Dear Gardener,

Welcome back to another exciting season! We have some great products that are new to the market, as well as some old favorites we're delighted to share with you.

Highlighted on our Back Cover, we have **Ponky Peppers** – sweet and hot peppers that are not only visually appealing but are full of delicious flavor. On page 5 you'll find a most unique squash, **Smooth Criminal** – the fruits actually grow up the plant instead of spreading along the ground. It should be a crime to grow squash this easily!

Along with our new items, we are also pleased to bring back four popular customer favorites that have been riddled with availability issues over the past few years – **Caspian Pink** page 23, **Opalka** page 29, **Rapunzel** page 37 and **Orange Scotch Bonnet** page 55 – all in stock, packed and ready to ship!

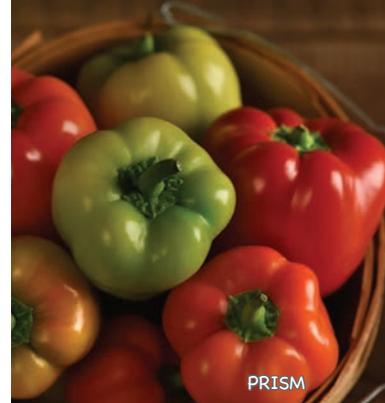

Unfortunately, we have had to discontinue offering our free seed which we know will disappoint many of you, however we think it will please you to find we have held, and even lowered, many of our prices where possible. We are also excited to offer our **Mini Garden** collection on page 3 – it consists of some of our most popular staple varieties in smaller sized packets at a very affordable price – we think you'll find it's a real bargain!

We stand firm in our commitment to offer the best products at the best prices for continued success in growing bountiful gardens which are not only therapeutic, but in the last few years have become a necessity for many. Happy Gardening!

TOTALLY TOMATOES

NEW! Prism Hybrid Sweet Pepper

78-80 days. Get green, orange and red fruits all at the same time on just one plant! Bigger than a mini, but smaller than a standard bell, these fruits grow approx. 2½" long by 2½" wide and weigh up to 2½ oz. Matures from light green at 60 to 65 days to orange, and finally to red, but can be harvested at any stage. Makes an eye-catching mix in baskets at farmers markets and roadside stands. Upright plants stand out in gardens and containers. Heavy yielder. Highly resistant to Bacterial Leaf Spot Races 0-3, 7 and 8.
#03225. (A) pkt. (10 seeds) \$4.05

PRISM

NEW! DarkStar Hybrid V LB Tomato

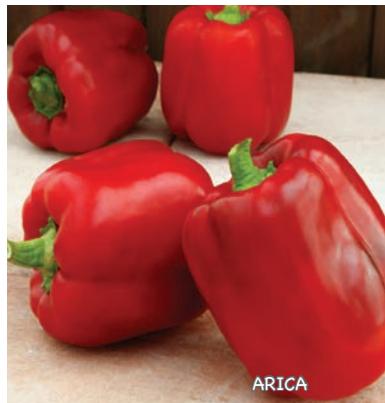

70-75 days. Large, 8 to 10 oz., purple beefsteak-type fruits are oblate, ribbed and full of visual appeal. Dark purple/red flesh has a rich, smoky flavor and texture that is very similar to Cherokee and Carbon. Heirloom tomato flavor with modern hybrid performance, higher yields and better fruit quality than similar varieties. Great fresh or for preserving. Indeterminate.
#00223. (A) pkt. (10 seeds) \$4.25

DARKSTAR

NEW! Arica Hybrid Sweet Bell

70-75 days. Large, blocky fruits grow approx. 4 to 4½" long by 4" wide and are smooth, firm and glossy. Peppers are juicy, crisp, have a mildly sweet flavor, weigh 8 to 9½ oz., mature to an attractive red and can be used at either stage. Vigorous, compact plants provide good leaf cover to protect fruits. Widely adaptable and heavy yielding. Great for farmers markets. Highly resistant to Pepper

ARICA

Tobamovirus and Bacterial Spot Races 0-3, 7 and 8 with intermediate resistance to Tomato Spotted Wilt Virus.

#03110. (A) pkt. (10 seeds) \$3.35

NEW! Quick Snack Edible Potted Cucumber

40 days. Space saving plants and baby vegetables are always in high demand – this newcomer delivers both and then some! Deliciously crisp, sweet, cocktail-sized fruits are best at 1½ to 2½" long. Great for fresh use and pickling. Can be grown inside on a sunny windowsill or outside in containers. Plants benefit from being trellised and should be pinched when plant reaches top of the trellis. A parthenocarpic variety that sets fruit without a pollinator and grown isolated, fruits will be seedless, otherwise, fruits can potentially develop seeds. Plants spread 15 to 20" and grow 20 to 24" tall.

#02139. (A) pkt. (10 seeds) \$4.55

QUICK SNACK

NEW! Unicorn Hybrid F LM ToMV Tomato

50 days. Heavy fruit set, excellent quality and a great disease resistance package! A fresh market cherry perfect for the Eastern U.S. Attractive, deep red, uniform fruits are firm, weigh approx. ½ oz. and have an outstanding sweet flavor. Excellent crack tolerance. Intermediate resistance to Bacterial Speck and Nematodes. Indeterminate.

#00788. (A) pkt. (15 seeds) \$3.95

UNICORN

NEW! San Joaquin Hybrid Hot Pepper

60 days. 2023 AAS Winner! High yielding plants set up to 50 fruits in a short window! Large, 4", dark green, thick-walled, crisp fruits have just a hint of heat at 2,500 to 6,000 Scoville units. Left on the vine, fruits mature to a beautiful red, maintaining their firmness and fresh flavor. Can be used at either stage of maturity. Plants have good leaf cover to protect fruits. Resistant to Tomato Mosaic Virus and Potato Virus Y.

#03764. (A) pkt. (15 seeds) \$4.95

SAN JOAQUIN

NEW! TINY TEMPTATIONS™ HYBRID SERIES TOMATOES

70-85 days. Attractive, ultra sweet fruits grow approx. ¼ to ½" and contrast nicely against dark green foliage. Although small, fruits are filled with loads of sweet flavor and have an average Brix of 10 to 12. Dwarf, bushy plants have a mounding/trailing, well-branched habit, grow up to 16" tall and spread up to 14". Fruits hold well on the vine without falling off or cracking. Easy-to-grow. Heavy yielder. Not susceptible to mildew. Highly tolerant to Phytophthora. Determinate.

Orange 2024 Fleuroselect Gold Medal Award Winner! #00775.

Red #00764.

Prices, above 2, per variety: (A) pkt. (10 seeds) \$6.65

TINY TEMPTATIONS™ ORANGE

TINY TEMPTATIONS™ RED

DID YOU KNOW...
 AAS Winners are varieties that have been tested in trials all over North America? Only a select few receive this award each year for displaying superior, all-around garden performance!

SYMBOLS TO NOTE

Indicates plants are available. See pages 6, 7, 60 & 62.

Indicates a Hot Seller.

Indicates Scoville units. See page 49.

NEW! Oaxacan Jewel Tomato

80 days. Striking orange/red bicolor heirlooms have marbled, meaty flesh, weigh 8 to 12 oz. and can sometimes weigh as much as a pound! Flat to slightly pointed, ribbed fruits are deliciously sweet with a nice acid to sugar ratio – a very old-fashioned flavor that's perfect for fresh eating, cooking, juicing and canning. From the mountains of Oaxaca, Mexico. Semi-potato leaf plants. Indeterminate. **#00517. (A) pkt. (30 seeds) \$3.35**

NEW! Tutti-Frutti™ Cherry Red Baby Hybrid Tomato

77-91 days. Very sweet, glossy, small cherries have thin skins and weigh approx. ½ oz. Juicy fruits have a honey-salty flavor with a Brix of 8 to 9. In trials, this beauty ranked at the top for flavor. Large trusses grow 18 to 28" long and average 20 to 30 fruits each. Great for large containers, patios and in gardens. Stake or cage for best results. High yielding. Indeterminate. **#00779. (A) pkt. (10 seeds) \$5.95**

NEW! PUMPKIN PEPPERS™ HALLOWEEN HYBRID SERIES SWEET PEPPER

85-100 days. A fun series with cute, pumpkin-shaped fruits that ripen from an attractive glossy purple-black to either bright golden orange or deep red respectively. Fruits are crisp, sweet and weigh approx. ¾ to 1¼ oz. each and measure approx. 1½" wide by 1" tall. Perfect for small spaces, hanging baskets and containers, indoors or out. Very ornamental plants have attractive glossy leaves and a nice branching habit. Sturdy stems are strong enough to hold fruits without staking or pruning. High yielding and drought tolerant.

Gold #03164.

Red #03157.

**Prices, above 2, per variety:
(A) pkt. (10 seeds) \$5.95**

NEW! "MINI GARDEN BARGAIN"

WHY BUY MORE SEED THAN YOU NEED?

If you've considered expanding the selection of vegetables you currently grow, but decided against it because of the price or the packets had more seeds than you need, check out this deal! We are excited to offer an assortment of 10 of some of our most popular varieties that have fewer seeds in each packet at a very affordable price. Whether you're trying something new or something you already love, these smaller packets are sure to suit your gardening needs!

All of the varieties are individually packaged and labeled and are NOT sold separately.

#04149. Take advantage of this special offer for just \$11.95!

NEW! Zenzei Hybrid VFF ToMV Tomato

70-80 days. 2023 AAS Regional Winner (Great Lakes, Heartland)! Get ready to be impressed with this early maturing, high yielding, highly disease resistant roma! Large, 4 to 5", meaty fruits are uniform and weigh up to 6½ oz. each. Perfect fresh or for canning and freezing. Unique, bushy plants are very vigorous and feature good cold setting ability. Expect fewer issues such as spots and Blossom End-Rot commonly associated with romas. Intermediate resistance to Tomato Spotted Wilt Virus, Tomato Yellow Leaf Curl Virus, Powdery Mildew and Nematodes. Indeterminate. **#00849. (A) pkt. (10 seeds) \$4.95**

NEW! Onyx™ Orange Hybrid Ornamental Pepper

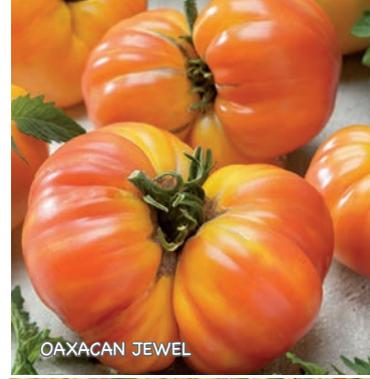

Eye-catching plants have dark purple foliage in high light conditions and produce clusters of small, up to ½", round, shiny fruits that start out purple/black and mature to yellow and orange respectively. Extremely heat tolerant, 6 to 12" plants are uniform and compact with a nice branching habit. Perfect for beds, pots and mixed containers. Excellent for mid/late summer production. **#07305. (A) pkt. (10 seeds) \$5.95**

NEW! Soundwave Hybrid Hot Pepper

80 days. One of the most attractive jalapeños on today's market with little to no etching! Smooth, dark green, thick-walled fruits grow approx. 4 to 4½" long, weigh up to 3 oz. and left on the vine, mature to bright red. Heavy fruits are spicy with a Scoville rating of 5,500 to 6,500 units and have an exceptional shelf life. Very high yielder. Highly resistant to Bacterial Spot Races 0-3, 7 and 8 with intermediate resistance to Phytophthora Crown & Root Rot. **#09280. (A) pkt. (15 seeds) \$4.35**

NEW! Early Girl Plus Hybrid VFFA GLS TSWV Tomato

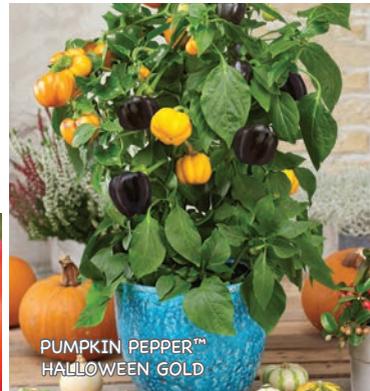

65-70 days. One of the best-selling early varieties on the market just got better with this newcomer! Enjoy bigger yields of bright red, 4 to 6 oz. fruits that have meaty flesh and feature the same great, deliciously sweet flavor – and with much improved disease resistance, gardeners are sure to have even greater growing success than the original. Perfect for slicing and salads. Indeterminate. **#00242. (A) pkt. (15 seeds) \$4.25**

FLORIDA 91

NEW! **Florida 91 Hybrid VFPA GLS Tomato**
70-75 days. Bred to perform in extreme heat, this beauty is perfect for growing in the hot, humid conditions of the eastern U.S. Extra large fruits weigh approx. 10 oz. each, have uniform green shoulders and mature to a glossy, bright red. Fruits have a great flavor and are exceptionally firm and smooth. Crack resistant. Strong, healthy vines are high yielding. Determinate.
#00269. (A) pkt. (10 seeds) \$4.75

YODA

NEW! **Yoda Hybrid Napa Cabbage**
40-50 days. Attractive heads have dark green outer leaves and tightly packed, white and brilliant yellow interior leaves. Upright plants produce barrel-shaped heads that are more tender than standard cabbage, grow up to 9" tall by 6" wide and weigh approx. 5 to 6 lbs. each. Great for farmers markets. High yielding. Intermediate resistance to Clubroot and Verticillium Wilt.
#01593. (A) pkt. (100 seeds) \$3.95

MARVEL STRIPE

NEW! **Marvel Stripe Tomato**
80-90 days. Huge, beefsteak type heirloom that averages 12 to 14 oz. each and can often weigh as much as 2 lbs. – considered to be one of the largest bicolored types! Fruits have attractive red stripes and are flattened with heavy ribbing. Flesh is juicy and has a mild, sweet flavor with very little acid. Excellent sliced and perfect for canning. Originally from Oaxaca, Mexico. Indeterminate.
#00457. (A) pkt. (30 seeds) \$3.35

NEW! **Sargento Hybrid Hot Pepper** 🌶️
80-85 days. Extra-large, attractive poblanos/ anchos grow approx. 6½ to 7" long and up to 3½" wide. Mildly spicy with a Scoville rating of 350 to 1,750 units. Smooth fruits are firm, straight, weigh up to 5½ oz. and have a high percentage of two lobes. Matures from glossy, dark green to deep red and can be used at either stage. Plants have good vigor and continuous setting ability. Great for fresh use and drying. Well-suited for farmers markets. Widely adaptable. High yielder. Intermediate resistance to Nematodes and Phytophthora Crown & Root Rot.
#09281. (A) pkt. (10 seeds) \$3.95

SARGENTO

KOSARA

SMOOTH CRIMINAL

NEW! **Yaqui Hybrid VFPA GLS Tomato**
75 days. Large, blocky fruits are plum-shaped, bright red and weigh approx. 3 to 4 oz. each. Attractive, uniform fruits are meaty, sweet and perfect for slicing, canning and making sauces. Vigorous, compact plants yield heavily. Intermediate resistance to Bacterial Speck and Nematodes. Determinate.
#00841. (A) pkt. (10 seeds) \$3.85

NEW! **Rio Grande Verde Tomatillo**
70-80 days. At 2 to 3", it's one of the largest tomatillos on the market! Large, globe-shaped, bright green, heirloom fruits have a sweet/tart flavor and weigh approx. 3 to 4 oz. each. As fruits ripen to light green, they will fill out their husks to the point of splitting, at which time they can be harvested. Use fresh or cooked – a must have for salsa verde. Also great roasted, grilled and sautéed. Support not needed, but helpful. High yielding. Determinate.
#00844. (A) pkt. (30 seeds) \$3.25

NEW! **Arietta Hybrid VFA ToMV Tomato**
65 days. Bright red, beefsteak-type fruits have a great flavor, weigh approx. 5½ to 7 oz. and can sometimes weigh even more! Large fruits have a flattened, slightly ribbed, oblate shape reminiscent of heirlooms. Cold tolerant so it has the ability to produce even in cooler climates. Plants have medium vigor and provide good leaf cover to protect fruits from sunscald. Intermediate resistance to Nematodes. Indeterminate.
#00022. (A) pkt. (20 seeds) \$4.35

NEW! **Kosara Hybrid Cucumber**
50 days. A Dutch-type, parthenocarpic variety with a quick and dependable maturity. Burpless, crispy cukes grow 12 to 13" long, have small seed cavities and are juicy with fresh, straight-from-the-garden flavor. Uniform, straight fruits are slightly ribbed with dark green, thin skins that don't need to be peeled. High yielder. Resistant to Target Leaf Spot and Scab.
#02124. (A) pkt. (10 seeds) \$4.25

NEW! **Smooth Criminal Hybrid Summer Squash**
55 days. Pale to medium yellow, straight neck fruits have thin skins and thick necks. Fruits are very tender and are best when harvested young at 6" or less. Flesh is creamy white and full of flavor. Bushy plants are nearly spineless and have a very unique, upright, indeterminate growth habit. Uniform fruits are produced along the central stem and can be harvested easily and painlessly. Tall plants may benefit from staking or trellising. Widely adaptable. Very heavy yielder.
#03576. (A) pkt. (20 seeds) \$4.95

YAQUI

RIO GRANDE VERDE

ARLETTA

Eye-catching & Appetizing – Try ‘Em All!

NEW! Spitfire Hybrid Hot Pepper 🌶️
85 days. Incredibly mild Anaheim-type with just 90 to 130 Scoville units. Large, high quality fruits weigh approx. 2½ oz. and grow 7 to 9" long. Attractive green fruits are ready in just 65 days; when fully mature, they're bright red and can be used at either stage. Great for fresh markets. Easy-to-grow. Performs well in the Southeast. Vigorous, bushy plants are sturdy, have a concentrated fruit set and are high yielding. Intermediate resistance to Phytophthora Blight.
#09282. (A) pkt. (20 seeds) \$5.35

NEW! Patty's Striped Beefsteak Tomato
75 days. Extremely attractive fruits are a stunning combination of thin golden yellow and red stripes. Fruits average 6 to 10 oz. and can sometimes weigh as much as 1 lb.! The real treat of these beauties is its gold, juicy flesh that is also streaked with red and full of very sweet flavor with little acid. Best used fresh – it makes a perfect slicer or chopped in salads and in fresh salsas. Indeterminate.
#00531. (A) pkt. (30 seeds) \$3.35

NEW! Fehér Ozon Paprika Sweet Pepper
80-85 days. Originating in Hungary, this heirloom is an all-around excellent pepper for both quality and performance. Attractive fruits grow approx. 3" wide by 4 to 5" long and ripen from white to orange to red. Thick-walled fruits are exceptionally sweet with a mild, peppery flavor. One of the best varieties for drying and grinding for fresh paprika, but is also good fresh, roasted and stuffed. Great for containers and small space gardens. Dwarf, compact plants are very productive.
#09241. (A) pkt. (30 seeds) \$3.95

NEW! Council Bluffs Tomato
67 days. This heirloom comes from the Bushman family of Council Bluffs, Iowa, who maintained and grew it for more than 100 years! In trials, it garnered high praises for all-around goodness! Thin-skinned fruits grow approx. 3 to 4" wide and weigh 5 to 13 oz. each. Pink beefsteak fruits are meaty and have a delicious, well-balanced, sweet flavor with moderate acidity. Perfect for eating fresh, making sauces, roasting, canning and freezing. Good yielder. Indeterminate.
#00198. (A) pkt. (30 seeds) \$3.55

NEW! Siletz Tomato
52-75 days. Bred by Dr. Jim Baggett of OSU to be cold tolerant so it produces very well even in cooler climates. An improved Oregon Spring type with a somewhat more vigorous plant and earlier ripening. Thin-skinned, round, deep red fruits weigh approx. 10 to 12 oz., are blemish free and nearly seedless. Fruits have meaty flesh with a mild, acidic flavor. Perfect fresh and for canning. Resistant to cracking and cat facing. High yielder. Determinate.
#00657. (A) pkt. (30 seeds) \$3.45

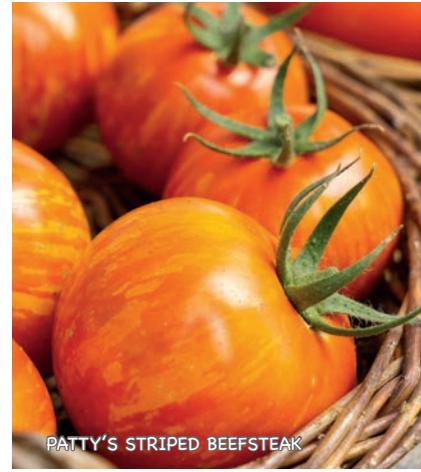

NEW! Maiden's Gold Tomato
60-75 days. This gem comes from Ted Maiden of LaFollette, TN, who grew it and saved seeds his father, Ernest Maiden, gave to him in 1964. Ernest grew it in his own garden in Bristol, VA, after receiving seeds from his father, Reverend Frank Maiden of Saltville, VA, prior to 1956. In 2009 Ted rediscovered seeds he had grown in 1987 stored in a box of photos that was packed away while he was serving in the Air Force. Attractive, dark orange, beefsteak-type fruits average 8 to 10 oz. each, with some weighing up to 1 lb.! Globe-shaped fruits are firm, meaty and juicy with a delicious, mild flavor. Great for fresh eating, canning and making pastes and sauces. High yielding. Indeterminate.
#00446. (A) pkt. (30 seeds) \$3.55

NEW! Big Poppa Hybrid Hot Pepper 🌶️
56-60 days. The only X10R® jalapeño on the market! That's especially good news for growers in the Southeast! Firm, crisp fruits mature early, grow approx. 4" long by 1¼" in diameter and weigh about 2 oz. Peppers ripen from bright green to deep red and are mildly hot with just 2,700 Scoville units. Expect some etching on fruits. Thick-walled fruits are perfect for poppers, roasted, fresh in salsas and pickling. Fruits have a good shelf life. Highly resistant to Potato Y Virus with intermediate resistance to Bacterial Leaf Spot Races 0-10 and Nematodes. High yielding.
#09207. (A) pkt. (10 seeds) \$4.65

NEW! X-terminator Hybrid Series Sweet Peppers
70-90 days. This fierce duo fights back with the latest X10R® technology – with intermediate resistance to all 10 Races of Bacterial Leaf Spot, they're tougher than ordinary bells! Large, blocky, thick-walled fruits are firm, smooth and sweet. Great for eating fresh and stuffing. Leafy plants provide good cover to protect attractive fruits against sunscald. Perfect for the Southeast where they maintain consistent yields even under bacterial pressure. Highly resistant to Tobamovirus.
Orange Intense orange fruits are approx. 3½" by 4" and weigh about 8 oz. **#09325. (A) pkt. (10 seeds) \$6.35**
Yellow Green fruits ripen quickly to brilliant yellow, are approx. 4" by 3¾" and weigh about 10 oz. **#09326. (A) pkt. (10 seeds) \$5.35**

SHIPPING DATE INFORMATION

All plants on 6 and 7 will be shipped at the proper planting time for your area. Approximate dates when shipping begins:

Zones 7 to 10: Starting around the second week of April

Zones 3 to 6: Starting around the last week of April

To find your zone, please see the USDA Zone Map on page 60 or visit our website for an easy-to-use Zone Finder.

Please note: Adverse weather in your area, or ours, may affect the shipping schedule.

We are unable to ship plants to the following states: AK, CA and HI.

GRAFTED PLANTS

Wondering why you should pay more for grafted plants? What makes them worth the extra price? These were some of the questions we also asked when grafted vegetables first appeared on the market. We admit we were skeptical – until we grew them ourselves and saw the proof. Grafted plants were stronger, produced fruit faster and because they were able to fend off diseases, the yields were higher.

Grafting joins the top of one plant (the scion) to the root system of a separate variety (the rootstock). As the tissues fuse, the vigor and disease resistance of the rootstock combines with the exceptional fruit qualities of the original variety. Plants will be shipped in 2 1/4" pots. Please read and follow the special growing instructions included with your plants. **We are unable to ship plants to the following states: AK, CA and HI.**

Tomato Helpers

Tomato Crater

Designed for growing tomatoes, but can also be used on a variety of garden plants. An easy way to get water and plant food to the roots, right where it's needed. A convenient two-part interlocking design allows it to be placed around plants, eliminating risk of plant injury. Slots in the base allow for a wire cage to be inserted. The red color warms the soil and reflects red light up into the plant to stimulate plant growth. Helps retain soil moisture, reduces the need for weeding and protects against cutworms and other ground insects. Provides years of use. #53370. Pkg. of 3, \$27.95; 2+ \$25.95 each

3+ Plants \$12.95 each; 6+ \$10.95 each; 9+ \$8.95 each

Ketchup 'n' Fries™

Harvest tomatoes AND potatoes from a single plant!

We are pleased to offer these specialty, hand-grafted plants that have quickly become customer favorites! Since Luther Burbank's experiments in the early 1900's, researchers have explored ways to find a commercially practical way of grafting a tomato plant top onto potato roots. After many years of trials, Burbank's vision finally came to fruition with the release of Ketchup 'n' Fries™.

Grow plants in the garden or in a patio container (at least 15 gallons or larger) with a 6 to 8 ft. stake or cage – a great variety for maximizing garden space. With a Brix of 10, plants produce possibly the sweetest cherry tomatoes you will ever taste AND delicious potatoes, too! During the growing season, up to 500 or more cherry tomatoes can be produced. When all the tomatoes have been gathered, cut plant back to ground level and approx. 2 weeks later, harvest up to 4 1/2 lbs. of tasty, white potatoes! All natural. Non-GMO. Easy-to-grow. Grafted plants will be shipped in 2 1/4" pots. Please read and follow the special growing instructions included with your plants. #39580.
\$16.95 each; 3+ Plants \$14.95 each; 6+ \$12.95 each

If you are not satisfied with the quality of your plants upon delivery, please let us know immediately.

SRM-RED™ Reflecting Mulch Film

Increases tomato production 12 to 20% over traditional black mulch! Developed by Clemson University and the USDA. Thin plastic film uses a patented technology to reflect wavelength-specific infrared light from the sun up into the plant. Warms the soil and retains moisture.
#53321. 48"W x 30'L, \$20.95 each
#53322. 48"W x 100'L, \$36.95 each

Red Tomato Tray™

Increases tomato yields by 40%! Red light is reflected off the tray to the plant to stimulate growth. Helps roots retain consistent moisture. Protects against drought and cutworms – yields earlier and tastier harvests. Use with tomato, pepper and vining plants. 12" x 12". #53123. Pkg. of 3, \$19.95; 2+ \$18.95 each

These Simple Steps Yield Totally Terrific Tomatoes

SEEDING:

Determine the proper time for seeding tomatoes by counting back 6-8 weeks before the last average spring frost in your area. Not sure of the frost date? Consult your local county extension service.

Timing will determine the quality of seedlings, so plan your schedule carefully. Seedlings started too early become leggy and may become stunted in containers. Seedlings held too long indoors will have a difficult time adjusting to conditions in the garden. Seedlings started too late will delay harvest.

The easiest way to schedule seeding is to use two or three dates about a week apart. It takes 7-14 days at a temperature of 70-80°F for germination, so staggered seeding would give several sizes of plants for staggered planting and a slightly staggered harvest.

When ready to seed, use a good seed starting (see page 63) or soilless mix. Firm gently, but do not pack, and moisten. Make a hole in the center of the potting mix about 1/4" deep, drop in two or three seeds and refill the hole. Or simply use **Jiffy-7® Peat Pellets** (see Order Form).

Seedling Heat Mats

Designed for gardeners who need to germinate only a few flats. Unroll the mat on any flat surface and place starter tray(s) directly on top. Direct contact with the polyvinyl mat means no

heat loss. Built-in thermostat holds temperature at 10-20°F above room temperature to a maximum of 85°F. 110 volts. UL approved.

#53252. 9" x 19-1/2" (for 1 flat), \$35.95

#53253. 20" x 20" (for 2 flats), \$69.95

#53254. 48" x 20" (for 4 flats), \$94.95

If sowing in market packs or flats, sow seeds sparingly in rows or scatter thinly across the soil surface, cover with 1/4" of potting mix and firm lightly. Mark containers with variety names and planting dates. Water thoroughly with a fine spray or wet soil from the bottom, allowing water to be absorbed until surface is moist. Keep containers moist, but not wet, and in a warm place, 70-80°F, until seeds germinate. To speed germination, apply bottom heat with a seedling mat, checking often, so seedlings can be moved to full light as soon as they emerge.

GROWING ON:

As soon as seedlings emerge, locate them in the sunniest spot available. Grow lights (at right and pg. 63) may also be used, positioning plants 4-8" below the light source and lighting 12-18 hours per day, but off at night. Seedlings grow best at temperatures of 60-70°F. Provide air circulation and keep soil surface moist.

If growing plants in market packs or flats, young seedlings are ready for transplanting to individual pots when they develop their first pair of true leaves. Thin plantings down to the strongest single seedling by pinching off weaker ones at the soil level.

Fertilize sparingly when seedlings are 3-4 weeks old, using a foliar feed concentration (1/3 to 1/2 of regular strength) of a complete (20-20-20) water-soluble plant food.

HARDENING OFF:

About a week to 10 days prior to transplanting to the garden, begin adapting plants to outside conditions. Utilize a sheltered location such as a cold frame or screened-in porch to protect from wind and sun at first, then gradually accustom them to garden conditions as the weather permits. Hardening off strengthens plant cell structure and results in sturdier and more rapidly growing plants after transplanting.

Light-Booster Single Plant House

See **Light-Booster Double Plant House** on pg. 63.

Ideal for growing a wide variety of plants in seed trays and pots. Reflective, silver foil backing bounces light back onto plants, increasing light levels by up to 70%, boosting growth for healthier, more robust plants. Protects plants from frost and harsh weather. Double zippered front panel rolls up to provide easy access. Side vents are covered in micromesh preventing overheating. Frame is made of powder coated steel with tough plastic joints. Extra thick cover is made of tough, long-lasting woven fabric and thick, clear plastic. 29.5"W x 63"H x 15.7"D. **#52958. \$119.95**

SITE PREPARATION:

As soon as all danger of frost has passed, seedlings are ready for transplanting to a prepared site in the garden. Tomatoes thrive in any reasonably good soil that is well drained and gets full sun. The soil should be tested (pg. 66) and the pH adjusted to within the range of 5.5 to 6.5, preferably in the fall. This is also a good time for deep spading or plowing to a depth of 8-12", and the soil should be enriched by adding compost, leaf mold or peat moss, as needed.

In early spring, till or spade the surface again, and rake to break up clods and remove debris. Fertilize as recommended on your soil test result form. Manure should be used, if at all, with caution, because excessive nitrogen tends to cause tomato plants to produce an overabundance of foliage rather than fruit. Using a fertilizer with a high phosphorus and potash analysis and low in nitrogen (such as 5-10-10) may be beneficial. If the soil is already fairly rich, the addition of organic matter along with a dressing of superphosphate should be sufficient. Some additional side-dressing of fertilizers may be necessary on light, sandy soils at regular intervals (14-21 days) during the growing season.

Jump Start® T5 4 ft. Light System With Timer

Using the built-in timer, simply choose your lighting schedule with a single button press – 12 hours on/12 hours off or 18 hours on/6 hours off. Easy lamp height adjustment makes it a snap to direct light where plants need it most. Just plant seeds and use the simple toggle clamp to lower it to a few inches above the soil.

Raise it as plants grow, staying 3 to 6" above the plant canopy. Includes T5 high output grow light fixture with 6400K full-spectrum lamp, Jump Start® Light Stand and 6 ft. cord with on/off switch. **#52960. \$134.95**

T5 Replacement 4 ft. Bulbs

#74671. Pkg. of 4, \$52.95

In larger plantings, rows of staked tomatoes should be 30-42" apart and spaced in the row at 24-30". If tomatoes cannot be staked, row spacings of 6 ft. and plant spacing of 4 ft. in the row are needed for proper air movement and plant development. Staking is the preferred method in limited spaces to produce a much higher percentage of clean, undamaged fruits.

Tomato Trellis

Get better quality tomatoes and save space by keeping vines off the ground. Provides greater exposure to sun and air for a healthier plant.

Ideal for tomatoes, cucumbers and other vining crops. Durable, extruded one-piece nylon net won't burn or harm tender shoots by sun "heat-up". Tangle-free and reusable. Handy 7" reach-through mesh makes harvesting easy.

#53283. 5'W x 15'L, \$16.95

#53284. 5'W x 30'L, \$19.25

Supports such as wooden stakes or wire cages (pg. 10) should be 40-72" tall, the shorter for **determinate** varieties; taller for the **indeterminates**. Determinate or bush varieties reach a certain height and stop growing bearing most fruit over a 4-6 week period. Indeterminates continue to grow and flower throughout the season, but have less mature fruits at any one time. **Indeterminate Short Internodes (ISI)** combine the controlled growth habit of a determinate with the unlimited production potential of an indeterminate.

TRANSPLANTING:

When transplanting, choose a cloudy, wind-free day or plant in the late afternoon. Be sure the danger of frost has passed, but emergency protection devices, such as plastic jugs with the bottoms removed, or **Kozy Coats™** protectors, may help if a late frost occurs.

Kozy Coats™

Reusable water filled teepees will reward you with an early season of delicious tomatoes, cucumbers, melons and other heat loving plants. The earlier you plant, the earlier you'll pick. No need to worry about heavy frost or late blizzards. Protects plants through the worst spring weather. Even if the water turns to ice, plants are still protected. Keeps heat in to warm the soil around plants. **#53725. Pkg. of 3 for \$18.95**

#53726. Repair Sleeves, Pkg. of 10 for \$8.95

Water plants thoroughly about 1/2 hour prior to planting, using a full-strength water-soluble fertilizer (pg. 64).

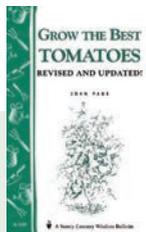

When planting, always make sure holes are large enough to accommodate all the roots without crowding. Plants should be set in deeper than they originally were in containers. Since tomato plants root freely from any portion of the stems buried beneath the soil, they may be planted down to the first leaves. For plants that have become leggy, dig out furrows and lay in the plants, burying excessively tall stems.

Partially fill the hole with soil to within about 3" of the surface and water in thoroughly, being careful to settle soil around roots, eliminating air pockets. Finish filling the hole with soil and firm soil around stem.

Tomato Growing Guide

By John Page. An easily understood, comprehensive explanation for growing the best tomatoes. 32 pages.

#82455. \$3.95

CULTURE:

Keeping plants well-watered during the growing season, particularly during periods of drought, will help ensure better yields and help control problems such as Blossom End-Rot, a blackening of the fruit on the blossom end due to a calcium deficiency often related to water uptake. Proper soil testing, lime applications and foliar treatment with calcium solutions will also help avoid this problem.

Jack's Classic® Tomato FeED 12-15-30

Water soluble plant food for vigorous plant growth from roots to green foliage, abundant flowering and fruit set. Contains micronutrients and magnesium for improved feeding results under diverse soil and growing conditions. It also includes calcium, an effective nutrient to help prevent Blossom End-Rot. Enhances blooming and keeps leaves green by preventing leaf tip yellowing. Use on tomatoes, peppers, cucumbers, eggplant, squash and zucchini. **Cannot ship to AK, AZ, HI, ND or TN.** #51236. 1-1/2 lbs., \$16.95

The control of weeds is also extremely important when it comes to growing tomatoes, they compete with plants for water, food and space. Keep soil cultivated to about a 1" depth or remove all established weeds and use a liberal application of mulch to prevent any new weeds from emerging. Mulch materials, such as straw or plastic film (pg. 7), also help conserve moisture, protect fruits from rot and blight diseases and maintain even soil temperatures.

Plants grown on stakes or trellises will need tying at regular intervals throughout the summer. Do not tie stems so tightly that they are likely to be strangled by the ties as the stems grow and thicken. Use soft string, strips of old sheeting or other soft, stretchable materials. For those of you into recycling, strips of old pantyhose make excellent ties!

Ripening time varies with location and growing season and is influenced by soil and weather conditions, but the days to maturity cited in this catalog gives you the approximate number of days from transplanting until the first fruits should ripen.

Leave the fruits on the vine until they become completely ripe for best flavor and food value. When tomatoes reach their full color, they are ready for picking – pull them off gently to prevent bruising.

After picking, tomatoes should be stored in a cool, dark place (but NOT in the refrigerator), where they will keep better than if left on the vine. In hot, damp weather fruits will be firmer if picked slightly before they are fully ripe and allowed to ripen indoors away from direct sunlight.

At the end of the season, all green fruits should be picked before the first hard frost. The greenest fruits may be used for making pickles and those of ripening size may be stored in shallow boxes or trays in a cool, frost proof area where they will ripen gradually and provide usable (although not vine-ripened quality) fruits for many weeks.

Jobe's® Tomato Spikes

A timed-release fertilizer concentrated into spike form for easy application and consistent vigorous growth of tomato plants. Special 6-18-6 analysis is customized for growing tomatoes. Push two spikes into the ground about 6 to 8" from base of each stem and water as required. 18 spikes per bag. #59450. \$9.95; 3+ \$8.95 each

TOMATO SEED COUNT

Our pkts. contain the number of seeds stated in each description.

Larger sizes contain the following approx. counts:

1/32 oz. contains 250 seeds 1/16 oz. contains 500 seeds 1/8 oz. contains 1,000 seeds
1/4 oz. contains 2,000 seeds 1/2 oz. contains 4,000 seeds

DISEASES & PESTS:

To combat diseases, grow varieties bred with resistance to common diseases. With the help of your local extension service, determine what diseases are common in your area. Look for varieties with codes indicating resistance to those diseases. The codes below follow the variety names. **NOTE:** Even resistant varieties may need some preventative fungicide applications, especially in wet seasons when disease pressure is high.

V – Verticillium Wilt
F – Fusarium Wilt (FF – Races 1 & 2; FFF – Races 1, 2 & 3)
N – Nematodes
T – Tobacco Mosaic Virus
A – Alternaria Stem Canker
GLS – Gray Leaf Spot
FOR – Fusarium Crown & Root Rot
LM – Leaf Mold
TSWV – Tomato Spotted Wilt Virus
ToMV – Tomato Mosaic Virus
ToTV – Tomato Torrado Virus
BS – Bacterial Speck
EB – Early Blight
LB – Late Blight
SLS – Septoria Leaf Spot
TYLCV – Tomato Yellow Leaf Curl Virus

Tomatoes can be attacked by a range of diseases and pests, so inspect plants for problems throughout the growing season. Damaged or stripped foliage is almost a sure sign of tomato hornworms and holes bored into fruits mean tomato fruitworms have hatched. Blotched and yellow foliage may mean blights are present, while stunted plants could mean Nematodes have invaded.

Organic gardeners often choose to handpick uninvited guests, or perhaps utilize insecticidal soaps or pyrethrins as treatments in combination with natural predators. Other gardeners, especially those with larger plantings, may need chemical pesticides for control of various insects and diseases. Be certain that the pesticides you use are labeled for your specific crop and pest, and follow label directions.

Zonix™ Biofungicide

Prevents and protects against Downy Mildew, Late Blight, Root Rot and more. Works by killing the spores that spread disease and helping plants absorb nutrients more easily, giving them better protection. Apply as a foliar spray before the first signs of disease or as a preplanting soil drench to kill disease spores. Can be used to treat seeds, transplants, roots, cuttings and both ornamental and edible plants. Easy-to-use. Mix 1/2 to 3/4 oz. per gallon of water. #50270. 8 oz. Concentrate, \$49.95

CONTAINER GARDENING:

Container gardening continues to gain in popularity, resulting in varieties bred specifically for growing in pots. Some of our best-selling container varieties, **Better Bush Hybrid** and **Bush Early Girl Hybrid** (pg. 17) and **Patio Hybrid** (pg. 21) are all excellent performers.

Check out our popular **Tomato Patio Planter Bags** (pg. 67). They're ideal for tomatoes and peppers.

For even smaller containers, some of our most popular cherry varieties like **Micro-Tom** (pg. 36) considered to be one of the worlds smallest tomato plants, **Tumbler Hybrid** and **Tumbling Tom Yellow** (pg. 39) perform especially well in hanging baskets.

Always use a good, well-drained potting mix for containers. See our **Ferti-lome® Organic Potting Mix** (O/F). Water when the surface of the media dries out.

Fertilize every 10 to 14 days with a water soluble or timed-release fertilizer like **Jobe's® Tomato Spikes**.

PRESERVING:

Tomatoes are so versatile that many gardeners plant extras for canning, freezing and juicing. You can easily prepare your own soups, juices, spaghetti and other sauces, tomato pastes, pickles and many other recipes. An enormous amount of information and recipes are available in **The Pickled Pantry** (below). Your local extension service is also helpful for information on home freezing and canning.

Sauce Master Deluxe

Strains and purees tomatoes, fruits and vegetables quickly and easily. Special screw-type action strains food through a screen while separating and expelling skins and seeds. Also prepares jams, jellies, baby food, pureed soups and mashed potatoes.

Stainless steel with an extended refuse chute, large plastic hopper, plunger and a squirt guard to save on cleanup time. Includes a spout, standard spiral and stainless steel screen, recipes and instructions. The base clamps to edge of tabletop or counter. Easy to assemble and clean.

Hand wash only.

#54246. \$94.95

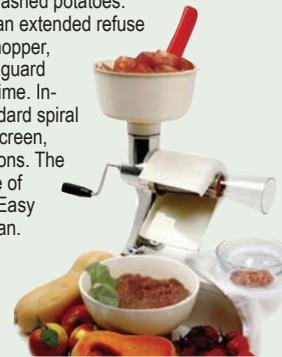

#54249. **Berry**

Screen, \$23.95

#54251. **Salsa**

Screen, \$23.95

#54257(X). **Get the Sauce Master & both screens for just \$121.95. Save 15%!**

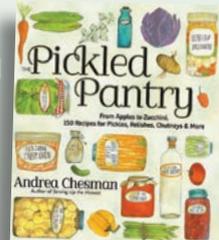

Fruitsaver Aluminum Steam Canner

Saves time, energy and water! Requires only 2 quarts of water as it steam-cooks fresh and frozen foods. Cuts preheating time by 50% over water bath canning and eliminates heavy lifting. Steam is hotter and more efficient than boiling water, killing enzymes that can attack flavor and texture of canned fruits. A built-in temperature indicator on the lid tells you exactly when to begin processing time. The base and rack make an excellent roaster. Aluminum construction ensures quick heat-up and cool-down times. Not recommended for low-acid vegetables and meat. Ideal for tomatoes, fruits and other high-acid foods. #53975. \$67.95

The Pickled Pantry

By Andrea Chesman. Fresh, contemporary recipes for pickling everything from apples to zucchini. Beginners will welcome the simple, low-fuss methods and thorough coverage of the basics and dedicated home canners will love the large-batch recipes and the stunning variety of flavors. Full color illustrations throughout. Paperback. 304 pages. #57483. \$19.95

CHERRY TOMATO SEED COUNT

Our pkts. contain the number of seeds stated in each description.

Larger sizes contain the following approx. counts:

1/32 oz. contains 375 seeds 1/16 oz. contains 750 seeds
1/8 oz. contains 1,500 seeds 1/4 oz. contains 3,000 seeds

Meet Our Famous Giants ...

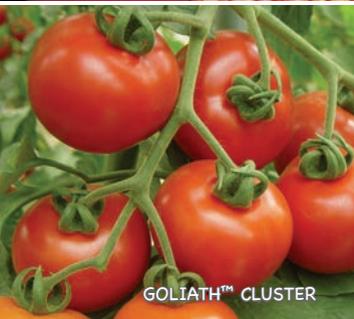

GOLIATH™ BUSH

Goliath™ Bush Hybrid VF

68 days. This remarkable tomato has continued to gain in popularity since its introduction! Specially developed for patio gardeners and those with limited garden space and unsurpassed by any other bush variety. Attractive, compact plants grow up to 3½ ft. tall and have a patio look ... the surprise is their huge, red, 3 to 4" fruits packed with flavorful meat and high sugar content. Bears consistently up to frost and needs little staking. Determinate.

#00002. (A) pkt. (30 seeds) \$4.35; (D) 1/32 oz. \$13.25

GOLIATH™ CLUSTER

Goliath™ Cluster Hybrid VFFT

65 days. Typically Goliath™ varieties are big, bold, stand-alone beauties, but this superior cluster-type with all the wow factors caught our eye. Bright red, flavorful, 4 to 5 oz. fruits present themselves for select picking or cluster harvest, holding their fine form and flavor up to 2 weeks. Indeterminate.

#00196. (A) pkt. (30 seeds) \$3.95; (V) 100 seeds \$8.95

GOLIATH™ EARLY

Goliath™ Early Hybrid VFNT TSWV TYLCV

60 days. Superb size, perfect shape, continuous production, luscious flavor and broad disease resistance. Expect extra-large harvests of big, round, 7 to 10½ oz., red, sweet fruits. Extends the growing season at the front end by almost a week without sacrificing the things we love most about Goliath™. A better yielder than most early varieties. Indeterminate.

