nomination, he's behind in Iowa, behind in New Hampshire, behind in party endorsements, behind in national media attention.

Still, opponents view him warily because of the one area in which he's not behind — money.

"You can't discount the power of a limitless pocket," said Mark McKinnon, advertising consultant to GOP front-runner George W. Bush.

Forbes, a millionaire who heads the Forbes Inc. magazine empire, largely is self-funding his campaign. He calls himself the only "real" conservative with the resources and organization to last over the long haul.

Already, he has spent \$19 million — almost as much as Bush. It hasn't yet made a dent in the polls but Forbes said he's convinced he has a winning strategy based on two factors:

— Pricking the notion that Bush is the most electable candidate.

— And uniting conservative support behind an issues-driven campaign.

"Bush's whole thing is inevitability," Forbes recently told a Waterloo, Iowa, crowd. "There's no philosophy, there's no core issue that's motivating people to back his campaign."

Bush has rejected such

complaints.

Forbes gets a chance to make his case face-to-face against Bush on Thursday when all the GOP candidates debate in Manchester, N.H. It's the first such forum the Texas governor has attended.

Of those still in the primary hunt, Forbes has been the most aggressive in going after Bush, who consistently gets 55-60 percent support in national polls. Forbes has been mired in single digits.

In a recent New York speech, Forbes said Bush has more in common with Democrats Bill Clinton and Al Gore.

"Gov. Bush is vague, I'm specific," said Forbes.

Forbes said he is looking forward to stressing differences with Bush on education, spending, taxes, Social Security and health care.

On taxes, he said, "the typical Texan pays more taxes than he or she did several years ago." On education, he said, Bush wants "a bigger role for the federal government ... I want to go in the exact opposite direction."

A week ago in Arizona, he accused Bush of learning policy positions "off the TelePrompTer" and believing that "government should guide our future."

For his part, Bush has said he's grounded in the philosophy of a compassionate conservative who believes government should do a few things and do them well, and private and faith-based agencies should pick up the slack.

In Forbes' losing presidential run four years ago, he drew attention for his constant focus on

a flat tax. This time, he has broadened his social message and picked up conservative support.

Last week, a dozen national conservative leaders linked to the early Ronald Reagan years declared Forbes the only "true conservative" in the race who can win.

The Forbes backers said they doubt Bush's commitment to such issues as reducing the role of government, cutting taxes and fighting abortion.

"Bush is essentially an establishment Republican," said conservative activist Paul Weyrich. "His administration would not be dominated by conservatives but by Republican establishment people."

Richard Viguerie, longtime conservative publisher and direct mail guru, said former President George Bush "never walked with conservatives and the son has never walked with conservatives."

"We've been a little too quiet," he said, promising that the group will fan out as in key states on Forbes' behalf.

It's in Iowa and New Hampshire where the Bush bubble must be burst, they said. Iowa's caucus kicks off the delegate selection season on Jan. 24, and New Hampshire's first-in-the-nation primary is Feb. 1.

Forbes' standing in Iowa, where he has spent 45 days to Bush's 19, represents his effort's high-water mark. His best measured support is in the low 20 percent range.

"Once the air of invincibility starts to collapse, the

see Forbes page 3

## Decision to give lab space to researchers harms undergraduate

To the Editor:

In response to the *Exponent* article, "Student fees to fund research lab" (Nov. 19), I would like to enlighten the student body to the happenings in the Biology department. First of all, the Biology department was initially going to cancel the lab portion of Biology 310, Comparative Anatomy, to provide space for Dr. John Miller's primate neuron research. Only after professors, like Dr. Lynn Irby, called foul did the administration come up with the lab space in Gaines Hall.

With this new lab space the administration has imposed restrictions prohibiting the students from spending time in the lab outside of their normal lab period. According to Dave Varricchio, the instructor, students in the past spent an average of two hours a week outside of class in the lab studying. The article made it sound like this restriction would be a minor inconvenience. Having taken the course from Dave last Spring, however, this is much more than a minor

inconvenience.

By reducing the lab portion of Biology 310, the Bio Department will effectively impair any future Fish and Wildlife Management undergraduate's ability to complete their degree. One reason is that this lab lays foundation needed to complete senior level biology courses such as Ichthyology, Ornithology, Mammalogy. For example, will they be able to work through a dichotomous key in Mammalogy if they can't identify various bone structures. I see this as a serious problem that undermines the mission of the institution to provide students with an undergraduate education. Further, this decision will limit Biological Sciences undergraduates in their employment possibilities, as many employers require specific knowledge provided in courses such as Comparative Vertebrate Anatomy Lab.

John Miller makes it sound like the students will actually benefit from this change with additional lab space. The fact according to the Director of Faculty

see Lab page 3

## ASMSU EXPONENT

The *Exponent* is published most Tuesdays and Fridays throughout the academic school year, distributed free throughout the University and the Bozeman community and is affiliated with the Associated Students of Montana State University.

### Editorial Policy

The *Exponent* welcomes letters to the Editor and guest editorials from its audience. Letters should be no longer than 300 words and addressed to the Editor. Guest editorials should be no longer 600 words. All submissions should include the authors name, address and phone number. Anonymous submissions will not be printed. The *Exponent* reserves the right to edit all submissions for content, grammar and spelling. The *Exponent* also reserves the right to reject any submission. Signed editorials represent the opinion of the author and in no way reflect the opinions of the *Exponent*, Advertisers, ASMSU or Montana State University. Unsigned editorials represent the opinion of the editorial staff of the *Exponent* and do not reflect the opinions of Advertisers, ASMSU or Montana State University.

**Forbes:** Voters distrustful of his lack of pre-requisites

*continued from page 2*

neels come off," said Forbes campaign manager Bill Dal Col. "We think we are a solid second and the threat to Bush in Iowa."

Of the first six states to vote, Forbes won two in 1996 — Delaware and Arizona, and he's organized in the other two, South Carolina and Michigan.

But analysts say some voters are uneasy about Forbes' new-found fervor for Christian conservative issues.

"Steve Forbes in 1999 is a conservative, pro-life, pro-Christian Coalition issues candidate, which he wasn't the last time around," said Steffen Schmidt, a political scientist at Iowa State University. Some people, he said, "are a little bit cynical."

In the TV air war, Forbes' political ads have focused on his positions on issues. His campaign has produced, but has not aired, some that raise questions about Bush's record as governor.

For now, those remain in the can because Forbes aides

said Bush has fumbled in some areas and undermined his efforts.

Still, others say Forbes has too big a hill to climb.

"Apart from his pocketbook, he would not be considered a serious contender," said Whit Ayers, a Republican consultant in Atlanta who's not involved in any presidential campaign.

