Section 4 – Please identify all code sections (include statutes, chapters, and bill numbers; e.g., Penal Code section 2045, Statutes 2004, Chapter 54 [AB 290]), regulatory sections (include register number and effective date; e.g., California Code of Regulations, title 5, section 60100 (Register 1998, No. 44, effective 10/29/98), and other executive orders (include effective date) that impose the alleged mandate pursuant to [Government Code section 17553](#) and don't forget to check whether the code section has since been amended or a regulation adopted to implement it (refer to your completed WORKSHEET on page 7 of this form):

State Water Resources Control Board, In the Matter of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District—Don Pedro Hydroelectric Project and La Grange Hydroelectric Project—Federal Energy Regulatory Commission Project Nos. 2299 and 14581, effective January 15, 2021, condition 12

- Test Claim is Timely Filed on [Insert Filing Date] [select either A or B]: 1 / 14 / 2022
- A: Which is not later than 12 months following [insert the effective date of the test claim statute(s) or executive order(s)] 1 / 15 / 2021, the effective date of the statute(s) or executive order(s) pled; or
- B: Which is within 12 months of [insert the date costs were *first* incurred to implement the alleged mandate] / / , which is the date of first incurring costs as a result of the statute(s) or executive order(s) pled. *This filing includes evidence which would be admissible over an objection in a civil proceeding to support the assertion of fact regarding the date that costs were first incurred.*

([Gov. Code § 17551\(c\)](#); [Cal. Code Regs., tit. 2, §§ 1183.1\(c\)](#) and [1187.5.](#))

Section 5 – Written Narrative:

- Includes a statement that actual and/or estimated costs exceed one thousand dollars (\$1,000). ([Gov. Code § 17564.](#))
- Includes all of the following elements for each statute or executive order alleged pursuant to [Government Code section 17553\(b\)\(1\)](#) (refer to your completed WORKSHEET on page 7 of this form):
- Identifies all sections of statutes or executive orders and the effective date and register number of regulations alleged to contain a mandate, including a detailed description of the *new* activities and costs that arise from the alleged mandate and the existing activities and costs that are *modified* by the alleged mandate;
- Identifies *actual* increased costs incurred by the claimant during the fiscal year for which the claim was filed to implement the alleged mandate;
- Identifies *actual or estimated* annual costs that will be incurred by the claimant to implement the alleged mandate during the fiscal year immediately following the fiscal year for which the claim was filed;

- Contains a statewide cost estimate of increased costs that all local agencies or school districts will incur to implement the alleged mandate during the fiscal year immediately following the fiscal year for which the claim was filed;
Following FY: 2022 - 2023 Total Costs: At least approx. \$25,000
- Identifies all dedicated funding sources for this program; State: None
Federal: None Local agency's general purpose funds: None
Other nonlocal agency funds: None
Fee authority to offset costs: None
- Identifies prior mandate determinations made by the Board of Control or the Commission on State Mandates that may be related to the alleged mandate: _____
- Identifies a legislatively determined mandate that is on the same statute or executive order: _____

Section 6 – The Written Narrative Shall be Supported with Declarations Under Penalty of Perjury Pursuant to [Government Code Section 17553\(b\)\(2\)](#) and [California Code of Regulations, title 2, section 1187.5](#), as follows (refer to your completed WORKSHEET on page 7 of this form):

- Declarations of actual or estimated increased costs that will be incurred by the claimant to implement the alleged mandate.
- Declarations identifying all local, state, or federal funds, and fee authority that may be used to offset the increased costs that will be incurred by the claimant to implement the alleged mandate, including direct and indirect costs.
- Declarations describing new activities performed to implement specified provisions of the new statute or executive order alleged to impose a reimbursable state-mandated program (specific references shall be made to chapters, articles, sections, or page numbers alleged to impose a reimbursable state-mandated program).
- If applicable, declarations describing the period of reimbursement and payments received for full reimbursement of costs for a legislatively determined mandate pursuant to [Government Code section 17573](#), and the authority to file a test claim pursuant to paragraph (1) of subdivision (c) of [Government Code section 17574](#).
- The declarations are signed under penalty of perjury, based on the declarant's personal knowledge, information, or belief, by persons who are authorized and competent to do so.

Section 7 – The Written Narrative Shall be Supported with Copies of the Following Documentation Pursuant to [Government Code section 17553\(b\)\(3\)](#) and [California Code of Regulations, title 2, § 1187.5](#) (refer to your completed WORKSHEET on page 7 of this form):

- The test claim statute that includes the bill number, and/or executive order identified by its effective date and register number (if a regulation), alleged to impose or impact a mandate. Pages 24 to 136.

- Relevant portions of state constitutional provisions, federal statutes, and executive orders that may impact the alleged mandate. Pages 158 to 168.
- Administrative decisions and court decisions cited in the narrative. (Published court decisions arising from a state mandate determination by the Board of Control or the Commission are exempt from this requirement.) Pages 169 to 216.
- Evidence to support any written representation of fact. *Hearsay evidence may be used for the purpose of supplementing or explaining other evidence but shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions. (Cal. Code Regs., tit. 2, § 1187.5).* Pages 18 to 156.

Section 8 –TEST CLAIM CERTIFICATION Pursuant to [Government Code section 17553](#)

- The test claim form is signed and dated at the end of the document, under penalty of perjury by the eligible claimant, with the declaration that the test claim is true and complete to the best of the declarant's personal knowledge, information, or belief.

Read, sign, and date this section. Test claims that are not signed by authorized claimant officials pursuant to [California Code of Regulations, title 2, section 1183.1\(a\)\(1-5\)](#) will be returned as incomplete. In addition, please note that this form also serves to designate a claimant representative for the matter (if desired) and for that reason may only be signed by an authorized local government official as defined in [section 1183.1\(a\)\(1-5\)](#) of the Commission’s regulations, and not by the representative.

This test claim alleges the existence of a reimbursable state-mandated program within the meaning of [article XIII B, section 6 of the California Constitution](#) and [Government Code section 17514](#). I hereby declare, under penalty of perjury under the laws of the State of California, that the information in this test claim is true and complete to the best of my own personal knowledge, information, or belief. All representations of fact are supported by documentary or testimonial evidence and are submitted in accordance with the Commission’s regulations. ([Cal. Code Regs., tit.2, §§ 1183.1](#) and [1187.5](#).)

I. INTRODUCTION

The Turlock and Modesto Irrigation Districts long ago built dams on the Tuolumne River to harness its potential to provide water and generate power for the beneficial use of local residents, but decades later the State Water Resources Control Board is now requiring the Districts to construct a new \$50+ million project outside their boundaries to “restore” the river’s historic floodplain for the benefit of fish downstream. This restoration project is a state agency mandate on local agencies for a new program or higher level of service. Section 6 of Article XIII B of the California Constitution requires the state to reimburse the Districts for the costs of this mandate. This test claim should be approved.

II. BACKGROUND

A. The Irrigation Districts

Turlock Irrigation District and Modesto Irrigation District (together, the “Districts”) are irrigation districts governed by division 11 (“Irrigation Districts”) of the Water Code. The Districts are each a “public corporation” for “municipal purposes.” (*Turlock Irrigation District v. White* (1921) 186 Cal. 183, 187.) With few exceptions, the Districts’ legal boundaries exclude riparian parcels along the Tuolumne River, whose owners largely opted out of joining the Districts. (Declaration of Peter Prows (“Prows Decl.”), Exhibit (“Ex.”) 1 (Department of Water Resources map of Districts’ legal boundaries, which do not extend to Tuolumne River for most of its reach).)

B. The Don Pedro and La Grange Hydroelectric Projects

The Districts operate the Don Pedro Hydroelectric Project and the La Grange Hydroelectric Project (together, the “Projects”) on the Tuolumne River. (Prows Decl., Ex. 2 at 8.) The Projects generate hydroelectric power as well as provide flood control and water supply for more than 200,000 acres of farmland, plus municipal and industrial uses, including water supply for the cities of Modesto and Turlock. (*Id.* at 7.) The Projects were developed decades ago using water rights held by the Districts dating back

more than a century. (*Id.* at 12; *see id.* at Attachment A (describing Projects’ historic development).)

C. FERC Relicensing

The Federal Energy Regulatory Commission (“FERC”) determined that the Projects require federal FERC licenses. (*Id.*) In 2014 and 2017, the Districts applied for FERC licenses for the Projects. (*Id.*)

D. The 401 Certification

Section 401 of the Clean Water Act, 33 U.S.C. § 1341, requires any applicant for a federal water-discharge permit to apply for “certification” from their state. (33 U.S.C. § 1341(a)(1).) The state has up to one year to grant or deny a certification, or else certification is waived. (*Id.*) If the state grants certification, it “shall set forth any effluent limitations and other limitations, and monitoring requirements necessary to assure that any applicant for a Federal license or permit will comply ... with any other appropriate requirement of State law”. (33 U.S.C. § 1341(d).) The conditions in the certification must then become conditions of the federal license. (*Id.*)

In California, the State Water Resources Control Board (“State Board”) is delegated responsibility for determining applications for certification under Section 401 of the Clean Water Act. (Water Code § 13160(a)(1).) Specifically, the State Board has authority “to give any certification ... pursuant to the [Clean Water Act] ... that there is reasonable assurance that any activity of any person subject to the jurisdiction of the state board will comply with ... any other appropriate requirements of state law.” (*Id.*) Water Code section 13385(a)(2) imposes state-law penalties for violating conditions in a water quality certification issued under Water Code section 13160.

The Districts applied to the State Board for certification in 2018, 2019, and 2020. (Prows Decl., Ex. 2 at 7.) The State Board denied the 2018 and 2019 applications without prejudice, and, in November 2020, the Districts withdrew their 2020 application. (*Id.*) The Districts and the State Board dispute whether the State Board has now waived certification under Section 401.

(*Id.*) That dispute is currently pending in the D.C. Circuit Court of Appeals (case nos. 21-1120, 21-1121).

Nevertheless, on January 15, 2021, the Executive Director of the State Board, exercising powers putatively delegated from the State Board (*id.* at 13-14), issued a certification with 45 conditions to the Districts (the “Order”). Only one of those conditions—condition 12—is at issue in this test claim. (See Section III below.)

E. Other Proceedings

The Districts timely petitioned the State Board for reconsideration of the Order and requested a stay. (Prows Decl., Ex. 3 at 1.) The State Board denied the stay, reasoning “there is substantial doubt that the state has authority to enforce the conditions of certification for a FERC-licensed hydroelectric project until and unless the license subjected to the certification is issued.” (*Id.* at 5.) Nevertheless, the State Board has refused to stay the Order and has not definitively disclaimed its authority to enforce any of the conditions in the Order, including condition 12, at any time.

In May 2021, the Districts filed a timely petition for writ of administrative mandamus in Tuolumne County Superior Court (case no. CV63819) to set aside the Order in its entirety. That action remains pending.

III. THE MANDATE AT ISSUE: CONDITION 12— RIPARIAN, SPAWNING, AND FLOODPLAIN RESTORATION

Condition 12 is the mandate (“Mandate”) at issue. It “requires the development and implementation of a Riparian, Spawning, and Floodplain Restoration Plan”. (Order at 39.) The Mandate is intended to redress “altered ... hydrology and natural geomorphic processes along the Tuolumne River corridor” caused by the damming of the river decades ago. (*Id.* at 38.)

The Mandate contains more than four pages of specific requirements. (*Id.* at 74-78.) Generally, the Mandate requires the preparation, approval, and implementation of a “Restoration Plan” to “construct a minimum of 150 acres of 100 percent suitable floodplain

rearing habitat that is designed to lower existing floodplain surface elevation in the first 10 years following ... approval”. (*Id* at 75.)

The Mandate also requires developing and implementing a “monitoring plan” to assess the effects of the project on floodplain inundation, fish use, vegetation, and other factors. (*Id.* at 77.) The Mandate requires annual monitoring for at least 10 years, and then, after 25 years, a “comprehensive evaluation” whether “additional floodplain restoration projects” will be required as part of the Mandate. (*Id.* at 77-78.)

Implementing the Mandate may require the Districts to undertake a separate environmental review process, under the California Environmental Quality Act, or obtain additional permits or entitlements from other agencies, including a Streambed Alteration Agreement from the California Department of Fish and Wildlife, under Fish and Game Code section 1602 (required for any substantial alteration of a stream), and a permit from the U.S. Army Corps of Engineers, under Section 404 of the Clean Water Act (33 U.S.C. § 1344, required for any dredge or fill activities in waters of the United States).

In 2018, the Districts estimated that constructing a 134-acre floodplain restoration project along the Tuolumne River would cost approximately \$51.6 million. (Prows Decl., Ex. 4 at 3.) That estimate was for a significantly smaller floodplain restoration project than required by the Mandate, and it did not include estimates of the costs of conducting any required environmental review, or of the years of monitoring and evaluation required by the Mandate. The costs of implementing the Mandate can reasonably be expected to be significantly higher than the 2018 estimate.

IV. STATE MANDATE LAW

Article XIII B § 6 of the California Constitution (“Section 6”) requires that, for every “state agency mandate[]” of “a new program or higher level of service” on “any local government”, the State is required to reimburse the local government for the “costs” of that mandate. A number of adjudicatory decisions by the State and Regional

Water Quality Control Boards have come under sharp scrutiny in recent years by the Commission and the Courts for being unfunded State mandates.¹ The Mandate is a state agency mandate of a new program or higher level of service on the Districts, which will impose reimbursable costs on the Districts (which are local agencies).

If the Mandate is not invalidated by the courts, then it will remain a State mandate. (Part V.A below.) The Districts are local government agencies within the meaning of these laws. (Part V.B below.) The Mandate requires a new program or higher level of service. (Part V.C below.) The Mandate will impose costs on the Districts. (Part III above and Part VI below.) The Districts meet their initial burden to show that the Mandate requires reimbursement under Section 6.

The State has the burden to establish the applicability of any defenses, but it cannot meet that burden here. The exemption to the reimbursement requirement for certain non-discretionary mandates required by federal law (Government Code § 17556(c)) is narrow and does not apply here. (Part V.D.1 below.) Another exemption, where the local agency “has the authority to levy service charges, fees, or assessments sufficient to pay” for the new or increased costs (Government Code § 17556(d)), is also inapplicable because the Districts lack authority under Articles XIII through XIII D of the California Constitution to levy such charges, fees, or assessments here. (Part V.D.2 below.) This test claim should be approved.

¹ *E.g. Department of Finance v. Commission on State Mandates* (2021) 59 Cal.App.5th 546; *Department of Finance v. Commission on State Mandates* (2017) 18 Cal.App.5th 661; *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749; *County of Los Angeles v. Commission on State Mandates* (2007) 150 Cal.App.4th 898; In re Test Claim On: *San Diego Regional Water Quality Control Board Order No. R9-2007-0001* (March 26, 2010); In re Test Claim On: *Los Angeles Regional Quality Control Board Order No. 01-182* (July 31, 2009).

V. THE MANDATE REQUIRES REIMBURSEMENT UNDER SECTION 6

A. The Mandate Is A State Agency Mandate

The Mandate is a “state agency mandate[]” within the meaning of Section 6. The Mandate was issued by the Executive Director of the State Board, exercising powers putatively delegated from the State Board. (Order at 13-14.) The State Board is part of the State. (*See* Water Code § 175 (State Board is part of the California Environmental Protection Agency); Government Code § 900.6 (“State” means any “board” of the State).)

The Mandate is also a mandate within the meaning of Government Code section 17514. State mandates include an “executive order”. (Government Code § 17514.) “Executive order” means any “order”, “plan”, or “requirement” issued by any “agency, department, board, or commission of state government”. (Government Code § 17516, especially subsection (c).) The Mandate is an order or requirement because Water Code section 13385(a)(2) imposes penalties for violating conditions in a water quality certification issued under Water Code section 13160, such as the Mandate. (*See* Order at 13 (Mandate issued under authority of Water Code § 13160) and at 93 (Conditions 32 and 33, specifying consequences for violations).) The Mandate is also a plan because the State Board plans for the Mandate to become a condition of the Districts’ FERC licenses. (*See id.* at 18 (“the conditions contained in this certification [to] be incorporated as

mandatory conditions of the new license(s) issued by FERC for the Projects”).)²

Because the Mandate constitutes an order by the State, it is a state agency mandate.

B. The Districts Are Local Agencies

“Local agency” includes any “special district”. (Government Code § 17518.) A special district “performs governmental or proprietary functions within limited boundaries”. (Government Code § 17520.)

The Districts, as their names make clear, are irrigation districts. Irrigation districts are “local agencies”. (*Basurto v. Imperial Irrigation District* (2012) 211 Cal.App.4th 866, 882.) Irrigation districts have standing to bring test claims under Section 6. (See *Paradise Irrigation District v. Commission on State Mandates* (2019) 33 Cal.App.5th 174, 180 (analyzing fee authority of irrigation district as a “local agency”).)

As irrigation districts, the Districts are each a “public corporation” for “municipal purposes.” (*Turlock Irrigation District v. White* (1921) 186 Cal. 183, 187.) Irrigation districts have a specific legal boundary, defined by statute as the “land ... formed into the ... district” (Water Code § 20845) comprised of the “land susceptible of irrigation from a common source and by the same system of works” (Water Code § 20700). The Department of Water Resources has mapped the boundaries of the Districts. (Prows Decl., Ex. 1.) Because the Districts perform

² Water Code section 13385(a)(2), imposing liability for violations of conditions a water quality certification, is arguably preempted by the Federal Power Act to the extent such liability could be imposed before the FERC licenses issue. But the State Board has never definitively conceded that preemption would apply here, has denied the Districts’ request for a stay of the Order (thus implicitly reserving the State Board’s prerogative to try to enforce it), and, regardless, the State Board plans for the Mandates to become effective conditions of those licenses regardless. (See Sections II.D and II.E above.)

governmental or proprietary functions within limited boundaries, they are local agencies.

C. The Mandate Is A New Program Or Higher Level Of Service

The Mandate requires a “new program” or “higher level of service” within the meaning of Section 6.

“Whether a program is ‘new’ or provides a ‘higher level of service’ is determined by comparing the legal requirements before and after the issuance of the executive order”. (*Department of Finance v. Commission on State Mandates* (2021) 59 Cal.App.5th 546, 557.) The Districts were not subject to a 150-acre riparian, spawning, and floodplain restoration requirement before the Mandate issued. (*See Order at 38-40* (citing the “need” for this condition, but not any preexisting requirement for it).) The Mandate is new.

A “new” or “higher” requirement is also a “program” under Section 6 when it requires a local agency either to (i) “carry out the governmental function of providing services to the public” or (ii) “implement a state policy” through “unique requirements ... [that] do not apply generally to all residents and entities in the state.” (*Id.*, quoting *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56.) The Mandate meets both alternative tests to be a program.

As for the first test, in the State Board’s view, restoring riparian, spawning, and floodplain areas will “support and protect aquatic-life beneficial uses”: they provide improved “food sources and shading”, and “temperature benefits and cover” in the river. (*Id.* at 39-40.) Improving water quality falls within the governmental function of providing services to the public. (*See Department of Finance*, 59 Cal.App.5th at 558-559 (“reduc[ing] pollution” in “drainage systems and receiving waters” is a program).)

As for the second test, the Mandate also implements state policy by imposing unique requirements on the Districts. The State Board justified the Mandate because of “the need for the development and implementation of riparian and floodplain habitats”, which is “consistent with

the Bay-Delta Plan” (Order at 39) adopted by the State Board (Order at 15). The Mandate’s requirement to develop and implement riparian and floodplain habitat restoration, consistent with the State Board’s Bay-Delta Plan, is imposed solely on the Districts and not the public generally. (See Order (directing requirements solely to the Districts and not the public generally).)

Because the Mandate is both “new”, compared to the existing legal requirements on the Districts, and a “program”, requiring the Districts to provide governmental water-quality and habitat development and management services to the public that are not required of the public generally, it is a “new program or higher level of service” within the meaning of Section 6. And because the Mandate is also a state agency mandate on local agencies, Section 6 requires the state to reimburse the Districts for its costs.

D. The State Cannot Meet Its Burden To Show Any Defenses Have Merit

The State may invoke various defenses to the reimbursement requirement here. (See Government Code § 17556.) If it does, it will have the initial burden to establish that those defenses apply here. (*Department of Finance*, 59 Cal.App.5th at 561.) The State cannot meet its burden.

1. The Mandate Is Not Required By Federal Law (Government Code § 17556(c))

The State might argue that, because the Order (at page 13) cites Section 401 of the federal Clean Water Act, 33 U.S.C. § 1341, the Mandate is “mandated by federal law” and thus exempt from Section 6 per Government Code section 17556(c). That narrow exemption applies only when the State lacks “*discretion* whether to impose a *particular* implementing requirement” of the federal law. (*Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 765, emphasis added; see Cal. Const., Art. XIII B § 9(b)) (exemption from Article XIII B applies only when agency is “without discretion” in complying with federal mandate.)

Section 401 does not mandate any particular federal requirements on California: Section 401 simply provides a procedure through which states may insist that state-law requirements be incorporated into a federal discharge permit. (*See* 33 U.S.C. § 1341 paras. (a)(1) (giving state up to one year to provide a “certification” or else certification is waived) & (d) (any certification shall set forth any “appropriate requirement of State law”).) Section 401 allows, but does not require, states to insist on additional state-law requirements in federal permits, but it does not require states to regulate in some federally required way:

[P]ursuant to § 401, States may condition certification upon any limitations necessary to ensure compliance with *state* water quality standards or any other “appropriate requirement of *State* law” [...].³

(*PUD No. 1 of Jefferson County v. Wash. Dept. of Ecology* (1994) 511 U.S. 700, 713-714, emphasis added, quoting 33 U.S.C. § 1341(d); *see Keating v. FERC* (D.C. Cir. 1991) 927 F.2d 616, 622 (“the validity of a state’s [*viz.* California’s] decision to grant or deny a request for [Section 401] certification ... turns on questions of substantive *state* environmental law”, emphasis added).)

This Mandate was meant to implement state conditions, not federal requirements. Generally, the Order’s conditions “were developed to ensure that the Projects comply with water quality requirements and other appropriate requirements of *state* law”. (Order at 18, emphasis added.) As specific authority for the Mandate, the Order cites only the State Board’s Bay-Delta Plan, not any federal requirements. (Order at 39-40.) Because nothing in federal law requires the particular requirements of the Mandate here, the State cannot meet

³ “Not a single sentence, phrase, or word in the Clean Water Act purports to place any constraint on a State’s power to regulate the quality of its own waters more stringently than federal law might require. In fact, the Act explicitly recognizes States’ ability to impose stricter standards.” (511 U.S. at 723, Stevens, J., concurring.)

its burden to show that the exemption of Government Code section 17556(c) applies.

2. The Districts Do Not Have Fee Authority To Recover The Mandate's Costs (Government Code § 17556(d))

The State might also invoke the exemption that applies when local agencies have “the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service”, under Government Code section 17556(d). The State cannot meet its burden to show that this exemption applies either.

To meet its burden, the State would need to establish that any “levy, charge, or other exaction” the Districts might use to pay for the Mandate “is not a tax, that the amount is no more than necessary to cover the reasonable costs of the governmental activity, and that the manner in which those costs are allocated to a payor bear a fair or reasonable relationship to the payor’s burdens on, or benefits received from, the governmental activity.” (Cal. Const. Art. XIII C § 1(e).) For any property-related assessments the Districts might impose (including any levy or charge on real property), the State would also have the burden of establishing that “the property or properties in question receive a special benefit over and above the benefits conferred on the public at large and that the amount of any contested assessment is proportional to, and no greater than, the benefits conferred on the property or properties in question.” (Cal. Const. Art. XIII D § 4(f); *see id.* §§ 2(b) (defining “assessment”) & 3(b) (excluding electrical-service fees from Proposition 218).) Similar constraints apply to property-related fees and charges, such as those for utility services. (*See* Cal. Const. Art. XIII D § 6(b) (property-related fees or charges such as water, sewer and trash removal must be “proportional” to the “cost of the service attributable to the parcel” (subpara. (3)) and “actually used by, or immediately available to, the owner of the property in question (subpara. (4)), and may not be for a “service ... available to the public at large in substantially the same manner as it is to property owners” (subpara. (5))); *Department of Finance, supra*, 59 Cal.App.5th at 568

(property-related fees that do not meet substantive requirements of Art. X III D § 6(b), subparas. (3)-(5), are barred even if they meet procedural requirements of § 6, paras. (a) & (c).)

The State will not be able to meet its burden. The most obvious, but not sole, problem for the State is that the Mandate will not provide, and is not intended to provide, benefits tailored to the Districts' customers (the putative fee payors):

- With few exceptions, the Districts' legal boundaries exclude riparian parcels along the Tuolumne River, whose owners largely opted out of joining the Districts. (Prows Decl., Ex. 1.) Because the Districts will likely have to reach outside their legal boundaries to construct the Mandate, the immediate riparian and floodplain benefits the Mandate is intended to achieve are for the benefit of lands outside the Districts, rather than for the Districts' customers.
- The Mandate is intended to “support and protect aquatic-life beneficial uses” of the “Bay-Delta Plan.” (Order at 39-40. The Bay-Delta Plan “establishes water quality objectives to protect beneficial uses of water in the *San Francisco Bay/Sacramento-San Joaquin Delta Estuary* and tributary watersheds”. (Order at 15, emphasis added.) Any charges, fees, or assessments the Districts might impose to pay for the Mandate necessarily would subsidize benefits intended in significant part for *another* region of the State entirely—the “Bay-Delta Estuary” or the rest of the State as a whole.

Because fees, charges, or assessments that might be imposed on the Districts' customers to subsidize significant benefits for riparian lands outside the Districts, or for the Delta Estuary and the rest of the State far downstream, would not bear a “fair or reasonable relationship” (Art. XIII C § 1(e)) to the (non-existent) benefits the Districts' local customers would receive in return, or would not be

“proportionate” to those customers’ (non-existent) specific benefits (Art. XIII D §§ 4(f), 6(b), subparas. (3)-(5)), the Districts do not appear to have the authority to impose them.

The Mandate is a state rather than federal mandate, of a new program or increased level of service on a local agency, without fee authority to recover its costs, and so the Districts are entitled to reimbursement under Section 6. This test claim should be approved.

VI. THE COSTS TO THE DISTRICTS OF THE MANDATE

A. Statement That Actual And Estimated Costs Exceed \$1,000

Actual and estimated costs to the Districts in this test claim exceed \$1,000.

In 2018, the Districts estimated that a significantly smaller restoration project would cost approximately \$51.6 million, plus the additional costs of any required permitting and environmental review, and the decades of monitoring and evaluation required by the Mandate. The costs of implementing the Mandate can reasonably be expected to be significantly higher than the 2018 estimate.

B. New Activities And Costs That Arise From The Mandate

“Costs mandated by the state” means “any” increased costs to the local agency required by “any” State mandate. (Government Code § 17514.) Costs of preparing and filing an approved test claim are reimbursable. (*See Mandate Reimbursement Process II*, Commission Case No. 05-TC-05 at 2.) Because the State Board—so far—has not yet insisted that the Districts begin complying with the Mandate now (see Section II.E above), the only costs the Districts have incurred this fiscal year, and are expected to incur next fiscal year, are costs associated with this test claim.

C. Existing Activities And Costs That Are Modified By The Mandate

The costs described in Part III above might also be considered existing activities and costs that are modified by the Mandate. (See Part V.C above.)

D. The Actual Or Estimated Annual Costs Incurred This Fiscal Year

Actual costs incurred so far this fiscal year by the Districts for the Mandate total approximately \$32,385, of which Turlock Irrigation District incurred approximately \$22,170.77 and Modesto Irrigation District incurred approximately \$10,214.23. (Declaration of Peter Prows ¶ 6.)

Additional costs to the Districts that are reasonably well known to the Districts for this fiscal year total at least approximately \$25,000, of which Turlock Irrigation District would be responsible for approximately \$17,115 and Modesto Irrigation District would be responsible for approximately \$7,885. (Prows Decl. ¶ 7.)

Added together, the total actual and estimated costs for the Mandate for this fiscal year total at least approximately \$57,385.

E. Estimated Costs For Next Fiscal Year

The Districts expect to incur additional costs of at least approximately \$25,000 associated with this test claim next fiscal year, though the amount is uncertain. (Prows Decl. ¶ 8.)

F. Statewide Cost Estimate

The Districts bear full responsibility under the Mandate for all statewide costs of the Mandate. (See Order (naming only the Districts as responsible parties).)

G. Identification Of All Available Funding Sources

The Districts do not have funds dedicated to pay for the Mandate. (Declaration of Bill Schwandt ¶ 7; Declaration of Michelle Reimers ¶ 7.)

SECTION 6: DECLARATIONS

Declaration of Michelle A. Reimers

1. I am the General Manager of Turlock Irrigation District (the “District”). I am making this declaration of my personal knowledge.

2. This test claim arises out of the order issued by the State Water Resources Control Board on January 15, 2021 containing Floodplain Restoration Condition (no. 12) of “Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District—Don Pedro Hydroelectric Project and La Grange Hydroelectric Project”.

3. The District agrees with Modesto Irrigation District on all issues in the test claim.

4. The District designates Peter Prows of Briscoe Ivester & Bazel LLP to act as its sole representative in these proceedings.

5. The District has incurred increased costs, in the form of legal fees to prepare the test claim itself, this fiscal year as a result of the mandate challenged in the test claim.

6. The District expects to incur increased costs next fiscal year, including in the form of legal fees to prosecute the test claim itself, next fiscal year.

7. The District has not identified dedicated local, state, or federal funds, or fee authority, that may be used to offset the increased costs of the mandate challenged in this test claim

I declare under penalty of perjury under the laws of the State of California that the facts stated in this declaration are true.

Date: 01/12/2022

Michelle A. Reimers
Turlock Irrigation District
General Manager

Declaration of Bill Schwandt

1. I am the General Manager of Modesto Irrigation District (the “District”). I am making this declaration of my personal knowledge.
2. This test claim arises out of the order issued by the State Water Resources Control Board on January 15, 2021 containing Floodplain Restoration Condition (no. 12) of “Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District—Don Pedro Hydroelectric Project and La Grange Hydroelectric Project”.
3. The District agrees with Turlock Irrigation District on all issues in the test claim.
4. The District designates Peter Prows of Briscoe Ivester & Bazel LLP to act as its sole representative in these proceedings.
5. The District has incurred increased costs, in the form of legal fees to prepare the test claim itself, this fiscal year as a result of the mandate challenged in the test claim.
6. The District expects to incur increased costs next fiscal year, including in the form of legal fees to prosecute the test claim itself, next fiscal year.
7. The District has not identified dedicated local, state, or federal funds, or fee authority, that may be used to offset the increased costs of the mandate challenged in this test claim

I declare under penalty of perjury under the laws of the State of California that the facts stated in this declaration are true.

Date: 1/12/22

Bill Schwandt
Modesto Irrigation District
General Manager

Declaration of Peter Prows

1. I am a partner with the law firm Briscoe Ivester & Bazel LLP and represent Turlock Irrigation District and Modesto Irrigation District in this test claim. I have personal knowledge of the following facts.

2. I visited a website maintained by the Department of Water Resources, https://gis.water.ca.gov/arcgis/rest/services/Boundaries/i03_WaterDistricts/MapServer/, which reports that it “represents polygon boundaries of all public water agencies in California”. I then clicked through to the “ArcGIS Online Map Viewer” from that website. I applied a filter to search for “Turlock Irrigation District” or “Modesto Irrigation District” and exported a map of the results. **Exhibit 1** is an accurate copy of the map I exported.

3. Attached as **Exhibit 2** is an accurate copy of the Order at issue in this test claim.

4. Attached as **Exhibit 3** is an accurate copy of the State Board’s order denying the Districts’ request for a stay of the Order.

5. Attached as **Exhibit 4** is an accurate copy of a document downloaded from FERC’s website for the Projects’ relicensing, consisting of a Technical Memorandum to the Districts.

6. Actual costs incurred so far this fiscal year by the Districts for preparing this test claim total approximately \$32,385, of which Turlock Irrigation District incurred approximately \$22,170.77 and Modesto Irrigation District incurred approximately \$10,214.23.

7. I anticipate the Districts will incur at least approximately \$25,000 in additional fees for this test claim this fiscal year, of which Turlock Irrigation District would be responsible for approximately \$17,115 and Modesto Irrigation District would be responsible for approximately \$7,885.

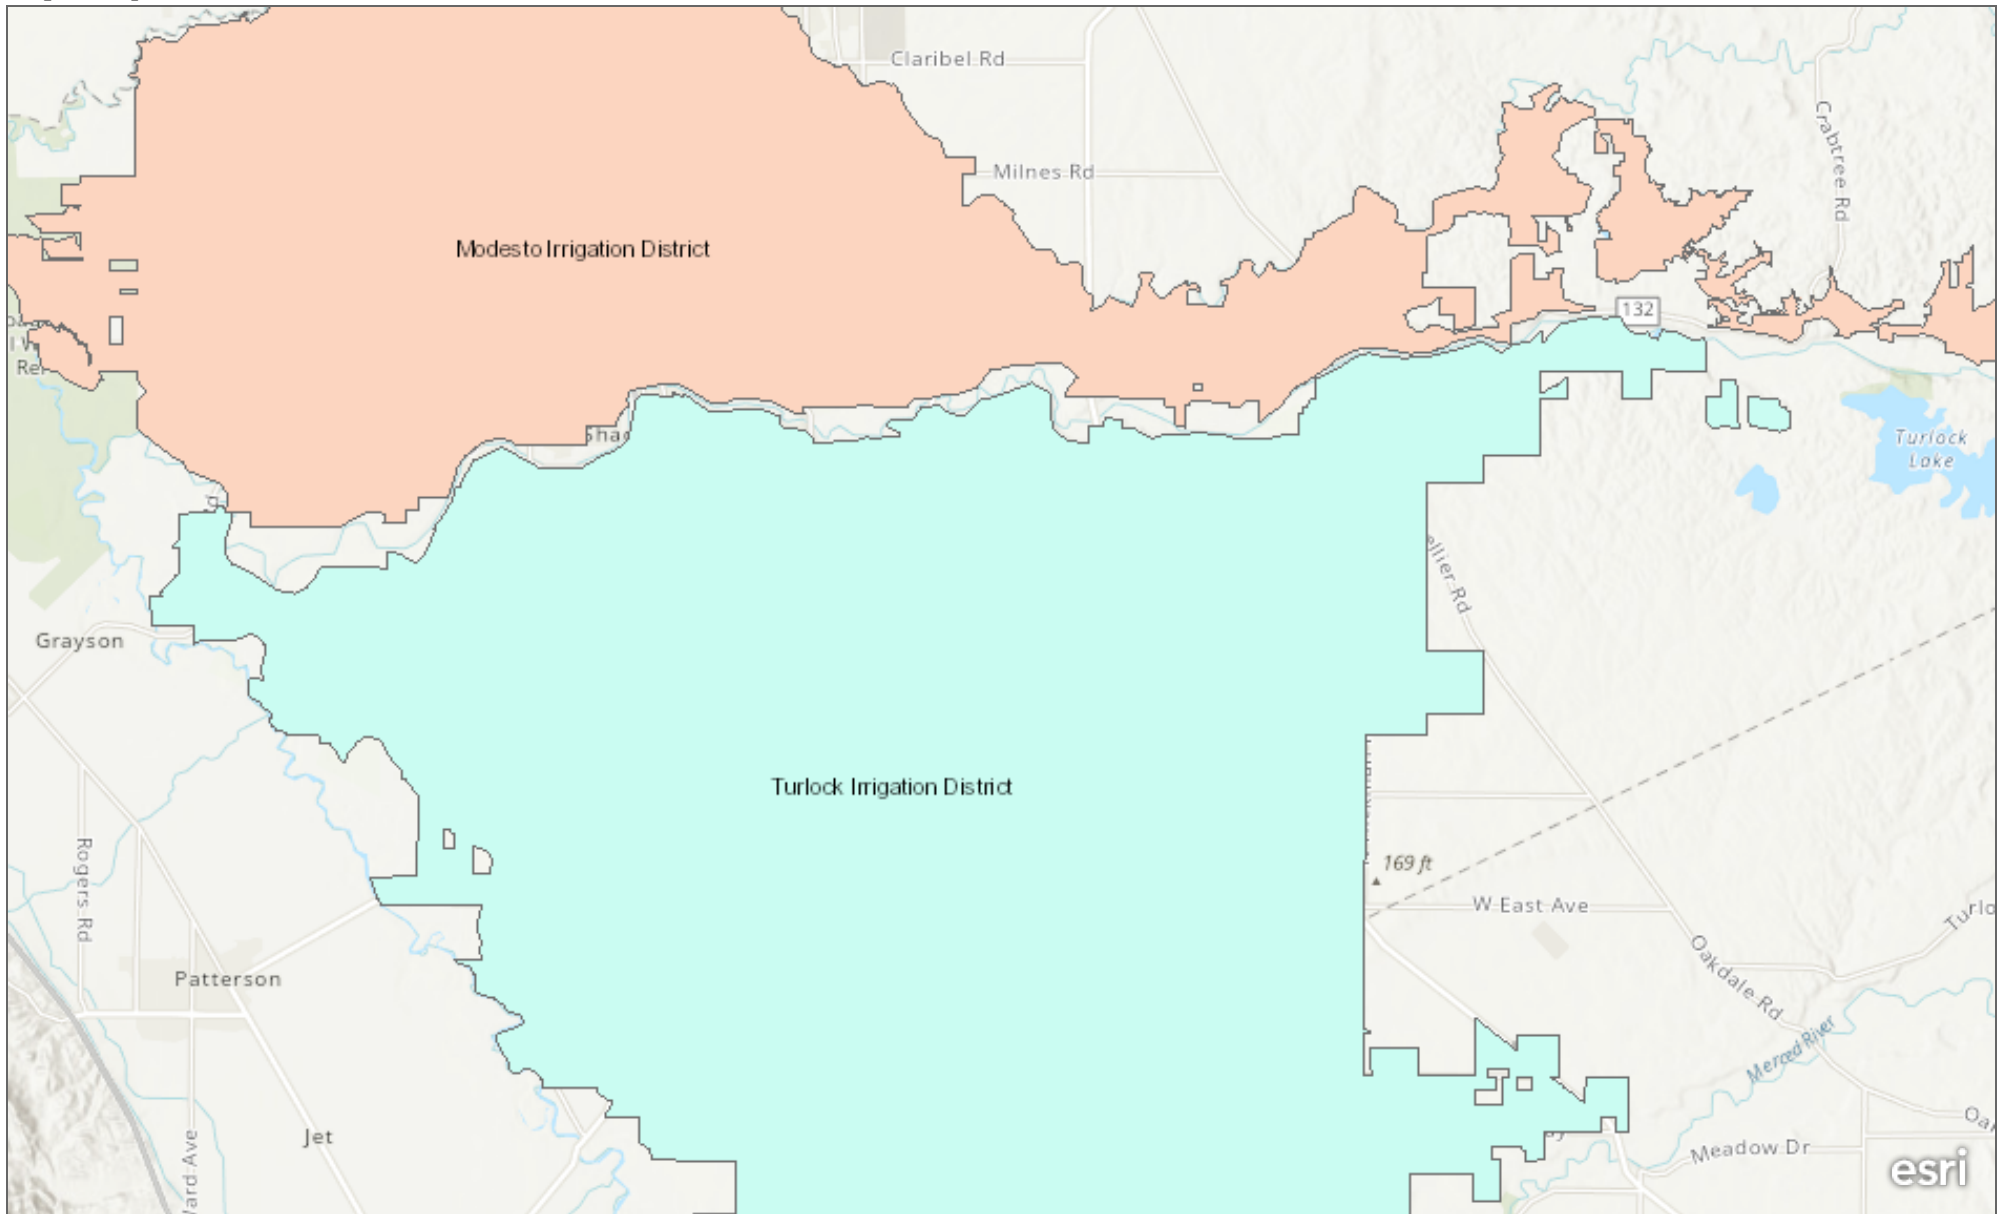

8. I anticipate the Districts will incur additional fees of at least approximately \$25,000 associated with this test claim next fiscal year, though the amount is uncertain.

Date: January 14, 2022

1.0 Projects Background

The Don Pedro Hydroelectric Project and La Grange Hydroelectric Project (collectively, Projects), Federal Energy Regulatory Commission (FERC) Project Nos. 2299 and 14581, respectively, are located on the Tuolumne River in Tuolumne and Stanislaus Counties, California (Figures 1 and 2).

On April 28, 2014, Turlock Irrigation District (TID) and Modesto Irrigation District (MID) (collectively, Districts or Licensees) filed an application for a new license with FERC to continue to operate and maintain the Don Pedro Hydroelectric Project. Subsequently, the Districts filed an amended application for the Don Pedro Hydroelectric Project on October 11, 2017. In addition to providing hydroelectric power generation, Don Pedro Reservoir provides water supply for the irrigation of more than 200,000 acres of Central Valley farmland, municipal and industrial uses, flood control benefits along the Tuolumne and San Joaquin Rivers, and a water-banking arrangement for the benefit of the City and County of San Francisco (CCSF).

The existing, unlicensed La Grange Hydroelectric Project was determined to require licensing in an order issued by FERC on December 19, 2012. On October 11, 2017, the Districts filed an application for an original license with FERC, to continue to operate and maintain the La Grange Hydroelectric Project. FERC provided notice of the accepted applications on November 30, 2017.

The Districts filed applications requesting water quality certification (certification) with the State Water Resources Control Board (State Water Board) under section 401 of the Clean Water Act for the Projects on January 26, 2018, and April 22, 2019. Before one year had elapsed after receiving the applications, the State Water Board denied the applications without prejudice on January 24, 2019, and April 20, 2020, respectively. The Districts, as lead agencies under the California Environmental Quality Act (CEQA), had not begun the environmental analysis required under CEQA, FERC had not completed its National Environmental Policy Act (NEPA) analysis, and the State Water Board could not determine compliance with water quality standards at that time. On July 20, 2020, the Districts submitted applications requesting certification for the Projects. The applications have been publicly noticed. (Cal. Code Regs., tit.23, § 3858.)

On October 2, 2020, the Districts petitioned FERC to issue a declaratory order finding that the State Water Board waived certification based on *Hoopa Valley Tribe v. Federal Energy Regulatory Commission* (D.C. Cir. 2019) 913 F.3d 1099 and recent FERC precedent. The State Water Board opposes the Districts' petition. On November 19, 2020, the Districts withdrew their applications for certification, but their applications for FERC licenses and waiver request are still pending. In the circumstances presented here, when an application for a federal license has been filed and the project is still pending federal approval, nothing in the Clean Water Act, the Porter-Cologne Water Quality Control Act, or the State Water Board's regulations bars the State Water Board from issuing certification.

The submission of the applications predates the effective date of the United States Environmental Protection Agency's (USEPA) new Clean Water Act Section 401 Certification Rule (40 C.F.R. part 121), which took effect on September 11, 2020. Thus, this certification is not subject to the requirements of the new regulations.

2.0 Projects Description

The 168-megawatt (MW) Don Pedro Hydroelectric Project is located at river mile (RM) 54.8 on the Tuolumne River in Tuolumne County, California. The Don Pedro Hydroelectric Project currently occupies 4,802 acres of federal land administered by the U.S. Department of the Interior, Bureau of Land Management (BLM). The major components of the Don Pedro Hydroelectric Project include New Don Pedro Reservoir, New Don Pedro Dam, Don Pedro Spillway, emergency spillway, power tunnel shaft and gate, Don Pedro Powerhouse, low-level outlet, and various access roads and other appurtenant facilities. The 4.7-MW La Grange Hydroelectric Project is located at RM 52.2 on the Tuolumne River in Stanislaus and Tuolumne Counties, California. The major components of the La Grange Hydroelectric Project include the La Grange Diversion Dam, storage reservoir, irrigation intakes and canals, powerhouse, access roads and other appurtenant facilities. The proposed area of the La Grange Hydroelectric Project is 14 acres of federal land administered by BLM. A detailed description of the Projects' facilities can be found in Attachment A.

3.0 Water Rights

The Districts share a number of appropriative water rights on the Tuolumne River for irrigation, power, recreation, and municipal use. New Don Pedro Reservoir provides 2,030,000 acre-feet (AF) of total water storage that serves irrigation, municipal and industrial water supply, and flood control purposes, which are described as critical functions of the Don Pedro Hydroelectric Project. The Don Pedro Hydroelectric Project provides water for irrigation of over 200,000 acres of farmland served by the Districts in the Central Valley. MID provides treated water to the City of Modesto and TID and MID jointly provide treated water to the community of La Grange. The Districts provide up to a maximum of 67,500 AF of water per year for municipal and industrial use. Immediately downstream of New Don Pedro Dam, the Districts generate 168 MW of electricity through the four turbines in the Don Pedro Powerhouse.

The La Grange Hydroelectric Project generates power using part of the flows released from the Don Pedro Hydroelectric Project. Downstream of La Grange Dam, TID diverts water from the TID Upper Main Canal to generate 4.7 MW of electricity through the La Grange Powerhouse.

Figure 2. Don Pedro and La Grange Hydroelectric Projects Site Location Map

The Projects receive inflow from the CCSF's upstream Hetch Hetchy Water and Power System, a series of reservoirs, diversion conduits, and powerhouses located on the upper Tuolumne River. Consistent with the requirements of the Raker Act¹ and agreements between the Districts and CCSF, the Projects provide a "water bank" of up to 570,000 AF of storage. The water bank allows CCSF to meet its requirement to satisfy the Districts' senior water rights by using the New Don Pedro Reservoir to store water released from its upstream facilities. By using the allotted reservoir storage, CCSF can then divert water at times when releases would have been required to satisfy the Districts' water rights. CCSF's water bank in New Don Pedro Reservoir provides water for its 2.4 million customers in the Bay Area.

In the Tuolumne River watershed, there are 165 post-1914 appropriative water rights with a combined face value of approximately 7.2 million AF (MAF). Of these 165 rights, 160 are non-power water rights with a face value of approximately 2.65 MAF. Of the 160 rights, five are non-power water rights held by TID and MID. The face value of these five water rights totals approximately 2.62 MAF, accounting for approximately 99 percent of the water authorized for diversion (based on face value) under non-power water rights in the Tuolumne River watershed (State Water Board, 2016).

In 2018, TID filed with the State Water Board a petition for long-term change to water right License 11058 (Application 14127), pursuant to Water Code section 1735 et seq. With the petition, TID seeks authorization to transfer up to 17,375 AF of water annually to the Stanislaus Regional Water Authority through July 28, 2065. The proposed transfer would include the following changes to License 11058: (1) add TID's infiltration gallery as a point of diversion (with an average diversion rate for the maximum 30-day period of use of 24 cubic feet per second (cfs)); and (2) add municipal and industrial purposes of use within TID's existing place of use boundary for irrigation. In addition, FERC's *Final Environmental Impact Statement for Hydropower Licenses Don Pedro Hydroelectric Project—FERC Project No. 2299-082 and La Grange Hydroelectric Project—FERC Project No. 14581-002* (Final EIS), released on July 7, 2020, describes the Districts' proposed facility modification involving infiltration galleries. The Final EIS describes the Districts' proposal to install and operate two in-river infiltration galleries (one of which has been partially constructed) at approximately RM 25.9 on the lower Tuolumne River, which would have a combined capacity of 200 to 225 cfs.

¹ The Raker Act, passed by Congress in 1913, authorizes CCSF to build certain water and power facilities on federal lands and addresses the allocation of the waters of the Tuolumne River between the Districts and CCSF.

Table A. Water Rights Held by TID and MID for the Projects¹.

¹ Water rights S013848, A003139, and S013849 are held solely by TID.

² Values shown in AF per year.

³ Irrigation (IRR), Power (POW), Recreation (REC), Municipal (MUN).

4.0 Federal Energy Regulatory Commission Licensing Process

On April 28, 2014, the Districts filed an application for a new license with FERC to continue to operate and maintain the Don Pedro Hydroelectric Project. On October 11, 2017, the Districts filed an amended final license application for the Don Pedro Hydroelectric Project. On the same day, the Districts also filed an application for original license for the La Grange Hydroelectric Project. The applications followed FERC's Integrated Licensing Process (ILP). On November 30, 2017, FERC noticed the license applications and provided an opportunity for comment. On January 29, 2018, the State Water Board submitted certification preliminary terms and conditions to FERC. FERC issued a *Draft Environmental Impact Statement for Hydropower Licenses Don Pedro Hydroelectric Project—FERC Project No. 2299-082 and La Grange Hydroelectric Project—FERC Project No. 14581-002* (Draft EIS) in February 2019, pursuant to NEPA. On April 12, 2019, the State Water Board submitted timely comments on the Draft EIS. FERC issued the Final EIS on July 7, 2020.

5.0 Regulatory Authority

5.1 Water Quality Certification and Related Authorities

The federal Clean Water Act (33 U.S.C. §§ 1251 et seq.) was enacted “to restore and maintain the chemical, physical, and biological integrity of the Nation’s waters.” (33 U.S.C. § 1251(a).) The Clean Water Act relies significantly on state participation and support, in light of States’ “primary responsibilities and rights” to “prevent, reduce, and eliminate pollution.” (*Id.*, § 1251(b).) Federal agencies must “co-operate with the State and local agencies to develop comprehensive solutions to prevent, reduce and eliminate pollution in concert with programs for managing water resources.” (*Id.*, § 1251(g).)

Section 401 of the Clean Water Act requires any applicant for a federal license or permit that may result in a discharge into navigable waters to provide the licensing or permitting federal agency with certification from the relevant state agency that the project will comply with state water quality laws. (*Id.*, § 1341(a)(1), (d).) Section 401 authorizes conditions “on the activity as a whole once the threshold condition, the existence of a discharge, is satisfied.” (*PUD No. 1 of Jefferson County v. Washington Dept. of Ecology* (1994) 511 U.S. 700, 712 (*PUD No. 1*)). The state’s certification may set conditions implementing Clean Water Act requirements, including the requirements of Section 303 of the Clean Water Act for water quality standards and implementation plans, or to implement “any other appropriate requirement of State law.” (33 U.S.C. § 1341(d).) An activity must comply with designated uses of water to comply with applicable water quality standards and to ensure that each activity is consistent with specific uses and attributes of a particular body of water. (*PUD No. 1, supra*, at pp. 715-717.) Section 401 further provides that certification conditions shall become conditions of any federal license or permit for the project. (33 U.S.C. § 1341(d).) If the state agency denies certification, the federal agency cannot approve the project.

The State Water Board is the state agency responsible for Section 401 certification in California. (Wat. Code, § 13160.) The State Water Board has delegated authority to

act on applications for certification to the Executive Director of the State Water Board. (Cal. Code Regs., tit. 23, § 3838, subd. (a).)

In addition, Water Code section 13383 provides the State Water Board with the authority to “establish monitoring, inspection, entry, reporting, and recordkeeping requirements... and [require] other information as may be reasonably required” for activities subject to certification under section 401 of the Clean Water Act that involve the diversion of water for beneficial use. The State Water Board delegated this authority to the Deputy Director of the Division of Water Rights (Deputy Director), as provided for in State Water Board Resolution No. 2012-0029 (State Water Board, 2012). In the *Redelegation of Authorities Pursuant to Resolution No. 2012-0029* memo issued by the Deputy Director on October 19, 2017, this authority is redelegated to the Assistant Deputy Directors of the Division of Water Rights (State Water Board, 2017A).

On November 30, 2020, the State Water Board released a draft certification for the Projects for public review and comment. In response to the draft certification, the State Water Board received comments from Bay Area Water Supply & Conservation Agency (BAWSCA), California Department of Fish and Wildlife (CDFW), California Farm Bureau Federation, Conservation Groups (comprised of Merced River Conservation Committee, California Sportfishing Protection Alliance, American Whitewater, Friends of the River, Golden West Women Flyfishers, Central Sierra Environmental Resources Center (CSERC), Sierra Club – Mother Lode Chapter, American Rivers, Tuolumne River Conservancy, Tuolumne River Trust, and Trout Unlimited), the Districts, Arthur E. Godwin of Robbins, Browning, Godwin & Marchini, LLP, National Marine Fisheries Service (NMFS), National Resources Defense Council (NRDC) and NRDC Action Fund, San Francisco Public Utilities Commission, and United States Army Corps of Engineers (USACE).

5.2 Water Quality Control Plans and Related Authorities

The State Water Board’s certification for the Projects must ensure compliance with the water quality standards in the Central Valley Regional Water Quality Control Board’s (Central Valley Regional Water Board) *Water Quality Control Plan for the Sacramento River Basin and the San Joaquin River Basin* (SR/SJR Basin Plan) (Central Valley Regional Water Board, 2018) and the *Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta Estuary* (Bay-Delta Plan) (State Water Board, 2018B). Water quality control plans designate the beneficial uses of water that are to be protected (such as municipal and industrial, agricultural, and fish and wildlife beneficial uses), water quality objectives for the reasonable protection of the beneficial uses and the prevention of nuisance, and a program of implementation to achieve the water quality objectives. (Wat. Code, §§ 13241, 13050, subds. (h), (j).) The water quality control plans are consistent with state and federal antidegradation policies. The beneficial uses, together with the water quality objectives contained in the water quality control plans, and applicable federal anti-degradation requirements, constitute California’s water quality standards for purposes of the Clean Water Act.

The nine Regional Water Quality Control Boards (Regional Water Boards) have primary responsibility for the formulation and adoption of water quality control plans for their respective regions, subject to State Water Board and USEPA approval, as appropriate. (Wat. Code, § 13240 et seq.) The State Water Board may also adopt water quality control plans, which will supersede regional water quality control plans for the same waters to the extent of any conflict. (*Id.*, § 13170.)

In March 2019, the State Water Board submitted to FERC the plans and policies included in the State's comprehensive plan for orderly and coordinated control, protection, conservation, development and utilization of the water resources of the State. The submission includes the SR/SJR Basin Plan and the Bay-Delta Plan.

5.2.1 Sacramento and San Joaquin Rivers Basin Plan

The Central Valley Regional Water Board adopted, and the State Water Board and USEPA approved, the SR/SJR Basin Plan. The SR/SJR Basin Plan designates the beneficial uses of water to be protected along with the water quality objectives necessary to protect those uses. The existing beneficial uses for the Tuolumne River from New Don Pedro Reservoir to the San Joaquin River are: irrigation; stock watering; power; contact recreation; canoeing and rafting; other non-contact recreation; warm freshwater habitat; cold freshwater habitat; warm spawning; cold spawning; and wildlife habitat. Additionally, municipal and domestic supply is designated as a potential beneficial use.

5.2.2 Bay-Delta Plan

The Bay-Delta Plan establishes water quality objectives to protect beneficial uses of water in the San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta) and tributary watersheds, including drinking water supply, irrigation supply, and fish and wildlife. The State Water Board adopts the Bay-Delta Plan pursuant to its authorities under the Porter-Cologne Water Quality Control Act (Wat. Code, § 13000 et seq.) and the federal Clean Water Act (33 U.S.C. § 1313).

The State Water Board has historically developed the water quality control plan for the Bay-Delta for several reasons. The Bay-Delta is a critically important natural resource that is both the hub of California's water supply system and the most valuable estuary and wetlands system on the West Coast. Because diversions of water within and upstream of the Bay-Delta are a driver of water quality in the Bay-Delta watershed, much implementation of the Bay-Delta Plan relies on the combined water quality and water right authority of the State Water Board. In addition, the Bay-Delta falls within the boundaries of two Regional Water Boards. Having the State Water Board develop and adopt a water quality control plans that crosses Regional Water Board boundaries ensures a coordinated approach.

The beneficial uses in the Bay-Delta Plan are: municipal and domestic supply; industrial service supply; industrial process supply; agricultural supply; groundwater recharge; navigation; water contact recreation; non-contact water recreation; shellfish

harvesting; commercial and sport fishing; warm freshwater habitat; cold freshwater habitat; migration of aquatic organisms; spawning, reproduction, and/or early development; estuarine habitat; wildlife habitat; and rare, threatened, or endangered species.

In 2018, the Bay-Delta Plan was updated to adopt new and revised Lower San Joaquin River (LSJR) flow objectives and revised southern Delta salinity objectives. The LSJR flow objectives apply from February – June to the Stanislaus, Tuolumne, and Merced Rivers and include a baseflow requirement that applies on the San Joaquin River (SJR) at Vernalis (Vernalis). In addition, the Bay-Delta Plan includes a revised southern Delta salinity objective of 1.0 deciSiemens/meter (dS/m) electrical conductivity (EC) at Vernalis and at the three interior southern Delta stations for the protection of agricultural beneficial uses.

5.3 Clean Water Act Section 303(d) Listing

On October 3, 2017, the State Water Board listed the Tuolumne River on the Clean Water Act Section 303(d) list of impaired waterbodies. USEPA approved the California 303(d) list on April 6, 2018. New Don Pedro Reservoir is impaired for mercury. The Tuolumne River, from New Don Pedro Reservoir to the San Joaquin River, has been identified as being impaired by chlorpyrifos, diazinon, Group A pesticides², mercury, temperature, and toxicity. Section 303(d) of the Clean Water Act requires total maximum daily loads (TMDLs) to be developed for impaired waterbodies. TMDLs are written plans that define the maximum amount of a pollutant that a waterbody can receive without exceeding water quality standards and establish load allocations for point and nonpoint sources of pollution.

5.4 Construction General Permit

The Districts may need to obtain coverage under the *General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities* (Construction General Permit)³ for activities that disturb one or more acres of soil or activities that disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres. Construction activities subject to the Construction General Permit include clearing, grading, and disturbances to the ground, such as stockpiling or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility.

² Group A pesticides consist of aldrin, dieldrin, chlordane, endrin, heptachlor, heptachlor epoxide, hexachlorocyclohexanes (including lindane), endosulfan, and toxaphene.

³ Water Quality Order No. 2009-0009-DWQ NPDES No. CAS000002, as amended by Order No. 2010-0014-DWQ and Order No. 2012-0006-DWQ. Available online at: https://www.waterboards.ca.gov/water_issues/programs/stormwater/construction.html Last accessed: November 5, 2020.

5.5 State Wetland Definition and Procedures for Discharges of Dredged or Fill Material to Waters of the State

On April 2, 2019, the State Water Board adopted the *State Wetland Definition and Procedures for Discharges of Dredged or Fill Material to Waters of the State* (Procedures), which became effective on May 28, 2020. The Procedures provide California's definition of wetland, wetland delineation procedures, and procedures for submitting applications for activities that could result in discharges of dredged or fill material to waters of the state. The Procedures ensure that State Water Board regulatory activities will result in no net loss of wetland quantity, quality, or permanence, compliant with Executive Order W-59-93. The Districts must comply with the Procedures when conducting dredge or fill activities that may impact waters of the state, including wetlands.

5.6 Aquatic Weed Control General Permit

The *Statewide National Pollutant Discharge Elimination System Permit for Residual Aquatic Pesticide Discharges to Waters of the United States from Algae and Aquatic Weed Control Applications* (Aquatic Weed Control General Permit)⁴ applies to projects that require aquatic weed management activities. The Aquatic Weed Control General Permit sets forth detailed management practices to protect water quality from pesticide and herbicide use associated with aquatic weed control.

5.7 Statewide Mercury Provisions

On May 2, 2017, the State Water Board adopted Resolution No. 2017-0027, which approved *Part 2 of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California—Tribal and Subsistence Fishing Beneficial Uses and Mercury Provisions*.⁵ Resolution No. 2017-0027 provides a consistent regulatory approach throughout the state by setting mercury limits to protect the beneficial uses associated with the consumption of fish by both people and wildlife. The State Water Board also established definitions for three new beneficial uses (tribal traditional culture, tribal subsistence fishing, and subsistence fishing) for use by the State Water Board and Regional Water Boards. The State Water Board also approved one narrative and four numeric mercury objectives to apply to inland surface waters, enclosed bays, and estuaries of the state that have any of the following beneficial use definitions: commercial and sport fishing, tribal traditional culture, tribal subsistence fishing, wildlife habitat, marine habitat, preservation of rare and endangered species, warm freshwater habitat, cold freshwater habitat, estuarine habitat, or inland saline

⁴ Water Quality Order No. 2013-0002-DWQ and NPDES No. CAG990005, as amended by Order No. 2014-0078-DWQ, Order No. 2015-0029-DWQ, Order No. 2016-0073-EXEC, and any amendments thereto. Available online at: https://www.waterboards.ca.gov/water_issues/programs/npdes/pesticides/weed_control.html. Last accessed: November 5, 2020.

⁵ Available online at: https://www.waterboards.ca.gov/water_issues/programs/mercury/ Last accessed: November 5, 2020.

water habitat, with the exception of waterbodies or waterbody segments with site-specific mercury objectives. These provisions will be implemented through National Pollution Discharge Elimination System (NPDES) permits, certifications, waste discharge requirements, and waivers of waste discharge requirements.

6.0 California Environmental Quality Act

The Districts are the lead agencies for the purposes of CEQA compliance. (Pub. Resources Code, §§ 21000 – 21177.) The State Water Board is a responsible agency. As of the date of this certification, the Districts have not initiated the CEQA process. On June 29, 2020, Governor Newsom signed into law amendments to the Water Code that provide the State Water Board with the authority to issue certifications before completion of CEQA review, where waiting until completion of CEQA review presents a substantial risk of waiver of certification authority. (See Wat. Code, section 13160, subd. (b)(2), as amended by Stats. 2020, ch. 18, § 9.) On October 2, 2020, the Districts petitioned FERC to issue a declaratory order finding that the State Water Board waived certification. The State Water Board may now issue certification before CEQA review is complete.

The issuance of this certification does not obviate the Districts' or the State Water Board's obligations under CEQA, and the State Water Board, pursuant to Water Code section 13160, subdivision (b)(1), reserves authority to reopen and revise this certification "as appropriate to incorporate feasible measures to avoid or reduce significant environmental impacts or to make any necessary findings based on the information provided in the environmental document prepared for the project." If the State Water Board exercises this authority, it will file a Notice of Determination with the State Clearinghouse within five days of issuance of an amended certification.

7.0 Rationale for Water Quality Certification Conditions

Water development projects in the LSJR watershed, including the Projects on the Tuolumne River, have resulted in reductions in flows and alterations in the flow regime that adversely affect water quality. The Projects' impacts on water quality and beneficial uses are addressed in this certification. The certification conditions were developed to ensure that the Projects comply with water quality requirements and other appropriate requirements of state law, including the protection of beneficial uses of California's waters by complying with water quality objectives in water quality control plans and other applicable water quality requirements. Section 401 of the federal Clean Water Act (33 U.S.C. § 1341) provides that the conditions contained in this certification be incorporated as mandatory conditions of the new license(s) issued by FERC for the Projects.

When preparing the conditions in this certification, State Water Board staff reviewed and considered:

- The final license applications, including amendments and errata, submitted by the Districts to FERC (Districts 2017A);

- The Districts' applications for certification;
- Comments submitted on the license applications;
- The Draft EIS (FERC 2019) and Final EIS (FERC, 2020) prepared pursuant to NEPA, including comments submitted on the Draft EIS;
- CDFW's 10(j) Recommendations (CDFW 2018);
- NMFS' 4(e) Conditions and 10(j) Recommendations;
- BLM's Comments, Recommendations, Preliminary Terms and Conditions, and Preliminary Fishway Prescriptions for the Don Pedro Hydroelectric Project (BLM, 2018A), Comments, Recommendations, Preliminary Terms and Conditions, and Preliminary Fishway Prescriptions for the La Grange Hydroelectric Project (BLM, 2018B), and Revised Conditions and Recommendations (BLM, 2018C);
- Existing and potential beneficial uses and associated water quality objectives in the SR/SJR Basin Plan and Bay-Delta Plan (State Water Board, 2018B);
- Final 2014/2016 California Integrated Report (Clean Water Act Section 303(d) List/305(b) Report) (State Water Board, 2017B);
- Projects-related controllable water quality factors;
- Comments submitted on the draft certification for the Projects; and
- Other information in the record.

The following describes the rationale used to develop the conditions in this certification that are needed to address water quality impacts of the Projects.

7.1 Rationale for Condition 1 –Instream Flows

Condition 1 is a suite of instream flow requirements that are based on FERC staff recommended minimum instream and spring pulse flows, CDFW fall pulse flow recommendations, and Bay-Delta Plan flow requirements, which are necessary to meet state water quality standards and other appropriate requirements of state law. Conditions 1.B, 1.C, and 1.D are based on information contained in FERC's 2020 Final EIS, CDFW recommendations to FERC (CDFW, 2018), the 2018 *Final Substitute Environmental Document in Support of Potential Changes to the Water Quality Control Plan for the San Francisco Bay-Sacramento San Joaquin Delta Estuary* (2018 SED) (State Water Board, 2018A),⁶ and other scientific information that became available after the State Water Board adopted the 2018 SED.

Condition 1.B includes FERC staff recommendations for minimum instream flows year-round with modifications that: (i) prevent minimum instream flows from falling below 200 cfs; and (ii) require the 75 percent exceedance forecast in determining the water year type. Minimum instream flows apply at La Grange Dam and one or more new points of diversion or rediversion downstream. Pulse flows required by Condition 1.C

⁶ Available online at:

https://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/bay_delta_plan/water_quality_control_planning/2018_sed/ Last Accessed: November 5, 2020.

are based on FERC staff recommended spring floodplain and outmigration pulse flows (“spring pulse flows”) and CDFW recommended fall pulse flows. The requirement for flows to be at least 200 cfs during the July through January period is based on maintaining recreational beneficial uses,⁷ supporting equitable access to water-based recreation for urban and rural communities, and minimizing poor water quality and habitat conditions that promote invasive plants and predatory fish. CDFW identified that the minimum instream flows proposed by the Districts in the amended final license application and, subsequently, in FERC’s Final EIS are not sufficient to support salmonid holding, spawning, and rearing in the lower Tuolumne River (CDFW, 2018). Analyses in the 2018 SED and more recent scientific information show that flows greater than the FERC recommended flows are needed to provide reasonable protection of native resident and migratory fish species that use the Tuolumne River, LSJR, and Bay-Delta, and that such flows have been impacted by the Projects. Accordingly, Condition 1.D applies Bay-Delta Plan flows in the February through June time period, which consist of a narrative objective, a percent of unimpaired flow objective at the confluence of the Tuolumne River and the LSJR, and a base flow objective for the San Joaquin River at Vernalis.

Bay-Delta Plan flows can be used to meet the requirements of Conditions 1.B and 1.C in the February through June time period or contribute to flow requirements from July to January (e.g., fall pulse flows) with State Water Board approved adaptive implementation of Condition 1.D flows or through a voluntary agreement approved by the State Water Board.

The California Natural Resources Agency and the California Environmental Protection Agency are currently leading efforts to negotiate voluntary agreements to improve conditions for native fish throughout the Bay-Delta Watershed, including in the Tuolumne River. These agreements, if achieved, would help provide reasonable protection of the fish and wildlife beneficial uses by implementing a combination of flow and non-flow actions over a 15-year period. The Bay Delta Plan includes provisions for implementing plan requirements through voluntary agreements. Pursuant to the Bay-Delta Plan, at a minimum, voluntary agreements must include provisions for transparency and accountability, monitoring and reporting, and for planning, adaptive adjustments, and periodic evaluation, that are comparable to similar elements contained in the program of implementation for the LSJR flow objectives. The State Water Board may consider approval of voluntary agreements that do not meet the Bay Delta Plan’s requirements after conducting any necessary technical and environmental analyses, and if necessary, complying with appropriate procedures to amend the Bay-Delta Plan. The State Water Board may also consider and accept voluntary agreements that include measures to comply with water quality requirements that are in addition to provisions included in applicable water quality control plans (e.g., gravel and large

⁷ Canoeing and rafting, contact recreation, and non-contact recreation are existing beneficial uses for the Tuolumne River from Don Pedro Reservoir to the confluence with the SJR (SJ/SJR Basin Plan, Central Valley Regional Water Board, 2018).

woody material augmentation, floodplain restoration), and may amend this certification accordingly. As discussed below, the State Water Board may amend the certification to accommodate a voluntary agreement.

Future updates to the Bay-Delta Plan may be approved by the State Water Board to include specific provisions for voluntary agreements as a means of implementing the water quality objectives for the protection of fish and wildlife beneficial uses. As stated in Condition 27 (compliance with the Bay-Delta Plan and SR/SJR Basin Plan) and Condition 28 (compliance with other applicable standards and plans), the Projects must be operated in a manner consistent with all applicable water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act or section 303 of the Clean Water Act. Moreover, as stated in Conditions 23 and 24 (reservations of authority), the State Water Board reserves the authority to add to or modify the conditions of the certification to implement any new or revised water quality standards and implementation plans, including revisions that provide for implementation through a voluntary agreement approved by the State Water Board.

7.1.1 Rationale for Condition 1.A: Water Year Type

This certification uses the San Joaquin Valley 60-20-20 Water Year Hydrological Classification Index (San Joaquin Valley 60-20-20 Index or SJV 60-20-20 Index) established in State Water Board Revised Water Right Decision 1641 (State Water Board, 2000) and the Bay-Delta Plan where flow requirements and other measures are based on water year type. The San Joaquin Valley 60-20-20 Index is calculated, in units of thousand acre-feet (TAF), using the monthly sum of unregulated runoff (i.e., unimpaired flow) into New Melones Reservoir (Stanislaus River), New Don Pedro Reservoir (Tuolumne River), Exchequer Reservoir (Merced River), and Millerton Lake (San Joaquin River) and the prior year's water year index volume as shown in the following equation.

$$\text{SJV 60-20-20 Index (TAF)} = 60\%(\text{sum current year April through July unimpaired runoff}) + 20\%(\text{sum current year March through October unimpaired runoff}) + 20\%(\text{the minimum between prior year index volume or 4,500 TAF}).$$

The San Joaquin Valley 60-20-20 Index includes five-water year classifications: Wet (W), Above Normal (AN), Below Normal (BN), Dry (D), and Critically Dry (C). The water year classification for the San Joaquin River flow objectives will be established using the best available estimate of the San Joaquin Valley 60-20-20 Index at the 75 percent exceedance level. FERC's Final EIS and the Districts' amended final license application also recommend use of the San Joaquin Valley 60-20-20 Index; however, the FERC staff recommendation uses the best available estimate of the San Joaquin Valley 60-20-20 Index at the 90 percent exceedance level in spring months. Use of the 90 percent exceedance forecast to determine flow requirements results in a shift to lower river flow requirements associated with drier water year types and would result in lower river flows in more months than would occur with the 75 percent exceedance

forecast. The minimum instream flows and pulse flows in Condition 1.B and 1.C are based on the San Joaquin Valley 60-20-20 Index using the 75 percent exceedance to remain consistent with the definition in the Bay-Delta Plan and the intent of improving flows to protect fish and wildlife beneficial uses.

7.1.2 Rationale for Condition 1.B: Minimum Instream Flows Below La Grange Dam and Below a Potential New Point or Points of Diversion or Rediversion

Condition 1.B contains water year type-specific, minimum instream flow requirements on the Tuolumne River immediately downstream of La Grange Dam and downstream of the proposed addition of one or more points of diversion or rediversion associated with one or more infiltration galleries. The year-round minimum instream flows in Condition 1.B are based on FERC staff recommended minimum flows with modifications that do not allow flows to fall below 200 cfs from July through January. The FERC staff recommended minimum instream flows are based on San Joaquin Valley 60-20-20 Index water year type (see section 7.1.1 for the water year type rationale).

The requirement for flows to be at least 200 cfs in the July through January period is based on the need to maintain recreational beneficial uses⁸. The Districts' *Lower Tuolumne River Lowest Boatable Flow Study Report* (Districts, 2013A) shows 200 cfs as the boatable flow value identified by 90 percent of study participants. The Final EIS states that a flow of 200 cfs provides the lowest boatable flow for canoes and hardshell and inflatable kayaks based on the *Lower Tuolumne River Lowest Boatable Flow Study Report* (Districts, 2013A). The Final EIS includes an analysis of frequency of boatable conditions under multiple proposed flow schedules including the FERC staff recommended flows with and without operation of the proposed infiltration galleries.

