Our Company

Carlson Systems is a leading distributor of the most recognized brands of construction and packaging machines, tools and supplies in the industry – supported by our network of service and repair technicians. The company has evolved over the past 66 years to encompass over 60 locations in the United States and Mexico.

This success story had its humble beginning in Omaha, Nebraska, when in 1947, Carl and Julia Carlson founded Carlson Stapler and Supply in the basement of their home with nothing more than a \$350 cash investment, a used file cabinet, and their own enthusiasm.

In the decades that followed, the company added to its product line and expanded its territory throughout the Midwest, eventually adding southwestern locations as well. The company name was simplified to Carlson Systems, but kept the familiar CSS logo and the founders' philosophy to provide the highest quality products along with outstanding service and support to our customers.

Carlson Systems was joined by Mid-Atlantic Fasteners in 2006. Sharing a similar beginning, Mid-Atlantic Fasteners was

established out of a garage in Baltimore, MD just after World War II as a Duo-Fast distributor. Most of their early customers were upholstery shops, furniture manufacturers and millwork companies. Primarily serving the Mid-Atlantic region of the east coast, the business grew over the years and began selling competitive lines, which allowed them to expand into new markets with new customers.

Serving the Packaging Industry Since 1947

Another acquisition occurred in 2013 with the addition of **Western Tool Supply Company**. Western Tool Supply was founded in 1982, with its headquarters in Salem, Oregon. The

addition of Western Tool Supply expanded Carlson Systems' presence in the northwestern U.S. The companies were a good fit because, like Carlson Systems, Western Tool Supply had a strong devotion to customer satisfaction through breadth of product, product expertise, and great order fulfillment, with the added benefit of tool and equipment repair service.

Focusing on fastening, packaging and product assembly systems, the offices and warehouses of Carlson Systems, Mid-Atlantic Fasteners and Western Tool Supply serve thousands of customers across the country and into Mexico. A group of problem solvers, we provide ideas and solutions in both the products we offer and the methods we propose. We offer the highest quality products along with outstanding service and support to our customers.

In our 67th year of business, we recognize the remarkable successes we have shared and the thousands of relationships we have built. We are grateful to our many customers and suppliers who have been instrumental to our business and we look forward to many more rewarding years together, living the values established by our founders.

Carlson Systems' Founders (left to right) Carl with sons Robert, Joe and Don Carlson.

Robert, Don and Joe Carlson.

Our Mission

To develop strong business relationships so we understand our customers' individual needs and provide the best possible solutions to improve their profitability.

Our Goal

- To better serve our customers and out perform the competition
- To be so good at what we do that no one can do it better
- To serve the market with the highest quality, unique fastening and packaging products and systems
- To maximize the use of information technology and logistics in order to meet our customers' needs

Carlson Systems, LLC, Mid-Atlantic Fasteners and Western Tool are not responsible for errors or omissions. Pictures may not represent item. Products may not be available at all of our locations.

We have over 60 locations to serve your packaging machine and supply needs.

PACKAGING MACHINES & SUPPLIES

Interior Packaging

Machines and Supplies for Cushioning, Block and Bracing, Wrapping, Void Fill, Shrink, Bagging, Package Sealing and Skin Packaging **4-10**
 Boxes, Corrugated Products, Mailers, Pouches, Packing List Envelopes, Poly Tubing, Poly Bags, Anti-Static and Moisture Protection Products, Bubble, Peanuts, Foam and Paper **54-61**

Carton Closing

Case Formers, Case Sealers, Water Activated Tape and Machines, Carton Closing Staplers and Staples **11-18**
 Tape, Tape Dispensers **62-65**

Carton Marking

Edge and Label Gluers, Palletizing Adhesives, Ink Jet Printers, Labels, Ribbons and Supplies, Print and Apply Systems, Label Applicators **19-25**
 Spray Products, Spray Inks, Markers, Stencil Supplies, Labels **66-69**

Strapping/Tying

Plastic Strapping Machines; Plastic and Steel Strapping Dispensers and Tools' Polypropylene and Polyester Machine and Hand Grade Strap; Buckles, Seals, and Strapping Kits; Strap Choppers, Stretch Film Compactors, Corrugate Shredder, Steel Strap, Tools, Seals, Kits **26-43**
 Cordage, Strap, Twine **70-71**

Palletizing/Unitizing

Edge Protection, Pallet Product Protection **44-45**
 Sheeting, Pallet Bags, Netting, Palletizing and Packing Products **71-73**

Stretch Wrapping

Material Handling, Industrial Fastening and Supplies

Material Handling Conveyors, Loaders, Lift Tables, Hand Trucks, Pallet Positioner, Industrial Fastening Tools, Fasteners, Compressors, Hose and Air Accessories **52-53**
 Safety Products, Shipping and Warehouse Supplies **74-75**

Protective Packaging: Cushioning, Blocking and Bracing, and Wrapping

Package cushioning is used to help protect fragile items during shipment. Shock and vibration are controlled by cushioning, so that the chance of product damage is reduced significantly. Cushioning functions include blocking & bracing and positioning products in a box.

PadPak material is generated, on-demand, by a converter that separates the multiple layers of paper, traps air between the paper layers, and forms cushioning pads. No tools or special training is needed to use a PadPak converter. In fact, all you need is a 110 volt outlet. The systems offered vary in size and configuration to accommodate any application.

PadPak Senior Converter

There are more paper choices and sizes than those shown.

PadPak® Senior

PadPak Senior is a versatile 2- or 3-ply paper packaging system that can accommodate all in-the-box packaging needs and applications from cushioning to wrapping, and blocking and bracing.

- For high volume applications
- Standard roll of 3-ply 30" x 450' paper yields, on average, 60 cubic feet of packing

PadPak Senior Paper (Regular, Double, Jumbo or Jumbo Adhesive)

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
2-ply	30	30/30	450
		30/50	900
		50/50	1350
3-ply	30	30/30/30	450
		30/50/30	900
		50/50/50	1350

Ask your Account Manager for details on the Loan Program for these machines!

PadPak Jr. Converter with Electric Cut

PadPak Jr. Converter

PadPak® Jr.

PadPak Jr. is a compact machine, capable of providing high performance to small volume packing departments. This mobile paper converter can be used in the widest variety of applications where flexibility is desired.

- Handle serves as paper feed/cut mechanism
- For lower volume applications
- Standard roll of 3-ply 27" x 450' paper yields, on average, 52 cubic feet of packing

PadPak® Jr. with Electric Cut

PadPak Junior Paper

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
2-ply	27	50/50	450
3-ply	27	30/30/30	450

PadPak LC™

PadPak LC converts 45- or 55-lb. fanfold kraft paper into an effective light cushioning pad for fast, efficient cushioning or blocking and bracing packaging applications.

- Standard roll of single-ply 30" x 1000' fanfold paper yields, on average, 75 cubic feet of packing

PadPak LC Paper

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
Fanfold	30	45	1200
Fanfold	30	55	1000

PadPak LC Converter

Pad-N-Pak® Workstation

Pad-N-Pak Workstation is a complete packing station that includes a standard PadPak Senior fitted with a curved chute to facilitate use with the workstation. The standard Pad-N-Pak Workstation includes a PadPak converter, work table, remote box and paper roll lifter. Many other options are available.

- For high volume applications, Converter slides in and out from under table for easy paper loading
- Can use with existing workstation table or with Ranpak table
- Standard roll of 3-ply 30" x 450' paper yields, on average, 60 cubic feet of packing

Pad-N-Pak Workstation

Protective Packaging: Void Fill

Wrapping

Wrapping packaging applications provide protection against scratching, surface abrasion and minor handling incidents. It also prevents damages caused by internal impact when multiple items are packed together. Wrapping application functions include box-lining, separating and wrapping.

Void Fill

Void fill protects products from damage by filling the excess space in the shipping box. This prevents the movement of the content, thus securing the shipment. Void fill functions include top fill and side fill.

The FillPak system generates a geometrically shaped "PaperStar" configuration for high volume, high speed top and side void fill applications, on-demand, right on your factory floor at speeds up to 55" per second. Just plug it in, load the paper and you're ready to generate void fill material.

FillPak TT®

Void Fill On Demand Where and When You Need It

FillPak TT converts 15" single-ply, fanfold kraft paper into a PaperStar™ configuration for fast and efficient void fill material to protect products in shipment.

- Standard bundle of single-ply 15" x 1660' fanfold paper yields, on average, 50 cubic feet of packing

FillPak TT® Cut Mechanism

One 15" bundle replaces up to three 14 cu. ft. bags of peanuts!

Gives FillPak TT the Ability to Cut and Predefine Paper Lengths

In addition to adding a cut mechanism to the FillPak TT, the upgrade also gives the operator the ability to pre-set paper lengths via an Electronic Delivery System (EDS) mode.

FillPak TT Paper

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
Fanfold Box	15	30	1660
Fanfold Box	15	45	1200

*30-lb. also available in 100% recycled and white.

FillPak®

Offers High Volume Void Fill with Speed and Cost Efficiency

The FillPak system converts fanfold kraft paper at a high speed into a PaperStar™ configuration for fast and efficient void fill while giving the operator the ability to pre-set paper lengths via an Electronic Delivery System (EDS) mode.

- Standard bundle of single-ply 30" x 1660' fanfold paper yields, on average, 100 cubic feet of packing

AccuFill®

One 30" bundle replaces up to seven 14 cu. ft. bags of peanuts!

Measure and Calculate the Accurate Amount of Void Fill, Every Time

AccuFill is the solution to optimizing the amount of void fill used in high volume packaging operations. As boxes come down the line, the AccuFill sensors scan the box to determine its size, measure the volume of the objects inside the box and compute the amount of paper needed to fill the void. It then signals the FillPak converter to dispense the exact amount of paper needed - no guesswork required.

- Standard bundle of single-ply 30" x 1660' fanfold paper yields, on average, 100 cubic feet of packing

FillPak and AccuFill Paper

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
Fanfold Box	30*	30**	1660

*Also Available in 32-lb. white

**Also Available in 100% recycled

WrapPak® PS Pack Station

On Demand Wrapping Option Within a Small Footprint

The Pack Station WrapPak converter forms two sheets of fanfold kraft paper into a resilient and shock absorbing 12" PaperWrap pad.

- Produces 18" of wrapping pad per second. Three modes of operation.

WrapPak® FS Full-Size

High Volume Padding for All Wrapping Needs

The WrapPak converter forms two bundles of fanfold kraft paper into a resilient and shock absorbing cushioning pad. Five modes of operation.

- 12" wide pad is automatically cut to the exact length.

WrapPak Paper is ideal for lining the bottom of a box, product separation or securely wrapping products.

Paper Type	Width (in.)	Basis Weight (lbs.)	Length (feet)
Fanfold	15	30	1660
Fanfold	15	45	1200
Fanfold	15	55	1000

No special tools or training are needed to use these machines.

Protective Packaging: Cushioning, Blocking and Bracing, and Void Fill

Industries such as mail order houses, electronic suppliers, automotive parts suppliers, and office supply stores use air pillows to cushion their products during shipment. Using an automatic machine, continuous strips of air pillows can be created, allowing users to speed up their packaging time.

Pregis AirSpeed Smart

Pregis AirSpeed® Smart™ Inflatable Void Fill Packaging

A convenient and cost-effective way to create inflatable packaging cushions on-demand for compact packaging operations. This system turns flat, easy-to-store film into lightweight, non-abrasive void fill packaging. The product in collapsed form takes up less than 1% of the space as it does when air filled, making it a space saving alternative to standard void fill packaging such as paper or peanuts.

- Simple start/stop operation.
- Perfect for small or decentralized work stations.

Pregis AirSpeed Void-Fill Film

- Multiple sizes and grades of film available.
- Wider, true width film yields 10–20% more void-fill than competitive films.
- Excellent puncture resistance and seal ability; non-abrasive surface.
- Recyclable; recycling category #4.
- EP-Flex™ Renew™ film: recycled content, recyclable and biodegradable.

Pregis AirSpeed HC

Pregis AirSpeed™ HC Inflatable Hybrid Cushioning System

Produces pillows at speeds up to 75 feet per minute. Two pillow sizes available depending on use: 8 squares x 8 squares (for 3/4" cushion) or 5 squares x 5 squares (for 1-1/4" cushion). The sheets are perforated for easy tear. **One pallet of AirSpeed HC film can be converted into the equivalent protection of almost one-and-a-half truckloads of traditional bubble!**

- Adjustable air pressure and multiple film sizes.
- Multiple machine options provide operational flexibility.

Pregis AirSpeed HC Hybrid Cushioning Film

- Multiple film choices to maximize performance.
- Excellent film clarity and configuration.
- High yield configurations provide reduced material consumption.
- All films are recyclable as a category #4.
- HC Renew™ film: recycled content, recyclable and biodegradable.

AirPouch Express 3

AirPouch™ Express 3 Table Top Air Pillow System

This system operates in either semi-automatic or automatic modes creating continuous strips of air pillows - featuring patented EZ-Tear™ perforation. This feature makes both handling and separating the pillows much faster and easier.

AirPouch EZ-Tear Air Pillow Materials

The AirPouch Express 3 Air Pillow System uses DuraClear 2000 (DC2) material for strong, durable air pillows that improve protection while reducing packing and shipping costs.

- Available in the standard 2.0 mil for most void fill packing applications (yields 3000 linear feet per box), or in a 1.5 mil gauge for a lower-cost alternative (yields 4000 linear feet per box).
- Available sizes: 8" and 10" wide in various standard lengths.
- Material options include: DuraClear 2000, biodegradable or recycled.

AirPouch FastWrap Protective Packaging System

Highly flexible system produces bubbles and tubes on-demand for wrapping, interleaving and block-and-brace applications. Tabletop, all-electric system operates at 65 feet per minute and combines with a variety of accessories, making it ideal for any sized pack station.

AirPouch FastWrap Bubble on Demand Packaging Materials

FastWrap Bubble on Demand is available in 12" (3/4" loft) and 14" (1-1/4" loft) widths, pre-perforated every 10" so the packer can select the right amount of material. The channel-filled honeycomb design allows for multi-directional wrapping and improves product protection.

FastWrap tubes are used in block-and-brace applications, and feature our exclusive EZ-Tear™ perforations between each tube, making them easier to separate while decreasing product waste.

- Material options include: DuraClear 2000, biodegradable or recycled.

AirPouch FastWrap

INTELLIPACK
Foam-in-Place Systems with a High IQ

Pregis IntelliPack® SmartSHOT® Foam-In-Place System

The SmartSHOT is IntelliPack's standard handheld, foam-in-place packaging system designed for small, medium and large applications that require protective void fill, blocking and bracing, and cushioning during the shipping and handling process.

- Tapered dispenser
- Long lasting mixing module
- Telemetry
- Heated dispenser minimizes cold-shots
- Insulated handle stays cool
- Bar-coding

Pregis IntelliPack® SmartBAGGER® Foam-In-Place System

IntelliPack's SmartBAGGER™ is foam-in-bag packaging technology ideal for high-volume, medium to large applications that require protective void fill, blocking and bracing, and cushioning during the shipping and handling process.

- Ergonomic design
- Easy-to-replace sealing wires and edge seal arbors
- Long lasting mixing module
- Cellular telemetry
- Intuitive control panel
- Bar-coding

Pregis IntelliPack Smart Bagger Foam-In-Place System

Pregis IntelliPack Smart Shot Foam-In-Place System

IntelliPack SmartFOAM™ A/B Liquid Foam IntelliPack Liquid Foam System IntelliPack SmartFILM™ IntelliPack SmartLUBE™

IntelliPack systems are specifically engineered to work with the family of consumables: SmartFOAM, SmartFILM and SmartLUBE. Together, they achieve a total packaging solution that provides customers with superior product protection.

Environmental Impact:	100% recyclable, renewable and reusable	Primarily a petroleum based product	A petroleum based product-difficult to recycle	A petroleum based product that is not recyclable

Shrink and Bagging Systems

PAC Machinery

The Flexible Packaging Specialists

CLAMCO

A PAC Machinery Company

DAMARK

Shrink wrap is typically a clear plastic or polymer-based film that shrinks when heated to conform to the shape of the object it is wrapped around. Shrink wrap can form a very tight, tamper-evident seal to protect the products from insects or other pests, moisture, dust or other contaminants, and discourage theft. Shrink wrap is commonly used for food bags and in other perishable applications, and is available in a variety of widths, designs, and film gauge, depending on the application.

Clamco 120 Series Shrink Packaging System

Clamco 120 and 220 Combo Semi-Automatic Shrink Packaging System

Clamco's L-sealer/tunnel combination system includes such standard features as unitized package tray and film cradle with pinwheel perforator, and 11 gauge steel construction throughout.

- Designed to seal and shrink most polyolefin and PVC films
- Unitized sealer/tunnel combination with console stand
- Height-adjustable, heavy-duty seal head with stainless steel film clamps
- Magnetic hold-down featuring adjustable, single large magnet
- Variable-speed Teflon® coated mesh belt-tunnel conveyor
- Made in the U.S.A.

Clamco Dem 6 Combo Shrink Wrap System

Clamco Dem 4 and 6 Combo Shrink Wrap System

The Clamco Dem 4 and 6 combo shrink systems combine a heavy-duty L-bar sealer and heat tunnel for shrink wrapping applications. The Dem seal system minimizes maintenance and eliminates the need for a hot knife seal bar with a proprietary seal wire temperature control. Dem combos are heavy-duty 24/7 machines that can be used with a wide range of films.

- Temperature controlled seal system provides consistently strong seals and increases the life of the seal wire when compared to traditional systems
- Power take-away and tunnel conveyors with a single height adjustment provide for smooth product transfer
- Heavy duty 24/7 shrink system for rugged industrial environments
- Digitally-controlled tunnel with 360° air circulation for consistency and maximum performance
- Automatic pace operation with pneumatic or motorized seal arm (optional)

Clamco Dem 4 Combo Shrink Wrap System

Clamco 6700GLX L-Bar Sealer

Clamco 6700GLX Automatic L-bar Sealer Shrink Wrap System

The Clamco 6700GLX has an enhanced Allen-Bradley microprocessor PLC, touch-screen interface and I/O diagnostics, memory for up to 20 package sizes, PLC and interface tunnel controls, self-adjusting scrap take-up wheel, microperforators for uniform air evacuation - and much more. All resulting in an automatic L-bar sealer with outstanding speed, throughput and performance.

- Production speeds of up to 40 packages per minute
- Heavy-duty hot knife sealing system with 18" x 23.5" seal area
- Lower film cradle with film splitter and static eliminator
- Adjustable jaw opening for products up to 8" high
- Variable-speed film unwind (23" maximum film width)
- Made in the U.S.A.
- USDA approved

Many other L-bar and Tunnel Systems are available!

Clamco Magnum

Clamco Heat Shrink Tunnels

Clamco manufactures a wide range of heat tunnels for virtually any shrink packaging application. Constructed of heavy-gauge structural steel, Clamco heat shrink tunnels feature heavy-duty blowers, variable air velocity, digital heat control, and variable-speed conveyors. These expertly crafted tunnels are operator-friendly and give an excellent shrink result for virtually any package.

Clamco Heat Shrink Tunnel

Clamco Magnum Automatic Bagger

The Clamco Magnum Vertical is a compact automatic bagging system that uses tubing, in addition to Rollbag™ pre-opened bags on a roll. This bagger offers an easy to operate and low maintenance design that provides the benefit of lower material costs and reduced bag changeover time. As compared to traditional vertical form fill seal systems, the Magnum Vertical eliminates the inconvenience of forming collars, back seaming, and complex controls.

The Clamco Magnum makes bags of different lengths at the push of a button, reducing changeover time.

The Magnum is also available in a Horizontal Configuration:

The Magnum Horizontal is designed to meet the unique requirements of large bag packaging with a horizontal loading configuration. It is ideal for long or bulky products or applications requiring special handling or orientation.

There are a number of flexible packaging options available: biaxially-oriented, multilayer and cross-linked polyolefin, thin-gauge PVC, and polyethylene shrink films. For almost any consumer product there's a shrink film available for your application. Available for manual, semi-automatic or high speed shrink packaging machines.

Polyolefin Shrink Films

Standard Film is recommended for packaging applications where maximum optics and durable wrapping are required. Strong seals and excellent shrink appearance are obtained with medium and high speed packaging systems.

- Very strong, high slip film
- Available in centerfold and single wound
- Especially suitable for high speed automatic applications
- Gauges: 50, 60, 75 and 100

High Performance Film is a versatile shrink film for a wide range of packaging applications. This crosslinked, soft, low shrink force film is especially suitable where low shrinkage temperatures and high shrinkage speeds are required.

- Soft, durable, low shrink force cross-linked film
- Available in centerfold and single wound with a pre-perforated option
- Ideal for soft items and odd shaped products
- Gauges: 45, 60, 75 and 100
- Available in 30 gauge - a thinner film that offers longer roll yields and lower tunnel temperature for cost savings

Tough and Versatile Film is a polyolefin shrink film made with an innovative crosslink process to provide strong, durable seals and excellent shrinkage. Optical properties are superior. This film exhibits outstanding abuse resistance and is easy to use.

- General purpose, forgiving film with wide seal and shrink temperature range
- Available in centerfold and single wound with a pre-perforated option
- Gauges: 45, 60, 75 and 100
- There are 125, 150, 200 and 300 gauge **Tough and Versatile** films available to replace traditional corrugated boxes or heavy gauge polyethylene

Other Options:

Anti-Fog Film to enhance presentation and extend freshness of fresh foods and produce.

- Gauges: 45, 60 and 75

The sealing properties of the **Poultry and Seafood Shrink Film** result in hygienic sealed trays to provide leak proof packages.

- Gauge: 60 and 75

Anti-Static is a transparent shrink film with superior static control capabilities for in-process bundling and ESD overwrap for electronic components and computer parts.

- Gauges: 100
- Centerfold or single wound

Polyethylene Shrink Films

This medium slip film has excellent stiffness and good strength properties. Engineered to meet USPS automatable polywrap mail requirements.

DESCRIPTION/SIZE	GAUGE
16" x 8500'	.90 mil
17" x 8000'	1 mil
26" or 30" x 3500'	1.25 mil

PVC Shrink Film

Strength and durability, combined with sparkling clarity and high gloss. High internal tear resistance and good memory makes this film excellent for irregularly shaped objects.

- Shrinks and seals at a lower temperature for great production
- Can be used with portable or automatic equipment
- Great for retail applications
- Available in three thicknesses: 60, 75 and 100 gauge and these common sizes:

DESCRIPTION/SIZE	GAUGE
8", 10", 12", 14", 15", 16", 18"	60, 75 or 100
20", 22", 24"	60, 75 or 100
30", 36"	60, 75 or 100

All shrink film is available in a number of sizes.

