

Data Sheet IBR900 Series Ruggedized Router

2023 - 11 - 02

The Cradlepoint IBR900 Series Router is a ruggedized, Gigabit-Class LTE networking platform. It is designed for persistent connectivity across a wide range of in-vehicle and mobile applications as well as portable or fixed IoT installations. The IBR900 Series is available with either Mobile or IoT NetCloud Service plans, which provide features optimized for the differing deployments.

High Performance Mobile Connectivity

For organizations that depend on field forces and mobile networks, the Cradlepoint IBR900 Series Router with the NetCloud Mobile service plan provides a ruggedized GPS-enabled, in-vehicle network solution. When coupled with the Advanced Mobile service plan, it provides threat management, web filtering, application visibility, analytics, and advanced GPS functionality including location tracking and cellular coverage maps. The IBR900 accommodates environmentally harsh environments while delivering enterprise-class standards of reliability, scalability, comprehensive management, and security.

Ruggedized IoT Solution

When coupled with the NetCloud Ruggedized IoT service plan, the IBR900 provides a compact, ruggedized, 4G LTE router solution for connecting and protecting IoT devices at scale. It is ideal for IoT deployments including oil and gas monitoring, Smart City infrastructure, and other IoT deployments operating under harsh conditions. With an extensive list of safety and hardening certifications, it can be confidently deployed in the field, in buildings, or in embedded systems to deliver complete visibility, security, and control of connected devices anywhere.

Notable Benefits

- Define policies through centralized cloud-based management for easy deployment at scale.
- Gain fast, reliable connectivity with an embedded Cat 11 or Cat 18 LTE modem.
- Add a second cellular modem for simultaneous dual-carrier LTE connectivity.
- Prioritize access on public safety networks for reliable, secure connectivity.
- Deploy Wave 2 dual-band, dualconcurrent, Gigabit Wi-Fi for the best possible connections.
- Integrate into Automatic Vehicle Location (AVL) systems with Active GPS.
- Provide a ruggedized solution to endure harsh environments.
- Configure GPIO ports for IoT and vehicle integrations.

Key Software Capabilities

Cradlepoint NetCloud Service for the IBR900 provides everything needed to unlock the power of LTE and connect vehicles, users, and IoT to critical applications and services. The available NetCloud IoT or Mobile service plans include the appropriate router software with powerful cloud management features for managing IoT at scale, or mobile-specific features like coverage maps, and application aware analytics. Everything within NetCloud works together, making it easy to deploy, connect, and secure edge applications at scale across the organization.

Router Services

Next generation hardware provides local processing power to handle demanding router-delivered services, such as support for VPN tunneling encryption including DMVPN, IPsec, GRE, and other tunneling technologies.

Security Services

NetCloud Service includes security features and options to optimize the IBR900 to meet the evolving security needs of mobile and IoT environments. The service includes stateful zone-based firewall with the ability to add application aware security policies with the Advanced Mobile service plan.

Connection Manager

Connection Manager provides the ability to manage all WAN connections types including wireless, Wi-Fi as WAN, and wired, from a single software-defined policy. Our custom-built modem software ensures users establish Wireless WAN connectivity faster while maintaining the highest level of resiliency.

Cloud Services

NetCloud Manager delivers true zero-touch deployment with the ability to define and deliver policy across entire groups of endpoints. Users can create a cloud-orchestrated hub and spoke VPN network and gain insights and analytics required for rapid troubleshooting and diagnostic workflows. Support operations with real time location services and vehicle information.

Hardware Specifications

The following features are delivered through the hardware.

INTERFACES

Modem:	One of the following:
	- Embedded 1200M-B modem
	 2 x SMA cellular antenna connectors
	- Embedded 600M modem
	 2 x SMA cellular antenna connectors
	Optional dual modem (requires the the COR Extensibility Dock):
	- Modular MC400 Modem
Ethernet:	2 x GbE (LAN/WAN switchable)
Wi-Fi:	Dual-radio, dual-band, concurrent operation (2.4 GHz and 5 GHz)
	 2x2 MU-MIMO 802.11ac Wave 2 (Wi-Fi 5) and 256 QAM support
	 Modes: AP, Wireless Client, and Wi-Fi as WAN
	 574 Mbps (2.4 GHz) and 1,200 Mbps (5 GHz)
	 2 x RP-SMA Wi-Fi antenna connectors
	 WPA/WPA2/WPA3 Personal, WPA2/WPA3 Enterprise, WEP Auto, Open
	- 802.11k (AP mode only), 802.11v
	- Wi-Fi Alliance Certified
Expansion:	1 x USB 2.0 Type A (output: 5V, 500mA, 2.5W)
	1 x Extensibility Port
	- Extensibility Dock
	 9-Wire Power and GPIO Cable
	- Serial Port Adapter
GNSS/GPS:	1 x SMA GNSS antenna connector
GNSS / GPS	
Acquisition:	32 seconds (cold start)
(Time to First Fix)	
Protocols:	NMEA 0183
Constellations:	600M

PERFORMANCE	
Stateful Firewall	940 Mbps
Throughput:	
IPsec VPN Throughput:	20 Mbps
Concurrent VPN Tunnels:	10
Concurrent Sessions (TCP):	16,000
Typical Client Count:	10†
LEDs	
	Refer to the IBR900 Series Ruggedized Router Quick Start Guide

Performance testing conducted based on requirements as defined in RFC2544 using fixed-frame 1518-byte packets. Throughput results reflect uni-directional UDP traffic with less than 1% packet loss as tested with wired connections. Results do not reflect performance of the cellular wireless operator networks.
[†]When Cradlepoint Secure Threat Management or Applications Analytics are enabled in NetCloud Manager, the client count is reduced to 5.

[†]Cellular carriers and operators throughout the world may only require telecom industry certifications, like PTCRB or GCF, to operate on their network. Some carriers require additional testing and approval, beyond telecom certifications. A carrier listed in the approvals section means Cradlepoint completed additional testing and acquired technical approval for that given carrier. Any carrier not listed may not require additional testing or approval beyond telecom industry certifications to operate on their network.

Ordering Guide

NetCloud Mobile and NetCloud Ruggedized IoT Essentials packages and plans contain all the features and capabilities required for a broad range of mobile, in-vehicle, and IoT applications. Essentials packages include 24x7 support (phone support: 24 hour weekdays with emergency response on weekends, web: 24x7, chat: 24x5) and a limited lifetime warranty.

For additional capabilities, a **NetCloud Mobile Advanced Plan** or **NetCloud Ruggedized IoT Advanced Plan** can be added to the NetCloud Mobile or Ruggedized IoT Essentials Package at any time.

See additional details of what is included in the Essential and Advanced NetCloud software: cradlepoint.com/netcloud-service

Support & Warranty

The IBR900 Router is only sold as a component of NetCloud Mobile/NetCloud Ruggedized IoT Essentials or Essentials and Advanced Packages.

- NetCloud Packages include support for the full subscription term.
- All Cradlepoint hardware products are covered by a limited lifetime warranty for as long as they have a subscription license to an active NetCloud Service Plan.