The Final EIS boatable flows analysis shows that recreational boating is unavailable downstream of the infiltration galleries for the majority of the May through October time period in Dry and Critically Dry years under the FERC staff flow recommendation. Boatable flow conditions of 200 cfs or greater downstream of the infiltration galleries occur 39 percent of the time in Dry water years and 29 percent of the time in Critically Dry water years during the May through October recreational season under the FERC staff recommended flows. In July, August, and September months of Dry years boatable flows occur 16, 6, and 10 percent of the time, respectively, and zero percent of the time for all three months in Critically Dry years under FERC staff recommended flows. The Districts propose to modify operation of the infiltration galleries to provide flows of 200 cfs for 12 boatable recreational days in June through October 15; however, the record does not support the conclusion that 12 boatable days provides reasonable access to the urban and rural communities seeking boating recreation opportunities

⁸ Canoeing and rafting, contact recreation, and non-contact recreation are existing beneficial uses for the Tuolumne River from Don Pedro Reservoir to the confluence with the SJR (SJ/SJR Basin Plan, Central Valley Regional Water Board, 2018).

downstream of the infiltration galleries and is protective of recreational uses generally. Instead, expected increased demand and the need to protect the water quality attributes of the water body that support recreational uses support the condition. The FERC Final EIS states that demand for recreational activities such as boating, wildlife viewing, and fishing are expected to increase with local population growth, which are expected to increase the demand for recreational experiences on the lower Tuolumne River. Additionally, as discussed below, there are water quality concerns associated with the FERC staff recommended flows during this period of time.

Flows of 200 cfs and lower in the lower Tuolumne River are also associated with warm water temperature, water hyacinth growth, poor water quality, stagnant conditions that support warm water predatory fish, poor aesthetic quality, and inequitably affect access to natural resources for urban and rural communities. The relationship between low flows and high temperatures is firmly established and summarized in the 2018 SED (State Water Board, 2018A). The *Lower Tuolumne River Lowest Boatable Flow Study Report* (Districts, 2013A) documents that water hyacinth mats completely spanned the river in 2012 at two locations between Riverdale Park and Shiloh Bridge and contributed to low boat-ability scores. Annual reports to FERC for the Don Pedro Hydroelectric Project also document water hyacinth, warm water temperatures, and presence of introduced predatory fish species (e.g., Districts 2015, 2016, and 2017B). Excessive plant growth, such as water hyacinth, and warm water are both associated with poor water quality such as low dissolved oxygen (State Water Board, 2018A) and can be harmful to salmon and other species as discussed in the rationale for Condition 3. Clear relationships have been demonstrated between reduced flow and depressed dissolved oxygen concentrations in other Central Valley waterbodies (Central Valley Regional Water Board, 2005).

FERC staff recommended minimum instream flows, floodplain pulse flows, and outmigration pulse flows are required at La Grange Dam in combination with Bay-Delta Plan flows, which are required at the flow gage nearest to the confluence with the LSJR⁹ (Condition 1.D), because river flows higher than FERC staff recommendations are needed to provide reasonable protection of fish and wildlife. The 2018 SED, which supports the Bay-Delta Plan LSJR flow objectives, and CDFW minimum instream flow rationale (CDFW, 2018) show that flows higher than the minimum instream flows required in the current FERC license and the FERC staff recommended minimum instream flows are associated with higher juvenile Chinook salmon survival.

CDFW minimum instream flow recommendations were developed to achieve the five functional flow components of the natural hydrograph in the eastern Central Valley:

⁹ The Bay-Delta Plan program of implementation for the LSJR flow objectives states that the Executive Director may approve changes to the compliance locations and gage station numbers if information shows that another location and gage station more accurately represent the flows of the LSJR tributary at its confluence with the LSJR.

(1) fall or winter pulse flows (freshets/first inundation flows of the wet season); (2) winter base flows (storm and peak flows); (3) spring snowmelt flows; (4) snowmelt recession flows; and (5) base flows. CDFW developed minimum instream flow levels based on flows needed to: achieve instream physical habitat as estimated by weighted usable area (WUA); achieve USEPA temperature criteria the majority of the time; activate and sustain floodplain habitats prior to and through the spring recession for successful outmigration; and successfully attract adult spawning-aged fish in the fall (CDFW, 2018). A recent (ISAP, 2019) evaluation of juvenile Chinook salmon survival data on the Stanislaus River shows that measured juvenile survival decreased with increased instream physical rearing habitat (WUA). This occurs because WUA modeling estimates for juvenile Chinook physical rearing habitat are maximized at relatively low flows (e.g., 75 cfs). However, spawner and juvenile data show that higher juvenile survival occurs during times of higher flows rather than under model estimates of increased physical rearing habitat. The same analysis shows that higher instream flows have a stronger, positive relationship with spawning success than WUA.

Minimum instream flows in Condition 1.B, in combination with pulse flows in Condition 1.C and Bay-Delta Plan flows in Condition 1.D, are consistent with the CDFW approach to identifying functional flow components in support of fish and wildlife. Implementing Bay-Delta Plan flows will generally result in greater river flows in the February through June months than Condition 1.B and Condition 1.C flows alone. Bay-Delta Plan flows and pulse flows also include options for shaping and shifting flows to meet the needs of the five functional flow components.

7.1.3 Rationale for Condition 1.C: Pulse Flows

Condition 1.C requires implementation of a spring floodplain pulse flow and spring outmigration pulse flow consistent with the FERC Final EIS's staff recommendation (FERC, 2020), and a fall attraction pulse flow as recommended by CDFW (CDFW, 2018). The FERC staff recommendation includes a spring floodplain pulse flow of 2,750 cfs for 9 – 20 days depending on water year type and timed to support salmon springtime rearing and outmigration pulse flows to facilitate survival of migrating juvenile salmon. It is anticipated that the flows required in Condition 1.D (Bay-Delta LSJR flows) will generally provide greater volumes of water in the spring than the combination of Condition 1.B flows (minimum instream flows) and Condition 1.C flows (pulse flows) in the spring. In the spring, if timed appropriately, floodplain pulse flows will activate floodplain and increase the quality and quantity of rearing habitat for juvenile salmon and the outmigration pulse flows will stimulate native migratory fish migration to the ocean prior to stressful summer flow and temperature conditions. The combination of FERC staff recommended minimum instream and pulse flows at La Grange Dam, and LSJR Bay-Delta Plan flows at Modesto should result in benefits to fisheries consistent with CDFW and Bay-Delta Plan analyses while providing opportunities to maximize water supply reliability.

The CDFW fall pulse flows are based on providing fall freshet attraction flows for spawning adults (CDFW, 2018). For example, during the fall, specifically in October or

November, a pulse flow would help to attract adult native migratory fish to the mouth of the Tuolumne River and stimulate upstream migration to the primary spawning area between La Grange Dam and Turlock State Park.

Pulse flows provide important geomorphic benefits, such as mobilizing spawning gravel and flushing sediment. Absent high flow events, especially in drier water years, river reaches can accumulate fine grained sediments, decreasing the amount of available spawning habitat. Furthermore, pulse flows and a more natural flow regime will better support aquatic life by maintaining or improving aquatic habitat. Pulse flows are needed to consistently inundate floodplains for a stretch of time, particularly during the spring, to provide rearing and foraging habitat for juvenile native resident and migratory fish in overbank areas. Pulse flows also stimulate development of floodplain vegetation that could provide protective cover for juvenile native resident and migratory fish and additional shade to the channel during warmer months when water temperature limits the suitability of native fish habitat in the lower Tuolumne River.

7.1.4 Rationale for Condition 1.D: Bay-Delta Plan Lower San Joaquin River Flows

Condition 1.D requires implementation of the Bay-Delta Plan's LSJR flow objectives (LSJR Bay-Delta flows), which are both narrative and numeric, to reasonably protect native fish and wildlife beneficial uses in the LSJR watershed to Bay-Delta. The narrative objectives require, in part, maintaining inflow conditions from the SJR watershed to the Bay-Delta at Vernalis that are sufficient to support and maintain the natural production of viable native SJR watershed fish populations migrating through the Delta. The numeric objective requires flows that more closely mimic natural hydrograph conditions. The program of implementation for the flow objectives provides flexibility for the flows to be adjusted, shaped, or shifted, if information supports that adaptively implementing the flows better achieves the narrative goal of supporting native SJR watershed fish populations.

The SJR watershed once supported large spring-run and fall-run (and possibly late fall-run) Chinook salmon populations; however, it is widely thought that the watershed now only supports fall-run Chinook salmon populations, and these populations are at risk. Reduced flow is recognized as a primary driver of the decline of riverine ecosystem conditions and fish species abundance and distribution. Nearly every feature of habitat that affects native fish and wildlife is, to some extent, determined by flow (e.g., temperature, water chemistry, and physical habitat complexity). The LSJR flow objectives in the Bay-Delta Plan protect fish and wildlife beneficial uses in the LSJR watershed.

The program of implementation for the flow objectives allows for adaptive implementation of the percent of unimpaired flow requirement. This adaptive implementation enables the magnitude and timing of flows to be adjusted, within the 30–50 percent of unimpaired flow range, when such adjustments result in better protection of fishery resources than rigidly following the unimpaired flow value on a

seven-day running average. In addition, non-flow measures could improve habitat conditions for fish and wildlife, which may support a change in the required percent of unimpaired flow, within the prescribed range, or other adaptive adjustments that may collectively reduce the water supply and economic effects resulting from implementing the 2018 Bay-Delta Plan.

Adaptive implementation of flow is intended to accomplish the following goals:

- Maximize fisheries benefits at potentially lower water cost.
- Respond to changing information and changing conditions, including changes in flow patterns from climate change.
- Minimize adverse water temperature effects.
- Support scientific efforts to assess the benefits of different flow regimes and other habitat improvements.

Tuolumne River flows that meet the February – June LSJR flow objectives are generally greater than the baseflows and pulse flows identified in Conditions 1.B (minimum instream flows) and 1.C (pulse flows). The higher flows required by Condition 1.D (LSJR Bay-Delta flows) support achieving temperature criteria in Table 3 (Condition 3) during the February through June time period and may contribute to meeting temperature criteria from July through November upon State Water Board approval and application of adaptive implementation methods. The 2018 SED provides the scientific basis for requiring LSJR numeric flow objectives for the reasonable protection of native fish and wildlife beneficial uses. The 2018 SED shows that flows greater than baseline and the FERC staff recommendation are needed to provide reasonable protection for LSJR native resident and migratory fish species. Accordingly, Condition 1.D requires the Districts to meet the Tuolumne River portion of the LSJR flow objectives including the percent of unimpaired flow objective near the confluence of the Tuolumne River with the LSJR. Condition 1.D also acknowledges that the Bay-Delta Plan allows for the percent of unimpaired flow objective to be implemented as a total volume of water that can be applied adaptively within and outside the February through June time period to achieve the best biological outcome while reducing water supply impacts.

As described in the rationale for Condition 1.B, Bay-Delta Plan percent of unimpaired flow objectives are consistent with the CDFW approach to identifying functional flow components to protect ecological functions and support fish and wildlife. CDFW minimum instream flow recommendations are the base flows needed to achieve the five functional flow components of the natural hydrograph in the eastern Central Valley. Bay-Delta Plan flows are generally higher than recommended minimum instream flows and pulse flows and can be used as a block of water to achieve functional flow targets from February through June and supplement functional flow components (e.g., summer base flows, fall attraction flows) from July through January if approved as part of adaptive implementation.

As discussed above, voluntary agreements may provide a means of implementing the Bay-Delta Plan's requirements. In addition, the State Water Board may modify the conditions of the certification to implement any new or revised water quality standards and related provisions, including revisions that provide for implementation through a voluntary agreement approved by the State Water Board.

7.1.5 Rationale for Condition 1.E: Compliance Methods

Compliance methods for minimum instream flows (Condition 1.B), pulse flows (Condition 1.C), and LSJR flow objectives (Condition 1.D) are needed to track and account for flows, including flows that are used as a volume or "block" of water to comply with the pulse flows and LSJR flow objectives. Implementing the LSJR percent of unimpaired flow objective requires development of methods to monitor and evaluate compliance. Flow objectives in water quality control plans and permits have traditionally been established as flow schedules by water year type with flows established at a fixed flow rate in cfs for a stated time period (e.g., monthly, 30-days, 14-days, or some other specific time increment). Similarly, compliance methods that track and account for flows that are established as a block or volume of water, such as pulse flows or LSJR flow objectives using adaptive methods, need to be established and approved by the State Water Board. On September 20, 2019, the State Water Board released a draft guidance document, *Initial Unimpaired Flow Compliance Measures*, (State Water Board, 2019B) which identifies basic steps for monitoring and assessing compliance with the LSJR unimpaired flow objectives and identifies issues to be resolved. State Water Board staff have been continuing to develop and refine compliance measures, including identifying options for voluntary agreements. Staff anticipate submitting an updated Unimpaired Flow Compliance Measures document to the State Water Board's Executive Director for consideration.

An evaluation of compliance also includes measuring and monitoring flows at compliance points specified in Condition 1. Condition 1 requires installation and operation of a new gage downstream of infiltration galleries to be added as points of diversion or rediversion, including TID's proposed point of rediversion, before water is diverted at the new point or points of diversion or rediversion. The new gage is necessary to monitor minimum instream flows downstream of the diversion or rediversion and establish compliance with minimum flows and pulse flows.

7.1.6 Rationale for Condition 1.F: Annual Operations Plans

Condition 1.F requires the development of annual operations plans to promote comprehensive water resource management, including efficient and effective management of water resources for water supply and biological beneficial uses. The annual operations plans must address implementation of the flows identified in Conditions 1.B (minimum instream flows), 1.C (pulse flows), and 1.D (LSJR Bay-Delta Plan flows), ramping rates in Condition 2, and carryover storage requirements in Condition 3. Annual operations plans will be based on a forecast, or multiple forecasts, of predicted inflow to the watershed. Examples of available forecasts include the San Joaquin River water year forecast of monthly unimpaired flow produced by the

California Department of Water Resources (DWR),¹⁰ released in December of the new water year and is updated monthly until May, and monthly inflow forecasts produced by the California Nevada River Forecast Center.¹¹ Best available information may not accurately reflect actual precipitation and snowpack conditions that occur as the water year progresses. Accordingly, it is expected that annual operations plans may need to be modified as the year progresses and information about available water supply improves. The process of developing an annual operations plan supports tracking operations decisions and identifying potential deviations from the approved plan as the water year progresses, such that proposed modifications can be submitted for approval, if necessary.

The Bay-Delta Plan requires annual adaptive operations plans to identify adaptive implementation actions for achieving the LSJR flow objectives. The annual operations plan required under Condition 1.F may be used to fulfill the Bay-Delta Plan's requirements for annual adaptive operations plans as long as the Bay-Delta Plan's requirements are met.

7.1.7 Rationale for Condition 1.G: Dry Year Management Operations Plan

Developing and implementing a Dry Year Management Operations Plan is important for successful management of water resources to protect all beneficial uses in California's extremely variable climate, which includes extended drought. Multiple, successive dry years present difficult choices between releasing reservoir water to meet immediate demands (deliveries and instream flow requirements) or storing reservoir water for a future year to address the risk of additional dry year(s). The Dry Year Management Operations Plan should identify available strategies for managing the need to release water from storage to fulfill seasonal water demand with the need to retain water in storage for future demand.

7.2 Rationale for Condition 2 – Ramping Rates

Projects' operations can cause abrupt flow and stage fluctuations in stream reaches. These fluctuations and the rate at which they occur (i.e., ramping rate) may strand or otherwise impact aquatic species. To avoid rapid changes in river flow that may adversely impact aquatic life and minimize risk of juvenile stranding or redd dewatering, Condition 2 requires the Districts to implement specific down-ramping rates of: (1) no more than two-inches per hour; and (2) a change in flow of less than or equal to 500 cfs in any 24-hour period. The down-ramping rates will be measured at the existing gage near La Grange Dam (USGS gage no. 11289650). Condition 2 provides an off-ramp for

¹⁰ Available at <https://cdec.water.ca.gov/snow/bulletin120/> by clicking on "San Joaquin River Water Year Forecast Breakdown: Latest." Last accessed: January 14, 2021.

¹¹ Available at <https://www.cnrfc.noaa.gov/ensembleProduct.php?id=NDPC1&prodID=6>. Last accessed: January 14, 2021.

higher ramping rates required by USACE's flood control guidelines (USACE, 1972), and updates thereto, to ensure safety for people and property during high-flow events.

The FERC Final EIS states that numerous studies in California have shown that ramping rates in the one- to two- inches per hour range minimize adverse effects to aquatic biota. The FERC Final EIS cites a 2004 PacifiCorp (PacifiCorp, 2004) literature-based assessment of ramping profiles in river reaches impacted by the Klamath Hydroelectric Project and recommendations in Hunter (Hunter, 1992) that support limiting reductions in river stage to one- to two- inches per hour as generally protective of juvenile anadromous salmonids. The FERC Final EIS also contains an analysis of water years 1971 – 2012 that shows an hourly stage change downstream of La Grange Dam of one-inch per hour or less was met 97 percent of the time for all proposed and recommended flow regimes (see Table 3.3.2-41, page 3-179). Condition 2 allows for the modification of ramping rates with the support of the Tuolumne River Anadromous Fish Committee and supporting technical documentation.

7.3 Rationale for Condition 3 – Temperature Management and Monitoring Plan

The Tuolumne River, including La Grange Reservoir, is listed on the Clean Water Act 303(d) list as impaired for elevated water temperatures, which adversely affects cold water beneficial uses on the Tuolumne River (State Water Board, 2017B). The Bay-Delta Plan protects the beneficial uses of the Bay-Delta and tributary watersheds, including the SJR watershed and its tributaries. As described in Section 5.2 of the certification, the Bay-Delta Plan and the SR/SJR Basin Plan designate cold-water beneficial uses that apply to the lower Tuolumne River. The Central Valley Regional Water Board evaluated temperature monitoring data to determine whether the migration and spawning cold water beneficial uses were being attained by comparing the current temperatures to the temperature criteria of salmonid species identified in the USEPA *Region 10 Guidance for Pacific Northwest State and Tribal Temperature Water Quality Standards* (USEPA, 2003). Through this public process, the Central Valley Regional Water Board determined that these temperature criteria best represent “natural receiving water temperatures” and the benchmark conditions necessary to protect fish and wildlife beneficial uses (Central Valley Regional Water Board, 2009). Monitoring data show elevated temperature conditions on the lower Tuolumne River that exceed the USEPA Region 10 guidance, which lead to its inclusion on the State Water Board's 303(d) list of impaired waterbodies for temperature in 2011.

Although the temperature criteria were developed for fish populations located in states north of California, USEPA considers the Region 10 guidance and its associated Technical Issue Papers (USEPA, 2001A; USEPA 2001B; USEPA, 2001C; USEPA, 2001D; USEPA, 2001E) the most comprehensive compilation of research related to salmonid temperature criteria available. The studies compiled in the USEPA guidance and associated technical issue papers address the full geographic extent of salmonid populations, including California. The State Water Board considered additional scientific papers and studies that have been completed on the thermal tolerance of

salmonids in California's Central Valley in the 2018 SED and as part of the rationale for Condition 3.

Elevated water temperatures can significantly reduce habitat suitability for native resident and migratory fish. On the Tuolumne River, water temperature is largely controlled by flow releases from the reservoirs, and the Districts' operations of the Projects can affect water temperatures downstream (State Water Board, 2018A).

Water temperature is a primary driver of the productivity and survival of native resident and migratory salmonids. The role of water temperature in determining suitable habitat for aquatic organisms and the drivers that determine water temperature in the Tuolumne River are extensively discussed and supported by scientific studies summarized in the 2018 SED (State Water Board, 2018A). Water temperature is crucial to aquatic organisms because it directly influences their metabolism, respiration, feeding, behavior, growth, and reproduction. Most aquatic species have an optimal temperature range for growth and reproduction, and they are also bound by upper and lower temperature limits in which they can no longer survive or successfully reproduce. Temperature interacts with other environmental conditions, for example, temperature and dissolved oxygen are intrinsically linked in the aquatic environment (i.e., as temperatures increase the biochemical demand for oxygen increases, and as temperatures increase the solubility of oxygen decreases). Elevated water temperature and depressed dissolved oxygen concentrations can significantly reduce habitat suitability for native resident and migratory fish.

Carryover storage requirements are needed to preserve cold water that can be used to provide suitable downstream temperatures for Chinook salmon and steelhead and other cold-water native fish species. Carryover storage refers to the quantity of water stored in a reservoir at the end of a season or water year (i.e., September 30). Establishing a carryover storage requirement is consistent with the Bay-Delta Plan Program of Implementation to support and protect aquatic-life beneficial uses. Where reservoir operations could result in impacts on fish and wildlife, maintaining or storing cold water in a reservoir is often referred to as a cold-water pool.

The State Water Board simulated monthly average Tuolumne River temperatures below La Grange Dam in September – December (1970 – 2003) as a function of reservoir storage (State Water Board, 2018A). This analysis is summarized in Figure 3, which shows simulated temperature in the Tuolumne River below La Grange Dam and associated storage volumes for the months of September through December. Figure 3 shows that a carryover storage target of 800,000 AF in New Don Pedro Reservoir would likely provide La Grange Dam release temperatures of less than 56°F in September through November of most years with December temperatures being lower (State Water Board, 2018A). These temperature values and time periods are consistent with providing suitable temperature conditions as defined by USEPA temperature criteria (55.4°F, 13°C) that protect returning adults during their upstream migration, holding, spawning, and egg incubation.

Examination of the historical record shows that New Don Pedro Reservoir has been observed above 800,000 AF at the end of September/beginning of October for more than 90 percent of years, after the reservoir initially filled (1970 – 1972). End of September/October storage was above 1,000,000 AF in 42 out of 48 years (~80 percent of years) and below 800,000 AF in 5 out of 48 years (~10 percent of years) during severe drought conditions such as 1976–1977, 1992, and 2014–2015 (CDEC).

Carryover storage requirements also provide the benefit of improving water delivery reliability, especially during sequential dry years and drought conditions. No reliable forecast exists that can predict hydrologic conditions for the upcoming water year. This means that reservoir operators must assume that conditions for the coming water year could range from drought to flood. For this reason, conservative reservoir operations include some degree of protection of existing and future water supplies in storage to successfully manage dry conditions.

The Bay-Delta Plan recognizes that implementing the LSJR flow objectives requires the development and implementation of minimum reservoir carryover storage levels based on analyses and scientific information summarized in the 2018 SED (State Water Board, 2018A). Maintaining adequate carryover storage is one of the most effective actions to provide suitable temperature conditions for salmonids and avoid significant adverse temperature impacts, or other impacts, on fish and wildlife. Adequate carryover storage levels allow for the consideration of fish and wildlife beneficial uses year-round while focusing the LSJR flow objectives on the season that is most important to early life stages of several fish species (i.e., salmonid egg incubation, emergence, and juvenile rearing, migration, and smoltification).

Additional actions to control water temperature have been evaluated and implemented in California rivers and streams. For example, a temperature control device was necessary to improve the ability to control downstream water temperatures in the Sacramento River (State Water Board, 1990). The North Coast Regional Water Board has implemented temperature control programs that require riparian management or other restoration measures and coordinated efforts with local entities (North Coast Regional Water Board, 2018). Other possible actions to improve downstream water temperatures include, but are limited to, adaptive implementation of Bay-Delta Plan LSJR flows, modified or additional reservoir releases, cold water bypass, and modified power supply operations.

Figure 3. 2018 SED Appendix F.1, page F.1-210. “Figure F.1.6-6a Effects of New Don Pedro Storage on New Don Pedro and La Grange Simulated Water Temperatures September – December for Baseline Conditions 1970 – 2003.”

Condition 3 requires the Districts to develop and implement a Temperature Management and Monitoring Plan that identifies carryover storage requirements and other actions needed to maintain suitable downstream temperature conditions and meet temperature targets within the Districts reasonable control. The Temperature Management and Monitoring Plan will be developed in consultation with the Tuolumne River Anadromous Fish Committee, the Tuolumne River Watershed Group, and appropriate state agencies, to ensure protection of water quality and the beneficial uses of water described in the Bay-Delta Plan and the SR/SJR Basin Plan.

Temperature targets identified in Table 3 are based on USEPA recommended temperature criteria for protection of salmonids¹² and information provided and analyzed in the 2018 SED (State Water Board, 2018A).¹³

¹² USEPA Region 10 Guidance for Pacific Northwest State and Tribal Temperature Water Quality Standards. April. USEPA 910-B-03-002. 49 pp.

¹³ Chapter 19 Analyses of Benefits to Native Fish Populations from Increased Flow between February 1 and June 30.

Temperature target timing and locations are generally consistent with CDFW and NMFS 10(j) recommendations. In addition, the targets include protections for migrating salmonids to the confluence.

Condition 3 also allows the Deputy Director to set interim carryover storage requirements if the Districts fail to identify and implement carryover storage needed to maintain suitable downstream temperature conditions and meet temperature targets within the schedule identified in the condition.

7.4 Rationale for Condition 4 – Extremely Dry Conditions

California's history of drought illustrates the importance of planning for multiple dry years or drought. It is difficult to anticipate the specific impacts of consecutive dry years or a long-term drought and identify where limited water supplies may be best used during times of shortage. Condition 4 allows the Districts to request Deputy Director approval of a Revised Operations Plan to address water shortage issues during consecutive Dry or Critically Dry water year types or drought years. This condition provides flexibility for adaptive implementation during times of extreme water shortage.

The Bay-Delta Plan includes an emergency provision, which applies if the State Water Board determines the existence of an emergency as defined in CEQA or the Governor declares an emergency under the California Emergency Services Act and the LSJR flow requirements affect or are affected by the conditions of the emergency. The Governor's power to declare an emergency is not limited to statewide emergencies but encompasses emergencies that are regional or local in nature. Under the provision, the State Water Board may approve a temporary change in the implementation of the LSJR flow objectives in a water right proceeding. With respect to drought conditions, however, most are not declared emergencies and are accommodated through the adaptive implementation methods for the LSJR flow objectives. The emergency provision cannot be used to routinely relax implementation of flow requirements but is reserved for true emergencies. The Bay-Delta Plan emergency provision includes a requirement for the State Water Board, before authorizing any temporary change, to find that measures will be taken to reasonably protect fish and wildlife beneficial uses in light of the circumstances of the emergency.

7.5 Rationale for Condition 5 – Southern Delta Salinity

One of the primary water quality concerns in the southern Delta is salinity, particularly for agricultural water users. The Bay-Delta Plan establishes a year-round water quality objective of 1.0 dS/m EC at Vernalis and in the southern Delta for the protection of agricultural beneficial uses.

Before 2018, the Bay-Delta Plan set a water quality objective at the three interior southern Delta compliance stations and Vernalis of 0.7 milliMhos per centimeter (mmhos/cm) (units of mmhos/cm are equal to units of dS/m) during the summer irrigation season and 1.0 mmhos/cm from September to March. Under their water right permits as amended by Revised Water Right Decision 1641 (State Water Board, 2000),

DWR and the United States Bureau of Reclamation (Reclamation) are responsible for meeting this salinity requirement at the three interior southern Delta compliance stations and Reclamation is responsible for meeting the requirement at Vernalis. The 2018 Bay-Delta Plan set a year round objective of 1.0 dS/m, but as part of the amendments, the State Water Board determined that salinity at Vernalis during the summer irrigation season should remain 0.7 dS/m to provide assimilative capacity for salinity in the southern Delta and ensure attainment of the 1.0 dS/m water quality objective.

Salinity control in the southern Delta is complicated due to a variety of factors. The San Joaquin River, which flows into the southern Delta, carries a heavy salt load from upstream, primarily associated with discharges from agricultural lands on the west side of the river, served with Reclamation's Central Valley Project (CVP) water. In addition, due to upstream water infrastructure development, flows in the SJR and its tributaries are lower than they were historically. Complex southern Delta circulation issues, shallow saline groundwater, the export CVP facilities, including export of water and salts from the Sacramento River to the San Joaquin Valley through the CVP facilities, movement of CVP water through DWR's State Water Project (SWP) to the San Joaquin Valley, the CVP and SWP export pumps in the Delta, and hundreds of diversions further complicate the salinity issues. Revised Water Right Decision 1641 (State Water Board, 2000) identifies that upstream diversions of water from the Stanislaus, Tuolumne, Merced, and San Joaquin Rivers collectively significantly reduced flows in the SJR and result in a substantial reduction of the assimilative capacity of the San Joaquin River and southern Delta channels ability to absorb salt loads at concentrations that support agricultural beneficial use. It is reasonable to consider the responsibility of other entities besides Reclamation and DWR for implementing the southern Delta salinity objective as more information becomes available.

The Bay-Delta Plan's LSJR flow objectives and southern Delta salinity objective are complementary. The diversion of water and associated reduction in streamflow contributes to increased salinity. Increased flows under the LSJR flow objectives provide the incidental benefit of a lower salinity irrigation water supply to flush salts early in the irrigation season, and thus provide better salinity conditions during spring germination of crops, which is generally the most salt-sensitive time. The complementary nature of both objectives provides a comprehensive means to put the state's water resources to beneficial use to the fullest extent possible.

7.6 Rationale for Condition 6 – Tuolumne River and Regional Watershed Management Coordination

Optimizing the timing of flows to meet instream flow and other requirements, while also considering other beneficial uses as long as intended benefits to fish and wildlife are not reduced, requires coordination with many parties. Such parties include the Districts, water operators, stakeholders, and agencies with expertise on the Tuolumne River and LSJR watershed in fisheries management, hydrology, operations, monitoring, and assessment. Coordination is intended to maximize the beneficial uses of the state's

waters and to assist with implementation, monitoring, and assessment of the certification conditions.

Participation in a LSJR watershed coordination group is necessary to assist with implementation of certification conditions, coordinate flows in the LSJR watershed to support native resident and migratory fish species, integrate monitoring efforts, and assess the effectiveness of certification conditions and water quality standards, including the February through June LSJR flow objectives. The Bay-Delta Plan identifies the formation of the Stanislaus, Tuolumne, and Merced Working Group (STM Working Group) as a watershed group to provide recommendations regarding multiple requirements of the Bay-Delta Plan such as: biological goals; procedures for implementing the adaptive methods described above; annual adaptive operations plans; and the San Joaquin River Monitoring and Evaluation Program, including special studies and reporting requirements. Recognizing that naming conventions may change over time, a watershed group identified by a name different than “STM Working Group” that performs the same functions and complies with the same requirements as the STM Working Group is considered functionally equivalent to the STM Working Group for the purposes of consistency with the Bay-Delta Plan’s requirements and this condition.

7.7 Rationale for Condition 7 – Annual Review Meeting

Monitoring plans and studies required by this certification will help resource agencies and State Water Board staff evaluate the benefits and impacts associated with implementation of new license conditions on hydrological, biological, and geomorphological resources affected by the Projects throughout the term of the license(s) and any extensions. Annual consultation meetings bring the Districts, resource agencies, and interested stakeholders together to discuss monitoring results and resource trends, and develop adaptive management actions, if necessary, to protect water quality and beneficial uses. Condition 7 requires the Districts to conduct annual consultation meetings with resource agencies and other interested stakeholders to review monitoring reports and discuss ongoing and forecasted operations, including revisions or modifications to monitoring and/or operations that may be needed to protect water quality and beneficial uses.

7.8 Rationale for Condition 8 – Water Quality Monitoring and Management

The Tuolumne River, including La Grange Reservoir, is listed on the Clean Water Act 303(d) list as impaired for elevated water temperatures, mercury, chlorpyrifos, diazinon, Group A pesticides, and toxicity. New Don Pedro Reservoir is listed on the 303(d) list as being impaired for mercury. In addition, the FERC Final EIS identified periods and locations where dissolved oxygen concentrations may exceed the dissolved oxygen water quality objectives, and the FERC Final EIS identified that the use of pesticides for Projects’ operations and maintenance has the potential to cause significant adverse effects on amphibians.

Dissolved oxygen, like water temperature, is a primary driver of the productivity and survival of native resident and migratory salmonids. As discussed in the rationale for

Condition 3, elevated water temperature and depressed dissolved oxygen concentrations can significantly reduce habitat suitability for native resident and migratory fish. On the Tuolumne River, water temperature is largely controlled by flow releases from the reservoirs, which can also affect dissolved oxygen concentrations downstream. Clear relationships have been demonstrated between reduced flow and depressed dissolved oxygen concentrations in other Central Valley waterbodies (Central Valley Regional Water Board, 2005).

As noted earlier in the certification, New Don Pedro Reservoir and the lower Tuolumne River, including La Grange Reservoir, have been identified as being impaired by mercury. Mercury is a potent neurotoxicant that is toxic to humans, wildlife, and fish, and mercury pollution negatively impacts the beneficial uses of many waters of the state. Fish collected from the Tuolumne River and New Don Pedro Reservoir have fish tissue mercury concentrations that exceed safety thresholds to protect fish health, as well as exceed water quality objectives for the protection of human and wildlife consumers of fish. Although mercury occurs naturally in the environment, the Projects' operations exacerbate fish mercury concentrations. The proposed Statewide Mercury Control Program for Reservoirs has identified multiple mechanisms for how reservoir operations can adversely influence mercury bioaccumulation. For example, Projects' operations decrease flow and increase water temperatures which increase methylmercury production and support non-native warm water fish, reduce primary and secondary productivity, reduce inputs from ocean-derived nutrients, and change water chemistry (State Water Board, 2017C). On May 2, 2017, the State Water Board adopted Resolution No. 2017-0027, which approved *Part 2 of the Water Quality Control Plan for Inland Surface Waters, Enclosed Bays, and Estuaries of California—Tribal and Subsistence Fishing Beneficial Uses and Mercury Provisions* (Provisions). The Provisions provide a consistent regulatory approach throughout the state by setting mercury water quality objectives to protect the beneficial uses associated with the consumption of fish by both people and wildlife.

Condition 8 requires the Districts to develop and implement a Dissolved Oxygen Monitoring and Management Plan, Mercury Monitoring and Management Plan, and Other Constituents Monitoring and Management Plan in consultation with the Tuolumne River Anadromous Fish Committee, the Tuolumne River Watershed Group, and appropriate state agencies, to protect water quality and the beneficial uses of water described in the Bay-Delta Plan and the SR/SJR Basin Plan. Information gathered from implementation of the plans required by Condition 8 will be used to evaluate the effects of actions related to the Projects on water quality, and to identify, assess, and adaptively manage potential adverse water quality impacts.

7.9 Rationale for Condition 9 – Large Woody Material Management

Large woody material contributes to productive aquatic ecosystems and is an important component of stream channel maintenance and the formation of complex aquatic habitat both along stream margins and in active river channels. Large woody material provides cover and holding habitat for native resident and migratory fish and organic

matter that supports the aquatic food web. Large woody material in tributaries of the upper watersheds is carried progressively downstream during high flow events. Prior to the construction of the Projects' dams, high flow events would distribute large woody material from the upper watersheds throughout downstream Projects' reaches. Presently, the Projects prevent most incoming large woody material from entering the Tuolumne River downstream of New Don Pedro Dam. The large woody material is instead impounded by the Projects' reservoirs. For this reason, large woody material of the size capable of influencing channel morphology is largely absent downstream of New Don Pedro Dam and the lower Tuolumne River.

Condition 9 requires the Districts to develop and implement a Large Woody Material Management Plan (LWMMP) in consultation with BLM, USFWS, NMFS, CDFW, and State Water Board staff. Condition 9 is based on recommendations made by CDFW (CDFW, 2018), NMFS (NMFS, 2018), and the FERC Final EIS regarding the need to develop a large woody material management plan. The condition does not specify the specific amounts of large woody material to be placed in the watershed but allows for development of that amount as part of the LWMMP development consultation process. The fisheries agencies and FERC identify varying amounts of large woody material and locations for installing large woody material suggesting the need for additional consultation or analysis to determine the appropriate amount of large woody material and identify specific locations for installation. Accordingly, Condition 9 requires development of a LWMMP that allows for consultation with resource agencies consistent with the FERC staff recommendation. The LWMMP will specify large woody material augmentation procedures and associated monitoring to assess the effectiveness of its implementation in transporting and distributing large woody material throughout the lower Tuolumne River below New Don Pedro Dam.

7.10 Rationale for Condition 10 – Erosion and Sediment Management

Surface erosion and increased overland flow associated with Projects-related construction and maintenance activities could release fine sediment into the Tuolumne River and tributaries. Additionally, the Projects reduce the frequency of seasonal high flow events in river reaches below the Projects' dams that facilitate the transport of fine sediment. Accumulation of fine sediment can degrade water quality and adversely affect fish spawning and incubation success.

To manage existing erosion and minimize future erosion and sediment delivery to Projects stream reaches and reservoirs, Condition 10 requires the Districts to develop and implement an Erosion and Sediment Management Plan (Erosion and Sediment Plan) in consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff. The Erosion and Sediment Plan will describe methods to inventory, assess, remediate, and monitor erosion sites, and outline site-specific temporary erosion control measures to be implemented during construction and maintenance activities.

7.11 Rationale for Condition 11 – Gravel Augmentation

Relicensing studies identified the need for gravel augmentation in the Tuolumne River below La Grange Dam. The Projects' reservoirs trap gravel originating from upstream sources. This limits available gravel that supports and enhances aquatic habitat in the Tuolumne River. McBain and Trush (2004) estimates that annually 18,800 cubic yards of coarse sediment is trapped behind the Projects' reservoirs and unavailable to supply downstream habitats. This estimate is comparable to the Districts' estimates of annual total and coarse sediment yields to the New Don Pedro Reservoir of 288,000 cubic yards and 28,800 cubic yards, respectively, based on reservoir storage reductions from 1923 to 2011 (Districts, 2013B). The Tuolumne River, downstream of La Grange Dam, exhibits degraded habitat due to Projects' operations. This degraded habitat is characterized by a coarsening of the bed surface and reduction in the frequency and quantity of gravel deposits. This coarsening of the bed surface reduces the habitat suitability of spawning reaches, resulting in a reduction in the survival of fish eggs. Good quality coarse gravel provides substrate for growth of algae and invertebrates, which are important for the aquatic food web.

Condition 11 requires the Districts to develop and implement a Gravel Augmentation Plan in consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff. The Gravel Augmentation Plan will require the addition of gravel to the Tuolumne River below La Grange Dam, as well as gravel mobilization monitoring. Condition 11 also requires the Districts to annually augment gravel to restore and maintain adequate spawning gravels. The total volume of gravel material required to augment is equivalent to the estimated amount of coarse sediment trapped by the reservoirs over the anticipated life of the license(s) (i.e., 40 years). The development and implementation of the Gravel Augmentation Plan will help address the previous and ongoing trapping of sediment by strategically replacing coarse sediment in identified areas of Project-affected stream reaches. Such gravel augmentation will restore the downstream sediment transport process that has been inhibited since construction of Don Pedro Dam in 1923 and reduce habitat for non-native predators (i.e., filling special run pools). CDFW recommended sourcing aggregate material from areas along the banks of the Tuolumne River where future restoration projects (Condition 12) could be located. As aggregate material is harvested along the streambanks for gravel augmentation activities, new floodplain areas may be created.

7.12 Rationale for Condition 12 – Riparian, Spawning, and Floodplain Management

The Projects have altered the hydrology and natural geomorphic processes along the Tuolumne River corridor. The Projects' dams block sediment recruitment from the upstream basin and have changed the high flow frequencies, caused channel incision, altered peak flows, decreased winter flows, increased summer flows, and changed ramp down rates. The depletion of sediment loads reduces the formation of sediment benches, which affects riparian colonization and succession. Natural floodplain inundation has been greatly reduced in the Tuolumne River corridor.

Floodplain habitats in the Central Valley have been found to have a positive effect on the growth of juvenile native resident and migratory fish, and larger and faster growth has been associated with increased survivorship in the river and to adulthood. The higher growth rates are largely attributed to greater productivity and availability of prey in the floodplains. Riparian habitats also provide allochthonous food sources and shading, which provides temperature benefits and cover to help protect juvenile native resident and migratory fish from predators. Floodplain habitats provide food and refuge from predatory species.

Condition 12 requires the development and implementation of a Riparian, Spawning, and Floodplain Restoration Plan, lowering of existing floodplain elevation to activate the floodplain at lower flow levels, and construction of a minimum of 150 acres of 100 percent suitable floodplain from Years 2 – 11 after license issuance and an additional 15 acres of 100 percent suitable floodplain in the years thereafter unless the Districts can demonstrate to the Deputy Director that habitat and flows are meeting the numeric and narrative goals and objectives for the LSJR.

Increased flows and habitat restoration are needed on the Tuolumne River and in the larger Bay-Delta watershed to achieve the Bay-Delta Plan LSJR narrative and salmon protection objectives. However, the exact combination of floodplain restoration and increased flow needed to achieve these goals is unknown. Accordingly, Condition 12 requires a lower minimum floodplain restoration amount than CDFW's recommendation of 810 acres of 100 percent suitable floodplain creation in the first 10 years of license issuance (CDFW, 2018). The CDFW recommendation for 810 acres of constructed floodplain is based on an Emigrating Salmonid Habitat Estimation (ESHE) analysis (Cain, 2019) and an evaluation of pre-Projects floodplain area, duration, and frequency on the Tuolumne River (USFWS, 2017 as summarized in CDFW, 2018). The analysis identifies that on average 77,640 acre-days of floodplain habitat would need to be produced to mitigate for the Projects' negative impacts to floodplain inundation. Scientific analyses relied on in the CDFW recommendation provide credible estimates of the amount of floodplain needed to rebuild the Tuolumne River salmonid population.

The lower minimum floodplain construction requirement in Condition 12 allows for adaptive management and increased knowledge from monitoring and assessment of the salmon population response to increased flows and habitat restoration to inform the need for additional floodplain restoration. Construction of 150 acres of 100 percent suitable floodplain habitat is a reasonable starting point that allows for evaluation of floodplain restoration projects (in progress and upon completion) combined with increased flows required by Condition 1 to determine if additional floodplain restoration is needed on the Tuolumne River to achieve the Bay-Delta Plan LSJR narrative objective, salmon protection objective, and approved biological goals for the Tuolumne River.

The need for the development and enhancement of riparian and floodplain habitats is consistent with the Bay-Delta Plan Program of Implementation to support and protect

aquatic-life beneficial uses. The inclusion of the development and enhancement of riparian and floodplain habitats will maximize the benefits to native species from the instream flow requirements (Condition 1). Additionally, riparian and floodplain improvement efforts should be coordinated with related efforts, such as gravel augmentation (Condition 11) and large woody material placement (Condition 9).

7.13 Rationale for Condition 13 – Predator Suppression Plan

Predation has been identified as one of the multiple stressors that adversely impacts the survival of juvenile native resident and migratory salmonids. Projects' operations contribute to increased predation pressure on juvenile native resident and migratory fish. For example, increased water temperatures increase the presence of warm-water predatory species, and reduced water velocities increase the presence of submerged aquatic vegetation, which supports predatory species. In addition, other physical conditions in the river likely increase predation exposure to native resident and migratory fish (e.g., gravel pits, diversion dams, and lack of cover). There is large uncertainty in the magnitude of the impact of predation on native salmonid populations, especially the role of predation as a proximate or ultimate cause of mortality to native salmonids. The implementation of non-flow actions such as predator suppression to increase native salmonid survival is necessary to bolster native salmonid populations and is consistent with the Bay-Delta Plan.

7.14 Rationale for Condition 14 – Aquatic Invasive Species Management

Recreational boating opportunities at New Don Pedro Reservoir and along the Tuolumne River have the potential to cause the proliferation of aquatic invasive species. Visitors from different areas provide the potential for a large number of aquatic invasive species to colonize Projects-affected waters and potentially impact beneficial uses. If not properly managed, the use of contact recreational equipment can introduce aquatic invasive species that can deleteriously affect water quality, outcompete native fauna and flora, and degrade Projects' infrastructure.

Aquatic invasive species have the potential to cause adverse impacts to native species in the river. Floating and submerged aquatic vegetation can degrade water quality (e.g., depressed dissolved oxygen) and support non-native predators. In addition to the increase of predation pressure by non-native species, invasive species can compete against native species for limited resources.

Condition 14 requires the Districts to develop and implement a Projects-specific aquatic invasive species plan that includes a public education program for the Projects' recreation facilities. The plan also must include monitoring for early detection of aquatic invasive species vectors to minimize the risk of aquatic invasive species becoming established in Projects waters.

7.15 Rationale for Condition 15 – Recreation Facilities Management

Operations and maintenance activities associated with the Projects' recreation facilities have the potential to impact water quality. Construction of new recreation facilities,

modification of existing recreation facilities, or other ground-disturbing activities could increase soil erosion and fine sediment delivery to Projects' waterways. Fine sediment can adversely affect water quality and associated aquatic habitat by increasing turbidity and total suspended solids. Accumulation of fine sediment in aquatic substrate can adversely affect fish spawning success and limit habitat suitability for many aquatic invertebrates.

Condition 15 requires the Districts to develop and implement a Recreation Facilities Management Plan in consultation with BLM and State Water Board staff. The Recreation Facilities Management Plan will include: (1) measures that would be implemented to protect water quality; (2) recreation activity surveys; and (3) schedules to implement the proposed improvements and new recreation facilities.

7.16 Rationale for Condition 16 – Road Management

Operations and maintenance of Projects' roads have the potential to impact water quality. The potential for water quality impacts depends on factors such as local topography, roadbed material, and drainage characteristics. To avoid and minimize these potential water quality impacts, Condition 16 requires the Districts to develop and implement a Road Management Plan. Condition 16 requirements will help ensure operation and maintenance of the Projects' roads do not cause discharges to surface waters that violate water quality standards.

7.17 Rationale for Condition 17 – Biological Resources Management

Continued operation of the Projects has the potential to impact fish populations, special-status amphibians, and benthic macroinvertebrate (BMI) assemblages in Projects-affected stream reaches. Biological measurements are the most direct indicator of the health and the well-being of fish and wildlife populations. Biological monitoring can detect changes, identify additional information needs, and guide adaptive management of Projects operations. Biological metrics can be used to assess the long-term impact from physical and chemical degradations (e.g., bioassessments). Corresponding biological data and environmental information (e.g., temperature, acres of floodplain inundation, flow pulse timing) can be used to evaluate the impact of management actions on fish and wildlife health. The Bay-Delta Plan Program of Implementation indicates that biological goals (e.g., abundance, spatial extent, survival, and temporal presence) will be used as part of adaptive management and as a way to measure the effectiveness of the program.

Condition 17 requires the Districts to develop and implement a Biological Monitoring and Management Plan in consultation with the Tuolumne River Anadromous Fish Committee, Tuolumne River Watershed Group, and the Lower San Joaquin River Watershed Group. The Biological Monitoring and Management Plan will outline monitoring and adaptive management for anadromous fish, BMI, and amphibians in the Tuolumne River.

7.18 Rationale for Condition 18 – Comprehensive Monitoring, Assessment, Reporting, and Special Studies

A comprehensive monitoring, assessment, reporting, and special studies program is necessary to determine compliance with water quality standards, including the flow and water quality requirements contained in this certification. Monitoring and special studies are also needed: to assess the effectiveness of flow and water quality requirements in this certification; to inform adaptive implementation and adaptive management decisions such as annual operations plans and the timing of pulse flows; to investigate the technical factors involved in water quality control; and to inform future amendments to water quality control plans.

The Bay-Delta Plan Program of Implementation for the LSJR flow objectives requires formation of the San Joaquin River Monitoring and Evaluation Program (SJRMEP), which includes comprehensive monitoring, evaluation, special studies, and reporting associated with implementation of the Bay-Delta Plan flow and water quality objectives. Development and implementation of the Tuolumne River Monitoring Plan may be used as the Tuolumne River portion of the SJRMEP. Fisheries and water quality monitoring along the migratory pathway of Tuolumne River salmonids is reasonable because Projects reduce the volume and pattern of freshwater flows which adversely affects salmon survival along the entire saltwater-to-freshwater migratory pathway of Tuolumne River salmon (State Water Board, 2018A; State Water Board 2017E). The monitoring and assessment required in Condition 18 is consistent with multiple other statewide efforts to improve the quality of and access to monitoring data for the regular assessment of the status of natural resources. For example, the State Water Board maintains a public information webpage that includes information on water quality monitoring, assessment, research, standards, regulation, enforcement, and other pertinent matters. The California Water Quality Monitoring Council (Monitoring Council) develops specific recommendations to improve the coordination and cost-effectiveness of water quality and ecosystem monitoring and assessment, enhance the integration of monitoring data across departments and agencies, and increase public accessibility to monitoring data and assessment information. The 2016 Open and Transparent Water Data Act calls for DWR, in consultation with the Monitoring Council, State Water Board, and CDFW, to create, operate, and maintain a statewide integrated water data platform, develop protocols for data sharing, documentation, quality control, public access, and promotion of open-source platforms and decision support tools related to water data (e.g., groundwater, water quality, fisheries, water project operations).

Comprehensive monitoring is needed to address individual and cumulative impacts of the Projects to fish and wildlife and other beneficial uses. Development and implementation of the comprehensive monitoring, assessment, reporting, and special studies program should be a collaborative effort with the State Water Board and watershed partners, including the Districts. The Tuolumne River is one tributary in the Bay-Delta Watershed that supports native resident and migratory fish that migrate through the Bay-Delta. Accordingly, the Tuolumne River Monitoring Plan should be integrated and coordinated with new and ongoing monitoring programs in the LSJR

watershed and Bay-Delta such as CDFW fish monitoring efforts, Interagency Ecological Program, FERC licensing proceedings, San Joaquin River Restoration Program, and regional water quality monitoring programs. This level of integration is necessary to coordinate flow actions among the salmon-bearing LSJR tributaries, evaluate progress toward achieving biological goals and protection of fish and wildlife beneficial uses, evaluate and prioritize aquatic habitat stressors, and assess the effectiveness of LSJR flow objectives on a regional scale.

The Bay-Delta Plan requires annual and comprehensive (multi-year) reporting of monitoring data. Annual reporting is required to inform the next year's operations and other activities to protect fish and wildlife. In addition to annual reporting, every three to five years, a comprehensive report is required to review the progress toward meeting the biological goals and identify any recommended changes to the implementation of the LSJR flow objectives. The State Water Board will hold public meetings to consider the comprehensive report, technical information, and conclusions or recommendations developed through a peer review process. This information will be used to inform potential adaptive changes to the implementation of the LSJR flow objectives and, as appropriate, future potential changes to the Bay-Delta Plan.

7.19 Rationale for Condition 19 – Construction and Maintenance

Protection of the beneficial uses identified in the SR/SJR Basin Plan requires effluent limitations and other limitations on pollutant discharges from point and nonpoint sources to the Tuolumne River and its tributaries. The Projects may replace or rehabilitate existing recreation facilities and conduct other activities that may require construction or maintenance through the term of the FERC license. Erosion from Projects-related construction and maintenance activities has the potential to result in discharges that violate water quality standards. Condition 19 requires the Districts to comply with the terms of the Construction General Permit, when applicable, and to develop and implement appropriate water quality monitoring and protection plans.

7.20 Rationale for Condition 20 – Reintroduction of Anadromous Fish

The Projects' facilities and other structures limit the upstream extent of habitat that anadromous fish can access. Water quality conditions (e.g., temperature and contaminant concentrations) are typically better in the river at upstream locations compared to downstream locations. La Grange Dam (RM 52.0) represents the upstream barrier to native resident and migratory fish in the lower Tuolumne River. As outlined in the FERC Final EIS, NMFS reserves its authority to prescribe the construction, operation, and maintenance of fishways at the Projects, including measures to determine, ensure, or improve the effectiveness of such prescribed fishways, pursuant to section 18 of the Federal Power Act. The FERC Final EIS estimated that fish passage above the La Grange and New Don Pedro dams may allow access to as much as 18.17 miles of accessible and 31.26 miles of potentially accessible anadromous fish habitat in the upper Tuolumne River Basin. Condition 20 reserves the State Water Board's authority to modify or add conditions to this certification if it is reasonably foreseeable that state- or federally-listed anadromous fish

species will be reintroduced above the Projects' facilities, to ensure adequate protection of beneficial uses identified in the SR/SJR Basin Plan and Bay-Delta Plan and compliance with water quality standards and appropriate requirements of state law.

7.21 Rationale for Conditions 21 through 45

In order to ensure that the Projects operate to meet water quality standards as anticipated, ensure compliance with other relevant state and federal laws, and ensure that the Projects will continue to meet state water quality standards and other appropriate requirements of state law over their lifetime, this certification imposes conditions regarding monitoring, enforcement, and potential future revisions. Additionally, California Code of Regulations, title 23, section 3860 requires imposition of certain mandatory conditions for all certifications, which are included in this certification.

8.0 Conclusion

The State Water Board finds that, with the conditions and limitations imposed under this certification, the Projects will comply with applicable state water quality standards and other appropriate requirements of state law.

9.0 Water Quality Certification Conditions

ACCORDINGLY, BASED ON ITS INDEPENDENT REVIEW OF THE RECORD, THE STATE WATER RESOURCES CONTROL BOARD CERTIFIES THAT OPERATION OF THE DON PEDRO HYDROELECTRIC PROJECT AND LA GRANGE HYDROELECTRIC PROJECT (collectively Projects) will comply with sections 301, 302, 303, 306, and 307 of the Clean Water Act, and with applicable provisions of State law under the following terms and conditions.

CONDITION 1. Instream Flows

Consistent with Condition 23, the State Water Resources Control Board (State Water Board) may re-evaluate and modify the requirements in Condition 1.A through 1.G to allow a voluntary agreement approved by the State Water Board to be used as an alternative means of meeting state water quality standards or other appropriate requirements of state law. An approved voluntary agreement may be used to meet flows in the *Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta Estuary* (Bay-Delta Plan) and other requirements, and any amendments thereto. If the Bay-Delta Plan is amended in the future to allow flows other than the current Lower San Joaquin River (LSJR) flow objectives, or to allow implementation of a voluntary agreement approved by the State Water Board, the flows required pursuant to Condition 1.B through 1.D may be re-evaluated and updated, if appropriate, through an amendment to this certification. Requirements for coordination with watershed and technical groups such as the Tuolumne River Anadromous Fish Committee, Tuolumne River Watershed Group, and/or Lower San Joaquin River Watershed Group (Condition 6) may be modified consistent with the governance structure established by an approved voluntary agreement. Similarly, annual and dry year reporting requirements in Conditions 1.F and 1.G may be modified or met through submittal of plans or reports to the State Water Board pursuant to the terms of an approved voluntary agreement.

Condition 1 is a suite of instream flow-related requirements that includes Federal Energy Regulatory Commission (FERC) staff recommendations, flows to protect recreational use, and flow requirements to meet state water quality standards and other appropriate requirements of state law. As described in Conditions 1.B through 1.E, base flow, pulse flow, and Bay-Delta Plan flow requirements apply at different locations including River Mile (RM) 51.7 just below La Grange Dam, Gear Road near RM 25, Modesto at RM 16, and on the Lower San Joaquin River at Vernalis.

1.A Water Year Types

The minimum flow requirements that depend on water year type must use the water year classification system for the San Joaquin Basin, referred to as the San Joaquin Valley 60-20-20 Water Supply Index (Index) established in State Water Board Revised Water Right Decision 1641 (State Water Board, 2000) and the California Department of Water Resources (DWR) April 1 San Joaquin Valley unimpaired runoff forecast. Turlock Irrigation District (TID) and Modesto Irrigation District (MID) (collectively, Districts or Licensees) shall identify flow gages and equations used to estimate

unimpaired inflow values for the determination of the Tuolumne River portion of the San Joaquin Valley 60-20-20 Index and specify methods for calculating inflow (i.e., daily and monthly unimpaired flow) to the State Water Board's Deputy Director for the Division of Water Rights (Deputy Director) as required in Condition 1.E and 1.F. The San Joaquin Valley 60-20-20 Index is calculated, in units of thousand acre-feet (TAF), using the monthly sum of unregulated runoff (i.e., unimpaired flow) into New Melones Reservoir (Stanislaus River), New Don Pedro Reservoir (Tuolumne River), Exchequer Reservoir (Merced River), and Millerton Lake (San Joaquin River) and the prior year's water year index volume as shown in the following equation.

$$\text{SJV 60-20-20 Index (TAF)} = 60\%(\text{sum current year April through July unimpaired runoff}) + 20\%(\text{sum current year March through October unimpaired runoff}) + 20\%(\text{the minimum between prior year index volume or 4,500 TAF}).$$

The San Joaquin Valley 60-20-20 Index includes five-water year classifications: Wet (W), Above Normal (AN), Below Normal (BN), Dry (D), and Critically Dry (C), which are defined by the following numeric breakpoints.

- Wet: Index \geq 3,800 TAF
- Above Normal: Index $>$ 3,100 TAF and $<$ 3,800 TAF
- Below Normal: Index $>$ 2,500 TAF and \leq 3,100 TAF
- Dry: Index $>$ 2,100 TAF and \leq 2,500 TAF
- Critically Dry: Index \leq 2,100 TAF

Preliminary water year classifications will be determined by DWR's Bulletin 120¹⁴, publications in February, March, and April and will apply from the 15th day of the month through the 14th day of the next month (i.e., February 15 – March 14, March 15 to April 14, and April 15 to May 14, respectively). For the preliminary Index calculations, the 75 percent exceedance forecast, from the corresponding monthly issue of DWR's Bulletin 120 shall be used for the current water year's April through July unregulated runoff and observed or expected values shall be used for the current water year's October through March unregulated runoff. The final water year classification shall be determined by DWR in May and shall apply from May 15 through February 14 of the following water year, unless the water year classification is updated in October with the DWR Bulletin 120 final water year classification. For the May Index calculation, a 75 percent exceedance forecast, from the May issue of DWR's Bulletin 120, shall be used for the current water year's April through July unregulated runoff and observed values shall be used for the current water year's October through March unregulated

¹⁴ Bulletin 120 is a publication issued four times a year, in the second week of February, March, April, and May by DWR. It contains forecasts of the volume of seasonal runoff from California's major watersheds, and summaries of precipitation, snowpack, reservoir storage, and runoff in various regions of California.

runoff. Within five days of each water year type determination, the Licensees shall provide written notice of the determination to State Water Board staff.

1.B Minimum Instream Flows Below La Grange Dam and Below One or More Potential Points of Diversion or Rediversion

Below La Grange Dam

No later than three months following license issuance, the Licensees shall maintain minimum instream flows specified in Table 1 immediately below La Grange Dam (RM 51.7), as measured at United States Geological Survey (USGS) gage no. 11289650 for Tuolumne River below La Grange Dam near La Grange, California. Minimum flow requirements in Table 1 are defined based on water year types described in Condition 1.A.

Table 1. Minimum Instream Flow Requirements downstream of La Grange Dam, River Mile 51.7 (cubic feet per second)

Time Period	Wet	Above Normal	Below Normal	Dry	Critical
January 1 – 31	225	225	225	200	200
February 1 – 28/29	225	225	225	200	175
March 1 – April 15	250	250	250	225	200
April 16 – May 15	275	275	275	250	200
May 16 – 31	300	300	300	275	225
June 1 – 30	200	200	200	200	200
July 1 – October 15	350	350	350	300	300
October 16 – December 31	275	275	275	225	200

Below Potential New Point (or Points) of Diversion or Rediversion

If the Licensees install and operate one or more infiltration galleries as a new point or points of diversion or rediversion at or near RM 25.9 on the lower Tuolumne River, including through TID’s change petition to add an infiltration gallery as a new point of rediversion near RM 25.9, the Licensees are required to operate the Projects to meet the minimum instream flows as described in Table 2 at a new stream gage to be located downstream of any new point or points of diversion or rediversion. Any necessary approvals, including any approvals by the State Water Board, must be obtained before the point or points of diversion or rediversion can be operated. The Licensees shall also operate the Projects to be consistent with the minimum instream flows in Table 1. The compliance point should directly measure streamflow in the Tuolumne River downstream of the new point or points of diversion or rediversion. Condition 1.E describes gage requirements.

Minimum flow requirements in Tables 1 and 2 are defined based on water year types described in Condition 1.A.

Table 2. Minimum Instream Flow Requirements Downstream of Potential New Point or Points of Diversion or Rediversion near River Mile 25.9 (cubic feet per second)

Time Period	Wet	Above Normal	Below Normal	Dry	Critical
January 1 – 31	225	225	225	200	200
February 1 – 28/29	225	225	225	200	175
March 1 – April 15	250	250	250	225	200
April 16 – May 15	275	275	275	250	200
May 16 – 31	300	300	300	275	225
June 1 – 30	100	100	100	75	75
July 1 – October 15	200	200	200	200	200
October 16 – December 31	275	275	275	225	200

1.C Pulse Flows

No later than three months following license issuance, the Licensees shall release pulse flows as specified in this condition. Pulse flows will be measured at the two compliance points identified here and in Condition 1.E and subject to the requirements of this certification: 1) La Grange, near RM 51.7 (at USGS gage no. 11289650 for Tuolumne River below La Grange Dam near La Grange, California); and 2) a new gage downstream of the proposed point or points of diversion or rediversion at TID’s infiltration gallery near RM 25.9, if the change is approved by the State Water Board’s Division of Water Rights or otherwise installed and operated. Both fall and spring pulse flow volumes are expected to be measured at the same compliance point.

- Fall Pulse Flow: The Licensees shall provide a fall pulse flow during the October 1 through November 30 time period until a total volume of 20,000 acre-feet (AF) is released in Wet and Above Normal years, 15,000 AF in Below Normal and Dry years, and 10,000 AF in Critically Dry years. The fall pulse volume is in addition to the volume of flows set forth in Table 1 and Table 2 for the same period. The timing, magnitude, and duration of the fall pulse flow shall be determined in consultation with the Tuolumne River Anadromous Fish Committee and the Lower San Joaquin River Watershed Group (Condition 6).
- Spring Pulse Flows: If implementing the spring pulse flows at the applicable compliance location (Condition 1.E) would result in a volume of water greater than the volume of water needed to meet the Bay-Delta Plan flow requirements at the applicable compliance location (Condition 1.E), the Licensees may modify the applicable spring pulse flow volume of water to ensure the volume is no greater than that required under the 2018 Bay-Delta Plan, with approval of the Executive Director of the State Water Board following consultation with Tuolumne River Anadromous Fish Committee and the Lower San Joaquin River Watershed

Group (Condition 6). In all instances the minimum instream flows identified in Tables 1 and 2 (Condition 1.B) shall be met.

Spring Floodplain Pulse Flow: During the time period of February 16 through May 31, the Licensees shall provide a floodplain pulse flow of 109,091 AF during Wet and Above Normal water years; 98,182 AF during Below Normal water years; 76,364 AF during Dry water years; and 49,091 AF during Critically Dry water years. Dry year off-ramps shall apply in Below Normal, Dry, or Critically Dry years that occur in a sequence that starts with a Dry or Critically Dry water year and contains no Wet or Above Normal water years. No floodplain pulse shall be required for Dry and Critical water years and the pulse flow shall be reduced to 76,364 AF for Below Normal water years. The floodplain pulse flow volumes shall be based on the preliminary water year type (Condition 1.A) in effect at the time the pulse flow is initiated. If the water year type as determined in the May issue of Bulletin 120 changes from the preliminary water year type initially used to define the pulse flow volume, the Licensees shall consult with the Tuolumne River Anadromous Fish Committee and the Lower San Joaquin River Watershed Group to determine how to adjust the pulse flow requirement. The floodplain pulse flow volume is inclusive of the volume of flows set forth in Table 1 and Table 2 for the same period. The timing, magnitude, and duration of the outmigration pulse flow releases shall be determined in consultation with the Tuolumne River Anadromous Fish Committee and the Lower San Joaquin River Watershed Group (Condition 6).

Spring Outmigration Pulse Flow: The Licensees shall provide an outmigration pulse flow of 150,000 AF during Wet and Above Normal water years; 100,000 AF during Below Normal water years; 75,000 AF during the first Dry water year in a sequence of Dry and Critically Dry water years; and 35,000 AF during the first Critically Dry water year in a sequence of Dry and Critically Dry water years, during the time period of February 16 through May 31. For the second or subsequent Dry and/or Critically Dry water years in a sequence of Dry and Critically Dry water years, dry year off-ramps will take effect requiring 45,000 AF during Dry water years and 11,000 AF during Critically Dry water years. The outmigration pulse flow volumes shall be based on the preliminary water year type (Condition 1.A) in effect at the time the pulse flow is initiated. If the water year type as determined in the May issue of Bulletin 120 changes from the preliminary water year type initially used to define the pulse flow volume, the Licensees shall consult with the Tuolumne River Anadromous Fish Committee to determine how to adjust the pulse flow requirement. The outmigration pulse flow volume is in addition to the volume of flows set forth in Table 1 and Table 2 for the same period. The timing, magnitude, and duration of the outmigration pulse flow releases shall be determined in consultation with the Tuolumne River Anadromous Fish Committee and the Lower San Joaquin River Watershed Group (Condition 6).

1.D Bay-Delta Plan Flow Objectives

No later than six months following license issuance, the Licensees shall operate the Project in a manner consistent with the Bay-Delta Plan and any amendments thereto. This includes achieving the LSJR narrative and numeric water quality objectives established in the Bay-Delta Plan, Table 3, Water Quality Objectives for Fish and Wildlife Beneficial Uses, consistent with measures in the Bay-Delta Plan's program of implementation, including provisions for adaptive implementation. Implementation of the Bay-Delta Plan LSJR flow objectives, including through adaptive implementation, may result in flows that achieve minimum instream flows and pulse flows set forth in Conditions 1.B and 1.C subject to the criteria and approval process set forth in this certification and the Bay-Delta Plan's program of implementation. Adaptive implementation is encouraged as a feature of the program of implementation because it allows for adjustment of the required percentage of unimpaired flow in specified ways to improve the functions of those flows and better achieve the water quality objectives in response to changing information and conditions. In addition, subject to acceptance by the State Water Board, the Bay-Delta Plan expressly allows the use of a voluntary agreement as a means of implementing the LSJR flow objectives. If parties submit voluntary agreements that do not meet the Bay-Delta Plan's requirements, the State Water Board may consider approval of the agreements after conducting any necessary technical and environmental analyses and complying with applicable laws, including complying with appropriate procedures to amend the Bay-Delta Plan as necessary.

The Licensees shall ensure that flows from the Tuolumne River, including flows bypassed, released, or otherwise provided by the Licensees and any other available flows, meet the LSJR flow objectives for the Tuolumne River and contribute to the flow objective at Vernalis.

This condition is not intended to relieve any other water diverter of applicable requirements, or to preclude the State Water Board from setting additional requirements for other diversions to contribute to the achievement of the LSJR flow objectives. If the Licensees are aware of any water diverter with a junior priority diverting or threatening to divert significant quantities of water at a time when the Licensees are required to bypass or release water to meet the LSJR flow objectives, the Licensees shall report that diversion or threatened diversion to the State Water Board, which will consider appropriate action.

Flow requirements from Condition 1.B, 1.C, and 1.D are consolidated into Attachment B – Consolidated Instream Flow Requirements, for convenience and illustrative purposes.

1.E Compliance Methods

No later than one year after license issuance, the Licensees shall submit a compliance methods and monitoring plan for the flow requirements in Conditions 1.B, 1.C, and 1.D to the Deputy Director for consideration of approval. The Deputy Director may require modifications as part of any approval. Compliance methods for Conditions 1.B, 1.C,

and 1.D shall be developed in consultation with the Tuolumne River Watershed Group and the Lower San Joaquin River Watershed Group (Condition 6).

Flows shall be measured in two ways: (1) as an instantaneous flow; and (2) as the 24-hour average of the flow (mean daily flow). The instantaneous flow is the value used to construct the mean daily flow value and shall be measured in 15-minute or more frequent increments. Each instantaneous flow measurement shall be equal to or greater than 90 percent of the flow value designated in Condition 1. The mean daily flow is the average of the incremental readings of instantaneous flow from midnight (12:00 AM) of one day to midnight (12:00 AM) of the next day. The mean daily flow shall be equal to or greater than the flow value designated in Condition 1. The Licensees shall record instantaneous (usually every 15-minutes) flow observations at all gages identified in this certification, consistent with USGS standards, and ensure the gages are calibrated for the full range of flows that are required, including pulse and unimpaired flows. The Licensees shall report any deviation from the required flows to the Deputy Director within 24 hours of the deviation.

Instream flows shall be measured at the compliance points referenced in Condition 1.B, 1.C, and 1.D. unless otherwise approved by the Deputy Director. The existing and potential compliance points are as follows:

- Immediately below La Grange Dam (RM 51.7), as measured at USGS gage no. 11289650 for Tuolumne River below La Grange Dam near La Grange, California (Condition 1.B, 1.C);
- A compliance point will be required if the Licensees install and operate infiltration galleries as a point or points of diversion or rediversion near RM 25.9, including through TID's petition to add an infiltration gallery as new point of rediversion. The second compliance point must be located in the Tuolumne River within 1,500 feet downstream of any new point or points of diversion or rediversion and must directly measure streamflow in the Tuolumne River downstream of the new point or points of diversion or rediversion. Water shall not be diverted at the new point or points of diversion or rediversion until the compliance point is installed and operational (Condition 1.B, 1.C);
- USGS gage no. 1129000 at Modesto (Condition 1.D); and
- San Joaquin River near Vernalis, DWR gage VNS (Condition 1.D).

The Licensees shall comply with applicable California laws and regulations regarding measuring and monitoring water diversions, including California Code of Regulations, title 23, section 933, and amendments thereto, and State Water Board requirements to provide telemetered diversion data on a public website.¹⁵ The Licensees shall post all

¹⁵ Information regarding telemetered requirements are available at the State Water Board's [Telemetry Requirements webpage](https://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/telemetry_requirements.html), which is available online at: https://www.waterboards.ca.gov/waterrights/water_issues/programs/measurement_regulation/telemetry_requirements.html. (Last Accessed November 23, 2020)

flow and other data to the California Data Exchange Center or successor website, within 24-hours of flow measurement, unless otherwise approved by the Deputy Director. The Licensees shall publicly notice at an easily accessible location on the internet all known events that will affect flow releases (e.g., powerhouse outages, construction, etc.) on the lower Tuolumne River below New Don Pedro Dam a minimum of 30 days in advance, or as soon as known if events are identified less than 30 days in advance.

At minimum, the compliance methods and monitoring plan shall include the following:

1. Locations where the Licensees will monitor compliance with the requirements in the license related to streamflows and reservoir levels.
2. Equipment used by the Licensees to monitor compliance with the requirements in the license related to streamflows and reservoir levels.
3. How the equipment used by the Licensees to monitor compliance with the requirements in the license related to streamflows and reservoir levels is deployed, set (e.g., frequency of data collection), operated and maintained, and calibrated.
4. How data are retrieved from the equipment used by the Licensees to monitor compliance with the requirements in the license related to streamflows and reservoir levels, including frequency of data downloads, quality assurance/quality control procedures, and data storage.
5. How the Licensees make streamflow and reservoir level data available to FERC, resource agencies, and the public.
6. High resolution description of the calculation of monthly and daily unimpaired flow including equations, equation terms, locations of gages, and methods for estimating specific terms that include field measurements and quantitative methods for transforming field measurements into estimates for specific equation terms (e.g., reservoir storage and diversions).
7. How the Licensees will update the plan during the term of the FERC license, including provisions for consultation.
8. An evaluation of public safety risk to recreational or other river users caused by rapid flow or river stage fluctuations and measures to reduce any public safety risk potentially caused by such fluctuations. At a minimum, if the evaluation demonstrates potential risk, the Licensees shall publicly notice such fluctuations at an easily accessible location on the internet in addition to implementing measures identified in the evaluation.

1.E.1 Minimum Instream Flows

The flow schedules in Table 1 and Table 2 specify minimum instream flows, by time period and water year type, to be met at the compliance points required by Condition 1. Minimum instream flows are expressed in cubic feet per second (cfs) as a mean daily average.

1.E.2 Pulse Flows

Fall Pulse Flow: Flows shall be measured and monitored at the compliance points required by Condition 1. The exact timing of the beginning of the pulse flow release shall be determined by the Tuolumne River Anadromous Fish Committee and coordinated with the Lower San Joaquin River Watershed Group (Condition 6). The Licensees shall implement the fall block pulse flow volumes identified in Section 1.C. The volume of water attributed to minimum instream flows shall not be included in the pulse flow volume. The total volume attributed to the pulse flow includes flows from the onset of the ramp up to the pulse flow to the return to the designated minimum instream flow.

Spring Pulse Flows: Flows shall be measured and monitored at the compliance points required by Condition 1. The configuration of all releases, including flows to be released on each day, and the exact timing of the beginning of the releases shall be determined by the Tuolumne River Anadromous Fish Committee and coordinated with the Lower San Joaquin River Watershed Group (Condition 6). The Licensees shall implement the spring pulse flow volumes identified in Section 1.C. The total volume attributed to the pulse flow includes flows from the onset of the ramp up to the pulse flow to the return to the designated minimum instream flow. The volume of water attributed to minimum instream flows shall not be included in the pulse flow volume.

