Any response to this Notice requesting other than a generic data exemption must be received within 90 days of the publication of this Notice in the Federal Register.

Dated: September 27, 1985. James W. Akerman, Acting Director, Registration Division. [FR Doc. 85–27361 Filed 11–18–85; 8:45 am] SILLING CODE 6560-50-M

#### [OPP-36104; FRL-2924-9]

Data Call-in Notice for Chronic Data for Pyrethrins, Pyrethrin Coils, and Pyrethrum Powder Other Than Pyrethrins

AGENCY: Environmental Protection Agency (EPA). ACTION: Notice.

SUMMARY: Under the authority of section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended (FIFRA), the Agency has determined that additional chronic toxicological data are needed to maintain in effect continued registration of products containing the active ingredient pyrethrins, pyrethrin coils, and pyrethrum powder other than pyrethrins, hereafter referred to as pyrethrin. This notice informs end-use registrants of affected products. consisting of less than 20 percent of pyrethrin, of the issuance of a Data Call-In Notice on products containing the active ingredient pyrethrin. This notice further informs them that they will be treated as if they had requested and been granted a generic data exemption from the data requirements. However, any such end-use registrant may inform the Agency within 90 days of publication of this Notice that the registrant does not wish such treatment or does not qualify for such treatment.

DATE: Any responses to this notice requesting other than a generic data exemption must be received on or before February 18, 1986.

ADDRESS: Submit three copies of written comments, identified with the document control number "OPP-36104," by mail to:

Information Services Section, Program
Management and Support Division
(TS-757C), Office of Pesticide
Programs, Environmental Protection
Agency, 401 M St., SW., Washington,
DC 20460.

In person, deliver comments to: Rm. 236, CM#2, 1921 Jefferson Davis Highway. Arlington, VA.

Information submitted in any comment concerning this Notice/proposed rule/rule may be claimed

confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

#### FOR FURTHER INFORMATION CONTACT:

Donald Mackey or Geraldine Werdig, Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460. Office location and telephone numbers: Rm. 728, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202, Don Mackey (703-557-2708); Geraldine

## Werdig, (703-557-7436). SUPPLEMENTARY INFORMATION:

#### I. Background

Under the authority of section 3(c)(2)(B) of the Federal Insecticide, Fungicide, and Rodenticide Act as amended (FIFRA), the Agency has determined that additional chronic toxicological data are needed to maintain in effect the continued registration of products containing the active ingredient pyrethrin. The Agency has issued a Data Call-In Notice requesting these data. The Data Call-In Notice for pyrethrin is printed in full in Unit II of this notice. Normally, each registrant of a product containing an active ingredient which is the subject of a Data Call-In Notice would be sent a copy of the notice and would have to respond to the Agency within 90 days of receipt of the Notice with certain information, including informing the Agency what steps are being taken to comply with the requirements, or face the possibility of suspension of product registrations. In this case, the Data Call-In Notice has been mailed only to those registrants with products consisting of 20 percent or more of pyrethrin. Those registrants of end-use products which, according to EPA records, contain less than 20 percent of pyrethrin are being notified by this publication in the Federal Register. This is an appropriate manner of notification, in light of the circumstances described below.

Several of the major producers, including Pyrethrin Board of Kenya, Fairfield American Corp., S.B. Penick and Co., Prentiss Drug and Chemical Co., S.C. Johnson and Son, Inc., and McLaughlin Gormley King Company have examined the list of registrants with products having 20 percent or more of pyrethrin (called the "20% list"). (This "20% list" is included as Attachment B-1 of the Data Call-In Notice, which is reprinted in Unit III of this Federal Register notice). Those companies have stated that they believe the "20% list" includes all registrants who would normally be responsible for fulfilling the pyrethrin chronic data requirements as well as some registrants who may be eligible for a generic data exemption. The following companies, Pyrethrin Board of Kenya, Fairfield American Corp., S.B. Penick and Co., Prentiss Drug and Chemical Co., and McLaughlin Gormley King Company have informed the Agency that they will generate the required chronic toxicological data, either individually or jointly. The companies further state their belief that all other registrants of products containing pyrethrin, but not included on the "20% list", purchase the chemical in the form of a registered product from a company included on the "20% list" Generally, a company which purchases an active ingredient as a registered product, and incorporates it into its own end-use product, may qualify for a generic data exemption.

This notice informs the end-use product registrants (those end-use registrants with less than 20 percent pyrethrin in their products) about the data requirements, applicable deadlines for data production and options available for complying with the requirements. This notice also informs those same end-use product registrants (listed in Attachment B-2 of the Data Call-In Notice, which is reprinted in Unit IV of this Federal Register notice) that the Agency will treat each such end-use registrant as if the registrant had requested and been granted a generic data exemption from the data requirements included in the Data Call-In Notice, unless the registrant informs the Agency within 90 days of publication of this notice in the Federal Register that it does not wish a generic exemption or is not qualified for one, thus requiring such registrant to be treated in a different manner.

