

USB 3.0 Capture Device for High-Performance HDMI Video - 1080p 60fps - Aluminum

Product ID: USB32HDCAPRO

This HDMI to USB video capture device records high-definition HDMI video to your computer. With an aluminum enclosure, this device is built strong for fixed-location or on-the-go capture. It offers a separate 3.5 mm audio input for accompanying audio or voice-overs, and a HDMI pass-through port for connecting a monitor to review the video as it's captured.

Capture HD video at 1080p 60fps

Record 1080p video at 60fps (frames per second), to save your content so it can be shared, stored, or edited. Capture meetings, presentations, conference calls and from security equipment directly to your computer.

Easy video recording on Windows and Mac

The included software makes recording easy. Using a widely adopted codec, videos saved in StreamCatcher™ work with almost any video player and require no converting or editing.

Live stream on Windows

On Windows, you can live broadcast your video over the internet, using Twitch™ or other third-party video streaming platforms, with the included software.

DirectShow compatibility on Windows

With this capture device, you're not tied to the included software. You can record raw/lossless video using any third-party DirectShow™ compatible software, such as Open Broadcaster Software (OBS).

The USB32HDCAPRO is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Record video for training and tutorial purposes from devices that output HDMI
- Great for video producers that may have a camera connected directly to the capture device
- Great for recording the output from your PC, server, or POS station
- Add your own independent audio source for voice-over commentary

Features

- Seamless picture quality with USB 3.0 bandwidth enabling you to capture 1080p video at 60 FPS
- Wide device playback support with universally encoded video files
- Raw/lossless video capture ensuring DirectShow™ compatibility on Windows devices
- Separate 3.5 mm audio input, for adding voice commentary or audio tracks
- Features an HDMI pass-through port, for watching the video as it is captured
