Cisco Technical Support Services Components	
Feature	
Feature	Benefits

Software support	Software support offers maintenance and minor and major updates for licensed feature sets. Downloading new maintenance releases, patches, or updates of Cisco IOS Software helps enhance and extend the useful life of Cisco devices. Through major software updates, organizations can extend the life of equipment and get the most from application technology investments by: Adding new functions that, in many cases, require no additional hardware investment Increasing the performance of current functions Enhancing network or application availability, reliability, and stability
Cisco TAC support	With more than 1000 highly trained customer support engineers, 390 Cisco Certified Internetwork Expert (CCIE) experts, and access to 13,000 research and development engineers, Cisco TAC complements your in-house staff with a high level of knowledge about data, voice, and video communications networking technology. Its sophisticated call-routing system quickly routes calls to the correct technology personnel. Cisco TAC is available 24 hours a day, 365 days a year.
Cisco.com	This award-winning website provides 24-hour access to an extensive collection of online product and technology information, interactive network management and troubleshooting tools, and knowledge-transfer resources that can help customers reduce costs by increasing staff self-sufficiency and productivity.
Advance hardware replacement	Advance replacement and onsite field engineer options supply fast access to replacement hardware and field resources for installing hardware, reducing the risk of potential network downtime.
Smart Call Home	Cisco Smart Call Home is a proactive, connected service capability of Cisco SMARTnet Service that is available at no additional cost on Cisco Catalyst 4500 Series Switches. Smart Call Home devices can continuously monitor their own health using Cisco Generic Online Diagnostics (GOLD) technology and automatically notify you of potential problems using secure transmissions. If a serious problem arises, Smart Call Home automatically detects it and generates a Cisco TAC service request that is routed to the team appropriate for a particular problem.