The Agency believes that each enduse registrant with products containing less than 20 percent pyrethrin (listed in Unit IV of this Federal Register notice) obtains the pyrethrin contained in its product solely by purchase of other registered products containing pyrethrin. Any registrant who incorporates into its end-use product any pyrethrin from any source other than a registered product which either is pyrethrin or contains pyrethrin must, within 90 days of publication of this notice, submit to the Agency an up-to-data Confidential Statement of Formula. The Agency may require further information or data as it may determine necessary.

As noted herein, circumstances may arise in the future which may change a registrant's status for continuation of the

generic data exemption.

A registrant included in the list in Unit IV of this Federal Register notice should not respond to the Agency within 90 days of publication of this notice unless any of the following statements are applicable:

1. The registrant does not wish to receive a generic data exemption and wishes to be responsible either individually or jointly for satisfying the data requirements through election of

some other option.

The registrant obtains the pyrethrin contained in its product other than by purchasing a registered product which is pyrethrin or contains pyrethrin.

Any registrant responding to the Agency should use the Data Call-In Summary Sheet, selecting any appropriate option(s) and providing appropriate supporting information. Because of the volume of this active ingredient which is produced and used, the Agency will not consider a request for a low-volume minor-use exemption.

A registrant who is treated as having been granted a generic data exemption must notify the Agency if it is no longer eligible for the exemption. In that event, the notice to the Agency must include a revised Confidential Statement of

Formula.

If, in the future, the registrant(s) of pyrethrin (identified in the "20% list" in Unit III of this Notice), who commit to generate either individually or jointly the required data, fail to take appropriate steps to supply the required data or fail to provide the required data on time, all end-use registrants (including those with registered products containing less than 20 percent pyrethrin, identified in Unit IV, as well as any registrants with 20 percent or greater pyrethrin end-use products who otherwise may qualify for a generic data exemption under the Data Call-In Notice) will be notified and must inform the Agency within 30 days of notification how they will comply with the data requirements by the dates specified in the Data Call-In Notice. In that event, a registrant who does not respond within 30 days of such notification, or fails to take appropriate steps to submit the required data by the date specified in the Data Call-In Notice

will be issued a Notice of Intent to Suspend each affected registration.

#### II. Data Call-in Notice

September 27, 1985.

Data Call in Notice for Chronic Toxicological Data for Pyrethrin

Dear Sir or Madam:

This Notice requires you and other registrants of pesticide products containing pyrethrins, pyrethrin coils and pyrethrum powder, other than pyrethrum hereafter referred to as pyrethrin, to submit certain data to the U.S. Environmental Protection Agency (EPA). Within 90 days after you receive this Notice you must inform EPA:

1. How you will comply with the data requirements set forth in this Notice; or

2. Why you believe you are exempt from the requirements of this Notice; or 3. Why you believe EPA should not

require your submission of data in the manner specified by this Notice.

If you do not respond to this Notice, or if you do not satisfy EPA that you will comply with its requirements or should be exempt or excused from doing so. then the registration(s) of your product(s) subject to this Notice will be suspended. We have provided a list of all of your products subject to this Notice (Attachment A), as well as a list of all registrants of pyrethrin products who are subject to this Notice (Attachments B-1 and B-2), Those registrants who must respond to this Data Call In Notice are identified in Attachment B-1, which is the list of registrants of products containing 20% or greater of pyrethrin (called the "20% list"). As explained herein, a Federal Register Notice is being published as a means of notifying those registrants with less than 20% pyrethrin in their products of these data requirements and options available for compliance. These registrants are identified in Attachment

The authority for this Notice is Sec. 3(c)(2)(B) of the Pederal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136a(c)(2)(B).

Section I. Why You Are Receiving This Notice

The Agency is including in this Notice the chronic data needs usually requested as a part of the ongoing regular Data Call in Program. Since this chemical is included in products used on food, it would be subject normally to chronic testing requirements. These tests are also required for certain nonfood uses. We have not exemined in detail the use patterns for your product(s). If your product(s) is not used

for food or other uses subject to the chronic testing requirements of the Pesticide Registration Guidelines, see Section III-C for instructions on submitting a request that the guidelines do not apply to your product(s). A copy of the "When Required" portion of the chronic testing requirements of those Guidelines is attached for use in your evaluations (Attachment C). The existing chronic data in the areas of chronic feeding, oncogenicity, reproduction and teratology (the traditional areas included in Data Call In) are cited in a list included as Attachment C-1. Therefore, the Agency imposes the requirement to supply the chronic data needed. If there are any additional existing chronic studies in this area which meet current requirements, please let us know within 90 days of your receipt of this Notice.

All the data we are requiring are called "generic" data. They pertain to the safety of that active ingredient in all products having the use patterns for which the data are required. The Agency has determined that the data listed in section II of this Notice are necessary to maintain in effect your registration of products containing

pyrethrin.

#### Section II. Data Required

II-A Toxicological Data Needed.
These data are specified in the Data
Requirements for Pesticide Registration;
Final Rule, § 158.135, toxicology data
requirements, chronic testing.

1. Chronic Feeding Study(s). Data needed: A chronic feeding study in two

species.

