To provide additional information with respect to Environmental Defence interrogatory 5, issue 4.7, as set out in Mr. Elson's letter.

UNDERTAKING JT2.1

8 9

Response

10 11

OPG provides the following in response to Mr. Elson's letter of April 14, 2014.

12 13 14

a) Management's "high confidence" estimate of the total cost of the DRP, including interest and escalation is \$12.9B as stated in Ex D2-2-1 Attachment 5, page 2 of 47. This is the expected expenditure in nominal dollars or dollars of the year. The table below provides a breakdown of the estimate in 2013 and 2014\$.

16 17

15

	2013\$	2014\$
High Confidence Estimate	\$10.0B	\$10.2B
Escalation	\$1.5B	\$1.3B
Interest	\$1.4B	\$1.4B
Total	\$12.9B	\$12.9B

18 19

b) Confirmed

32

33

34

35

i) No, it is not OPG's position that it can finance DRP for an after tax return of 7%. Please note that in Mr. Elson's letter, discount rate and rate of return are used interchangeably, which is not correct. The 7% referenced is the discount rate OPG applied in its calculation of the DRP LUEC. For rate of return (on equity), see response to ED IR#005. OPG believes 7% is the appropriate discount rate to evaluate the DRP. In EB-2010-008, OPG explained that it assesses differences in risk through cash flows rather than through the discount rate. OPG continues to maintain that risks have been adequately accounted for in the project cash flows. Mr. Elson's letter references the 2005 CIBC World Markets report and quotes the Bruce Power LP cost of equity to have been assessed by CIBC at between 13.7% and 18% and incorrectly implies that this rate should be compared to OPG's 7% discount rate. Again the cost of equity and discount rates for use in LUEC calculations are different things. Generally speaking rate regulation is lower risk than power purchase contracts. And, in the rate regulated environment in which OPG operates, the ratepayers benefit from this lower risk through a lower cost of financing.

36 37 38

39

40

41

42 43 ii) OPG does not have explicit commitment s from the Ontario Electricity Financial Corporation to provide financing for the DRP. OPG expects to finance DRP through corporate debt issued to the Ontario Electricity Financial Corporation which is addressed in Section 3,2 Corporate Long-Term Debt Issues and Section 4.3 Planned Corporate Long Term Debt Issues, Exh. C1-1-2. OPG's sources of equity are its retained earnings and equity investment from its Shareholder.

Refiled: 2014-06-04 EB-2007-0905 Exhibit L Tab 1 Schedule 1 Page 2 of 2

1 2

3

5

d) OPG's response to Ex. L-04.7 ED-005 (f) has provided the requested information. The total cost of the DRP is the basis of the estimate of 3.2 cents/kWh shown in the table provided. The LUEC calculation includes interest and escalation (see also responses to L-04 7.1 Staff-031 and L-04 10-17 SEC-055).

JT2.2

Page 2 of 2

b) At a 50% cost overrun, applied to the selected projects, and through the application of the contract model used in each of the contracts, the estimated point-estimate for the DRP, is less than \$10.0 billion due to contingency and management reserve contained within OPG's high confidence estimate. At a 100% cost overrun, the project related contingency and management reserve are exhausted resulting in a projected cost overrun of \$200 million above OPG's high confidence estimate. Note that for all scenarios, OPG maintains approximately in Program level contingency (as noted in note 3 of Part C) of IR ED-011).

9 10 11

1 2

3

4

5 6

7

8

c) Cost overrun scenarios including interest and escalation are provided below.

3 4

<u>Undertaking</u>

6 7

5

To obtain cost information with respect to other environmental budgetary programs, in addition to any monitoring already identified in the existing interrogatory response.

8

Response

10 11 12

The estimated 2014 - 2015 costs for environmental programs at Darlington, incremental to the monitoring identified in interrogatory response L-4.9-12 LOW-001, is provided in the table below.

13 14

Environmental Program Costs*	Total Estimate \$M 2014-2015
Refurbishment environment support (labour)	2.1
Environmental governance and compliance management	1.1
Waste, effluent, and chemical management	1.2
Groundwater monitoring	0.3
Sampling and analysis for chemical waste, groundwater wells	0.8
Biodiversity studies and monitoring	0.2
Chemistry laboratory support for environmental monitoring	2.2
Stack and filter testing emission verification	0.4
Radiological Environmental Monitoring Program (per CSA N288.4-10)	1.0
Total	9.2

In addition to the above, each contractor working on the DRP is required to implement 15 an Environmental Management plan applicable to their work activities. These plans are 16 17 developed by the contractor based on the Nuclear Projects - Environmental 18 Requirements Guideline (N-GUID-09701-10013) and reviewed and accepted by OPG 19 staff. Each contractor's plans will include applicable monitoring requirements to ensure 20 their activities conform to the environmental effluent and emission limits for Darlington 21 NGS. OPG cannot provide the additional amounts to protect the environment, 22 associated with these contracts, as they are included within the general costs of the

23

particular project.

Filed: 2014-05-02 EB-2013-0321 JT2.5 Page 1 of 1

UNDERTAKING JT2.5

Undertaking

To provide an anticipated date for conclusion of talks with the Department of Fisheries.

Response

 Work is currently underway to submit an application for an authorization to Fisheries and Oceans Canada in support of the Darlington Refurbishment project and the continued operation of the facility. It is anticipated that this application will be submitted by the end of June, 2014. Once submitted, Fisheries and Ocean Canada will assess the application and define any offsets which may be required to compensate for any residual effects. It is our understanding that Fisheries and Oceans Canada have up to 90 days from the date they deem our application complete to issue an authorization with any terms and conditions. If the authorization identifies the need for offset, OPG will build the requirements into our business planning process and develop implementation plans accordingly.

7 8

Response

9 10 11

12

13 14

15

The Definition Phase Planning Activities capital cost for 2013 is \$92.3M below the 2013 budget of \$422.0M. Major contributors include the delay of Retube and Feeder Replacement ("RFR") Mock up and Tooling milestones into 2014, deferred work across other major contracts to align with project approvals and contract awards; partially offset by higher engineering costs related to Integrated Safety Report follow up activities,

Component Condition Assessment reviews and Modification Design Report support. 16

1 <u>UNDERTAKING JT2.8</u>

2 3

Undertaking

To provide, on a confidential basis, the calculation that resulted in a 5 percent reduction in contingency in the response to Board Staff interrogatory 31(b).

Response

Please refer to page 34, Table C1 and pages 36 - 38 of OPG's Confidential Filing of Ex. D-2-2-1, Attachment 5. Table C1 shows that the contingency amount in the 2009 BCS was (2013\$) and in the 2013 BCS was (2013\$). Subtracting the two numbers yields a difference of which when divided by the original yields a difference of

More detail on the contributors to the contingency amounts in the 2013 BCS can be found on page 37, Table C3 of OPG's Confidential Filing of Ex. D-2-2-1, Attachment 5, and, for the 2009 BCS on page 27, Table 2 of OPG's Confidential filing of Ex. D-2-2-1, Attachment 4, filed in EB 2010-008. Comparing the 2009 contingency amounts (converted to 2013\$) and the 2013 contingency amounts allocated to each of the categories, the following is noted:

Cost Estimate Uncertainty declined by (2013\$) or almost as would be expected, because of increasing certainty in the estimates as progress in issuing contracts and other estimate development progresses in the definition phase.

• Contingent Work, which in the 2009 BCS was labeled "Potential Scope Increase due to ISR, EA Gaps, and Other Regulatory", has remained virtually unchanged, i.e., a very slight decline of While significant certainty has been gained in ISR, EA and Other Regulatory scope, the detailed development of the scope during the definition phase has resulted in many additional items of contingent work being identified and probabilities being assigned to this work. Some of this contingent work is dependent on the completion of inspections in the pre-refurbishment period in order to confirm whether the scope will or will not need to be executed during refurbishment.

Labour and Materials Uncertainty increased by (2013\$) or While OPG has staffed up its Program Support and Program Management functions, experience to date with certain of the contractors has been that there is severe competition for qualified resources, most acutely felt currently in the engineering disciplines. The publication of the LTEP and the potential that Bruce Power may be refurbishing Bruce Units 4, 3 and 5 in parallel with the Darlington Refurbishment indicates a potential for this severe competition for qualified resources to continue.

Discrete Risks Contingency has increased by (2013\$) or because of two primary factors:

- As the Definition Phase has progressed, there has been a significant increase in the level of detailed risk identification and assessment, in particular for the major contracts such as Re-tube and Feeder Replacement, Steam Generator, Turbine Generator, Fuel Handling and Defueling. This is a normal expectation during a project's development cycle. It would be expected that some portion of these Discrete Risks would be mitigated or eliminated as the definition phase progress.
- Between 2009 and 2013, OPG reclassified the risks associated with the costs of OPG work in support of the project scope from cost estimate uncertainty to Discrete Risks. This second change accounts for the majority of the increase in Discrete Risks.
- Schedule Uncertainty has decreased by (2013\$) or This is because of increasing certainty about the duration, particularly higher certainty about the critical path work as a result of further project definition.

1 UNDERTAKING JT2.9

2 3

Undertaking

To confirm whether a breakout of contingencies, management reserve, interest and escalation from the total Darlington budget is shown in the business case, and if not, to make best efforts to provide it.

Response

OPG confirms that the \$10B (2013\$) high confidence estimate includes the Contingency and Risk Amounts Total of (2013\$) at the 90% confidence level as shown in Table C3 on page 37 of the Confidential Filing of Ex. D-2-2-1, Attachment 5. As can also be seen on page 34 of the Confidential Filing of Ex. D-2-2-1, Attachment 5, the total (90% confidence) estimate, including contingency is OPG considers the additional (2013\$) difference between and \$10B to be management reserve.

OPG confirms that the business case also includes interest and escalation. Please refer to the response to interrogatory L-47-6 ED-005. Information on interest and escalation included in the estimate is also provided in Ex. D-2-2-1, Attachment 5, page 34.

1 2

Undertaking

To provide a version of the table in response to CCC interrogatory 20 showing regulated operations only.

UNDERTAKING JT2.10

Response

The correct reference is to the table in response to CCC 22 (Ex. L-6.8-4 CCC-022). Ex. L-6.8-4 CCC-022 shows the calculation of the estimated \$700M savings resulting from the headcount reduction target of 2,000 employees, for all of OPG, by the end of the test period.

A version of the Ex. L-6.8-4 CCC-022 table based on the target reduction of 1,300 employees by the end of the test period applicable to regulated operations only is shown below.

	Actua	d	BP 2	2013 - 201	5	
	2011	2012	2013	2014	2015	Total
Headcount reductions	348	275	216	249	222	1,310
(\$M)						
2011 Savings	27	54	54	54	54	243
2012 Savings		21	43	43	43	150
2013 Savings			17	34	34	85
2014 Savings				19	39	58
2015 Savings					17	17
Total	27	75	114	150	187	553

Under the BT initiative, OPG has a staff reduction target of approximately 1,300 employees for the regulated operations by the end of 2015 (excluding DRP and new nuclear). The estimated cost savings are approximately \$150M and \$187M in the test period and the corresponding headcount reductions are 249 and 222 respectively.

Ontario Power Generation

CHRC Briefing

December 14, 2011

This record (as that term is defined in the Freedom of Information and Protection of Privacy Act (Ontario)) is or was prepared, maintained or used by or on behalf of OPG in relation to: (a) meetings, consultations, discussions or communications about labour relations or employment-related matters in which OPG has an interest; and/or (b) negotiations or anticipated negotiations relating to labour relations or to the employment of a person by OPG between OPG and a person or a bargaining agent. In addition, this record contains: (a) positions, plans, procedures, criteria or instructions to be applied to any negotiations carried on or to be carried on by or on behalf of OPG; and/or (b) plans relating to the management of personnel or the administration of OPG that have not yet been put into operation or made public.

Page 2 of 21

Executive Summary

- The analysis confirms the belief and quantifies the extent to which OPG's P&B plans are unsustainable
 - Under the status quo the threshold levels for all metrics chosen to assess sustainability are exceeded
- Initial set of six interventions analyzed have potential to provide significant financial benefit (growing to roughly 3% of Gross Revenue; \$1.3B cumulative over 15 years) but do not move P&B plans to a fully sustainable position
 - Three interventions are within management control and are being pursued for implementation through the BTS
 - Further three interventions requiring negotiation are being used to influence labour negotiation strategies
 - Beneficial effect of additional interventions identified by the work teams are being evaluated
- Consistent with prior CHRC discussions, significant changes to P&B design and program management will be required to improve sustainability
 - Long term strategy will require aggressive pursuit of significant design changes through a variety of channels, supported by critical cost reduction approaches through plan management

Page 3 of 21

Pension and Benefit Sustainability Project Update

Overview

- 5 Work Teams: Program Design, Program Management, Business Model, Stakeholder Management and Sustainability
- Programs in scope: Registered Pension Plan, Supplemental Pension Plan, Active Benefits and Post-Retirement Benefits

Work Completed

- Developed a stochastic financial model to assess current state
- Defined a set of measures and thresholds against which to evaluate and monitor sustainability
- Considered business impact of exceeding the thresholds
- Obtained feedback and positioning from work teams and project sponsors
- Assessed impact on sustainability of a set of potential program interventions
 - Integrating implementation of program management interventions into related Business Transformation Strategy (BTS) initiatives
 - Using program design interventions that require negotiated solutions to influence Labour strategies

JT2.12

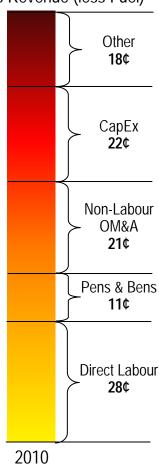

Attachment 1 Page 4 of 21

Defining "Sustainability" Measures and Thresholds

The following financial metrics were determined to be the most appropriate, most transparent and comparable to available benchmarks:

P&B Cash should not exceed 10% of Gross Revenue

- \$1 of Gross Revenue (less Fuel)
- Cost of P&B trending well above upper threshold and further increases must be limited
- Significant P&B cash requirements is drawing funds away from core business needs
- 2 P&B Cash should not exceed 40% of Operating Cash Flow before CapEx (1)
 - Cannot allow P&B cash requirements to impair CapEx spend; tested on a three-year average to allow for ebbs and flows in business financials
 - 40% is an upper end limit external proxy analysis indicates majority of companies in lower range of 5% to 40% (OPG cash requirements currently above 50%)
- P&B Expense should not exceed 35% of EBIT (1)
 - P&B expense is currently well above 35%, but expected to decline to 30-35%
 - 35% selected as upper end limit based on current business plan approach
- P&B Expense should not exceed \$50K per active employee (constant 2011 \$)
 - From stakeholder (OEB, public, union, employee) perspectives, an easy-to-follow metric
 - Management of per capita P&B costs may be a critical means of demonstrating progress
 - \$50,000 selected as a level in line with current costs and as a point where further increases in average costs would be viewed adversely by broader publics (OPG has crossed \$50,000)
- Additional metrics defined which may be used to better illustrate sustainability thresholds depending on stakeholder audience provided in Appendix A

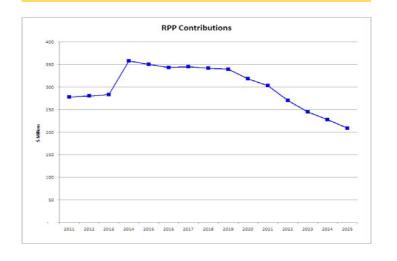

Notes:

(1) For purposes of the P&B Review, the terms "Operating Cash Flow Before CapEx" and "EBIT" above are determined before the direct financial effect of the P&B program costs (that is, they represent the value in the absence of P&B plans) – in OPG financials, these values are determined after adjusting for P&B program costs.