#00003. (A) pkt. (20 seeds) \$5.95

Goliath™ Italian Hybrid VFNTA

76 days. Variety Boy-Oh-Boy. One of our most versatile Goliaths™! Adds robust flavor to all your favorite dishes. Firm, 8 oz. beefsteak-type fruits, with excellent flavor, turn from apple green with green shoulders to bright red at maturity. Vigorous plants have strong disease resistance. Indeterminate.

#00007. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$12.95

GOLIATH™ ITALIAN

Goliath™ Old-Fashioned Hybrid T LB

78 days. Variety Beef Maestro. This large-fruited wonder has all the qualities of a fine heirloom variety – big fruits that are 13 oz. or more and a pleasing combination of sweetness, flavor and very smooth texture. Fruits are oblate and a little flattened with slightly rough shoulders. Plenty of vigor over a long harvest. Indeterminate.

#00009. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$10.95

GOLIATH™ OLD-FASHIONED

Collapsible Tomato Cages

Simple to set up with one square cage per determinate plant and two stacked on each other per indeterminate plant. Easy to disassemble and store at the end of the growing season as they fold flat. Spikes are made of heavy gauge wire for durability and will sink about 6" in the ground to stabilize cages. Measures 14½"W x 14½"D x 40"H. #83021. 3 for \$35.95

Jumbo Tomato Cages

These folding cages provide more growing space and support for raising big tomato plants. Constructed of heavy-duty galvanized steel with a powder coated finish of green or red. Taller and wider than Collapsible Cages, with 8 support legs. Measures 18"W x 18"D x 58¼"H.

#54276. Green #54277. Red
Pkg. of 2 for \$59.95; 2+ pkgs. \$56.95 each

Collapsible Pepper Cages

A smaller version of our popular Collapsible Tomato Cages. Easy to set up, disassemble and store at the end of the growing season. Perfect for eggplants, as well. 32"H x 14"W. #53472.

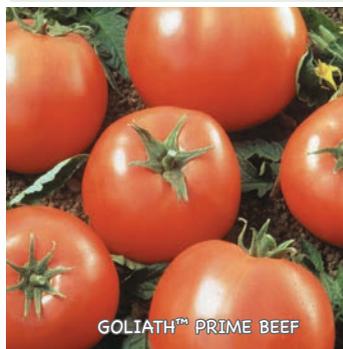

Pkg. of 3 for \$33.95

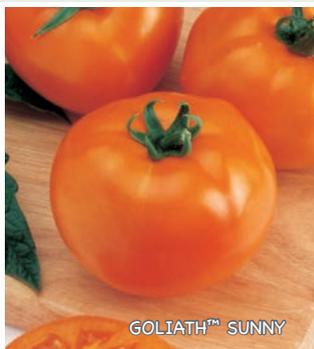

COLLAPSIBLE PEPPER CAGES

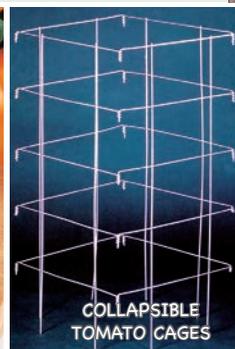

GOLIATH™ ORIGINAL

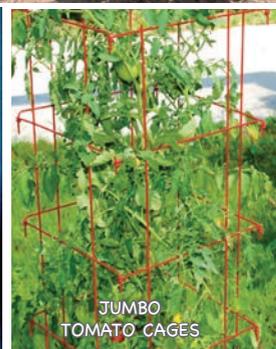

GOLIATH™ PRIME BEEF

GOLIATH™ SUNNY

COLLAPSIBLE TOMATO CAGES

JUMBO TOMATO CAGES

DID YOU KNOW... Hybrid varieties are more disease resistant than heirloom or open-pollinated types? When disease resistances are known, codes are listed after the name & sometimes additional resistances are listed in the description. The code key can be found on page 9.

Goliath™ Original Hybrid VFFTA GLS ToMV

65 days. Variety Pio. Every inch a king, from its beautiful, smooth, bright-red, deep oblate fruits averaging 10 to 15 oz., to a sweet, luscious flavor and a virtually blemish-free exterior. Tall, vigorous plants produce yield after yield and modern disease resistance makes it widely adaptable just about anywhere. Intermediate resistance to Nematodes. Indeterminate.

#00001. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$22.95

Goliath™ Prime Beef Hybrid VFFT GLS

70 days. Goliath™ continues to bring 'Prime' flavors to the table with this beefsteak-type variety! Large fruits are very flavorful, globe-shaped with green shoulders and weigh approx. 8 to 10 oz. each. Perfect for salads, sandwiches and more. Determinate.

#00016. (A) pkt. (30 seeds) \$4.55 each

Goliath™ Sunny Hybrid VFN

70 days. Variety Jubilation. A gorgeous yellow-gold variation on our much-sought-after red Goliath™ varieties, with plenty to bring to the table in its own right – big juicy fruits, mild and sweet, with a medium-soft texture and a mouth-watering juiciness when ripe. Large, 7 to 8 oz. fruits can be harvested when they first turn yellow, or left on the vine until they reach a brilliant shade of gold. Ideal for those who don't like the highly acidic bite of most red tomatoes and bound to be appreciated by anyone who values eye appeal as much as quality. Vigorous plants continue setting fruits from the bottom up. Indeterminate.

#00004. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$8.15

Cages & Supports for Tomatoes & Peppers

And See Why Goliath Rules!

Goliath™ Gentle Giant Hybrid

68-70 days. Variety Key West. A cubanelle-type with early maturity and large fruit – about 7 to 7½" in length by 2½" in width. Fruits mature from light green to a beautiful red and are perfect for grilling, stuffing, adding to salads and pizzas or eating fresh from the garden – as you will be tempted to do. Plants have added resistance to three races of the dreaded Bacterial Spot disease.

#03149. (A) pkt. (15 seeds) \$5.95

Goliath™ Goldrush Hybrid

72-75 days. Variety Chardonnay. This treasure is worth its weight in gold and the rush continues to enjoy its rich rewards! Fruits mature from green to bright yellow, producing sweet and flavorful, crispy, 4-lobed bells. Luminous fruits average 3½" by 4" each and make a bright gold presentation against dark green foliage. Plants are compact and open for easy harvest, with high yield potential. Tobacco Mosaic Virus and Bacterial Leaf Spot resistant.

#00011. (A) pkt. (20 seeds) \$3.95; (V) 100 seeds \$11.95

Goliath™ Griller Hybrid

70-73 days. Variety Santa Fe Garden. This variety's finest characteristic is its versatile flavor – pungent enough to make a fantastic roaster, but mild enough to eat fresh if you like a little bite. Smooth fruits, up to 8½" long and about 1" wide, mature from green to red and yield better than other hot peppers under cool growing conditions. Widely adaptable with good disease resistance.

#00008. (A) pkt. (20 seeds) \$3.95; (V) 100 seeds \$10.95

Goliath™ Jalapeño Hybrid

70-75 days. Giant, 5" long by 2" wide, broad shouldered, thick-walled beauties mature from dark, glossy green to scarlet red. Their large size and consistent production all season long makes them ideal for all your slicing, grilling and stuffing needs. Fruits pack good heat with excellent flavor and texture. Scoville rating is 3,000 to 5,000 units. Resistant to Tobacco Mosaic Virus and Potato Virus Y.

#00006. (A) pkt. (20 seeds) \$5.75

Goliath™ Sweet Hybrid

71 days. Variety Cabernet. If you've grown to love the Goliath™ family of superb tomatoes you'll really appreciate this sensational sweet bell, one of the largest yet! Massive, 4-lobed fruits set well under a variety of conditions. Vigorous plants develop huge, elongated, thick-walled bells measuring 4" wide by 7" long, with plenty of substance and terrific flavor! Left on the plants, fruits will turn from green to dark red and contain more Vitamin C than oranges!

Photo courtesy of The Ervin Walter family in Cresco, Iowa.
#00005. (A) pkt. (30 seeds) \$4.55

Totally Tomatoes Exclusives!

We invite you to try all 5! Your taste buds will thank you!

Belle of the Ball Hybrid F

70 days. A true hybrid heirloom bred from parents that originated in France over 100 years ago and were reselected for their uniformity. Beautiful, slightly flat, round fruits average 6 to 8 oz., are juicy and full of wonderful flavor that has the perfect balance of acid and sweetness. Great fresh or cooked. High yielder. Determinate.

#00069. (A) pkt. (30 seeds) \$4.15

Little Hot Shots Hybrid

60-65 days green; 70-75 days red. These cute, ¾" cherry peppers are fairly hot, with a Scoville rating of 9,000 to 10,000. Fruits ripen from dark green to a deep crimson red and can be enjoyed at either stage. Excellent fresh, roasted for chili paste, pickled or dried. Sturdy plants grow up to 20" tall and produce an abundance of fruit. An excellent choice for patio containers.

#03781. (A) pkt. (30 seeds) \$4.15

Sweet Snax Hybrid VF

60 days. Looking for a variety that will potentially produce thousands of small, delicious nuggets of sweetness? Then we have just what you're looking for. Vigorous plants are heavy producers of bright red cherry tomatoes that are less than an inch in diameter and filled with excellent, sweet flavor. Great for roasting, salads or just plain snacking. Crack resistant. Indeterminate.

#00731. (A) pkt. (30 seeds) \$3.45

Where's The Heat? Habanero

80-85 days. Attractive fruits are bright golden-yellow and completely sweet – however, there may be an occasional hot pepper, although not as hot as a typical habanero. The best part about these beauties is that they have the same fruity flavor hot habaneros have, but without the insane burn. Large, upright plants create a nice canopy to protect fruits from sunscald.

#03797. (A) pkt. (30 seeds) \$3.55

Perfectly Pink Hybrid FN

95 days. The maturity is long, but certainly worth the wait! The reward for your patience? Large, tasty summer treats. Attractive, beefsteak-type fruits are juicy, super sweet and weigh in at 1 lb. or more, making them the perfect one slicer! Potato leaf plants produce good yields. Indeterminate.

#00546. (A) pkt. (30 seeds) \$3.55

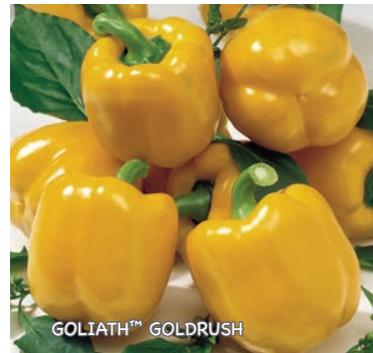

Garden Stakes

Garden stakes are green plastic coated with a steel core. Weather and rust-proof with water tight closures on both ends – won't rot or split. Perfect for tomatoes, peppers and vining plants. Spurred to prevent ties from slipping. Reusable year after year.

Varieties on pages 12-16 typically grow fruits 10 oz. or larger

American Original Red Beefsteak Hybrid

65 days. Gardeners everywhere will love the heirloom look and feel of these large, 12 to 14 oz. beefsteak fruits that were bred to hold their texture and flavor longer after picking. Packed with exactly the right amount of flavor for fresh eating in salads and on sandwiches. Indeterminate.
#00025. (A) pkt. (20 seeds) \$5.75

Beefmaster Hybrid VFA GLS

80 days. One of the most popular hybrid beefsteak-types. Solid, meaty, bright red tomatoes weigh up to 2 lbs. Improved disease resistance, better yields, larger fruits and good tolerance to cracking/splitting. Intermediate resistance to Nematodes. Indeterminate.
#00061. (A) pkt. (30 seeds) \$5.75

Bella Rosa Hybrid VFFA GLS

75 days. Large, 10 to 12 oz. bright red tomatoes are round, firm and highly flavorful with a good balance of acid and sugar. A heat tolerant variety which does well in hot, humid areas. Perfect for home gardens. Plants produce high yields. Intermediate resistance to TSWV. Determinate.
#00066. (A) pkt. (20 seeds) \$5.45; (V) 100 seeds \$16.95

Better Boy Hybrid VFA GLS

75 days. A spectacular, mid-season variety with plump, juicy, deep red tomatoes that often weigh more than 1 lb. Once they arrive they just keep on coming! Fruits are extremely flavorful, with flesh that's juicy, yet firm. Heavy foliage protects fruits from sunscald. A highly adaptable variety that thrives in nearly any climate. Intermediate resistance to Nematodes. Indeterminate.
#00068. (A) pkt. (30 seeds) \$5.15; (G) 250 seeds \$18.95

Better Boy Plus Hybrid VFA FOR GLS ToMV

75 days. Bright red, unbelievably juicy fruits weigh up to 1 lb. and with a higher Brix of 6.5, it's packed with an unbeatable, sweeter flavor. PLUS it has intermediate resistance to Tomato Spotted Wilt Virus and Nematodes. Indeterminate.
#00074. (A) pkt. (15 seeds) \$4.55

Big Beef Hybrid VFFA GLS ToMV

73 days. 1994 AAS Winner. A miracle of modern breeding. In AAS trials, judges described this variety as "the best tomato yet developed". Smooth fruits are globe-shaped, weighing 9 to 16 oz. Widely adaptable, it's a good choice in virtually any climate, readily overcoming adverse growing conditions. Coupled with old-fashioned, rich flavor, it features bred-in hybrid qualities – colossal fruit size and yield, uniformity and a full spectrum of disease resistance with intermediate resistance to Nematodes. Indeterminate.
#00075. (A) pkt. (30 seeds) \$5.65; (G) 250 seeds \$23.95

BIG BEEF PLUS

BIG LEAGUE

BIG ZAC

BLUSHINGSTAR

Big Beef Plus Hybrid VFFA FOR GLS ToMV ToTV

75 days. With the added crimson gene, this beauty is visibly deeper red inside and out. Fruits are sweeter with a higher Brix of 6.2 and weigh 9 to 16 oz. PLUS it has intermediate resistance to Tomato Spotted Wilt Virus and Nematodes. Higher yield potential. Indeterminate.
#00080. (A) pkt. (15 seeds) \$4.85

Big League Hybrid

65-70 days. Produces the largest fruit of any true container variety on the market to date! Beautiful, 14 to 21 oz., beefsteak-type, red tomatoes grow on plants that will require support due to the sheer weight of the fruit. Plants only grow up to 48". Determinate.
#00086. (A) pkt. (15 seeds) \$4.65

Big Zac Hybrid

80 days. This prize winner was bred by Minnie Zaccaria, a New Jersey gardener who tirelessly sought the perfect cross-pollination of two heirlooms, creating this enormous tomato with fruits that repeatedly tip the scales at an amazing 4 to 6 lbs. An excellent tomato in every respect – meaty, delicious and true-growing every time! Furthermore, it has impeccable ancestors ... a beautiful red heirloom beefsteak-type and a large, pink, open-pollinated beefsteak heirloom. Indeterminate.
#00087. (A) pkt. (15 seeds) \$3.75; (V) 100 seeds \$19.95

BlushingStar Hybrid LB SLS

70-75 days. Combines tasty heirloom flavor with modern hybrid performance. Early maturing, pink beefsteak-type, 12 to 16 oz. fruits are juicy, sweet and savory. Large, oblate-shaped fruits are ribbed and grow to approx. 2 1/2" by 4". Perfect for eating fresh or for use in canning. Indeterminate.
#00101. (A) pkt. (10 seeds) \$4.85

BRANDYMASTER HYBRID SERIES VFN

70-80 days. This modern strain of classic Brandywine delivers world famous flavor packed into large fruits, unrivaled among similar varieties. Pink fruits weigh up to 10 oz. each, while both Red and Yellow fruits weigh up to 1 lb. All have firm, juicy flesh with an incredible, rich tomato taste. Potato-leaved plants do well under a wide range of conditions. Fruits mature later in northern areas. Indeterminate.

Pink #00555. Red #00608. Yellow #00828.
Prices, above 3, per variety:
(A) pkt. (30 seeds) \$3.75

It's Back!

Buffalosun Hybrid VFFF

70 days. 2020 AAS Regional Winner (Northeast/Southeast). The unique yellow with red/orange flame coloration is as beautiful on the outside as it is on the inside with its nicely marbled interior. Ribbed, flattened, 18 to 24 oz., beefsteak-type fruits have a better texture, better crack resistance and higher yields than comparable yellow varieties. Sweet, tender flesh has the look of an heirloom without the mushiness often associated with them. In AAS trials it outlasted similar varieties when disease hit in late summer. Intermediate resistance to Late Blight and TSWV. Indeterminate. #00118. (A) pkt. (10 seeds) \$6.65

Burpee's Big Boy Hybrid A

78 days. The hallmark of this large, crack-free tomato is its absolutely superb flavor. Bright red, firm, meaty fruits often weigh 1 lb. or more and feature smooth, blemish-resistant skins. High yielding plants produce all summer long. Indeterminate. #00128. (A) pkt. (30 seeds) \$5.25; (G) 250 seeds \$19.95

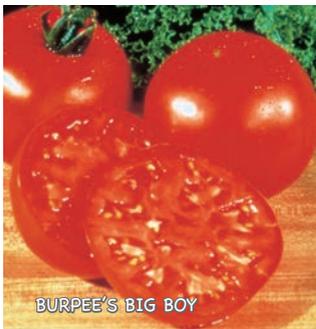

Bush Champion II Hybrid VFFA GLS ToMV

65 days. One of the best varieties for small space gardens and containers, bar none. Compact plants grow to just 24" tall, producing extra-early yields of big, 8 to 12 oz. fruits with excellent flavor. Displays similar qualities of its popular namesake Champion and exceeds our expectations with satisfying performance in virtually every climate. Good disease resistance. Determinate. #00148. (A) pkt. (20 seeds) \$10.45

BUFFALOSUN

BURPEE'S BIG BOY

BUSH CHAMPION II

CHEF'S CHOICE HYBRID SERIES

This award winning (except Purple and Striped) series, features superior taste and texture. Great for canning, stewing and eating fresh. Crack resistant. Indeterminate.

Bi Color FTA

75 days. 2020 AAS Regional Winner (Mountain/Southwest, Southeast, West/Northwest). Large, eye-catching fruits weigh 10 to 12 oz. each, are globe-shaped and absolutely delicious! Heirloom-type, pale yellow tomatoes are brushed with deep red splashes on the blossom end and throughout the lemony yellow flesh. Vigorous plants are heavy yielders. Scab resistant. #00160.

Black VFT

75 days. 2019 AAS Regional Winner (Mountain/Southwest, Southeast, West/Northwest). Large, dark red-purple, 8 to 12 oz. fruits have green shoulders and a flattened globe shape. Delicate skin surrounds very juicy, deep crimson flesh that's full of flavor and has a slight saltiness that enhances the taste. #00164.

Green VFTA

90 days. 2016 AAS Winner. Beautiful green fruits, 6 to 7" in diameter, have subtle yellow stripes and a wonderful sweet, yet tangy flavor. Plants, with dark green foliage, produce heavy yields of large, 9 to 10 oz. beefsteak type fruits with a flattened globe shape. Scab resistant. #00176.

Orange FTA ToMV

75 days. 2014 AAS Winner. Bred from the popular heirloom tomato Amana Orange (pg. 21), this variety captures the wonderful flavor and unique color of the heirloom, but with much earlier maturity and improved disease resistance. Beefsteak-type, 5 to 6" fruits have a flattened globe shape and average 9 to 12 oz. each. Bright orange, almost neon, both inside and out - won't fade or discolor when cooked. #00178.

Pink VTA

80 days. 2015 AAS Regional Winner (Great Lakes, Southeast). Very large, 12 to 14 oz., pink, meaty fruits have the perfect acid to sugar ratio. Easier to grow than most beefsteaks. Potato leaved plants produce high yields. Scab resistant. #00177.

Purple NT

70 days. Fans of Cherokee Purple (pg. 23) will fall in love with this exceptionally flavored heirloom hybrid. Attractive, flattened globe-shaped, 9 to 10 oz. fruits are firm, smooth and truly purple inside and out. #00182.

Red VF

85 days. 2018 AAS Regional Winner (Southeast, West/Northwest). Beautiful, red, 8 oz. fruits are globe-shaped and scar-free. Beefsteak-type, 6 to 7" tomatoes have firm flesh with just the right balance of acid to sugar creating a flavor similar to heirlooms. Scab resistant. #00179.

Striped TA

75 days. Unique, 6 to 7 oz., globe-shaped fruits have stunning yellow skin and are covered with pink/red stripes that resemble brush strokes. Delicious flesh is bright yellow with a slight red blush on the blossom end. Scab resistant. #00185.

Yellow VFTA

90 days. 2017 AAS Regional Winner (Southeast). Gorgeous, 10 oz. beefsteak-type fruits have a sweet, citrus-like flavor with just the right amount of acid. Plants produce loads of 6 to 7", golden yellow fruits. Scab resistant. #00173.

Prices, above 9, per variety:
(A) pkt. (30 seeds) \$3.55

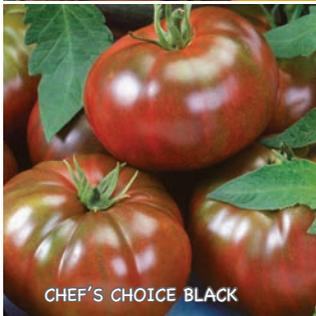

DID YOU KNOW... When tomato plant leaves curl, but do not discolor, this is a physiological disorder not a disease? Leaf curl/roll can be due to several outside influences like high temperatures, especially with high humidity, but wet soil conditions, high nitrogen levels & improper pruning can also cause this to happen. Leaf curl/roll does not affect fruit formation. Keep plants healthy and ensure soil is well-draining to prevent this issue.

COUNTRY TASTE

Country Taste Hybrid VFFT

70 days. Tomato lovers won't get enough of these smooth, round, deep red fruits weighing up to 1 lb. Color is consistent from the skin straight through to the center. Flesh is firm and juicy, packed with real tomato flavor. Produces high yields of beefsteak fruits that pay tribute to the old-time qualities of hearty, country-style tomatoes. Great for fresh eating. Indeterminate. **#00205. (A) pkt. (20 seeds) \$5.05**

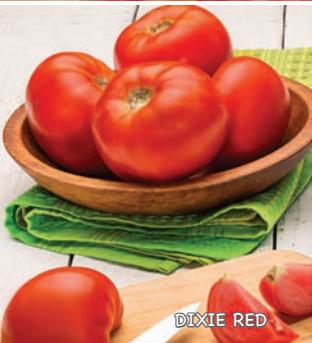

DAMSEL

Damsel Hybrid VN LB

73 days. An outstanding pink beefsteak variety with impeccable heirloom flavor! Uniform fruits weigh up to 12 oz., make an excellent slicer and are perfect in salads. In trials, it was an excellent producer, even in less than ideal conditions. Compact plants grow 4 to 5 ft. Indeterminate. **#00218. (A) pkt. (10 seeds) \$5.35**

Dixie Red Hybrid VFFFA GLS

80-90 days. Large firm fruits weigh 11 to 12 oz. each and have a deep oblate-shape. Plumpness, deliciousness and juiciness makes this the perfect choice for fresh salads, in soups or on those tasty BLT's. An early-main season variety bred to perform well in hot, humid climates. Heavy yielder. Intermediate resistance to Nematodes and TSWV. Determinate. **#00221. (A) pkt. (10 seeds) \$4.75**

DIXIE RED

Galahad Hybrid VFFFN GLS TSWV LB

75 days. 2020 AAS Regional Winner (Heartland). If you're having problems growing tomatoes because of Late Blight, then you'll need to try this variety bred from parent lines that are both resistant. Large, round, great tasting, 12 oz. fruits have broad shoulders and are slightly ribbed. Excellent for canning, salsas, sauces and sandwiches. AAS judges agreed that the sweet, meaty flavor is better than that of comparable varieties and boasts good crack resistance. Strong sturdy plants are high yielding. Determinate. **#00284. (A) pkt. (10 seeds) \$5.45**

GALAHAD

Grand Marshall Hybrid VFFA

78 days. Attractive, large to extra large, 10 to 14 oz. beefsteak-type fruits are firm, smooth shouldered, deep oblate-shaped and grow in clusters of 2 to 3. Mild flavored fruits have the perfect balance of acid to sugar ratio. Bred to have good performance under hot conditions and when bacterial pressure is present. Matures early for a main season hot set variety. Ideal for home gardens and fresh markets. Strong, vigorous plants produce high yields. Intermediate resistance to Gray Leaf Spot and Tomato Yellow Leaf Curl Virus. Determinate. **#00314. (A) pkt. (10 seeds) \$5.25**

Grandma's Pick Hybrid VFN GLS

78-80 days. A modern day hybrid combining the look and taste of an heirloom beefsteak with earlier, more productive and disease resistant yields. Fruits are deeply globed, weigh 10 to 14 oz. each, have an excellent flavor and are high in lycopene. An excellent choice for home gardens, specialty markets and roadside stands. Indeterminate. **#00325. (A) pkt. (10 seeds) \$4.55**

HEIRLOOM MARRIAGE™ HYBRID SERIES

These varieties are produced from modern day unions of heirloom parents, providing hybrid vigor while maintaining the virtue and integrity of their old-fashioned beginnings. They were bred for improved yield, earlier maturity, fewer blemishes and the same old-time flavor we've all come to love. Indeterminate.

Also see Marzinaro on page 20.

Big Brandy

75-80 days. Pink beefsteak-type – a cross of Big Dwarf and Brandywine. 12 to 15 oz. **#00077.**

Cherokee Carbon

75-80 days. Purple beefsteak fruits, 10 to 12 oz., are full of rich flavor. A cross of Cherokee Purple and Carbon. **#00172.**

Genuwine

70-75 days. Slicing type – a cross of Costoluto Genovese and Brandywine. 10½ to 11½ oz. **#00279.**

Laguna Red Hybrid VFFA FOR ToMV

68-72 days. Attractive, large, scarlet red, globe-shaped fruits weigh approx. 8 to 12 oz. each and are very firm and smooth shouldered. Flavorful, deep red, juicy flesh has a good acid to sugar ratio. An ideal choice for farmers markets. Plants are widely adaptable and provide good leaf cover to protect fruits. Intermediate resistance to Gray Leaf Spot and Tomato Yellow Leaf Curl Virus. Determinate. **#00423. (A) pkt. (10 seeds) \$5.25**

DID YOU KNOW... The majority of diseases that affect tomato plants are fungal in nature, spread by wind, rain & insects and less often from the soil itself? Fungal diseases can be prevented by using proper sanitation, planting specifically resistant varieties, rotating crops and applying the right fungicide at the right time. Try Bonide Revitalize on pg. 65.

OUR FAMOUS MOUNTAIN HYBRID SERIES

Working at NCSU Mountain Crops Research Station, Randy Gardner, Ph.D., developed a family of exceptional fresh market varieties particularly well-adapted to the Southeast. While specially bred for mountain regions and higher elevations, nationwide trials have suggested that the series is well-adapted everywhere! Ideal for the home garden or fresh market. Also see Magic pg. 21 & Vineyard pg. 36.

Mountain Delight VFF

70 days. Similar to Mountain Fresh Plus and Mountain Spring, but plants are more compact with slightly higher yields. Flattened, globe-shaped fruits weigh 10 oz. and are packed with flavor. Determinate.

#00487. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$10.95

Mountain Fresh Plus VFFN

79 days. Smooth, clean fruits often exceeding 3½", are 10 to 12 oz., have uniform color and great flavor. Large vines offer excellent cover to protect fruits and produce good yields. Smooth blossom scar. Tolerant to Early Blight. Determinate.

#00490. (A) pkt. (30 seeds) \$6.25; (G) 250 seeds \$27.95

Mountain Gem VFF TSWV ToMV LB

74 days. Crimson red, deliciously sweet flesh has a balanced sugar to acid flavor. Deep oblate to flattened globe-shaped, firm, 6 to 8 oz. fruits have clean blossom ends. Vigorous plants yield high concentrated sets of excellent quality fruit. Ideal for home gardens and container gardening. Determinate.

#00489. (A) pkt. (10 seeds) \$5.75

Mountain Majesty VFF

78 days. Good yields of high quality, deep oblate to flattened globe-shaped, extra large fruits have the ability to stay firm when fully ripe. If you love the other varieties in this series, you will definitely want to include this deep red beauty in your garden. Vigorous plants offer heavy foliage to protect fruits. Includes intermediate resistance to Tomato Spotted Wilt Virus. Good crack resistance. Determinate.

#00494. (A) pkt. (10 seeds) \$5.25

Mountain Merit VFFFN GLS

75 days. 2014 AAS Regional Winner (Heartland). A praise-worthy variety offering multiple disease resistances not typically combined in most varieties. Deep red, 8 to 10 oz. fruits are firm, oblate to flattened, with generally smooth blossom end scars – delicious and makes the perfect slicing tomato. A fresh market variety with excellent resistance to cracking. Intermediate resistance to both Early and Late Blight and TSWV. Determinate.

#00497. (A) pkt. (10 seeds) \$4.95

Mountain Pride VFFA GLS BS

70 days. The first in the Mountain series with 6 oz. fruits that are crack resistant, jointed and green shouldered. Plants are vigorous and uniform. Determinate.

#00496. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$9.95

Mountain Rouge VFN

73 days. 2019 AAS Regional Winner (Heartland). This pink beauty, just like its sister varieties, has a very good disease resistance package. Enjoy a generous harvest of large, beefsteak-type tomatoes weighing a hefty 12 to 14 oz. each. Fruits have thick flesh with minimal seeds and a delicious flavor with just the right balance of acid and sugar. Performs especially well in cooler climates. Intermediate resistance to Late Blight. Indeterminate.

#00498. (A) pkt. (10 seeds) \$6.95

Mountain Spring VFF

72 days. Appreciated for its superb, 8 to 10 oz. fruits with good firmness that are particularly resistant to cracking and Blossom End-Rot. Determinate.

#00500. (A) pkt. (30 seeds) \$5.45

#00865(X). Get 1 packet each of all 10 Mountain varieties (including Magic on pg. 21 & Vineyard on pg. 36) for just \$43.95. Save 20%!

Park's Whopper CR Improved Hybrid VFFN

65 days. Earlier, tastier and meatier than the original Whopper, with big, red, 4", juicy fruits that have improved disease and crack resistance, as well as a more uniform fruit size. Start harvesting early and pick until frost! A popular choice for fresh markets and home gardens. Vigorous, stocky plants produce heavy yields. Indeterminate.

#00533. (A) pkt. (30 seeds) \$6.95; (G) 250 seeds \$33.95

Patsy Hybrid VF GLS TSWV

78 days. Attractive, round, large to extra-large, 9 to 10½ oz. fruits are deep crimson inside and out and have a delicious, mild flavor. Meaty and somewhat firm with clean blossom ends. Strong plants provide excellent foliage cover to protect fruits. A great variety for multiple harvests with continuous yields. Great for roadside stands. Widely-adaptable for the East Coast. Intermediate resistance to Tomato Yellow Leaf Curl Virus. Determinate.

#00547. (A) pkt. (10 seeds) \$5.65

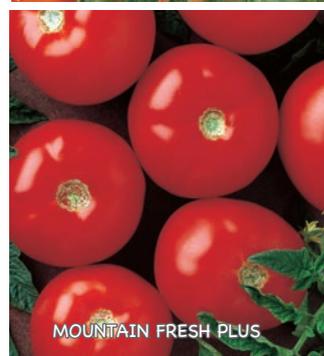

Pink Delicious Hybrid V GLS ToMV

74 days. 2022 AAS Regional Winner (Southeast & Heartland). Ribbed, beefsteak-type fruits are pink, deep oblate-shaped and weigh approx. 8 to 11 oz. each. Hefty fruits are full of excellent flavor and much sweeter than typical pink varieties. In trials it produced earlier, had higher yields, more uniform fruits and better crack resistance than comparable varieties. Heavy yielder. Indeterminate.

RAMBLER

Rambler Hybrid VFFA

68-72 days. An adaptable, high-quality salad variety featuring extra large, attractive fruits that weigh approx. 8 to 12 oz. each. Dark red, globe-shaped fruits are very firm and have deep red flesh. Great for fresh markets. Plants are widely adaptable and produce excellent yields. Intermediate resistance to Gray Leaf Spot and Tomato Spotted Wilt Virus. Determinate.
#00597. (A) pkt. (10 seeds) \$5.65

RED SNAPPER

Red Snapper Hybrid VFFA

70-75 days. Attractive, large 8 to 12 oz. fruits are deep red, smooth, firm and deeply oblate. Flesh is scarlet red and full of great tomato flavor. Makes a great slicer. Medium tall plants have dark green foliage that provides moderate cover for fruit protection. Sets well in the heat. Widely adaptable and a high yielder. Developed in cooperation with University of Florida's Food and Agricultural Science tomato breeding program. Intermediate resistance to Gray Leaf Spot, Tomato Spotted Wilt and Tomato Yellow Leaf Curl Virus. Determinate.
#00604. (A) pkt. (10 seeds) \$5.55

ROADSTER

Roadster Hybrid VFFFA FOR

65-70 days. This candy apple red beauty will turn heads with its glossy, 8 to 12 oz., very firm fruits. Tomatoes have smooth shoulders, are globe-shaped, and have exceptional taste with rich red color inside and out. Plants have a high yield potential and are widely adaptable. Great for container gardening. Intermediate resistance to Gray Leaf Spot and TSWV. Determinate.
#00636. (A) pkt. (10 seeds) \$5.25

RUBEE HYBRID SERIES VFF FOR LM ToMV

Early maturity, great flavor, amazing color, thin, smooth skin, crack resistance and fantastic disease resistance – this series has it all. All are very good slicers. Intermediate resistance to Nematodes.

Dawn

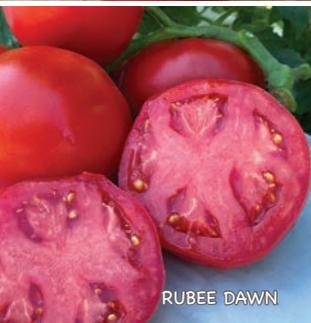

57-60 days. Firm, rich red, 8 to 12 oz. fruits are deep oblate and have light green shoulders. Flavor has a wonderful balance of sweet with a touch of tartness and a hint of floral overtones. Intermediate resistance to Gray Leaf Spot. Compact indeterminate.
#00628.

Goddess

60-65 days. Deep red, juicy 8 to 10 oz. fruits are flattened globe-shaped and firm. Productive plants were top performers in trials. Intermediate resistance to Late Blight. Indeterminate. #00629.

Plus

65 days. Juicy fruits have thick, meaty flesh, weigh 8 to 10 oz., are flattened globe-shaped, firm and deep scarlet red at maturity. Smooth shouldered fruits grow in clusters of 2 to 3. The best slicer in the series. Indeterminate. #00633.

RUBEE DAWN

Prize

65 days. Extra large, 9 to 10 oz. fruits are flattened globe-shaped, firm, have light green shoulders and are deep scarlet red. Sets clusters of 2 to 4, almost seedless fruits. Most popular in the series for flavor. Super productive plants have good leaf cover. Compact indeterminate.

70-75 days. Vine-ripened fruits have the perfect balance between acid and sweetness. An early-mid season variety with high yields of impressive 11 oz. fruits. Strong, vigorous plants produce concentrated fruit sets. Adapts well to patio containers. Intermediate resistance to TSWV. Determinate.
#00689. (A) pkt. (15 seeds) \$5.25

Sunny Boy Hybrid VF

70-75 days. Striking, bright yellow, beefsteak-type fruits weigh approx. 10 to 12 oz. each and can sometimes even weigh up to 16 oz.! Fruits are globe-shaped, firm, meaty and have less seeds than comparable red varieties. Very sweet and flavorful with a hint of acid, this plump slicer is perfect in salads, on sandwiches and will really shine on vegetable trays. Plants set well and are widely adaptable. Excellent for roadside stands and farmers markets. High yielding. Indeterminate.
#00704. (A) pkt. (30 seeds) \$3.95

Super Fantastic Hybrid VFFA GLS ToMV

70 days. An improved version of the ever-popular Fantastic (pg. 18), but with stronger disease resistance. Heavy yields of solid, meaty, smooth fruits weigh an average of 10 oz. each. Intermediate resistance to Nematodes. Indeterminate.
#00720. (A) pkt. (30 seeds) \$7.25; (V) 100 seeds \$20.95

Supersonic Hybrid

75 days. Big, red, mid-season fruits with great flavor, size and quality! Firm, meaty, very large, 12 oz. fruits are slightly oblate in shape and are smooth, with excellent resistance to cracking. Perfect for roadside stands. Sturdy plants are vigorous and high yielding with intermediate resistance to Verticillium Wilt and Fusarium Wilt. Indeterminate.
#00732. (A) pkt. (30 seeds) \$3.95; (G) 250 seeds \$19.95

Thunderbird Hybrid VFFFA

72-75 days. A vigorous hot set variety that thrives in warm, wet conditions! Very firm, smooth, meaty fruits are extra-large, deeply oblate, weigh approx. 8 to 12 oz. each and are deep red inside and out. Fruits have a good shelf life. Well-suited for farmers markets and home gardens as well. Plants provide good foliage cover to protect fruits. Features intermediate resistance to Gray Leaf Spot and Tomato Yellow Leaf Curl Virus. Determinate.
#00769. (A) pkt. (10 seeds) \$5.55

Tough Boy Hybrid VFN GLS

75 days. Also known as Momotaro. Extra early and vigorous. Pink, very sweet fruits weigh approx. 1 lb. and grow in clusters of 6 to 7. Ideal for home gardens or fresh markets. Plants have medium sized leaves and medium-short internodes. Crack resistant. Indeterminate.
#00778. (A) pkt. (15 seeds) \$6.25

Is Medium to Large Your Ideal Size?

See Tomato Disease Code Key on page 9

Varieties on pages 17-20 typically grow fruits 6 to 10 oz.

Amelia VR Hybrid VFFFN GLS TSWW

75 days. Specially bred for Southeastern gardens – this southern belle thrives in hot climates. Produces large, 8 to 10 oz. firm, uniform fruits. Very flavorful and excellent when picked green or red. Great for sandwiches, salads and salsas. Good crack resistance and performs best with moderate pruning. Perfect for container gardening. Heavy yielder. Determinate.

#00033. (A) pkt. (10 seeds) \$5.85

Andiamo Hybrid

65 days. A true San Marzano type. Strong, vigorous plants produce heavy yields of bright red, 5" elongated, 5 to 6 oz. fruits that are firm, meaty and loaded with sweet flavor and just the right amount of acid. Excellent for fresh eating, salsas and perfect for making pastes, sauces and for canning. Indeterminate.

#00056. (A) pkt. (30 seeds) \$3.35

Bellerose Hybrid VFFN TSWV TYLCV

70 days. Pink, beefsteak-type fruits are round, firm and weigh approx. 6½ oz. each. Meaty fruits are juicy and have a nice sweet/acidic balanced flavor. Perfect for fresh eating and canning. Fruits have a long shelf life and exhibit excellent crack resistance. Intermediate resistance to Early Blight. Indeterminate.

#00076. (A) pkt. (10 seeds) \$5.65

Bendida Hybrid VFFA ToMV

60-80 days. Beautiful deep orange, glossy fruits are firm, round, average up to 7 oz. each and are high in beta carotene. Fruits grow in clusters of 6 to 7 and have a superbly, well-balanced flavor. Perfect for pastes, sauces, canning, salads and slicing. High yielding. Intermediate resistance to Early Blight. Semi-determinate.

#00071. (A) pkt. (15 seeds) \$4.65

Best Boy Hybrid VFFN

75 days. Beautiful, bright red, firm, 8 oz. deep globe-shaped fruits are smooth and really delicious. Some claim it's better than Better Boy (pg. 12) – you be the judge! An excellent choice for mid-early production. Vigorous plants produce heavy yields. Tolerant to Gray Wall and cracking. Indeterminate.

#00067. (A) pkt. (30 seeds) \$3.55

Better Bush Hybrid VF

68 days. This early home garden variety bears all season long. Produces big 4" fruits that are mouth-watering, sweet and meaty, with the much-sought-after real tomato taste. Plants feature a strong central stem capable of supporting its 48" height with very little need for staking. If you love container gardening, definitely try this one! Determinate.

#00072. (A) pkt. (30 seeds) \$4.75

Biltmore Hybrid VFFA GLS

70 days. This mid-season variety is a reliable producer with a manageable plant size and an extended harvest of large, smooth, globe-shaped, 8 to 10 oz. fruits with deep red exteriors. Matures earlier than varieties of similar size with fully developed flavor that has proven tough to beat in farmers market taste tests. Semi-determinate.

#00085. (A) pkt. (20 seeds) \$7.05

Buffalosteak Hybrid VF ToMV

75 days. High quality beefsteak-type fruits average 6 to 7 oz. and have a superior, robust old-fashioned tomato flavor. Bright red flesh is solid and meaty with very few seeds making it excellent for slicing to top sandwiches and burgers. Vigorous plants are very productive. Intermediate resistance to Nematodes. Indeterminate.

#00117. (A) pkt. (10 seeds) \$6.15

Bush Early Girl Hybrid VFFNT

54 days. This sister to popular Early Girl (pg. 18) delivers the same desirable qualities in a compact, patio-sized variety. Extremely early with huge yields of firm, meaty, flavorful fruits that are larger than Early Girl – a full 4" in diameter. Determinate.

#00149. (A) pkt. (20 seeds) \$4.45

Carolina Gold Hybrid VFF

71 days. Large, 10 oz. fruits are yellow-gold and deeply oblate with very few seeds. Flesh is firm and meaty with low acid. Vigorous, medium-tall plants should be staked. Crack tolerant. Determinate.

#00162. (A) pkt. (30 seeds) \$5.95; (G) 250 seeds \$26.95

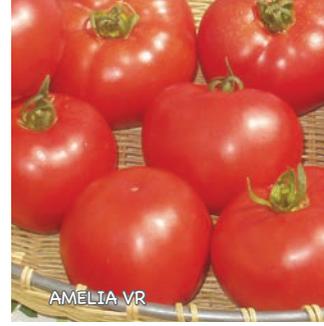

Cedro Hybrid VFFFA ToMV

75-80 days. Beautiful, large, saladette/roma-type, high quality fruits weigh approx. 4 to 6 oz. Great tasting, smooth, bright red tomatoes have an elongated oval shape, are uniform and very firm with beautiful color inside and out. Fruits grow in clusters on compact plants that have short internodes, mid vigor and excellent yield potential. Widely adaptable and performs well when grown under conditions from warm to cool with good heat set ability. Indeterminate.

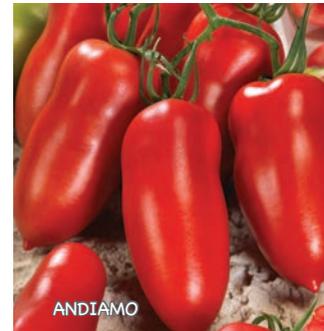

#00163. (A) pkt. (10 seeds) \$5.85

CELEBRITY

Celebrity Hybrid VFFA GLS ToMV 

70 days. This **1984 AAS Winner** established a new standard for main-crop hybrids requiring multiple disease resistances. Medium-sized, globe-shaped fruits are crack resistant and average 7 oz. Highly adaptable from Canada to the South. Intermediate resistance to Nematodes. Semi-determinate.
#00175. (A) pkt. (30 seeds) \$5.95;
(G) 250 seeds \$25.95

CELEBRITY PLUS

Celebrity Plus Hybrid VFFA GLS ToMV 

70 days. Large, smooth 8 oz. fruits have an outstanding flavor. Widely adaptable for fresh markets and home gardens. PLUS it has intermediate resistance to Nematodes and TSWV. Semi-determinate.
#00195. (A) pkt. (15 seeds) \$4.85

Champion II Hybrid VFA ToMV

62-65 days. Features more disease resistance than the original Champion Hybrid while maintaining the same delicious flavor and timing. Delivers high yields of meaty, sweet, 6 to 10 oz., bright red fruits that are great on sandwiches and burgers. Intermediate resistance to Nematodes. Indeterminate.
#00180. (A) pkt. (30 seeds) \$7.05

CHAMPION II

Charger Hybrid VFFFA

72 days. This variety takes charge of diseases featuring intermediate resistance to the dreaded Tomato Yellow Leaf Curl Virus and Gray Leaf Spot. Brilliant red, oblate, 8 to 10 oz., fruits are very firm and smooth shouldered with good flavor that's high in sugar and low in acid. A high yielding salad variety that's perfect for home gardens. Widely adaptable. Crack resistant. Determinate.
#00183. (A) pkt. (10 seeds) \$4.55

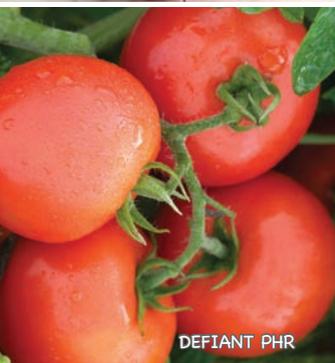

CHARGER

Defiant PhR Hybrid VFF LB

70 days. This variety cracks the genetic code to produce the first tomato bred for resistance to the modern strains of Late Blight. High yielding plants produce 6 to 8 oz. globe-shaped fruits with great old-fashioned tomato flavor. Intermediate resistance to Early Blight. Determinate.
#00213. (A) pkt. (10 seeds) \$7.35

Early Choice Black Hybrid FN

68-70 days. A true black variety with flattened, round, 5 to 6 oz. eye-catching tomatoes that grow in clusters. Fruits have a combination of attractive maroon flesh and green gel. Flavor is delicious with the perfect acid to sugar balance. A definite attention-getter at roadside stands and in the garden. Vigorous plants produce heavy yields. Crack resistant. Tolerant to Tobacco Mosaic Virus. Indeterminate.
#00236. (A) pkt. (30 seeds) \$3.65

DEFIANT PHR

Early Girl Hybrid VFF 

57 days. It's hard to find tasty, full-sized fruits like this extra-early in the season! Meaty, ripe red fruits, 4 to 6 oz., are slightly flattened and bright crimson throughout. Very appealing, with firm texture and blemish-resistant skin. Heavy yields on hardy vines. Indeterminate.
#00240. (A) pkt. (30 seeds) \$6.25;

Then Try These Hefty Hybrids!