2. Oncogenicity Study(s). Data needed: An oncogenicity study in two species.

 Reproduction Study(s). Data needed: No additional data needed at this time.

 Terotogenicity Study(s). Data needed: A teratogenicity study in two species.

II.—B. Schedules for Submission of Data. The chronic studies must be submitted according to the following schedule:

Chronic Feeding Study(s) in two species.

—A progress report is due 8 months after receipt of this Notice and semiannually thereafter.

 A final report is due 50 months after receipt of this Notice.

Oncogenicity Study(s) in two species.

 A progress report is due 8 months after receipt of this Notice and semiannually thereafter.

- A final report is due 50 months after receipt of this Notice.
- 3. Teratology Study(s) in two species.
- —A progress report is due 8 months after receipt of this Notice and semiannually thereafter.

—A final report is due 15 months after receipt of this Notice.

II-C. Testing Protocols. Any studies submitted under Section II-A must be conducted in accordance with acceptable test standards such as those outlined in the Pesticide Assessment Guidelines. Protocols approved by the Organization for Economic Cooperation and Development (OECD) are also acceptable provided the OECD recommended test standards, such as test duration, selection of species, and degradate identification (environmental fate) requirements conform to that specified in the Pesticide Data Requirements regulation (§ 158.70). When using the OECD protocols, care should be taken to observe the test standards in a manner such that the data generated by the study will satisfy the requirements of Part 158. The Pesticide Registration Guidelines were proposed by EPA in the Federal Register (FR) on August 22, 1978, 43 FR 37336. Subsequently, the registration data requirements were summarized as a final regulation on November 24, 1982, 47 FR 53192 (40 CFR Part 158) and the final data requirements regulation was published on October 24, 1984 (49 FR 42856). The final regulation is labeled "Data Requirements for Pesticide Registration; Final Rule." The pesticide Assessment Guidelines contain acceptable tests and other guidance. Residue Studies appear in Subdivision O. Residue Chemistry Guidelines; chemistry studies in Product Chemistry, Subdivision D; Environmental Fate in Subdivision N; and the chronic toxicology data requirements are in Subdivision F, Hazard Evaluation: Humans and Domestic Animals. These EPA Guidelines are available as: NTIS Order No. PB83-153916 for Subdiv. F (hard copy \$16.00/microfiche \$4.50); PB83-153890 for Subdiv. D (\$11.50); PB83-153973 for Subdiv. N (\$13.00); and PB83-153981 for Subdiv. O (\$10.00); from the National Technical Information Service (NTIS), Attn: Order Desk, 5285 Port Royal Rd., Springfield, VA 22161 [703-487-4650]. The OECD protocols are available from OECD, 1750 Pennsylvania Ave., NW., Washington, D.C. 20006.

Section III. Compliance with Requirements of This Notice

Within 90 days of receiving this Notice, you must submit for each of your products subject to this Notice a completed copy of the "Data Call In Summary Sheet" (Attachment C-2). On that sheet you must state which option(s) you have selected to comply with this Notice. At the same time, you must also submit any additional documents required to support the option(s) chosen. The Summary Sheet and other attachments are provided to assist you in responding to this Notice. Do not alter the printed material. If you believe you qualify for more than one of the available options provided by this Notice, you should choose every option for which you believe you may qualify when you respond to this Notice. In processing responses which specify more than one option for complying with this Notice, EPA will attempt to adopt the option which will impose the least burden on the registrant.

Section III-A. Exemption From the Requirements of This Notice

Generic Data Exemption. Under Sec. 3(c)(2)(D) of FIFRA, an applicant for registration of a product is exempt from the requirement to submit or cite data concerning an active ingredient if the active ingredient in his product is derived exclusively from purchased registered pesticide products containing the active ingredient. EPA has concluded that such a registrant also should normally be exempt from a \$ 3(c)(2)(B) notice requiring data on the active ingredient which they purchase. To qualify for this exemption all of the following requirements must be met:

 The pyrethrin in your registered product must be present solely because of incorporation of another registered product which contains pyrethrin;

 Every registrant who is the ultimate source of the pyrethrin in your product must be in compliance with the requirements of this Notice and must remain in compliance; and

3. You must have provided to EPA an accurate and current "Confidential Statement of Formula" for each of your products to which this Notice applies.

Generally, to apply for the generic data exemption you must submit a completed Generic Data Exemption Statement (Attachment D) and all supporting documentation for each of your products for which you claim the exemption. End-use registrants, identified in Attachment B-1 must comply with the requirements of this Data Call In Notice if seeking a generic data exemption. However, in this case an additional mechanism for obtaining a generic data exemption is being included in a Federal Register Notice. applicable to registrants listed in Attachment B-2. The Federal Register

document notifies registrants of pyrethrin products of this Data Call-In Notice and identifies steps to be taken, depending upon the course of action chosen by the individual end-use registrant as an appropriate response to the Notice. Under this approach, subject to certain conditions, registrants with products having less than 20% pyrethrin will be treated as if they had requested and been granted a generic data exemption, unless they notify the Agency within 90 days that they do not qualify or do not wish to receive such treatment.