1.E.3 LSJR Flow Objectives

The Licensees shall develop compliance methods for the LSJR flow objectives specific to the Tuolumne River that are consistent with the Bay-Delta Plan and submit the methods to the State Water Board's Executive Director (Executive Director) for consideration of approval. The Executive Director may require modifications as part of any approval. For the Tuolumne River, the Bay-Delta Plan-required compliance points for the LSJR flow objectives are on the Tuolumne River at Modesto USGS gage no. 1129000 and on the San Joaquin River near Vernalis at DWR gage code VNS. The Licensees must provide a high-resolution description of the calculation of monthly and daily unimpaired flow, including equations, equation terms, locations of gages, and methods for estimating specific equation terms (e.g., reservoir storage). Field measurement data and equations used to calculate daily and monthly unimpaired flow should be easily accessible by the public and State Water Board.

Compliance methods approved by the State Water Board or Executive Director in accordance with the Bay-Delta Plan shall be used to inform the Licensees' development of compliance methods specific to the Tuolumne River as required by this condition.

1.E.4 Unplanned Temporary Flow Modifications

The flows specified in Condition 1 may be temporarily modified in the event of equipment malfunction reasonably beyond the control of the Licensees, as directed by law enforcement authorities, or in an emergency. An emergency is defined as an unforeseen event that is reasonably out of the control of the Licensees and requires the Licensees to take immediate action, either unilaterally or under instruction by law

enforcement or other regulatory agency staff, to prevent imminent loss of human life or substantial property damage. An emergency may include, but is not limited to, natural events such as: landslides, storms, or wildfires; malfunction or failure of Projects works; and recreation accidents. Drought is not considered an emergency for purposes of this condition.

When possible, the Licensees shall notify the Deputy Director prior to any unplanned temporary instream flow modification. In all instances, the Licensees shall notify the Deputy Director within 24 hours of the beginning of any unplanned temporary streamflow modification. Within 96 hours of the beginning of any unplanned temporary stream flow modification, the Licensees shall provide the Deputy Director with an update of the conditions associated with the modification, an estimated timeline for returning to the required flows, and any measures taken to reasonably protect fish and wildlife beneficial uses in light of the circumstances.

Within 30 days of any unplanned temporary instream flow modification, the Licensees shall provide the Deputy Director with: (1) a written description of the modification and reason(s) for its necessity; (2) photo documentation of the emergency or reason for the flow modification; (3) a timeline for returning to the required flow or timeline when the required flow resumed; (4) a description of corrective actions taken in response to any unplanned under-release of flow; and (5) a plan to prevent the need for modification of flows resulting from a similar emergency or event.

1.F Annual Operations Plan

The Licensees shall prepare an Annual Operations Plan that describes actions, operations, and methods for meeting instream flows identified in Condition 1, temperature and carryover storage requirements in Condition 3, and dissolved oxygen targets identified in Condition 8. The Annual Operations Plan shall cover the current water year. The Annual Operations Plan shall identify how instream flow requirements, carryover storage requirements, dissolved oxygen objectives, and temperature targets will be achieved under a reasonable range of hydrological conditions, including hydrological conditions that are reasonably expected in the year for which the plan is prepared. The Annual Operations Plan shall identify appropriate strategies for meeting flow, dissolved oxygen, temperature, and carryover storage requirements and identify relevant parameters such as precipitation volume, monthly reservoir storage, as well as precipitation, inflow, storage patterns, and resulting streamflow. The Annual Operations Plan shall identify how Bay-Delta Plan flows and other flow requirements are calculated or measured, identify compliance methods for minimum, pulse, and Bay-Delta Plan flows, and how adjustments will be made as updated information regarding the present year's hydrology becomes available, such as DWR's San Joaquin River water year forecast and inflow volume forecasts from California Nevada River Forecast Center. Equations and gage locations shall be provided as part of the description of flow calculations that will be used to meet requirements.

By November 1 of each year, the Licensees shall submit a preliminary Annual Operations Plan to the Deputy Director, the Tuolumne River Watershed Group, and the Lower San Joaquin River Watershed Group (Condition 6), for review and recommendations. This preliminary plan must provide information about preliminary operational strategies for meeting instream flow requirements, water delivery demand, and reservoir storage targets given available information about existing conditions (e.g., end of September reservoir storage) and precipitation projections (e.g., inflow forecasts from California Nevada River Forecast Center and San Joaquin River water year forecast). The preliminary annual operations plan shall cover the current water year (October 1 – September 30 of the following year). After considering recommendations and projections for the water year, the Licensees shall submit a proposed Annual Operations Plan to the Executive Director by January 10 of the current water year for consideration of approval. When acting on requests for approval of an Annual Operations Plan, the State Water Board or Executive Director will consider the recommendations of the Tuolumne River Watershed Group and Lower San Joaquin River Watershed Group (if functionally equivalent to the Stanislaus, Tuolumne, Merced [STM] Working Group), along with the requirements and procedures for adaptive implementation and other relevant information. The Executive Director or State Water Board may require modifications to the proposed Annual Operations Plan, based on advice from the watershed groups or other relevant information, as part of approval.

As hydrologic conditions change in the current water year such that revisions need to be made to an approved Annual Operations Plan, the Licensees shall submit a Revised Operations Plan to the Executive Director for consideration of approval after consultation with the Tuolumne River Watershed Group and the Lower San Joaquin River Watershed Group (if functionally equivalent to the STM Working Group). The State Water Board recognizes that an annual operations plan is based on a forecast from the best available information and may not reflect actual conditions that occur during the February through June period. Accordingly, the State Water Board will consider this factor and whether the hydrologic condition could have been planned for in evaluating deviations from approved annual operations plans. The Executive Director may require modifications to the Revised Operations Plan as part of any approval.

The annual operations plans and revisions thereto shall be implemented upon approval of the Executive Director or State Water Board and any other required approvals. The Licensees shall file with FERC the approved Annual Operations Plan, and any approved revisions thereto.

The Bay-Delta Plan requires annual adaptive operations plans for adaptive implementation actions that achieve the LSJR flow objectives. The annual operations plan required under this condition may be used to fulfill the Bay-Delta Plan requirements for annual adaptive operations plans provided that the requirements for annual adaptive operations plans and related requirements in the Bay-Delta Plan are met.

1.G Dry Year Management Operations Plan

No later than one year following license issuance, the Licensees shall submit a Dry Year Management Operations Plan to the Deputy Director for consideration of approval. The Deputy Director may require modifications as part of any approval. The Dry Year Management Operations Plan should outline operations strategies for optimizing water supply reliability for instream flows and water deliveries during Dry years in anticipation of multiple, sequential dry years. Dry-year water management strategies should be designed to minimize the frequency of requesting modification of the flow requirements of this certification as described in Condition 4 (Extremely Dry Conditions).

The Dry Year Management Operations Plan shall be developed in consultation with the Tuolumne River Watershed Group (Condition 6), and include, at minimum, a description of the process for allocating water to users during years with and without water shortages, a description of options for reservoir storage targets that address water deliveries and the need for instream flows and downstream temperature management in anticipation of multiple, sequential dry year conditions, and management strategies to guide operations in multiple, sequential, dry years. Management strategies should include water allocation approaches that assess risks and costs of meeting immediate and future water supply needs and instream flow requirements, considering the uncertainty of future inflows and the risk of drought. This effort should be coordinated with development of carryover storage requirements required in Condition 3. Implementing dry-year operations strategies should be exhausted prior to using the process outlined in Condition 4 (Extremely Dry Conditions).

To avoid duplication of dry year planning measures, the Licensees may incorporate the elements of FERC's Dry Year Management Operations Plan into any other drought management plan required by the license(s); doing so, however, does not relieve the Licensees of any obligation to comply with this condition.

The Dry Year Management Operations Plan shall be implemented upon approval of the Deputy Director and any other required approvals. The Licensees shall file with FERC the Deputy Director-approved Dry Year Management Operations Plan, and any approved amendments thereto.

CONDITION 2. Ramping Rates

The Licensees shall, upon issuance of the license, implement the down-ramping rates identified below for all controllable flow rate changes greater than 200 cfs.

- The decreasing rate of change shall be no more than two-inches per hour as measured at the existing gage near La Grange Dam (USGS gage no. 11289650) and change shall be less than or equal to 500 cfs in any one 24-hour period, unless a higher rate of change is required by USACE's *Don Pedro Lake Reservoir Regulation for Flood Control (USACE, 1972)*, and amendments thereto, to avoid interference with flood control operations necessary to ensure safety of people and property.

The Licensees may request Deputy Director approval to modify the ramping rates required by this condition for purposes of avoiding adverse impacts to aquatic species. The Deputy Director may require modifications as part of any approval. Any such request shall be supported by the Tuolumne River Anadromous Fish Committee based on supporting technical information. The Licensees shall provide documentation of Tuolumne River Anadromous Fish Committee support for the modification and supporting information as part of any request.

No later than one month following license issuance, the Licensees shall notify the Deputy Director whether facility modifications are needed to meet the specified ramping rates, and specifically identify what modifications are needed to meet the ramping rates associated with specific ranges of flows required per the certification. If facility modifications are necessary to achieve the specified ramping rates, the modifications shall be completed no later than three years after license issuance. The Licensees are required to make a good faith effort to provide the specified ramping rates until such facility modifications are completed.

CONDITION 3. Temperature Management and Monitoring Plan

No later than six months following license issuance, the Licensees shall initiate a collaborative effort through the Tuolumne River Watershed Group (Condition 6) to identify comprehensive reservoir operation requirements, including carryover storage, needed to maintain suitable downstream temperature targets identified in Table 3. Table 3 temperature targets may be updated with new requirements, including biological and environmental targets for temperature, if incorporated into a voluntary agreement approved by the State Water Board, or alternate temperature targets approved by the Executive Director that are developed by the Licensees based on scientific information demonstrating reasonable protection of native fish.

Table 3. Tuolumne River Temperature Targets

Time Period¹	Water-Year Type (Condition 1)	Temperature (7DADM)	Location¹
January 1 – May 31	Wet Above Normal Below Normal	14°C (57.2°F)	Hickman Bridge (RM 31.8)
	Dry Critically Dry		Robert’s Ferry Bridge (RM 39.5)
February 15 – May 31 February 15 – May 31 February 15 – May 31 February 15 – May 31 February 15 – April 30	Wet Above Normal Below Normal Dry Critically Dry	18°C (64.4°F)	Shiloh Bridge (RM 3.4)
June 1 – September 30	Wet Above Normal Below Normal	18°C (64.4°F)	Robert’s Ferry Bridge (RM 39.5)
	Dry Critically Dry		Turlock State Park (RM 42.8)
October 1 – October 31	Wet Above Normal Below Normal	18°C (64.4°F)	Shiloh Bridge (RM 3.4)
October 1 – October 15	Dry Critically Dry	20°C (68.0°F)	
October 15 – October 31		18°C (64.4°F)	
October 16 – December 31	Wet Above Normal Below Normal	13°C (55.4°F)	Robert’s Ferry Bridge (RM 39.5)
	Dry Critically Dry		Basso Bridge (RM 47.4)

Abbreviations: 7DADM – 7-day average of the daily maximum; RM – River Mile

¹ Alternative locations and temperatures may be approved by the Deputy Director as part of approval of the Water Temperature Management Plan or amendments thereto. If temperature targets cannot be met for the entire time periods identified, then the plan should identify the frequency or percentage of time that it is anticipated that the temperature targets will be attainable for the range of water years, time frames, and locations. Requests for modifications to Table 3 temperature targets shall be developed in consultation with the Tuolumne River Anadromous Fish Committee (Condition 6) and supported with scientific information.

The Licensees shall take actions within their reasonable control to achieve the water temperatures outlined in Table 3 and any amendments to the temperature targets as

approved in the Licensees' Annual Operations Plan (Condition 1) or amendments to the Water Temperature Management and Monitoring Plan. No later than one year following license issuance, the Licensees shall submit a Water Temperature Monitoring and Management Plan to the Deputy Director for review and consideration of approval. The Deputy Director may require modifications as part of any approval. The Licensees shall develop the Water Temperature Monitoring and Management Plan in consultation with the Tuolumne River Anadromous Fish Committee (Condition 6). The Licensees shall install and operate four to eight water temperature monitoring devices no later than two years following license issuance. At a minimum, the Water Temperature Management and Monitoring Plan shall include:

- A statement of the goals and objectives of the plan;
- A description of proposed monitoring and associated protocols, including monitoring locations, schedule/frequency, equipment to be used, and the quality assurance project plan;
- A comprehensive description of factors that may affect water temperature. This description shall also identify whether the factors are associated with the Projects' operations;
- A comprehensive description of reasonable actions to achieve the temperature targets, which may include temperature control structures, riparian shade and other restoration measures, adaptive implementation of Bay-Delta Plan LSJR flows, modified or additional reservoir releases, cold water bypass, reduced delivery for consumptive use, and modified power supply operations. The plan shall also identify the actions the Licensees proposes to implement and the schedule for implementation;
- Proposed carryover (end of September) storage requirements that can meet and maintain temperature targets in Table 3 in most years (see more in Carryover Storage section below);
- Other reservoir requirements may include refill requirements after dry year sequences, minimum allocations, and options for relaxing the carryover storage requirements to meet the minimum allocation during times of extreme drought;
- A detailed reporting schedule, that includes:
 - Reporting on inability to meet water temperature targets; and
 - Posting monitoring data to a publicly available website in real-time (see Condition 1.E);
- A plan for corrective measures and a timetable for implementation, if data indicate that the Projects may be increasing water temperature and/or adversely affecting water quality, including adjustments to Projects' operations or physical solutions;
- A description of the modeling and assumptions that will be used to develop annual operations plans (Condition 1) so that the Projects can achieve the temperature targets in Table 3 within the reasonable control of the Licensees;
- Any requests for modifications to the monitoring locations identified in Table 3, including supporting information for any proposed modifications. Proposed

locations shall be selected with consideration for site accessibility, equivalency to existing location, and species presence and management; and

- A summary of any comments received in development of the plan and how the comments were addressed.

Inability to Meet Temperature Targets Due to Uncontrollable Factors. If the Licensees are unable to meet the temperature targets of this certification due to an event or circumstance beyond their reasonable control, the Licensees shall file a notice with the Deputy Director within 10 days of such event or circumstance. The notice shall describe the event or circumstance causing the inability to meet the target. Such notice shall include a statement of specific actions that the Licensees have or will take to address the event or circumstance and how they will manage the cold-water pool or river flow to minimize exceedances of Table 3. If the Deputy Director finds that there is a pattern of exceedances within the Licensees' reasonable control that could result in adverse impacts to fishery resources, the Deputy Director may take remedial action to address the exceedances (e.g., requiring the Licensees to file a plan identifying any feasible measures that the Licensees may undertake, requiring the Licensees to file modifications to license(s) requirements, directing implementation of corrective actions in the Water Temperature Monitoring and Management Plan, etc.) in addition to other actions within the State Water Board's authority.

Carryover Storage. In developing the carryover storage requirements, the Licensees shall consider and incorporate site-specific information, local conditions, and knowledge from local experts. The feasibility of carryover storage options shall be evaluated and considered as part of developing the carryover storage requirements. The carryover storage requirements shall be designed to provide suitable stream temperatures, avoid significant adverse temperature or other impacts on fish and wildlife and, if feasible, on other beneficial uses. The Licensees shall target suitable temperature conditions for freshwater life stages of Chinook salmon and Central Valley steelhead, which are identified in Table 3. The carryover storage requirements shall include any monitoring and reporting that will be implemented (may include reference to monitoring conducted under other certification conditions), as well as updates to the requirements, if needed, during the term of the FERC license(s).

The Licensees shall implement the Temperature Management and Monitoring Plan upon receipt of Deputy Director and any other required approvals in accordance with the schedule specified therein. The Licensees shall file with FERC the Deputy Director-approved Temperature Management and Monitoring Plan, and any approved amendments thereto.

Prior to Deputy Director approval of the Temperature Management and Monitoring Plan, the Licensees shall monitor and report temperature conditions and manage diversions, releases, and operations to achieve temperature targets (Table 3) in combination with approved biological goals (currently under consideration by the State Water Board pursuant to the Bay-Delta Plan).

If the Licensees do not have approved carryover storage requirements one year after license issuance, the Deputy Director reserves the authority to require interim carryover storage to achieve temperature requirements following notice and an opportunity for comment. The Licensees shall file with FERC the Deputy Director's interim carryover storage requirements, and any approved amendments thereto. The Licensees shall implement the Deputy Director's interim carryover storage requirements upon receipt, in accordance with the schedule and requirements specified therein.

CONDITION 4. Extremely Dry Conditions

In the event of extremely dry conditions, which may include a year in which the Governor of the State of California declares a drought emergency for Tuolumne County or Stanislaus County, or both, or multiple consecutive Dry or Critically Dry water years, the Licensees may request modification of the flow and flow-related requirements, including carryover storage requirements, of this certification. If the Licensees anticipate that they may request modification pursuant to this condition, the Licensees shall notify the agencies in the Tuolumne River Watershed Group (Condition 6), the Bureau of Land Management (BLM), and Deputy Director of the Licensees' concerns related to flows and related requirements as early as possible, and no later than March 15 of the year in which a request may be submitted. If the Licensees request modification pursuant to this condition, the Licensees shall develop a Revised Operations Plan in consultation with the agencies in the Tuolumne River Watershed Group (Condition 6) and BLM for flows during the extremely dry conditions.

The Licensees shall provide interested parties with notice of the proposed Revised Operations Plan at least seven days prior to submittal to the Deputy Director. Whenever possible, the Licensees shall provide an opportunity for interested parties to comment on the proposed Revised Operations Plan prior to submittal to the Deputy Director and provide such comments to the Deputy Director as part of submittal of the Revised Operations Plan. The Licensees' request shall include: an estimate of water to be saved and the alternative beneficial uses for which the water is being conserved; a timeline for the return to regular operations; proposed monitoring for the revised operations, including an estimation of any impacts the revised operations may have on any beneficial uses of water; identification of measures to reasonably protect beneficial uses under the circumstances; and proposed water conservation measures that will be implemented. If conservation measures are not applicable, the Licensees shall describe the circumstances and justification for not implementing water conservation measures. Any information that is required by FERC's Drought Management Plan (or equivalent document in the final Projects' license(s)) may be integrated into the Revised Operations Plan so as not to duplicate efforts.

The Licensees shall submit the proposed Revised Operations Plan to the Deputy Director for review and consideration for approval. The Licensees shall also provide a summary of any comments received and how the comments were addressed. The Deputy Director may require modifications to the Revised Operations Plan as part of any approval. The Licensees may implement the Revised Operations Plan upon receipt

of Deputy Director and other required approvals, in accordance with the schedule and requirements specified therein. The Licensees shall file with FERC the Deputy Director-approved Revised Operations Plan, and any approved amendments thereto.

CONDITION 5. Southern Delta Salinity Objective

The Licensees shall not divert water when, in order to meet the southern Delta salinity objective established in the Bay-Delta Plan, the United States Bureau of Reclamation (Reclamation) is releasing stored water from New Melones Reservoir to avoid exceedance of 0.7 deciSiemens/meter (dS/m) electrical conductivity (EC) at Vernalis (April – August) and 1.0 dS/m EC at Vernalis (September – March). In water years when Reclamation may release stored water from New Melones to achieve the Vernalis salinity objective, the Licensees shall consult with Reclamation and State Water Board staff on at least a monthly basis, and more often as needed, to determine whether this condition applies. The Deputy Director may modify or provide additional direction regarding the required consultation process.

This restriction shall not apply when, in the judgment of the Deputy Director, curtailment of diversion will not be effective in lowering the salinity concentration at Vernalis, or when in the absence of the Licensees' diversion, hydraulic continuity would not exist between the Licensees' point of diversion and Vernalis. This restriction shall also not apply when, in the judgment of the Deputy Director, releases of stored water from New Melones to achieve salinity requirements would be unnecessary if Reclamation curtailed diversion of natural flow being diverted at other Reclamation facilities in the San Joaquin River watershed under water rights that are junior in priority to the Licensees.

This condition is not intended to relieve any other diverter of responsibility to contribute to achievement of the southern Delta salinity objective. If the Licensees are aware of any person or entity with a junior priority diverting or threatening to divert significant quantities of water at a time when the Licensees are required to bypass or release water under this condition, the Licensees should report that diversion or threatened diversion to the Deputy Director, who may initiate appropriate actions to address that diverter's responsibility to contribute to achievement of the southern Delta salinity objective, as appropriate.

This condition shall apply unless and until modified through a proceeding by the State Water Board to allocate responsibility for meeting the southern Delta salinity objective in the Bay-Delta Plan.

CONDITION 6. Tuolumne River and Regional Watershed Management Coordination

The Licensees shall form and participate in a Tuolumne River Watershed Group. The Licensee shall participate in the Lower San Joaquin River Watershed Group, as described below, or participate in an alternative governance entity established pursuant to a voluntary agreement approved by the State Water Board that performs similar functions.

Tuolumne River Watershed Group

No later than three months following license issuance, the Licensees shall establish and convene a Tuolumne River Watershed Group, or functionally equivalent group, for the purpose of consultation on ecological topics related to the development and review of plans required by this certification and to provide recommendations to the Licensees as expressly provided in this certification. Examples of topics the Tuolumne River Watershed Group shall consult on include, but are not limited to, the implementation, monitoring, and effectiveness assessment of the flow requirements identified in this certification. The Tuolumne River Watershed Group may also develop materials and information to inform coordination of Tuolumne River flows with flows from the other salmon-bearing tributaries to the LSJR, specifically the Stanislaus and Merced Rivers. In order to ensure adequate coordination, and unless persons or entities decline to participate, the Tuolumne River Watershed Group shall include, at a minimum, and in addition to the Licensees' representative or representatives, representatives from the following entities who have expertise in San Joaquin River fisheries management, hydrology, operations, land management, and monitoring and assessment needs: State Water Board, California Department of Fish and Wildlife (CDFW), National Marine Fisheries Service (NMFS), United States Fish and Wildlife Service (USFWS), BLM, and other members identified by the Deputy Director. The State Water Board staff overseeing implementation of this water quality certification shall also be included in all meetings related to development of information related to, or implementation of, provisions of this certification. Depending on the topic, it is also highly recommended, and the Deputy Director may direct, that the Tuolumne River Watershed Group include water diverters and users on the Tuolumne River and nongovernmental organizations with appropriate expertise.

The Tuolumne River Watershed Group may convene individual committees, as needed, to address specific topics or issues or to invite additional expertise. The committees may include representatives from all or a subset of the entities of the watershed group as well as representatives from other sectors with appropriate expertise.

The Licensees are required to convene a Tuolumne River Anadromous Fish Committee, a subgroup of the Tuolumne River Watershed Group. The Licensees shall host the first meeting of the Tuolumne River Anadromous Fish Committee no later than three months following license issuance. The Licensees shall organize and host all future meetings of the Tuolumne River Anadromous Fish Committee. Meetings shall be held at least monthly unless otherwise agreed to by the committee. The Tuolumne River Anadromous Fish Committee shall be comprised of one representative each from TID, Modesto Irrigation District, CDFW, NMFS, USFWS, the State Water Board, and at least one nongovernmental organization with anadromous fisheries expertise. Tuolumne River Anadromous Fish Committee members shall be selected by each respective organization.

Lower San Joaquin River Watershed Group

The Licensees shall participate in a Lower San Joaquin River Watershed Group convened by the State Water Board or other appropriate regional watershed group established to assist with the implementation, monitoring, and assessment of the Bay-Delta Plan. This regional group will serve the purposes and functions of the Stanislaus, Tuolumne, and Merced (STM) Working Group as described in the Bay-Delta Plan. The State Water Board will seek recommendations from the regional watershed group (i.e., STM Working Group) regarding: biological goals; procedures for implementing the adaptive methods; annual adaptive operations plan; and the San Joaquin River Monitoring and Evaluation Program, including special studies and reporting requirements.

The Lower San Joaquin River Watershed Group shall include, at a minimum, representatives from the following entities who have expertise in LSJR, Stanislaus, Tuolumne, and Merced rivers fisheries management, hydrology, operations, and monitoring and assessment needs: CDFW; NMFS; USFWS; and water diverters and users on the Stanislaus, Tuolumne, and Merced rivers. The Lower San Joaquin River Watershed Group shall also include State Water Board staff and may include any other persons or entities the Executive Director determines to have appropriate expertise, including nongovernmental organizations. To the extent practicable, the membership of the Lower San Joaquin Watershed Group should achieve a balance of interests such that no one interest constitutes a majority of the group.

CONDITION 7. Annual Review Meeting

No later than one year following license issuance, the Licensees shall establish an annual meeting that is open to the public to review and discuss implementation of the Projects' license(s). At a minimum and at least 30 days prior to the meeting, the Licensees shall invite the Tuolumne River Watershed Group (Condition 6), BLM, and other interested stakeholders to participate in the annual review meeting. The Licensees shall notice the annual review meeting at least 30 days in advance on the Tuolumne River Technical Advisory Committee [webpage](#)¹⁶ or successor website or forum. The Tuolumne River Watershed Group shall establish communication protocols to facilitate interactions between group members that allow for open participation and communication between all parties.

The first annual review meeting shall be held no later than the first full calendar year after license issuance. At the annual review meetings, the Licensees shall:

- Review the status of implementing the FERC license(s) and certification conditions;
- Review monitoring data from all monitoring conducted the previous year;

¹⁶ Available at: <http://tuolumnerivertac.com/>

- Review elements of current year maintenance plans and any non-routine maintenance;
- Discuss foreseeable changes to the Projects' facilities or features;
- Discuss the status of salmonid reintroduction plans;
- Discuss necessary revisions or modifications to plans approved as part of this certification; and
- Discuss species listing implications, including:
 - Needed protection measures for species newly listed as threatened, endangered, candidate, or sensitive;
 - Changes to existing plans for actions that may no longer be necessary due to delisting of a species; and
 - Changes to existing plans to incorporate new information about species requiring protection.

Materials shall be provided to the Tuolumne River Watershed Group (Condition 6), BLM, and other interested stakeholders at least 30 days prior to the annual meeting. The Licensees shall submit a report to the State Water Board that summarizes the annual review meeting no later than 60 days following each meeting.

CONDITION 8. Water Quality Monitoring and Management

8.A Dissolved Oxygen Monitoring and Management Plan

The Licensees shall take all actions within their reasonable control to meet the dissolved oxygen water quality objectives outlined in Table 4 below and any amendments thereto as approved in the Licensees' Annual Operations Plan (Condition 1). No later than six months following license issuance, the Licensees shall submit a Dissolved Oxygen Management Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Licensees shall develop the Dissolved Oxygen Monitoring and Management Plan in consultation with the Tuolumne River Anadromous Fish Committee (Condition 6) and Central Valley Regional Water Quality Control Board (Central Valley Regional Water Board) staff. No later than 18 months following license issuance, the Licensees shall operate a minimum of two continuous real-time dissolved oxygen monitoring stations to measure compliance with the applicable dissolved oxygen water quality objectives for the lower Tuolumne River (Table 4). At a minimum, the Dissolved Oxygen Management Plan shall include:

- A statement of the goals and objectives for the plan;
- A description of proposed monitoring and associated protocols, including monitoring locations, frequency (i.e., continuous), equipment to be used, and the quality assurance project plan. The description shall include a minimum of two continuous real-time dissolved oxygen monitoring stations that will be operated to measure compliance with the dissolved oxygen water quality objectives in the Tuolumne River, rationale for the compliance locations, and evaluation of the

- need for additional dissolved oxygen monitoring stations to inform habitat suitability;
- A comprehensive description of the Projects’ impact on dissolved oxygen concentrations in the lower Tuolumne River. This description shall also identify the magnitude of the Projects’ impact in relationship to other environmental factors influencing dissolved oxygen in the Tuolumne River;
 - A detailed reporting schedule that includes:
 - Summarizing, evaluating, and reporting on the data; and
 - Posting monitoring station data to a publicly available website in real-time (see Condition 1.E);
 - A plan for corrective measures and a timetable for implementation if data indicate that the Projects may be decreasing dissolved oxygen concentrations and/or adversely affecting water quality;
 - A description of the modeling and assumptions or data that will be used to develop annual operation plans (Condition 1) to meet the dissolved oxygen requirements in Table 4 at the compliance points identified in the plan; and
 - A summary of any comments received in development of the plan and how the comments were addressed.

Table 4. Tuolumne River Dissolved Oxygen Water Quality Objectives¹

River Section	Water Quality Objective (mg/l)¹	Time Period
Tuolumne River from Waterford to La Grange	8.0	October 15 – June 15
	7.0	June 16 – October 14
Tuolumne River from Waterford to the confluence with San Joaquin River	7.0	All Year
Sources to New Don Pedro Reservoir and New Don Pedro and La Grange Reservoirs		

¹ SR/SJR Basin Plan. Dissolved oxygen concentrations below the levels presented in this table are prohibited at all times. Subject to the Deputy Director’s approval, the requirements in this table may be superseded by appropriate dissolved oxygen requirements adopted in an amended SR/SJR Basin Plan.

Inability to Meet Dissolved Oxygen Requirements Due to Uncontrollable Factors. If the Licensees are unable to meet the dissolved oxygen requirements of this certification due to an event or circumstance beyond its reasonable control, the Licensees shall file a notice with the Deputy Director within 10 days of such event or circumstance. The

notice shall describe the event or circumstance causing the inability to meet the requirement. Such notice shall include a statement of specific actions that the Licensees have or will take to address the event or circumstance and how they will manage the cold-water pool or river flow to minimize exceedances of Table 4. If the Deputy Director finds that there is a pattern of exceedances within the Licensees' reasonable control that could result in adverse impacts to fishery resources or other beneficial uses, the Deputy Director may take remedial action to address the exceedances (e.g., requiring the Licensees to file a plan identifying any feasible measures that the Licensees may undertake, require the Licensees to file modifications to license(s) requirements, etc.).

The Licensees shall implement the Dissolved Oxygen Management Plan upon receipt of Deputy Director and other required approvals, in accordance with the schedule and requirements specified therein. The Licensees shall file with FERC the Deputy Director-approved Dissolved Oxygen Management Plan, and any approved amendments thereto.

8.B Mercury Monitoring and Management Plan

No later than one year following license issuance, the Licensees shall submit a Mercury Monitoring and Management Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Licensees shall develop the Mercury Monitoring and Management Plan consistent with the State Water Board's May 2, 2012 *Part 2 Of The Water Quality Control Plan For Inland Surface Waters, Enclosed Bays, And Estuaries Of California—Tribal And Subsistence Fishing Beneficial Uses And Mercury Provisions* and any amendments thereto, and in consultation with the California Department of Public Health, Office of Environmental Health Hazard Assessment, State Water Board, and Central Valley Regional Water Board staff. At a minimum, the Mercury Monitoring and Management Plan shall include:

- A statement of the goals and objectives for the plan;
- A description of proposed monitoring protocols and locations (within the reservoirs and river), including aqueous methylmercury and inorganic mercury, fish tissue mercury, sediment mercury, and other ancillary parameters that affect mercury cycling (e.g., chlorophyll-a, dissolved organic carbon, and redox-potential);
- A comprehensive description of procedures, including coordination with the California Department of Public Health and Office of Environmental Health Hazard Assessment to develop notification procedures that will be implemented to inform the public if hazardous levels of mercury are found in fish tissue;
- An evaluation of risks to piscivorous wildlife;
- A detailed description of reporting that will be implemented, including schedule;

- Proposed reservoir operations and fisheries adaptive management to reduce methylmercury pollution (e.g., bioaccumulation, methylation, and risks to piscivorous wildlife and human fish consumers);
- A plan for corrective measures and a timetable for implementation, if data indicate that the Projects may be increasing bioavailable mercury concentrations and/or adversely affecting water quality; and
- A summary of any comments received in development of the plan and how the comments were addressed.

The Licensees shall implement the Mercury Monitoring and Management Plan upon receipt of Deputy Director and other required approvals, in accordance with the schedule and requirements specified therein. The Licensees shall file with FERC the Deputy Director-approved Mercury Monitoring and Management Plan, and any approved amendments thereto.

8.C Other Constituents Monitoring and Management Plan

No later than one year following license issuance, the Licensees shall submit an Other Constituents Monitoring and Management Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Other Constituents Monitoring and Management Plan shall be developed in coordination with the Tuolumne River Watershed Group (Condition 6) and the Central Valley Regional Water Board. At a minimum, the Other Constituents Monitoring and Management Plan shall include:

- A statement of goals and objectives for the plan;
- A description of proposed monitoring and associated protocols, including monitoring locations, frequency (e.g., continuous), equipment to be used, and the quality assurance project plan;
- A comprehensive description of the Projects' impact on concentrations of constituents that will be monitored per the plan (see next bullet) in New Don Pedro Reservoir, La Grange Reservoir, and the lower Tuolumne River. This description shall also identify the magnitude of the Projects' impact in relationship to other factors influencing the constituents in the Tuolumne River;
- A description of water quality parameters to be monitored that include, but are not limited to those identified in the 303(d) listing: water temperature (covered in Condition 3), mercury (covered in Condition 8.B), chlorpyrifos, diazinon, Group A pesticides (aldrin, dieldrin, chlordane, endrin, heptachlor, heptachlor epoxide, hexachlorocyclohexanes [including lindane], endosulfan, and toxaphene), and toxicity;
- Pesticides used for Projects' operations and maintenance;
- A description of water quality parameters to be monitored in the Tuolumne River as part of the *Waste Discharge Requirements General Order For Growers Within The Eastern San Joaquin River Watershed That Are Members Of The Third-*

Party Group (Central Valley Regional Water Board Order R5-2012-0116-09), including any amendments or successor orders;

- Current water quality objectives for the parameters and monitoring requirements provided in the SR/SJR Basin Plan, Bay-Delta Plan, or amendments thereto;
- Description of options to reduce 303(d) listed pollutant levels, and a plan for corrective measures and a timetable for implementation, if data indicate that the Projects may be adversely affecting water quality;
- A summary of any comments received in development of the plan and how the comments were addressed; and
- A detailed reporting schedule that includes summarizing, evaluating, and reporting on the data.

The Licensees shall implement the Other Constituents Monitoring and Management Plan upon receipt of Deputy Director and other required approvals, in accordance with the schedule and requirements specified therein. If the water quality monitoring assessment determines that the Projects' operations have de minimis impacts to the constituents described above, then the Licensees may propose reduced monitoring for review and approval by the Deputy Director. The Licensees shall file with FERC the Deputy Director-approved Other Constituents Monitoring and Management Plan, and any approved amendments thereto.

CONDITION 9. Large Woody Material Management

No later than one year following license issuance, the Licensees shall submit a Large Woody Material Management Plan (LWMMP) to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The LWMMP shall be designed to provide additional native resident and migratory fish rearing habitat in the Tuolumne River by creating additional cover, edge, and channel complexity through the addition of structural habitat, including large woody debris, boulders, and other objects. The LWMMP shall be developed in consultation with BLM, USFWS, NMFS, CDFW, and State Water Board staff. The Licensees shall consider guidance from the *National Large Wood Manual* (Reclamation and ERDC, 2016) and *Integrating Recreational Boating Considerations into Stream Channel Modification & Design Projects* (Colburn, 2012) in developing the LWMMP.

At a minimum, the LWMMP shall include:

- Specific objectives, including a description of: (a) what constitutes large woody material (i.e., size criteria) that will be captured, removed, stored, and placed as part of this condition; (b) how other woody material will be handled or disposed of as part of the Projects' operations; (c) what other materials (e.g., boulders) will be used;
- Proposed monitoring to assess the effectiveness of the plan (e.g., mobilization and distribution of large woody material and other approved materials);
- Detailed description of the methods, locations, volume, and frequency of large woody material capture, removal, storage, and placement for large woody

material in New Don Pedro Reservoir, including options for moving the large woody material collected in New Don Pedro Reservoir and depositing it downstream of La Grange Dam;

- Identification of suitable locations in the Tuolumne River downstream of La Grange Dam where large woody material can be placed and be passively mobilized by two to five-year high flow events, or where it would be appropriate to anchor large woody material;
- A monitoring and reporting program that describes how the Licensees will evaluate and report on the performance of management efforts related to large woody material and other approved materials. The monitoring and reporting program shall include the criteria that will be used to evaluate the performance of the management measures. The Licensees shall propose updates to the LWMMP based on the monitoring results. Reports shall be submitted to the Deputy Director, BLM, CDFW, NMFS, and USFWS;
- An adaptive management program that describes how the Licensees plan to adjust large woody material management and monitoring methods based on evaluation of information and monitoring resulting from implementation of the LWMPP; and
- Documentation of consultation with BLM, USFWS, NMFS, CDFW, and State Water Board staff, including comments and recommendations made in connection with the LWMMP, and a description of how the LWMMP incorporates or addresses the comments and recommendations.

In addition to the general minimum requirements above, the Licensees shall, in consultation with the agencies listed above, evaluate the following elements for inclusion in the LWMMP:

- A strategy for safe and expeditious wood removal from New Don Pedro Reservoir when the volume exceeds 5,000 cubic yards of woody material entering New Don Pedro in any one year;
- The amount and location of large woody material placement and a schedule for placement in consultation with BLM, USFWS, NMFS, CDFW, and State Water Board staff. Identification of the amount, location, and timing of large woody material; and
- CDFW and NMFS recommendations (CDFW, 2018; NMFS, 2018) and information provided in the Final EIS, and other available, relevant scientific and technical information. CDFW and NMFS recommendations (CDFW, 2018; NMFS, 2018) and information provided in the FERC Final EIS, and other available, relevant scientific and technical information.

The Licensees shall report on large woody material management for the previous year at the Annual Review Meeting (Condition 7).

The Licensees shall file with FERC the Deputy Director-approved LWMMP, and any approved amendments thereto. The Licensees shall implement the LWMMP upon

receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 10. Erosion and Sediment Management

No later than one year following license issuance, the Licensees shall submit an Erosion and Sediment Control Management Plan (Erosion and Sediment Plan) to the Deputy Director for review and consideration for approval. The Licensees may require modifications as part of any approval. The Erosion and Sediment Plan shall be developed in consultation with BLM, CDFW, Central Valley Regional Water Board, and State Water Board staff. The primary goal of the Erosion and Sediment Plan shall be to address and control Projects-related erosion and sedimentation during the term of the new license(s) and any extensions.

At a minimum, the Erosion and Sediment Plan shall include recommendations (referred to as Measure Number 4, items 1 and 2) provided by CDFW (CDFW, 2018) and the following items:

- The goal, purpose, and scope of the plan;
- Periodic inventories of the entire Projects area to identify and assess sites with erosion and sedimentation issues. The plan shall identify a timeline for the inventories;
- Criteria for ranking and treating erosion sites identified as part of the inventories, including a risk rating and hazard assessment for scheduling erosion treatment measures and monitoring at each erosion site;
- Protocols for monitoring completed erosion control treatment measures for a period of up to three years after treatment to determine the effectiveness of erosion control measures and whether further erosion control measures are necessary;
- Process and timeline for submittal of the periodic inventories, including associated information and monitoring of existing sites, to the Deputy Director. If the inventory indicates existing or new sites with Project-related erosion and sedimentation issues, the Licensees shall prepare an amendment to the plan for Deputy Director review and consideration for approval. The plan amendment shall be prepared in consultation with BLM, CDFW, Central Valley Regional Water Board, and State Water Board staff and submitted to the Deputy Director within six months of submitting the periodic inventory to the Deputy Director. The plan amendment shall include: (a) a ranking of the sites based on the criteria used for ranking and treating erosion sites; (b) a timeline for addressing sites with erosion and sedimentation issues; (c) measures/treatments that will be implemented to address erosion and sedimentation issues at each site; (d) measures that will be implemented to protect water quality and beneficial uses; (e) monitoring of sites to evaluate effectiveness of implemented measures/treatments; and (f) reporting;
- Site-specific temporary erosion control measures that will be implemented during construction-related activities;

- A monitoring and reporting program that describes how the Licensees will evaluate and report on the performance of erosion and sedimentation control efforts. The program shall include the criteria that will be used to evaluate the performance of erosion and sedimentation control management measures and propose changes to the measures/treatments;
- Protocols for emergency erosion and sediment control that will be implemented upon notice to the Deputy Director, outside of the timeline and process outlined above; and
- Documentation of consultation with BLM, CDFW, Central Valley Regional Water Board, and State Water Board staff, comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

The Licensees shall file with FERC the Deputy Director-approved Erosion and Sediment Plan, and any approved amendments thereto. The Licensees shall implement the Erosion and Sediment Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 11. Gravel Augmentation and Management

No later than one year following license issuance, the Licensees shall submit a Gravel Augmentation Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Gravel Augmentation Plan shall be developed in consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff. A primary goal of the Gravel Augmentation Plan shall be to develop specifications for gravel augmentation in the lower Tuolumne River, including the addition of coarse gravel to fill bedload traps/special run pools and provide spawning gravel downstream of La Grange Dam. The Gravel Augmentation Plan should be designed with consideration of sediment budgets that exceed the river's ability to transport, so that over time the system becomes less incised.

At a minimum, the Gravel Augmentation Plan shall include:

- The purpose, goals, and scope of the plan, including the provisions noted in the Additional Gravel Augmentation Details section below;
- Identification of coarse gravel and spawning gravel sizes to be used for gravel augmentation;
- Identification of gravel harvesting sources and storage sites;
- Method for removal, sorting, and cleaning the source gravel, as well as disposal of any byproducts associated with the process;
- Identification of locations and methods for gravel introduction/placement, and any facilities or improvements necessary to access the Tuolumne River and place gravel;
- Coordination with activities under the Riparian, Spawning, and Floodplain Restoration Plan (Condition 12);

- The priorities for short-term gravel transfusions of coarse gravel (to fill sediment traps/special run pools) and long-term annual spawning gravel augmentations as found in the Tuolumne River Coarse Sediment Management Plan (McBain and Trush 2004);
- Measures that Licensees will take to reasonably protect water quality, including fish and wildlife beneficial uses, during gravel augmentation;
- A monitoring and reporting program that describes how the Licensees will evaluate and report on the performance of gravel augmentation efforts. The program shall include the criteria that will be used to evaluate the performance of gravel augmentation management measures, including a schedule and methods for monitoring mobilization of gravel dispersal. Monitoring shall include an evaluation of the effectiveness of gravel augmentation activities at providing spawning substrate, including identification of whether the gravels are being used, the quality of spawning habitat being created, and success in meeting the plan's goals. The Licensees shall propose any updates to the plan based on the monitoring results. Reports shall be submitted to the Deputy Director, BLM, CDFW, NMFS, and USFWS;
- An adaptive management program that describes how the Licensees plan to adjust gravel placement and monitoring methods based on evaluation of information and monitoring resulting from plan implementation; and
- Documentation of consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff, including comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

Additional Gravel Augmentation Details. The Licensees shall implement coarse gravel (non-spawning and spawning) enhancement in the following reaches:

- Spawning Reach (RM 53.0 – RM 47.5) La Grange Dam to Basso Bridge;
- Dredger Reach (RM 47.5 – RM 39.5) Basso Bridge to Roberts Ferry;
- Mining Reach (RM 39.5 – RM 36.3) Roberts Ferry to Santa Fe Bridge; and
- Lower Tuolumne (RM 36.3 – RM 0).

The Licensees shall place coarse gravel in the four reaches of the lower Tuolumne River identified above. The exact size distribution of gravels and location of gravel placement in the four reaches identified above shall be determined in the Gravel Augmentation Plan and through annual consultation with the BLM, CDFW, USFWS, NMFS, and State Water Board staff. The Gravel Augmentation Plan shall include the gravel augmentation as follows:

- 564,000 cubic yards of coarse gravels within the first 15 years (approximately 37,600 cubic yards per year) following license(s) issuance to fill the bedload traps/special run pools; and

- 5,400 cubic yards per year of cleaned spawning sized gravel to create or restore spawning riffles and restore fluvial geomorphic processes starting five years after license(s) issuance.

The Deputy Director may require additional gravel augmentation based on monitoring results, as part of adaptive management implementation of the Gravel Augmentation Plan. The Licensees shall file with FERC the Deputy Director-approved Gravel Augmentation Plan, and any approved amendments thereto. The Licensees shall implement the Gravel Augmentation Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 12. Riparian, Spawning, and Floodplain Management

12.A Riparian, Spawning, and Floodplain Restoration Plan

No later than two years following license issuance, the Licensees shall submit a Riparian, Spawning, and Floodplain Restoration Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Riparian, Spawning, and Floodplain Restoration Plan shall be developed in consultation with the agencies in the Tuolumne River Anadromous Fish Committee (Condition 6), shall: (i) include habitat and biological goals for the restoration plan; (ii) be based on the expected water budget resulting from Conditions 1.B, 1.C, 1.D, and 3; and (iii) include a definition of high flow events.

The Riparian, Spawning, and Floodplain Restoration Plan shall identify the river reaches with the greatest need for riparian, spawning, and floodplain rearing habitat. Spawning restoration sites identified in the Gravel Augmentation Plan (Condition 11) shall be incorporated into the Riparian, Spawning, and Floodplain Restoration Plan if approved by the Tuolumne River Anadromous Fish Committee. Riparian habitat restoration sites may be identified in specific locations for temperature management or combined with floodplain restoration sites if approved by the Tuolumne River Anadromous Fish Committee. The Riparian, Spawning, and Floodplain Restoration Plan shall identify the target amount of floodplain rearing habitat to be developed for each reach, and potential locations for floodplain restoration projects, including locations for lowering existing floodplain elevations to activate at flow rates in the range of 700 to 1,300 cfs and in the range from 1,300 to 3,000 cfs. The Riparian, Spawning, and Floodplain Restoration Plan shall evaluate floodplain restoration locations for a minimum of 200 acres of constructed, restored floodplain rearing habitat and shall include a floodplain inundation analysis to identify locations for restoration projects that reduce elevations for flooding to flow rates of 700 to 3,000 cfs, a revegetation plan, and other relevant details.

The Licensees shall prioritize project sites that have the potential to produce the highest quality habitat at the optimal frequency and duration for supporting native fish species. Restoration project site selection shall prioritize floodplain areas with a higher river frontage to acreage ratio and projects that lower the existing floodplain elevation to

activate at lower flow levels. The Licensees shall also work in coordination with the Tuolumne River Anadromous Fish Committee to develop restoration project-specific plans including performance criteria. The Licensees may develop specific projects in conjunction with projects developed as part of the Gravel Augmentation Plan (Condition 11). Floodplain restoration sites may be used as sources of material for gravel augmentation and new floodplains may be created during the filling of special-run pools as recommended by CDFW in Measure 5 (CDFW, 2018).

No later than one year following license issuance, the Licensees shall, as part of submittal of the Riparian, Spawning, and Floodplain Restoration Plan, submit a screening level analysis of proposed locations for a minimum of 200 acres of constructed, restored, floodplain habitat throughout the lower Tuolumne River in reaches with the greatest needs and designed to activate at flows lower than existing overbank flow values (e.g., between 700 and 1,300). The screening level analysis shall include a determination of floodplain activation flows for each project and an evaluation of how flood/pulse flows may contribute to floodplain values and benefit fish and wildlife species. Restored habitats that activate at lower flows may be restored side channels with a mix of floodplain and instream habitat characteristics determined by flow rate. The screening level analysis shall be developed in consultation with the Tuolumne River Anadromous Fish Committee (Condition 6).

The Riparian, Spawning, and Floodplain Restoration Plan shall identify recommended restoration projects, implementation schedule for the restoration, identification of performance criteria for restored habitats, and implementation and effectiveness monitoring that will be performed for each individual restoration project. The recommended restoration projects shall incorporate relevant information from the Gravel Augmentation Plan (Condition 11) and restoration screening-level analysis.

The Licensees shall include with the plan copies of the comments, including recommendations, made in the course of consultation, and an explanation as to how the plan incorporates or addresses the comments and recommendations. The Licensees shall file with FERC the Deputy Director-approved Riparian, Spawning, and Floodplain Restoration Plan, and any approved amendments thereto.

12.B Floodplain Habitat Restoration

The Licensees shall implement the Riparian, Spawning, and Floodplain Restoration Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

The Licensees shall construct a minimum of 150 acres of 100 percent suitable floodplain rearing habitat that is designed to lower existing floodplain surface elevation in the first 10 years following Deputy Director approval of the Riparian, Spawning, and

Floodplain Restoration Plan (an average of 15 acres per year¹⁷). The Licensees shall construct an average of 15 acres of 100 percent suitable floodplain habitat every year thereafter unless the Licensees, in consultation with the Tuolumne River Anadromous Fish Committee, can demonstrate to the Deputy Director that available habitat and flows are meeting the narrative and numeric objectives and goals for the LSJR and Tuolumne River. Floodplain construction and restoration shall implement the Riparian, Spawning, and Floodplain Restoration Plan and primarily include floodplain restoration that activates at flows in the range of 700 – 1,300 cfs and 1,300 – 3,000 cfs. Additional floodplain restoration is required if monitoring and assessment show that floodplain restoration projects are not 100 percent suitable, are not meeting performance criteria, or if biological targets for salmon are not met (e.g., juvenile survival targets, Central Valley Protection Improvement Act doubling escapement, State Water Board approved biological goals for the Tuolumne River) due to lack of adequate rearing habitat quality or quantity.

No later than two years following license issuance, the Licensees shall complete the final design, perform pre-construction monitoring to support development of a Before-After-Control-Impact (BACI) analysis, and commence construction of the approved Riparian, Spawning, and Floodplain Restoration Plan.

The Licensees shall develop restoration project-level designs in consultation with the Tuolumne River Anadromous Fish Committee and identify performance metrics for habitat quantity and quality and biological targets (e.g., salmonid use, salmonid survival, presence/absence of warm water predator fish) for each restoration project.

12.C Riparian, Spawning, and Floodplain Restoration Monitoring and Assessment

Restoration Site-specific Monitoring. The Licensees shall develop a monitoring plan for each restoration site and shall be responsible for implementing the plan at each site. Monitoring designs for implementation and effectiveness assessment shall be identified in collaboration with the Tuolumne River Anadromous Fish Committee for each restoration project. Monitoring can be carried out by other organizations and/or member organizations of the Tuolumne River Anadromous Fish Committee and Tuolumne River Watershed Group. The Licensees shall be financially responsible for fulfillment of this requirement. As multiple restoration projects are completed, their individual monitoring plans shall be integrated so that monitoring activities, analysis, and synthesis are facilitated and to further the understanding of river wide recovery efforts. Such integration shall be reflected in the annual, five-year, and comprehensive reports described below. The Licensees shall include the following parameters in their

¹⁷ An averaging period of no greater than five years may be applied to the annual requirement for 15 acres of 100 percent suitable floodplain rearing habitat.

monitoring plans for immediate implementation following the completion of any individual floodplain restoration project:

- Floodplain Inundation: The Licensees shall monitor pre- and post-project floodplain inundation frequency, duration, depth, timing, velocity, and temperature;
- Fish Use: The Licensees shall monitor the pre- and post-project use of the restored project sites by fish, particularly juvenile salmonids; and
- Vegetation Survival: The Licensees shall monitor survival of planted riparian species at newly constructed restoration sites.

Implementation Monitoring. The Licensees shall summarize and provide the results of implementation monitoring in a report to the Deputy Director, CDFW, USFWS, and NMFS within 60 days of completion of the site-specific restoration implementation monitoring.

Effectiveness Monitoring. The Licensees shall conduct effectiveness monitoring to assess:

- Floodplain inundation and geomorphic processes at the restored/enhanced floodplain sites;
- Survivorship of planted riparian species, riparian canopy cover, and riparian species recruitment at the restored/enhanced floodplain sites;
- Presence and function of large woody material in the restored/enhanced floodplain sites;
- Terrestrial subsidies inputs from the restored/enhanced floodplain sites; and
- Juvenile salmonid use of restored/enhanced floodplain habitats and large woody material placement sites.

Post-construction effectiveness monitoring of restoration and enhancement sites shall commence no later than one year following full implementation at a given restoration site for a period of 10 years or until performance metrics have been achieved. If the effectiveness monitoring shows less effectiveness than the design values and performance metrics, the Licensees shall only be credited with the amount of restoration shown to be suitable habitat. The Licensees shall implement an adaptive management process to employ additional measures needed to achieve restoration objectives. The Licensees shall summarize and provide the results of effectiveness monitoring in a report to the Deputy Director, CDFW, USFWS, and NMFS within 60 days of completion of the site-specific restoration effectiveness monitoring.

Annual Monitoring. The Licensees shall annually collect data appropriate for evaluating the implementation and effectiveness of the Riparian, Spawning, and Floodplain Restoration Plan and the achievement of the plan objectives. The Licensees shall prepare an annual summary report describing monitoring and implementation activities completed pursuant to this condition, including floodplain reconnection and riparian planting that were completed during the previous year, and submit the report to the

agencies of the Tuolumne River Anadromous Fish Committee (Condition 6) for review and comment. The Licensees shall present the results of monitoring completed pursuant to this condition at the annual meeting (Condition 7).

Five-Year Evaluation. The Licensees, in consultation with the agencies of the Tuolumne River Anadromous Fish Committee (Condition 6), shall evaluate the Riparian, Spawning, and Floodplain Restoration Plan every five years after initial implementation and provide a comprehensive report that evaluates the effectiveness of the program over the previous five years and other efforts conducted under this condition. If any changes are recommended beyond the objectives approved by the Deputy Director, the Licensees shall submit recommendations in a revised plan to the Deputy Director for review and consideration for approval. The Licensees shall include with the revised plan, copies of the comments, including recommendations, made in the course of consultation with the agencies, and an explanation of how the plan incorporates or addresses the comments and recommendations.

Comprehensive Evaluation. The Licensees shall evaluate the need for additional habitat restoration to meet performance metrics and biological goals in consultation with the Tuolumne River Anadromous Fish Committee no later than 25 years following license issuance or completion of floodplain restoration projects if completed prior to 25 years after license issuance. The evaluation shall be submitted to the Deputy Director upon completion, no later than 26 years after license issuance. The Deputy Director may require additional floodplain restoration projects if needed to achieve biological goals or habitat goals.

CONDITION 13. Predator Suppression Plan

No later than one year following license issuance, the Licensees shall submit a Predator Suppression Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Licensees shall develop the Predator Suppression Plan in consultation with the agencies of the Tuolumne River Anadromous Fish Committee (Condition 6).

At a minimum, the Predator Suppression Plan shall include:

- The goals and objectives of the plan;
- An evaluation of the effects that predators have on native resident and migratory fish, including predator density in the Tuolumne River, alternative prey, juvenile residence time, refuge habitat availability, and impacts of predation on native resident and migratory fish survival rates;
- Identification of gravel pits, scour pools, ponds, weirs, diversion dams, submerged aquatic vegetation, and other structures or areas, that support significant number of non-native fish and predators that may currently reduce native resident and migratory fish survival;
- Actions the Licensees will implement to reduce predation and non-native fish effects and to improve native resident and migratory fish success. Action may

- include modification of structures and areas or other appropriate actions (e.g., predator removal);
- Coordination with actions required by other conditions of this certification (e.g., large woody material placement, floodplain habitat refuge for juvenile native resident and migratory fish, gravel augmentation, and temperature management) to maximize predator suppression and native resident and migratory fish survival;
 - A monitoring and reporting program that describes how the Licensees will evaluate and report on the performance of plan implementation. The program shall include the criteria that will be used to evaluate plan implementation and propose changes; and
 - Documentation of consultation with agencies, including comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

The Licensees shall file with FERC the Deputy Director-approved Predator Suppression Plan, and any approved amendments thereto. The Licensees shall implement the Predator Suppression Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 14. Aquatic Invasive Species Management Plan

No later than two years following license issuance, the Licensees shall submit an Aquatic Invasive Species Management Plan (Invasive Species Plan) to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Invasive Species Plan shall be developed in consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff. The Invasive Species Plan shall provide guidance to manage aquatic invasive species that occur or have the potential to occur in Projects-affected waters. The goals of the Invasive Species Plan are to: (1) identify and implement best management practices (BMPs) to minimize and prevent the introduction and spread of aquatic invasive species into and throughout Projects-affected waters; (2) provide education and outreach to ensure public awareness of the potential effects of aquatic invasive species throughout Projects-affected waters and actions needed to avoid or address them; (3) develop and implement monitoring programs to ensure early detection of aquatic invasive species; and (4) monitor the spread of established aquatic invasive species. At a minimum, the Invasive Species Plan shall include:

- The purpose of the plan;
- Identification of aquatic invasive species that occur or have the potential to occur in Projects-affected waters. For those that occur, include information on where the aquatic invasive species occur and its density;
- BMPs that will be implemented to manage aquatic invasive species;
- An education and outreach program that will be implemented to ensure public awareness and actions to avoid the introduction and spread of aquatic invasive species;

- A monitoring and reporting program that will be implemented to ensure early detection of new aquatic invasive species and monitor the spread or reduction of established aquatic invasive species. The monitoring program shall include the species that will be monitored for, monitoring protocols, frequency, and locations. The program shall describe how the Licensees will evaluate and report on the performance of aquatic invasive species management efforts. The program shall include the criteria that will be used to evaluate the performance of aquatic invasive species management measures. The reports shall include identification of changes associated with the presence of aquatic invasive species in Projects-affected waters and recommendations to address the presence. The Licensees shall propose any updates to the plan based on the monitoring results or other available information. Reports shall be submitted to BLM, CDFW, USFWS, NMFS, and the Deputy Director;
- An adaptive management program that describes how the Licensees plans to adjust aquatic invasive species monitoring methods based on evaluation of information and monitoring resulting from implementation of the plan; and
- Documentation of consultation with BLM, CDFW, USFWS, NMFS, and State Water Board staff, including comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

The Licensees shall file with FERC the Deputy Director-approved Invasive Species Plan, and any approved amendments thereto. The Licensees shall implement the Invasive Species Plan upon receipt of Deputy Director approval and any other required approvals, in accordance with the schedule and requirements specified therein. The Deputy Director may direct the Licensees to implement additional measures to address aquatic invasive species in Projects-affected waters.

CONDITION 15. Recreation Facilities Management

No later than two years following license issuance, the Licensees shall submit a Recreation Facilities Management Plan (Recreation Plan) to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Recreation Plan shall be developed in consultation with BLM and State Water Board staff.

At a minimum, the Recreation Plan shall include:

- A description of operations and maintenance activities associated with the Projects' recreation facilities that have the potential to impact water quality, and measures that will be implemented to address any impacts;
- Identification of recreation use surveys that will be conducted as part of the Projects and submittal of the associated results to State Water Board staff. If results of the surveys indicate an increase in recreation use, the Licensees shall evaluate the potential effects to determine whether modifications to Projects' facilities are needed to protect water quality and beneficial uses and provide the

Deputy Director with the analysis and any associated recommendations for review and consideration of approval;

- A list, description, and schedule for modifications to existing and construction of new recreation facilities associated with the Projects. For each facility modification or construction, the Licensees shall prepare and implement, once approved by the Deputy Director, a Water Quality Monitoring and Protection Plan (Condition 19) that outlines measures and monitoring the Licensees will implement to protect water quality, beneficial uses, and aquatic biological resources;
- A reporting program to document, summarize, and analyze completion of recreation facility construction or modification and associated monitoring results; and
- Documentation of consultation with BLM and State Water Board staff, comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

The Licensees shall file the Deputy Director-approved Recreation Plan, and any required modifications or amendments thereto, with FERC. The Licensees shall implement the Recreation Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 16. Road Management

No later than two years following license issuance, the Licensees shall file a Road Management Plan with the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Road Management Plan shall be developed in consultation with Central Valley Regional Water Board and State Water Board staff. The Road Management Plan shall describe the maintenance and construction of Projects' roads in a manner that is protective of water quality.

At a minimum, the Road Management Plan shall include:

- An inventory and map of all roads associated with the Projects, including locations of drainage structures, streams, and surface waterbodies;
- An assessment of Projects' roads to determine if any drainage structures or road segments are impacting or have the potential to impact water quality;
- Proposed measures and an implementation schedule to rehabilitate existing damage and minimize erosion from Projects' roads;

- Proposed measures designed to improve drainage that are consistent with the most current BLM construction and maintenance guidance¹⁸ or Caltrans' Highway Design Manual¹⁹
- A process for the Licensees to propose updates or modifications to the plan for activities unknown at the time of plan approval, such as new road construction or decommissioning;
- A schedule and plan for inspection and maintenance of Projects' roads throughout the term of the license(s) and any extensions; and
- Documentation of consultation with Central Valley Regional Water Board and State Water Board staff, including comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

The Licensees shall file with FERC the Deputy Director-approved Road Management Plan, and any approved amendments thereto. The Licensees shall implement the Road Management Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 17. Biological Resources Management

No later than one year following license issuance, the Licensees shall submit a Biological Monitoring, Management, and Science Plan to the Deputy Director for review and consideration for approval. The Deputy Director may require modifications as part of any approval. The Licensees shall develop the Biological Monitoring, Management, and Science Plan in consultation with the Tuolumne River Anadromous Fish Committee, Tuolumne River Watershed Group, and the Lower San Joaquin River Watershed Group (Condition 6).

As part of implementing the Biological Monitoring, Management, and Science Plan, the Licensees shall monitor salmonids, fish communities, and aquatic ecology in the lower Tuolumne River, lower San Joaquin River, and at the mouth of the Sacramento-San Joaquin Delta in order to quantify the effects of the Projects on fish and wildlife in the watershed. Monitoring salmonid populations will assist in developing data for improving life-cycle models and scientific tools to better manage Tuolumne River salmonid populations. In consultation with the Tuolumne River Anadromous Fish Committee and the Tuolumne River Watershed Group, and with the Deputy Director's approval, the Licensees may participate in a regional monitoring program or other collective monitoring effort in lieu of some or all of the individual monitoring or data collection

¹⁸ BLM's construction and maintenance for roads can be found at: <https://www.blm.gov/sites/blm.gov/files/Chapter%204%20-%20Construction%20and%20Maintenance.pdf>. Last accessed: November 23, 2020.

¹⁹ Caltrans Highway Design Manual – Hydraulics and Stormwater Related Chapters. <https://dot.ca.gov/programs/design/manual-highway-design-manual-hdm>. Last accessed: November 23, 2020.

provisions required by this condition. Such programs and efforts may include partnerships with the Interagency Ecological Program Bay-Delta water quality and biological monitoring efforts. Participation in a regional monitoring program or other collective monitoring effort shall consist of providing funds or in-kind services to the existing program or effort equivalent to the cost of conducting separate monitoring or data collection and assessment efforts.

At a minimum, the Biological Monitoring, Management, and Science Plan shall include:

1. Specific management questions that each biological monitoring effort is designed to answer;
2. Identification of biological and ecological performance targets to assess progress towards improving and sustaining healthier salmon populations, including biological goals adopted by the State Water Board, and other ecological metrics;
3. Science Program. Identify scientific investigations and/or special studies that need to be completed to achieve more effective and efficient attainment of biological goals and/or performance targets;
4. Adaptive management that describes how the Licensees plan to adjust management actions based on evaluation of information and monitoring resulting from implementation of the plan;
5. Specific years that monitoring will occur throughout the term of the license(s) and any extensions;
6. Standardized sampling and data protocols with consideration given to methods used for downstream monitoring associated with the Sacramento-San Joaquin Delta;
7. Salmon Monitoring Plan – see details below;
8. Ecological Stream Monitoring Plan -- native resident and migratory fish, benthic macroinvertebrates (BMI), and amphibians in the lower Tuolumne River (La Grange Dam to the confluence with the LSJR) over the term of the license(s) and any extensions;
 - Fish community composition monitoring and assessment in coordination with habitat improvement actions such as large woody debris (Condition 9), gravel augmentation (Condition 11), riparian and floodplain improvement (Condition 12), and predator suppression (Condition 13) to identify fish species in multiple locations spanning the lower Tuolumne River;
 - BMI monitoring using the Surface Water Ambient Monitoring Program Protocols²⁰ or its successor program, or an alternative methodology approved by the Deputy Director. The protocols shall include population heterogeneity, composition, and trends;
9. Monitoring and habitat protection measures for fish, amphibian, and reptile species that are listed as threatened or endangered under the California

²⁰ State Water Board. 2017D. Surface Water Ambient Monitoring Program: Quality Assurance Program Plan.

Endangered Species Act (ESA) and/or federal ESA, or Species of Special Concern designated by CDFW. These species include, but are not limited to: Central Valley steelhead, Central Valley spring-run Chinook salmon, Central Valley fall and late fall-run Chinook salmon, North American green sturgeon, Western Pond Turtle, Limestone Salamander, California red-legged Frog, Foothill yellow-legged Frog, and California Tiger Salamander. (Note monitoring for fish may be covered by other portions of the plan.);

10. Monitoring and habitat protection measures for bald eagle, including focused surveys to identify eagle nests within one mile of disturbance areas related to the Projects. The early nesting season survey shall occur at a time when eagles are most likely to be found at the nest sites, and the second survey shall occur later in the season and prior to the fledglings leaving the nest to confirm nesting activity. All observations shall be reported to CDFW using the California Bald Eagle Nesting Territory Survey Form;
11. Monitoring and habitat protection measures for Vernal Pool Fairy Shrimp and Vernal Pool Tadpole Shrimp;
12. Consideration of Projects' impacts on species and their habitats;
13. Documentation of consultation, including comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations; and
14. Funding strategy, budget, and funding reporting process.

Salmon Monitoring Plan. A Salmon Monitoring Plan shall be included in the Biological Monitoring, Management, and Science Plan consistent with CDFW recommendations (CDFW, 2018). At a minimum, the Salmon Monitoring Plan shall include the following:

1. Measurement of fall-run Chinook salmon spawning and escapement surveys:
 - Annual carcass surveys to estimate spawning and escapement from October 1 through December 1, and continuing until two weeks after surveyors find less than five new fish-carcasses in a week. The stream-reach locations for each carcass shall be recorded;
 - Consistent with the modified Cormack-Jolly-Seber (CJS) methodology described in the CDFW 2012 *Central Valley Chinook Salmon In-River Escapement Monitoring Plan* (Bergman et al. 2012);
 - Annual snorkel surveys to estimate adult distribution, abundance, and age; and
 - Annual pre-spawning mortality survey.
2. Morphometric measurements of returning salmon adults shall include:
 - 100 percent of the Chinook salmon carcasses downstream of the Fish Counting Weir at RM 24.5, surveying to at least RM 23.5;
 - The first 500 Chinook salmon carcasses found upstream of the Fish Counting Weir; and
 - An additional five percent (5%) of the Chinook salmon carcasses beyond the first 500 Chinook salmon carcasses upstream of the fishing weir, but not more than 1,000 in given year:

- Scale and otolith collection, length, sex, coded-wire-tag, and fecundity data (for estimating pre-spawn mortality).
3. Measure and estimate juvenile production by operating two rotary screw traps: one at RM 5.3 (Grayson RST); and one at RM 29.8 (Waterford RST). For fall-run Chinook salmon, operation of the traps shall occur annually from January 1 through June 15. The Licensees shall ensure:
 - The rotary screw traps are maintained in working order and positioned to provide adequate trap capture efficiencies at all flows;
 - Sufficient capture efficiency tests are conducted at all flows with all fish sizes;
 - Measurement of fork length of juveniles to track life-history diversity properties of brood years;
 - Development of methods to estimate expanded passage value for juvenile production estimates; and
 - Identification of all fish species that are sampled for information regarding fish community composition.
 4. Operation and maintenance of a seasonal counting weir at RM 24.5 to estimate CV Chinook salmon and CCV steelhead escapement and provide data on the percentage of females and migration timing.
 5. Snorkel surveys, using standard survey protocols, prior to each large woody material placement action, within the area of large woody material placement at the 10 meters upstream and downstream of the placement. Two snorkel surveys should occur in the placement area following large woody placement: the first during the second week following placement; and the second prior to spring flows returning to minimum instream flows in the calendar year following large woody material placement.
 6. Monitoring that will support assessment of the fisheries with respect to State Water Board approved biological goals for the LSJR and fishery performance metrics (e.g., total abundance, density, age composition, spatial distribution, and seasonal survival).

The Licensees shall file with FERC the Deputy Director-approved Biological Monitoring, Management, and Science Plan, and any approved amendments thereto. The Licensees shall implement the Biological Monitoring, Management, and Science Plan upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 18. Monitoring, Assessment, Reporting, and Special Studies

18.A Monitoring, Assessment, and Science Program

No later than two years following license issuance, the Licensees shall submit a comprehensive Tuolumne River monitoring, assessment, reporting, and special studies plan (Tuolumne River Monitoring, Assessment, and Science Plan) to the Deputy Director for review and consideration for approval. The Deputy Director may require

modifications as part of any approval. The Deputy Director also may direct the Licensees to implement measures to address impacts associated with the Projects. The Tuolumne River Monitoring, Assessment, and Science Plan and performance of the required monitoring may serve as the Tuolumne River portion of the San Joaquin River Monitoring and Evaluation Program (SJRMEP).

Development of the Tuolumne River Monitoring, Assessment, and Science Plan shall build on the monitoring and assessment framework and principles outlined in the California Wetland and Riparian Area Monitoring Plan²¹ (WRAMP) and the USEPA tiered monitoring approach.²² The Tuolumne River Monitoring, Assessment, and Science Plan shall consolidate all monitoring actions required in the conditions of this certification that include monitoring necessary to assess compliance with the flow and water quality requirements in this certification, inform adaptive management decisions, and assess progress toward meeting biological goals.²³ The Tuolumne River Monitoring, Assessment, and Science Plan shall be developed in consultation with the agencies in the Tuolumne River Watershed Group and the Lower San Joaquin River Watershed Group (Condition 6).

Development and implementation of the Tuolumne River Monitoring, Assessment, and Science Plan shall be coordinated with monitoring programs in the LSJR watershed and Bay-Delta including, but not limited to: CDFW fish monitoring efforts; the Interagency Ecological Program; Reclamation monitoring for the CVP; DWR monitoring for the SWP; USFWS Anadromous Fish Restoration Program; FERC licensing proceedings for the Tuolumne River; San Joaquin River Restoration Program; and regional monitoring programs, such as the Irrigated Lands Regulatory Program East San Joaquin Water Quality Coalition, Delta Regional Monitoring Program, and San Francisco Bay Regional Monitoring Program.

²¹ WRAMP is designed to support monitoring and assessment of wetlands and streams, including projects, in a watershed or landscape context. Additional information is available on the Elements of WRAMP webpage, which is available online at https://mywaterquality.ca.gov/monitoring_council/wetland_workgroup/wramp/ (Last accessed: November 23, 2020)

²² <https://www.epa.gov/wetlands/wetlands-monitoring-and-assessment> (Last accessed: November 23, 2020)

²³ The Bay-Delta Plan requires development biological goals for the LSJR tributaries to assess progress towards achieving the narrative LSJR flow objective. **Draft Biological Goals** were released in 2019 for public comment and currently under consideration by the State Water Board pursuant to the Bay-Delta Plan. https://www.waterboards.ca.gov/waterrights/water_issues/programs/bay_delta/docs/biological_goals/draft_biological_goals.pdf (Last accessed November 23, 2020).

At a minimum, the Tuolumne River Monitoring, Assessment, and Science Plan shall include²⁴:

- The purpose of the plan and specific management questions the monitoring program is designed to address;
- Compliance and Implementation Monitoring. Identify the locations and instruments to measure flow and water quality properties (e.g., dissolved oxygen and temperature) needed to demonstrate compliance with flow and water quality requirements in this certification. Identify all monitoring requirements in the conditions of this certification and include them in the plan. See additional details in Condition 1.E for flow compliance monitoring, Condition 3 for temperature monitoring, Condition 8.A for dissolved oxygen monitoring, Condition 8.B for mercury monitoring, and Condition 8.C for other constituents monitoring;
- Biological (Effectiveness) Monitoring. Identify fish, BMI, and amphibian monitoring the Licensees will conduct in Projects-affected reaches over the term of the license(s) and any extensions (see additional details in Condition 17);
- Other Constituents Monitoring. Identify water quality parameters and associated monitoring the Licensees will conduct in Projects-affected reaches over the term of the license(s) and any extensions. See additional details in Condition 8;
- Non-Flow Actions. Incorporate compliance and adaptive management monitoring associated with non-flow restoration actions such as gravel augmentation (Condition 11), floodplain restoration (Condition 12), large-woody material management (Condition 9), predator suppression (Condition 13) and other non-flow restoration actions as they are implemented. Monitoring designs for non-flow actions should be based on principles outlined in the WRAMP and the USEPA tiered monitoring approach, or updated approaches approved by the Deputy Director;
- Assessment. Identify a schedule for assessing monitoring data and providing data and assessments to the Tuolumne River Watershed Group to inform real-time adaptive management decisions and to complete reporting requirements in Condition 18.B and Condition 18.C. Assessment of monitoring data shall provide: the compliance status for flow and water quality objectives required in this certification; evaluation of biological and ecological monitoring data, and tracking progress toward achieving biological goals; and updated responses to management questions. Assessments shall include identification of any impacts to biological resources and recommendations to address such impacts;

²⁴ To the extent information is provided in another monitoring plan required by this certification that has been approved by the Deputy Director, the Licensees shall integrate the approved monitoring plan (e.g., temperature monitoring, biological monitoring) into the Tuolumne River Monitoring, Assessment, and Science Plan. References to certification conditions have been provided to assist the Licensees in determining when such instances may occur.