Ayers discounts Forbes' chances because, he said, "He doesn't have the pre-requisite quality that most Americans look for in a president — a record of success in a high ranking political position."

Never having held office is a "difficult hurdle to get over," Ayers said. "I can construct a scenario where he gets to second in a number of states, but not first."

Forbes has batted away that criticism, saying people believe it's time to elect an outsider. "It's time," he said, "for someone who's not tied to the political class."

**Lab:** Education compromised

*continued from page 2*

Services, the lab space he refers to is slated as research space, not undergraduate lab space. How do undergraduates benefit? The only benefit I see is the research dollars and prestige that this project provides to the department. Don't get me wrong, though I believe in the value of research, I just don't think it should take precedence over an undergraduate's education.

I believe MSU and the

Biology Department should take a step back and evaluate this decision before its reputation is tarnished and undergraduate education is undermined. Otherwise, undergraduates might be wise to look elsewhere to get a degree that is worth more than the paper it is printed on.

## Millennium: Systems Y2K compliant

continued from page 1

"The phones have been Y2K compliant for sometime now," Todd said. "Just the voice mail was updated over Thanksgiving."

According to Denison, the cables that connect most buildings on campus to each other and to the Internet are so old that they have a date ignorant system, and the cables to the new buildings are Y2K compliant.

The central computer system on campus was recently tested for Jan. 1, 2000 and for Feb. 29, 2000, the extra day for a millennial leap.

"Some minor

problems were found, but they are known problems with known solutions," Todd said.

He said they are trying to fix the problem while disturbing people as little as possible — the problem is with PC's, and they all need to be converted at the same time.

According to Denison, the installment of the Banner 2000 computer system made the university computer system Y2K compliant.

"We are certainly thinking," said Denison, "that we are now Y2K compliant with Banner."

## Rhodes scholar: Senior plans to attend medical school

continued from page 1

Carolina's marathon-running homecoming queen.

West Point and Yale, with three selections each, led 26 colleges and universities with students chosen to receive Rhodes scholarships. William and Mary and Harvard had two Rhodes scholars each.

The West Point paratroopers are Craig Mullaney of North Kingstown, R.I., who also ranks third in the nation in competitive skydiving, and Melissa Sturm of Chatsworth, Calif., who also is a member of the army judo team and an accomplished violinist.

The academy's third winner is Elizabeth Young of Branford, Conn. She is West Point's brigade adjutant, responsible for discipline in the

cadet corps.

One of the AIDS researchers, William and Mary's Eileen Robin Cardillo of Fairfax, Va., soon is to take her research to Ghana for more study.

The second, Michael Lanham of Gravel Switch, Ky., an 18-year-old senior at Centre College, does work on the mathematical modeling of diseases. He plans to study for a doctorate in mathematics at Oxford.

"Everybody is very accomplished and there's definitely an element of luck in there," Cardillo said.

She eventually would like to teach at a university and do research on the brain while maintaining her interest in AIDS education and

prevention.

"We're at the beginning of the epidemic and not the end. It will still be an issue in 20 years," she said.

The South Carolina homecoming queen is Carol Parker of Irmo, S.C. She has prizes in engineering and is a chemistry researcher, a dancer and a marathon runner.

Elliot Gerson, American secretary of the Rhodes Scholarship Trust, said that with Harvard's two selections this year, the school has 20 winners, the most Rhodes scholars of any U.S. institution.

Yale is second with 18 selections, Princeton, which was represented this year, is third with 18 and West Point is fourth with 73.

## Increase in serious crime reported among women in U.S.

### TMS Campus

WASHINGTON — More women are being arrested and serving jail time than in the past, according to a Justice Department report released Sunday.

The increase in serious crimes committed by women comes at a time when the national crime rate—the number of crimes related to the size of the population—has been declining.

The report by the Bureau of Justice Statistics does not explain why crime by women is up.

Despite the upsurge in the total number of women being arrested and incarcerated, the rate of crimes committed by women has followed the downward trend of men.

The crime rate among women was 19 per 1,000 in 1993 and dropped to 15 per 1,000 in 1997. The rate among men dropped over the same period from 135 to 99 per 1,000.

Moreover, three-quarters of the 2.1 million violent crimes committed by women each year are simple assaults on other women.

By comparison, men commit about 13 million violent

crimes each year, just over half of which are simple assaults, and 70 percent of their victims are males, the Justice statistics bureau reported.

The remainder of violent offenses by both sexes were more serious: aggravated assaults, robberies, rapes, murders.

Between 1990 and 1996—the latest year of available data—felony convictions of women in state courts increased 42 percent. Convictions for fraud were up 55 percent; drug offenses up 37 percent; and violent felonies up 30 percent.

In the violent crimes category, convictions for murder

and robbery each dropped 4 percent while sentences for aggravated assault were up by more than half. The number of convictions for rape or sexual assault more than doubled, although the actual number of cases was relatively small—from 202 to 442.

The number of women in prison increased by an annual average of 8.5 percent between 1990 and 1998, while the rate for men increased 6.6 percent.

Based on complaint and arrest reports, women account for about 14 percent of violent offenders and 22 percent of people who are arrested. They

comprise 16 percent of convicted felony defendants and people in the corrections system, including community supervision.

Arrest rates were higher among juvenile than adult women.

Last year one of every 100 females between the ages of 15 and 17 was arrested. It was an arrest for every 42 adult women.

Violent crimes committed by young women has increased 1/2 times since the mid-1980s.

Women usually victimize other women. More than three-fourths of violent crimes committed by women were against women.

# Bozeman community pays tribute to one of its finest

Associated press

The two months since her husband's death have been a heartrending, yet inspiring, experience, Jennifer Lowe told 1,000 people who attended a memorial service in Shroyer Gym on the Montana State University campus Friday night.

"We received hundreds upon hundreds upon hundreds of cards and letters and they mean so very much," Mrs. Lowe said. "It shows how much Alex touched all of you and how much we mean to you."

Alex Lowe and photographer Dave Bridges of Colorado died in an avalanche Oct. 5 on Shishapangma mountain in Tibet, which at 26,291 feet is the 14th highest mountain in the world. Lowe was part of a six-man team that intended to climb up and ski down its slopes. The expedition was called off after the avalanche.

"The community has been incredibly supportive," Jennifer Lowe said. "I want to thank all of you here in Bozeman for everything you've done for me and my children, including yard work, babysitting and wonderful meals fixed."

Family members, climbers and friends paid tribute in music, speech and film to the man whom many have called the world's finest climber.

Admission to the two hour memorial was \$5, with the money going to the Fund for the Children of Alex Lowe.