Common Roll Sizes of Polyolefin Shrink Films

Standard Widths are from 6" to 32" in 2" increments - available in a number of other sizes.

Gauge	45	50	60	75	100	125	150	200	300
Centerfold	5,830'	5,250'	4,375'	3,500'	2,625'	2,100'	1,750'	1,310'	875'
Single Wound	11,660'	10,500'	8,750'	7,000'	5,250'	4,200'	3,500'	2,620'	1,750'

Polyolefin is usually soft; if you squeeze a piece of it in your hand, it's soft like saran wrap. **PVC** is crinkly like cellophane. **Polyethylene** is a low density preferential shrink film with good optical properties combined with exceptional strength. It is ideal for multipack utilization applications.

With all three types, the rule of thumb is the higher the gauge, the thicker (and stronger) the film.

Multi-layer Polyolefin Shrink Films

Function	Grade & Thickness	Features
Standard (Syfan 307-S)	50-60-75-100-150 gauge	High shrink force film with excellent stiffness and flatness, making it ideal for multipacking and high speed applications.
High Efficiency (Syfan 307-S)	50-60-75-100-150 gauge	Enriched formulation resulting in a low temperature shrink film with the highest available free shrink.
High Performance (Syfan MVP/Cryovac D940)	45-60-75-100 gauge	A 5-layer shrink film that seals and shrinks at lower temperatures with high free shrink for maximum retail presentation.
Soft Shrink (Syfan MVP/Cryovac D940)	45-60-75-100 gauge	Cross-linked for abuse resistance, a low force shrink film with high free shrink designed for wrapping soft and irregularly shaped items.
Tough and Versatile (Syfan 701/Cryovac D955)	45-60-75-100 gauge	Cross-linked shrink film with enhanced toughness and a broad operating window suitable for a broad range of applications.

Traco SS24SWS Portable Shrink-Wrap System

Traco SS24SWS Portable Shrink-Wrap System

- Portable, lightweight and sleek, the Standard SuperSealer is built to last
- Comes complete with ultra-light HotShot® adjustable temperature heat gun
- Sizes: 13", 18", 24", 32", or 40"
- Also available in deluxe and wand models.

Bagging, Portable Sealing, Vacuum Sealing and Skin Packaging

There are many different models of bag sealers, drop sealers and portable sealing machines to choose from; the models shown represent some of our most popular models.

Bagging Systems

Revolutionary bagging and in-line printing systems offer powerful advantages over conventional baggers:

- Optimizes low-cost polyethylene tubing for substantial material cost savings
- Optional in-line thermal transfer imprinting
- Bag lengths can be changed electronically, reducing material inventory
- Ideal solution for a vast array of food, medical, industrial and retail products
- Compact design, very affordable price
- Easy integration with most brands of automatic feed systems (auger fillers, scales, counters, conveyers, disk loaders, etc.)
- Also works with pre-opened bags on a roll

Clamco Bagmaster

Clamco Rollbag 1275

PlexPack MPS 7500 Band Sealer

Audion Sealboy

Automatic Drop Sealers

Heavy duty pneumatic impulse sealing systems produce up to 30 bags per minute. Standard heavy-duty shroud completely encloses all moving parts for operator protection. Trims, seals, and bags with or without second security seal as desired; automatically ejects and collects scrap materials. Teflon dispensing roller extends life of sealing element.

- Accepts bags up to 15" wide and 22" long
- PLC controls to monitor and change temperature compensation, allowing smokeless/odorless operation with no required warm-up time

Portable Sealing Machines

- Impulse and constant-heat bag sealers are safe, economical, fast, and built to last.
- Perfect for sealing polyethylene, polypropylene, PVC, foil and surlyn, mylar or bubble pack/padded mailers
- Many options to fit your application needs

Refer to Pages 56-57 for bags and poly tubing

Prop-Lock® Vacuum Sealer with Internal Compressor

The Prop-Lock vacuum sealer's compact, portable design has outstanding vacuum packaging performance. The heavy-duty design is durable and easy to use with foot pedal activation. With one touch of the pedal, automatically flush out oxygen and moisture, then the automated stainless steel nozzle retracts, and your components are sealed in seconds.

The PL20-IC (20" seal length) and PL30-IC (30" seal length) models are self-contained, retractable nozzle vacuum sealers with built-in air compressors, which eliminates the need for additional equipment. Completely self contained, the sealer is ready to perform out of the box, while saving money by reducing equipment requirements and providing greater flexibility for placement.

- Reduces storage space by 50-75%
- Tamper resistant to insure added security

Prop-Lock PL30-IC Vacuum Sealer

Clamco Vacumaster™ Skin Packaging System

The Vacumaster is an effective way to mount products to a hanging display board or corrugated shipping carton with a strong, clear film. Products that can be skin packaged in the Vacumaster include: hardware (hinges, etc.), fasteners, hand tools, automotive parts, advertising specialties, and anything in a custom shipping box.

The efficient Vacumaster skin packaging machine will work with virtually any skin packaging film and board. Each model is specifically designed to handle standard master board sizes of 18x24, 24x30, 24x36 and 30x36 inches.

- Simpulse cut-off for fast cutting of film roll
- Patented ThermOpulse™ heating system offers impulse system safety
- Adjustable speed vacuum turbine provides precise packaging appearance

Clamco Vacumaster Skin Packaging System

Little David Case Formers are easily integrated into any production line and can be justified on volumes as low as 500 cases per day. Little David Case Formers are designed to provide all the features found in larger, more costly case erecting packaging machinery.

LOVESHAW
an **ITW** Company

CF-5 Semi-Automatic Case Former

The Little David CF-5 is a semi-automatic case former designed to fold and hold all bottom flaps of RSC corrugated boxes presented to it by an operator. This machine can be used alone or with a case sealer as part of a packing/sealing station to improve productivity.

- Case dimensions: length 8" to 26-1/2"; width 6" to 20"; height 3-1/2" to infinite
- Produces up to 15 cases per minute
- PLC driven

CF-5 Case Erector
(Shown with LD-7 Case Taper)

CF-25 Automatic Case Former with Bottom Tape Cartridge

The CF-25 is an industrial grade, high performance case erector designed to form and bottom-seal corrugated boxes at speeds of up to 15 cases per minute depending on case size and corrugate quality. The CF-25 is ideal for applications that require more throughput than manual case erecting can provide.

- Case dimensions: length 6" to 16"; width 6" to 14"; height 4" to 12"
- Reliable case forming in a compact footprint with no operator needed
- Built for industrial grade, high performance applications that require a small foot print
- Load-on-the-fly: easy load hopper ensures that box loading and changeover are simple and efficient.

CF-25 Case Erector with
Bottom Tape Cartridge

CF-50T Automatic Case Former, Folder and Bottom Sealer

The CF-50T expands the Little David line of high performance case formers. This machine was designed to automatically form, fold, and bottom seal RSC corrugated cases - from double wall to recycled material, and can form up to 20 cases per minute.

- Case dimensions: length 7" to 24"; width 6" to 16"; height 4" to 20"
- Produces up to 20 cases per minute, depending on case size and corrugated quality.
Standard: 14 cases per minute
- Heavy duty steel construction is designed to endure the most rigorous industrial environments.
- Tool-less changeover features make it easier than ever to switch from one box size to another.

CF-50T Case Erector with Bottom Tape Cartridge

SP-304R BO Semi-Automatic Random Case Former, Bottom Only

The SP-304R BO incorporates an anvil pack table station to provide a table that allows the operator to form the box before sealing the bottom. Random side belt drives positively drive the box through the folding area and over the tape cartridge for a consistent bottom seal. The patent-pending CaseLocker 60 tape cartridge features tool-less quick release wipe rollers and knife blade.

- Case dimensions: length 8" - maximum based on anvil; width 4.5" to 20"; height 3.5" to infinite
- Processes 32 ECT single wall to 44 ECT double wall boxes

SP-304R BO Case Former
with Tape Cartridge

Oversized or stainless steel systems are also available.

Case Sealers

LOVESHAW
an **TW** Company

Loveshaw manufactures a variety of Little David case tapers designed to meet your needs. Models range from semi-automatic to fully automatic and stainless, and are designed to work with uniform or random box sizes.

LD-7 Uniform Case Taper

LD-3SB Uniform Case Taper

LDX-UTB Uniform Case Taper

SP-304 Uniform Case Taper

LD-24 Case Taper

Some of the most popular machine tapes that we sell are listed on page 64.

LD-7 Semi-Automatic Uniform Case Sealer

An economical top and bottom case taper with **bottom belt drive** and a small footprint for sealing large runs of uniform cases, or for those applications that require infrequent case size changes.

- Operating Speed: Continuous belt drive - 80' per minute (24.4m/min)

Case Capacity (with 2" wide CaseLocker ST™ cartridge):

- Length: 4-1/2" (114mm) - infinite
- Width: 4-1/2" (114mm) - 20" (508mm),
- Height: 4-1/2" (114mm) - 24" (610mm)

LD-3SB Semi-Automatic Uniform Case Sealer

This **side belt drive** case taper is recommended for dimensionally unstable boxes, lightweight boxes and boxes as narrow as 4". Can be used for setting up empty boxes with bottom tape only.

- Uses pressure-sensitive tape
- CaseLocker ST tape cartridge requires no lubrication
- Operating Speed: Continuous belt drive - 72' per minute (18.3m/min)

Case Capacity (with 2" wide CaseLocker ST™ cartridge):

- Length: 4-1/2" (114mm) - infinite
- Width: 4" (102mm) - 20" (508mm)
- Height: 4-1/2" (114mm) - 24" (610mm)

LDX-UTB Semi-Automatic Uniform Case Sealer

This **top and bottom belt drive** sealer is designed for processing large runs of the same size box. The LDX-UTB requires manual adjustments to the top drive (for the height of the box) and side rails (for the width of the box).

- Operating Speed: Continuous belt drive - 115' per minute (35.05m/min)

Case Capacity (with 2" or 3" CaseLocker™ 60 cartridges):

- Length: 6" (152mm) - infinite
- Width: 5-1/2" (140mm) - 26" (660mm)
- Height: 3-1/2" (89mm) - 24-1/2" (622mm)

SP-304 Semi-Automatic Uniform Case Sealer

This **extended side belt driven** case taper propels cartons through a folding section, then folds all major flaps and one upper flap. Repetitive motion is reduced and productivity is increased with this innovative design.

- Ergonomic design for operator alleviates twisting motion
- Top and bottom major flap folding
- Operating Speed: Continuous belt drive; 67' per minute (18.3m/min)

Case Capacity (with 2" wide CaseLocker ST™ cartridge):

- Length: 6" (152mm) - 24" (610mm)
- Width: 4-1/2" (114mm) - 20" (508mm)
- Height: 4-1/2" (114mm) - 24" (610mm)

LD-24 Fully Automatic Uniform Case Sealer

This heavy duty fully automatic **top and bottom, side belt drive** case sealer is optimal for large runs of the same size box. Pneumatic flap folding, compact footprint and fully welded base frame makes it one of the most reliable and efficient case sealers on the market.

- Capable of running 2" and 3" tape in same machine
- PLC Controlled
- Extensive case capacity: length 6" to 24"; width 6" to 18"; height 4-1/2" to 18"
- Up to 100ft a minute

Case Capacity

- Length: 6" (152mm) - 24" (610mm)
- Width: 6" (152mm) - 18" (457mm)
- Height: 4-1/2" (114mm) - 18" (457mm)

LD-XSS Case Sealer

LD-XSS Wash Down Case Sealer

- Heavy duty **bottom belt drive** stainless steel design with continuous TIG welding
- Maximized water shedding to prevent bacterial growth
- Minimal overlapping joints to meet AMI standards for wash down environments
- Operating Speed: Continuous belt drive - 80' per minute (24.4m/min.)

Case Capacity

- Length: 4-1/2" (114mm) - infinite
- Width: 5-1/2" (140mm) - 28" (711mm)
- Height: 4-1/2" (114mm) - 24" (610mm)

LDX-RTB Semi-Automatic Random Case Sealer

- This **top and bottom belt drive** sealer processes cases between 40% and 80% faster than the competition
- Processes void-filled and overstuffed cases
- Operating Speed: continuous belt drive - standard: 115' per minute (35.05 m/min). High Speed: 155' per minute (47.25 m/min.)

Case Capacity

- Length: 6" (152mm) - infinite,
- Width: 5-1/2" (140mm) - 26" (660.4mm)
- Height: *3-1/2" (90mm) - 24.5" (622mm)
- *Minimum height can be reduced to 2.5" (159mm) with reduced tape tab length

LDX-RTB Case Sealer

Legend Semi-Automatic Random Case Sealer

- **Bottom belt drive** sealer with dual light touch roller switch in pack table for centering and holding box during packing
- Operating Speed: Continuous belt drive - 80' per minute (24.4m/min)

Case Capacity (with 2" wide CaseLocker ST™ cartridge):

- Length: 6-1/2" (165mm) - infinite
- Width: 4-1/2" (114mm) - 20" (508mm)
- Height: 4-1/2" (114mm) - 24" (610mm)

Legend Semi-Automatic Uniform Case Sealer

This **bottom belt drive** unit incorporates a sealed drive, an internally mounted electrical systems and includes the infeed pack table.

- Operating Speed: Continuous belt drive - 80' per minute (24.4m/min)

Case Capacity (with 2" wide CaseLocker ST® cartridge):

- Length: 4-1/2" (114mm) - infinite
- Width: 4-1/2" (114mm) - 22" (559mm)
- Height: 2-5/8" (64mm) - 24" (610mm)

Legend Random Case Sealer

Legend Uniform Case Sealer

LD-16R Fully Automatic Random Case Sealer

- **Bottom belt drive** sealer
- Servo controller and PLC controlled, NEMA 12 electrical enclosure
- Operating Speed: Consult factory

Case Capacity

- Length: 10" (254mm) - 36" (914mm)
- Width: 5-1/2" (140mm) - 22" (559mm)
- Height: 6-3/4" (171.45mm) - 30" (762mm)

LD-16R Case Sealer

Both Uniform and Random Case Sealers are available in many of the models shown.

Magnum 1300 TB-U Case Sealer

Magnum 1300 TB-U Uniform Semi-Automatic Case Sealer

The Magnum 1300 TB-U utilizes **dual top and bottom belt drives** to provide the best performance for cases that are overstuffed or tall and unstable, where side belt drive systems are less suitable. The machine can be adjusted quickly for different box sizes using a crank handle and two locking knobs.

- Easy manual adjustment for uniform case dimensions up to 20"W x 20"H
- Operates up to 30 cases per minute
- Two 2" tape heads with easy threading (3" optional)
- Includes 16-inch long infeed and exit conveyors and Case Top Squeezer Rollers
- Height adjustable legs from 23" to 32" with locking casters

Magnum 2300 SD-U Case Sealer

Magnum 2300 SD-U Uniform Semi-Automatic Case Sealer

The Magnum 2300 SD-U utilizes **dual side belt drives** that provide the best performance for uniform case sealing application, including challenging narrow or long length boxes. The opposing side belts create optimum grip in the case and allow for productivity-improving upgrades such as flap folding options. A simple turn of the crank handles quickly adjusts the machine for different box sizes.

- Easy manual adjustment for uniform case dimensions up to 20"W x 20"H
- Operates up to 30 cases per minute
- Two 2" tape heads with easy threading (3" optional)
- Includes 16-inch long infeed and exit conveyors and Case Top Squeezer Rollers
- Height adjustable legs from 23" to 32" with locking casters

Magnum 700 shown with pusher and Magnum 2300 case sealer with additional flap folder option

Magnum 3000 Case Packing Station

Magnum CFPS 700 Semi-Automatic Case Erector

The Highlight Magnum CFPS 700 is a semi-automatic bottom flap forming machine and packing station. Designed to increase productivity and reduce worker strain, the machine will fold all four bottom flaps and hold a case securely for packing on the unit.

- Interfaces with any carton sealer
- Accepts large range of case sizes
- All pneumatic operation

A single operator can do the work of three!

Magnum 3000 Case Packing Station

Combines the CFPS 700 and Magnum 2300, allowing a single operator to easily achieve a production rate of up to 15 cases per minute.

Magnum 3500 TB-R Case Sealer

Magnum 3500 TB-R Random Semi-Automatic Case Sealer

The Magnum 3500 TB-R utilizes **dual top and bottom belt drives** that provide the best performance for cases that are overstuffed or tall and unstable, where side belt drive systems are less suitable. The machine automatically adjusts in height and width according to box size. Three operation modes are standard: Random, Fast Random, and Uniform.

- Automatically adjusts to random case dimensions up to 20"W x 20"H
- PLC Control with three modes: Random, Fast Random, and Uniform
- Up to 12 cases per minute in Random mode and 30 cases per minute in Uniform mode
- High speed option available for up to 18 random cases per minute
- Two 2" tape heads with easy threading. 3" optional
- Height adjustable legs from 27" to 35" with locking casters

Some of the most popular machine tapes that we sell are listed on page 64.

Magnum 4500 SD-R Random Semi-Automatic Case Sealer

The Magnum 4500 SD-R utilizes **dual side belt drives** that provide the best performance for random case sealing applications, including challenging narrow or long length boxes. The machine automatically adjusts in height and width according to the box size. Three operation modes are standard: Random, Fast Random, and Uniform.

- Automatically adjusts to random case dimensions up to 24"W x 24"H
- PLC Control with three modes: Random, Fast Random, and Uniform
- Up to 15 cases per minute in Random mode and 30 cases per minute in Uniform mode
- High speed option available for up to 20 random cases per minute
- Two 2" tape heads with easy threading (3" optional)
- Height adjustable legs from 27" to 35" with locking casters

Magnum 4500 SD-R Case Sealer

Magnum 5850 SD-U FF Uniform Fully Automatic Case Sealer

The Magnum 5850 SD-U FF is an **adjustable side belt drive** case sealer designed to automatically fold the flaps and provide accurate and consistent tape application to uniform cases. Highlight's 200 Series tape head will accept any 2" case tape and provide optimum case sealing to the top and bottom of the case. The system is designed to operate at up to 26 cases per minute. An optional 3" tape head, Model 300, is also available and interchangeable with the model 200. Entry and exit conveyors are optional. Height-adjustable legs from 27" to 35" with locking casters included.

- Automatically folds flaps for uniform cases
- Indexing gate for automatic operation up to 26 cases per minute
- Two 2" tape heads with easy tap threading (3" optional)
- Adjustable flap folding arms
- Adjustable legs from 27" to 35" with locking casters
- Two safety doors with safety switches
- Options available: infeed and exit conveyors, tape sensing, high speed

Magnum 5850 SD-U FF Case Sealer

Magnum Precision Tape Head

- Easy tape threading with open side plate
- Heavy gauge steel for strength and long life
- Tape Width: 1-1/2" to 2" (200) and 3" (300) – interchangeable only on the side belt drive Highlight MAGNUM case tapers
- Tape Roll Diameter: up to 16" maximum on a 3" diameter core
- Tape Application Leg Length: adjustable from 1-1/2" to 2-3/4"
- Operating Rate: conveyor speeds up to 125' per minute
- Retro fit tape head kits to upgrade other carton sealers
- For use with all pressure sensitive film box sealing tapes

Magnum Precision Tape Head

Water Activated Tape Machines

Water activated tape machines offer the convenience of easily-dispensed packaging tape in an easy-to-manage counter-top size. Electric models give you programmable size presets. Manual models give you the flexibility to station the machine anywhere in your facility without worrying about proximity to an electrical outlet.

Better Pack 555e Series Tape Dispenser

Better Pack® 555e Series Electric Water-Activated Tape Dispenser

The Better Pack 555e Series electronic water activated tape dispensers offer the most options and the highest level of automation available. Several models are available to fit your packing specifications and accessories and replacement parts are available.

- Fast tape output of 45" per second and user-friendly, color-coded keypad with 14 preset length buttons make dispensing and sealing quick and easy
- Maximum roll size up to 10" diameter (25cm); 1,000' tape roll capacity means fewer changeovers, less downtime
- Automatic tape advance feature (standard on most models) is perfect for high-volume, fixed size carton sealing
- 1,000 foot roll tape capacity means fewer changeovers, less downtime
- Foot pedal and tape aerial accessories further improve worker efficiency

Better Pack 333 Plus Tape Dispenser

Better Pack® 333 Plus Manual Tape Dispenser

The Better Pack 333 is a rugged, reliable, simple-to-use manual water-activated tape dispenser - perfect for any application on a light to medium-volume packing line. Without the need for electricity, the dispenser is easy to move from one packing line to another. Replacement parts are available.

- Dispenses up to 30" (76cm) of tape with one stroke - more with multiple strokes
- Handles both reinforced and non-reinforced paper tapes - from 1-1/2" to 3" wide (4-7cm)
- 15 preset tape lengths measured in inches on a dial

Refer to page 68 for information on the MSSC/Marsh Stencil Machines and Supplies!

MSSC TD2100 Electric Tape Machine

Water Activated Gummed Tape

Available in a wide variety of sizes and product construction, reinforced water activated gummed tapes are designed to provide consistent performance in carton sealing applications where durability, extra strength and reliability are required. Extra strong fiberglass yarns are bonded between the high tensile strength sheets for an extra margin of strength. Water activated gummed tapes are also available non-reinforced and both types bond instantly to corrugated cartons and paper and the immediate destructive bond results in a tamper-evident package.

DESCRIPTION/SIZE	CTN	CT
Non-reinforced Medium Duty – Natural/White		
Natural 2-1/2" x 600', with core (60mm x 183m)	12	
Natural 3" x 600', with core (72mm x 183m)	10	
Reinforced – Natural/White		
Natural 70mm x 375', coreless (115m)	8	
Natural 70mm x 450', coreless (138m)	10	
Natural 70mm x 600', coreless (183m)	10	
White 72mm x 450', with core (138m)	10	
Natural 72mm x 450', with core (138m)	10	
Natural 3" x 450', heavy duty (138m)	10	

Both natural and white tapes are available in many sizes for the WAT machines shown.

MSSC TD2100 Manual Tape Machine

Marsh TD2100 Electric and Manual Tape Machines

- Accommodates up to 1000 foot (305 meter) tape roll; max roll diameter is 9" (222.6mm)
- The "Apex" design guillotine style cutter, made of 420HC stainless steel offers long life and requires very little cleaning and adjustment
- 70 oz. water bottle increases production up time with fewer refills; largest bottle in the industry
- Wide track 1.5" feed roll and pinch roll using a high coefficient of friction urethane to ensure accurate and quiet tape feed through

The **TD2100 (TDE)** electric version has three variations to meet your specific carton closure needs: standard, premium short, and premium long.