- Science Program. Identify scientific investigations that need to be completed to achieve more effective and efficient attainment of flow and water quality requirements and biological goals (Condition 17); and
- Governance and Administration. The Tuolumne River Monitoring, Assessment, and Science Plan shall also include:
 - A governance charter for decision making processes in consultation with the Tuolumne River Watershed Group (Condition 6);
 - Identification of organizations involved in collecting, assessing, and reporting monitoring data and their roles. The Licensees shall document consultation with entities identified in monitoring, such as the Tuolumne River Watershed Group (Condition 6);
 - Data Management. Identify protocols for collecting, storing, assessing, summarizing, and making monitoring data and assessments and results from special studies available to the public;
 - Annual Review. Identify an annual review cycle to determine the need for modifications and a process for proposing modifications to the plan once approved;
 - External Review. Identify and implement a schedule for regularly occurring external reviews (e.g., every five years) of the plan and its implementation; and
 - Long-term funding strategy. Identify funding sources and allocate resources to monitoring, data management, assessment, reporting, special studies, and external reviews.

Documentation of consultation with the Tuolumne River Watershed Group and Lower San Joaquin River Watershed Group (Condition 6) and existing monitoring programs shall be provided to the Deputy Director as part of the request for review and consideration for approval of the Tuolumne River Monitoring, Assessment, and Science Plan. Documentation shall include any comments and recommendations made in connection with the plan, and a description of how the plan incorporates or addresses the comments and recommendations.

There may be a need to modify the approved Tuolumne River Monitoring, Assessment, and Science Plan to accommodate changing circumstances such as technological improvements in monitoring equipment and the initiation and completion of non-flow restoration actions or special studies. Proposed modifications shall be based on knowledge gained through monitoring data, assessment results, or results of special studies. Proposed modifications shall be developed through the annual review process in consultation with the Tuolumne River Watershed Group (Condition 6). The Licensees shall submit any proposed modifications to the Tuolumne River Monitoring, Assessment, and Science Plan to the Deputy Director for review and consideration for approval.

The Licensees shall file with FERC the Deputy Director-approved Tuolumne River Monitoring, Assessment, and Science Plan, and any approved amendments thereto.

The Licensees shall implement the Tuolumne River Monitoring, Assessment, and Science Plan and any required measures upon receipt of approval of the Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

18. B Annual Summary Reports

By December 31 of each year, the Licensees shall submit an annual summary report to the Deputy Director that summarizes the Licensees' operations and other activities for the prior water year. The annual summary report shall be used to inform future years' operations and other activities. The annual summary report shall describe implementation of flows, including any flow shifting done pursuant to the annual adaptive operations plan or a voluntary agreement, monitoring and special studies activities, and implementation of other measures to protect fish and wildlife during the previous water year, including actions performed by other entities identified in the Bay-Delta Plan's program of implementation. The annual summary report shall also identify any deviations from the annual adaptive operations plan and describe future special studies planned for the water year. The Licensees shall ensure that the annual report is available for review and discussion at the Annual Review Meeting (Condition 7).

18.C Comprehensive Reports

Every three to five years following implementation of this certification (i.e., beginning no sooner than three years, and no later than five years following issuance of the license(s)), the Licensees shall prepare and submit a comprehensive report to the State Water Board. The comprehensive report shall be prepared to review progress toward meeting the biological goals and identify any recommended changes to the implementation of the LSJR flow objectives.

The comprehensive report and any recommendations shall be peer-reviewed by an appropriate independent science panel, which will make its own conclusions and recommendations. In order to leverage expertise and limited resources (financial and otherwise), the Licensees are encouraged to work collaboratively in one or more groups and in consultation with the Tuolumne River Watershed Group and the Lower San Joaquin River Watershed Group (Condition 6).

CONDITION 19. Construction and Maintenance

When applicable and for activities not covered by other conditions of this certification, the Licensees shall comply with the State Water Board's *General Permit for Stormwater Discharges Associated with Construction and Land Disturbance Activities* (Construction General Permit), and amendments thereto. For any construction and maintenance activities with the potential to impact water quality or beneficial uses that are not subject to the Construction General Permit, the Licensees shall prepare and implement site-specific Water Quality Monitoring and Protection Plans (WQMP Plans) for Deputy

Director approval. WQMP Plans must demonstrate compliance with sediment and turbidity water quality objectives in the SR/SJR Basin Plan.

The Licensees shall submit the WQMP Plans to the Deputy Director for review and consideration for approval at least 60 days prior to the desired start date of the applicable construction or maintenance activity. The Deputy Director may require modifications as part of any approval. The objective of the WQMP Plans shall be to identify and implement control measures for construction, maintenance, or other activities with the potential to cause erosion, stream sedimentation, fugitive dust, soil mass movement, release of hazardous materials, or other water quality impairment.

The WQMP Plans shall be based on actual site geologic, soil, and groundwater conditions, and at a minimum shall include:

- Description of site conditions and the proposed activity;
- Detailed descriptions, design drawings, and specific topographic locations of all control measures in relation to the proposed activity, which may include:
 - Measures to divert runoff away from disturbed land surfaces;
 - Measures to collect and filter runoff from disturbed land surfaces; and
 - Measures to dissipate energy and prevent erosion;
- Revegetation measures for disturbed areas, which shall include use of native plants and locally sourced plants and seeds; and
- A monitoring, maintenance, and reporting schedule.

The Licensees shall file with FERC the Deputy Director approved WQMP Plans, and any approved amendments thereto. The Licensees shall implement the WQMP Plans upon receipt of Deputy Director and any other required approvals, in accordance with the schedule and requirements specified therein.

CONDITION 20. Reintroduction of Anadromous Fish

The State Water Board reserves authority for the Executive Director to modify or add conditions to this certification if State Water Board staff determine that it is reasonably foreseeable that state or federally listed anadromous fish species will be reintroduced into Projects-affected streams to ensure adequate protection of SR/SJR Basin Plan and Bay-Delta Plan objectives and beneficial uses. The State Water Board also reserves the authority for the Executive Director to require the Licensees to develop plans and conduct studies if it is reasonably foreseeable that listed anadromous fish species will be reintroduced into Projects-affected areas. Such plans and studies shall be designed in consultation with USFWS, NMFS, CDFW, and State Water Board staff, to develop fish passage, flows, or other measures, as well as determine appropriate modifications to the certification to minimize potential impacts and protect water quality and beneficial uses. Introduction of anadromous fish may require reevaluation of the Projects' facilities, flow regimes, fish stocking plans, availability of large woody material, gravel augmentation, and access to Projects-affected tributaries.

CONDITIONS 21 – 45

CONDITION 21. The Licensees shall ensure no net loss of wetland or riparian habitat functions and is responsible for its own compliance with the *State Wetland Definition and Procedures for Discharges of Dredged or Fill Material to Waters of the State* (State Water Board, 2019A) and the *California Wetlands Conservation Policy* (Governor's Executive Order W-59-93). Proposed wetland mitigation ratios shall be submitted to the Deputy Director for approval.

CONDITION 22. Any plan developed as a condition of this certification will require review and consideration for approval by the Deputy Director, unless otherwise specified. The State Water Board's approval authority, including authority delegated to the Deputy Director or others, includes, but is not limited to, the authority to withhold approval or modify a proposal, plan, or report prior to approval. The State Water Board, or delegatee with approval authority for a plan, may require consultation with persons or entities with appropriate expertise, including nongovernmental organizations, prior to considering the plan. If the Licensees fail to timely submit an adequate plan, the Deputy Director may prescribe interim requirements or measures in furtherance of the condition that is the subject of the plan. The State Water Board may take action, including enforcement action, if the Licensees fail to provide or implement a required item in a timely manner. If a time extension is needed to submit an item for Deputy Director or Executive Director approval, the Licensees shall submit a written request for the extension, with justification, to the Deputy Director or Executive Director no later than 60 days prior to the deadline. The Licensees shall file with FERC any Deputy Director- or Executive Director-approved time extensions. The Licensees shall not implement any plans or reports until after receiving Deputy Director and Executive Director approval and any other necessary regulatory approvals.

CONDITION 23. The State Water Board reserves the authority to add to or modify the conditions of this certification to incorporate terms of a State Water Board-approved voluntary agreement that helps to meet water quality standards and other appropriate requirements of state law, and that may include, but is not limited to, coordination requirements with watershed groups, modifications to requirements for instream flows, temperature targets, annual plans and reporting requirements, non-flow restoration actions (e.g. gravel augmentation, habitat restoration, large woody material management), and monitoring, assessment, and science requirements.

CONDITION 24. The State Water Board reserves the authority to add to or modify the conditions of this certification: (1) to incorporate changes in technology, sampling, or methodologies; (2) if monitoring results indicate that continued operation of the Projects could violate water quality objectives or impair beneficial uses; (3) to implement any new or revised water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act or section 303 of the Clean Water Act; (4) to coordinate the operations of these Projects and other hydrologically connected water development projects, where coordination of operations is reasonably

necessary to meet water quality objectives and protect beneficial uses of water; and (5) to require additional monitoring and/or other measures, as needed, to ensure that continued operation of the Projects meet water quality objectives and protect the beneficial uses of New Don Pedro Reservoir, the Tuolumne River, and the Bay-Delta.

CONDITION 25. Future changes in climate projected to occur during the FERC license(s) term may significantly alter the baseline assumptions used to develop the conditions of this certification. The State Water Board reserves authority to add to or modify the conditions of this certification, to require additional monitoring and/or other measures, as needed, to verify that Projects' operations meet water quality objectives and protect the beneficial uses assigned to Projects-affected stream reaches.

CONDITION 26. The State Water Board shall provide notice and an opportunity to be heard in exercising its authority to add to or modify the conditions of this certification.

CONDITION 27. In addition to the specific conditions in this certification, the Projects shall be operated in a manner consistent with all applicable requirements of the Bay-Delta Plan and SR/SJR Basin Plan.

CONDITION 28. In addition to the specific conditions in this certification, the Projects shall be operated in a manner consistent with all water quality standards and implementation plans adopted or approved pursuant to the Porter-Cologne Water Quality Control Act or section 303 of the Clean Water Act.

CONDITION 29. Unless otherwise specified in this certification or at the request of the Deputy Director, data and/or reports shall be submitted electronically in a format accepted by the State Water Board to facilitate the incorporation of this information into public reports and the State Water Board's water quality database systems in compliance with California Water Code section 13167.

CONDITION 30. This certification does not authorize any act which results in the taking of a threatened, endangered, or candidate species or any act which is now prohibited, or becomes prohibited in the future, under either the California ESA (Fish & Game Code §§ 2050 – 2097) or the federal ESA (16 U.S.C. §§ 1531 – 1544). If a "take" will result from any act authorized under this certification or water rights held by the Licensees, the Licensees must obtain authorization for the take prior to any construction or operation of the portion of the Projects that may result in a take. The Licensees are responsible for meeting all requirements of the applicable ESAs for the Projects authorized under this certification.

CONDITION 31. The Licensees shall submit any change to the Projects, including operations, facilities, technology changes or upgrades, or methodology, which may have a significant or material effect on the findings, conclusions, or conditions of this certification, to the State Water Board for prior review and written approval. The State Water Board shall determine significance and may require consultation with state and/or federal agencies. If the State Water Board is not notified of a change to the Projects, it

will be considered a violation of this certification. If such a change would also require submission to FERC, the change must first be submitted and approved by the Executive Director of the State Water Board unless otherwise delegated in this certification or other State Water Board approval.

CONDITION 32. In the event of any violation or threatened violation of the conditions of this certification, the violation or threatened violation is subject to any remedies, penalties, process, or sanctions as provided for under applicable state or federal law. For the purposes of section 401(d) of the Clean Water Act, the applicability of any state law authorizing remedies, penalties, process, or sanctions for the violation or threatened violation constitutes a limitation necessary to ensure compliance with the water quality standards and other pertinent requirements incorporated into this certification. In response to any violation of the conditions of this certification, the State Water Board may add to or modify the conditions of this certification as appropriate to ensure compliance.

CONDITION 33. In response to a suspected violation of any condition of this certification, the State Water Board or Central Valley Regional Water Board may require the holder of any federal permit or license subject to this certification to furnish, under penalty of perjury, any technical or monitoring reports the State Water Board deems appropriate, provided that the burden, including costs, of the reports shall bear a reasonable relationship to the need for the reports and the benefits to be obtained from the reports. (Wat. Code, §§ 1051, 13165, 13267, and 13383.)

CONDITION 34. This certification shall not be construed as replacement or substitution for any necessary federal, state, and local approvals. The Licensees are responsible for compliance with all applicable federal, state, or local laws or ordinances and shall obtain authorization from applicable regulatory agencies prior to the commencement of Projects' activities.

CONDITION 35. Any requirement in this certification that refers to an agency whose authorities and responsibilities are transferred to or subsumed by another state or federal agency, will apply equally to the successor agency.

CONDITION 36. Upon request, a construction schedule shall be provided to the Deputy Director. The Licensees shall provide State Water Board and Central Valley Regional Water Board staff access to Projects sites to document compliance with this certification.

CONDITION 37. A copy of this certification shall be provided to any contractor and all subcontractors conducting Projects-related work, and copies shall remain in their possession at the Projects site(s). The Licensees shall be responsible for work conducted by its contractor, subcontractors, or other persons conducting work related to the Projects.

CONDITION 38. Onsite containment for storage of chemicals classified as hazardous shall be away from watercourses and include secondary containment and appropriate management as specified in California Code of Regulations, title 27, section 20320.

CONDITION 39. Activities associated with operation and maintenance of the Projects that threaten or potentially threaten water quality shall be subject to further review by the Deputy Director and Executive Officer of the Central Valley Regional Water Board. Any proposal for Projects maintenance or repair work involving Projects-affected water bodies, including desilting of dam impoundments, impoundment drawdowns to facilitate repair or maintenance work, and tailrace dredging, shall be filed with the Deputy Director for prior review and consideration for approval.

CONDITION 40. The Licensees shall comply with the terms and conditions in the State Water Board's *National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities* (Construction General Permit; State Water Board Order 2009-0009-DWQ, as amended by State Water Board Orders 2010-0014-DWQ and 2012-0006-DWQ), and ongoing amendments during the life of the Projects.

CONDITION 41. Nothing in this certification shall be construed as State Water Board approval of the validity of any water rights, including pre-1914 claims. The State Water Board has separate authority under the Water Code to investigate and take enforcement action, if necessary, to prevent any unauthorized or threatened unauthorized diversions of water.

CONDITION 42. This certification is subject to modification or revocation upon administrative or judicial review, including but not limited to review and amendment pursuant to California Water Code section 13330 and California Code of Regulations, title 23, division 3, chapter 28, article 6 (commencing with section 3867).

CONDITION 43. This certification is subject to modification to incorporate feasible measures to avoid or reduce significant environmental impacts or to make any necessary findings based on any environmental documents certified by the California Environmental Quality Act (CEQA) lead agency after this certification is issued, including any revisions to those environmental documents made as a result of judicial review of the CEQA lead agency's approval of the Projects.

CONDITION 44. This certification is not intended and shall not be construed to apply to any activity involving a hydroelectric facility and requiring a FERC license or an amendment to a FERC license unless the pertinent application for certification was filed pursuant to California Code of Regulations, title 23, section 3855, subdivision (b) and that application for certification specifically identified that a FERC license or amendment to a FERC license for a hydroelectric facility was being sought.

CONDITION 45. This certification is conditioned upon total payment of any fee required under California Code of Regulations, title 23, division 3, chapter 28.

Eileen Sobeck
Executive Director

ATTACHMENT A: DETAILED PROJECTS DESCRIPTION

**FINAL WATER QUALITY CERTIFICATION
FOR
DON PEDRO HYDROELECTRIC PROJECT
AND
LA GRANGE HYDROELECTRIC PROJECT**

JANUARY 2021

1.0 Introduction

The Don Pedro Hydroelectric Project (Don Pedro Project) and La Grange Hydroelectric Project (La Grange Project) (collectively, Projects), Federal Energy Regulatory Commission (FERC) Project Nos. 2299 and 14581, respectively, are located on the Tuolumne River. The Projects are jointly owned by Turlock Irrigation District (TID) and Modesto Irrigation District (MID) (collectively, Districts). The Don Pedro Project is located in Tuolumne County and has an authorized installed generation capacity of 168 megawatts (MW). The La Grange Project is located immediately downstream of the Don Pedro Project in Stanislaus and Tuolumne Counties and has an authorized installed capacity of 4.7 MW.

The Don Pedro Project consists of New Don Pedro Dam and Don Pedro Reservoir, gated and uncontrolled spillways on the west abutment of the main dam, low-level outlet works located in the diversion tunnel in the east abutment of the main dam, the power intake and tunnel (also in the left abutment), Don Pedro powerhouse, the Project switchyard located at the powerhouse, and four dikes. The La Grange Project consists of La Grange Diversion Dam and Reservoir, La Grange spillway, sluice gates and sluice channel, two penstocks and their intakes, La Grange Powerhouse, an excavated tailrace, and a substation. These Projects facilities are described in further detail below. The descriptions provided in this attachment are for informational purposes only.

2.0 Don Pedro Hydroelectric Project

2.1 New Don Pedro Dam

New Don Pedro Dam is a 1,900-foot-(ft)-long by 580-ft-high earth and rockfill structure. The top of the dam is at an elevation of 855 ft. The dam has a top depth (i.e., thickness) of 40 ft and a bottom depth of approximately 3,000 ft. The downstream slope is grass-covered and the upstream slope has riprap protection extending to an elevation of 585 ft.

2.2 Don Pedro Reservoir

The Don Pedro Reservoir extends for approximately 24 miles at the normal maximum water surface elevation of 830 ft and 26 miles at the upstream Project Boundary water at an elevation of 845 ft. The surface area of the reservoir at an elevation of 830 ft is approximately 12,960 acres (ac) with a gross storage capacity of 2,030,000 acre-feet (AF). The Don Pedro Reservoir shoreline, including the numerous islands within the lake (at the normal maximum water surface elevation), is approximately 160 miles long. The current minimum operating pool elevation is at 600 ft. Water storage below this elevation is approximately 309,000 AF. The old Don Pedro Dam, which was displaced by the construction of New Don Pedro Dam, is located approximately 1.5 miles upstream of New Don Pedro Dam at approximately River Mile 56.4. The old Don Pedro Dam remains in place with its 12 original irrigation outlets in the open position. The permanent concrete spillway crest of old Don Pedro Dam is at an approximate elevation of 597 ft and was topped by nine-foot-high gates, which were removed when New Don Pedro Dam was constructed.

2.3 Don Pedro Spillway

The Don Pedro spillway includes gated and ungated sections, located adjacent to one another in a saddle area west of, and separated from, the main dam. The gated spillway section is 135-ft-long, with a permanent crest elevation of 800 ft, and includes three radial gates each 45-ft-wide by 30-ft-high. The radial gates are operated by motor-driven steel cables. A travel way is provided over the gated spillway along a top deck at elevation 855 ft. Gate trunnions are located at an elevation of 810 ft. The ungated spillway is an ogee crest section 995-ft-long with a permanent crest elevation of 830 ft and a top abutment elevation of 855 ft. The total spillway capacity at a reservoir water level of 850 ft is 472,500 cubic feet per second (cfs). Flow over the ungated ogee crest section of the spillway has occurred only twice since Don Pedro Project construction, during the New Year's 1997 flood and more recently in February 2017. Flows over the spillway are released into a normally dry gulch named Twin Gulch, which discharges into the Tuolumne River approximately 1.5 miles downstream of the main dam. The spillway sections are founded on bedrock. The Twin Gulch spillway channel primarily consists of bedrock and boulders.

2.4 Outlet Works

Low level outlet works are located at the left (east) abutment of the main dam. The outlet works consist of three individual service gate housings, each containing 4-ft-wide by 5-ft-high slide gates. The outlet works are situated in a 3,500-ft-long concrete lined tunnel, a portion of which originally served as the water diversion tunnel during construction. The original water diversion tunnel had an inlet elevation centerline of 315 ft. At the completion of construction, the original inlet for the diversion tunnel was fitted with a concrete plug and a new 12-ft-diameter inlet was constructed with an inlet invert of 342 ft. The diversion tunnel downstream of the new inlet was fitted with three bonneted slide gates. The invert of the three slide gates is at an approximate elevation of 310 ft. A maintenance gate, which travels on an inclined gate track, serves as the inlet to the outlet works. The outlet works tunnel daylight back to the Tuolumne River approximately 400 ft downstream of the powerhouse. The invert of the outlet works at the river discharge is at an approximate elevation of 300 ft. At a reservoir water surface elevation of 830 ft, the hydraulic capacity of the three gates constituting the outlet works is 7,500 cfs. The three gates were refurbished in 2016.

2.5 Power Intake and Tunnel

Flows are delivered from the reservoir to the powerhouse via a 2,960-ft-long power tunnel located in the left (east) abutment of the dam. The tunnel transitions from an 18.5-ft-diameter concrete lined section to a 16-ft-diameter steel lined section. Emergency closure can be provided by a 21-ft-high by 12-ft-wide fixed-wheel gate that is operated from a chamber at the top of the gate shaft located at the left dam abutment. Flows from the power tunnel are delivered to the four unit powerhouse and a hollow jet bypass control valve in the powerhouse. The inlet to the power tunnel is fitted with trash racks and a hydraulically operated bulkhead gate for tunnel dewatering or emergency closure. The power tunnel centerline at the intake is at an elevation of 534 ft, 66 ft below the minimum power pool elevation of 600 ft.

2.6 Don Pedro Powerhouse, Turbines, and Generators

Located immediately downstream of the dam, the reinforced concrete powerhouse contains four turbine generator units and a 72-in hollow jet valve. The powerhouse is 171-ft-long and 148-ft-wide. The powerhouse contains four Francis-type turbines that are direct connected to electrical generators. The current FERC-authorized capacity is 168 MW. Combined hydraulic capacity of the four units under the maximum gross operating head of 530 ft is approximately 5,500 cfs. Each of the three original turbines and generators have a rotational speed of 277 revolutions per minute (rpm) and are rated at 77,700 horsepower (hp) and 48 megavolt-amperes (MVA), respectively, at 450 ft of net head. Turbine 4 was installed in 1989 after FERC approved the Districts' amendment to add the fourth turbine in February 1987. At maximum head (i.e., at full gate flow supplied to each of the four units), the powerhouse has an output capability of 203 MW.

The powerhouse also contains a 72-in hollow jet valve located in the east end of the powerhouse with a centerline elevation, at discharge, of 305 ft. The maximum hydraulic capacity of the hollow jet valve is 3,000 cfs. While Turbines 1, 2, and 3 discharge directly to the river channel, Turbine 4 discharges to the outlet works tunnel approximately 250 ft upstream of the tunnel outlet. Water to Turbine 4 is delivered through a bifurcation from the hollow jet valve piping, such that when Turbine 4 is in operation, the hollow jet valve capacity is reduced from 3,000 cfs to 800 cfs.

Access to the powerhouse is via a secured gate located off the former Visitor Center parking area. The road provides access directly onto the top deck of the powerhouse at an elevation of 340 ft. A 4-ft-high wall surrounds the top deck. A two-hook gantry crane sits atop the deck to provide for equipment and materials delivery to the powerhouse and maintenance services. The generator floor in the powerhouse is at an elevation of 323 ft and the turbine floor is at an elevation of 308 ft.

2.7 Tailrace

The powerhouse and hollow jet valve discharge directly to the Tuolumne River at about River Mile 54. Tailwater elevation during turbine operation varies from a low of about 300 ft to a high of about 304 ft under normal operating conditions. The tailwater elevation at the outlet works tunnel is at approximately 300 ft under low flow conditions.

2.8 Switchyard

The Don Pedro Project switchyard is located atop the powerhouse at an elevation of 340 ft. The switchyard provides power delivery and electrical protection to the Districts transmission systems. The switchyard includes isolated phase buses, circuit breakers, and four transformers that raise the 13.8-kilovolt (kV) generator voltage to 69-kV transmission voltage. Transformers 1, 2, and 3 are rated at 55-MVA and Transformer 4 is rated at 44-MVA. While Transformers 1, 2, and 4 are directly connected to TID's system and Transformer 3 to the MID system, the switchyard has been configured to allow for interconnection across the systems when needed. This system, when

operating in an interconnected fashion, acts as a pathway for electricity to flow across the two systems, providing system benefits to both districts.

2.9 Gasburg Creek Dike

The spillway structures for New Don Pedro Dam discharge into Twin Gulch, a small intermittent drainage, which discharges back into the Tuolumne River 1.5 miles downstream of the dam. To prevent spillway discharges into Twin Gulch from entering the adjacent Gasburg Creek drainage, the Districts constructed the Gasburg Creek Dike. The dike is located in a low saddle that separates Twin Gulch drainage from Gasburg Creek drainage, approximately midway down the Twin Gulch waterway. The 75-ft-high Gasburg Creek Dike consists of an earth and rock fill dam with an impervious core. The dike is equipped with a slide-gate controlled by an 18-in-diameter outlet conduit. The top of Gasburg Creek Dike is at an elevation of 725 ft.

2.10 Dikes A, B, and C

There are three small reservoir rim embankments along the reservoir, which are referred to as Dikes A, B, and C. These embankments are constructed in low saddles on the reservoir rim with top elevations of 855 ft. Dike A is located between the dam and the spillway. Dikes B and C are located east of the dam.

2.11 Station Service

Station service power¹ is provided by primary and secondary station service power transformers. The primary unit is a 69-kV/12-kV step-down transformer that feeds a 12-kV line. The 12-kV line feeds three secondary 12-kV/480-kV step-down transformers. The first two secondary transformers service the spillway motor control centers. The third services the powerhouse. There is a 45-kVA diesel generator that serves as an emergency backup for station service power. There is also a portable propane power unit that can power the gate hoists for the radial gates in an emergency.

3.0 La Grange Hydroelectric Project

3.1 La Grange Dam and Headpond

The La Grange Diversion Dam (LGDD) was constructed for the purpose of raising the level of the Tuolumne River to a height that enabled gravity flow of diverted water into the Districts' irrigation systems. When not in spill mode, the water level above the diversion dam is between 294 ft and 296 ft approximately 90 percent of the time. The headpond formed by LGDD is narrow and steep-sided and flow conditions along the headpond reflect a more riverine than lacustrine environment.

Based on FERC's assessment of hydraulic modeling performed by the Districts, the upper end of the headpond formed by LGDD under non-spill conditions terminates

¹ Station service power refers to the electric energy produced by a project that is used in the project to power lights, motors, control systems, and other auxiliary electrical loads that are necessary to operate the project.

approximately two miles above the diversion dam. This creates a shoreline length of approximately four miles and a surface area of approximately 35 acres. The headpond has a maximum depth of 35 ft, a mean depth of approximately 11 ft, a gross storage capacity of approximately 400 AF, and a usable storage capacity of less than 100 AF.

3.2 Intakes and Tunnels

Water released from Don Pedro Reservoir is either diverted by TID or MID at LGDD for irrigation or municipal water supply purposes at LGDD or passes to the lower Tuolumne River through one of the flow passageways available at the diversion dam. MID's diversion tunnel intake is located on the west (looking downstream, river right) end of the diversion dam, and TID's diversion tunnel intake is located on the east (river left) end of the diversion dam. Consistent with each irrigation districts' acreage served, the irrigation canals were constructed such that approximately 68 percent of diverted flow is routed to the TID system and 32 percent to the MID system.

3.3 MID's Intake and Diversion Tunnel

MID's diversion tunnel and intake are non-Project facilities, as they are not used in conjunction with TID's hydropower facility.

Due to maintenance and repair issues experienced along its Upper Main Canal, in 1987/1988 MID constructed the current diversion tunnel and tunnel intake to bypass the upper section of the Main Canal. The intake to the MID diversion tunnel is located in the face of a cliff on the west (river right) bank about 100 ft upstream of LGDD. The invert of the MID tunnel is at an elevation of 277.4 ft. Flow is conveyed through the 15.5-foot-diameter tunnel for 895 ft to a control structure. Flow is then conveyed through a 5,300-foot-long tunnel to an outlet structure which controls flow to the MID non-Project Main Canal. The canal provides water to MID's irrigation and municipal water systems. The design maximum flow rate for this tunnel is approximately 2,000 cfs.

3.4 TID's Intake and Diversion Tunnel

TID's diversion tunnel and intake are non-Project facilities, the primary purpose of which are to divert Tuolumne River flows to TID's main irrigation canal. The TID intake is located on the east (left) bank just upstream of the diversion dam and consists of two separate structures. The south intake structure contains two 8-ft-wide by 11.8-ft-high control gates driven by electric motor hoists. The north intake structure contains a single 8-ft-wide by 12-ft-high control gate.

The north intake structure was added in 1980 to increase the delivery capability of TID's irrigation canal system by reducing head losses through a single intake and lowering the tunnel invert. Flows from the intake are conveyed to a 600-foot-long tunnel and thence the 110-ft-long forebay of the TID non-Project Main Canal. The forebay was modified in the 1980's to reinforce the structure. Flows to TID's irrigation system are regulated at the non-Project Main Canal Headworks, which consists of six slide gates, each of which is 5-ft-wide by 8.3-ft-high.

3.5 Powerhouse Intake and Main Canal Headworks

Flows from the TID tunnel discharge nearly 600 ft downstream from the intake into a concrete channel that contains the penstock intake structure and TID's non-Project Upper Main Canal Headworks. At the tunnel outlet portal, the channel invert is approximately 18 ft wide and gradually expands to 39 ft wide at the face of the Upper Main Canal Headworks. The channel runs 118 ft along the centerline of flow and is constructed with a gradual bend to the south as it enters the TID non-Project Upper Main Canal.

The original invert of the channel was constructed at an elevation of approximately 281.2 ft but was excavated and rebuilt at a lower elevation of nearly 278 ft in 1980 to improve the irrigation flow delivery capacity to the TID Upper Main Canal. TID currently maintains an 18-in pipe in an open position, which continuously delivers flow to the sluice gate channel downstream of the sluice gates. This water flows into the tailrace just upstream of the powerhouse. The flow quantity is not measured but is estimated to be approximately 5 to 10 cfs.

Located at the west side of the concrete channel, the penstock intake structure contains a trashrack structure and three 7.5-ft-wide by 14-ft-high concrete intake bays that deliver water to the two penstocks. Manually-operated steel gates are used to shut off flows through these intakes. Immediately upstream and adjacent to the penstock intakes are two automated 5-ft-high by 4-ft-wide sluice gates that discharge water over a steep rock outcrop and sluice gate channel to the tailrace just upstream of the powerhouse.

The non-Project TID irrigation canal headworks structure was originally constructed with five 5-ft-wide by 8.3-ft-high outlets controlled by fabricated steel gates. In 1980, a sixth gate was added as part of the rehabilitation of the forebay. The sixth gate is the same dimensions of the original five gates. All the 1980 modifications were performed to improve the control of flows as part of improvements to the TID irrigation system.

3.6 La Grange Powerhouse

The La Grange powerhouse is located approximately 0.2 miles downstream of LGDD on the south (left) bank of the Tuolumne River. The power plant is owned and operated by TID. Water diverted through the TID intake and tunnel can enter the two penstocks that deliver flow to the powerhouse. The two-unit powerhouse was built in 1924. The powerhouse is a 72-ft by 29-ft structure with a reinforced concrete substructure and steel superstructure. The intakes for the two penstocks are located in the west (right) side of the forebay. The penstock for Unit 1 is a 235-ft-long, 5-ft-diameter steel pipe. The penstock for Unit 2 is a 212-ft-long, 7-ft-diameter steel pipe.

There have been no modifications to the powerhouse since its original construction in 1924, except for routine maintenance and repairs.

3.7 Turbines, Generators, and Accessory Equipment

The La Grange powerhouse contains two turbine-generator units originally installed circa 1924/1925. The turbine of the smaller unit (Unit 1) contains a Voith runner rated, at its cavitation limit, at 1,650 horsepower at 140 cfs and 115 ft of net head. The larger unit (Unit 2) also contains a Voith runner rated, at its cavitation limit, at 4,950 horsepower at 440 cfs and 115 ft of net head. The actual net head at the plant varies with flow, which affects flow capacity and unit output. The runners of the original turbine-generator units were replaced with the current Voith runners in 1989.

Historically, the flow capacity of the original 1924 units exceeded 600 cfs. The units with the Voith replacement runners have a combined capacity of about 580 cfs at the guaranteed maximum capacity (i.e., their cavitation limit). The original Unit 1 design was an unconventional configuration, even for the 1910/1920s, consisting of a single horizontal Francis turbine coupled to two 500-kilowatt generators, one on each side of the turbine. The powerhouse has a minimum hydraulic capacity of roughly 100 cfs.

This two-generator configuration was replaced with an industry-standard single-generator configuration as part of the 1989/1990 rehabilitation work. The original Unit 2 design was a conventional configuration consisting of a single vertical Francis turbine coupled to a single 3,750-kilowatt generator. At the turbines' guaranteed maximum capacity, the combined generator output is approximately 4.7 MW.

3.8 Substation and Transmission Line

There are no FERC-jurisdictional transmission lines associated with the La Grange Project. The transmission line connecting the La Grange Powerhouse to the grid originates at the 4.16-/69-kV transformer in the substation located on the east side of the powerhouse. This transmission line connects to both TID's Tuolumne Line No. 1 and its Hawkins Line. In the event that the La Grange Project powerhouse is decommissioned in the future, this transmission line would need to be retained to provide power needed to operate the Main Canal Headworks associated with the irrigation canal systems and the sluice gates. Therefore, under FERC's transmission line jurisdictional criteria, the transmission line currently serves as part of the existing distribution/transmission grid and, therefore, would not fall under FERC jurisdiction.

**ATTACHMENT B: CONSOLIDATED INSTREAM FLOW
REQUIREMENTS**

**FINAL WATER QUALITY CERTIFICATION
FOR
DON PEDRO HYDROELECTRIC PROJECT
AND
LA GRANGE HYDROELECTRIC PROJECT**

JANUARY 2021

**Consolidated Instream Flow Requirements in
Conditions 1.B, 1.C, and 1.D (provided for illustrative purposes)**

Attachment B, Table 1 Consolidated Instream Flow Requirements Downstream of La Grange Dam, River Mile 51.7

Time Period	W (cfs)	AN (cfs)	BN (cfs)	D (cfs)	C (cfs)	Pulse Flows (TAF)	Function	Bay-Delta Plan Flows ¹
January 1 – 31	225	225	225	200	200		Wet season base flow	LSJR Feb – June flow objectives
February 1 – 15	225	225	225	200	175			
February 16 – 28/29	225	225	225	200	175	109,091 AF in W & AN; 98,182 AF in BN; 76,364 AF in D; 49,091 AF in C ² -----	Floodplain activation pulse & wet season base -----	
March 1 – April 15	250	250	250	225	200			
April 16 - 30	275	275	275	250	200	Plus 150 TAF in W & AN; 100 TAF in BN; 75 TAF in D; 35 TAF in C ³	Outmigration pulse & wet season base	
May 1 – 15	275	275	275	250	200			
May 16 – 31	300	300	300	275	225			
June 1 – 30	200	200	200	200	200			July – January adaptive methods allow flow shifting, if approved
July 1 – September 30	350	350	350	300	300		Dry season base flow	
October 1 – 15	350	350	350	300	300	Plus 20 TAF in W, AN; 15 TAF in BN & D; 10 TAF in C	Fall pulse flow window & dry season base flow	
October 16 – November 30	275	275	275	225	200			
December 1 – 31	275	275	275	225	200		Dry season base flow	

- 1) When LSJR flow requirements exceed minimum instream base flows, LSJR requirements control and can also be used to meet Conditions 1.B and 1.C.
- 2) For BN, D, or C years that occur in a sequence that starts with a D or C year and contains no W or AN years then dry year off-ramps will apply, in which case no floodplain pulse will be required for D and C years and the pulse will be reduced to 76,364 AF for BN years.
- 3) In a sequence of C and D years, off ramps are applied to the spring pulse flow volume. When these off ramps are applied, the D year spring pulse flow volume is reduced to 45 TAF, and the C year spring pulse flow volume is reduced to 11 TAF.

Abbreviations: cfs – cubic feet per second; LSJR – Lower San Joaquin River; AF – acre-feet; TAF – thousand acre-feet; W – Wet, AN – Above Normal, BN – Below Normal, D – Dry, C – Critical.

Attachment B, Table 2 Consolidated Instream Flow Requirements Downstream of Potential New Point or Points of Diversion or Rediversion, River Mile 25.9

**EXHIBIT 3:
ORDER DENYING STAY**

STATE OF CALIFORNIA
CALIFORNIA ENVIRONMENTAL PROTECTION AGENCY
STATE WATER RESOURCES CONTROL BOARD

ORDER WQ 2021-0007-EXEC

IN THE MATTER OF THE REQUEST FOR STAY OF
WATER QUALITY CERTIFICATION BY TURLOCK IRRIGATION DISTRICT AND
MODESTO IRRIGATION DISTRICT

Order Denying Stay

BY THE EXECUTIVE DIRECTOR:

1.0 INTRODUCTION

On January 15, 2021, the State Water Resources Control Board's (State Water Board or Board) Executive Director issued a water quality certification (certification) under section 401 of the Clean Water Act for the Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581, respectively.¹ The State Water Board received timely petitions for reconsideration of the certification from four groups of petitioners: (i) Turlock Irrigation District and Modesto Irrigation District (collectively, Districts); (ii) the City and County of San Francisco; (iii) the Bay Area Water Supply and Conservation Agency; and (iv) the Tuolumne River Trust, California Sportfishing Protection Alliance, Trout Unlimited, American Rivers, American Whitewater, Merced River Conservation Committee, Friends of the River, Golden West Women Flyfishers, Central Sierra Environmental Resource Center, Tuolumne River Conservancy, and Sierra Club Mother Lode Chapter.

The Districts' Petition for Reconsideration and Request for Stay (Petition) requests that the State Water Board withdraw the certification in its entirety. The Petition also requests

¹ In the Matter of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District, Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581 (Jan. 15, 2021). The State Water Board has delegated authority to act on applications for certification to the Executive Director. (Cal. Code Regs., tit. 23, § 3838, subd. (a).)

that the State Water Board stay the certification during the period while the Board considers the Petition. This Order addresses only the Districts' request for stay. The merits of the Districts' and other parties' petitions for reconsideration will be decided at a later date. For the reasons below, this Order denies the request for stay.

2.0 BACKGROUND

The Don Pedro Hydroelectric Project and La Grange Hydroelectric Project (collectively, Projects) are located on the Tuolumne River in Tuolumne and Stanislaus Counties, California. On April 28, 2014, the Districts filed an application with the Federal Energy Regulatory Commission (FERC) for a new license to continue to operate and maintain the Don Pedro Hydroelectric Project. The license expired on April 30, 2016, and the Districts continue to operate the Don Pedro Hydroelectric Project under annual licenses. On October 11, 2017, the Districts filed an application for an original license with FERC to operate and maintain the La Grange Hydroelectric Project. The applications for a new and original license are still pending before FERC.

In December 2018, in response to the continuing decline of the Bay-Delta ecosystem, the State Water Board adopted amendments to the Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta Plan) that include new and revised water quality objectives for the Lower San Joaquin River (LSJR) and its three salmon-bearing tributaries, the Stanislaus, Tuolumne, and Merced Rivers and revised salinity water quality objectives for the southern Delta. The LSJR flow objectives require a portion of flow be maintained in the three tributaries during certain times of year to ensure suitable habitat and migratory pathways for native fish.

Issuance of a FERC license is a federal action that requires certification under section 401 of the Clean Water Act. (33 U.S.C. § 1341.) Before FERC can issue a license, a section 401 certification issued by the State Water Board or a waiver of section 401 authority is required. In order to issue a certification, the State Water Board must have sufficient information to show that operation of the Projects is consistent with both water quality objectives and the protection of the beneficial uses designated for the Tuolumne River and the San Joaquin River in the Water Quality Control Plan for the Sacramento River Basin and the San Joaquin River Basin and in the Bay-Delta Plan. Any certification issued by the State Water Board must include conditions that implement these requirements and any other appropriate requirement of state law. (33 U.S.C. § 1341(d).

On July 20, 2020, the Districts filed requests with the State Water Board for section 401 certification of the Projects.² On October 2, 2020, the Districts filed a petition requesting

² Previously, the Districts requested certification for the Projects from the State Water Board on January 26, 2018, and April 22, 2019. The State Water Board timely denied the requests without prejudice on January 24, 2019, and April 20, 2020, respectively. The

FERC to find that the State Water Board has waived its certification authority for the Projects. On November 19, 2020, the Districts filed a formal withdrawal of their July 20, 2020 requests for certification based on their argument that the State Water Board had waived its certification authority under section 401. The State Water Board issued a draft certification for the Projects on November 30, 2020, and a final certification on January 15, 2021. On January 19, 2021, FERC denied the Districts' petition and found that the State Water Board had not waived its certification authority for the Projects.

The Districts timely petitioned the State Water Board for reconsideration of the certification and requested a stay pending the Board's reconsideration decision.

3.0 LEGAL STANDARD FOR STAY REQUESTS

A stay is extraordinary relief that is granted in few cases. In order to grant a stay, the State Water Board must find that a petitioner seeking a stay has alleged facts and produced proof of: (1) substantial harm to the petitioner or to the public interest if the stay is not granted; (2) lack of substantial harm to other interested persons and the public interest if a stay is granted, or the harm that would result from the stay being granted is substantially outweighed by the harm that would occur if no stay is granted; and (3) substantial questions of law or fact regarding the disputed action. (Cal. Code Regs., tit. 23, § 3869, subd. (d)(1)(A)-C.) A petitioner must provide facts and proof of each of the three factors in order for a stay to be granted. Failure to meet any of the elements will result in denial of the stay request.

In addition, the issue of whether a stay is appropriate is evaluated in the temporal sense—a petitioner must prove that it will suffer substantial harm if a stay is not granted for the relatively brief period pending resolution of the petition on the merits. (State Water Board Order WQ 2006-0007 (*Boeing Company*), p. 4; State Water Board Order WQ 2011-0007 (*Merced Irrigation District*), p. 6; State Water Board Order WQO 2002- 0007 (*County of Los Angeles*), p. 3.)³ Thus, the issue before the State

Districts, as lead agencies under the California Environmental Quality Act (CEQA), had not begun the environmental analysis required under CEQA, FERC had not completed its National Environmental Policy Act analysis, and the State Water Board could not determine compliance with water quality standards at the times the requests for certification were denied.

³ Certain water quality orders cited address requests for stay pursuant to California Code of Regulations, title 23, section 2053, which does not apply to this matter. Section 2053 applies to the State Water Board's review of an action by a Regional Water Quality Control Board. Nonetheless, section 2053 requires facts and proof of the same factors as those required by section 3869 and, thus, the discussion of the factors under section 2053 also informs the consideration of the factors under section 3869.

Water Board is not whether the Districts might prevail on any of the merits of their claims or suffer substantial harm over the term of the federal license(s), once issued.

4.0 DISCUSSION

4.1 The Districts have not shown substantial harm to them or to the public interest if a stay is not granted

The Districts allege that unless the certification is stayed, substantial harm will follow from implementation of the certification's requirements. They assert that the certification is immediately enforceable under state law (citing Water Code section 13385, subdivision (a)(5)) and that FERC could incorporate some or all of the conditions of the certification into the Districts' license(s) at any time. The Districts also cite to the declaration of Dr. Susan Burke in support of their petition for reconsideration and request for stay. The declaration includes a copy of Dr. Burke's report on "Estimating Changes in Agricultural Production Impact Assessment Methodology Technical Memorandum," dated January 15, 2021,⁴ which estimates the economic impacts of the certification on the agricultural economy of Stanislaus and Merced Counties over a 42-year study period for three metrics (output, jobs, and labor income), based on certain modeling assumptions.

State Water Board regulations specify, however, that a petitioner must show "substantial harm to the petitioner or to the public interest *if a stay is not granted.*" (Cal. Code Regs., tit. 23, § 3869, subd. (d)(1)(A), italics added.) The only costs relevant to an analysis for purposes of a stay are those costs that may be incurred pending the State Water Board's decision on the merits of the Districts' petition for reconsideration. The Districts' economic estimates do not reflect the actual costs that may be incurred during the reconsideration period because compliance with the certification is not anticipated while it is pending reconsideration, or, as discussed below, before FERC issues the federal licenses for the Projects.

Moreover, the Districts are unlikely to incur any significant actual costs associated with implementation of the certification before the State Water Board acts on the reconsideration request. The Districts do not provide any facts to support their suggestion that FERC could incorporate some or all of the conditions of the certification into the Districts' licenses before the State Water Board takes final action on the Districts' petitions for reconsideration. FERC's licensing process is ongoing, and the additional procedural requirements FERC must follow are almost certain to take substantially longer than the State Water Board will take to act on the Districts' petitions for reconsideration. For example, section 7 of the Endangered Species Act (ESA) requires federal agencies to consult with the United States Fish and Wildlife Service or the National Marine Fisheries Service (NMFS), or both, before engaging in a discretionary action that may

⁴ The footer on the report is dated February 2021.

affect listed species or critical habitat. (16 U.S.C. § 1536.) By letter dated October 2, 2020, NMFS notified FERC that NMFS had closed out FERC's previous consultation requests pursuant to ESA section 7 and the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq., due to inactivity. FERC has yet to reinstate its consultation with NMFS. There is no information to support the conclusion that FERC will imminently issue licenses incorporating some or all of the certification.

Additionally, the asserted prospect of enforcement by the State Water Board generally does not support a stay. It is not the State Water Board's practice to seek enforcement while a petition for reconsideration of a certification is pending. Even where the potential for civil and administrative enforcement were not speculative, the State Water Board has rejected the possibility, or even probability, of enforcement actions as justification for a requested stay because it is very unlikely that the enforcement action would be concluded during the time a stay was in place. (State Water Board Order WQ 2006-0007 (*Boeing Company*), pp. 9-10.) If enforcement is proposed or initiated, the District may seek reconsideration or a stay of the action at that time

Moreover, the State Water Board does not intend to enforce the certification conditions before the federal license is issued (and even then only if enforcement is warranted). In the context of state regulation of FERC-licensed hydroelectric projects, the state's exercise of its state law authority independent of section 401 of the Clean Water Act is subject to Federal Power Act preemption. (*Karuk Tribe of Northern California v. California Regional Water Quality Control Bd., North Coast Region* (2010) 183 Cal.App.4th 330.)⁵ While section 401 makes applicants subject to the state's procedural requirements for certification, the requirement for compliance with the conditions of certification takes effect upon issuance of the federal permit or license. (33 U.S.C. § 1341(d).) Accordingly, there is substantial doubt that the state has authority to enforce the conditions of certification for a FERC-licensed hydroelectric project until and unless the license subjected to the certification is issued. Indeed, the State Water Board has never sought to enforce a certification before the license is issued. In sum, the possibility of enforcement by the State Water Board and, in particular, the conclusion of any enforcement action during the period a stay would be in effect, is far too speculative to warrant a stay.

The Districts have failed to prove substantial harm justifying a stay of the certification while their petition for reconsideration is pending.

⁵ State Water Board Order 2003-0017-DWQ does not apply here. The order applies to discharges of dredged or fill material regulated under Clean Water Act section 404 and issues water discharge requirements to persons who are proposing to discharge dredged or fill material where the discharge is also subject to Clean Water Act section 401 certification. It does not pertain to Clean Water Act section 401 certification of FERC-licensed hydroelectric projects unless expressly provided by the certification.

4.2 The Districts have not shown a lack of substantial harm to other interested persons and the public interest if a stay is granted

As with their argument concerning harm if a stay is not granted, the Districts' arguments concerning a lack of substantial harm to other interested persons and the public if a stay is granted fail to distinguish between harm during the period over which the State Water Board considers the petitions for reconsideration and harm during the 40 to 50 years the FERC license will be in effect. Because the burden of proof is on the Districts, this discussion briefly focuses on the arguments made by the Districts and does not speculate as to the arguments the Districts could have made if they had focused on the limited period a stay would be in effect. It bears emphasis that a stay will not be granted simply because there would be little harm in doing so—it also must be demonstrated that there will be substantial harm to the petitioners or the public interest from not granting a stay.

The Districts allege that a stay would not cause harm because the Legislature has already determined that the uses to which the Districts are putting their water are the highest uses and the certification does not provide any significant benefits. While the Districts fail to address harm during the relatively short period before the State Water Board acts on the petition for reconsideration, this order briefly addresses the issues raised by the Districts' arguments – one issue amounts to a legal argument regarding whether the State Water Board has authority to adopt conditions to protect instream beneficial uses and another mischaracterizes a model referenced by the Board in the environmental document supporting the Bay-Delta Plan amendments.

The Districts first cite to Water Code section 106, which expresses the policy of the state “that the use of water for domestic purposes is the highest use of water and that the next highest use is for irrigation.” The Districts suggest that it is improper to prioritize fish and wildlife beneficial uses in light of section 106, alleging that the certification would take water from these “highest” municipal and agricultural uses “and put it to environmental uses the Legislature has deemed less important.” (Petition, p. 72.) Thus, the Districts conclude, the “Legislature has already determined that the balance of harms tips strongly against the Order.” (*Ibid.*)

The priorities in Water Code section 106 are important, but they are not absolute. Water Code section 107 expressly declares that the declaration of policy in the same chapter (Wat. Code, §§ 100 - 113) “is not exclusive, and all other or further declarations of policy in this code shall be given their full force and effect.” Thus, section 106 must be considered in the context of other statutory declarations of policy that also establish policies for the administration and protection of the state's water resources. Importantly, the Porter-Cologne Water Quality Control Act establishes state policy that the “quality of all the waters of the state shall be protected for use and enjoyment by the people of the state” and “activities and factors which may affect the quality of the waters of the state shall be regulated to attain the highest water quality which is reasonable, considering all demands being made and to be made on those waters and the total values involved” (Wat. Code, § 13000.) The State Water Board is thus required to formulate and adopt

water quality control plans consistent with this policy (§§ 13240, 13170) and which contain water quality objectives that will ensure the reasonable protection of beneficial uses (§ 13241). This includes the reasonable protection of fish and wildlife beneficial uses. (*Id.*, § 13050, subd. (f).)

The California Supreme Court has explained that the primary function of Water Code sections 106 and 106.5 (pertaining to municipal water rights) is to establish priorities among competing appropriators, but that the sections also declare principles of California water policy applicable to any allocation of water resources. (*National Audubon Society v Superior Court* (1983) 33 Cal.3d 419, 447, fn 30.) In the latter context, the Court explained that the policy must be read “in conjunction with later enactments requiring the consideration of in-stream uses . . . and judicial decisions explaining the policy embodied in the public trust doctrine.” (*Ibid.*) Thus, the Court concluded “neither domestic and municipal uses nor in-stream uses can claim an absolute priority.” (*Ibid.*) Contrary to the Districts’ assertion, section 106 does not support the conclusion that the weighing of harms tips against the certification.

The Districts also assert that setting aside the certification will not cause any significant harm to the environment because the SalSim analysis in the Substitute Environmental Document (SED) supporting the 2018 Bay-Delta Plan amendments⁶ shows that the unimpaired flows would have an insignificant benefit to salmon in comparison to the millions of fish produced from state and federal hatcheries. SalSim is a life-history population simulation model for fall-run Chinook salmon originating from the San Joaquin River and its upper three east-side salmon-bearing tributaries (Stanislaus, Tuolumne, and Merced Rivers) developed by the California Department of Fish and Wildlife and others. The Districts’ assertion mischaracterizes the State Water Board’s use of SalSim in the SED. The SED discusses the SalSim model’s application and limitations, including providing a “use advisory,” and is quite clear that the State Water Board did not rely on SalSim due to the model’s limitations, either for impact determinations in the SED or for its conclusions regarding fish benefits.⁷ Moreover, as explained in the SED, scientific information strongly supports the LSJR flow objectives, which require inflow conditions sufficient to support and maintain the natural production of viable native San Joaquin River watershed fish populations migrating through the Delta, and their substantial benefits.

⁶ Final Substitute Environmental Document in Support of Potential Changes to the Water Quality Control Plan for the San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Dec. 12, 2018).

⁷ For example, SalSim is discussed in SED Chapter 19, *Analyses of Benefits to Native Fish Populations from Increased Flow between February 1 and June 30*, and Master Response 3.1, *Fish Protection*, as well as in other SED locations.

Finally, the Districts' declaration addresses the modelled estimated economic impacts of the certification on the regional agricultural economy and does not provide any evidence of lack of harm to other interested persons or the public interest if the stay is granted.

4.3 Substantial questions of fact or law regarding the disputed action

The Districts point to arguments in their petition for reconsideration that there are substantial questions of law and fact regarding the certification. They assert that there is no jurisdiction for the certification, the certification violates the law, and the evidence does not support the certification. Because section 3869 requires a showing of all three factors discussed above, and the Districts have not shown substantial harm to them or the public interest, it is unnecessary to address the legal arguments in this order.

5.0 CONCLUSION

The Districts' request for a stay while a decision on their petition for reconsideration is pending is denied because the Districts have failed to meet their burden of demonstrating that (i) there will be substantial harm to the Districts or the public interest if the stay is not granted, (ii) neither the public interest nor other interested persons will suffer substantial harm if the stay is granted, and (iii) substantial questions of fact or law regarding the disputed action exist.

Nothing in this order implies a decision by the State Water Board on the merits of the Districts' petition for reconsideration. The merits of the petition will be decided at a later date.

Technical Memorandum

Date: May 02, 2018

To: Turlock and Modesto Irrigation Districts

From: Daniel March, PE and Michael Garelo, PE (HDR)

Subject: **Basis of unit cost development for USFWS and CDFW 10(j) recommendations regarding floodplain restoration**

Introduction

This Technical Memorandum (TM) summarizes the development of order of magnitude unit costs representative of the level of effort required to perform floodplain reclamation and restoration adjacent to the lower Tuolumne River. The unit cost is developed using information and knowledge obtained by the Turlock Irrigation District (TID) and HDR Engineering, Inc. (HDR) through the implementation of floodplain restoration projects in the past decade. This final range of unit costs is intended to provide a gross estimate to be scaled to develop high-level cost estimates for floodplain restoration efforts recommended by the USFWS and CDFW in their January 29, 2018 10(j) recommendations on the Don Pedro Project. Neither the agencies, nor the authors of this memo, have verified whether suitable conditions for additional restoration projects even exist in the lower Tuolumne River.

Basis of Costs

Any potential floodplain restoration efforts along the banks of the Tuolumne River would require work under challenging conditions through the gravel mining reach, through Special Run Pool reaches, or through agricultural reaches. Solutions to working with private landowners, getting access (temporary and/or permanent) through active mining operations or agricultural land, acquisition of aggregate or mineral rights, reclamation of tailings ponds, and other types of land use challenges must be identified. A previously designed project was identified and used as the basis of cost to estimate the level of effort and associated cost that would be required. The resulting cost was then divided by the modified floodplain area to generate a unit cost that can be applied on a per acre basis.

For this activity, the previous project estimate developed by TID titled "Tuolumne River Channel Restoration Project: MJ Ruddy – Warner – Deardorff Mining Reaches" located at RM 35.2 to 37.5 was used to evaluate the work tasks and costs required to accomplish the goal of floodplain restoration. Sub reaches of the project were originally designed for TID in 2002 and 2004 and all three reaches were consolidated as one project in 2010. All potential cost items and singular unit costs were escalated to reflect 2018 US dollars. Total project costs were then used to develop unit costs per acre. Base costs are developed to an order of magnitude level of accuracy and therefore the recommended cost per unit acre is provided as a potential range calculated as -20% to +40% of the base unit cost. The basis of costs include the following phases of work:

1. Project formulation, design, and development of construction drawings – Development of specific project objectives, identification of project extents, preliminary design, site surveying and characterization, final design, development of quantities, preparation of contract documents for the purpose of bidding, and coordination among stakeholders and resource agencies.
2. Project right-of-way and easement acquisition – Landowner outreach, identification of temporary and permanent right-of-way limits, development of preliminary right-of-way drawings, verification of mineral rights acquisition costs, verification of real estate value, and final easement or property acquisition.
3. Procurement of nursery stock – Procurement of native plant nursery stock one-year in advance of project construction. Costs include rearing, delivering, and installing native plant materials anticipated for the project.
4. Construction – Execution of a contractual agreement with a prime contractor to provide all labor, equipment, and materials (with the exception of native plants) and installing the project as detailed in the approved drawings and specifications.
5. Post construction monitoring and plant management (assumed to be a minimum of 5 years) – This line item includes carrying forth an agreement with the native plant nursery to actively manage native plantings and perform annual monitoring reports that are to be submitted to the resource agencies as part of the project permitting requirements. Plant management includes non-native weed eradication within the project limits, native plant replacement, and temporary irrigation systems. Monitoring includes collection of water table data, plant survival, and plant replacement activities.

The following project elements describe the example used:

- 134 total acres of floodplain reclaimed and revegetated along 2.8 miles of river;
- 1 mile of water control berm to isolate flood flows from tailings ponds, mining operations, and agricultural land uses (not in conformance with FEMA regulatory requirements);
- 16 acres of existing tailings ponds reclaimed;
- Presence of engineered log jams and other forms of engineered habitat and river training elements were not included;
- The project occurs in an active aggregate mining reach; and
- Access to both sides of the river was required in perpetuity for mining and native plant management operations (performed via railcar bridge in this case).

Estimate Approach

The revised opinion of probable project costs (OPPC) uses volumes from the MJ Ruddy – Warner – Deardorff Mining Reaches restoration project with updated unit costs to reflect assumed 2018 construction costs. A detailed breakdown of all line items is provided in Appendix 1.

1. OPPC for the 100% design of the MJ Ruddy Reach of the Tuolumne River Restoration project prepared for TID in 2002 and 2004 was used as the basis of this OPPC.
2. Unit costs were updated to reflect 2018 US dollars.

3. Gravel mineral rights acquisition costs were computed using minable gravel volumes.
4. Gold mineral rights acquisition costs were computed using minable tonnage resulting from the Mineral Report created for the MJ Ruddy Reach in 2004 (HDR, 2004), averaged site specific fine gold ounces/ton, and current (4/2018) gold prices.
5. Administrative costs are based on typical percentage of construction costs.
6. Total project cost includes administrative, construction, right-of-way, mineral rights and easements.
7. Total project costs are divided by the area of floodplain formed in the example project resulting in cost/acre that are scalable for high level cost estimates of potential projects.

Results

Detailed calculations and results are provided in Appendix 1. A summary of results is provided below. Table 1 provides a summary of costs estimated for the example project which resulted in 134 acres of floodplain restoration. Table 2 provides a range of unit costs for both construction and total project costs (including right-of-way acquisition and implementation costs). The base unit costs of \$262,000/acre and \$385,000/acre were the result of the total construction costs and total project costs divided by the total number of floodplain acres (134). These values are expressed as a range of potential costs (-20% and +40% of the base unit cost) to account for the lack of specificity associated with the 10(j) recommendations.

Table 1. Summary of example project costs.

Cost Item Description	\$US (2018)
Project formulation, design, administration, and owner construction management	\$ 13,304,940
Project right-of-way and easement acquisition	\$ 3,245,364
Procurement, installation, management, and monitoring of nursery stock	\$ 1,245,000
Construction	\$ 33,768,000
Total Example Project Costs	\$ 51,563,304

Table 2. Summary of unit costs expressed in \$US (2018) per acre of floodplain.

Unit Cost Description	LOW (-20%)	BASE	HIGH (+40%)
Unit cost of construction and revegetation	\$ 209,600	\$ 262,000	\$ 366,800
Unit cost of total project costs	\$ 308,000	\$ 385,000	\$ 539,000

SECTION 7: DOCUMENTATION

[United States Code Annotated](#)

[Title 33. Navigation and Navigable Waters \(Refs & Annos\)](#)

[Chapter 26. Water Pollution Prevention and Control \(Refs & Annos\)](#)

[Subchapter IV. Permits and Licenses \(Refs & Annos\)](#)

33 U.S.C.A. § 1341

§ 1341. Certification

[Currentness](#)

(a) Compliance with applicable requirements; application; procedures; license suspension

(1) Any applicant for a Federal license or permit to conduct any activity including, but not limited to, the construction or operation of facilities, which may result in any discharge into the navigable waters, shall provide the licensing or permitting agency a certification from the State in which the discharge originates or will originate, or, if appropriate, from the interstate water pollution control agency having jurisdiction over the navigable waters at the point where the discharge originates or will originate, that any such discharge will comply with the applicable provisions of [sections 1311](#), [1312](#), [1313](#), [1316](#), and [1317](#) of this title. In the case of any such activity for which there is not an applicable effluent limitation or other limitation under [sections 1311\(b\)](#) and [1312](#) of this title, and there is not an applicable standard under [sections 1316](#) and [1317](#) of this title, the State shall so certify, except that any such certification shall not be deemed to satisfy [section 1371\(c\)](#) of this title. Such State or interstate agency shall establish procedures for public notice in the case of all applications for certification by it and, to the extent it deems appropriate, procedures for public hearings in connection with specific applications. In any case where a State or interstate agency has no authority to give such a certification, such certification shall be from the Administrator. If the State, interstate agency, or Administrator, as the case may be, fails or refuses to act on a request for certification, within a reasonable period of time (which shall not exceed one year) after receipt of such request, the certification requirements of this subsection shall be waived with respect to such Federal application. No license or permit shall be granted until the certification required by this section has been obtained or has been waived as provided in the preceding sentence. No license or permit shall be granted if certification has been denied by the State, interstate agency, or the Administrator, as the case may be.

(2) Upon receipt of such application and certification the licensing or permitting agency shall immediately notify the Administrator of such application and certification. Whenever such a discharge may affect, as determined by the Administrator, the quality of the waters of any other State, the Administrator within thirty days of the date of notice of application for such Federal license or permit shall so notify such other State, the licensing or permitting agency, and the applicant. If, within sixty days after receipt of such notification, such other State determines that such discharge will affect the quality of its waters so as to violate any water quality requirements in such State, and within such sixty-day period notifies the Administrator and the licensing or permitting agency in writing of its objection to the issuance of such license or permit and requests a public hearing on such objection, the licensing or permitting agency shall hold such a hearing. The Administrator shall at such hearing submit his evaluation and recommendations with respect to any such objection to the licensing or permitting agency. Such agency, based upon the recommendations of such State, the Administrator, and upon any additional evidence, if any, presented to the agency at the hearing, shall condition such license or permit in such manner as may be necessary to insure compliance with applicable water quality requirements. If the imposition of conditions cannot insure such compliance such agency shall not issue such license or permit.

(3) The certification obtained pursuant to paragraph (1) of this subsection with respect to the construction of any facility shall fulfill the requirements of this subsection with respect to certification in connection with any other Federal license or permit required for the operation of such facility unless, after notice to the certifying State, agency, or Administrator, as the case may be, which shall be given by the Federal agency to whom application is made for such operating license or permit, the State, or if appropriate, the interstate agency or the Administrator, notifies such agency within sixty days after receipt of such notice that there is no longer reasonable assurance that there will be compliance with the applicable provisions of [sections 1311, 1312, 1313, 1316, and 1317](#) of this title because of changes since the construction license or permit certification was issued in (A) the construction or operation of the facility, (B) the characteristics of the waters into which such discharge is made, (C) the water quality criteria applicable to such waters or (D) applicable effluent limitations or other requirements. This paragraph shall be inapplicable in any case where the applicant for such operating license or permit has failed to provide the certifying State, or, if appropriate, the interstate agency or the Administrator, with notice of any proposed changes in the construction or operation of the facility with respect to which a construction license or permit has been granted, which changes may result in violation of [section 1311, 1312, 1313, 1316, or 1317](#) of this title.

(4) Prior to the initial operation of any federally licensed or permitted facility or activity which may result in any discharge into the navigable waters and with respect to which a certification has been obtained pursuant to paragraph (1) of this subsection, which facility or activity is not subject to a Federal operating license or permit, the licensee or permittee shall provide an opportunity for such certifying State, or, if appropriate, the interstate agency or the Administrator to review the manner in which the facility or activity shall be operated or conducted for the purposes of assuring that applicable effluent limitations or other limitations or other applicable water quality requirements will not be violated. Upon notification by the certifying State, or if appropriate, the interstate agency or the Administrator that the operation of any such federally licensed or permitted facility or activity will violate applicable effluent limitations or other limitations or other water quality requirements such Federal agency may, after public hearing, suspend such license or permit. If such license or permit is suspended, it shall remain suspended until notification is received from the certifying State, agency, or Administrator, as the case may be, that there is reasonable assurance that such facility or activity will not violate the applicable provisions of [section 1311, 1312, 1313, 1316, or 1317](#) of this title.

(5) Any Federal license or permit with respect to which a certification has been obtained under paragraph (1) of this subsection may be suspended or revoked by the Federal agency issuing such license or permit upon the entering of a judgment under this chapter that such facility or activity has been operated in violation of the applicable provisions of [section 1311, 1312, 1313, 1316, or 1317](#) of this title.

(6) Except with respect to a permit issued under [section 1342](#) of this title, in any case where actual construction of a facility has been lawfully commenced prior to April 3, 1970, no certification shall be required under this subsection for a license or permit issued after April 3, 1970, to operate such facility, except that any such license or permit issued without certification shall terminate April 3, 1973, unless prior to such termination date the person having such license or permit submits to the Federal agency which issued such license or permit a certification and otherwise meets the requirements of this section.

(b) Compliance with other provisions of law setting applicable water quality requirements

Nothing in this section shall be construed to limit the authority of any department or agency pursuant to any other provision of law to require compliance with any applicable water quality requirements. The Administrator shall, upon the request of any Federal department or agency, or State or interstate agency, or applicant, provide, for the purpose of this section, any relevant information on applicable effluent limitations, or other limitations, standards, regulations, or requirements, or water quality criteria, and shall, when requested by any such department or agency or State or interstate agency, or applicant, comment on any methods to comply with such limitations, standards, regulations, requirements, or criteria.

(c) Authority of Secretary of the Army to permit use of spoil disposal areas by Federal licensees or permittees

In order to implement the provisions of this section, the Secretary of the Army, acting through the Chief of Engineers, is authorized, if he deems it to be in the public interest, to permit the use of spoil disposal areas under his jurisdiction by Federal licensees or permittees, and to make an appropriate charge for such use. Moneys received from such licensees or permittees shall be deposited in the Treasury as miscellaneous receipts.

(d) Limitations and monitoring requirements of certification

Any certification provided under this section shall set forth any effluent limitations and other limitations, and monitoring requirements necessary to assure that any applicant for a Federal license or permit will comply with any applicable effluent limitations and other limitations, under [section 1311](#) or [1312](#) of this title, standard of performance under [section 1316](#) of this title, or prohibition, effluent standard, or pretreatment standard under [section 1317](#) of this title, and with any other appropriate requirement of State law set forth in such certification, and shall become a condition on any Federal license or permit subject to the provisions of this section.

[United States Code Annotated](#)

[Title 33. Navigation and Navigable Waters \(Refs & Annos\)](#)

[Chapter 26. Water Pollution Prevention and Control \(Refs & Annos\)](#)

[Subchapter IV. Permits and Licenses \(Refs & Annos\)](#)

33 U.S.C.A. § 1344

§ 1344. Permits for dredged or fill material

[Currentness](#)

(a) Discharge into navigable waters at specified disposal sites

The Secretary may issue permits, after notice and opportunity for public hearings for the discharge of dredged or fill material into the navigable waters at specified disposal sites. Not later than the fifteenth day after the date an applicant submits all the information required to complete an application for a permit under this subsection, the Secretary shall publish the notice required by this subsection.

(b) Specification for disposal sites

Subject to subsection (c) of this section, each such disposal site shall be specified for each such permit by the Secretary (1) through the application of guidelines developed by the Administrator, in conjunction with the Secretary, which guidelines shall be based upon criteria comparable to the criteria applicable to the territorial seas, the contiguous zone, and the ocean under [section 1343\(c\)](#) of this title, and (2) in any case where such guidelines under clause (1) alone would prohibit the specification of a site, through the application additionally of the economic impact of the site on navigation and anchorage.

(c) Denial or restriction of use of defined areas as disposal sites

The Administrator is authorized to prohibit the specification (including the withdrawal of specification) of any defined area as a disposal site, and he is authorized to deny or restrict the use of any defined area for specification (including the withdrawal of specification) as a disposal site, whenever he determines, after notice and opportunity for public hearings, that the discharge of such materials into such area will have an unacceptable adverse effect on municipal water supplies, shellfish beds and fishery areas (including spawning and breeding areas), wildlife, or recreational areas. Before making such determination, the Administrator shall consult with the Secretary. The Administrator shall set forth in writing and make public his findings and his reasons for making any determination under this subsection.

(d) “Secretary” defined

The term “Secretary” as used in this section means the Secretary of the Army, acting through the Chief of Engineers.

(e) General permits on State, regional, or nationwide basis

(1) In carrying out his functions relating to the discharge of dredged or fill material under this section, the Secretary may, after notice and opportunity for public hearing, issue general permits on a State, regional, or nationwide basis for any category of activities involving discharges of dredged or fill material if the Secretary determines that the activities in such category are similar in nature, will cause only minimal adverse environmental effects when performed separately, and will have only minimal cumulative adverse effect on the environment. Any general permit issued under this subsection shall (A) be based on the guidelines described in subsection (b)(1) of this section, and (B) set forth the requirements and standards which shall apply to any activity authorized by such general permit.

(2) No general permit issued under this subsection shall be for a period of more than five years after the date of its issuance and such general permit may be revoked or modified by the Secretary if, after opportunity for public hearing, the Secretary determines that the activities authorized by such general permit have an adverse impact on the environment or such activities are more appropriately authorized by individual permits.

(f) Non-prohibited discharge of dredged or fill material

(1) Except as provided in paragraph (2) of this subsection, the discharge of dredged or fill material--

(A) from normal farming, silviculture, and ranching activities such as plowing, seeding, cultivating, minor drainage, harvesting for the production of food, fiber, and forest products, or upland soil and water conservation practices;

(B) for the purpose of maintenance, including emergency reconstruction of recently damaged parts, of currently serviceable structures such as dikes, dams, levees, groins, riprap, breakwaters, causeways, and bridge abutments or approaches, and transportation structures;

(C) for the purpose of construction or maintenance of farm or stock ponds or irrigation ditches, or the maintenance of drainage ditches;

(D) for the purpose of construction of temporary sedimentation basins on a construction site which does not include placement of fill material into the navigable waters;

(E) for the purpose of construction or maintenance of farm roads or forest roads, or temporary roads for moving mining equipment, where such roads are constructed and maintained, in accordance with best management practices, to assure that flow and circulation patterns and chemical and biological characteristics of the navigable waters are not impaired, that the reach of the navigable waters is not reduced, and that any adverse effect on the aquatic environment will be otherwise minimized;

(F) resulting from any activity with respect to which a State has an approved program under [section 1288\(b\)\(4\)](#) of this title which meets the requirements of subparagraphs (B) and (C) of such section,

is not prohibited by or otherwise subject to regulation under this section or [section 1311\(a\)](#) or [1342](#) of this title (except for effluent standards or prohibitions under [section 1317](#) of this title).

(2) Any discharge of dredged or fill material into the navigable waters incidental to any activity having as its purpose bringing an area of the navigable waters into a use to which it was not previously subject, where the flow or circulation of navigable waters may be impaired or the reach of such waters be reduced, shall be required to have a permit under this section.