"Alex's strength and drive came from the heart," said cattleman Tom McClay, who grew up with Lowe in the Bitterroot Valley. "I feel there was another star in the night's sky when Alex was engulfed on the mountain."

Mountaineer Conrad Anker of Big Oak Flats, Calif., said he was close to Lowe and Bridges on Shishapangma when the avalanche started to move 6,000 feet above them.

When it hit, Anker was covered with about a foot of avalanche debris. He received several cuts on his head. They have healed in the two months since the incident.

Anker and Lowe were the best of friends. In the dedication of his book, "The Lost Explorer" published this year, Anker thanked Lowe for "his continued friendship."

During an interview before Friday's tribute, Anker said he and Lowe "were cut from the same cloth." The quality he valued most in Lowe was "his energy and his exuberance for anybody and everybody," Anker said.

Climber and "Into Thin Air" author, Jon Krakauer of Seattle, described Lowe as unaffected and down to earth.

Mountaineer Jack Tackle spoke about his climbs with Lowe that extended over 20 years. Although the climbing itself was rewarding, the real fun came from the friendship, he said.

Rennie Jackson, a National Park Service ranger, said he remembers Lowe calling him many times with the invitation, "Let's go climbing." Although he was less than enthusiastic when the invitation came in winter, Jackson said he would usually go.

"You don't get that many times to be with greatness," Jackson said. "Thanks for those phone calls, Alex. I won't forget your laugh."

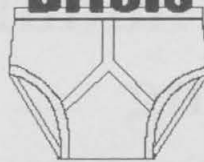

The loudest applause at the tribute for Lowe was for one of his sons, whose dignified performance on the fiddle conveyed what words could not.

Lowe's oldest son, 11-year-old Max, said nothing after he climbed to the stage to perform a bittersweet piece, accompanied by his teacher Nancy Padilla on the guitar.

When he finished, Max quietly left the stage.

"Thank you, Max," said Gordon Wiltse of Bozeman, a professional photographer, climber and a close family friend. "That was brilliant. You dad would be so proud of you."

## Briefs

## Freshman faces charges of Internet hacking

PEORIA, Ill. — A Bradley University freshman could be in big trouble if accusations that he tried

to hack into the Web sites of 400 European corporations are correct.

Companies from around the world notified university officials that someone from the campus' network had tried to break into their computer systems. According to the Bradley Scout, Bradley police traced the would-be hacker to the residence hall room of Blake Ferguson, 18. Ferguson was using a computer provided by the university.

Police said Ferguson told them an ongoing joke between him and a buddy from high school prompted him to try to hack into his friends PC. While trying to do so, Ferguson told police he unintentionally scanned corporate Internet Protocol addresses. That access, investigators said, could have resulted in the alteration of computer settings ranging from turning desktop icons upside-down to disabling a keyboard.

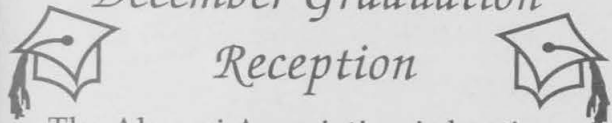

Still unclear is whether any of the affected companies will press charges against Ferguson. While most attempts to hack into sites failed, Ferguson did gain potentially damaging access to about 12 systems. The case is being reviewed by the Illinois State's Attorney's Office.

## Man asking for directions busted for possession of drugs

DAVIS, Calif. — When deciding whom to ask for help, consider this: Police at the University of California-Davis arrested a man who asked an officer for directions.

The officer, sensing that the man smelled of marijuana, detained him and asked him to produce identification. When the man did so, the officer discovered he was wanted on an outstanding warrant with the Sacramento Police Department. Davis police arrested the man. A subsequent search revealed that the man also possessed 5 grams of marijuana. Davis police charged the man with drug possession, too.

## December Graduation Reception

The Alumni Association is hosting a reception in honor of all December 1999

Candidates for Degrees this Sunday, December 12th from 1:00 - 3:00 P.M. at the Foundation/ Alumni Center.

Friends and family are welcome.

For more information call the Alumni Office at 994-2401

## Do you need cash for the holidays?

We can help...just bring in your old CD's and exchange them for cash or credit on more CD's. We are now stocking new copies of old favorites.

Also watch for new accessories, including blank tapes, CD holders, CD repair, etc.

## Four students injured in Oklahoma middle school shooting

### TMS campus

An armed 13-year-old middle school boy wounded four of his classmates just before 8 a.m. Monday, and was still trying to pull the trigger when he was subdued by a science teacher.

None of the injuries were said to be life-threatening. Injured at the Fort Gibson Middle School shooting were two 13-year-old boys, and a boy and girl, both 12.

Muskogee County Sheriff's Deputy Terry Cragg said the boy

"doesn't even know who it was he shot... There was not a hate thing. I asked him why. He said, 'I don't know.'"

The boy did not appear to be remorseful and had a blank look on his face, according to published reports.

The boy, a seventh-grader, fired all the rounds in the 9mm semiautomatic handgun. He was approached by science teacher Ronnie Holuby, who also serves as the safety officer at the school.

School officials cancelled class for all of the district's 1,850 students. There are about 450 students in the middle school.

## NASA: Satellite will monitor changes in environment

continued from page

instrument that has multiple functions. Those functions include measuring photosynthesis on a global scale.

"Software like what was written here at UM will provide users directly with land surface images," Running said. "Previous satellites have offered only raw data and required the end user to build the image. This advance should significantly expand the variety of uses society makes of satellites."

Satellites such as Terra will allow researchers to monitor how rapidly carbon

dioxide and other gases, responsible for change in global temperatures, will accumulate in the future. The satellites also will measure changes such as deforestation, wildfires and urbanization.

Running and some of his fellow researchers plan to be at California's Vandenberg Air Force Base for the launch. In Missoula, the launch will be shown in a room at the UM Science Complex on Dec. 16.

Running has worked with NASA since 1981, when the agency expanded its scientific research team.

"This launch represents a milestone in one of the most significant research projects on the campus of the University of Montana."

### Dec 9

The Department of Media and Theatre Arts presents "Ignatius Explains It All For You" Thursday, Dec. 9 through Saturday, Dec. 11 at the SUB Underground Theatre. Show begins at 8 p.m. and tickets will be sold at the SUB box office. For more info contact MTA at 994-3902.

The Museum of the Rockies Classic Film Series presents "The Lord of the Flies" Friday, Dec. 10 at 7 p.m. Schoolboys are stranded on a desolate island and resort to savagery as they struggle to survive. Based on the Pulitzer Prize-winning novel by William Golding. Tickets will be sold at the Museum. For more info, contact MOR at 994-6018.