- Standard models offer 10 pre-set selectable lengths from 5" to 99"
- Premium models not only offer 10 pre-set selectable lengths, but with the use of the "NUM LOCK" key provides option to input custom lengths ranging from 5" to 99" in 1" increments.
- Electric model features tactile keypad with LCD display for easy adjustment of tape length

The **TD2100 (TDH)** manual version comes in 4 models, with the choice of inch or metric scale and an optional 110V or 220V heater.

- Manual model features easy-pull handle to adjust for various tape lengths; can be adjusted from 5" to 36" in just a single pull (longer lengths can be set with an additional pull)

ISP Stitching & Bindery Products
A Division Of Samuel Strapping Systems

ISP HF16P Regular Duty Post-Type Silverstitcher

Post-type stitcher for setting up regular slotted boxes, overlap slotted boxes, full overlap boxes or half-slotted boxes with partial covers. For bottom closure of boxes.

- Closes bottoms of slotted boxes quickly and securely, meets carrier regulations
- Maximum size box (including top flaps): 32" wide x 41-1/4" deep
- 16" from front of frame to clincher; 41-1/2" from top of base to clincher
- Produces over 3000 boxes a day; up to 350 RSC boxes an hour

ISP HF16P Post-Type Silverstitcher

Choose from a wide range of galvanized or copper wire sizes to use in stitching machines from ISP, Bostitch and others.

Bostitch FC95EC Electric Anvil Post Carton Closing Stapler

Post-type stapler for high volume carton bottom closing of regular slotted cartons.

- 24" throat and 40" anvil post height allows most cartons to be stapled in one motion without reversing carton direction
- 180 staples per minute average speed; maximum coil 4000 staples

Roll Staples

Many other sizes of stitching wire and staples are available.

Bostitch F84-138 Carton Closing Stapler

Long Reach Carton Closing Staplers

Long reach carton closing staplers allow flexibility of staple placement and limit interference from obstacles such as box flanges. Applications include fastening corrugated containers, vegetable tray boxes, end caps, pallet boxes, container inserts, die cut inserts, and stapling of fabric. Models available from Senco, Bostitch, Josef Kihlberg and others.

For use in staplers from Bostitch, Josef Kihlberg, Senco and others.

Galvanized Plier Staples for Clinch Type and Long Reach Staplers

DESCRIPTION/SIZE	GAUGE	CTN CT
1/2" Crown x 5/16" Leg	20	24000
1/2" Crown x 3/8" Leg	20	10000
1/2" Crown x 1/2" Leg	20	10000
7/16" Crown x 3/8" Leg	18	5000
7/16" Crown x 1/2" Leg	18	5000
7/16" Crown x 5/8" Leg	18	5000

Correct method for basic box stapling

- Crown width must be at least 1-1/4 inches
- Do not space staples more than 5 inches apart along both the center seam and the sides of the outside flaps of a regular slotted container but only where the outer flaps overlap the inner flaps.

Which staple is right for this application?

- 1/2 inch leg – 125 and 175 lb. test single wall
- 5/8 inch leg – most single wall corrugate
- 3/4 inch leg – most double wall corrugate
- 7/8 inch leg – heavy double and triple wall especially in manual applications where board "memory" is difficult to overcome

Long Reach Carton Closing Staplers

Carton Closing Staplers and Staples

Roll Box Stapler

There are many benefits of using staples versus other carton closure methods. Staples are environmentally safe; they can be recycled or land filled without problems. Roll staples reduce loading time and increase production output. Staple closure is instantaneous with visual confirmation. Staples “lock” flaps together providing maximum holding strength. Staple strength and security exceeds shipping and handling requirements, and staple closures are unaffected by extremes of temperature and humidity.

Roll Box Stapler

Pneumatic operated tool for use on moderate volume packaging lines; 1000 staples per coil roll for high speed production box stapling. These light-weight tools can close up to 250 cartons without stopping to reload. Uses 5/8" or 3/4" leg staples, 1-1/4" crown.

Air Box Stapler

Air Box Stapler

Pneumatic operated tool utilizes pre-formed stick staples for use on low to moderate volume packaging lines or where carton design requires staples to be inserted at an awkward position. High production carton make-ready or carton closing stapler is used to staple light or heavy 350# cartons. Five models available:

AB150-C58 uses 5/8" leg, 1-1/4" crown (C-58)
 AB150-C34 uses 3/4" leg, 1-1/4" crown (C-34)

AB100-A58 uses 5/8" leg, 1-3/8" crown (A-58)
 AB100-A34 uses 3/4" leg, 1-3/8" crown (A-34)
 AB100-A78 uses 7/8" leg, 1-3/8" crown (A-78)

Hand Box Stapler

Hand Box Stapler

Hand operated tool uses pre-formed stick staples for use on low volume packaging lines or warehouse applications where compressed air is not readily available. Built-in auxiliary handle permits easy carrying and insures consistent and reliable hand stapling. Closes filled cartons from the outside. Three models available:

HB150-C58 uses 5/8" leg, 1-1/4" crown (C-58)
 HB150-C34 uses 3/4" leg, 1-1/4" crown (C-34)

HB100-A58 uses 5/8" leg, 1-3/8" crown (A-58)
 HB100-A34 uses 3/4" leg, 1-3/8" crown (A-34)
 HB100-A78 uses 7/8" leg, 1-3/8" crown (A-78)

Carton Closing Staples

Staples have many advantages over other carton closing methods like tape and glue, including superior strength and security. While a taped box can easily be sliced open and its contents pilfered, a stapled box is much tougher to open.

Staples listed are for use in foot bottom box staplers, roll box staplers, air box staplers and hand box staplers from Interchange, Bostitch, ISM, Josef Kihlberg and others.

Edge and Label Gluers, Palletizing Adhesives

Ensure that your labels are securely applied to products, packages, and pallets, and your edge is glued as desired. Whether you are shipping product across departments or across state borders, you can rest assured that our edge and label gluers will thoroughly apply the required adhesive so your label stays put for the extent of the trip, until it reaches its destination, and beyond.

Standard Edge Gluer

The Standard Edge Gluer glues the bottom edge of an item; available in two models.

- Model #2 features a gluing range from 1/4" to 2-1/4"; roller speed of 69-163 ft/minute; feed table 4.9" x 10.5"; and 16 oz. liquid glue capacity.
- Model #4 features a gluing range from 1/4" to 3-1/2"; roller speed of 69-163 ft/minute; feed table 5.9" x 10.5"; and 24 oz. liquid glue capacity.

Standard Edge Gluer

Label-Pro® 5.5 Manual or Electric Label Gluer

The Label Pro 5.5 is available in manual or electric models. The **manual model** starts when the operator places the label in position and pushes a black rubber feed roller to run the label through the equipment, whereas, the **electric model** starts automatically when the operator feeds the label into the gluer.

- The electric Label Pro 5.5 is available with a 120 or 220 volt motor
- The standard Label-Pro applies a corduroy pattern of glue to the back of the label.
- Thin film with no glue oozing from the edge of the label
- Both models' max label width is 5-1/2"

Captain B Electric Label Gluer

The Captain B labeling and gluing machine is available with 8", 10", and 14" roller widths.

- Excellent speed and glue control
- Oversized models are available

Captain B Electric Label Gluer

LabelPro 5.5 Manual or Electric Label Gluer

Palletizing Adhesives

SKID-LOCK, a water-based adhesive, is applied on top of each item before being palletized. The packages are then placed on the pallet or slip-sheet where a unique adhesive bond forms that is high in shear strength (to hold during the side-to-side motion encountered during transportation) and low in tensile strength (up and down movement). When the customer receives the pallet, they simply pick the package up to break the bond cleanly with no damage to the packaging.

SKID-LOCK® Palletizing Adhesive Applicator Systems

SKID-LOCK offers an economical and ecological alternative for securing pallets.

- Complete system includes: spray arm assembly, application station and pumping station

SLUSB Automatic Applicator

- Applies SKID-LOCK onto each item when detected by two photo-electric eyes
- Automatically adjusts for changes in the length of the items palletized

LC Automatic Applicator

- The best basic, entry level system available
- Single photo-electric eye accurately detects most items

LC Automatic Applicator

P.A.T. Manual Applicators

Standard P.A.T.

P.A.T. with Pistol Grip Sprayer

P.A.T. Sprayer

P.A.T. Manual Applicator

Three P.A.T. (Pneumatic Adhesive Tank) systems are available. Each P.A.T. is available in 3, 5, or 10 gallon sizes and features gauge and regulators, a safety relief valve and a glue line and applicator valve.

- **Standard P.A.T.** Uses interchangeable glue heads: extrusion glue head applies solid lines, while the spray head sprays product in a larger "fan" pattern
- **P.A.T. with Pistol Grip Sprayer** Comfortable hand-held device
- **P.A.T. Sprayer** Best control for manually spraying SKID-LOCK

SKID-LOCK Adhesive

SKID-LOCK is a water based resin product with a key ingredient that prevents deep penetration of the resin into paper or board stock. The resulting surface bond provides the ideal properties required for a true unitizing adhesive...high shear strength (side to side) and low tensile strength (up and down).

For the best results, apply using one of our adhesive applicators: P.A.T. manual applicators, the LC Auto Applicator, or the SLUSB-120 Auto Applicator.

Ink Jet Printers - Dot Matrix and Fluids

Fluids are available for these and other competitive ink jet systems!

Loveshaw MicroJet III Ink Jet Printer

MicroJet I Ink Jet Print Sample

MicroJet® I Ink Jet Printer

Prints one line of 11/32" (5 x 5 dot matrix) high print. Ideal for product or date code identification on porous surfaces, such as corrugated containers.

MicroJet I Plus Ink Jet Print Sample

MicroJet® I Plus Ink Jet Printer

Prints one line of 3/8" to 2" (5 x 7 dot matrix) high print. Perfect for large characters on porous surfaces.

MicroJet II Ink Jet Print Sample

MicroJet® II Ink Jet Printer

Prints one or two lines of 7/16" (5 x 5 dot matrix) high print. One line of 5/8" (5 x 7 dot matrix) high print. One line of 15/16" (5 x 11 dot matrix) high print. Perfect for porous printing jobs that require lots of information in a small amount of space.

MicroJet III Ink Jet Print Sample

MicroJet® III Ink Jet Printer

Same as the Multi II, plus an extra line of 7/16" (5 x 5 dot matrix) printed in any combination. Multiple fonts are what the Multi III is all about. Perfect for porous printing jobs that require three lines of print in a limited amount of space

Dot Matrix Print Samples

Inks and fluids available for the following systems:

Citronix **Marsh**
Diagraph **Matthews**
Domino **Squibb**
Hitachi **and more!**
Loveshaw

Ink Jet Fluids

Refill your ink jet printer system with top-quality inks that deliver sharp barcodes and text messages.

High Resolution Inks for Bar Coding - These inks achieve excellent bar code readability while maintaining machine friendly reliability.

Large Character Ink Jet Ink - These inks have been designed to deliver optimum performance utilizing the finest dyes and raw materials all filtered to sub micron particle size to insure printer friendly prints. Inks for both porous and non-porous surfaces are available.

CIJ Continuous Ink Jet Small Character Printing

Variable data such as barcodes and traceability codes are printed onto products in industries including: automotive, food, beverage, electronic, consumer products, wire/cable, mailing systems and pharmaceuticals.

Listed below are the most popular items that we sell.

DESCRIPTION	COLOR	SIZE
Hi-Res Ink	Black	16.7oz
Porous	Black	1 Liter

High Resolution Printing using HP Ink Cartridge Technology: Bar Codes and Logos can be printed with these systems.

Loveshaw MicroJet HRP Thermal Jet Printer

The HRP printhead is constructed of an enclosed, industrial-grade housing with stainless steel faceplate and built-in photo sensors to detect product speed and direction. The MicroJet HRP 1/2" is designed for one and two line marking/coding applications. The MicroJet HRP 1" is capable of printing up to 10 lines of data including alphanumerics, logos and UPC-A bar codes onto porous or non-porous surfaces.

- Variable Character Heights: Prints up to 10 lines of print- 1/10", 1/4", 1/2", or 1" (2.54mm, 6.35mm, 12.7mm, or 25.4mm) tall
- Print Resolution: 300 dpi vertical resolution
- Print Speed: Up to 200 fpm (up to 61 mps)

Loveshaw HRP

Digital Design Evolution SC™ Small Character Ink Jet Printer

A non-porous small character ink jet printer designed to print a lot number, expiration date or other product identification directly onto the primary product as it travels on the production line. Three distinct character heights, with bold characters available for the two large sizes. The Evolution SC is powered by Hewlett-Packard thermal ink jet cartridge technology. Sizes available for selection via the keypad are 5x5, 7x5, 7x5 BOLD, 12x9 and 12x9 BOLD.

DOT MATRIX	CHARACTERS	MESSAGES/CARTRIDGE*
5 x 5	8,000,000	800,000
7 x 5	5,650,000	565,000
7 x 5 Bold	2,668,000	266,800
12 x 9	3,694,000	369,400
12 x 9 Bold	1,921,000	192,100

* Based on a typical 10 digit message.

Supplies are available for these and other Ink Jet Printer systems.

For Printing on Porous and Non-Porous Surfaces!

Evolution SC Ink Jet Printer

Citronix ci Series (Continuous Ink Jet) Ink Jet Printer

Citronix printers offer a non-contact way to code your products, whether plastic, metal, paper, wood, glass or other substrate type, with one to five lines of high quality text, graphics and bar codes at very high speeds. Specialty printers available for: micro, heavy pigment, food grade, HS50, pigment and security.

The ciSeries standard printers are:

- ci580: for typical 1 or 2 line printing applications.
- ci700: mid-range printer designed to meet 1 to 3 line printing applications; available with wider range of connectivity options.
- ci1000: advanced printer with capability to print up to 5 lines of text, graphics and bar codes. Includes advanced connectivity features such as ciLink.
- ci2000: designed for harsh environments, this IP65 rated printer includes all the features and capabilities of the ci1000.

Citronix CI Series Ink Jet Printer

Leibinger Jet3 Small Character Inkjet Printer

Leibinger Jet3 Ink Jet Printer

The Jet3 offers a comfortable operation based on Windows CE Technologie® using a 10,4" color TFT touch display. Large keys and menu navigation in different languages as well as endless numbers of special functions like graphic and font editor make the handling extremely easy. The refill system guarantees a clean, splash-free and smell-free refilling process.

Ink Jet Print Samples

Desktop Label Printers

Desktop Label Printers

The perfect printers for applications when a single label needs to be printed and manually applied: retail point of sale and product marking, shelf labeling, inventory and asset management, healthcare specimen labeling, patient tracking, pharmacy/prescription labeling, and more.

Common features include:

- Thermal Transfer models use a ribbon to transfer the printed image to the label.
- Direct Thermal models do not have a ribbon and print directly to the label.
- Plug-and-play with your desktop computer, with software control over the printer.
- High resolution printhead on certain models enables high quality, crisp, clear printing for labeling applications that require data such as two-dimensional bar codes, fine text, or composite graphics.
- RFID-Ready models can encode data onto Radio Frequency (RF) chips embedded into a label (also known as a smart label) creating a powerful Radio Frequency Identification (RFID) label.

Prolong the life of your printhead with Clean Start®

There's an easy, convenient way to maintain your printhead and print quality. It's called Clean Start and it's built in at the beginning of the wax and wax/resin thermal transfer ribbons. Patent pending Clean Start printhead cleaner removes debris before it builds up on the printhead so variable images are always clear, consistent and highly readable.

Thermal and Direct Thermal Printers

Thermal printers are designed to print very high quality labels with or without bar codes and as few as one label at a time or very large batches of labels.

There are two general types of thermal printers: Direct Thermal and Thermal Transfer. Like conventional FAX machines, **direct thermal printers** image the paper directly, using no ribbon, while **thermal transfer printers** use a temperature sensitive inked ribbon that transfers ink to the paper or synthetic label material when heated.

Direct thermal printers use a thermal printhead that applies heat to a chemically treated paper that turns dark as a result of the heat thus creating lines, text and graphics. Direct thermal printing produces a

tag or label that fades with age and will turn black if exposed to heat or strong sunlight. Many restaurant and grocery store receipts are direct thermal technology.

Thermal transfer printers use the same thermal printheads as direct thermal printers, but heat is applied to a ribbon which transfers the image to a substrate (label or tag) creating lines, text and graphics. There are more choices of face materials available with thermal transfer printing.

Labels also come in two main types: direct thermal and thermal transfer. A huge variety of specialty materials and adhesives are available to suit most applications.

Direct Thermal and Thermal Transfer Labels; Thermal Transfer Ribbons

Wax, Wax/Resin and Resin Thermal Transfer Ribbons

The ribbon acts as a buffer between the substrate and the printhead, extending the printhead life. For this reason, the ribbon should always be wider than the width of the tag or label. Thermal transfer ribbons come in three main types:

- **Wax:** Delivers dark, high-definition, rotated and non-rotated barcodes, text, logos and symbols. Durable and smudge resistant. Recommended for shipping labels, carton labeling and retail bags. Wax ribbons are for printing onto paper labels, where the life of the label can be years but must be kept dry and must not be subjected to certain chemicals or oil, which would melt the wax image.
- **Wax/Resin:** Delivers high-definition images at lower print temperatures. Increased resin makes labels more resistant to smearing and scratching. Wax/resin ribbons produce a finer image on very smooth paper or coated paper labels. The printed image is much more durable than wax, but can still only stand slight contact with water.
- **Resin:** Versatile resin ribbons are formulated to print onto a wide variety of labels from mid range synthetics to high end films. Scratch, abrasion, chemical and heat resistant. Prints sharp, dark images at moderate print temperatures.

Label Applicator and Print/Apply Systems

LOVESHAW
an ITW Company

LABEL MILL®

MATO
DCS & Labeling Worldwide

Loveshaw LX-80 Print and Apply Label Applicator

Loveshaw LX-80 Print and Apply Label Applicator

The LX-80 features a simplified control panel, and set-up procedure which allows the user to take the system from pallet to production in less than ten minutes. The LX-80 utilizes a completely redesigned stand and mounting orientation which gives its users the versatility they require - with high quality features such as stainless steel blow tubes, and automatic stroke control.

Loveshaw LX-800-DT Print and Apply Label Applicator

Designed for integration into automatic print/apply labeling applications, this easy to use labeler is designed for dual tamp, single tamp, and corner wrap applications.

Loveshaw LX-800-DT Print and Apply Label Applicator

Loveshaw LX-500P Label Applicator

Loveshaw LX-500P Label Applicator

The easy to use LX-500P is a compact label applicator that can be oriented for top, side or bottom labeling. It is built around a brushless DC Servo motor for accurate and dependable label dispensing. For use in applications that require maximum uptime and high repeatability.

Loveshaw LS-600 Automatic Label Applicator

The LS-600 allows for the use of various applicator options. When applying labels on pallets or runs of various dimensional cases/products, this system is a reliable labeler for industrial environments and applies pre-printed labels and precisely positions them on boxes, pallets or products.

- Dual Tamp available

Loveshaw LS-600 Label Applicator

Many other models are available!

Label Mill 5000RPS Label Applicator

Label Mill 5000RPS Round Product Label Applicator

The Label Mill 5000RPS High Speed Wrap Around bottle labeler was specifically designed for the bottling industry. Built to handle almost any cylindrical glass or plastic container, as well as almost any other cylindrical product, the 5000RPS' standard features are designed to accurately apply full wrap, partial wrap, or front and back labeling at high speeds. Its compact footprint and heavy duty construction make it easy to integrate into new or existing production lines.

- Labeling speed/rate: up to 200 per minute; label speeds up to 2400 inches per minute
- Label size: minimum 1/2" wide x 1/2" long; maximum 6-1/2" wide x 12" long (optional sizes available)
- Application method: wipe-on and tamp
- Equipped with the Label Mill 1510 wipe-on labeler for high-speed, accurate label placement

Label Mill 3605 Print and Apply System

Label Mill 3605 Automatic Print and Apply Labeling System

The hand-held labeler interface allows for quick and easy set-up with adjustment for product delay, tamp duration, cycle type and other key functions. The system's modular design allows for quick in-plant modifications to allow you to meet all your labeling needs.

- Print speed/rate: up to 16" per second (approximately 10 to 90 per minute, depending on label and product size)
- Label size: minimum 1" wide x 1/2" long; maximum 4" wide x 14" long
- Application method: tamp is standard; wipe-on, blow, corner-wrap, and adjacent panel are optional

Label Mill 3501/3510 Automatic Print and Apply Labeling System

More than two dozen I/O points allow for easy integration to scales, bar-code scanners, product diverters, automatic machines, conveyor lines, remote trigger, second trigger for variable data, tamp synchronization, and indicator signals such as "low label," "low ribbon," "printer error," "batch done," and more.

- Print speed/rate: up to 16" per second (approximately 10 to 90 per minute, depending on label and product size)
- Label size: minimum 1" wide x 1/2" long
- Application method: tamp is standard; wipe-on, flag, blow, corner-wrap, and swing tamp are optional

Label Mill 3501/3510 Print and Apply System

Label Mill 1502 Label Applicator

Label Mill 1502 Automatic Labeling System

More than two dozen I/O points allow for easy integration to scales, bar-code scanners, product diverters, automatic machines, conveyor lines, remote trigger, tamp synchronization, and indicator signals such as "low label," "broken web," "batch done," and more.

- Labeling speed/rate: up to 2500 linear inches per minute and, depending on label and product size, approximately 565 labels per minute. Higher speeds available based on application.
- Label size: minimum 1/2" wide x 1/2" long; maximum 6-1/2" wide x 12" long (optional sizes available)
- Application method: tamp, wipe-on, and blow

Label Mill 1201 Semi-Automatic Table Top Label Printer and Applicator

The Label Mill 1201 label printer applicator can serve as a packing table tamp applicator, allowing for immediate labeling at the time of packing insuring fast and accurate information.

- Labeling speed/rate: up to 30 per minute
- Label Size: minimum 1" wide x 1/2" long; maximum 4" wide x 6" long
- Application method: swing tamp

Label Mill 1201 Label Printer and Applicator

Label Mill 1000/1005 Semi-Automatic Table Top Label Applicator

Using the unique rail-mounted modules, the Label Mill 1005 can serve as a label dispenser, tamp applicator, round-product applicator, and flag applicator. Because this unit can do them all, there is no need for additional units for each type of application.

- Labeling speed/rate: up to 45 per minute
- Label Size: minimum 1/2" wide x 1/2" long; maximum 4-1/4" wide x 8" long (optional sizes available)
- Application method: tamp, flag, round-product

Label Mill 1000/1005 Label Applicator

Label Mill 910 Dispenser

Label Mill 910 Dispenser

The Label Mill 910 is a medium duty cost effective label dispenser. Its compact design works well on production lines or anywhere you need labels dispensed.

Plastic Strap Machine Heads

Samuel VK30 Strapping Head

Plastic Strap Machine Heads are just the head of a plastic strapping machine. Without the rest of the machine getting in the way, you can integrate the head into your existing set-up, giving you flexibility not possible with a full-fledged strapping machine. In some cases, the head simply “snaps” into existing machinery.