Approach to Building Stochastic Projection Model

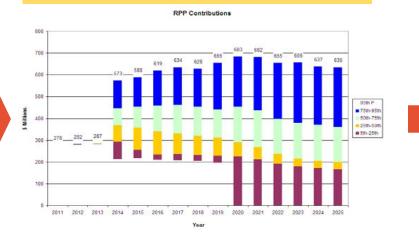

Basic Deterministic Pension Model (Business Plan)

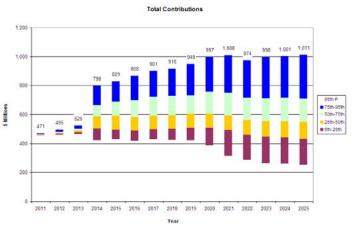

Alternative Deterministic Pension Scenarios

Stochastic Pension Forecast

Extend Stochastic Forecast to All P&B Programs

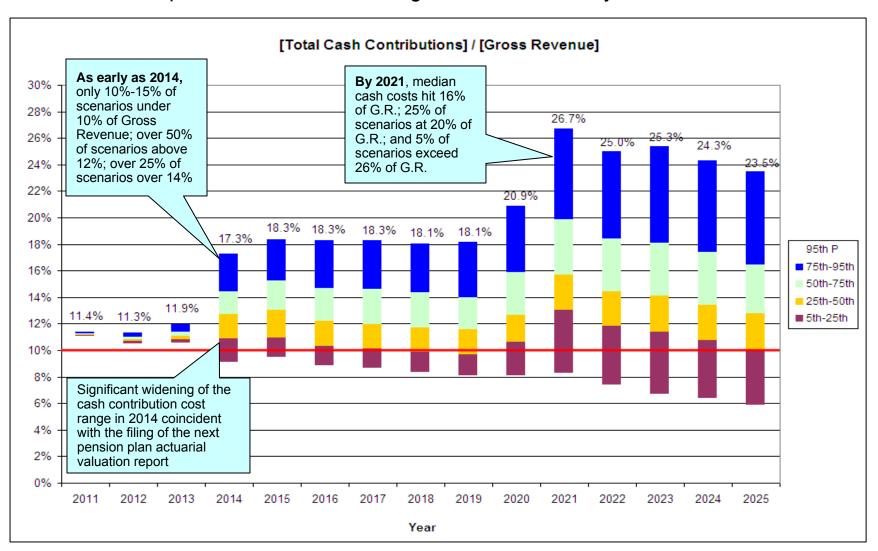

towerswatson.com

Filed: 2014-05-08 EB-2013-0321 JT2.12

Attachment 1 Page 6 of 21

Metric #1 – P&B Cash Should Not Exceed 10% of Gross Revenue

 Starting in 2014 (after next pension valuation), more than 75% of scenarios show cash contribution requirements above 10% of gross revenue each year

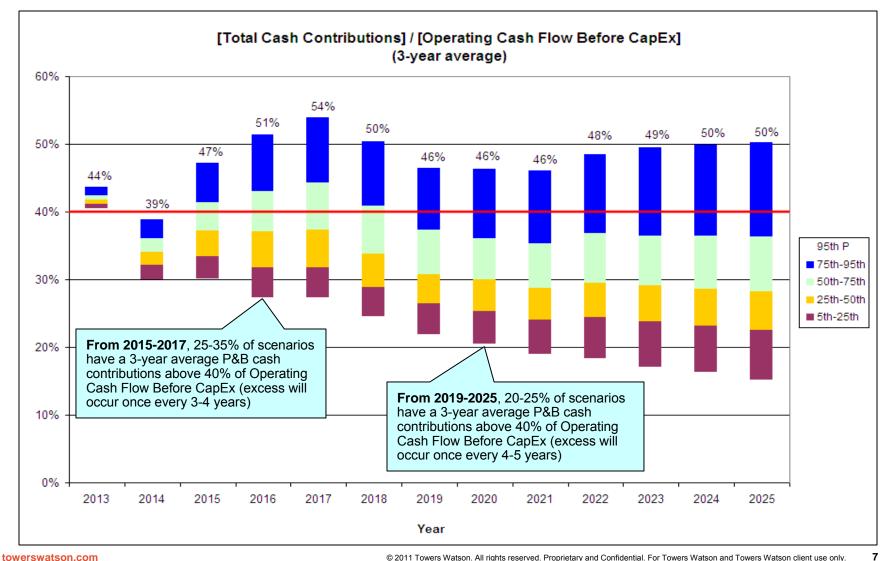

JT2.12

Attachment 1

Metric #2 – P&B Cash Should Not Exceed 40% of Operating Cash Flow Before €99 € xf 21

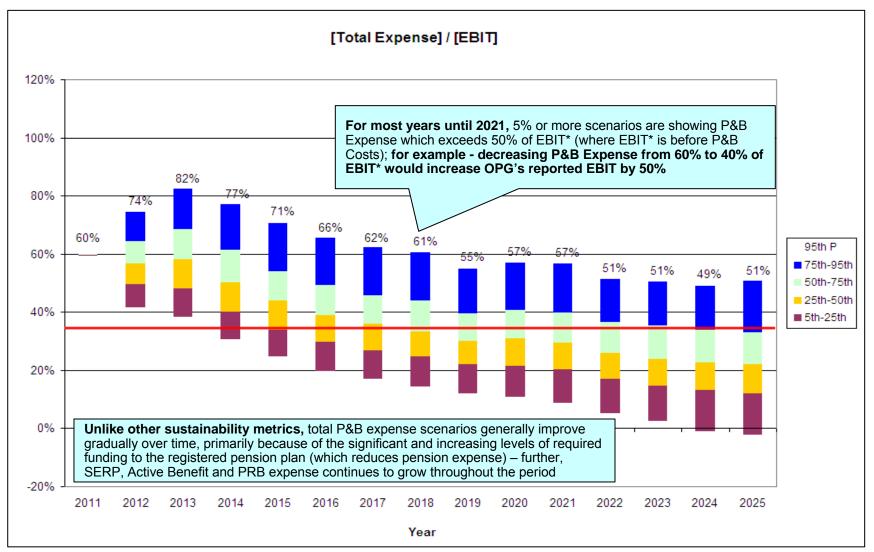

Cash contributions represents over 40% of Operating Cash Flow before CapEx in 20-35% of scenarios for entire projection period

Filed: 2014-05-08 EB-2013-0321 JT2.12 Attachment 1 Page 8 of 21

Metric #3 – P&B Expense Should Not Exceed 35% of EBIT

 Projected ratio of P&B expense to EBIT is expected to gradually reduce over time, primarily due to significant contributions to pension plan

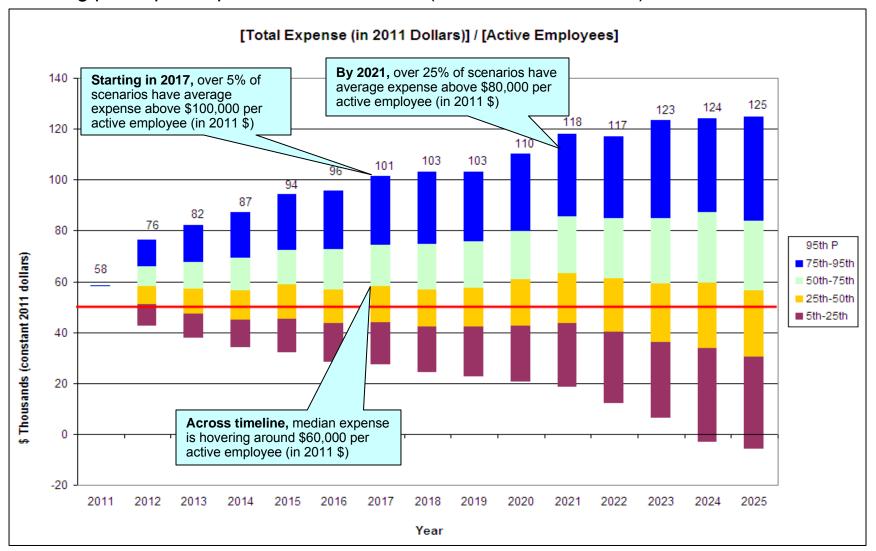

JT2.12

Attachment 1

Metric #4 – P&B Expense Should Not Exceed \$50K Per Active Employee (const?200915)

 Median per capita expense stays at \$60,000 for projection period, with 25% of scenarios having per capita expense above \$80,000 (constant 2011 dollars)

Page 10 of 21

Business Alternatives if Cost Thresholds Exceeded

 Non-P&B alternatives to address financial shortfalls were reviewed and found to be insufficient – certain options may provide short-term tactical relief

Alternative	Assessment/Impact on OPG's Business
Reduce Capital Expenditures	 CapEx includes sustaining and developmental expenditures (other than significant builds/refurbishments) – reductions would impair future power generation and/or value of OPG assets; not viable to reduce CapEx and deliver on OPG business strategy Supplemental CapEx funds would require OEB approval (cost borne by rate payers)
Obtain Additional Capital via Shareholder	 Notwithstanding a common belief by many employees and other stakeholders that the government will backstop all financial shortfalls at OPG, Ontario government has provided no explicit commitment for any such funding
Increase Level Of External Financing	 Potential adverse implications on OPG's credit rating (and total cost of credit) Credit rating agencies would expect increased levels of Free Cash Flow to maintain higher coverage ratios and support higher debt servicing costs (not in current OPG business plan)
Earn Better Fund Returns / Revise Pension Asset Mix	 Market movements and/or significant correction will not provide sustained financial support Asset mix changes to generate higher expected returns would significantly increase risk/volatility Incremental fund returns provides no relief for SERP, PRB and Active Benefits
Implement Workforce Reduction	 Longer term cash costs and expense can be reduced with reduced headcount; however, implementation costs usually exceed savings in the first year or two years Reduction programs constrained by collective bargaining agreements Limitation to total cost savings which can be achieved by workforce reduction before business is impaired (reduction of headcount in regulated segments also affects revenue)
Eliminate Certain Internal Non-Labour Programs	Limitation to total cost savings which can be achieved by reducing/eliminating internal non-labour programs (significant amount of re-evaluation already implemented)
OEB Rate Increase	 Roughly \$200M p.a. of additional revenue equates to roughly 70¢ increase in average monthly consumer hydro bill; OPG faces significant challenges in getting new OEB increases approved
Asset Sales / Service Spinoffs / Shutdown	 If counterparties exist, could sell/spin off certain services or power generation assets; significant asset sales/shutdowns will have workforce implications and will adversely affect future OPG revenue stream

Page 11 of 21

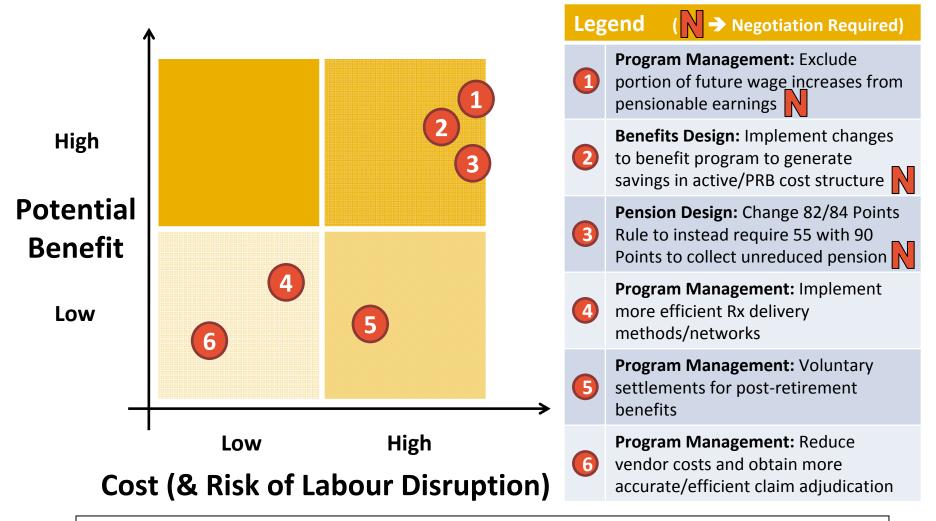

Recap of Current State

- A number of current cost levels exceed the thresholds which OPG views as necessary to maintain a sustainable business (across all key measures)
- The risk of costs escalating far beyond an affordable level is very plausible
- OPG is operating within a period of relative P&B cost stability until the next pension plan actuarial valuation report is filed in 2014
 - This provides a limited window to achieve selected changes in program management and plan design as the first phase of an overall strategy to reign in P&B costs
- Overall change strategy needs to recognize the reality of labour negotiation dynamics and related bargaining capital required for implementing changes
- Negotiation strategies and mandates must carefully evaluate impacts on P&B costs

Filed: 2014-05-08 EB-2013-0321 JT2.12 Attachment 1 Page 12 of 21

Pension and Benefit Interventions

Set of initial interventions analyzed/evaluated to assess their impact on sustainability

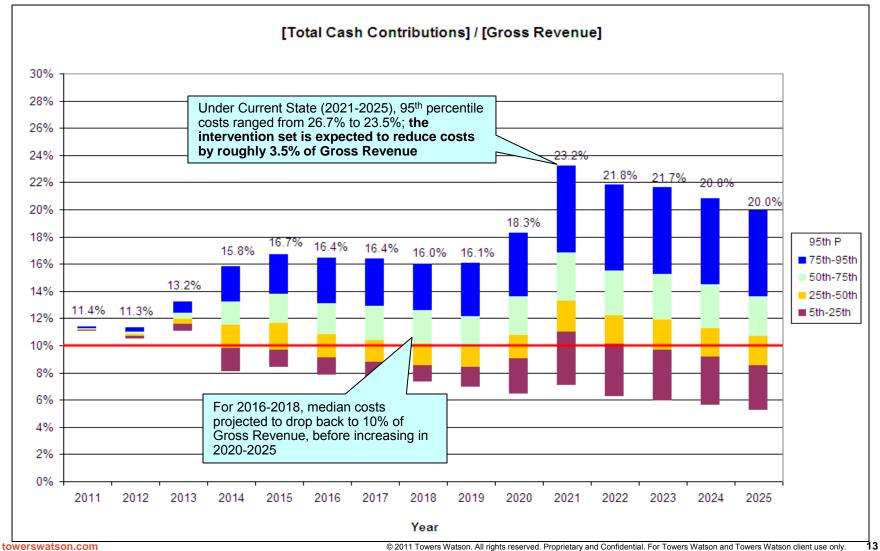

Notes:

For purposes of this phase of the P&B Review, all interventions were assumed to take effect January 1, 2013 in respect of past and future service for all members; in practice, certain provisions would need to be negotiated and/or may require notice to unions and members; grandfathering rules may also be required.

