SDM Standalone Adapter
Standalone operation for SDM devices

An external adapter which allows standalone operation of SDM slot-in computers and other SDM devices which operate externally from connected large format displays, projectors and desktop monitors.

The SDM Standalone Adapter allows SDM devices standalone operation for set-up, testing, servicing as well as for permanent operation with any displays without SDM interface.

Standalone Adapter front

Delivering Genuine Benefits

- Retrofit or upgrade displays without SDM interface.

- Ideally suited for 24/7 operation.

- Power supply and full PC-functionality

- Comprehensive connectivity: 2 x USB, HDMI, DisplayPort, Audio & RS232.

- High quality and wide range of use: Industrial grade components and construction.