(g) State administration

(1) The Governor of any State desiring to administer its own individual and general permit program for the discharge of dredged or fill material into the navigable waters (other than those waters which are presently used, or are susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce shoreward to their ordinary high water mark, including all waters which are subject to the ebb and flow of the tide shoreward to their mean high water mark, or mean higher high water mark on the west coast, including wetlands adjacent thereto) within its jurisdiction may submit to the Administrator a full and complete description of the program it proposes to establish and administer under State law or under an interstate compact. In addition, such State shall submit a statement from the attorney general (or the attorney for those State agencies which have independent legal counsel), or from the chief legal officer in the case of an interstate agency, that the laws of such State, or the interstate compact, as the case may be, provide adequate authority to carry out the described program.

(2) Not later than the tenth day after the date of the receipt of the program and statement submitted by any State under paragraph (1) of this subsection, the Administrator shall provide copies of such program and statement to the Secretary and the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service.

(3) Not later than the ninetieth day after the date of the receipt by the Administrator of the program and statement submitted by any State, under paragraph (1) of this subsection, the Secretary and the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, shall submit any comments with respect to such program and statement to the Administrator in writing.

(h) Determination of State's authority to issue permits under State program; approval; notification; transfers to State program

(1) Not later than the one-hundred-twentieth day after the date of the receipt by the Administrator of a program and statement submitted by any State under paragraph (1) of this subsection, the Administrator shall determine, taking into account any comments submitted by the Secretary and the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, pursuant to subsection (g) of this section, whether such State has the following authority with respect to the issuance of permits pursuant to such program:

(A) To issue permits which--

(i) apply, and assure compliance with, any applicable requirements of this section, including, but not limited to, the guidelines established under subsection (b)(1) of this section, and [sections 1317](#) and [1343](#) of this title;

(ii) are for fixed terms not exceeding five years; and

(iii) can be terminated or modified for cause including, but not limited to, the following:

(I) violation of any condition of the permit;

(II) obtaining a permit by misrepresentation, or failure to disclose fully all relevant facts;

(III) change in any condition that requires either a temporary or permanent reduction or elimination of the permitted discharge.

(B) To issue permits which apply, and assure compliance with, all applicable requirements of [section 1318](#) of this title, or to inspect, monitor, enter, and require reports to at least the same extent as required in [section 1318](#) of this title.

(C) To assure that the public, and any other State the waters of which may be affected, receive notice of each application for a permit and to provide an opportunity for public hearing before a ruling on each such application.

(D) To assure that the Administrator receives notice of each application (including a copy thereof) for a permit.

(E) To assure that any State (other than the permitting State), whose waters may be affected by the issuance of a permit may submit written recommendations to the permitting State (and the Administrator) with respect to any permit application and, if any part of such written recommendations are not accepted by the permitting State, that the permitting State will notify such affected State (and the Administrator) in writing of its failure to so accept such recommendations together with its reasons for so doing.

(F) To assure that no permit will be issued if, in the judgment of the Secretary, after consultation with the Secretary of the department in which the Coast Guard is operating, anchorage and navigation of any of the navigable waters would be substantially impaired thereby.

(G) To abate violations of the permit or the permit program, including civil and criminal penalties and other ways and means of enforcement.

(H) To assure continued coordination with Federal and Federal-State water-related planning and review processes.

(2) If, with respect to a State program submitted under subsection (g)(1) of this section, the Administrator determines that such State--

(A) has the authority set forth in paragraph (1) of this subsection, the Administrator shall approve the program and so notify (i) such State and (ii) the Secretary, who upon subsequent notification from such State that it is administering such program, shall suspend the issuance of permits under subsections (a) and (e) of this section for activities with respect to which a permit may be issued pursuant to such State program; or

(B) does not have the authority set forth in paragraph (1) of this subsection, the Administrator shall so notify such State, which notification shall also describe the revisions or modifications necessary so that such State may resubmit such program for a determination by the Administrator under this subsection.

(3) If the Administrator fails to make a determination with respect to any program submitted by a State under subsection (g) (1) of this section within one-hundred-twenty days after the date of the receipt of such program, such program shall be deemed approved pursuant to paragraph (2)(A) of this subsection and the Administrator shall so notify such State and the Secretary who, upon subsequent notification from such State that it is administering such program, shall suspend the issuance of permits under subsection (a) and (e) of this section for activities with respect to which a permit may be issued by such State.

(4) After the Secretary receives notification from the Administrator under paragraph (2) or (3) of this subsection that a State permit program has been approved, the Secretary shall transfer any applications for permits pending before the Secretary for activities with respect to which a permit may be issued pursuant to such State program to such State for appropriate action.

(5) Upon notification from a State with a permit program approved under this subsection that such State intends to administer and enforce the terms and conditions of a general permit issued by the Secretary under subsection (e) of this section with respect to activities in such State to which such general permit applies, the Secretary shall suspend the administration and enforcement of such general permit with respect to such activities.

(i) Withdrawal of approval

Whenever the Administrator determines after public hearing that a State is not administering a program approved under subsection (h)(2)(A) of this section, in accordance with this section, including, but not limited to, the guidelines established under subsection (b)(1) of this section, the Administrator shall so notify the State, and, if appropriate corrective action is not taken within a reasonable time, not to exceed ninety days after the date of the receipt of such notification, the Administrator shall (1) withdraw approval of such program until the Administrator determines such corrective action has been taken, and (2) notify the Secretary that the Secretary shall resume the program for the issuance of permits under subsections (a) and (e) of this section for activities with respect to which the State was issuing permits and that such authority of the Secretary shall continue in effect until such time as the Administrator makes the determination described in clause (1) of this subsection and such State again has an approved program.

(j) Copies of applications for State permits and proposed general permits to be transmitted to Administrator

Each State which is administering a permit program pursuant to this section shall transmit to the Administrator (1) a copy of each permit application received by such State and provide notice to the Administrator of every action related to the consideration of such permit application, including each permit proposed to be issued by such State, and (2) a copy of each proposed general permit which such State intends to issue. Not later than the tenth day after the date of the receipt of such permit application or such proposed general permit, the Administrator shall provide copies of such permit application or such proposed general permit to the Secretary and the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service. If the Administrator intends to provide written comments to such State with respect to such permit application or such proposed general permit, he shall so notify such State not later than the thirtieth day after the date of the receipt of such application or such proposed general permit and provide such written comments to such State, after consideration of any comments made in writing with respect to such application or such proposed general permit by the Secretary and the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, not later than the ninetieth day after the date of such receipt. If such State is so notified by the Administrator, it shall not issue the proposed permit until after the receipt of such comments

from the Administrator, or after such ninetieth day, whichever first occurs. Such State shall not issue such proposed permit after such ninetieth day if it has received such written comments in which the Administrator objects (A) to the issuance of such proposed permit and such proposed permit is one that has been submitted to the Administrator pursuant to subsection (h)(1)(E), or (B) to the issuance of such proposed permit as being outside the requirements of this section, including, but not limited to, the guidelines developed under subsection (b)(1) of this section unless it modifies such proposed permit in accordance with such comments. Whenever the Administrator objects to the issuance of a permit under the preceding sentence such written objection shall contain a statement of the reasons for such objection and the conditions which such permit would include if it were issued by the Administrator. In any case where the Administrator objects to the issuance of a permit, on request of the State, a public hearing shall be held by the Administrator on such objection. If the State does not resubmit such permit revised to meet such objection within 30 days after completion of the hearing or, if no hearing is requested within 90 days after the date of such objection, the Secretary may issue the permit pursuant to subsection (a) or (e) of this section, as the case may be, for such source in accordance with the guidelines and requirements of this chapter.

(k) Waiver

In accordance with guidelines promulgated pursuant to [subsection \(i\)\(2\) of section 1314](#) of this title, the Administrator is authorized to waive the requirements of subsection (j) of this section at the time of the approval of a program pursuant to subsection (h)(2)(A) of this section for any category (including any class, type, or size within such category) of discharge within the State submitting such program.

(l) Categories of discharges not subject to requirements

The Administrator shall promulgate regulations establishing categories of discharges which he determines shall not be subject to the requirements of subsection (j) of this section in any State with a program approved pursuant to subsection (h)(2)(A) of this section. The Administrator may distinguish among classes, types, and sizes within any category of discharges.

(m) Comments on permit applications or proposed general permits by Secretary of the Interior acting through Director of United States Fish and Wildlife Service

Not later than the ninetieth day after the date on which the Secretary notifies the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service that (1) an application for a permit under subsection (a) of this section has been received by the Secretary, or (2) the Secretary proposes to issue a general permit under subsection (e) of this section, the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, shall submit any comments with respect to such application or such proposed general permit in writing to the Secretary.

(n) Enforcement authority not limited

Nothing in this section shall be construed to limit the authority of the Administrator to take action pursuant to [section 1319](#) of this title.

(o) Public availability of permits and permit applications

A copy of each permit application and each permit issued under this section shall be available to the public. Such permit application or portion thereof, shall further be available on request for the purpose of reproduction.

(p) Compliance

Compliance with a permit issued pursuant to this section, including any activity carried out pursuant to a general permit issued under this section, shall be deemed compliance, for purposes of [sections 1319](#) and [1365](#) of this title, with [sections 1311](#), [1317](#), and [1343](#) of this title.

(q) Minimization of duplication, needless paperwork, and delays in issuance; agreements

Not later than the one-hundred-eightieth day after December 27, 1977, the Secretary shall enter into agreements with the Administrator, the Secretaries of the Departments of Agriculture, Commerce, Interior, and Transportation, and the heads of other appropriate Federal agencies to minimize, to the maximum extent practicable, duplication, needless paperwork, and delays in the issuance of permits under this section. Such agreements shall be developed to assure that, to the maximum extent practicable, a decision with respect to an application for a permit under subsection (a) of this section will be made not later than the ninetieth day after the date the notice for such application is published under subsection (a) of this section.

(r) Federal projects specifically authorized by Congress

The discharge of dredged or fill material as part of the construction of a Federal project specifically authorized by Congress, whether prior to or on or after December 27, 1977, is not prohibited by or otherwise subject to regulation under this section, or a State program approved under this section, or [section 1311\(a\)](#) or [1342](#) of this title (except for effluent standards or prohibitions under [section 1317](#) of this title), if information on the effects of such discharge, including consideration of the guidelines developed under subsection (b)(1) of this section, is included in an environmental impact statement for such project pursuant to the National Environmental Policy Act of 1969 and such environmental impact statement has been submitted to Congress before the actual discharge of dredged or fill material in connection with the construction of such project and prior to either authorization of such project or an appropriation of funds for such construction.

(s) Violation of permits

(1) Whenever on the basis of any information available to him the Secretary finds that any person is in violation of any condition or limitation set forth in a permit issued by the Secretary under this section, the Secretary shall issue an order requiring such person to comply with such condition or limitation, or the Secretary shall bring a civil action in accordance with paragraph (3) of this subsection.

(2) A copy of any order issued under this subsection shall be sent immediately by the Secretary to the State in which the violation occurs and other affected States. Any order issued under this subsection shall be by personal service and shall state with reasonable specificity the nature of the violation, specify a time for compliance, not to exceed thirty days, which the Secretary determines is reasonable, taking into account the seriousness of the violation and any good faith efforts to comply with applicable requirements. In any case in which an order under this subsection is issued to a corporation, a copy of such order shall be served on any appropriate corporate officers.

(3) The Secretary is authorized to commence a civil action for appropriate relief, including a permanent or temporary injunction for any violation for which he is authorized to issue a compliance order under paragraph (1) of this subsection. Any action under this paragraph may be brought in the district court of the United States for the district in which the defendant is located or

resides or is doing business, and such court shall have jurisdiction to restrain such violation and to require compliance. Notice of the commencement of such action¹ shall be given immediately to the appropriate State.

(4) Any person who violates any condition or limitation in a permit issued by the Secretary under this section, and any person who violates any order issued by the Secretary under paragraph (1) of this subsection, shall be subject to a civil penalty not to exceed \$25,000 per day for each violation. In determining the amount of a civil penalty the court shall consider the seriousness of the violation or violations, the economic benefit (if any) resulting from the violation, any history of such violations, any good-faith efforts to comply with the applicable requirements, the economic impact of the penalty on the violator, and such other matters as justice may require.

(t) Navigable waters within State jurisdiction

Nothing in this section shall preclude or deny the right of any State or interstate agency to control the discharge of dredged or fill material in any portion of the navigable waters within the jurisdiction of such State, including any activity of any Federal agency, and each such agency shall comply with such State or interstate requirements both substantive and procedural to control the discharge of dredged or fill material to the same extent that any person is subject to such requirements. This section shall not be construed as affecting or impairing the authority of the Secretary to maintain navigation.

TURLOCK IRRIGATION DISTRICT
(a Public Corporation), Respondent,

v.

JAMES G. WHITE, Tax
Collector, etc., et al., Appellants.

Supreme Court of California.

Sac. No. 2935.

June 15, 1921.

[1]

TAXATION—LANDS OF MUNICIPAL CORPORATIONS
OUTSIDE CORPORATE BOUNDARIES— EXCEPTION
FROM EXEMPTION—INAPPLICABILITY OF
CONSTITUTIONAL AMENDMENT TO IRRIGATION
DISTRICTS.

An irrigation district organized under the laws of the state is not a municipal corporation within the meaning of such term as used in the amendment of 1914 to section 1 of article XIII of the constitution, which excepts from exemption for taxation such lands and improvements belonging to a municipal corporation located outside of the municipality as were subject to taxation at the time of their acquisition.

[2]

IRRIGATION DISTRICT—NATURE OF.

An irrigation district is not a municipal corporation, but a public corporation for municipal purposes.

[3]

TAXATION—EXEMPTION OF IRRIGATION DISTRICTS
PRIOR TO CONSTITUTIONAL AMENDMENT—
PROPERTY OF THE STATE.

Under section 1 of article XIII of the constitution before its amendment in 1914, irrigation districts were exempted from taxation under the express exemption of the property of the state, and not under the special exemption of property of municipal corporations.

APPEAL from a judgment of the Superior Court of Tuolumne County. G. W. Nicol, Judge. Affirmed.

The facts are stated in the opinion of the court.

*183 Rowan Hardin for Appellants.

P. H. Griffin and Griffin, Boone & Boone for Respondent.

THE COURT.

This appeal is by defendants from a judgment enjoining them from attempting to collect certain taxes levied by the defendant county against lands of the plaintiff.

The plaintiff, an irrigation district, whose corporate boundaries are wholly within the counties of Merced and Stanislaus, is the owner of land situated in the county of Tuolumne. It is the taxation of this land by the county of Tuolumne that is sought to be enjoined.

*184 Authority to levy and collect such tax is claimed by the defendant county under the amendment of 1914 to section 1 of article XIII of the state constitution. As this section of the constitution previously stood, it provided that no property belonging to the "United States, this state, or to any county or municipal corporation within this state" shall be subject to taxation. The amendment excepts from such exemption "such lands and the improvements thereon located outside of the county, city and county, or municipal corporation owning same as were subject to taxation at the time of the acquisition of the same by said county, city and county, or municipal corporation."

The entire controversy in this case is as to whether or not an irrigation district, organized under the laws of California, is a "municipal corporation" within the meaning of this section of the constitution.

This amendment to the constitution (article XIII, section 1) was submitted by the legislature to the people in November, 1914. A printed argument in favor of its adoption accompanied the publication of the proposed amendment, a copy of such argument being mailed to each voter in the state as required by law. (Pol. Code, secs. 1195, 1195a, 1195b.) This argument in favor of the proposed amendment clearly explains its purpose, and the voters in acting upon the amendment must be deemed to have considered such reasons in interpreting the general term "municipal corporation" used in the proposed amendment. The argument, in part, was as follows:

... This amendment does not seek to hinder in any way the development of enterprises by and for the benefit of counties or municipalities, in any part of the state, but to protect from loss those counties into which they may enter for such

purposes. A concrete illustration is afforded by the counties of Tuolumne, Mono, and Inyo. In furtherance of obtaining a large water supply, for municipal and other uses, the purchase by San Francisco in Tuolumne County aggregated over one million dollars' worth of property. Los Angeles, in Owens River valley, acquired by purchase over seventy five thousand acres of land, amounting to over one-sixth of the assessed value, and more than one-fourth of the of the located agricultural land of the county. The city of Los Angeles has acquired large holdings in Mono County. Before *185 such acquisition the area was taxpaying property. Since the acquisition in Inyo County the city of Los Angeles has continued to pay taxes, as a matter of justice, but its payments are accompanied by protests, in order to preserve to it the right of refusal to pay which many contend that it has under the constitutional provision as it stands at present, and that it might sustain in case of legal contest. While not abandoning any right from a technical standpoint, the city recognizes the justice of the contention upon which this amendment is based.

The city of San Francisco refuses absolutely to pay one dollar in taxes in Tuolumne County on their one million dollars' worth of property, contending they are exempt from such a tax by a constitutional provision....

It would be possible for an acquiring city or county to virtually destroy the government of a small county by acquiring, for one purpose or another, for municipal use, the substance of its revenue-yielding property. That such a result would be improbable and extreme does not alter the fact of its possibility. In the Inyo county instance, refusal by the city of Los Angeles to pay taxes upon real estate which has heretofore borne its due share of the expense of the county government would be a serious matter, either curtailing the county's welfare or imposing a heavier burden on other property. With such a result possible to a fractional extent, it would be equally possible to the fullest extent that the investing city might see fit to go.

It is to remedy such a condition that this amendment was proposed. Uncertainty on the matter should be removed by a legal assurance that while natural resources within one county may be directly used for the upbuilding of another, lands or other property already upon the invaded county's tax-roll shall continue to bear its share of maintaining the local government.

"It is hoped, therefore, that the justice of this amendment will insure for it the approval of the people of the state."

It is apparent that the term "municipal corporation" was thus presented to the people as synonymous with such corporations as Los Angeles and San Francisco, that is to say, as municipal corporations in the strict technical sense.

*186 In their brief appellants say: "To start with it will be admitted that by the late decisions of the supreme court said decisions have by an exceedingly fine analysis, determined that, as a technical legal proposition, an irrigation district is an arm of the state government or a public corporation and not a municipal corporation as the term municipal corporation is technically known." However, appellants' contention is that the term "municipal corporation," in its popular acceptance, includes irrigation district and consequently this popular meaning is to be applied rather than a technical one. The rule appellants rely on is thus stated in a recent case (*City of Pasadena v. Railroad Commission*, 183 Cal. 526, [10 A. L. R. 1425, 192 Pac. 25]): "... The constitution, 'unlike the acts of our legislature, owes its whole force and authority to its ratification by the people; and they judged of it by the meaning apparent on its face according to the general use of the words employed, where they do not appear to have been used in a legal or technical sense.' (*Miller v. Dunn*, 72 Cal. 465, [1 Am. St. Rep. 67, 14 Pac. 27, 28].) Where a word has a popular and also a technical meaning, 'the courts will accord to it its popular meaning, unless the very nature of the subject indicates or the context suggests that it is employed in its technical sense.' (*Weill v. Kenfield*, 54 Cal. 113.)" Other instances of its application may be found in *Miller v. Dunn*, 72 Cal. 462-465, [1 Am. St. Rep. 67, 14 Pac. 27]; *Towle v. Matheus*, 130 Cal. 574-577, [62 Pac. 1064]; *San Pedro etc. R. Co. v. Hamilton*, 161 Cal. 610-617, [37 L. R. A. (N. S.) 686, 119 Pac. 1073]; *Perrin v. Miller*, 35 Cal. App. 129-132, [169 Pac. 426].

In support of the proposition that the term "municipal corporation" as commonly understood includes an irrigation district, the following quotation from *Merchants' Bank v. Escondido Irr. Dist.*, 144 Cal. 329, [77 Pac. 937], is cited: "... but the term *municipal*, as commonly used, is appropriately applied to all corporations exercising governmental functions, either general or special; and, indeed, this must be taken as the definition of a *public* or *municipal corporation*." Appellants also cite the following from *In re Madera Irr. Dist.*, 92 Cal. 296, 319, [27 Am. St. Rep. 106, 14 L. R. A. 755, 28 Pac. 272, 277]: "The municipal corporations which may be thus created are not limited to cities and towns. The *187 constitution makes provision in various places for municipal corporations, other than cities and towns (article XI, sections 9, 10, 12, 16).

In each of these sections provision is made with reference to the government or officers of 'county, city, town, or other public or municipal corporation,' thus clearly indicating that there may be municipal corporations other than those of a town or city."

(1) The fact that the argument submitted to the voters indicated that the term "municipal corporation" was used with technical accuracy requires that the rule relied upon by appellants be applied against them rather than in favor of their contention, because the very nature of the subject, the context of the amendment, and the manner and reason for its presentation all require that it be construed in its technical sense, and hence, it is within the exception of the rule of construction above stated. There are, however, other cogent reasons for concluding that an irrigation district is not included within the term "municipal corporation" as used in the amendment.

(2) The nature of an irrigation district has been a matter of judicial investigation and interpretation, and it has been held that such a corporation is not a municipal corporation, but a "public corporation for municipal purposes." (*Fallbrook Irr. Dist. v. Bradley*, 164 U. S. 112, [41 L. Ed. 369, 17 Sup. Ct. Rep. 56, see, also, Rose's U. S. Notes].) As to swamp-land, drainage, levee, and reclamation districts, similar to irrigation districts, it has been held that they were not municipal corporations. (*People v. Levee Dist. No. 6*, 131 Cal. 30, [63 Pac. 676]; *People v. Sacramento Drainage Dist.*, 155 Cal. 373, [103 Pac. 207]; *Swamp Land Dist. No. 150 v. Silver*, 98 Cal. 51, [32 Pac. 866]; and *Reclamation Dist. No. 70 v. Sherman*, 11 Cal. App. 399, [105 Pac. 277]. See, also, *People v. Selma Irr. Dist.*, 98 Cal. 206, 208, [32 Pac. 1047], and cases there cited.) The amendment in question must be considered to have been framed and submitted to the people with these decisions in mind, by which it was settled that such corporations were not "municipal corporations."

It is worthy of note that at the very election at which this constitutional amendment was adopted several amendments were submitted in which the term "irrigation district" was used. For illustration, section 13, article XI, was amended to prohibit the legislature from interfering with any county, *188 city, town, or municipal improvement, etc., "except that the legislature shall have power to provide for the supervision, regulation and conduct, in such manner as it may determine, of the affairs of irrigation districts, reclamation districts or drainage districts, organized or existing under any law of this state." Article XI, section 13 1/2, was amended

to include "irrigation district" in the phrase "county, city and county, city, town, *municipality*, or other public corporation," so that the phrase now reads: "Any county, city and county, city, town, municipality, irrigation district or other public corporation," etc., thus tending to impress upon the voter that the term "municipality" did not include an "irrigation district."

At the same election article XI, section 6, was amended by the people. This section restricts the power of the legislature in the formation of municipal corporations, to providing by general law for their formation, and prohibits the formation of such corporations by special statute. That section uses the term "municipal corporation" as synonymous with "cities and towns." The section reads, in part, as follows: "Sec. 6. Corporations for municipal purposes shall not be created by special laws, but the legislature shall by general laws provide for the incorporation, organization and classification, in proportion to population, of cities and towns ..."

If it were intended by the legislature and by the people to use the term "municipal corporation" with its broadest possible meaning in article XIII, section 1, *supra*, it is reasonable to suppose that language similar to that contained in article XI, section 13 1/2, *supra*, would have been employed, expressly including, as does the latter section, the term "irrigation districts."

One of the important rules of constitutional construction is thus stated by Mr. Cooley: "If a difficulty really exists, which an examination of every part of the instrument does not enable us to remove, there are certain extrinsic aids which may be resorted to, and which are more or less satisfactory in the light they afford. Among these aids is a contemplation of *the object to be accomplished or the mischief to be remedied or guarded against* by the clause in which the ambiguity is met with." (Cooley's Constitutional Limitations, p. 100. [Italics the author's.]

*189 In view of the general policy of the law and the great necessity on which that policy rests, that property held by public corporations shall not be taxed by the state, much less by other public corporations, and the plain fact that this particular amendment of the constitution was manifestly inspired by the desires of three counties to prevent Los Angeles and San Francisco from escaping taxation on property owned by them situated outside their limits for the carrying on of public water systems, together with the further fact that the constitution itself in other parts thereof describes

“municipal corporations” and provides for their creation in such a way that it cannot be doubted that none other than the ordinary municipal corporations were referred to, it is clear that irrigation districts were not made taxable by the exception contained in the amendment in question.

(3) It should be stated that it is conceded that irrigation districts were not taxable before the amendment of 1914, and are not now, unless such taxation is authorized by the amendment, but it is contended that they then were exempt because of the special exemption of the property of “municipal corporations” contained in such section, and that such irrigation districts are now taxable under the special exception in the amendment authorizing the taxation of “municipal corporations.” To the contrary, such exemption existed because of the express exemption of the property of “the state,” contained in that section and because of the implications in favor of the exemption of public property. (See [Reclamation Dist. No. 551 v. County of Sacramento](#), 134 Cal. 477, [66 Pac. 668], and cases therein cited for a discussion of the principle applicable. See, also, [Webster v. Board of Regents](#), 163 Cal. 705, [126 Pac. 974], and cases cited.) Reference may also be made to [Central Irr. Dist. v. De Lappe](#), 79 Cal. 351, [21 Pac. 825], and [Lindsay-Strathmore Irr. Dist. v. Superior Court](#), 182 Cal. 315, [187 Pac. 1056], for a discussion of the similarity of the organization of reclamation and irrigation districts.

The language quoted in the dissenting opinion from [Southern Pacific Co. v. Levee Dist. No. 1](#), 172 Cal. 345, [156 Pac. 502], read in the light of the express statement in the opinion that such districts are not “municipal corporations,” would indicate that the court considered that the property of the district was “state property” rather than property of a *190 “municipal corporation.” The same view is taken in [People v. Reclamation Dist. No. 551](#), 117 Cal. 114, [48 Pac. 1016], where it is said: “Certainly these districts were not municipal corporations, as that term is used in the constitution ... If these districts can be said to be corporations at all, I think they are properly called public corporations for municipal purposes. That phrase means no more than that they are state organizations for state purposes. They are certainly not municipal corporations in the strict sense.” Similarly in [Re Madera Irr. Dist.](#), 92 Cal. 296, 322, [27 Am. St. Rep. 106, 14 L. R. A. 755, 28 Pac. 272, 278], it was said: “The property held by the corporation is in trust for the public, and subject to the control of the state.”

However, the reasons presented for the conclusion reached in [Southern Pacific Co. v. Levee Dist. No. 1](#), 172 Cal. 345, [156 Pac. 502], were so numerous and cogent that the differentiation between the various forms of taxing agencies was of little, if any, weight in arriving at the conclusion that it was intended by the amendment to prohibit all such agencies from exercising the taxing power over railroad corporations, that the decision is of little or no assistance in reaching a conclusion on the question involved here.

Judgment affirmed.

Wilbur, J., Angellotti, C. J., Shaw, J., Olney, J., Lennon, J., and Lawlor, J., concurred.

SLOANE, J., Dissenting.

I dissent. The reasoning of the majority opinion that this constitutional provision should be strictly interpreted against the tax in question because all intendments of the law are against the taxation of public property cannot apply in this instance, because here the provision involved is avowedly dealing with the taxation of public property.

Section 1 of article XIII expressly defines what classes of public property shall be exempt from taxation. It discloses, first, “that all property in the state except as otherwise in this constitution provided, not exempt under the laws of the United States, shall be taxed.” Standing alone, under the rule cited, this might not include public property, exempt under the general rule of public policy, but the section proceeds with a proviso which shows *191 that it is dealing with the subject of taxation as applied to both public and private property.

The proviso is, that various enumerated classes of property, including “such as may belong to the United States, this state, or any county, city and county, or municipal corporation within this state, shall be exempt from taxation.”

It is entirely clear that unless the property of an irrigation district is either the property of the state or of a municipal corporation, it is not exempt from taxation at all. When the legislature or constitution has made express provision for the exemption of certain classes of public property, the inference is clear that it did not intend that other classes should be exempt. (26 R. C. L., p. 291; [Chicago Sanitary Dist. v. Martin](#), 173 Ill. 243, [64 Am. St. Rep. 110, 50 N. E. 201]; [Board of Trustees v. Atlanta](#), 113 Ga. 883, [54 L. R. A. 806, 39 S. E. 394].) But under our constitution the matter is made

conclusive by the direction that all property not so enumerated shall be taxed.

This court was confronted with such an alternative in the case of *Reclamation Dist. v. Sacramento*, 134 Cal. 477, [66 Pac. 668]. As stated in the opinion in that case: “The role question presented is, whether property acquired by a reclamation district as necessary and indispensable to the execution of its objects is subject to taxation for state and county purposes.” Exemption was claimed for this property by the district under section 1 of article XIII of the constitution as it read prior to the amendment of 1914 exempting all property which belongs to “this state, or to any county or municipal corporation within this state.” Reviewing the authorities on the question as to whether or not a reclamation district was a municipal corporation, without directly passing upon this point, the court disposes of the case upon another theory. It says: “It is not necessary to hold this property, thus acquired, to be the property of a municipal corporation, in order to make it exempt from taxation. It would be sufficient to hold that it is public property of the state, within the meaning of the constitution.”

It requires great latitude of construction to hold the property of a reclamation district as property “belonging *192 to the state,” but, considering the nature of such district organization with its limited corporate powers under the law as it existed at the time covered by this decision, it was perhaps a more logical conclusion than to class it as a municipal corporation.

The supreme court of Illinois in determining the liability of a drainage district of the city of Chicago to taxation upon property it owned outside the corporate limits of the city under analogous constitutional provisions (*Chicago Sanitary Dist. v. Martin*, 173 Ill. 243, [64 Am. St. Rep. 110, 50 N. E. 201]), held that as the legal title to the property was vested in the district, it could not be held to be property “belonging to the state.”

People v. Morrill, 26 Cal. 336, defines “lands belonging to the state” as those “(1), which it holds by virtue of grants from the United States; (2), those which it owns by reason of its sovereignty.” In either event, the term implies ownership and not mere authority and control over. In view of the fact that the law of California governing irrigation districts expressly provides that “the legal title to all property acquired under the provisions of this act shall immediately and by operation of law vest in such irrigation district,” it would be an elastic use of terms to hold that the interests of the state in such lands

amounts to such ownership as to justify holding such property to belong to the state.

As previously pointed out, the only remaining alternative which will permit of any exemption of irrigation district property at all is to include such district for the purposes of this section as a “municipal corporation.”

It, of course, follows that if the general exemption clause of section 1, article XIII, of the constitution, includes irrigation districts under the classification of “municipal corporations,” the exception from such exemption of “lands and the improvements thereon located outside the county, city and county or municipal corporation owning the same,” must also apply to such irrigation districts, for the term “municipal corporations” is obviously used in the same sense in both connections.

But the most persuasive reason for classifying an irrigation district as a municipal corporation under this constitutional provision is that any other construction, in my *193 opinion, defeats the very apparent purpose of the amendment.

It is doubtless true, as set forth in the argument presented to the voters on the submission of this amendment, that the inducing cause of the amendment was the acquisition of large real estate interests in the counties of Tuolumne, Mono, and Inyo for reservoir purposes by the distant cities of Los Angeles and San Francisco. These corporations happen to be governmental municipalities, but that was not the circumstance which appealed to the voters of these counties and others likely to be invaded by public power and water purveyors.

The real purpose was to prevent abuses threatened and likely to recur from permitting private lands subject to taxation in one jurisdiction to be taken over for public uses by other communities and by depriving the territory in which the lands are situated of the revenue from this taxation thus throw part of the burden of such public use upon territory not benefited by it. What possible reason or justification could there be for protecting these outside jurisdictions from the incursions of towns and cities in search of water storage and distribution and leaving them exposed to precisely the same invasion by extensive irrigation districts outside their territory. The gist of the matter clearly appears in the part of the argument for this constitutional amendment which says: “Uncertainty on this matter should be removed by a legal assurance that while natural resources within one county may be directly used for

the upbuilding of another, lands or other property already upon the invaded county's tax-roll shall continue to bear its share of maintaining the county government.”

The direct object of the amendment was to protect and conserve the revenues of the invaded territory, and with that object in view it can make no difference whether the public use acquired is by a city or county, or some other public corporation exercising municipal functions.

No violence is done to the rules of construction under the interpretation of the term “municipal corporations” here contended for. It is common knowledge that in popular usage the term “municipal corporation” is understood as applying to all departments of state organization *194 exercising public functions, and the same general use of the term is common in judicial decisions and with law text-writers.

In 19 Ruling Case Law, page 691, it is said that “municipal” in its primary sense means “pertaining to a town or city or to its local government,” but it also declares that the word “municipal” “has two meanings, one of which is pertaining to the internal government of a state or nation, and in that sense every corporation formed for governmental purposes is a municipal corporation”; and, further, at page 696, it is said: “The legislature frequently organizes the people of a certain territory into a district having certain limited powers for the carrying out of some particular public purpose. Familiar examples are school districts ... irrigation districts, levee districts ... but it has been held that such a district is a ‘corporation for municipal purposes.’ ” Such district organizations are very commonly referred to in the California decisions as public corporations for municipal purposes, or quasi-municipal corporations. (*Merchants' Bank v. Escondido Irr. Dist.*, 144 Cal. 329, [77 Pac. 937]; *People v. Reclamation Dist.*, 117 Cal. 120, [48 Pac. 1016]; *Central Irr. Dist. v. De Lappe*, 79 Cal. 351, [21 Pac. 825]; *Turlock Irr. Dist. v. Williams*, 76 Cal. 366, [18 Pac. 379]; *Hughes v. Ewing*, 93 Cal. 414, [28 Pac. 1067]; *Perry v. Otay Irr. Dist.*, 127 Cal. 565, [60 Pac. 40]; *Jenison v. Redfield*, 149 Cal. 500, [87 Pac. 62]; *Fogg v. Perris Irr. Dist.*, 154 Cal. 209, [97 Pac. 316]; *Healey v. Anglo-Californian Bank*, 5 Cal. App. 278, [90 Pac. 54]; *Dean v. Davis*, 51 Cal. 409.)

The same classification is maintained in the federal courts in the consideration of such districts under the laws of California. (*Fallbrook Irr. Dist. v. Bradley*, 164 U. S. 174, [41 L. Ed. 369, 17 Sup. Ct. Rep. 56]; *Tulare Irr. Dist. v. Shepherd*, 185 U. S. 1, [46 L. Ed. 773, 22 Sup. Ct. Rep. 531], see, also,

Rose's U. S. Notes]; *Herring v. Modesto Irr. Dist.*, 95 Fed. 705.)

In the construction of words used in a constitution a more general and inclusive definition is often recognized than in the more technical provisions of a statute or a contract. A constitution is the formulation of broad general *195 rules of governmental policy submitted to the popular will and understanding for their adoption.

“Where a word, having a technical as well as a popular meaning, is used in a constitution, the courts will accord to it its popular signification.” (*Weill v. Kenfield*, 54 Cal. 111; *Miller v. Dunn*, 72 Cal. 462, 465, [1 Am. St. Rep. 67, 14 Pac. 27]; *Towle v. Matheus*, 130 Cal. 574, 577, [62 Pac. 1064]; *San Pedro etc. R. Co. v. Hamilton*, 161 Cal. 610, 617, [37 L. R. A. (N. S.) 686, 119 Pac. 1077]; *Perrin v. Miller*, 35 Cal. App. 129, 132, [169 Pac. 426].)

This rule of liberal construction appears to have been applied by this court in *Southern Pac. Co. v. Levee Dist. No. 1*, 172 Cal. 345, [156 Pac. 502], construing the use of the word “municipal” in an amendment to the state constitution in a way which we think has a marked bearing on this case. In the amendment of the constitution by adoption of the new section 14, article XIII, for the purpose of changing the system of taxation of corporations, it was declared that the system of taxation provided should “be in lieu of all other taxes and licenses, state, county and municipal.” Levee District No. 1 of Sutter County, being a levee district organized under the act of the legislature for the creation of such districts, undertook to levy a tax upon property of the Southern Pacific Company within such district, and attempted to sustain the validity of such tax against the plea of this constitutional amendment on the ground that it is a district and not a municipality, and that the amendment does not exempt from district taxation. This court in the case cited, while holding directly that such levy district was not a municipal corporation, decided upon an exhaustive consideration of the purposes of the section, and the obvious intent of the constitutional amendment, that district taxes of this nature were included under the term “municipal,” and says: “It would appear to be beyond peradventure, therefore, that when the constitution declared that the state taxes ‘shall be in lieu of all other taxes, state, county, and municipal’ it used the words ‘state, county and municipal’ as inclusive and descriptive, and not as designed to exempt districts from its operation ...”

An irrigation district probably comes nearer than any other of the subordinate public corporations of the state *196 to meeting the technical requirements defining a municipal corporation. It has its own directors and officers, conducts its own elections, can sue and be sued in its corporate name, issues bonds, levies, collects, and disburses its own revenues, acquires and holds property, both real and personal, in its own name, and in the management of its internal affairs is entirely independent of the county and state, aside from the control of general laws.

While the courts have frequently drawn the line between public corporations of a *quasi*-municipal character and those performing strictly municipal functions, it has usually been for the purpose of defining limitations upon the political powers of these lesser state agencies, but no reason seems to exist why the distinction should be pushed so far in this case as to exclude irrigation districts from the operation of the constitutional amendment under discussion.

Rehearing denied.

Court of Appeal, Fourth District, Division 1, California.

Salvador BASURTO,
Plaintiff and Appellant,

v.

IMPERIAL IRRIGATION DISTRICT,
Defendant and Respondent.

D058353

Filed November 8, 2012

Synopsis

Background: Former employee brought action against irrigation district for age and race discrimination in violation of Fair Employment and Housing Act (FEHA) and wrongful termination, and petitioned for writ of mandate challenging the district board's adverse decision on his administrative challenge to his termination. The Superior Court, Imperial County, No. ECU01967, [Joseph W. Zimmerman, J.](#), granted summary judgment for district. Employee appealed.

Holdings: The Court of Appeal, [Haller, J.](#), held that:

district board hearing was sufficiently judicial for collateral estoppel effect;

district board did not suffer from any inherent bias precluding its administrative hearing from having collateral estoppel effect; and

board decided same issue underlying civil action in administrative hearing.

Affirmed.

****148** APPEAL from a judgment of the Superior Court of Imperial County, [Joseph W. Zimmerman](#), Judge. Affirmed. (Super. Ct. No. ECU01967)

***870 I. INTRODUCTION**

Plaintiff Salvador Basurto (Basurto) appeals from the trial court's order granting summary judgment in favor of defendant Imperial Irrigation District (the District) on Basurto's damages claims alleging age and/or race discrimination and wrongful termination. The trial court determined that Basurto's civil claims were barred, under principles of collateral estoppel and res judicata, by a prior adverse administrative decision of the District's governing board (District Board). In that hearing, the District Board had concluded, after an evidentiary adversarial hearing pursuant ****149** to the District's internal grievance procedures, that Basurto's termination for causing a serious vehicular accident while affected by alcohol was supported by the evidence and warranted under the District's policies regarding alcohol use and negligent operation of a District vehicle. Basurto did not raise his discrimination and wrongful termination allegations at that hearing, nor did he raise issues of claimed bias and due process violations.

Basurto challenged the administrative ruling by means of a petition for writ of mandate and civil complaint in the superior court. In the writ petition, Basurto alleged that the District's internal grievance procedures had denied him due process and that the District Board could not be impartial. He did not argue that the evidence did not support the District Board's findings. The trial court ultimately denied the writ petition, finding that Basurto had waived his due process and bias claims by failing to raise them at his administrative hearing. On the District's subsequent summary judgment motion on the civil complaint, the trial court determined that Basurto had been "afforded due process and the opportunity to raise every theory under which his right to continued employment may have been affected, including whether he was discriminated against based on his age and/or race." It therefore granted summary judgment in the District's favor on the civil complaint, citing [Johnson v.](#)

[City of Loma Linda \(2000\) 24 Cal.4th 61, 99 Cal.Rptr.2d 316, 5 P.3d 874 \(Johnson\)](#) and [Takahashi v. Board of Education of Livingston Union School District \(1988\) 202 Cal.App.3d 1464, 249 Cal.Rptr. 578 \(Takahashi\)](#).

On appeal from the trial court's judgment, Basurto primarily contends that the District Board's decision should not bar his civil claims because the District's internal complaint procedures are not of a sufficient "judicial character" to allow application of collateral estoppel or res judicata. We disagree. The administrative hearing conducted by the District Board possessed the critical attributes of a quasi-judicial proceeding, including the *871 ability for Basurto to be represented by counsel before an impartial panel, to raise any and all claims pertinent to his discharge, and to present evidence and cross-examine witnesses. We reject Basurto's contention that the District Board could never be impartial as a decision maker when a ruling in an employee's favor could have an adverse financial consequence to the District. If that were the case, no administrative proceeding involving an employment or disciplinary dispute could ever be valid and binding. The law does not support such a categorical invalidation of adjudications by an administrative agency. Accordingly, we affirm.

II. FACTUAL AND PROCEDURAL BACKGROUND

A. Basurto's Discharge and the Initial Administrative Proceeding

The facts underlying this appeal are largely undisputed. Basurto was employed for approximately 31 years by the District as a zanjero,¹ delivering water to farmers using a District vehicle. About 8:00 a.m. on March 31, 2003, while on duty and driving a District vehicle, Basurto was involved in a collision with another vehicle, causing extensive property damage to both vehicles and personal injury to the driver of the other car. The police report on the accident indicated that Basurto admitted **150 to the responding officer that he had consumed alcohol the previous evening. The police conducted a field sobriety examination and a "preliminary alcohol screening device" test, and determined that Basurto still had alcohol in his system, with a blood-alcohol level of 0.031 percent at the time of the accident. (Capitalization omitted.) The police concluded that Basurto "was not under the influence of an alcoholic beverage," but that he caused the

accident by failing to yield the right of way. (Capitalization omitted.)

¹ "One who is in charge of water distribution." (<<http://wordsmith.org/words/zanjero.html>> [as of Nov. 8, 2012].)

This incident prompted the District to discharge Basurto on April 18, 2003. At that time, Basurto was 55 years old. He appealed his discharge through the District's internal complaint procedures, contending that termination was too strong a penalty and that other employees who had been "compromised" had not been discharged but had received less severe discipline. Basurto's complaint was reviewed by his supervisor, the department head, the management committee, and finally, the District Board. At all levels, his complaint was denied.

Before issuing its decision on February 26, 2004, the District Board held a hearing and received testimony and documentary evidence in accordance with *872 its internal procedures. In addition to hearing evidence of the circumstances surrounding the accident in question, the District Board also received evidence that twice before during the prior 10 years, Basurto had been disciplined for negligent vehicle operation, although generally he had received very favorable performance evaluations during that period. In denying his complaint, the District Board concluded that Basurto had violated District policies and procedures prohibiting employees from reporting to work while under the influence of alcohol, and that he had negligently operated his District vehicle.

B. The Initial Writ Petition and Complaint

Basurto filed a claim with California's Department of Fair Employment and Housing on April 13, 2004, and thereafter received a right-to-sue notice under the California Fair Employment and Housing Act ([Gov.Code, §§ 12900 et seq.](#)) (FEHA). On May 25, 2004, three months after the District Board's decision became final, Basurto filed in the superior court a complaint for damages and petition for writ of mandate. Basurto alleged civil claims under the FEHA seeking reinstatement and backpay on the grounds of age and/or race discrimination, as well as a claim for wrongful termination of an employment contract. In the same filing, he petitioned for a writ of mandate pursuant to [Code of Civil Procedure sections 1085](#) and [1094.5](#), arguing that he was denied due process in the administrative proceeding.

Nearly a year later, and close to the scheduled trial date of his civil claims, Basurto obtained a hearing date on his writ petition and filed his supporting memorandum of points and authorities. In his brief, Basurto argued principally that the District was subject to the requirements of the Administrative Procedure Act, [Government Code sections 11340 et seq.](#) (APA), but its hearing on Basurto's complaint of wrongful discharge did not comply with the APA. In response, the District maintained that relief was barred by laches (i.e., Basurto's failure to diligently prosecute the matter), that the APA does not apply to irrigation districts, and that Basurto received a fair hearing.

In September 2005, the trial court issued a tentative decision denying an administrative writ of mandate. Although the trial court rejected the District's laches argument, it concluded that the APA did not apply to the District, and further found ****151** that substantial evidence supported the District Board's decision—save for its finding of driving under the influence, but as to that finding Basurto had failed to show prejudice. After reviewing Basurto's proposed statement of decision raising issues about the state of the record, the trial court issued an order vacating its tentative decision in February 2006. The court noted that it “appears that there is no agreed upon administrative record, as such, yet filed or established with the Court concerning [Basurto's] writ ***873** application. Nor does it appear that the parties have moved any of their various exhibits, in whole or part, into evidence.” The trial court directed the parties “to agree upon a uniform administrative record,” and if they could not do so, it alternatively directed Basurto to “make a motion in this Court to settle an administrative record which may be entered into evidence.” Basurto made such a motion, and the District opposed. The parties' differences focused on the authenticity of a purported transcript of Basurto's hearing before the District Board, and the admissibility of an audiocassette tape of that hearing. In April 2006, the trial court issued an order settling the administrative record, which included both the transcript and the audiotape.

After a subsequent hearing, a different trial judge granted the writ of mandate on September 20, 2006. It incorporated the September 2005 findings regarding the failure of Basurto to show a prejudicial abuse of discretion by the District Board. However, the court ruled that it was unclear from the administrative record what documents in the record had been provided to Basurto, and when, or even whether, any documents had been offered to or received by the District

Board members during the hearing. The trial court concluded that the District Board “failed to proceed as required by law within the meaning of [Code of Civil Procedure \[section\] 1094.5\(b\)](#) in that [Basurto] did not have notice that the documents were being offered to the board as evidence, nor did he have notice that the board received the documents.” The trial court directed the District “to either conduct a new hearing consistent with this ruling or, alternatively, reinstate [Basurto] and restore to him all salary and benefits lost as a result of [the District's] decision.” The court entered judgment on the writ petition on November 8, 2006, and the writ issued on November 30, 2006.

The District neither reinstated Basurto nor held a new hearing by the return date stated in the writ. Basurto moved for the imposition of a fine and other measures to secure enforcement of the writ. The District attempted to explain its failure to respond to the writ by asserting, among other things, that attempts to hold a second hearing on Basurto's discharge had been delayed by the demands of Basurto's counsel regarding how the new hearing should be conducted, and before whom. On August 22, 2007, the original trial judge issued an order imposing a fine against the District for failure to timely respond to the writ without just excuse.

C. The Second Administrative Proceeding

On June 12, 2007, the District Board conducted a second hearing on Basurto's discharge. In response to concerns expressed by Basurto's counsel regarding improper ex parte contacts between the District Board and the District's counsel, the District had earlier substituted new outside counsel to ***874** handle the second administrative proceeding. Basurto's counsel also had made a number of other procedural demands including, among other matters, a hearing before an administrative law judge rather than the District Board (which Basurto claimed was inherently biased), ****152** access to certain witnesses, the use of a certified court reporter, and the admission (or exclusion) of certain evidence. The District acceded to some of Basurto's requests and rejected others. It offered to have the matter heard before a state-certified neutral instead of the District Board, but Basurto declined that offer.

The second hearing was held before the District Board, which consisted almost entirely of new members; only one of the members had participated in Basurto's previous hearing. At the outset, and expressly in response to one of the concerns Basurto's counsel had raised in his earlier written

communications, the District's counsel inquired as follows of the District Board members: "Are there any Board members that have a financial or personal interest in this matter? That's a no. Are there any Board members who have had any discussions with any attorneys representing [the District] that would in any way bias you or make you unable to be impartial and fair in this matter? That's a no or a shake of the head as well."

During the hearing, which lasted about seven hours and was transcribed by a certified court reporter, both sides were represented by counsel; the burden of proof and evidentiary procedures were explained; objections to the admissibility of evidence were considered and ruled upon; documents were received; deposition testimony was read into the record; witnesses were called by both sides, testified under oath and were subject to cross-examination; District Board members were able to ask questions; and counsel were allowed to present opening and closing statements. As occurred at the first hearing, the District Board heard evidence that Basurto had received very favorable performance evaluations over the years, but also that he had been disciplined twice before for negligent operation of a District vehicle. Additionally, the District Board received evidence that given the rate of alcohol metabolism, Basurto's blood-alcohol level was 0.08 percent or higher at the time he reported for work at 6:00 a.m. on the date of the accident. At no time did Basurto present evidence or argument regarding his discrimination and wrongful termination claims. Apart from merely alluding to his concern that the District Board could not be impartial, Basurto's counsel voiced no objection to proceeding at that hearing, he made no argument and presented no evidence supporting his due process and bias allegations, and he did not *voir dire* the District Board members on these issues.

On July 10, 2007, the District Board issued a six-page decision concluding that "the penalty of discharge imposed was appropriate," and denying Basurto's grievance and affirming his discharge. The District Board found that Basurto *875 had violated District policy in that he "was affected by prior alcohol use" and was "under the influence of alcohol" at the time of the accident, had operated a District vehicle while under the influence of alcohol, and had negligently damaged District property. The District Board cited the District policies and procedures that Basurto had violated. It detailed the evidence it had examined and the witnesses that testified. It specifically found that the penalty imposed on Basurto was not applied differently to Basurto "than it historically has been applied to other similarly situated District employees," and

noted that it had taken into account Basurto's "long service and performance as an employee of the District."

D. *The Second Writ Petition and Amended Complaint*

Following issuance of the District Board's decision, Basurto commenced a new proceeding with the filing of a second **153 petition for writ of mandate against the District. Thereafter, he filed a "First Amended Complaint for Damages and Supplemental Petition for Writ of Mandate" (first amended complaint) in the first action. Basurto alleged that the second writ petition filed under a different case number was a " 'protective Action' so as to prevent any argument on procedural grounds contesting" the supplemental writ petition. In its answer to the amended complaint, the District challenged the propriety of Basurto's "supplemental" petition for writ of mandate, on the ground that the first writ petition already had been fully adjudicated and thus could not be "supplemented." On October 5, 2007, pursuant to the parties' stipulation, the trial court ordered the two matters to be consolidated under the case number for the first action. Basurto's amended complaint for damages was substantially similar to his initial complaint in all ways material to this appeal.

More than 16 months later, on February 24, 2009, Basurto filed a notice of hearing on the second writ petition. In support of his petition, Basurto indicated that he was not asking the trial court to set aside the District Board's decision to terminate him, but rather stated that the purpose of the petition was to avoid any collateral estoppel effect of the District Board's decision on his civil discrimination claims. In arguing that the District Board's decision should not be given collateral estoppel or *res judicata* effect, Basurto maintained that the District Board's hearing violated due process in that, among other reasons, the hearing was not held before an impartial hearing examiner, and the District Board had no procedures whereby Basurto could effectively raise his age discrimination claims. The District responded that the petition should be denied because it was supported by substantial evidence, and the hearing comported with due process.

On June 30, 2009, the trial court denied Basurto's petition for mandamus relief. The court found that Basurto had "waived his due process objections *876 and bias issues to the hearing and its collateral estoppel effect by not raising these issues before the Board at the time of the hearing." Basurto thereafter filed a petition for writ of mandate in this court,

raising essentially the same arguments he raised in his trial court writ petition. We summarily denied his petition on October 9, 2009, noting that Basurto “has an adequate remedy by way of appeal.”

E. *The Summary Judgment Motion and the Trial Court's Order*

After Basurto's writ petition in this court was denied, the District moved for summary judgment, or in the alternative, summary adjudication as to Basurto's civil claims for damages. The District primarily argued in support of its motion that Basurto's age and race discrimination claims were barred by res judicata and/or collateral estoppel, in that Basurto could and should have raised those claims before the District Board, but failed to do so. The District relied in particular on *Johnson, supra*, 24 Cal.4th 61, 99 Cal.Rptr.2d 316, 5 P.3d 874, which held that “when, as here, a public employee pursues administrative civil service remedies, receives an adverse finding, and fails to have the finding set aside through judicial review procedures, the adverse finding is binding on discrimination claims under the FEHA.” (*Id.* at p. 76, 99 Cal.Rptr.2d 316, 5 P.3d 874.) In support of its res judicata argument, the District cited *Takahashi, supra*, 202 Cal.App.3d 1464, 249 Cal.Rptr. 578, in which a public school teacher's civil discrimination claims were barred by the trial court's denial of her writ petition challenging an adverse administrative ruling. (*Id.* at pp. 1474, 1481–1485, 249 Cal.Rptr. 578.)

****154** In response, Basurto contended that the District Board's decision should not be given estoppel effect, for several reasons. He conceded that his race and age discrimination claims were not raised during the District Board hearing, but argued there was no basis for raising them at that time because the District Board's internal procedures were designed to address only an employee's performance or behavior issues, not the District Board's conduct. Further, he asserted that the District Board's hearing was not the type of “real administrative hearing” that, under *Johnson* and other case law, afforded “ ‘extensive and detailed procedural protections’ ” sufficient to give rise to collateral estoppel or res judicata effect.

In an order dated July 1, 2010, the trial court granted the District's motion for summary judgment. The trial court found that under *Johnson, supra*, 24 Cal.4th 61, 99 Cal.Rptr.2d 316, 5 P.3d 874, and *Takahashi, supra*, 202 Cal.App.3d

1464, 249 Cal.Rptr. 578, collateral estoppel and res judicata barred Basurto's entire first amended complaint. The trial court concluded that the District Board had held a “full evidentiary hearing” regarding Basurto's termination, “during which he was afforded due process and the opportunity to raise every theory under which his right to continued *877 employment may have been affected, including whether he was discriminated against based on his age and/or race.... Plaintiff failed to raise issues of age and/or race discrimination at the termination hearing.” Further, the trial court noted that Basurto had failed to have the District Board's decision vacated by writ petition:

“As a result, all of the issues that could have been or should have been raised as a defense to [Basurto's] termination during the administrative proceeding, including issues of discrimination and his wrongful termination, are collaterally estopped from being raised in the First Amended Complaint. Further, the causes of action in the First Amended Complaint concern the same primary right at issue in the administrative and writ proceedings and therefore they are barred by the doctrine of res judicata and the prohibition against splitting a cause of action.”

The trial court entered judgment on Basurto's claims on August 12, 2010.

III. DISCUSSION

A. *Standard of Review*

On this appeal, we are asked to consider whether the trial court erred in granting summary judgment on the ground that Basurto's civil claims for discrimination and wrongful termination are barred as a matter of law by the doctrines of collateral estoppel and res judicata. We review the granting of the District's summary judgment motion de novo, considering all of the evidence presented by the parties, except that which was properly excluded by the trial court. (*Guz v. Bechtel National, Inc.* (2000) 24 Cal.4th 317, 334, 100 Cal.Rptr.2d 352, 8 P.3d 1089.) “We are not bound by the [trial] court's stated reasons for its summary judgment ruling; rather, we examine the facts before the trial court then independently determine their effect as a matter of law.” (*O'Toole v. Superior Court* (2006) 140 Cal.App.4th 488, 501, 44 Cal.Rptr.3d 531.)

B. Basic Principles of Collateral Estoppel

Collateral estoppel has been described as “one aspect of the concept of res judicata.” (*Lucido v. Superior Court* (1990) 51 Cal.3d 335, 341, fn. 3, 272 Cal.Rptr. 767, 795 P.2d 1223 (*Lucido*)). “Collateral estoppel precludes relitigation of issues argued and decided in prior proceedings.” **155 (*Id.* at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.) The threshold prerequisites for its application are well known:

“First, the issue sought to be precluded from relitigation must be identical to that decided in a former proceeding. Second, this issue must have been actually litigated in the former proceeding. Third, it must have been necessarily decided in the former proceeding. Fourth, the decision in the former proceeding must be final and on the merits. Finally, the party against whom *878 preclusion is sought must be the same as, or in privity with, the party to the former proceeding.”

(*Ibid.*) The doctrine of collateral estoppel, or issue preclusion, also rests on fundamental public policies, including “preservation of the integrity of the judicial system, promotion of judicial economy, and protection of litigants from harassment by vexatious litigation.” (*Id.* at p. 343, 272 Cal.Rptr. 767, 795 P.2d 1223.) Accordingly, the propriety of invoking collateral estoppel depends not simply on a determination of whether its threshold requirements are met, but also on consideration of whether applying it “in a particular circumstance would be fair to the parties and constitutes sound judicial policy.” (*Ibid.*)

It has long been recognized that collateral estoppel not only prevents relitigation of court findings, but also may be applied to the decision of an administrative agency when that agency is acting in a judicial or quasi-judicial capacity. (*People v. Sims* (1982) 32 Cal.3d 468, 479, 186 Cal.Rptr. 77, 651 P.2d 321 (*Sims*); see *Castillo v. City of Los Angeles* (2001) 92 Cal.App.4th 477, 481, 111 Cal.Rptr.2d 870 (*Castillo*); *Knickerbocker v. City of Stockton* (1988) 199 Cal.App.3d 235, 242, 244 Cal.Rptr. 764.) Giving preclusive effect to prior administrative findings in appropriate cases furthers the policies underlying the collateral estoppel doctrine, in that it “promote[s] judicial economy by minimizing repetitive litigation,” prevents “the possibility of inconsistent judgments which may undermine the integrity of the judicial system,” and protects parties “from being harassed by repeated litigation.” (*Sims, supra.*

32 Cal.3d at pp. 488–489, 186 Cal.Rptr. 77, 651 P.2d 321; see *Johnson, supra*, 24 Cal.4th at p. 75, 99 Cal.Rptr.2d 316, 5 P.3d 874 [the value of “enforcing repose” is furthered by precluding a FEHA claim that would relitigate facts already determined by an administrative agency].)

However, California courts have also emphasized that an administrative decision may operate as a bar to later judicial relief only when the court is first satisfied that the administrative proceeding leading to that decision had a sufficiently “judicial” character. In other words, administrative findings may be given preclusive effect only when the administrative agency “ ‘is acting in a judicial capacity and resolves disputed issues of fact properly before it which the parties have had an adequate opportunity to litigate.’ ” (*Sims, supra*, 32 Cal.3d at p. 479, 186 Cal.Rptr. 77, 651 P.2d 321, original italics, quoting *United States v. Utah Construction & Mining Co.* (1966) 384 U.S. 394, 422, 86 S.Ct. 1545, 16 L.Ed.2d 642; see *McDonald v. Antelope Valley Community College Dist.* (2008) 45 Cal.4th 88, 113, 84 Cal.Rptr.3d 734, 194 P.3d 1026 (*McDonald*); *Pacific Lumber Co. v. State Water Resources Control Bd.* (2006) 37 Cal.4th 921, 944, 38 Cal.Rptr.3d 220, 126 P.3d 1040 (*Pacific Lumber*)). “Indicia of [administrative] proceedings undertaken in a judicial capacity include a hearing before an impartial decision maker; testimony given under oath or affirmation; a party's ability to subpoena, call, **156 examine, and cross-examine witnesses, to introduce documentary evidence, and to make oral and written argument; the taking of a record *879 of the proceeding; and a written statement of reasons for the decision.” (*Pacific Lumber, supra*, 37 Cal.4th at p. 944, 38 Cal.Rptr.3d 220, 126 P.3d 1040.)

For the most part, Basurto does not contest that the threshold requirements for the application of collateral estoppel are met in this case. Rather, he contends that the District Board's hearing was not sufficiently “judicial” to be accorded collateral estoppel effect. He argues, in particular, that he was denied due process by the District's failure to comply with APA procedures. Additionally, he contends that the District Board was inherently biased and could not be impartial in determining whether his discharge was justified. For the reasons explained below, we conclude that these contentions are belied by the record. Because we also conclude that the other requirements for the application of collateral estoppel are satisfied, we affirm the trial court's judgment.

C. Summary of the Administrative Process and Judicial Review

As the foregoing authority makes clear, determining whether a prior administrative decision properly may bar later civil claims entails an evaluation of the nature and scope of the agency's internal administrative proceeding. To provide some context for this analysis, we briefly summarize the legal framework governing Basurto's administrative remedies and the prerequisites for pursuing his FEHA and wrongful termination claims.

Employees who believe they have suffered discrimination at the hands of their employers and wish to file civil claims for damages under the FEHA must first exhaust their administrative remedies by filing a complaint with the Department of Fair Employment and Housing (DFEH) and obtaining a right-to-sue notice. (See, e.g., *Rojo v. Klinger* (1990) 52 Cal.3d 65, 72, 83, 276 Cal.Rptr. 130, 801 P.2d 373; *Morgan v. Regents of University of California* (2000) 88 Cal.App.4th 52, 63, 105 Cal.Rptr.2d 652; Gov.Code, §§ 12960, 12965, subd. (b.)) Employees also may, *but are not required to*, pursue internal administrative remedies offered by their employer. (*Schifando v. City of Los Angeles* (2003) 31 Cal.4th 1074, 6 Cal.Rptr.3d 457, 79 P.3d 569 [municipal employee need not exhaust city's internal remedies prior to filing a complaint with DFEH].) However, if they voluntarily choose to first obtain relief by means of the employer's internal procedures, they must fully exhaust that avenue of relief. This entails not merely exhausting the administrative remedy itself, but also the *judicial* remedies—petitioning for an administrative writ of mandate and appeal from any order on that petition—that are the exclusive means of reviewing any administrative decision. (See *Johnson, supra*, 24 Cal.4th at p. 70, 99 Cal.Rptr.2d 316, 5 P.3d 874 [exhaustion of judicial remedies is necessary to avoid giving binding effect to the agency's decision].) *Johnson* makes clear that failure to set aside an agency's quasi-judicial *880 decision will render that decision final and binding on a plaintiff's later FEHA claims. (*Id.* at p. 76, 99 Cal.Rptr.2d 316, 5 P.3d 874.)

In this case, Basurto not only filed a claim with the DFEH and obtained a right-to-sue notice, he also opted to challenge his discharge under the District's internal procedures. At his second administrative hearing, he admittedly did not raise his discrimination and wrongful termination claims. The District Board ruled against Basurto, and set forth its decision **157 concluding that Basurto's discharge was an

appropriate penalty, based on the following findings, among others: (1) Basurto was under the influence of alcohol at the time of the accident; (2) Basurto caused an accident resulting in major damage to property and serious personal injury to the driver of the other vehicle; (3) Basurto was in violation of the District's policies regarding the use of alcohol; (4) Basurto violated District policy in negligently causing injury to District property; and (5) the penalty of discharge had not been applied to him differently than to other similarly situated District employees.

Basurto then petitioned the trial court for a writ of mandate, but only to avoid the collateral estoppel effect that, under *Johnson*, otherwise would be accorded the District Board's decision. Specifically, he argued that he was denied due process and an impartial hearing officer; he did not, however, assert that the District Board's findings were not supported by the weight of the evidence. The trial court found he had waived his due process and bias arguments by not raising them at the hearing. Based on Basurto's failure to have the District Board's decision set aside, the trial court thereafter granted summary judgment against Basurto, holding that the District Board's decision, and Basurto's failure to have it set aside, barred his civil damages claims.

D. The District's Internal Grievance Procedures Are Sufficiently "Judicial" in Character for Collateral Estoppel to Bar Basurto's Civil Damages Claims

We now turn to Basurto's principal contention that the District failed to show its internal complaint process possesses the indicia of a "real" quasi-judicial proceeding so as to bar Basurto's civil claims for damages. On this point, Basurto makes two arguments: First, the District failed to utilize the procedures contemplated in the APA, and second, the District Board was inherently biased, requiring that the hearing be held before an independent decision maker. We conclude that neither of these arguments has merit, that Basurto had a full and fair opportunity to present any and all challenges he may have had to his discharge at the hearing before the District Board, and that his claim of bias is purely speculative.

*881 At the outset, we agree with Basurto that the party asserting the defense of collateral estoppel bears the burden of establishing that its requirements have been met. (*Lucido, supra*, 51 Cal.3d at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.) He is also correct that it was the District's burden to show that it was entitled to judgment as a matter of law.

(See [Aguilar v. Atlantic Richfield Co. \(2001\) 25 Cal.4th 826, 850, 107 Cal.Rptr.2d 841, 24 P.3d 493.](#)) But we summarily reject Basurto's contention that the District presented “no evidence” to establish the judicial character of its internal proceeding. (Italics added.) The record refutes this assertion. For example, the District's separate statement is supported by references to evidence showing the nature and extent of the hearing held before the District Board, including a description of the broad scope of evidence presented by both sides at the hearing, and in particular, of the evidence demonstrating that Basurto was not treated differently than other similarly situated employees. Moreover, the transcript of Basurto's hearing reveals that the District Board was expressly asked about potential conflicts of interest, that the members denied any such conflict or bias, and that Basurto made no effort to establish otherwise. As we will explain, this constitutes a sufficient prima facie showing to support summary judgment in the absence of any ****158** demonstration by Basurto raising a material question of fact on these issues. (See, e.g., [Y.K.A. Industries, Inc. v. Redevelopment Agency of City of San Jose \(2009\) 174 Cal.App.4th 339, 353, 94 Cal.Rptr.3d 424 \(Y.K.A. Industries\)](#) [once moving party makes prima facie showing of nonexistence of any material, triable fact, burden shifts to opponent to demonstrate existence of such fact].)

1. The APA Does Not Apply to the District

Basurto's contention that the District was obliged to comply with APA-mandated procedures has no basis in the law. The trial court correctly concluded, in denying Basurto's second writ petition, that the APA does not apply to the District. The APA provides: “Except as otherwise expressly provided by statute: [¶] (a) This chapter applies to all agencies of the state.” ([Gov.Code, § 11410.20, subd. \(a\).](#)) It also specifies, however, that the APA “does not apply to a *local agency* except to the extent the provisions are made applicable by statute,” with “local agency” defined as, among other things, a “*district, public authority, public agency.*” ([Gov.Code, § 11410.30, subds.\(b\), \(a\), italics added.](#))

Basurto contends that in 1997, the APA's reach was expanded to cover all state agencies, unless specifically excepted. But “local agencies” such as “districts” were expressly excluded from this expansion of coverage. (See [Gov.Code, § 11410.30.](#)) Such agencies as the District were excluded, as the legislative comments to this section of the APA observe, “because of the very different circumstances of local government units when compared to state agencies.” (Cal. Law Revision Com. com., 32D ***882** [West's Ann. Gov.Code \(2005 ed.\) foll. § 11410.30, p. 272.](#)) The fact that a number of statutes have

since made the APA expressly applicable to various “local agencies” (such as school districts) does not help Basurto. (See, e.g., [Ed.Code, § 44944](#) [suspension or dismissal of permanent employee by school district], [Ed.Code, § 87679](#) [evaluation, dismissal and imposition of penalties on personnel employed by community college district].) If anything, these provisions merely highlight that, absent a similar requirement in the Water Code, local irrigation districts are “local agencies” excluded from coverage under the APA.²

² [Water Code section 20570](#) is not such a provision. That statute, which generally “reaffirmed that [irrigation] districts are state agencies” ([Wat.Code, § 20570](#)), was enacted decades before [Government Code section 11410.30](#). As the trial court concluded in its tentative decision on Basurto's first writ petition (later vacated for other reasons), “[t]he legislature was, presumably, aware of [Water Code § 20570](#) when it enacted [§ 11410.30](#); nevertheless, [§ 11410.30](#) provides a self-contained definition of local agencies exempted from the APA.” It is well established that “a more recent provision is typically more persuasive than an older one,” and the courts will “give effect to a specific statute relating to a particular subject in preference to a general statute.” ([Lazar v. Hertz Corp. \(1999\) 69 Cal.App.4th 1494, 1504, 82 Cal.Rptr.2d 368; Code Civ. Proc., § 1859](#) [in construing statutes, “when a general and particular provision are inconsistent, the latter is paramount to the former”].)

The cases cited by Basurto, which refer to irrigation districts as “state agencies,” are not helpful in determining whether the APA's procedures are applicable to district proceedings. First, none of these cases addresses that specific question. Second, we note that other courts have recognized that water districts are not considered state agencies for all purposes. (See, e.g., [Garrett v. Superior Court \(1974\) 11 Cal.3d 245, 248, 113 Cal.Rptr. 152, 520 P.2d 968](#) [holding that Riverside County's flood ****159** control and water conservation district is a local agency for purposes of the venue provision in [Code Civ. Proc., § 394](#)].)

Basurto also insists that even if the District was not required to follow APA procedures, it should have done so because it would be good policy. At a minimum, Basurto contends (quoting [Nightlife Partners, Ltd. v. City of Beverly Hills \(2003\) 108 Cal.App.4th 81, 91, 133 Cal.Rptr.2d 234](#)), that the APA is “helpful as indicating what the Legislature believes are the elements of a fair and carefully thought out system of procedure for use in administrative hearings.” That may be

so, but if the APA is not applicable, the only relevant inquiry is whether the procedures *actually followed* by the District provided adequate procedural safeguards and opportunities for Basurto to be heard. If they did, then under the guidelines set forth in cases such as [Sims, supra, 32 Cal.3d at pages 479–480](#), [186 Cal.Rptr. 77, 651 P.2d 321](#), and [Pacific Lumber, supra, 37 Cal.4th at page 944, 38 Cal.Rptr.3d 220, 126 P.3d 1040](#), the administrative hearing was sufficiently “judicial” in character to warrant the application of collateral estoppel. It is to that inquiry that we now, therefore, turn.

***883** 2. *The District's Evidentiary Hearing Afforded Basurto Due Process*

Rather than explain why the procedures the District actually employed in his case denied him due process, Basurto merely argues that because the procedures set forth in policy and procedure No. 4351 of the District's Manual of Operations are not identical to APA procedures, they cannot support the application of collateral estoppel so as to bar his civil claims. Basurto cites no law supporting this proposition, and more importantly, he provides no rebuttal to the District's showing that his second administrative hearing in fact bore many similarities to a judicial proceeding. In other words, Basurto failed to raise any triable issue of material fact regarding the alleged inadequacies of the District's procedures that might otherwise have precluded a grant of summary judgment on estoppel grounds. (See, e.g., [Y.K.A. Industries, supra, 174 Cal.App.4th at p. 353, 94 Cal.Rptr.3d 424](#).)

Whatever type of procedure might be contemplated by the District's policy and procedure No. 4351, the second hearing the District *actually provided* to Basurto had many of the indicia of an actual trial, particularly in comparison to the first hearing. First, Basurto does not and cannot dispute that he had actual notice of the charges against him and the subject matter of the hearing. Second, although Basurto complains about the lack of formal discovery under the District's internal procedures, the fact is that in the years preceding the second administrative proceeding, the parties conducted substantial discovery on issues relevant to his discharge, including the discrimination allegations. All of this discovery was available to Basurto at the time of his second hearing.

Third, prior to the second hearing, Basurto's counsel corresponded with the District's counsel on a number of issues, including Basurto's specific concerns about the procedures to be used at the hearing, his access to witnesses, and the impartiality of the District Board members. Many of the additional items Basurto requested tracked his position

that the District Board should conform to the APA. In response to these concerns, the District undertook the following: (1) substituted new counsel for the District, to address Basurto's complaint that its prior counsel had improper ex parte contact with District Board members; (2) provided a court reporter; and ****160** (3) provided Basurto with documents and a list of witnesses.

At the nearly seven-hour-long hearing, both sides were represented by counsel, who gave opening and closing statements. The District used outside counsel to prosecute the matter. The nature of the proceeding (specifically, that it was a de novo hearing and the District Board was not to consider what occurred at the prior hearing) was fully explained, as was the burden of proof. The administrative record was clarified at the outset. Both sides were ***884** able to call witnesses and cross-examine the other side's witnesses, all of whom testified under oath; documents were entered into evidence; and objections were raised, considered and ruled on by the District Board. An official transcript of the proceedings was prepared. The District Board issued a nearly six-page written decision, signed by the District Board president, that recited the evidence considered, identified the witnesses who appeared, and set forth specific factual findings and conclusions, with citation to District policies and procedures.

This hearing was far more thorough, and provided far more procedural safeguards, than Basurto's initial administrative hearing, at which he represented himself, no witness was sworn, there was no clarity as to the evidence considered and relied upon by the District Board, and there was no court reporter. The procedures actually followed at the second hearing are, in fact, substantially similar to those Basurto contends are required under the APA, and to those outlined by the California Supreme Court in [Sims, supra, 32 Cal.3d at pages 479–480, 186 Cal.Rptr. 77, 651 P.2d 321](#), and [Pacific Lumber, supra, 37 Cal.4th at page 944, 38 Cal.Rptr.3d 220, 126 P.3d 1040](#). Basurto appears to rest his due process argument on the sole fact that the District's *written* policies and procedures do not themselves contain all these safeguards, even though he actually benefitted from those protections at his hearing. This argument is unpersuasive and unsupported by any authority.