### Dec. 10

The Ceramics Guild is holding a sale Dec. 10 at the SUB. For more info call Josh Marcus at 586-4095.

The MSU Women's Center is sponsoring a Women's Coffeehouse on Friday, Dec. 10 from 7-9 p.m. at the Leaf & Bean Coffeehouse in downtown Bozeman. Everyone is invited to attend and all women are encouraged to perform. Share your music, stories and poetry. Bring your instruments. (P.A. system is provided) For more info, call 994-3836.

Make sure to pick up your very own copy of the Excrement this Friday!

## Truckin' Derek Trucks Band plays for sold out Bozeman crowd

"Sorry, if you don't have a stamp or a ticket, I can't let you in." That's what the bouncers were saying to the poor souls who didn't get to the Cat's Paw in time to see the Derek Trucks Band perform in front of a maximum capacity crowd. Vootie really outdid themselves when they decided to bring this 20-year-old slide guitar prodigy to Bozeman.

I had just gotten off work around 6 p.m. and thought, just maybe, I'd stop into the Cat's Paw to see if I could chat with Derek Trucks. Lo and behold, there he was, walking across the dance floor. There were only a few folks in the bar, but their interest was in keno rather than his guitarist for the Allman Brothers Band.

Trucks was more than happy to sit and talk while he finished eating a pear. I asked him about playing with the Allman Brothers and in regard to Dickey Betts, he said, "It's great playin' with him. He's definitely one-of-a-kind."

Last summer, Derek toured with the Allman Brothers on their 30<sup>th</sup> Anniversary Tour. I had a chance to see one of the Portland shows and Derek held his own among the grizzled veterans of the Allman Brothers.

Derek explained that he only had five days to practice with the Allman Brothers before they kicked off the tour at Red Rocks. He had listened to their music before, but had no direct involvement until they asked him to join the band. Derek learned the band's set list in only four days, because as Derek put it, "I didn't want them to wait on me. It was nice to be able to surprise them!"

Derek is constantly touring and when asked how he spends his spare time, he smirked and said, "There is no spare time. We tour all the time. If there does happen to be a little extra time, we do laundry—ah, the glamour."

Talking with Derek, you would never believe he is only twenty. His grace isn't limited to his guitar playing. While we were talking his cell phone began to ring. Instead of answering, he simply reached down and turned it off. His style and composure is a rare quality for musicians in this day and age.

When I returned to the Cat's Paw about three hours later, I saw an entirely different scene: the Vootie security guards were milling about and the band was nowhere to be found. The bouncers were doing a nice job impersonating Silver Backed Gorillas while keeping their eyes on the pack.

The band definitely took their sweet time getting started, but when they did the bar began to move. Warming up with "Preachin' Blues" off their second album, the sold-out crowd seemed surprised at what they had gotten themselves into.

Derek is a regular slide guitar samurai. His Gibson SG began producing sounds that shut some mouths and opened some eyes.

According to Derek, "Bozeman's a cool place. The crowd is so varied."

Saturday night, the Cat's Paw was as varied as it could be. Some folks looked as though they were celebrating their 20-year high school reunion, while others looked like they were just out of high school.

While there was very little room to dance, everyone seemed to find enough space to do a little hippy jig of their own.

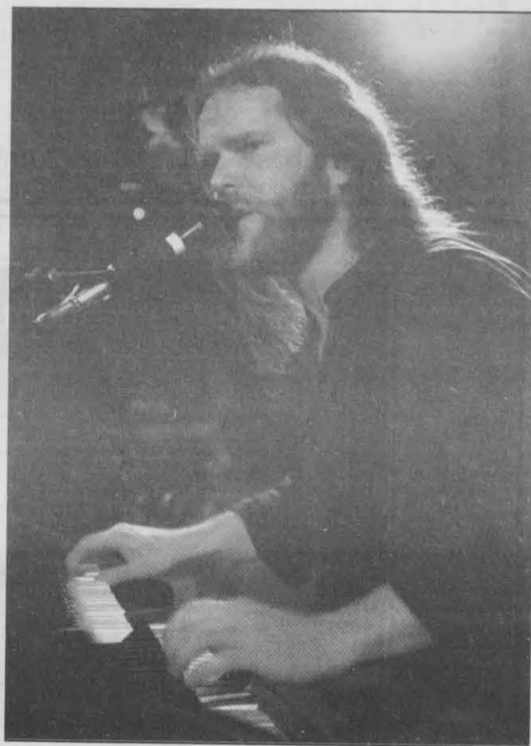

Derek doesn't use a pick during his routine, so it was really amazing to watch this guy play. Bill McKay was a virtual blues powerhouse. His voice was about as bluesy and passionate as they come.

By the time the second set rolled around, the crowd was really lubed. Their energy seemed to inspire the band. When Kofi Burbridge whipped out his flute, it added a nice splash of jazz to the funk and blues.

They began wrapping up the evening with a Bob Marley instrumental. Diehards who stuck around seemed very appreciative, so the band continued with a Grateful Dead cover. By then, it looked like it was all over. The hippies were happy, the forty-somethings were smashed, and the rest of us, well, we were truly amazed.

However, with a little encouragement from the crowd, the band played an encore consisting of Sonny Boy Williamson's, "Good Mornin' Little School Girl."

When the concert was over for real, one extremely happy fan walked by, saying of Derek, "Man, I love that guy, man. I've gotta go give him a hug." With a little perseverance, he got that hug. Shortly thereafter, he passed out in the parking lot.

(Clockwise from above) Pickin' machine Derek Trucks makes his job look easy. Keyboardist Bill McKay belts out the blues. Kofi Burbridge's flute playing added a jazzy sound to the Trucks Band funk.

# Student ceramics sale held in time for holidays

Ashley Brodie  
Exponent Writer

Friday is the last pay day of the semester for MSU employees and, coincidentally, the day chosen for the annual Ceramics Guild benefit sale in the SUB. From 10 a.m. to 5 p.m. student made ceramics art will be on sale just in time for last minute holiday shopping.

The Ceramics Guild is made up of ceramics artists from MSU who are concerned with giving exposure to student artwork and placing the school of art in a more public light, while generating money for the guild. The majority of funds from the sale go toward the Archie Bray Foundation in Helena.

The Archie Bray foundation, located in a former brick foundry, houses a family of local ceramic artists. The Ceramics Guild recruits three to four artists in the spring from the foundry to speak to student artists here at MSU.

Josh Marcus, who pulled the Ceramics Guild out of dormancy two years ago, is a sculpture major whose main focus of work combines wood with metalsmithing. Despite his art concentration, Marcus chose to reestablish the Ceramics Guild due to the utilitarian nature of ceramics.

