1 Introduction

1.1 Background

The Single Window Initiative (SWI) was identified as one of 32 joint priorities within the Perimeter Security and Economic Competitiveness Action Plan (hereinafter the “*Action Plan*”) announced on December 7, 2011 that would facilitate trade and align regulatory approaches to protect health, safety and the environment while supporting growth. The Action Plan commits the Canada Border Services Agency (CBSA) and U.S. Customs and Border Protection (U.S. CBP) to providing traders with a single window through which they can electronically submit all information required to comply with government import regulations, resulting in more efficient border processes.

Importers/Brokers (IBs) will no longer be required to send duplicate information, in duplicate formats, via different delivery mechanisms to multiple agencies to meet regulatory requirements. The **Integrated Import Declaration (IID)** includes all CBSA required data as well as all data essential for PGAs to make border-related decisions and acts as the foundation for the modernization of government business processes to eliminate requirements for presentation of paper documents at the border.

1.2 Document Purpose

The main vehicle for communicating the transaction details and usage of the IID has been the IID Electronic Commerce Requirements Document (ECCRD), which has been published in successive versions since the spring of 2013. The latest version of the IID ECCRD is v4.0, published April 2017.

This Addendum outlines the changes to be applied to version 4.0 of the IID ECCRD. The changes listed within this addendum will be included in the next full version of the IID ECCRD (v5.0), which will be published in the summer of 2019.

The complete set of requirements for the IID is now:

- The IID ECCRD v4.0 from April 2017;
- CBSA Bulletin **TCC18-168** (sent on December 13, 2018)
- CBSA Bulletin **TCC19-024** (sent on February 22, 2019)
- The Participants Requirements Document (PRD) Image Functionality v1.5 from September 2017.
- ECCRD Addendum v1.0 (this document)

The changes identified within this Addendum range from minor corrections/additional instructions to PGA legislative and regulation rule changes. Please note that any item highlighted as a **Rule Change or Code Change** will be available in the Testing environment in May 2019. Following a 5-month period for client testing, the changes identified in this addendum will be migrated into CBSA’s Production environment in October 2019.

2 Corrections to ECCRD V4.0 (Published April 2017)

The following is a list of corrections to version 4.0 of the SWI ECCRD, published in April 2017.

2.1 Appendix A: IID EDIFACT Inbound MIG

- 1) In element 7009 'Item Description Code' of SG117.IMD (page 95), **remove** the following from the Usage / Remark section:

The following codes are for use with Item Characteristic 180 (Chemical Specification)

- CNSC Various - See Table 1 in the CNSC appendix (B2.1.3)

Business Justification – As per the CNSC appendix (B2.1.2/ page 187), the chemical specification values are to be entered in element 7008 (Item description). For clients who have completed IID certification, there are no system changes required.

2.2 Appendix B: Inbound MIG PGA Appendices

Global Affairs Canada

1) SG117.CNT (page 255) - Commodity Unit Count

Listed under the “Qualifier” section for the Commodity Unit Count, the previous SWI ECCRD publications mistakenly identified Appendix G6 as the reference for possible units of count. Instead, clients should refer to Appendix G7 for valid units of count:

IID Segment & Tags	Data Element Name	PGA Element Definition	Data Element Status	Data Element Rules & Conditions	Qualifier	Codes
SG117 CNT (Q) 6411 (E) 6066	Commodity Unit Count	Quantity Unit Count	C	<p>The number of units for each commodity line must be provided. Either a size (MEA) or a count (CNT) segment must be provided for this commodity line to be valid.</p> <p>The Unit of Measure provided must align to the HS tariff expectations for this commodity line and should be provided as either a size or a count as appropriate.</p>	Refer to Appendix G7 for possible count UOMs	

2) SG128.COD (page 258) – Component Ingredient Details

The data element status for Fibre Country of Origin, Yarn Country of Origin, and Fabric Country of Origin will be changed from M (mandatory) to C (conditional):