On the contrary, California precedent makes clear that an administrative hearing, to qualify as sufficiently “judicial” for collateral estoppel purposes, need not be identical to a judicial trial, so long as basic due process considerations are

satisfied. In *Sims, supra*, 32 Cal.3d 468, 186 Cal.Rptr. 77, 651 P.2d 321, the California Supreme Court considered whether a hearing conducted by the State Department of Social Services (DSS) under the “fair hearing” statute (Welf. & Inst.Code, § 10950) was of a sufficiently “judicial character” to permit collateral estoppel to attach to its decision. Even though, by statute, the APA does not apply to such hearings, and the rules of evidence are not applicable (Welf. & Inst.Code, §§ 10953, 10955), the *Sims* court found that the requirements of collateral estoppel were met when the hearing was “a judicial-like adversary proceeding,” in that it was conducted in an impartial manner, testimony was received under oath or affirmation, the parties were allowed to call, examine and cross-examine witnesses, make oral and written argument, and a verbatim record of the proceeding was created. (*Sims, supra*, at pp. 479–480, 186 Cal.Rptr. 77, 651 P.2d 321.) In these respects, the parties were provided with an adequate opportunity to fully litigate their claims—even though the county in that case failed to present evidence or participate in the hearing because of its claim that the DSS lacked jurisdiction. (*Id.* at pp. 474, 481, 186 Cal.Rptr. 77, 651 P.2d 321.) Further, the hearing officer provided a written statement of decision that, in an adjudicatory manner, applied existing rules to the facts of the case. (*Id.* at p. 480, 186 Cal.Rptr. 77, 651 P.2d 321.)

****161 *885** It is undisputed that Basurto's hearing had virtually identical characteristics. We therefore conclude that Basurto was provided with due process at his second administrative hearing.

3. Basurto's Claim That the District Board Was Inherently Biased Is Speculative and Unsupported by Law

The second focus of Basurto's complaint about the District's internal grievance procedures is on what he perceives to be the inherent bias of the District Board as adjudicator. According to Basurto, the District Board can never be impartial in deciding an employee's grievance when a decision in favor of the employee could result in a substantial financial penalty to the District, in the form of backpay, future wages, benefits, and attorney fees. We disagree.

If Basurto were correct, then no administrative agency could ever adjudicate employee disputes that might result in the agency's liability and financial compensation to the employee. Yet, statutory and case law long have recognized the ability of an agency to internally adjudicate employment and other matters, even where a result favorable to the other party may result in a financial gain for that party and a loss for

the agency (or the public fisc). Thus, in *Johnson*, collateral estoppel was applied where the employee's grievance was decided by the city's personnel board. (See *Johnson, supra*, 24 Cal.4th at p. 66, 99 Cal.Rptr.2d 316, 5 P.3d 874.) In *McDonald, supra*, 45 Cal.4th 88, 84 Cal.Rptr.3d 734, 194 P.3d 1026, the Supreme Court noted with approval that the community colleges' internal grievance procedures, with final review by the chancellor, “afford a complainant ... a full opportunity to formally or informally resolve a dispute.” (*Id.* at pp. 104–105, 84 Cal.Rptr.3d 734, 194 P.3d 1026; see *Westlake Community Hospital v. Superior Court* (1976) 17 Cal.3d 465, 131 Cal.Rptr. 90, 551 P.2d 410 [holding that doctor at private hospital was required to set aside internal tribunal's revocation of her privileges before maintaining a damages action].) The type of hearing at issue in *Sims* may be conducted by an administrative law judge, but the relevant statute provides that the director of the agency may instead designate himself or herself for that purpose. (See Welf. & Inst.Code, §§ 10950, 10953.) More pertinent to the present case, the boards of directors of irrigation districts have long been empowered to act “in a quasi-judicial capacity” in matters relating to employment. (See, e.g., *Wilbur v. Board of Directors* (1928) 94 Cal.App. 511, 519, 271 P. 514, italics omitted; see Welf. & Inst.Code, § 22225 [empowering irrigation districts “to perform all acts necessary to carry out fully” their statutory functions].)

Accordingly, we reject Basurto's contention that the District Board is incapable of being impartial in resolving a dispute like this one. We also conclude that Basurto has failed to present any evidence that the board in fact ***886** was biased in this case.³ The evidence highlighted by the District demonstrates the opposite. First, we note that the members participating in the second hearing were all new to the board, and had not participated in the first hearing, with one exception. Second, the District's general counsel asked the members whether they had a personal or financial interest in the case, or whether they had any ex parte communications with District ****162** attorneys that might have created a bias or conflict of interest. The members uniformly denied any such conflicts or bias—a fact noted in the District Board's written decision. Basurto made no separate inquiry of the members on this issue, and he introduced no evidence suggesting that any of the members had in any way been influenced by District counsel or otherwise.⁴

³ It bears noting in this regard that the District offered Basurto the opportunity to have his case heard by a state-certified neutral—an offer he declined.

⁴ For these reasons, Basurto's reliance on cases such as *Ward v. Village of Monroeville* (1972) 409 U.S. 57, 93 S.Ct. 80, 34 L.Ed.2d 267, is misplaced. *Ward* involved a situation in which the mayor of the village acted as a judicial officer in criminal proceedings in which a conviction could result in fines and penalties which constituted a “major part of village income.” (*Id.* at p. 58, 93 S.Ct. 80.) *Tumey v. Ohio* (1927) 273 U.S. 510, 47 S.Ct. 437, 71 L.Ed. 749, presented an even more stark instance of a judge's personal pecuniary interest in obtaining a conviction, as that case involved an instance where the mayor's own salary and costs as judge were covered by such fees and fines. (*Id.* at p. 520, 47 S.Ct. 437.) This case presents a very different set of facts. Not only did the District adduce prima facie evidence at the hearing that the District Board members had no such pecuniary interest, either personally or as managers of the District, but also, the very purpose of the District's internal grievance procedures is to minimize costs to the District by ensuring that any error in discharging an employee may be quickly corrected. (See *Westlake Community Hospital v. Superior Court*, *supra*, 17 Cal.3d at p. 476, 131 Cal.Rptr. 90, 551 P.2d 410.) Basurto presented no evidence that the cost to the District of rehiring a wrongly terminated employee was so substantial as to create a bias in the District Board toward ruling against employees in these types of cases.

Basurto complains that the District's manual specified no procedure whereby he could have raised the issue of bias. Regardless of whether the District had a written policy or procedure specifically addressing that question, nothing prevented Basurto's counsel from raising the issue or examining the members individually on that matter. Indeed, Basurto's counsel alluded to the bias issue in his opening statement, and could well have examined the members individually, just as the District's general counsel did, but he chose not to do so.

In these circumstances, we are persuaded that the District met its burden of demonstrating that Basurto's grievance was adjudicated by a fair and impartial panel.

***887** E. *The Threshold Requirements for Application of Collateral Estoppel Are Met*

1. *Basurto Does Not Dispute That the District Board Considered and Decided the Same Issue Underlying His Civil Claims*

For collateral estoppel to apply, the District was required to show that the issues actually litigated before and decided by the District Board are identical to those underlying Basurto's civil claims. (*Lucido, supra*, 51 Cal.3d at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.) Basurto makes no argument that these elements were not established, and the record provides ample support that they were.⁵

⁵ There is also no dispute that the administrative hearing and the lawsuit involved the same parties—Basurto and the District. (See *Lucido, supra*, 51 Cal.3d at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.)

“The ‘identical issue’ requirement addresses whether ‘identical factual allegations’ are *at stake* in the two proceedings.” (*Lucido, supra*, 51 Cal.3d at p. 342, 272 Cal.Rptr. 767, 795 P.2d 1223, italics added.) At the heart of both Basurto's administrative proceeding and his civil lawsuit is the issue of the wrongfulness of his discharge. In both fora, Basurto alleged that, notwithstanding his admitted responsibility **163 for the accident, his conduct did not warrant discharge, and that other employees who had been found with drugs or alcohol in their systems did not lose their jobs. Therefore, the “identical issue” requirement is met. (See *Castillo, supra*, 92 Cal.App.4th at pp. 481–482, 111 Cal.Rptr.2d 870 [issue before agency of wrongfulness of discharge was held to be identical to issue underlying plaintiff's FEHA claim even though former was not based specifically on age or race discrimination].)

The same is true for the “actually litigated” and “necessarily decided” elements. (*Lucido, supra*, 51 Cal.3d at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.) An issue is “actually litigated” when it “‘is properly raised, by the pleadings and otherwise, and is submitted for determination, and is determined A determination may be based on a failure of ... proof [Citation.]’ ” (*Sims, supra*, 32 Cal.3d at p. 484, 186 Cal.Rptr. 77, 651 P.2d 321, original italics.) The issue is considered to have been “necessarily decided” if it was not “‘entirely unnecessary’ ” to the judgment in the prior proceeding. (*Lucido, supra*, 51 Cal.3d at p. 342, 272 Cal.Rptr. 767, 795 P.2d 1223.) Here, Basurto raised in his administrative complaint that discharge was too severe a penalty, and that he was being treated differently than other similarly situated employees. At the hearing, the District Board received evidence of, among other things, the District's “last chance” policy that provided

employees who had been found to misuse drugs and alcohol another opportunity to conform their conduct to District policy without discharge, under certain circumstances. In an effort to *888 demonstrate that Basurto had not been treated disparately, the District presented evidence showing that the only other employee who had been found to have alcohol in his system and to have caused a serious vehicle accident was also discharged. Additionally, the District presented evidence of Basurto's involvement in two prior vehicle accidents. Basurto's counsel cross-examined the District's witnesses on these issues, and in particular, attempted to elicit testimony to support Basurto's contention that he should have been given another chance, particularly in light of his highly favorable performance reviews over the years. The District Board weighed all this evidence and concluded that Basurto's discharge was justified under the facts of the case, and explicitly concluded that he had not been treated differently than other similarly situated employees.

The fact that Basurto never raised his specific age and/or race discrimination allegations at his administrative hearing does not defeat the application of collateral estoppel. A party cannot circumvent the doctrine simply by cherry-picking which facts and theories to raise at his administrative hearing and which to reserve for a civil lawsuit, if all speak to the same issue—which in this case was the wrongfulness of Basurto's discharge—and if the party has a full and fair opportunity to present all those facts for determination (which, as we explained previously, Basurto was given here). As the Supreme Court observed long ago: “[E]ven though the causes of action be different, the prior determination of an issue is conclusive in a subsequent suit between the same parties as to that issue *and every matter which might have been urged to sustain or defeat its determination.*” (*Pacific Mut. Life Ins. Co. v. McConnell* (1955) 44 Cal.2d 715, 724–725, 285 P.2d 636, italics added.)

The case of *Castillo v. City of Los Angeles*, *supra*, 92 Cal.App.4th 477, 111 Cal.Rptr.2d 870, is instructive here. In *Castillo*, the trial court granted summary judgment against the plaintiff in his wrongful termination action on the ground that his **164 claims based on age, race and national origin discrimination were barred by a prior administrative ruling that he had been discharged for nondiscriminatory reasons relating to his performance. (*Id.* at pp. 479–480, 111 Cal.Rptr.2d 870.) At his administrative hearing, the plaintiff presented evidence showing alleged disparate treatment by his supervisor, although the plaintiff did not attribute that disparity to age, race or national origin. (*Id.*

at p. 482, 111 Cal.Rptr.2d 870.) Nevertheless, the court held that collateral estoppel barred his FEHA discrimination claims. It determined: “Castillo has not shown that he was prevented from introducing admissible evidence relevant to [the issue of discrimination].” (*Ibid.*) Furthermore, the hearing officer determined that Castillo's discharge was for *889 “appropriate” reasons; “if the hearing examiner were to have found that the reasons for the discharge were merely a pretext for discrimination, she would not have found the discharge was appropriate.” (*Ibid.*) Thus, the question whether Castillo's discharge was justified on nondiscriminatory grounds was actually litigated and necessarily decided.

Also instructive is *Takahashi*, *supra*, 202 Cal.App.3d 1464, 249 Cal.Rptr. 578. Although that decision rested principally on res judicata principles, the case bears substantial similarity to this one. In *Takahashi*, a longtime public school teacher was discharged on competency grounds, after a hearing before the Commission on Professional Competence. (*Id.* at p. 1470, 249 Cal.Rptr. 578.) At the hearing, the teacher challenged the commission's jurisdiction only; no mention was made of any constitutional or civil rights defense. (*Ibid.*) After the commission ruled against her, the teacher petitioned the trial court for writ of mandate, but again, did not raise her wrongful termination defenses, but continued to challenge the commission's jurisdiction only. (*Id.* at pp. 1470–1471, 249 Cal.Rptr. 578.) When the court denied her petition and the denial was affirmed on appeal, she sought to pursue civil claims that she was not terminated for good cause. (*Id.* at pp. 1471–1472, 249 Cal.Rptr. 578.) The trial court granted summary judgment on res judicata grounds. (*Id.* at pp. 1472–1473, 249 Cal.Rptr. 578.) The *Takahashi* court upheld that ruling on appeal. It concluded, among other things, that all of the plaintiff's civil claims arose “in conjunction with or as a result of the alleged wrongful termination of her employment,” and thus involved the same “primary right” as the one at stake in the administrative proceeding. (*Id.* at pp. 1475–1476, 249 Cal.Rptr. 578.) Further, it held that the plaintiff had the right to interpose any defense to her termination at her commission hearing, and the fact that she failed to do so did not preclude application of res judicata to the commission's decision. (*Id.* at pp. 1476, 1481–1482, 249 Cal.Rptr. 578.)

“ ‘It was never contemplated that a party to an administrative hearing should withhold any defense then available to him or make only a perfunctory or “skeleton” showing in the hearing and thereafter obtain an unlimited trial de novo, on expanded issues, in the reviewing court.’ ”

(*Id.* at p. 1481, 249 Cal.Rptr. 578, quoting *Bohn v. Watson* (1954) 130 Cal.App.2d 24, 37, 278 P.2d 454.)

So too, here, nothing prevented Basurto from presenting evidence that his discharge was attributable to age or race discrimination. The fact that the District Board received evidence addressing the question whether Basurto had received harsher punishment than others who had engaged in similar conduct refutes Basurto's position that the District's procedures did not contemplate that such issues could be raised. Basurto's core contention underlying ****165** his internal grievance was that in discharging him, the District had treated him differently than other similarly situated employees—i.e., that the District's stated reason for his termination (being under the influence) was, in essence, pretextual. It was therefore incumbent upon him to present at his hearing any facts or theories supporting his contention that he had been unfairly or ***890** disparately punished, including any evidence of age or race discrimination. Had Basurto presented evidence of discriminatory policies or practices by the District, the outcome of the administrative hearing might have been different. (*Takahashi, supra*, 202 Cal.App.3d at p. 1477, 249 Cal.Rptr. 578 [if plaintiff had raised and proved her defenses at the commission hearing, her termination would have been judged wrongful, and she then could have sought in court the damages to which she was entitled, but which the commission had no authority to award].)

In short, the issue whether Basurto's termination was wrongful was actually litigated and necessarily decided by the District Board, when it determined that Basurto's conduct in violation of District policy justified his dismissal, and that he had not been treated differently than other employees in being terminated. (See *Sims, supra*, 32 Cal.3d at pp. 474, 481, 484–485, 186 Cal.Rptr. 77, 651 P.2d 321 [issue of welfare fraud was actually litigated before agency, even though the county failed to present evidence or otherwise participate at the hearing on the ground that the agency lacked jurisdiction: “The failure of a litigant to introduce relevant available evidence on an issue does not necessarily defeat a plea of collateral estoppel.”].)

2. The District Board's Administrative Findings Are Final and Binding

The remaining threshold requirement for the application of collateral estoppel is that the administrative determination must be final and on the merits. (*Lucido, supra*, 51 Cal.3d at p. 341, 272 Cal.Rptr. 767, 795 P.2d 1223.) This inquiry

necessarily implicates the judicial process by which Basurto unsuccessfully attempted to have the District Board's findings set aside, and so we now address whether that process was fully exhausted and finalized. For purposes of this discussion, we concern ourselves only with Basurto's second petition for writ of mandate and the trial court's ruling thereon.

Basurto's second writ petition did not challenge the merits of the District Board's findings, or contend that they were not supported by the weight of the evidence. Rather, Basurto challenged only what he contended were procedural deficiencies of the District's internal complaint process and the alleged inherent impartiality of the District Board, explicitly with the intent of avoiding the collateral estoppel effect of the District Board's decision on his claims for damages—a result that otherwise would be mandated by the *Johnson* decision. The trial court denied his petition on the ground that Basurto had failed to raise these issues at his hearing and therefore waived them. Although Basurto sought review of that order by means of a petition for writ of mandate to this court, we denied that petition on the ground that Basurto had an adequate remedy on appeal. Accordingly, the only remaining means by which Basurto could have set aside the District Board's administrative findings and prevented them from becoming final and binding under ***891** *Johnson* would have been to challenge the trial court's denial of the second writ petition on this appeal. (See, e.g., *Castillo, supra*, 92 Cal.App.4th at pp. 482–483, 111 Cal.Rptr.2d 870 [administrative agency's decision is final when the trial court denied the petition for writ ****166** of mandate and the time to appeal that denial passed].)

Yet, in his opening brief on this appeal, Basurto all but explicitly disclaims any intent to appeal the trial court's denial of his second writ petition. Instead, Basurto asserts that this appeal presents one “focused issue: Did [the District] establish that its grievance procedure had a judicial character with safeguards sufficient for it to qualify it as the basis for collateral estoppel or res judicata.” Indeed, Basurto's opening brief is dedicated exclusively to explaining why the District had failed to meet its burden on summary judgment of demonstrating the adequacy of the District's internal procedures. Not surprisingly, therefore, the District asserts in its responding brief that Basurto failed to appeal the trial court's denial of his second writ petition. However, contrary to his earlier statements expressly limiting the scope of his appeal, Basurto argues in his reply brief that the trial court's denial of his second writ petition is now ripe for review, and suggests that there is no legal justification for the trial court's

conclusion that he waived his right to challenge the District Board's findings on due process or bias grounds.

Basurto is correct in pointing out that we previously declined to review the order denying his second writ petition on the ground that Basurto had an adequate remedy by way of appeal. He is also correct that we have the authority to review that interlocutory order upon appeal from the trial court's judgment. (See [Code Civ. Proc., § 906](#).) The question whether a particular order is appealable, however, is different than the question whether a party has properly presented an issue for review on appeal. Under basic principles of appellate review, we generally will not consider substantive legal arguments raised for the first time in the reply brief. (See, e.g., Eisenberg et al., *Cal. Practice Guide: Civil Appeals and Writs* (The Rutter Group 2012) ¶ 9.78, p. 9-27 (rev. # 1, 2012); [Shade Foods, Inc. v. Innovative Products Sales & Marketing, Inc.](#) (2000) 78 Cal.App.4th 847, 894, fn. 10, 93 Cal.Rptr.2d 364.) Basurto all but expressly abandoned any challenge he might have to the District Board's administrative findings in his opening brief. Although he sought to revive that issue in his reply brief, he offered no explanation and provided no good cause for his failure to address those arguments earlier.

The reason for Basurto's vacillation on this issue may be his dissatisfaction with the District's administrative process, as evidenced by a number of comments made in his briefs in the trial court and on appeal. Indeed, the very fact that Basurto petitioned for mandamus relief solely to avoid the collateral estoppel effect of the District Board's ruling, and not to challenge that ruling *892 as lacking evidentiary support, reflects his view that the District's administrative process is a “ ‘procedural minefield,’ ” a “gauntlet,” and a “Serbonian bog of exhaustion of administrative remedies.” Basurto apparently viewed more favorably his chances of success in a court of law, and since the adverse District Board ruling, consistently has followed a strategy of merely “going through the motions” of exhausting his administrative and judicial remedies, pinning his hopes on ultimately being able to avail himself of legal recourse.

Basurto was not required to seek relief by means of the District's internal procedures, but having chosen to do so, he is not free to merely abandon that process without consequence. Because Basurto failed to properly appeal the trial court's denial of his second writ petition, the District Board's decision is now final. (See [Johnson, supra](#), 24 Cal.4th at p. 69, 99 Cal.Rptr.2d 316, 5 P.3d 874 [the administrative finding that plaintiff was laid off for **167 economic, not

discriminatory, reasons became final when plaintiff failed to timely challenge that finding in superior court]; [Castillo, supra](#), 92 Cal.App.4th at pp. 482–483, 111 Cal.Rptr.2d 870 [administrative decision became final when trial court denied writ petition and the time for appeal of that denial passed]; [Briggs v. City of Rolling Hills Estates](#) (1995) 40 Cal.App.4th 637, 646, 47 Cal.Rptr.2d 29 [noting that administrative agency's decision “achieve[s] finality” when the aggrieved party fails “to pursue the exclusive *judicial* remedy for reviewing administrative action”].)⁶ Furthermore, the District Board's determination was “on the merits” because, as previously explained, “it followed a ‘full hearing’ in which ‘the substance of the claim [was] tried and determined.’ ” [Citation.]” ([Castillo, supra](#), 92 Cal.App.4th at p. 483, 111 Cal.Rptr.2d 870.)

⁶ Although this conclusion renders unnecessary our review of the correctness of the trial court's determination that Basurto had waived his due process and bias claims, we find no merit to Basurto's contention that there was no specific procedure by which he could have raised these issues at his hearing. Nothing prevented him from doing so, and in fact, his counsel recognized at the outset of the hearing that “it [was] incumbent upon [Basurto] to raise objections which normally would be raised in a court of law.” The prehearing exchange of letters between Basurto's and the District's outside counsel was insufficient, as the substance of those letters was never brought to the District Board's attention. The case law consistently shows that due process and bias issues must be presented to the hearing officer or tribunal itself for the issue to be preserved. (See, e.g., [Morongo Band of Mission Indians v. State Water Resources Control Bd.](#) (2009) 45 Cal.4th 731, 734–735, 88 Cal.Rptr.3d 610, 199 P.3d 1142 [Morongo petitioned the board for disqualification of enforcement team before the hearing, and after the hearing officer denied the petition, sought reconsideration by the board]; [Haas v. County of San Bernadino](#) (2002) 27 Cal.4th 1017, 1021, 119 Cal.Rptr.2d 341, 45 P.3d 280 [impartiality objections were raised prior to and renewed at the hearing].) Further, counsel's passing reference in his opening statement to Basurto's impartiality concerns was insufficient to squarely raise the issue of potential bias. “The mere allegation of bias in [an administrative hearing] without any evidence to support [it]” is not enough. ([Parker v. City of Fountain Valley](#) (1981) 127 Cal.App.3d 99, 117, 179 Cal.Rptr. 351.) In short, the trial court did not err in concluding Basurto had waived his due process and bias claims.

***893** 3. *Application of Collateral Estoppel in This Case Furthers the Policies Underlying the Doctrine*

We must also consider whether giving estoppel effect to the District Board's decision in this case would be consistent with the policy considerations enumerated in *Lucido*. (See *Lucido, supra*, 51 Cal.3d at 343, 272 Cal.Rptr. 767, 795 P.2d 1223.) We conclude that barring Basurto's civil damages claims would be consistent with those policies.

Fundamentally, giving estoppel effect to an appropriate, quasi-judicial administrative decision “accords a proper respect” to an agency's internal procedures, which provide a means for the agency to quickly determine if it has committed error, and if so, “to minimize, and sometimes eliminate, any monetary injury to the plaintiff by immediately reversing its initial decision.” (*Westlake Community Hospital v. Superior Court, supra*, 17 Cal.3d at p. 476, 484, 131 Cal.Rptr. 90, 551 P.2d 410.) In *Sims*, the Supreme Court recognized that “[g]iving conclusive effect” to such an agency decision “would promote judicial economy by minimizing repetitive litigation.” (*Sims, supra*, 32 Cal.3d at p. 488, 186 Cal.Rptr. 77, 651 P.2d 321.) In contrast, permitting relitigation of issues that a party already has had a full and fair opportunity to litigate would “substantially diminish[]” the value of the administrative process. (*Ibid.*; see also *Castillo, supra*, 92 Cal.App.4th at p. 483, 111 Cal.Rptr.2d 870.) ****168** Indeed, as the Supreme Court emphasized in *Johnson*, “Refusing to give binding effect to the findings of administrative agencies in quasi-judicial proceedings would ... undermine the efficacy of such proceedings, rendering them in many cases little more than rehearsals for litigation.” (*Johnson, supra*, 24 Cal.4th at p. 72, 99 Cal.Rptr.2d 316, 5 P.3d 874.)

These considerations apply with equal force here. As explained, Basurto chose to avail himself of the District's internal grievance procedure, and he was provided with an adequate opportunity to present evidence at his hearing of every fact or theory he believed supported his contention that his discharge was wrongful. Had he taken full advantage of that opportunity, the District would have been required to consider his age and race discrimination claims. Instead, Basurto sat on his rights, and he did so even though he had first prevailed in his efforts to compel the District to hold a more thorough evidentiary and adversarial hearing than he was given initially. The *Takahashi* court put the matter succinctly, in addressing similar issues underlying a res judicata analysis:

“There can be no justification for plaintiff's position that she should be permitted to fail to assert at the administrative

hearing constitutional and civil rights violations as reasons that made her termination wrongful, fail to prevail on the writ without attempting to urge or to bring before the court those reasons, and then be allowed to recover damages in this consolidated action that resulted from termination of her employment alleged to be wrongful based on those same reasons.”

(***894** *Takahashi, supra*, 202 Cal.App.3d at p. 1485, 249 Cal.Rptr. 578.) “It is just such a case as this in which such allegations must be brought at the earliest opportunity, in this case before the [District Board], so that the matter can be resolved.” (*Ibid.*)

We hold that, in light of these policy considerations, and for the reasons set forth earlier in this opinion, collateral estoppel effect is properly applied to the District Board's July 2007 administrative decision concluding that Basurto's discharge was consistent with the District's policies and supported by the weight of the evidence. Under *Johnson*, that determination is final and conclusive as to Basurto's FEHA discrimination and breach of contract claims, in that the District has proven that Basurto's discharge was for nondiscriminatory reasons and for good cause. (See *Johnson, supra*, 24 Cal.4th at p. 76, 99 Cal.Rptr.2d 316, 5 P.3d 874; see also *id.* at p. 71, 99 Cal.Rptr.2d 316, 5 P.3d 874 [since plaintiff's FEHA claim “that his discharge was for discriminatory reasons [was] at odds with the preceding determination by the City that the termination was for economic reasons,” the administrative finding, because it was final and binding, barred plaintiff's pursuit of relief under FEHA].) The trial court's order granting summary judgment to the District on this ground is, accordingly, affirmed.⁷

⁷ Because our holding on the collateral estoppel issue itself is sufficient to affirm the trial court's judgment, we do not decide whether the judgment would also be correct on res judicata grounds. We note, however, that given our discussion here, the decision in *Takahashi, supra*, 202 Cal.App.3d 1464, 249 Cal.Rptr. 578, would likely control any res judicata analysis and compel the same result. (*Id.* at pp. 1476–1477, 1481–1485, 249 Cal.Rptr. 578.)

F. *Basurto's Remaining Contentions Do Not Merit Discussion*

Finally, we briefly address, and dismiss, Basurto's contentions that the District ****169** failed to comply precisely with the format requirements for summary judgment motions as set

forth in [Code of Civil Procedure section 437c](#) and [California Rules of Court, rule 3.1350](#). His argument is essentially a “defense” of the trial court's decision not to rule on any of the District's summary judgment or summary adjudication arguments other than collateral estoppel and res judicata. The trial court's decision not to address these other issues rested not on any procedural deficiency in the District's submissions, but rather, as the court explained, on its conclusion that resolution of these matters was unnecessary to its decision. Since Basurto has neither asked us to reverse on this ground, nor cited authority suggesting reversal is required on this ground, we do not consider these contentions here. (See, e.g., [Cahill v. San Diego Gas & Electric Co. \(2011\) 194 Cal.App.4th 939, 956, 124 Cal.Rptr.3d 78](#) [“ ‘ “When an appellant fails to raise a point, or asserts it but fails to support it with reasoned argument and citations to authority, we treat the point as waived.” ’ [Citation.] ‘We are not bound to develop appellants' arguments for them.’ ”].)

***895 DISPOSITION**

The judgment is affirmed. Respondent may recover its costs on appeal.

Supreme Court of the United States

PUD NO. 1 OF JEFFERSON COUNTY
and City of Tacoma, Petitioners
v.
WASHINGTON DEPARTMENT
OF ECOLOGY et al.

No. 92–1911.

|
Argued Feb. 23, 1994.

|
Decided May 31, 1994.

Synopsis

City and local utility district appealed Washington State Department of Ecology's imposition of minimum stream flow rates as part of certification requirements under Federal Clean Water Act for building hydroelectric power plant. The Pollution Control Hearings Board reversed flow rate set by Department, and parties cross-appealed. The Superior Court, Thurston County, Carol A. Fuller, J., ruled that Department was not preempted from setting minimum stream flows. [City moved for direct review. The Supreme Court, 121 Wash.2d 179, 849 P.2d 646](#), affirmed. On petition for certiorari, the Supreme Court of the United States, Justice [O'Connor](#), held that: (1) states could condition certification of project on any limitations necessary to ensure compliance with state water quality standards or other appropriate requirements of state law; (2) minimum flow condition was appropriate requirement of state law; and (3) state's authority to impose minimum flow requirements would not be limited on theory that it interfered with Federal Energy Regulatory Commission's authority to license hydroelectric projects.

Affirmed.

Justice [Stevens](#) filed a concurring opinion.

Justice [Thomas](#) filed a dissenting opinion in which Justice [Scalia](#) joined.

1903 *Syllabus

*
— The syllabus constitutes no part of the opinion of the Court but has been prepared by the Reporter of Decisions for the convenience of the reader. See [United States v. Detroit Lumber Co.](#), 200 U.S. 321, 337, 26 S.Ct. 282, 287, 50 L.Ed. 499.

*700 Section 303 of the Clean Water Act requires each State, subject to federal approval, to institute comprehensive standards establishing water quality goals for all intrastate waters, and requires that such standards “consist of the designated uses of the navigable waters involved and the water quality criteria for such waters based upon such uses.” Under Environmental Protection Agency (EPA) regulations, the standards must also include an antidegradation policy to ensure that “[e]xisting instream water uses and the level of water quality necessary to protect [those] uses [are] maintained and protected.” States are required by § 401 of the Act to provide a water quality certification before a federal license or permit can be issued for any activity that may result in a discharge into intrastate navigable waters. As relevant here, the certification must “set forth any effluent limitations and other limitations ... necessary to assure that any applicant” will comply with various provisions of the Act and “any other appropriate” state law requirement. § 401(d). Under Washington's comprehensive water quality standards, characteristic uses of waters classified as Class AA include fish migration, rearing, and spawning. Petitioners, a city and a local utility district, want to build a hydroelectric project on the Dosewallips **1904 River, a Class AA water, which would reduce the water flow in the relevant part of the river to a minimal residual flow of between 65 and 155 cubic feet per second (cfs). In order to protect the river's fishery, respondent state environmental agency issued a § 401 certification imposing, among other things, a minimum stream flow requirement of between 100 and 200 cfs. A state administrative appeals board ruled that the certification condition exceeded respondent's authority under state law, but the State Superior Court reversed. The State Supreme Court affirmed, holding that the antidegradation provisions of the State's water quality standards require the imposition of minimum stream flows, and that § 401 authorized the stream flow condition and conferred on States power to consider all state action related to water quality in imposing conditions on § 401 certificates.

Held: Washington's minimum stream flow requirement is a permissible condition of a § 401 certification. Pp. 1908–1914.

***701 a) A State may impose conditions on certifications insofar as necessary to enforce a designated use contained in the State's water quality standard. Petitioners' claim that the State may only impose water quality limitations specifically tied to a "discharge" is contradicted by § 401(d)'s reference to an applicant's compliance, which allows a State to impose "other limitations" on a project. This view is consistent with EPA regulations providing that activities—not merely discharges—must comply with state water quality standards, a reasonable interpretation of § 401 which is entitled to deference. State standards adopted pursuant to § 303 are among the "other limitations" with which a State may ensure compliance through the § 401 certification process. Although § 303 is not specifically listed in § 401(d), the statute allows States to impose limitations to ensure compliance with § 301 of the Act, and § 301 in turn incorporates § 303 by reference. EPA's view supports this interpretation. Such limitations are also permitted by § 401(d)'s reference to "any other appropriate" state law requirement. Pp. 1908–1910.

(b) Washington's requirement is a limitation necessary to enforce the designated use of the river as a fish habitat. Petitioners err in asserting that § 303 requires States to protect such uses solely through implementation of specific numerical "criteria." The section's language makes it plain that water quality standards contain two components and is most naturally read to require that a project be consistent with both: the designated use and the water quality criteria. EPA has not interpreted § 303 to require the States to protect designated uses exclusively through enforcement of numerical criteria. Moreover, the Act permits enforcement of broad, narrative criteria based on, for example, "aesthetics." There is no anomaly in the State's reliance on both use designations and criteria to protect water quality. Rather, it is petitioners' reading that leads to an unreasonable interpretation of the Act, since specified criteria cannot reasonably be expected to anticipate all the water quality issues arising from every activity that can affect a State's hundreds of individual water bodies. Washington's requirement also is a proper application of the state and federal antidegradation regulations, as it ensures that an existing instream water use will be "maintained and protected." Pp. 1910–1912.

(c) Petitioners' assertion that the Act is only concerned with water quality, not quantity, makes an artificial distinction, since a sufficient lowering of quantity could destroy all of a river's designated uses, and since the Act recognizes that reduced stream flow can constitute water pollution.

Moreover, §§ 101(g) and 510(2) of the Act do not limit the scope of water pollution controls that may be imposed on users who have obtained, pursuant to state law, a water allocation. Those provisions preserve each State's authority to allocate water quantity as between ***702 users, but the § 401 certification does not purport to determine petitioners' proprietary right to the river's water. In addition, the Court is unwilling to read implied limitations into § 401 based on petitioners' claim that a conflict exists between the condition's imposition and the Federal Energy Regulatory Commission's authority to license hydroelectric **1905 projects under the Federal Power Act, since FERC has not yet acted on petitioners' license application and since § 401's certification requirement also applies to other statutes and regulatory schemes. Pp. 1912–1914.

[Lawrence G. Wallace](#), Washington, DC, for the U.S. as amicus curiae, by special leave of the Court.

Opinion

***703 Justice [O'CONNOR](#) delivered the opinion of the Court.

Petitioners, a city and a local utility district, want to build a hydroelectric project on the Dosewallips River in Washington State. We must decide whether respondent state environmental agency (hereinafter respondent) properly conditioned a permit for the project on the maintenance of specific minimum stream flows to protect salmon and steelhead runs.

***704 I

This case involves the complex statutory and regulatory scheme that governs our Nation's waters, a scheme that implicates both federal and state administrative responsibilities. The Federal Water Pollution Control Act, commonly known as the Clean Water Act, 86 Stat. 816, as amended, [33 U.S.C. § 1251 et seq.](#), is a comprehensive water quality statute designed to “restore and maintain the chemical, physical, and biological integrity of the Nation's waters.” [§ 1251\(a\)](#). The Act also seeks to attain “water quality which provides for the protection and propagation of fish, shellfish, and wildlife.” [§ 1251\(a\)\(2\)](#).

To achieve these ambitious goals, the Clean Water Act establishes distinct roles for the Federal and State Governments. Under the Act, the Administrator of the Environmental Protection Agency (EPA) is required, among other things, to establish and enforce technology-based limitations on individual discharges into the country's navigable waters from point sources. See [§§ 1311, 1314](#). Section 303 of the Act also requires each State, subject to federal approval, to institute comprehensive water quality standards establishing water quality goals for all intrastate waters. [§§ 1311\(b\)\(1\)\(C\), 1313](#). These state water quality standards provide “a supplementary basis ... so that numerous point sources, despite individual compliance with effluent limitations, may be further regulated to prevent water quality from falling below acceptable levels.” *EPA v. California ex rel. State Water Resources Control Bd.*, 426 U.S. 200, 205, n. 12, 96 S.Ct. 2022, 2025, n. 12, 48 L.Ed.2d 578 (1976).

A state water quality standard “shall consist of the designated uses of the navigable waters involved and the water quality criteria for such waters based upon such uses.” [33 U.S.C. § 1313\(c\)\(2\)\(A\)](#). In setting standards, the State must comply with the following broad requirements:

“Such standards shall be such as to protect the public health or welfare, enhance the quality of water and ***705 serve the purposes of this chapter. Such standards shall be established taking into consideration their use and value for public water supplies, propagation of fish and wildlife, recreational [and other purposes.]” *Ibid*.

See also [§ 1251\(a\)\(2\)](#).

A 1987 amendment to the Clean Water Act makes clear that § 303 also contains an “antidegradation policy”—that is, a policy requiring **1906 that state standards be sufficient to maintain existing beneficial uses of navigable waters, preventing their further degradation. Specifically, the Act permits the revision of certain effluent limitations or

water quality standards “only if such revision is subject to and consistent with the antidegradation policy established under this section.” [§ 1313\(d\)\(4\)\(B\)](#). Accordingly, EPA's regulations implementing the Act require that state water quality standards include “a statewide antidegradation policy” to ensure that “[e]xisting instream water uses and the level of water quality necessary to protect the existing uses shall be maintained and protected.” [40 CFR § 131.12 \(1993\)](#). At a minimum, state water quality standards must satisfy these conditions. The Act also allows States to impose more stringent water quality controls. See [33 U.S.C. §§ 1311\(b\)\(1\)\(C\), 1370](#). See also [40 CFR § 131.4\(a\) \(1993\)](#) (“As recognized by section 510 of the Clean Water Act [[33 U.S.C. § 1370](#)], States may develop water quality standards more stringent than required by this regulation”).

The State of Washington has adopted comprehensive water quality standards intended to regulate all of the State's navigable waters. See Washington Administrative Code (WAC) 173–201–010 to 173–201–120 (1986). The State created an inventory of all the State's waters, and divided the waters into five classes. 173–201–045. Each individual fresh surface water of the State is placed into one of these classes. 173–201–080. The Dosewallips River is classified AA, extraordinary. 173–201–080(32). The water quality ***706 standard for Class AA waters is set forth at 173–201–045(1). The standard identifies the designated uses of Class AA waters as well as the criteria applicable to such waters.¹

- ¹ WAC 173–201–045(1) (1986) provides in pertinent part:
- “(1) **Class AA (extraordinary).**
 - “(a) General characteristic. Water quality of this class shall markedly and uniformly exceed the requirements for all or substantially all uses.
 - “(b) Characteristic uses. Characteristic uses shall include, but not be limited to, the following:
 - “(i) Water supply (domestic, industrial, agricultural).
 - “(ii) Stock watering.
 - “(iii) Fish and shellfish:
 - Salmonid migration, rearing, spawning, and harvesting.
 - Other fish migration, rearing, spawning, and harvesting.
 -
 - “(iv) Wildlife habitat.
 - “(v) Recreation (primary contact recreation, sport fishing, boating, and aesthetic enjoyment).
 - “(vi) Commerce and navigation.
 - “(c) Water quality criteria

- “(i) Fecal coliform organisms.
- “(A) Freshwater—fecal coliform organisms shall not exceed a geometric mean value of 50 organisms/100 mL, with not more than 10 percent of samples exceeding 100 organisms/100 mL.
- “(B) Marine water—fecal coliform organisms shall not exceed a geometric mean value of 14 organisms/100 mL, with not more than 10 percent of samples exceeding 43 organisms/100 mL.
- “(ii) Dissolved oxygen [shall exceed specific amounts].
.....
- “(iii) Total dissolved gas shall not exceed 110 percent of saturation at any point of sample collection.
- “(vi) Temperature shall not exceed [certain levels].
.....
- “(v) pH shall be within [a specified range].
- “(vi) Turbidity shall not exceed [specific levels].
- “(vii) Toxic, radioactive, or deleterious material concentrations shall be less than those which may affect public health, the natural aquatic environment, or the desirability of the water for any use.
- “(viii) Aesthetic values shall not be impaired by the presence of materials or their effects, excluding those of natural origin, which offend the senses of sight, smell, touch, or taste.”

***707 In addition to these specific standards applicable to Class AA waters, the State has adopted a statewide antidegradation policy. That policy provides:

“(a) Existing beneficial uses shall be maintained and protected and no further degradation which would interfere with or become injurious to existing beneficial uses will be allowed.

“(b) No degradation will be allowed of waters lying in national parks, national recreation areas, national wildlife refuges, national scenic rivers, and other areas of national ecological importance.

.....

“(f) In no case, will any degradation of water quality be allowed if this degradation interferes with or becomes injurious to existing water uses and causes long-term ***1907 and irreparable harm to the environment.” 173–201–035(8).

As required by the Act, EPA reviewed and approved the State's water quality standards. See [33 U.S.C. § 1313\(c\)\(3\)](#); [42 Fed.Reg. 56792 \(1977\)](#). Upon approval by EPA, the state standard became “the water quality standard for the applicable waters of that State.” [33 U.S.C. § 1313\(c\)\(3\)](#).

States are responsible for enforcing water quality standards on intrastate waters. § 1319(a). In addition to these primary enforcement responsibilities, § 401 of the Act requires States to provide a water quality certification before a federal license or permit can be issued for activities that may result in any discharge into intrastate navigable waters. [33 U.S.C. § 1341](#). Specifically, § 401 requires an applicant for a federal license or permit to conduct any activity “which may result in any discharge into the navigable waters” to obtain from the State a certification “that any such discharge will comply with the applicable provisions of sections [1311, 1312, 1313, 1316, and 1317 of this title].” [33 U.S.C. § 1341\(a\)](#). Section 401(d) further provides that “[a]ny certification ***708 ... shall set forth any effluent limitations and other limitations, and monitoring requirements necessary to assure that any applicant ... will comply with any applicable effluent limitations and other limitations, under section [1311 or 1312 of this title] ... and with any other appropriate requirement of State law set forth in such certification.” [33 U.S.C. § 1341\(d\)](#). The limitations included in the certification become a condition on any federal license. *Ibid.*²

² Section 401, as set forth in [33 U.S.C. § 1341](#), provides in relevant part:

“(a) Compliance with applicable requirements; application; procedures; license suspension

“(1) Any applicant for a Federal license or permit to conduct any activity including, but not limited to, the construction or operation of facilities, which may result in any discharge into the navigable waters, shall provide the licensing or permitting agency a certification from the State ... that any such discharge will comply with the applicable provisions of [sections 1311, 1312, 1313, 1316, and 1317](#) of this title.

.....

“(d) Limitations and monitoring requirements of certification

“Any certification provided under this section shall set forth any effluent limitations and other limitations, and monitoring requirements necessary to assure that any applicant for a Federal license or permit will comply with any applicable effluent limitations and other limitations, under [section 1311](#) or [1312](#) of this title, standard of performance under [section 1316](#) of this title, or prohibition, effluent standard, or pretreatment standard under [section 1317](#) of this title, and with any other appropriate requirement of State law set forth in such certification, and shall become a condition on any Federal license or permit subject to the provisions of this section.”

II

Petitioners propose to build the Elkhorn Hydroelectric Project on the Dosewallips River. If constructed as presently planned, the facility would be located just outside the Olympic National Park on federally owned land within the Olympic National Forest. The project would divert water from a 1.2-mile reach of the river (the bypass reach), run the ***709 water through turbines to generate electricity and then return the water to the river below the bypass reach. Under the Federal Power Act (FPA), 41 Stat. 1063, as amended, [16 U.S.C. § 791a et seq.](#), the Federal Energy Regulatory Commission (FERC) has authority to license new hydroelectric facilities. As a result, petitioners must get a FERC license to build or operate the Elkhorn Project. Because a federal license is required, and because the project may result in discharges into the Dosewallips River, petitioners are also required to obtain state certification of the project pursuant to § 401 of the Clean Water Act, [33 U.S.C. § 1341](#).

The water flow in the bypass reach, which is currently undiminished by appropriation, ranges seasonally between 149 and 738 cubic feet per second (cfs). The Dosewallips supports two species of salmon, coho and chinook, as well as steelhead trout. As originally proposed, the project was to include a diversion dam which would completely block **1908 the river and channel approximately 75% of the river's water into a tunnel alongside the streambed. About 25% of the water would remain in the bypass reach, but would be returned to the original riverbed through sluice gates or a fish ladder. Depending on the season, this would leave a residual minimum flow of between 65 and 155 cfs in the river. Respondent undertook a study to determine the minimum stream flows necessary to protect the salmon and steelhead fishery in the bypass reach. On June 11, 1986, respondent issued a § 401 water quality certification imposing a variety of conditions on the project, including a minimum stream flow requirement of between 100 and 200 cfs depending on the season.

A state administrative appeals board determined that the minimum flow requirement was intended to enhance, not merely maintain, the fishery, and that the certification condition therefore exceeded respondent's authority under state law. App. to Pet. for Cert. 55a–57a. On appeal, the ***710 State Superior Court concluded that respondent could require compliance with the minimum flow conditions. *Id.*, at 29a–45a. The Superior Court also found that respondent

had imposed the minimum flow requirement to protect and preserve the fishery, not to improve it, and that this requirement was authorized by state law. *Id.*, at 34a.

The Washington Supreme Court held that the antidegradation provisions of the State's water quality standards require the imposition of minimum stream flows. [121 Wash.2d 179, 186–187, 849 P.2d 646, 650 \(1993\)](#). The court also found that § 401(d), which allows States to impose conditions based upon several enumerated sections of the Clean Water Act and “any other appropriate requirement of State law,” [33 U.S.C. § 1341\(d\)](#), authorized the stream flow condition. Relying on this language and the broad purposes of the Clean Water Act, the court concluded that § 401(d) confers on States power to “consider all state action related to water quality in imposing conditions on section 401 certificates.” [121 Wash.2d, at 192, 849 P.2d, at 652](#). We granted certiorari, [510 U.S. 810, 114 S.Ct. 55, 126 L.Ed.2d 25 \(1993\)](#), to resolve a conflict among the state courts of last resort. See [121 Wash.2d 179, 849 P.2d 646 \(1993\)](#); *Georgia Pacific Corp. v. Dept. of Environmental Conservation*, [159 Vt. 639, 628 A.2d 944 \(1992\)](#) (table); *Power Authority of New York v. Williams*, [60 N.Y.2d 315, 469 N.Y.S.2d 620, 457 N.E.2d 726 \(1983\)](#). We now affirm.

III

The principal dispute in this case concerns whether the minimum stream flow requirement that the State imposed on the Elkhorn Project is a permissible condition of a § 401 certification under the Clean Water Act. To resolve this dispute we must first determine the scope of the State's authority under § 401. We must then determine whether the limitation at issue here, the requirement that petitioners maintain minimum stream flows, falls within the scope of that authority.

***711 A

There is no dispute that petitioners were required to obtain a certification from the State pursuant to § 401. Petitioners concede that, at a minimum, the project will result in two possible discharges—the release of dredged and fill material during the construction of the project, and the discharge of water at the end of the tailrace after the water has been used to generate electricity. Brief for Petitioners 27–28. Petitioners contend, however, that the minimum stream flow requirement imposed by the State was unrelated to these

specific discharges, and that as a consequence, the State lacked the authority under § 401 to condition its certification on maintenance of stream flows sufficient to protect the Dosewallips fishery.

If § 401 consisted solely of subsection (a), which refers to a state certification that a “discharge” will comply with certain provisions of the Act, petitioners’ assessment of the scope of the State’s certification authority would have considerable force. Section 401, however, also contains subsection (d), which expands the State’s authority to impose conditions on the certification of a ****1909** project. Section 401(d) provides that any certification shall set forth “any effluent limitations and other limitations ... necessary to assure that *any applicant*” will comply with various provisions of the Act and appropriate state law requirements. [33 U.S.C. § 1341\(d\)](#) (emphasis added). The language of this subsection contradicts petitioners’ claim that the State may only impose water quality limitations specifically tied to a “discharge.” The text refers to the compliance of the applicant, not the discharge. Section 401(d) thus allows the State to impose “other limitations” on the project in general to assure compliance with various provisions of the Clean Water Act and with “any other appropriate requirement of State law.” Although the dissent asserts that this interpretation of § 401(d) renders § 401(a)(1) superfluous, *post*, at 1916, we see no such anomaly. Section 401(a)(1) identifies the category of activities *****712** subject to certification—namely, those with discharges. And § 401(d) is most reasonably read as authorizing additional conditions and limitations on the activity as a whole once the threshold condition, the existence of a discharge, is satisfied.

Our view of the statute is consistent with EPA’s regulations implementing § 401. The regulations expressly interpret § 401 as requiring the State to find that “there is a reasonable assurance that the *activity* will be conducted in a manner which will not violate applicable water quality standards.” [40 CFR § 121.2\(a\)\(3\) \(1993\)](#) (emphasis added). See also EPA, Wetlands and 401 Certification 23 (Apr.1989) (“In 401(d), the Congress has given the States the authority to place any conditions on a water quality certification that are necessary to assure that the applicant will comply with effluent limitations, water quality standards, ... and with ‘any other appropriate requirement of State law’”). EPA’s conclusion that *activities*—not merely discharges—must comply with state water quality standards is a reasonable interpretation of § 401, and is entitled to deference. See, e.g., [Arkansas v. Oklahoma, 503 U.S. 91, 110, 112 S.Ct. 1046, 1059, 117 L.Ed.2d 239 \(1992\)](#);

[Chevron U.S.A. Inc. v. Natural Resources Defense Council, Inc., 467 U.S. 837, 104 S.Ct. 2778, 81 L.Ed.2d 694 \(1984\)](#).

Although § 401(d) authorizes the State to place restrictions on the activity as a whole, that authority is not unbounded. The State can only ensure that the project complies with “any applicable effluent limitations and other limitations, under [[33 U.S.C. §§ 1311, 1312](#)]” or certain other provisions of the Act, “and with any other appropriate requirement of State law.” [33 U.S.C. § 1341\(d\)](#). The State asserts that the minimum stream flow requirement was imposed to ensure compliance with the state water quality standards adopted pursuant to § 303 of the Clean Water Act, [33 U.S.C. § 1313](#).

We agree with the State that ensuring compliance with § 303 is a proper function of the § 401 certification. Although § 303 is not one of the statutory provisions listed in § 401(d), *****713** the statute allows States to impose limitations to ensure compliance with § 301 of the Act, [33 U.S.C. § 1311](#). Section 301 in turn incorporates § 303 by reference. See [33 U.S.C. § 1311\(b\)\(1\)\(C\)](#); see also [H.R.Conf.Rep. No. 95–830, p. 96 \(1977\)](#), U.S. Code Cong. & Admin. News 1977, pp. 4326, 4471 (“Section 303 is always included by reference where section 301 is listed”). As a consequence, state water quality standards adopted pursuant to § 303 are among the “other limitations” with which a State may ensure compliance through the § 401 certification process. This interpretation is consistent with EPA’s view of the statute. See [40 CFR § 121.2\(a\)\(3\) \(1992\)](#); EPA, Wetlands and 401 Certification, *supra*. Moreover, limitations to assure compliance with state water quality standards are also permitted by § 401(d)’s reference to “any other appropriate requirement of State law.” We do not speculate on what additional state laws, if any, might be incorporated by this language.³ ****1910** But at a minimum, limitations imposed pursuant to state water quality standards adopted pursuant to § 303 are “appropriate” requirements of state law. Indeed, petitioners appear to agree that the State’s authority under § 401 includes limitations designed to ensure compliance with state water quality standards. Brief for Petitioners 9, 21.

³ The dissent asserts that § 301 is concerned solely with discharges, not broader water quality standards. *Post*, at 1918, n. 2. Although § 301 does make certain discharges unlawful, see [33 U.S.C. § 1311\(a\)](#), it also contains a broad enabling provision which requires States to take certain actions, to wit: “In order to carry out the objective of this chapter [viz. the chemical, physical, and biological integrity of the Nation’s water] there shall

be achieved ... not later than July 1, 1977, any more stringent limitation, including those necessary to meet water quality standards, ... established pursuant to any State law or regulations....” [33 U.S.C. § 1311\(b\)\(1\)\(C\)](#). This provision of § 301 expressly refers to state water quality standards, and is not limited to discharges.

B

Having concluded that, pursuant to § 401, States may condition certification upon any limitations necessary to ensure ***714 compliance with state water quality standards or any other “appropriate requirement of State law,” we consider whether the minimum flow condition is such a limitation. Under § 303, state water quality standards must “consist of the designated uses of the navigable waters involved and the water quality criteria for such waters based upon such uses.” [33 U.S.C. § 1313\(c\)\(2\)\(A\)](#). In imposing the minimum stream flow requirement, the State determined that construction and operation of the project as planned would be inconsistent with one of the designated uses of Class AA water, namely “[s]almonid [and other fish] migration, rearing, spawning, and harvesting.” App. to Pet. for Cert. 83a–84a. The designated use of the river as a fish habitat directly reflects the Clean Water Act’s goal of maintaining the “chemical, physical, and biological integrity of the Nation’s waters.” [33 U.S.C. § 1251\(a\)](#). Indeed, the Act defines pollution as “the man-made or man induced alteration of the chemical, physical, biological, and radiological integrity of water.” [§ 1362\(19\)](#). Moreover, the Act expressly requires that, in adopting water quality standards, the State must take into consideration the use of waters for “propagation of fish and wildlife.” [§ 1313\(c\)\(2\)\(A\)](#).

Petitioners assert, however, that § 303 requires the State to protect designated uses solely through implementation of specific “criteria.” According to petitioners, the State may not require them to operate their dam in a manner consistent with a designated “use”; instead, say petitioners, under § 303 the State may only require that the project comply with specific numerical “criteria.”

We disagree with petitioners’ interpretation of the language of § 303(c)(2)(A). Under the statute, a water quality standard must “consist of the designated uses of the navigable waters involved *and* the water quality criteria for such waters based upon such uses.” [33 U.S.C. § 1313\(c\)\(2\)\(A\)](#) (emphasis added). The text makes it plain that water quality standards contain two components. We think the language ***715

of § 303 is most naturally read to require that a project be consistent with *both* components, namely, the designated use *and* the water quality criteria. Accordingly, under the literal terms of the statute, a project that does not comply with a designated use of the water does not comply with the applicable water quality standards.

Consequently, pursuant to § 401(d) the State may require that a permit applicant comply with both the designated uses and the water quality criteria of the state standards. In granting certification pursuant to § 401(d), the State “shall set forth any ... limitations ... necessary to assure that [the applicant] will comply with any ... limitations under [§ 303] ... and with any other appropriate requirement of State law.” A certification requirement that an applicant operate the project consistently with state water quality standards—*i.e.*, consistently with the designated uses of the water body and the water quality criteria—is both a “limitation” to assure “compl[iance] with ... **1911 limitations” imposed under § 303, and an “appropriate” requirement of state law.

EPA has not interpreted § 303 to require the States to protect designated uses exclusively through enforcement of numerical criteria. In its regulations governing state water quality standards, EPA defines criteria as “*elements* of State water quality standards, expressed as constituent concentrations, levels, or narrative statements, representing a quality of water that supports a particular use.” [40 CFR § 131.3\(b\) \(1993\)](#) (emphasis added). The regulations further provide that “[w]hen criteria are met, water quality will *generally* protect the designated use.” *Ibid.* (emphasis added). Thus, the EPA regulations implicitly recognize that in some circumstances, criteria alone are insufficient to protect a designated use.

Petitioners also appear to argue that use requirements are too open ended, and that the Act only contemplates enforcement of the more specific and objective “criteria.” But this argument is belied by the open-ended nature of the criteria ***716 themselves. As the Solicitor General points out, even “criteria” are often expressed in broad, narrative terms, such as “‘there shall be no discharge of toxic pollutants in toxic amounts.’” Brief for United States as *Amicus Curiae* 18. See [American Paper Institute, Inc. v. EPA, 996 F.2d 346, 349 \(CAD 1993\)](#). In fact, under the Clean Water Act, only one class of criteria, those governing “toxic pollutants listed pursuant to [section 1317\(a\)\(1\)](#),” need be rendered in numerical form. See [33 U.S.C. § 1313\(c\)\(2\)\(B\)](#); [40 CFR § 131.11\(b\)\(2\) \(1993\)](#).

Washington's Class AA water quality standards are typical in that they contain several open-ended criteria which, like the use designation of the river as a fishery, must be translated into specific limitations for individual projects. For example, the standards state that “[t]oxic, radioactive, or deleterious material concentrations shall be less than those which may affect public health, the natural aquatic environment, or the desirability of the water for any use.” WAC 173–201–045(1)(c)(vii) (1986). Similarly, the state standards specify that “[a]esthetic values shall not be impaired by the presence of materials or their effects, excluding those of natural origin, which offend the senses of sight, smell, touch, or taste.” 173–201–045(1)(c)(viii). We think petitioners' attempt to distinguish between uses and criteria loses much of its force in light of the fact that the Act permits enforcement of broad, narrative criteria based on, for example, “aesthetics.”

Petitioners further argue that enforcement of water quality standards through use designations renders the water quality criteria component of the standards irrelevant. We see no anomaly, however, in the State's reliance on both use designations and criteria to protect water quality. The specific numerical limitations embodied in the criteria are a convenient enforcement mechanism for identifying minimum water conditions which will generally achieve the requisite water quality. And, in most circumstances, satisfying the criteria will, as EPA recognizes, be sufficient to maintain the ***717 designated use. See [40 CFR § 131.3\(b\) \(1993\)](#). Water quality standards, however, apply to an entire class of water, a class which contains numerous individual water bodies. For example, in the State of Washington, the Class AA water quality standard applies to 81 specified fresh surface waters, as well as to all “surface waters lying within the mountainous regions of the state assigned to national parks, national forests, and/or wilderness areas,” all “lakes and their feeder streams within the state,” and all “unclassified surface waters that are tributaries to Class AA waters.” WAC 173–201–070 (1986). While enforcement of criteria will in general protect the uses of these diverse waters, a complementary requirement that activities also comport with designated uses enables the States to ensure that each activity—even if not foreseen by the criteria—will be consistent with the specific uses and attributes of a particular body of water.

Under petitioners' interpretation of the statute, however, if a particular criterion, such as turbidity, were missing from the list **1912 contained in an individual state water quality standard, or even if an existing turbidity criterion were

insufficient to protect a particular species of fish in a particular river, the State would nonetheless be forced to allow activities inconsistent with the existing or designated uses. We think petitioners' reading leads to an unreasonable interpretation of the Act. The criteria components of state water quality standards attempt to identify, for all the water bodies in a given class, water quality requirements generally sufficient to protect designated uses. These criteria, however, cannot reasonably be expected to anticipate all the water quality issues arising from every activity that can affect the State's hundreds of individual water bodies. Requiring the States to enforce only the criteria component of their water quality standards would in essence require the States to study to a level of great specificity each individual surface water to ensure that the criteria applicable to that water are sufficiently detailed and individualized to fully protect the ***718 water's designated uses. Given that there is no textual support for imposing this requirement, we are loath to attribute to Congress an intent to impose this heavy regulatory burden on the States.

The State also justified its minimum stream flow as necessary to implement the “antidegradation policy” of § 303, [33 U.S.C. § 1313\(d\)\(4\)\(B\)](#). When the Clean Water Act was enacted in 1972, the water quality standards of all 50 States had antidegradation provisions. These provisions were required by federal law. See U.S. Dept. of Interior, Federal Water Pollution Control Administration, Compendium of Department of Interior Statements on Non-degradation of Interstate Waters 1–2 (Aug. 1968); see also Hines, A Decade of Nondegradation Policy in Congress and the Courts: The Erratic Pursuit of Clean Air and Clean Water, 62 Iowa L.Rev. 643, 658–660 (1977). By providing in 1972 that existing state water quality standards would remain in force until revised, the Clean Water Act ensured that the States would continue their antidegradation programs. See [33 U.S.C. § 1313\(a\)](#). EPA has consistently required that revised state standards incorporate an antidegradation policy. And, in 1987, Congress explicitly recognized the existence of an “antidegradation policy established under [§ 303].” [§ 1313\(d\)\(4\)\(B\)](#).

EPA has promulgated regulations implementing § 303's antidegradation policy, a phrase that is not defined elsewhere in the Act. These regulations require States to “develop and adopt a statewide antidegradation policy and identify the methods for implementing such policy.” [40 CFR § 131.12 \(1993\)](#). These “implementation methods shall, at a minimum, be consistent with the ... [e]xisting instream water uses and the level of water quality necessary to protect the

existing uses shall be maintained and protected.” *Ibid.* EPA has explained that under its antidegradation regulation, “no activity is allowable ... which could partially or completely eliminate any existing use.” EPA, Questions and ***719 Answers on Antidegradation 3 (Aug. 1985). Thus, States must implement their antidegradation policy in a manner “consistent” with existing uses of the stream. The State of Washington’s antidegradation policy in turn provides that “[e]xisting beneficial uses shall be maintained and protected and no further degradation which would interfere with or become injurious to existing beneficial uses will be allowed.” WAC 173–201–035(8)(a) (1986). The State concluded that the reduced stream flows would have just the effect prohibited by this policy. The Solicitor General, representing EPA, asserts, Brief for United States as *Amicus Curiae* 18–21, and we agree, that the State’s minimum stream flow condition is a proper application of the state and federal antidegradation regulations, as it ensures that an “existing instream water use [e]” will be “maintained and protected.” [40 CFR § 131.12\(a\)\(1\) \(1993\)](#).

Petitioners also assert more generally that the Clean Water Act is only concerned with water “quality,” and does not allow the regulation of water “quantity.” This is an artificial distinction. In many cases, water quantity is closely related to water quality; a sufficient lowering of the **1913 water quantity in a body of water could destroy all of its designated uses, be it for drinking water, recreation, navigation or, as here, as a fishery. In any event, there is recognition in the Clean Water Act itself that reduced stream flow, *i.e.*, diminishment of water quantity, can constitute water pollution. First, the Act’s definition of pollution as “the man-made or man induced alteration of the chemical, physical, biological, and radiological integrity of water” encompasses the effects of reduced water quantity. [33 U.S.C. § 1362\(19\)](#). This broad conception of pollution—one which expressly evinces Congress’ concern with the physical and biological integrity of water—refutes petitioners’ assertion that the Act draws a sharp distinction between the regulation of water “quantity” and water “quality.” Moreover, § 304 of the Act expressly recognizes that water “pollution” may result from “changes ***720 in the movement, flow, or circulation of any navigable waters ..., including changes caused by the construction of dams.” [33 U.S.C. § 1314\(f\)](#). This concern with the flowage effects of dams and other diversions is also embodied in the EPA regulations, which expressly require existing dams to be operated to attain designated uses. [40 CFR § 131.10\(g\)\(4\) \(1992\)](#).

Petitioners assert that two other provisions of the Clean Water Act, §§ 101(g) and 510(2), [33 U.S.C. §§ 1251\(g\) and 1370\(2\)](#), exclude the regulation of water quantity from the coverage of the Act. Section 101(g) provides “that the authority of each State to allocate quantities of water within its jurisdiction shall not be superseded, abrogated or otherwise impaired by this chapter.” [33 U.S.C. § 1251\(g\)](#). Similarly, § 510(2) provides that nothing in the Act shall “be construed as impairing or in any manner affecting any right or jurisdiction of the States with respect to the waters ... of such States.” [33 U.S.C. § 1370](#). In petitioners’ view, these provisions exclude “water quantity issues from direct regulation under the federally controlled water quality standards authorized in § 303.” Brief for Petitioners 39 (emphasis deleted).

This language gives the States authority to allocate water rights; we therefore find it peculiar that petitioners argue that it prevents the State from regulating stream flow. In any event, we read these provisions more narrowly than petitioners. Sections 101(g) and 510(2) preserve the authority of each State to allocate water quantity as between users; they do not limit the scope of water pollution controls that may be imposed on users who have obtained, pursuant to state law, a water allocation. In [California v. FERC](#), [495 U.S. 490, 498, 110 S.Ct. 2024, 2029, 109 L.Ed.2d 474 \(1990\)](#), construing an analogous provision of the Federal Power Act,⁴ we explained that “minimum stream ***721 flow requirements neither reflect nor establish ‘proprietary rights’ ” to water. Cf. [First Iowa Hydro–Electric Cooperative v. FPC](#), [328 U.S. 152, 176, and n. 20, 66 S.Ct. 906, 917, and n. 20, 90 L.Ed. 1143 \(1946\)](#). Moreover, the certification itself does not purport to determine petitioners’ proprietary right to the water of the Dosewallips. In fact, the certification expressly states that a “State Water Right Permit (Chapters 90.03.250 RCW and 508–12 WAC) must be obtained prior to commencing construction of the project.” App. to Pet. for Cert. 83a. The certification merely determines the nature of the use to which that proprietary right may be put under the Clean Water Act, if and when it is obtained from the State. Our view is reinforced by the legislative history of the 1977 amendment to the Clean Water Act adding § 101(g). See 3 Legislative History of the Clean Water Act of 1977 (Committee Print compiled for the Committee on Environment and Public Works by the Library of Congress), Ser. No. 95–14, p. 532 (1978) (“The requirements [of the Act] may incidentally affect individual water rights.... **1914 It is not the purpose of this amendment to prohibit those incidental effects. It is the purpose of this amendment to insure that State allocation systems are not subverted, and that effects on individual

rights, if any, are prompted by legitimate and necessary water quality considerations”).

⁴ The relevant text of the Federal Power Act provides that “nothing herein contained shall be construed as affecting or intending to affect or in any way to interfere with the laws of the respective States relating to the control, appropriation, use, or distribution of water used in irrigation or for municipal or other uses, or any vested right acquired therein.” 41 Stat. 1077, [16 U.S.C. § 821](#).

IV

Petitioners contend that we should limit the State's authority to impose minimum flow requirements because FERC has comprehensive authority to license hydroelectric projects pursuant to the FPA, [16 U.S.C. § 791a et seq.](#) In petitioners' view, the minimum flow requirement imposed here interferes with FERC's authority under the FPA.

***722 The FPA empowers FERC to issue licenses for projects “necessary or convenient ... for the development, transmission, and utilization of power across, along, from, or in any of the streams ... over which Congress has jurisdiction.” § 797(e). The FPA also requires FERC to consider a project's effect on fish and wildlife. §§ 797(e), 803(a)(1). In *California v. FERC*, *supra*, we held that the California Water Resources Control Board, acting pursuant to state law, could not impose a minimum stream flow which conflicted with minimum stream flows contained in a FERC license. We concluded that the FPA did not “save” to the States this authority. *Id.*, at 498.

No such conflict with any FERC licensing activity is presented here. FERC has not yet acted on petitioners' license application, and it is possible that FERC will eventually deny petitioners' application altogether. Alternatively, it is quite possible, given that FERC is required to give equal consideration to the protection of fish habitat when deciding whether to issue a license, that any FERC license would contain the same conditions as the state § 401 certification. Indeed, at oral argument the Deputy Solicitor General stated that both EPA and FERC were represented in this proceeding, and that the Government has no objection to the stream flow condition contained in the § 401 certification. Tr. of Oral Arg. 43–44.

Finally, the requirement for a state certification applies not only to applications for licenses from FERC, but to all federal licenses and permits for activities which may result in a

discharge into the Nation's navigable waters. For example, a permit from the Army Corps of Engineers is required for the installation of any structure in the navigable waters which may interfere with navigation, including piers, docks, and ramps. Rivers and Harbors Appropriation Act of 1899, 30 Stat. 1151, § 10, [33 U.S.C. § 403](#). Similarly, a permit must be obtained from the Army Corps of Engineers ***723 for the discharge of dredged or fill material, and from the Secretary of the Interior or Agriculture for the construction of reservoirs, canals, and other water storage systems on federal land. See [33 U.S.C. §§ 1344\(a\), \(e\)](#); [43 U.S.C. § 1761](#) (1988 ed. and Supp. IV). We assume that a § 401 certification would also be required for some licenses obtained pursuant to these statutes. Because § 401's certification requirement applies to other statutes and regulatory schemes, and because any conflict with FERC's authority under the FPA is hypothetical, we are unwilling to read implied limitations into § 401. If FERC issues a license containing a stream flow condition with which petitioners disagree, they may pursue judicial remedies at that time. Cf. *Escondido Mut. Water Co. v. La Jolla Band of Mission Indians*, 466 U.S. 765, 778, n. 20, 104 S.Ct. 2105, 2113, n. 20, 80 L.Ed.2d 753 (1984).

In summary, we hold that the State may include minimum stream flow requirements in a certification issued pursuant to § 401 of the Clean Water Act insofar as necessary to enforce a designated use contained in a state water quality standard. The judgment of the Supreme Court of Washington, accordingly, is affirmed.

So ordered.

Justice [STEVENS](#), concurring.

While I agree fully with the thorough analysis in the Court's opinion, I add this comment **1915 for emphasis. For judges who find it unnecessary to go behind the statutory text to discern the intent of Congress, this is (or should be) an easy case. Not a single sentence, phrase, or word in the Clean Water Act purports to place any constraint on a State's power to regulate the quality of its own waters more stringently than federal law might require. In fact, the Act explicitly recognizes States' ability to impose stricter standards. See, e.g., § 301(b)(1)(C), [33 U.S.C. § 1311\(b\)\(1\)\(C\)](#).

***724 Justice [THOMAS](#), with whom Justice [SCALIA](#) joins, dissenting.

The Court today holds that a State, pursuant to § 401 of the Clean Water Act, may condition the certification necessary to obtain a federal license for a proposed hydroelectric project upon the maintenance of a minimum flow rate in the river to be utilized by the project. In my view, the Court makes three fundamental errors. First, it adopts an interpretation that fails adequately to harmonize the subsections of § 401. Second, it places no meaningful limitation on a State's authority under § 401 to impose conditions on certification. Third, it gives little or no consideration to the fact that its interpretation of § 401 will significantly disrupt the carefully crafted federal-state balance embodied in the Federal Power Act. Accordingly, I dissent.

I

A

Section 401(a)(1) of the Federal Water Pollution Control Act, otherwise known as the Clean Water Act (CWA or Act), [33 U.S.C. § 1251 et seq.](#), provides that “[a]ny applicant for a Federal license or permit to conduct any activity ..., which may result in any discharge into the navigable waters, shall provide the licensing or permitting agency a certification from the State in which the discharge originates ... that any such discharge will comply with ... applicable provisions of [the CWA].” [33 U.S.C. § 1341\(a\)\(1\)](#). The terms of § 401(a)(1) make clear that the purpose of the certification process is to ensure that discharges from a project will meet the requirements of the CWA. Indeed, a State's authority under § 401(a)(1) is limited to certifying that “any discharge” that “may result” from “any activity,” such as petitioners' proposed hydroelectric project, will “comply” with the enumerated provisions of the CWA; if the discharge will fail to comply, the State may “den[y]” the certification. *Ibid.* In addition, under § 401(d), a State may place conditions on a ***725 § 401 certification, including “effluent limitations and other limitations, and monitoring requirements,” that may be necessary to ensure compliance with various provisions of the CWA and with “any other appropriate requirement of State law.” [§ 1341\(d\)](#).

The minimum stream flow condition imposed by respondents in this case has no relation to any possible “discharge” that might “result” from petitioners' proposed project. The term “discharge” is not defined in the CWA, but its plain and ordinary meaning suggests “a flowing or issuing out,” or “something that is emitted.” Webster's Ninth New Collegiate

Dictionary 360 (1991). Cf. [33 U.S.C. § 1362\(16\)](#) (“The term ‘discharge’ when used without qualification includes a discharge of a pollutant, and a discharge of pollutants”). A minimum stream flow requirement, by contrast, is a limitation on the amount of water the project can take in or divert from the river. See *ante*, at 1908. That is, a minimum stream flow requirement is a limitation on intake—the opposite of discharge. Imposition of such a requirement would thus appear to be beyond a State's authority as it is defined by § 401(a)(1).

The Court remarks that this reading of § 401(a)(1) would have “considerable force,” *ante*, at 1908, were it not for what the Court understands to be the expansive terms of § 401(d). That subsection, as set forth in [33 U.S.C. § 1341\(d\)](#), provides:

“Any certification provided under this section shall set forth any effluent limitations and other limitations, and monitoring requirements necessary to assure that *any applicant* for a Federal license or permit ***1916 will comply with any applicable effluent limitations and other limitations, under [section 1311](#) or [1312](#) of this title, standard of performance under [section 1316](#) of this title, or prohibition, effluent standard, or pretreatment standard under [section 1317](#) of this title, and with any other appropriate requirement of State law set forth in such certification, and shall become a condition on any Federal ***726 license or permit subject to the provisions of this section.” (Emphasis added).