Filed: 2014-05-08 EB-2013-0321 JT2.12 Attachment 1 Page 13 of 21

Metric #1 – P&B Cash Should Not Exceed 10% of Gross Revenue (with Initial Interventions)

While 95th percentile cost ratio is still above 20% over long term, median costs are approaching the 10% level

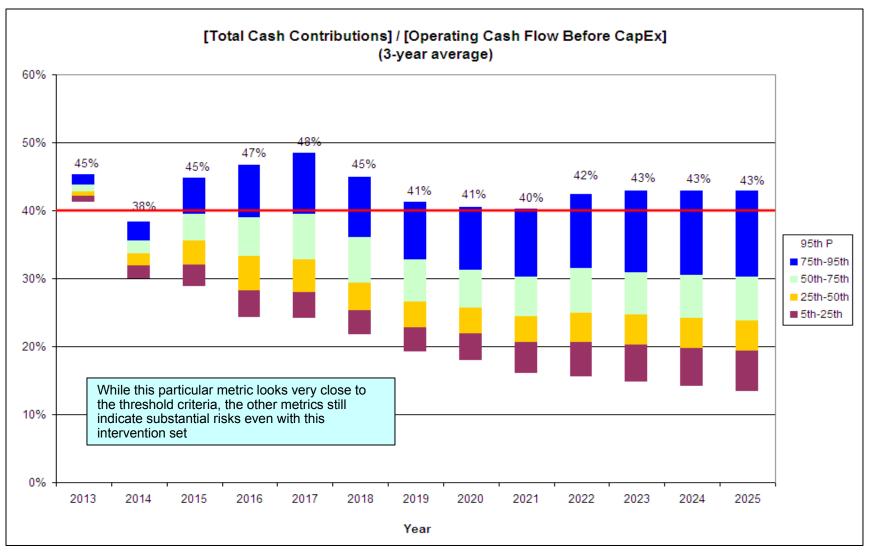

JT2.12

Attachment 1

Metric #2 – P&B Cash Should Not Exceed 40% of Operating Cash Flow Before (with Initial Interventions)

95th percentile ratios moved from 46-50% to 40-43% for most years

JT2.12

Attachment 1 Page 15 of 21

Dashboard and Assessment of Initial Intervention Set

- At 95% confidence, initial intervention set expected to generate cost reduction of 2-3% of Gross Revenue (5-7% of Operating Cash Flow Before CapEx)
- Further analysis required to augment intervention set

Next Steps

- Continue intervention evaluation through the sustainability model
 - Refine analysis of sustainability measures, thresholds, confidence levels and current state
 - Extend analysis to incorporate additional interventions with a view to identifying the most feasible set of interventions to maximize degree of sustainability
 - Estimate cost of execution for identified interventions
- Refine stakeholder management and education plan and integrate messaging with BTS
- Utilize the analysis and outcomes to influence longer term strategies
 - Coordinate sequencing, timing and impact of the three interventions within management control with other BTS initiatives
 - Inform BTS decisions around approaches to achieving staffing targets
 - Continue to manage Union attempts to improve programs over the long term
 - Use the three interventions which require negotiation to influence Labour negotiation strategy

Appendix A – Other Sustainability Measures to Monitor

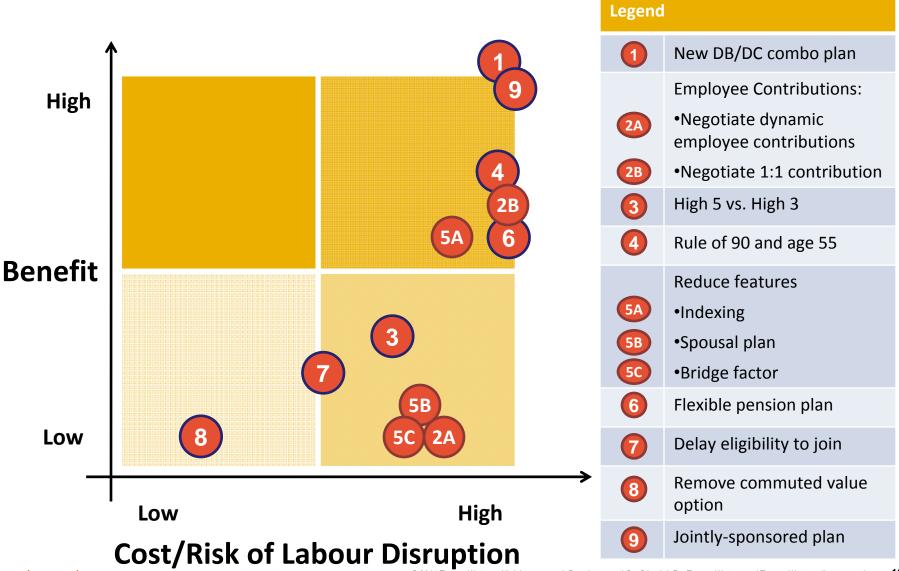

The following sustainability metrics will also be monitored and may be used in key stakeholder communications:

- P&B Cash should not exceed 100% of Operating Cash Flow after CapEx
 - Operating Cash Flow cannot be depleted after making for provision for CapEx and providing cash requirements for P&B
- P&B Expense should not exceed 60% of Payroll
 - P&B burden needs to be managed especially in conjunction with the management of overtime/etc.
- P&B Cash should not exceed \$6M per TWh
 - P&B program spending should remain in line with OPG's overall cost of power production
- Pension Windup Deficit should not exceed \$5B
 - Substantial portion of windup deficit is exempt from solvency funding under current pension law
 - Pension deficit represents a potential but crippling financial burden if the Ontario government removes current funding exemptions applicable to the OPG pension plan
- Annual pension plan contributions should not exceed 5x employee contributions
 - As OPG contributions exceed more than 5x employee contributions, significant concern that the basic cost-sharing relationship is impaired

Appendix B – Priority Matrix for Benefits Design Interventions

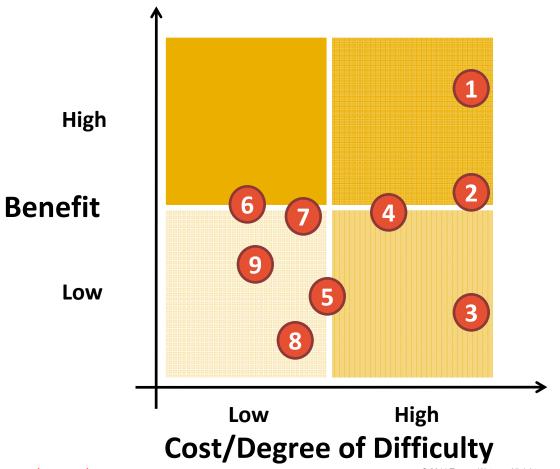

s reserved. Proprietary and Confidential. For Towers Watson and Towers Watson client use only.

Filed: 2014-05-08 EB-2013-0321 JT2.12 Attachment 1 Page 20 of 21

Appendix B – Priority Matrix for Program Management Interventions

- This is an initial prioritization, to be refined
- The scale for this matrix is different than used for the design interventions

Legend

- Exclude portions of future wage increases from pensionable earnings
- Increase prevalence of nonpensionable variable comp.
- Increase cost/risk sharing (e.g., consider JSPP)
- Voluntary settlements for postretirement benefits
- Voluntary settlements for disability income benefits
- Reduce vendor costs and obtain more accurate/efficient claim adjudication
- Implement more efficient Rx delivery methods/networks
- Aggressively manage the disability program
- Develop and implement a consumerism campaign

Page 21 of 21

Appendix C – Confidence Levels

- When interpreting the results of a stochastic forecast (i.e., a large number of plausible scenarios), it is necessary to establish a confidence level
- OPG selected a 95% confidence level as most appropriate measure for assessment
 - Threshold conditions were established at the highest level viewed as affordable for OPG
 - Therefore, occurrences of actual experience beyond the threshold must be minimized
- For example, confidence levels of:
 - 50% on average, one year in two would exceed the threshold
 - 75% on average, one year in four would exceed the threshold
 - 90% on average, one year in ten would exceed the threshold
 - 95% on average, one year in twenty would exceed the threshold
- Sustainability Team spent considerable time deliberating on appropriate confidence level
 - Impossible to absolutely ensure that cash/expense will stay within specified thresholds, but concluded that should P&B costs occasionally exceed thresholds and/or exceed by small amounts, these occasional excesses can be managed by OPG
 - Viewed to be less prudent to establish a lower threshold criteria
 - With this approach, OPG would face more-frequent adverse experience above that threshold
 - With a lower threshold, the potential size of any excess amount would also be larger, bringing potentially severe consequences to OPG

Notes to the Table:

- (a) Costs presented in the table are associated with OPG's EB-2013-0321 rate application.
- (b) Data for Historical Years (2010, 2011 and 2012) is consistent with Ex. F3-1-3, Table 1. Actual costs are shown for 2013 and projections are shown for 2014.
- (c) External Witness costs incurred in 2011 and 2012 are associated with studies and reports that the OEB, in its EB-2010-0008 Decision with Reasons dated March 10, 2011, directed OPG to complete. These studies and reports were completed in 2011 and 2012 as OPG had originally planned to file a rate application in 2012. The 2011 costs shown in the above table are \$70.0k higher than the number shown in Ex. L-6.9-1 Staff-134 due to accruals reversal on contracts not related to the EB-2013-0321 rate application.
- (c) OPG has interpreted the phrase "incremental operating expenses associated with staff resources allocated to this application" to mean expenses incurred by Regulatory Affairs that are beyond the Regulatory Affairs Department's approved budget. As indicated in the table, no such incremental expenses were allocated to this application.
- (d) Incremental operating expenses associated with other resources allocated to this application consist of projected Section 30 expenses. Some of these expenses were accrued in 2013 as the application was filed on September 27, 2013.
- (e) Intervenor costs are projections and some of these costs were accrued in 2013 as the application was filed on September 27, 2013.

JT2.14 Attachment 1 – List of Major Benchmarking (2010 – 2013)

	Name of Study	Timing	Author	Purpose
	•			•
1.	OPG Nuclear Benchmarking Reports	2009 - 2011	OPG /Scott Madden Management Consultants	To compare OPG Nuclear's performance to that of nuclear industry peer groups both in Canada and worldwide.
2.	Nuclear Staffing Benchmarking Analysis	2012	Goodnight Consulting Inc	To benchmark OPG nuclear staff levels against other North American nuclear operators.
3.	Uranium Procurement Program Assessment	2011	Longenecker & Associates	An external assessment of OPG's uranium procurement assessment.
4.	Corporate Executive Board General Counsel Roundtable Legal Department Spending and Staffing Benchmarking	2011		Internal review of comparative organizations to identify any gaps.
5.	Recharging Our Workforce	2011	Electricity Sector Council	To mitigate against a reality of the electricity sector in Canada losing 30% of its workforce between 2007-2012.
6.	Review of Dam Safety Program	2007- 2011	Dam Safety Advisory Panel	To provide: • External oversight of OPG's Dam and Public Safety Program; • An independent viewpoint into the strategic and operational risks and emerging issues regarding safety of OPG's dams; • Advice on priorities and opportunities of Dam Safety Program performance improvements.
7.	Hydroelectric Generation Benchmarking Program	on-going	Navigant Consulting Inc.	To provide: • Hydroelectric generation costs and performance reviews; • Opportunity to network, exchange experiences and discuss best practices.

Filed: 2014-05-08 EB-2013-0321 JT2.14 Attachment 1 Page 2 of 2

				Page 2 of 2
	Name of Study	Timing	Author	Purpose
8.	Hydroelectric Productivity Committee (HPC) Database Electric Utility Cost Group	on-going	Electric Utility Cost Group (EUCG)	HPC Database is used to derive industry statistics such as operating and maintenance costs as well generating units' performance. OPG position can be established relative to that. Numerical analyses are presented during workshops and used as background for discussing methodologies, business practices, equipment repair methods, etc.
9.	OPG IT Cost Benchmarking Analysis Reports	2010	Electric Utility Cost Group (EUCG)	To review compatible peer organizations to identify gaps in IT costs.
10.	Corporate Library Benchmarking Study	2010	Primary Research Group (PRG)	To review compatible peer organizations to identify gaps in documentation storage.
11.	Market Total Compensation Review	2010	Mercer	To conduct a total compensation review for the non-union employee populations (Bands A to L) for 2010.
12.	National Utility Compensation Survey	2013	Aon Hewit	Required by OEB. Submitted in 2013 OEB Evidence.
13.	Benefit Index Report	2012	Aon Hewit	To assess the value of the OPG salaried employee pension and benefits for the PWU group as compared to a norm of values of the salaries employee benefits program of 16 companies.

UNDERTAKING JT2.15

Undertaking

To confirm whether a report exists related to the IT benchmarking data, and provide it or explain why it will not be provided.

Response

EUCG (IT Chapter) is a voluntary group established to exchange data related to IT activities and costs. EUCG does not perform studies nor does it produce any reports for its member companies. It simply collects and disseminates the agreed raw data for its members.

OPG IT staff have analyzed and summarized IT Cost / Employee and IT Cost / GWh for the quartile information, which has been summarized in Ex F3-3-1, pp. 6 – 8 and Ex L-6.9-2 AMPCO-064 c), but has not completed a report related to the information contained at these references. OPG has completed an IT benchmarking report for 2010, which is provided as Attachment 1 to this response.

JT2.15 Attachment 1 Page 1 of 42

Final OPG IT Cost Benchmark Analysis - 2010

BS&IT – Programming & Performance Improvement

Filed: 2014-05-08 EB-2013-0321 JT2.15 Attachment 1 Page 2 of 42

Interpretation of Reported Trends

	Q1	Indicates OPG is at or within first quartile (<= 25 percentile)
2010 OPG	Q2	Indicates OPG is at or within second quartile (<= 50 percentile)
Ranking / Position	Q3	Indicates OPG is at or within third quartile (<= 75 percentile)
	Q4	Indicates OPG is within fourth quartile (> 75 percentile)
2009 vs. 2010 OPG Performance	Ĵ	Indicates an increase in OPG's cost/service performance compared to previous year
	t	Indicates a decrease in OPG's cost/service performance compared to previous year

Page 3 of 42

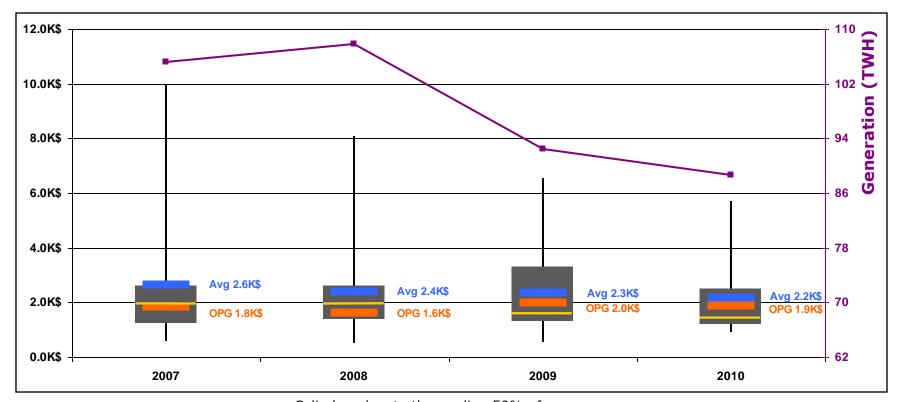

IT Benchmark Methodology

- 2007-2010 year-over-year analysis compares key IT metrics (i.e. IT Spend Per GWH and IT Spend Per Employee) against EUCG peers
- Conversion rates are based on Bank of Canada's year average of exchange rates
- OPG data is excluded from the average and quartile calculations
- EUCG data is confidential and for EUCG member use only.

2010 Peer Group

- 2010 peer group is composed of the following North American utilities:
 - Center Point Energy
 - Energy North West
 - New Brunswick Power
 - Omaha Public Power District
 - Oncor
 - Pacific Gas & Electric
 - Pennsylvania Power & Light Corp
 - Progress Energy
 - Southern California Edison
 - Tennessee Valley Authority

JT2.15 Attachment 1 Page 7 of 42

IT Spend

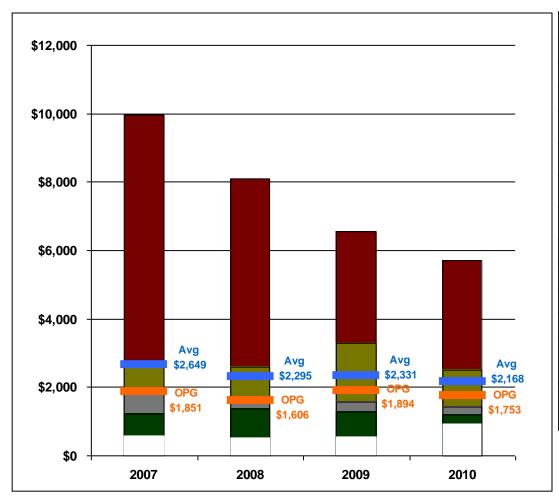

- Some IT costs were excluded to better achieve an apples-to-apples comparison. Below are some exclusions per EUCG IT Data Dictionary such as:
 - Floor space and furniture associated with the IT function
 - Process and simulator computing support
 - Remote access, SCADA network, cellular phones, radio and paging systems, whether or not part of IT organization
 - Document and records management operations (non-IT costs)
- Cost components of EUCG IT Spend include:
 - Labour Costs
 - Hardware & Software Maintenance Expenses and Depreciation
 - Circuit Costs
 - Outsourced Costs and
 - Decentralized Costs

UNDERTAKING JT2.16

Undertaking

To confirm whether a report exists related to the electricity utility HR metrics data, and provide it or explain why it will not be provided.

Response

There is no "HR Metrics" study or report.

The Electric Utility HR Metrics Group referenced at Ex. F3-1-1, pp. 14 - 15 benchmarks HR Functions across utilities based on a standard definition of the function. OPG participates in this HR benchmarking annually and submits data electronically. The raw data from all of the submitting organizations is then summarized and provided to the participating organizations along with some high level analysis.

The summary allows participating organizations to review the data and report any errors in the data or analysis. Reported errors are then corrected in the raw blinded data and participating organizations are given access to the updated database. Participating organizations are then free to use the data in the system in any way they deem to be useful / appropriate.