Exemption for low volume minor use pesticides. Section 3(c)(2)(A) of FIFRA requires EPA to consider the appropriateness of requiring data for low volume miner use pesticides. In implementing this provision, EPA considers as a low volume chemical only active ingredients whose total production volume for all manufacturers is small. If the active ingredient is used for both high volume and low volume uses, a low volume exception will not be approved. If all uses of an active ingredient are low volume and the combined volumes for all uses are also low, then an exemption may be granted. An exemption will not be granted if any registrant of the active ingredient elects to conduct the testing.

To apply for a low volume minor use exemption, you must submit the following information:

 Your total production in pounds per year of pyrethrin for all uses (including non-pesticide uses) of the chemical for each of the last five calendar years.

A listing of all uses of the pyrethrin you produce and the amount used in pesticide products.

 A financial impact analysis which treats the cost of the proposed testing and addresses the ability to pass those costs on to the users of the product.

 Statement of how important pyrethrin is to users.

 A list of data requirements for which you request an exemption and a detailed explanation of why an exemption is requested.

The Agency will not consider any requests for low-volume minor-use exemptions because of the volume of this active ingredient which is produced and used.

Section III-B Production of Data Required by This Notice

There are three methods by which you may meet the requirements of this Notice to produce data. First, you may commit to the Agency that you will develop the data. Second, you may share in the cost of developing the data.

Third, you may submit existing data which satisfies the requirements of this Notice.

If you choose to develop the required data yourself or to submit existing data, within 90 days of receipt of this Notice you must submit a completed Data Coversheet for each study to be provided.

Submitting Existing Data. If you submit existing data, you must include two copies of the study. You must also determine that the data satisfy one or more of the requirements imposed by this Notice. If the data do not, you still will be required to comply with this Notice, normally without any extension of the required date of submission.

Developing Data. If you choose to develop the required data, your submission should also indicate the protocols to be followed in conducting the study. If you wish to use a protocol which differs from the options provided by Section II of this Notice, you must submit a detailed description of the proposed protocol and your reason for wishing to use it. The Agency may choose not to accept a protocol not specified in Section II: rejection of the proposed protocol will not be a basis for any extension of time for submission of data.

Sharing Cost to Develop Data. If you choose to enter into an agreement to share in the cost of producing the required data but will not be submitting the data yourself, provide the name of the registrant who will be submitting the data. You must also provide EPA with documentary evidence that an agreement has been formed. Such evidence may be your letter offering to join in an agreement and the other registrant's acceptance of your offer, or a written statement by the parties that an agreement exists. The agreement to produce the data need not specify all of the terms of the final arrangement between the parties or the mechanism to resolve the terms. Section 3(c)(2)(B) provides that if the parties cannot resolve the terms of the agreement they may resolve their differences through binding arbitration.

Section III-C Other Courses of Action Under This Notice

There are additional options available in responding to this Notice. First, you may claim that one or more data requirements should not apply to your product. Second, you may amend your registration to delete the uses to which one or more data requirements apply. Third, you may ask for the voluntary cancellation of your registration. Fourth, you may request that EPA use its discretion and not suspend your

registration because of your good faith yet unsuccessful efforts to enter into an agreement for a joint data development/cost sharing program.

Applicable Data Requirements. If the data requirements of this Notice do not apply to your product(s), you will not be required to supply the data pursuant to section 3(c)(2)(B). If you claim that the data requirements are not applicable to your product(s), you must submit an explanation of why you believe they do not apply. You should also submit the current label(s) of your product(s) and a copy of the Confidential Statement of Formula of the product(s). If EPA determines that the data are required for your product(s), you must choose another method of meeting the requirements of this Notice in a timely

Voluntary Cancellation or
Amendment. You may avoid the
requirements of this Notice by
eliminating the uses of your product to
which the requirement applies. To do so,
you may choose either to request
voluntary cancellation of your
registration or to seek amendment of the
registration to delete the appropriate
uses. If you wish to amend your
registration, you must submit a
completed application for amendment, a
copy of your proposed amended
labeling, and all other information

required for processing the application. Discretionary Non-Suspension of Your Registration(s). You may also request EPA to exercise its discretion not to suspend your registration(s) although you do not comply with the data submission requirements of this Notice. EPA has determined that as a general policy, absent other relevant considerations, it will not suspend the registration of a product of a registrant who has in good faith sought and continues to seek to enter into a data development/cost sharing program but the other registrant(s) developing the data have refused to accept his offer. To qualify for this option, you must prove to EPA that you have made an offer to another registrant (who has an obligation to submit data) to share in the burden of developing that data. You must also provide us with a copy of that offer and proof of the other registrant's receipt of that offer (such as a certified mail receipt). Your offer must, in addition to anything else, offer to share in the burden of producing the data upon terms to be agreed or failing agreement to be bound by binding arbitration as provided by FIFRA section 3(c)(2)(B)(iii). In addition, you must demonstrate that the other registrant to whom the offer was made has not accepted your offer to enter into a cost-sharing agreement. The

other registrant must also inform us on a Summary Sheet that he will develop and submit the data required by this Notice.

