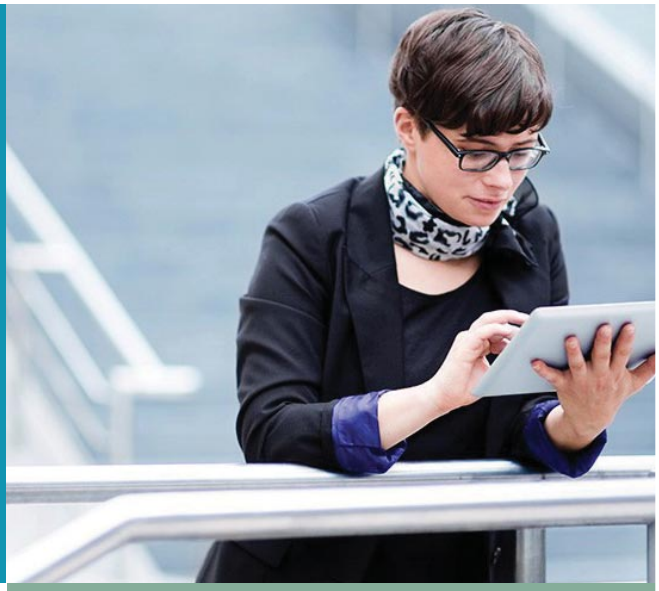
We are XMA.

This document contains commercially sensitive information and should not be shared (wholly or in part) with any third party unless prior agreement is provided from Scottish Procurement.

We are XMA.



We deliver innovative IT solutions that enhance how people learn, teach, govern, deliver healthcare and do business. We are a team of over 250 specialists, based across the UK who bring together over 30 years of experience, world class vendor partnerships and broad service delivery capabilities on the ground and in the cloud.

Part of an independently owned British group, we are based in Nottingham, Reading, Halifax, Glasgow, Cwmbran and London. We have national reach and a local touch. Our UK-based data centre and ISO:27001 accreditation means we can host your data, applications and infrastructure in the cloud, securely.

We are a compliant route to purchase, with presence on local and national frameworks for hardware supply and services. Our partners are the biggest names in computing, infrastructure and print. We take their products and build, deliver and maintain solutions that work for you.

About the Framework

XMA was awarded The Scottish Government National Framework for Tablet Devices in March 2013. The framework enables public sector organisations in Scotland to purchase from the enclosed range of mobile devices.

Details of the framework are available on the Scottish Government website:
http://www.scotland.gov.uk/Topics/Government/Procurement/directory/IThardware/tabletdevices

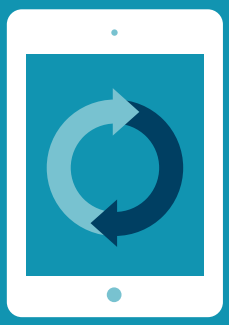
EXCLUSIVE OFFER

A collaborative contract placed on behalf of the Scottish Public Sector by Scottish Procurement



Trade in your ipad with Tech-Trade and XMA

XMA have teamed up with Scotland-based Tech-Trade to offer highly competitive trade-in pricing on iPad.

Our site makes it easy to search for your iPad model, select the condition and receive an instant valuation. If you're happy, select a date, Teach-Trade will arrange for collection of your devices and provide written confirmation of their trade-in offer. Should you go ahead, a credit will be made available with XMA against future purchases.

FAQs

Q: What devices are eligible for trade-in?
A: iPad, iPad 2, iPad (3rd Generation), iPad (4th Generation), iPad mini, iPad mini 2 and iPad Air. If you're not sure about which devices you have, visit http://support.apple.com/kb/HT5452.

Q: Can I trade-in broken/faulty devices?
A: Yes, however the trade-in value will be reduced based on the unit condition.

Q: What is the minimum number of devices I can trade-in?
A: The minimum is 20 devices. These can be of any combination of eligible iPad models.

Q: Is there a cost to send my devices to Tech-Trade?
A: No, you will receive all packaging delivered to your specified location via courier or our own transport. Once you have packaged all devices a courier or our own transport will collect the order from your specified location.

Q: What happens to the devices I trade-in?
A: The used devices are thoroughly checked by a technician to assess their condition. Those in good working order are data wiped* and resold on secondary markets. If the device cannot be economically repaired, it will be recycled in an environmentally responsible way.

*Data disposal is achieved using Tabernus Enterprise Erase Mobile which is certified and approved by CESG (The information arm of GCHQ), CPA, NATO and The Defence INFOSEC Product Co-Operation Group UK. The software augments existing factory reset and re-flashing processes.