Corrected: 2014-06-11 EB-2013-0321 JT2.17 Page 1 of 1

UNDERTAKING JT2.17 1 2 3 **Undertaking** 4 5 To make best efforts to provide information on how BT savings integrate with drivers of 6 the deficiency. 7 8 9 Response 10 11 OPG cannot readily break out BT savings, which are primarily headcount related, into 12 the categories shown in the drivers of deficiency charts. 13 14 However, OPG estimates that the test period savings attributable to targeted headcount 15 reduction of 1,300 by the end of 2015 for regulated operations, to be approximately \$337M (\$150M in 2014 and \$187M in 2015) as shown in Ex. JT2.10. As most of OPG's 16 17 staff support the nuclear business, OPG expects that most of these savings would be 18 reflected in the nuclear deficiency.

Filed: 2014-05-02 EB-2013-0321 JT2.18 Page 1 of 1

UNDERTAKING JT2.18
<u>Undertaking</u>
To advise what percentage of the 10,375 headcount appears on the sunshine list.
<u>Response</u>
There were 7.050 ODC ampleyees reported in the 2042 Dublic Contan Colomy Displayers
There were 7,958 OPG employees reported in the 2013 Public Sector Salary Disclosure list.
iiSt.
7,958 / 10,375 = 77%
7,0007 10,070 1770
Note that 10,375 is OPG's headcount target at year end 2016 and relates only to regular
employees from ongoing operations, while 7,958 is a historical number as of year-end
2013 and relates to all employees of OPG.

Filed: 2014-05-02 EB-2013-0321 JT2.19 Page 1 of 1

UNDERTAKING JT2.19 1 2 3 **Undertaking** 4 5 To provide a reconciliation of the OPG sunshine list with the people actively employed 6 by the company at the time the list was produced. 7 8 9 Response 10 11 OPG has provided the requested reconciliation in the attached list which identifies 12 employees who were reported under the 2013 Public Sector Salary Disclosure Act and 13 are above \$200,000. The attached list indicates employees who are no longer with OPG 14 with an asterisk. 15 As of April 24th, 2014, 471 employees who were reported under the 2013 Public Sector 16 Salary Disclosure Act are no longer with OPG. 17 18 19 As of April 24th, 2014, 39 employees who were reported under the 2013 Public Sector Salary Disclosure Act AND above \$200,000 are no longer with OPG. 20

JT2.20

Attachment 1 Page 3 of 7

Four Steps to Initiating Centre-Led Org

Step 1: Leadership Selections Confirmed and Announced to SLT March 5th - March 20th Step 2: Launch Top Level Organization and Leaders to Everyone March 29 to April 13th (April 5th Announcement) Step 3: Prepare
Directors/Managers
(non-union staff) on
the "What" Organization
Structure and Plan
April 10th to April
30th

Step 4: Roll out to Employees on the What - Organization Structure and Plan

Date to be determined

Filed: 2014-05-02 EB-2013-0321 JT2.20

Attachment 1 Page 4 of 7

Step 2: Launch Top Level Organization and Leaders to Everyone

Timeframe: March 29th — April 13th

Objective	Tactic	Owner	Timing	Topic Areas
Finalize BU Communication Plan: Affected Team Member Discussions		HR Partner to support ELT and Builder (Support from Change & Comms)	March 27 th	•Detailed BU communication plan for affected team member discussions (see slide 5)
Custom BU Plan for Affected Team Members: Communication to directly affected team members Principles: Communicate to directly affected team members before the announcement (Mon/Tues) Current leader owns the communication to their team, followed by the new leader If no individual is impact, say that and tailor cascade accordingly	1x1's Refer to Key Messages Document	Current SLT member to impacted team leads and teams New Leader Follows up	Thurs- Wed March 29 th – April 4 th	•Concept of a Centre-Led Organization •New leaders that have been appointed to the new centre-led structure •Starting to align teams under new centre-led function •Organization will transition to the centre-led organization in May •What is changing for them •What is not changing •The resources and teams supporting operations or plants; •Accountabilities of teams at this point in time are not changing. Employees will continue to perform the same job duties they were performing before this change. •For employees who are part of a team transitioning to centre-led, there will be no change to their accountabilities, their direct manager, or their work location. • As we continue to define and refine the change initiatives to help OPG become more efficient and effective, we will work with employees and their representatives. •Announcement will be sent from Tom Mitchell on April 5 th •New Leader will follow-up with you •What you can say to your teams right now •Ask to keep this information confidential

Filed: 2014-05-02 EB-2013-0321 JT2.20 Attachment 1

Page 5 of 7

Customer BU Plan: Affected Team Leader Discussions

Developed by HR Partner to support ELT and Builder (support from change/comms)

Communicate to people directly impacted: Mar 29th - Apr 4th

- Current leader talks to direct reports/leaders who are transferring out
- New Leader talks with new direct reports/leaders who are transferring in
- •Current L2's talk to current direct report team about changes to the team: leadership changes if any, team changes
- Transferring leaders talk to their immediate teams (not extended teams yet, unless they are small and will feel the impact. Keep discussions with broader teams/union staff to closer to announcement)

Announcement - Apr/5th

Follow-up with organizations post announcement: Apr 10th-13th

- New L2 Leader communicates with direct report team
- New L2 communicates with extended team (email/group meeting)
- L3/L4's to their teams on what it means where appropriate

Note: Communication prior to announcement should focus on those directly impacted, not extended organizations until post announcement. Communications with represented staff prior to announcement should be limited to staff who will be directly impacted as a result of the change.

JT2.20

Attachment 1 Page 6 of 7

Step 2: Launch Top Level Organization and Leaders to Everyone

Timeframe: March 29th - April 13th

Objective	Tactic	Owner	Timing	Topic Areas
Discussion with Senior Union Leaders	Meeting	Jason	April 2 nd	Overview of communication materials and April 5 th announcement
Follow-up with Chief Stewards/UD's	1x1	Comms Owners (TBD)	April 3 rd and 4 th	Key messages from the April 5 th announcement
Announcement of new organization	Email Website Org Charts EE Q&A Submit questions	Tom	Thurs Apr 5 th	Concept of Centre-Led Organization Structure and the significant functional organization changes What is changing and what is not changing Brief overview of quick wins/early implementation initiatives Next steps
BU/Function Announcement	Email Template will be provided	(Support from Builder, Comms, Change)	Post April 5 th Announcement	•Reinforce Corporate key messages (provided in template) •Thank teams that will be transferring out of the BU and highlight benefits now they are apart of centre-led and the continued support •Welcome teams that will be transferring in to the BU/function and highlight benefits now they are apart of centre-led and the continued support •Announce changes within the BU/function •Announce any new L3 roles •Thank leadership team who will be driving this transition forward •Provide an overview of BU specific quick wins/early implementation initiatives •Remind people again of the importance of delivering a strong 2012 business plan, deliver the commitments and continue to ensure safe, reliable operations and strong project execution
Custom BU Plan: Leaders communicate more broadly to teams	Email/ Meetings Refer to Key Messages Document	Current SLT Member New SLT Member	W/O Apr 10 th - 13 th	Reiterate what is changing The resources and teams supporting operations or plants; Accountabilities of teams at this point in time are not changing. Employees will continue to perform the same job duties they were performing before this change. For employees who are part of a team transitioning to centre-led, there will be no change to their accountabilities, their direct manager, or their work location. As we continue to define and refine the change initiatives to help OPG become more efficient and effective, we will work with employees and their representatives. Organization will transition to the centre-led organization in May. 6 Deliver a strong 2012 business plan, continue to deliver the commitments, and continue to ensure safe reliable operations and strong project execution.

Step 3: Prepare Directors/Managers on the "What" Organization Structure and Plan (New L2 Leaders Team Meetings with Dir/Mgrs)

Timeframe: April 10th – April 30th

Objectives:

- · Provide an overview of the OPG top level organization design and the benefits of moving to centre-led model.
- Overview of ALL L2 organizations by function/business unit, with a focus of key BU dependencies.
- Overview the May transition organization for the specific function, and early initiatives the function/BU will be working on
- Provide an opportunity to dialogue about what is changing, the implications, next steps and their role.

Format: Presentation/Custom design based on Business Unit/Function requirements

Employee Cascade Implications:

- Cascade may happen for employees after PWU ratification or once ELT/L2's are notified this can happen
- In the meantime, generic Q&A for all employees and key messaging will be provided online at the time of announcement

Support: Change Support will partner with Builders and Communications to support the rollout

Common Content Areas:

- Integrated Model, Centre-led
- Top level organization structure
- L2 structure by Function/BU
- Benefits of the change
- Phases and status of the change

Custom Content Areas: by Business Unit / Function

- Overview to April transition org for specific function
- Address key BU dependencies
- Discuss early initiatives
- What is changing/Not & next steps
- Benefits of the change

L2 Specific Details: (customized by L2 leader)

- L2 initiatives
- What it means for a specific team
- Key next steps and actions

[2]

Welcome

As one of our leaders, you play a critical role in transforming our business. With your continued support, we can involve employees in making sustainable change that will build a strong future for OPG.

Our Values and Behaviours define the culture we need to be a high performing organization and achieve our Mission to be Ontario's low cost electricity generator of choice. I have said that our transformation is 90% cultural, and it will take each one of us to make a difference. Shifting our culture means everyone shifting his or her behaviours. It starts with ourselves, first and foremost. Many of you have started to take action. You may be wondering what is expected of you in a leader role to impact culture change? I have three calls to action:

- First Be a role model. Demonstrate our Values and Behaviours in your day-to-day work. Understand that the expectations that people have of us as leaders is to walk our talk. Be humble, we will not always get it right but we need to be transparent on what we are learning and clear a path for others to do the same.
- Second Build understanding with your team. Help your employees understand what our Values and Behaviours mean in their daily work. Have conversations with them. Point out examples and share stories of your team putting them into action.
- Lastly Tell me what you need from me to make this culture change. What barriers or roadblocks are you facing in making this change and where do you need my help to make the Behaviours stick? Please share your ideas by sending me an e-mail.

Use this leader's guide to support you in my call to action. Let's transform our culture and collectively make our Values and Behaviours the way we do things at OPG.

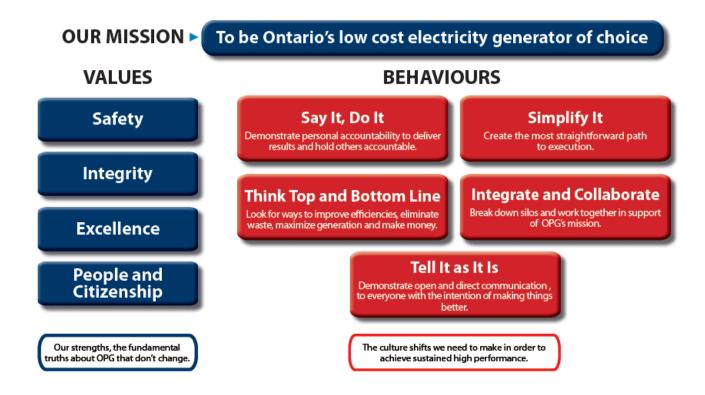

[3]

Mission, Values and Behaviours

Our Mission is to be Ontario's low cost electricity generator of choice. Safety, Integrity, Excellence, People & Citizenship are our OPG Values. They are the fundamental truths about OPG that don't change. They are our strengths that guide our behaviour and decision making, and point the way to business conduct that results in successful individuals and a successful company.

Our Behaviours are the cultural shifts we need to make to be a high performing company and continue to deliver on our Mission. These Behaviours – Say It, Do It, Simplify It, Think Top and Bottom Line, Integrate and Collaborate and Tell it As It Is – strengthen and support OPG's Values and are essential to making sustainable change at OPG.

As we transform our business, demonstrating the OPG Behaviours is critical to achieving sustained change. This guide emphasises our Behaviours, and provides ways each of us can make them real and everyday.

Behaviours Descriptions

OPG Behaviours for All Employees at OPG clarifies the expectations regardless of our role, job or group.

OPG Behaviours

the way all employees do things around here

Below are the behaviours expected from all employees regardless of role, iob, or aroup - they quide all of us at OPG.

Say It, Do It

Demonstrate personal accountability to deliver results and hold others accountable.

- · Deliver on commitments with a consistent focus
- on safety and quality.

 Expect others to deliver on their commitments and results.
- Surface issues and identify problems in a timely manner and recommend solutions where required.
- Own mistakes and failures, and learn from them to improve the next time.
- Understand the risks and implications of decisions and actions: ask if you don't know

- · Compromise safety requirements, or eliminate the safety verification process.
- Blame others instead of owning mistakes.
- Work around people who aren't delivering on their commitments.
- not delivering on a commitment.

Simplify It

Create the most straight forward path to execution.

√ IT IS

- · Simplify work practices and procedures within your control; input to simplify ones that aren't.
- · Identify issues, barriers or perceived low value work within processes or procedures and where possible suggest solutions.
- Influence and challenge the status quo when something doesn't make sense, or is overly

X IT ISN'T

· Compromise or sacrifice quality or

Think Top and **Bottom Line**

Look for ways to improve efficiencies, eliminate waste, maximize generation and make money.

- Identify ways to do things better and more efficiently.
- Understand there is a limited amount of money, and act accordingly
- Recognize that all the small costs add up to a larger overall cost.
- Understand how your actions and decisions impact operations
- Understand the challenges of our industry and what it means for OPG

X IT ISN'T

- Behave as if there is an endless pot of money and time.
- Spend money and time on "Nice to haves" vs. "Need to haves".

Integrate and **Collaborate**

Break down silos and work together in support of OPG's mission.

√ IT IS

- Work collaboratively to problem solve issues, work through conflict and learn together.
- Keep others informed and ensure quality handoffs and knowledge transfer.
- Consider the impact of actions and decisions on others within and beyond the team
- · Proactively build strong working relationships across teams and geographies.

X IT ISN'T

- Operate in silos Behave with an "Us" vs. "Them"
- mentality. Perform tasks in isolation of the
- bigger picture and team. Build your own solution without
- considering others' needs and impact to others.
- Solely rely on email as a key means to build working relationships.

Tell It as It Is

Demonstrate open and direct communication to everyone with the intention of making things better.

- Speak the truth in a constructive, factual and respectful manner, without blame or judgement.
- Receive feedback openly from peers, direct reports and bosses.
- Deliver both good news and bad news
- Respectfully call out others on inconsistent

X IT ISN'T

- Avoid difficult discussions
- · Use a process or procedure in place of a difficult discussion
- . Use silence as a way to disagree.
- Be defensive.
- · Talk behind others' backs.

VALUES

Safety • Integrity • Excellence • People & Citizenship

April 2013

Behaviours Descriptions (cont.)

Building on the Behaviours for All Employees, there are leader expectations for those in the role of FLM/Supervisor.

OPG Behaviours

the way flm/supervisors do things around here

Building on the **all employees** behaviours, below are the added expectations for those in the critical role of **flm/supervisor** at OPG.

Say It, Do It

Demonstrate personal accountability to deliver results and hold others accountable.

√ IT IS

- Set clear expectations, observe work execution provide feedback on performance.
- Hold others to their commitments and results, recognize when they deliver, and challenge when they don't.
- Ensure staff have the appropriate decision authority aligned to their role.
- Provide input to decisions, and once a decision is made, own and support the decision, and execute the plan of action.
- Plan and organize work to ensure that work is completed efficiently, and monitor for timely and accurate completion.

X IT ISN'T

- Make commitments that you cannot keep.
- Do others' work rather than hold them accountable.
- Create governance for everyone to follow because a few people aren't delivering.

Create the most straight forward path to execution.

√ IT IS

Simplify It

- Work to change procedures that are perceived as barriers or low value work for staff.
- Ask your staff only for the work necessary to get the job done; eliminate work that isn't.
- Acknowledge and empower skill of the craft/discipline where it makes sense rather the set procedures.

X IT ISN'T

- Be more prescriptive than required.
- Create governance or procedures to address an exception, where there is low risk, or in response to an individual mistake.

Think Top and Bottom Line

Look for ways to improve efficiencies, eliminate waste, maximize generation and make money.