According to the Court, the fact that § 401(d) refers to an “applicant,” rather than a “discharge,” complying with various provisions of the Act “contradicts petitioners' claim that the State may only impose water quality limitations specifically tied to a ‘discharge.’” *Ante*, at 1909. In the Court's view, § 401(d)'s reference to an applicant's compliance “expands” a State's authority beyond the limits set out in § 401(a)(1), *ibid.*, thereby permitting the State in its certification process to scrutinize the applicant's proposed “activity as a whole,” not just the discharges that may result from the activity, *ante*, at 1909. The Court concludes that this broader authority allows a State to impose conditions on a § 401 certification that are unrelated to discharges. *Ante*, at 1908–1909.

While the Court's interpretation seems plausible at first glance, it ultimately must fail. If, as the Court asserts, § 401(d) permits States to impose conditions unrelated to discharges in § 401 certifications, Congress' careful focus on discharges in § 401(a)(1)—the provision that describes the scope and function of the certification process—was wasted effort. The

power to set conditions that are unrelated to discharges is, of course, nothing but a conditional power to deny certification for reasons unrelated to discharges. Permitting States to impose conditions unrelated to discharges, then, effectively eliminates the constraints of § 401(a)(1).

Subsections 401(a)(1) and (d) can easily be reconciled to avoid this problem. To ascertain the nature of the conditions permissible under § 401(d), § 401 must be read as a whole. See *United Sav. Assn. of Tex. v. Timbers of Inwood Forest Associates, Ltd.*, 484 U.S. 365, 371, 108 S.Ct. 626, 630, 98 L.Ed.2d 740 (1988) (statutory interpretation is a “holistic endeavor”). As noted above, § 401(a)(1) limits a State's authority in the certification process to addressing concerns related to discharges and to ensuring that any discharge resulting from a project will comply with specified provisions of the Act. It is reasonable ***727 to infer that the conditions a State is permitted to impose on certification must relate to the very purpose the certification process is designed to serve. Thus, while § 401(d) permits a State to place conditions on a certification to ensure compliance of the “applicant,” those conditions must still be related to discharges. In my view, this interpretation best harmonizes the subsections of § 401. Indeed, any broader interpretation of § 401(d) would permit that subsection to swallow § 401(a)(1).

The text of § 401(d) similarly suggests that the conditions it authorizes must be related to discharges. The Court attaches critical weight to the fact that § 401(d) speaks of the compliance of an “applicant,” but that reference, in and of itself, says little about the nature of the conditions that may be imposed under § 401(d). Rather, because § 401(d) conditions can be imposed only to ensure compliance with specified provisions of law—that is, with “applicable effluent limitations and other limitations, under [section 1311](#) or [1312](#) of this title, standard[s] of performance under [section 1316](#) of this title, ... prohibition[s], effluent standard[s], or pretreatment standard[s] under [section 1317](#) of this title, [or] ... any other appropriate requirement[s] of State law”—one should logically turn to those provisions for guidance in determining the nature, scope, and purpose of § 401(d) conditions. Each of the four identified CWA provisions describes discharge-related limitations. See [§ 1311](#) (making it unlawful to discharge any pollutant except in compliance with enumerated provisions of the Act); [§ 1312](#) (establishing effluent limitations on point source discharges); [§ 1316](#) (setting national standards of performance **1917 for the control of discharges); and [§ 1317](#) (setting pretreatment

effluent standards and prohibiting the discharge of certain effluents except in compliance with standards).

The final term on the list—“appropriate requirement[s] of State law”—appears to be more general in scope. Because ***728 this reference follows a list of more limited provisions that specifically address discharges, however, the principle *ejusdem generis* would suggest that the general reference to “appropriate” requirements of state law is most reasonably construed to extend only to provisions that, like the other provisions in the list, impose discharge-related restrictions. Cf. *Cleveland v. United States*, 329 U.S. 14, 18, 67 S.Ct. 13, 15–16, 91 L.Ed. 12 (1946) (“Under the *ejusdem generis* rule of construction the general words are confined to the class and may not be used to enlarge it”); *Arcadia v. Ohio Power Co.*, 498 U.S. 73, 84, 111 S.Ct. 415, 421–422, 112 L.Ed.2d 374 (1990). In sum, the text and structure of § 401 indicate that a State may impose under § 401(d) only those conditions that are related to discharges.

B

The Court adopts its expansive reading of § 401(d) based at least in part upon deference to the “conclusion” of the Environmental Protection Agency (EPA) that § 401(d) is not limited to requirements relating to discharges. *Ante*, at 1909. The agency regulation to which the Court defers is [40 CFR § 121.2\(a\)\(3\)](#) (1993), which provides that the certification shall contain “[a] statement that there is a reasonable assurance that the activity will be conducted in a manner which will not violate applicable water quality standards.” *Ante*, at 1909. According to the Court, “EPA’s conclusion that *activities* — not merely discharges—must comply with state water quality standards ... is entitled to deference” under *Chevron, U.S.A. Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837, 104 S.Ct. 2778, 81 L.Ed.2d 694 (1984). *Ante*, at 1909.

As a preliminary matter, the Court appears to resort to deference under *Chevron* without establishing through an initial examination of the statute that the text of the section is ambiguous. See *Chevron, supra*, at 842–843, 104 S.Ct., at 2781–2182. More importantly, the Court invokes *Chevron* deference to support its interpretation even though the Government does not seek ***729 deference for the EPA’s regulation in this case.¹ That the Government itself has not contended that an agency interpretation exists reconciling the scope of the conditioning authority under § 401(d) with the terms of § 401(a)(1) should suggest to the Court that there is

no “agenc[y] construction” directly addressing the question. [Chevron, supra, at 842, 104 S.Ct., at 2781.](#)

¹ The Government, appearing as *amicus curiae* “supporting affirmance,” instead approaches the question presented by assuming, *arguendo*, that petitioners' construction of § 401 is correct: “Even if a condition imposed under Section 401(d) were valid only if it assured that a ‘discharge’ will comply with the State's water quality standards, the [minimum flow condition set by respondents] satisfies that test.” Brief for United States as *Amicus Curiae* 11.

In fact, the regulation to which the Court defers is hardly a definitive construction of the scope of § 401(d). On the contrary, the EPA's position on the question whether conditions under § 401(d) must be related to discharges is far from clear. Indeed, the only EPA regulation that specifically addresses the “conditions” that may appear in § 401 certifications speaks exclusively in terms of limiting discharges. According to the EPA, a § 401 certification shall contain “[a] statement of *any conditions* which the certifying agency deems necessary or desirable *with respect to the discharge of the activity.*” [40 CFR § 121.2\(a\)\(4\) \(1993\)](#) (emphases added). In my view, [§ 121.2\(a\)\(4\)](#) should, at the very least, give the Court pause before it resorts to *Chevron* deference in this case.

II

The Washington Supreme Court held that the State's water quality standards, promulgated ****1918** pursuant to § 303 of the Act, [33 U.S.C. § 1313](#), were “appropriate” requirements of state law under § 401(d), and sustained the stream flow condition imposed by respondents as necessary to ensure compliance with a “use” of the river as specified in those standards. As an alternative to their argument that § 401(d) conditions must be discharge related, petitioners assert that *****730** the state court erred when it sustained the stream flow condition under the “use” component of the State's water quality standards without reference to the corresponding “water quality criteria” contained in those standards. As explained above, petitioners' argument with regard to the scope of a State's authority to impose conditions under § 401(d) is correct. I also find petitioners' alternative argument persuasive. Not only does the Court err in rejecting that § 303 argument, in the process of doing so it essentially removes all limitations on a State's conditioning authority under § 401.

The Court states that, “at a minimum, limitations imposed pursuant to state water quality standards adopted pursuant to § 303 are ‘appropriate’ requirements of state law” under § 401(d). *Ante*, at 1910.² A water quality standard promulgated pursuant to § 303 must “consist of the designated uses of the navigable waters involved and the water quality criteria for such waters based upon such uses.” [33 U.S.C. § 1313\(c\)\(2\)\(A\)](#). The Court asserts that this language “is most naturally read to require that a project be consistent with *both* components, namely, the designated use *and* the water quality criteria.” *Ante*, at 1910. In the Court's view, then, the “use” of a body of water is independently enforceable through § 401(d) without reference to the corresponding criteria. *Ibid*.

² In the Court's view, § 303 water quality standards come into play under § 401(d) either as “appropriate” requirements of state law or through § 301 of the Act, which, according to the Court, “incorporates § 303 by reference.” *Ante*, at 1909 (citations omitted). The Court notes that through § 303, “the statute allows States to impose limitations to ensure compliance with § 301 of the Act.” *Ibid*. Yet § 301 makes unlawful only “the [unauthorized] *discharge* of any pollutant by any person.” [33 U.S.C. § 1311\(a\)](#) (emphasis added); cf. *supra*, at 1916. Thus, the Court's reliance on § 301 as a source of authority to impose conditions unrelated to discharges is misplaced.

The Court's reading strikes me as contrary to common sense. It is difficult to see how compliance with a “use” of a body of water could be enforced without reference to the *****731** corresponding criteria. In this case, for example, the applicable “use” is contained in the following regulation: “Characteristic uses shall include, but not be limited to, ... [s]almonid migration, rearing, spawning, and harvesting.” Wash.Admin.Code (WAC) 173–201–045(1)(b)(iii) (1986). The corresponding criteria, by contrast, include measurable factors such as quantities of fecal coliform organisms and dissolved gases in the water. 173–201–045(1)(c)(i) and (ii).³ Although the Act does not further address (at least not expressly) the link between “uses” and “criteria,” the regulations promulgated under § 303 make clear that a “use” is an aspirational goal to be attained through compliance with corresponding “criteria.” Those regulations suggest that “uses” are to be “achieved and protected,” and that “water quality criteria” are to be adopted to “protect the designated use[s].” [40 CFR §§ 131.10\(a\), 131.11\(a\)\(1\) \(1993\)](#).

³ Respondents concede that petitioners' project "will likely not violate any of Washington's water quality criteria." Brief for Respondents 24.

The problematic consequences of decoupling "uses" and "criteria" become clear once the Court's interpretation of § 303 is read in the context of § 401. In the Court's view, a State may condition the § 401 certification "upon *any limitations* necessary to ensure compliance" with the "uses of the water body." *Ante*, at 1909–1910 (emphasis added). Under the Court's interpretation, then, state environmental agencies may pursue, through § 401, their water goals in any way they choose; the conditions imposed on certifications need not relate to discharges, nor to water quality criteria, nor to any objective or quantifiable standard, so long as they tend to ****1919** make the water more suitable for the uses the State has chosen. In short, once a State is allowed to impose conditions on § 401 certifications to protect "uses" in the abstract, § 401(d) is limitless.

To illustrate, while respondents in this case focused only on the "use" of the Dosewallips River as a fish habitat, this particular river has a number of other "[c]haracteristic uses," ****732** including "[r]ecreation (primary contact recreation, sport fishing, boating, and aesthetic enjoyment)." WAC 173–201–045(1)(b)(v) (1986). Under the Court's interpretation, respondents could have imposed any number of conditions related to recreation, including conditions that have little relation to water quality. In *Town of Summersville*, 60 FERC ¶ 61,291, p. 61,990 (1992), for instance, the state agency required the applicant to "construct ... access roads and paths, low water stepping stone bridges, ... a boat launching facility ..., and a residence and storage building." These conditions presumably would be sustained under the approach the Court adopts today.⁴ In the end, it is difficult to conceive of a condition that would fall outside a State's § 401(d) authority under the Court's approach.

⁴ Indeed, as the § 401 certification stated in this case, the flow levels imposed by respondents are "in excess of those required to maintain water quality in the bypass region," App. to Pet. for Cert. 83a, and therefore conditions not related to water quality must, in the Court's view, be permitted.

III

The Court's interpretation of § 401 significantly disrupts the careful balance between state and federal interests that

Congress struck in the Federal Power Act (FPA), 16 U.S.C. § 791a et seq. Section 4(e) of the FPA authorizes the Federal Energy Regulatory Commission (FERC) to issue licenses for projects "necessary or convenient ... for the development, transmission, and utilization of power across, along, from, or in any of the streams ... over which Congress has jurisdiction." 16 U.S.C. § 797(e). In the licensing process, FERC must balance a number of considerations: "[I]n addition to the power and development purposes for which licenses are issued, [FERC] shall give equal consideration to the purposes of energy conservation, the protection, mitigation of damage to, and enhancement of, fish and wildlife (including related spawning grounds and habitat), the protection of recreational opportunities, ****733** and the preservation of other aspects of environmental quality." *Ibid*. Section 10(a) empowers FERC to impose on a license such conditions, including minimum stream flow requirements, as it deems best suited for power development and other public uses of the waters. See 16 U.S.C. § 803(a); California v. FERC, 495 U.S. 490, 494–495, 506, 110 S.Ct. 2024, 2027, 109 L.Ed.2d 474 (1990).

In *California v. FERC*, the Court emphasized FERC's exclusive authority to set the stream flow levels to be maintained by federally licensed hydroelectric projects. California, in order "to protect [a] stream's fish," had imposed flow rates on a federally licensed project that were significantly higher than the flow rates established by FERC. *Id.*, at 493, 110 S.Ct., at 2027. In concluding that California lacked authority to impose such flow rates, we stated:

"As Congress directed in FPA § 10(a), FERC set the conditions of the [project] license, including the minimum stream flow, after considering which requirements would best protect wildlife and ensure that the project would be economically feasible, and thus further power development. Allowing California to impose significantly higher minimum stream flow requirements would disturb and conflict with the balance embodied in that considered federal agency determination. FERC has indicated that the California requirements interfere with its comprehensive planning authority, and we agree that allowing California to impose the challenged requirements would be contrary to congressional intent regarding the Commission's licensing authority and would constitute a veto of the project that was approved and licensed by ****1920** FERC." *Id.*, at 506–507, 110 S.Ct., at 2033–2034 (citations and internal quotation marks omitted).

California v. FERC reaffirmed our decision in *First Iowa Hydro-Electric Cooperative v. FPC*, 328 U.S. 152, 164,

66 S.Ct. 906, 911–912, 90 L.Ed. 1143 (1946), in which we warned against “vest[ing] in [state authorities] ***734 a veto power” over federal hydroelectric projects. Such authority, we concluded, could “destroy the effectiveness” of the FPA and “subordinate to the control of the State the ‘comprehensive’ planning” with which the administering federal agency (at that time the Federal Power Commission) was charged. *Ibid.*

Today, the Court gives the States precisely the veto power over hydroelectric projects that we determined in *California v. FERC* and *First Iowa* they did not possess. As the language of § 401(d) expressly states, any condition placed in a § 401 certification, including, in the Court’s view, a stream flow requirement, “shall become a condition on any Federal license or permit.” 33 U.S.C. § 1341(d) (emphasis added). Any condition imposed by a State under § 401(d) thus becomes a “ter[m] ... of the license as a matter of law,” *Department of Interior v. FERC*, 952 F.2d 538, 548 (CADC 1992) (citation and internal quotation marks omitted), regardless of whether FERC favors the limitation. Because of § 401(d)’s mandatory language, federal courts have uniformly held that FERC has no power to alter or review § 401 conditions, and that the proper forum for review of those conditions is state court.⁵ Section 401(d) conditions imposed by States are ***735 therefore binding on FERC. Under the Court’s interpretation, then, it appears that the mistake of the State in *California v. FERC* was not that it had trespassed into territory exclusively reserved to FERC; rather, it simply had not hit upon the proper device—that is, the § 401 certification—through which to achieve its objectives.

⁵ See, e.g., *Keating v. FERC*, 927 F.2d 616, 622 (CADC 1991) (federal review inappropriate because a decision to grant or deny § 401 certification “presumably turns on questions of substantive state environmental law—an area that Congress expressly intended to reserve to the states and concerning which federal agencies have little competence”); *Department of Interior v. FERC*, 952 F.2d, at 548; *United States v. Marathon Development Corp.*, 867 F.2d 96, 102 (CA1 1989); *Proffitt v. Rohm & Haas*, 850 F.2d 1007, 1009 (CA3 1988). FERC has taken a similar position. See *Town of Summersville*, 60 FERC ¶ 61,291, p. 61,990 (1992) (“[S]ince pursuant to Section 401(d) ... all of the conditions in the water quality certification must become conditions in the license, review of the appropriateness of the conditions is within the purview of state courts and not the Commission. The only alternatives available to the Commission are either to issue a license with the conditions included or to deny”

the application altogether); accord, *Central Maine Power Co.*, 52 FERC ¶ 61,033, pp. 61,172–61,173 (1990).

Although the Court notes in passing that “[t]he limitations included in the certification become a condition on any federal license,” *ante*, at 1907, it does not acknowledge or discuss the shift of power from FERC to the States that is accomplished by its decision. Indeed, the Court merely notes that “any conflict with FERC’s authority under the FPA” in this case is “hypothetical” at this stage, *ante*, at 1914, because “FERC has not yet acted on petitioners’ license application,” *ante*, at 1914. We are assured that “it is quite possible ... that any FERC license would contain the same conditions as the state § 401 certification.” *Ibid.*

The Court’s observations simply miss the point. Even if FERC might have no objection to the stream flow condition established by respondents *in this case*, such a happy coincidence will likely prove to be the exception, rather than the rule. In issuing licenses, FERC must balance the Nation’s power needs together with the need for energy conservation, irrigation, flood control, fish and wildlife protection, and recreation. 16 U.S.C. § 797(e). State environmental agencies, by contrast, need only consider parochial environmental interests. Cf., e.g., *Wash.Rev.Code § 90.54.010(2)* (1992) (goal of State’s water policy is to “insure that waters of the state are protected and fully utilized for the greatest benefit to the people of the state of Washington”). As a result, it is likely that conflicts will arise between a **1921 FERC-established stream flow level and a state-imposed level.

Moreover, the Court ignores the fact that its decision nullifies the congressionally mandated process for resolving such state-federal disputes when they develop. Section 10(j)(1) of the FPA, 16 U.S.C. § 803(j)(1), which was added as part ***736 of the Electric Consumers Protection Act of 1986 (ECPA), 100 Stat. 1244, provides that every FERC license must include conditions to “protect, mitigate damag[e] to, and enhance” fish and wildlife, including “related spawning grounds and habitat,” and that such conditions “shall be based on recommendations” received from various agencies, including state fish and wildlife agencies. If FERC believes that a recommendation from a state agency is inconsistent with the FPA—that is, inconsistent with what FERC views as the proper balance between the Nation’s power needs and environmental concerns—it must “attempt to resolve any such inconsistency, giving due weight to the recommendations, expertise, and statutory responsibilities” of the state agency. § 803(j)(2). If, after such an attempt, FERC “does not adopt in whole or in part a recommendation

of any [state] agency,” it must publish its reasons for rejecting that recommendation. *Ibid.* After today's decision, these procedures are a dead letter with regard to stream flow levels, because a State's “recommendation” concerning stream flow “shall” be included in the license when it is imposed as a condition under § 401(d).

More fundamentally, the 1986 amendments to the FPA simply make no sense in the stream flow context if, in fact, the States already possessed the authority to establish minimum stream flow levels under § 401(d) of the CWA, which was enacted years before those amendments. Through the ECPA, Congress strengthened the role of the States in establishing FERC conditions, but it did not make that authority paramount. Indeed, although Congress could have vested in the States the final authority to set stream flow conditions, it instead left that authority with FERC. See [California v. FERC](#), 495 U.S., at 499, 110 S.Ct., at 2029–2030. As the Ninth Circuit observed in the course of rejecting California's effort to give *California v. FERC* a narrow reading, “[t]here would be no point in Congress requiring [FERC] to consider the state agency recommendations on environmental matters and ***737 make its own decisions about which to accept, if the state agencies had the power

to impose the requirements themselves.” [Sayles Hydro Associates v. Maughan](#), 985 F.2d 451, 456 (1993).

Given the connection between § 401 and federal hydroelectric licensing, it is remarkable that the Court does not at least attempt to fit its interpretation of § 401 into the larger statutory framework governing the licensing process. At the very least, the significant impact the Court's ruling is likely to have on that process should compel the Court to undertake a closer examination of § 401 to ensure that the result it reaches was mandated by Congress.

IV

Because the Court today fundamentally alters the federal-state balance Congress carefully crafted in the FPA, and because such a result is neither mandated nor supported by the text of § 401, I respectfully dissent.

District of Columbia Circuit.

Joseph M. KEATING, Petitioner,
v.
FEDERAL ENERGY REGULATORY
COMMISSION, Respondent,
State of California, ex rel.
California State Water Resources
Control Board, Intervenor.

No. 90-1080.

|
Argued Jan. 31, 1991.

|
Decided March 8, 1991.

|
On Denial of Intervenor's Petition
for Rehearing May 10, 1991.

Synopsis

Applicant filed petition for review of Federal Energy Regulatory Commission's dismissal of application for license to construct and operate hydroelectric power plant. The Court of Appeals, [Harry T. Edwards](#), Circuit Judge, held that Commission, rather than California administrative agency or California state courts, had to make determination as to whether California's asserted revocation of blanket state water quality certification satisfied predicate requirements of Clean Water Act.

Remanded.

617** *345** On Petition for Review of Orders of the Federal Energy Regulatory Commission.

Opinion

Opinion for the Court filed by Circuit Judge [HARRY T. EDWARDS](#).

***618** [HARRY T. EDWARDS](#), Circuit Judge:

The petitioner in this case, Joseph M. Keating, challenges a decision by the Federal Energy Regulatory Commission ("FERC") dismissing his application for a license to construct and operate a hydroelectric power plant. In rejecting the petitioner's license application, FERC ruled that Keating did not have the necessary state certification covering water quality standards for the project as required by the Clean Water Act. See [33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#).¹

¹ (1) Any applicant for a Federal license or permit to conduct any activity including, but not limited to, the construction or operation of facilities, which may result in any discharge into the navigable waters, shall provide the licensing or permitting agency a certification from the State in which the discharge originates or will originate, or, if appropriate, from the interstate water pollution control agency having jurisdiction over the navigable waters at the point where the discharge originates or will originate, that any such discharge will comply with the applicable provisions of sections 1311, 1312, 1313, 1316, and 1317 of this title. In the case of any such activity for which there is not an applicable effluent limitation or other limitation under sections 1311(b) and 1312 of this title, and there is not an applicable standard under sections 1316 and 1317 of this title, the State shall so certify, except that any such certification shall not be deemed to satisfy section 1371(c) of this title. Such State or interstate agency shall establish procedures for public notice in the case of all applications for certification by it and, to the extent it deems appropriate, procedures for public hearings in connection with specific applications. In any case where a State or interstate agency has no authority to give such a certification, such certification shall be from the Administrator. If the State, interstate agency,

or Administrator, as the case may be, fails or refuses to act on a request for certification, within a reasonable period of time (which shall not exceed one year) after receipt of such request, the certification requirements of this subsection shall be waived with respect to such Federal application. No license or permit shall be granted until the certification required by this section has been obtained or has been waived as provided in the preceding sentence. No license or permit shall be granted if certification has been denied by the State, interstate agency, or the Administrator, as the case may be.

[33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#).

Keating contends that he obtained the requisite certification from the State of California in the course of procuring an earlier permit with respect to the same project from the Army Corps of Engineers (“the Corps”); the state, however, claims to have revoked that earlier certification. Keating now argues that, under the express terms of [33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#),² California's purported revocation is invalid as a matter of federal law and that FERC is bound by the Clean Water Act to recognize the continuing validity of the state's earlier certification. In reply, FERC insists that it is powerless to apply the standards of [section 1341\(a\)\(3\)](#) and that Keating's only recourse for contesting the validity of California's asserted revocation is in the California state courts.

² (3) The certification obtained pursuant to paragraph (1) of this subsection with respect to the construction of any facility shall fulfill the requirements of this subsection with respect to certification in connection with any other Federal license or permit required for the operation of such facility unless, after notice to the certifying State, agency, or Administrator, as the case may be, which shall be given by the Federal agency to whom application is made for such operating license or permit, the State, or if appropriate, the interstate agency or the Administrator, notifies such agency within sixty days after receipt of such notice that there is no longer reasonable assurance that there will be compliance with the applicable provisions of sections 1311, 1312, 1313, 1316, and 1317 of this title because of changes since the construction license or permit certification was issued in (A) the construction or operation of the facility, (B) the characteristics of the waters into which such discharge is made, (C) the water quality criteria applicable to such waters or (D) applicable effluent limitations or other requirements. This paragraph shall be inapplicable in any case where the applicant for such operating

license or permit has failed to provide the certifying State, or, if appropriate, the interstate agency or the Administrator, with notice of any proposed changes in the construction or operation of the facility with respect to which a construction license or permit has been granted, which changes may result in violation of section 1311, 1312, 1313, 1316, or 1317 of this title.

[33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#).

****347** We can find no merit in FERC's position; we therefore grant the petition for review. We agree that [section 1341\(a\)\(3\)](#) of the Clean Water Act expressly controls the validity of California's attempted withdrawal of its prior certification. Because this provision requires an application of federal law, in connection with a matter that is within the clear compass of FERC's jurisdiction, we hold that FERC is obligated to apply the controlling federal law in considering ***619** Keating's present request for a license. Accordingly, we remand the case to the agency with instructions to reinstate Keating's application and to consider whether California's attempted revocation is valid.

I. Background

Joseph Keating desires to build a small hydroelectric power plant, called the Tungstar project, on the Morgan and Upper Pine Creeks in Inyo County, California. Under section 4(e) of the Federal Power Act, Keating is required to obtain a license from FERC authorizing construction and operation of the proposed facility. *See* [16 U.S.C. § 797\(e\) \(1988\)](#). Because construction of the plant would require the placement of dredged or fill material into the creeks, Keating was also required, by section 404 of the Clean Water Act, [33 U.S.C. § 1344 \(1988\)](#), to obtain a dredge-and-fill permit from the Army Corps of Engineers.

The licensing authority of both FERC and the Corps, however, is contingent upon compliance with a provision of the Clean Water Act, section 401(a)(1), which requires prior state environmental approval of proposed water projects. *See* [33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#), *reprinted at note 1 supra*.

Both a section 4(e) (FERC) license and a section 404 (Corps) permit fall within the terms of “a Federal license or permit” subject to the state certification requirement under section 401. *See* [33 C.F.R. §§ 325.1\(d\)\(4\), 330.9\(a\), 336.1\(a\)\(1\), \(b\)\(8\) \(1990\)](#) (Corps section 404 permit must be supported by section 401 state certification); [18 C.F.R. § 4.38\(a\) & \(c\)\(2\) \(1990\)](#) (applicant for FERC license under

section 4(e) must produce proof of section 401 certification or waiver); *City of Fredericksburg, Va. v. FERC*, 876 F.2d 1109, 1111 (4th Cir.1989) (section 4(e) license applicant must obtain state certification under section 401). Without such state certification, neither the FERC license nor the Corps permit may be issued. See 33 U.S.C. § 1341(a)(1) (1988) (“No [federal] license or permit shall be granted until the certification required by this section has been obtained or has been waived....”).

On June 23, 1986, Keating filed a request for state certification of his proposed Tungstar project with the Lahontan Regional Water Quality Control Board (“the Regional Board”), a division of the California State Water Resources Control Board. Three months later, on September 30, 1986, he submitted an application to FERC for a section 4(e) license.

While his applications before FERC and the California Regional Board were pending, Keating also sought a dredge-and-fill permit from the Army Corps of Engineers under section 404. The Corps authorizes dredge-and-fill operations in one of two ways: either with a permit that extends only to a given project, based upon a site-specific review of the particular activities proposed there; or, for certain classes of activities that “will cause only minimal adverse environmental effects,” with a general permit, customarily known as a “nationwide permit.” See 33 U.S.C. § 1344(e)(1) (1988); 33 C.F.R. Part 330 (1990). See generally *United States v. Marathon Dev. Corp.*, 867 F.2d 96 (1st Cir.1989). A nationwide permit authorizes any party to engage in the sort of activity described in the permit without the need to seek prior project-specific authorization. See *id.* at 98–99; *Riverside Irr. Dist. v. Andrews*, 758 F.2d 508, 511 (10th Cir.1985); *Orleans Audubon Soc’y v. Lee*, 742 F.2d 901, 909–10 (5th Cir.1984); see also 33 C.F.R. § 320.1(c) (1990) (“If an activity is covered by a general permit, an application for a ... [Corps] permit does not have to be made. In such cases, a person must only comply with the conditions contained in the general permit to satisfy requirements of law for a ... [Corps] permit.”).

Regardless of which route is followed, however, the Corps cannot issue a permit under section 404 without first obtaining state certification pursuant to section 401 from the state in which the activity is to take place. See 33 C.F.R. §§ 330.9(a), 336.1(b)(8) (1990); *Marathon Development*, 867 F.2d at 100 (“[T]he state certification requirement of section 401 applies to section 404(e) nationwide permits in the same way that it applies to any other section 404 permit.”);

Friends of the Earth v. United States Navy, 841 F.2d 927, 929–30 (9th Cir.1988). At about the same time that Keating was seeking a site-specific state **348 certification for his Tungstar project, the Corps sought state certification in connection with 26 nationwide permits covering a range of modest construction, navigational and similar activities. See 33 C.F.R. § 330.5 (1990) (listing nationwide permits). On October 31, 1986, the California State Water Resources Control Board (“the State Board”)—the parent agency of the Regional Board then considering Keating’s project—granted a blanket state certification *620 authorizing the activities set out in all 26 Corps nationwide permits. See State Water Resources Control Board, 1986 Amended Decision (Oct. 31, 1986), reprinted in Appendix (“App.”) Tab 3. The State Board’s certification included a number of conditions concerning particular regions in the state, none of which were relevant to Keating’s project, and claimed to reserve “discretionary authority to revoke certification, or set additional conditions of certification, for such permits on a case-by-case basis.” *Id.* Based on this certification, the Corps issued final permits on January 12, 1987.

Keating’s Tungstar project is covered by the last of the general permits issued by the Corps. On October 11, 1987, Keating wrote to the Los Angeles District of the Corps, seeking confirmation that his proposed Tungstar project fell within the scope of the nationwide permit. On November 18, 1987, the Corps replied, agreeing that Keating’s project was authorized by the Corps’ Nationwide Permit No. 26. See Letter from Clifford Rader, U.S. Army Corps of Engineers, to Joseph Keating (Nov. 18, 1987) (citing 33 C.F.R. § 330.5(a)(26) (Nationwide Permit No. 26)), reprinted in App. Tab 7. “As long as you comply with the nationwide permit conditions,” the Corps letter stated, “an individual permit is not required.” *Id.* (citation omitted).

Although it is undisputed that Keating had a Corps section 404 permit for his project, and that this permit was granted with the requisite state certification, he nonetheless ran into difficulties in connection with his application for a section 4(e) license from FERC. Under section 401(a)(3) of the Clean Water Act, absent other valid objections, FERC was obliged to accept the certification underlying the Corps permit as satisfying the state certification requirement with respect to Keating’s section 4(e) license application. See 33 U.S.C. § 1341(a)(3) (1988). However, on April 30, 1987, the California Regional Board, which had continued to review Keating’s application for certification specific to the Tungstar site, denied Keating’s request without prejudice because

Keating allegedly had failed to submit all environmental documentation required by state law. *See* Letter from James L. Easton, Exec. Dir., State Water Resources Control Board, to Joseph M. Keating (Apr. 30, 1987), *reprinted in* App. Tab 4. Upon learning of this situation, officials at FERC apparently believed that they were faced with conflicting signals from the State of California concerning whether Keating had the requisite state certification to support his section 4(e) license application. On the one hand, the State Board had certified that projects satisfying the criteria spelled out in the Corps' Nationwide Permit No. 26 would conform with state water quality standards, and the Corps had subsequently confirmed that Keating's project fell within the scope of that permit. On the other hand, the Regional Board had later denied Keating's site-specific request for certification on grounds of inadequate environmental data.

In light of these arguably inconsistent pronouncements, FERC sought clarification from the State of California regarding certification of the Tungstar project. Specifically, FERC asked the State Board whether the Regional Board's project-specific denial of certification for the Tungstar project in April 1987 purported to revoke the State Board's October 1986 blanket certification of projects, like Keating's, satisfying the Corps' nationwide permit criteria. *See Joseph Martin Keating*, [45 F.E.R.C. \(CCH\) ¶ 61,112, at 61,351 \(Oct. 27, 1988\)](#) (order on motion for expedited action on license application), *reprinted in* App. 10. The State Board responded on December 9, 1988, confirming that the Regional Board's action vitiated the state's earlier certification given in connection with the Corps nationwide permits. The State Board explained that it had never intended by its blanket Corps certification to certify any individual projects for purposes of a later federal power license and that if “certification of Nationwide Permits applies to applications for hydropower licenses under the Federal Power Act, that certification was revoked as applied to the Tungstar project.” *See* California State Water Resources ****349** Control Board Response to Request for Advice Regarding the Status of State Water Quality Certification Under Section 401 of the Clean Water Act for the Tungstar Project 3 (Dec. 9, 1988), *reprinted in* App. Tab 11.

On the basis of the state's reply, FERC held itself powerless to act on Keating's application. “In light of the Board's December 12, 1988[,] filing,” FERC wrote, “it has not been shown that the Tungstar Project has water quality certification.” *See Joseph Martin Keating*, [47 F.E.R.C. \(CCH\) ¶ 61,170, at 61,554 \(May 2, 1989\)](#) (order denying motion

for expedited action on license application), *reprinted in* App. Tab 1. Accordingly, the agency suspended ***621** consideration of Keating's license application until Keating could produce an unclouded state certification. *Id.*

In his petition for rehearing, Keating objected vigorously to FERC's acceptance of California's decision to revoke the certification Keating claimed to hold under the state's 1986 blanket approval of the Corps' nationwide permits. Keating argued that section 401(a)(3) of the Clean Water Act, [33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#), limits the power of a state to revoke a prior certification once a federal license or permit—such as a Corps section 404 permit—has been issued on the basis of that certification. California's attempted revocation, Keating continued, was invalid by the terms of that federal law and FERC was therefore obligated to treat California's original certification of his project as valid for purposes of his subsequent section 4(e) license application.

In reply, FERC refused Keating's demand that it review the validity of California's purported revocation. The agency contended that “[a] review of the case law on section 401 of [the Clean Water Act] ... indicates that the issue of whether a state certifying agency has legally revoked validly issued project-specific or blanket water quality certification is reviewable in the state courts, not by this Commission.” *See Joseph Martin Keating*, [49 F.E.R.C. \(CCH\) ¶ 61,343, at 62,229 \(Dec. 18, 1989\)](#) (order denying rehearing) (“*Rehearing Order*”), *reprinted in* App. Tab 2. The Commission acknowledged Keating's argument that federal law governed the validity of California's action, but held nonetheless that Keating's *only* recourse was a challenge in the state courts. As the Commission later explained in response to Keating's arguments concerning the controlling effect of section 401(a)(3) of the Clean Water Act, “whatever may be the validity of these contentions, the Commission's position here is that they must be raised and decided by the state agency and thereafter, if necessary, reviewed in state court.” *See* Brief for Respondent Federal Energy Regulatory Commission at 21, *Keating v. FERC*, No. 90–1080 (D.C.Cir. Mar. 8, 1991).

Because Keating refused to pursue any such state remedies, FERC dismissed his license application. *See Rehearing Order*, 49 F.E.R.C. at 62,231. Keating then filed this petition for judicial review.

II. Analysis

A. *This Court's Authority and the Issue on Appeal*

In section 4(e) of the Federal Power Act, Congress delegated to the Federal Power Commission, now the Federal Energy Regulatory Commission, the authority to issue licenses for the construction and operation of hydroelectric facilities. [16 U.S.C. § 797\(e\) \(1988\)](#). We have jurisdiction to review FERC's final order dismissing Keating's application under section 313(b) of the Federal Power Act. [16 U.S.C. § 8251\(b\) \(1988\)](#).

The dispute between Keating and the Commission is relatively narrow: whether the blanket certification issued by California in October 1986 continues in effect for Keating's Tungstar project or whether California's claimed revocation of that approval in April 1987 effectively blocks the issuance of the FERC license. It is clear on these facts that the resolution of this dispute is controlled by a provision of federal law, section 401(a)(3) of the Clean Water Act. The only question remaining is who must apply that provision—FERC or the state courts.

At first blush, the record in this case suggested that state and federal authorities had overlapping, and seemingly conflicting, authority in connection with Keating's section 4(e) license application. Thus, it appeared that this case might pose an impossible dilemma with respect to the jurisdiction of federal and state agencies to enforce the Clean Water Act. Upon careful consideration, however, the facts at **350 hand are relatively straightforward and the applicable legal standards are not unclear.

At bottom, this case strictly concerns an application of section 401(a)(3) of the Clean Water Act. *See* note 2 *supra*. The Army Corps of Engineers first received state certification under section 401 for its section 404(e) nationwide permits. The Corps then issued permits, one of which covered Keating's project. The Corps deemed the state certification underlying its permits to be final and unqualified, at least insofar as Keating's project was concerned. *See* note 4 *infra*. Thus, the state certification underlying the Corps permit should have been sufficient under section 401(a)(3) to support Keating's application for a section 4(e) license from FERC. Under section 401(a)(3), the only way that FERC could reject the prior certification as *622 insufficient to support the section 4(e) license application was upon a finding that the State of California, within 60 days after proper notice,

gave notice to FERC that there was “no longer reasonable assurance that [Keating would comply with the applicable water quality standards] ... because of *changes* since the [issuance of California's 1986 blanket certification] ... in (A) the construction or operation of the facility, (B) the characteristics of the waters into which such discharge is made, (C) the water quality criteria applicable to such waters or (D) applicable effluent limitations or other requirements.” [33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#). In other words, a state may revoke a prior certification that might otherwise support a subsequent license application, but only pursuant to the terms of, and for the reasons indicated in, section 401(a)(3).

Thus, this case boils down to an analysis of whether FERC was justified in refusing to recognize the state certification underlying the Corps permit as valid and sufficient for purposes of Keating's subsequent application for a section 4(e) license. Stated alternatively, the question before us focuses on FERC's authority to decide whether the state's purported revocation of its prior certification satisfied the terms of section 401(a)(3). We have no doubt that the question posed is a matter of federal law, and that it is one for FERC to decide in the first instance.

B. *The Statutory Framework*

In designing the Clean Water Act, Congress plainly intended an integration of both state and federal authority. Although federal licenses are required for most activities that will affect water quality, an applicant for such a license must first obtain state approval of the proposed project. *See* [33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#). The states remain, under the Clean Water Act, the “prime bulwark in the effort to abate water pollution,” *see* [United States v. Puerto Rico](#), [721 F.2d 832, 838 \(1st Cir.1983\)](#), and Congress expressly empowered them to impose and enforce water quality standards that are more stringent than those required by federal law, *see* [33 U.S.C. § 1370 \(1988\)](#). At the very outset of the statute, Congress made clear that

[i]t is the policy of the Congress to recognize, preserve, and protect the primary responsibilities and rights of States to prevent, reduce, and eliminate pollution, to plan the development and use ... of land and water resources, and to consult with the Administrator in the exercise of his authority under this chapter.

[33 U.S.C. § 1251\(b\) \(1988\)](#).

One of the primary mechanisms through which the states may assert the broad authority reserved to them is the

certification requirement set out in section 401 of the Act. Section (a)(1) of that provision says that no federal license or permit may be granted in the absence of the requisite state certification indicating that no state water quality standards will be violated by the proposed project. *See* [33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#). Through this requirement, Congress intended that the states would retain the power to block, for environmental reasons, local water projects that might otherwise win federal approval. *See* [Marathon Development, 867 F.2d at 99–100](#); 2 W. Rodgers, Jr., *Environmental Law: Air and Water* § 4.2, at 26 (1986) (“Section 401 offers a veto power to states with water quality related concerns about licensing activities of the various federal agencies, including the Environmental Protection Agency, Federal Energy Regulatory Commission, Corps of Engineers, and the Nuclear Regulatory Commission.”).

There is no doubting that FERC is bound by federal law to refuse a section ****351** 4(e) license application that is unsupported by a valid state certification under section 401. *See* [33 U.S.C. § 1341\(a\)\(1\) \(1988\)](#); [City of Fredericksburg, 876 F.2d at 1111](#). Nor do we doubt the propriety of a federal agency's refusal to review the validity of a state's decision to grant or deny a request for certification in the first instance, before any federal license or permit has yet been issued. Such a decision presumably turns on questions of substantive state environmental law—an area that Congress expressly intended to reserve to the states and concerning which federal agencies have little competence. It is for these reasons that a number of courts have held that disputes over such matters, *at least so long as they precede the issuance of any federal license or permit*, are properly left to the states themselves. *See* [Marathon Development, 867 F.2d at 102](#); [Proffitt v. Rohm & Haas, 850 F.2d 1007, 1009 \(3d Cir.1988\)](#) (dictum); [Roosevelt Campobello Int'l Park Comm'n v. EPA, 684 F.2d 1041, 1056 \(1st Cir.1982\)](#); [Lake Erie Alliance for the Protection of the Coastal Corridor v. United States Army Corps of Eng'rs, 526 F.Supp. 1063, 1074 \(W.D.Pa.1981\), aff'd mem., 707 F.2d 1392 \(3d Cir.\), cert. denied, *623 464 U.S. 915, 104 S.Ct. 277, 78 L.Ed.2d 257 \(1983\)](#); [Mobil Oil Corp. v. Kelley, 426 F.Supp. 230, 234–36 \(S.D.Ala.1976\)](#).

The certification power of the states under section 401 is not, however, unbounded. Whatever freedom the states may have to impose their own substantive policies in reaching initial certification decisions, the picture changes dramatically once that decision has been made and a federal agency has acted upon it. Thus, under section (a)(3) of section 401, Congress created a presumption that a state certification

issued for purposes of a federal construction permit will be valid for purposes of a second federal license related to the operation of the same facility.³ A state may overcome that presumption and revoke certification for purposes of the second federal license, but only under limited circumstances expressly defined in the statute. *See* note 2 *supra*.

³ The applicable portion of section 401(a)(3) provides:

The certification obtained pursuant to paragraph (1) of this subsection with respect to the construction of any facility shall fulfill the requirements of this subsection with respect to certification in connection with any other Federal license or permit required for the operation of such facility unless, after notice to the certifying State, [specified changed circumstances are present]....

[33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#).

C. Keating's Case

As indicated above, it is obvious that section 401(a)(3) controls the disposition of this case. The Commission did not doubt that a valid state certification had been granted by California for activities covered by the Corps' nationwide permits. Nor can it be doubted, given that section 401 certification is a predicate to the issuance of any section 404 permit, and that a Corps dredge-and-fill permit *is* a federal permit “with respect to the construction of a [] facility” within the meaning of section 401(a)(3). It is also significant that the Commission made an express finding that a “Corps section 404 permit for the Tungstar Project [had] ... issued and [was] ... final,” *see Rehearing Order*, 49 F.E.R.C. at 62,230, a conclusion that has been reinforced by the Corps itself.⁴ From these facts, it is clear that section 401(a)(3) governs the validity of California's attempt, after a valid Corps section 404 permit had issued, to revoke its prior certification for purposes of Keating's second federal license application.

⁴ Corps officials have indicated that the nationwide permit issued under section 404 remains valid for purposes of Keating's project despite California's attempted revocation of the certification underlying it. *See* Letter from B.N. Goode, Chief, Regulatory Branch, U.S. Army Corps of Engineers, to John H. Tait (Mar. 10, 1989) (“If a state ‘decertifies’ a general or individual permit after the Corps has issued the permit in good faith reliance on the original certification, the Corps does not recognize an obligation to revoke the Corps permit but may elect to modify or revoke the permit at its own discretion....”), *reprinted in* App. Tab 13.

The arguably equivocal language used in California's section 401 certification to the Corps does not require a contrary result. We recognize the authority of states to impose express conditions upon the issuance of a particular certification. When states make compliance with specified conditions a prerequisite to the effectiveness of a certification, the federal Government has been prepared to enforce those conditions. See *Roosevelt Campobello*, **352 684 F.2d at 1055–57; 33 U.S.C. § 1341(d) (1988); 33 C.F.R. §§ 325.4(a)(1), 330.9(a) (1990) (Corps section 404 permits will incorporate conditions specified by states in underlying section 401 certifications). In this case, however, we are confronted not by any such conditions precedent, but rather by the state's claim of a general reservation of discretionary authority to revoke prior blanket certification as to particular projects at any time and apparently for any reason. Such a broad reservation of authority cannot be squared with Congress' purpose in section 401(a)(3). The statute allows a state to revoke a prior certification only within a specified time limit and only pursuant to certain defined circumstances; if a state could revoke a prior certification at any time and for any (or no) reason, however, section 401(a)(3) would be rendered meaningless. Obviously, such a result would make no sense.

It is the applicability of section 401(a)(3) that separates this case from those relied upon by FERC in asserting that the validity of a state's action in connection with certification is a question exclusively for the state courts. It is true that some of those cases suggested broadly that “certification under Section 401 is set up as an exclusive p[r]erogative of the state and is not to be reviewed by ... any agency of the federal government.” See *Mobil Oil*, 426 F.Supp. at 234. But, to our knowledge, none of those cases involved a situation in which a state sought to revoke certification after a federal agency had already issued a *624 permit based upon the state's earlier approval—*i.e.*, the scenario contemplated by section 401(a)(3). In *Mobil Oil*, for instance, upon which FERC relies heavily, a state agency granted section 401(a)(1) certification to a project for purposes of a Corps of Engineers drilling permit and then revoked that certification *before* the Corps had acted upon the application. Because no federal permit had yet been issued, section 401(a)(3) had no application and the court found no federal law purporting to control the state's action. The court's decision in that context to abstain from intervening in the state's certification decision in no way suggests, however, that this court should follow suit, given that a Corps permit has already issued in Keating's case and that section 401(a)(3) clearly applies.

D. Applying Section 401(a)(3)

As we have suggested, section 401(a)(3) permits state revocation of prior certification only if certain conditions are met. The first is timeliness: the state must notify the relevant federal licensing agency of its intention to revoke within 60 days of the time it is itself notified that a new license application is pending. The second is that the revocation be driven by some change in circumstances “since the construction license or permit certification was issued.” See 33 U.S.C. § 1341(a)(3) (1988). If either of these conditions is not met—if the state's decision comes too late or if it is not pursuant to changed circumstances—then the attempted revocation is invalid as a matter of federal law and no further inquiry is needed.

There can be no serious claim that FERC is without *any* authority to consider the validity of a state's purported revocation of a prior certification under section 401(a)(3). At a minimum, FERC must find that the purported revocation is timely and that the state's action was assertedly taken in response to *changed circumstances* pursuant to section 401(a)(3). In this case, there is no claim that the state's objection to FERC was untimely,⁵ but neither is there any suggestion that the state's purported revocation came “because of *changes* since the [Corps] ... permit certification was issued.” 33 U.S.C. § 1341(a)(3) (1988) (emphasis added). This is a matter that FERC must consider on remand.

⁵ In fact, it is unclear whether the state was ever given the official federal notice that is contemplated under section 401(a)(3). The 60-day time limit for state objection set out in that section is not triggered until the state receives notice from the second federal licensing authority that there is a pending license application premised upon the state's earlier certification. Thus, in assessing the timeliness of California's asserted revocation on remand, FERC must first determine whether and when it notified the state of Keating's section 4(e) license application.

If FERC finds that the state's revocation was both timely and assertedly because of changed circumstances, then the question will arise whether the motivating change in circumstance falls within one of the four **353 categories specified in section 401(a)(3).⁶ FERC has suggested, without any good explanation, that Keating's sole recourse for resolution of this question is before a state agency or a state court. We recognize that, in certain cases, the resolution of a disputed claim over “changed circumstances” under section 401(a)(3) may involve a question of state law or an

application of state water quality standards, neither of which is within the expertise or normal jurisdiction of FERC. In such a situation, we could hardly doubt the wisdom of FERC'S decline of jurisdiction to resolve the section 401(a)(3) question. However, other cases might arise regarding claims of “changed circumstances” under section 401(a)(3) that easily can be resolved by FERC, without resort to consideration of state law or the applicable water quality standards.

⁶ The motivating change in circumstances must be related to:

(A) the construction or operation of the facility, (B) the characteristics of the waters into which such discharge is made, (C) the water quality criteria applicable to such waters or (D) applicable effluent limitations or other requirements.

[33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#).

FERC has been too quick to assume that it has no role to play in the application of section 401(a)(3). It is true that the state, alone, decides whether to certify under section 401(a)(1). The issue under section 401(a)(3), however, involves a different question, *i.e.*, one going to the authority of a *federal* agency to issue a *federal* permit or license once the state has already issued a certification. A state can affect federal authority under section 401(a)(3) only to the extent therein indicated. Thus, the application of section 401(a)(3) involves a federal question that, absent satisfactory explanation, presumably must be resolved by the applicable federal licensing authority and the federal courts. *Cf. New Orleans Pub. *625 Serv., Inc. v. Council of New Orleans*, 491 U.S. 350, 109 S.Ct. 2506, 2512–13, 105 L.Ed.2d 298 (1989) (“We have no more right to decline the exercise of jurisdiction which is given, than to usurp that which is not given.... [T]he courts of the United States are bound to proceed to judgment and to afford redress to suitors before them in every case to which their jurisdiction extends. They cannot abdicate their authority or duty in any case in favor of another jurisdiction.”) (inner quotation marks and citations omitted).

In any event, FERC has given no adequate explanation in this case for its refusal to apply section 401(a)(3). We offer no final judgment on this question, save to say that FERC must at least decide whether the state's assertion of revocation satisfies section 401(a)(3)'s predicate requirements—*i.e.*, whether it is timely and motivated by some change in circumstances after the certification was issued. Beyond that, assuming the predicate requirements are met, we do not decide whether FERC must go on to determine whether the asserted

changed circumstance falls within one of section 401(a)(3)'s enumerated categories. FERC must, however, either decide the question itself or articulate a satisfactory explanation for why Congress would have intended to leave the application of some or all of section 401(a)(3)'s categorical provisions to the state courts alone.

III. Conclusion

For the foregoing reasons, the petition for review is granted and the case is remanded to the Commission for further proceedings.

So ordered.

On Intervenor's Petition for Rehearing

May 10, 1991.

PER CURIAM:

Upon consideration of the petition for rehearing filed by intervenor, the State of California, it is hereby ordered that the petition is denied. We find no merit in this petition, and only one of the arguments raised warrants a response.

California now argues, for the first time, that section 401(a)(3) of the Clean Water Act, [33 U.S.C. § 1341\(a\)\(3\) \(1988\)](#) -- the statutory provision found to be controlling in this case -- has no application here because the so-called dredge-and-fill permit issued to Keating by the Army Corps of Engineers (“the Corps”) is not a permit “with respect to the construction of a[] facility” within the meaning of the statute. This argument comes too late, for it presents an entirely new theory of this case which cannot be appropriately raised on a petition for rehearing.

As was noted in the panel opinion in this case, section 401(a)(3) “create[s] a presumption that a state certification issued for purposes of a federal construction permit ****354** will be valid for purposes of a second federal license related to the operation of the same facility.” *Keating v. FERC*, 927 F.2d 616, 623 (D.C. Cir. 1991) (footnote omitted). Throughout this litigation, it has been Keating's contention that because he had earlier obtained state certification for a dredge-and-fill permit from the Corps -- a permit that Keating needed in order to begin construction work at his proposed hydroelectric facility

-- section 401(a)(3) mandated that this certification would also be valid for purposes of obtaining a subsequent license from the Federal Energy Regulatory Commission ("FERC").¹

¹ California does not dispute that the FERC license for which Keating applied is one "required for the operation of [Keating's proposed] . . . facility" within the meaning of section 401(a)(3). In fact, in its original brief before this court, California noted that "Keating [had] applied to [FERC] . . . for a license *to operate* the Tungstar hydropower project." Brief for Intervenor State of California at 3 (emphasis added).

During the proceedings before the agency, in their original briefs and at oral argument before this court, neither FERC nor California ever disputed Keating's assertion that a Corps dredge-and-fill permit is one for which state certification is required under 401(a)(1), and that such a permit is a "construction" permit within the contemplation of section 401(a)(3). For purposes of this litigation, we accepted these assertions as given. Both FERC and California limited their arguments principally to a claim that state courts

have exclusive jurisdiction to review all disputes over state certifications under section 401(a)(1). It was not until the instant petition for rehearing that California raised for the first time a claim that the Corps permit is not a permit "with respect to the construction of a[] facility" within the meaning of the statute. *626 Because California failed to raise this argument until its petition for rehearing, the argument is waived and we decline to reopen the matter now.

We offer no view on whether, upon proper submission and review, it might be found that a Corps permit is not a "construction" permit within the contemplation of section 401(a)(3). Nothing in our decisions should be read to foreclose any party from raising this issue as may be appropriate in future litigation.

Re: **Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim**

Floodplain Restoration Condition (no. 12) of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District – Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, 21-TC-02

Dear Mr. Prows, Ms. Reimers, and Mr. Schwandt:

On January 14, 2022, the Turlock Irrigation District and the Modesto Irrigation District (claimants) filed a Test Claim with the Commission on State Mandates (Commission) on the above-named matter.

Upon review, Commission staff rejects this Test Claim pursuant to Commission regulation section 1183.1(a) because neither Turlock Irrigation District nor Modesto Irrigation District are local governments subject to the tax and spend limitations of the California Constitution, and therefore they are not eligible for mandate subvention under article XIII B, section 6 of the California Constitution.

Section 1183.1(g) provides that “any test claim, or portion of a test claim, that the Commission lacks jurisdiction to hear for any reason...may be rejected or dismissed by the executive director with a written notice stating the reason therefor. However, for an otherwise timely and complete test claim over which the Commission would have jurisdiction, except that it was filed by a local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution, the Commission shall follow the process outlined in section 1187.14(b).”

Commission regulations in section 1187.14(b)(1) provides a process for a test claim filed by an agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution, to be taken over by an eligible agency subject to the alleged mandate by a substitution of parties and provides an opportunity to file comments on the proposed dismissal of the test claim:

- (1) For test claims that are withdrawn, deemed abandoned, or filed by an agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution, Commission staff shall serve written notice to initiate dismissal of the test claim to everyone on the mailing list for the matter. The notice shall announce that another local agency or school district may take over the claim by substitution of parties within 60 days of the issuance of the notice. The notice shall also announce the opportunity to file written comments on the proposed dismissal of the test claim. A copy of the notice shall also be posted on the Commission's website.

J:\MANDATES\2021\TC\21-TC-02 Floodplain Restoration Condition No. 12\Correspondence\Proposed Dismissal.docx

Because the alleged mandate is applicable only to Turlock Irrigation District and Modesto Irrigation District, it will not be possible for another agency to take over the claim.

How To File Comments on the Proposed Dismissal of the Test Claim

Parties, interested parties, and interested persons receiving this letter may file comments on the proposed dismissal of this Test Claim not later than **5:00 p.m. on April 25, 2022**, in accordance with sections 1183.2 and 1181.3 of the Commission's regulations.

Oral or written representations of fact offered by any person shall be under oath or affirmation and signed under penalty of perjury by persons who are authorized and competent to do so and must be based on the declarant's personal knowledge, information or belief. (Cal. Code Regs., tit. 2 §§ 1183.2, § 1187.14, and 1187.5.) If representations of fact are made, they must be supported with documentary evidence filed with the comments on the test claim. (Cal. Code Regs., tit. 2 §§ 1183.2, § 1187.14, and 1187.5.) The Commission's ultimate findings of fact must be supported by substantial evidence in the record.¹ Hearsay evidence (such as declarations not based on personal knowledge but on information and belief alone) may be used for the purpose of supplementing or explaining other evidence but shall not be sufficient in itself to support a finding unless it would be admissible over objection in civil actions.²

The dismissal of this matter is tentatively set for hearing on **May 27, 2022** and will be proposed for the consent calendar.

Process for Filing Comments

The Commission's regulations require that written materials filed with the Commission be electronically filed (e-filed) in an unlocked legible and searchable PDF file, using the Commission's Dropbox. (Cal. Code Regs., tit. 2, 1181.3(c)(1).) Refer to <https://www.csm.ca.gov/dropbox.php> on the Commission's website for electronic filing instructions. If e-filing would cause the filer undue hardship or significant prejudice, filing may occur by first class mail, overnight delivery or personal service only upon prior approval of a written request to the executive director. (Cal. Code Regs., tit. 2, 1181.3(c)(2).)

As provided in the Commission's regulations, a real party in interest may appeal to the Commission for review of the actions and decisions of the executive director. Please refer to California Code of Regulations, title 2, section 1181.1(c).

Sincerely,

Heather Halsey
Executive Director

¹ Government Code section 17559(b), which provides that a claimant or the state may commence a proceeding in accordance with the provisions of section 1094.5 of the Code of Civil Procedure to set aside a decision of the Commission on the ground that the Commission's decision is not supported by substantial evidence in the record.

² Title 2, California Code of Regulations, section 1187.5.

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On February 22, 2022, I served the:

Sacramento, CA 95814

Subject: Response of Turlock Irrigation District and Modesto Irrigation District to
Proposed Dismissal of 21-TC-02

Dear Ms. Halsey:

Claimants Turlock Irrigation District (TID) and Modesto Irrigation District (MID) respond to the 22 February 2022 “Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim” (Notice) to oppose dismissal of this joint test claim.

The Procedure Here Is Objectionable Because Insufficient Notice Was Given

As an initial matter, Claimants object to the procedure being used. The joint test claim in Section 5 met Claimants’ initial burden to establish, with citation to authority and evidence, why they are local agencies eligible for subvention for the increased costs of the Mandate at issue here. The Notice asserts—without citation, explanation, or the certification required by section 1181.3(a) of the Commission’s regulations—that “Commission staff rejects this Test Claim pursuant to Commission regulation section 1183.1(a) because neither Turlock Irrigation District nor Modesto Irrigation district are local governments subject to the tax and spend limitations of the California Constitution, and therefore they are not eligible for mandate subvention under article XIII B, section 6 of the California Constitution.” Claimants have found no case holding that California irrigation districts are not “local governments subject to the tax and spend limitations of the California Constitution.” Commission staff’s bare, uncertified, and apparently unprecedented assertion is inadequate to constitute “notice” of why Commission staff believe the joint test claim should be dismissed.

BRISCOE IVESTER & BAZEL LLP

Ms. Halsey

18 April 2022

Page 2

Claimants are long-established and well-respected irrigation districts. They put significant effort into the joint test claim. Tens of millions of dollars are at stake. As a matter of due process, and basic respect between governmental agencies about an important matter, Commission staff should have provided Claimants with a more fulsome explanation of the proposed dismissal of the joint test claim.

If The Issue Is One Of Law, The Commission Has Already Resolved It In Claimants' Favor

To try to get some understanding of what Commission staff might be thinking, Claimants promptly requested an informal conference “to identify and resolve or clarify issues of fact or law related to the proposed dismissal” of the joint test claim. Two days later, on 2 March 2022, the Executive Director denied the request for an informal conference, explaining that “there is only the single *issue of law* regarding whether [TID] or [MID] are local governments subject to the tax and spend limitations of articles XIII A and XIII B of the California Constitution” (emphasis added).

The Executive Director’s 2 March letter clarifies that the only issue is one of law: as a matter of law, can California irrigation districts be subject to the tax and spend limitations of articles XIII A and XIII B of the California Constitution?

The answer to that legal question is an easy “yes”. California irrigation districts are all formed, empowered, and governed by the same law: Division 11 of the Water Code. The Commission has found California irrigation districts formed under that law to be subject to constitutional tax-and-spend limitations such that they may pursue test claims, as the Commission did for Oakdale Irrigation District and Glenn-Colusa Irrigation District in test claims 10-TC-12 and 12-TC-01. Because the Commission has already resolved in the affirmative that irrigation districts may pursue test claims, the test claim here cannot be dismissed as a matter of law.

If The Issue Is One Of Fact, Commission Staff, Not Claimants, Have The Initial Burden

To the extent Commission staff might believe that dismissal is appropriate, not because they view irrigation districts as ineligible to pursue test claims as a matter of law, but because, contrary to the Executive Director’s 2 March letter, the specific *facts* pertaining to MID and TID make them specially immune from constitutional tax-and-spend limitations, Commission staff have the initial burden to explain their thinking

and then provide a reasonable opportunity for MID and TID to make the requisite factual showing in response. The Superior Court, in *Paradise Irrigation District v. Commission on State Mandates* (no. 34-2015-80002016), concluded that the Commission “abused its discretion” in determining that Richvale Irrigation District and Biggs-West Gridley Water District were “‘ineligible’ to claim reimbursement”, because “the Commission never determined whether Richvale and Biggs-West receive any ‘proceeds of taxes’ within the meaning of Article XIII B, and therefore never determined whether they would be compelled to rely on limited appropriations to satisfy the mandates at issue.” (**Exhibit 1** at 16-17, emphasis added.)

That holding against the Commission—that it has the initial burden to establish that a claimant does not receive “proceeds of taxes”—was not disturbed on appeal, 33 Cal.App.5th at 197-198, and is binding against the Commission here as collateral estoppel. (See *Bernhard v. Bank of America Nat’l Trust & Sav. Asso.* (1942) 19 Cal.2d 807, 812 (allowing use of non-mutual offensive collateral estoppel in California); Cal. R. of Court R. 8.1115(b)(1) (allowing citation to unpublished opinions when they are collateral estoppel).) Placing the initial burden on the Commission is consistent with the presumption, in Articles XIII A § 3(d) and XIII C § 1(e), that every levy, charge, or exaction is a tax, and that the initial burden rests with the party asserting no taxes to prove it.

If, notwithstanding Commission staff’s insistence that the issue here is solely one of law, staff now intends to assert that MID and TID do not as a factual matter receive any proceeds of taxes, Commission staff have the initial burden to establish those facts. Only if Commission staff meet that initial burden can MID and TID be expected to understand why their joint test claim is proposed for dismissal and to properly appreciate what kind of factual showing they should prepare in response. Claimants object to being required to put on evidence on any factual issues before Commission staff have met their initial burden, and also object to the extent Claimants are not given a full and fair opportunity to respond, including with additional evidence, to whatever evidence Commission staff might offer before or at the hearing.

*The Joint Test Claim Establishes That The Mandate At Issue Could Only Be Funded
By The Proceeds Of Taxes*

In any event, the joint test claim here makes a prima facie showing that the State mandate at issue could only be funded by the proceeds of taxes. Irrigation districts like TID and MID raise revenues through charges for service (Water Code § 22280) or levies on real property (Water Code § 25701).¹ Charges and levies are presumptively also *taxes*. (Article XIII C § 1(e).) Charges are taxes unless “imposed for a specific government service or product provided directly to the payor that is not provided to those not charged”. (Article XIII C § 1(e)(2).) Levies are also taxes unless “imposed in accordance with the provisions of Article XIII D” (Article XIII C § 1(e)(7)), including those provisions prescribing that the levy “shall not exceed the proportional cost of the service attributable to the parcel” (Article XIII D § 6(b)(3)), and that they may not be used for “general governmental services ... where the service is available to the public at large in substantially the same manner as it is to property owners” (Article XIII D § 6(b)(5)). If the charges or levies irrigation districts would impose to fund a State mandate do not overcome that presumption, they are deemed taxes subject to the tax-and-spend limitations of Articles XIII A and XIII B of the California Constitution.

The joint test claim here, in page 13 of Section 5, established that “the Mandate will not provide, and is not intended to provide, benefits tailored to the Districts’ customers (the putative fee payors)”, including because: (i) “the Districts’ legal boundaries exclude riparian parcels along the Tuolumne River” and so “the immediate riparian and floodplain benefits the Mandate is intended to achieve are for the benefit of lands outside the Districts, rather than for the Districts’ customers”, and (ii) the Mandate is intended to benefit the “Bay-Delta Estuary”, which is in “another region of the state entirely”. (See *Department of Finance v. Commission on State Mandates* (2021) 59 Cal.App.5th 546, 567-570 (a fee a local agency would be required to charge to pay for a

¹ Although “a local government may be subject to the Article XIII B appropriations limit even if it is not currently receiving any *ad valorem* property taxes” (Exhibit 1 at 16), TID does currently also receive property tax revenues from Stanislaus and Merced Counties. (See Declaration of Jesse Kirchner, attached as **Exhibit 2**.)

BRISCOE IVESTER & BAZEL LLP

Ms. Halsey

18 April 2022

Page 5

State mandate to provide a “service available to the public at large” would be subject to constitutional limitations).)

Because charges and levies are presumptively taxes, and the joint test claim establishes that the Mandate at issue would require Claimants to impose charges or levies to fund a project intended to provide benefits principally for people and regions elsewhere, who would *not* be paying those charges or levies, those charges and levies that would fund the Mandate here would be taxes. Because imposing taxes would subject Claimants to the tax-and-spend limitations of Articles XIII A and XIII B of the California Constitution, the Claimants have standing to pursue this joint test claim.

Conclusion

The joint test claim should not be dismissed. The Commission should proceed to adjudicate it without further delay.

I certify that the facts stated in this letter are true and correct to the best of my knowledge based on my personal knowledge, information, or belief.

Sincerely,

BRISCOE IVESTER & BAZEL LLP

/s/ Peter Prows

EXHIBIT 1:
SUPERIOR COURT DECISION IN *PARADISE*
IRRIGATION DISTRICT

SUPERIOR COURT OF CALIFORNIA

COUNTY OF SACRAMENTO

**PARADISE IRRIGATION DISTRICT, et
al.,**

v.

**COMMISSION ON STATE
MANDATES, et al.,**

**DEPARTMENT OF WATER
RESOURCES, et al.**

Case Number: 34-2015-80002016

**RULING ON SUBMITTED MATTER &
STATEMENT OF DECISION**

Date: February 5, 2016

Time: 9:30 a.m.

Dept.: 29

Judge: Timothy M. Frawley

On February 4, 2016, the court issued a tentative ruling in the above-entitled proceeding. On February 5, 2016, at 9:30 a.m., the matter came on for hearing with counsel present as indicated on the record. The matter was argued and submitted. Having taken the matter under submission, the court now affirms its tentative ruling, with modifications, as set forth below.

At the hearing, counsel for Petitioners orally requested a statement of decision. Without conceding that a statement of decision is required, (see, e.g., *City of Carmel-by-the-Sea v. Board of Supervisors* (1986) 183 Cal.App.3d 229, 236), the court directs that this ruling shall constitute its statement of decision.

Introduction

Article XIII B, § 6, of the California Constitution requires reimbursement to local governments for any "new program or higher level of service" mandated by the State. A local government initiates the process for reimbursement under article XIII B, section 6, by filing a "test claim" with the Commission on State Mandates. The Commission must then determine whether a state mandate exists and, if so, the amount of reimbursement due the local entity.

This case challenges a decision of the Commission denying consolidated test claims seeking reimbursement for costs incurred by urban and agricultural water suppliers to comply with the Water Conservation Act of 2009 and implementing regulations.

The Commission found that two of the named claimants – namely, Richvale Irrigation District and Biggs-West Gridley Water District – are not eligible to claim reimbursement because they are not subject to the taxing and spending limitations imposed by California Constitution articles XIII A and XIII B. As to the remaining claimants, the Commission found the costs incurred by the agencies are not reimbursable because the agencies have sufficient authority to pass the costs onto parcel owners through increased fees or charges for water service. Petitioners (supported by “Friend of the Court” California Special Districts Association) challenge both of these findings. The petition is opposed by the Commission, the Department of Water Resources, and the Department of Finance.

While the court agrees with Petitioners that the Commission abused its discretion in dismissing the test claims of Richvale and Biggs-West, the court shall deny the petition because Petitioners have failed to show they incurred reimbursable state-mandated costs.

Background Law

Overview of Restrictions on Taxation and Spending

In 1978, the voters adopted Proposition 13, adding article XIII A to the California Constitution.¹ Section 1 of the act curbed the power of cities, counties, and special districts to levy *ad valorem* real property taxes. It limited the maximum amount of any *ad valorem* tax on real property to one percent of the property’s full cash value. It also reduced property taxes by rolling back the assessed value of real property to the value shown on the 1975-76 tax rolls, and restricting annual increases to an inflation factor, not to exceed 2% per year. It prohibited reassessment of a new base year value except in cases of purchase, new construction, or change in ownership. (Cal. Const., Art. XIII A, §§ 1, 2.)

To prevent the imposition of new taxes to make up for the decrease in real property tax revenues, the act prohibited new *ad valorem* real property taxes and new sales or

¹ Proposition 13 was not the first legislation to limit the ability of government to levy taxes. For example, several years earlier the State had enacted the Property Tax Relief Act of 1972 with the intent to limit the ability of local agencies and school districts to levy taxes.

transaction taxes on the sale of real property. It also imposed additional restrictions on state and local taxes. Article XIII A, Section 3 restricted state taxes by prohibiting any change in state taxes "enacted for the purpose of increasing revenues" unless approved by not less than two-thirds of the members of the Legislature. Article XIII A, Section 4 imposed a similar restriction on local taxes, requiring that special taxes be approved by a two-thirds vote of the electorate. (Cal. Const., Art. XIII A, §§ 3, 4.)

In 1979, in the wake of Proposition 13, California voters enacted Proposition 4 to limit the growth of government spending. Commonly known as the "Gann Limit," Proposition 4 added Article XIII B to the California Constitution, placing limits on government appropriations of the proceeds of taxes. (Cal. Const., Art. XIII B, § 1.)

In 1980, California enacted legislation to further implement the limits on appropriations established by Article XIII B. (Cal. Gov. Code § 7900 *et seq.*) Taken together, the sections explain and define the state and local government appropriation limits and the appropriations subject to limitation.

In 1986, voters enacted Proposition 62, placing still more restrictions on local taxes. (Cal. Gov. Code 53720 *et seq.*) Proposition 62 classifies all taxes as either special (imposed for specific purposes) or general (imposed for general governmental purposes). Proposition 62 restated that special taxes must be approved by a two-thirds vote, and added the requirement that local general taxes must be approved by a majority vote.

In 1996, voters adopted Proposition 218, which added the Right to Vote on Taxes Act (Articles XIII C and XIII D) to the California Constitution. Article XIII C reiterated the requirements of Proposition 62, making them part of the Constitution, while also making clear that the restrictions apply to taxes imposed by charter cities.

Article XIII D restricted local power to levy assessments and to impose new or increased property-related fees and charges. Article XIII D generally requires local governments to obtain voter approval for new or increased assessments, which is a levy or charge on real property for a special benefit conferred on that property. Under Article XIII D, an assessment imposed on a parcel or property must be proportional to, and no greater than, the special benefit conferred on the parcel. (Cal. Const., Art. XIII D, § 4.)

Property-related fees and charges are subject to similar restrictions. Under Article XIII D, property-related fees or charges (including charges for property-related services) must meet all of the following requirements: (1) revenues derived from the fee or charge must be used for the purpose for which the fee or charge was imposed, and

must be less than or equal to the funds required to provide the property-related service; (2) the amount of the fee or charge must not exceed the proportional cost of the service attributable to the parcel; (3) the service for which the fee or charge is imposed must actually be used by, or available to, the owner of the property; and (4) the fee or charge may not be imposed for general governmental services. (Cal. Const., Art. XIII D, § 6(b).)

New or increased fees and charges are subject to voter approval at two stages. First, local governments must give notice and conduct a public hearing on the proposed fee or charge. If a majority of owners protest against the proposed fee or charge, the fee or charge cannot be imposed. (Cal. Const., Art. XIII D, § 6.) Second, except for fees or charges for sewer, water, and refuse collection services, a proposed fee or charge must be submitted to and approved by a majority vote of the affected property owners or by a two-thirds vote of the electorate residing in the affected area. (*Ibid.*)

Proposition 218 buttressed Proposition 13's limitations on property taxes and special taxes by incorporating restrictions on local taxes and by imposing new restrictions on special assessments and property-related fees and charges. (See *Apartment Association of Los Angeles County v. City of Los Angeles* (2001) 24 Cal.4th 830, 837.) Together, Proposition 13 and 218 affect taxes, as well as most property-related assessments, fees, and charges. However, they do not materially affect other compulsory fees and charges (such as regulatory fees and user fees), which are not imposed as an incident of property ownership.

Following the enactment of Propositions 13 and 218, there was concern that local governments were disguising new taxes as "fees" to raise revenue without complying with the constitutional restrictions. Thus, in order to ensure the effectiveness of the existing constitutional limitations, in 2010, the voters adopted Proposition 26.² The measure amended and broadened the definition of "tax" in Article XIII A and XIII C to mean "any levy, charge, or exaction of any kind imposed by the State," except:

- (1) A charge imposed for a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the State of conferring the benefit or granting the privilege to the payor.
- (2) A charge imposed for a specific government service or product provided directly to the payor that is not provided to those not charged, and which does

² Proposition 26 is not retroactive; it does not apply to legislation enacted before its effective date (November 3, 2010.)

not exceed the reasonable costs to the State of providing the service or product to the payor.