Husky Red Hybrid VFFA GLS

68 days. The unlimited production potential of an indeterminate and the controlled growth of a determinate combine for season-long production! Attractive fruits weigh 5 to 7 oz. Compact plants are only 4 to 4½ ft., with dark green, rugose foliage and strong, thick central stems. Ideal for small spaces, patios, planters and even larger pots. Dwarf indeterminate. **#00367. (A) pkt. (30 seeds) \$6.15**

Jet Star Hybrid VF

70 days. Prolific producer of big, globe-shaped fruits that ripen all the way through. Excellent flavor with low acidity. Nice, compact habit. Indeterminate. **#00392. (A) pkt. (30 seeds) \$4.75; (G) 250 seeds \$16.95**

Jetsetter Hybrid VFFNTA GLS

64 days. Earlier than Jet Star, with better disease resistance! Jetsetter sacrifices nothing for its early maturity – delivers real tomato flavor in large, 8 oz. fruits that are smooth, juicy, flattened globes. Consistent, huge yields and good disease resistance. Indeterminate. **#00395. (A) pkt. (30 seeds) \$4.45**

Jolene Hybrid VFF GLS FOR

73 days. Attractive, large to extra-large, 8 to 10 oz. fruits have deep, dark red flesh and an excellent flavor. Early maturing, globe-shaped, 3½ to 4" fruits are firm with a clean blossom end and uniformly smooth shoulders. In trials, it displayed outstanding performance in the southeast. A great fresh market variety. Intermediate resistance to Tomato Yellow Leaf Curl Virus. Determinate. **#00394. (A) pkt. (10 seeds) \$4.75**

La Roma III Hybrid VFA GLS

76 days. An excellent roma known for its vigor and uniformity. Bright red, meaty fruits are large, 5 to 8 oz. and full of flavor. Disease resistant plants are very vigorous and produce fruit abundantly throughout the growing season. The perfect variety for any home gardener who enjoys canning or making their own pastes and sauces. Intermediate resistance to Nematodes. Determinate. **#00422. (A) pkt. (30 seeds) \$6.65**

Lemon Boy Hybrid VFA GLS LM

72 days. Lemon yellow, not golden, in color. Highly adaptable plants yield large, deep oblate fruits averaging 6 to 7 oz. and about 3½" across. Mild-flavored. Out yields all other "golden" tomatoes available. Intermediate resistance to Nematodes. Indeterminate. **#00427. (A) pkt. (30 seeds) \$5.75; (G) 250 seeds \$23.95**

Lemon Boy Plus Hybrid VFFFA GLS FOR LM ToMV ToTV

75 days. Attractive 6 to 7 oz. fruits have a unique yellow color and a sweeter (with a higher Brix of 6.6), yet tangy flavor. PLUS it has intermediate resistance to Nematodes. Indeterminate. **#00430. (A) pkt. (15 seeds) \$4.75**

Medusa Hybrid

75 days. A cross between Damsel Hybrid (pg. 14) and Cherokee Purple (pg. 23). Large, purple fruits are juicy and acidic in flavor and have an heirloom appearance. Pick when shoulders are green and allow to ripen off the vine for the best taste and reduced cracking. Expect an occasional, irregular shaped fruit (see inset picture). High yielding. Intermediate resistance to Late Blight, Verticillium Wilt and Nematodes. Indeterminate. **#00463. (A) pkt. (10 seeds) \$8.95**

Mountain Man Hybrid FF TSWW

73 days. Large, beefsteak-type, 8½ oz., round fruits are deep red inside and out. Flavor is delicious with a good balance between sweetness and acidity. Strong plants have high yield potential and multiple harvests. Good for container gardening. Great for the Eastern U.S. Intermediate resistance to Nematodes. Determinate. **#00492. (A) pkt. (15 seeds) \$5.05**

Pink Girl Hybrid VFA GLS

76 days. Smooth, pinkish red, deep oblate fruits, with green shoulders, average 6 to 8 oz. each. Sweet, juicy and mild flavored fruits are low in acid. Perfect for home gardeners and farmers markets. Vigorous plants are heavy yielders. Resistant to cracking. Indeterminate. **#00556. (A) pkt. (30 seeds) \$5.75**

Purple Boy Hybrid VF FOR ToMV

65-70 days. A unique heirloom-type hybrid that offers something special to home gardens. Beautiful, purple, beefsteak-type fruits have the vigor and disease resistance package typically offered by a hybrid, combined with the rich, traditional flavor that's expected of heirlooms. Round, 6 to 7 oz. fruits are packed with sweet flavor and a gorgeous color that looks great when sliced. Strong plants are heavy yielders. Intermediate resistance to Nematodes. Semi-indeterminate. **#00587. (A) pkt. (10 seeds) \$5.25**

Rugby Hybrid VF ToMV

50-70 days. Attractive, pink, heart-shaped fruits are firm, smooth, glossy and grow in trusses of 4 to 5. Fruits weigh up to 7½ oz., have meaty flesh with a superb, well-balanced flavor and are high in beta-carotene. Excellent for canning. High yielding plants have great foliage cover to protect fruits. Intermediate resistance to Early Blight. Indeterminate. **#00642. (A) pkt. (15 seeds) \$4.95**

Tough Boy Gold Hybrid VFFN GLS ToMV

75-85 days. Early to extra early, deep yellow to orange, 7½ to 8 oz., deliciously sweet flavored fruits are uniform and firm. Plants have medium-sized leaves, short internodes and a better root system than similar varieties. Good setting ability under colder temperatures. A great fresh market variety that will be very appealing to home gardeners and at roadside stands. Resistant to Blossom End-Rot. Crack resistant. Indeterminate.
#00770. (A) pkt. (10 seeds) \$7.95

TASTI-LEE®

Tasti-Lee® Hybrid VFFF GLS

72-75 days. Higher lycopene – up to 40% more than other varieties – gives fruit a rich, healthy red color inside and out and boosts antioxidant activity. A true tomato flavor – great in salads, sandwiches, salsas and sauces. Determinate.
#00755. (A) pkt. (10 seeds) \$6.65

Ultimate Opener Hybrid VF

57 days. More often than not, early-ripening tomatoes are under-sized, have marginal flavor and color with way too many blemishes. This tomato, developed by the same breeder of Early Girl and Better Boy Hybrids, produces blemish-free fruits about 33% larger than Early Girl with marvelous flavor that's sweet and juicy. Strong, vigorous plants are capable of tremendous yields. Strong disease resistance. Indeterminate.
#00785. (A) pkt. (20 seeds) \$3.45; (D) 1/32 oz. \$7.95

Tasti-Lee® 2 Hybrid VFFF GLS

75 days. Customers who have become fans of Tasti-Lee®, which can be found in super markets, have come to love this improved variety. Extra firm, 6 to 9 oz. fruits are full of excellent flavor and have a good shelf life. High lycopene content provides tomatoes with rich red color inside and out. Plants provide good fruit cover and produce high yields. Widely adaptable. Determinate.
#00765. (A) pkt. (10 seeds) \$4.85

Small to Medium With Big, Bold Flavor!

Varieties on pages 20 & 21 typically grow fruits 2 to 5 oz.

TASTI-LEE® 2

Bellatrix Hybrid FFT LB ToMV

65-70 days. Bright red roma/paste-type tomatoes grow up to 3" long by 2¼" wide. Fruits ripen in a short period of time, allowing for a large harvest over the season. Excellent for sauces and salsas. Great for growing in containers. Determinate.
#00070. (A) pkt. (10 seeds) \$4.95

Health Kick Hybrid VFFA GLS

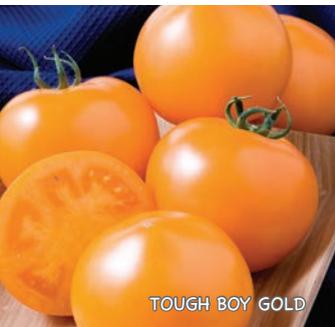

72 days. A perfect saladette variety – enjoy fine-flavored, fruits of the brightest red, thanks to 50% higher levels of lycopene. Juicy, plum-shaped fruits weigh about 4 oz. Healthy plants grow about 4 ft. tall, have good wilt resistance and intermediate resistance to TSWV and Bacterial Speck. High yielding. Determinate.
#00342. (A) pkt. (30 seeds) \$6.35; (G) 250 seeds \$29.95

Early Doll Hybrid

55 days. Every gardener needs a variety like this one! Early and packed with flavor, 4 to 5 oz., bright red, globe-shaped fruits are excellent for fresh use in salsas, salads or slicing. Determinate.

Heirloom Marriage™ Marziner Hybrid

70-75 days. A variety from the Heirloom Marriage Series on pg. 14. Meaty, 2 to 3 oz., bright red roma/paste fruits are great for salsas, canning and cooking. A cross of San Marzano and Cream Sausage. Bred for improved yields, earlier maturity, fewer blemishes and the same old-time flavor we've all come to love. Indeterminate.
#00171. (A) pkt. (15 seeds) \$5.25

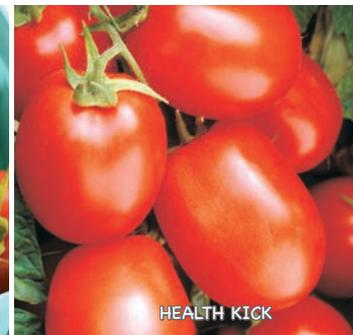

TOUGH BOY GOLD

Early Resilience Hybrid VFFA GLS LB

115 days. 2020 AAS Winner. An excellent variety for the home canner! Large, blocky 2" romas weigh up to 3½ oz. each and have uniform maturity. Great tasting fruits have a deep red, good quality flesh with the perfect balance of sugar to acid. Compact, bushy plants are perfect for containers. Excellent resistance to Blossom End-Rot, resulting in high yields and less fruit loss. Tolerant to Bacterial Canker of Tomato and Bacterial Spot. Determinate.
#00243. (A) pkt. (10 seeds) \$3.95

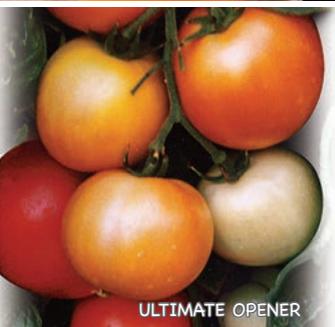

HEIRLOOM MARRIAGE™
MARZINERA

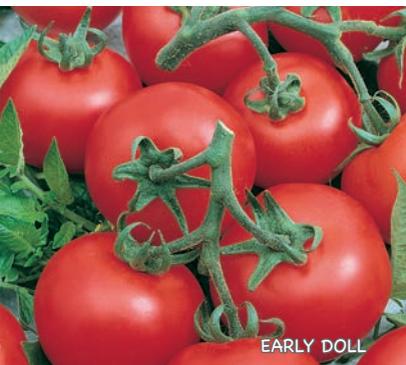

HEALTH KICK

Golden Rave Hybrid F ToMV

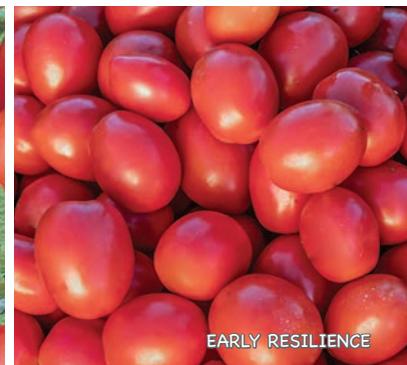

67 days. Beautiful, golden yellow fruits are just 2" long and weigh up to 2 oz. A romanita-type that will perform well in a wide range of climates. Sweet fruits have little to no cracking. If yellow tomatoes aren't your usual pick, try this variety – it will give you plenty to 'rave' about. Indeterminate.
#00318. (A) pkt. (15 seeds) \$8.35

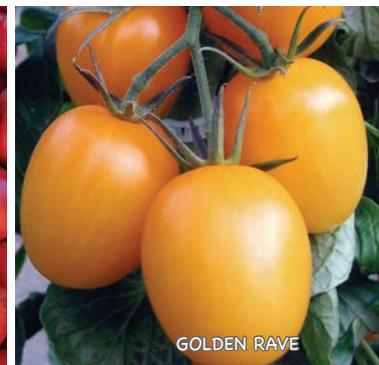

ULTIMATE OPENER

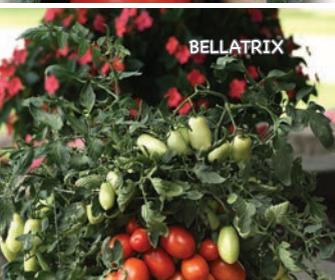

EARLY DOLL

EARLY RESILIENCE

GOLDEN RAVE

BELLATRIX

Invincible Hybrid VFF ToMV

65-70 days. Saladette-type tomatoes are blocky, elongated, very smooth and firm. Uniform fruits weigh up to 3½ oz. each, are deep red inside and out, and have a delicious flavor. Early maturing plants are vigorous, with a leafy habit that provides good cover to protect fruits. Excellent for hot areas and is a heavy yielder. Intermediate resistance to Tomato Yellow Leaf Curl Virus, Gray Leaf Spot, Late Blight and Bacterial Wilt. Determinate.
#00376. (A) pkt. (10 seeds) \$5.45

Little Napoli Hybrid VF

60-65 days. A sister variety to Little Bing on pg. 35. Bright red, pear shaped, 2 to 2½ oz., roma fruits are meaty and full of flavor. Harvest enough at one time for a batch of your favorite sauce or some delicious homemade salsa. Compact plants have a tidy habit and flourish in containers. Determinate.
#00441. (A) pkt. (15 seeds) \$5.05

Marzito Hybrid FNT LM ToMV

50-55 days. Elongated, mini marzano-type fruits grow up to 2¼" long by ¾" wide and resemble small romas, the staple variety used for canning for generations. Flesh has a firm texture and a sweet, rich flavor. This multi-purpose tomato is versatile and perfect for eating straight-from-the-vine, cooking or canning. Indeterminate.
#00458. (A) pkt. (10 seeds) \$6.75

Mountain Magic Hybrid VFF GLS

72-75 days. A variety from the Mountain Series on pg. 15. Heirloom qualities meet modern day disease resistance in a supersweet, salad tomato. Heavy producer of round, to deep round, 2 oz. fruits that grow in trusses, are uniformly red both inside and out and have a long shelf life. Features intermediate resistance to Late Blight which is a huge threat to tomatoes. Crack resistant. Indeterminate.
#00495. (A) pkt. (10 seeds) \$5.55

Large Open-Pollinated Tomatoes

Abraham Lincoln Original

87 days. Beautiful dark red fruits are sweet, solid and meaty. Fruits are smooth, free from cracks and seams, and although large, ripen all the way through. Ideal for ketchup, juice or slicing. Indeterminate.
#00014. (A) pkt. (20 seeds) \$3.25; (D) 1/32 oz. \$8.95

Amana Orange

90 days. Discovered by a gardener in Florida and named after a town he was fond of. Large, up to 5" in diameter, mild beef-steak fruits weigh up to 2 lbs. and are a distinctive orange color. Indeterminate.
#00026. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$9.95

Ananas Noire

85 days. Also known as Black Pineapple. Large, dark-purple fruits average up to 1½ lbs. and have a distinctive pink, red, green and yellow flesh. Green-shouldered fruits have a hearty flavor that's both sweet and rich, with smoky and acidic undertones. Makes a great tomato sauce! Regular leaf plants are large and sprawling, but earn their keep with heavy yields. Indeterminate.
#00031. (A) pkt. (30 seeds) \$3.85

Patio Hybrid FA GLS

70 days. Perfect for container gardening or limited space. Vines are extremely compact, yet produce medium-sized, deep oblate fruits that are smooth, firm and flavorful on plants with rugose leaves. Dwarf determinate.
#00536. (A) pkt. (30 seeds) \$5.95; (G) 250 seeds \$24.95

Plum Regal Hybrid VFF GLS

80 days. Another highly prized variety bred by Randy Gardener, Ph.D., who also developed the popular Mountain Series. Expect high yields of large, meaty, 3 to 4 oz., delicious fruits that are bright red inside and out. An excellent choice fresh and for sauces. Very small blossom end scars. Plants have heavy foliage cover to protect fruits from sunscald. Tolerant to Late Blight and cracking. Intermediate resistance to TSWV. Determinate.
#00573. (A) pkt. (10 seeds) \$5.15

Red Racer Hybrid VFFN GLS

57 days. 2018 AAS Winner. Cocktail size, 1½" tomatoes have a good sweet/acid balance, weigh 2 oz., are uniform in size and grow in clusters. Compact plants produce huge yields 7 to 10 days earlier than comparable varieties. Ideal for small space and container gardens. One judge summed up this winner saying "Red Racer is small in size but big in taste!". Also resistant to Tomato Mosaic Virus. Determinate.
#00605. (A) pkt. (10 seeds) \$5.65

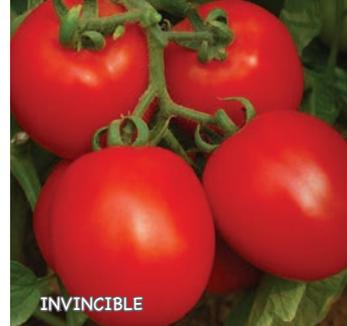

Totem Improved Hybrid

70 days. More fruit than foliage, compact and perfect for patios or window boxes. Just 18 to 30" tall, with small to medium, round, red, flavorful fruits produced in abundance – up to 10 lbs. per plant! Great for indoor gardens too, with its attractive dark green foliage. No staking is required. Determinate.
#00777. (A) pkt. (15 seeds) \$5.15

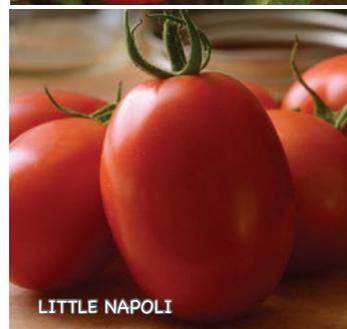

Varieties on pages 21-27 typically grow fruits 10 oz. and larger

Anna Russian

65-70 days. This luscious heirloom was reported to have been brought to Oregon by a Russian immigrant generations ago. Pinkish-red, heart-shaped fruits are large, early and juicy with outstanding flavor and weigh up to 1 lb. Wispy foliage on hardy vines. Indeterminate.

85 days. Large varieties from the Artisan Series (pg. 32). Very vigorous vines are relatively resistant to fungal leaf pathogens. Heavy yielders. Indeterminate.

Orange Jazz

Outstanding flavor with just a hint of fresh peach sweetness! Unique, orange beefsteak-type, 10 to 16 oz. fruits are brushed with yellow stripes. #00054.

Pink Jazz

Pink beefsteak-type with yellow/gold stripes. Ribbed fruits have a very sweet, rich flavor and often weigh 1 lb. or more. A great variety for specialty markets. Not prone to catfacing. #00039.

Prices, above 2, per variety:

(A) pkt. (20 seeds) \$4.35

Aunt Ruby's German Green

80 days. Heirloom beefsteak with a deliciously sweet flavor enhanced by a spicy undertone. Globe-shaped, 12 to 16 oz. fruits have light green, smooth skins at maturity and just a hint of yellow. Flesh is green blushed with pink, meaty and flavorful. Makes interesting juice! Intermediate resistance to Late Blight. Indeterminate.

#00043. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$8.95

Beefsteak

80 days. Large, flattened, solid, meaty, juicy, brilliantly red fruits are slightly ribbed and weigh up to 2 lbs. each. An excellent slicer, with a rich, sub-acid flavor. Indeterminate.

#00065. (A) pkt. (50 seeds) \$3.75; (F) 1/16 oz. \$8.95

Black From Tula

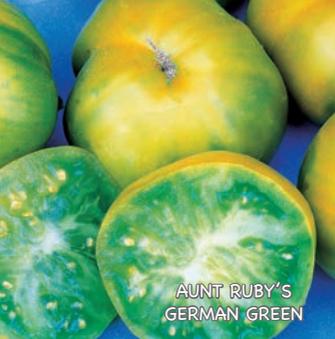

80-85 days. A robust Russian heirloom and one of the largest of the dramatic blacks. Slightly flattened fruits have dark, greenish-black shoulders on dark, brownish-red skins and grow 3 to 5" in diameter. Full-flavored, chocolate-brown flesh, with green gel is rich and satisfying. Performs well in dry conditions. Indeterminate.

#00094. (A) pkt. (30 seeds) \$3.55

Black Krim

69 days. A most unusual novel heirloom. Fruits, 8 to 12 oz., are a dark, deep red (almost a shiny black) with heavy green shoulders. Flesh is a deep, reddish-green color and has a sweet, tasty flavor. Intermediate resistance to Late Blight. Indeterminate.

#00095. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$7.95

Box Car Willie

80 days. This old-timer is a favorite main crop variety. Smooth, reddish-orange fruits average 10 to 16 oz. each. With an old-fashioned flavor you'll remember from childhood, these high-yielding, multi-use tomatoes will last throughout the season and are ideal for canning, freezing or for home-cooked meals. Crack resistant. Indeterminate.

#00103. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$7.95

BRANDYWINE SERIES

Brandywine Original

90-100 days. Heirloom dating back to the 1880's. Potato leaf plants produce good yields of extra-large, up to 1½ lbs., clear-skinned, light rosy-pink fruit. Considered one of the world's best-flavored tomatoes. Exhibits moderate resistance to Late Blight. Indeterminate. #00112.

Brandywine Black

90-100 days. A prolific yielder whose novel black, up to 1 lb. fruits are well-formed, oval-shaped and have real tomato taste. Potato leaf plants. Indeterminate. #00091.

Brandywine Orange

80 days. Some say this is the best pure orange beefsteak available. Potato leaf plants produce enormous yields of meaty, 1 lb. fruits that have a superb flavor and a nice smooth texture. Enjoy fresh, in salads, salsas and more. Indeterminate. #00109.

Brandywine Red

90-100 days. Pennsylvania Amish heirloom dating to 1885. Delicious, scarlet-red fruits weigh up to 2 lbs. Regular leaved plants. Indeterminate. #00600.

Brandywine Yellow

90-100 days. Prolific yields of golden-yellow, flattened, semi-irregular, up to 2 lb. fruits. Potato leaf. Indeterminate. #00830.

Prices, above 5, per variety:

(A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$7.95

#00875(X). Get 1 packet each of all 5 Brandywines for just \$12.95. Save 20%!

DID YOU KNOW... Blossom End-Rot is one of the most common tomato problems! It's a disorder that can be avoided by choosing resistant varieties, consistent watering and fertilizing with low nitrogen & calcium rich tomato specific food. Try Neptune Harvest Tomato & Veg Formula 2-4-2 on pg. 64.

Carbon

80 days. Rich, complex flavors made this variety the winner of heirloom tomato taste tests at Cornell University. One of the darkest black tomatoes we offer. Produces large, 10 to 12 oz. crack resistant fruits – similar to Cherokee Purple. Excellent for salads and sandwiches. Indeterminate.

#00155. (A) pkt. (30 seeds) \$3.75

Caspian Pink

80 days. The first tomato to beat Brandywine in taste tests! We all love Brandywine, generally considered to be the world's finest flavored tomato, but in California trials, heirloom Caspian Pink beat Brandywine for several years! Originally grown in Russia in the area between the Caspian and Black Seas. Fruits average 12 oz. Indeterminate.

#00170. (A) pkt. (10 seeds) \$3.15

Cherokee Purple

80-90 days. A reliable producer of unusual, medium pink-purple fruits that appear brown in color and average 10 to 12 oz. each. Fruits are round to oblate with no cracking. Tolerant to mild drought. Indeterminate.

#00188. (A) pkt. (30 seeds) \$3.85; (D) 1/32 oz. \$9.95

Climbing Trip-L-Crop (Italian Tree)

85 days. Enormous yielder – can produce up to 2 to 3 bushels! Red, meaty fruits measure up to 6" across and are great for canning. Vigorous, potato leaf vines grow up to 25 ft. and should be trellised. Indeterminate.

#00380. (A) pkt. (30 seeds) \$3.85; (F) 1/16 oz. \$7.95

Comstock Sauce and Slice

80-85 days. An Italian variety originally introduced in the early 1980's. Beautiful, meaty, deep red, roma-shaped fruits weigh up to 1 lb. and have very few seeds. A dual-purpose variety excellent for canning, pastes, sauces and fresh eating. Indeterminate.

#00202. (A) pkt. (30 seeds) \$3.95

DID YOU KNOW... Cracking on tomatoes is a disorder that can be avoided? Just like Blossom End Rot, cracking is mainly caused by rapid water absorption by plants. To avoid this, plant crack resistant varieties, mulch well, water consistently at ground level, keep plants appropriately fertilized and don't let soil go from very dry to very wet.

Cuore de Toro (Bull's Heart)

89 days. This Italian heirloom, a huge pink Oxheart-type, weighs in at a gigantic 2 lbs. or more! Abundant 4" fruits on vigorous plants are a colorful pinkish-red with a wonderful sweet flavor. Indeterminate.

#00209. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$9.95

Delicious

77 days. An excellent slicer. Most fruits weigh over 1 lb. – many 2 to 3 lbs. and even held the Guinness World Record of 7+ lbs. for a single fruit for 28 years! Plants produce smooth fruits that seldom crack, with small cavities, nearly solid meat and excellent flavor. Developed from Beefsteak after years of careful selection. Indeterminate.

#00131. (A) pkt. (30 seeds) \$3.15; (F) 1/16 oz. \$8.95

Dester

80 days. This German heirloom has won numerous taste test competitions! Large, 1 to 2 lb., pink beefsteak fruits with rich, sweet flavor are excellent for eating fresh or canning and is a great one slicer. Gardeners will love this heavy yielding variety. Indeterminate.

#00217. (A) pkt. (30 seeds) \$3.35

Dinner Plate

90-100 days. Large, red fruits averaging 1½ to 2 lbs. each are radially flattened and heart-shaped. Fine quality flesh has excellent flavor. Indeterminate.

#00216. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

Dixie Golden Giant

85-100 days. An unusual heirloom, grown by the Amish since the 1930's. Huge, golden-yellow, beefsteak tomatoes have few seeds and a delicious, fruity flavor. Fruits weigh 1 to 2 lbs., mature earlier than similar varieties and may feature a pink blush on the blossom end. Very vigorous vines. Indeterminate.

#00219. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$7.95

Dr. Wyche's Yellow

80 days. Don't be fooled by the light-yellow color – there's nothing pale about the flavor of this rich-tasting beefsteak! Slightly flattened fruits weigh up to 1 lb. and have meaty flesh that is almost porous. Blemish free fruits mature to golden-orange. Indeterminate.

#00227. (A) pkt. (30 seeds) \$3.55

Georgia Streak

90 days. Lovely bicolor fruits are rich gold, blushed with a delicate pink. As if that wasn't enough, the real surprise is inside – the firm flesh is streaked with red! Large, globe-shaped fruits weigh 1 to 2 lbs. and have a sweet, yet hearty flavor. Indeterminate.

#00280. (A) pkt. (30 seeds) \$3.75

GERMAN HEAD

German Head

80-90 days. An old-time favorite with large, beefsteak-type, dark pink, crack-free fruits that have a delicious flavor and weigh 1 to 2 lbs. A nice fresh market variety. Excellent yield. Indeterminate.

#00283. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$9.95

GERMAN JOHNSON PINK

German Johnson Pink

80 days. A potato leaf version of the heirloom German Johnson. Vigorous vines produce mildly-flavored, meaty, rough, 12 to 24 oz. fruits with pink skins, yellow shoulders and low acid flavor. May contain a small percentage of regular leaf plants. Highly rated for flavor and yield. Indeterminate.

#00289. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$7.95

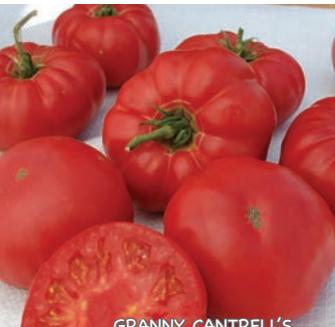

GIANT BELGIUM

Giant Belgium

82-90 days. One of our most popular heirlooms. Huge, sweet fruits average 1 to 2 lbs. and have weighed in at nearly 5 lbs.! Dark pink fruits have smooth blossom ends and a low acid, mild flavor, so sweet that some growers use them to make wine. Solid meat and size means one slice per sandwich! Indeterminate.

#00299. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

GRANNY CANTRELL'S

Granny Cantrell's

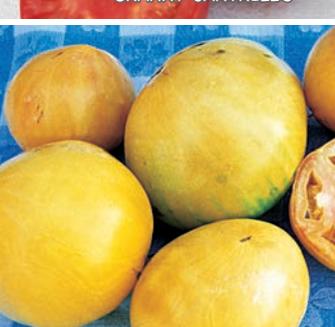

85 days. Original seeds were given to Lettie Cantrell from a World War II soldier returning home from Germany. Beefsteak-type, pink, meaty fruits are slightly flattened and can weigh up to 2 lbs. Delicious, sweet flavor is great for fresh eating, cooking and canning. The perfect one-slicer for sandwiches and burgers. Won a Best of Taste award in 2006. Heavy yields. Indeterminate.

#00327. (A) pkt. (30 seeds) \$3.75

Great White

80 days. A magnificent, almost perfect, 14 to 16 oz. white tomato with low acidity and few seeds. Good drought and crack tolerance. Fruits are protected under vigorous, heavy foliage. Indeterminate.

#00323. (A) pkt. (30 seeds) \$3.35; (D) 1/32 oz. \$8.95

GREAT WHITE

Henderson's Pink Ponderosa

80 days. First introduced in 1891 by Peter Henderson & Company who claimed it to be their most popular tomato ever and still remains a home gardener's favorite today! Extra large, pink, beefsteak-type fruits weigh one pound or more – some often weighing as much as 2 lbs.! Rich and meaty flesh is thick and delicious. Great for slicing and canning. Indeterminate.

#00358. (A) pkt. (30 seeds) \$3.25

HENDERSON'S PINK PONDEROSA

MISSOURI PINK LOVE APPLE

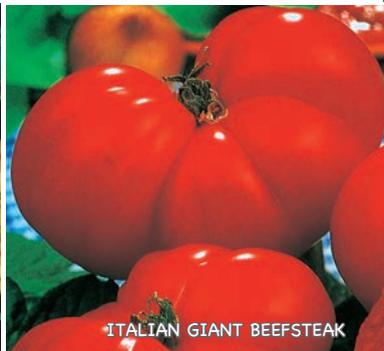

LILLIAN'S YELLOW HEIRLOOM

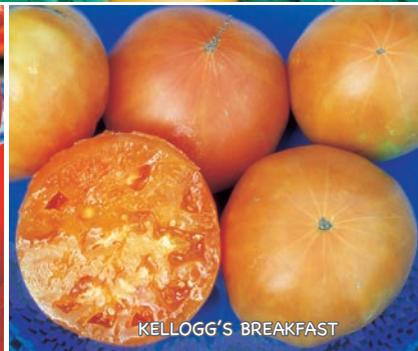

KENTUCKY BEEFSTEAK

HILLBILLY

ITALIAN GIANT BEEFSTEAK

KELLOGG'S BREAKFAST

Hillbilly

85 days. This heirloom hails from the hills of West Virginia, where they know a superb tomato when they see one! Huge, mildly-flavored, beefsteak-type fruits weigh 1 to 2 lbs. each, are low in acid and a most unusual orange-yellow, streaked and mottled in shades of red and pink. Regular potato leaf variety. Indeterminate.

#00347. (A) pkt. (30 seeds) \$3.75; (F) 1/16 oz. \$9.95

Italian Giant Beefsteak

83-85 days. This blockbuster of a beefsteak was brought over from Italy in the early 1900's and still rules the garden for sheer size, with some fruits growing larger than two fists! Deep red, flattened fruits average 1 lb. and are 4" in diameter – meaty and delicious, yield after impressive yield. Indeterminate.

#00373. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$9.95

Kellogg's Breakfast

80-85 days. Lovely, pale-orange fruits are solid and meaty throughout, packed with mild, superb tasting flesh. A long-season producer of large, beefsteak-type fruits, up to 1 lb. with solid centers that have just a few seeds at the edges. Very desirable! Indeterminate.

#00415. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

Kentucky Beefsteak

115 days. An old heirloom from the hills of its namesake, eastern Kentucky. Like most beefsteaks, the fruits are enormous, often weighing as much as 2 lbs. and lack much of the roughness usually associated with heirloom beefsteak-types. Fruits are actually quite attractive – globe to oval-shaped and a beautiful deep orange in color. Indeterminate.

#00418. (A) pkt. (30 seeds) \$3.25; (F) 1/16 oz. \$7.95

Lillian's Yellow Heirloom

95-98 days. Magnificent clear-yellow, globe-shaped, beefsteak-type fruits weigh up to 1 lb. each. Mild flesh is so rich in flavor, it actually has a creamy taste on the tongue. Vigorous, potato-leaved plants are unique in such a large-fruited, yellow variety and provide cover for heavy yields. Local heirloom from Manchester, Tennessee. Indeterminate.

#00436. (A) pkt. (30 seeds) \$3.35

Missouri Pink Love Apple

75-85 days. This heirloom was grown in the late 1800's by Grandpa Barnes who grew it as an ornamental, believing (as many people did at the time) that tomatoes or "love apples" were poisonous. Big, pink, beefsteak-type, 3" fruits are slightly sweet with a juicy, meaty texture. Potato-leaved plants are heavy yielders. Indeterminate.

#00476. (A) pkt. (30 seeds) \$3.45

Heirlooms... All-Around Goodness!

Mortgage Lifter

75-85 days. Also called Radiator Charlie. Long-time favorite with good yields of very large, 1 to 2 lb., smooth, pink-skinned fruits, even in droughts. Very meaty fruits with few seeds, much like Giant Belgium (pg. 24), but not quite as large. Very mild, delectable, sweet flavor. Indeterminate.
#00481. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

Mr. Stripey

80 days. Red and yellow-striped heirloom variety that adds color to any gourmet salad bar. Large, ridge-shouldered fruits weigh up to 2 lbs., are mildly-flavored and low in acid. Indeterminate.
#00506. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$7.95

Mrs. Maxwell's Big Italian

80 days. Given seed by a friend from Italy, Mrs. Maxwell grew and saved them year after year selecting the largest, earliest and most crack resistant – the results are this heirloom beauty! Vigorous potato-leaved plants produce 1 to 2 lb., dark pink beefsteak fruits with incredible flavor. Excellent for using fresh or for canning. Indeterminate.
#00505. (A) pkt. (20 seeds) \$3.95

Mushroom Basket

75 days. Eye-catching beauties, these 8 to 16 oz. watermelon-pink tomatoes will grab lots of attention in the garden. Uniquely pleated fruits are firm, have few seeds and a deliciously sweet flavor. No matter how you slice it, it's terrific in any dish. Heavy yielder. Indeterminate.
#00504. (A) pkt. (30 seeds) \$3.75

Old German

75 days. An heirloom originally grown by the Mennonite community of Virginia and one of the best-ever varieties for slicing. Huge fruits have an unusual boat shape, are red and yellow throughout and weigh 1½ to 2 lbs. each. Indeterminate.
#00519. (A) pkt. (30 seeds) \$3.75

Omar's Lebanese

80 days. Monster tomatoes, 1 to 2 lbs., from a Lebanese hill town – luscious and incredible! Delicious, 5" pink fruits are huge, meaty and somewhat irregularly shaped, rich, sweet and juicy. A favorite of American tomato aficionados because of its excellent yield and superb flavor. High yielder. Indeterminate.
#00524. (A) pkt. (30 seeds) \$3.45

Oma's Orange

75-80 days. Large, beefsteak-type tomatoes weigh 8 to 16 oz. and grow approx. 3 to 4½" wide. Juicy fruits have delicious, dark orange flesh with the perfect balance of sweetness and acidity. Plants grow 5 to 6 ft. tall and bear fruit singly or in clusters of up to 3. Betty Moore of Stow, OH, has grown and saved the seeds since 1983, when she received them from her mother, Oma Rachel Lively Miller, who was given the variety from a relative in the 1930's when she married. Indeterminate.
#00520. (A) pkt. (30 seeds) \$3.55

Orange Strawberry

80 days. Lovely, heart-shaped fruits have pointed tips and are almost blemish-free. Strong, sweet taste in juicy fruits that are a vibrant, deep orange when mature and average 8 oz. to 1 lb. Don't be fooled by the wispy leaves – plants are very vigorous and high yielding. Indeterminate.
#00529. (A) pkt. (30 seeds) \$3.45

Oxheart, Giant

90 days. This giant produces large, 12 oz. to 2 lbs., firm, meaty, heart-shaped, pink fruits with thick walls, few seeds and a mild flavor. Vigorous vines produce high yields of fruits that mature late but are well worth the wait! Indeterminate.
#00300. (A) pkt. (30 seeds) \$3.75; (F) 1/16 oz. \$7.95

Oxheart, Orange

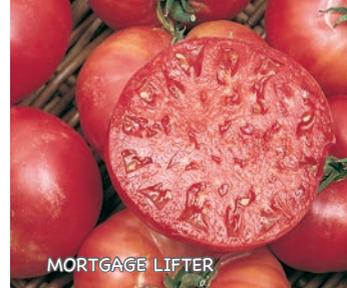

80 days. Strong vines yield numerous large, 3", vibrant golden orange, heart-shaped, 10 to 12 oz. fruits. Meaty, with a delicious, well-balanced flavor and tremendous eye appeal. Indeterminate.
#00527. (A) pkt. (30 seeds) \$3.95

Paul Robeson

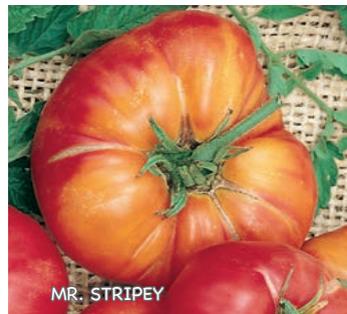

80-90 days. A Russian heirloom that continues to be a favorite in taste test competitions! Brick red, 8 to 12 oz. fruits have dark green shoulders and red flesh. Flavor is exceptional with a nice balance of sweetness and acidity. Named in honor of Paul Robeson, the famous actor and singer. Indeterminate.
#00540. (A) pkt. (30 seeds) \$3.95

Genuine Classic Flavor ...

Persimmon

80 days. Great flavor and eye appeal! Large, plump, golden-orange fruits average 1 to 2 lbs., have few seeds and are meaty, with a delicious flavor. Vigorous plants produce good yields. Indeterminate.
#00542. (A) pkt. (30 seeds) \$3.35; (D) 1/32 oz. \$8.95

Pineapple

85-90 days. Enormous, uniquely-patterned, striped fruits will be the center of attention. Beefsteak-type fruits easily grow 5" and larger, are orange-yellow with red streaks inside and out and no green shoulders. Meaty flesh has a nice mild flavor. Heavy-foliaged plants produce good yields. Indeterminate.
#00553. (A) pkt. (30 seeds) \$3.75; (G) 250 seeds \$7.95

Ponderosa Pink

80 days. Extra-large, up to 1 lb., beefsteak-type fruits are like Ponderosa Red, but rosy-pink. Almost seedless, with low acidity and meaty flesh. Indeterminate.
#00577. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$9.95

Ponderosa Red

80 days. This old-time favorite is an extra-large, up to 1 lb., beefsteak-type with mild flavor. Almost seedless, with low acid, solid, meaty, deep red flesh. Vigorous vines produce heavily. Indeterminate.
#00580. (A) pkt. (50 seeds) \$3.35

Pruden's Purple

75 days. Large, 10 oz. to 1 lb., dark pink, nearly purple fruits mature quite early, with the delicious flavor and good production that heirlooms are known for. Potato-leaved vines. Indeterminate.
#00592. (A) pkt. (30 seeds) \$3.95

Rainbow (Big Rainbow)

80-85 days. Very large, orange fruits, with red spots or streaks, grow up to 4½" in diameter and weigh up to 2 lbs. Firm, meaty flesh with low acidity, has a delicious flavor and is ideal in a variety of dishes or eaten plain. Indeterminate.
#00595. (A) pkt. (30 seeds) \$3.55; (D) 1/32 oz. \$7.95

Rainbow Beefsteak Blend

77-115 days. This eye-catching mix of colorful tomatoes has continued to impress our customers the same, if not more, as our Gourmet Rainbow Pepper Blend (pg. 42). Blend contains a full spectrum of pink, red, yellow, green, black and orange varieties ranging from 12 oz. to 3 lbs. Indeterminate.
#00596. (A) pkt. (30 seeds) \$3.35; (D) 1/32 oz. \$7.95

Rose

75-80 days. An Amish heirloom from Pennsylvania. Large, crack resistant, 10 oz. fruits are meaty and dusty rose colored. Flavor is excellent, and is considered by some to rival Brandywine (pg. 22). Plants are vigorous and strong with good leaf cover. Indeterminate.
#00620. (A) pkt. (20 seeds) \$3.25

Soldacki

75 days. Poland sends us this heirloom variety, memorable for its low acid and intensely sweet flavor. Dark pink fruits, flattened in shape, weigh about 1 lb. and are packed with firm flesh inside thin skins. Indeterminate.
#00663. (A) pkt. (30 seeds) \$3.45

Spark's Yellow

80-90 days. Very attractive, large, 3", blemish-free, beefsteak-type tomatoes can grow up to approx. 1 lb. each! Juicy fruits are round, golden yellow/orange and full of delicious flavor. Perfect for pastes, sauces, slicing and canning. Potato leaf plants produce good yields. Indeterminate.
#00671. (A) pkt. (30 seeds) \$3.95

Striped German

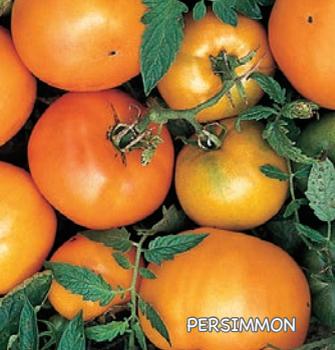

80 days. Considered by many to be one of the most popular bicolored beefsteak tomatoes ever grown! Large 12 to 16 oz. fruits – some weighing in at almost 2 lbs.! – are slightly ribbed and yellow with red marbling inside and out. Meaty fruits have a complex tropical flavor and an excellent smooth texture. A delicious beauty when sliced and also makes a great canning tomato. Heavy yielder. Indeterminate.
#00672. (A) pkt. (30 seeds) \$3.75

Tasmanian Chocolate

70 days. A unique dwarf variety. Large, 8 to 12 oz., beefsteak-type fruits ripen to a beautiful mahogany red. Full of delicious, balanced flavor and perfect for eating fresh or cooked. A cross between New Big Dwarf and Paul Robeson. Great for small spaces and containers. Sturdy, 2 to 3 ft. plants have dark green rugose foliage. Dwarf determinate.
#00752. (A) pkt. (15 seeds) \$3.85

Tasty Pink Beefsteak

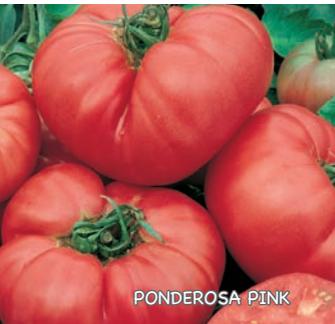

75 days. Delicious, dark pink fruits are meaty with a mild, but tasty, classic fresh tomato flavor. Fruits average 16 to 20 oz. but can weigh up to 3 lbs. and have thin skins. Vigorous potato leaf plants produce heavy yields. Indeterminate.

With Timeless Appeal!