In order for you to avoid suspension under this option, you may not withdraw your offer to share in the burdens of developing the data. In addition, the other registrant must fulfill its commitment to develop and submit the data as required by this Notice.

Section III-D. Existing Stocks of Suspended or Cancelled Products

EPA has statutory authority to permit continued sale and distribution of existing stocks of a pesticide product which has been suspended or cancelled if doing so would be consistent with the purposes of the Act. The Agency has not determined that such disposition of existing stocks for a suspended registration when a section 3(c)(2)(B) data request is outstanding would generally not be consistent with the Act's purposes. Accordingly, the Agency anticipates granting permission to sell or distribute existing stocks of suspended products only in exceptional circumstances. If you believe such disposition of existing stocks of your product(s) which may be cancelled or suspended because of this Notice should be permitted, you have the burden of clearly demonstrating to EPA that granting such permission would be consistent with the Act. Unless you meet this burden, the Agency will not consider any request pertaining to your continued sale and distribution of your existing stocks after cancellation or suspension.

If you expect to have your product suspended or intend to request a voluntary cancellation or your products(s) and wish to request an existing stocks provision, the following information must be included in your request:

 Demonstration that such a provision would be consistent with the purposes of FIFRA, and

 Explanation of why an "existing stocks" provision is necessary, including a statement of the quantity of existing stocks and your estimate of the time required for their sale and/or distribution.

Section IV. Inquiries and Responses to This Notice

If your have any questions regarding the requirements and procedures established by this Notice, please contact: Donald Mackey (703) 557–2708 or Geraldine Werdig (703) 557–7436.

All responses to this Notice must include a completed Data Call In Summary Sheet and the other documents required by Section III of this Notice, and should be submitted to: Geraldine W. Werdig, Chief, Data Call In Program, Registration Division (TS– 767), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, RE: Pyrethrin.

The Office of Compliance Monitoring (OCM) of the Office of Pesticides and Toxic Substances (OPTS), EPA, will be monitoring the data being generated in response to this Notice. Therefore, if you respond to this Notice by:

-committing to develop and/or submitting data,

 stating that data requirements are not applicable.

-submitting protocols or modifications to them, and/or

 requesting extensions in due date for submitting final reports.

Send a duplicate copy of the DCI Summary Sheets and coversheets with supporting information to: Laboratory Data Integrity Program, Office of Compliance Monitoring (EN-342), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460.

A duplicate copy of the actual studies need not be sent to OCM.

Sincerely yours, James Akerman for Douglas D. Canpt, Director, Registration Division.

Attachment D.—"Generic" Data Exemption Statement

EPA Product Registration No. — Registrant's Name and Address:

As an authorized representative of the registrant of the product identified above, I certify that:

(1) I have read and am familiar with the terms of the Notice from EPA dated ——concerning a requirement for submission of "generic" data on the active ingredient named ——under FIFRA Section 3(c)(2)(B).

(2) My firm requests that EPA not suspend the registration of our product, despite our lack of intent to submit the generic data in question, on the grounds that the product contains the active ingredient solely as the result of the incorporation into the product of another product which contains that active ingredient, which is registered under FIFRA Section 3, and which is purchased by us from another producer.

(3) An accurate Confidental Statement of Formula (CSF) for the above identified product is attached to this statement. That formula statement indicates, by company name, registration number, and product name, the source of the subject active ingredient in my firm's product.

OR

The CSF dated — on file with EPA is complete, current and accurate and contains the information requested on the current CSF Form No. 8570–4. The registered source(s) of

My firm will apply for an amendment to the registration prior to changing the source of the active ingredient in our product.

[4] I understand, and agree on behalf of my firm, that if at any time any portion of this Statement is no longer true, or if my firm fails to comply with the undertakings made in this Statement, my firm's product's registration may be suspended with FIFRA Section 3(c)(2)(B).

#### INSTRUCTIONS

Please Read Carefully Before Completing

The complete chemical composition of each pesticide must be known so it can be evaluated for registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended.

This form is designed for reporting the ingredients used in the formulation of a pesticide product. It must be completed and submitted with each application for new registration of a pesticide and application for amended registration if the revision involves a formula change.

Block A-Check the appropriate action for which you are submitting the form.

Block B-Number all pages consecutively. Enter on each page the total number of pages submitted. If more than one page is required, number them "1 of 2," "2 of 3," "3 of 3," etc.

1. Name and Address of Applicant/ Registrant-Enter the name and address of your firm or authorized agent.

2. Name and Address of Producer-Specify the name of the producer and the address of the site where this product will be produced.

3. Product Name-Specify the complete name of this pesticide product as it will appear on the label. This name must be the same as that which appears on the application form.

4. Registration Number/File Symbol-Enter the EPA registration number or file symbol, if known, for this product.

5. EPA Product Manager/Team Number-Enter the name and team number of the EPA Product Manager assigned to this product, if known.

6. Country Where Formulated-Specify the

country where this product is formulated.
7. Weight per Gallon/Bulk Density—For a liquid product specify pounds per gallon of formulated product. For a powder or granular product, enter the bulk density of formulated product (as used). Enter weight per unit if the product is produced as a tablet, briquette, or other uniformly shaped product.