"Ceramics are marketable

and fairly inexpensive to produce. You can easily sell a cup for \$10, but would have a hard time selling a sculpture for a thousand dollars at school," he stated. "Ceramics are art that everyone can afford." Twenty to thirty percent of the sale's proceeds will go to the guild.

Senior ceramics major Adam Swang adds, "the ceramics guild brings visiting artists to the university, while providing the opportunity for students to sell their work."

Swang's current work depicts a variety of clay community dwellings on a small scale.

"I've always had a fascination with building, and finding such monumental dwellings inspires me," he said.

Swang's inspirations arise from a combination of the Anazasi, African Dogon cultures, medieval, Roman, and Egyptian architecture.

The guild is "helpful for young artists to see the opportunity to sell their work," according to Swang. The organized opportunity to sell work provides a type of gratification for dedicated student artists.

Swang described, as an example of such dedication, seeing vice president Chris Coutre asleep in the studio by the kiln waiting for it to reach temperature.

"This is the type of commitment you will see in the ceramics guild and at the sale," Swang said.

## Winter Heritage

# Album captures concert musicians' magic

Ashley Brodie  
Exponent Writer

The second season of Winter Heritage concerts will visit Bozeman on Sunday. The show at the Emerson Cultural Center will feature New Grange, a new ensemble of phenomenal string musicians along with special guests Laurie Lewis and Friends.

New Grange, an all-acoustic American folk and bluegrass hodgepodge, features six talented and acclaimed artists who create an extremely rich sound.

Philip Aaberg, who in the past performed with wonders such as Peter Gabriel and blues legend Elvin Bishop, has appeared on more than 200 albums.

Violinist, fiddler, composer, producer, and educator Darol Anger poses as a founding member of The David Grisman Quintet, Montreux, and the Turtle Island String Quartet. As well as winning the Best Jazz Violin award, Anger has numerous grants and awards for recordings, movie soundtracks, solo work, and composing under his belt.

Master of the mandolin, guitar and violin, Mike Marshall also began his career as a member of the David Grisman Quintet.

Alison Brown, former banjo member of Alison Krauss and the Union Station, finally formed her own band which produced five subsequent releases. She was also crowned Banjo

player of the year by the International Bluegrass Music association.

Tim O'Brien is part of the new acoustic bluegrass movement of the past twenty years. He was recently critically acclaimed and Grammy nominated for his recording "Red & Blonde," which is a tribute to Bob Dylan's song writing. His recent work inventively combines classic bluegrass with his Irish roots.

Critically acclaimed Todd Phillips, who mastered acoustic bass over the past 20 years, has received many Grammy nominations, winning his first Grammy award in 1983 and his second in 1996.

In addition to the winter concert, New Grange just produced a self-titled release recorded in San Francisco.

Various mandolin banjos, an accordion, fiddle, and guitar are melded together to generate a complete pool of sound. This masterful compilation mostly consists of pure buttery acoustics coupled with occasional light, twang-tinted vocals. Bits of O'Brien's Celtic tradition resound throughout the album, especially in "Goin' to Boston."

The album's complete package proves to be reminiscent of Grisman's work.

Overall, the new release carries a hearty but light and mellow presence. It receives two thumbs up.

The release of the album coincides with the Winter Heritage concert playing at the Emerson Cultural Center in Bozeman Sunday, December 12. Tickets are available at Cactus Cd Warehouse, Grateful Shed, and Books Etc.

# English actress Janet McTeer stars in 'Tumbleweeds'

## by Ivry Light-Ridder Newspapers

NEW YORK — The most amazing thing about "Tumbleweeds," the low-budget but high-quality mother-daughter drama, is that it marks Janet McTeer's first American film appearance.

McTeer, the 6-foot-tall, 38-year-old English stage veteran, is the owner of piercing blue eyes and a Tony Award for "A Doll's House," testimony to her immense talent.

Ben Brantley of the New York Times called McTeer's Nora the greatest stage performance he ever seen. Yet, McTeer had never graced the silver screen on either side of the pond — and when she did land the role of flirty Southern bombshell Mary Jo Walker in "Tumbleweeds," it was almost by accident. Thank a PBS talk show.

"I'm a 'Charlie Rose' fan," says "Tumbleweeds" director Gavin O'Connor, who also wrote the script and co-stars Jack, Mary Jo's love interest. Of course, I'd heard of Janet, from all those rave reviews she'd written in "A Doll's House." She was on "Charlie Rose" one night, and a light bulb just went off in my head. I said, "That's Mary Jo."

"I almost didn't go on the show that night," McTeer says. "I was really tired and I had bronchitis, and I had to do 'A Doll's House' five nights a week. And, to tell you the truth, I'd never seen 'Charlie Rose,' and I thought it

was one of your typical TV talk shows. But somebody sent me a tape and I saw that it was a good show, so I did it. I think Gavin was watching that night because there was another actress on and he wanted to see her legs."

"Janet was telling Charlie about her sister's kids and her relationships with her nephews," says O'Connor, "and it paralleled the relationship Mary Jo has in 'Tumbleweeds' with her daughter, Ava. So I sent her the script."

"The script wasn't quite finished," says McTeer, "but the scenes I read, I loved. They were wonderful. So Gavin and I met, and I think he was expecting some classical grande dame of the stage. But I was unconventional and a little ballsy — I said (a bad word) a few times, and he was rather shocked."

"We went out for a drink," O'Connor recalls, "and it was supposed to be, like, a half-hour get-together. But it turned into three hours. We discovered that we're from the same tribe. We have the same artistic sensibility. So Janet was attached to the film a year before we shot it, which gave us a long time to talk about the character. Janet did a lot of homework."

"Playing a Southerner isn't that easy," McTeer says with a laugh. "It's especially hard with this English accent I have. We only had the money for two sessions with a voice coach, but I made a tape and listened to it, and I watched 'Coal Miner's Daughter,' 'Bastard Out of Carolina,' and 'Tender Mercies' over and over again to get the accents. Then, I

British actress Janet McTeer, center, makes her American film debut in "Tumbleweeds" with Kimberly J. Brown, left.

went to North Carolina and just watched the people, because the most important thing isn't talking Southern, it's being Southern. There's a languid quality to the way they move, and it's about the space and the food and the weather, which can get too hot to do anything but sit back and wait for it to get cooler."

Says O'Connor: "When I cast Kimberly J. Brown as Mary Jo's daughter, Ava, the light bulb went off in my head just like it did when I saw Janet. Some people make decisions with their hearts, and others make decisions with their heads. I make them with my

bones — you just know something is right. And I felt Kim was right for Ava in my bones. We searched all over the country for a girl to play Ava, and we got hundreds of tapes. I knew she was Ava the instant I saw her tape. There was something about her personality — witty, bright, charming, and an absolute wise-ass. I fell in love with her."