/ IT IS

- Operate within your means, including budget and resources.
- Be conscious of your team's productivity and take action to make it better.
- Understand and demonstrate the importance of valuing and developing people.
- Understand what it takes to maintain OPG's license to operate within each of our communities, and take actions accordingly.

X IT ISN'T

- Cut corners that may lead to safety or other unacceptable risks.
- Spend too much time and effort on things that have very little benefit.

Integrate and Collaborate

Break down silos and work together in support of OPG's mission.

/ IT IS

- Actively work with and involve the right people in decisions and solutions affecting them, sharing early and often.
- Break down silos to promote cross-team cooperation.
- Define success in terms of the whole team.
- Be visible and demonstrate that you are approachable in day-to-day interactions with others

X IT ISN'T

- Place your responsibility for making difficult decisions on others.
- Refuse to make a decision until consensus is achieved.

Tell It as It Is

Demonstrate open and direct communication to everyone with the intention of making things better.

√ IT IS

- Take responsibility to speak up.
- Confront the brutal facts and sensitive issues early on.
 Be open and honest about what you can and
- Be open and nonest about what you can and can't say.
- Promote two-way discussion and test for buy-in and understanding.

🗶 IT ISN'T

- Sit on bad news, sugar coat the message.
- Use feedback as an excuse to be rude or disrespectful to others.
- Manage conflict or difficult situations by email.

VALUES

Safety • Integrity • Excellence • People & Citizenship

Ways to Get Started

- Provide your team with copies of the All Employee What It Is and What It Isn't.
- Discuss what it means to demonstrate them in your work group.
- Build them into your meetings (formal and informal), and share examples of the Behaviours you see. Repeat often.
- Ask your team to share their ideas on practical ways to stay focused on the Behaviours in their daily work.

Filed: 2014-05-02 EB-2013-0321 JT2.22 Attachment 1 Page 6 of 16

[6]

Your Role Expectations—Lead the Way

The things you do every day with everyone you deal with are opportunities to demonstrate our Values and Behaviours. Our Values are a source of pride from OPG, and as a leader, demonstrating this pride and continuing to live the Values are important to lead the way. Our Behaviours require us to change – employees, peers and others will watch if you are demonstrating the Behaviours and reinforcing them with others. If we all do our part, collectively we will role model what is important for how we do things at OPG.

How Can You Lead the Way?

1)	By how you break it down	Have you broken down what the Behaviours mean in your team's day-to-day work, and what they can do to demonstrate the Behaviours?
2)	By how you make decisions	Do your decisions align with our Values and Behaviours?
3)	By what you talk about and the questions you ask	Do you ask questions that invite open discussion of issues and opportunities and do you reinforce the Values and Behaviours in your discussion?
4)	By your reactions to critical incidents	Do you stick to our Values and Behaviours when under stress and dealing with issues?
5)	By what you recognize	Do you recognize people who are demonstrating our Values and Behaviours?
6)	By your pride	Do you demonstrate your pride in the job well done and in working for OPG?

Tools You Can Use

The tools in this guide are designed to be used in two ways:

- On your own, to reflect on the leadership impact you are making in modeling our Behaviours.
- With your team/crew to build their understanding of what our Behaviours mean and involve them on how to implement the Behaviours in their daily work.

It is recommended you begin with using the tools to reflect personally on how you are demonstrating the OPG Behaviours and then use the tools with your team/crew.

The OPG Behaviours tools are:

- 1. Progress Check check in on progress for making the Behaviours the way we do things at OPG.
- 2. What it Looks Like recognize and call out our Behaviours in action.
- 3. **Conversation Generator** have positive and meaningful team conversations about what the Behaviours mean.
- 4. Embed in Your Work Programs link the Behaviours and actions required for work program success

Page 7 of 16

OPG Behaviours: Embed in Your Work Programs

Your work programs are a practical way to ensure our Behaviours are incorporated into our day-to-day work. Use this tool when you are leading a project, change, business initiative, or process improvement. This simple assessment will help you to determine what OPG Behaviours are critically important for success in your work program and what you need to do to ensure they are demonstrated.

Name of Work Program

(i.e. project, change, business initiative, process improvement)

Using the rating scale and gauges below, assess what impact you think each OPG Behaviour has on the success of your work program.

 From your assessment above, prioritize what 1-2 OPG Behaviours are most critically needed for the success of your work program.

Behaviour 1: Behaviour 2:

- 2. Where are there gaps in demonstrating these Behaviours? (refer to OPG Behaviours, What it Is and What it Isn't)
- 3. As the leader, what do you need to do differently on the Behaviour(s) to address the gap?
- 4. For others important to the success of this work program, what do they need to do differently to address the gap?
- 5. How will you know you have achieved the Behaviours needed for this work program?
- What needs to be in place to ensure you achieve the Behaviours? (i.e. agreed upon measures, feedback process, monitoring, reinforcing communication, training, etc)

2013 Corporate Balanced Scorecard – Project Performance Measures (Revised Jan 20, 2014)	Threshold	Target	Maximum	Projected Y/E Results	YE Score (Below /Target/Above)
				2013. (Maximum) Achieved > 1	
D. Start of Mock-up Construction (date)	July 30	July 15	June 15	month ahead of plan. (Maximum)	
E. Scope Definition—All Approve Darlington Scope Requests <= Health of Scope 20 (Note 4)	Dec 31	Dec 2	Nov 15	All approved Darlington Scope Requests <=Health of Scope 20 achieved by November 15 (Maximum)	

Notes:

- 1. For these projects with multiple components, the entire project takes the score of the lowest performing component
 - If any of the tasks are below Threshold, the project does not meet Threshold
 - All tasks must be at or better than target to achieve target. If any task is below target, the project takes the score of the lowest performing task.
 - All tasks must be at or better than maximum to achieve maximum. If any task is below maximum, the project takes the score of the lowest performing task.
- 2. Threshold achievement for Niagara and Atikokan will be based on the October month end EPC contractor forecasts
- 3. Includes formwork, rebar and concrete pour, but does not include shoring removal.
- 4. Exceptions (approved by the EVP Nuclear Projects) are allowed for the following: Scope resulting from planned inspections or analysis scheduled during or after 2013, i.e. scope resulting from scheduled inspections in the 2015 VBO outage. Any new scope approved by: The Darlington Refurbishment Scope Review Board during or after 2013. Any new scope resulting from the CNSC's review and approval of the EA or ISR. "Approved" Darlington Scope Requests require approval by the Darlington Refurbishment Scope Review Board.
 - The following are the Health of Scope definitions (note the lower the score, the scope is better defined):
 - o 90 Scope will not be executed in Nuclear Refurbishment, DSR will be removed pending PSRB approval
 - o 60 Pure engineering or procedures with no likely field work (i.e. provide CNSC with reports, update procedures, etc)
 - o 50 Assessment is required to build a report for analysis
 - 40 Analyze the completed report to determine actions / path forward
 - 30 Actions to implement selected, may be a component strategy across many systems
 - o 20 Work is known at the system or project level but not component
 - 10 Work is known at the component / MEL level
 - o 5 DSR is adequately known such that it is ready for Work Order to be input on all Units
 - 4 All Work Orders input for DSR on all applicable Units or all work completed for DSR.

ACTIONS - PLANNED AND UNDERWAY	Planned Completion Date	Actions in Response to AG Report	Associated Cost Savings
Executive and Senior Management Staffing Levels			
 Decrease senior management headcount in proportion to overall headcount reductions. (Reduced by 6% since Dec. 2012). 	2016		
New senior executives continue to receive lower compensation than their predecessors;	Ongoing		
Hiring of all director and above positions will require CEO approval.	Ongoing	✓	N/A
Reduce headcount by a further 830, for a total reduction of 2,330 and \$1B savings by 2016.	2016		
Benchmarking of Staffing Levels at Nuclear Facilities			
Business plans to define continuing actions to move from current 8% over benchmark to benchmark (down from 17% over in Feb. 2012).	2016		
CNSC and other external peer groups confirm OPG continues to ensure strong nuclear safety and operational performance.	Ongoing		
NEW: Update benchmarking results to measure against changes relative to industry.	Q4 2014	•	N/A
NEW: Staffing level imbalances in Nuclear will be addressed through business transformation, business planning, redeployment and expected attrition.	2015/16	1	No estimate available

Filed: 2014-05-08 EB-2013-0321 JT2.26 Attachment 1 Page 2 of 4

Recruitment Practices and Requirements			
Centralized recruitment function to improve controls, compliance and efficiency of hiring processes.	Complete		
Amend Code of Conduct to clarify expectation regarding hiring policies. Failure to follow policy will result in disciplinary action.	Q1 2014		
Conduct compliance reviews for internal/external vacancies.	Ongoing	✓	N/A
Reviewed all groups with same addresses to ensure valid hiring process was followed.(reviewed 284 files from 2011, 2012; no documentation retained for others beyond two years; found 4 cases without proper documentation.)	Complete	•	N/A
Compensation and Incentive Awards Implement outcomes of government legislation to regarding broader public sector executive compensation.	Contingent on government legislation		
Reduce headcount by additional 830 for total reduction of 2,330 and \$1B savings by 2016 (already achieved 1,500 reduction since Jan. 2011);	2016		
Reduce all management AIP for 2013 by 10%. Board to review AIP program for 2014 and beyond	Q1 2014	1	\$2.7M due to 2013 reduction
Continue to seek collective agreements that reflect OPG business objectives and government compensation constraints.	Ongoing		
Reduced base salary costs for management by 9% compared to 2010.	Completed. Further reductions ongoing		
NEW: Management staff mandated to enter performance objectives into the electronic system that allows for compliance monitoring.	Completed	✓	N/A

Filed: 2014-05-08 EB-2013-0321 JT2.26 Attachment 1 Page 3 of 4

 Employee Housing and Moving Allowance Adopt Ontario Public Service Relocation policy for management employees. Conduct review of practices and controls related to employee relocation, including a review of practices for guarantee house values. 	Q1 2014 Q1 2014	1	No estimate available N/A
 Review OPS relocation policy against collective agreements to determine what if any changes are required. 	Coterminous with collective bargaining	✓	N/A
Security Clearance Requirements Review security clearance requirements for non-nuclear employees to	Q1 2014		
ensure appropriate levels in place.			
Implement enhanced compliance monitoring method.	Q3 2014	✓	N/A
 Implemented controls to ensure immediate security clearance compliance for new hires and ongoing compliance for existing employees. 	Complete	•	
 CNSC, CSIS audits validate that OPG has an industry-leading nuclear security clearance program. All employees who require access to nuclear site or sensitive nuclear information have appropriate clearance. 	Complete		
All board members at the time of the AG audit now have security clearance.	Complete	✓	
Pensions and Benefits			
 Begin implementation of Board directed management pension and benefits reforms. 	Q1 2014		
Participate in Province's review of electricity sector pension plan reforms.	TBC – dependent on Ministry of Finance		
 Any changes to pension and benefits for unionized staff will be a matter for future rounds of collective bargaining. 	Coterminous with collective bargaining

1 <u>UNDERTAKING JT2.28</u>

2 3

Undertaking

To provide available information on savings resulting from adoption of 24-month window for filing dental and health claims.

Response

OPG expects to save approximately \$20k per year in reduced administration costs related to the processing of claims greater than two years old. Older claims are more difficult and time consuming to process.

In addition, OPG expects to realize cost savings associated with the adjudication and grievance/arbitration processes. Claims greater than two years old often do not have all of their required documentation, due to the lapse of time. This results in a challenge to the claim which then has to be adjudicated.

Furthermore, limiting the claim window to two years also reduces OPG's risk of fraudulent claims and brings OPG in line with the practices of other companies.

While the estimated cost savings associated with tightening the Health and Dental claim window are not large, there is still value to OPG in doing so.

UNDERTAKING JT2.29

Undertaking

To make best efforts to provide information on savings resulting from change from five to four consecutive sick days permitted without medical follow-up.

Response

Based on the transcript at page 145, lines 19 - 27, the undertaking was actually to provide a graph, not "information on savings."

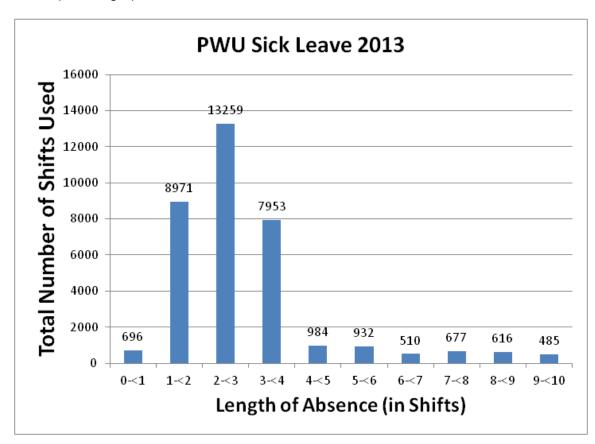

MR. CROCKER: Okay. Can you provide the same graph, or the same type of graph since you have limited it to four days?

MR. FITZSIMMONS: I would have to look at whether or not we've reproduced that graph with the imposition of this new standard.

MR. CROCKER: Okay.

MR. MILLAR: So JT2.29. I guess that is on a best-efforts basis

The requested graph is below.

15

OPG notes that this undertaking overlaps with the information requested by Board Staff in Undertaking JT2.33. Accordingly, OPG will provide its response to this undertaking as part of Undertaking JT2.33, which is to be provided in advance of the settlement conference.

Filed: 2014-06-06 EB-2013-0321 JT2.33 Page 1 of 2

Undertaking

To review and confirm a table by Board Staff regarding FTEs and headcount, and provide information for missing categories as appropriate, before the settlement conference.

UNDERTAKING JT2.33

Response

The table on the following page shows headcount, FTE and employee costs for OPG's regulated facilities. For clarity, the following information and definitions are provided:

Headcount is defined as the number of persons employed as of December 31 of the given year, including both regular and non-regular staff.

Regular Staff are as defined in Ex F4-3-1, page 5, starting at line 20. Non-Regular Staff are as defined in Ex F4-3-1, page 5, starting at line 25.

Employee costs are total base salary and wages, overtime, incentive pay, fiscal year adjustment and total benefits including current service cost of pension and OPEB costs as noted in the notes page of Ex F4-3-1, Attachment 6.

Non-regular staff figures have not been broken down by representation (i.e. management, Society and PWU).

Nuclear staffing and employee cost data has been presented in two categories, "Nuclear Operations and Projects" and "DRP and New Nuclear" as opposed to the three categories requested by Board Staff. A breakdown of data into "Operations" and Projects" was not possible in the time frame.

 As noted in Ex L-6.8-1 Staff 100, OPG's Business Transformation headcount reduction targets are in reference to regular staff, not non-regular staff and are in reference to ongoing operations, which exclude DRP and New Nuclear. OPG has added several lines in Board Staff's table, in addition to those originally provided, in order to address undertaking JT2.32's request for "number of ongoing regulated regular employees".

As this application is based on the 2013-2015 Business Plan, OPG has used data consistent with the 2013-2015 Business Plan.

Certain simplifying assumptions were made in the allocation of headcount data and 2013 actual costs. The same labour percentages used to allocate FTEs in the preparation of Ex F4-3-1 Attachment 6 were also used to allocate headcount. For 2013 actual compensation, the same percentages for payroll burden and statutory benefits used in the preparation of Ex F4-3-1 Attachment 6's 2013 budget figures were used.

 Corrected: 2014-06-23

UNDERTAKING JT2.34

Undertaking

To provide the bottom-line number associated with the table in response to Board Staff interrogatory 101.

Response

The cost of the 2.75% increase was calculated to be approximately \$21.0M year over year including base rates, overtime and benefits.

The offsets in the PWU Agreement included:

- Elimination of the Goalsharing bonus
- Elimination of Radiation Protection Clothing
- Net savings in health and dental
- Efficiency Gains- MAR and Shift Turnover
- Adding "Radiation Protection Technicians" to the hiring hall
- 20 Hard threshold PSA
 - Ability to "claw back" family time taken but not repaid
- Extension of targeted severance provisions.

The aggregate value of these offsets was calculated to be approximately \$22.0M per vear.

The calculations associated with the net costs and savings were presented to the Government to satisfy its expectation regarding "net zero" in the form attached as Attachment 1, (Confidential Advice to Government), and was accepted. Attachment 1 contains information that may be used by OPG during the next round of collective bargaining. Therefore the attachment has been provided on a confidential basis, to be withheld from PWU and SEP, since its public production would prejudice OPG's negotiating position.