8. pH-Enter the pH of aqueous formulations and products which are either dispersible or soluble in water. If not

applicable enter "N/A."

9. Flash Point/Flame Extension-Specify the flash point as determined by the regulations for pressurized products and/or products known or suspected to burn. State the results of the flame extension test for pressurized products including positive flashbacks.

10. Components in Formulation-List as actually introduced into the formulation. For each component in your formulation, provide the product name, commonly accepted chemical, the trade name, and the Chemical Abstract (CAS) number for each identifiable ingredient present in that product. CAS

numbers may be obtained from the Chemical Abstract Service of the American Chemical Society, Columbus, OH. For each original and alternate source of each active ingredient in the product, indicate the percent purity of the manufacturing use product, technical product, or other source of active ingredient. If one or more components will be obtained from more than one source, enter all alternate sources and all alternate EPA Reg. Nos. in blocks 10. 11, and 12 or on a separate attachment.

ATTENTION: (Special Instructions for Columns 10, 13, and 14). Any impurities greater than or equal to 0.1% (or less than 0.1% if the impurity if toxicologically significant) which are associated with the active ingredient(s) of a technical grade (manufacturing or reformulating use) product or an end-use product produced by an integrated formulations system should also be listed in column 10, and the corresponding amount, percent by weight, and upper certified limits in columns 13 and 14.

11. Supplier Name and Address-Provide the name and address of the supplier of each component in the formulation. If one or more components will be obtained from more than one source, specify the names and addresses

of the alternate sources also.

12. EPA Reg. No.-Specify the EPA registration number, if any, for each active ingredient in the formulation. If an unregistered active ingredient is used, have the suppliers submit the chemical specification, as well as any data required under 40 CFR Part 158.

13. Each Component in Formulationa. Amount-Specify the quantity of each component as actually introduced into the formulation. Units (e.g., pounds, grams, gallons, liters) should be expressed as used in the formulation. If the quantity is a liquid measure, enter the volume and the specific gravity or the pounds per gallon of the component.

b. Percent by Weight-Specify the weight percentage of each component in your formulated product. CHECK YOUR CALCULATIONS. Note that the weight percentage in many cases will not agree with that shown on the label ingredient statement

where the weight percentage of the pure active ingredient(s) must be declared.

ATTENTION: PRODUCERS OF MICROBIAL PRODUCTS-(Special Instructions for Column 13.b.) Please state the percent of active ingredient in British International Units (BIUs). International Toxic Units (ITUs), Polyhedral Inclusion Bodies (PIBs) (viruses), or Colony Forming Units (CFUs) (fungi), as appropriate, and include an equivalent statement of active ingredient per milligram, ounce, pound, etc., of product (e.g., a 50% active Baciullus thuringiensis product may have an equivalency value of 1.59 million Aedis aegypti ITU per pound of productl.

14. Certified Limits-These limits are to be set based on representative sampling and chemical analysis (i.e., quality control) of the product.

a. Upper Limit-Specify the maximum percentage of each active ingredient, intentionally added inert ingredient, and any impurities greater than 0.1%, to be permitted in the product.

b. Lower Limit-Specify the minimum percentage of each active ingredient and intentionally added inert ingredient to be

permitted in the product.

15. Purpose in Formulation-Specify the purpose of each ingredient both active and inert. (For example, disinfectant, herbicide, synergist, surfactant, defoamer, sequestrant, etc.) If space is insufficient, abbreviate.

16. Typed Name of Approving Official-Complete this item for identification of individual to be contracted if necessary.

17. Total Weight-Specify the total weight of the batch (column 13. a.).

18.-21-Complete these items for identification of individual to be contacted if

#### Attachment E.—Coversheet for Data Submitted in Response to Data Call in Notice

EPA Registration No. -Product name: Registrant's name: Name of active ingredient:

Type of submission:

☐ Intent to submit data in the future

☐ Original submission of data

Duplicate submission of data Type of study (if available): Title of study:

Name and address of laboratory(s) or individual(s) who performed (), are performing C, or will perform C the study.

Numbers used by registrant or laboratory to identify the study.

Date that study was completed (if or date by which the study applicable) will be submitted to EPA (if it is not enclosed): -

Date when you expect study (in life portion) to be initiated by laboratory and date when you expect in life portion to . In future progress be completed reports, indicate when the study (in life portion) was actually initiated and completed.

Note: You may also receive requests from other EPA offices for additional information on these studies. Should you receive such requests, you do not need to provide a copy of your response to the Data Call In Office.

Part III

# Department of Labor

**Employment Standards Administration, Wage and Hour Division** 

29 CFR Part 541
Defining and Delimiting Terms; Advance
Notice of Proposed Rulemaking

#### DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

#### 29 CFR Part 541

Defining, and DEelimiting the Terms
"Any Employee Employed in a Bona
Fide Executive, Administrative, or
Professional Capacity (Including Any
Employee Employed in the Capacity of
Academic Administrative Personnel or
Teacher in Elementary or Secondary
Schools), or in the Capacity of Outside
Salesman"

AGENCY: Wage and Hour Division, ESA, Labor.