Virginia Sweets

80 days. This bicolored heirloom has become one of our most popular varieties. Enormous 1 lb. dark yellow, beefsteak-type fruits, with red stripes are stunningly beautiful. Full of rich, super sweet flavor with just the right amount of acid. Perfect for salads, slicing and cooking. Heavy yields. Indeterminate. **#00801. (A) pkt. (30 seeds) \$3.85**

Watermelon Beefsteak

75 days. An heirloom from the 1800's, with good, old-fashioned flavored fruits weighing 2 lbs. or more. Pink-skinned and very mild with purplish-red flesh. Indeterminate. **#00803. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.95**

WILD BOAR SERIES

An introduction from Brad Gates, a small organic farmer, tomato breeder and grower of heirlooms since 2000. Mr. Gates, owner of Wild Boar Farms, has bred numerous tomatoes, hand picking his varieties based on flavor from over 1,000 heirlooms, crosses and hybrids. His main focus is on bicolor and striped fruits with extreme flavor and fascinating looks. Performs exceptionally well for home and market gardeners – even in areas with challenging climates. Several varieties were featured in the July/August 2013 issue of Martha Stewart Living magazine. These are sure to be some of the prettiest, tastiest and most unique tomatoes you'll ever grow and eat! Indeterminate.

See Mint Julep on p. 39.

Beauty King

75-90 days. Possibly one of the best looking and tasting, red and yellow bicolor tomatoes you'll ever try! Very sweet fruits can grow up to 20 oz. each and have meaty, yellow flesh with bright red streaks. A cross between Big Rainbow and Green Zebra. **#00820.**

Large Barred Boar

65-75 days. Unique, pinkish brown tomatoes with metallic green stripes, weigh 8 to 12 oz. Flattened beefsteak fruits are very meaty and extremely flavorful. **#00809.**

Pineapple Pig

75 days. Large, creamy-yellow striped with a rose blush. Meaty, bicolor fruits grow up to 1 lb. each and are low in acid with sweet flavor. You might try it for the name, but the flavor will keep you coming back. **#00817.**

Prices, above 5, per variety: (A) pkt. (30 seeds) \$4.45

Wins All

80 days. An offspring of Ponderosa Pink (pg. 26), developed by a breeder in the 1920's for improved consistency and flavor. Produces moderate to high yields of blemish-free, 1 lb. fruits that are pink, round and juicy. The flavor is complex and rewarding – sweet and tangy, but never overwhelming. Robust potato-leaved plants, with heavy cover, resist foliage diseases and Blossom End-Rot. Indeterminate. **#00825. (A) pkt. (30 seeds) \$3.75**

Wherokowhai

75 days. Also known as Lucky Cross Dwarf. A unique dwarf variety that produces large, 8 to 12 oz. beefsteak-type fruits with an excellent sweet flavor. Sturdy plants, with dark green rugose foliage, grow just 2 to 3 ft. tall and are loaded with fruit. Great for small spaces and container gardening. Wherokowhai means red/yellow in the native New Zealand language and is pronounced fer-dow-co-fi. Developed by the Dwarf Tomato Project. Dwarf Indeterminate. **#00429. (A) pkt. (20 seeds) \$3.95**

Pink Berkeley Tie-Dye

65-75 days. Large beefsteak fruits are the color of port wine with metallic green stripes and weigh 8 to 12 oz. Its excellent sweet flavor was put to the test against Cherokee Purple in farmers markets taste tests and was preferred every time. **#00811.**

Solar Flare

75 days. Strikingly gorgeous red fruits are 6 to 10 oz. beefsteaks with gold stripes. Luscious and meaty with a slightly sweet full tomato flavor. Good Scab resistance. **#00814.**

Yellow Giant Belgium (Goldie)

85-95 days. Since the early 1800's, this heirloom has been widely grown for its vigorous vines that produce loads of giant, slightly flattened, golden globes with a mild flavor. Tasty, non-acidic fruits are highlighted by smooth blossom ends. Indeterminate. **#00836. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$6.95**

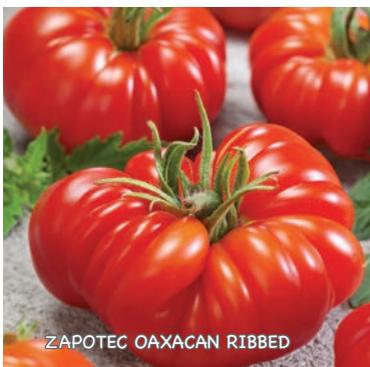

Zapotec Oaxacan Ribbed

80-90 days. 2023's Free Trial. Dates back to the Zapotec Indians of Oaxaca, Mexico. Large, deeply ribbed, pink/red fruits grow up to 4" in diameter, have a yellow blush and weigh up to 1 lb. Fruits are somewhat hollow, have sturdy walls and a mild, sweet flavor. Ideal for stuffing, baking and grilling. Indeterminate. **#00847. (A) pkt. (30 seeds) \$3.55**

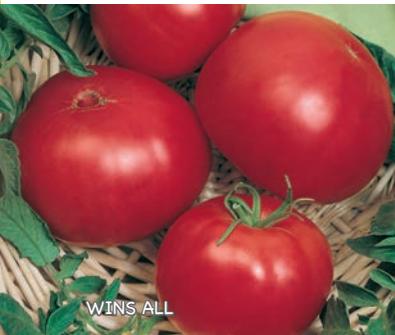

DID YOU KNOW... Tomato pollen becomes sterile in high temperatures, making fruit set difficult to impossible? When growing tomatoes in warm temperatures, try using Tomato & Blossom Set Spray (pg. 64) with all-natural plant hormones to overcome the plant's resistance to fruit formation.

Medium To Large Favorites

Varieties on pages 28-30 typically grow fruits 6 to 10 oz.

Amish Paste 
74 days. Dates back to the turn of the century and is one of the most popular for sauces and canning. Deep red fruits, about 8 oz., are large for canning types with real tomato flavor. Not overly acidic. Indeterminate.
#00029. (A) pkt. (30 seeds) \$3.35; (G) 250 seeds \$8.95

Arkansas Traveler

90 days. Bred at the University of Arkansas by Joe McFerran as an updated version of this region's famously high quality pink tomatoes. Fruits are rough, medium-sized, about 6 oz., with an excellent, creamy, mild flavor. Highly adaptable. Indeterminate.
#00040. (A) pkt. (30 seeds) \$3.25; (F) 1/16 oz. \$7.95

Bonny Best

72 days. An old-time favorite producing 8 to 10 oz. globed-shaped fruits that are solid and meaty. Highly adaptable and performs especially well in the North. Indeterminate.
#00100. (A) pkt. (50 seeds) \$3.45

Bush Beefsteak

62 days. The perfect sandwich-sized fruit! Solid-fleshed fruits are a deep, rich red and average 8 oz. Vigorous, bushy plants are high yielders. Determinate.
#00145. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$9.95

Campbell's 33 FA

69 days. Produces medium-early, 7 oz. fruits that are oblate, bright red, with green shoulders and good interior color. Sets fruit well under unfavorable conditions, with tolerance to cracking and good disease resistance. Determinate.
#00150. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$7.95

Cherokee Green

72 days. A selection from the popular heirloom Cherokee Purple (pg. 23) and possibly one of the best green tomatoes ever! Medium-sized, green fruits weigh 8 oz. or more and show some yellowish-orange color on the blossom end when ripe. Flesh is full of bold, acidic, complex tomato flavor that green varieties are known for. Bred and selected by Craig LeHoullie. Indeterminate.
#00159. (A) pkt. (30 seeds) \$3.55

Costoluto Genovese

90 days. An excellent performer in both gardens and greenhouses. Plants are vigorous and produce ribbed, firm, fleshy fruits that weigh up to 7 oz. each and have a deliciously sweet flavor. Indeterminate. **#00203. (A) pkt. (30 seeds) \$3.85; (D) 1/32 oz. \$9.95**

Get Stuffed!

75 days. Shaped like bell peppers, completely hollow and possibly the boldest striped, stuffing tomato available. Fruits average 5 to 7 oz. and have a delicious classic tomato flavor. Good yields. Tolerant to Powdery Mildew. Indeterminate.
#00294. (A) pkt. (30 seeds) \$3.85

Golden Jubilee

72 days. 1943 AAS Winner. Mild flavor and low acidity makes this one of the best varieties for tomato juice. Bright, golden-orange fruits, 2½ to 3" in diameter, average 6 to 7 oz. each and have meaty, thick walls. Fruits are solid, with few seeds. Medium-sized plants need staking and produce high yields, making them ideal for home gardens and fresh markets. Indeterminate.
#00316. (A) pkt. (50 seeds) \$3.75; (F) 1/16 oz. \$6.95

Heinz 1370 FA GLS

75-77 days. Smooth, round, 4 to 6 oz. globes have meaty flesh. Excellent for fresh markets, as well as making ketchup, purées and sauces, as its name suggests! Fruits resist cracking and plants feature good foliage cover. Good disease resistance. Determinate.
#00344. (A) pkt. (50 seeds) \$3.25

Homestead F

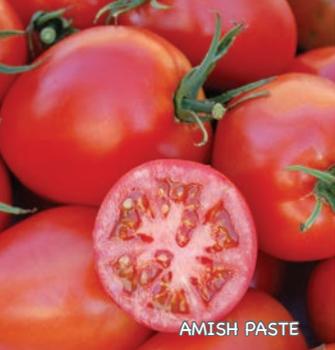

80 days. Highly adaptable, especially in hot conditions. Fruits are medium-large, very smooth, red, meaty and flavorful, averaging about 8 oz. each. Determinate.
#00350. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$9.95

Horizon

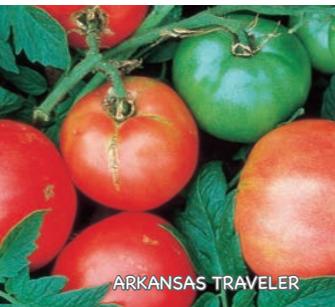

75 days. Heirloom beefsteak-type, 9 to 10 oz. fruits are thick, meaty, juicy and deliciously sweet. Plants are very leafy and produce huge, 4 to 6", red, smooth, slightly heart-shaped, sometimes oblate fruits. Indeterminate.
#00359. (A) pkt. (30 seeds) \$3.35

Indigo™ Blue Beauty

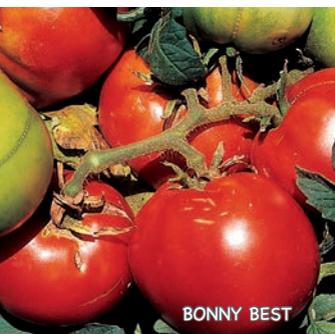

80 days. A variety from the Indigo Series on pg. 30. A cross between Beauty King and a blue variety. Meaty, pink, 4 to 8 oz., beefsteak fruits, with lovely dark, blue-black shoulders. Holds well on the vine for extended periods. Sunburn and crack resistant. Very good flavor. Indeterminate.
#00366. (A) pkt. (20 seeds) \$4.75

See Tomato Disease Code Key on page 9

Manitoba VF

58 days. An extremely early variety developed by the Morden Experiment Farm in Manitoba for southern Canadian prairies. Fruits are bright red, slightly flattened, good-flavored and weigh about 6 oz. each. Particularly well-suited for extreme northern areas of Montana, Dakotas, Minnesota, Wisconsin, Michigan and New England. Easily grown in a small area. Determinate.

#00448. (A) pkt. (30 seeds) \$3.35

Marglobe Improved VF

72 days. This highly adaptable, tasty old favorite produces high yields of globe-shaped fruits on strong vines. Medium-sized, 5 to 8 oz. fruits are uniform, very sweet and thick-walled. Determinate.

#00450. (A) pkt. (50 seeds) \$3.45; (F) 1/16 oz. \$5.95

Marion FF GLS

78 days. An early Rutgers-type heirloom featuring good disease resistance. Medium-large, smooth, 6 oz., deep red globes, with small blossom end scars. Plants have strong vines and provide good cover to protect fruits. High yielding. Especially adapted to the Southeast. Crack resistant. Indeterminate.

#00453. (A) pkt. (50 seeds) \$3.45

New Yorker V

66 days. One of our earliest standard varieties produces high yields of smooth, meaty, 4 to 6 oz., scarlet globes with the perfect sugar/acid ratio – perfect for canning. Bush beefsteak-type plants set fruit in cool, short-season conditions. Crack and Blossom End-Rot tolerant. Determinate.

#00515. (A) pkt. (50 seeds) \$3.55

Old Brooks

75-85 days. Smooth, blemish-free fruits are known for their superior resistance to Blossom End-Rot. Gourmet quality flesh, with a fine, even texture. The taste is somewhat acidic, which proves to be an asset in home canning. Good all-around variety. Intermediate resistance to both Early and Late Blight. Indeterminate.

#00518. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$8.95

Opalka

85 days. Richer and more flavorful than most paste tomatoes. Long, pepper-shaped fruits, approx. 4 to 6" long, grow in clusters of 2 to 5. So sweet and refreshing, and can be eaten straight off the vine, but is highly prized for sauces and canning. Indeterminate.

#00526. (A) pkt. (30 seeds) \$3.35; (D) 1/32 oz. \$7.95

Purple Russian

80 days. Also known as Ukrainian Purple. Original stock of this variety came from Irma Henkel in the Ukraine. Meaty, plum-shaped, 6 oz. purplish-black, smooth skinned fruits are 3 to 4" long. Sweet and flavorful – great for salsas, sauces or straight-from-the-vine. High yielding. Crack resistant. Indeterminate.

#00591. (A) pkt. (30 seeds) \$3.85

Rutgers VF

75 days. A popular all-purpose variety that is ideal for canning. Bright red fruits, with heavy walls, average about 7 oz. and ripen evenly from the inside out. An attractive, old-time favorite with full-bodied flavor. Disease resistant. Determinate.

#00624. (A) pkt. (50 seeds) \$3.15; (F) 1/16 oz. \$5.95

Sausage

75 days. Fruits, up to 6" long, resemble huge, red banana peppers. A prolific paste tomato with very fine-flavored meat that is especially ideal for ketchup or sauces. Indeterminate.

#00639. (A) pkt. (30 seeds) \$3.45

Sheboygan

80 days. Lithuanian immigrants in Wisconsin are credited with introducing this pink, paste-type heirloom in the early 1900's. Full-flavored fruits average 4 to 6 oz. and are 4" in diameter, with meaty flesh and plenty of juice, making this one of the best varieties for canning. Heavy yields. Indeterminate.

#00644. (A) pkt. (20 seeds) \$3.35

Striped Stuffer

85 days. Bell pepper shaped fruits are completely hollow and easy to stuff. Showy, 5 to 7 oz. red fruits have golden-orange stripes and a classic tomato taste. A good yielder and highly resistant to Powdery Mildew. Indeterminate.

#00677. (A) pkt. (30 seeds) \$3.45

Super Sioux

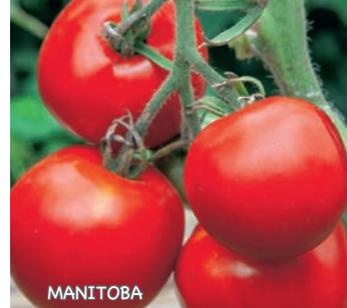

70 days. An excellent variety for areas with hot summer temperatures, since it sets fruit well in spite of the heat and dry conditions. Thick-walled, crack-free, 4 to 6 oz. red globes have an acidic flavor. Perfect for canning. Semi-determinate.

#00726. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

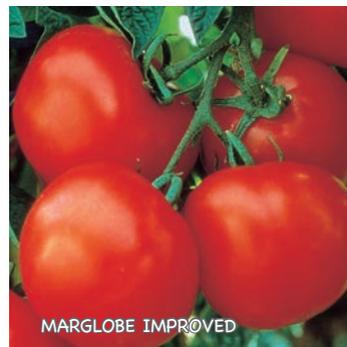

Taxi

65-70 days. The best yellow variety for short season areas. Bright yellow, 4 to 6 oz. fruits are smooth and blemish-free. Flesh is meaty, mild and acid free. Excellent fresh for salads, sandwiches or adds a nice color to salsas. Heavy yielder over a 3 to 4 week period. Determinate.

Thessaloniki

68 days. Uniform, baseball-sized, 6 to 8 oz. fruits are the trademark of this variety developed in sunny Greece. Fruits have a pleasant, mild flavor and virtually refuse to rot, even when completely red and ripe. Resistant to sunburn, cracks and spots. Perfect blossom ends resemble those of greenhouse tomatoes. Indeterminate.

#00762. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$6.95

Wisconsin 55

75 days. A superb tomato developed at the University of Wisconsin. Large, deep red fruits resist shoulder cracks, ripen evenly and have strong skin with solid flesh. Great for canning. Vigorous plants are tolerant to Leaf Spot and Blossom End-Rot. Intermediate resistance to Early Blight. Semi-determinate.

#00824. (A) pkt. (30 seeds) \$3.85

Small to Medium Open-Pollinated Types

Varieties on pages 30-32 typically grow fruits 2 to 5 oz.

INDIGO™ SERIES

Uniquely colored and high in anthocyanin (a powerful antioxidant with disease fighting properties) – making them among the healthiest tomatoes in the world and is also what causes the blue pigment. Allow fruits to fully mature for best flavor.

Also see Blue Beauty on pg. 29, Blue Berries, Cherry Drops, Dancing With Smurfs & Kumquat on pg. 35

Indigo™ Apple

70-75 days. A cross between Indigo Rose and a red cherry. Unripe, 2 to 4 oz., green fruits will show lots of purple, which is brought on by sunlight, but will eventually turn almost a true black. Excellent sweet tomato flavor. Indeterminate.

#00365. (A) pkt. (20 seeds) \$4.65

Indigo™ Rose EB LB

75-80 days. (PVP) The first in the series. Round, 2 to 3" fruits have purple on the side exposed to light, while the shaded part starts out green and turns deep red when mature. Flesh is red with a superbly balanced, multi-faceted tomato flavor. Bred at OSU. Heavy yielder. Intermediate resistance to Powdery Mildew. Indeterminate.

#00372. (A) pkt. (30 seeds) \$5.95

Japanese Black Trifele

85 days. Heavy producer of pear-shaped fruits that are free of blemishes and cracks and range in color from intense black to dark gray, blushed with magenta. Potato leaf plants produce prolific yields of picture-perfect, 3 to 5 oz. fruits that look stunning when sliced and arranged on a plate. As delicious as it is unique. An excellent canner as it holds its flavor and color well. Indeterminate.

#00382. (A) pkt. (30 seeds) \$3.95

DID YOU KNOW... Tomato and pepper seeds germinate more consistently when soaked prior to sowing? Pre-soaking seeds for 8 hours, starting with warm water initiates the germination process in virtually all seeds. Treated or pelleted seeds should NOT be pre-soaked.

Amish Gold Slicer

80 days. Beautiful, 3 to 4" round slicer that's been a trial favorite year after year. Fruits, up to 5 oz., are blemish-free, very firm and have excellent flavor. Great for fresh eating and canning. Extremely productive. Indeterminate.

#00034. (A) pkt. (10 seeds) \$3.15

Black Plum

80 days. A very prolific Russian strain. Brownish-gray fruits are so sweet and meaty that some prefer it to Roma for making sauces. Also excellent when used in salads or for drying. Oval fruits average 2 to 4 oz. and turn a deep mahogany-brown at maturity. One of our best yielders for both fresh market and home use. Intermediate resistance to Late Blight. Indeterminate.

#00097. (A) pkt. (30 seeds) \$3.85

Garden Peach

75 days. This unique heirloom looks very much like a small peach – it even has slightly fuzzy skin! Small, 2 oz., light-yellow fruits have a delicate, distinctive flavor that's light, clean and a little bit fruit-like. Prolific producer of juicy fruits with excellent keeping quality. Introduced to American gardens in 1862. Intermediate resistance to Late Blight. Indeterminate.

#00276. (A) pkt. (30 seeds) \$3.95

Golden Roma

75-90 days. Bright yellow, 3 to 4" elongated fruits are smooth and have a sweet flavor. These very attractive, 3 oz. fruits are yellow versions of typical red roma-types and are considered to be a true paste tomato. Fruits are consistently meaty and have less water and fewer seeds than fresh market tomatoes. Great for fresh salsas, sautéing, roasting, drying, canning and making sauces and soups. Heavy yielder. Indeterminate.

#00308. (A) pkt. (30 seeds) \$3.95

Green Zebra

78 days. One of the most unusual varieties you'll ever grow! Fully ripened fruits are bright green with stripes of a still lighter green. Small, round, 2 to 4 oz. fruits have excellent, real tomato flavor. Intermediate resistance to Late Blight. Plants are vigorous and indeterminate.

#00329. (A) pkt. (30 seeds) \$3.85; (F) 1/16 oz. \$9.95

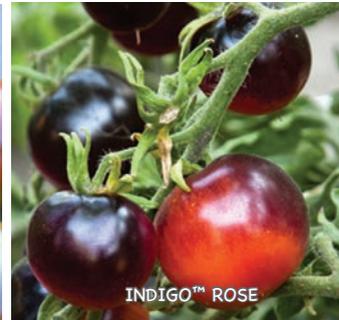

Independence Day

55 days. If transplanted in early May, you can have ripe tomatoes by the Fourth of July. Round, 2 to 3" pink fruits have a great tomato flavor which is not always typical with other early varieties. Perfect for salads and for slicing. Indeterminate.

#00362. (A) pkt. (30 seeds) \$3.75

JAPANESE BLACK TRIFELE

INDIGO™ ROSE

GREEN ZEBRA

INDEPENDENCE DAY

INDIGO™ APPLE

Jaune Flammée

80 days. A gorgeous study in contrasts, with bright orange skin surrounding reddish flesh that is a rare find in heirloom tomatoes! Fruits are slightly larger than cherry varieties, about 2 to 3 oz., with thick walls that are tender and flavorful. Sweet, high-yielding and especially valued as a salad tomato for its beautiful appearance. Indeterminate.

#00384. (A) pkt. (30 seeds) \$3.85; (D) 1/32 oz. \$8.95

Jersey Devil

90 days. An extremely prolific paste-type heirloom shaped like a banana pepper. Fruits grow to about 5 to 6", are very juicy, meaty and have few seeds. Very flavorful and excellent used in sauces and salsas. Indeterminate.

#00390. (A) pkt. (30 seeds) \$3.65

Martino's Roma

75 days. You can't go wrong with this Italian heirloom! Richly flavored, meaty, pear-shaped fruits set heavily on compact plants with rugose, dark green foliage. So productive, the 2 oz., 3" fruits tend to drop from the vine when ripe. Most often used for sauces, salsas and pastes, but is perfect for eating fresh as well. Great for farmers markets. Dwarf determinate.

#00461. (A) pkt. (30 seeds) \$3.45; (G) 250 seeds \$9.95

Oregon Spring V

60 days. Early variety that sets loads of meaty fruits weighing 3 to 5 oz., with excellent flavor. Compact plants set fruits even in cool weather and continue to yield all season long. Nearly seedless. Perfect for ketchup and sauces. Determinate.

#00530. (A) pkt. (50 seeds) \$3.95; (D) 1/32 oz. \$9.95

Quedlinburger Fruhe Liebe

40 days. An extremely early German heirloom that continuously produces until frost – one of the strongest all-season producing plants you can grow. Fruits weigh approx. 2 oz. and have a great flavor and acid level for such an early variety. In trials, it was one of the best. Round, red, 1 to 2" fruits set in clusters of 4 to 6 on potato leaf plants. Yields great in hot summer temperatures and sets surprisingly well in cool climates. Indeterminate.

#00588. (A) pkt. (30 seeds) \$3.35

Roma VF

75 days. Roma is considered to be the most well-known paste-type tomato, perfect for sauces, pastes and ketchup. Heavy crops of bright red, pear-shaped, 2 to 3 oz. fruits are nice and meaty, with very few seeds. Determinate.

#00618. (A) pkt. (50 seeds) \$3.25; (F) 1/16 oz. \$5.95

San Marzano

80 days. A little later than Roma, with superb flavor in long, 3½" by 1½" blocky fruits that are bright red and hang in large clusters. Holds well on the vine and in storage. Extra-high solid content is perfect for canning. Crack resistant. Plants provide good cover to protect fruits and produce heavy yields. Indeterminate.

#00630. (A) pkt. (50 seeds) \$3.75; (F) 1/16 oz. \$8.45

Saucy Lady

80 days. Possibly the best sauce tomato that we have offered for quite some time. Attractive, 3 to 4 oz. fruits are deep crimson in color and extremely firm. Excellent for canning or making delicious sauces and pastes. Heavy yielder. Determinate.

#00641. (A) pkt. (15 seeds) \$3.95

Speckled Roman

85 days. Tomato lovers everywhere are tipping their caps to John Swenson who developed this cross of Antique Roman and Banana Legs. Orange-red, 5" long fruits are a speckled paste-type and are marked by irregular yellow stripes. Meaty fruits have a hearty, real tomato flavor and almost no seeds. Indeterminate.

#00669. (A) pkt. (20 seeds) \$3.25; (V) 100 seeds \$7.95

Stupice

52 days. A native of Czechoslovakia where its extreme earliness, tolerance to cold, superior flavor and high yields earned it worldwide attention. Attractive, ruby colored fruits are firm, sugary sweet and weigh approx. 3 oz. or more. Potato leaf plants are heavy yielders. Intermediate resistance to Late Blight. Indeterminate.

#00678. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$8.95

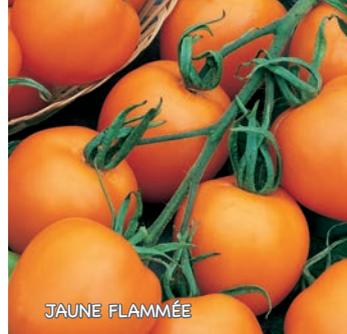

Ten Fingers of Naples

75 days. An excellent paste-type. Elongated, pointed, 5 to 6", meaty fruits weigh up to 3 oz. and are produced in long trusses, giving them a finger-like appearance! Flavor is sweet, rich and superior to many modern day varieties. Ideal for cooking, canning and preserving. A popular heirloom from Naples, Italy. Heavy yielder. Determinate.

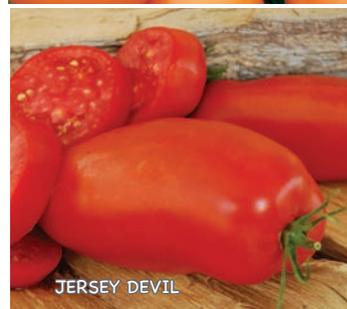

#00756. (A) pkt. (30 seeds) \$3.65

SAN MARZANO

Cherry, Cocktail & Grape Tomatoes ...

42 DAYS

42 Days

42 days. One of the world's earliest tomatoes with an excellent flavor! Golf ball size, 1 oz. fruits are bright red with very few seeds. While most early tomatoes originate from cooler climates, this variety is believed to have come from Mexico, so it's rather unique, as it does well in cool and warm climates. Excellent for containers. Determinate. #00257. (A) pkt. (20 seeds) \$3.85

APPLE YELLOW

Apple Yellow Hybrid TYLCV

110 days. 2020 AAS Winner. Uniquely dimpled, bell-shaped fruits weigh up to 1 oz. and have a firm, meaty texture. With a Brix of 8, flavor is deliciously sweet, yet citrusy, with just the right balance of sugar/acid. Plants abundantly produce clusters of eye-catching, bright, lemon yellow, uniform fruits that grow up to 1½" – in trials, one plant produced nearly 1,000 fruits! Crack resistant and holds well on the vine. Tolerant to Tomato Mosaic Virus and Nematodes. Indeterminate. #00038. (A) pkt. (10 seeds) \$5.95

Artemis Hybrid NT LM ToMv

50-55 days. Deliciously super-sweet, rich, red cherry tomatoes have a unique crisp, firm texture. Attractive, round, 1" fruits weigh up to ½ oz. each and are great for eating straight-from-the-vine, in sauces and salsas. Indeterminate. #00021. (A) pkt. (10 seeds) \$5.75

ARTEMIS

ARTISAN™ SERIES

Bred to concentrate specifically for small growers, local and specialty markets. Combines excellent flavor with unique colors, shapes, sizes and stripes. Tiger is a julienne type with a tropical flavor and can be allowed to ripen off the vine without compromising the flavor. Fruits weigh up to 1 oz. and are great for appetizers and salads to main courses. Vigorous vines produce continuously over a long growing season. Indeterminate.

Also see Orange Jazz and Pink Jazz on pg. 22.

Blush

75 days. Golden yellow with a pink blush. #00045.

Pink Bumble Bee

70 days. Pink striped with yellow and are crack resistant. #00042.

Purple Bumble Bee

70 days. Purple striped with green. #00044.

Artisan™ Mix

70-75 days. A mix of all 5 varieties. #00041.

Prices, above 6, per variety:
(A) pkt. (30 seeds) \$4.95

Black Opal

70 days. Bred from the popular heirloom Black Cherry and selected for its improved growth habit, firmer texture and superior flavor. Masses of ½", attractive, round fruits are excellent for fresh eating, grilling, sauces and pastes. Extremely productive. Indeterminate. #00096. (A) pkt. (20 seeds) \$3.85

Braveheart Hybrid F FOR LM ToMV

60 days. Bright red, 1 oz. cherries have a deliciously sweet and juicy, bold tomato flavor. Fruits are thin-skinned and ripen quickly and uniformly, extending harvests throughout the season. Expect prolific yields on medium-sized plants that are easily managed. Intermediate resistance to Gray Leaf Spot. Crack resistant. Indeterminate. #00108. (A) pkt. (20 seeds) \$4.45

Candyland Red

55-60 days. 2016 AAS Winner. Dark red, ½" fruits weigh ¼ oz. and are smaller than most cherries. Fruits have an excellent, sweet flavor! Plants have a tidier habit than other currant-types with the fruit tending to form on the outside of the plant making them easier to harvest. Indeterminate. #00156. (A) pkt. (10 seeds) \$3.95

Celano Hybrid LB

60-70 days. 2020 AAS Winner. Deliciously super-sweet, oblong fruits weigh up to ¾ oz. each and have an average Brix of 9. In comparison to similar varieties, fruits are sweeter, have better texture and a deeper red color. Early and heavy yielding. Ideal for growing in containers. Semi-determinate. #00161. (A) pkt. (10 seeds) \$5.95

Cherry Roma

75-80 days. Produces bountiful sets of 1" long, plum-shaped fruits with a surprising flavor that's both sweet and spicy at the same time. A real tasty treat when eaten fresh or dried to enjoy all year long! Indeterminate.

#00191. (A) pkt. (30 seeds) \$3.75

Chocolate Cherry

70 days. Extremely flavorful, uniform, round, chocolate-red fruits grow in trusses and measure 1". Fruits hold stems very well, don't crack and can be picked several days before completely mature and allowed to ripen off the vine without sacrificing quality. Great variety for the home gardener and fresh markets. Indeterminate.

#00186. (A) pkt. (30 seeds) \$3.95

Chocolate Pear

70 days. Gorgeous, pear-shaped cherries are light red swirled with various shades of green and brown – great for farmers markets and home gardeners. Fruits have a rich tomato flavor. A consistent taste-test winner in trials. Indeterminate.

#00165. (A) pkt. (30 seeds) \$3.95

Chocolate Sprinkles Hybrid FN

50-55 days. Beautiful, 1½" cherries are red and striped with dark green. Fruits have a rich, sweet flavor and grow in trusses of 5 to 7. Produces more fruit with better flavor than similar open-pollinated varieties. Plants are very productive and early. Indeterminate.

#00174. (A) pkt. (10 seeds) \$5.75

Crokin Hybrid F LM ToMV

60-65 days. 2020 AAS Regional Winner (Southeast). Fruits have a very sweet Brix of 8.5 and a light acidic taste giving it the perfect sweet/acid balance. Round, ½ oz. fruits are small and firm with a crunchy texture and grow in trusses of up to 12. In trials, plants had better yields than similar varieties due to Late Blight resistance and were slightly more compact. Intermediate resistance to Late Blight, Nematodes and Tomato Yellow Leaf Curl Virus. Indeterminate.

#00210. (A) pkt. (10 seeds) \$5.55

Cupid Hybrid FA GLS BS

66 days. There are a lot of good grape tomatoes on the market, but Cupid advances to the next level in the areas of quality, flavor, yields and holding ability. Meaty, bright red fruits are nearly as firm as Roma types and are quite crack resistant. Vigorous plants set loads of fruit in long trusses for a long season that begins early and due to a very high level of disease resistance, continues right up until frost. Indeterminate.

#00208. (A) pkt. (10 seeds) \$5.75

Fantastico Hybrid LB

60 days. 2014 AAS Winner. Long clusters of bright red, super-sweet fruits, with a Brix of 12, grow in clusters toward the outside of plants making them very easy to harvest. In trials, fruits resisted cracking much better than similar varieties when left on the vine past maturity. High yielding plants produce up to 12 lbs. of ½ oz. fruits! Bred for growing in small gardens – perfect in large patio containers or hanging baskets. Determinate.

#00260. (A) pkt. (10 seeds) \$5.45

CREAM OF THE CROP SERIES

Delicious and beautiful! Even if you don't typically eat tomatoes, give these 6 varieties a try – kids will love 'em, too! Bred for improved quality, longer shelf life and better disease tolerance than comparable varieties. Indeterminate.

Apricot Zebra

60-70 days. Golf ball sized, 1½ to 2" fruits are firm and meaty with a nice texture. Unique tangerine skins have prominent green stripes that almost disappear when fully ripe. Strong tomato flavor is rich with moderate sweetness averaging a Brix of 7.5. High yielding. #00019.

Pink Champagne

60-70 days. A favorite for snacking! Dark pink, grape-shaped fruits have an amazing sweet flavor with an average Brix of 9.5, measure a little over 1" long and grow on moderately long trusses. Good yielder. #00563.

Red Torch Hybrid

60-70 days. 2019 AAS Winner. Excellent flavor, great texture and high yields makes this heat tolerant variety a standout in the specialized market of striped tomatoes. Attractive, oblong, 2" fruits are red with golden stripes and weigh up to 1½ oz. each. #00615.

Prairie Fire

60-70 days. Pointed, grape-shaped, 3" fruits have subtle gold striping and deep red flesh. In trials, it rated a Brix of 10. #00585.

Tropical Sunset

60-70 days. Gorgeous, 1½" ping-pong ball sized fruits are gold with orange-pink striping and nearly translucent when ripe. Flavor is fruity and bright with an average Brix of 8. Good shelf life. A trial favorite! #00773.

Prices, above 4, per variety: (A) pkt. (20 seeds) \$4.45

Sparky XSL Hybrid

60-70 days. 2019 AAS Regional Winner (Heartland). One of the few X-tended Shelf Life cherries available to home gardeners. Attractive, striped, round fruits weigh 1 oz., are 1¼" in diameter and very sweet with an average Brix of 8.5. Early and prolific. Well-suited for market growers. #00667.

Fire Fly Hybrid VFT

80 days. 2019 AAS Winner. Attractive, round fruits are super-sweet, pale white to pale yellow, less than 1" in diameter and weigh about ½ oz. each. Delicate, translucent skins add a mild acidic flavor which enhances the juicy, sweet flesh that explodes with flavor. Perfect for snacking, roasting and in salads. Crack resistant. Indeterminate.

#00266. (A) pkt. (30 seeds) \$4.95

Gardener's Delight

72 days. A German-bred heirloom that produces long trusses of grape-like, red, ¾" fruits in clusters of 6 to 12. Sugar-sweet, crack resistant and bears until frost. Hardy vines require staking or caging. Indeterminate.

#00277. (A) pkt. (30 seeds) \$3.55; (G) 250 seeds \$7.95

Geranium Kiss

65 days. An excellent choice for container gardening. Stocky, dwarf plants, with rugose foliage, grow just 24 to 30" tall and produce loads of golf ball sized, bright red fruits that are round with pointed ends. Tomatoes have a good texture, an exceptional flavor, grow in clusters of 10 or more and weigh about 1 oz. each. In trials, plants exhibited tolerance to Early Blight and Septoria. Bred by Alan Kapuler, Ph.D. of Peace Seeds. Dwarf determinate.

#00282. (A) pkt. (15 seeds) \$3.65

Gold Nugget

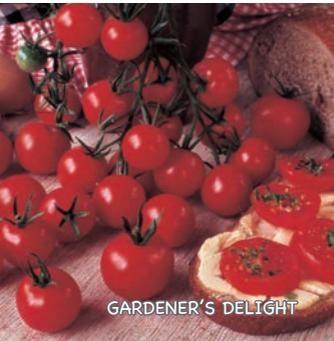

55 days. Golden-yellow, deliciously sweet, 1" oval fruits are often seedless. Uniform, compact plants are vigorous and grow to just 24" tall. Great for containers. Developed by Dr. James Baggett, OSU. Determinate.

Green Grape

70 days. No more waiting for green tomatoes to turn red and ripe without spoiling. Fruits are just under 1" across and grow profusely on vigorous plants. Very juicy and sweet. Perfect for green ketchups, soups, garnishes, sauces and hors d'oeuvres. Determinate.

#00326. (A) pkt. (30 seeds) \$3.75

GARDENER'S DELIGHT

GERANIUM KISS

GOLD NUGGET

HEARTBREAKERS™ HYBRID COLLECTION

70-85 days. Get ready to fall in love with Dora & Twiggy whose adorable little fruits reveal a lovely heart shape when cut in half. Juicy fruits have tender skins, the perfect sugar to acid ratio and a Brix of 9. Sturdy plants have nicely branched trusses of fruit that lay outside of the foliage for easy visibility and harvest. Great indoors on windowsills, in small gardens, raised beds and in containers or hanging baskets mixed with trailing vegetables or flowers. Plants have excellent vigor and naturally remain dwarf without any pinching or pruning. Produces abundantly. Determinate.

Dora Series

Fruits grow in clusters of approx. 8 to 10, weigh up to ½ oz. each and are about the size of a quarter. Bred for regrowth after harvest of the first fruits; plants will continue to set new fruit, but only if ripe fruit is kept harvested. Ideal pot size is 6 to 8". Mature plants grow to just 16" tall.

Orange #00337. Red #00333. Yellow #00338.

Twiggy Series

Fruits grow in clusters, weigh approx. ¼ oz. each and are about the size of a nickel. Plants are considerably more compact than Dora. Ideal pot size is 5 to 6". Mature plants grow to just 12" tall.

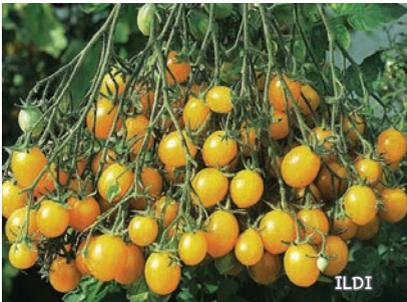

Orange #00334.

Red #00331.

INDIGO™ SERIES

For full series description, see pg. 30.

Indigo™ Blue Berries

75 days. An eye-catching cherry which ripens from amethyst purple to a stunning, almost black, with a brick red bottom. Flavor is great and is an all around crowd pleaser. Indeterminate. #00374.

Indigo™ Cherry Drops

65 days. (PVP) This stunning cocktail cherry, with excellent sweet flavor, may just be the best-tasting Indigo yet! Round, 1" fruits weigh 1 to 2 oz., have indigo shoulders with rosy undersides and deep red flesh. Expect huge yields – potentially 500 to 1,000 fruits per plant under ideal growing conditions! Indeterminate. #00364.

Prices, above 2, per variety:
(A) pkt. (20 seeds) \$4.95

Indigo™ Dancing With Smurfs

85 days. An unusual blue, 1 to 1½" cherry with attractive red flesh. Fruits grow in clusters, are mature when they are red with dark purple blushing, have a nice flavor and are excellent keepers. A standout variety in Wisconsin trials. High yielding. Exhibits some tolerance to Late Blight. Indeterminate.

#00363. (A) pkt. (20 seeds) \$4.45

Indigo™ Kumquat Hybrid

75 days. A cross between Indigo Rose and a yellow cherry. Tangerine-orange, oval-shaped fruits, with indigo shoulders, weigh 1 oz. and grow in clusters of up to 8. Semi-sweet flavor with an excellent fragrance. Semi-determinate.

#00375. (A) pkt. (10 seeds) \$8.05

Jasper Hybrid LB

60 days. 2013 AAS Winner. An outstanding disease resistant package results in extended harvests of this delightful little tomato. Small, round, ¾" red fruits weigh less than 1 oz. each with sweet, rich flavor and a pleasant creamy texture. Fruits grow on small trusses, holding their quality for a long time on the plant and after picking, resisting cracking and rot. Plants are extra vigorous and tall. Overcomes weather-related stresses with ease. Intermediate resistance to Early Blight. Indeterminate.

#00385. (A) pkt. (10 seeds) \$5.95

JELLY BEAN HYBRID SERIES VFVA GLS

72 days. Grape-like fruits weigh up to ¼ to ½ oz. and are aptly named for their bite-sized sweetness and intense colors. Heavy clusters of up to 30 fruits mature early on plants that have good disease resistance. Indeterminate.

Red #00387. Yellow #00837.

Prices, above 2, per variety:
(A) pkt. (30 seeds) \$5.95; (G) 250 seeds \$24.95

Jolly Hybrid N

70-75 days. 2001 AAS Winner. Large, pink, peach-shaped fruits have good acid content and an exceptionally sweet flavor. You can expect 9 to 14 meaty fruits per cluster that weigh about 1½ oz. each. Resists cracking. Indeterminate.

#00397. (A) pkt. (20 seeds) \$4.75

KITCHEN MINIS® EDIBLE POTTED HYBRID SERIES

70-84 days. No garden, no problem! Get deliciously sweet cherry fruits right from your windowsill or countertop. Plants grow just 6 to 8" tall and wide and produce ½ to 1" fruits, stay tidy and benefit from being grown dry. Kitchen Minis® make it possible for consumers to harvest their own homegrown vegetables regularly. Each plant's harvest lasts about a month. Also great grown in patio containers. Determinate.

Cocoa #00200. Red Velvet #00610. Siam #00650.

Prices, above 3, per variety:
(A) pkt. (10 seeds) \$6.85

Large Red Cherry

72 days. An excellent salad tomato that grows in clusters of up to 5 on spreading, hardy vines, with dark green foliage. Full-season, high yields of deep scarlet, round, 1 to 1¼" diameter, flavorful fruits. Green fruits may be pickled while the ripe ones are used fresh or for preserves. Indeterminate.

#00424. (A) pkt. (50 seeds) \$3.25; (F) 1/16 oz. \$7.95

Little Bing VFF Hybrid

60-65 days. A sister variety to Little Napoli on pg. 21. Bright red, 1" cherry fruits. Compact plants have a tidy habit and healthy green foliage. At less than 24" tall, they flourish in containers, stay a manageable size and produce lots of tomatoes in a period of a few weeks for a large harvest. Fruits are delicious fresh or in your favorite recipes. Determinate.

