Cable Package Contents

1 x VGA TC2 10MVGA [SAP:1461166]
1 x 3.5mm Minijack TC2 10M3.5MM [SAP:1461164]
1 x HDMI TC2 10MHDMI [SAP:2746864]

Techconnect is a modular audio-visual faceplate family engineered especially for AV installers.

A "surround" fits to a backbox (or "mudring" if your wall is hollow), then the modules fix in place to complete the installation. Techconnect is based around standard UK backbox sizes, and Vision also offers mounting hardware for other countries.

For 99% of professional AV installations the same set of modules are required, so Vision offer a simple package that contains a basic selection of modules as a starting point. Just select the length of the cable package you need to go with it.

Plug-In Cables
Vision offer professional cables. VGA, Phono (RCA), and Minijack Techconnect cables have phoenix connectors on one end which plugs right in to the rear of the modules. These phoenix connectors can easily be removed to pull cables.

EDID Support
Vision's VGA cable included the SDA and SCL data lines to support EDID handshakes which allows the display device to communicate its supported display modes.