**ACTION:** Advance notice of proposed rulemaking.

SUMMARY: The Wage and Hour Division is considering proposing revisions in Regulations, 29 CFR Part 541 which contain the criteria for exemption under section 13(a)(1) of the Fair Labor Standards Act (FLSA) with respect to employees employed in a bona fide executive, administrative, professional, or outside sales capacity. Those sections under review include the salary test levels as well as the duties and responsibilities tests contained in the regulations. Accordingly, this advance notice of proposed rulemaking is being published to obtain the views of the public on needed changes in the regulations. The Department is interested in the views of the public with respect to all aspects of the regulations. Comments are invited concerning the current definitions of terms relating to the salary, duties, and responsibilities tests for such employees, as well as the interpretations of such definitions.

DATE: Comments will be received until January 21, 1986.

ADDRESS: Written comments should be addressed to Herbert J. Cohen, Deputy Administrator, Wage and Hour Division, Employment Standards Administration, Room S-3502, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION: Section 13(a)(1) of the FLSA (29 U.S.C. 213(a)(1)) provides an exemption from the Act's minimum wage and overtime pay provisions for "any employee employed in a bona fide executive, administrative

or professional capacity (including any employee employed in the capacity of academic administrative personnel or teacher in elementary of secondary schools), or in the capacity of outside salesman (as such terms are defined and delimited from time to time by regulations of the Secretary of Labor .)". Regulations defining and delimiting these terms are codified in 29 CFR Part 541. The regulations provide that in order to be exempt as a bona fide executive, administrative or professional (EPA) employee, an individual must meet certain tests of job duties and responsibilities and must be compensated at no less than a specified amount on a salary basis.

On January 13, 1981, the Department of Labor published a final rule (46 FR 3010) revising the salary test levels for EAP employees to take effect 30 days after publication. (There is no salary tests for outside sales employees.) On February 12, 1981, a notice was published in the Federal Register announcing that the effective date of these regulations was stayed indefinitely (46 FR 11972). The purpose of that action was to allow the Department to fully review the rule before it took effect. The comment period was reopened and the interim salary tests which became effective April 1, 1975, were continued. On March 27, 1981, that notice was republished (46 FR 18998) as a notice of proposed rulemaking to invite public comments on the indefinite suspension of the January 13, 1981, regulations. Comments were also invited regarding the economic impact of the salary tests contained in the regulations. In view of a number of comments and petitions received from various industry groups regarding the duties and responsibilities tests and their interpretations as contained in the regulations as well as recent development in case law, the Department has concluded that there is a need for a more comprehensive review of the regulations. Accordingly, the indefinite stay of the January 13, 1981, regulations on the salary tests is continued and the comment period on this issue is reopened. In addition, the Department has decided to broaden the scope of the review to cover all aspects of the regulations for the reasons discussed below.

Employers in the food and lodging industry seek clarification of the regulations governing the exemption status of certain job functions performed by management personnel and proposals to change the regulations as they apply to management employees in that industry have been suggested.

Requests have also been received from the real estate industry, specifically the camp resort and timeshare condominium industry, for clarification of the outside sales employee exemption tests in the regulations. Also, recent decisions of the courts interpreting the "primary duty" test for exemption of executive employees raise questions concerning the Department's current interpretations in the regulations. In Donovan v. Burger King Corp., 672 F.2d 221 (1st Cir. 1982), the court ruled that the "primary duty" of managers means the "principal or most important" work performed by these employees, and not necessarily duties and functions requiring more than 50 percent of their working time. See also Donovan v. Burger King Corp., 875 F.2d 516 (2nd Cir. 1982). In Marshall v. Western Union Telegraph Co., 621 F.2d 1246 (3rd Cir. 1980), the court ruled that the "primary duty" test could not be applied on a workweek basis, or over any other specific timeframe, until such time as the regulations are amended to specify a timeframe during which this test must be

Accordingly, comments are sought from interested parties concerning the matters set out below, as well as any other issues of interest under this regulation.

#### I. Salary Tests

In order to be exempt under the current regulations, executive and administrative employees must be paid on a salary basis of not less than \$155 per week and professional employees must be paid on a salary or fee basis of not less than \$170 per week. In addition to these monetary tests, such employees must also meet certain duties and responsibilities tests. EAP employees who are paid not less than \$250 need only meet shortened duties and responsibilities tests under the regulations. Comments are sought with respect to the following matters related to the salary tests:

1. Should the salary test levels contained in §§ 541.1, 541.2, and 541.3 of Regulations, 29 CFR Part 541 be increased, and, if so, why? If so, to what levels should the salary tests be increased, and why those levels? Commenters should also address the economic impact of raising the salary tests.

2. Should the salary tests be eliminated? If so, what tests should the Department rely on to determine applicability of the section 13(a)(1) exemption? What would be the economic impact of the elimination of the salary tests?