Little Birdy Red Robin

55 days. An extra-sweet, container-grown variety, just as good grown indoors as a potted plant. Round, red, 1 1/4" fruits are produced on compact, rugose leaved plants that grow just 8 to 12" tall. Ideal for windowsills, patios or hanging baskets. Dwarf determinate. **#00612. (A) pkt. (30 seeds) \$5.95; (G) 250 seeds \$22.95**

LOVERTINO

Lovertino Hybrid F ToMV

80 days. Very attractive, glossy, dark red cherries are strawberry-shaped and grow in long trusses. Fruits can weigh up to 1 oz. each and are full of deliciously sweet flavor. Excellent straight-from-the-vine, on charcuterie boards and in salads. Indeterminate. **#00443. (A) pkt. (10 seeds) \$5.55**

Mexico Midget

60-70 days. Old-time, south-of-the-border favorite. Tiny, red, cherry-type fruits weigh down trusses with prolific yields throughout an extended growing season. Round 1/2" fruits explode with irresistible flavor. Very reliable. Indeterminate. **#00466. (A) pkt. (30 seeds) \$3.45; (G) 250 seeds \$7.95**

MEXICO MIDGET

Micro-Tom

50-60 days. Considered to be one of the world's smallest tomato plants – grows just 6 to 8" tall and bears loads of flavorful, 1 oz., deep red fruits. An ideal house plant for windowsills and patios for vine-ripened fruits year round! Developed by the University of Florida. Resistant to Leaf Mold. Dwarf determinate. **#00468. (A) pkt. (20 seeds) \$4.55; (G) 250 seeds \$26.95**

Midnight Snack Hybrid

65-70 days. 2017 AAS Winner. Unique cherries ripen to red with a blush of glossy black-purple on the skin when exposed to sunlight due to the accumulation of anthocyanin pigment. Plants are productive all season, yielding 1 1/2" fruits that have a well-balanced flavor. Great in salads or eaten straight off the vine – a guilt-free treat any time of the day or night. Indeterminate. **#00469. (A) pkt. (15 seeds) \$5.55**

MICRO-TOM

Moon Sign Book

Popular since 1905. The only almanac you'll need this spring! Includes lunar timing tips on planting and harvesting and a guide to companion plants. Also provides recommended dates on fishing, hunting and weather forecasts. Customers come back year after year because of its accuracy and reliability. This edition features void-of-course charts, weather and economic forecasts, aspectarian tables, and a variety of thoughtful articles. You'll learn about lunar mansions, eclipses, superfoods that boost body and mind, gathering seeds from plants, ways to live in harmony with invertebrate creatures, and more. Filled with dozens of tips on crafting, health and home, and growing a strong connection to animals, this book helps you connect to the Moon's energy whenever you need it. Paperback. 320 pages. **#53454. \$13.95 each**

Mingle Mix Hybrid

65-70 days. Eye-catching grape tomatoes are always a home gardeners favorite and this delightful mix is destined to become a popular choice. Attractive fruits are deliciously sweet and weigh up to 1 oz. each. Perfect for snacking, salads, the ever-popular charcuterie boards and roasted or sautéed. Colors include oranges, reds, yellows and chocolates. For the best color range grow 6 plants or more. Great for farmers markets and roadside stands. High yielding. Crack resistant. Indeterminate. **#00470. (A) pkt. (10 seeds) \$5.95**

Mountain Vineyard Hybrid VFFF GLS

76 days. A variety from the Mountain Series on pg. 15. The first of its kind – this grape tomato contains the crimson gene for high lycopene. Mature fruits are glossy dark red, firm with appealing red gel and a balanced sweet flavor. Compact vines have short internodes making fruits easier to harvest. Early heavy pruning recommended. Crack resistant. Intermediate resistance to TSWV. Indeterminate. **#00502. (A) pkt. (10 seeds) \$6.95**

Natures Bites Hybrid FFT

100 days. A gorgeous cherry tomato with exceptional sugar content. Brilliant, bright red fruits are easily grown in home gardens for straight-from-the-vine eating. Fruits weigh 3/4 oz. and grow in clusters of up to 20. Heavy yielder. Resistant to Fusarium Crown & Root Rot. Indeterminate. **#00510. (A) pkt. (20 seeds) \$4.95**

Orange Sunshine Hybrid

58 days. The qualities of these bright beauties just can't be beat! Beautiful orange, 1/2 oz. cherries are firm and as sweet as the ever popular Sungold (pg. 37). Adds a dash of color and flavor to salads, pizzas, sautés, and salsas. Prolific yields. Indeterminate. **#00525. (A) pkt. (15 seeds) \$5.95**

Orange Zinger Hybrid F

60 days. If Sungold (pg. 37) is a favorite of yours, you're going to love this variety! Dark orange, round, 1" fruits have big tomato flavor with the perfect sweet to tangy ratio. Excellent in salads or straight-from-the-vine. Crack resistant. High yielding. Indeterminate. **#00522. (A) pkt. (20 seeds) \$5.95**

ORANGE ZINGER

MIDNIGHT SNACK

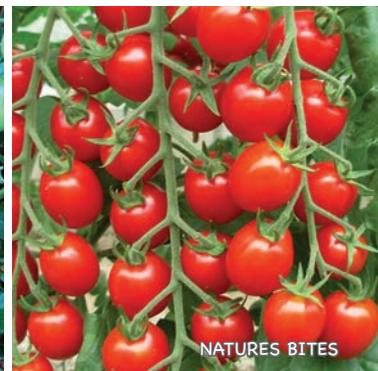

DID YOU KNOW... Damping off is a disease responsible for killing patches of seedlings virtually overnight? It is one of the most common diseases of seedlings and can affect any variety or type of vegetable or flower. Avoid by practicing proper sanitation, always using new, fresh starting mix, new or sterilized trays & pots and do not over water. 

MINGLE MIX

MOUNTAIN VINEYARD

NATURES BITES

ORANGE SUNSHINE

PATIO CHOICE HYBRID SERIES

50-60 days. Compact plants produce generous amounts of ½ oz. cherry fruits that are juicy, delicious and perfect for snacking. Specifically bred for small spaces, containers and hanging baskets. Plant both for a dramatic effect. Determinate.

Red

Plants grow 24 to 30" and produce attractive trusses that cascade in hanging baskets. #00541.

Yellow

2017 AAS Winner. Enjoy roasted or sun-dried for a delicious, sweet treat. Plants grow 18" and have short vines. #00535.

**Prices, above 2, per variety:
(A) pkt. (30 seeds) \$4.25**

Rainbow Cherry Blend

63-90 days. Get the whole rainbow in this refreshing mix of cherry tomatoes! Juicy and delicious bite-size fruits, up to 1½" across, come in a full range of colors including browns, golds, oranges, creamy whites, yellows, pinks, greens, purples and reds – even bicolors. Indeterminate. #00598. (A) pkt. (20 seeds) \$3.95

Rapunzel Hybrid

68-70 days. Named for the fairy tale character, plants produce unique, long cascading trusses with up to 40 fruits. Very flavorful, bright red, ¾ to 1 oz. cherry tomatoes make the perfect addition to salads and veggie trays. So sweet, you'll be tempted to eat them straight-from-the-vine. Indeterminate. #00631. (A) pkt. (15 seeds) \$4.45

Red Pear

70 days. One of the rarest of the heirloom varieties still grown today! Hardy, medium-sized plants yield plenty of small, red, pear-shaped, up to 2" fruits with very few seeds. Perfect for salads, sauces or pickles. Indeterminate. #00606. (A) pkt. (50 seeds) \$3.75; (F) 1/16 oz. \$8.95

Rosella

70 days. From the breeder of the extremely popular Sweet Aperitif (pg. 38). This gorgeous cherry has the perfect balance of sweetness and acidity. High yielding plants produce long trusses of ½" round, thin-skinned, purple fruits that weigh ½ oz. each. Makes a great paste tomato and can also be eaten fresh or grilled. Perfect for market gardeners and home gardeners alike. Indeterminate. #00626. (A) pkt. (15 seeds) \$3.95

Ruby Crush Hybrid FF FOR ToMV

60 days. Performs well in containers, shines in the garden and has sugary-acid balanced fruits that resist cracking. Smooth, bright red fruits are solid, oval, and weigh about ½ oz. each. Unlike other determinate grape varieties, compact plants are strong, have good leaf cover and require minimal support. Intermediate resistance to Gray Leaf Spot. Determinate. #00637. (A) pkt. (10 seeds) \$7.05

Snowberry

75 days. Nicely rounded, 1½ to 2 oz. firm fruits feature a creamy-yellow color outside with white flesh inside, making this unique variety the closest thing to a pure white cherry available on the market today. Sturdy plants produce trusses of uniform fruits with a distinctive flavor that's very sweet and fruity. High yields. Indeterminate. #00658. (A) pkt. (30 seeds) \$3.95

Sugar Lump

65-75 days. A sweet German heirloom that produces heavy yields straight through until frost. Clusters of 6 to 12, smooth, deep-red fruits average ¾" to 1" in diameter and weigh approx. 1 oz. Excellent eating quality and flavor. Indeterminate. #00684. (A) pkt. (30 seeds) \$3.15

Sugar Rush Hybrid F

50-55 days. Super-sweet, ¾ to 1¼" elongated fruits have a Brix of 8 to 9, grow on long trusses, are firm and have a great crunch. Plants are early maturing, very productive and grow up to 84". Indeterminate. #00676. (A) pkt. (20 seeds) \$5.05

Sugary Hybrid

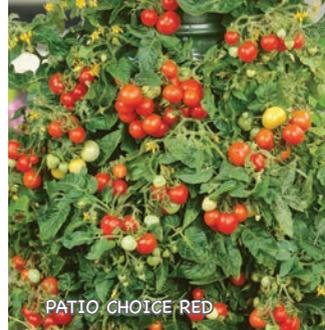

80 days. 2005 AAS Winner. Sugary stands out as something really special in the world of cherry tomato competitions. Super-sweet, juicy, 2 oz. fruits have appealing, reddish-pink skins. Huge yields of oval-shaped, slightly pointed fruits set continuously. Semi-determinate. #00680. (A) pkt. (15 seeds) \$4.35

Sun Dipper Hybrid FNT

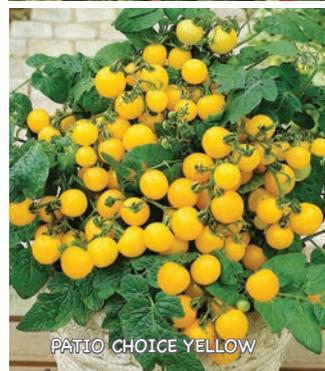

60-65 days. Unique, eye-catching, elongated fruits are an attractive orange. Fruits are 2 to 2½" long by ½" wide and have a delicious, juicy flavor. Perfectly shaped for dipping and visually appealing on vegetable platters. Note that pruning plants to 1 to 2 leaders can increase fruit size up to 3 to 4" long. Upright plants grow approx. 60 to 84". Indeterminate. #00706. (A) pkt. (10 seeds) \$5.15

Suncherry Extra Sweet Hybrid FT

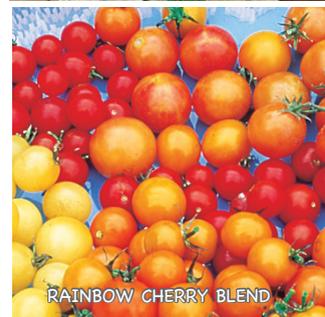

55-60 days. No hors d'oeuvre tray or salad will be complete without this bite-size delight once you taste its super-sugary sweetness that has a Brix of 9 to 10. Vigorous plants produce high yields of thin-skinned, ¼ oz. fruits especially at the beginning of the season. Indeterminate. #00693. (A) pkt. (15 seeds) \$4.75; (G) 250 seeds \$27.95

SUNCHOCOLA

With Big Flavor!

Sunchocola Hybrid T

60-67 days. Fans of Sungold have come to love this beauty from the same breeders. Gorgeous chocolate-red, 1" fruits with a deliciously sweet, smoky flavor are very juicy and lower in acid than most typical cherry varieties. Clusters of 8 to 12 fruits, weighing approx. 1 oz. each, are grown on high yielding plants. An excellent color addition to all your favorite dishes, fresh or cooked. Indeterminate. **#00692. (A) pkt. (10 seeds) \$6.75**

SUNGOLD

Sungold Hybrid FT

57 days. A positively luscious, bite-size golden beauty overflowing with an abundance of fruits – thin-skinned, with a juicy flesh that holds its oh-so-sweet, fresh-from-the-vine flavor. Cascading trusses are smothered in fruits that remain ripe and ready for picking over long periods of time. Very early, and a heavy yielder both outdoors and in greenhouses. Indeterminate. **#00696. (A) pkt. (20 seeds) \$5.25; (G) 250 seeds \$26.95**

Sungold Select

70 days. This open-pollinated version of our very popular Sungold has become a favorite as well! Flavor is fruity, yet tart, making these bite-sized beauties a great snacking tomato. Indeterminate. **#00694. (A) pkt. (30 seeds) \$3.95**

SUNGOLD SELECT

Sunpeach Hybrid T

60 days. A favorite from past summer trial gardens – we're sure you'll enjoy these sweet treats! Reddish-pink fruits are highly uniform in shape and each ½ oz. fruit bursts with fantastic flavor that is just the right balance between sweet and tangy. Skins are crack resistant, but not thick and chewy. High-yielding, plants produce long trusses of fruits from late summer until fall. Resistant to Leaf Mold. Indeterminate. **#00703. (A) pkt. (10 seeds) \$5.55**

SUNPEACH

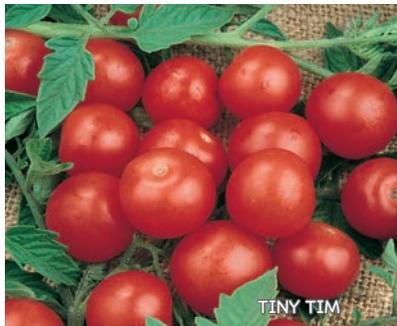

SunSugar Hybrid F ToMV

62 days. The ultimate in cherry tomatoes, this golden yellow beauty achieves a new level of sugary-sweetness and flavor, superb texture, and a tangy true tomato taste. Fruits are a lovely golden yellow, weigh ½ oz., and possess thin skins – remarkable, considering its wonderful crack resistance, even in heavy rains. Heavy early cropper. Very vigorous – can also be grown indoors in an unheated greenhouse in cold climates. Indeterminate. **#00711. (A) pkt. (20 seeds) \$5.55; (G) 250 seeds \$31.95**

SUNSUGAR

"2nd GENERATION" COLLECTION
One packet each of Suncherry Extra Sweet (pg. 37) & SunSugar. **#00880(X). 2 pkts. for just \$9.25. Save 10%!**

TINY TIM

SWEET TREATS

Supersweet 100 Hybrid VF

65 days. Staked plants produce long strands of 15 or more sugary sweet cherry tomatoes, weighing about 1 oz. each and measuring 1" in diameter. Perfect for snacking and in salads. Extra-high in Vitamin C. Plants bear continuously throughout the season. Requires staking or caging. Indeterminate. **#00735. (A) pkt. (30 seeds) \$4.95; (G) 250 seeds \$16.95**

Sweet Aperitif

80 days. This fresh tomato might be the sweetest cherry you'll ever eat! Bright red fruits have exceptional flavor and very high levels of sugar – up to a Brix of 13 – even sweeter than Sungold and Sun-Sugar! – that are perfectly balanced with just the right amount of acid to give this tomato a deliciously, refreshing, tangy flavor. Plants have a multi-branching habit and are completely covered with bite-sized, ½ oz. fruits. Indeterminate. **#00736. (A) pkt. (15 seeds) \$3.95**

Sweet Million Hybrid F ToMV

60 days. Terrific flavor in high yields of super-sweet cherries that have an excellent, hybrid-bred disease resistance. Long trusses of smooth, dark red, 1 to 1½" fruits are produced on large, vigorous plants. Matures early and produces until frost. Indeterminate. **#00747. (A) pkt. (30 seeds) \$4.95; (G) 250 seeds \$19.95**

Sweet Pea Currant

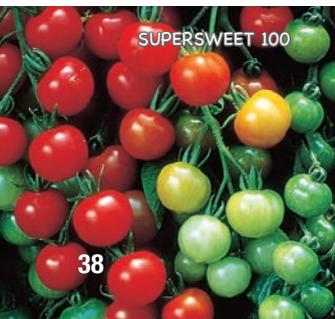

75 days. High yielding plants can produce literally thousands of fruits per plant! Tiny, ruby-red, ¼" fruits explode with delicious, sweet flavor. Grown in trusses of 10 to 12, fruits won't fall off the vine like most currant tomatoes. Perfect for garnishes, snacking or mixing into a fresh summer salad. Indeterminate. **#00740. (A) pkt. (30 seeds) \$3.55 each**

Sweet Treats Hybrid FF LM ToMV

75 days. One of the first pink cherries in the world. Combines the flavor of pink tomatoes with the size of a cherry providing a uniquely balanced flavor of sweetness and acidity. Good aroma and great texture with attractive skins. Uniform and crack-free, 1 oz. fruits with a Brix of 8 to 9, grow in clusters of 12 to 15 fruits per truss. A perfect snack item, as well as a tasty addition in salads and in cooking. Intermediate resistance to Fusarium Crown & Root Rot and Gray Leaf Spot. Indeterminate. **#00749. (A) pkt. (10 seeds) \$9.65 each**

Tiny Tim

60 days. Early, dependable, tree-like plants have rugose leaves and are perfect for small gardens or containers. Grows to approx. 8 to 16" tall, yet produces heavy yields of small, scarlet-red, ¾" fruits. Super in salads. Dwarf determinate. **#00771. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$9.95**

SWEET APERITIF

SWEET MILLION

SWEET PEA

Phone Toll-Free (800)345-5977

Tomatoberry Garden Hybrid T

60-70 days. Melt-in-your-mouth fruits resemble strawberries and are extremely sweet. Petite, tapered, 1" fruits weigh up to ¾ oz. and are deep red with thick, juicy flesh and small inner cavities. Ideal for snacking. Holds well on the vine and resists cracking. High yielding. Indeterminate.

#00763. (A) pkt. (10 seeds) \$7.45

Tommy Toe EB LB

70 days. Heirloom from the Ozark Mountains. Excellent in salads or for juices, ½ to 1", delicious fruits are smooth, mild, glossy red and range from round to oval in shape. They can also be roasted and dried. Exceptionally vigorous plants produce heavy yields. Indeterminate.

#00774. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.45

Tumbler Hybrid 🌿

48-50 days. Specially bred for hanging baskets. Bushy plants have a graceful, cascading habit, pliable stems and look fantastic when mixed in containers with Lobelia or Ivy. Yields up to 6 lbs. of bright red, delicious, very sweet, 1¼" fruits. Determinate.

#00783. (A) pkt. (10 seeds) \$4.25

Tumbling Tom Yellow

70 days. This magnificent variety cascades to 20" or more, making it ideal for hanging baskets, containers and small space gardens. Sturdy plants are loaded with juicy, 1 to 2" fruits that are perfect for snacking and salads. A true ornamental that may seem too pretty to pick, but one sweet bite will have you coming back for more! Indeterminate.

#00767. (A) pkt. (20 seeds) \$4.25

Tutti-Frutti™ Stuffin XS Hybrid

77-91 days. Unique, small cherries look like mini bell peppers! Bright red, 2" by 1½", blocky-shaped fruits are partly hollow making them easy to stuff – for those who don't like bell peppers, this is a tasty alternative. Makes an interesting addition to party platters. Prune and trim plants to expose fruits to sunlight and support with trellises or stakes. Perfect for growing in 7 to 9" pots. Plants have an upright growth habit. High yielder. Indeterminate.

#00780. (A) pkt. (10 seeds) \$6.75

Umberto Pear

80 days. One of the oldest named varieties still in existence, this Italian heirloom was brought back from near extinction. Just one plant can easily produce up to 250 dark pink, meaty 2 oz. fruits! Robust flavor is excellent for both fresh eating and sauces. Very high yielding. Indeterminate.

#00786. (A) pkt. (10 seeds) \$3.25

DID YOU KNOW... Plants that produce a lot of flowers, but few fruits can be caused by several factors? Generally, with tomatoes this is due to a lack of pollination. Poor or weak pollination can occur when plants are too close together, not thinned properly, temperatures are too high, it rains a lot or if soil is too rich in nitrogen.

Valentine Hybrid

55 days. 2018 AAS Winner. Redder than most typical tomatoes when fully ripe due to its high lycopene content. Deep-red, juicy fruits have a rich, complex flavor and hold longer on the vine without cracking or losing their superior quality. Flesh is firm and meaty like a Roma. For optimum flavor, pick when fruits are 1½" long by ¾" wide and deep red. Easy to harvest – fruits detach from trusses effortlessly and have an excellent shelf life. Great for fresh markets. Plants stay healthy and green even under strong Early Blight pressure. High yielding. Indeterminate.

#00798. (A) pkt. (10 seeds) \$6.25

Wild Boar Mint Julep

75 days. Also known as Michael Pollan. Part of the Wild Boar Series on pg. 27. Plum/pear shaped, 1½ oz. fruits have a pleasant tomato taste with a nice overall sweet flavor that is less tart than other green varieties. Extremely high yields with one plant often producing as much as 5 gallons of fruit! Indeterminate.

#00810. (A) pkt. (30 seeds) \$4.55

Yellow Cherry

70 days. Enjoy loads of small, ½", appealing fruits to toss into salads or add color to hors d'oeuvre trays. Strong vines produce high yields of delicious, yellow jewels, preferred by taste-testers about the same percentage as Supersweet 100 (pg. 38). Indeterminate.

#00833. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.95

Yellow Pear VFA LB 🌿

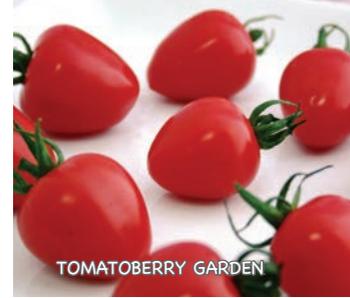

78 days. Heirloom variety with vigorous vines that produce clusters of 2", yellow-skinned, pear-shaped fruits with very few seeds. Slightly later than Red Pear (pg. 37), but with the same prolific yields and performance. Great for snacking or making preserves and pickles. Heat tolerant. Indeterminate.

#00842. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$7.95

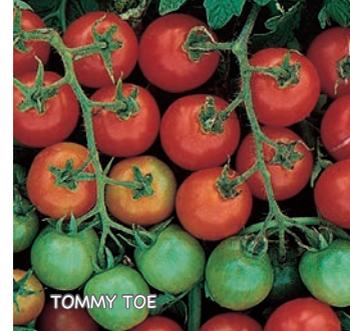

Zebra Cherry Hybrid

70 days. Unique, uniform fruits are slightly larger than the average cherry at 1 to 1½" in diameter and weigh up to ½ oz. each. Exotic looking fruits are brown/red with green stripes and have dark red, excellent flavored, firm flesh. Medium size plants are moderately vigorous and produce high yields. Indeterminate.

Tomatillos/Ground Cherries

Aunt Molly's Ground Cherry

65-90 days. Also known as Cape Gooseberry, Husk Cherry and Strawberry Tomato. An heirloom variety from Poland prized for its flavor. Golden-yellow, ½" fruits, with a strawberry-like flavor, are excellent for pies, preserves, jams and fresh eating. Productive plants, 18" tall and 24" wide, start fruiting in July and continue until frost. Indeterminate. **#02351. (A) pkt. (100 seeds) \$3.75**

Pineapple

75 days. A unique ground cherry with a deliciously sweet and juicy pineapple flavor. Bushy, spreading plants grow 12 to 18" tall and produce loads of small, 1" yellow fruits that have a nice texture and are encased in husks. Makes an unusual, delicious salsa and is excellent in salads, desserts, jams and for canning. Indeterminate. **#00838. (A) pkt. (30 seeds) \$3.45**

PINEAPPLE

Purple Coban

70 days. Attractive fruits are smaller than typical varieties, at approx. 1" in diameter, but they are packed with a sweet, distinctive tomatillo flavor. Fruits start off green and ripen to varying shades of mostly purple. Popular in Guatemalan cuisine. Collected in Coban, Guatemala by Baker Creek Seed Company. Indeterminate. **#00835. (A) pkt. (30 seeds) \$3.25**

PURPLE COBAN

While Ornamental Peppers are primarily used for decorative purposes, most are very hot & have little, to no flavor.

Black Pearl

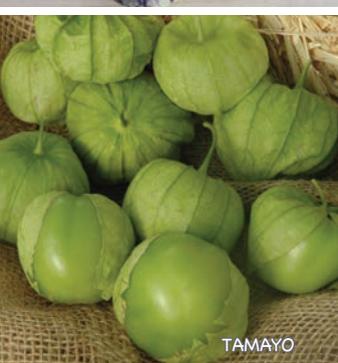

110-125 days. 2006 AAS Winner. (PVP) The first black-leaved ornamental pepper. Ideal for landscapes and mixed containers. Bushy, upright, 14 to 18" plants have a well-branched habit and greenish foliage when young. Produces very hot, shiny, rounded, slightly pointed, black fruits that mature to dark red. Very vigorous with a high tolerance to heat and humidity. **#07302. (A) pkt. (10 seeds) \$6.85**

Chilly Chili Hybrid

72 days. 2002 AAS Winner. Tapered, 2 to 2½" long peppers change from greenish-yellow to orange to dark red in a continual display set off by lush and attractive foliage. Although non-pungent, peppers are edible, their primary use is ornamental. Best when grown in full sunlight. Mounded, upright plants grow to 9 to 10". **#07303. (A) pkt. (10 seeds) \$4.75; (R) 50 seeds \$12.95**

Medusa

72 days. Narrow, twisted, snake-like peppers named for Medusa's mythological hair. Produces huge yields of 2 to 2½" pointed peppers held prominently above dark green foliage with an average display of 40 to 50 non-pungent fruits at the same time. Expect a wide color spectrum ranging from ivory to yellow, orange and bright red. Mounded, upright, naturally dwarf plants grow to 6 to 8". **#07309. (A) pkt. (10 seeds) \$4.95; (R) 50 seeds \$14.95**

TAMAYO

It's Back!

PRETTY N SWEET

ONYX™ RED

NuMex Easter

90 days. 2014 AAS Winner. Bred by the Chili Pepper Institute at NMSU. Plants, 6" tall, are very compact and filled with clusters of 4 to 6 beautiful purple, lavender, yellow and light orange conical fruits that point upward, topping dark green foliage. Fruits are produced continuously in beds, borders and containers. Easy-to-grow. Tolerates heat, drought, humidity and rain. **#07306. (A) pkt. (20 seeds) \$4.95**

Onyx™ Red

110-125 days. 2018 AAS Winner. Naturally compact, 6 to 12" plants have eye-catching foliage that turns dark black/purple under high light conditions. The contrast between the foliage and tons of shiny red fruit is striking – black fruits are equally as striking – and makes a bold statement. Plants are vigorous, yet retain their neat habit. Great for beds, borders and containers. Very heat tolerant. **#07308. (A) pkt. (10 seeds) \$5.95**

Pretty N Sweet Hybrid

60 days. 2015 AAS Winner. An ornamental pepper that can be eaten – and it tastes fantastic! Sweet, multicolored peppers on compact, 18" plants are very attractive in ornamental gardens and containers. Compared to similar varieties, it's earlier, more prolific (harvest weekly in peak season), has thicker walls and a much sweeter taste to enjoy fresh or in your favorite recipes. **#03204. (A) pkt. (30 seeds) \$3.55**

Peppers – Always So Rewarding!

SEEDING

Peppers, like tomatoes and eggplants, are members of the Nightshade Family and thus similar in culture. There are a few differences, however. Peppers absolutely demand warm weather as they are more susceptible to cold weather damage. Never rush transplanting seedlings – be certain all danger of frost and cold weather has passed.

Peppers thrive in soils rich in organic matter, with adequate moisture. Grow in full sun and exercise caution when using fertilizers containing nitrogen, as plants tend to produce excess foliage rather than fruits.

Pepper seeds are best started indoors about 6 to 8 weeks prior to the last average frost date. Pre-soak seeds for 8 hours starting with warm water. After soaking seeds, rinse and sow. Use fresh seed starting mix that is free of fertilizer and has been pre-moistened. Place trays/pots on heating mats (see pg. 8) to provide consistent bottom heat between 80-86°F. Use plastic cover to help retain adequate soil moisture, spritz soil surface with water to keep soil moist, but not soggy. Germination typically takes 14 to 21 days, but hotter peppers may take longer.

Do not allow seedlings to suffer from drought or low temperatures as they develop. Keep them growing steadily and gradually harden them off prior to planting. See page 8 for more information.

GROWING ON

Plant in full sun with an 18" spacing in the rows and a 2 ft. spacing between rows. Cultivate often but not too deep to avoid root damage. Adding mulch can help prevent weed germination and the loss of moisture.

Peppers can also develop Blossom End-Rot, so water well and provide extra calcium by foliar feeding or side-dressing. Staking can be beneficial since plants are brittle. With proper care, plants will produce until frost.

DISEASES

We offer many disease resistant peppers, some of which have X3R® technology. These varieties feature a high resistance to Bacterial Leaf Spot (Xcv) Races 0-3, 7 and 8. X10R® varieties are resistant to all Races of Bacterial Leaf Spot. This is especially important for growers in the Southeast.

WARM TO HOT TYPES

Colorful, hot peppers have become a staple in home gardens and earned the respect they deserve in the culinary world. They offer a full spectrum of taste and heat. With a little information and a little work, you can grow varieties that add the perfect degree of heat to specialty dishes year round.

Anaheim Chiles (also called New Mexican or Colorado Chiles) are long, green chiles that are mildly hot. Meaty, thick-walled pods get sweeter, hotter and redder as they ripen. Anchos (also called Poblanos) are also among the least hot.

Medium-hot Jalapeños are favored as middle-of-the-road chiles – not too hot and not too mild, as are the small Serrano chiles and the medium-mild Pasillas. Chipotles are dried, smoked Jalapeños.

Cayennes, both red and gold types, are very pungent.

Habaneros, once considered the world's hottest peppers, have now been surpassed on the heat scale by Bhut Jolokia (also known as Ghost Chile), Carolina Reaper and Trinidad Scorpion – all rate more than one million Scoville units!

See our **Scoville Heat Scale** on Page 48! 

PEPPER SEED COUNT

One oz. of most pepper seed varieties contains 4,000 seeds. Our pkts. contain the number of seeds stated in the description. Larger sizes contain the following approximate counts:

1/32 oz. contains 125 seeds	1/16 oz. contains 250 seeds
1/8 oz. contains 500 seeds	1/4 oz. contains 1,000 seeds

DID YOU KNOW... All bell peppers start out green due to chlorophyll pigments? Different colored peppers come from the loss of chlorophyll pigments and an increase of expressed pigments such as Beta-carotene & Lutein pigments found in orange & yellow bells.

Our Sweetest Bell Peppers!

Alliance Hybrid

70 days. Because of its disease resistance you'll be ensured of healthy yields of large, mostly 4-lobed, 4½" blocky fruits with thick walls and smooth skin. Fruits mature from green to deep red. Strong plants have good leaf canopy offering protection from sunscald and easy harvest of fruits. Highly resistant to Bacterial Leaf Spot Races 1-3 and 5, Potato Virus Y, Potato Yellow Mosaic Virus, Tobacco Mosaic Virus and Pepper Mottle Virus with intermediate resistance to Cucumber Mosaic Virus.

#03105. (A) pkt. (15 seeds) \$5.95

Baron Hybrid

68 days. Formerly known as Red Beauty. The first widely-adapted red bell, sure to be king of the reds wherever it's grown. Impressive, 4-lobed fruits are packed with heavy, sweet flesh and set early. High yielder.

#03207. (A) pkt. (30 seeds) \$6.95; (V) 100 seeds \$15.95

Big Bertha Hybrid

70 days. One of our most popular varieties for fresh markets, home gardens and gourmet chefs. Extra-large, mostly 4-lobed, superior fruits mature up to a full 7" long by 3½" across, turning deep green to red, with full-season fruiting. Upright plants grow 25 to 30". Resists Tobacco Mosaic Virus.

#03116. (A) pkt. (25 seeds) \$6.55; (V) 100 seeds \$17.95

Big Red

75 days. Large, 3 to 4-lobed blocky bells weigh about 6 oz. and are 5 to 6" long and 5" wide. Attractive fruits mature to a deep, dark red and have thick-walled, very sweet flesh. Excellent for fresh markets and home gardens. Sturdy plants grow to about 24" tall.

#03112. (A) pkt. (30 seeds) \$3.75

Bull Nose

65-80 days. An heirloom dating back to the 1800's. Crisp, 3 to 4-lobed, glossy bells ripen from green to red, have an excellent flavor and can be used at any stage. Peppers grow 3 to 4" and are great fresh, stuffed and pickled. Very productive, extra sturdy plants.

#03108. (A) pkt. (30 seeds) \$3.85

California Wonder 300 TMR

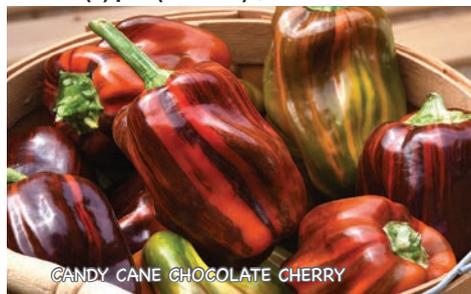

75 days. Deep green to red, thick-walled with an attractive glossy flesh. Fruits are medium-sized, 4" by 4", 3 to 4-lobed, smooth and blocky. A nice stuffer. High yields on plants that grow 28" tall.

#03121. (A) pkt. (100 seeds) \$3.75; (F) 1/16 oz. \$4.95

Candy Cane Chocolate Cherry Hybrid

70-75 days. Attractive, variegated foliage stands out in gardens even as young plants! Attractive mini bells grow up to 3½" long by 2½" wide and ripen from green with unique white stripes to chocolate with cherry red stripes. Early-maturing fruits weigh approx. 3½ to 4½ oz. and have a sweet flavor with a crisp texture – perfect for fresh eating at any stage of ripeness. Green fruits are ready for harvest in 55 to 60 days. Great for containers.

#03123. (A) pkt. (10 seeds) \$4.95

CANDY CANE CHOCOLATE CHERRY

BIG BERTHA

BIG RED

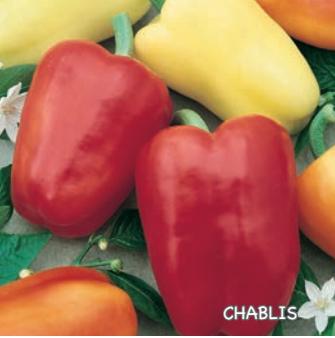

BULL NOSE

CALIFORNIA WONDER 300 TMR

Big, Little, Traditional, Gourmet ...

CHABLIS

Chablis Hybrid

60 days. Early maturity means early rewards from this easy-care variety. Produces blocky, 4" by 3" fruits on plants 18 to 24" tall. Weighty fruits are super sweet, with thick walls that hold their shape. Popular for fresh salsa, salads, frying, stuffing, roasting and pickling. High yields ripen from white to orange to brilliant red. Resistant to Tobacco Mosaic Virus and Bacterial Leaf Spot.

#03129. (A) pkt. (30 seeds) \$4.25

CHINESE GIANT

Chinese Giant

90 days. A mild, mid-season type perfect for home gardens. Uniformly large fruits have a blocky bell shape and thick walls – ideal for stuffing. Sweet flavored and ripens to a brilliant cherry red, each averaging 4 to 5" across and 6" in length.

#03128. (A) pkt. (30 seeds) \$3.55; (D) 1/32 oz. \$7.95

Dragonfly Hybrid

75 days. 2022 AAS Winner. Beautiful, 3½" purple, 4-lobed, blocky bells are deliciously sweet. Unlike other purple varieties that tend to have thin, papery walls, these fruits are thick and meaty. As delicious at the green stage as it is when purple and fully mature. Compared to similar varieties, it has a much better purple color that doesn't fade and has a more robust flavor. Fruits grow high on the plant, hold well and if left on the vine, turn bright red. High yielder. Resistant to Tobacco Mosaic Virus Races 0-2.

#02840. (A) pkt. (10 seeds) \$4.75

DRAGONFLY

Early Summer Hybrid

68-73 days. Beautiful, golden-yellow fruits will impress even the pickiest pepper critics! Extra-large, 4 to 5" fruits mature from dark green to yellow on strong plants with very impressive yields. High quality fruits are firm, smooth and glossy with thick walls and a uniform blocky shape. Excellent disease resistance.

#03141. (A) pkt. (20 seeds) \$5.25

EARLY SUMMER

Early Sunation Hybrid

69 days. One of the earliest, biggest and brightest yellow bells ever! Very fine, extra-large, 4½", smooth fruits mature from green to bright golden-yellow, when they are at their sweetest. An X3R® variety.

#03142. (A) pkt. (20 seeds) \$6.15; (V) 100 seeds \$19.95

EARLY SUNATION

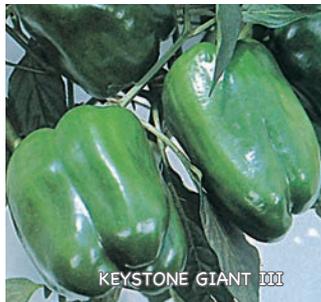

Encore Hybrid

70 days. Extra-large, 5½ to 6" blocky fruits are smooth with thick walls and are slow to turn to a deep dark red. Even under cool temperatures, plants produce abundant yields of high quality peppers that consistently maintain their large size and shape. Plants grow up to 24" and have excellent foliage cover to protect fruits against sunscald. Widely adaptable. Highly resistant to Pepper Mottle Virus and Potato Virus Y Races 0-2.

#03138. (A) pkt. (20 seeds) \$5.35

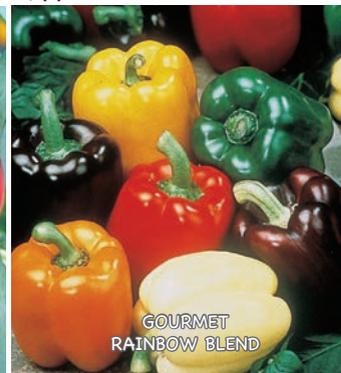

ENCORE

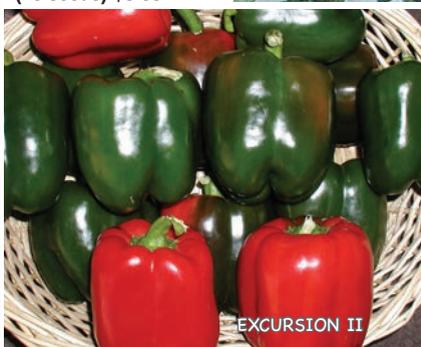

KEYSTONE GIANT III

GOURMET RED IMP.

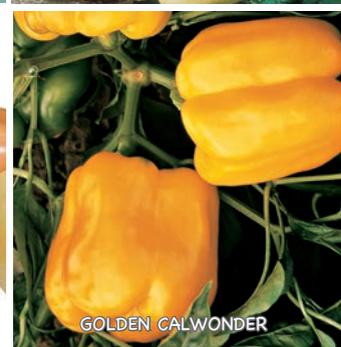

GOURMET RAINBOW BLEND

EXCURSION II

FLAMINGO

GOLDEN CALWONDER

Excursion II Hybrid

75 days. Big, blocky 4½ by 4½" bell peppers have thick walls and a juicy texture. Fruits are 4-lobed, intense deep green and ripen to a shiny, brilliant red. Compact plants produce excellent yields often with 8 to 10 fruits at the same time on a single plant. Resistant to Bacterial Leaf Spot, Tobacco Mosaic Virus and Potato Virus Y.

#03140. (A) pkt. (20 seeds) \$4.95

Flamingo Hybrid

66 days. Very prolific, with high yields of smooth, slightly tapered, 3½" waxy fruits. Matures from creamy ivory to orange-red. Crisp, sweet flesh makes this an excellent choice as a salad pepper. Widely adaptable plants have good Tobacco Mosaic Virus resistance and thrive in open fields and gardens.

#03147. (A) pkt. (20 seeds) \$7.35

Golden Calwonder

72 days. Very similar to California Wonder 300 TMR (pg. 41), except that its smooth, glossy fruits ripen to a beautiful, golden-yellow. Adds rich color and flavor to salads and dishes.

#03154. (A) pkt. (100 seeds) \$3.85; (F) 1/16 oz. \$6.95

Gourmet Rainbow Blend

65-70 days. A formula mix of our most popular bell pepper colors. Grow a rainbow of vibrant sweet bells – red, yellow, green, orange, purple and brown – without buying more seed than you need of each! It's one of our best sellers!

#03158. (A) pkt. (25 seeds) \$3.95; (D) 1/32 oz. \$9.95

Gourmet Red Improved Hybrid

50-60 days. Big, flavorful and sure to be the perfect pick for pepper aficionados. Large, 3 to 4-lobed fruits weigh approx. 4 oz. and have a very sweet flavor. Adds a bright color to salads and veggie trays. Plants, with a semi-upright habit, produce very early and abundantly. Highly resistant to Tobacco Mosaic Virus, Tomato Mosaic Virus and Pepper Mild Mottle Virus.

#03214. (A) pkt. (20 seeds) \$5.65

Keystone Giant Resistant III

72-75 days. Large, blocky fruits, 4½" by 3½", are 4-lobed and have sturdy, thick walls making them the perfect pepper for stuffing! Plants bear heavily, even when under stress. Tobacco Mosaic Virus tolerant.

#03173. (A) pkt. (100 seeds) \$3.65; (F) 1/16 oz. \$5.95

 **King Arthur Hybrid** 

61 days. Formerly known as Fat 'N Sassy. Varieties bred for early yields usually give up some of their size – not so with this one – it's unmatched for its large fruit size and early maturity. Sweet, crunchy, 4-lobed fruits are approx. 4½" by 4½", thick-walled and blocky. Plants grow to about 22" and perform well under a variety of conditions. Tolerant to most diseases. **#03144. (A) pkt. (25 seeds) \$6.25; (V) 100 seeds \$15.95**

King of the North

68-70 days. Excellent in short-season gardens of Northern climates due to early bearing. Huge, blocky shaped fruits are thick-walled, bright red and measure 6" by 4". Great for stuffing. Mild taste becomes even more mellow as the fruits mature. **#03174. (A) pkt. (25 seeds) \$3.75; (V) 100 seeds \$6.95**

Liberty Belle Hybrid

73-78 days. The naturally dwarf habit of this patio variety makes it outstanding for container gardening. Large, blocky bells, 4 to 5½" by 3½" to 4", are an attractive light green and mature to a gorgeous bright yellow. Very sweet peppers are great for stuffing, sautéing, roasting and using fresh. High yielding plants grow up to just 20" and withstand intense heat without fruit damage. Resistant to Tobacco Mosaic Virus. **#03169. (A) pkt. (10 seeds) \$5.15**

Majestic Red Hybrid

70-75 days. Large, 6 to 7", blocky peppers have a mild, sweet flavor, weigh 4 to 6 oz. each and are smooth with thick, crunchy walls. Fruits are heavy for their size and mature from green to a bright candy-apple red. Perfect for stuffing! Medium to large plants provide good foliage cover. Highly resistant to Tobacco Mosaic Virus and Bacterial Spot. **#03175. (A) pkt. (15 seeds) \$4.85**

Mercer Hybrid

72-78 days. Extra-large, attractive, blocky bells grow up to 4½" by 4" and mature from dark green to a brilliant, ruby red. Mid-early maturing variety produces firm, 6½ oz. fruits that have excellent quality. Widely adaptable, it's especially well-suited for the North Eastern U.S. growing regions. Plants are vigorous, sturdy, provide good leaf cover and produce high yields. Highly resistant to Tobacco Mosaic Virus, Bacterial Spot Races 0-3, 7, 8 with intermediate resistance to Phytophthora Root Rot. **#03180. (A) pkt. (10 seeds) \$4.65**

Merlot Hybrid

68 days. Rich, jewel-toned, deep purple, 5" by 4", blocky fruits have gourmet eye-appeal! Bells have crisp, thick walls and a very sweet flavor. Early maturing, high yielding plants are adaptable to cool conditions as well as hot, and grow 18 to 24" tall with good leaf protection. Resistant to Tobacco Mosaic Virus and Bacterial Leaf Spot. **#03190. (A) pkt. (30 seeds) \$4.25; (D) 1/32 oz. \$10.95**

Mini Belle Blend

60 days. A festive, charming mix of tiny bell peppers, just 1¼", on 24" plants. Fruits have sweet, firm flesh that is surprisingly thick and flavorful. All peppers start out green and mature to a range of yellows and reds. Prolific yields. Resistant to Tobacco Mosaic Virus. **#03187. (A) pkt. (30 seeds) \$3.95; (F) 1/16 oz. \$8.95**

Muscato Hybrid

75 days. Deep orange, blocky, 5" by 4" bells are mostly 4-lobed, have very thick walls, are quite heavy and super sweet. Strong compact plants grow up to 24" and initially produce up to 6 peppers – after that first fruit set, they will continue to produce until the first frost. Ideal stuffed, stir-fried, roasted or fresh. Excellent for containers. Early maturing and high yielding. Resistant to Tobacco Mosaic Virus. **#02838. (A) pkt. (20 seeds) \$3.85**

New Ace Hybrid

65 days. Earliness and high yields characterize this hybrid. Perfect for short growing seasons in the North. Deep green, 3-lobed fruits mature to red, weigh approx. 2 oz. and are nice fresh from the vine or for stuffing. Excellent resistance to Tomato Mosaic Virus and Tobacco Mosaic Virus. **#03189. (A) pkt. (20 seeds) \$4.15; (V) 100 seeds \$9.45**

North Star Hybrid

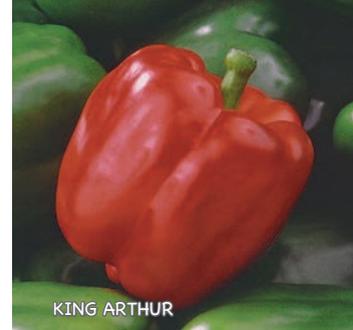

60-65 days. Extremely early and ideal for areas with a short growing season. Deep green, 3 to 4-lobed fruits grow approx. 4½ by 3½" and turn bright red at full maturity. Plants are particularly well-adapted to set blocky fruits even under unfavorable conditions. Tobacco Mosaic Virus resistant. **#03191. (A) pkt. (30 seeds) \$6.85**

Orange Bell

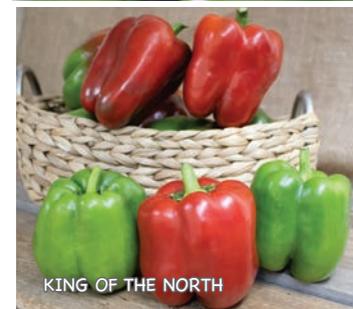

75 days. Beautiful, large, blocky, 3 to 4-lobed bells grow 3 to 4" wide by 4 to 5" long. Thick-walled fruits ripen from green to brilliant orange and have a super sweet flavor. Can be enjoyed at the green stage in just 50 days. Excellent for fresh eating, canning and freezing. Sturdy plants hold fruits high off the ground and produce abundantly. **#02841. (A) pkt. (30 seeds) \$3.95**

Ozark Giant

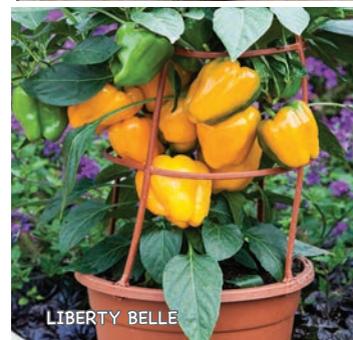

70-85 days. Huge, 8" long, heirloom beauties! Red fruits have a deliciously sweet flavor, are thick-walled and juicy. Can also be harvested at the green stage. Enjoy in salads, salsas and your favorite recipes. Sturdy plants have heavy foliage and should be supported as giant yields can weigh them down. **#03202. (A) pkt. (30 seeds) \$3.85**

PURPLE BEAUTY

Purple Beauty

70-75 days. Perfect for gourmet chefs. Fruits are blocky, 3 to 4-lobed, thick-walled and dark purple. Compact plants set heavily, with good cover to protect fruits from sunscald.
#03201. (A) pkt. (30 seeds) \$3.85; (D) 1/32 oz. \$6.95

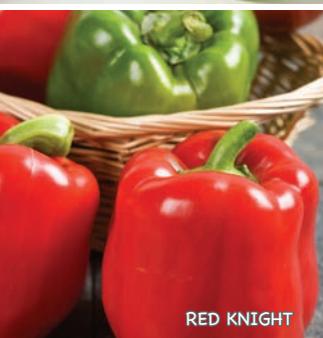

RECOVERY

Recovery Hybrid

60 days. Vigorous plants have an open bush habit and produce smooth, blocky, 4" by 4" sweet fruits with good firmness and thick walls. Very early and quick to mature to red under warm to hot temperatures and can be eaten at any stage. Widely adaptable for cool and warm growing conditions. Perfect for fresh markets. Heavy yielder. Highly resistant to Bacterial Leaf Spot.
#03227. (A) pkt. (20 seeds) \$5.15

Red Knight Hybrid

66 days. One of our earliest maturing X3R® varieties. Big, blocky, thick-walled fruits are approx. 4½" by 4½" and can be harvested green when they are mild or left to mature to bright red for an almost sugary flavor. Perfect for stir-frying, stuffing, and grilling. Widely adaptable. Highly resistant to Potato Y Virus.
#03209. (A) pkt. (15 seeds) \$4.75

RED KNIGHT

Shield® Ninja S10® Hybrid

75 days. Takes on the latest growing challenges, most notably Bacterial Leaf Spot. Shows intermediate resistance to all 10 races of this serious disease, especially important in the Eastern U.S. Extra large, uniform fruits grow up to 4½" long by 4" wide and weigh 8 to 12 oz. each. Blocky fruits are very firm, glossy, mature from dark green to red and have impressive holding ability. Strong, vigorous plants have good leaf cover to protect fruits. Great for farmers markets. Widely adaptable. Heavy yielder. Highly resistant to Tobacco Mosaic Virus as well.
#02823. (A) pkt. (10 seeds) \$4.95

Snackabelle Red Hybrid

70-75 days. Thick-walled, 2 to 2½", peppers have blunt-ends and a rich, sweet flavor that's great for fresh eating – green or red – holds up well through grilling and stuffing. Fruits have an "easy-out" stem and seeds – simply push down or cut around cap to release seed cavity for quick cleaning. Superior disease resistance includes Tobacco Mosaic Virus and Bacterial Leaf Spot Races 1-3, 7 and 8.
#03216. (A) pkt. (10 seeds) \$4.55

SHIELD® NINJA S10®

Summer Sweet® #8610 Hybrid

73-83 days. Well-branched plants produce heavy yields of big, blocky, 3½ to 4½" peppers that ripen from rich green to an attractive golden yellow. Smooth fruits are blemish-free and have a crisp, juicy texture and wonderful sweet flavor. Highly resistant to Bacterial Spot, Tobacco Mosaic Virus and Potato Virus Y.
#03222. (A) pkt. (20 seeds) \$4.95

 8 pkts. for just \$30.75. Save 20%!