Samuel VK30 High Performance Plastic Strapping Heads

The VK30 plastic strapping head is ideal for today’s high tension and high seal joint requirements in cotton, textile, lumber, brick, steel and metal product applications. The VK30 offers higher tension capability and greater strap capacity.

- Polypropylene or Polyester strap size: 3/8" (9mm), 1/2" (12mm), 5/8" (16mm), 3/4" (19mm) wide; .015" (38mm) to .050" (1.27mm) thickness
- PLC controls allow high-speed strapping operations with flexible sequence control, as well as adaptability into many diverse applications and head orientations.
- Workload is spread out among three versatile, direct drive motors which are individually optimized to perform specific functions: high speed feed and slack strap take up; final heavy tension; sealer/cam activations.

Dynaric MHB1 Strapping Head

Dynaric MHB1 High Performance Plastic Strapping Heads

- Minimize downtime with the quick-change strapping unit
- Custom built to meet your needs
- Use Dynaric XXL coils to reduce downtime cause by coil changes
- Automatic strap feed and refeed
- To ensure long-lasting operation the strapping and sealing unit are mounted vertically to avoid debris

Plastic Strapping Methods

Type B1F Strapping Head

Type B1F

For vertical strapping with side-mounted strapping head

- Strap head travels towards packing unit

Type B2F

For vertical strapping with side-mounted strapping head

- Strap head travels towards packing unit
- Lance guides strap through pallet voids

Type C2F

For vertical strapping with top-mounted strapping head

- Strap head travels towards packing unit
- Lance guides strap through pallet voids
- Compression units available

Type C2LF

For vertical strapping with top-mounted strapping head

- Strap head travels towards packing unit
- Strapping unit travels into strapping position(s) alongside the packing unit
- Lance guides strap through pallet voids
- Compression units available

Type C4F

For vertical strapping with top-mounted strapping head

- Strap head travels towards packing unit
- Compression units available

Type D1LF

For horizontal strapping with side-mounted strapping head

- Strap head travels alongside packing unit into strapping position(s)
- Strapping unit travels towards packing unit

Type C2F Strapping Head

DF30 Strapping Machine

DF30 Semi-Automatic Strapping Machine

An easy to use strapping machine designed to run 1/4" to 5/8" strapping. Equipped with externally adjustable strap feed and electronic tension control, the DF30 is the perfect machine for securing and unitizing outgoing shipments of mail trays or bundled mail.

- Fast cycle time: 25-30 per minute
- Operates on 115v single-phase power so the machine can be plugged in virtually anywhere in your facility
- AC motor utilizes a direct drive dual motor system, eliminating the need for clutches and brakes

D3100 and D3300 Strapping Machines

D3100 and D3300 Automatic Strapping Machines

Operator friendly strapping machines capable of over 48 strapping cycles per minute. Cycle initiation is by start switch, table mounted photo switch or foot switch. The coil is internally mounted, which minimizes required floor space, but utilizes an open design so that the coil is visible. D3100 accepts 5mm or 6mm strap.

- D3300 accepts 9mm (3/8") or 12mm (1/2") strap; the D3100 uses 1/4" (5mm & 6mm)
- Operates on 120v single-phase power so the machine can be plugged in virtually anywhere in your facility
- Fully automatic version available

DA-93 Strapping Machines

DA-93 Economical Automatic Strapping Machines

The DA-93 will apply up to 30 heat sealed straps/minute, with speed, consistency and reliability. It uses economical polypropylene strapping in a broad range of strap widths and break strengths thereby insuring that the user can use the most economical strap for their products. The unit includes easy strap feed access, strap loop ejector, and short feeding detection device with a strap re-feed function, and end of strap sensor among its standard equipment.

- DA-93 accepts 8mm, 9mm, 12mm or 15mm strapping
- Cycle time: 2-2.5 sec/strap

AM-650 and AM-659 Strapping Machines

AM-650 and AM-659 High Speed Automatic Strapping Machines

The AM-650 and AM-659 are high speed automatic heat seal strapping machines designed for ease of operation. They are capable of applying up to 50 straps/minute to a wide range of sizes and types of packages. Because of the ability to use many sizes of strap, and the electronic tension control, it enables the customer to choose the least expensive strap for their package.

The AM-650 and AM-659 have many standard features that include automatic coil feed system, strap loop ejector, short feed detector, refeed system and foot bar cycle activation pedal.

- Applies 50 straps/minute
- AM-650 accepts 5mm, 6mm (standard) and 9mm (optional) strap; the AM-659 uses 9mm or 12mm
- Operates on 120v single-phase power so the machine can be plugged in virtually anywhere in your facility
- Standard arch sizes available 25.5" wide x 15.4" high (650mm x 400mm) and 25.5" wide x 23.6" high (650mm x 600mm)

Many other models
are available!

Plastic Strapping Machines

Strapping machines are used for keeping boxes, packages, and bundles held tight and together. These machines are loaded with a roll of material called strapping that is then dispensed and sealed around the product that needs to be held together, primarily for the purpose of shipping.

N3400 Strapping Machine

N3400 High Speed Automatic Strapping Machine

A high performance automatic strapping machine equipped to provide reliable performance while using less energy. The N3400 is equipped with an automatic strap feeding system as well as an "end of strap" sensing system with automatic strap discharge once a coil has been completed.

- Up to 55 cycles per minute, depending on tension setting and package size
- Strap width 5mm to 12mm
- Uses standard 120v power to operate the 24 volt direct drive servo motors. The direct drive Servo motors not only save energy but also increasing machine reliability.

N3400A Strapping Machine

N3400A Fully Automatic Strapping Machine

A high performance, innovative and low maintenance fully automatic strapping machine that is equipped to provide reliable performance while using less energy. The N3400A has fewer moving wear parts, all metal strap drive rollers, hot knife sealing technology and DAT (direct access technology) so no tools are needed to access strap path for cleaning.

- Up to 35 bundles per minute
- Energy saving direct drive motor: the direct drive servo motors not only save energy, but also increase machine reliability.
- Strap width 5mm to 12mm
- Uses standard 120v power to operate the 24 volt direct drive servo motors.

ST1 Strapping Machine

ST-1 Fully Automatic High Speed Operator-Free Strapping Machine

A high-speed machine equipped with variable speed powered belts, eliminating the need for an operator. Although the unit can be switched to manual and used like an offline unit, the ST-1 is designed to operate automatically using photo switches to detect incoming packages. To decrease downtime in between coil changes the ST-1 is equipped with an externally located dispenser that can utilize XL coils. It also has an automatic strap feeding system as well as an "end of strap" sensing system with automatic strap discharge once a coil has been completed.

- Accepts 5mm, 1/4", 6mm, 9mm or 3/8" strapping; no parts required to change between sizes
- Adjustable conveyor height from 30.5" to 35.4"
- Operates on 120v single-phase power or 208v-460v 3-phase power

D2400 Strapping Machine

D2400 High Speed Automatic Strapping Machine

When initiated, the strap is pulled around the package then tightened to the precise tension; the plastic strap is then heated, sealed and pressed to create the best seal possible, all in approximately 1.2 seconds.

The D2400 has a low maintenance strapping head with minimal moving parts, reducing mechanical malfunction due to part failure or wear. All body panels can be easily removed to access the strapping head, electrical box and strap pool area.

- High speed cycle time, capable of more than 50 cycles per minute
- Accepts 5mm, 6mm or 9mm strapping, requiring no additional parts
- 110 volt Single-phase

for information
on the poly
strap for these
machines!

A variety of industries can benefit from the use of strapping machines. Workers in commercial printing, food, general packing, lumber, newspaper printing, magazine publishing, and postal fields all need various types of strapping. Shipping books, papers, and merchandise requires a simple and secure method of packaging. Strapping machines are the quickest and easiest (and often the most cost-effective) method of fastening for these industries.

DF11 Heavy-Duty Strapping Machine

The DF11 is built around a rugged steel frame with heavy-duty components and has proven to be a "workhorse" in many industries. The DF11 comes standard with roller tabletops allowing the user to handle packages effortlessly. The machine can be configured with many different arch sizes to best fit your application needs.

- Many arch sizes available for small and extra large packages
- Accepts 3/8" or 1/2" plastic strapping

DF11C Strapping Machine

DF11C Narrow Seal Automatic Strapping Machine

The DF11C is a specialized machine designed to produce a tight bundle around items as small as 1.6" wide. Engineered with a narrow sealing head, the DF11C can strap rigid material such as steel bars, as well as cylindrical products like PVC tubing, metal pipes, and even fence posts - while maintaining strap tension.

- Ideal for strapping packages as small as 1.6" wide by 1.2" high
- 3/8" or 1/2", strapping can be used
- Operates on 120 volts single-phase power, enabling it to be used in any location

DF11SCA Fully Automatic Stainless Steel Cabinet Strapping Machine

The DF-11SCA is an operator-less machine incorporating a stainless steel exterior cabinet design for use in the harsh environments of the meat and poultry packing environments. Utilizing powered belts on the tabletops and photo switches, this unit can place up to two straps automatically. The dispenser is internally located, which minimizes the required floor space and reduces the amount of condensation which can form on the coil.

- Accepts 3/8" or 1/2" strapping
- Operates on 220v 3-phase power; also available in 110v single-phase or 460v 3-phase power variations

DF11SA Fully Automatic All Stainless Steel Strapping Machine

The DF-11SA is an operator-less machine incorporating a stainless steel exterior cabinet design and corrosion resistant (stainless steel, brass, plastic, etc.) parts to provide maximum protection in the harsh environments of the meat and poultry packing industries. Utilizing powered belts on the tabletops and photo switches, this unit can place up to two straps automatically.

- Operates on 3/8" or 1/2" strapping
- Operates on 220 volt 3-phase power or 440 volt 3-phase power (optional)

DF117 Automatic Side Seal Strapping Machine

The DF117 side seal strapping machine is ideal for integration with low (13" high) conveyor lines. The arch configurations (height and width) increase independently in 200mm (approximately 8") increments, so configuring the arch for a specific application is doable. The DF117 can be set up to communicate with your conveyor controls by installing an automation capability kit.

- Accepts 3/8" or 1/2" strapping
- Operates on 220v 3-phase power; also available in 115v variation

DF11 Strapping Machine

DF11SCA Strapping Machine

D11SA Strapping Machine

DF117 Strapping Machine

Plastic Strapping Machines

A small business that has limited shipping or packaging needs might use a semi-automatic low volume strapping machine. Another small to medium company that has a consistent amount of shipping, but not a mass amount of production, shipping or packaging might use the semi-automatic moderate volume strapping machines. Mass production or packaging – like postal offices, shipping companies, or a widely distributed newspaper company – would probably use a fully automatic, high volume strapper.

P726 Strapping Machine

P726 Semi-Automatic Strapping Machine

- Uses polypropylene strap sizes 1/4", 3/8", or 1/2" (6, 9, 12mm) wide with no additional parts required
- Package size: 2.5" x 1.25" minimum
- Automatic motor shut-off if not used within 60 seconds
- Tension: 10 to 132 lbs.
- Adjustable package guides ensure positioning accuracy of package over sealing head.
- 110 volt allows for use anywhere in the facility.
- Heater blade reaches operating temperature in just 5 seconds and maintains an optimum operation level thereafter.
- All operating functions (strap feed, strap tension and heater bar temperatures) are controlled by a printed circuit board.

P702-59 Strapping Machine

P714 Semi-Automatic Strapping Machine

- Uses polypropylene strap sizes 1/4", 3/8", 1/2" or 5/8" wide
- Package size: 4" x 1" x 5" minimum
- Tension: electronic tension up to 88 lbs.
- Unique dual tension mode
- 110 volt allows for use anywhere in the facility
- 45 second start up

P714 Strapping Machine

P702-59 Automatic Strapping Machine

- Uses polypropylene strap sizes 5mm or 6mm wide, embossed or smooth
- Package size: 2.5" x 1" minimum to within arch size
- Strapping speed: up to 65 cycles per minute
- Tension: 2 to 70 lbs.
- The operator control panel is hinged to allow access from enhanced diagnostics and the ability to make adjustments.
- The compact frame features an inside mount strap dispenser that hinges up for auto strap loading at knob.
- All P702 series machines have a hinged open top plate for easy access to the strapping head. They also feature quick release feed guides for immediate access to the strap feed system without the need for tools.

P702-12 Strapping Machine

P702-12 Automatic Strapping Machine

- Uses polypropylene strap 9mm or 12mm wide, embossed or smooth
- Package size: 2.5" x 1" minimum to within arch size
- Strapping speed: up to 60 cycles per minute
- Tension: electronic tension 2 to 100 lbs.
- Outside mount dispenser for fast auto strap loading at waist height
- The operator control panel is hinged to allow access from either side of the machine.
- The new quick release dispenser flange lock knob makes coil changes faster.
- All P702 series machines have a hinged open top plate for easy access to the strapping head. They also feature quick release feed guides for immediate access to the strap feed system without the need for tools.

P702N Narrow Head Strapping Machine is also available.

Our Service Technicians can repair your tools and machines!

Our trained and certified service technicians can repair your tools and machines, even if you didn't buy them from us. Call us or visit us online at carlsonsystems.com, midatlanticfasteners.com, or westerntool.com to find the location nearest you, and our technicians will get you back up and running in no time!

There are two basic substrates used for strapping: plastic and steel. From these two substrates, a number of different strapping products are available to meet a wide variety of packaging requirements. The items that need to be packaged determine which materials are best for your application.

Plastic straps are made of polyester for medium and heavy duty applications, or polypropylene for light to medium bundles or packages.

P715 Automatic Strapping Machine

The P715 combines a heavy duty frame design with the high operating speeds and precision strap placement of many of the newer machines.

- Uses polypropylene strap: 5mm, 6mm (1/4"), 3/8" or 1/2" wide, 8" x 8" or 9" x 8" core
- Package size: 3.1" x 1" minimum to within arch size
- Strapping speed: up to 70 cycles per minute
- Tension: 2 to 130 lbs.
- The operator control panel is located on the table top of the machine for easy access.
- A diagnostics display monitors the electrical operating system for instant solutions should a problem arise.
- The three motor seal engine design provides a high level of performance while greatly reducing the number of moving parts when compared to other machines.
- The dispenser can be adjusted to work with 8"x8" coils or 9"x8" coils.

P715 Strapping Machine

P702B Fully Automatic Conveyorized Strapping Machine

The P702B features high operating speeds combined with heavy duty structural designs, allowing it to be used in the most demanding applications. It features automatic strap loading, automatic strap ejector when the coil runs out, and a loop ejector when it is cycled without a package present.

- Uses polypropylene strap: 5mm, 6mm, 9mm or 12mm wide, 8" x 8" core
- Package size: 4" x 1.5" minimum to within arch size
- Strapping speed: up to 40 packages/65 cycles per minute
- Tension: up to 100 lbs.
- Single, double, multiple strap and bypass modes
- All P702 series machines have a hinged open top plate for easy access to the strapping head. They also feature quick release feed guides for immediate access to the strap feed system without the need for tools.

P702B Strapping Machine

P702BPS Fully Automatic Conveyorized Stainless Steel Strapping Machine

In addition to the features of the P702B, the P702BPS features a stainless steel frame, body and covers for use in cold, wet environments.

- Uses polypropylene strap: 5mm, 6mm, 9mm or 12mm wide, 8" x 8" core
- Package size: 2.75" x 1" x 5" minimum to within arch size
- Strapping speed: up to 40 packages/65 cycles per minute
- Tension: up to 100 lbs.
- All P702 series machines have a hinged open top plate for easy access to the strapping head. They also feature quick release feed guides for immediate access to the strap feed system without the need for tools.

P702BPS Strapping Machine

OB-360 Automatic Paper and Film Tape Banding Machine

Three modes of operation—single action, continuous operation and pause—to accommodate various product requirements. Straps cases from 30mm to 420mm wide with a three-stage tightening adjustment that varies depending on the case: firm for hard products and gentle for fragile products.

- Uses paper tape 1.125" W x 623' L or Poly Film 1.125" W x 656' to 1214' L
- Straps packages from 1.125" W x 0.375" H to 16.5" W x 8.25" H (30mm x 10mm to 420mm x 210mm)
- High capability - up to 30 cycles per minute.

Many other machines and arch sizes are available.

Samuel OB-360 Strapping Machine

EP-3080 Oscillated Wound Strapping Dispenser

EP-3080

Standard Duty Oscillated Wound
Core I.D. 8" and 16"

- Face width 3" - 6"
- 8" Rubber tires
- Quick load system

EP-3100 Oscillated Wound Strapping Dispenser

EP-3100

Regular Duty Oscillated Wound
Core I.D. 16" only

- Face width 3" - 6"
- Large upper tray for battery tools
- 10" Rubber tires

EP-3200 Oscillated Wound Strapping Dispenser

EP-3200

Premium Oscillated Wound with Strap Troller

- Core I.D. 16" only
- Face width 3" - 6"
- Large upper tray for battery tools
- 10" Rubber tires

EP-3340

Ribbon Wound Steel

- 3/4" to 1-1/4" steel strapping
- Core I.D. 16"
- 8" Rubber tires
- Quick load system

EP-3350

Ribbon Wound Steel

- 3/4" to 1-1/4" steel strapping
- Additional tool holders
- Extra heavy duty wheels
- Large tool tray
- Robust build

The strap carts shown are some of the many models available.

EP-3340 Ribbon Wound Steel Strapping Dispenser

EP-3350 Ribbon Wound Steel Strapping Dispenser

100-567 Standard

100-567

Standard Duty Oscillated Wound

Mobile dispenser comes with large tool tray to accommodate manual and battery powered tools. Heavy duty 10" wheels, automatic brake, strap payoff on the side. Can be used with steel and plastic strapping with 16"x6" and 16"x3" put up.

100-567-T

Standard Duty Oscillated Wound with Troller Brake

Mobile dispenser comes with heavy duty troller brake and large tool tray. Heavy duty 10" wheels. Can be used with steel and plastic strapping with 16"x6" and 16"x3" put up.

100-567-HD Heavy Duty

100-567-HD

Heavy Duty Oscillated Wound

Extra rugged mobile dispenser comes with heavy duty troller brake and heavy duty 10" wheels. Reinforced frame and tool tray with tool holsters to hold one cutter and one sealer. Used with steel and plastic strapping with 16"x6" and 16"x3" put up.

100-7HD

Stationary Horizontal Oscillated Wound

Stationary horizontal dispenser. Made of heavy gauge steel, the spun bucket is bearing mounted for easy strap payoff. Strap payoff is from the inside of the coil.

NM-7

NM-7

Oscillated Wound

Rugged tubular steel frame with tool tray, seal storage compartment & 6" rubber tires. Heavy gauge spun steel discs with positive coil braking device. For plastic strapping coils with 8" face and 8" inside diameter.

200-RW

Heavy Duty for Ribbon Wound Steel Strap

Heavy duty welded steel frame with hardened steel rollers for smooth coil payoff. Features easy loading from a vertical or horizontal dispenser position, 10" HD wheels, a tool tray and holsters for one strap cutter and one strap sealer. Manually adjustable for strap sizes of 3/4", 1-1/4" and 2". Strap payoff to either side.

200-RW Heavy Duty

100-8

Heavy Duty for Ribbon Wound Steel Strap

Heavy duty floor model. Off feeds from outside diameter. Heavy duty bearing for smooth action. For ribbon wound strapping 3/4" to 2".

100-9

Heavy Duty for Ribbon Wound Steel Strap

Heavy Duty with foot activated shear. For ribbon wound strapping 3/4" to 2".

Manual Tools

Tensioners

- Tensions polypropylene strap, polyester strap and poly cord
- There are many different types of regular duty and heavy duty strap tensioners available to strap widths from 3/8" to 3/4"

Regular Duty Plastic Strap Tensioners

Heavy Duty Plastic Strap Tensioners

Model	Description (Manual Tensioners)
T6 EP-1150	Drum-type for 3/8" - 3/4" (10mm-19mm) plastic strapping. Flat surfaces.
T4 EP-1175	Push-type for 3/8" - 3/4" (10mm-19mm) plastic strapping. Curved surfaces.

Sealers

- Seals polypropylene strap, polyester strap and poly cord
- Front action, front action offset and side action models are available

Regular Duty Sealer

Heavy Duty Sealer Front Action

Heavy Duty Sealer Side Action

Model	Description (Manual Sealers)
S-3	For 3/8" (10mm) plastic strapping.
S-4 & S-4HD EP-1225-12 EP-1250-12	For 1/2" (13mm) plastic strapping.
S-5 & S-5HD EP-1225-58 EP-1250-58	For 5/8" (16mm) plastic strapping.
S-6 & S-6HD EP-1225-34 EP-1250-34	For 3/4" (19mm) plastic strapping.

Round surface tensioners and sealers are also available.

Combination Tools (Seal-Type)

Single-Lever Manual

- For Polypropylene (PP) and Polyester (PET) Strapping
- Manual drum type combination tensioning and sealing tool
- Feed wheel type tensioning
- Strap width range: 1/2" x .015" to .035"; 5/8" x .015" to .040"

Manual Plastic Strap Combo Tools

Model	Seal	Strap Width	Strap Thickness
P403	4-M	1/2" 12 - 13mm	0.015" - 0.035" 0.40 - 0.90mm
P404	5-M	5/8"	0.015" - 0.035"
OR 4000.13	ORP 2100.13	1/2" 13mm	0.016" - 0.028" 0.40 - 0.70mm
OR 4000.16	ORP 2300.16	5/8" 16mm	0.020" - 0.040" 0.50 - 1.0mm

Power Tools

Combination Tools - Sealless

Battery Powered Tension and Sealing Tools

- Operates on one 14.4v battery which recharges in 25 minutes; delivers approximately 250 polypropylene or 120 polyester cycles per charge
- Ergonomic design allows both tensioning and sealing functions to be completed using convenient thumb activated buttons

There are many other tools available - some of the most popular models are shown.

Friction Weld Battery Powered Plastic Strap Combo Tools

Pneumatic Powered Friction Weld Tools

- Combo tool features pneumatic tension and friction sealing in one tool

Model	Strap Type	Strap Size		Description
		in	(mm)	
P326	Polyester or Polypropylene	3/8" x .016-.041 to 5/8" x .016-.041	(10 x .40-1.05mm) (16 x .40-1.05mm)	3.0 Ah Li-Ion battery
P327	Polyester or Polypropylene	5/8" x .025-.041 to 3/4" x .016-.041	(16 x .65-1.05mm) (19 x .40-1.05mm)	3.0 Ah Li-Ion battery
P330	Polyester or Polypropylene	3/4" x .031-.060 to 1" x .016-.053	(19 x .80-1.53mm) (25 x .40-1.35mm)	3.0 Ah Li-Ion battery
P350	Polyester	1/2" x .031 to 1-1/4" x .044	(13 x .79mm) (32 x 1.12mm)	Pneumatic tension and friction sealing
P355	Polyester or Polypropylene	3/8" x .016 to 5/8" x .041	(10 x .4mm) (16 x 1.04mm)	Pneumatic tension and friction sealing
P356	Polyester	5/8" x .026 to 3/4" x .053	(16 x .65mm) (19 x 1.35mm)	Pneumatic tension and friction sealing

Polypropylene Strap - Machine Grade

Refer to the strapping machines on pages 27-31

What is Polypropylene Strap?

