Ever Wonder What The Future of Bending Looks Like?

Now you know.

EGB 6020 ATC e

Eco-Conscious Electric Press Brake

In adherence to the primary section of AMADA's **Basic Policy on Sustainability**, we are committed to treating people and the global environment with respect.
https://www.amada.co.jp/en/sustainability

65-Ton Electric Press Brake with Automatic Tool Changer and Voice Command Control

AMADA's latest generation of servo-controlled press brakes, the EGB 6020 ATC e, is equipped with a high-performance electric drive system combined with an Automatic Tool Changer (ATC) and voice command control. These production-enhancing features ensure high-speed bending and repeatable accuracy even if an operator lacks experience. In addition, a compact, newly-redesigned ATC can precisely load complex tool layouts within minutes—making it the ideal solution for variable lot sizes and the seamless introduction of rush jobs.

An integrated HMI control tablet is positioned above the tooling bed to provide convenient access to bending data, thereby maximizing efficiency and productivity. An intelligent AMNC 4ie control allows voice commands to request, change, and verify bend information while the operator is on the move—all as an automatic foot pedal slides to the next bending position to ensure continuous operation.

To further boost productivity, Bi-S II Bend Indicator Sensors automatically measure and correct bend angles up to 85% faster than Bi-S technology. And a new electric Auto-Crowning system maintains longitudinal accuracy throughout production.

The AMNC 4ie control provides operator face recognition and voice-command functionality to maximize efficiency, ease of use, and productivity.

EGB e models available later this year: 6020 standalone, 8025 standalone, 1303 standalone, and 1303 ATC.

ABOUT THE EVENT PARTNERS

The FABTECH Event Partners include five leading industry associations; the American Welding Society (AWS), the Fabricators and Manufacturers Association (FMA), SME, the Precision Metalforming Association (PMA), and the Chemical Coaters Association International (CCAI).

The American Welding Society (AWS) was founded in 1919 as a multifaceted, nonprofit organization with a mission to advance the science, technology and application of welding and allied joining and cutting processes, including brazing, soldering, and thermal spraying. Headquartered in Doral, Florida and led by a volunteer organization of officers and directors, AWS serves more than about 70,000 members worldwide and is composed of 22 Districts with 250 sections and student chapters. **For more information, visit aws.org.**

Based in Elgin, Ill., the Fabricators & Manufacturers Association is a professional organization reaching more than 135,000 industry professionals world-wide focused on improving the metal forming and fabricating industry. Founded in 1970, FMA brings metal fabricators and fabricating equipment manufacturers together through technology councils, educational programs, networking events, award-winning magazines and co-sponsorship of FABTECH. FMA has a technology affiliate, the Tube & Pipe Association, International (TPA), which focuses on the unique needs of companies engaged in tube and pipe producing and fabricating. Nuts, Bolts & Thingamajigs™ is the charitable foundation of FMA. **Visit fmamfg.org for more information.**

Founded in 1932, SME (Society of Manufacturing Engineers) is a nonprofit organization dedicated to advancing manufacturing. SME leads the industrial ecosystem by elevating manufacturers, academia, professionals, and the communities in which they operate. CONFERENCE PROGRAM

ABOUT THE CONFERENCE PROGRAM

The Fabricators & Manufacturers Association, (FMA), SME, Precision Metalforming Association (PMA), and Chemical Coaters Association International (CCAI), co-sponsor the sessions on 3D/additive manufacturing, automation/robotics, cutting, finishing, forming & fabricating, job shop, laser, lean, management, marketing & sales, smart manufacturing, stamping, and workforce development. All sessions offer practical knowledge you can use right away.

The American Welding Society (AWS) presents a comprehensive lineup of welding education. Led by the industry's top professionals, programs focus on best practices and new commercial developments in welding.

CONTINUING EDUCATION CREDITS

Individuals who attend AWS education programs are awarded 1 PDH (Professional Development Hour) for each hour of education program attendance. Individuals seeking FMA Recertification Credits will be awarded two credits for each conference session attended (forming & fabricating, cutting, or finishing tracks) plus an additional two credits for attending the show. Individuals who attend SME education programs may be eligible to receive one credit per hour attended toward their SME-managed recertification requirements.

TAX DEDUCTION

An income tax deduction may be allowed for expenses of education (including registration fees, travel, lodging, and meals) undertaken to maintain and improve professional skills (Treas Reg Sec 1 162-5). Contact your tax consultant for additional details.