IID Segment & Tags	Data Element Name	PGA Element Definition	Data Element Status	Data Element Rules & Conditions	Qualifier	Codes
SG128 COD (Q) 7505 (E) 1131	Component/ Ingredient Details	Fibre Country of Origin	C	For clothing and textile commodities, the coded (as per appendix G24) country of origin of the fibre raw material component of the textile must be provided, qualified with the following: <ul style="list-style-type: none"> FI – Fibre 	FI	
SG128 COD (Q) 7505 (E) 1131	Component/ Ingredient Details	Yarn Country of Origin	C	For clothing and textile commodities, the coded (as per appendix G24) country of origin of the yarn raw material component of the textile must be provided, qualified with the following: <ul style="list-style-type: none"> YA – Yarn 	YA	
SG128 COD (Q) 7505 (E) 1131	Component/ Ingredient Details	Fabric Country of Origin	C	For clothing and textile commodities, the coded (as per appendix G24) country of origin of the fabric raw material component of the textile must be provided, qualified with the following: <ul style="list-style-type: none"> FA – Fabric 	FA	

Business Justification – The above elements are not applicable to all GAC programs and therefore are only mandatory for Clothing and Textiles. For clients who have completed IID certification, there are no system changes required.

3 Updates to the April 2017 ECCRD v4.0

3.1 Appendix A: IID EDIFACT Inbound MIG

RULE/CODE CHANGE

- 1) In the segment description for SG13 **Additional Inspection/Exception Details** (pages 61-63), the following (highlighted) wording will be **added**:

Counter	No	Tag	St	MaxOcc	Level	Name
---------	----	-----	----	--------	-------	------

0550		SG13	C	99	1	Additional Inspection/Exception Details
------	--	-------------	---	----	---	--

This segment group is used to provide any additional details that may be required by PGAs for exceptional processing or inspection scheduling.

This segment group indicates the PGA(s) exception processing is applicable. Include additional iterations within this segment group for each PGA or CBSA processing requirement. **This segment group should only be used to provide PGA Processing Exception Codes that are applicable to all commodity lines on this entire declaration. To submit PGA Process Exception Codes that only apply to specific commodity lines, use SG125.**

0560	25	RCS	M	1	1	Requirements and conditions
------	----	------------	---	---	---	------------------------------------

RULE/CODE CHANGE

- 2) The segment name for SG125 **Compliance Statements** (pages 132/133), will be renamed **Compliance Statements / Exception Details**. SG125.RCS will become a dual use element for clients to provide PGA Compliance Statements as well as PGA Exception Process Codes at the commodity level. Codes beginning with 'X' will be designated for PGA Exception Process Codes. Codes beginning with 'M' will be designated for PGA Compliance Statement Codes.

RULE/CODE CHANGE

3) In the segment description for SG125 (pages 132/133) the following (highlighted) wording will be **added**:

Counter	No	Tag	St	MaxOcc	Level	Name
5650		SG125	C	99	4	Compliance Statements / Exception Details

This segment group is used to provide attestations of the importer (or other parties) to various compliance statements. See PGA appendices for details regarding compliance statements.

Use this segment group to provide PGA Processing Exception Codes that are applicable to individual commodity lines. To submit a PGA's Exception Process Code that applies to all commodity lines, use SG13.

5660	79	RCS	M	1	4	Requirements and conditions
------	----	------------	---	---	---	------------------------------------

Business Justification – Production issues have been identified for PGA Programs who have multiple exception codes. By adding Processing Exception Codes at SG125.RCS, clients will be able to identify exception codes which apply to specific commodity lines.

Note: All existing PGA Exception Codes and PGA Compliance Statement Codes from ECCRD V4.0 will be replaced. Refer to section 3.3 of this addendum to obtain the new PGA coded values.

3.3 Appendix G: Code Tables

3.3.1 Appendix G14 (PGA Exception Process Qualifier)

As a result of the changes to allow PGA Exception Process Codes at the commodity line level (at SG125.RCS), all existing PGA Exception Codes and PGA Compliance Statement Codes from ECCRD V4.0 will be replaced.

Codes beginning with 'X' will be designated for PGA Exception Process Codes. Codes beginning with 'M' will be designated for PGA Compliance Statement Codes. The PGA Exception Codes identified below in Appendix G14, will also appear in Appendix G23.