The most economical of all strapping material, polypropylene is a light weight strapping that can be used for a variety of bundling applications: carton closure, bundling, reinforcement and unitizing. It is available in a wide variety of sizes and gauges and offers the greatest elongation of all strapping and has good initial recovery characteristics. Most polypropylene can be heat sealed with a joint efficiency of 70 to 80%. By nature, polypropylene strapping is very flexible and has the ability to mold to contours of odd-shaped or irregularly shaped packages.

Polypropylene Strap - Machine and Hand Grade and Polyester Strap

Controlled Elongation Polypropylene Strap

Controlled elongation polypropylene strap offers lower elongation as standard for better initial tension and superior creep resistance.

Ultraband Polypropylene

A hybrid of characteristics blended to create the optimum in performance and economy. Ultra low elongation offers high resistance to impact and superior break strength for the most challenging packaging applications.

- Can replace higher priced polyester and steel strapping in many applications
- Absorbs more shock energy than steel and PET
- Can be friction welded, eliminating the high cost metal seals

Polyester Strap

There are many cost saving advantages and performance benefits associated through the use of polyester strapping. Manufactured to the tightest industry tolerances, polyester strapping is AAR approved for use with brick and lumber. It has excellent retained tension properties which makes it ideal for heavy duty loads that require good initial tension as well as retained tension, which keeps the strap tight around the load even if the package settles and shrinks in size.

Standard Polyester

Woven Polyester Strapping

GatorSTRAP™ heavy duty strapping offers these advantages:

- Has no dangerous sharp edges to cut someone
- Is only 1/4 the weight of steel strapping
- Can be easily applied with our high friction buckles and retensioned if the load shifts during transit
- Has natural shock absorption, providing the ability to move with a dynamic load without breaking

Poly Buckles, Seals and Strap Kit

Why Would I Use Buckles Instead of Seals?

Plastic and wire buckles are used in low volume plastic strapping applications where cost is a factor. The manual operation requires no tools for securing the strap, only for cutting. The strapping is threaded through the buckle and tightened manually without the use of a tool.

Meanwhile, seals are used when the application is higher volume and requires a more secure fastening solution. Seals require the use of a manual or automatic sealer tool to attach. Unlike buckles, the strapping is threaded through the seal and tightened using a sealer.

Buckles & Seals

Wire Buckle

Wire buckles are easy to use and self-lock when under tension in order to provide a secure seal. They are ideal for polypropylene and polyester strapping.

Plastic Buckle

Plastic buckles are light-weight, durable, and secure. They're easy to thread while being very slip-resistant.

Metal Seal

Special tools called sealers are used to crimp notches into metal seals, which bite into the plastic strap to form a secure hold that keeps the strapping in place.

Heat Seal

Plastic strapping such as polypropylene and polyester can be secured using the heat seal process. A hot knife heats two ends of the strap then joins them together to form a strong bond.

Friction Weld

Friction welds are created when a sealing tool rubs two ends of plastic strap together at extremely high speeds. This process fuses the two straps together and creates a strong seal.

Poly Seals

Serrated and Standard Poly Seals

Serrated seals are designed with threads, or serrations, on the inside of the seal to grip polyester or polypropylene strapping. The threads prevent the strap from slipping inside the seal.

DESCRIPTION/SIZE	CTN CT	ITEM CODE
1/2" Seal	1000 or 2500	12-POLYSEAL
5/8" Seal	1000	58-POLYSEAL

5/8" Serrated Seal	1000	ORP2300.16

Poly Strap Kit

A complete strapping station in a box! 3000 feet of 1/2" 350 lb. poly strap and 300 metal wire or plastic buckles, it's your choice. You also get a metal tensioner/cutting tool in a handy self-dispensing box!

Absolutely perfect for low volume users and out-of-the-way shipping departments. Strap, bundle, unitize - everything you need and full buckle instructions too!

DESCRIPTION/SIZE	ITEM CODE
3000' Light Duty Strap, 300 Wire Buckles, 1 Hand Pull Tensioner	SPW
3000' Light Duty Black Strap, 300 Plastic Buckles, 1 Hand Pull Tensioner	SPP-BLK
3000' Light Duty White Strap, 300 Plastic Buckles, 1 Hand Pull Tensioner	SPP-WHT

For replacement buckles, order HDB-4 (1/2" wire) or PLB-4 (1/2" plastic)

Increase shop safety, reduce housekeeping problems and costs. Choppers and Scrap Converters dramatically cut man-hours used to discard steel and plastic strap, tubing, wire, cable, mild steel and, in many cases, turn it into saleable products.

Sweed Model 450WMXHD Wide Mouth Dual Drive Band Chopper

Featuring a 3-1/2" infeed opening, operation is easy. Just insert the strapping material into the infeed funnel and the feedworks (pinch rolls) will then grab the material and pull it into the rotating knife path. The feedworks will continue to pull at a rate of 106 feet per minute until the material is consumed or the operator releases the feedworks.

- Easy to reach feedworks release hand lever
- Infeed funnel with anti-kickback flap
- Knives can be rotated (4 times) for extended life
- Comes standard with 120v one-phase power supply; several other power supply options are available by request
- Accepts 3/8" x .064", 1/2" x .064", and 3/4" x .031" steel strap, and all sizes of plastic/PET strap

Sweed Model 450WMXHD Scrap Chopper

Sweed Model 510XHD Scrap Chopper

A great choice for high-volume conversion of plastic and metal strapping, mild steel flat bar, slitter-line trim, and other materials. For easy maintenance, the Model 510 has been designed with a hinged feedworks, making it an excellent choice for in-line placement to process slitter-line trim. The 510 can be ordered with air cylinder feedworks and safety detent foot switch. Ideal for heavy-duty applications.

- Infeed funnel with anti-kickback flap
- Both feedrolls are driven to enhance feeding
- Accepts 3/8" x .093", 1/2" x .087", 3/4" x .0625", 5/16" x .046", and 1" x .046" steel strap, and all sizes of plastic/PET strap

Sweed Model 510XHD Scrap Chopper

Mallard Machine Series 800, 500, 300 and 100 Scrap Saver Recycling Machines

Turn the cost of waste strapping disposal into a profit of saleable scrap. Scrap Saver machines chop waste wire and 3/4", 1-1/2" and 2" steel strap as well as all sizes of plastic strap into 3" pieces.

- Sealed heavy duty bearings
- Self feeding handy feed stop
- 8-way cutter blades

Mallard Machine Scrap Saver

Highlight Poly Packer 2400

The Poly Packer Model 2400 is specifically designed to compact stretch film. It will reduce the volume of uncompacted stretch film by up to 90%!

- Bale Size: 24 inches wide by 24 inches deep by 24 inches high

Highlight Poly Packer

Highlight Shred-it-tor Corrugated Shredder

Model SD-1675 Standard Duty Corrugated Shredder

Model HD-1675 Heavy Duty Corrugated Shredder

The Highlight Shred-It-Tor shreds scrap corrugated cardboard into useful packaging material and will shred 16.75 inches of material and cut any additional width to be fed back into the Shred-It-Tor.

Tensioners

Feedwheel Tensioners - Manual

- For general use on flat surfaces
- Regular duty features strap width range of 3/8" to 3/4" or 1/2" to 3/4"; strap gauge range: .015" to .025" or .028"
- Heavy duty features strap width range of 3/4" to 1-1/4"; strap gauge range: .015" to .025"

Feedwheel Push-Type Tensioners - Manual

- Heavy duty pusher type features strap width range of 5/8" to 1-1/4"; strap gauge range: .023" to .031"

Push-Type Tensioners - Manual

- For use on small or irregularly shaped surfaces
- Regular duty strap width range: 3/8" to 3/4"; strap gauge: .025"
- Heavy duty strap width range: 3/4" to 1-1/4"; strap gauge: .035"

Windlass/Drum-Type Tensioners - Manual

- For applications requiring high tension
- Heavy duty strap width range: 3/4" to 1-1/4"; strap gauge range: .031" to .044"

Sealers

Sealers - Regular Duty Manual

- Single notch, up cut, front action: strap 3/8", 1/2", 5/8" and 3/4" wide; strap gauge range from .015" to .023"
- Double notch, down cut, front action: strap 3/8", 1/2", 5/8" and 3/4" wide; strap gauge range: .015" to .023"
- Other models are available in single notch or double notch, up cut or down cut, front or side action
- Ideal for use on irregularly-shaped packages; use with push-type tensioners

Sealers - Heavy Duty Manual

- Single notch, down cut, side action: strap 3/4", 1" and 1-1/4" wide; strap gauge range from .025" to .035"
- Double notch, down cut, front action: strap 1/2", 5/8" and 3/4" wide; strap gauge range: .023" to .031"
- Double notch, up cut, side action: strap 3/4", 1" and 1-1/4" wide and strap gauge range: .025" to .035"
- Other models are available in single notch or double notch, up cut or down cut, front or side action
- Ideal for use on irregular-shaped packages; use with push-type tensioners

Many tool models are available from these and other suppliers.

Manual Tools

Shears

Strap Cutters

- Regular duty steel strap cutter: strap width range 3/8" to 3/4"; strap gauge range .015" to .031"
- Heavy duty steel and poly strap cutter: strap width range 3/8" to 1-1/4"; strap gauge range: .015" to .035"

Regular Duty Steel Strap Shears

Heavy Duty Steel and Poly Strap Shears

Combo Tools

- Enables user to perform tensioning, sealing and cutting in one simple operation without the need for separate tools
- By eliminating metal seals, sealless systems provide significant cost savings

Seal-Type - Regular Duty Manual

- Strap width range: adjustable from 3/8" to 3/4"; strap gauge range: .015" to .023"
- For use with regular duty steel strap only

Regular Duty Seal-Type Combo Tool

Sealless - Regular Duty Manual

- Strap width range: adjustable from 3/8" to 3/4"; strap gauge range: .015" to .023"
- For use with regular duty steel strap only

Regular Duty Sealless Combo Tools

Sealless Tool with MicroLock - Regular Duty and High Tensile Manual

- Strap size: regular duty 3/8" x .015" to .020"; or high tensile 1/2" x .015" to .025", 5/8" x .015" to .025" and 3/4" x .015" to .025"

Regular Duty Sealless Combo Tool with MicroLock

MicroLock Sealless Seal

Pneumatic Tools

Sealers

- Strap size: 3/4" x .020" to .040"; 1-1/4" x .029" to .040"
- Pneumatic double up notch sealer; ideal for curved or irregularly shaped packages
- Uses a seal with a double notch up cut seal joint for maximum safety in a one stroke operation
- Used in conjunction with pneumatic tensioner

Pneumatic Sealer

Pneumatic Tensioner

Tensioners

- Strap width range: 3/4" to 1-1/4"; strap gauge range: .025" to .050"
- Provides the extremely high tension required for heavy loads of metal, with a maximum tension of 1900 lbs.
- Used in conjunction with pneumatic sealer

Push-Type Combination Tool

- Strap size: regular duty 3/8" x .015" to .020"; high tensile 1/2" x .020" to .023", 5/8" x .020" to .023" and 3/4" x .020" to .025"
- Pneumatic push type for round packages and irregular shapes
- Two buttons control the entire operation of tensioning, sealing and cut-off

Pneumatic Pusher-Type Combination Tool

Refer to pages 42-43 for the steel strap and seals for these tools.

Many other sizes of steel strap are available.

Steel Strap

All steel strapping is coiled in either an oscillated pattern (the steel strapping is wound in a tight uniform pattern) or ribbon wound (the steel strapping is wound onto itself so that the width of the coil is the same as the strap).

Regular Duty Steel Strap is a low carbon steel strapping produced for general applications, such as package reinforcement, unitizing, bundling, palletizing and box closure, and is available in a number of different finishes.

Ultra Ten is specifically developed to provide our customers with a high quality, cost effective alternative to high carbon high tensile AAR-33 strapping. Ultra Ten is not suitable for applications such as open-top car loading.

High Tensile Steel Strap is manufactured for optimum results in every application. Specially blended cold rolled steel of a high carbon and manganese analysis is heat treated to ensure uniform tensile and elongation characteristics. Typical applications are unitizing compressed fiber bales, securing heavy steel coils and open-top railcar and trailer loading. High tensile strapping provides more footage per coil than heavy duty sizes of comparable break strength.

Painted and Waxed Steel Strapping features hard baked-on paint on both sides along with a wax coating. Painted strap is usually black, but other colors are available as well.

Unpainted and Waxed Regular Duty Steel Strapping is a low carbon product for many general applications. Unpainted strap is an economical alternative that offers similar characteristics as painted strap at a lower cost. In some cases unpainted strapping will even outperform painted strap.

Blued & Waxed is a mid carbon product for most general applications. The surface finish is blued over a flame rather than painted; bluing the steel burns off foreign material from the steel. Blued strap is an economical alternative that offers similar characteristics as painted strap at a lower cost.

Zinc/Epoxy Coated Strapping offers greater rust resistance than regular painted material, and is commonly used when prolonged outside storage is a must.

Steel Seals and Strap Caddy Kits

Open Seals

Also known as "snap-on" seals, these are put over the overlapping strapping ends prior to tensioning.

Push Type Seals

Also known as "overlap" seals and are pre-threaded and used when strap is tensioned by butting the nose of the push-type tensioner against the seal.

Closed Seals

Also known as "thread-on" seals. Strapping must be threaded through before tensioning.

Semi-Closed Seals

Heavy-duty version of the Open Seal, they have one open and one closed leg.

Steel Seals

Open Seals

Fast and easy to use, open seals can be placed over the strap before or after tensioning.

DESCRIPTION	CTN CT
3/8" Seals	2000
1/2" Seals	2000
5/8" Seals	2000
3/4" Seals	2000 or 5000

Push-Type Seals

The strap is pre-threaded through the seal prior to tensioning. An overlapping flange provides the required strength as the tensioner pushes against the edge of the seal.

Closed (Thread On) Seals

Also referred to as thread-on seals, the strap is pre-threaded through the seal prior to tensioning.

DESCRIPTION	CTN CT
3/4" Heavy Duty Seals	2000
1-1/4" Heavy Duty Seals	1000

Semi-Closed (Open Flange) Seals

Open flange seals are used for heavy duty or high tensile steel strapping. Their design allows placement over the strap before or after tensioning.

DESCRIPTION	CTN CT
3/4" Heavy Duty Seals	2000
1-1/4" Heavy Duty Seals	1000

All seals are regular duty unless otherwise noted. Many different sizes and styles also available.

Strap Caddy Steel Banding Kits

The Strap Caddy Kit is a complete portable steel strap solution. Ready to carry and use steel strap, tools, and seals in a carry-all dispenser. Perfect for low volume, occasional and satellite operations. Included tools: Tensioner (SST-34), Sealer (SSS-12 or SSS-34) and a Shear Tool (H51).

Tools are medium duty rated and mount in the Strap Caddy carrier with steel strap and seals. Tools, strap and seals are also available separately.

Edge Protection

Paperboard Corner and Edge Protectors

Protect your products during shipping, handling and storage.

Paperboard edge protectors are a simple product that solve a wide range of packaging problems. Made by laminating recycled paperboard into a rigid right-angle shape, they provide edge protection as well as load containment, stabilization and strengthening. Plus, they easily combine with other materials to create custom packaging solutions.

Paperboard edge protectors are available in a wide range of sizes, configurations and options that meet a wide spectrum of needs. Some paperboard edge protectors can also be customized with print options including CautionBoard, IdentiBoard, CuttingBoard and LibertyLine, or you can custom print with your logo, promotional tagline, handling instructions, product code or other information.

Paperboard Edge Protectors - Sizes

Paperboard edge protectors are available in a wide range of configurations: equal leg lengths of 2.0" x 2.0", 2.5" x 2.5", 3.0" x 3.0" and 4.0" x 4.0"; offset leg lengths of 1.0" x 3.0", 2.0" x 3.0" and 2.0" x 4.0"; lengths range from 2.5" to more than 24" and calipers from 0.090" to 0.500".

Many additional calipers and sizes are available either boxed or in skid quantities!

Laminations products:

VBoard® Edge Protection: VBoard edge guards and corner protectors are available in 80 sizes, in lengths ranging from 2.5" (6.35cm) to over 24" (7.31m). Calipers range from .090" to .500" (.152 to 1.270cm).

VGuard® strap guard is a shorter version of their VBoard in lengths from 2.5" to 12" and provides targeted edge protection.

MegaVBoard®, the mega-sized VBoard corner and edge protector is available in sizes up to 9" x 9" (2" leg minimum) and a variety of leg lengths and calipers. It improves load containment and weight distribution for stronger, more secure pallet loads and enhances structural integrity for increased stacking strength, allowing pallets to be stacked higher without risking corner and edge damage.

PerfBoard™ - create the ideal height edge protection in a snap with perforated convenience.

Paperboard Corner and Edge Protectors are available in both white and kraft. Ask about the cost savings by purchasing kraft.

Pregis products:

ProFlex® foam edge and corner protectors provide surface and edge protection to limitless packaging applications.

- **EdgeFoam®** Protectors: flexible L- or U-shape channels enables the structure to wrap around corners, edges and asymmetrical shapes with a snug fit, conforming to just about any product contour.
- Withstand multiple impacts as well as constant vibration
- Excellent resiliency, flexibility and shape memory

ITW Angleboard products:

AngleBOARD® provides cardboard edge protection and enhances the stacking strength of palletized goods.

AngleWRAP® is an excellent replacement for wood packaging and it permits higher strap tension for tighter, more secure loads.

CornerBOARD™ is a high-strength, moisture resistant corner post made of recycled paper and plastic with a paper outer wrap.

FormaBOARD™ utilizes a unique manufacturing process to heat bond polycoated plies of paper, forming them into rigid right angles of exceptional strength. FormaBoard enables the use of a thinner caliper and/or shorter leg length than with a standard open-edge product.

EcoEDGE is 100% recycled content and, like our **CornerBOARD™**, can be reclaimed, recycled and reused in the manufacturing of new EcoEdge.

StackMaster™ (not shown) is a corner post that increases its load-bearing strength, unifies stacked loads, absorbs shock and prevents damage during package handling and transit.

Caraustar products:

Protect-A-Board protects the edges of palletized freight from strapping, stretch film, dents, abrasions and other damage associated with shipping and handling.

Protect-A-Wrap is formed at a 90-degree angle, then reinforced by wrapping the top ply of paper for added strength and a cleaner appearance. Improved stacking ability due to enhanced column strength and enhanced moisture protection.

Snap Right Perforated Edge Protectors - In seconds you can remove perforated portions of Snap Right to create the ideal height edge protection. Available in multiple segment lengths and leg sizes (1.5" x 1.5", 2" x 2", 3" x 3", 4" x 4").

Strap Protectors - Available in standard grade or machine grade to provide superior protection from strap damage.

Protect-A-Coil - Designed to protect inside and outside diameters of metal coils, rolls of fine paper and other irregularly palletized freight.

Protect-A-Flex offers the benefits of our popular Protect-A-Board but with mitered corners that reduces packaging labor and allows 90-degree turns that form a protective frame.

Paperboard Strap Guards

A cost-effective strap protector

A shorter version of the paperboard edge protectors, they provide protection from strapping damage on palletized loads or stacked products. This practical, economical strap protector is made to a high degree of precision to ensure the uniform shape and sizing required for automated application systems.

Paperboard strap protectors are available in lengths from 2-1/2 to 12 inches (6.35 to 30.48cm).

Refer to page 54 for information on corrugated shipping boxes.

Stretch Wrap Machines

HIGHLIGHT
INDUSTRIES, INC.

Turntable systems use a film carriage on a fixed mast to apply stretch film as it ascends and descends and rotates the load. This type of system can meet the needs of most applications. Semi-automatics are designed for use with a forklift (high profile turntable) or a pallet jack (low profile turntable) and automatics are normally used with a conveyor.

Predator SS Stretch Wrapper

Predator® UX Low Profile Turntable

- 59" diameter turntable
- 4,000 lb. load capacity
- Front & rear forklift portable
- 48" ramp available

Predator UX-Low Profile Turntable

Predator® SS Semi-automatic Turntable Stretch Wrapper with Simplified Stretch

The Predator SS is loaded with features including: top and bottom counters; photo eye; and two (2) wrapping modes. State-of-the-art INFO screen shows current machine operation and makes trouble-shooting easy. Simplified Stretch allows you to precisely adjust your film stretch and film force on your load with the turn of a knob. Ramp is also available.

- 80" wrap height capacity
- Available in both low profile and high profile models

Predator XS Stretch Wrapper

Predator® XS Semi-automatic Turntable Stretch Wrapper

The Predator XS is designed with ground-breaking standard features that include: Select Stretch which allows you to quickly select from either 230% or 270% pre-stretch gear ratios; Allen-Bradley MicroLogix 1200 PLC; and fast film feed and automatic film cutting at the end of the wrap cycle.

- 80" wrap height capacity
- Hinged control box
- Available in both low profile and high profile models

Predator® Platinum Fully Automatic Stretch Wrapper

The Predator Platinum wraps loads automatically with a simple pull of the lanyard cord, eliminating the need to have the operator attach the film at the beginning or cut and wipe the film to the load at the end of the wrap cycle. Loads can be wrapped up to 50% faster. The Predator Platinum is a true fully automatic system with built-in features that are not available on other simpler automatics.

Predator Platinum Stretch Wrapper

Fantom Robot Self-Propelled Stretch Wrapper

Highlight's battery operated self-propelled Fantom Robot is designed for ease of operation and safety. Includes touch screen controls as well as other function controls.

- Select Stretch offers two settings, 230% and 270%, changeable in less than a minute
- The guide wheel follows the contour of your pallet.
- Yellow safety bumper instantly stops the Robot when encountering an obstacle.

The Fantom Robot's Touch Screen and Function Controls

Fantom Robot Stretch Wrapper

Digital Scale Display (Option)

The scale display is used on all Highlight machines equipped with a scale. This display system is mounted on the control panel tower using the stainless steel mounting bracket and includes an easy-to-read six digit display with 3/4" LED numbers.

Custom Wrapper with Belt Drive

Drive for Predator Series and Synergy .5, 1 and 1.5

Ring Bearing for Synergy Automatics

HP Turntable for Predator and Synergy Series

There are many options available for the stretch wrap machines we sell.

