logitech

Outstanding picture quality & detailed reproduction for business

Harness the power of rich media content for your organization with BRAVIA Professional Displays.

androidtv

Cognitive Processor XR™

World's first processor with Cognitive Intelligence

Our BRAVIA XR Display takes vision and sound to the next level with the ingenious Cognitive Processor XR. It understands how humans see and hear, providing a whole new experience that immerses you completely in the scene.

4K HDR Processor X1™

One chip, incredibly real

With Object-based HDR remaster and Super Bit Mapping 4K HDR technology, our new 4K HDR Processor X1 reproduces more depth, textures and natural colors than Sony's entry level 4K Processor X1. You'll see pure colors at higher brightness levels for exceptionally realistic pictures.

Cognitive Processor XR™

XIR Color

A wide palette of naturally beautiful colors

See colors that are natural and beautiful to the human eye. The Cognitive Processor XR enables our unique display to access a wider palette and reproduce each color with the subtle differences seen in the real world. With extended hue and saturation, vivid shades and realistic texture can be seen.

XIR Contrast

Real life depth with deep blacks and intense brightness

analyzes data, enhancing pictures in the same way that the human eye focuses for real life color and depth. With XR Contrast Booster, bright areas are brighter and dark areas darker -eliminating details overwhelmed by shadow or lost in blown-out highlights.

4K HDR Processor X1™

Intelligent motion processing for fast-moving, blur-free scenes

stays smooth, bright and clear with no blur.

Picture

Color

XR Motion

Unique 4K X-Reality PRO picture processing technology upscales every pixel for remarkable clarity. Advanced noise reduction techniques and a special pattern database ensure every scene is full of lifelike detail.

Watching fast-moving movies just got a whole lot better. Our Cognitive

Processor XR with XR Motion Clarity™ cross analyses data to ensure action

TRILUMINOS 🕮

By widening the color spectrum, TRILUMINOS powered by our X1 processors reproduces more colors than a conventional display. It analyzes and processes data in every image to make colors even more natural and precise so pictures are closer than ever to real life

XR Clarity

Recreating lost texture, the intelligent way

Whatever the content or source, you'll clearly see them close to 4K resolution with XR

4K Upscaling. Our Cognitive Processor XR accesses a vast amount of data,

intelligently recreating lost textures and detail for real world pictures.

Feel breathtaking contrast, just as in real life. Our Cognitive Processor XR cross

Contrast

Imagine seeing a white object in a dark environment on your display: on an edge-lit or direct-lit display, you would sacrifice the brightness of the object for a darker background (or vice versa), and the background would likely appear blue or grey. On a Sony Full Array LED display with local dimming, you get a beautiful, natural picture with crisp brightness and an authentically dark background.

Clarity

On some screens, sports and fast-action scenes can seem to go by in a blur. Our latest X-Motion Clarity™ technology keeps everything smooth, bright, and clear. Each "blink" is individually controlled and its duration optimized, while brightness is boosted when needed, so you won't miss a thing.

Expanding the possibility of your business with the new lineup of BRAVIA Professional Displays

Our extended lineup brings Sony image quality to a wide range of commercial applications and environments.

Sony's largest professional display model with supreme picture quality features

100"

The 100" BZ40J delivers supreme picture quality, high contrast, and more detail for large-sized digital signage and meeting rooms.

Small, high picture quality 32" 4K display model

Small in size, but big in picture quality for meeting contents details even in huddle space environment with new 32" BZ30J

Professional Design

Sutable designs for professional use such as Digital Signage

Logo Position for Public Installation

Sony logo is printed to top-right side bezel for public installation such as digital signage and it eliminates the sideways logo in portrait orientation.

Four-sided Uniform Bezel for Portrait Installation * for BZ40J only

Carrying Handle

Cable Management

Neatly bundles the power cable, HDMI and other cables with a cable clamper

32" AC **Adapter Holder**

Smart installation by adapter holder even in limited space

Features for Professional Use

Professional Mode

New professional features let you disable input or remote control, remove labels and block buttons; customize and store display settings and features, add security then copy them easily from display to display via USB flash memory.