In its Advice to Government, OPG also included savings associated with staff reductions that amounted to a large overall net savings, and a smaller saving associated with the cost associated with collective bargaining by adding a third year to the collective agreement. These amounts produced savings beyond the "net zero" amount.

In Ex. L-6.8-17 SEC-106, the 2013 interest arbitration between the Society of Energy Professionals ("SEP") and OPG, Arbitrator Albertyn, found that the PWU agreement resulted in economic increases of 0.73% per year attributable to the compounding of wages (cumulative effective year over year). The Albertyn arbitration did not consider additional savings related to staff reductions and bargaining referred to in OPG's net zero calculation contained in the Advice to Government document. For strategic labour relations reasons these were not put before the arbitrator by OPG. The information is also not included in Ex L-6.8-1 Staff-101.

Collective Bargaining Monitoring Overview January 16, 2013

The above graph depicts the three-month moving average annual base wage increase for agreements covering 150 or more employees in the BPS Non-Municipal, the BPS Municipal, Federal and Private sectors in Ontario.

For the period of January 2012 to January 2013, the moving average annual base wage increase for the BPS Non-Municipal has declined since May and settled at 0.73% in January 2013.

The Federal sector moving average annual base wage increase continues an upward trend, peaks in October and edges down in January 2013.

The moving average annual base wage increase for the Private Sector has been declining and reaches its lowest point (0.83%) in January 2013.

Wage Information is based on agreements covering 150 or more employees, a sample that represents 81% of all unionized employees in Ontario. Wage information is based on agreements ratified between January 1, 2012 and January 16, 2013 as of January 16, 2013. Wage information consists of an average annual base wage increase over the duration of a collective agreement and excludes lump sum payments. For the Private sector, wage information includes COLA estimates.

1 <u>UNDERTAKING JT2.37</u>

Undertaking

To explain how the ratio of 3:1 in response to Board Staff interrogatory 121(b) was arrived at, and explain how the methodology differed from the Auditor General's.

Response

The employer/employee contribution ratio is generally calculated using employer contributions to Current Service Cost and the total employee contributions. Based on the OPG Pension Plan Report to Members 2012, p. 2, this ratio has been approximately 3:1 since 2009.

The Auditor General calculated the employer/employee contribution ratio using the employer contributions to Current Service Cost + Deficit Repayment + Voluntary Payment, and the total employee contributions. Including these special payments yields a higher employer/employee contribution ratio, which was approximately 5:1 for 2012.

A copy of OPG's Pension Plan Report to members 2012 is provided as Attachment 1 to this response.

OPG Pension Plan

Report to Members 2012

The Ontario Power Generation Inc. (OPG) Pension Plan (Plan) 2012 Report to Members is intended to provide members with information about the operation and status of the Plan. This report includes information on the Plan's membership profile, funding, investment performance, and governance structure. The assets of the Plan (Fund) have performed well during the economic challenges of recent years but longer retirement periods and historically low interest rates are driving up pension liabilities. OPG is committed to keeping you informed and providing a sustainable pension throughout your retirement.

Plan Facts at a Glance

Asset Value	• \$10.3 billion as at December 31, 2012						
Rate of Return	One year return of 9.4%Ten year (2003 - 2012) annualized return of 7.4%						
Membership Profile	Active Members 11,201 Retired Members 8,266 Beneficiaries in Receipt of Pension 2,016 Former Employees with Deferred Pension 899						

Important Notice

All the terms of the OPG registered pension plan (Plan) are set out exclusively in the Plan text, as amended and filed with the Financial Services Commission of Ontario. While this Report summarizes certain terms of the Plan, this Report does not change or supplement the Plan text in any manner whatsoever. Accordingly, the Plan text will govern exclusively in all cases should any questions or differences arise. The Plan is separate from the OPG supplementary pension plan. This Report contains no information relating to the OPG supplementary pension plan.

Filed: 2014-05-02 EB-2013-0321 JT2.37 Attachment 1 Page 2 of 4

Funding of the OPG Pension Plan

With over \$10 billion in assets, the Plan is well positioned to pay pensions for many years. However, pension plans are required to take into consideration all obligations over a much longer time horizon. When we look at the projected asset values and pension liabilities over the long term, the Plan is in a deficit position (liabilities are larger than assets) and OPG, like many other employers, is taking steps to close the gap.

because o

OPG analyzes the financial position of the Plan on an ongoing basis and files a valuation with the Financial Services Commission of Ontario every three years. The valuation is conducted by an external actuary. The valuation report prepared by the Plan actuary determines whether the Plan is in a surplus or a deficit position. These determinations are made using three different approaches:

 on a going concern basis (which assumes the Plan is continued indefinitely);

- on a **solvency basis** (which assumes a termination of the Plan and the settlement of the Plan's liabilities as at the date of the report. As permitted by applicable law, this calculation is subject to adjustments (1) to exclude the value of indexation (inflation adjustment) and (2) to take into account the changes in the values of assets and liabilities over a five year period (smoothing)); and
- on a wind-up basis (which assumes a termination of the Plan and the settlement of the Plan's liabilities as at the date of the report, without any adjustments).

The Plan's most recent actuarial valuation report was prepared as at January 1, 2011. That report showed that the Plan has a deficit on a going concern basis and a small surplus on a solvency basis (see table below).

The next valuation will be prepared as at January 1, 2014.

Going Concern	January 1, 2011 (\$ millions)	Solvency	January 1, 2011 (\$ millions)
Actuarial Value of Assets	\$9,638	Solvency Assets (smoothed)	\$9,283
Actuarial Liability	\$10,193	Solvency Liabilities (smoothed)	\$9,280
Unfunded Liability	<u>(\$555)</u>	Solvency Excess	<u>\$3</u>

OPG is making special contributions to the Plan of \$65 million per year, over a period of 15 years to eliminate the going concern deficit of \$555 million in accordance with applicable laws.

The law requires that contributions be made to pension plans on a going concern basis and on a solvency basis – but not on a wind-up basis. The Plan's deficit, calculated on a wind-up basis, was approximately \$5.7 billion as at January 1, 2011.

The contributions to the Plan by OPG and its employees over the five year period 2009-2013 are:

(\$millions)	2009		2010		2011		2012		2013 (est.)	
Employee Contribution	\$83		\$82		\$80		\$75		\$72	
 Current Year Service 	\$72	25%	\$75	25%	\$74	26%	\$73	26%	\$72	24%
Transfers In	\$11		\$7		\$6		\$2		n/a	
Employer Contribution	\$264		\$270		\$300		\$370		\$300	
 Current Service Cost 	\$212	75%	\$219	75%	\$218	74%	\$225	75%	\$233	76%
Deficit payment	\$28		\$28		\$65		\$65		\$65	
Voluntary payment	\$24		\$23		\$17		\$80		\$2	

- Power Workers' Union-represented employees contribute 5% of pensionable earnings up to \$50,100, plus 7% of pensionable earnings in excess of \$50,100
- Society of Energy Professionals-represented and Management Group employees contribute 7% of pensionable earnings.

The payments out of the Plan over the five year period 2009-2013 are:

(\$millions)	2009	2010	2011	2012	2013 (est.)
Benefit Payments	\$346	\$360	\$387	\$420	\$440
Transfers/Lump Sum Payments	\$100	\$62	\$97	\$163	n/a
Expenses	\$32	\$33	\$36	\$35	\$36

Attachment 1 Page 3 of 4

OPG Pension Plan

Report to Members 2012

Growth of Liabilities

As at the last valuation, OPG's pension liabilities were larger than pension assets and are growing at a faster pace than the assets. The value of the Fund's assets continually changes based on market performance. Similarly, the value of the Plan's liabilities continually changes with long term Canadian interest rates as the primary driver. If the growth of the Fund's assets matches or exceeds the growth in the Plan's liabilities, the Plan's funded status will remain stable or improve. If, however, the Plan's liabilities grow faster than the Fund's assets, the Plan's funded status will worsen.

As long term Canadian interest rates decline, as has happened steadily over the past decade, the Plan's liabilities increase (and have increased significantly over the past several years). In a declining interest rate environment, the Fund requires more assets today to pay for the Plan's future benefit payments. This situation is one of the contributing factors that has led to the Plan's deficits that we see today.

Investment Performance

% Annual Returns	2006	2007	2008	2009	2010	2011	2012	10 yr annualized
OPG Pension - Total Fund	12.3	2.0	(17.4)	15.0	12.2	6.9	9.4	7.4
Benchmark	12.7	1.7	(19.0)	16.1	12.4	5.7	9.8	7.3
Value Added	(0.4)	0.3	1.6	(1.1)	(0.2)	1.2	(0.4)	0.1

The Fund rate of return for 2012 was 9.4%, which is slightly below the benchmark target of 9.8%.

The Fund's performance is measured against the performance of a benchmark. The Fund's benchmark return reflects the returns of market indices for each asset class category in which the Fund is invested, weighted proportionally by the benchmark asset mix of the Fund. The chart above provides the investment returns compared to the established market benchmark by year.

In 2012, the Fund realized a total return of 9.4 percent, underperforming the benchmark return of 9.8 percent. This relative underperformance was primarily the result of the overweight to bonds, offset by strong results from real estate and foreign equities. On a ten-year annualized basis, the Fund is in line with its benchmark.

As at December 31, 2012, the Fund held approximately 18 percent of its investments in real return bonds. The vast majority of these bonds are guaranteed by the Government of Canada and the return on these bonds closely matches the rate of inflation. This matching partially protects the Plan against increases in the Plan's cost of future pension benefits due to inflation. During 2012, the Fund's bond portfolio, which consists primarily of real return bonds and long-term nominal government bonds, returned 3.9 percent.

There are a limited number of real return bonds and long-term bonds available in the market. As a result, beginning in the second quarter of 2010, the Fund implemented a bond overlay strategy. This strategy consists of entering into financial contracts in order to extend the average maturity dates in, and increase the inflation sensitivity of, the bond portfolio, thereby increasing the matching of the liabilities of the Plan with the assets in the Fund.

JT2.37

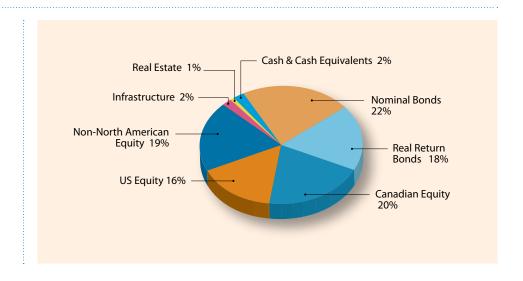

Attachment 1 Page 4 of 4

Asset Mix

This chart shows the Plan's asset mix as at December 31, 2012. The Fund continues to invest in global infrastructure and real estate and as such, the allocations to these asset classes are expected to increase over the next several years.

esp. because

Governance

The OPG Pension Plan is governed by the Ontario Pension Benefits Act, and the Federal Income Tax Act. The Plan text also forms part of the Collective Agreement for The Society and the Power Workers' Union. OPG as "Administrator" of the Plan acts through its Board of Directors (Board). We measure ourselves against standards for governance, internal controls and risk management that reflect best practices and the highest standards.

The governance structure defines the roles and accountabilities of those who manage the Plan. The Board has delegated various responsibilities to:

- the Board's Compensation and Human Resources Committee relating to the administration of the benefits, including Plan design; and
- the Board's Audit and Finance Committee relating to the administration of the Plan's assets.

The Board's Audit and Finance Committee appoints senior OPG management to the Pension Committee, which has been delegated the responsibility to supervise the operations of the Plan, manage the Plan assets and implement policies and procedures.

Additional Information

2012 financial information for the Plan's assets and an electronic copy of this Report are available:

- on OPG's intranet at: HumanResources>Benefits>PensionPlan; and
- on the pensioners' website at https://pensioners.opg.com.

Pensioners and beneficiaries can obtain a password for the pensioners' website by e-mailing Pensioner Services at: pensionerservice@opg.com.

Executive Summary

- Review of Current Environment
- Areas of Consideration
- Strategic Options
- End of Term Strategy Market Information
- Summary

Executive Summary

- Over the past 29 months, OPG has been working to develop and then execute its End of Term Strategy (ETS) for its IT outsourcing agreement with NHSS. OPG and NHSS have come to an agreement for a renegotiated contract
- OPG has requested that Everest provide an assessment of the ETS that has been employed against
 market best practices. The deliverable is divided into two reports; the first is a narrative on ETS
 market best practices and the second is an assessment of OPG's ETS relative to these best
 practices
- As the first of the reports, this document is focused on market best practices for ETS
- As the outsourcing marketplace has matured and the need to develop strategies around an end of term event has become more frequent, Everest has developed a Best Practice framework that is applied to assist a Buyer in developing its ETS
- The ETS Development Framework provides a structured method for creating a strategy based on both market and Buyer-specific information which includes:
 - An assessment of the existing outsourcing environment
 - The major objectives and areas of consideration for an ETS
 - The options that should be reviewed as the possible strategies
- Our analysis includes market based research on commonly employed strategies in the outsourcing industry and Buyer behaviours, including when and how these strategies are being employed

Executive Summary

Review of Current Environment

- Areas of Consideration
- Strategic Options
- End of Term Strategy Market Information
- Summary

- The factors that influenced the development of the original contract will have changed over time. The Buyer needs to explore the following factors in order to understand which ETS is the best fit for its organization
 - The existing outsourcing relationship needs to be assessed to understand if it achieved the original objectives
 - The existing outsourcing relationship needs to be review against the current marketplace to understand if it is achieving its value potential
 - The changes and evolutions within the marketplace need to be considered for the value they might bring to the Buyer
 - The Buyer needs to review its organizational strategies to understand any constraints that might impact the ETS

The assessment of the achievement of the original EB-2013-0321 objectives will inform the potential goals and considerations for the ETS

Objectives for original contract

Financial Objectives:

- One-time cost reduction
- On-going cost reduction
- Increased revenue

Process Objectives:

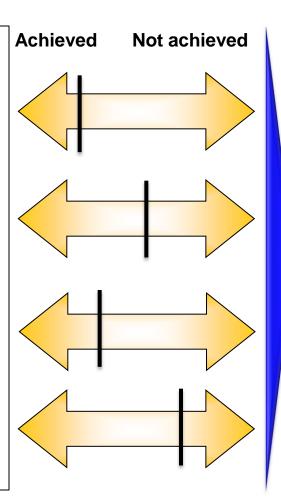

- Process transformation
- Improved services

Solution Objectives:

Technological advances

Strategic Objectives:

Expansion into new geographies

Resulting Goals and Considerations

Supplier related

- Capabilities of incumbent
- Relationship with incumbent
- Future requirements

Process changes:

- Scope changes
- Performance improvement requirements

Solution Goals:

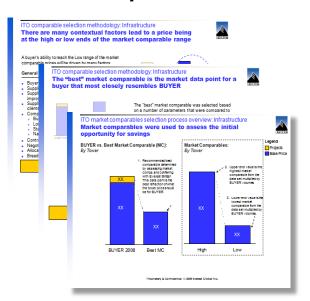

- Technological advances
- Location optimization

Contract Considerations:

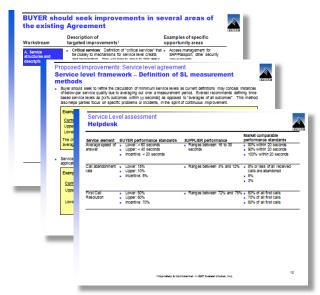

- Key contract requirements
- Risk sharing

To understand the cost savings and efficiencies the 2014-05-08 could be unlocked through an ETS, the current outsourcing agreement must be assessed to mark etge 7 of 23

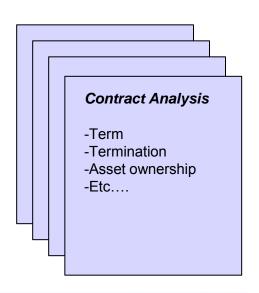

Market Comparables

Service Level analysis

Contract analysis

A review of these three areas against market standards will identify opportunities to achieve further value in 1) Pricing 2)Service Improvements and 3) Contract Terms.

