### B Pop-Up Lock Bags

Stores coin and currency, checks, and documents. Six-wafer lock provides moderate security to contents. Durable fabrics and double stitched seams make these bags withstand the impact of the night deposit drop, as well as daily abuse. Built-in lock has spring-loaded action, which requires no key to lock it. The lock is keyed differently with no master key. Other keying options are available when specified (see keying options below). Two keys, ideal for multiple bag users or spares, are included with each bag. Master-keying option reduces the number of keys to maintain. The bag includes silk screen imprint (one color/one location), consecutive numbering (one color/one location), and framed I.D. window and address card. Fabric color choices on pages 16-17.

## 7-Pin Transport Bags

7-Pin Transport Bags carry nearly anything comfortably and securely. Each bag is constructed with reinforced seams, pick-resistant zipper, metal shield and heavy-duty vinyl around the lock to provide longevity and security. Bags are available in several colors and a silk-screen imprint (one location, one side) is included. Bags also include an I.D. window and address card, and two keys.

The seven pins inside the tumbler make the lock virtually pick-resistant. The lock is unique because the key cannot be released until the lock plunger is pressed down. This feature prevents users from accidentally locking their keys inside the bag.