Q: How long does the process take once my devices are collected?
A: From the point at which your devices are received at our facility, we will process and grade all devices within 5 working days. If the device is received in the condition stated at the point of processing the transaction we will authorise a credit note with XMA.

Q: Who are Tech-Trade?
A: The Tech-Trade programme is operated by Games Centre Limited in association with XMA.

For further FAQs and full terms and conditions please visit the Tech-Trade website.

Options available across all devices

Accessories and Upgrades

We offer a whole range of accessories for mobile devices to ensure you get the most out of your purchase. From protective cases, to power adapters and batteries, earphones, headphones, keyboards, charging units, adapters to connect your device up to all sorts of displays and projectors, we have it all. There are new accessories appearing on the market all the time and we keep our ears close to the ground to make sure we can supply them for you. If you are looking for a device with additional storage or extra functionality such as cellular connectivity then we can offer these too.

Leasing

XMA can provide a 2 year operating lease option for all devices, including accessories. With an operating lease you pay a consistent lease amount across 24 months and have various options available at the end of the period - you can buy the equipment at a Fair Market Value, return the equipment or extend the contract. The lease option includes insurance against accidental damage and theft.

Insurance

When purchasing devices outright, XMA can provide options for accidental damage and theft insurance. The cover offered has no excess and the device is covered while at home and even on holiday.

Warranty Extension

Every device offered on the framework includes a 2 year collect and return warranty, all administered by XMA via our helpline and online framework portal. XMA can extend the term of the warranty to 3 or 4 years and provide onsite options. Where data security is especially important we can provide options that allow you to retain the storage from a faulty device or have us destroy it onsite.

Services

XMA can offer a number of services to assist in the deployment of mobile devices in your school or institution. We can asset tag or laser etch (minimum 10 units) your devices with asset numbers and your institution's logo, pre-configure your devices with applications and settings and store your device in our bonded warehouse for staged rollouts.

Mobile Device Management

XMA can advise you on the most appropriate management solution for your organisation. We work with a number of Mobile Device Management partners who offer management across all major mobile platforms and have both hosted and on site options.

Get Advice and Order

XMA's team in Glasgow can advise you on the devices available under this framework as well as associated accessories and services. Contact the team by phone or e-mail using the details below.

Call **0845 688 8775 Monday to Friday, 09.00 - 17.30**
Visit **scotland@xma.co.uk**

Our dedicated ordering portal will be available soon, offering access to pricing, online ordering, order tracking and more. Watch this space.

Delivery and Returns

Standard items will be delivered within 10 working days. XMA's customer service team can advise you on the status of your order and manage returns. Contact the team by phone or e-mail using the details below.

Call **0115 846 4656 Monday to Friday, 09.00 - 17.30**
Email **customer.services@xma.co.uk**

Framework Team

Framework Account Managers

For advice on which of the framework devices is best for your institution, speak to our Framework Account Managers. This team can also provide help on any accessories and services that you require to go alongside them.

About optional MendIT insurance

MendIT Insurance is suitable for all makes and models of tablets and notebooks, providing protection against those everyday mishaps that occur at home, work or on holiday. Whether physical, liquid, fire or flood damage, MendIT insurance has you protected.

With an easy claims process and fully trained and accredited engineers, MendIT aim to have your device either repaired, or replaced and returned to you within the shortest time possible.

Examples of Accidental Damage can be dropping your device on to a hard surface, such as a wooden or concrete floor, resulting in a cracked/smashed screen/case. Liquid damage can consist of either a drinks spillage or caught in the rain.

Provision and Process

- You will receive insurance documents and a policy number after product registration
- You will receive worldwide cover and no excess on the policy
- To make a claim online visit www.compucover.co.uk/claims
- Claims must be reported within 14 days of the event
- MendIT will arrange collect of the defective device, repair and return it to your location (UK nationwide)
- MendIT will incur all repair and logistical costs during this process
- Examples of accidental damage cover include drops, liquid damage and accidental breakage

MendIT Insurance must be purchased during the manufacturer's standard warranty period (check guidance with the device or on the manufacturer's website). Your policy will begin from the date you purchased your MendIT insurance.

MendIT is an Appointed Representative of Summit Insurance Services Limited, and regulated by the Financial Services Authority (FSA). Summit Insurance Services Ltd's FSA Register No. 300172

A collaborative contract placed on behalf of the Scottish Public Sector by Scottish Procurement

Wi-Fi and Infrastructure

XMA work with world class infrastructure partners and our specialist team will either confirm that your existing network infrastructure is suitable for your expanding mobile device rollout or advise on appropriate upgrades. We offer wireless solutions that can grow with your deployment, offering secure access to network services and appropriate access to the internet. We design these solutions to provide coverage and capacity to support your deployment now and as it expands in the future.