"Kimberly was 13 when we shot 'Tumbleweeds,'" McTeer says, "and I was very keen that she not be treated like a child. We were the two leading actresses in the movie, and her thoughts and input mattered as much as any-

one else's. So I was both a mother to her and a peer. We'd talk a lot. My respect for her is huge."

"We were very, very fortunate to get Janet for 'Tumbleweeds,'" O'Connor says. "I'm very proud of the fact that this is her first American film."

"I don't know if I could've made it as an American movie actress when I was younger," says McTeer. "It's so much about the way you look. Either you're very, very pretty and you play the ingenue, or you're the best friend character. It's not so bad when you're older like me."

## Apocalyptic action flick pits Schwarzenegger against Satan

### by Katie Parsons Exponent Writer

Arnold Schwarzenegger's newest film has all the makings of a smash hit, but is far too close to a near miss. If there are any other disillusioned people out there who will attend "End of Days" with the expectation of something grand, I can almost guarantee disappointment.

A mindless religious-cumbered action flick, "End of Days" tells the story of Jericho Kane, an alcoholic New York City cop who must stop Satan (living in Gabriel Byrne's body) from taking over the earth, destroying civilization as we know it.

Fulfilling the prophecy in the book of Revelation, Satan

must find his chosen bride and conceive a child to ensure his reign. Of course, he must impregnate her between the hours of 11 p.m. and midnight, or his whole plan goes down the tubes. Christine York (Robin Tunney), Satan's "bride" has had religious visions her whole life and seems to have been born for the sole purpose of having his baby.

The plot had potential, as did the cast. As far as performances are concerned, Schwarzenegger wasn't bad at all. He paled in comparison, though to the purely evil display put on by Byrne, who actually became his role, and made it seem fit for no one else but him.

Tunney was somewhat detached from the majority of the show, which was inappropriate

for such a central character. Kevin Pollack, Arnie's pal, jumped in with a few good one-liners, but was little more than a backdrop in the larger scheme of the movie.

This movie is thrilling and interesting at times, but too much of it is just plain silly. For example, the priests in this film would have us believe that "666", the sign of Satan, is actually "999" because St. John dreamed it backwards. Add a "1" in front, and gasp—"1999!" The year of Satan! Unfortunately, "End of Days" is fraught with such stunts. Not only that, but there are too many holes in the plot to make it believable. Several of the characters were also a little underdeveloped,

## Son of legendary author presents manuscript

### Ashley Coogan Exponent Writer

Patrick Hemingway, son of Nobel-prize winning author Ernest Hemingway, will be the featured speaker in a program Tuesday night at the Museum of the Rockies.

During the program, which will begin at 7 p.m. in the Hager Auditorium, Hemingway will give a brief talk on his involvement in the editing and completion of his father's last manuscript, *True at First Light*. Hemingway will also speak on his travels in Africa, and will answer questions from the audience.

After the presentation, a reception in honor of Hemingway will be given at the museum, where he will be available to speak personally with museum goers.

"We often do author presentations [at the Museum of the Rockies], and we are glad to have Mr. Hemingway come and speak," said Marilyn Wessel, dean of the museum. "He has graciously donated his

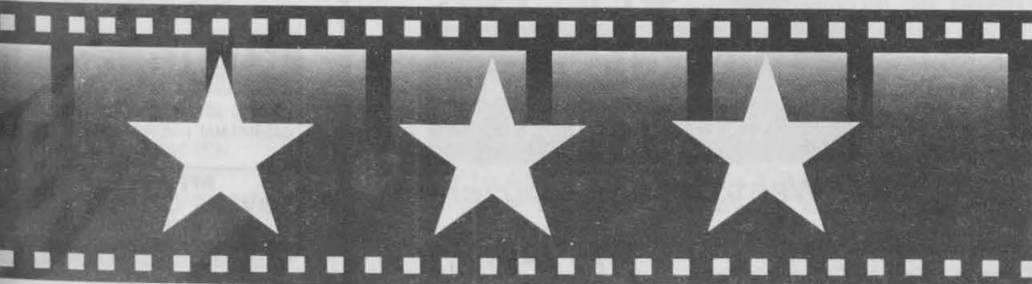

time, and we hope to have a capacity crowd of 250 people."

*True at First Light* includes an introduction written by Hemingway which recalls his childhood spent in Africa and the political turmoil of the continent. In his presentation, Hemingway will speak on the impact that the country had on his father and his father's literary work.

The book, which is a fictional account of a game-hunting safari in Africa, also details the relationship between Ernest Hemingway, his wife Mary, and an African woman. *True at First Light* is the last book that Ernest Hemingway wrote, and the manuscript was incomplete at the time of his death.

Hemingway, a Bozeman resident, wrote an introduction and edited the unfinished manuscript of the story, which has been released in the 100<sup>th</sup> anniversary year of his father's birth.

666: Arnie battles prince of Darkness

continued from page 9

and too flat to evoke any feelings from the audience.

"End of Days" isn't much more than a well-armed Arnold taking on the Prince of Darkness. Yes, Jericho Cane fully expects to kill Satan with a gun. This is not a classic "good vs. evil" story line, it's a corny "Arnold versus evil" story line that puts Arnie, the supreme anti-hero, in charge of defeating the most evil force in the universe!

You would think that with a plot such as this, some heaven-sent help would come around, right? Not so. Writer Andrew W. Marlowe neglected to add any mention of God, or any godly force at all. It is with this (coupled with the weight of too many action scenes, not enough substance, and poor character and plot development) that "End of Days" comes to a very unsatisfying close.

Japanese student offers alternative to unhealthy holiday eating habits

Megumi Suzuki  
Special to the Exponent

Before you load another forkful of turkey and stuffing or holiday fruitcake into your mouth, please pause for a moment to consider healthier dietary habits. Perhaps we could learn a thing or two from Japan, where the average life expectancy is 77.19 years for males and 83.82 years for Females.

It appears that healthy dietary habits are partly responsible for these results. Yes, Japanese food is considered one of the healthiest cuisine in the world! As you know Japan is surrounded by sea, and the diet depends heavily on seafood. In fact, fish is very nutritious. Fresh fish contains a high proportion of protein, rich in amino acids & vitamins, and far less cholesterol than either beef or pork. In Japan the most popular way to serve fish is raw. There are two ways of serving raw fish. One is called *Sashimi*, which is various sliced raw fish eaten by dipping in soy sauce and Japanese green horseradish

(*wasabi*). The other is called *Sushi*- maybe the most famous Japanese dish in the world.