- 1) The following PGA Exception Process Qualifier Codes, found in Appendix G14 (p425-426) of v4.0 of the SWI ECCRD, will be **added and/or replaced**:

ME22	The company states that 1) it has a statement from the manufacturer of the engine that the engine will, when completed in accordance with instructions provided by the manufacturer, conform to the standards prescribed under the Marine Spark-Ignition Engine, Vessel and Off-Road Recreational Vehicle Emission Regulations; and 2) the engine will be completed in accordance with those instructions.	ECCC – Vehicle and Engine Emissions Program – Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles - <u>Incomplete Engines</u>

4) As per Section 3.1 and various PGA appendix updates from this addendum, the following PGA Exception Process Qualifier Codes will be **added** to Appendix G23 (p450-454) of the SWI ECCRD:

PGA Exception Process Qualifier Codes (Commodity Level SG125.RCS)		
XE01	ECCC - On-Road Vehicles, Engines and Equipment	For use by Vehicle and Engine Emissions Program - On-Road Vehicles, Engines and Equipment
XE02	ECCC - Off-Road Compression (Diesel) Engines	For use by Vehicle and Engine Emissions Program - Off-Road Compression (Diesel) Engines
XE03	ECCC - Off-Road Small Spark-Ignition (Gasoline) Engines	For use by Vehicle and Engine Emissions Program - Off-Road Small Spark-Ignition (Gasoline) Engines
XE04	ECCC - Marine Spark-Ignition Engines, Vessels and Off-Road Recreational Vehicles	For use by Vehicle and Engine Emissions Program - Marine Spark-Ignition (Gasoline) Engines, Vessels and Off-Road Recreational Vehicles
XE05	ECCC - Client Exemption -client has authorization to apply the National Emissions Mark (NEM) by ECCC and the NEM is applied to their goods	For use by Vehicle and Engine Emissions Program - On-Road Vehicles, Engines and Equipment
XE99	ECCC - goods are not subject to any of the Vehicle and Engine Emissions Program regulations	For use by all Vehicle and Engine Emissions Programs
XH01	HC - Cells, Tissues & Organs - Lymphohematopoietic Cells and Organs	For use by HC - Lymphohematopoietic cells and organs are exempt from having to provide Establishment Registration Numbers.

XH02	HC - Medical Devices - Medical Device Establishment Licence Exemption	For use by HC – Retailers, healthcare facilities and manufacturers that are eligible for an exemption to the establishment licensing requirement must indicate their status in this field. If this exemption is indicated, the Intended use Code, must equal Human Therapeutic Usage for all device classes.
XH03	HC - Pesticides - PMRA Scheduled Pest Management Products	For use by HC – Specific HC exceptional processing that may apply include: PMRA Scheduled Pest Management Products.
XH04	HC - Pesticides - PMRA Exempt Pest Management Products	For use by HC - Specific HC exceptional processing that may apply include: PMRA Exempt Pest Management Products.
XT01	TC - Tires Program - Tires Program	For use by TC Tires - For commodities regulated under the Tire Program a code indicating 'Tire Program ' must be provided.
XT02	TC - FMVSS Standard - TC1 - Standard Process	For use by TC Vehicle Program - FMVSS - Standard must indicate TC1 - Standard Process.
XT03	TC - FMVSS Case-By-Case - TC1 - E08 - Case-By-Case FMVSS - RIV	For use by TC Vehicle Program - TC1 = E08 - Case-by-Case FMVSS - RIV
XT04	TC - CMVSS Appendix F - TC3 - E01 - Appendix F - Commercial Importation	For use by TC Vehicle Program - Appendix F
XT05	TC - CMVSS Appendix G - TC3 - E02 - Appendix G - Commercial Importation	For use by TC Vehicle Program - Appendix G

XT06	TC - Returning Vehicles - TC3 - E03 - CMVSS Vehicle Returning by Original Owner	For use by TC Vehicle Program - CMVSS Vehicle Returning by Original Owner.
XT07	TC - Age Exemption - TC3 - E04 - Age Exemption	For use by TC Vehicle Program - Vehicle Age Exemption (Greater than 15 years)
XT08	TC - Unregulated Vehicles - TC3 - E05 - Non-Regulated & Others	For use by TC Vehicle Program - This exemption code is to be used for all unregulated vehicles.
XT09	TC - CMVSS Appendix Case-By-Case - TC3 - E06 - Case-By-Case CMVSS - RIV	For use by TC Vehicle Program - This exemption code is to be used on a case-by-case basis for CMVSS - Commercial Vehicle Imports.
XT10	TC - Vehicles for Parts - TC3 - E07 - Vehicle for Parts	For use by TC Vehicle Program - This exemption coded is to be used for Parts.
XP01	PHAC - Human and Terrestrial Animal Pathogens & Biological Toxins - Exempt Pathogen/Toxin	For use by PHAC - Human Terrestrial Animal Pathogens
