

Next Generation Endpoints for Citrix

Easy-to-use devices and exceptional management software deliver a comprehensive solution for Citrix VDI

Citrix Ready
Partner Pavilion
EDUCAUSE 2019

booth
#1817

Educational institutions have long used Citrix products to simplify the delivery of computing platforms to students and educators. NComputing endpoints and management software extend that philosophy by:

PROVIDING low-cost devices built on popular hardware platforms such as Raspberry Pi and x86.

IMPROVE user experience with reduced boot time and login time while increasing endpoint security and productivity.

INTRODUCING software to manage, configure and update endpoints at multiple sites from a central location with asset tracking, role-based access and certificate management, powered by Stratodesk NoTouch.

Not every access location has the same set of functional needs. NComputing's holistic approach to endpoints and management software provides the right solution for the job, at the right price.

- ✓ Choose from Citrix Ready workspace hub (Raspberry Pi) and x86 thin clients
- ✓ Optimized for Citrix Virtual Apps and Desktops to deliver full HD multimedia capabilities
- ✓ Skype for Business voice and video
- ✓ HDX 3D Pro workload support for graphic-intensive applications
- ✓ Differentiated session roaming and wireless docking
- ✓ Broad USB peripheral support & compatibility
- ✓ Single Sign-on Support

Our thin clients are significantly less expensive than PCs—slash your hardware costs by up to **80%**

Maintenance-free and easy to deploy, NComputing devices reduce ongoing maintenance costs by up to **75%**

A typical PC uses 50-100 watts of power whereas our devices use as little as 5 watts of electricity, a savings of up to **90%**

Visit our booth

- Catch a live technical demo of NComputing solutions from our team of experts, including the highly anticipated Raspberry Pi4 addition to the Citrix Ready Workspace Hub ecosystem.
- Go hands-on with the EX400, our x86 endpoint solution featuring native dual monitor outputs supporting 4K resolutions.