- 3. Should the salary test levels be established based on a relationship to (i.e., a specific multiple of) the minimum wage required by the FLSA (currently \$3.35 an hour)? If so, what should that relationship be, how should the relationship be calculated and for what periods of time should such a salary level remain in effect?
- 4. Should the regulations also provide separate salary test levels for employees or retail or service establishments since sections §§ 541.1(e), 541.112, 541.2(d), and 541.209 provide a higher tolerance for nonexempt work for executive and administrative employees of such establishments to conform with Congressional intent? If so, what should the relationship be to the salary tests for other industries?
- 5. Should the regulations permit the inclusion of commission earnings in meeting the salary tests without a "guarantee" as discussed in § 541.118(b)? If, so, how and to what extent should such earnings be included?
- 6. Should the regulations continue to require that the salary test levels be "guaranteed"? If not, what measure should be adopted to determine if the tests are being met?
- 7. Should an employer be able to take a credit toward meeting the salary tests for lodging, meals, or other facilities furnished to EAP employees? If so, to what extent should the value of such facilities be counted toward the applicable salary tests?
- 8. Should the regulations permit the inclusion of bonuses or employee receipts from profit sharing plans in meeting the salary tests? If so, how and to what extent should such compensation be included?
- 9. Should the regulations permit consideration of compensation guaranteed on an annual basis, including compensation other than basic salary? Further, should it be assumed that a pro rata share of such compensation is allocable to each workweek in the year for the purposes of meeting the weekly salary test requirements in the regulations?
- 10. Should the Department recognize individual State and local government civil service systems for classifying EPA employees in applying the exemption to employees of such governments? Such recognition would not alter the traditional FLSA principle that an employer who claims an exemption under the Act has the burden of showing that it applies.

#### II. Duties and Responsibilities

- 1. Should the duties test be changed or eliminated? What would be the economic impact of such a proposal?
- 2. Should the present duties tests for EAP employees be revised to eliminate current limitations on the amount of nonexempt work which may be performed without the loss of their exempt status? For example, under the current rule executives who are paid a salary of at least \$155 per week are exempt if their primary duty is management and supervision and if they spend no more than 20 percent of their time on nonexempt duties (40 percent in the case of retail or service establishments). However, executives who are paid at least \$250 per week (the "upset salary") are not subject to the 20 percent (or 40 percent) limitation on nonexempt work.
- 3. Should a special salary test be established which would provide that any EAP employee earning at least that amount and performing some executive, administrative or professional type functions would be exempt regardless of the employee's other duties and responsibilities? If so, how and at what level should such a salary test be established? What safeguards would be necessary in order to preclude the loss of minimum wage and overtime protection for highly paid employees. such as certain mechanics and technicians, to whom Congress did not intend the section 13(a)(1) exemption to apply?

Under the present rule, employees who are paid at least \$250 per week are not subject to the 20 percent limitation on nonexempt work, but remain subject to the criterion of having management and supervision as their primary duty. For example, executives paid at least \$250 per week must have management as their primary duty and must supervise two or more other employees.

- 4. Should a standard time frame be established for determining whether an employee has met the primary duty test for exemption contained in §§ 541.1(a), 541.2(a), and 541.3(a) of the regulations? If so, should such a time frame be a week, a month, or some other length of time?
- 5. Should the primary duty test concept as discussed in §§ 541.103, 541.206, and 541.304 be changed to emphasize an employee's "primary responsibility" as opposed to "time spent" in various activities encompassed within the scope of his/her job? If so, how should responsibilities be defined to distinguish a bona fide manager or executive from

- an employee engaged in routine nonexempt work?
- 6. Should the "sole charge" standard in \$ 541.113 be revised or abandoned? Currently, executives who are paid a salary of at least \$155 but less than \$250 per week are subject to a 20-percent limitation on nonexempt duties (40 percent in the case of retail or service establishments). Executives who are in sole charge of an independent establishment or a physically separated branch establishment are not subject to this limitation.
- 7. Should a separate and special definition of duties be established in § 541.1 for the retail or service industry? If so, why? Are there inherently different or unique duties performed by managers in that industry to warrant such an exception? Are there other industries which should be given such separate treatment? If so, why?
- 8. Do the definition of "administrative" employee in § 541.2 and the interpretations in §§541.201 through 541.215 need to be clarified in any specific areas?
- 9. Should consideration be given to recognizing additional occupations as "professional" within the meaning of section 541.3? For example, should systems analysts and computer programmers employed in the data processing field with bachelor degrees in computer science or related fields be recognized as exempt professional employees? Also, for example, should newspaper reporters, court reporters, aircraft pilots and flight engineers be recognized as exempt professional employees? Are there occupations in the health science, medical, and related fields, for which at least a bachelor's degree and accreditation are customarily required, that should be recognized as "professional" within the meaning of the regulations? Finally, should the definitions of "educational establishment" and "teachers" be clarified?
- 10. Should consideration be given to revising the definition of "outside sales" employees contained in §§541.5 and 541.500 to take into account sales practices in the real estate industry or other industries? In particular, how does the concept of sales away from the employer's place of business apply in the real estate, camp resort, and time share condominium industries?