These will factor in the selection of the ETS that best achieve this value

The evolution of the outsourcing market has critical-2013-0321 implications for Buyers at the end of an existing agreement

Filed: 2014-05-08 JT2.39 Attachment 1 Page 8 of 23

- Maturation of the outsourcing marketplace over the last five years
 - Large number of suppliers with proven capabilities
 - All of the major suppliers have grown rapidly in terms of scale and capabilities, example:
 - TCS and Infosys have over 110K and 90K FTEs respectively
 - IBM and Accenture have over 175K FTEs with more than 50K FTEs in India.
 - Expanded IT enabled service offerings
 - Global delivery footprint with suppliers having capabilities to deliver services from all continents, leveraging unique location advantages
 - Major suppliers now have delivery locations in India, China, Central and Eastern Europe, South America and Central America
- Componentization of service delivery enables buyers to buy certain pieces of service or end-to-end transformational service
 - Buyers are moving up the complexity chain, procuring high value analytical and knowledge based services
- Consolidation of the supplier market
 - Industry maturity has led to mergers, acquisitions and consolidations
 - Suppliers have also acquired shared service/captive operations from the buyer community

Dimensions of current agreement review

Process review sub-dimensions:

- Scope
- Performance management
- Operational infrastructure
- Transition

Solution review sub-dimensions:

- Technology
- Global sourcing
- Governance

Supplier review sub-dimensions:

- Supplier portfolio
- Supplier strategy and focus
- Supplier capability

Contract review sub-dimensions:

- Contract size and duration
- Pricing
- Key terms and conditions

Assess outsourced Process maturity and review the 2013-0321 current Solution to identify major gaps and levers that a current 1 **expand value**

Filed: 2014-05-08 Page 11 of 23

Dimension	Sub dimension	Brief description	
A. Process	Scope	Assessing the process coverage and degree of outsourcing to identify opportunities for evolution	
	Performance management	Assessment of type and purpose of metrics, number of SLAs, performance levels, and enforcement strategy	
	Transition	Review of transition methodology, resources, engagement modes, and timelines/cost	
B. Solution	Technology	Assessing the underlying technology solution in terms of ownership, fragmentation, and deployment options	
	Global sourcing	Comparing the global sourcing adoption to the global sourcing market maturity from process and delivery location perspectives	
	Governance	Assessing the governance structure in place to address operational and strategic aspects	

Evaluate Supplier profile and Contract elements to EB-2013-0321 identify evolution themes for next stage of relation Attachment 1

Page 12 of 23

Dimension	Sub dimension	Brief description
C. Supplier	Supplier portfolio	Assessment of Buyer's overall supplier portfolio strategy in terms of having a single-supplier strategy versus multi-supplier strategy
	Supplier strategy & focus	Examining current supplier's strategy in the market and assessing its alignment with client's objectives
	Supplier capabilities	Evaluating current supplier's capability across key parameters (such as scale, scope, technology capabilities, and delivery footprint) and its positioning as compared to other suppliers in the market
D. Contract	Contract size & duration	Comparison of contract size and duration with market average in view of the stage of the relationship
	Pricing	Assessment of the pros and cons of current pricing structure and indicative overall pricing levels along with pricing evolution opportunities
	Terms & conditions	Coverage of key terms and conditions with potential key additions to formalize in the next stage of relationship

- Executive Summary
- Review of Current Environment
- Areas of Consideration
- Strategic Options
- End of Term Strategy Market Information
- Summary

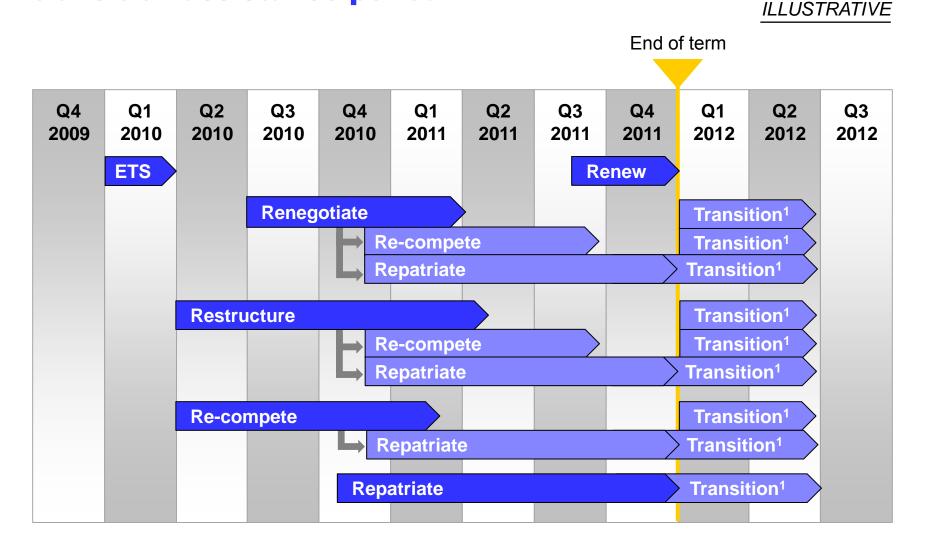

Renew	Renegotiate	Restructure	Re-compete	Repatriate
Re-sign existing contract terms with minimal changes	Modify one or a limited number of elements of an outsourcing contract, e.g., price and service levels	Re-think the structure of key contract provisions and key business terms, and re-think in-scope processes	Terminate existing contract and enter into competitive bid process with potential suppliers to evaluate and select one or multiple suppliers to replace the current services agreement	Terminate current outsourcing contract and bring previously outsourced services back in-house

Buyers should take six key questions under consideration in choosing their sourcing option

- 1. To what degree will each sourcing option lead to lower ongoing costs and equal or improved services?
- 2. What is the approximate one-time cost of each sourcing option?
- 3. What is the risk of executing each option?
- 4. What is the effort and duration of implementing each option?
- 5. How can a client maximize its negotiating leverage?
- 6. To what extent is the sourcing option strategically aligned?

The optimal sourcing approach is one that is most likely meet a buyer's targeted outcomes			
Examples of outcomes:	☑ Financial return	☑ Service quality	
	☑ Legal and compliance	✓ Acceptable risk	

Buyers should initiate an ETS at least two years being 13-0321 the end of current contract term, earlier if inclusive Attachment 1 transition assistance period

¹ Example assumes current agreement contains provision for transition and transition assistance

Reasons for early contract renewal

Source: Everest Outsourcing Journal February 2009

Everest research and experience shows a wide range of savings when renegotiating or re-tendering – nearly 80% gain 20% in savings or more. The actual savings gained depends on factors such as the context of the deal, original financial arrangement, degree of unions or off-shoring, etc.

The study found the following drivers among the agreements that renewed their contracts early to clarify pricing

Filed: 2014-05-08
EB-2013-0321
JT2.39
Attachment 1
Page 19 of 23

- Move from time and materials to a fixed price model
- 2. Review of cost of services after conducting benchmarking activity
- 3. Move to a pricing model that better represents a long-term relationship
- 4. Adjust for currency fluctuation
- 5. Adjust pricing because of added scope
- 6. Move to a managed services model
- 7. Account for buyer's exponential business growth beyond the figures anticipated when the parties initially negotiated the contract

Price changes as part of the renewal

The study also found the following drivers among telego 13-0321 agreements that renewed their contracts early to contract terms

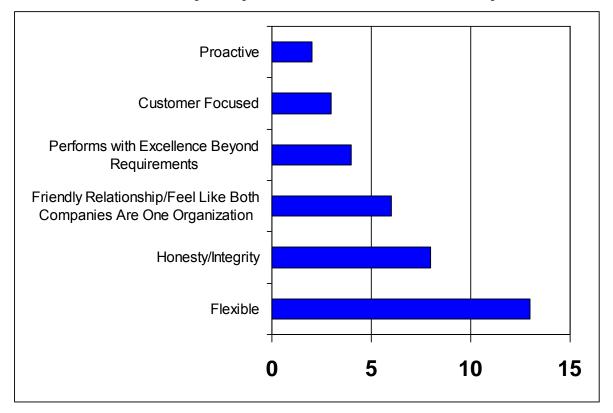

Filed: 2014-05-08 JT2.39 Attachment 1 EVEREST Page 20 of 23

- 1. Clarify some terms, considering the relationship grew deeper and more collaborative than originally envisioned
- 2. Restructure contract to allow for continuous growth without having to renegotiate the contract every time
- 3. End discrepancy in original per-unit pricing around what was considered a billing incident versus a break/fix incident
- 4. Establish new billing metrics regarding what constitutes an additional resource charge (ARC)

Contract term changes as part of the renewal

The study revealed the top six qualities of providers-2013-0321 that influenced the early-renewing buyers' decision Attachment 1 Page 21 of 23

To ensure a thorough development of an ETS, the Buyer should complete three major activities

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 1 Page 23 of 23

- The Buyer's should complete a review of the current environment to answer the following key questions:
 - Has the outsourcing engagement delivered the value that was set out to achieve?
 - Has the outsourcing deal achieved its value creation potential?
 - How has the outsourcing marketplace changed?
 - What should be done when or before the deal term comes to an end?

The Buyer should apply the high level targets, detailed objectives, and constraints to the five strategy options to assess the appropriate ETS for their outsourcing contract; The result can be one option or a hybrid of the options

Executive Summary

OPG was entirely consistent with leading practices in both the process to develop its ETS and in the ETS itself.

Background:

 Anticipating the 2011 conclusion of a ten-year IT outsourcing agreement with Capgemini/New Horizon System Solutions (NHSS), OPG has been developing, and subsequently executing an end-of-term sourcing strategy (ETS) since early 2007. During that time OPG had undertaken a lengthy process in which it traversed a structured process through which it developed its ETS, founded on a number of interim steps.

Scope:

 In October 2009 OPG hired KPMG to perform a two-day due diligence review of the process it undertook in developing its ETS, the ETS itself, both against leading practices.

Approach & Methodology:

- In the assessment timeline (initiated on October 6, 2009 completed October 9, 2009) KPMG employed the follow approach:
 - KPMG assembled a team of three advisors experienced in end-of-term strategy development, outsourcing and due diligence.
 - KPMG made an information request to OPG to obtain necessary documentation related to the ETS development process and the ETS itself. KPMG scheduled interviews with OPG personnel representing key ETS development areas.
 - KPMG evaluated the information gathered from all noted sources against leading practices; leading practices represent a hybrid of what
 mature organizations would do in similar circumstances, in tandem with leading practices espoused in various popular sourcing and IT
 management frameworks (e.g. COBIT).
 - KPMG documented its findings (this report) against leading practices.

Findings:

- 1. KPMG's review of OPG's ETS development process finds that OPG was entirely aligned with leading practices in the ETS development process. OPG made proper use of the correct inputs at the appropriate times in the process, and each process step involved the right parties.
- 2. KPMG finds that OPG consistently developed each necessary component of the ETS, aligned each with the business strategy, and rigorously consulted internal and external stakeholders and advisors, therefore KPMG finds that OPG was entirely aligned with leading practices in its ETS.

Overview

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 5 of 33

Overview

Background

- Ontario Power Generation (OPG) entered into a ten-year IT outsourcing agreement with Capgemini/NHSS in 2001.
- In 2007 OPG undertook a multi-year process to evaluate their sourcing strategy options and to create and execute an end-of-term strategy (ETS) related to the IT outsourcing agreement with Capgemini/NHSS. This process sought to identify and evaluate potential alternatives to the existing contract as well as to renew/modify/extend the existing contract.
- Presently, OPG has completed renegotiating its current agreements based on its ETS. As part of the due diligence process OPG has engaged KPMG LLP/ Canada (KPMG) for the below purpose.

Purpose

This document summarizes KPMG's Point of View (POV) of the process OPG undertook to develop an End of Term Strategy, and the ETS
itself.

Approach

- In the assessment timeline (initiated on October 6, 2009 completed October 9, 2009) KPMG employed the following approach:
 - KPMG assembled a team of three advisors experienced in end-of-term strategy development, outsourcing and due diligence.
 - KPMG made an information request to OPG to obtain necessary documentation related to the ETS development process and the ETS itself. KPMG scheduled interviews with OPG personnel representing key ETS development areas.
 - KPMG evaluated the information gathered from all noted sources against leading practices; leading practices represent a hybrid of what
 mature organizations would do in similar circumstances, in tandem with the leading practices espoused in various popular sourcing and IT
 management frameworks (e.g. COBIT).
 - KPMG documented its findings (this report) against leading practices.

Nature of our Work

- KPMG relied on information and representation from OPG management and staff for the completeness and accuracy of the information provided.
- KPMG did not attempt to validate the accuracy of the information received through this review.
- KPMG did not assess the correctness of the decisions made or the quality of the documents reviewed.
- KPMG were not acting as auditors and accordingly, our work did not result in expressing an audit opinion on OPG's ETS or the process in which it was developed.
- KPMG did not conduct a review of the IT renewal contract with Capgemini.

Key findings

Page 5 of 7

Process Element	Leading Practices in ETS Development	Findings	KPMG's Point of View
Consultations with Proficient Parties	Consult external organization to provide insight on outsourcing leading practices	•Consultations with outsourcing exemplars in Canada, USA and UK.	•OPG's approach was consistent with leading practices.
	Consult external organization to provide insight on outsourcing with potential provider	•Consultations / research on local outsourcing arrangement with client of potential provider.	•OPG's approach was consistent with leading practices.
	Seek external, independent expertise	•Retention of external party services for independent consultation.	•OPG's approach was consistent with leading practices.
		•External, independent expertise were used throughout the process for validation and verification type assessments.	•OPG's approach was consistent with leading practices.
SWOT and PEST Analyses	Evaluate enterprise SWOT	•Post mortem review of existing contracts (weaknesses and threats).	•OPG's approach was consistent with leading practices.
		•Development of improvement (strengths and opportunities).	•OPG's approach was consistent with leading practices.
	Evaluate enterprise PEST	•Conducted risk assessments, using two external parties, addressing political, environmental, sociocultural and technological considerations.	•OPG's approach was consistent with leading practices.
Risk Assessments	Development of a risk register, which catalogs risks and assigns to each an impact and probability	•Risk assessment performed collaboratively.	•OPG's approach was consistent with leading practices.
	Assignment of specific risk mitigation responsibility to individuals	•Documented in risk registry.	•OPG's approach was consistent with leading practices.
	Risk assessment of the sourcing options	•Assessment of the viability of the sourcing alternatives based on four categories of risk.	•OPG's approach was consistent with leading practices.

Supporting analysis to key findings

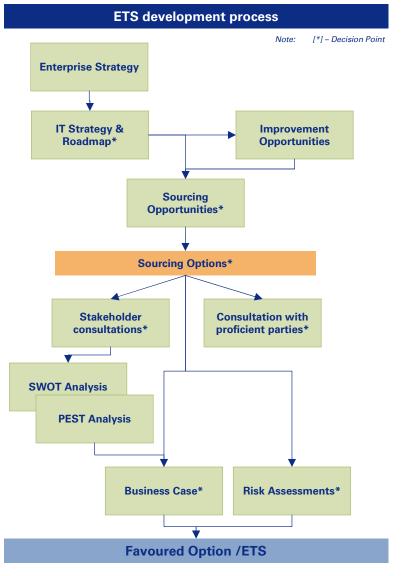

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 15 of 33

Leading practices in the ETS development process

Leading practices in the ETS development process are espoused in the Control Objectives for Information and related Technology (CobIT) framework, which is a widely adopted framework.

- It is a leading practice to align all organizational initiatives to objectives expressed in the business strategy.
- The information technology (IT) strategy is an IT manifestation of relevant business objectives, to which IT initiatives are directly linked.
- The IT strategy is one of several key inputs to the ETS, and is used authoritatively to guide downstream IT initiatives. Objectives originating in the IT strategy clarify requirements in cost, performance and other relevant IT metrics, and also provide guidance on the feasibility and attractiveness of potential future state options.
- Other inputs should be used to support decisions related to option refinement, such as a business case, risk assessment, performance reviews, etc. Again, these inputs should align with the IT strategy, and be directly traceable to the business strategy.
- Once high-level options are narrowed, if the option favoured is an existing option, elaboration of the ETS is made both in terms of incremental (relative) and independent (absolute) performance.
- Decision points (DP) are instances where a specific decision should be made prior to proceeding in the ETS development process.
 Decisions should be supported with robust input at the point they are made.
- Decision points illustrated represent within the ETS development process when inputs should be evaluated and a specific decision is made. These are not the only decision points in the process, but from the due diligence standpoint, they represent points in time at which material decisions should be made related to an ETS.
- Note: Descriptions of process elements, inputs and outputs in subsequent pages are meant as operating definitions to clarify the process and should not be interpreted to be prescriptive or robust.