Featured infrastructure partner – Aerohive

Public sector organisations require "business-grade" wireless networks – those that are managed centrally and offer sophisticated features for scaling the network throughout buildings, campuses, and local authorities. Aerohive cost-effectively delivers these features – and more – so you can take networking to the next level.

Features	Benefit(s)
• Simple, Zero-Touch Deployment Model (for routers and Wi-Fi networks	• No need for wireless or networking expertise • Just plug in the router or access point • The device will "phone home" and get its configuration from a single, centralized HiveManager • Changes are automatically pushed to the device
• Centralized management across multiple sites from a single console or online service	• Same HiveManager for routers and access points • Unified wired/wireless policies enable the same experience for both wired and wireless access • Offers easy-to-use management for streamlining operations and reducing opex (operating expenses)
• Fast, Secure Roaming and Identity-based Security, enforced in every access point and router as a user connects	• Provides enhanced security above and beyond 802.11's inherent authentication and over-the-air encryption including integrated firewall, WIPS, VPN, • RADIUS, and Active Directory support • Users can easily and securely roam between access points and the router with no loss in connectivity.
• Mesh Technology for AP-to-AP Direct Communications	• Ensures highest levels of network availability and resiliency, as network "self heals" around any failure points • Eliminates need to cable APs to switches in difficultt-to-wire locations
• Simple Pricing Model and No Feature Licensing	• Grows with your needs (Linear cost curve as you grow) • Eliminates budget "surprises" as you need additional features for new applications (i.e. QoS, VPN, mesh)
• Secure Guest Access with Integrated Captive Web Portal	• Provides easy-to-deploy guest access to access points or routers • Offers multiple methods to ensure acceptable use or authentication • Provides protection against intrusions by temporary users
• Subscription Model for Branch Networks	• Provides maximum flexibility for deploying branch networks • Eliminates pre-staging and remote IT expertise requirements • Built in network-based mobile device management
• Dynamic Airtime Scheduling	• Optimizes performance for each wireless traffic type, including latency-sensitive voice and video, as well as fair network access for all 802.11 client types (11a/b/g/n) • Prevents slow clients from impacting the performance of fast clients

Device Management

As mobile devices like tablets are designed to be used on the move, it is important to consider how to manage them and deliver apps to them when they are outside of your network. Mobile Device Management (MDM) solutions allow you to monitor, support and secure mobile devices over the air. With iPad, MDM can also manage and deploy apps purchased from Apple's Volume Purchase Programme.

Featured MDM partner - AirWatch

Government departments at local and central levels are embracing mobility. With the increase in number of mobile devices and applications used by public sector workers, IT administrators are being challenged to ensure public sector security requirements are being met. AirWatch is helping government departments address security concerns surrounding enterprise mobility while also considering tight budgets and resource constraints.

Enhanced Security

AirWatch enables government departments to leverage advanced mobile devices and applications without compromising security and compliance. AirWatch's advanced security capabilities include strong user authentication using AD/LDAP, certificate-based access to enterprise Email, Wi-Fi and VPN networks, and secure distribution of apps and documents. AirWatch meets government compliance standards and ensures your confidential data is protected.

Compliance Monitoring

AirWatch constantly monitors your device fleet for unauthorised users, compromised devices, blacklisted apps and other risks. When a threat is identified, AirWatch can block access to enterprise email, applications and resources, lock, and wipe a device automatically through our configurable compliance engine.

Secure Content Locker

With the AirWatch Secure Content Locker mobile application, government agencies can now securely distribute and access sensitive documents from their mobile device. Transmit documents over industry standard 256-bit SSL encrypted connections and prevent access for unauthorised users or non-compliant devices. Control a user's ability to edit, share or open files in unauthorised applications, and remotely wipe documents from the console.

VPN On Demand

AirWatch provides the ability to provision a VPN profile to devices to automatically configure access to corporate networks and file systems. Our advanced VPN On Demand capability allows mobile users to securely access specific websites through a VPN tunnel. This process is invisible and seamless to the user, allowing them to continue working without interruptions.

Benefits for Public Sector:

- Enforce mobile security, compliance, and maximise Data Loss Prevention
- Implement a secure way to distribute and access confidential documents
- Ensure protected sites are accessed through a secure VPN tunnel
- Implement a scalable solution to support your growing mobile deployment
- Adopt a flexible platform that supports corporate devices and BYOD/CYOD programmes
- Take advantage of flexible deployment models and competitive pricing

Contact your XMA account manager who can arrange a webinar to discuss further details.

We are XMA.