Sweetie Pie Hybrid

60-70 days. 2017 AAS Regional Winner (Heartland, Northeast, Southeast). These small, 3 oz. cuties are 2½" by 3", thick-walled, sweet and flavorful and can be eaten at both the green and red stages. Excellent fresh, grilled, stir-fried or stuffed. Compact plants have heavy yields – as many as 30 mini bells each! Perfect for containers and small space gardens.
#03234. (A) pkt. (20 seeds) \$4.75

Tawny Port Hybrid

70 days. Beautiful, port wine colored fruits have an excellent, very sweet flavor. Four-lobed and very large, 4" by 5" bells are perfect for adding unique color to salads and stir-fries. Makes a beautiful stuffed pepper, too! Early and heavy yielding.
#03230. (A) pkt. (30 seeds) \$4.55; (D) 1/32 oz. \$9.95

Trailblazer Hybrid

70-75 days. Large, 8 to 9 oz., blocky, 3 to 4-lobed bells have firm, thick walls. Crispy fruits grow up to 3½" long by 3¼" wide and have a sweet, rich flavor. Peppers have a strong, bright yellow color that lasts longer so they are slower to turn gold/orange, distinguishing this variety from others. Can be enjoyed at the green stage in 50 to 55 days. Fruits have a good shelf life and are perfect for stuffing. Highly resistant to Bacterial Leaf Spot Races 1-3, 7 and 8.
#02839. (A) pkt. (15 seeds) \$4.65

Trifecta Hybrid

50-65 days. Extra-large, blocky, 3½" by 3½", dark green fruits turn scarlet red and have brilliant color inside and out. Delicious, thick-walled bells are perfect for stuffing, grilling and for fresh eating. Perfect for market growers. Strong plants produce high yields and have good leaf cover to protect fruits. Highly resistant to Tobacco Mosaic Virus and Tomato Spotted Wilt Virus.
#03233. (A) pkt. (10 seeds) \$4.55

Valahia Hybrid

65-70 days. Blocky, 3 to 4-lobed, ivory-yellow bells weigh up to 7 oz., measure approx. 3" by 3¾" and mature to deep red. Uniform, burpless fruits have medium thick walls and a deliciously sweet flavor at both stages of maturity. Upright, vigorous plants produce high yields. Highly resistant to Tobacco Mosaic Virus, Tomato Mosaic Virus Race 2 and Blossom End-Rot.
#02826. (A) pkt. (15 seeds) \$4.95

Yellow Monster

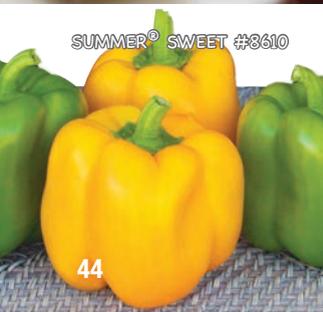

70 days. Harvest heavy yields of giant, elongated fruits. Strong, 27" plants bear sweet, meaty, enormous fruits that can grow up to 8" long by 4" wide. As the fruits mature from green to bright sunny yellow the sweet flavor intensifies. Perfect fresh, fried, stuffed or roasted.
#03235. (A) pkt. (30 seeds) \$3.95

Aruba Hybrid

65 days. Unique, elongated, 3 to 4-lobed, cubanelle-type fruits grow approx. 5½ to 6½" long and have a distinctive flavor that is mildly sweet and fruity with a just a hint of heat. Perfect for salads and stir-fries. Peppers mature from lime-green to orange to red to chocolate. Vigorous, upright plants produce heavy yields.

#03103. (A) pkt. (25 seeds) \$5.95; (V) 100 seeds \$14.95

Biscayne Hybrid

63 days. An improved cubanelle with 5", blocky, 3 to 4-lobed fruits that have thicker walls than the older varieties. Other improvements are an earlier maturity, more prolific yields and a flavor that's sweeter than open-pollinated types. Excellent for frying.

#03221. (A) pkt. (30 seeds) \$5.75; (V) 100 seeds \$17.95

Candy Cane Red Hybrid

60-65 days. These unique, sweet beauties will stand out at roadside stands and in gardens. Elongated, 3½ to 4" by 1¼ to 1¾" fruits ripen from green with creamy white stripes to solid red. Thin walls and crispy texture make it perfect for fresh eating at any stage of ripeness. Plants grow 18 to 24" and have unique, eye-catching variegated foliage giving them an ornamental look. Ideal for patio containers and small space gardening.

#03118. (A) pkt. (10 seeds) \$5.15

Carmen Hybrid

60-80 days. 2006 AAS Winner. A distinctive horn-shaped Italian pepper with a delightful flavor that's noticeably sweeter (at the red stage) than other varieties, raw or cooked. Great fresh, roasted and grilled. Firm, tapered fruits weigh approx. 5 oz., are 6" long by 2½" wide at the shoulders and mature from green to red on upright, leafy plants. Excellent yields, widely adaptable, reliable and easy-to-grow.

#03127. (A) pkt. (15 seeds) \$5.45; (V) 100 seeds \$19.95

Cavalcade Hybrid

65-70 days. If you're a fan of Pageant, you really need to give this one a try! Smooth, slender fruits retain their bright yellow color longer providing flexibility in harvest. Thick-walled peppers, 7½" long by 1½" wide, mature to bright red and are ideal for eating fresh or for pickling. An excellent variety for container gardening. Widely adaptable and high yielding.

#03107. (A) pkt. (20 seeds) \$4.95

DID YOU KNOW... Pepper plants are susceptible to many of the same fungal diseases as tomato plants?

Techniques for reducing fungal issues include avoiding overhead watering, wide plant spacing for better air circulation, quick removal of severely infected plants, rotating crops yearly, ample amounts of clean mulch under & around plants at planting time and proper sanitation methods like cleaning hands, gloves & tools that come into contact with diseased plants.

Cherry Pick Hybrid

68 days. Fruits measure 1¼" by 1¼" and are uniform in size and shape. Yield is superb, with tall, 24", vigorous plants setting loads of sweet, dark green fruits that mature to red, although normally harvested in the green stage. Makes excellent pickled peppers. Disease resistant and about 25% larger than the old strains.

#03126. (A) pkt. (20 seeds) \$5.95

Corbaci

75 days. Slender, sweet, 10 to 12", unique fruits change from light green, to yellow, to orange and finally to bright red. A perfect choice for fresh eating, pickling or frying, this rare heirloom is from Turkey and has a very rich, sweet flavor. Harvest edible, green fruits in as little as 55 days or allow to fully mature at 75 days. Plants should be staked as very heavy yields will cause the plants to fall over.

#03125. (A) pkt. (30 seeds) \$3.75

CORNITO HYBRID SERIES

75 days. Cornitos are only 5" long and 1 to 1½" wide at the shoulders, very early, deliciously sweet and attractive smaller versions of Carmen and Escamillo (pg. 46), with similar maturity. Perfect for grilling and roasting just like their full-size counterparts or eating fresh. Great for roadside stands. Strong, sturdy plants yield prolifically all season long.

Giallo #03117. 2016 AAS Winner. Rosso #03122.

Prices, above 2, per variety:

(A) pkt. (25 seeds) \$7.25

Corno di Toro Red

72 days. Heirloom "Horn of the Bull" pepper imported from Italy. Fruits are 8 to 10" long and curved much like its namesake. Ripens to a gorgeous red cone at maturity with superb taste and size. Tall plants are very vigorous.

#03134. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$8.95

CREST HYBRID SERIES

50-60 days. Medium, thick-walled, Japanese conical-type sweet peppers are 6 to 7" long. Semi-upright plants produce smooth, tapered 4 oz. deliciously sweet fruits that mature early. Good leaf canopy provides protection from sunscald. Highly resistant to Tobacco Mosaic Virus, Tomato Mosaic Virus and Pepper Mild Mottle Virus.

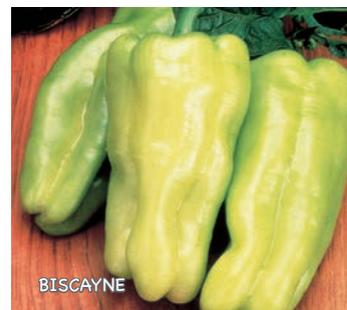

Red #03135. Yellow #03136.

CUBANELLE

Cubanelle

65 days. Sweet Italian frying type with a delicious taste. Long, green, thick-skinned fruits have 2 to 3 lobes and turn yellow, then bright red at maturity. Peppers measure about 5½" long by 2½" wide and are tasty when fried in olive oil.

#03139. (A) pkt. (100 seeds) \$3.45; (F) 1/16 oz. \$5.95

DELITE® ORANGE

DELITE® HYBRID SERIES

58-65 days. A favorite for the whole family!

Large-fruited snack peppers have very early maturity and good heat setting ability. Fruits grow to approx. 2½ to 4" long by 1½" wide and weigh up to 1¼ oz. each. Crunchy, flavorful, smooth and firm with glossy bright colors at full maturity. High in Beta-carotene and Vitamin C, attractive fruits ripen from green to deep orange and ruby red. Excellent for container gardening. Upright vigorous plants provide good fruit cover and are high yielding. Easy to care for. Highly resistant to Tobacco Mosaic Virus and Bacterial Spot Races 0-3, 7 and 8.

Orange #02836.

Ruby #02837.

Prices, above 2, per variety:

(A) pkt. (5 seeds) \$6.95

Escamillo Hybrid

60-80 days. 2016 AAS Winner. Eye-catching corno di toro-type, 6 oz., golden yellow fruits are big and bold, growing up to 8" long with broad, 2½" shoulders. Peppers have an outstanding, deliciously sweet flavor and are excellent raw, cooked, sautéed, stuffed or fire roasted. Peppers are held high on the plant, minimizing rot and making them easier to harvest. Plants are compact and high yielding.

#03146. (A) pkt. (15 seeds) \$6.55

DELITE® RUBY

Felicity Hybrid

90 days. A heatless Jalapeño type. Continuously sets large fruits that turn from green to red when mature. Plants have strong vigor and produce high yields of peppers that have thick walls and weigh approx. 1 to 1½ oz.

#03029. (A) pkt. (20 seeds) \$4.75

ESCAMILLO

Giant Marconi Hybrid

70 days. 2001 AAS Winner. Not technically a marconi pepper, but displays so many similar traits it has earned the name! Large, tapered fruits grow 6 to 8" by 3" and have a sweet, smoky flavor that's equally delectable green or red, fresh or grilled. Widely adaptable, it produces larger than normal crops. Withstands severe weather. Highly tolerant to Tobamovirus Races 0-2.

#03151. (A) pkt. (25 seeds) \$5.75; (V) 100 seeds \$14.95

GIANT MARCONI

GOLDEN TREASURE

GYPSY

HABANADA

Golden Treasure

80 days. Italian heirloom variety with long, very attractive, 9" fruits that mature from green to shiny yellow. Peppers have a nice, sweet flavor with medium thick flesh and tender skins.

Excellent for stuffing, frying, roasting and fresh eating.

#03155. (A) pkt. (20 seeds) \$3.25

Gypsy Hybrid

60 days. 1981 AAS Winner. An extremely early, heavy producer of wedge-shaped, tasty, 4" long by 2" wide peppers with sturdy walls and crunchy, firm, sweet flesh. A reliable yielder all season long. Plants grow to 18" tall. Tobacco Mosaic Virus resistant.

#03163. (A) pkt. (25 seeds) \$5.95; (V) 100 seeds \$14.95

Habanada

70-90 days. A heatless habanero with an irresistible tropical flavor. Extremely productive plants produce 2 to 3" fruits that ripen from lime green to fluorescent orange and can be eaten at any stage. Excellent sautéed, pickled, roasted or fresh. Bred by Dr. Michael Mazourek of Cornell University.

#03162. (A) pkt. (15 seeds) \$4.25

Hungarian Cheese Mix Hybrid

65-68 days. This fun mix is very early maturing, yet sets continuous high yields. Peppers hang like ornaments on top of prolific, 18 to 24" plants. Fruits are flattened and round, with flutes around the stem end and unlike other mini-sweet peppers they have thick walls. Harvests have a long shelf life and are the perfect shape for stuffing. They also are great for salsa, fresh eating, canning or pickling – even use them as bowls for individual dip cups. Great for gardens or containers.

#03215. (A) pkt. (20 seeds) \$5.25

Jimmy Nardello's

80-90 days. An Italian heirloom from the 1800's. Sweet, tapered fruits mature to fire engine red when mature and grow approx. 10" long. A favorite for frying or eating fresh – green or red. Freezes and dries well. Bushy plants produce high yields.

#03167. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.95

Just Sweet Hybrid

65-75 days. 2019 AAS Winner. Attractive, unique snacking peppers are 4-lobed and look like elongated miniature bells. Fruits are approx. 3" long, have thick walls and crispy, delicate skin that's an exceptionally bright, shiny golden yellow, sometimes with hints of orange. Flavor is both sweet and tart with aromatic accents. Great eaten fresh, sautéed and stuffed. Plants are vigorous growers, up to 36" tall, and have been bred to have a strong, upright, bushy habit. Highly resistant to Tobamovirus.

#03166. (A) pkt. (10 seeds) \$5.95

With A Not So Traditional Look!

Lunchbox Mix

75-83 days. Equal amounts of red, yellow and orange snack peppers make up this colorful mix. Beautiful, mini-sized, 2 to 3" fruits are remarkably sweet and flavorful, with red being slightly smaller and noticeably sweeter. Delicious fresh as a healthy snack, in salads or sautéed. Enjoy green fruits in just 55 days. Strong plants yield well.

#03177. (A) pkt. (10 seeds) \$4.95

Mama Mia Giallo Hybrid

85 days. 2014 AAS Winner. Bright yellow, tapered fruits grow 7 to 9" long and are very uniform with smooth skin and sweet flavor. Excellent fresh, roasted or grilled – this Italian sweet pepper is a winner both in the garden and at the dinner table. Plants are somewhat compact at 20 to 24" tall with excellent leaf coverage to protect peppers from sunburn. Strong stems support the heavy yields of up to 30 fruits per plant. Tobacco Mosaic Virus resistant.

#03186. (A) pkt. (25 seeds) \$3.95

Marconi

70-72 days. An Italian type with traditional long, green, sweet, crunchy peppers that mature to red. Large plants bear tasty, 3-lobed fruits that grow up to 12" long by 3" across at the shoulders. Good at both the green or red stage for salads, stuffing and frying.

#03183. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$10.95

Margaret's

62 days. If you love growing giant sweet peppers, this is the variety you don't want to pass up. Huge fruits, approx. 7" long, will be some of the sweetest, biggest and most attractive peppers you'll ever grow. Maturing from green to orange to bright red and finally to deep red, these thick walled fruits have an outstanding mild, sweet flavor. The original seed was hand carried from Hungary to the U.S. and carefully maintained for over 50 years. Plants bear early and prolifically.

#03184. (A) pkt. (20 seeds) \$3.95

Melrose

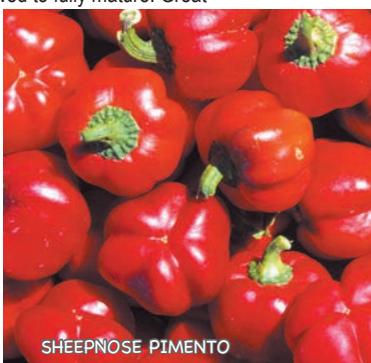

55-75 days. A superb heirloom brought to the U.S. from Italy many years ago. Tender and sweet, thin-skinned, 4" fruits ripen to a brilliant red and are produced very early. Fruits can be enjoyed when harvested green, but the flavor will become sweeter and more intense when allowed to fully mature. Great fresh, stuffed or fried.

#03181. (A) pkt. (30 seeds) \$3.75

DID YOU KNOW... Cold night temps can cause pepper flowers to drop or prevent fruit set?

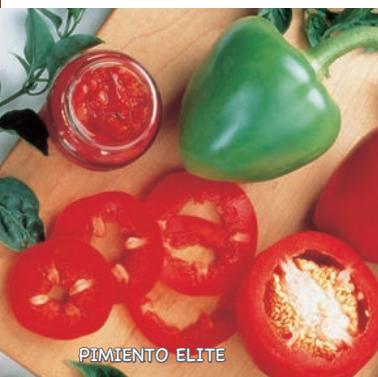

Likewise, hot, dry conditions can cause flowers and newly set fruits to drop off. High temps around the time of fruit set are usually responsible for misshaped peppers.

SHEEPNOSE PIMENTO

SWEET BANANA

PIMIENTO ELITE

PIMENTO L

ORANGE BLAZE

Nadapeño

75 days. A great choice for those who want the jalapeño flavor, but without the heat. This variety was bred to have no heat, yet keep the flavor and appearance of traditional jalapeños – no gloves needed for chopping or slicing! Attractive fruits are 3" long, ripen from green to red and are great for fresh use, stuffing and roasting. Sturdy plants produce heavy yields. Bred by A. P. Whaley Seed Company.

#03194. (A) pkt. (25 seeds) \$3.85

Orange Blaze Hybrid

65-70 days. 2011 AAS Winner. Snack-type, intense orange, 1 to 2-lobed fruits weigh 3½ to 5 oz., are 3 to 4" long by 1½" wide, shiny and blemish-free. Very sweet and early to mature, with multiple disease resistances. Flavor and color peak at the same time, letting you time your harvests to perfection. An X3R® variety.

#03192. (A) pkt. (10 seeds) \$6.25

Pimento L

95-100 days. One of the mildest pimento-types. Heart-shaped fruits mature from dark green to deep red. Ideal for salads, garnishes and canning. Compact, 18" plants produce high yields. Tobacco Mosaic Virus resistant.

#03200. (A) pkt. (100 seeds) \$5.95

Pimiento Elite Hybrid

75 days. The first hybrid version of the pimiento pepper, with extra-heavy yields of thick-walled fruits measuring 3" long by 3½" across. Fruits, less heart-shaped than Pimento L, are more oblong or oval.

#03199. (A) pkt. (30 seeds) \$5.95

Sheepnose Pimento

80 days. A tried-and-true heirloom. Pimento-shaped, 3" by 4" fruits are very sweet and meaty, making them ideal for canning, freezing and eating fresh. Plants are very productive and fruits keep for weeks in the refrigerator.

#03212. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$8.95

Sweet Banana

66 days. One of the most popular peppers, excellent fresh or cooked! Thick-walled, pendant fruits with sweet, mild, waxy flesh start out a pale green, ripen to yellow, then red. Prolific plants grow 16 to 24".

#03217. (A) pkt. (100 seeds) \$3.55; (F) 1/16 oz. \$5.95

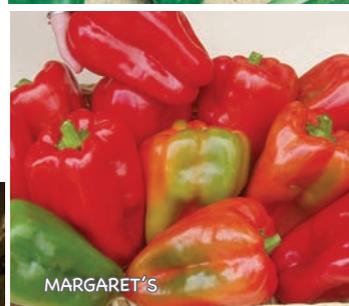

LUNCHBOX MIX

MELROSE

NADAPEÑO

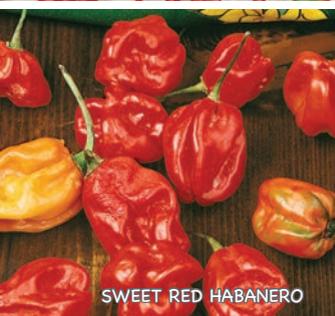

SWEET CAYENNE

Sweet Cayenne

75 days. Sweet and Cayenne – two words that aren't typically used together! Unique, cayenne-shaped, sweet peppers have crunchy, thin walls and grow up to a whopping 12" long! Excellent in stir-fries. Plants produce high yields of fruits that mature from green to red. This variety has it all – except the heat!

#03223. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$5.95

SWEET RED HABANERO

Sweet Red Habanero

80-85 days. Habaneros have continually gained popularity among hot pepper lovers, but there are some that love the flavor they're known for, they just can't take the heat! If you're one of those people, you'll definitely want to try this heatless beauty. Attractive red, lantern-shaped peppers have the same fruity flavor, but without the scorching heat. They mature slightly earlier than standard habaneros. Plants are eye-catching grown in containers on the patio.

#03226. (A) pkt. (30 seeds) \$4.95

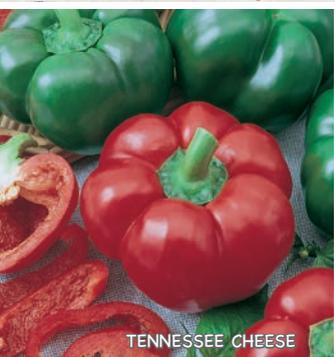

SWEET SUNSET

Sweet Sunset Hybrid

85-90 days. 2015 AAS Regional Winner (Heartland, Southeast, West/Northwest). Colorful, thick-walled banana peppers range from yellow to orange to red and grow approx. 7½" by 1½" at the shoulders. Great fresh, as well as for frying, pickling or cutting into rings for salads, sandwiches and pizza toppings. Compact plants are perfect for container and small space gardening. High-yielding, vigorous, produces early, often and continues late into the season. An X3R® variety.

#03218. (A) pkt. (15 seeds) \$5.75

TENNESSEE CHEESE

Tennessee Cheese

82 days. An ancient heirloom recovered from seeds donated by a couple living in Kingston, Tennessee years ago. Originally from Spain, where it is still used as a staple in many dishes. Fruits are round, apple or tomato-shaped, with a flattened base and a thick, delicious skin. Perfect for stuffing like a bell, fresh, pickled, canned or dried for paprika.

#03228. (A) pkt. (30 seeds) \$3.55; (D) 1/32 oz. \$5.95

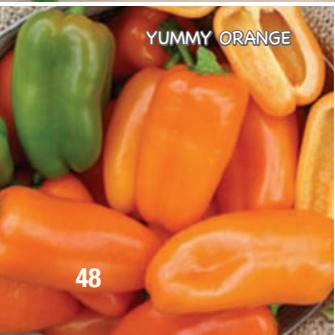

TRICKED YOU

Tricked You Hybrid

90 days. An improved version of the very popular Fooled You that has become a favorite in its own right. Easy-to-grow, 4" fruits have excellent jalapeño flavor without the heat. Great for combining with hot jalapeños to customize the level of heat in homemade salsa and hot sauce. An X3R® variety.

#03090. (A) pkt. (15 seeds) \$5.45

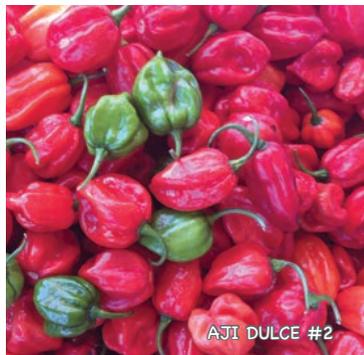

YUMMY ORANGE

Yummy Orange Hybrid

73 days. Large, sturdy plants continuously set loads of petite, 2½" by 1¼", snack-type fruits. These tender-crisp, super sweet, nearly seedless delights are perfect for vegetable trays, used with dips, stuffed with cheese or grilled on skewers. Keeps well for a long time without refrigeration.

#03240. (A) pkt. (15 seeds) \$5.35

AJI DULCE #2

AJI RICO

Hot Peppers – From Mildly Spicy...

PLEASE NOTE:

Seeds & fruits can be very hot! We suggest wearing plastic gloves when handling these varieties.

SCOVILLE HEAT SCALE

100-3,500 Units

Smoulderin'

3,500-30,000 Units

Sizzlin'

30,000-100,000 Units

Smokin'

100,000-700,000 Units

Ragin'

Scorchin'

Cultural and environmental conditions like heat, drought and ripeness at harvest can affect the potential heat of a pepper.

Aji Dulce #2

85-90 days. Attractive peppers look just like fiery hot, red habaneros, have a similar aroma and flavor but without all the heat! Fruits have medium thick flesh and a nice fruity flavor that has only a hint of heat even when you use seeds and all. Popular in Central and South America for dishes that require that great habanero flavor but much lower levels of heat. Tall plants are very sturdy and produce an abundant harvest.

#03101. (A) pkt. (15 seeds) \$4.55

Aji Rico Hybrid

60-70 days. 2017 AAS Winner. Thin-walled, crunchy, 3 to 4" fruits have a delicate, citrus flavor combined with a good amount of medium heat. Narrow, conical shaped fruits mature from green to red and can be eaten at any stage. Matures earlier, has more plant vigor and is more productive than comparable open-pollinated types. Perfect for eating fresh, in salsas and making hot sauces. Dries well for a homemade spicy paprika.

#03752. (A) pkt. (10 seeds) \$4.95

Aleppo

80 days. Attractive, thin-walled fruits grow 4 to 6" long, are mostly 3-lobed and ripen from green to rich red to burgundy. Moderately hot with about 10,000 Scoville units. Flavor is sweet and smoky with a kick of heat. Grown in Aleppo, Syria for centuries where it was traditionally used for drying and crushing into pepper flakes or grinding into powder. Fruits can also be enjoyed fresh. Very productive plants can grow 3 to 4 ft. tall.

#03776. (A) pkt. (30 seeds) \$4.45

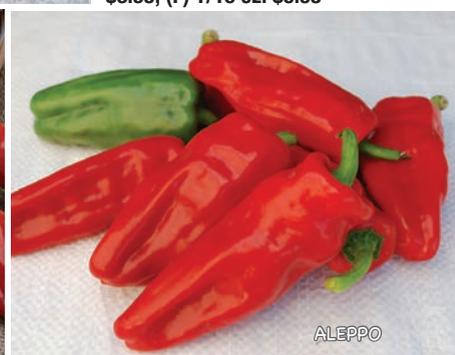

Anaheim Chili

75 days. One of the most popular chili peppers. Two-celled, mildly hot fruits, with medium thick, dark green flesh, ripen to bright red and have a Scoville rating of 500 to 2,500 units. Good fried, canned or dried. Continuous bearing, high yielding, vigorous, 24 to 30" plants are bushy and upright, providing good foliage cover to protect fruits.

#03001. (A) pkt. (100 seeds) \$3.95; (F) 1/16 oz. \$6.95

ANAHEIM CHILI

ALEPPO

Ancho Gigantia

80 days. Thick-walled, 3" long by 2¼" wide peppers are mildly hot with a Scoville rating of 2,000. Green fruits mature to red and can be eaten at either stage. Perfect fresh, roasted, stuffed and can be dried at the red stage.

#09200. (A) pkt. (30 seeds) \$3.95

Big Jim

75-80 days. Released by New Mexico State University. One of the largest of the chile peppers, with mildly hot fruits measuring 10 to 12" long and weighing up to 4 oz. Excellent for Chiles Rellenos. Sturdy 24 to 36" plants yield 24 to 30 peppers per plant which tend to ripen all at the same time.

#03008. (A) pkt. (50 seeds) \$3.95; (D) 1/32 oz. \$6.95

Biggie Chile™ Hybrid

68 days. (Sahuaro Cultivar) An improved Big Chile II with stronger plants and a heavier leaf canopy that protects fruits from sun-scald. It has the same great qualities – early maturity, huge yields, impressive, thick-walled fruits up to 9" long and a mild rating of 500 Scovilles on average. Light green fruits will mature to a bright red if left on the vine. Great for roasting or slicing to add the perfect zest to pizzas or salads. Resistant to Pepper Mild Mottle Virus.

#03009. (A) pkt. (20 seeds) \$5.95; (V) 100 seeds \$17.95

Black Magic Hybrid

65 days. Unique, very dark green, almost black fruits are thick-walled, grow approx. 3 to 4" long, have a Scoville rating of 2,500 units and will show some etching when ready to harvest. Fruits will turn red if left on the vine too long. High yielding plants have intermediate resistance to Bacterial Leaf Spot Races 1-3.

#03003. (A) pkt. (15 seeds) \$4.95

Burning Bush™ Hybrid

85-100 days. Connoisseurs of hot peppers know that the best varieties temper heat with a touch of sweet. Medium-large fruits have plenty of fire at the leading edge with a pleasant aftertaste. Strong plants produce excellent sets of firm fruits that mature green to orange, averaging 1½" by 3" in length. One of the earliest maturing varieties of its type on the market, up to 3 weeks earlier, with a Scoville rating of 15,000 to 20,000 units.

#03022. (A) pkt. (15 seeds) \$5.95

Cajun Belle

61 days. 2010 AAS Winner. The perfect combination of mildly spicy, but still sweet flavor makes this the perfect choice to add zing to salsas, salads and stir-fry dishes. Fruits ripen green to red and can be eaten at either stage. Uniform plants reach 24" in width and height, producing plentiful yields of firm-walled fruits that average 3½ to 4" at maturity.

#03019. (A) pkt. (10 seeds) \$4.85

Carranza Hybrid

90 days. Unlike most peppers, anchos/poblanos prefer cool growing conditions – not this variety – it was specially bred for performing in the heat. Large, 7" by 3", mostly 2-lobed fruits have a classic poblano shape. Mildly spicy fruits have a Scoville rating of approx. 500. Compact plants make harvesting easier. High yielding. Perfect for farmers markets. Intermediate resistance to Nematodes.

#03769. (A) pkt. (10 seeds) \$4.55

Cayenne Large Red Thick

75 days. Quite hot, thick-fleshed, 6" by ¾" fruits are a favorite for using dried, pickled or in sauces. Concentrated sets of pendant fruits – wrinkled, tapered and curved – are borne on strong upright plants. Ripens from a lustrous dark green to a brilliant scarlet.

#03016. (A) pkt. (100 seeds) \$3.85; (F) 1/16 oz. \$6.95

Cayennetta Hybrid

69 days. 2012 AAS Winner. Attractive in containers or patio gardens with a prolific display of colorful, cascading fruits that are protected from sun scorch by the dense canopy of foliage. Elongated, mildly spicy, 3 to 4" green fruits mature to glossy red. An all-around good choice for home gardeners.

#03012. (A) pkt. (10 seeds) \$6.95

Count Dracula

110 days. Jet black leaves and purple flowers create a striking display on sturdy, 2 ft. plants. Adding to the drama are 2" long, black fruits which ripen to blood red. With a rating of 25,000 Scovilles, these spicy hot peppers definitely have a bite.

#03006. (A) pkt. (10 seeds) \$5.05

Cowhorn

75 days. 2023's Free Trial. Tapered, thick-walled, 6 to 9" cayenne peppers have a curled horn shape and mature from green to bright red. Fruits have a good flavor and are medium hot with an average of 5,000 to 8,000 Scoville units. Great for drying and making hot sauces.

#03779. (A) pkt. (30 seeds) \$3.75

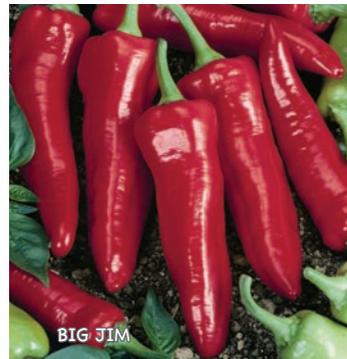

Craig's Grandé Jalapeño

70 days. A great garden staple for jalapeño lovers. Large, 3 to 4" long fruits weigh 3 oz. and have thick flesh making them great for stuffing, roasting, drying, pickling or using fresh. Matures from green to red when they are at their hottest. Short, stocky plants are loaded with hefty fruits from mid-summer up until frost.

#03759. (A) pkt. (30 seeds) \$3.65

CAYENNE LARGE RED THICK

CARRANZA

DEVIL SERRANO

Devil Serrano

73 days. High yields of dark green, finger-sized, glossy fruits begin to mature early so you can enjoy them all season, but be prepared – with a rating of 6,000 Scoville units, it's quite hot. Prized for its vigorous habit and extended shelf life, both in the U.S. and Mexico. Semi-determinate plants are easy to harvest, with less sprawl and a more efficient use of garden space.
#03080. (A) pkt. (20 seeds) \$5.15

DRAGON GRILLING

Dragon Grilling Hybrid

75-80 days. A unique hybrid selected from Shishito and Padron peppers, combining the best traits from both varieties to get the perfect grilling, roasting or stir-fry pepper. Fruits are not spicy when picked young, tender and green at less than 2" long, however, when fruits are fully matured to red, they can be quite spicy, similar to a jalapeño. Red pods can also be dried and used for mild to medium chile flakes. Plants are high yielding.
#03765. (A) pkt. (25 seeds) \$4.15

Early Jalapeño

60-65 days. Ideal for Mexican dishes. Deep green, sausage-shaped, 3½" by 1½" fruits mature to red and are great for pickling, too. Just like Jalapeño, but earlier and better adapted to cool, coastal conditions. Compact, non-brittle bushes.
#03028. (A) pkt. (50 seeds) \$3.95; (F) 1/16 oz. \$7.95

EARLY JALAPEÑO

Emerald Fire Hybrid

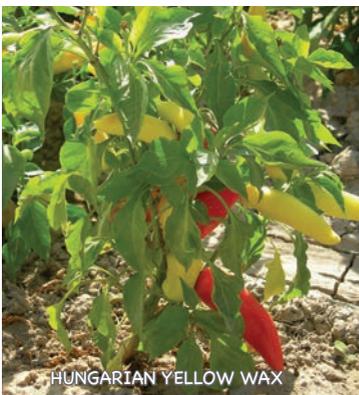

90 days. 2015 AAS Winner. Compact plants boast extra large, 3½", very tasty, jalapeño fruits with medium heat at 2,500 Scoville units. Perfect for stuffing, grilling, using in salsa and canning. Thick-walled with very little cracking, even after maturing to red. A high yielding X3R® variety featuring better disease resistance than similar types.
#03039. (A) pkt. (15 seeds) \$4.65

Fish

90 days. An heirloom considered by many to be the best variety to use when cooking fish and shellfish. High yields of very hot, pointed fruits, about 1½" long, range from white with green stripes, to orange with brown stripes, to a brilliant red – some deep purple, too. Plants, 18 to 24", feature decorative green and purple foliage splashed with white. Makes an attractive ornamental, as well. Good for container gardening.
#03033. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$8.95

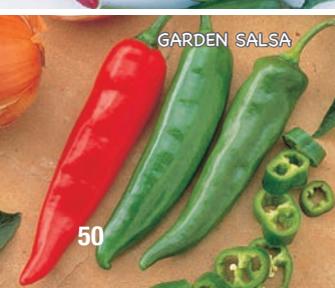

EMERALD FIRE

HUNGARIAN YELLOW WAX

FISH

GARDEN SALSA

GONG BAO

HOLY MOLÉ

HOT SUNSET

Garden Salsa Hybrid

73 days. A chile pepper developed specifically to capitalize on the growing popularity of salsas. Fruits are 8" long by 1" across and are usually picked green for salsa (they mature red). Peppers average 2,500 to 3,000 Scovilles and are great for pickling. Highly resistant to Potato Y Virus Races 0-1 and Tobacco Mosaic Virus.
#03036. (A) pkt. (25 seeds) \$6.75; (V) 100 seeds \$16.95

Gong Bao Hybrid

85 days. Named for the popular Chinese dish, the slender, thin-walled, 3 to 5" long peppers have a deliciously spicy flavor. Peppers have a Scoville rating of 3,000 to 6,000 and can be used fresh or cooked – also easy to dry for use throughout the year. High yielding plants set fruit continuously.
#03075. (A) pkt. (15 seeds) \$5.85

Holy Molé Hybrid

85 days. 2007 AAS Winner. Gourmet quality fruits are bright green at early maturity, then darken to warm brown over the next 2 weeks. Crunchy fruits grow 7 to 9" long and 1½" wide. Not overly spicy at just 700 Scovilles and used as a staple in Mexico's famous Molé sauce and many other dishes. Early crops are most often sliced for toppings and baking, while the dark brown, fully mature fruits can be dried and ground. Sturdy 3 ft. plants produce multiple harvests.
#03046. (A) pkt. (20 seeds) \$5.85

Hot Sunset Hybrid

85 days. 2015 AAS Regional Winner (Southeast, Heartland, Great Lakes). Banana pepper lovers who desire a prolific and earlier harvest of delicious and spicy fruits with 600 to 800 Scovilles, are sure to make this X3R® variety a favorite. Thick-walled peppers have a great flavor, unlike other hot peppers where heat is all you get. Vigorous plants produce tasty and attractive fruits, up to 7", all season long. Perfect fresh, grilled, roasted or pickled.
#03054. (A) pkt. (15 seeds) \$4.95

Hungarian Yellow Wax

67 days. Spicy, fairly hot, banana-shaped fruits are 6" long by 1½" wide and are perfect for pickling. Matures from light yellow to bright red. Best hot pepper for cooler climates. Ever-bearing plants are 16 to 24" tall, strong and upright.
#03045. (A) pkt. (100 seeds) \$3.75; (F) 1/16 oz. \$6.95

Cast iron, 9" pan is pre-seasoned with a rust proof coating and has eight pepper shaped wells. Can be used on stove tops, grills, campfires or in the oven. Easy cleanup. Instructions and recipes included. #54054. \$23.95 each

Inferno Hot Banana Hybrid

60 days. Early and produces big, 8" long by 1½" wide fruits that are ultra-smooth, with outstanding flavor – just hot enough to taste good with everything. Matures from yellow to red and has a Scoville rating of 800 to 1,000. High yielder.

#03048. (A) pkt. (20 seeds) \$5.25; (V) 100 seeds \$19.95

La Bomba II Hybrid

56 days. A high quality jalapeño with good flavor and medium heat with a Scoville rating of 1,800 to 5,000 units. Large, 2¾" long by 1" wide, dark green fruits have thick walls with little to no etching and are great fresh or used for poppers. Strong, upright plants have a sturdy main stem for easy harvest, plus a dense leaf canopy to help prevent sunscald. Resists Potato Virus Y. Good for container gardening.

#03057. (A) pkt. (10 seeds) \$4.75

Lone Ranger Hybrid

60-75 days. (Patent 11,324,189) A serrano variety with large, light to medium green fruits that maintain their size throughout the entire growing season. Hot, 1 oz. fruits, with a Scoville rating of up to 22,000 units, average 4½ to 5" long, have thick walls and an extra long shelf life. Great for farmers markets. Plants have excellent cover and good heat setting ability. Highly resistant to Bacterial Spot Races 0-3, 7 and 8.

#03051. (A) pkt. (15 seeds) \$4.45

Longhorn Hybrid

85-95 days. Long, 6 to 9" fruits are much larger than comparable varieties and have an unusual curl at the end – hence the name Longhorn. Peppers have an excellent spicy flavor with a Scoville rating of just 15,000 to 20,000 units. Vigorous plants can be grown in containers, but will require support due to the large volume of fruit.

#03782. (A) pkt. (10 seeds) \$5.35

Mad Hatter Hybrid

65-75 days. 2017 AAS Winner. Judges were impressed with this plant's vigor, earliness, high yields, large fruits and awesome taste. Uniquely shaped, specialty peppers, 2 to 3½" by 2 to 2½", have a delicate floral scent and rich flavor that intensifies as it matures. In hot, dry climates some fruits will have a touch of heat close to the seed cavity, but the 'wings' are always sweet. Excellent fresh, pickled or stuffed. Plants are very productive, yielding more than similar open-pollinated varieties.

#03178. (A) pkt. (10 seeds) \$5.15

Colander Trug

The perfect kitchen and garden companion. From the garden or the grocer, this large, lightweight, easy-to-use colander is perfect for harvesting and cleaning fruits and vegetables. Features drainage holes in one end – simply

rinse, tilt and drain. Made of durable, recycled plastic with sturdy handles that fold down for convenient storage. Measures 22"L x 12"W x 4¾"H and weighs just ½ lb. **#54654. \$25.95; 2+ \$23.45 each**

Mariachi Hybrid

66 days. 2006 AAS Winner. Delicious, mild, fleshy, 4" by 2" fruits are low in pungency and have a Scoville rating of just 500 to 600 when grown under non-stressful conditions. Fruits mature red but are usually harvested yellow. Ready a full 10 days earlier than most other chile types. Delicate gourmet flavor with fruity overtones, lends itself well to cooking, grilling, pickling and salads. Widely adaptable, 24" plants set fruits continuously.

#03058. (A) pkt. (20 seeds) \$6.25

Megatron Hybrid

65 days. (Patent 11,324,190) An exciting jalapeño that boasts extra-large, 3 oz. dense fruits that average a whopping 4½" long! Smooth fruits are firm, mature to a deep red and have a good shelf life. With a Scoville rating of 5,000 to 8,000 units, they have the perfect amount of heat typically associated with jalapeños. Ideal for containers. Strong, compact plants produce high yields and are highly resistant to Tobacco Mosaic Virus and Bacterial Spot Races 0-3, 7 and 8.

#03052. (A) pkt. (15 seeds) \$4.65

Mexibell Hybrid

70 days. 1988 AAS Winner. A bell pepper with a mild chile flavor? Absolutely! Plants grow up to 26" tall, bearing lots of 3 to 4-lobed fruits with firm flesh. Peppers ripen from green to chocolate to red and can be eaten at any stage. Tolerant to Tobacco Mosaic Virus.

