## Limestone Flock

With a new business venture on the horizon the Weston family have come to the difficult decision to cease breeding pedigree Texels for the time being. The entire Limestone flock will be sold over the next 12 months, resulting in this first stage of the dispersal of all aged and shearing ewes, with the 2018 crop ewe lambs to be sold later.

The Limestone ewes are run naturally on grass at 1000ft in the Peak District along commercial lines with concentrates only being feed in the last week before lambing.

Purchasers can be confident that ewes are genuine and haven't been over fed prior to the sale.

The Limestone flock was founded in 2006 with the purchase of 10 ewe lambs from the Corriecravie flock. Additional foundation ewes of note were purchased from Alwent, Cambwell, Claybury, Craighead, Stainton and Heyworth Lodge. The Alwent ewe NTA07 360 founded a strong female line in the flock, which resulted in many impressive ewes. She was great grand dam of prize winning Limestone Yasmin WFL 1600177 and also tup lambs selling up to 1600gns at Carlisle 2018. A small amount of embryo work has been carried out in 2018 which resulted in some excellent progeny from WFL 1600177 to Drumgooland Yabba Dabba.

# **BELTEX**

## **THE STANDARD OF EXCELLENCE**

### **General Appearance**

The Beltex is a medium sized sheep, long in body. It is wedge shaped from a narrow shoulder to a distinctive large double-muscled hind quarter.

### **Head**

The head is generally white in colour but may have black, blue or brown shadings or patches. Colour is irrelevant to quality. The fore face is short and thick.

### **Neck**

The neck is thick and short.

### **Body**

Well muscled shoulder. A wide back and long barrel shaped body

### **Gigots**

The distinctive characteristic of Beltex Sheep is the double-muscled hindquarters, sloping pelvis, low set tail, deep flushed, well rounded and full of meat. The excessive hindquarter development when compared to the line of the shoulders gives a wedge shaped appearance.

### **Legs**

Sheep should be mobile and capable of natural service. Joints should be straight and sound. Legs are usually white but colour is relevant. Feet tight. Pasterns upright. Fine bone structure.

### **Fleece**

Tight, dense of medium staple length, affording a good protective birth coat to the lamb. A medium to tight fleece is tolerated.

### **Bone**

Fine bone is a desirable characteristic.

### **Teeth**

Teeth are scored on a 1 to 5 scale, where 1 is extreme and 5 extreme overshot, with 3 being perfect. Only animals with a score of 2, 3 or 4 are considered acceptable.