*Sushi* has a culinary history dating back at least one thousand years in Japan. It

onto an oval-shaped vinegared rice is known as the most popular *Sushi*. Popular *Sushi* fish are fatty tuna (*toro*), tuna (*maguro*), shrimp (*ebi*), octopus (*tako*), salmon roe (*ikura*),

## New man in town

# Kramer takes over helm of MSU football

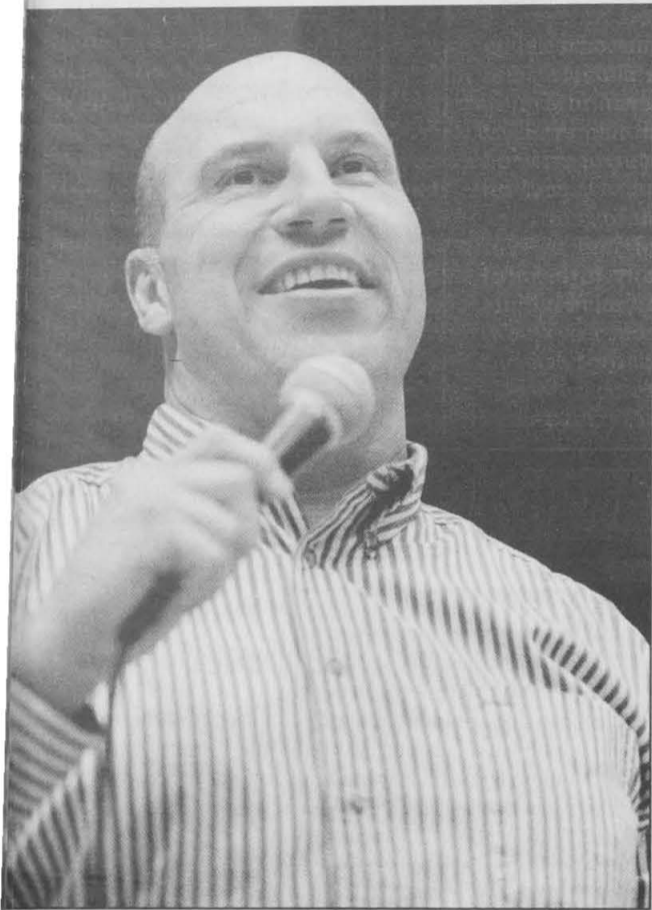

Photo by Jay Thane

Mike Kramer, pictured here at the MSU basketball game Monday night, became the 30th head coach at Montana State University when it was announced that he would be replacing eight-year head coach Cliff Hysell who departed MSU following this past season.

### Special to the Exponent

Montana State University president Mike Malone has ended all the speculation. If there ever was any.

Answering the question of who is going to coach Montana State football, Malone announced late last week that former Eastern Washington head coach Mike Kramer, who was the only candidate officially interviewed for the vacant post, has been hired as the 30th head coach in Montana State history.

Kramer, who had expressed enthusiasm regarding the potential to coach at MSU, accepted the position late Thursday evening.

"We were in constant communication with President Malone during the interview process," said Allen Yarnell, MSU vice-president of student affairs, who oversees Bobcat athletics. "President Malone authorized the hiring, following the recommendations of the screening committee, the athletics advisory board, the Bobcat booster board, Athletics Director Chuck Lindemann and myself."

Kramer fills the head coaching position, vacated by Cliff Hysell, who stepped down after an eight-season, 41-47 stint as head coach. Kramer has been at Eastern Washington for the past 11 years, including the last six as the school's head coach. Prior

to that, he was an assistant at MSU.

"As a head coach, Mike Kramer has all the qualities that were consistent with the previous program — discipline, commitment and integrity," Lindemann said. "What we add is genuine interest in helping the program grow through external support. He knows the state of Montana and he has maintained his contacts here over the years. He'll hit the ground running and we're extremely excited about the future of the Bobcat football program."

"As a head coach, Mike Kramer has all the qualities that were consistent with the previous program; discipline, commitment and integrity."

—Chuck Lindemann,  
MSU Athletic Director

Kramer compiled a 37-32 record in six seasons at Eastern Washington, and is 30-17 in the past four seasons. His Eagles were 7-4 and tied for second-place in the Big Sky Conference this fall, with two losses to NCAA Division I-A schools Idaho and Boise State. EWU finished 12-2 in 1997, won the Big Sky

title with a 7-1 ledger, and advanced to the semifinals of the NCAA Division I-AA Championship playoffs.

"I, along with my family are just enthralled with where Montana State University is going as an institution," Kramer said. "We're very excited with the opportunity Chuck Lindemann has presented, as well as with the growth of the athletic department. I certainly would like to thank Cliff Hysell and staff for laying the

see Kramer page 13

## MSU falls to UW-Milwaukee, 63-52

### Exponent Staff

Jessica Wilhite notched 17 points, while teammate Chanelle Jonason chipped in 11 points and 11 rebounds to lift the University of Wisconsin-Milwaukee to a 63-52 win over Montana State University on Sunday afternoon.

Montana State (2-4) was paced by Amy Meckling with 22 points, while Kelly Martin and Jennifer Curl added 10 points each.

"We didn't shoot very well in the second half," said MSU interim head coach Frank McCarthy. "We also had a little trouble with their press in the first-half, and it was a struggle to overcome the 10 point second-half deficit."

The Bobcats jumped out to an early 4-0 margin, which was their only advantage in the game, following a jumper by senior Lezlee Weedin. UW-Milwaukee (3-2) responded with a 10-2 run and entered intermission with a 38-29 lead. The Panthers extended the margin to 43-31 with 16:15

remaining in the game, before the Bobcats scored eight unanswered points to close to within 43-39 on a Meckling jumper. MSU could get no closer, however, as a pair of Jonason field-goals iced the game down the stretch.

"We entered the first road trip hoping for a split," McCarthy said. "We let one get away from us at Northern Illinois, and we were a little flat this afternoon. However, the first trip was a good experience for us and we're continuing to find our identity. We're only going to get better and better as we get closer to the Big Sky Conference season."

For the game, the Bobcats shot 46 percent from the field in the first half, but shot an icy 27 percent from the floor in the second stanza. UWM out-rebounded Montana State 40-33, including 13 offensive boards. MSU was led under the glass by Martin, who notched a team-high seven rebounds.

Montana State will host Carroll College this Friday at 7:05 p.m. in Worthington Arena.