#03056. (A) pkt. (30 seeds) \$4.35

Mexican Sunset Hybrid

60-65 days. 2018 AAS Regional Winner (Southeast). Thick-walled, conical 6 to 7" hungarian-type, hot wax peppers mature from pale green to light yellow to orange and finally to a bright red. Spicy fruits have an average of 9,000 to 10,000 Scovilles and can be eaten at any stage. Delicious fresh, stuffed, baked, grilled or pickled. Highly ornamental, compact, bushy plants set fruits early and prolifically, creating a brilliant display of colors as they mature. Perfect for containers and small space gardens. Tobacco Mosaic Virus resistant.

#03746. (A) pkt. (25 seeds) \$4.15

Paquimé Hybrid

70 days. Consistently produces super-sized jalapeños that grow to nearly 5"! Fruits have a subtle to medium heat that doesn't linger on the tongue and become overwhelming. High quality peppers are smooth, firm, have thick walls and are the perfect size and shape for stuffing, grilling or for poppers. Sturdy plants grow up to 24" and easily support the heavy fruit load. Highly resistant to Potato Virus Y. Intermediate resistance to Nematodes.

#03787. (A) pkt. (15 seeds) \$5.45

Peperoncino, Golden Greek

72 days. You've seen these peppers pickled in gourmet shops and on salad bars. Abundant yields of thin, yellowish-green fruits, 2 to 4" long, are mildly hot with excellent flavor. Harvest when fruits are at the green stage. Vigorous plants grow to 30" tall.

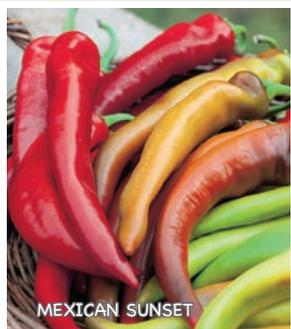

#03195. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$6.95

MARIACHI

PETER, RED

Peter, Red

90 days. The original strain from the Alfneys. Demand has continued to far exceed supply of this ornery old heirloom, grown as much to shock the prudish as for its culinary value! Pods are 4 to 6" long, blunt-ended and mature to a deep red – excellent for chili powder. Dense plants grow 20 to 30" tall.
#03071. (A) pkt. (10 seeds) \$3.95

POT-A-PEÑO

Pot-a-peño Hybrid

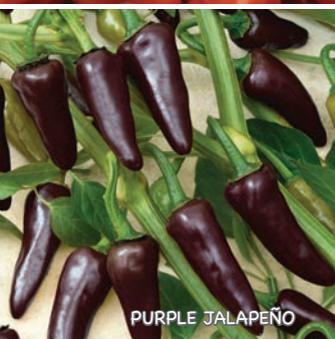

60-65 days. 2021 AAS Regional Winner (Great Lakes, West/Northwest). Unique cascading habit is perfect for hanging baskets or containers. Early maturing, 3 to 4" jalapeño fruits hang down beneath the plant for easy harvest – yet another unique trait! Green fruits have a traditional spicy flavor in 45 to 50 days or left to fully mature to bright red, they have a sweet, mildly hot flavor at less than 500 Scovilles. Plants, 12 to 15", have a dense canopy of small, dark green leaves to protect fruits. High yielding.
#03067. (A) pkt. (10 seeds) \$4.95

PRIMERO RED HABANERO

Primero Red Habanero Hybrid

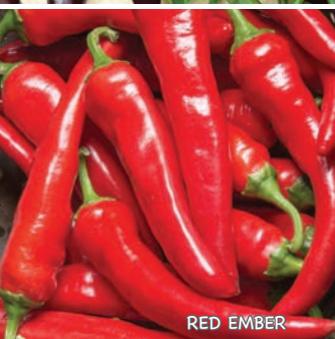

75-80 days. Big, bright red, 2 to 3½" long by approx. 1½" wide beauties are larger than typical habaneros with about one third of the heat at only 70,000 Scoville units – enjoy traditional habanero flavor without the extreme burn! One of the earliest maturing habaneros available on today's market. Enjoy green fruits in 60 to 65 days. Great fresh, roasted and in salsas. Excellent for container gardening. Huge yielder. Intermediate resistance to Tomato Spotted Wilt Virus.
#03789. (A) pkt. (10 seeds) \$4.85

PURPLE JALAPEÑO

Purple Jalapeño

75 days. Fruits start out green, then turn purple for a long time before turning red at maturity. Peppers are slightly larger than regular jalapeños and have a Scoville rating of 2,500 to 10,000 units. Excellent for salsas, salads, stuffing and pickling. Plants are very productive.
#03073. (A) pkt. (30 seeds) \$4.15

RED EMBER

Red Ember Hybrid

75 days. 2018 AAS Winner. A specialty cayenne type with bright red, ½ oz. attractive fruits that grow up to 4½" long by 1" wide. Versatile peppers have thicker walls and a flavor that is tastier than the traditional cayenne – pleasantly sweet and spicy, with just enough heat without being overwhelming at 30,000 to 50,000 Scoville units. Excellent fresh, cooked or dried. Plants yield heavily even under cool weather conditions. Great for container gardening.
#03790. (A) pkt. (15 seeds) \$5.55

ROULETTE

Roulette Hybrid

85 days. 2018 AAS Winner. The same shape, size and color of traditional hot habaneros but with a Scoville rating of just 100! Large, red, uniform, 3" by 1½" fruits have thick walls and a nice citrusy habanero flavor. In trials, plants easily produced up to 100 peppers by the end of the season. Excellent fresh, pickled, roasted and sautéed. Widely adaptable. Highly resistant to Tobamovirus.
#03220. (A) pkt. (10 seeds) \$4.85

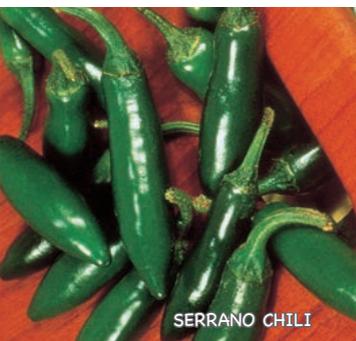

SWEET HEAT

SWEET BONNET

DID YOU KNOW... Capsaicinoid levels in the fruit is what dictates the heat level of the pepper? When plants are grown in high temperatures and lean on water, capsaicin content increases making peppers taste hotter. The reverse is also true, cooler growing conditions and more water during fruit development typically favors a more mild pepper flavor.

SERRANO CHILI

SPICY SLICE

SRIRACHA

Serrano Chili

85 days. Whether picked green or red, when fully mature, this is one spicy pepper! Vigorous 30" plants are covered with flavorful, 2" thin-walled fruits. Perfect for chili sauce, salsa, hot pepper vinegar and pickles.
#03083. (A) pkt. (100 seeds) \$3.25; (F) 1/16 oz. \$7.95

Spicy Slice Hybrid

65 days. Extra-large, 4 to 4¾" tasty fruits mature from dark green to red, are firm, smooth, slice well and have a Scoville rating of 4,000 to 6,000. Perfect for fresh market. Early maturing and widely adaptable throughout the U.S. Vigorous plants provide good leaf cover to protect fruits and produce heavy yields. Highly resistant to Bacterial Spot with intermediate resistance to Tobacco Etch.
#03082. (A) pkt. (20 seeds) \$5.75

Sriracha Hybrid

65-70 days. Attractive, large, 5" by 1¼", dark green, chili-type fruits are firm and uniform with shiny, smooth skin and thick walls. Flavor is mildly hot, but not overpowering with a Scoville rating of approx. 2,500 units. Perfect for slicing, roasting and pickling. Peppers have a long shelf life.
#03793. (A) pkt. (10 seeds) \$4.95

Sweet Bonnet

100-120 days. A sweet spin on the traditional scorching Caribbean Scotch Bonnet. Fruits ripen to a beautiful bright red and have a tropical sweet flesh with the smoky start of a true hot pepper without any real heat – there is a small bit of detectable heat that is milder than a jalapeño. Perfect for using in mild Caribbean recipes for those who love the fruity sweetness of Scotch Bonnets but can't take the heat.
#09283. (A) pkt. (30 seeds) \$3.95

Sweet Heat Hybrid

56 days. Sweet and mildly spicy flavor – like a pepperoncini, but with smoky undertones. Early and prolific, with loads of fruits that average 3 to 4" long by 1 to 1½" wide. A perfect choice for grilling and salsa. Can be eaten at the green or red stage. Plants are compact and bushy.
#03088. (A) pkt. (20 seeds) \$6.75

Takara Hybrid

60 days. A special hybrid version of the classic open-pollinated shishito type with the same shape, size and quality, but with better uniformity. Small, 3½" by 1" fruits have a mild, but rich, flavor. Excellent sautéed, in stir-fries, grilled and eaten fresh. Compact plants have a spreading, well-branched habit, short internodes and are high yielding. Great for containers and small space gardens.
#03232. (A) pkt. (15 seeds) \$4.75

Trident Hybrid

80-85 days. Extra-large, ancho/poblano peppers grow up to 7" long by 3½" wide and mature from mid-dark green to deep red. Glossy fruits are mildly hot at 250 to 1,500 Scovilles, weigh approx. 5½ oz., are firm, straight and have a high percentage of two lobes. Peppers have a good dry weight ratio and are excellent fresh or dried. Plants produce multiple harvests and maintain fruit size. Great for farmers markets and roadside stands. Vigorous plants produce high yields and are widely adaptable. Highly resistant to Tobacco Mosaic Virus.
#03794. (A) pkt. (15 seeds) \$5.15

Trinidad Perfume

80-85 days. A sweet seasoning pepper that looks like a traditional habanero, but without the heat, although fruits can reach up to 500 Scoville units. Fruits grow 1 to 1½" long and mature from green to a golden orange. Extremely flavorful and has a delicious scent when cooked. Also can be used for pickling or fresh eating. Sturdy plants grow 2 ft. tall and are extremely prolific.
#03086. (A) pkt. (15 seeds) \$4.75

To Something In Between ...

Bulgarian Carrot

65-68 days. A charming heirloom whose seed was supposedly smuggled out through the Iron Curtain years ago. Fluorescent orange, 3½" fruits seem to almost glow with a brilliant hue and intense flavor – fruity and pungent at the same time – adding a colorful tint to glazes, marinades and salsas.
#03011. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.95

Cayenne Blend

60-75 days. Add some dramatic flair to your garden with this well-balanced blend of Cayenne varieties in a rainbow of colors – red, orange, yellow, purple and green. All are similar in shape and texture, with firm, tapered 3" fruits that keep their color when dried. Very ornamental. Requires only average soil and occasional watering to produce prolific yields.
#03020. (A) pkt. (30 seeds) \$3.45; (F) 1/16 oz. \$7.95

Cayenne Long Thin

72 days. Long, 5 to 6", slender, slightly wrinkled peppers are very hot at 30,000 to 50,000 Scoville units and especially good for pickles, canning and drying for using as a spice. Excellent for chili and homemade salsa. Two-celled fruits start out dark green, mature to a brilliant, fiery red and are no thicker than a pencil. High yielder.
#03018. (A) pkt. (100 seeds) \$3.85; (F) 1/16 oz. \$5.95

Chiltepin

90 days. Don't be fooled by the unassuming size of these pea-like, ½" fruits – they pack a wallop! At 50,000 to 100,000 Scovilles, it's one hot pepper – some continue to rate this variety even higher on the heat scale. Prolific plants produce extremely hot peppers whose small size is very versatile in recipes.
#03024. (A) pkt. (30 seeds) \$3.45; (D) 1/32 oz. \$7.95

Volcano Hybrid

60-70 days. Hungarian type with slightly taller plants and larger fruits than Hungarian Yellow Wax (pg. 50). Pendant shaped fruits grow 4 to 6" long, are glossy greenish-yellow to red at maturity and are mildly pungent averaging approx. 2,000 to 4,000 Scoville units. Excellent for pickling, roasting and fresh use.
#03097. (A) pkt. (20 seeds) \$3.75

Wildcat Hybrid

75 days. 2023 AAS Regional Winner (Mountain/Southwest, Southeast). Extra-large, 8 to 12" fruits weigh 2 to 3 oz., and have meaty flesh that's thicker than comparisons. Fruits are straighter than traditional cayennes, have a nice smoky, sweet flavor and a Scoville rating of 500 to 1,500 units. Great for containers. Easy to harvest. Uniform growth habit and mild heat level makes this a good multi-purpose pepper. High yielding. Highly resistant to Potato Y Virus, Tobamovirus and intermediate resistance to Fusarium Wilt.
#03098. (A) pkt. (10 seeds) \$5.75

DID YOU KNOW... The hotter the pepper variety, the hotter the bottom heat should be for germination? Hot peppers contain high levels of capsaicin which can inhibit germination. Optimal soil temps for germination should be between 85-95°F. Be patient, some hot pepper seeds can take nearly a month to germinate. Pre-soaking seed also helps speed up germination!

Cumari Verdadeira Yellow

80 days. Pea-sized fruits, less than ½" long, are sweet and pack a punch of heat as well. From the same family as Scotch Bonnet and Habanero, fruits have a Scoville rating of 40,000. High yielding plants produce small, yellow peppers which can be easily seen among the large leaves. Bushy plants are great as an ornamental. Originates from the Cumari region of Brazil.
#03014. (A) pkt. (30 seeds) \$3.95

Giant Ristra Hybrid

80 days. 2014 AAS Regional Winner (Mountain/Southwest). It looks like a pretty, red Marconi pepper, but has the heat of a cayenne with a Scoville rating between 30,000 and 50,000 units. Elongated, 6 to 7" fruits should be picked when red and are excellent fresh, roasted or dried. Can also be used to make a beautiful ristra of dried peppers. Compact, bushy plants produce high yields of uniform peppers. Easy-to-grow. Tobacco Mosaic Virus tolerant.
#03061. (A) pkt. (25 seeds) \$4.15

HOT PORTUGAL

Hot Portugal

65 days. Very hot, thin, red and glossy – this superb variety doesn't do anything halfway! Elongated, curved fruits on 4 ft. plants grow to 7" or more in length. Harvest and use at the green or red stage.

#03070. (A) pkt. (30 seeds) \$3.75; (D) 1/32 oz. \$6.95

JALAPEÑO SPICE LEMON

JALAPEÑO SPICE SERIES

65 days. Jalapeños are probably the most popular spicy pepper in the world and interest will continue to peak with these NuMex varieties. Bright, colorful peppers, 2 to 3" long by 1" wide, have major eye appeal and will stand out in salsas and other fresh recipes. Plants grow up to 24" and are great for container gardening.

Lemon

Fruits ripen from green to bright yellow and are mild to medium hot at 25,000 Scoville units. **#03780.**

Orange

Fruits ripen from green to orange and have a great fruity/citrus flavor. Hottest of the series at 79,000 Scoville units. **#03783.**

Pumpkin

Green fruits ripen to a stunning pumpkin-orange, a color normally only found in bell peppers. Mild to medium hot at 22,000 Scoville units. The most productive of the series. **#03784.**

**Prices, above 3, per variety:
(A) pkt. (30 seeds) \$4.25**

Lemon Drop

100 days. A terrifically hot, citrus-flavored heirloom that's popular as a seasoning in Peru, its country of origin. Bright yellow, crinkled, cone-shaped fruits have a Scoville rating of 15,000 to 30,000 units, are about 2½" long, ½" wide and have few seeds. Dense plants, about 2 ft. high and wide, are typically covered with fruits. Excellent for container gardening. **#03055. (A) pkt. (30 seeds) \$3.95**

JALAPEÑO SPICE ORANGE

JALAPEÑO SPICE PUMPKIN

Quickfire Hybrid

50 days. 2022 AAS Winner. A revolution in innovative breeding, this Thai-type award winner is by far the fastest maturing chile in trials! Bright red fruits have plenty of heat with a Scoville rating of approx. 40,000 units and grow up to 1¾" long. Bred for taste and yield, but has tremendous ornamental appeal as well. Compact, sturdy, 6" plants produce a profusion of fruits and are perfect for container gardening as well as indoors on windowsills. **#03072. (A) pkt. (15 seeds) \$5.75**

To Fire Breathing Heat!

Armageddon Hybrid

70-75 days. The world's first hybrid super-hot chili with a Scoville rating of 1.3 million units! Pale green, pendant-shaped fruits grow up to 2" long by 1½" wide, have a small tip/tail and ripen to bright red. Compared to Carolina Reaper, this variety matures up to 2 weeks earlier and some taste testers have rated it hotter – try it if you dare! Features improved plant vigor, fruit uniformity and less days to maturity compared to open-pollinated varieties. Vigorous, uniform and early fruiting with exceptional yields.

#03010. (A) pkt. (5 seeds) \$6.25

SUPER CHILI

Super Chili Hybrid

75 days. 1988 AAS Winner. Highly ornamental, semi-compact, 24" plants bear 2½" elongated fruits with plenty of hot chile flavor. Ripens from green to orange and finally to red. Bred for increased yields. Ideal for patio and container gardens – bring plants indoors during severe winters for continuous yields all winter.

#03087. (A) pkt. (30 seeds) \$6.65; (V) 100 seeds \$14.95

Tabasco

80 days. Used for Louisiana's famous, extra-hot Tabasco® sauce since its introduction in 1868. Easily harvested fruits ripen from yellow-green to red. Vigorous and productive. **#03094. (A) pkt. (30 seeds) \$3.25; (D) 1/32 oz. \$6.75**

Thai Dragon Hybrid

65-70 days. Attractive, slender fruits grow upward and stand out above bright green leaves, creating quite a display on plants. Green peppers grow up to 6" long and mature to a beautiful bright red. Fruits are excellent fresh or dried and store well while retaining their heat that has a rating of 50,000 to 100,000 Scoville units. Plants grow up to 24" tall and are perfect for container gardening. High yielding.

#03092. (A) pkt. (30 seeds) \$3.95

Thai Hot

65-90 days. Ornamental as well as edible – if you can stand the heat! Stocky plants, up to 16", are covered with 2 to 3" peppers that start out a deep green, then mature to bright red. Fleshy pods are particularly good in Oriental dishes and chili. You'll also appreciate their beauty in borders and containers.

#03093. (A) pkt. (30 seeds) \$3.35; (V) 100 seeds \$7.95

USE EXTREME CAUTION WHEN HANDLING SEEDS AND FRUITS!

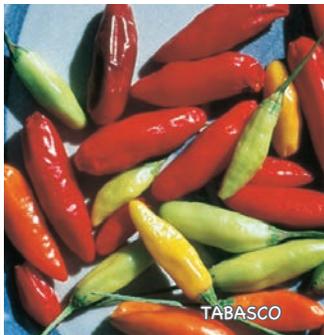

Bhut Jolokia

80-85 days. Also known as Ghost Chile. The Guinness Book of World Records hottest pepper in the world from 2007 through 2010 measuring over one million units on the Scoville scale! More than a novelty, these orange-red peppers, which grow up to 3½" long at maturity, can be used to spice up cuisine but should be eaten with extreme caution and kept away from eyes.

Buffy Hybrid

70 days. 2022 AAS Winner. In trials, plants produced more than 250 fruits each! Juicy, thick-walled fruits grow to approx. 1½" long by ½" wide and ripen from green to bright red. Pungent, aromatic fruits are slightly larger and mature earlier compared to Tabasco and are perfect for pickling. Peppers are held high on the plants creating ornamental appeal and make for easy harvest. Ideal for large containers. Disease tolerant plants are strong, healthy, upright and produce good yields.

#03777. (A) pkt. (10 seeds) \$4.35

Caribbean Blend

90-120 days. Warning – this mix is blistering in its heat! A blend of some of our most popular, hottest Caribbean varieties including a colorful range of habaneros, scotch bonnets and several others in varying sizes and shapes.

#03013. (A) pkt. (30 seeds) \$3.95; (F) 1/16 oz. \$8.95

Carolina Reaper

90 days. Officially the hottest pepper in the world as ranked by Guinness Records – Scoville units typically average a whopping 1.5 million and peak at 2.2 million! Devilish looking fruits, 1½" wide by 2" long, are fiery red with a unique little stinger tail. Has a surprisingly good flavor once you get past the heat – if you dare! This scorcher was bred in Rock Hill, SC.

#03755. (A) pkt. (20 seeds) \$6.95

Chaak Hybrid

75-85 days. Habanero fruits are uniform, quickly ripen from green to golden yellow and finally to orange and have an average of 200,000 Scovilles. Heavy, thick-walled, 2½" long by 1½" wide fruits weigh approx. ½ oz. each and have fruity/floral undertones once you get past the heat. Matures up to 2 weeks earlier than similar varieties and has a good shelf life. Strong, vigorous plants are upright, have short internodes and hold fruit well. High yielding. Crack tolerant. Intermediate resistance to Tomato Spotted Wilt Virus.

#03778. (A) pkt. (10 seeds) \$4.95

Habanero Chocolate

85-100 days. An outstanding variety made superior in every way through quality breeding. Crunchy, 1½ to 2½" fruits pack some serious heat and are very flavorful. Extra-versatile in the kitchen, adding just the right kick to stir-fries, salsas and sauces. High yielder.

#03047. (A) pkt. (30 seeds) \$3.95; (D) 1/32 oz. \$7.95

Habanero Orange

95 days. The original strain. Among the hottest ever measured! Reportedly 1,000 times hotter than Jalapeño! Lantern-shaped, 1" by 1½" peppers, with thin, wrinkled, light green flesh, ripen to a lovely golden orange. A favorite for sauces. Slow to germinate and must be grown in warm, moist conditions. High yielding plants grow 36" tall.

#03040. (A) pkt. (30 seeds) \$3.55; (F) 1/16 oz. \$6.95

Magnum

80-100 days. Dark green, wrinkled fruits ripen to a beautiful bright orange and with an average of 210,000 Scoville units they are ragin' hot. Bonnet shaped, shiny habanero fruits are very similar to the extremely popular Scotch Bonnet pepper, measure approx. 2" by 1½" and can be used fresh or dried. Harvest at the green stage in just 80 days. Compact plants are well-branched, uniform and heavy yielding. More tolerant to cooler weather than comparable varieties.

#03060. (A) pkt. (30 seeds) \$4.25

Orange Scotch Bonnet

120 days. Hotter than Habanero? You judge! Matures later and fruits are not as long. Bonnet-shaped fruits are bright orange when ripe; flavor is smoky and fiery hot. Plants, 30" tall, are excellent in containers in the North.

#03053. (A) pkt. (30 seeds) \$3.95

Trinidad Scorpion (Moruga)

100 days. One of the hottest chili's on the planet! Wrinkled, lantern-shaped peppers ripen to a searing red-orange and have a tender, fruit-like flavor which makes for the perfect sweet-hot combination. Averages 1.2 million Scovilles and has reached over 2 million! Use extreme caution when handling these super hot fruits! Plants will act as a perennial if overwintered in mild climates or if brought indoors in the North.

#03002. (A) pkt. (10 seeds) \$5.95

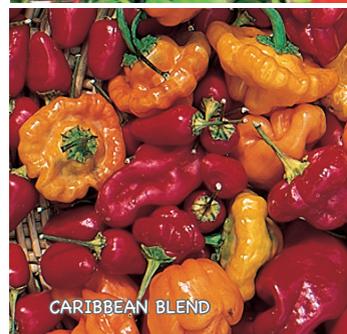

Wicked Ghost Hybrid

90 days. Caution! With an extremely high heat level – an estimated Scoville rating of more than 800,000 – this pepper seriously brings the heat. Smooth skinned, deep red, pointed, lantern shaped, 2½" peppers are very attractive and wrinkled like habaneros. Fruits mature about 10 to 12 days earlier and have higher yields than open-pollinated ghost varieties.

Cucumbers – Some Burpless, Some Seedless ...

Alibi Hybrid

50-55 days. Harvest medium green, delicious fruits at 2" for making smooth gherkin pickles or allow to reach full maturity at 3 to 4". Fruits have small seed cavities and are excellent for fresh eating as well. Strong growing, vigorous, compact vines are heavy yielders and resistant to Powdery Mildew and Downy Mildew.

#02002. (A) pkt. (30 seeds) \$3.95; (G) 250 seeds \$6.95

Artist Hybrid

45 days. Fine-spined gherkins have an excellent flavor that is not bitter and are great fresh or pickled. A parthenocarpic variety that does not require pollination. Enjoy abundant yields over a long harvest season. Highly resistant to Cucumber Mosaic Virus with additional resistances to other common cucumber diseases.

#02006. (A) pkt. (30 seeds) \$5.25; (G) 250 seeds \$17.95

Barese

60 days. Sweet, bitter-free Italian heirloom novelty. Harvest fruits young for use as a traditional cucumber or allow to grow larger and use as a melon. Spineless fruits have a downy peach type fuzz. Very productive.

#02102. (A) pkt. (10 seeds) \$3.25

Bella Hybrid

60 days. Bitter-free, dark green fruits are uniform, weigh up to 17 oz. and can grow up to 14" long. Attractive fruits are seedless and have an excellent flavor. Ideal for home gardens. Vigorous, parthenocarpic plants produce high yields even during hot weather. Highly resistant to Scab and Target Leaf Spot with intermediate resistance to Powdery Mildew.

#02107. (A) pkt. (10 seeds) \$6.95

Bush Crop

62 days. Compact, bushy plants produce 6 to 8" fruits that are deliciously crisp and tender. Perfect for containers or small garden spaces as vines are short. An excellent pickling variety. Scab resistant.

#02210. (A) pkt. (50 seeds) \$3.75

Bush Pickle

50 days. Compact vines produce 3 to 4" fruits that make tasty, crisp, whole pickles. Vines are compact, yet very prolific. Perfect for small gardens and containers.

#02220. (A) pkt. (50 seeds) \$3.65

Diamant Hybrid

47 days. Attractive fruits have a crisp texture and a fresh, mildly sweet flavor that is great for both fresh eating and pickling. Dark green, 4 to 5" fruits are nearly smooth, have very small, white spines and ripen early. Compact plants are parthenocarpic, so they don't require pollination to set fruit. Produces abundantly over a long season. Resistant to Downy and Powdery Mildew, Cucumber Mosaic Virus and Cucumber Scab.

#02014. (A) pkt. (15 seeds) \$5.25

Diva

58 days. 2002 AAS Winner. All-female, parthenocarpic variety. Very crisp, sweet, bitter-free and ideal for slicing. Fruits are spineless and bright green, with glossy tender skins. Burpless and seedless. Best harvested at 4 to 8". Very disease resistant.

#02108. (A) pkt. (20 seeds) \$3.85

Double Yield

50 days. Be amazed with the impressive yields of this old timer originally introduced in the early 1920's – the more it's picked, the more it produces! Dark green, uniform, slender fruits are 6" long with excellent flavor. Ideal for making pickles or eating straight-from-the-vine. Heat tolerant.

#02011. (A) pkt. (10 seeds) \$3.35

Early Fortune

55 days. Also known as Special Dark Green. Introduced in 1906, this variety was described as "the earliest and best white spine cucumber ever offered". Fruits grow 7 to 8" long by 2" in diameter and have a fresh, clean taste that's almost never bitter. A very dependable performer.

#02111. (A) pkt. (30 seeds) \$3.75

Early Spring Burpless Hybrid

58 days. An excellent home garden variety with a taste that's as big as its fruit! Pale green, 10 to 12" fruits will grow straight when staked or will curl if left alone. Fruits are smooth and white-spined. A bitter-free, burpless variety that is great when sliced – peeled or not. Early and a good yielder.

#02109. (A) pkt. (30 seeds) \$3.85

Eureka Hybrid

57 days. 1994 AAS Winner. Uniform, crisp fruits are very green from the earliest stages, making them a marvelous pickling variety when 1½ to 5" long. Harvest for salads when tiny, or at any stage up to full maturity at 7". Monoecious and virtually trouble-free. Best grown on a fence or trellis for easy harvest. Highly resistant to Watermelon Mosaic Virus, Zucchini Yellow Mosaic Virus and Scab.

#02018. (A) pkt. (30 seeds) \$4.75; (W) 500 seeds \$18.95

DID YOU KNOW... Cucumber beetles are responsible for spreading Bacterial Wilt disease to cucumbers? Management relies on removing host weed plants and using products such as Bug Buster-O (pg. 65) or Sticky Strip Insect Traps (visit our website) to monitor for adult beetles.

Fanfare Hybrid

63 days. 1994 AAS Winner. Slender, deep green, uniform, attractive fruits are 8 to 9" long. Crisp flesh has a deliciously mild flavor. Produces over a longer period than other varieties. Great for containers, home gardens and market growers. Semi-dwarf, monoecious plants with 2 to 2½ ft. long vines, produce heavy, high quality yields. Resistant to Powdery Mildew, Scab, Cucumber Mosaic Virus, Angular Leaf Spot and Anthracnose.

#02115. (A) pkt. (25 seeds) \$5.35

General Lee Hybrid

66 days. Delicious, uniform 8" slicing cucumbers have white spines, are attractive dark green and very straight. Originally bred for southern gardens, this prolific producer has proven its ability to perform in the North as well. Plants handle stress well. Resistant to Powdery Mildew and Scab with intermediate resistance to Cucumber Mosaic Virus.

#02117. (A) pkt. (30 seeds) \$4.95

Gherking Hybrid

50-55 days. Early, large yields of bitter-free fruits won't become bitter even when left on the vine too long. Dark green, 3 to 5" gherkins with white spines, are perfect for pickling and fresh eating. Strong vigorous plants are parthenocarpic and gynoecious. Excellent tolerance to Scab and Cucumber Mosaic Virus with intermediate resistance to Powdery and Downy Mildew.

#02026. (A) pkt. (20 seeds) \$5.25

Goliath Hybrid

45-50 days. Tasty, productive and highly disease resistant. Gynoecious plants produce loads of dark green, nearly spineless fruits, up to 8" long that have a nice texture. Holds well on the vine. Excellent resistance to CMV, Powdery Mildew, Anthracnose, Scab and more. Great for market growers.

#02116. (A) pkt. (30 seeds) \$4.25

Green Light Hybrid

30-37 days. 2020 AAS Winner. Compared to similar seedless varieties, yields were higher, maturity was earlier and more attractive, with a superior taste. Pick at 3 to 4" for sweet, crisp mini cukes that can be enjoyed with or without peeling. Makes a good pickler, as well. Grow vining plants on stakes or trellises for a more productive, easier harvest and cleaner fruits.

#02120. (A) pkt. (30 seeds) \$4.95

Homemade Pickles

55 days. Medium-green fruits, with small white spines, are specially bred for making the best pickles you've ever tasted. Harvest when 1½" long for tiny sweets, or 5 to 6" long for robust dills and spears. Solid and crisp with superb flavor.

#02020. (A) pkt. (100 seeds) \$3.95

Iznik Hybrid

60 days. Demand continues to be high for this terrific parthenocarpic female variety, so order early! Thin-skinned, smooth, crisp fruits are best when harvested at 3 to 4". Vining plants have small leaves, high yields and a compact habit – the perfect choice for patio containers and trellis gardens. Very versatile.

#02019. (A) pkt. (10 seeds) \$6.55

Manny Hybrid

50 days. Why pay expensive supermarket prices when you can grow your own? Gourmet quality, 5 to 6" cucumbers are delicately sweet, with exceptionally tender, shiny skins. Great eaten fresh, in salads or pickled. A good choice for container gardening. Plants are parthenocarpic, have intermediate resistance to Powdery Mildew and don't have to be supported, but expect higher yields when trellised.

#02225. (A) pkt. (15 seeds) \$5.95

Marketer

55-70 days. 1943 AAS Winner. A great slicer for salads and makes delicious pickle chips as well. Slender, dark green, 8 to 9", uniform fruits have a sweet, mild flavor. Vigorous, heat resistant plants are very productive with a long harvest season. White-spined.

#02132. (A) pkt. (100 seeds) \$3.85; (C) 1,000 seeds \$5.95

Martini Hybrid

69-74 days. This unique beauty stands out from the competition with a pale white exterior that won't turn yellow! Fruits are bitter-free, very sweet and crunchy with tender skins that don't need to be peeled if harvested at approx. 5 to 6". Vining, monoecious plants are heavy yielders of high-quality, straight fruit – even in the heat of summer. Intermediate resistance to Powdery Mildew.

#02131. (A) pkt. (15 seeds) \$4.95

Mexican Sour Gherkin

60-70 days. Generous yields of 1 to 2" fruits look like miniature watermelons and even fall off the vines when ripe. Sweet cucumber flavor, followed by a surprising sourness, lead you to believe they are already pickled! A most unusual variety that's excellent for growing on trellises.

#02024. (A) pkt. (30 seeds) \$3.95

Mini-Me Hybrid

45 days. Now you can grow those mini, healthy, pricey treats you purchase in the grocery store in your own garden. The perfect snacking cucumber, these 3 to 4" fruits are crispy and delicious. Attractive, uniform cukes are dark green with shiny, smooth skins that don't need to be peeled. Plants produce high yields of 2 to 5 fruits per node early and continue all season long. Beit-alpha type.

#02025. (A) pkt. (10 seeds) \$4.95

Dill Dukat Herb

70 days. Easy-to-grow and perfect for pickling your favorite cukes. Produces more foliage before forming seeds than other varieties. Flower heads grow up to 10" across.

#02252. (A) pkt. (1,000 seeds) \$3.95 each

HOMEMADE PICKLES

MINI MUNCH

Mini Munch Hybrid

50-65 days. The one-bite, seedless snack cucumber! Pick when 3" long and enjoy as a fresh, healthy snack. Fruits have very smooth, deep green skins that require no peeling and flesh that has a crispy crunch and delicious, mild flavor. Parthenocarpic and all-female flowering plants set multiple flowers and fruits per node resulting in terrific yields even under less than optimum conditions. Powdery Mildew tolerant.

#02227. (A) pkt. (10 seeds) \$7.55

Muncher

60-65 days. Very tender variety that is excellent for fresh eating right out of the garden. Nearly spineless fruits are 6 to 8" long and 3" wide on strong vigorous vines. Non-bitter, burpless and can be eaten at any stage of growth. For pickles, pick when the fruits are 4 to 6" long.

#02133. (A) pkt. (30 seeds) \$3.35

Painted Serpent

55-70 days. These unique, Armenian type, burpless cucumbers can grow up to 36" long and curl into snake-like shapes! Fruits are light green with dark green stripes, slender and ribbed with a mildly delicious flavor that is best when harvested at 8 to 15".

#02138. (A) pkt. (30 seeds) \$3.35

MUNCHER

Parisian Gherkin Hybrid

50 days. 2015 AAS Regional Winner (Northeast, Mountain/Southwest). An excellent, 2 to 4", mini cucumber that can be picked at midget or small stage for pickling. Numerous black spined fruits can also be enjoyed fresh in salads and slaws. Crisp with a sweet flavor. Semi-vining plants can be grown in the garden or in staked patio containers. Very easy-to-grow, produces quickly and is resistant to Scab, Cucumber Mosaic Virus and tolerant to Powdery Mildew.

#02031. (A) pkt. (30 seeds) \$3.75

PAINTED SERPENT

Patio Snacker Hybrid

39 days. Dark green, 8" fruits have a good flavor, crunchy texture and a bitter-free peel – great for straight-from-the-vine eating. Controlled, yet vigorous, short branching vines are a great fit for small gardens or large containers with a small trellis. Free-flowering, monoecious plants are high yielding with continuous harvests.

#02032. (A) pkt. (15 seeds) \$5.35

Pick A Bushel Hybrid

50 days. 2014 AAS Regional Winner (Heartland, Great Lakes). Be prepared to pick lots of cukes from these compact plants. Medium green, white-spined fruits are sweet, firm and crisp. Pick at 3" gherkin size for great pickles or allow to grow to 6" for slicing fresh in salads. Semi-bush vines grow only 24" tall. Well-suited for growing in patio containers as well as the garden. Plants have excellent heat tolerance and disease resistances to Cucumber Mosaic Virus, Scab and Mottle Mosaic Virus.

PICKLERS PRIDE MIX

SALAD BUSH

SALADMORE BUSH

SOUTHERN DELIGHT

Picklers Pride Mix

53-65 days. A blend of white-spined, medium to dark green, crispy cukes. Expect abundant yields of early, mid and late season fruits that are perfect for making delicious homemade pickles or eating fresh.

#02041. (A) pkt. (30 seeds) \$3.55

Salad Bush Hybrid

57 days. 1988 AAS Winner. Dark green, 8" fruits are tender and crisp. Compact plants require only 2 ft. of garden space – perfect for patio gardening and hanging baskets. Good disease resistance.

#02230. (A) pkt. (20 seeds) \$7.25

Saladmore Bush Hybrid

55 days. 2014 AAS Regional Winner (Southeast). Vines spread only 24", yet produce an average of 10 to 12 fruits per plant. Harvest small, dark green fruits for pickles or allow them to fully mature, 7 to 8", for fresh use. Crisp flesh has a mild, sweet flavor. Keep fruits picked to extend the harvest season. Perfect for growing in containers or smaller gardens where space is limited. Resistant to Cucumber Mosaic Virus, Scab, Anthracnose and Powdery Mildew.

#02142. (A) pkt. (30 seeds) \$3.95

Southern Delight Hybrid

60 days. One of the best hybrid cukes for continuous yields of late spring to fall crops. Fruits have a crisp and delicious texture from the time they're small when harvested for pickling, right through full maturity at 8 to 10" long and 1" diameter. Deep green skin becomes glossier in high heat. Particularly well-suited to warm climates, but proven reliable under a variety of conditions. Strong disease tolerance.

#02153. (A) pkt. (20 seeds) \$4.75

Summer Dance Hybrid

70 days. Japanese burpless type producing uniform fruits that are glossy, deep green and 8½ to 9" long. A vigorous grower that produces many lateral vines for high yields. Highly resistant to Downy Mildew and Powdery Mildew with moderate resistance to Corynepora Leaf Spot. Heat tolerant.

#02159. (A) pkt. (20 seeds) \$4.85

Summer Top Hybrid

65-70 days. Easy-to-grow. Early Japanese type. Burpless, deep green, 10" long fruits are straight and uniform, with few white spines. Heat tolerant and high-yielding, especially when grown off the ground where light and air can circulate. Superior resistance to Downy Mildew, Powdery Mildew, Anthracnose and Cucumber Mosaic Virus.

#02161. (A) pkt. (20 seeds) \$4.65

Suyo Long

60 days. An Asian heirloom, burpless cuke that grows up to 16" long. Fruits are delicious, tender, crispy and non-bitter. Excellent for fresh eating or pickling – makes excellent bread and butter pickles. Fruits are spiny when young, become smoother at maturity and tend to curl on one end so trellis vines for straighter cukes. Plants produce excellent yields, are widely adaptable and heat tolerant.

#02167. (A) pkt. (50 seeds) \$3.95

DID YOU KNOW... Parthenocarpic plants can produce fruits without pollination? Many modern hybrid cucumber varieties have been bred with this beneficial feature. Parthenocarpic fruits will be virtually seedless as well.

All Just Plain Great!

Sweet Slice Hybrid

62 days. Sweet, burpless and non-bitter. Fruits, 10 to 12", are slim, dark green and very mild. Does not need peeling. Very vigorous vines, with excellent yields, are highly disease resistant.
#02160. (A) pkt. (30 seeds) \$6.45

Sweet Success Hybrid

58 days. 1983 AAS Winner. The first AAS winning seedless cucumber. For seedless fruits, grow in a greenhouse where it cannot be pollinated. Fruits grow up to 12" long and are slender, with thin, smooth skin. One of the very sweetest – burpless, too! Best when trellised.
#02170. (A) pkt. (15 seeds) \$7.85; (V) 100 seeds \$30.95

Tanja

58 days. The ultimate burpless cuke. Bitter-free. Slim fruits, up to 14" long, have dark green skins and tender, crisp flesh that has an outstanding flavor. A premium home garden slicing cucumber in Europe and widely adapted for successful growing almost anywhere. Also suitable for growing in greenhouses. Plants yield prolifically and continue to bear over a long harvest period.
#02178. (A) pkt. (30 seeds) \$3.55

DID YOU KNOW... Powdery Mildew is the most commonly occurring disease on cucumbers? Avoiding it is easy by following these tips: choose resistant varieties, prevent water stress by heavy mulching and consistent watering, carefully pick off infected leaves as soon as they appear and apply a preventative fungicide before outbreaks occur. Try Monterey Garden Phos™ on the Order Form.

Egg'ceptional Eggplants!

Black Beauty

80 days. Produces many large, 1 to 3 lb. fruits per plant – each one rich, deep purplish black and enormous. Tender and tasty at all stages – fried, steamed, grilled or stuffed. Retains color and holds well in storage.
#02271. (A) Pkt. (850 seeds) \$3.65

Fairy Tale Hybrid

50 days. 2005 AAS Winner. Lavender flowers produce clusters of elongated, mini fruits marked by white stripes. Best harvested at 4" long by 1 1/4" across for sweet, bitter-free, nearly seedless eating. Attractive, soft green foliage and unique habit make it a natural for containers, ornamentals and gardens. Plants, 18 to 24", are much smaller than typical varieties and set fruits two weeks earlier. Highly productive.
#02277. (A) pkt. (25 seeds) \$6.65

Goya Hybrid

74 days. Extra firm, 6 to 8", round to globe-shaped, deep purple/black fruits have green spineless, flat calyxes. Delicious flesh is great for making pastes, dips and sauces. Good shelf life. High yielding.
#02281. (A) pkt. (25 seeds) \$4.45

Gretel Hybrid

55 days. 2009 AAS Winner. Glossy white fruits grow in clusters and are very sweet and firm with tender skins and few seeds. An excellent choice for grilling and sautéing. Pick at 3 to 4" for baby fruits or allow to fully mature at 4 to 6". Harvest frequently to encourage setting throughout the season. Plants grow up to 42" tall.
#02276. (A) pkt. (25 seeds) \$6.65

'EGG'CELLENT COLLECTION

One pkt. each of Fairy Tale, Gretel & Hansel.
#02299(X). 3 pkts. for just \$15.95. Save 20%!

Hansel Hybrid

55 days. 2008 AAS Winner. Clustered, 2 to 10" fruits mature to a glossy, dark black/purple with no bitterness and few seeds. Compact, semi-spineless plants, under 36" tall, produce heavy yields of tender fruits over a long growing season. Widely adaptable and miles ahead of the older, open-pollinated types. Great for large containers.
#02279. (A) pkt. (25 seeds) \$6.65

Millionaire Hybrid

63 days. One of the most popular oriental varieties on the market. Slender fruits weigh approx. 7 oz., grow up to 12" long, have smooth, tender, brilliant black skins and nearly seedless flesh. Delicious and excellent for stir-fries and other popular Asian dishes. Upright plants produce early and vigorously.
#02288. (A) pkt. (25 seeds) \$3.95

Patio Baby Hybrid

45 days. 2014 AAS Winner. Produces a prolific number of 2 to 3", egg-shaped, glossy, purple-black fruits. Taste is excellent, mild and less bitter than comparable varieties. Try roasted or in dips and salads. Thornless leaves and calyxes allow for painless harvesting. Great used as an ornamental in garden beds and containers. Plants grow less than 24" tall.

Flavorful Fruity Fixin's!

Ambrosia Hybrid Cantaloupe

86 days. Features a terrific, sweet flavor that's distinctively different than typical varieties. Round fruits, with peach-colored flesh, average 4 to 5 lbs. each, have heavy nets and light sutures. A favorite of gardeners and fresh markets. Resists Powdery Mildew.

#02618. (A) pkt. (25 seeds) \$7.75

Burpee Hybrid PMT Cantaloupe

82 days. Tops for quality, flavor and yield! Round to slightly oval fruits, 4 to 4½ lbs., have dark orange, firm, juicy flesh and strong netting patterns and ribs. Highly adaptable nationwide, but particularly to Northern states.

#02623. (A) pkt. (25 seeds) \$7.25

Orange SilverWave Hybrid Melon

75 days. 2019 AAS Regional Winner (Northeast, Southeast). An exotic, 3 to 4 lb., oval melon with extremely sweet, orange flesh and unique rind color. Vigorous vines produce up to 6 fruits each. Trellis plants for better disease control. Resistant to Melon Necrotic Spot Virus and Melon Fusarium Wilt.

#02631. (A) pkt. (20 seeds) \$5.25

Savor Charentais Hybrid Melon

85 days. High yielding, classic French Charentais type. Small, 2 lb. melons have pale green, smooth skin and extra-sweet, aromatic, bright orange flesh. Disease resistant.

#02696. (A) pkt. (30 seeds) \$8.85

Faerie Hybrid Watermelon

60 days. 2012 AAS Winner. Creamy-yellow rinds have thin stripes and sweet, pink-red flesh with a high sugar content and crisp texture. Slightly oval, 7 by 8" melons weigh just 4 to 6 lbs. each. Vines are vigorous, yet spread only to 11 ft., so it takes up less garden space. Disease tolerant. Prolific yielder.