Synergy™ 2 Semi-automatic Stretch Wrapper with Dual Hydro-Stretch

The Synergy 2 with Dual Hydro-Stretch delivers more load-holding strength than any other stretch wrap system available! The fast 12 RPM turntable wraps your load quickly. The Allen-Bradley PLC with three unique wrapping patterns insures reliability and flexibility.

Refer to page 50 for stretch film for these machines.

Synergy™ 2.5 Semi-automatic Dual Stretch Wrapper

Reliable Pre-Stretch Performance - Standard features of the high profile model include: 12 RPM, 3 built-in wrap programs, film assist, and wrap height to 72" for high profile (HP) or 80" for low profile (LP) model. The low profile model is available with an optional ramp.

- Fixed gear pre-stretch 200% standard; other gear sets available.

Synergy 2.5 Dual High Profile Stretch Wrapper

Synergy 2 Stretch Wrapper

Synergy™ 3 Semi-automatic Stretch Wrapper with Dual Power Hydro-Stretch

Dual Power Hydro-Stretch allows users to dial in the level of stretch on their film from 0 – 400% to adapt to any stretch film and deliver the maximum performance from that film. The flexibility of five wrapping patterns will utilize any load most efficiently. Low profile model is available.

Synergy 2.5 and 3 Low Profile Chain Drive

Synergy 3 Stretch Wrapper

Freedom™ 6500 Fully Automatic Stretch Wrapper

Any load that can be conveyed can be easily wrapped with the Freedom 6500 Automatic Rotary Arm Stretch Wrapper. Platform Automatic models are also available. CHOOSE any film and stretch it to its maximum performance level with Highlight's exclusive Dual Power Hydro-Stretch!

Freedom 6500 Stretch Wrapper

Freedom 6512 Semi-automatic Stretch Wrapper

Wrapping Specifications

- 52" x 52" x 84" high load capacity
- Load height photosensor
- Film lowers to 1½" from floor
- 20" film capacity by 10" O.D.
- Adjustable film force
- Fixed gear pre-stretch 200% standard; other gear sets available.

Freedom 6512 Stretch Wrapper

Revolver Standard Orbital Stretch Wrapper with Conveyors & Platens

The Revolver™ orbital stretch bundling system protects your products with the right size equipment, the right level of automation, a custom design to meet you exact needs, and all the features you'll need.

- Eight different standard, semi-automatic and automatic models available with three different control systems, with or without conveyors

Revolver 6010 Orbital Stretch Wrapper

Freedom Drive Gear, Pinion and Motor

Highlight offers a wide variety of ring sizes to choose from, available in both semi-automatic and automatic control options. Many other models are available.

Flex turntable stretch wrappers are available in these configurations, both low and high profile:

Sentry Stretch Wrapper

Flex LPS Series Stretch Wrapper

Flex LPD Series Stretch Wrapper

Flex HPD High Profile Turntable

Flex HPD high profile offers reliable chain drive, a heavy duty steel frame and 8 industrial casters for turntable support.

Insta-Cut

The Insta-Cut option boosts production by eliminating the need for operators to manually sever the film web at the end of the cycle.

Insta-Thread Film Delivery System

With the Insta-Thread Film Delivery System, the stretch wrap machines help to reduce cost with every load that's wrapped. With a standard film pre-stretch rate of 260% you'll not only save money by using less film, the film on the load will be stronger, so loads are securely wrapped for storage or shipping.

Semi-automatic Pallet Wrappers

Standard

The Flex S Series offers just the features you need. Ideal machine for light to medium duty applications.

Deluxe

The Flex D Series is the semi-automatic workhorse. D models are for medium to higher speed applications.

Automatic

Flex A Series machines offer maximum efficiency and economy by automating the film tail process.

Sentry

Sentry machines are entry level, semi-automatic wrapping machines for economical and efficient unitization of pallet loads with stretch film.

Sentry Low Profile Stretch Wrapper

The Sentry is an entry level, semi-automatic, low profile turntable style wrapping machine that can lower film cost per load, especially compared to manually applying stretch film by hand.

- Wraps pallet loads up to 52" x 52" x 80"H, weighing up to 4,000 pounds
- Low profile, 60" round turntable
- Variable turntable speed: maximum 9 RPM
- 200% film pre-stretch reduces film cost and increases film strength
- Carriage accepts 20" wide stretch film up to 95 gauge thickness

These machines are available with many different options to fit your application needs!

Flex S Series Standard Stretch Wrapper

LPS Low Profile Standard or HPS High Profile Standard

The LPS and HPS have been designed to provide the same standards of durability, reliability and performance as the rest of the Flex line, yet at an affordable price.

- Wraps pallet loads up to 55" x 55" x 80"H, weighing up to 4,000 lbs.
- Low profile: 63" round turntable; high profile: 48" x 48" turntable
- 12 RPM variable speed with "soft-start"
- The S Series includes the InstaThread film delivery system which elongates film 260% prior to delivery to the load.
- The InstaThread features an ultra-sensitive corner compensation mechanism to assure that film tension around the entire load is consistent for better load stability.
- For applications using only fork lifts, we recommend a high profile model such as the Flex HPS.

Flex HPS Series Stretch Wrapper

Flex D Series Deluxe Stretch Wrapper

LPD Low Profile Deluxe or HPD High Profile Deluxe

Built for the most demanding industrial environments.

- Wraps pallet loads up to 55" x 55" x 80"H, weighing up to 5,000 lbs.
- Low profile: 63" round turntable; high profile: 48" x 48" turntable
- 15 RPM variable speed with "soft-start"
- The Flex D Series features a durable steel framework and a heavy-duty turntable support system.
- D Series machines include the 260% (standard) Insta-Thread film delivery system.
- Forklift portable from front or rear
- High efficiency 260% powered film pre-stretch

Flex HPD Series Stretch Wrapper

Flex A and D LP

Flex A and D low profile models feature a heavy duty steel base with structural fork tubes that run the length of the machine.

Refer to page 50 for stretch film for these machines.

Automatic Pallet Wrappers

Flex LPA Series Stretch Wrapper

Flex A Series Automatic Stretch Wrapper

LPA Low Profile Automatic or HPA High Profile Automatic

Flex A models eliminate the need for operators to attach and cut the stretch film. Simply place the pallet load on the machine, and pull a lanyard switch while backing away. The machine will perform the entire wrap cycle automatically without the need for an operator to tie the film tail to the load at the beginning of the cycle, and detach it at the end.

- Wraps pallet loads up to 50" x 50" x 80"H, weighing up to 5,000 lbs.
- Low profile, 63" round turntable; high profile 48" x 48" turntable
- 15 RPM variable speed with "soft-start"
- High efficiency 260% powered film pre-stretch

Flex HPA Series Stretch Wrapper

FA Turntable Automatic Stretch Wrapping System

Offers Category 2 Safety Rating as standard equipment, not an option. As part of Category 2 Safety Rating you'll find full surround 8 foot high steel mesh fencing with interlocked access points as well as infeed and exit light curtains with electronic muting.

- Wraps pallet loads up to 48" x 48" x 80"H, weighing up to 4,000 lbs.
- Heavy duty chain & sprocket turntable drive
- 15 RPM variable speed with "soft-start"
- AC Motors with Allen Bradley Power Flex VFD
- Air knife eliminates hanging film tail
- 260% Insta-Thread pre-stretch

FA Stretch Wrapper

MA Series Automatic Rotary Tower Stretch Wrappers

- Wraps pallet loads up to 48" x 48" x 80"H, weighing up to 4,500 lbs., 6,000 lbs. optional
- Variable speed with "soft-start"
- Insta-Thread™ film delivery systems with 260% pre-stretch
- Automatically adjusts for various load heights
- AC Variable Frequency Drive for reliability and easy maintenance

MA-ST (Standard 12 RPM)

With many of the same components as the DX and X, the MA-ST is one of the best values in automated stretch packaging.

MA-DX (Deluxe 18 RPM)

Can be configured with a wide variety of options to create a packaging system suited to your application.

MA-X (30 RPM)

Offers the highest speeds with a specially designed A-shaped frame structure to withstand demanding applications.

MA-ST Stretch Wrapper

Flex RTA Rotary Tower Automatic Pallet Wrapper

The RTA semi-automatic stretch wrapping system is the fastest way to boost your end-of-line packaging efficiency by eliminating the need for operators to manually attach the film tail to the load, then cut and secure the film tail at the end of the cycle. The RTA stretch wrapper automatically performs these functions so your operators simply place the load, pull a handling lanyard to start the cycle, and attend to other duties. When they return the load is securely wrapped and ready to be removed.

- 16 RPM variable speed tower
- Maximum load size: 48"W x 48"L x 80"H
- Standard pre-stretch ratio: 260%

RT Drive System

RTA Stretch Wrapper

Other Popular Flex Series Options

The split base option is used with oversized loads. This option can be combined with the scale option to provide an accurate load weight.

The motorized top platen option is ideal for unstable loads. The platen lowers to press down on the top of the load while wrapping.

The gravity conveyor option allows for integration with infeed and exit conveyor for easy roll-on, roll-off load movement.

The dual turntable option, available for high or low profile models, increases efficiency by allowing simultaneous load staging and wrapping.

Machine Grade Stretch Film

INTEPLAST GROUP
AMTOPP DIVISION

Standard Performance - Machine Film

- Alpha Series (A1) – Standard performance cast two-sided cling film for up to 275% stretch. For A, B and some C loads.
- Alpha Series (ADC) – Standard performance cast, two-sided cling film for up to 225% stretch. For A and B loads.
- Performance Plus (PP) – High performance blown two-sided cling film for up to 275% stretch. For A, B and C loads.
- Pro5 E Series (E) – High performance excellence cast one-sided cling film available in 63 and 71 gauge for up to 230% stretch. For A, B and C loads.

Ultra-High Performance - Machine Film

- Advantage (ADU) – High performance cast one-sided cling films for up to 275% stretch. For A, B and C loads.
- Excalibur (EXP) – High performance cast one-sided cling films for up to 275% stretch. For A, B and C loads.
- SuperMicron (XR) – Ultra high performance cast with outside slip surface. High load containment and puncture resistance compared to much heavier films. 63 gauge stretch performance up to 300%. Available in 98 to 37 gauge.
- SuperMicron (XRPLUS) – Ultra high performance cast with outside slip surface.

Similar to XR with high stretch percentages at lower gauges. 42 gauge stretch performance of up to 250%; 47 gauge up to 275%; and 52 gauge up to 300%.

- ST Film – Superior three-layer blown, co-extruded film that provides remarkable strength, puncture resistance with excellent cling. Formulated to exceed pre-stretch levels of 250 to 300%. Good for B and C type loads.
- AccuWrap (AW) – Three-layer blown stretch film that is puncture and tear resistant and offers exceptional cling. High pre-stretch for superior containment—up to 300%—for greater control and economies in usage.

Cast Machine Film

Quiet, clear, high performance, excellent puncture. Good for A, B and C type loads, with good cling.

Cast Film Properties

- Consistent cling
- Excellent clarity and gauge control
- Glow
- More resistance to tearing
- Excellent optics
- Quiet unwind
- Consistent film thickness

Blown Film Properties

- Tougher, greater puncture resistance
- High force on load; stiff
- Hazy and dull
- Excellent performance without pre-stretch and in cold temperatures
- Normally noisy unwind

Your Account Manager can recommend the maximum stretch for each type of film and show you how to stretch your packaging dollars by utilizing the right gauge for your application!

Hand Grade Stretch Film, Stretch Tape and Dispensers

INTEPLAST GROUP
AmTOPP DIVISION

Stretch film protects pallet loads from weather, theft, and improper strapping. It can also be used to protect furniture, machines, equipment – almost anything you can think of!

Stretch film is tough, puncture-resistant, clings to itself and it conforms to any shape. Hand stretch film can be used anywhere – on your production line, in your trucks, at your staging area or on your loading dock.

Standard Performance - Hand Film

- Handwrap (ADW) – Cast film clarity with extra stiffness and strength.
- Handwrap (HW) – Blown film strength, with the flexibility and strength to meet all your application requirements.
- Handwrap (HH) – Cast film clarity with maximum stretch capability.

Contact your account manager for help choosing the right film for your application.

Ultra-High Performance - Stiff Handwrap

- Pre-stretched (LX, X2S and X2W) – High performance with ease of use and most economical choice. Pre-stretch hand wrap is available in cast, too.
- SuperMicron Handwrap (XH) – The ultimate CAST handwrap. A combination of load containment, toughness, puncture, stiffness, and cling.
- SuperMicron Handwrap (XB) – The ultimate BLOWN handwrap. A combination of load containment, toughness, puncture, stiffness, and cling.

Stretch netting can be found on page 71.

Footage per roll varies by supplier.

Cast Hand Film

Quiet, clear, good puncture and good cling. Four rolls per carton.

Stretch Tape
Stretch Tape is the stretch film that adheres only to itself, leaving no gooey residue or marred finishes. And it won't tear off the printed surface of a package, as sticky tape will. It's just a fraction of the cost of strapping tape, twine or wire, plus the considerable savings in time and no damage to product.
Choose from a wide variety of weights, widths and colors.

Stretch Film Dispensers

Just slide a roll onto these handy stretch film dispensers and make the task of applying film a lot easier!

KPC-Master's Craft SpaceSaver™ 180 Conveyor

The SpaceSaver non-powered conveyor is specially designed for light or small objects. It saves space and labor by automatically returning the item to the operator. A compact 180° turnaround conveyor, the SpaceSaver 180 is great for product return and accumulation.

- Works with most shrink packaging equipment or accumulating systems
- Comes standard with 36" straight length telescoping legs for adjustable height and leveling feet
- 110v variable speed drive models are available

Bishamon EZ Loader

EZ Loaders are true ergonomic tools. They are designed to eliminate worker bending by automatically raising and lowering pallets during loading or unloading without the use of mechanical springs. EZ Loaders also allow easy pallet rotation so the worker does not have to reach or strain. As the load weight changes, the EZ Loader automatically adjusts, keeping the top of the load at a convenient working height.

- Platform height: 8-3/4" (lowered), 30" (raised)
- Rotator ring diameter: 43"; base frame: 50-1/2" L x 30" W
- Weight capacity: 250 lbs. to 4000 lbs.

Bishamon MobilLift™ BX Lift Tables

MobilLift™ scissor lift tables are rugged industrial lift tables with push-bars and casters. BX Series lift tables provide improved ergonomics by placing the load at a convenient work height while providing the mobility to locate the lift where it is needed. Over 15 models available; weight capacity ranges from 330 to 1100 lbs.

- Raised platform height ranges from 28.8" to 63.2"

Bishamon BS Series Hand Trucks

Pallet trucks are easy to use and exceptionally durable. Designed and manufactured to easily move palletized loads. By utilizing quality components and manufacturing techniques, Bishamon's BS Series pallet trucks are completely rebuildable and offer many extra years of valued service.

- Over 10 models available; weight capacity ranges from 2500 to 6500 lbs.

Bishamon EZ Off® Lifter Floor Level Pallet Positioner

The lowest floor level pallet positioners with rotating platforms for loading/unloading with a pallet truck!

Provides electro-hydraulic control of the lift platform from the fully raised to the fully lowered position. The controls allow the operator to adjust the top of the load to a convenient working height. The EZ OFF Lifter may be used for both loading or unloading applications.

- Maximum weight capacity: 2000 lbs.; maximum pallet size: 44" x 48"
- Height: 1-3/4" (lowered) x 30" (raised)
- Loads can be put on or taken off with a pallet jack or fork lift
- Rear leveling feet (Model EZO-25E)
- Model EZO-25E-3S provides three ramp position options

Bishamon UniLift™ Pallet Lifter and Transporter

The only pallet handler that can lift & transport a standard pallet without straddling it!!

- Can be used with standard GMA pallets, 48" x 40" CHEP pallets or skids
- Dual-purpose product allows for both transport and load lifting
- Lifting fork height up to 36"
- Lift capacity up to 2000 lbs.

Skid lifts are also available.

The industrial fastening field covers many areas. In the shelter industries there are furniture, cabinets, millwork applications as well as the manufactured home needs. In packaging there are the obvious pallet building, crating and boxes required by many manufacturers. The field broadens to include recreational vehicles, boats and product assembly of all kinds.

Serving the needs of industrial fastening requires a great deal of knowledge and experience. We have been finding the products and the answers to a great variety of fastening needs since 1947. These solutions are based on recommendations that consider the following questions:

- What materials are involved?*
- What is the most economical method?*
- What fastener strength and life span is required?*
- What appearance or aesthetic qualities are important?*
- What level of technology and automation is required?*
- What ergonomic or environmental factors need to be considered?*
- What are the latest products and materials available?*
- What are the safety considerations, both in-plant and in-use?*

CARLSON
CORRUGATED
SOLUTIONS

SURFACE GUARD
A DIVISION OF **Pregis**

- All cartons ship and store flat to save space.
- Sizes shown are the inside dimensions of the box in the following order: length x width x depth.

Custom solutions are available to satisfy almost any packaging need, including: Universal Laptop Packs, Universal Small Electronics Packs, Universal Computer Drive Packs, Size-Specific Laptop Packs, Handheld Electronics Packs, Optical Drive Packs, Digital Camera Packs, Motherboard Packs, Modem/Router Packs and more!

Over 1,000 sizes and styles of boxes available

- Corrugated cartons
- Multi-Depth cartons
- Single, double and triple wall
- Gaylord
- Chipboard pads
- Corrugated layer pads, rolls or sheets
- Custom sizes also available

The most commonly used shipping box is a R.S.C. (Regular Slotted Container). These boxes have flaps that meet in the center when folded. Corrugated cartons' measurements are shown as L x W x D.

The length is the longest side of the box, the width is the adjacent side and the depth (or height) is the distance between the scores that create the flaps. Measurements shown for cartons are inside dimensions.

Multi depth R.S.C. cartons are pre-scored at various lengths making it easy to adjust the size of the carton by cutting down to the desired depth.

POLYAIR

Padded Mailers

Puncture and moisture resistant mailers keep items safe during shipping.

- Fiber padding expands as package is handled, absorbing shock and protecting contents from damage.
- Available in either open end for heat sealing or self-sealing.
- Self-sealing mailers feature adhesive strip for quick and easy sealing.
- Some items are available in kraft or white.

DESCRIPTION/SIZE	CTN CT	ITEM CODE

14-1/2" x 20"	50	7 (Open End or Self Seal)

Tubes

Strong construction of the tubes protect your products from damage during shipping or storage. Available in a number of different options:

- 3-ply, spiral wound kraft - available in standard or jumbo sizes. Plastic caps are available to secure the tube ends.
- Telescoping tubes
- Crimped end tubes
- Adjustable tubes
- Some items are available in kraft, white or colored
- Square tubes
- Triangle tubes

Bubble Mailers

Bubble lined mailers provide lightweight, low cost cushioned shipping protection in a strong puncture resistant mailing bag.

- Available in either open end for heat sealing or self-sealing
- Self-sealing mailers feature adhesive strip for quick and easy sealing and are also available with a tear strip
- White or recycled golden kraft paper with a 3/16" bubble lining

Co-extruded Vacuum Pouches

Made from a cost-effective film that meets FDA and USDA requirements for use with food products. The three-mil thick, seven-layer mixture of polyethylene and nylon resins provides excellent performance, and its ability to stretch allows the material to conform to unique product shapes.

- Excellent barrier properties for both oxygen and moisture vapor transmission
- Extends shelf life for a variety of food products

Laminated Foam Pouches

Lamibags are pouches made from Lamifoam, a laminated packaging material that combines foam with polyethylene film to create a strong, lightweight composite sheet. Lamibags are thinner, denser, and stronger than other foam pouches.

DESCRIPTION/SIZE		
1/16" x 8" x 6"	1/16" x 10" x 8"	1/16" x 14" x 7"
1/16" x 16" x 16"	1/16" x 24" x 14"	

Non-Laminated Foam Pouches

Foam pouches with 3" Lip are available in the same sizes as the laminated versions.

Packing List Envelopes, Poly Tubing and Poly Bags

Packing List Envelopes

Protect your shipping documents with packing list envelopes. They have a clear pressure sensitive backing that attaches securely to almost any material. The waterproof plastic envelopes are easy to close and provide tamper proof security. Eliminate the need for address labels and protect your packing lists.

We carry plain and pre-printed; colors and clear face; back, side and top loading. All pressure sensitive envelopes are made with heavy-duty 2 mil poly to protect contents from water, oil and dirt. Carton quantity on most items: 1,000.

Envelopes - Printed: Packing List Enclosed; Invoice Enclosed; Material Safety Data Sheets Enclosed; Important Documents Enclosed and more.

Common Sizes

4-1/2" x 5-1/2"	5-1/2" X 10"	7" X 5-1/2"
4-1/2" X 6"	6-3/4" X 5"	7" X 6"
		7-1/2" X 5-1/2"

There are a number of other sizes and styles of packing list envelopes available.

Envelopes - Non-Printed: Clear face

Common Sizes

4" x 6"	6" x 6"	9" x 12"
4-1/2" x 5-1/2"	6" x 9"	9-1/2" x 12"
4-1/2" x 6"	7" x 10"	
5" x 10"	7-1/2" x 5-1/2"	
5-1/4" x 7-1/2"	8" x 10"	
5-1/2" x 10"		

Cohesive (Cold Seal) Packaging

Cohesive single face is an ideal packaging material where cushioning and rigidity are required. Capabilities include:

- 50#, 70#, 100# standard paper grades
- Bleached, colored, specialty papers available
- B Flute & E Flute
- Widths from 3" to 65"
- Roll length from 250' to 1000'
- Tear strip or perforation available
- 1 or 2 color printing is available

The bagging systems and portable sealing machines can be found on page 10.

Poly Tubing

Cut tubing to desired length, insert product and seal. Tubing can be heat sealed, stapled or taped at either one or both ends.

This tubing is made from 100% virgin low density polyethylene which meets LP-378 requirements. Because it is from virgin polyethylene it meets FDA requirements and can be used for food packaging and service. The tubing is wound either gusseted or flat on 3" cores.

There are a number of sizes of poly tubing available - sizes from 2 mil to 6 mil, and from 2" to 48" wide. Our most popular sizes are:

2 MIL	14" x 2700'	4 MIL	14" x 1350'
2" x 1500'	16" x 2700'	2" x 750'	16" x 1350'
4" x 3000'	18" x 2400'	4" x 1500'	18" x 1200'
6" x 3000'	24" x 1800'	6" x 1500'	24" x 900'
8" x 3000'	30" x 1500'	8" x 1500'	30" x 750'
10" x 3000'	36" x 1350'	10" x 1500'	36" x 675'
12" x 3000'	48" x 900'	12" x 1500'	48" x 450'

Centerfold Poly Bags

Centerfold poly bags are essentially film on a roll, folded in the middle so that the roll is easier to handle. The film has a slit on the side of the crease.

