Refresh your future

with HPE ProLiant Gen11 and Windows Server 2022

Microsoft has announced end of support on Windows Server 2012/R2 on **10 October 2023**. After this date, customers will no longer receive security updates - and new hardware and software may not work on their old servers. Upgrading to HPE ProLiant Gen11 with Windows Server 2022 ensures business continuity while opening up a world of possibilities.