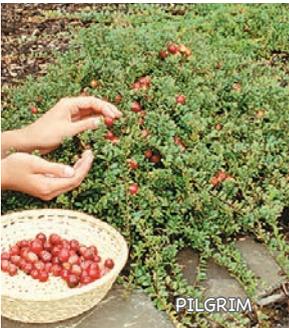

#04110. (A) pkt. (20 seeds) \$8.45

Gold in Gold Hybrid Watermelon

70 days. 2017 AAS Winner. Excellent tasting, bright yellow fruits have gold stripes and golden-orange, crisp flesh with a high sugar content. Oblong melons, 11 to 16 lbs., have strong rinds that resist cracking or bursting. A perfect icebox melon. Early and high yielding with improved disease resistance.

#04119. (A) pkt. (25 seeds) \$6.05

SOLITAIRE

Harvest Moon Hybrid Watermelon

80-100 days. 2013 AAS Winner. The first seedless watermelon to win an AAS award! Compact vines produce seedless, 18 to 20 lb. fruits with sweet, crisp, pinkish-red flesh and dark green rinds with yellow spots. Very productive. Plant 1 pollinizer (included) for every 3 plants to ensure fruiting.

#04121. (A) pkt. (10 seeds) \$8.55

Mini Love Hybrid Watermelon

70 days. 2017 AAS Winner. Personal-sized, 7 to 9 lb. fruits are perfect for small space gardens. Fruits have sweet, crisp, deep red, juicy flesh, few seeds and thin, but strong, crack and split resistant rinds. Short, 3 to 4 ft. vines produce up to 6 fruits per plant. Not prone to Powdery Mildew.

Cannot ship to SC. #04069. (A) pkt. (10 seeds) \$6.75

Solitaire Hybrid Watermelon

85 days. Mini, seedless, round fruits are larger than a softball but smaller than a soccer ball, weighing 3½ to 5 lbs. each. Deep red flesh is crisp and very sweet. A great choice for short season areas. Plant 1 pollinizer (included) for every 3 plants to ensure fruiting.

Cannot ship to SC. #04077. (A) pkt. (10 seeds) \$8.65

Improved Meyer Lemon Tree

Enjoy fresh citrus all year, even in northern locations. A cross between a lemon and a mandarin orange. Easy-to-grow with the ability to bloom and set fruit all year. Fragrant, white flowers are followed by large, orange-yellow fruits perfect for juicing, cooking and baking. Trees rarely exceed 5 ft. tall. Place in a sunny location. Move inside to a well lit room before the first hard frost. Heavy yielding trees are self-pollinating and bear fruit in 1 to 2 years. Ships in gallon pots. Zones 9-10. **Cannot ship to AK, AL, AZ, CA, FL, HI or TX.**

#30970. \$46.95 each; 3+ \$44.95 each

Pilgrim Cranberry Plants

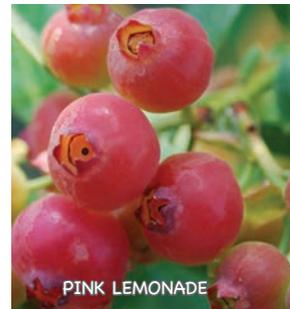

A versatile and nutritious fruit that makes lovely ornamentals and ground covers, as well. Grows to just 6" tall with evergreen foliage. Tasty berries ripen in the fall. Hardy to -30°F. Ships in 3" pots. Zones 4-9.

#30280. \$17.95 each; 3+ \$16.45 each; 6+ \$14.95 each

Pink Lemonade Blueberry Plants

Just as flavorful and high in healthful benefits as blue varieties. Use for fresh eating, baking and freezing. Ornamental, 4 to 5 ft., plants are covered with pale pink, bell-shaped flowers in spring and fruits from mid-July through August. Glossy green leaves become bright orange and scarlet in fall. Grow same as standard blueberries. Ships in a one qt. pot. Zones 4-8. **Cannot ship to AK, GA, HI, MI or WA.**

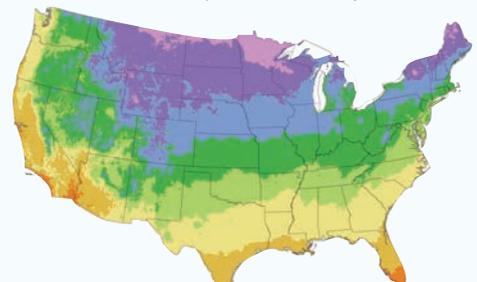

#30141. \$20.95 each; 2+ \$18.95 each; 5+ \$16.95 each

Fresh & Healthy Salad Fixin's!

Aspabroc Hybrid Baby Broccoli

50-60 days. Known as Broccolini in the produce section of your grocery store and on restaurant menus. Resembles a broccoli rab with an asparagus stem and has a mild taste. Easy-to-grow and requires little space. After first maturity of the central shoots, plants will set 3 to 5 shoots shortly thereafter and continue for about 4 weeks in mild weather.

#01460. (A) pkt. (20 seeds) \$4.55

Purple Haze Hybrid Carrot

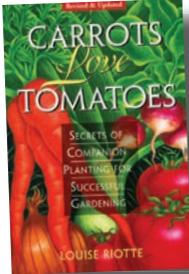

70 days. 2006 AAS Winner. Imperator-type. Long, 10 to 12", smooth roots have rich purple exteriors and bright orange centers. When cut, the color is amazing and the sweet flavor is incredible. Cooked flavor is also excellent, but the color fades. Easy-to-grow.

#01669. (A) pkt. (500 seeds) \$4.45

Rainbow Hybrid Carrot

70 days. Cylindrical, 7 to 8" roots in yellow, white, light and dark orange and coral, each with a distinctive flavor. High sugar content.

#01671. (A) pkt. (500 seeds) \$4.65

Carrots Love Tomatoes

By Louise Riotte. Learn the secrets of companion planting and watch your garden thrive! Create plant relationships that result in natural insect control, weed control and increased yields simply by identifying good and bad plant companions. This illustrated guide contains hundreds of interesting and educational facts. 224 pages.

#55469. \$15.95 each

Baby Hybrid Cauliflower

28 days. The smallest and cutest cauliflower available on the market today. Each plant produces a small, compact, 2 to 3" head AND as an added bonus, its leaves are edible – raw or cooked! Due to its size, it's ideal for growing in small pots and containers. For true baby heads, plant 6 to 10" apart, otherwise heads will be larger.

#01704. (A) pkt. (20 seeds) \$4.95

Cheddar Hybrid Cauliflower

68 days. Curds are orange through and through! Smooth, dome-shaped heads have almost as much Beta-carotene as carrots. Fantastic flavor and texture, cooked or raw. Color deepens when cooked. Prefers moderate to cool temperatures.

#01706. (A) pkt. (20 seeds) \$6.65

DePurple Hybrid Cauliflower

68 days. Unique, attractive, lavender-pink heads grow 7½ to 8" and have contrasting white stems. Flavor is excellent and the color holds when cooked. Uniform heads are dense and dome-shaped with tight curds. Wrapper leaves provide good protection. Plants are widely adaptable. Ideal for both spring and fall plantings.

#01715. (A) pkt. (20 seeds) \$6.75

"COLORFUL CAULIFLOWER" COLLECTION

One packet each of Cheddar, DePurple & Snow Crown.

#01732(X). 3 pkts. for just \$15.95. Save 15%!

Snow Crown Hybrid Cauliflower

60-70 days. 1975 AAS Winner. Heavy yields of uniformly shaped, semi-dome, 2 lb. heads, 8" across. Vigor and overall quality make this a top choice of growers everywhere.

#01730. (A) pkt. (100 seeds) \$5.45

Aristotle Basil Herb

60 days. Compact with tightly packed, tiny leaves that create pretty, pale green mounds. Easy-to-pick and has a classic basil taste and aroma. Perfect for patio gardens, containers and window boxes. Plants have a dense, bushy habit that spreads to 15". Grows 12" tall, but is best when harvested at about 6".

#02359. (A) pkt. (50 seeds) \$4.35

Prizm Hybrid (Baby leaf) Kale

50-60 days. 2016 AAS Winner. Attractive, tight, ruffle-edged leaves are short and content in containers and gardens. Easy to maintain, almost stemless, 3½ to 4" stalks are quick to re-leaf. Harvest early and often for a continual supply. Excellent tasting, almost nutty flavored leaves are tender enough to enjoy in fresh salads, but also hold up well when cooked. Easy-to-grow.

#01457. (A) pkt. (100 seeds) \$5.15

Rainbow Candy Crush Hybrid Kale

45-50 days. Use as a baby leaf or allow to fully mature – either way, leaves are more tender than typical colored kales. Flavor is mildly sweet and can be enjoyed fresh or cooked. Great for salads, smoothies and for making kale chips. In cooler climates, curled leaves are mostly vibrant pink and have bright green edges. Leaves will be darker green and more purple in hotter climates. Ornamental plants have an almost perfectly manicured look due to their naturally rounded, compact habit. Grows to approx. 12" tall by 18" wide.

#01456. (A) pkt. (10 seeds) \$5.75

Konan Hybrid Kohlrabi

42-50 days. 2016 AAS Winner. Smooth, globe-shaped bulbs grow to about 6" in diameter and have snow-white flesh with a nice crunchy texture and a juicy, mild radish/cabbage flavor. Grow in containers or gardens. Upright, uniform leaves resist insect damage so plants stay healthy all season long.

#02487. (A) pkt. (50 seeds) \$5.75

Green Ice Lettuce

45 days. This loose-leaf type is in high demand for all types of salads due to its sweet, vitamin-rich, crispy leaves. Slow to bolt and doesn't become bitter in hot weather.

#02560. (A) pkt. (1,000 seeds) \$3.95

Bon Vivant Mesclun Blend

35-45 days. A gourmet mix of exotic leaf lettuces of the best flavors, textures and colors. Includes deep reds and bronze tones and greens ranging from the lightest greens to the darkest emeralds.

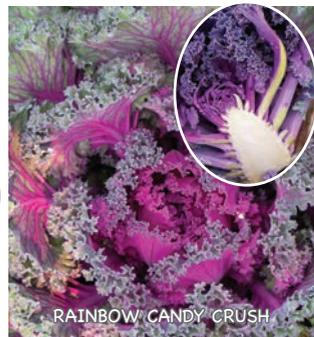

#02568. (A) pkt. (1,000 seeds) \$3.45

DID YOU KNOW... Most garden insects can be eliminated by utilizing our Giant Fleece Easy Tunnel on pg. 67. If pests do appear, most can be effectively eliminated by using organic products listed on pg. 65 and the Order Form.

CANDY

SIMPLY SALAD™ MESCLUN MIXES

Modern technology packs several species of greens into one easy-to-sow pellet. Plant 2 or 3 pellets in a 6" or larger container and in about 5 to 6 weeks begin harvesting fresh greens. Cut back to 2", allow to regrow, cut again.

Alfresco Mix

A mix of red and green leaf lettuces with arugula, endive and radicchio. #02542.

City Garden Blend

A mix of traditional red and green lettuces. #02543.

Global Gourmet Mix

A mix of red and green leaf lettuces and Asian greens. #02544.

Prices, above 3, per variety:

(A) pkt. (10 pellets) \$4.95

#02541(X). Get 1 pkt. each of all 3 Simply Salad Mixes for just \$11.85. Save 20%!

WARRIOR

WARRIOR RED

Candy Hybrid Onion

85 days. Extremely early cross between a long-day and a short-day onion. Jumbo bulbs have mild, sweet, white flesh. Small-necked and a golden-brown outside – inside, they have large, thick rings with mostly single centers. A good keeper when cured. Grows well anywhere in the U.S. (Sow in spring.)

#02722. (A) pkt. (250 seeds) \$4.95

#02722PL. 1 bunch (40-50 plants, depending on size)

\$15.95 each; 2+ bunches \$14.45 each;

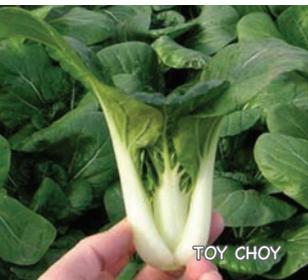

5+ bunches \$12.95 each

Cannot ship plants to AK, HI, ID and WA.

Warrior Bunching Onion

60 days. 2016 AAS Regional Winner (Southeast, Mountain/Southwest). An easy-to-grow bunching onion. Grows quickly producing a very uniform crop of slender, crisp, 1/2" wide stalks that are easy to harvest and clean. Holds up in the garden longer than similar varieties. Use raw to add texture, flavor and color to all kinds of dishes or try them grilled.

#02741. (A) pkt. (250 seeds) \$3.95

TOY CHOY

Warrior Red Bunching Onion

60 days. The red version of our award winning bunching white Warrior above. White stems are long and slender with small red bulbs. Its flavor is mild and adds the perfect amount of color to any dish, fresh or cooked. These lovely deep burgundy colored bunching onions grow approx. 24 to 26" tall as a scallion. This variety also works great for a microgreen.

#02742. (A) pkt. (250 seeds) \$3.65

EASTER EGG II

Toy Choy Hybrid Pak Choi

30-35 days. An early maturing, 5", mini Pak Choi, with crisp, white stalks and smooth, dark green leaves. Excellent mild flavor. Enjoy sautéed, roasted or in stir-fries. Great for summer growing.

#02807. (A) pkt. (200 seeds) \$4.25

Easter Egg Blend II Radish

30 days. A multicolored mix of globe-shaped, 1" roots in a delightful array of colors – pink, red, lavender, purple and white all with white interiors. Crispy, mild taste. Great in salads or as part of a colorful relish tray.

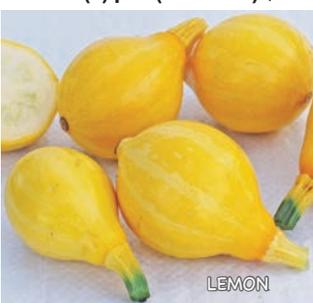

#03345. (A) pkt. (500 seeds) \$3.85

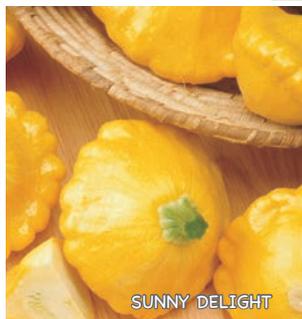

SWEET BABY

WATERMELON

LEMON

SUNNY DELIGHT

BRIGHT LIGHTS

EASYPICK GOLD II

Sweet Baby Hybrid Radish

40-45 days. 2016 AAS Regional Winner (Great Lakes, South-east). Outstanding flavor, quality and uniformity. Crisp, crunchy and slightly spicy, 3" elongated, purple radishes are tasty. Interior color ranges from pale purple to white with violet streaks to mostly white with a few purple splashes of color. Enjoy multiple harvests with this early maturing variety.

#03319. (A) pkt. (100 seeds) \$4.75

Watermelon Radish

59 days. A charming heirloom – crisp, mild and even a little sweet! Cream-colored, 2 to 4" roots slice open to mimic a tiny watermelon – green "rind" with brilliant pinkish red flesh. Prominent tops make them easy to pick even when small, when they tend to be the most colorful. Add one-of-a-kind flair to garnishes, salads, appetizers, stews, stir-fries and more. Roots hold well without turning woody.

#03394. (A) pkt. (250 seeds) \$3.85

Lemon Summer Squash

55 days. Attractive, 3 to 4 oz. fruits resemble the color and shape of a lemon and are approx. the size of a baseball. Oddly shaped fruits have an excellent flavor and are perfect for frying, sauteeing and chopped up fresh in salads. Vining plants produce heavy yields over a long growing season and feature good resistance to insects and pests. Ideal for farmers markets and home gardeners.

#03557. (A) pkt. (30 seeds) \$4.15

Sunny Delight Hybrid Squash

40 days. Matures earlier, resists greening better and holds its flat, scalloped shape longer on the vine than similar varieties. Uniquely shaped fruits, with small blossom scars, appear in abundance on semi-bush plants with an open habit for easy harvest. Ideal as a baby vegetable.

#03586. (A) pkt. (20 seeds) \$5.45

Bright Lights Swiss Chard

60 days. 1998 AAS Winner. Brings pizzazz to the table with stems of gold, pink, orange, purple, red and white and mild chard flavor. Begin harvesting the vitamin-rich, glossy green, savoyed leaves in 4 to 5 weeks – let them grow back for repeated cuttings. Use greens fresh, steamed or like spinach. Strong bolt resistance.

#03742. (A) pkt. (200 seeds) \$4.95

Easypick Gold II Hybrid Zucchini

45-50 days. Count on easy and continuous harvesting on plants with nearly spineless leaves and stems. Simply twist the slender, 10" fruit to pick – less scarring and clean harvest means longer shelf life. An excellent fresh-eating variety – can also be used for roasting, steaming and stir-fries or try some on the grill. Plants have an open habit.

#03533. (A) pkt. (15 seeds) \$5.15

A-Frame Trellis

Great for cucumbers and squash. Grow healthier plants with better fruits and easier harvesting. The secret is allowing plants to grow off the ground preventing diseases, pests and poor quality fruits. Green powder coated metal frame folds and unfolds for easy setup and convenient storage. 58"H x 42"W.

#54274. \$62.95; 2 or more \$60.95 each

Seed Starting

Purple Cow Organics® Seed Starter Mix

Get seedlings off to a strong start. Compost based mix for seed starting in trays, blocks or small containers. Contains naturally occurring beneficial microorganisms and enough fertility for most transplants for up to 45 days – or until the roots begin to outgrow the space.

#54342. 12 Qts., \$21.95

#54343. 1 Cubic ft., \$34.95

Espoma® Organic Seed Starter Mix

A premium potting mix enhanced with Myco-tone™, a proprietary blend of 11 different strains of mycorrhizae, excellent for all seedlings and cuttings. Uses up to 30% less water than ordinary soils, improves transplant survival and growth and promotes bigger root growth for increased water uptake. Increases drought tolerance and other environmental stresses, improves soil structure and increases fertilization utilization.

#54395. 8 Qts., \$15.95

Q-Plug Starter Kit

Includes everything needed to start seeds and cuttings using a unique float system that gives plants constant access to the ideal air-to-water ratio – never over-water again! Extra large plugs encourage vigorous, deep root growth and remove from the insert easily with no damage to the plant. Includes a 21"L x 11"W x 2 1/2"D heavy duty seed tray, a 7"H dome with three vents, a 55 cell reusable floating styrofoam insert with large 1 1/2" cells and 55 aerated Q-Plugs. Instructions included.

#53826(X). \$44.95

#84555. Extra Trays, \$12.95 each

#85245. Extra Domes, \$11.95 each

#53823. Q-Plug 55 Pack Refills, \$29.95 each

#53824. Extra 55 Cell Styrofoam Inserts, \$10.75 each

Composting

RollMix™ Composter

Home composting has never been easier or quicker – it's possible to make your own compost in as little as 6 weeks! All you need to do is add water, a variety of kitchen waste and roll it. Its compact size makes it perfect to compost anywhere you have limited space. Made of durable, polyethylene fabric that traps heat, holds odors in and keeps pests out. Makes approx. 32 gallons of compost, measures 26"L x 22"D and weighs less than 3 lbs.!

Folds flat for easy storage. Instructional guide included. #53076. \$44.95

EcoGrow™ Enviro-Grow Containers

Made from recycled paper and natural ingredients that decompose over time. Ideal for transplanting seedlings or starting seeds indoors. Fiber material breathes like clay to keep roots healthy. At planting time, peel off the bottom of the pot, position in the hole, place the bottom beside it and fill with soil. Completely compostable and biodegradable.

#54320. 3-3/4" Round Pots, 10 for \$6.95; 50 for \$21.95

#54318. Carry Trays for 3-3/4" Pots, \$6.95 each; 5 for \$21.95

Cowpots™

Made from 100% natural composted cow manure, completely odorless and biodegradable. As plants grow, roots are able to penetrate the sides of the pot for better root growth, while absorbing valuable nutrients. Transplant directly into the soil so there is no transplant shock. Pots fully decompose within weeks, leaving valuable nutrients and organic matter behind. Environmentally friendly.

#54375. 3" Pots, Pkg. of 12, \$11.95; 2+ \$10.45 each

#54376. 4" Pots, Pkg. of 12, \$12.95; 2+ \$11.50 each

Greenhouses

Light-Booster Double Plant House

A wider version of the Light-Booster Single Plant House on page 8, with more shelf space and 4 full height zippers that allow the front 2 panels to be individually rolled up. 59"W x 63"H x 15.7"D. #52957. \$187.95

SunBlaster™ Nanodome Mini Greenhouse

Custom kit includes everything you need to start seedlings, propagate fresh cuttings or grow fresh herbs all year long! The high dome incorporates light tracks engineered to receive lighting bi-directionally.

Includes 7" Nanodome with vents (for optimum temperature and humidity control), 1020 double thick tray and a SunBlaster™ 18" T5 light. #52942. \$69.95

Tomato Greenhouse

Get the most from tomato plants with their own red mini-greenhouses – color enhances tomato growth up to 20%. Allows air circulation and heat retention for faster growing tomatoes while protecting against damaging weather and pests. Fits over most tomato cages or can be attached to stakes. Made of perforated plastic film with UV stabilizers added for longer life. Each package will cover 5 to 7 plants. #52988. 28" W x 20"L, \$13.95 #52989. 38"W x 20"L, \$15.95

DID YOU KNOW... There are 3 main factors to get consistently good seed germination?

1. Proper bottom temperature - Many seeds germinate with 70-75°F bottom heat, but 80-85°F is best for tomato & pepper seeds. See Seedling Heat Mats on page 8.
2. Proper media moisture - Pre-moisten mix & after sowing, cover trays with plastic or domes to keep the media properly moist.
3. Oxygen - Use a seed starting mix that offers proper oxygen for seeds. Never use potting soil, as it is too dense.

Lighting

NEW! Happyleaf™ LED Procyon 2.0 All-Purpose Grow Lights

Germinate seeds or grow all types of vegetative, fruiting or flowering plants indoors with this highly efficient, money saving, LED grow light! Provides 3 times the light of T5 fluorescent bulbs (below), helping seedlings grow more robust. An integrated T-slot channel allows for easy hanging options and includes 2 eye-bolt hangers. Built to last for years and includes a 5-year manufacturer's warranty. Water resistant (IP65). Made in the USA.

- Silent operation.
- Full spectrum with PAR* levels for successful growing.
- Daylight appearance/no pink cast.
- 120° beam angle - Efficacy: 2.5 umol/J

*PAR (Photosynthetic Active Radiation) is the measure that most accurately conveys what plants need to grow effectively.

17" - #77050 (Wt. 13 oz.) \$159.95 each

33" - #77051 (Wt. 26 oz.) \$219.95 each

Hydrofarm® T5 4ft. 4 Tube Premier System w/Bulbs

Delivers performance, flexibility and high lumen output in any growing environment. These daisy-chainable systems allow multiple hanging configurations to meet your needs. Combines German specular aluminum with energy-efficient/high-output T5 bulbs that are twice as efficient as ordinary grow lights. 10 ft. grounded power cord and four T5 bulbs included. #82110. \$224.95

T5 Replacement 4 ft. Bulbs #74671. Pkg. of 4, \$52.95

Fertilizers & Soil Helpers

NEW! True Organic™ Tomato & Vegetable Food

Blended from natural and organic farm-grade ingredients. Proven to be extremely beneficial for both plants and soil. For in-ground and container plants, both indoors and out.

Liquid 3-2-3

Blended with soy protein Hydrolysate. Apply every two weeks to help grow superior harvests. Covers approximately 30 sq. ft. when mixed at a rate of 2 oz. per gallon of water.

#118161. 16 oz. Concentrate, \$11.95

Granular 4-5-6

Grow healthier harvests of organic fruits and vegetables! Contains 6% calcium, seabird guano which is a great source of phosphorus and slow release nitrogen, shrimp and crab shell meal which is a sustained supply of calcium and nitrogen for soil and plants, poultry manure ethically sourced from organically raised birds, and organically sourced soybean meal. No sludge, fillers or additives. Apply once per month. Covers up to 70 sq ft.

#118126. 4 lb. Reclosable Bag, \$16.95

Neptune's Harvest Tomato & Veg Formula 2-4-2

The perfect complete fertilizer for tomatoes, vegetables and more. Made from fresh fish, seaweed, molasses, yucca extract and humic acids, this formula was uniquely designed for plants with intense growth or "vegging" stages. Growers will see increased stalk/stem mass resulting in higher yields. In addition,

it provides necessary nutrients to keep plants vigorous with strong root zones and lush foliage, increasing tolerance to various diseases, temperature and drought.

#51266. 32 oz., \$35.95 #51267. Gallon, \$79.95

Neptune's Harvest Fish & Seaweed Fertilizer 2-3-1

All natural, 100% organic. Get the best of both products with this organic fertilizer that perfectly blends fish hydrolysate and seaweed ensuring a complete fertilization program. Fish and seaweed are known to increase the natural sugars in plants which results in increased yields, improved shelf life of fruits and vegetables, as well as stronger, more colorful foliage and flowers. It does not deplete natural soil elements and has no odor. Mix 1 oz. per gallon of water and apply every 2 to 3 weeks.

#51221. 18 oz., \$20.95

#51222. 36 oz., \$30.95

Neptune's Harvest Crab & Lobster Shell 5-3-0 Organic Plant Food

A dry organic source of nitrogen, phosphorus, calcium and magnesium. Retains moisture in soil and builds organic matter. Gives roots something to grab onto, for a food source, creating a deeper root system. Integrated into the soil, it encourages chitin eating bacteria which helps control/eliminate ants, grubs, fungus and root nematodes. Placed around plants, it keeps slugs and snails off. Also helps choke out weeds and keep moles, voles, mice, etc. from digging up bulbs and root vegetables. Perfect for use in flower beds, vegetable gardens and on lawns and turf. Safe for pets and kids.

#55438. 4 lbs., \$24.95

Sea Magic™ Seaweed Extract

A natural growth activator. Dries quickly using special methods to keep its natural growth enhancers and disease fighting substances intact. Apply every 2 to 3 weeks as directed and watch everything grow bigger and better. Ideal for ornamentals, lawns, fruits, vegetables and more. A one oz. packet makes up to 66 gallons.

#51150. \$12.95

Bonide® Tomato & Blossom Set Spray

This natural hormone-type spray makes blossoms set fruit even under adverse conditions. Promotes flowering, increased blossom set and increased fruit yield. Also for use on beans, cucumbers, eggplants, melons, okra, peppers, strawberries and grapes. **Cannot ship to AK, CA or HI.**

#50440. 8 oz. Pump Spray, \$11.55

Jack's Classic® All Purpose 20-20-20

Water soluble plant food considered the industry standard of general purpose fertilizers by professional growers. Feeds both through the roots and the leaves. This formula of nitrogen, phosphorus and potassium provides fast green-up and rapid leaf expansion. For use on all your indoor and outdoor plants. Indoors it is especially effective on foliage plants. A proven performer in the vegetable garden for generations.

#56316. (B) 4 lbs., \$29.95

Old Truck Organics Tomato & Vegetable Plant Food 5-3-3

High quality, organic fertilizer with 25% MYKOS mycorrhizae (an all natural root enhancing soil microbe) plus kelp and humic acid. Helps transplants establish more quickly, flowers appear sooner and fruits and vegetables ripen even earlier! Each bag has at least 85,000 microbes that will immediately begin to help plants absorb nutrients and

water. Calcium combined with the mycorrhizae, helps protect tomatoes from Blossom End-Rot. Use on tomatoes, herbs and vegetables. Treats up to 100 sq. ft. or 28 one gallon tomato plants.

#50511. 2.2 lb. Reclosable Bag, \$18.95

Old Truck Organics MYKO Start Paks 5-2-3

Biodegradable Transplant Paks. Organic fertilizer with 25% MYKOS mycorrhizae plus kelp and humic acid. Increases drought tolerance! Designed for

transplanting and staggering in containers, raised beds and in-ground gardens. Just place a few in the transplant hole for weeks of vigorous plant growth. Provides 4 weeks of nutrient supply. Holds the fertilizer in place until plants need it. Each pak contains at least 300 microbes to help get plants

started off right. Use on flowers, fruits, herbs and vegetables. Treats up to 24 plants.

#50512. 24 Starter Paks, \$18.95

Coop Poop™ Organic Tomato Plant Food

Contains 8% calcium for strong roots and plants. Low odor and high performance. Low dust application. Natural nutrients for plants and soils to improve plant health, growth and development. Offers all the nutrition

without any harmful ingredients.

#51011. 4 lb. Reclosable Bag, \$14.95

Wiggle Worm Soil Builder

100% organic fertilizer produced naturally by earthworms. Earthworm castings are one of the purest forms of sustained release plant food. Castings

won't burn even the most delicate plants, are naturally odor-free and improve soil structure, aeration and drainage. They are also rich in beneficial bacteria and microbes to help plants absorb nutrients. Mix with soil when potting or use as a top-dress in garden beds.

#58014. (C) 15 lbs., \$25.95

Espoma® Tomato-tone® 3-4-6

Fertile soil, a pH of 6.5 to 7.5 and plenty of Tomato-tone® will produce super tomato yields! This formula is based on recommendations of six university studies. High organic content prevents rapid foliage growth at the expense of blooms. Provides all 15 essential nutrients for optimum growth. Mix according to directions and feed your tomatoes twice a month.

#86945. (A) 4 lbs., \$14.95

Algoplus Fertilizer

100% mineral based – no chlorides, carbonates or sodium – plus it's odorless, colorless and environmentally safe. Encourages rapid cell growth using three major elements along with micronutrients. Contains a higher percentage of potassium to promote production of larger tomatoes. Use on cucumbers, melons and peppers as well. Use one capful per gallon of water as a regular feed or ½ capful to spray directly on the foliage and watch

the amazing results. One-liter bottle makes 100 gallons. Water soluble.

#51081. 4-6-8 Tomato

#51080. 6-6-6 All-Purpose

Prices, above 2: \$19.95 each; 2+ \$18.95 each

Happy Frog® Tomato & Vegetable 5-7-3 Fertilizer

Tomatoes, soft fruits and veggies require a special nutritional mix to ensure high yields. Contains premium ingredients like bat guano, kelp meal, alfalfa meal, fish meal and naturally occurring organic material that is formed

when organic matter decomposes. Also contains calcium which helps prevent Blossom End-Rot and boosts stronger cell walls, helping plants fight off disease. Feeds plants and produces high quality fruits. **Cannot ship to AK, HI or IL.**

#51119. 4 lbs., \$19.95

John & Bob's Soil Optimizer

Avoid heavy digging and lugging cumbersome bags of humus to repair poor soil. This 100% organic blend of concentrated, fully decomposed humus and other essential soil additives is simply spread over existing lawns or gardens and watered in. It's completely safe with no risk of burning plants or over-applying. Spreading 3 lbs. over 1,000 sq. ft. gives the same result as working in hundreds of pounds of compost humus. When applied as directed, it's guaranteed to start improving soil that season.

#51106. 3 lbs., \$23.95
#51107. 6 lbs., \$34.95

Monterey® Foli-Cal®

A liquid formulation of calcium used to prevent and treat plant disorders associated with calcium deficiency such as Blossom End-Rot on tomatoes, peppers and melons. Can also be used on other vegetables, fruit trees and vine crops. Complements good soil fertility by supplying nutrients directly to the foliage and fruit of crops during critical growth stages. **Cannot ship to AK, HI, KY, ND or WY.**

#50401. Pint, \$17.95

Weed Prevention

Preen® Vegetable Garden Natural Weed Preventer

Weed-free vegetable gardens without all the work! An organic way to keep weeds from sprouting. Use in fruit, vegetable, herb, and landscape beds anytime during the growing season to save time from backbreaking weeding. Formulated to control some of the toughest weeds like clover, bluegrass, crabgrass, foxtail, lambsquarters and plantain. Just sprinkle once a month to prevent weeds from returning. Safe around kids and pets. Covers 250 sq. ft. **Cannot ship to AK, DC, HI or SD.**

#89854. (A) 5 lbs., \$29.95

Monterey® Vegetable And Ornamental Weeder

One of the few weed killers safe to use on vegetable gardens. This pre-emergence herbicide kills weeds before they germinate. Controls grasses and broadleaf weeds for up to 5 months. Can also be used around trees, shrubs, roses and other ornamentals. 3 oz. mixed in 2 gallons of water treats 1,000 sq. ft. Active ingredient Trifluralin. **Cannot ship to AK, DC, HI or WA.**

#50375. Pint, \$34.95

Bonide® Grass Beater®

Kills weedy grasses without injuring desirable plants. This systemic post-emergent herbicide can be sprayed over flower beds, trees, shrubs, ground covers and vegetable plants to eliminate quackgrass and other weedy annual and perennial grasses. Stops growth of weed grasses within 2 days.

#52330. 8 oz. Concentrate, \$29.95

BioFungicides

Monterey® Complete Disease Control

Prevents both fungal and bacterial plant diseases. This broad spectrum formula is approved for organic gardening and treats a wide range of diseases including Powdery Mildew, Botrytis, Early and Late Blight, Fire Blight, Fusarium and Pythium. Active ingredient *Bacillus amyloliquefaciens* strain D747, colonizes the roots to prevent diseases. Apply as both a foliar spray and soil drench, indoors and outdoors, on vegetables and ornamentals. Mix approx. 1 tsp. per gallon of water. **Cannot ship to AK, HI or ND.**

Arber Bio Fungicide

Say goodbye to diseases on leaves and in soils and hello to stronger plants! Protects against fungus, mold, mildew, and rot using Mother Nature's good bacteria. For use indoors and out on vegetables, roses, fruits, berries, nuts, flowers, foliage houseplants, ornamental trees, and shrubs. Controls and suppresses Grey and White Molds, Downy Mildews, Black Spots on roses, Leaf Spots, Root Rot, Botrytis, and more. Makes up to 8 gallons or 32 quarts. **Cannot ship to AK, CA or HI.**

#50287. 8 oz. Concentrate, \$19.95

Arber Bio Insecticide

Prevent insect and mite build up and suppress soil-dwelling pests and nematodes. This unique formulation uses good bacteria that's harmless to beneficial insects and pollinators and helps plants thrive. Contains over 20 natural compounds that are effective against the smallest, yet mightiest of pests. For use indoors and out on vegetables, fruits, nuts, ornamental plants, trees, shrubs, flowers, foliage and tropical plants. Controls and prevents aphids, fungus gnats, mites, mealybugs, leafhoppers, tent caterpillars, grubs, leaf beetles, thrips, whiteflies, stink bugs, fruit flies, and more. Makes up to 8 gallons or 32 quarts. **Cannot ship to AK, CA or HI.**

#50288. 8 oz. Concentrate, \$19.95

Monterey® Bug Buster-0 Insect Control

This organic insecticide controls over 100 insects. A natural pyrethrin, it quickly knocks down and kills cucumber beetles, Japanese beetles, stink bugs, tomato hornworms and many more insects. It can be used on fruits, vegetables and ornamentals – even on the day of harvest. Easy-to-use. One of the few organic treatments for onion maggots. Dilute 1 to 1.4 fluid ounces in one gallon of water to cover 1,000 sq. ft. **Cannot ship to AK, AR, AZ, HI, ID, IA, KY, NE, NV, ND, WV or WY.**

#50012. 8 oz. Concentrate, \$38.95

Organocide™ Bee Safe 3-in-1 Garden Spray

A patented blend of sesame and fish oils so safe you can enter your garden and yard immediately after application. Kills aphids, whiteflies, spider mites, fungus gnats, thrips, mealy bugs, scale insects and more. Controls Powdery and Downy Mildews, Black Spot, Greasy Spot and more. Use on fruits, vegetables, flowers, ornamentals, trees and shrubs. May be used right up to the day of harvest. Makes 10 gallons of spray. **Cannot ship to AK, CT, HI, IA or NM.**

#88626. 32 oz. Concentrate, \$29.95

Pest Control/Repellents

Enoz® BioCare® Gnat Stix

A simple way to gain control of fungus gnats and other tiny flying insects that are not only annoying, but can also do real harm to plants by feeding on sap, leaves, and roots. Fungus gnats, aphids, plant lice, and other similar insects are attracted to the specific shade of yellow, will land on them, become stuck, and perish. Controls infestations in houseplants and greenhouses. Recommended for indoor use. Pesticide-free. Safe for use in food handling and food storage areas. Pkg. contains 12 sticky traps (1" x 4") and 12 wooden stakes. **#52151. Pkg. of 12, \$11.95**

Rescue! Flypad®

Stick it to flies! Traps flies, not fingers! Uses exclusive technology with appealing colors and multi-dimensional patterns to lure flies to its adhesive surface. Targets common house flies, bottle flies, cluster flies, fruit flies and gnats. Works everywhere from windows to garbage cans, indoors and out. Clean, simple setup. Odor and pesticide-free. Made in the USA. **#52157. Pkg. of 2, \$8.95**

Victor® Quick-Strike™ Gopher & Mole Gasser

Safe and easy-to-use, smoke from self-igniting sticks penetrate deeply into burrows and tunnels. With a long burn time, they ensure successful pest control. Kills moles, pocket gophers, woodchucks, skunks and more. No lighter necessary. Waterproof and windproof. **#56007. Pkg. of 4, \$16.95**

Green Screen® Deer and Rabbit Repellent

Proven to protect prized plants and flowers. Ideal for home gardens, orchards and vineyards. Comprised of a proprietary mixture of bone meal, blood meal and pepper, bags emit an offensive odor that is effective in discouraging wildlife. Easy-to-use. Hang from plants, stakes or trees. 100% organic and non-toxic. Resealable plastic pouch contains 10-2 oz., pre-filled, cotton draw string bags. **#52092. \$21.95**

Bonide® Revitalize® BioFungicide

For organic gardening. Triggers plant immune response and colonizes roots. A high potency biofungicide/bactericide that controls blights, molds, rots, spots and mildews on vegetables, fruits, nuts, ornamentals, lawns, houseplants and tropical plants grown inside or out. May be used right up to the day of harvest. Makes up to 96 gallons. Foliar spray or soil drench. **#50046. 16 oz. Concentrate, \$22.95**

Visit Our Website at www.totallytomato.com

NEW! Hornet's Nest
Territorial insects avoid areas where they detect the presence of an existing nest. Simply hang outdoors around homes, eating areas, camping spots, and any other place you want clear of wasps, hornets, carpenter bees and more. Water resistant, safe and chemical-free. Measures 11" tall.

#52103. Pkg. of 3, \$19.95

NEW! Jute Trellis
Environmentally friendly. Rugged netting provides support for heavy vining plants. Heavy duty with a 5" reach through mesh that makes harvesting easy. Ideal for tomatoes, cucumbers, peas and more. Blends well with natural environments. Measures 5'H x 30'L.

#52123. \$32.95

Soil Testing & Analyzing

Professional Soil Test Kit

For the homeowner desiring accurate, detailed soil analysis at a reasonable cost. Kit contains 10 tests each of soil pH, Nitrogen, Phosphorus and Potash. Includes instructions for amending soils based on test results. Packed in a sturdy plastic carrying case.

#51345. 40 Test Kit, \$31.95

#51346. Supersized 80 Test Kit, \$37.95

Tomato Grower's Test Kit

An easy-to-use test to check Nitrogen, Phosphorus, pH and Potash to grow stronger, healthier tomatoes! Kit contains 4 tests. Instructions included.

#51320. WAS \$6.75 NOW \$4.95

4-Way Analyzer

Measures the four most important aspects of plant health – light, soil moisture, soil pH and soil fertility. It determines the light level where the plant is located, and the moisture level where it counts – at the roots. Soil pH is measured on a scale of 0 to 9, and a combined Nitrogen, Phosphorus, Potash reading is determined using USDA standards. No batteries required. One year manufacturer's warranty. **#51307. \$42.95**

Electronic Soil Tester
Tests soil pH and fertilizer levels in a quick, one-minute test. Directions include ideal pH range for 350 plants and easy guidelines for soil correction. Convenient slide switch. Requires one AA battery, not included. **#51309. \$29.95**

Just Bag 'Em!

Tomato Patio Planter Bags Easy-to-use planters for balcony and patio gardens. The perfect solution for people who want to garden, but don't have the space. These tomato-red bags are bright accents for patios and have a reinforced woven handle on each side so they're easy to slide around. Con-

structed of tough polyethylene and made to last for several seasons. Equipped with reinforced drainage holes so plants don't become water-logged. Bags are 14" in diameter, 18" deep, hold 40 liters of medium and can accommodate 2 or 3 plants depending on variety. **#53886. Pkg. of 3, \$20.95**

Tomato Planter Bags

Love home grown tomatoes but don't have room for a garden? These bags are perfect for decks, balconies and patios. Holds up to two plants, depending on the variety and deep enough for stakes or tomato cages to support plants. Seams are porous to provide drainage. Made of woven polyethylene with wipe clean surfaces and webbed handles for easy mobility. Folds flat for easy storage. Measures 15"H x 12 1/2"D. **#53732. Pkg. of 3, \$28.95**

Protection

Twist-Up Tomato Cloche

Get plants in the ground earlier! Protects tomato, pepper and other tall plants against blight, slugs and harsh weather. Pops up quickly and folds down neatly. Works well with our popular Tomato Patio Planter™ Bags above. Made of clear plastic to allow plenty of sunlight and warmth that plants need to grow. Includes aeration vents and ground pegs to hold in place. Measures 17 1/2"D x 37 1/4"H and weighs 1 1/4 lbs.

#84101. \$30.95; 2+ \$28.95 each

GIANT EASY TUNNELS

A patented, all-in-one design that opens like an accordion and sets up quickly. Simply insert the sturdy, rust-proof, galvanized steel hoops, that are sewn into the fabric, in the ground. Sides lift up to allow easy access to plants. Closable drawstring ends open for ventilation. Covers larger plants or double rows. Provides year-round protection against insects, birds and animals. Tunnels measure 118"L x 24"W x 18"H.

Fleece

Protects against frost and harsh weather, while allowing air, moisture and sunlight to filter through. Made from UV-stabilized,

heavy-weight, polypropylene fleece. **#53738. \$33.95**

Net

Provides shade against strong sunlight helping to prevent scorched plants and conserve moisture. Made from UV-stabilized, high-density, 5mm mesh polyethylene. **#53729. \$43.95**

CHECK ACCEPTANCE POLICY

When you provide a check payment, you authorize us to process a one-time ACH debit entry for up to the amount of your check. You also authorize us to process credit adjustments to your bank account if a refund is needed. If you have insufficient funds to cover your payment, you authorize us to collect your payment plus a fee of \$40 from your account. Funds may be withdrawn from your account on the same day we receive your payment. Sending a paper check increases processing time and you may not receive your check back from your financial institution.

NEW! UNIQUE, FUN VARIETIES THAT TASTE AS
GOOD AS THEY LOOK – ENJOY!

CREAM OF THE CROP SERIES

75 days. This popular series is known for its cherry types that have superior quality, exceptional flavor and eye-catching/unusual combinations of skin and flesh colorations – these beefsteak versions deliver all that and are sure to be just as popular as their smaller counterparts on page 33. Delicious, 12 to 14 oz. fruits are very meaty, have few seeds, are juicy and have a nice sugar to acid balance. A great slicer and ideal for freezing and canning.

The perfect choice for fresh markets and home gardeners. High yielders.

Beefy Purple

Mahogany fruits are striped with green, are meatier and store better. Plants grow 24 to 30" tall. Determinate. #00062.

Beefy Red

Brick red fruits are striped with golden-yellow when mature, and have bright red flesh. Plants grow 30 to 36" tall. Indeterminate. #00063.

Prices, above 2, per variety: (A) pkt. (20 seeds) \$3.95

PONKY PEPPERS™ HYBRID SERIES

85-100 days. Excellent for hanging baskets or containers! Plants start out very compact – after the initial harvest, in containers, they will grow approx. 15 to 20" tall and spread 24"; in hanging baskets, plants will develop a trailing habit. First fruits appear in the center of the plant, with side-shoots following. Leaves have a beautiful shine and their structure ensures lower water usage. In containers, a trellis or stake is recommended to support large yields. Low maintenance and easy-to-grow.

Spicy Jane Red 🌶️

Bright red fruits grow 3 to 4" long. Flavor is initially sweet followed by heat similar to that of a jalapeño. Scoville rating is 5,000 units. #09274.

Spicy Jane Yellow 🌶️

Golden yellow fruits grow 3 to 4" long and are spicier than Red. Scoville rating is 7,000 units. #09275.

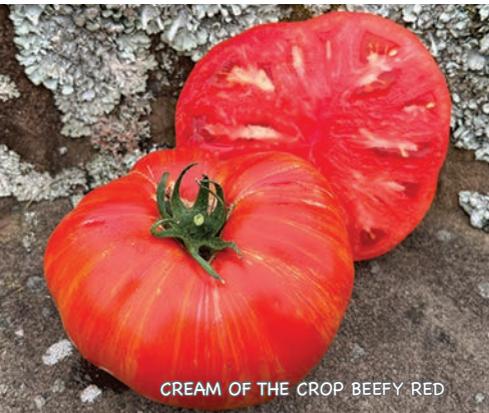

Sweet Caroline Red

Fruits, approx. 6" long, start out an unusual white color, are sweet at any stage of maturity and ripen from yellow to orange and finally to vibrant red. #09060.

Prices, above 3, per variety: (A) pkt. (10 seeds) \$6.35