1 MIL	2 MIL	3.5 MIL
54" x 40"	54" x 118"	118" x 55"
		140" x 55"

Poly Bags on a Roll

Bags on a roll are pre-opened at one end for easy insertion and pre-sealed at the other end. Perforated for easy tear off with over 40 sizes available - from 1 mil to 4 mil and from 2" x 3" to 12" x 15".

TUBING

CENTER FOLD SHEETING

J SHEETING

SINGLE WOUND SHEETING

DOUBLE WOUND SHEETING

GUSSET TUBING

Poly Bags

Polyethylene bags are designed to handle a variety of packaging needs: they can hold everything from small parts to all types of food items and can be heat sealed to provide security or retain freshness.

- Bags are from seamless tubing and bottom sealed for extra strength; no side or slit seals.
- Dimensions represent the interior usable portion of the bag.

Also available with these options:

- Flat or gusseted
- Individually cut or on a roll
- Bags with white block
- Reclosable: single or double track slide seal
- With hang holes
- A variety of mil thicknesses
- Static shield and anti-static

Refer to page 10 for the bagging and sealing systems.

Layflat Bags

There are a number of sizes of flat bags available, sizes from 1 mil to 6 mil and 2" x 3" to 56" x 60". Close bags with twist ties, bag tape or by heat sealing. Listed are some of our most popular layflat bag sizes:

1 MIL (WxH)	10" x 12"	3 MIL (WxH)	8" x 10"
	12" x 18"		4" x 6"
	10" x 14"		9" x 12"
1.5 MIL (WxH)	12" x 15"		10" x 12"
	12" x 16"		6" x 8"
	4" x 6"		5" x 15"
	12" x 18"		12" x 15"

	6" x 8"		24" x 36"
	8" x 10"		24" x 30"
	24" x 24"	4 MIL (WxH)	24" x 36"
	8" x 12"		4" x 6"
	9" x 12"		5" x 8"
			6" x 8"
			9" x 12"
		6 MIL (WxH)	
			6" x 8"
			9" x 12"

Bag Tapers

Standard: Easy to use. Twist mouth of bag shut and move through slot. 3/8" wide throat.

Heavy duty: 5/8" wide throat seals heavy mil bags. Built in trimmer. All steel taper with sturdy base. Uses 3/8" and 5/8" wide tape.

There are many other sizes of poly bags and tubing available.

Gusseted Bags

Gusseted sides provide extra room for irregularly shaped items. There are over 150 sizes of gusseted bags from 1 mil to 3 mil and from 3" x 2" x 8" to 36" x 36" x 70" in size. Our most popular sizes are:

1 MIL (WxDxH)	5" x 3" x 12"	16" x 14" x 36"	12" x 8" x 30"
	8" x 4" x 18"	6" x 4" x 15"	24" x 20" x 48"
	6" x 4" x 20"	8" x 4" x 12"	4 MIL (WxDxH)
1.5 MIL (WxDxH)	6" x 4" x 20"	8" x 4" x 12"	8" x 4" x 18"
	16" x 14" x 24"	8" x 4" x 18"	12" x 8" x 30"
	24" x 20" x 48"	10" x 8" x 24"	
2 MIL (WxDxH)	12" x 8" x 30"	10" x 8" x 24"	
	3" x 2" x 8"	3" x 2" x 8"	

Reclosable Bags

There are a number of sizes of reclosable bags available. Sizes from 2 mil to 8 mil, from 1" x 1" to 30" x 30", with a single track zipper that securely closes the top of the bag to keep products inside clean and moisture free. Meets FDA requirements for food applications. Listed are some of our most popular reclosable bag sizes:

2 MIL (WxH)	12" x 15"	10" x 12"
	2" x 3"	10" x 13"
	12" x 18"	10" x 13"
	3" x 4"	13" x 15"
	3" x 4"	13" x 15"
	3" x 5"	13" x 18"
	4" x 4"	16" x 20"
	4" x 6"	18" x 24"
	5" x 7"	18" x 24"
	24" x 36"	24" x 24"
	5" x 8"	24" x 24"
4 MIL (WxH)	2" x 3"	6 MIL (WxH)

	6" x 8"	3" x 4"
	6" x 8"	3" x 4"
	6" x 9"	3" x 5"
	8" x 8"	4" x 6"
	8" x 10"	4" x 6"
	9" x 12"	6" x 9"
	10" x 12"	8" x 10"
	10" x 13"	9" x 12"
	12" x 12"	

Reclosable Bags

Mil Application

1 Mil	Economical, lightweight, temporary storage for lighter items.
2 Mil	Most popular thickness used for general light to medium weight products like clothing, small parts or food.
3 Mil	Sturdy mil protects medium to heavier products.
4 Mil	Heavy duty mil protects heavy products such as hardware and tools.
6 Mil	Extra heavy duty for puncture resistance. Protects heavyweight products such as industrial parts, machinery and metal tools.

VCI Corrosion/Rust Inhibiting Products: Bubble, Sheeting, Paper, Film and Bags

Protective Bubble Cushioning

Bubble cushioning offers active corrosion protection as well as physical protection. Provides superior strength, extraordinary air retention, and powerful corrosion protection for short or long-term shipping and storage applications.

- Vapor molecules protect enclosed product from rust and corrosion for up to 5 years.
- Corrosion inhibiting products are environmentally friendly, non-toxic, odorless, and non-allergenic.
- Have been cleared by the FDA for protecting metals used in food processing and packaging.
- Has no coating of chemicals that flake off, stick to, or otherwise damage the product they are designed to protect.

There are many sizes of protective bags and bubble cushioning available.

Corrosion Inhibiting Protective Bags

Zerust packaging materials contain proprietary chemical formulations that release an invisible, odorless, and non-toxic corrosion inhibiting vapor into the air inside the bag. Simply place metal parts into Zerust packaging and seal it. Within two or three hours the interior of the package will be saturated with Zerust vapor molecules and a powerful corrosion inhibiting molecular layer will form on all exposed metal surfaces. Later, when the parts are removed from the packaging, the Zerust corrosion inhibiting molecular layer will immediately vaporize into the atmosphere. This leaves behind clean, dry and corrosion free parts that are ready for immediate use and require no further cleaning or handling.

VCI Corrosion Control Paper Products

Prevents metal from rusting - protects multi-metals from corrosion and rust.

Industrial Rolls

- Chemically treated paper continuously vaporizes creating an environment that blocks out rust, corrosion and oxidation.
- One square foot of VCI Paper for every one cubic foot of packaging area is recommended.
- Completely wrap for maximum protection.
- Heavy duty rolls are available for long-term storage of iron, steel and other ferrous metals.
- Use VCI waxed paper rolls to prevent moisture, oil or grease from seeping beyond the paper.

Paper Sheets

- VCI Sheets are chemically treated paper that shield ferrous metals from rust, corrosion and oxidation.
- Use for domestic or international shipments.

Call for quotes on VCI and anti-static bags or for sizes not shown.

VCI Poly Bags

Low density 4 mil VCI polyethylene film bags with a corrosion inhibitor offer corrosion preventative packaging and also provide a dust and moisture barrier. The transparent bags allow products to be identified, inventoried and picked without the need to open up the package.

VCI Flat Poly Bags

- No wrapping necessary - simply place the product directly into the bag.

4" x 6"	8" x 10"	12" x 18"	24" x 36"
6" x 8"	9" x 12"	18" x 24"	

VCI Reclosable Poly Bags

- Single track zipper securely closes the top of the bag to keep products inside clean and moisture free.

3" x 5"	6" x 8"	9" x 12"
4" x 6"	8" x 10"	12" x 18"

VCI Gusseted Poly Bags

- Large bags feature expandable sides and a fitted bottom to protect bigger items.

- Perforated on a roll for easy dispensing.

40" x 36" x 80"	54" x 44" x 96"
-----------------	-----------------

Static Control Products: Poly Tubing, Film, Bags, Foam and Bubble

Anti-Static Poly Tubing: Make your own custom size bags by cutting the tubing to your desired length, inserting the product and heat sealing both ends.

- Available in 2 mil (2,150' roll) and 4 mil (1,075' roll), widths from 3" to 24".

Anti-Static Hand Stretch Film: Keep shipments clean while protecting from static discharge. Pink cast film stretches up to 250%.

- 80 gauge 17" x 1,500' roll.

Anti-Static Poly Bags: Pink anti-static (PAS) bags and black conductive bags are made with an extra-strong bottom seal or a durable side weld. Protect electronic components from static build-up, dust, dirt and moisture.

- Anti-Static Flat Bags are available in 2 mil, 4 mil and 6 mil, sizes from 2" x 3" to 36" x 36".
- Anti-Static Reclosable Bags are available in 4 mil, sizes from 2-1/2" x 3" to 12" x 12".

Anti-Static Air Foam: Lightweight, pink, anti-static foam is non-abrasive, moisture-resistant and keeps products clean.

- Air Foam Rolls are available in 1/8" (550' roll) and 1/4" (250' roll) foam thicknesses, 6", 12", 18", 24" and 72" widths.
- Perforated Air Foam Rolls are cross perforated every 12" for easy tear off. Available in 1/8" (550' roll) and 1/4" (250' roll) foam thicknesses, 6", 12", 18", 24" and 72" widths.
- Air Foam Dispenser Packs are cross perforated every 12" for easy tear off. Foam is 1/8" thick and available in either 12" x 175' or 24" x 175'.

Anti-Static Bubble: Pink bubble safeguards against shock, abrasion and vibration. Available in 3/16" (750' roll), 5/16" (375' roll) and 1/2" (250' roll) bubble heights, in 12", 24" and 48" widths.

- Air Bubble Rolls
- Perforated Air Bubble Rolls are perforated every 12".
- Air Bubble Dispenser Packs are cross perforated every 12" for easy tear off.
- Bubble Pouches are self seal: simply insert product, peel tape and seal! Available in 3/16" bubble height in sizes from 4" x 5-1/2" to 18" x 23-1/2".

3M™ Static Shielding Bags

These transparent, metallized static shield bags provide a static safe environment for sensitive electronic devices.

- Faraday Cage effect shields and protects from ESD and electrostatic fields.
- Printed with ESD warning symbol and the bags are date-coded for quality control traceability.
- Strong 3.1 mil construction available in sizes from 2" x 3" to 30" x 24".
- Available in open end and reclosable styles.
- Quickly secure static sensitive items with the reusable, double track reclosable bags.
- Meets EIA 625, MIL-HDBK-263, MIL-STD-1686 and EOS/ESD standards.
- Four-layer construction offers excellent protection from punctures and tears.

3M™ Dri-Shield Moisture Barrier Bags

Protect expensive electronic components from damage due to moisture or electrostatic discharge.

- Suitable for vacuum packaging and nitrogen flushing.
- Meets electrical and physical requirements of EIA 583, EIA 541, EIA 625.
- Static safe dissipative inner and outer surfaces.
- Maximum puncture resistance.
- 3.6 mil, sizes from 3" x 5" to 18" x 24".

Bubble

The flexibility and strong burst strength of bubble provides superior wrapping, cushioning, void fill and surface protection, and it performs under pressure. Available in 3/16" (750' roll), 5/16" (375' roll) and 1/2" (250' roll) bubble heights in both standard and heavy duty.

Air Bubble Rolls:

- Standard and heavy duty rolls in 12", 24" and 48" widths.
- Perforated rolls are perforated every 12".
- UPS shippable size rolls are also available.
- Adhesive air bubble rolls - adhesive sticks directly to your product; 3/16" bubble is cross-perforated every 12" for easy tear off. 300' rolls are available in 6", 12" or 24" widths.
- Cohesive air bubble rolls - no tape needed as cohesive air bubble only sticks to itself - not to your products. 3/16" bubble is cross-perforated every 12" for easy tear off. 300' rolls are available in 12" or 24" widths.

Air Bubble Pouches:

- Bubble Pouches are self seal: insert product, peel tape and seal! Bubble is on the outside, smooth on the insides making it easier to insert the product. Available in bubble height 3/16" or 5/16"; sizes from 3" x 3-1/2" to 18" x 23-1/2".
- Flush cut pouches have an open end; available in sizes from 3" x 5" to 36" x 48".

Dispenser Packs:

- Air bubble dispenser packs are cross perforated every 12" for easy tear off.
- Adhesive air bubble dispenser pack have 3/16" bubble that is cross-perforated every 12" for easy tear off. Available in 12" x 175" size.
- Cohesive air bubble dispenser packs have 3/16" bubble that is cross-perforated every 12" for easy tear off. Available in 12" x 175" pack.

Insulated box liners, bubble mailers and bubble rolls are also available.

Actual Bubble Height

- Small bubble offers better protection for small and fragile items.
- Large bubble is better used for void fill and protection of larger, less fragile items.
- Bubble sizes are measured by the bubble height - the width is larger than this measurement.

Boxed Bubble

Box-A-Bubble is an octagonal shaped carton containing a 4' wide roll of bubble. This convenient dispenser is ideal for use in mail order operations, catalog houses and offices.

- 1/2" bubble is perforated every 12" for easy-to-use tear-off sheets.
- Roll is 48" wide x 80'.
- Superior burst strength so the bubble withstands pressure and abuse, giving maximum product protection.
- Large roll of bubble in an octagonal box serves as a dispenser on a warehouse table, saving space and increasing convenience.
- Box is designed to be UPS shippable.

DESCRIPTION/SIZE

Box-A-Bubble, 1/2" x 48" x 80'

ITEM CODE

BB-L

Many other sizes and styles are available!

Green Recycled Bubble

Designed to incorporate high levels of post consumer recycled content without losing product integrity. The green color promotes purchase and awareness of recycled content products, and Green Bubble is in turn recyclable, keeping the chain in motion.

- Recycled bubble contains up to 40% recycled - using up to 20% post-consumer content reducing landfill waste.
- Manufactured using reusable polyethylene resin.

Peanuts

Peanuts easily fill in and around the contents of a shipping box, providing a cushion of protection on all sides. Made of moisture-proof material, peanuts are a lightweight packing alternative that saves on shipping costs, yet is durable enough to be reused.

Available in 7, 14 or 20 cubic foot bags. The 7 cu. ft. bags are UPS shippable.

Pink anti-static, biodegradable, and recycled packing peanuts are also available.

POLYAIR

 Pregis

 AirPouch™
A PRODUCT OF AUTOMATED PACKAGING SYSTEMS

Litin

Foam Padding

Non-abrasive, light-weight air foam is filled with thousands of cushioning air cells to protect your product.

Air Foam Rolls

- Foam thicknesses: 1/32" (2,000' roll), 1/16" (1,250' roll), 3/32" (750' roll), 1/8" (550' roll) and 1/4" (250' roll).
- 6", 12", 18", 24", 48" and 72" widths.
- Shock absorbing foam provides cushioning and surface protection.
- Moisture resistant.
- Air foam rolls can be custom slit and/or perforated to your exact specifications.
- Recycled and UPSable rolls are also available.

Perforated Air Foam Rolls

Foam rolls are cross-perforated every 12" for easy tear off.

- Foam thicknesses: 1/32" (2,000' roll), 1/16" (1,250' roll), 3/32" (750' roll), 1/8" (550' roll) and 1/4" (250' roll).
- 6", 12", 18", 24", 48" and 72" widths.
- Light-weight protection.
- Foam absorbs shocks.
- Keeps products clean and mark free.
- Non-abrasive.
- Moisture resistant.
- UPSable rolls are available.

Air Foam Dispenser Packs

Air Foam cushioning in a convenient dispenser pack!

- Foam thicknesses: 1/16" (350' roll), 1/8" (175' roll) and 1/4" (85' roll).
- 12" and 24" widths.
- Portable dispenser pack is great for work-station use.
- Light-weight foam keeps product protected and clean.
- Moisture resistant.
- Cross-perforated at 12" for easy tear off.

Air Foam Sheets

Pre-cut polyethylene foam sheets save packing time.

- Light-weight 1/8" foam protection.
- 4" x 4", 6" x 6", 8" x 8", 10" x 10", 12" x 12" and 24" x 24" sizes.
- Non-abrasive foam will not scratch or mark.
- Moisture resistant.
- Use to wrap small items and as a cushioning layer pad.

Cohesive Air Foam Rolls

Make your own custom foam pouches.

- 1/16" thick foam is cross-perforated every 6" for easy tear off.
- 12" x 625' and 24" x 625' rolls.
- Will not leave a residue behind because it sticks to itself, not to the product.
- Put the product on the foam, fold and press sides for a custom fit.

Flush Cut Foam Pouches

- 1/8" thick polyethylene foam pouches are available in a number of sizes from 2-3/4" x 3" to 36" x 36".
- Non-abrasive, polyethylene air foam cut and sealed forms a convenient light-weight bag.

Kraft Paper

Kraft paper can be used as void fill around a product and is also excellent for wrapping delicate products prior to packaging. Available in rolls or sheets.

Kraft Paper Rolls

- Available in 30# (1,200' roll), 40# (900' roll), 50# (720' roll), 60# (600' roll), or 75# (475' roll).
- Roll sizes range from 12" to 60" wide.

Kraft Paper Sheets

- Available in 30#, 40# or 50# pre-cut sheets.
- Roll sizes: 18" x 18", 18" x 24", 24" x 36", 30" x 40" or 36" x 48" (50 lbs./bundle)

Recycled Kraft Paper

Recycled Kraft paper is a perfect economical void fill/dunnage/packing paper. Absorbent and bulky, conformable yet durable. Each pallet of 24" turns into 1000 cubic feet of void fill.

- 100% recycled fiber
- All widths (2" to 72") and basis weights (30# to 70#)

Poly Coated Kraft Paper

Perfect for wrapping and protecting metal parts, good vapor barrier and protects products from water, oil, dust and grease damage.

- 10# gloss poly coating on one side; 40# virgin kraft paper on the other
- 600' Rolls available in 12", 18", 24", 36", 48" and 60" widths
- 18" x 24" or 24" x 36" sheets

Waxed Paper

Protects products from oil, grease and moisture. Lightweight, 30#, 100% virgin kraft paper is waxed on both sides to provide non-abrasive protection.

- 1,500' Rolls available in 12", 18", 24", 36", 48" and 60" widths
- 12" x 12" or 24" x 36" sheets

Anti-Slip/Anti-Skid Paper

Great for stabilizing loads on pallets or preventing items from sliding during transport.

- 80# kraft is available in 37" x 45" or 40" x 48" (to fit 48" x 40" pallet)

Tapes

Masking Tape

Masking tape can be used for paint masking, holding light-duty work, splicing, bundling or packaging. Medium utility grade is used in professional painting applications, and is also good for brush, roller and spray paint applications. Premium grade is generally used when conformity and tensile strength are important.

3" x 60 yd. Silver	24	

Water Activated Gummed Tape

Available in a wide variety of sizes and product construction, reinforced water activated gummed tapes are designed to provide consistent performance in carton sealing applications where durability, extra strength and reliability are required. Extra strong fiberglass yarns are bonded between the high tensile strength sheets for an extra margin of strength. Water activated gummed tapes are available non-reinforced, too, and both types bond instantly to corrugated cartons and paper, and the immediate destructive bond results in a tamper evident package.

DESCRIPTION/SIZE	CTN	CT
Non-reinforced Medium Duty – Natural/White

Natural 3" x 450', heavy duty	10	

Tensitized Strapping Tape

Tensitized strapping tape, unlike filament tape, does not have reinforcing filaments in them. This allows them to stretch, and makes them a good choice for bundling or unitizing. BOPP - Biaxially Oriented Poly Propylene - tape backed filament tape is available in black, white or natural.

DESCRIPTION/SIZE	CTN	CT
Medium Grade Utility		
1/2" x 60 yd., BOPP (12mm x 55m)	72	
3/4" x 60 yd., BOPP (18mm x 55m)	48	
1" x 60 yd., BOPP (24mm x 55m)	36	
2" x 60 yd., BOPP (48mm x 55m)	24	

Sheathing Tape

Sheathing tape provides superior sealing, protective benefits and ease of handling. Use for permanent seaming and sealing of joints in foam insulation and other sheathing materials, to secure lap edges in house wraps and other vapor barriers, repair rips and tears in roll and batt insulation, construction films, and membranes. Eliminates drafts around window and door openings. Resistant to mold growth and high humidity.

Refer to the Water Activated Gum Tape Dispensers shown on page 16.

Carton Sealing Tapes

Many other sizes available from 1.6 mil to 3 mil; 2", 2-1/2" and 3".

Hot Melt Tape - Clear

Hot melt adhesive carton sealing tapes have superior adhesion properties and the widest range of applications available from tape.

General purpose grade is recommended for light duty packaging applications. Production grade is reliable in both manual or automated carton sealing applications, and is recommended for closure of medium weight cartons in normal manufacturing and shipping environments, holding and repair applications. Performance grade products are designed for demanding aerospace, automotive and industrial applications.

DESCRIPTION/SIZE	GRADE	MIL	CTN CT
2" x 55 yd. (48mm x 50m)	Production	1.9 mil	36

Many other sizes available from 1.6 mil to 3 mil; 2", 2-1/2" and 3".

Emulsion Acrylic Carton Sealing Tape

For packaging subjected to normal shipping hazards, where a high level of sealing performance and clarity is required. Strong adhesive grips well to corrugated cartons. **User friendly - sticks to the box, not to itself!**

There are many other sizes and types of tapes available.

Packaging Tape Guide: Hot Melt vs. Acrylic

Hot Melt	The most common adhesive in the U.S., hot melt provides excellent quick-grab and adhesion. It is economical and preferred for most light-duty situations. It is especially well suited for use with automated equipment.
Acrylic	Acrylic tapes exhibit good ultraviolet and exterior durability, excellent chemical resistance and a broad range of service temperatures.

Colored and Printed Hot Melt Tape is also available.

Refer to pages 12-15 for some of the case sealers that we offer.

Special order printed tape is also available. Consult your Account Manager for ordering information.

Filament Strapping Tape Dispenser

Use this tape dispenser with either 1" or 2" strapping tape with a 3" core to reinforce boxes, bags or almost anything else. The lightweight, handheld dispenser features a hand brake that allows tension to be applied while reinforcing the package.

Hand Tape Dispensers

For pressure sensitive carton sealing tapes, our selection of hand tape dispensers includes models with a pistol grip and also models with a brake. All of them feature the same heavy duty construction.

DESCRIPTION

- 2" Hand Tape Dispenser with Brake
- 2" Heavy Duty Hand Tape Dispenser
- 3" Heavy Duty Hand Tape Dispenser with Brake
- 3" Hand Tape Dispenser with Adjustable Brake

Hand Label Protection Tape Dispensers

For label protection tapes, our selection of dispensers includes both hand and table top models. All feature the same heavy duty construction.