Flexible Content Layout with HTML5

The BZ Series offers built-in support for the HTML5 application platform, so it's possible to use HTML5 interactive signage content without requiring a set-top box or PC. The content screen can be freely laid out using the 4K video, pictures, or even with the HDMI input.

IP Network and Serial Communication Controls

The BZ Series is controllable both via IP network (wired/wireless LAN) and RS-232C. This makes it possible to incorporate the displays into a variety of existing systems, such as in offices and as eye-catching signage.

Wi-Fi 5Ghz / Apple AirPlay & Chromecast built-in™

Discover a new world of possibilities with the new BRAVIA functionality. Easily mirror content onto your BRAVIA Pro Display using Apple AirPlay or Chromecast built-in, and take advantage of Wi-Fi 5Gz connection.

World Comparison

Peak Brightness: 850 cd/m²

Brighter highlights and deeper blacks

Multiple LED zoning allows Full Array display models to adjust and

create contrast depending on the scene, resulting in more light

where brightness is needed, and less light where darkness is

Picture Quality Features

Full Array LED

needed.

High brightness, high

application content

contrast images for business

The BZ40J incorporates the Cognitive Processor XR that uses human perspective analysis to cross analyze thousands of elements at one to create an intensely immersive picture.

XR Trilluminos Pro

Powered by our Cognitive Processor XR, this display reproduces color it in a way that humans find beautiful. See a wider palette of colors with an enhanced range of hue and saturation, allowing natural shades and precise details to be seen, even in dark scenes.

XR 4K Upscaling

Powered by our Cognitive Processor XR, this display takes 2K signals close to true 4K quality for incredibly real and immersive viewing. XR 4K Upscaling accesses and utilizes a vast amount of data, analyzing patterns in scenes and recreating subtle

XR Motion Clarity™

On some screens, fast-moving scenes can seem to go by in a blur. Our latest LED XR X-Motion Clarity technology keeps everything smooth, bright and clear. Each frame is individually controlled and its duration optimized, while brightness is boosted when needed, so you won't miss a thing.

XR Contrast Booster

By precisely balancing light output across the screen, dimming some areas and boosting others, the XR Contrast Booster adjusts brightness for higher peaks in glare and deeper blacks in shadows. As bright areas are brighter and dark areas darker, scenes look more real with extra depth and detail.

Picture Quality Features

Motionflow XR

Less blur, even in fast scenes

On some screens, sports and fast action scenes go by in a blur. Our Motionflow technology keeps movement smooth and clear by creating extra images between images and black images between scenes. The result? Less blur and afterimage, more flowing motion.

Color Reproduction

Our displays with a wide colourgamut and unique TRILUMINOS PRO™ algorithm can detect colourfrom saturation, hue and brightness to reproduce natural shades in every detail. You'll enjoy coloursthat are closer to those seen in the real world.

*1 Please refer "Wall-Mount Installation Manual" for condition details *2 As of June, 2021 *3 The actual capacity available to the user will vary depending on OS and installed software requirements. Google, Google Play, Android TV, Chromecast built-in and other marks are trademarks of Google LLC.

Options & Accessories

BRAVIA Meeting (WQ-BM1)

BRAVIA Meeting enables centralized management of displays and interactive meetings via a network. The optional software, BRAVIA Meeting, enables remote monitoring of multiple displays, power control, and configuration changes. In addition, displaying PC screen shots wirelessly and annotation which enhances in-meeting collaboration.

BRAVIA Signage (WQ-BS1)

BRAVIA Signage simplifies management and distribution of signage content across multiple networked BRAVIA displays. Group displays, schedule content playout and more – everything's included with this highly flexible package.

Simple Media Player 2 (WQF-USMP2) / Free of charge

Simple Media Player 2 is an easy-to-use standalone signage player application, allowing you to display video, photos and HTML5 content directly from a connected USB flash memory.

It's quick and intuitive to set up screens, edit and preview playlists and schedules using the BRAVIA display's remote controller.

FWA-CE100

Full HD USB Camera & Microphone exclusively designed for BRAVIA 4K Professional Displays.

STP-IR200 Series

Touch overlay kit for 55", 65", 75" BRAVIA 4K Professional Displays.