The process illustrated below applies generally to an ETS strategy development process.

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 16 of 33

Process elements used for developing the ETS – enterprise strategy

OPG was consistent with leading practices in aligning with the enterprise strategy.

Description:

• The purpose of the enterprise strategy is to define the high level objectives, goals, constraints and timing for the organization. Interpretation of the enterprise strategy yields sub-strategies related to specific functions, lines of business or other organizational entity.

Source and Details:

• OPG's enterprise strategy is outlined in the 2008 Annual Report, which can be found on OPG's public website.

Enterprise Strategy			
Leading Practices in ETS development	Findings	KPMG's Point of View	
Ensure alignment of ETS to the enterprise strategy	Evaluated business plans across all OPG lines of business.	OPG's approach was consistent with leading practices.	
	 Consulted individually with the various business unit leaders to determine their key objectives and priorities. Discussed strategic potential for contract alternates and the implications. 	leading practices.	
	 Identified specific "business strategies", which were propagated consistently in process documentation. 	OPG's approach was consistent with leading practices.

Process elements used for developing the ETS – IT strategy and roadmap

OPG was consistent with leading practices in aligning with the IT strategy and roadmap.

Description:

- The purpose of the information technology (IT) strategy is to define the high-level objectives, goals, principles, tactics and timing for information technologies for the organization. The IT strategy is a direct translation of business objectives into a future state IT blueprint, expressed as discrete initiatives plotted against a timeline ("roadmap").
- The first decision point in the ETS development process relates to extracting a robust set of objectives from the IT strategy, and validating these objectives with the key stakeholders. Stakeholders should be comprised of business and IT representation.

Extraction Strongy To Parkage A Copyonism of Opposituation Copyonism of Opposituation Control Opposituation Control Opposituation with Control opposituation of the Control opposituation opposituation of the Control opposituation oppositua

Source and Details:

- OPG's 5-year IT strategy document, dated November 2008.
- Identification of a set of IT objectives to achieve in the ETS, which was based on alignment with the IT strategy. The traceability matrix was contained within the Joint Solutioning binder.

IT Strategy and Roadmap			
Findings	KPMG's Point of View

Process elements used for developing the ETS – improvement opportunities

OPG was consistent with leading practices in developing improvement opportunities.

Description:

- Distinct from the IT roadmap initiatives in the IT strategy, improvement opportunities relate specifically to sourcing, and at this point in the process typically focus on:
 - Exploratory improvement opportunities such as benchmarking, independent reviews, performance assessments, external consultations
 - Preparatory and opportunistic improvements such as IT maturity, process standardization, application rationalization and other efforts toward simplification and standardization

Source and Details:

 Contained within Joint Solutioning binder, IT Council presentations dating back to early 2007, presentation to the Board of Directors dating back to mid-2007, presentations to ETS (senior executive) Steering Committee dating back to mid-2007.

Improvement Opportunities			
Leading Practices in ETS development	Findings	KPMG's Point of View	
Explore exploratory improvement opportunities	OPG conducted an independent review of its business processes with an aim to identify improvement.	OPG's approach was consistent with leading practices.	
	OPG conducted a benchmarking exercise with an external party.	OPG's approach was consistent with leading practices.	
Explore preparatory improvement opportunities	OPG hired an external party to compose a service catalogue.	OPG's approach was consistent with leading practices.	
Explore opportunistic improvement opportunities	OPG hired an external party to explore cost saving opportunities.	OPG's approach was consistent with leading practices.	
Seek external, independent expertise	Engaged external parties for independent consultation of improvement opportunities.		

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 19 of 33

Process elements used for developing the ETS – sourcing opportunities

OPG was consistent with leading practices in developing sourcing opportunities.

Description:

- Upon defining and validating relevant business and IT objectives, it is prudent to consult a broad representation of stakeholders to define specific sourcing opportunities. Sourcing opportunities are different from sourcing options insofar as sourcing opportunities are not sourcing solutions or potential future state blueprints, rather they define a narrower sourcing opportunity that may form part of a sourcing option.
- The decision point in this process element involves assigning sourcing opportunities to individual "champions" to develop and support the ideas for the subsequent process step.

Source and Details:

 Contained within Joint Solutioning binder, IT Council presentations dating back to early 2007, presentation to the Board of Directors dating back to mid-2007, presentations to ETS (senior executive) Steering Committee dating back to mid-2007.

Sourcing Opportunities								
Leading Practices in ETS development	Findings	KPMG's Point of View						
Identify and validate relevant sourcing opportunities	Assembled a broad stakeholder group for opportunity identification.	OPG's approach was consistent with leading practices.						
	Defined specific sourcing opportunities and associated each with a responsible stakeholder.							
	Identified key constraints, challenges for each opportunity.	OPG's approach was consistent with leading practices.						
Seek external, independent expertise	Engaged external parties for independent consultation of sourcing opportunities.	OPG's approach was consistent with leading practices.						

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 20 of 33

Process elements used for developing the ETS – sourcing options

OPG was consistent with leading practices in developing and evaluating sourcing options.

Description:

- Sourcing options are the high-level scenarios that could be considered potential solutions based on the identified objectives.
- The decision related to evaluating among sourcing options has high importance for the organization in achieving its objectives. This decision must be made collaboratively among a cross-section of stakeholders representing key business areas (e.g. Legal, Risk, Supply Chain). An independent evaluation is also a leading practice as option selection has significant implications for the organization.

Source and Details:

• Contained within IT Council presentations dating back to early 2007, presentation to the Board of Directors dating back to mid-2007, presentations to ETS (senior executive) Steering Committee dating back to mid-2007, Everest End-of-Term Strategy Report dated December 2007, end-of-term Charter dated July 2008.

Sourcing Options							
Leading Practices in ETS development	Findings	KPMG's Point of View					
Identify and validate relevant sourcing options	Assembled a broad stakeholder group for option evaluation, comprised of individuals at varying seniority levels.						
	Documented options with clarity and defined how they may be executed at OPG.	· ·					
Seek external, independent expertise	Engaged external parties for independent consultation of sourcing opportunities.	OPG's approach was consistent with leading practices.					
Eliminate infeasible or unattractive options	 Leveraged viewpoints of cross-sectional stakeholder team to evaluate feasibility and attractiveness from multiple perspectives. 						
	Decision makers consulted individuals at all seniority levels.	OPG's approach was consistent with leading practices.

Process elements used for developing the ETS – stakeholder consultations

OPG was consistent with leading practices in conducting stakeholder consultations.

Description:

• Stakeholder consultations create an opportunity to achieve relative or absolute improvements in sourcing. To achieve complete visibility in to improvement opportunities, it is advantageous to include representation from the stakeholder groups (historical and potential) most impacted by sourcing arrangements.

Educative Stating If Strategy is Stating Operation Commission of Particular Stating Operation Equation of Particular Stating Operation of Particular Stating Operation Equation of Particular Stating Operation of Particula

Source and Details:

 Details related to stakeholder consultations were contained in presentations to the Steering Committee, IT Council and Working Group, Charter document, Meeting Minutes, and several other sources.

Stakeholder Consultations							
Leading Practices in ETS development	Findings	KPMG's Point of View					
Involve stakeholders presently impacted by sourcing arrangement	Created numerous groups for consultation.	OPG's approach was consistent with leading practices.					
Involve stakeholders potentially impacted by future sourcing arrangement	Created cross-sectional group with representation across business lines and functions.						
Seek external, independent expertise to facilitate and educate the consultation process	Engaged external parties for independent consultation of sourcing opportunities.	OPG's approach was consistent with leading practices.					
Create common language for discussing sourcing	Created a service catalogue, which focuses discussions on services and the associated metrics.	OPG's approach was consistent with leading practices.					
Evaluate stakeholder preferences on behalf of the broader stakeholder community	Consideration made for relevant stakeholders, including regulator, public and unions.						
Cross-functional, senior approval for major deliverables and decision making	 Approval for major deliverables (e.g. business case recommendation, board approval) required sign-off from all involved stakeholders. 	OPG's approach was consistent with leading practices.					

Attachment 2

Process elements used for developing the ETS – consultations with proficient parties Page 22 of 33

OPG was consistent with leading practices in conducting consultations with proficient parties.

Description:

Proficient parties are those who have experience, expertise or knowledge of the process for building an ETS
and in the decisions associated with the process steps. This consultation provides an opportunity for
leveraging expertise for a specific service or task as well validating process outcomes.

- Documentation relating to the various external assessments and reports provided by independent consulting firms and individuals.
- Peer evaluations include site visits and discussions.

Consultations with Proficient Parties							
Leading Practices in ETS development	Findings	KPMG Point of View					
Consult external organization to provide insight on outsourcing leading practices	Consultations with outsourcing exemplars in Canada, USA and UK.	OPG's approach was consistent with leading practices.					
Consult external organization to provide insight on outsourcing with potential provider	 Consultations / research on local outsourcing arrangement with client of potential provider. 	OPG's approach was consistent with leading practices.					
Seek external, independent expertise	Retention of external party services for independent consultation.	OPG's approach was consistent with leading practices.					
	External, independent expertise were used throughout the process for validation and verification type assessments.	OPG's approach was consistent with leading practices.

Process elements used for developing the ETS – SWOT & PEST

While not using the exact acronyms, OPG was consistent with leading practices in conducting SWOT and PEST analyses.

Description:

- Strength, Weakness, Opportunities and Threat (SWOT) analysis provide a framework for identifying key factors that may or should influence the ETS.
- Political, Economical, Socio-cultural and Technological (PEST) analysis provide a framework to assess various macro level factors that are typical inputs into developing an ETS.

Process elements used for developing the ETS – business case

OPG was consistent with leading practices in constructing a business case.

Description:

• The purpose of a business case is to capture and compare alternatives for initiating a project or task. It will also include supporting documentation and analysis such as a risk assessment, financial justification and approval requirements.

Source and Details:

OPG's ETS business case (approved)

Business case							
Leading Practices in ETS development	Findings	KPMG Point of View					
Business case models all feasible sourcing options	Business case modeled all feasible sourcing options.	OPG's approach was consistent with leading practices.					
Business case values are traceable to the business objectives	Business case values were traceable to the business objectives.	OPG's approach was consistent with leading practices.					
Business case documents and explains assumptions	Business case documented and explained assumptions.	OPG's approach was consistent with leading practices.					
Business case provides or links to quantitative calculations	Business case referenced source documents of quantitative calculations.	OPG's approach was consistent with leading practices.					
Consideration of qualitative factors	Qualitative analysis of key considerations that were difficult/impossible to quantify.	OPG's approach was consistent with leading practices.					
Business case uses standard quantities to evaluate among competing options	Business case consistently used net present value for option costing.	OPG's approach was consistent with leading practices.					
Business case highlights the risks associated with each option	Business case highlighted the risk associated with each option.	OPG's approach was consistent with leading practices.					
Business approval is granted by a cross- section of senior executives	Business approval was granted by a cross- section of senior executives.	OPG's approach was consistent with leading practices.

Process elements used for developing the ETS – sourcing option / ETS

OPG was consistent with leading practices in favouring a sourcing option.

Description:

• An ETS outlines a favoured sourcing option and a plan of execution. It is based on the assumption that a business case has been approved or a favourable sourcing option has been selected.

JT2.39 Attachment 2 Page 30 of 33 2. Industry leading practices

COBIT is one of several frameworks used in **KPMG's consideration** toward leading practices.

Further to KPMG's experience and knowledge in developing an end of tem strategy, and more broadly a sourcing strategy, other industry leading practices confirm this approach.

- Control Objectives for Information and Related Technology (CobIT) is a well recognized framework for assessing IT performance and controls. To further demonstrate the importance of industry practices in developing a strategy CobIT highlights the importance and linkage between an organizations enterprise (or business) goals and IT, as depicted to the left. Further detail of the specific control is CobIT Domain Plan and Organise (PO), control 1.2 Business IT-Alignment.
- The Software Engineering Institute (SEI), also has a well recognized industry practice for assessing maturity and has published a sourcing maturity model - The eSourcing Capability Model for Client Organizations. Within the document it defines five practices to developing a sourcing strategy. They include:
 - Str01, Sourcing Sponsorship, Establish management sponsorship for sourcing
 - Str02, Sourcing Constraints, Identify the constraints that impact the client organization's potential uses of sourcing
 - Str03, Potential Sourcing Areas, Decide to what extent sourcing may be relevant to the client organization
 - Str04, Sourcing Objectives, Define, align, and document sourcing objectives
 - Str05, Organizational Sourcing Strategy, Define, communicate, and maintain the sourcing strategy of the client organization

3. Interview questions

Filed: 2014-05-08 EB-2013-0321 JT2.39 Attachment 2 Page 31 of 33

Outsourcing Renewal Strategy (ETS)

- How was the ETS aligned to your corporate strategy?
 - What inputs used in developing the ETS?
 - What objectives did these inputs provide in the development of the ETS (e.g. cost reduction, service definition)?
- What changes have occurred at OPG that impacted the ETS?
- What changes have occurred at Capgemini / NHSS that impacted the ETS (e.g. ownership structure/incentives, risks, capabilities/technology, cost structure, other)?
- What non-financial <u>and</u> non-technical considerations impacted the development of OPG's ETS (e.g. cultural, political)?
- What length of contract is desirable and why?

Process

- Have services / positions been evaluated since the last contract as strategic or not (e.g. core competencies of OPG)?
- In the process that was undertaken, who was involved at OPG?
 - What question set was posed? (General or specific to service provision)
- What were the findings from the ETS development process (e.g. leading practices, improvement opportunities)? Did any themes emerge?
- How was it determined that the ETS process was exhaustive in breadth (e.g. explore alternate options)?
- How was it determined that the ETS process was exhaustive in depth (e.g. quantitative and qualitative depth of explorations)?

Contract Post Mortem

- In the previous contract, what were the identified pain-points relating to:
 - Costs (particularly unbudgeted/unexpected costs)
 - Quality
 - Scope
 - Timing
 - Service Performance
 - Flexibility
 - Constraints / Limitations
- What measures were taken to compensate for the aforementioned pain-points?
- How successful were you in achieving the IT effectiveness and efficiency sought?
 - Performance measurement
 - Performance
 - Cost
 - Operational transparency
 - Continuous improvement
- Of the aforementioned, what measures were designed into the ETS?

Leading Practices

- What other sources were consulted/referenced in the ETS process?
 (e.g. alternate providers, independent consultants, peers)
- How did you determine the leading practices
- Have leading IT practices factored into ETS development (e.g. benchmarking)

UNDERTAKING JT2.40

Undertaking

To add a "total" column to the table in response to board staff interrogatory 124, removes the "2007" column, and cross-add from 2008 to 2015 to the "total" column.

Response

 A modified version of Ex. L-6.8-1 Staff-124, Chart 1 is provided below. In addition to removing the "2007 column" and incorporating the requested "total" column, the modified chart also reflects the updated forecast of 2014 - 2015 pension and OPEB costs presented in Ex. L-6.8-1 Staff-112.

In the EB-2010-0008 Decision With Reasons (page 91), the OEB approved the continued use of the accrual method for determining supplementary pension plan ("SPP") and other post retirement benefit ("OPRB") costs in setting OPG's payment amounts. The circumstances with respect to OPG's SPP and OPRB costs and their recovery have not changed since EB-2010-0008.

On an accrual basis, SPP and OPRB costs are incurred and recognized in accordance with generally accepted accounting principles when the related employee service is considered to be rendered and the benefit is considered to be earned, not when the actual benefit payments are made to retirees in the future. It is the earning of the benefit which results in the cost. Reflecting these costs in payment amounts at the time the costs arise results in an appropriate matching of costs and benefits, thereby avoiding intergenerational equity issues as consistent with generally accepted regulatory principles.

Corrected: 2014-06-11 EB-2013-0321