DESCRIPTION

- 4" Label Protection Tape Dispenser, Hand
- 4" Label Protection Tape Dispenser, Bench/ Table Top

Many other Packaging, Building, Construction and Specialty Tapes are available.

Spray Products

Spray Adhesives

Spray adhesives are used for temporary and permanent bonds when quick bond times are essential.

Camie

300 General Purpose Spray Adhesive: essentially colorless, instant tack, high strength, temporary and permanent bonds

363 High Strength Fast Tack Spray Adhesive: transparent, web spray pattern, low soak-in

373 High Performance Adhesive: colorless, mist spray, all purpose, pressure-sensitive, highly effective, low soak-in

3M

Repositionable 75 Spray Adhesive is an adhesive that provides tape-like bonds on many lightweight materials. It adheres in seconds, yet has an extra-long tack range that allows you to lift and reposition materials.

Rubber And Vinyl 80 Spray Adhesive is a high performance neoprene based contact aerosol spray adhesive.

Scotch-Weld™ Foam Fast 74 Inverted Spray Adhesive is an industrial grade spray adhesive for foam bonding, featuring upside down spray technology.

Super 77™ Multi-Purpose Spray Adhesive is a high tack, high coverage and fast drying adhesive.

Hi-Tack 76 Spray Adhesive is an industrial aerosol spray adhesive with high tack for one surface bonding applications.

Hi-Strength 90 Spray Adhesive is an industrial high strength contact adhesive for furniture, woodworking, marine, acoustics, and construction applications such as tilt-up and precast

AerVOE

Industrial Adhesive 8177: provides holding power on most surfaces, rough or smooth.

Hi-Strength Adhesive 8190: A high-strength, industrial grade adhesive for extra-strong bonding of materials to a variety of surfaces.

Spray Products

Camie

20/25 Stainless Steel Cleaner & Polish: quickly cleans and polishes stainless steel in one easy application without streaking.

22/80 Citrus Cleaner: removes adhesives, grease, oil stains, road tar, rubber marks, decal residue, etc., and leaves no residue

22/90 Heavy Duty Degreaser: for heavy duty degreasing in the manufacturing process

999 Dry Silicone: 4% dry, all purpose, eliminates squeaking and sticking on most applications; use for rigid polyurethanes, epoxies, polyesters, TPR and other thermosetting resins

A1000 Dry Lubricant Release Agent: fine, dry film, produces slick, friction-free surface between like and unlike substrates

ITEM	DESCRIPTION	NET WEIGHT
20/25	Stainless Steel Cleaner & Polish	18 oz.
22/80	Citrus Cleaner	15 oz.
22/90	Heavy Duty Cleaner Degreaser	15 oz.
999	Dry Silicone Lubricant	13 oz.
A1000	Dry Lubricant Release Agent	13 oz.

Spray Products

- Adhesive Remover - Citrus Based
- Repositionable Adhesive
- Polystyrene Foam Insulation Adhesive
- Rubber and Vinyl Adhesive
- Pressure Sensitive Adhesive
- Foam to Wood, Metal or Plastic Adhesive
- Labeling Adhesive
- Case Sealing Adhesive
- Palletizing Adhesive
- Light-weight Adhesive
- High Tack Adhesive
- High Strength Adhesive

and more!

A wide variety of spray adhesives, cleaners, degreasers and lubricants are available.

Paint Markers

Now available in 13 weather- and fade-resistant colors and with replaceable tips. Makes permanent marks on: porous and non-porous surfaces, metal, wood, corrugated, rubber, plastic, and glass.

Available in a wide variety of colors.

Refillable Jumbo Chisel Point Marking Pens with Permanent Ink

Marks permanently on wood, plastic, metal, glass – virtually any surface – and the durable chisel point tip marks wide or fine lines. This is the industrial marker of choice! Also features refillable, fast drying, waterproof ink. Available in black, blue, red and green.

DESCRIPTION	COLOR
Jumbo Chisel Point Marker	Black
Refill Ink for Jumbo Marker	Black
Jumbo Chisel Point Marker	Red
Refill Ink for Jumbo Marker	Red
Jumbo Chisel Point Marker	Blue
Refill Ink for Jumbo Marker	Blue
Jumbo Chisel Point Marker	Green
Refill Ink for Jumbo Marker	Green

Also available in Broad Chisel Point and Fine Bullet Point.

Blockout Spray

Reuse your storage cartons by covering up unwanted marks with our blockout inks. Dries quickly and is oil- and water-resistant on porous and non-porous surfaces. New VOC-compliant formula contains no CFC and is available in tan and white.

DESCRIPTION	SIZE
Blockout Spray	11 oz.

Sharpie Permanent Markers

Permanent on most surfaces, Sharpie markers feature fade and water resistant ink. Quick drying, AP certified non-toxic ink formula is available in 39 assorted colors and many different tip options.

Spray Inks

Each of these permanent inks is great for stenciling or color coding, dries in just 30 to 60 seconds, complies with CONEG legislation and is environmentally safe. Non-fluorocarbon propellant and features new VOC-compliant formula. Contains no CFCs.

- Standard colors include black, red, blue, green, yellow and white
- Packaged in 11 oz. (308g) cans; 12 cans per case

Just a few of the many colors and options are shown.

Stencil Cutting Machines

Manual machines are portable, versatile, and provide sharp, clear marks. Electric machines provide fast fingertip operation, and are labor efficient for low-cost operation. Over-sized models are also available for larger applications.

Spray inks for stenciling are shown on page 67.

Oil Board

Oil board is exceptionally high-quality paper board treated with a special combination of oils to resist ink bleed-through and cut with the grain to maintain rigidity. Ideal for flat or curved surfaces.

- Standard sizes from 5" x 6" (10cm x 15cm) to 24" x 36" (60cm x 90cm); also available: 48" x 300" (120cm x 9m) roll
- Natural oil board available in .007" (.018cm) thickness for use with 1/4" machines and .015" (.38cm) thickness
- Special size sheets and rolls available on request

Stencil Ink - Non-Porous

Waterproof, permanent and fast-drying for marking on any porous or non-porous surface. Non-porous stencil ink can be used with: stencil fountain rollers, fountain brushes, stencil pads and roller system, or standard spray gun.

Stencil Ink - Porous

Permanent, waterproof, fast-drying ink for marking on porous surfaces such as: paper, cloth, wood, cardboard cartons, etc. Use the porous stencil ink with the following products: the stencil fountain rollers, fountain brushes, M99 Marker, or standard spray gun.

Rollers, Brushes & Ink Pads

The pump action of fountain rollers give you fast and uniform ink dispensing without fading or flooding. Designed to make stenciling easy on any surface, ideal for neat and quick paint application.

Stencil Applicator Roller - Available in 1-1/2" and 3" sizes for porous or non-porous surfaces.

The Stencil Fountain Brush ensures solid stencil coverage and strong clear marks. Great for uneven surfaces such as crates or concrete. Bristles are set in epoxy for long-lasting performance with solvent based inks.

Stencil Board Selector Guide

Use the chart below to choose the oil board that is right for your application:

LETTER HEIGHT	NUMBER OF LINES TO BE CUT					
	1	2	3	4	5	6
1/4" (6.35 mm)	4"	4"	4"	4"	4"	5"
1/2" (12.70 mm)	4"	4"	4"	5"	6"	6-1/2"
3/4" (19.05 mm)	4"	4"	5"	6-1/2"		
1" (25.4 mm)	4"	5"	6"	6-1/2"		
1-3/4" (44.45 mm)	4"	6-1/2"	11"	11"		
2" (50.8 mm)	4"	7"	11"	11"		

Shipping and Caution Labels

- Fragile, Handle with Care
- Caution, This Side Up
- Documents Enclosed
- Glass
- Inventory
- Specialty Labels
- and many more

Circle labels are ideal for product identification, price marking and promotional uses.

There are a number of different styles and sizes of labels available.

Label printer labels are shown on page 23.

Cordage, Strap and Twine

Polyester Cord and Woven Strapping

- Break strengths from 350 to 5400 lbs.
- Manufactured from industrial polyester fibers
- Non abrasive for hand operations
- Can be hand tied or used with inexpensive strapping tools
- Elongation of 11% adds greatly to the energy break with excellent elasticity
- Meets all specifications for postal use, truck transportation, rail and air freight
- Five to six times lighter than steel (approximately 17 lbs. per roll/coil) and is oil free so there is no rust
- Flexibility of strapping makes it easier to hold difficult or unusual shapes

Tying Film

Flat and twisted polyethylene tying film designed for automatic tying machines. Strong and secure without cutting or tearing bundle. Provides greater yield than tying twine at comparable breaking strength. Used by printers, mailers, laundry and linen services as well as nurseries, box manufacturers and foam converters.

Polypropylene Tying Twine

- Strong, pliable, monofilament poly twine ties easily and holds knot well.
- High tensile strength with minimal stretch and exceptional holding power
- Rot, mildew and insect resistant

Cotton Twine

- Versatile and flexible light-duty twine
- Soft, unpolished, natural cotton easily forms tight, strong knots.
- Cotton twine is able to absorb high amounts of water.
- Great for bundling papers and tying packages

Jute Twine

- A natural fiber tying twine
- Use as a general purpose tying twine for wrapping parcels
- Biodegradable

Sisal Tying Twine

- Natural fibers grip firm and provide exceptional knot strength.
- Smooth, strong, moisture-resistant twine will not cut the edges of boxes.
- Great for corrugated cartons, newspapers, lath and lumber
- Totally biodegradable

Natural Sisal Baling Twine

- Knotless, twisted all natural fiber
- Biodegradable and treated against rodents, insects, mildew and moisture
- Natural fibers grip tightly for exceptional strength.
- Recommended for farmers and shipping departments

Nylon Rope

- Strong, flexible and shock absorbent
- Smooth, round **solid braided** nylon rope is for pulleys, blocks, sheaves and winches.
- **Twisted nylon** rope is easy to splice and is used for most general purpose applications.
- **Double braided** nylon rope has a greater strength, elongation and shock absorption.

Polypropylene Rope

- Lightweight, splice able and floatable
- Twisted rope is unaffected by rot, mildew, oil, gasoline, water and most chemicals.
- Hollow braid rope features a smooth, diamond weave exterior and hollow interior that can be used for barriers, tie-downs, floating lines and lifelines.

Sisal Rope

- Biodegradable and pliable rope for moderate tying applications

Manila Rope

- Premium grade, fiber rope that resists abrasion and stretching

Polyester Rope - Twisted

- Strong, twisted polyester is UV, abrasion and weather resistant.

A number of sizes and lengths of twine and rope are available

Protect your products with poly bags and sheeting that meet your applications' specifications.

Poly Bags are available on rolls or individually cut to fit your application needs. Typical uses include:

- Mattress bags
- Box liners
- Cargo bags
- Bin liners
- Pallet covers
- Truck liners

Pallet covers are available in either shrink or standard types and custom printing is also available.

Gaylord liners, available in .0006 to .010 gauge, are custom made to your specifications to fit any size gaylord box for clean material protection.

Clear Poly Sheeting

Economical protection from dust, dirt and moisture.

- Cover your warehouse equipment, machinery, construction material and skids.
- Giant sheeting is ideal for covering lumber, walls and scaffolding.

Black Poly Sheeting

Conceals as it protects.

- Great for use on construction materials and equipment.

Furniture Covers

Keep furniture and other large items free from dirt and dust with large poly covers.

- 1 Mil bags are perforated on a roll for fast, easy tear-off.

Mattress Bags

Protect mattresses and box springs from dirt and moisture.

- Vent holes allow air to circulate.
- Perforated 1.1 mil bags for fast and easy tear-off

Pallet Top Sheeting

Keeps tops of palletized products protected from settling dust and dirt.

- Sheets can be used alone or with a dispensing system.

Listed are some of our most popular pallet top sheeting sizes:

1.5 MIL (WxH)	2 MIL (WxH)
48" x 48"	60" x 60"
60" x 60"	
72" x 72"	

Clear Pallet Covers and Bin Liners

Large, clear, gusseted poly bags can be used as liners or covers. Protect your products from dust, dirt and moisture while providing visibility of contents or products. Slip gusseted bag over pallet and heat shrink.

- Perforated rolls for easy tear-off
- Perfect for lining cartons or covering machinery, industrial parts or pallets

Listed are some of our most popular pallet cover or bin liner sizes:

1.5 MIL (WxDxH)	2 MIL (WxDxH)	4 MIL (WxDxH)
46" x 44" x 80"	32" x 28" x 72"	52" x 48" x 108"
48" x 46" x 72"	48" x 36" x 72"	54" x 44" x 72"
48" x 46" x 96"	46" x 44" x 80"	54" x 44" x 96"
51" x 49" x 73"	48" x 46" x 72"	58" x 46" x 96"
54" x 44" x 72"	48" x 46" x 96"	
54" x 44" x 96"	48" x 46" x 96"	
	51" x 49" x 73"	
	51" x 49" x 85"	
	52" x 48" x 96"	

Black Pallet Covers and Bin Liners

Black poly is opaque and protects against pilferage by concealing contents on pallets.

- Protects items from dust and dirt
- Ideal for outdoor storage

Stretch Netting

Stretch netting secures pallet loads without stopping air flow, providing ventilation and keeping condensation from forming on loads. Perfect for the food industry.

Strong, disposable plastic netting is used for containment of small products or debris, especially during transporting.

Palletizing and Packing Products

Performance Sheets
City of Industry, CA

Chipboard Pads

Chipboard pads, sometimes referred to as "slip sheets", provide layers for added protection when stacking products on a pallet. We offer custom packaging, full-color printing (up to 54"), hole punching from 1/8" to 1/2", corner rounding, and custom die-cuts.

- Use as a pad between your product and the pallet, protecting products from the dirt, nails, and splinters common to wooden pallets .
- Prevents bagged products from bulging between the gaps in wooden pallets.
- Use lightweight chipboard pads to top layer cartons to help protect damage from box cutters and knives.
- Sturdy construction from 22 or 30 point kraft fiberboard

Chipboard Pads - Poly Coated on One Side

Poly coated chipboard pads are similar to standard chipboard pads, but have a poly coating on one side of the pad. Poly coating is moisture and bacteria resistant, non-porous, more hygienic, and offers a higher tensile strength than chipboard pads alone.

Corrugate Roll

Corrugate rolls are available from 2" to 84" wide. This product can also be sheeted and die cut.

Singleface is used for the following applications:
lining containers and trucks,
wrapping pallets on trucks,
protecting products from
dust, nails and splinters,
and lining railcars.

Corrugated Layer Pads

Corrugated layer pads provide layers to separate items, particularly for layers on skids or inside packaging. Place between layers of product for protection and to disburse weight.

- Pads are sized to fit the most commonly used box sizes.
- Top layering protects products when box is being cut open.
- Pads help keep tops of products dust free during storage.
- Helps prevent strapping and forklift damage

Single Wall Corrugated Sheets

- Manufactured from 200#/ECT-32 kraft corrugated

Double Wall Corrugated Sheets

Use Double Wall Corrugated Sheets to stack heavy items and provide extra durability and strength.

- Manufactured from 275#/ECT-48 DW kraft corrugated

Triple Wall Corrugated Sheets

Use Triple Wall Corrugated Sheets between layers of heavy machinery and appliances.

- Manufactured from 1100#/ECT-90 TW kraft corrugated

Corrugated Dividers - Wax Coated on One Side

Corrugated divider sheets increase the stability of your unitized load, allowing higher stacking per pallet. They also prevent slippage during transit. Wax coated on one side for added protection.

White Corrugated Sheets

Recommended for separating layers on skids or inside packaging.

- Constructed from 200#/ECT-32 white corrugated (white on one side)
- White Sheets offer a nice clean look and help the layer separations stand out.

Honeycomb Sheets

- Use flat between pallets for superior cushioning strength.
- Constructed from compressed paper that is lightweight, yet durable.
- Can be cut easily with a knife and used as void fill.
- An eco-friendly product that is 100% recyclable and 100% biodegradable.

Anti-Slip Pallet Paper

Great for stabilizing loads on pallets or to prevent items from sliding during shipment.

- 80# kraft paper is non-toxic, reusable and 100% recyclable.
- Anti-slip treatment is durable and remains effective for extended periods of time.
- Fit pallets 48" x 40"

Plastic Sheets

Protect shipments from dust and dirt.

- Constructed from rigid 3/16" thick polypropylene
- Dirt, grease and water resistant
- Durable and reusable
- Available in black or white

Plastic Slip Sheets

Plastic slip sheets are sheets of thick plastic with a 3-6 inch lip (referred to as a pull tab) on one or more sides that are handled using specialized push/pull attachments mounted on fork lifts.

- Slip sheets cost about 85 percent less than wood pallets.
- Less space is needed for storage and in transport.
- Lightness reduces transportation costs.
- Plastic slip sheets are recyclable in a closed-loop system, where old slip sheets can be recycled into new ones.

1000 Plastic Slip Sheets vs. 20 Wood Pallets

Dunnage Air Bags

Dunnage air bags are paper bags, constructed of multiple layers of paper and designed with an inflatable internal polyethylene bladder. They are the most economical and reliable means of securing the load in your truck trailer, rail car, sea container or vessel. The purpose of the dunnage air bag is to reduce the shifting of the loads occurring during transport which will result in customer satisfaction because of no damage or returned goods.

Dunnage air bags are reusable and are made from high tensile light-weight kraft paper. When inflated, dunnage air bags will expand to fill a much larger void than other air bags. They are also more flexible, giving them the advantage of filling up almost any empty space, and conform to odd configurations without damaging the cargo!

What is the maximum void recommended to use a dunnage air bag?

- For void less than 8" (20cm): 24" wide (60cm) dunnage air bag
- For void between 8" (20cm) and 12" (30cm): 36" wide (90cm) dunnage air bag
- For void between 12" (30cm) and 16" (40cm): 48" wide (1200cm) dunnage air bag
- For void between 16" (40cm) and 20" (50cm): 60" wide (1500cm) dunnage air bag
- For shipment by rail the void cannot exceed 12" (30cm) after inflation

Vinyl Aisle Marking and Safety Tapes

Vinyl tape is used in a wide variety of different applications, such as color coding, wrapping, and aisle marking. Thin, durable and resistant to tearing; stabilized, plasticized, shiny, polyvinyl chloride (SPVC) film; non-corrosive natural rubber adhesive.

Many sizes available; colors available include yellow, orange, white, red, black, blue, green and yellow/black.

DESCRIPTION	CTN CT	ITEM CODE
Yellow Vinyl Tape		
2" x 36 yd. 5.5 mil	24	VP410-2X33Y
3" x 33 yd. 5.5 mil	24	VP410-3X33Y
4" x 33 yd. 5.5 mil	24	VP410-4X33Y

OSHA Safety Colors

Caution: Yellow/Black or Yellow: physical hazards, poles, stairs, and corners

Danger: Red/White or Red: fire protection equipment and obstructions

Boundaries: White/Black, Orange, White, Green and Blue: housekeeping and traffic markings

Hard Hats

- Lightweight hats engineered to provide comfort, head protection, balance and stability
- Comfortable heavy duty hard hats with adjustable six-point nylon suspension for custom fit
- CoolMax terry cloth headband
- Ratchet holds hard hat in place for secure fit
- A number of different colors and styles are available.

Safety Glasses

- Can be worn alone or over most prescription eyeglasses
- One-piece polycarbonate front with adjustable temples
- A number of different frame types and lens colors are available.

Ear Plugs

- Roll and insert ear plug into ear
- Available with or without cord
- A number of different styles are available.

Dust Masks & Respirators

- Designed to filter out contaminants, liquid aerosols, dust and pollen
- Fits snug yet comfortably without leaks
- A number of different styles are available.

Industrial Gloves

Many Industrial workers need durable, high-performing gloves that provide dexterity and tactile sensitivity, while also protecting against hand injuries.

- Industrial gloves are available in chemical resistant, cut resistant, coated or thin mil grades
- Sizes from XS to XL (7 - 11)

Disposable Gloves

- Disposable gloves are available powdered or non powdered
- Sizes from XS to XL (7 - 11)

Desiccants

A variety of desiccants are available to protect your product during transit.

First Aid Kits

A number of different first aid kit content options are available for the workplace, vehicle or home.

We Carry a Complete Line of Safety Supplies

- Hard hats
- Safety glasses and goggles
- Ear plugs and hearing protection
- Dust masks and respiratory protection
- Industrial gloves
- Disposable gloves
- Desiccants
- Wipes
- First aid kits
- Safety and barrier tape
- Thermal winter wear
- Cooling summer sweatbands
- Fall protection
- Back support belts
- Tool belts

Standard Utility Knife

Retractable utility knife has an ergonomic handle with an overlock nose for blade stability.

- Constructed from high quality die cast metal
- Ergonomic handle
- Overlock nose for blade stability
- Includes 3 standard utility blades

Scraper Knife

- Heavy-duty metal construction
- Brass slider locks blade into position
- Jam-proof button
- Includes 1 single edge blade

Economy Steel Box Cutter

- All metal construction
- Easy blade change
- Glossy painted finish
- Includes 1 single edge blade

Safety Grip Utility Knives

Safety grip handles put your safety first!

- Ergonomic handle
- Features a non-slip grip surface to reduce slippage
- High quality die cast metal

Safety Cutter Utility Knife

Three tools in one: cutter, tape splitter and film cutter.

- Features integrated, replaceable film cutter that flips open, and a convenient 5 blade storage compartment within the handle.
- When locked into film cutter position, the safety lock-out system prevents the box cutting blade from extending.
- Utility knife includes one Safety Point Blade.

Stretch Film Cutter

Angled cutter easily cuts through stretch film.

- 6-1/2" long Stretch Film Cutter features an easy grip handle and a metal blade.

Carton Sizer/Reducer

Cut boxes to the exact size required!

- Carton Sizer/Reducer makes cutting boxes down to the desired depth fast and easy.
- Saves money by requiring less void fill.
- Ruled for precise measuring.

Wipes

Professional industrial wipes replace towels and rags. Wipes are reinforced for extra scrubbing and cleaning power, yet soft enough for face and hands.

Box of Rags

Withstands industrial wiping and polishing applications.

- Soft and absorbent.
- Cotton/polyester blend.
- Available in new white knit or sanitized reclaimed white knit.

Scrubs In-a-Bucket® Hand Cleaner Towels

Pre-moistened, heavy-duty towels easily remove soil from your hands.

- Use on tools, equipment and work surfaces.
- Works fast on dirt, oils, adhesives, lubricants, paints, grease, tar, urethanes, epoxies, inks and dyes, sealants and caulks.

Ladders

- Extension Ladders
- Stockers Ladders
- Step Ladders
- Scaffolding
- Aluminum or Fiberglass
- Many different sizes and styles available