## 'Cats get by CC Islanders

### First-year program plays tight with MSU

Scott Barbur  
Exponent Sports Writer

Three-point field goals and free throws were the keys to the game for the Montana State men's basketball team (4-3/0-0) as they defeated Texas A&M Corpus Christi (2-3) by a score of 99-88 at home Monday night.

The Bobcats combined for 9 of 19 three-pointers and 30 of 39 free throws to keep the visiting Islanders at bay most of the game.

The Bobcats used their good shot selection and tendency to get to the free throw line to keep the lead throughout the first half. They led by as many as 13 points on two different occasions.

Redshirt freshman Pete Conway came off the bench to provide an offensive spark for the Bobcats with 13 points on 4-of-6 shooting. They went into half-time leading 48-41.

"We got open looks," said Conway. "When you get looks

*continued from page 11*

like that you make them." head coach Mick Durham. The second half was "They shot very well. We equally dominated by had a tough time stopping each teams' offense. The Islanders pulled a head midway through the period, but were denied any chance at gaining momentum by a barrage of three-pointers by the Bobcats. The Bobcats finally put the game away in the last few minutes.

"They've done a heck-of-a job [as a first year program]," said MSU head coach Mick Durham. "They shot very well. We had a tough time stopping them." Junior forward John Lazosky led all Bobcats with 20 points. Conway finished with a career-high 19. Four other Bobcats scored double figures. MSU will hit the road for the next two games, heading first to Wyoming on Dec. 11 and then to Corpus Christi, for a rematch with the Islanders, on Dec. 18.

**"We got open looks, when you get looks like that you make them."**

*—Pete Conway, MSU freshman shooting guard*

**Two assistants selected to join new MSU football staff**

**Exponent Staff**

New Bobcat head football coach, Mike Kramer has wasted little time naming a pair of coaches, with whom he is familiar, to his new coaching staff at Montana State University. Kramer tabbed former Eastern Washington assistant Torresy Smith on Saturday, and on Sunday announced that he would retain Bobcat assistant Butch Damberger.

Smith just completed his fifth season at Eastern Washington, where he was the coach for the running backs. Four different Eagle runners combined for six 1,000-yard seasons under Smith's tutelage. Smith was a part-time starter at quarterback for EWU in 1993 and 1994 after transferring from Illinois Valley Community College, and in those two seasons he threw for 1,275 yards and 15 touchdowns. He is a native of Peoria, Ill.

"I'm very happy that Toressy has decided to join my staff at Montana State," Kramer said. "He's a talented young coach who I know well and who is quite familiar with my style and system. He will be an outstanding asset to Montana State and our football program."

A two-time All-Big Sky tight end at Montana State in the late 70s, Damberger was the first assistant hired by Cliff Hysell eight years ago. He coached Montana State defensive linemen from 1992-97, and the past two years he has coached the secondary.

Five defensive linemen coached by Damberger earned All-America honors. MSU players garnered all-league kudos 11 times in his tenure. He coached All-Big Sky All-America preseason choice Shon Farris on safety, and coordinated MSU's most successful special teams.

"I've held Butch in high regard since he was on Jack Johnson's staff (Great Falls High) in the early 80s," Kramer said. "Confronted against him, the elements of the team responsible for have always been excellent. Butch brings a tremendous amount of lifeblood and a tremendous amount of competence to the program."

Kramer said that he will not assign coaching duties to Smith and Damberger until he further fills his coaching staff. He indicated he will finish interviewing current Bobcat members on Monday.

**Kramer: Former Eastern Washington coach brings impressive record to MSU**

*continued from page 11*

ation of this fabulous team." Kramer's college coaching career began as an assistant to MSU head coach Dave Arnold in 1983, and he became the linebackers' coach on the 1984 National Championship squad. He was promoted to defensive coordinator the next season, and after two years in that role he moved to the high school ranks in his native Eastern Washington for two seasons. A 1977 Idaho graduate

joined Dick Zornes' staff at Eastern Washington in 1989, and after five seasons succeeded the legendary Eagle coach.

Kramer interviewed for the Montana State University vacancy before approximately 250 people. During the interview process, he met with the MSU athletics advisory board, which is mostly made up of faculty members; the Bobcat athletics department, including the coaching staffs and support personnel; a large

contingent of Bobcat boosters, 80 members of the football team; and the M-Club, comprised of former MSU letter winners.

"We received responses from over 250 people in regards to Coach Kramer's interview," Lindemann said. "Over 95 percent highly recommended him for the job. He interviewed before a very diverse group of people and he impressed all groups, equally."

"We were under a short time frame for hiring this

position, and I was very impressed with the pool of applicants and the way the screening committee devoted their energies to identifying finalists for the position. We had some high-profile people in the final pool and I feel that we got the right person for our position."

Kramer, 45, will begin his duties at Montana State on Saturday afternoon. He and his wife, Sandi, have two daughters, Courtney, 16, and Gretchen, 9.

A real rose dipped in real gold. Nothing outshines for holiday giving.

A very special gift for a very special woman. A real 12" long-stemmed rose, preserved and dipped in real 24k gold. Each rose is unique (no two are alike) and like your love for her, it will last forever. For almost the same price of dozen roses, you'll give her a single rose that she'll remember you by and cherish forever.

## ASMSU MISSION

ASMSU is committed to providing affordable and diverse support services, entertainment, as well as a recreational and educational opportunity to the students of Montana State University. We are committed to providing quality services in a cost effective manner through responsible financial management. • We are committed to remaining responsive to the evolving needs and interests of Montana State University. • We are committed to providing employees, staff, and volunteers with a positive work environment which facilitates their personal and professional growth. • ASMSU will conscientiously represent Montana State University students to the entire University and the surrounding communities.

ASMSU Day Care School is having a

## Christmas Party

Tuesday, December 14, 1999  
3:00 PM.

Open to children in family housing  
Cookie donations are welcome

call 994-4370 for information

## Campus Entertainment Arts and Exhibits Committee

The Campus Entertainment Arts and Exhibits Committee is looking to fill two positions, Publicity member and Hospitality member.

Pick up an application at the Campus Entertainment office or the ASMSU office. For more information call Bree Smouse at 994-1828

## BE A LEADER! ASMSU wants you!

ASMSU currently has three positions open on your student senate. Two are off-campus seats and the third is a Greek seat. These are vacated spring seats and will be appointed by the ASMSU Senate. If you are interested in learning how \$750,000 student dollars are allocated here on campus, get involved. Come pick up an application in room 281 of the SUB before the end of the semester and learn about your student senate and how you can make a difference.

Deadline for returned applications is December 17, 1999  
Must live either off-campus or in a Greek house to apply.

ASMSU

is now

accepting

## APPLICATIONS

for Homecoming

Chair & Senate

Secretary.
