

SUBJECT: End of Life Announcement: Extend EOS of Some Products
BULLETIN NUMBER: TSB17796
BULLETIN TYPE: Product Support Notification
AFFECTED PRODUCTS: All
ISSUE DATE: June 22, 2020
REVISION: 1.0

OVERVIEW:

To comply with the European RoHS Compliance Regulations, in 2016 Juniper upgraded many of its products and the versions of those products referenced in the column below entitled ‘EOL Model Number’ (“Affected Products”) will reach their end of service in 2021. To help our customers which currently continue to deploy such products to better manage their product migration, Juniper now announces the extended End of Service of such products, so that our customers will have more time planning and adopting the respective product upgrades.

AFFECTED PRODUCTS:

The EOS (End of Service) date of the following Affected Products will be extended to 12/31/2021. Please review the **Juniper Support Responsibilities and Exceptions** portion of this Product Support Notification which, among other things, sets forth exceptions to the stated EOS extension.

JUNIPER SUPPORT RESPONSIBILITIES AND EXCEPTIONS

With this EOS extension initiative, Juniper will use its commercially reasonable efforts to provide JTAC, RMA (Return Material Authorization) and critical security vulnerability case review (on the above recommended software versions only) support to the contracted customers up until the extended EOS dates as stated above.

TSB17796

Juniper reserves the right to further amend the above extended EOS dates if its support capability, including but not limited to depletion of inventory of relevant hardware, changes over time.

Service Level

Basically, the EOS extension applies to all current available Juniper Care support service levels, except for NDCE (Juniper Care Next Day Onsite), SD (Juniper Care Same Day) and SDCE (Juniper Care Same Day Onsite). However, on some selected products, only Juniper Care Core/SUP service level will be extended. And some RMA associated service levels are only available to customer sites located in certain countries. Please refer to the RMA support portion below for more details.

JTAC support

In the event that the software release version is already EOS, JTAC support will generally be limited to investigation and troubleshooting in an attempt to provide solutions, configuration guidelines and workarounds. If a solution cannot be provided, customers will be expected to upgrade to a replacement product, should one be available.

Root cause analysis and hardware engineering support are not included; problems relating to incompatibility of newer/next generation products or problems with software that is not the recommended software version stated above in this TSB are excluded.

RMA support

In the event that the FRU (Field-Replaceable Unit) and the chassis in which it is designed for use are each subject to separate EOS dates, then the earlier of the EOS date will take precedence with respect to the FRU.

In certain locations where Juniper may not be able to support an RMA or have spare inventory to support at any given time, Juniper will downgrade the support to JTAC only support.

Notwithstanding anything stated herein to the contrary, the RMA support extension does NOT apply to the following countries, where import of refurbished unit is restricted (New Buy Only Country).

Bangladesh
Brazil
China
Egypt
India
Indonesia
Pakistan
Sri Lanka
Turkey
Vietnam

TSB17796

Moreover, the ND (Next Day Delivery) and NDS (Next Day Ship) service is only extended to the United States and EU locations. For all other countries, the extended Juniper Care support will be capped at RTF (Return to Factory) /Core Plus (with Return-to-Factory RMA support), AR5 (Advanced Replacement 5 Day Ship), Core/SUP (with no RMA support) service levels.
