EBV A brief explanation:

Birth Weight	Negative values indicate animals that will produce smaller lambs at birth.
Eight Week Weight	Breeding potential for lamb growth rates from birth to 8 weeks of age.
Shearling Weight	Choosing animals with high figures for this trait will increase mature size
Litter Size	The breeding potential to produce prolific female progeny.
Litter Size Reared	Positive values indicate ewes who will rear more lambs.
Maternal Ability	Maternal component of 8wk measurement. Higher figures mean a ram's ewe lambs will perform better as mothers (milking ability).
Scan Weight	Breeding potential for lamb growth rates to 21 weeks (age at scanning). Selection of breeding stock with high scan weight EBVs will result in animals with heavier carcasses at a constant fat class or leaner carcasses at a constant age.
Muscle Depth	Choosing animals with high muscle depth EBVs will increase lamb muscularity and hence the lean meat content of the carcass.
Fat Depth	Negative values indicate animals with lower fat content which will produce leaner carcasses, or which can be taken to higher weights without becoming over-fat.
Mature Weight (PreMating)	An indication of breeding potential for mature ewe weights at mating.
BCS (PreMating)	Breeding potential for body condition score, higher values indicating breeding lines tending to have higher BCS at mating time.
BFL Index	Highlights superior breeding stock for a specific objective.

Performance Mules

Welcome to the Bluefaced Leicesters breeding and marketing initiative of Mules sired by performance recorded Bluefaced Leicesters in the top 50% of the breed. As we are aware there is an increasing demand for a scientific approach in many areas of agriculture and sheep farming is no different.

Our aim is to provide the sheep industry with high performing, profitable ewes which benefit from the maximum amount of hybrid vigour. It has been proven that the benefits of hybrid vigour are at their highest when two breeds are used and that it decreases as more breeds are added to the mix. The crossing of the Bluefaced Leicester with any pure hill breed is a proven method of maximising the benefits of hybrid vigour, producing mules for professional farm managers and shepherds. We now want to work with Mule breeders to develop and identify Performance Mules .

In 2014 the Welsh Mule Society were the first group of breeders to take up this initiative and offer Performance Mules at their association sales. Mule breeders will again this year be able to market their female Mules as 'Performance Mules' if they meet a few simple qualifying criteria.

How to qualify as a Performance Mule

Mule breeders will need to work with the Bluefaced Leicester Association and their Mule society to formally identify Mules sired by above average index Performance recorded Bluefaced Leicesters.

- 1) All Mules in any one pen must be sired by a Bluefaced Leicester with an index in the top 50% on the year of purchase, according to Signet performance recorded data. This data is also available on the BASCO website.
- 2) Each Mule breeder can contact the Bluefaced Leicester Association for a certificate which highlights the identity of the Qualifying Ram or rams used. These certificates can be displayed on the pens at the Mule sales.
- 3) All Performance Mules will be identified by the initials 'PM' on their ear tags in a similar way as the Bluefaced Leicesters use the initial 'L'. Please contact your tag supplier to produce appropriate tags for 2023 born Performance Mules.

The Mule societies and Bluefaced Leicester Association will continue to work together as this initiative develops. Please contact the Association office should you require Certificates for your Qualifying rams.

Class 3 – 117 Females Including The Full Dispersal Of The Mendick Flock On Behalf Of The Late Mr John Dykes

Foreward The Mendick Flock

John Dykes started breeding Bluefaced Leicester sheep at South Slipperfield in 1990. The primary purpose of the small flock was to produce rams for use on the commercial stratified flock.

It soon became apparent that the rams could be used as lambs then sold the following year as tried and tested shearlings. In 1993 John Purchased a foundation of seven females from the Mount Benger flock and that's when the 'Mendick' flock became registered.

For the following twenty-five years the shearlings were sold primarily at Kelso reaching a high of £6500 in 2018 and another £3200 going on to become the RHS breed champion and reserve interbreed champion in 2017. As the commercial flock at home changed John started to sell his rams as lambs and reached a high of £3200 at Carlisle in 2021.

When the breed divided John was resolute at staying traditional and was convinced

that the 'true blues' would regain traction again one day even though many fellow breeders were changing towards the 'Crossing type'.

Despite enjoying the show and sale accolades Johns focus was always about the commercial traits so he was particularly proud of establishing a steady flow of repeat customers over the years.

This complete dispersal of the entire Mendick flock is as a result of the sudden and unexpected death of John in July 2023. It goes without saying that John would be wishing the best of luck to all who manage to buy a piece of his flock and thanks you for keeping the Mendick name alive.

Thank you for showing interest.

The Dykes Family.