- (3) A charge imposed for the reasonable regulatory costs to the State incident to issuing licenses and permits, performing investigations, inspections, and audits, enforcing agricultural marketing orders, and the administrative enforcement and adjudication thereof.
- (4) A charge imposed for entrance to or use of state property, or the purchase, rental, or lease of state property, except charges governed by Section 15 of Article XI.
- (5) A fine, penalty, or other monetary charge imposed by the judicial branch of government or the State, as a result of a violation of law. (Cal. Const., Art. XIII A, § 3(b); Art. XIII C, § 1(e).)

Proposition 26 also shifted to the State or local government the burden of demonstrating that a levy, charge, or other exaction is not a tax. (*Ibid.*) In this manner, Proposition 26 attempts to ensure that government cannot circumvent the constitutional restrictions on "taxes" simply by referring to them as "fees."

Reimbursement for Unfunded State Mandates

As laws were enacted to limit government taxation and spending, additional laws were enacted to prevent the State from shifting the cost of governmental programs from the State to local agencies. This was accomplished primarily by requiring the State to compensate local governments for mandated state costs.

The concept of reimbursement originated with the Property Tax Relief Act of 1972, generally known as "SB 90." The chief purpose of SB 90 was to limit the authority of local agencies and school districts to levy taxes. However, to offset those limitations, SB 90 required the State to reimburse local governments for the cost of unfunded state mandates. (See *City of Sacramento v. California* (1984) 156 Cal.App.3d 182, 188, overruled on other grounds in *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46.)

In 1975, the State created a statutory process for reviewing unfunded mandate claims. The legislation authorized the State Board of Control to conduct hearings and decide whether local agencies should be reimbursed for costs mandated by the State. The statutory process was codified in Revenue and Taxation Code, Section 2201 *et seq.*

Former Revenue and Taxation Code Section 2231(a) provided that the State "shall reimburse each local agency for all 'costs mandated by the state,' as defined in Section 2207." Former Section 2207, in turn, defined such costs as "any increased costs which a local agency is required to incur as a result of . . . [any] law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program"³ (*County of Los Angeles v. State of California* (1984) 153 Cal.App.3d 568, 571; see also *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 57-58.)

In 1979, with the adoption of Proposition 4, the voters added Article XIII B, Section 6, which superseded SB 90 and provided constitutional support for the prohibition of unfunded mandates. Article XIII B, Section 6 was based on the process established by SB 90. (See *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 736-737.) Section 6 provides:

Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service (Cal. Const, Art. XIII B, § 6.⁴)

Under Section 6, the Legislature is not required to provide subvention of funds for (i) legislative mandates requested by the local agency, (ii) legislation defining a crime, (iii) legislation enacted prior to January 1, 1975 (or regulations implementing such legislation), and (iv) legislation within the scope of California Constitution, Article I, Section 3(b)(7).

Section 6 was included in recognition that Article XIII A and B severely restricted the taxing and spending powers of local governments. (See *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487.) The provision was intended to preclude the State from shifting financial responsibility for governmental programs onto local entities that were "ill equipped to handle the task." (*Ibid.*) The concern which prompted Article XIII B, Section 6 was the perceived attempt by the State to shift to local agencies the fiscal responsibility for providing public services. (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56.) In the ballot arguments, the proponents of Article XIII B

³ In 1989, the Legislature repealed former Section 2207.

⁴ In 2004, Proposition 1A amended this language to eliminate the word "such." As amended, Section 6 provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service"

explained to the voters: "Additionally, this measure: . . . Will not allow the state government to force programs on local governments without the state paying for them." (*Ibid.*)

In 1984, the Legislature enacted Government Code Sections 17500 through 17630 to implement Article XIII B, Section 6. The legislation created the Commission on State Mandates to replace the State Board of Control as the quasi-judicial body charged with resolving state mandate claims. (Cal. Gov. Code § 17525; see also *Kinlaw v. State of California* (1991) 54 Cal.3d 326, 331.) Under the legislation, the Commission is vested with exclusive authority to hear and decide claims that a local government is entitled to reimbursement for "costs mandated by the state" under Article XIII B, Section 6. (Cal. Gov. Code § 17525.)

A local government initiates the process for reimbursement by filing a "test claim" with the Commission. The Commission then must determine whether a state mandate exists and, if so, the amount of reimbursement due the local entity. (Cal. Gov. Code §§ 17551, 17557, 17558.) Judicial review of the Commission's decision is available through a petition for writ of mandate under Code of Civil Procedure section 1094.5. (*Kinlaw, supra*, 54 Cal.3d at p.332; Cal. Gov. Code § 17559.)

The legislation defines "costs mandated by the state" as "any increased costs which a local agency or school district is required to incur . . . as a result of any statute . . . or any executive order implementing any statute . . . , which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution." (Cal. Gov. Code § 17514.) However, in Section 17556 subdivision (d), the Legislature declared that the Commission shall not find costs to be mandated by the state if the local agency "has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service." (Cal. Gov. Code § 17556(d).)

In 2004, voters adopted Proposition 1A. Among other things, the Proposition added subdivisions (b) and (c) to Article XIII B, Section 6. (Cal. Const., Art. XIII B, § 6 (b) and (c).)

Background Facts and Procedure

The test claims at issue in this writ proceeding arise from the Water Conservation Act of 2009 and its implementing regulations (the Agricultural Water Measurement regulations). (See Cal. Water Code §§ 10608-10608.64 and 10800-10853; 23 C.C.R. § 597-597.4.) The test claim statutes and regulations (collectively, the "test claim

statutes”) require large agricultural water suppliers to implement “critical” water management practices, including measuring the volume of water delivered to customers and adopting a pricing structure based at least in part on the quantity of water delivered, as well as other cost effective and technically feasible management practices.⁵ (Cal. Water Code § 10608.48.) The test claim statutes also subject large agricultural water suppliers to new agricultural water management plan requirements. (*Ibid.*) In addition, urban water suppliers must comply with new urban water management plan requirements and achieve mandatory water conservation goals.

On June 30, 2011, Petitioners Richvale Irrigation District, Biggs-West Gridley Water District, Paradise Irrigation District, and South Feather Water and Power Agency filed a test claim with the Commission contending that the Water Conservation Act contained reimbursable state mandates. On February 28, 2013, Petitioners Richvale and Biggs-West filed a second test claim challenging the implementing regulations. The two test claims were consolidated for analysis and hearing.

Prior to the hearing on the merits, the Commission determined that Richvale and Biggs-West were ineligible to claim reimbursement for state-mandated costs because they did not currently receive any “tax” revenue. Thus, the Commission gave notice that it intended to dismiss their test claim unless other local agencies agreed to substitute in as claimants in their place. Petitioners Oakdale Irrigation District and Glenn-Colusa Irrigation District agreed to substitute in, and were accepted as the claimants in Test Claim 12-TC-01 in place of Richvale and Biggs-West.

In December 2014, after Commission staff issued a Proposed Decision recommending denial of the test claims, the Commission held its hearing on the test claims. The Commission received evidence and heard arguments from the claimants, Commission staff, the Department of Water Resources, the California Special Districts Association, and the California State Association of Counties. After hearing, the Commission voted to adopt the Proposed Decision as its Decision, denying the test claims.

In its Decision, the Commission concluded that reimbursement is not required. The Commission determined that most of the challenged code sections and regulations do not impose new mandated activities. Further, even if the statutes and regulations impose new state-mandated activities, the costs incurred to comply with those requirements are not costs mandated by the State because the claimants have authority to charge fees sufficient to cover such costs, defeating their claim of a reimbursable

⁵ Large suppliers are those serving 25,000 or more irrigated acres.

mandate. The Commission also affirmed that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend tax revenue.

In response to the Commission's Decision, Petitioners filed their Petition for Writ of Administrative Mandamus. Petitioners contend that the Commission abused its discretion by concluding that the petitioning local agencies have sufficient fee "authority" to pay for the costs of the new mandates. Petitioners argue that the procedural limitations of Proposition 218 – in particular, the "majority protest" provisions – divested local agencies of "authority" to establish or increase property-related fees or charges. Petitioners argue that the Commission cannot require local agencies to "try and fail" to impose new or increased fees or charges before seeking subvention.

Petitioners also challenge the Commission's determination that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend property tax revenue. Petitioners contend that the Commission has added a new eligibility requirement for subvention which violates the unambiguous constitutional language providing that subvention is available to "any local government."

Standard of Review

The court must determine whether the Commission proceeded without, or in excess of, jurisdiction; whether the parties received a fair hearing; and whether there was a prejudicial abuse of discretion. (Code Civ. Proc. § 1094.5) Abuse of discretion is established if the Commission did not proceed in the manner required by law, its order or decision is not supported by the findings, or the findings are not supported by the evidence. (*Ibid.*)

The Commission's factual findings are reviewed under the substantial evidence test. (*City of Richmond v. Commission on State Mandates* (1998) 64 Cal.App.4th 1190, 1194-1195; Cal. Gov. Code § 17559.) Under the substantial evidence test, the court does not reweigh the evidence, views the evidence in the light most favorable to the Commission's findings, and indulges all reasonable inferences in support thereof. (*Camarena v. State Personnel Bd.* (1997) 54 Cal.App.4th 698, 701; *Hosford v. State Personnel Bd.* (1977) 74 Cal.App.3d 302, 306-07.) The court may not overturn a finding of fact simply because a contrary finding would have been more reasonable. (*Boreta Enterprises, Inc. v. Department of Alcoholic Beverage Control* (1970) 2 Cal.3d 85, 94; *Wilson v. State Personnel Bd.* (1976) 58 Cal.App.3d 865, 870.)

However, in addition to examining whether the Commission's findings are supported by substantial evidence, the court must determine whether the Commission committed any

errors of law. The court must independently assess pure questions of law. (*Jenron Corp. v. Dept. of Social Services* (1997) 54 Cal.App.4th 1429, 1434.) The determination of whether a statute or regulation imposes a reimbursable state mandate is a question of law, as is the interpretation of a statute or constitutional provision. (*County of San Diego v. State of California* (1997) 15 Cal.4th 68, 109; *State Building & Construction Trades Council of California v. City of Vista* (2012) 54 Cal.4th 547, 558.)

While an agency's interpretation of the meaning and legal effect of a governing law is entitled to consideration and respect, agency interpretations are not binding or authoritative. (*Bonnell v. Medical Board* (2003) 31 Cal.4th 1255, 1264.) It is the duty of the courts to state the true meaning of the law finally and conclusively, even if this requires the courts to overturn an erroneous administrative construction. (*Yamaha Corp. of America v. State Bd. of Equalization* (1998) 19 Cal.4th 1, 7.)

The weight accorded to an agency's interpretation is "fundamentally situational," and turns on a "legally informed, commonsense assessment of [its] contextual merit." (*Bonnell, supra*, 31 Cal.4th at p.1264.) Depending on context, the agency's interpretation may be helpful, enlightening, or convincing. Other times, it may be of little worth. (*Yamaha, supra*, 19 Cal.4th at pp.7-8.)

In determining how much weight to give an agency interpretation, courts must analyze two broad categories of factors: those indicating that the agency has a comparative interpretive advantage over the courts, and those indicating that the interpretation in question is probably correct. (*Id.* at p.12.) In the first category are factors indicating the agency has special expertise or technical knowledge, especially where the legal text to be interpreted is technical, complex, or entwined with issues of fact, policy, and discretion. (*Ibid.*) In the second category are factors suggesting that the agency gave careful consideration to its interpretation (such as adoption of a formal interpretive rule under the APA), factors indicating that the agency's interpretation was adopted contemporaneous with the legislative enactment being interpreted, and factors showing that the agency has consistently maintained the interpretation over time. (*Id.* at pp.12-13.)

Whatever the force of administrative construction, final responsibility for the interpretation of the law rests with the courts. (*State Bd. of Equalization v. Board of Supervisors* (1980) 105 Cal.App.3d 813, 820.)

In interpreting the scope of a constitutional provision, courts apply the same principles that govern statutory construction. The court's fundamental task in construing a law is to determine and effectuate the intent of those who enacted it. To determine intent, the

reviewing court turns first to the language of the provision, giving the words their usual and ordinary meanings. When the language is clear and unambiguous, there is no need for construction and courts should not indulge in it. (*Morgan v. Imperial Irrigation Dist.* (2014) 223 Cal.App.4th 892, 905-906; *Arden Carmichael, Inc. v. County of Sacramento* (2000) 79 Cal.App.4th 1070, 1075.) If the words are ambiguous and open to more than one meaning, the court may refer to extrinsic indicia of the intent, such as the legislative history of the measure and its impact on public policy. (*Morgan, supra*, 223 Cal.App.4th at pp.905-06; see also *Mejia v. Reed* (2003) 31 Cal.4th 657, 663.)

Discussion

Petitioners contend the Commission's Decision constitutes an abuse of discretion in the following two respects. First, the Commission erroneously determined that Richvale and Biggs-West are not eligible to claim reimbursement because only local agencies that collect and spend "proceeds of taxes" are entitled to claim reimbursement for state mandates. Second, the Commission erroneously determined that Government Code Section 17556 bars reimbursement because Petitioners have sufficient fee authority to pay for the costs of any new mandates.

Eligibility to Claim Reimbursement

The Commission determined that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend "proceeds of taxes" subject to the tax and spend limitations of Articles XIII A and B. Relying on the California Supreme Court's opinion in *County of Fresno v. State of California*, the Commission concluded that reimbursement for a state mandate is required only if a local agency is compelled to rely on "proceeds of taxes" to meet the mandate. If an agency does not collect or expend proceeds of taxes, it is not subject to the appropriations limitation of Article XIII B, and therefore is not eligible for reimbursement under Article XIII B, Section 6. Because Richvale and Biggs-West do not receive any property tax revenues, the Commission determined they are not eligible for reimbursement.

Petitioners (and CSDA) argue that the plain language of Article XIII B, Section 6 – as amended by Proposition 1A -- indicates that reimbursement is available to "any local government," without qualification. Petitioners argue that the Commission's reliance on *County of Fresno* is misplaced because that case was decided prior to Proposition 218, when there were no constitutional restrictions on nontax sources of local revenues. Thus, the Court focused on "tax revenues" as the only constitutionally-limited local revenue sources.

With the adoption of Proposition 218, assessments and fees joined taxes as limited revenue sources. Thus, Petitioners argue that the subvention requirement should protect local government revenues derived from assessments and fees in the same manner it protects tax revenues. Petitioners contend that this construction is consistent with the purpose of Article XIII B, Section 6, which is to prevent the State from shifting financial responsibility for carrying out governmental programs to local entities that are "ill equipped" to handle the task.

This court concludes that the Commission properly interpreted the Supreme Court's decision in *County of Fresno*, but misapplied that decision to the facts of this case. In reaching this conclusion, the court acknowledges that Petitioners' "plain language" argument has intellectual appeal. However, the court cannot ignore the constraints imposed by the doctrine of *stare decisis*.

The doctrine of *stare decisis* expresses a fundamental policy of law that courts exercising inferior jurisdiction must accept the law declared by courts of superior jurisdiction. (*Cuccia v. Superior Court* (2007) 153 Cal.App.4th 347, 353.) A decision of an appellate court is binding on a lower court even if the lower court believes it was wrongly decided. Application of the doctrine here means this court is bound by the Supreme Court's decision in *County of Fresno*.

In *County of Fresno*, the Supreme Court rejected a "plain meaning" interpretation of Section 6. *County of Fresno* involved a facial constitutional challenge to Government Code Section 17556. As discussed above, Section 17556(d) provides that the Commission shall not find costs to be mandated by the State if the local agency has authority to levy charges, fees, or assessments sufficient to pay for the mandated program or increased level of service. The petitioner argued that the provision was facially unconstitutional because it conflicted with the language of Article XIII B, Section 6, which contains no such exception. The Court disagreed.

In reaching its decision, the Court acknowledged that Section 6 "broadly declares that the 'state shall provide a subvention of funds to reimburse . . . local government for the costs [of a state-mandated new] program or higher level of service,' subject only to the exceptions enumerated in the initiative. (*County of Fresno, supra*, 53 Cal.3d at p.487.) Nevertheless, the Court concluded that Section 6, "read in its textual and historical context," was intended to protect only the "tax revenues" of local governments. Thus, the term "costs" in Article XIII B, Section 6, implicitly excludes expenses that are recoverable from sources other than "taxes." (*Id.* at pp.487-88.)

Although Section 17556(d) only refers to charges, fees, and assessments, the Supreme Court's reasoning is broad enough to cover any non-tax sources of revenue. Thus, the Court ruled that subvention is required "only when the costs in question can be recovered *solely from tax revenues.*" (*Ibid.*) Based on this analysis, the Court found the statute to be facially constitutional. Because such expenses are outside the scope of the constitutional provision, the Legislature did not unlawfully create a new exception to the subvention requirement.⁶

Petitioners may criticize the decision in *County of Fresno* for failing to abide by the rules of statutory construction. It is hornbook law that courts are bound to give effect to constitutional provisions according to the usual, ordinary import of the language used. If the language is clear and unambiguous, the plain meaning controls and courts should not resort to extrinsic aids to determine intent. (*Delaney v. Superior Court* (1990) 50 Cal. 3d 785, 801-02; *Silicon Valley Taxpayers' Assn., Inc. v. Santa Clara County Open Space Authority* (2008) 44 Cal.4th 431, 444; see also *Morgan, supra*, 223 Cal.App.4th at pp.905-906.)

Courts must avoid unnecessarily changing a law in the name of "construing" it. If the words are clear, a court may not alter them to accomplish a purpose that does not appear on its face. (*People v. Savala* (1981) 116 Cal.App.3d 41, 61.) Generally a court may not read an exception into a statute or constitutional provision unless it must be implied in order not to violate an established rule of public policy. (*People v. Goodson* (1990) 226 Cal.App.3d 277, 281.)

As the Supreme Court observed in *County of Fresno*, the plain language of Section 6 broadly declares that "[w]henever the [State] mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service," with only three designated exceptions. In *County of Fresno*, the Court did not expressly find this language ambiguous, but it nevertheless resorted to extrinsic sources to determine voter intent.

In addition, the paramount goal of constitutional interpretation is to ascertain the intent of the lawmakers – in this case, the voters -- so as to effectuate the purpose of the law. (*Delaney, supra*, 50 Cal.3d at p.798.) The term "purpose" refers not to the subjective

⁶ Because *County of Fresno* was decided prior to the adoption of Proposition 218, the Court assumed that costs of state-mandated programs always are recoverable, either from tax revenues or from other (non-tax) sources of revenues such as fees, charges, and assessments. In limiting subvention to expenses that are recoverable "solely from taxes," the Court assumed that expenses determined to be outside the scope of subvention would be recoverable from other sources, such as fees, charges, and assessments. After Propositions 218 and 26, this is not necessarily correct, which may justify the Court revisiting the broad rule established in *County of Fresno*.

motivation of those who enacted the initiative, but to the intended result or effect of the legislation. (See *Board of Supervisors v. Superior Court* (1995) 32 Cal.App.4th 1616, 1623.) The relevant inquiry is: What purpose was the law intended to achieve?

In *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, the Supreme Court declared the purpose of Section 6 was to preclude a shift of financial responsibility for carrying out governmental functions from the State to local agencies. The apparent inspiration or motivation for the provision was the recognition that local agencies had their taxing powers restricted by the enactment of Article XIII A in the preceding year and therefore were "ill equipped" to take responsibility for new programs. (*Id.* at pp. 56-57, 61.) In *County of Fresno*, the Court arguably merged these concepts and determined that the "purpose" of Section 6 was to protect local "tax revenues," even though Section 6 (as originally enacted) did not mention taxes, tax revenues, or the taxing limitations imposed by Article XIII A.⁷

However, it is not for this court to reconsider whether *County of Fresno* was rightly decided. As a court exercising inferior jurisdiction, this court is bound by the doctrine of *stare decisis* to follow the decisions of courts exercising superior jurisdiction. A lower court may not overrule the "holding" of a higher court. (*Auto Equity Sales v. Superior Court* (1962) 57 Cal.2d 450, 455.)

There can be no dispute that the "tax revenue" language in *County of Fresno* is part of the Court's holding, because it consists of statements of law necessary to the decision. (*In re Marriage of Boswell* (2014) 225 Cal.App.4th 1172, 1176-77.) Thus, if the construction of Section 6 in *County of Fresno* is to be overruled, it is up to the California Supreme Court to do it.⁸

This disposes of the argument that Section 6 applies by its "plain language" to any local agency, without qualifications. The Supreme Court has construed Article XIII B, Section 6 as designed to protect the proceeds of "taxes." It construed the term "costs" in Article

⁷ The fact that Section 6, as originally enacted, did not refer to "taxes" or "appropriations subject to limitation," raises an issue about whether the voters intended the subvention requirement to incorporate subsequent changes to the law governing the definition of "taxes" and "appropriations subject to limitation." Normally, this question is answered by looking at the terminology used to determine whether the lawmakers intended the law to grow with changes in jurisprudence, or intended instead that the law remain frozen as originally enacted. This is not a trivial consideration. In 1990, Proposition 111 created additional exemptions from the category of appropriations subject to limitation. *County of Fresno* provides no express guidance on whether such amendments should be considered in determining the scope of subvention required by Section 6, though it is difficult to conceive how such amendments could be considered without also considering the amendments made by Proposition 218. (See *Old Homestead Bakery, Inc. v. Marsh* (1925) 75 Cal.App.247, 259 [discussing rule of *in pari materia* with regard to revenue and taxation statutes].)

⁸ The addition of Article XIII B, Section 6(c) by Proposition 1A in 2004 does not alter this analysis.

XIII B, Section 6 as excluding expenses that are recoverable from sources other than taxes. This court cannot ignore that decision and reinterpret the term costs to include expenses that are recoverable from sources other than taxes.

Nevertheless, the language used in *County of Fresno* should not be taken out of context, for even the “devil can cite Scripture for his purpose.” (Shakespeare, Merchant of Venice, act I, scene 3, cited in *Harris v. Superior Court* (1992) 3 Cal.App.4th 661, 666.) Expressions used in judicial opinions are always to be construed and limited by reference to the matters under consideration. (*Estate of Miller* (1951) 104 Cal.App.2d 1, 17; *People v. Smith* (2003) 110 Cal.App.4th 1072, 1106 fn.73.)

Construed in context, it is clear that the Court in *County of Fresno* used the term “taxes” as that term is defined in Article XIII B. (*County of Fresno, supra*, 53 Cal.3d at pp.486-87.) For local agencies, Article XIII B defines “proceeds of taxes” to include, “*but not be restricted to,*” all tax revenues *and* proceeds from (1) regulatory charges and fees, to the extent such proceeds exceed the costs reasonably borne by government in providing the product or service; (2) the investment of tax revenues; and (3) subventions received from the State (other than pursuant to Section 6).⁹ (Cal. Const. Art. XIII B, § 8 [emphasis added].)

The Commission, in contrast, interpreted the term “taxes” to mean “local property tax revenues.” It concluded that if a local agency does not currently receive local property tax revenues, the agency is *per se* ineligible for subvention.¹⁰ This does not follow. Article XIII B clearly defines “proceeds of taxes” as including,¹¹ without limitation, “all tax revenues,”¹² excessive regulatory fees and user charges, proceeds from the investment

⁹ Under Article XIII B, state financial assistance to local government generally is not subject to the state appropriations limit, but is subject to the local appropriations limit. In contrast, funds provided to reimburse local governments for state mandates are not subject to the local appropriations limit, but are subject to the state appropriations limit. (Cal. Const. Art. XIII B, § 8.) Because Article XIII B distinguishes between the two types of subvention, it is clear that voters intended local governments to receive funding for state mandates separate and apart from whatever other financial assistance they may receive from the State.

¹⁰ In other parts of its Decision, the Commission seems to acknowledge that the reasoning of *County of Fresno* potentially extends beyond local property taxes: “If the local entity is not compelled to rely on appropriations subject to the limitation to comply with the alleged mandate, no reimbursement is required.” (Decision, p.34; see also p.35 [the issue is “to what extent [an agency’s] sources of revenue (and the appropriations to be made) are limited by articles XIII A and XIII B.”])

¹¹ The word “including” is a term of enlargement, (*Bighorn-Desert View Water Agency v. Verjil* (2006) 39 Cal.4th 205, 216-217), suggesting that other revenue sources (beyond “subventions” and “tax revenues”) might qualify as “proceeds of taxes” under Article XIII B. It is unclear whether the California Supreme Court considered this argument in *County of Fresno*.

¹² While the term “tax” traditionally had no fixed meaning, a tax frequently was defined as a compelled contribution levied to raise revenue for the general support of government. (*Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 874.) Courts suggested that any compelled contribution levied to raise revenues for the general support of government may qualify as a “tax” within the meaning of

of tax revenues, as well as most subventions from the State. (See *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 448-50.) Thus, a local government may be subject to the Article XIII B appropriations limit even if it is not currently receiving any *ad valorem* property taxes.

The redevelopment cases cited by the Commission do not compel a different conclusion. The analysis in those cases is specific to tax increment financing under Article XVI, § 16. Pursuant to Health and Safety Code Section 33678, the funds a redevelopment agency receives from tax increment financing are not "proceeds of taxes" subject to the Article XIII B appropriations limit. The constitutional validity of Section 33678 was upheld in *Brown v. Community Redevelopment Agency* (1985) 168 Cal.App.3d 1014. Thus, as a matter of law, tax increment revenues received by redevelopment agencies are not "proceeds of taxes" within the meaning of Article XIII B. Because tax increment revenues are not "proceeds of taxes," *County of Fresno* dictates that subvention is not required when redevelopment agencies are mandated to use tax increment revenues for state-mandated programs. (*Redevelopment Agency of the City of San Marcos v. California Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986-87; *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-82.)

Richvale and Biggs-West are not redevelopment agencies. They are not funded solely by tax increment financing. Thus, the redevelopment cases have no application here.

It well may be that Richvale and Biggs-West do not (and cannot) receive "proceeds of taxes" and therefore are not actually entitled to reimbursement for mandated costs, but the court cannot make this determination based on the record presented.¹³ Here, the Commission never determined whether Richvale and Biggs-West receive any "proceeds of taxes" within the meaning of Article XIII B, and therefore never determined whether

Article XIII B. (*County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 449-50; see also *Redevelopment Agency of the City of San Marcos v. California Commission on State Mandates* (1997) 55 Cal.App.4th 976, 983, 986.)

Proposition 26 subsequently amended the California Constitution to define the term "tax" to mean "any levy, charge, or exaction of any kind" imposed by government, except those that meet one of seven specified exemptions. (Cal. Const. Art. XIII C, § 1(e).) Thus, levies enacted after the effective date of Proposition 26 are more likely to be classified as "taxes."

At minimum, taxes received by local governments may include, in addition to property taxes, sales taxes, utility taxes, transient occupancy taxes, business taxes, parcel taxes, and documentary transfer taxes. It is unclear from the record whether Richvale and Biggs-West collect any of these other taxes.

¹³ Determining whether Richvale and Biggs-West receive "proceeds of taxes" will require a comprehensive account of the revenues received by them, and a subsequent determination as to whether those revenues constitute "taxes" within the meaning of Article XIII B. No simple feat.

they would be compelled to rely on limited appropriations to satisfy the mandates at issue.

Based on the record presented, the court agrees that the Commission abused its discretion in determining that Richvale and Biggs-West are “ineligible” to claim reimbursement merely because they do not “receive *ad valorem* property tax revenue.”

Sufficient Fee Authority

As described above, Government Code Section 17556(d) precludes finding costs to be mandated by the State if the local agency has authority to levy charges, fees, or assessments sufficient to pay for the mandated program. (Cal. Gov. Code § 17556(d).) The California Supreme Court upheld the facial constitutionality of Section 17556(d) in *County of Fresno*. Relying on Section 17556(d) and *County of Fresno*, the Commission denied the test claims, concluding the test claim statutes do not impose any reimbursable “costs” because the claimants possess fee authority sufficient as a matter of law to cover the costs of any new mandated activities.

Petitioners admit that, but for Proposition 218, they would have sufficient authority to establish or increase fees or charges to recover the costs of any new mandates. However, Petitioners contend that Proposition 218 removed their authority to establish or increase property-related fees or charges. Petitioners contend that under Proposition 218, a local agency only has authority to “propose” a fee or charge. The local agency then must provide written notice by mail of the proposed fee or charge to each affected landowner, who may file a written protest. If a majority of the owners file protests against the proposed fee or charge, the fee or charge cannot be imposed. (Cal. Const., Art. XIII D, § 6.) Thus, Petitioners argue, the ultimate decision-making authority rests with the landowners, not the agency.

Petitioners argue that the Commission correctly recognized the impact of Proposition 218 in an earlier test claim decision, *Discharge of Stormwater Runoff*, Test Claim No. 07-TC-09, Mar. 26, 2010. In *Stormwater*, the Commission determined that Government Code Section 17556(d) did not apply because the agency’s authority to impose a fee was contingent on the outcome of Proposition 218’s voting and majority protest procedures. The Commission concluded the local agency did not have “sufficient” authority to pay for the mandated program. (AR, at CSM_2318 through CSM_2334.)

In the Decision, the Commission recognized that Petitioners’ fee authority is subject to limitations, including the majority protest provision of Proposition 218. However, the Commission ruled that for the majority protest provision to constitute a legal barrier,

either Petitioners “would have to provide evidence that they tried and failed” to impose or increase the necessary-fees, or a court would have to determine that the threat of a majority protest is a constitutional barrier to fee authority as a matter of law. (Decision, pp.78-79.) The “speculative and uncertain threat” of a majority protest by itself cannot defeat Petitioners’ fee authority.

The Commission attempted to distinguish its earlier decision in *Stormwater* by claiming that Petitioners’ fees are exempt from the voter approval requirement, whereas the fees in *Stormwater* were not. (AR, at CSM_84.) But that claim is flatly contradicted by the record. (AR, at CSM_2333.)

In *Stormwater*, the Commission considered some fees that are subject to Proposition 218’s voter-approval requirement, and some that are not. (AR, at CSM_2333.) The Commission concluded that a local agency does not have sufficient fee authority if the fee is subject to voting or majority protest requirements under Proposition 218. The Commission concluded that these requirements strip the local agency of authority to impose the fee. (See AR, at CSM_2324 through CSM_2325 and CSM_2332 through CSM_2334.) The Commission rejected an argument of the State Water Board that the voting and majority protest requirements are equivalent to the practical/economic infeasibility hurdles discussed in *Connell v. Superior Court* (1997) 59 Cal.App.4th 382. (See AR, at CSM_2324 through CSM_2325.)

In this case, the Commission reversed course, determining that a majority protest provision is not a legal barrier to fee authority, but merely a practical or economic hurdle, as in *Connell*. (See AR, at CSM_83 through CSM_85.) It follows that the *Stormwater* decision is not “distinguishable;” it is simply inconsistent – as the Commission now seems to concede in its Opposition brief. (See Opposition, p.17.)

The fact that the Commission’s Decision is inconsistent with *Stormwater* does not, by itself, render it invalid. Commission decisions are not precedential, and the Commission may depart from its reasoning in a prior test claim, provided its action is not arbitrary or capricious. (Cal. Gov. Code §§ 17533, 11425.60.) An agency has the power to “change its mind.” (*Citicorp N. Am. v. Franchise Tax Bd.* (2000) 83 Cal.App.4th 1403, 1419-20.) However, a new interpretation which conflicts with an earlier interpretation is entitled to considerably less deference. (*Yamaha Corp. of America v. State Board of Equalization* (1998) 19 Cal.4th 1, 14; see also *City of Oakland v. Public Employees’ Retirement System* (2002) 95 Cal.App.4th 29, 57 [an administrative decision, even if not designated precedential, properly informs as an administrative interpretation of the law].)

Because the court itself is the ultimate arbiter of the interpretation of the law, the court must decide which Commission interpretation is correct: its initial determination that a majority protest provision is a legal barrier to an agency's fee authority, or its subsequent determination that it is not (at least until the agency has "tried and failed" to impose the necessary fees.) (See *East Peninsula Educ. Council, Inc. v. Palos Verdes Peninsula Unified Sch. Dist.* (1989) 210 Cal.App.3d 155, 165 [use of an erroneous legal standard constitutes a failure to proceed in the manner required by law].)

The court concludes that the Commission's more recent interpretation is correct. The mere threat of a majority protest provision is not a legal barrier to an agency's fee authority. A majority protest requirement is not a legal barrier until it is exercised.

Section 17556(d) precludes reimbursement where a local agency has the authority – i.e., the right or power – to levy fees sufficient to cover the costs of the state-mandated program. Nothing in the language of the statute indicates that an agency's fee authority must be absolute; it merely must be "sufficient."

Case law also supports the view that an agency's fee authority need not be absolute. In *County of Placer, supra*, 113 Cal.App.3d 443, which was cited with approval in *County of Fresno*, the Court of Appeal held that governmental spending restrictions imposed under Article XIII B do not limit a local agency's ability to expend funds collected from non-tax sources, such as special assessments. In reaching this determination, the Court noted that most special assessment acts contain a majority protest provision. Nevertheless, the Court held that special assessments are not the type of exaction intended to be included within the limitations of Article XIII B. (*Id.* at pp.453-55.)

Similarly, in *County of Fresno*, the County did not possess unlimited fee authority. Both the Health and Safety Code and Article XIII B limited the County to collecting fees in an amount sufficient to pay for the costs of the services provided. The County was prohibited from charging "excess" fees. Yet this did not prevent application of Section 17556(d). (*County of Fresno, supra*, 53 Cal.3d 482, 485-87; see also *Connell, supra*, 59 Cal.App.4th 382 [Districts had authority to levy fees sufficient to cover the costs at issue].)

Petitioners are correct that the authority of local agencies to recover costs through charges, fees, and assessments was impacted by Proposition 218. However, the mere specter of a majority protest should not, by itself, negate a local agency's fee authority. While it is possible that a majority of the owners will protest a proposed fee, it is also possible that they will not.

Petitioners argue that if a voter-approval requirement divests an agency of fee authority, a majority protest requirement should as well. Petitioners contend there is no material distinction between the voter approval and majority protest requirements for purposes of subvention. The court, however, sees a material distinction. Under the voter approval requirement, the agency has no authority to establish or increase fees unless the fee is approved by an affirmative majority vote of the affected property owners. (Cal. Const., Art. XIII D, § 6(c).) Under the majority protest requirement, the agency has authority to levy a fee unless there is a majority protest.¹⁴ The agency is prohibited from imposing the fee only if a majority of owners present written protests. If owners do nothing, the agency may proceed with its plans to impose the fee. A majority protest functions more like a veto than an affirmative voter approval requirement.

Under Proposition 218, a local agency lacks authority to impose a fee for water services if it is actually protested by a majority of the affected owners. But, like the Commission, this court is unwilling to conclude that Petitioners lack "sufficient" fee authority based on the speculative and uncertain threat of a majority protest. Thus, in the absence of a showing that Petitioners have "tried and failed" to impose or increase the necessary fees, the Commission properly concluded that Petitioners have sufficient fee authority to cover the costs of any mandated programs.

The court does not agree with Petitioners that requiring such a showing will bar agencies from timely filing test claims. Under Government Code Section 17551, test claims must be filed within 12 months following the effective date of a statute or executive order, or within 12 months of incurring increased "costs" as a result of a statute or executive order, *whichever is later*. (Cal. Gov. Code § 17551 [emphasis added].)

According to *County of Fresno*, the Legislature has construed the term "costs" as excluding expenses that are recoverable from sources other than taxes. Thus, until an agency knows whether expenses are recoverable from sources other than taxes, it does not know whether it has incurred any "costs." Logically then, the limitations period for filing a test claim cannot begin to run until after the agency has "tried and failed" to recover the costs through fees or charges subject to a majority protest requirement.

Further, given the relatively short deadline for owners to file a protest, the agency generally should know within one year whether a particular fee or charge has been blocked by a majority protest. In that rare case where it takes longer than one year to

¹⁴ The court acknowledges that Proposition 218 refers to fees "proposed for imposition," but this does not alter the court's analysis of how the majority protest requirement functions – as notice with an opportunity to object (sometimes referred to colloquially as a "scream or die" notice).

enact a fee to cover a new mandate, the court has little difficulty concluding that the time period for submitting a test claim should (at minimum) be equitably tolled while the agency completes the majority protest procedures.¹⁵ If, as the Commission concluded in its Decision, claimants must show that they “tried and failed” to impose the necessary fees, (see Decision, at CSM_84), then claimants must have a means to submit their test claims to the Commission *after* fulfilling the majority protest requirement. To conclude otherwise would produce the unacceptable result that a claimant would have no means of seeking reimbursement even for expenses that are indisputably “costs mandated by the State.” That cannot be the law.

In this litigation, the Commission distanced itself from the “try and fail” language in its Decision, arguing that even if voters or landowners block a proposed fee increase, subvention is not required because the resulting costs were imposed by the voters/landowners, rather than the State. This argument borders on the absurd, conflating the “costs” mandated by the State with the “fees” levied to cover such costs. By its plain terms, Article XIII B, Section 6 requires subvention “[w]hensoever the Legislature or any state agency mandates a new program or higher level of service on any local government,” to reimburse that local government for the costs of the program or increased level of service. In Section 17556(d), the Legislature recognized an exception to the reimbursement requirement when mandated “costs” are recoverable from sources other than taxes (namely, from charges, fees, or assessments). But the mandate itself still originates from the State, not the voters or landowners who may exercise their constitutional right to block the agency from imposing new fees or assessments.

This should be obvious from the language of Article XIII B, Section 6. But if there remains any doubt, it is dispelled by Government Code Section 17514, which defines “costs mandated by the state” to mean “increased costs which a local agency . . . is required to incur . . . as a result of any statute . . . or any executive order implementing any statute . . . , which mandates a new program or higher level of service of an existing program” The test claims in this proceeding arise from the Water Conservation Act of 2009 and its implementing regulations. Petitioners filed the test claims because they will incur costs to comply with the requirements of the new statute and regulations. Petitioners may seek to cover these costs through increased fees or charges, but if such efforts fail due to lack of voter or landowner approval, the costs still cannot be attributed to the voters or landowners because *they did not mandate the new program or higher level of service* -- the State did.

¹⁵ To ensure its rights are preserved, the agency also could file its test claim before the rate-setting process is complete, and request the Commission stay the claim pending the outcome of the majority protest process.

The Commission also suggests that this court should find as a matter of law that Petitioners have sufficient authority merely because they have statutory authority to establish or increase fees. This argument is a non-starter. The court cannot simply ignore the constitutional limitations on Petitioners' fee authority. A statute cannot trump the Constitution. Wherever statutes conflict with constitutional provisions, the latter must prevail. (*Delaney v. Superior Court* (1990) 50 Cal.3d 785, 801.) Statutory fee authority is not "sufficient to pay for the mandate program or increased level of service" if it cannot be applied due to constitutional limitations.

Disposition

The court concludes that the Commission abused its discretion in dismissing Richvale and Biggs-West as eligible claimants. However, because the court finds the Commission correctly denied the test claims because Petitioners have not (yet) incurred any costs mandated by the State, the court shall deny the petition. This ruling shall be without prejudice to Petitioners' ability to file a new test claim if fees/charges proposed to recover the costs of the programs are blocked by a majority protest.

Counsel for the Commission is directed to prepare a formal judgment, consistent with this ruling; submit it to opposing counsel for approval as to form; and thereafter submit it to the court for signature and entry of judgment in accordance with Rule of Court 3.1312.

Dated: February 8, 2016

Hon. Timothy M. Frawley
California Superior Court Judge
County of Sacramento

CERTIFICATE OF SERVICE BY MAILING
(C.C.P. Sec. 1013a(4))

I, the Clerk of the Superior Court of California, County of Sacramento, certify that I am not a party to this cause, and on the date shown below I served the foregoing RULING by depositing true copies thereof, enclosed in separate, sealed envelopes with the postage fully prepaid, in the United States Mail at Sacramento, California, each of which envelopes was addressed to:

ALEXIS K. STEVENS
Somach Simmons & Dunn
500 Capitol Mall, Ste. 1000
Sacramento, CA 95814

DUSTIN C. COOPER
PETER C. HARMAN
Minasian Meith Soares Sexton & Cooper
1681 Bird Street
Oroville, CA 95965

MATTHEW B. JONES
Commission Counsel
Commission on State Mandates
980 Ninth Street, Ste. 300
Sacramento, CA 95814

PETER H. CHANG
Deputy Attorney General
Department of Justice
455 Golden Gate Ave., Ste. 11000
San Francisco, CA 94102-7004

I, the undersigned deputy clerk, declare under penalty of perjury that the foregoing is true and correct.

Dated: February 8, 2016

Superior Court of California, County of
Sacramento

By: F. Temmerman,
Deputy Clerk

RECEIVED
FEB 12 2016
COMMISSION ON
STATE MANDATES

**EXHIBIT 2:
DECLARATION OF JESSE KIRCHNER**

Declaration of Jesse Kirschner

1. I am the Accounting and Finance Department Manager of Turlock Irrigation District (the "District"). I am making this declaration of my personal knowledge.
2. The District receives annual property tax revenues from Stanislaus County and Merced County.
3. In 2018, the District received \$1,837,715 in property tax revenues from Stanislaus County and \$18,965 in property tax revenues from Merced County.
4. In 2019, the District received \$1,987,224 in property tax revenues from Stanislaus County and \$18,965 in property tax revenues from Merced County.
5. In 2020, the District received \$2,059,291 in property tax revenues from Stanislaus County and \$41,741 in property tax revenues from Merced County.
6. In 2021, the District received \$2,177,478 in property tax revenues from Stanislaus County and \$50,614 in property tax revenues from Merced County.

I declare under penalty of perjury under the laws of the State of California that the facts stated in this declaration are true.

Date: 4/15/22

Jesse Kirschner
Turlock Irrigation District
Accounting and Finance Department
Manager

DECLARATION OF SERVICE BY EMAIL

I, the undersigned, declare as follows:

I am a resident of the County of Sacramento and I am over the age of 18 years, and not a party to the within action. My place of employment is 980 Ninth Street, Suite 300, Sacramento, California 95814.

On April 18, 2022, I served the:

- **Claimant’s Comments on the Proposed Dismissal of Test Claim filed April 18, 2022**

Floodplain Restoration Condition (no. 12) of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District – Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, 21-TC-02

Turlock Irrigation District and Modesto Irrigation District, Claimants

By making it available on the Commission’s website and providing notice of how to locate it to the email addresses provided on the attached mailing list.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct, and that this declaration was executed on April 18, 2022 at Sacramento, California.

Jill L. Magee

12 May 2022

Ms. Heather Halsey, Executive Director
Commission on State Mandates
980 Ninth Street, Suite 300
Sacramento, CA 95814

Subject: Additional Documentation re: Response of Turlock Irrigation District and Modesto Irrigation District to Proposed Dismissal of 21-TC-02

Dear Ms. Halsey:

In their opposition to the proposed dismissal of their joint test claim, Claimants Turlock Irrigation District (TID) and Modesto Irrigation District (MID) noted that “Although ‘a local government may be subject to the Article XIII B appropriations limit even if it is not currently receiving any *ad valorem* property taxes’ [citation], TID does currently also receive property tax revenues from Stanislaus and Merced Counties.” (Opposition at n.1, quoting *Paradise Irrigation District v. Commission on State Mandates*, Ruling on Submitted Matter & Statement of Decision (8 February 2016), Sacramento County Superior Court case no. 34-2015-80002016, *aff’d* 33 Cal.App.5th 174.) In support, that opposition attached a declaration from TID’s Accounting and Finance Department Manager, Jesse Kirschner, describing the property tax revenues TID received from Stanislaus and Merced Counties from 2018-2021.

This letter is submitted to update the Commission that, earlier this month, TID received \$723,805.15 in additional property tax revenues from Stanislaus County. A copy of the check and payment voucher from the County to TID is attached as **Exhibit 3**.

I certify that the facts stated in this letter are true and correct to the best of my knowledge based on my personal knowledge, information, or belief.

BRISCOE IVESTER & BAZEL LLP

Ms. Halsey

12 May 2022

Re: Proposed Decision to Dismiss Test Claim

Floodplain Restoration Condition (no. 12) of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District – Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, 21-TC-02

Water Quality Certification for Federal Permit or License, Turlock Irrigation District and Modesto Irrigation District Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581, Condition 12, Riparian, Spawning, and Floodplain Management, Adopted by the State Water Resources Control Board on January 15, 2021

Turlock Irrigation District and Modesto Irrigation District, Claimants

Dear Mr. Cook and Mr. Prows:

The Proposed Decision for the above-captioned matter is enclosed for your review. Pursuant to your request on May 6, 2022, this Item has been removed from the Proposed Consent Calendar.

Hearing

This matter is set for hearing on **Friday, May 27, 2022, in person at 10:00 a.m., at Park Tower, 980 9th Street, Second Floor Conference Room, Sacramento, California, 95814.**

COVID-19 Precautions. The Park Tower Building Management requires that no person will enter the Second Floor Conference Room having tested positive for COVID-19 within the last 30 days or having been exposed to someone who tested positive for COVID-19 or is believed to have contracted COVID-19 within the last 30 days. In addition, the Park Tower Building Management requires that no person will enter the Second Floor Conference Room having any of the following known symptoms of COVID-19: fever, chills, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea. Persons attending this in-person meeting will be required to certify the above prior to entering the Second Floor Conference Room. Additionally, while the mask mandate has been lifted, some Commission staff and potentially other meeting participants are at high risk of severe COVID-19 complications or have autoimmune conditions and may not be protected by the vaccine but are required to attend this in-person meeting. Therefore, you are strongly encouraged to wear a mask to the meeting to protect yourself and your family and to provide a safe workplace for those who are more vulnerable and who will also be in attendance. Masks will be made available at the meeting for anyone who would like one.

Testimony at the Commission Hearing. If you plan to address the Commission on an agenda item, please notify the Commission Office not later than noon on the Wednesday prior to the hearing. Please also include the names and email addresses of the people who will be speaking

\\10.0.0.11\data\MANDATES\2021\TC\21-TC-02 Floodplain Restoration Condition No.

12\Correspondence\PDtrans.docx

for inclusion on the witness list. When calling or emailing, identify the item you want to testify on and the entity you represent. The Commission Chairperson reserves the right to impose time limits on presentations as may be necessary to complete the agenda.

If you plan to file any written document for Commission member review, please note that Commission staff will include written comments filed at least 15 days in advance of the hearing in the Commissioners' hearing binders. Additionally, staff will transmit written comments filed between 15 and five days prior to a meeting to the Commission members, if possible. However, comments filed less than five days prior to a meeting or submitted at the meeting will not be included in the Commissioners' hearing binders and the commenter shall provide 12 paper copies of the comments to Commission staff at the meeting for such late filings. Commission staff shall provide copies of late comments submitted at the hearing to the Commission members and shall place a copy on a table for public review at the hearing (Cal. Code Regs., tit. 2, § 1181.10(b)(1)). Please also file the PDF document provided via the Commission's dropbox at <https://csm.ca.gov/dropbox.php> prior to the hearing.

If you would like to request postponement of the hearing, please refer to section 1187.9(b) of the Commission's regulations.

Special Accommodations

For any special accommodations such as a sign language interpreter, an assistive listening device, materials in an alternative format, or any other accommodations, please contact the Commission Office at least five to seven *working* days prior to the meeting.

Sincerely,

Heather Halsey
Executive Director

ITEM 3

PROPOSED DECISION TO DISMISS

Water Quality Certification for Federal Permit or License, Turlock Irrigation District and Modesto Irrigation District Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581, Condition 12, Riparian, Spawning, and Floodplain Management, Adopted by the State Water Resources Control Board on January 15, 2021

Floodplain Restoration Condition (no. 12) of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District – Don Pedro Hydroelectric and La Grange Hydroelectric Project

21-TC-02

Turlock Irrigation District and Modesto Irrigation District, Claimants

EXECUTIVE SUMMARY

Overview

Turlock Irrigation District and Modesto Irrigation District (claimants) seek reimbursement for costs allegedly mandated by an order issued by the State Water Resources Control Board (State Board). The claimants filed applications with the State Board requesting water quality certification under section 401 of the Federal Clean Water Act to continue to operate and maintain the Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, both located on the Tuolumne River.¹

On February 22, 2022, Commission on State Mandates (Commission) staff issued the Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim pursuant to sections 1183.1 and 1187.14 of the Commission’s regulations because “neither Turlock Irrigation District nor Modesto Irrigation District are local governments subject to the tax and spend limitations of the California Constitution, and therefore they are not eligible for mandate subvention under article XIII B, section 6 of the California Constitution.”²

Staff recommends that the Commission dismiss this Test Claim.

Procedural History

The claimants filed the Test Claim on January 14, 2022.³ Commission staff issued the Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim on

¹ Exhibit A, Test Claim, filed January 14, 2022, page 16.

² Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022.

³ Exhibit A, Test Claim, filed January 14, 2022.

February 22, 2022 because the claimants are not subject to the tax and spend limitations of the California Constitution.⁴ The claimants filed comments on April 18, 2022, opposing the proposed dismissal.⁵ The claimants filed additional documentation on May 12, 2022.⁶

Commission Responsibilities

Under article XIII B, section 6 of the California Constitution, local agencies and school districts are entitled to reimbursement for the costs of state-mandated new programs or higher levels of service. In order for local government to be eligible for reimbursement, one or more similarly situated local agencies or school districts must file a test claim with the Commission. “Test claim” means the first claim filed with the Commission alleging that a particular statute or executive order imposes costs mandated by the state. Test claims function similarly to class actions and all members of the class have the opportunity to participate in the test claim process and all are bound by the final decision of the Commission for purposes of that test claim.

The Commission is the quasi-judicial body vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6 of the California Constitution and not apply it as an “equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”⁷

Claims

The following chart provides a brief summary of the claims and issues raised and staff’s recommendation.

Issue	Description	Staff Recommendation
Are the claimants subject to the taxing and spending limitations of articles XIII A and XIII B of the California Constitution and therefore eligible to claim reimbursement under article XIII B, section 6?	Article XIII B, section 6 was specifically designed to protect the tax revenues of local governments from state mandates that would require the expenditure of such revenues. ¹⁴ Water Code sections 22280 et seq., added by Statutes 1943, chapter 372.

¹⁵ Water Code section 22078.5 (Stats. 1991, ch. 70), which is in Article 1, states: “A district may impose a special tax pursuant to Article 3.5 (commencing with Section 50075) of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code. The special taxes shall be applied uniformly to all taxpayers or all real property within the district, except that unimproved property may be taxed at a lower rate than improved property.”

Government Code section 50075 states: “It is the intent of the Legislature to provide all cities, counties, and districts with the authority to impose special taxes, pursuant to the provisions of Article XIII A of the California Constitution.”

Issue	Description	Staff Recommendation
	<p>funded by revenues other than “proceeds of taxes” cannot accept the benefits of an exemption from article XIII B’s spending limit while asserting an entitlement to reimbursement under article XIII B, section 6.¹⁰</p> <p>The Commission’s regulations make it clear that a test claim filed by local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution shall be proposed for dismissal.¹¹</p>	

Staff Analysis

This Test Claim is proposed for dismissal pursuant to California Code of Regulations, title 2, sections 1183.1(g) and 1187.14, on the ground that Turlock Irrigation District and Modesto Irrigation Districts (claimants) are not subject to the taxing and spending limitations of article XIII A and B of the California Constitution and, are therefore not eligible to claim reimbursement under article XIII B, section 6.

Article XIII B, section 6 was specifically designed to protect the tax revenues of local governments from state mandates that would require the expenditure of such revenues. The purpose is to prevent “the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill-equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”¹⁶

¹⁰ *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-282; *Redevelopment Agency of the City of San Marcos v. Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986.

¹¹ California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

¹⁶ *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 763, quoting *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1283; *County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176, 1185, holding that reimbursement under article XIII B, section 6 is only required when a mandated new program or higher level of service forces local

Article XIII B does not reach beyond taxation and does not restrict the growth in appropriations financed from nontax sources, such as bond funds, user fees based on reasonable costs, or revenues from local assessments, fees, and charges.¹⁷ Local agencies funded by revenues other than “proceeds of taxes” cannot accept the benefits of an exemption from article XIII B’s spending limit while asserting an entitlement to reimbursement under article XIII B, section 6.¹⁸ Therefore, the Commission’s regulations make it clear that a test claim filed by local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution shall be proposed for dismissal.¹⁹

The claimant districts were established in 1887 and are currently governed by Division 11 of the Water Code (The Irrigation District Law, codified at Water Code sections 20500 et seq.). The Irrigation District Law authorizes irrigation districts to levy annual assessments;²⁰ issue bonds;²¹ charge fees or tolls for specified services, such as water and electricity;²² and (as of 1991) levy special taxes for specific purposes in accordance with article XIII A of the California Constitution, which must be approved by a two-thirds vote of the local electors.²³ But the Irrigation District Law does not authorize irrigation districts to levy property taxes or other taxes that raise general revenues.

government to incur “increased actual expenditures of limited tax proceeds that are counted against the local government’s spending limit.”

¹⁷ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; and *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 451, finding that revenues from a local special assessment for the construction of public improvements are not “proceeds of taxes” subject to the appropriations limit.)

¹⁸ *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-282; *Redevelopment Agency of the City of San Marcos v. Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986.

¹⁹ California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

²⁰ Water Code sections 25650 et seq., added by Statutes 1943, chapter 372.

²¹ Water Code sections 24950 et seq., added by Statutes 1943, chapter 372.

²² Water Code sections 22280 et seq., added by Statutes 1943, chapter 372.

²³ Water Code section 22078.5 (Stats. 1991, ch. 70), which is in Article 1 states: “A district may impose a special tax pursuant to Article 3.5 (commencing with Section 50075) of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code. The special taxes shall be applied uniformly to all taxpayers or all real property within the district, except that unimproved property may be taxed at a lower rate than improved property.”

Government Code section 50075 states: “It is the intent of the Legislature to provide all cities, counties, and districts with the authority to impose special taxes, pursuant to the provisions of Article XIII A of the California Constitution.”

Moreover, there is no evidence in the record that the claimants ever collected property taxes, special taxes, or other “proceeds of taxes.” Although the 2020 and 2019 Turlock Irrigation District Financial Audit mentions “TID levies ad valorem property taxes on property located in the counties of Stanislaus and Merced,”²⁴ the law does not authorize them to levy property taxes. And their budget documents show that they are fully funded with bond revenue, assessments, fees and charges, which are *not* “proceeds of taxes” subject to the appropriations limit of article XIII B.²⁵

Similarly, although the Modesto Irrigation District’s website mentions an “irrigation tax” that was last imposed in 1959,²⁶ the Irrigation District Law did not provide the authority to levy property taxes. The claimants only had the authority to levy an assessment on the property, and other fees and charges.²⁷ In addition, Modesto Irrigation District’s budget for 2018 through 2021 shows water revenues, electric revenues, and other revenues, but no tax revenues - and no appropriations limit is identified.²⁸ Moreover, Modesto Irrigation District’s website says: “Today the district remains tax free, although in 1976 an irrigation water user charge was adopted.”²⁹

Therefore, the claimants are not eligible to claim reimbursement under article XIII B, section 6.

Conclusion

Based on the forgoing, staff concludes that this Test Claim should be dismissed pursuant to California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

Staff Recommendation

Staff recommends that the Commission adopt the Proposed Decision to Dismiss the Test Claim and authorize staff to make any technical, non-substantive changes to the Proposed Decision following the hearing.

DECISION TO DISMISS

The Commission on State Mandates (Commission) heard and decided this Test Claim during a regularly scheduled hearing on May 27, 2022. [Witness list will be included in the adopted Decision.]

The law applicable to the Commission’s determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code sections 17500 et seq., and related case law.

The Commission [adopted/modified] the Proposed Decision to Dismiss the Test Claim by a vote of [vote will be included in the adopted Decision], as follows:

Member	Vote
Lee Adams, County Supervisor	
Natalie Kuffel, Representative of the Director of the Office of Planning and Research	
Gayle Miller, Representative of the Director of the Department of Finance, Chairperson	
Renee Nash, School District Board Member	
Sarah Olsen, Public Member	
Shawn Silva, Representative of the State Controller	
Spencer Walker, Representative of the State Treasurer, Vice Chairperson	

Summary of the Findings

This Test Claim is dismissed pursuant to California Code of Regulations, title 2, sections 1183.1(g) and 1187.14, on the ground that Turlock Irrigation District and Modesto Irrigation District (claimants) are not subject to the taxing and spending limitations of article XIII A and B of the California Constitution and, are therefore not eligible to claim reimbursement under article XIII B, section 6.

Article XIII B, section 6 was specifically designed to protect the tax revenues of local governments from state mandates that would require the expenditure of such revenues. The purpose is to prevent “the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill-equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”³⁰

Article XIII B does not reach beyond taxation and does not restrict the growth in appropriations financed from nontax sources, such as bond funds, user fees based on reasonable costs, or revenues from local assessments, fees, and charges.³¹ Local agencies funded by revenues other than “proceeds of taxes” cannot accept the benefits of an exemption from article XIII B’s spending limit while asserting an entitlement to reimbursement under article XIII B, section 6.³² Therefore, the Commission’s regulations make it clear that a test claim filed by local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution shall be proposed for dismissal.³³

The claimant districts were established in 1887 and are currently governed by Division 11 of the Water Code (The Irrigation District Law, codified at Water Code sections 20500 et seq.). The Irrigation District Law was originally enacted in 1943 and authorizes irrigation districts to levy

³⁰ *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 763, quoting *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1283; *County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176, 1185, holding that reimbursement under article XIII B, section 6 is only required when a mandated new program or higher level of service forces local government to incur “increased actual expenditures of limited tax proceeds that are counted against the local government’s spending limit.”

³¹ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; and *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 451, finding that revenues from a local special assessment for the construction of public improvements are not “proceeds of taxes” subject to the appropriations limit.)

³² *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-282; *Redevelopment Agency of the City of San Marcos v. Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986.

³³ California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

annual assessments;³⁴ issue bonds;³⁵ charge fees or tolls for specified services, such as water and electricity;³⁶ and (as of 1991) levy special taxes for specific purposes in accordance with article XIII A of the California Constitution, which must be approved by a two-thirds vote of the local electors.³⁷ But the Irrigation District Law, as originally enacted in 1943³⁸ and as it currently exists, does not authorize irrigation districts to levy property taxes or other taxes that raise general revenues. In addition, published court cases dating back to 1895 discuss the authority of irrigation districts to impose charges, fees, and assessments, but not taxes.³⁹

Moreover, there is no evidence in the record that the claimants ever collected property taxes, special taxes, or other “proceeds of taxes.” Although the 2020 and 2019 Turlock Irrigation District Financial Audit mentions “TID levies ad valorem property taxes on property located in the counties of Stanislaus and Merced,”⁴⁰ the law does not authorize them to levy property taxes. And Turlock Irrigation District’s budget documents show that it is fully funded with bond revenue, assessments, fees and charges, which are *not* “proceeds of taxes” subject to the appropriations limit of article XIII B.⁴¹

³⁴ Water Code sections 25650 et seq., added by Statutes 1943, chapter 372.

³⁵ Water Code sections 24950 et seq., added by Statutes 1943, chapter 372.

³⁶ Water Code sections 22280 et seq., added by Statutes 1943, chapter 372.

³⁷ Water Code section 22078.5 (Stats. 1991, ch. 70), which is in Article 1, states: “A district may impose a special tax pursuant to Article 3.5 (commencing with Section 50075) of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code. The special taxes shall be applied uniformly to all taxpayers or all real property within the district, except that unimproved property may be taxed at a lower rate than improved property.”

Government Code section 50075 states: “It is the intent of the Legislature to provide all cities, counties, and districts with the authority to impose special taxes, pursuant to the provisions of Article XIII A of the California Constitution.”

³⁸ Exhibit E (1), 1943 Irrigation District Act (Stats. 1943, chs. 368, 372).

³⁹ *City of San Diego v. Linda Vista Irrigation Dist.* (1895) 108 Cal.189, 192-193; *Mitchell v. Patterson* (1898) 120 Cal.286, 288-289; *Bolton v. Terra Bella Irr. Dist.* (1930) 106 Cal.App. 313, 317; *Thompson v. Board of Directors of Turlock Irrigation Dist.* (1967) 247 Cal.App.2d 587, 593; see also, 84 Opinions of the California Attorney General 81 (Cal.A.G.), 2001.

⁴⁰ Exhibit E (17), Turlock Irrigation District Report of Independent Auditors 2020 2019, https://issuu.com/turlockirrigationdistrict/docs/tid_final_fs?fr=sYzNhZTE5NTkxNTU (accessed April 20, 2022), page 14.

⁴¹ Exhibit E (14), Turlock Irrigation District 2019 Proposed Operations and Capital Budget, <https://www.tid.org/download/2019-budget/> (accessed on April 20, 2022), page 1; Exhibit E (16) Turlock Irrigation District 2022 Budget, <https://www.tid.org/download/current-tid-budget/> (accessed on April 20, 2022), page 3; Exhibit E (6) Modesto Irrigation District, *The Greening of Paradise Valley, The First 100 Years of the Modesto Irrigation District*, chapter 4, https://www.mid.org/about/history/chpt_14.html (accessed on April 20, 2022); and Exhibit E (5)

Similarly, although the Modesto Irrigation District’s website mentions an “irrigation tax” that was last imposed in 1959,⁴² the Irrigation District Law did not provide the authority to levy property taxes. The claimants only had the authority to levy an assessment on the property, and other fees and charges.⁴³ In addition, Modesto Irrigation District’s budget for 2018 through 2021 shows water revenues, electric revenues, and other revenues, but no tax revenues - and no appropriations limit is identified.⁴⁴ Moreover, Modesto Irrigation District’s website states: “Today the district remains tax free, although in 1976 an irrigation water user charge was adopted.”⁴⁵

Therefore, the claimants are not eligible to claim reimbursement under article XIII B, section 6. Accordingly, this claim is dismissed.

COMMISSION FINDINGS

I. Chronology

- 01/15/2021 Water Quality Certification for Federal Permit or License, Turlock Irrigation District and Modesto Irrigation District Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581, Condition 12, Riparian, Spawning, and Floodplain Management was adopted by the State Water Resources Control Board.
- 01/14/2022 The Turlock Irrigation District and Modesto Irrigation District filed the Test Claim.⁴⁶

- 02/22/2022 Commission staff issued the Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim due to lack of Commission jurisdiction.⁴⁷
- 04/18/2022 The claimants filed comments on the Notice of Proposed Dismissal of Test Claim.⁴⁸
- 05/12/2022 The claimants filed additional documentation.⁴⁹

II. Background

The claimants filed applications requesting water quality certification under section 401 of the Federal Clean Water Act to continue to operate and maintain the Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, both located on the Tuolumne River.⁵⁰ The projects generate hydroelectric power and provide flood control and water supply for more than 200,000 acres of farmland, plus municipal and industrial uses, including water supply for the cities of Modesto and Turlock.⁵¹ On January 15, 2021, the request was conditionally approved by the State Water Resources Control Board, provided the Districts comply with 45 conditions and “upon total payment of any fee required under California Code of Regulations, title 23, division 3, chapter 28,” as follows: “The State Water Board finds that, with the conditions and limitations imposed under this certification, the Projects will comply with applicable state water quality standards and other appropriate requirements of state law.”⁵² The claimants seek reimbursement for Condition 12, which allegedly requires them to do the following:

Condition 12 is the mandate (“Mandate”) at issue. It “requires the development and implementation of a Riparian, Spawning, and Floodplain Restoration Plan”. (Order at 39.) The Mandate is intended to redress “altered ... hydrology and natural geomorphic processes along the Tuolumne River corridor” caused by the damming of the river decades ago. (*Id.* at 38.)⁵³

According to the Districts, Condition 12 contains more than four pages of specific requirements. It generally requires the preparation, approval, and implementation of a “Restoration Plan” to “construct a minimum of 150 acres of 100 percent suitable floodplain rearing habitat that is designed to lower existing floodplain surface elevation in the first 10 years following

⁵² Exhibit A, Test Claim, filed January 14, 2022, pages 78, 129.

⁵³ Exhibit A, Test Claim, filed January 14, 2022, page 14.

...approval.”⁵⁴ They also contend that Condition 12 requires developing and implementing a “monitoring plan” to assess the effects of the project on floodplain inundation, fish use, vegetation, and other factors; and annual monitoring for at least 10 years, and after 25 years, a “comprehensive evaluation” whether “additional floodplain restoration projects” will be required.⁵⁵

III. Positions of the Parties

A. Turlock and Modesto Irrigation Districts

On April 18, 2022, the claimants filed comments on the Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim.⁵⁶ The claimants object to the process, stating they were given insufficient notice based on the letter Commission staff issued regarding the Commission’s lack of jurisdiction. They argue, “Commission staff’s bare, uncertified, and apparently unprecedented assertion is inadequate to constitute “notice” of why Commission staff believe the joint test claim should be dismissed. . . . Commission staff should have provided Claimants with a more fulsome explanation of the proposed dismissal of the joint test claim”⁵⁷

The claimants further argue that the Commission already adjudicated Test Claims 10-TC-12 and 12-TC-01 (*Water Conservation*) for the Oakdale and Glenn-Colusa Irrigation Districts, so the instant Test Claims cannot be dismissed as a matter of law.⁵⁸ Additionally, the claimants assert that, if Commission staff believes facts pertaining to the districts make them immune to the constitutional tax and spend limitations, that they “have the initial burden to explain their thinking and then provide a reasonable opportunity for MID and TID to make the requisite

⁵⁴ Exhibit A, Test Claim, filed January 14, 2022, pages 16-17.

⁵⁵ Exhibit A, Test Claim, filed January 14, 2022, page 17.

⁵⁶ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022

⁵⁷ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 1.

⁵⁸ Exhibit E (2), Commission Decision, *Water Conservation*, 10-TC-12 and 12-TC-01. In *Water Conservation*, two of the irrigation and water districts admitted they collected no property tax revenue and identified no other “proceeds of taxes,” including the receipt of special taxes, and thus, the Commission found they were not eligible to claim reimbursement under article XIII B, section 6. (<https://csm.ca.gov/decisions/121214.pdf> p. 38.) The Commission also concluded that South Feather Water and Power Agency and Paradise Irrigation District were eligible to claim reimbursement because they filed declarations that they were establishing their appropriations limit in accordance with the law. (<https://csm.ca.gov/decisions/121214.pdf> p. 38.) The Commission further concluded that Oakdale Irrigation District and Glenn-Colusa Irrigation District were eligible to claim reimbursement based on annual reports identifying the receipt of property tax revenue. (<https://csm.ca.gov/decisions/121214.pdf> p. 39.)

factual showing in response.”⁵⁹ The claimants cite the trial court opinion in *Paradise Irrigation District v. Commission on State Mandates* in which the court found that the Commission had abused its discretion in determining that two of the irrigation districts in that case were not eligible to claim reimbursement because the Commission did not determine whether the districts received any proceeds of taxes within the meaning of article XIII B, and the holding was not disturbed on appeal.⁶⁰ According to the claimants:

If, notwithstanding Commission staff’s insistence that the issue here is solely one of law, staff now intends to assert that MID and TID do not as a factual matter receive any proceeds of taxes, Commission staff have the initial burden to establish those facts. Only if Commission staff meet that initial burden can MID and TID be expected to understand why their joint test claim is proposed for dismissal and to properly appreciate what kind of factual showing they should prepare in response. Claimants object to being required to put on evidence on any factual issues before Commission staff have met their initial burden, and also object to the extent Claimants are not given a full and fair opportunity to respond, including with additional evidence, to whatever evidence Commission staff might offer before or at the hearing.⁶¹

The claimants assert that their Test Claim makes a prima facie showing that the alleged mandate “could only be funded by the proceeds of taxes.” They argue:

Irrigation districts like TID and MID raise revenues through charges for service (Water Code § 22280) or levies on real property (Water Code § 25701). [Footnote omitted.] Charges and levies are presumptively also taxes. (Article XIII C § 1(e).) Charges are taxes unless “imposed for a specific government service or product provided directly to the payor that is not provided to those not charged”. (Article XIII C § 1(e)(2).) Levies are also taxes unless “imposed in accordance with the

⁵⁹ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, pages 2-3.

⁶⁰ Exhibit E (7), Notice of Entry of Judgment, *Paradise Irrigation Dist. v. Commission on State Mandates*, Sacramento County Superior Court Case No. 34-2015-80002016, pages 19-25. The court found that the Commission properly interpreted *County of Fresno v. State of California* (1991) 53 Cal.3d 482 (holding that article XIII B, section 6 was designed to protect only proceeds of taxes and expenses recoverable from other than proceeds of taxes are not reimbursable under article XIII B, section 6), but misapplied the decision to the facts since the Commission focused on property taxes, but did not determine if the districts received any other proceeds of taxes. On appeal, the court did not reach the eligibility issue since the dismissed districts “failed to show how they incurred reimbursable state-mandated costs” noting that they had sufficient fee authority under Government Code section 17556(d) and thus, finding there were no costs mandated by the state. (*Paradise Irrigation Dist. v. Commission on State Mandates* (2019) 33 Cal.App.5th 174, 197-198.)

⁶¹ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 3.

provisions of Article XIII D” (Article XIII C § 1(e)(7)), including those provisions prescribing that the levy “shall not exceed the proportional cost of the service attributable to the parcel” (Article XIII D § 6(b)(3)), and that they may not be used for “general governmental services ... where the service is available to the public at large in substantially the same manner as it is to property owners” (Article XIII D § 6(b)(5)). If the charges or levies irrigation districts would impose to fund a State mandate do not overcome that presumption, they are deemed taxes subject to the tax-and-spend limitations of Articles XIII A and XIII B of the California Constitution.⁶²

The claimants contend that they cannot impose fees because the alleged mandate is intended to benefit lands outside district boundaries and does not benefit their customers. The claimants conclude that they have standing to pursue the Test Claim,⁶³ and attach to their comments a declaration from the Accounting and Finance Department Manager of Turlock Irrigation District stating in relevant part that the District collected property taxes from Stanislaus and Merced Counties in 2018, 2019, 2020 and 2021, as follows:

2. The District receives annual property tax revenues from Stanislaus County and Merced County.
3. In 2018, the District received \$1,837,715 in property tax revenues from Stanislaus County and \$18,965 in property tax revenues from Merced County.
4. In 2019, the District received \$1,987,224 in property tax revenues from Stanislaus County and \$18,965 in property tax revenues from Merced County.
5. In 2020, the District received \$2,059,291 in property tax revenues from Stanislaus County and \$ 41,741 in property tax revenues from Merced County.
6. In 2021, the District received \$2,177,478 in property tax revenues from Stanislaus County and \$50,614 in property tax revenues from Merced County.⁶⁴

The claimants also filed a copy of a check from Stanislaus County to the Turlock Irrigation District, dated May 6, 2022, for \$723,805.15, with the description of “current secured taxes.”⁶⁵

⁶² Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 4.

⁶⁵ Exhibit D, Claimants’ Late Comments on the Notice of Proposed Dismissal of Test Claim, filed May 12, 2022.

B. State Agency Comments

No comments were filed on this matter by any state agency.

IV. Discussion

Article XIII B, section 6 of the California Constitution provides in relevant part the following:

Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such programs or increased level of service...

The purpose of article XIII B, section 6 is to “preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”⁶⁶ Thus, the subvention requirement of section 6 is “directed to state-mandated increases in the services provided by [local government] ...”⁶⁷

Reimbursement under article XIII B, section 6 is required when the following elements are met:

1. The claimant is subject to the tax and spend limitations of articles XIII A and XIII B of the California Constitution and, thus, eligible to claim reimbursement under article XIII B, section 6.⁶⁸
2. A state statute or executive order requires or “mandates” local agencies or school districts to perform an activity.⁶⁹
3. The mandated activity constitutes a “program” that either:
 - a. Carries out the governmental function of providing a service to the public; or
 - b. Imposes unique requirements on local agencies or school districts and does not apply generally to all residents and entities in the state.⁷⁰

⁶⁶ *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81.

⁶⁷ *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56.

⁶⁸ *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 451; *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *Redevelopment Agency of the City of San Marcos v. Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1283;; *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-282; *County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176, 1185; *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 763; California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

⁶⁹ *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 874.

⁷⁰ *San Diego Unified School Dist. v. Commission on State Mandates* (2004) 33 Cal.4th 859, 874-875 (reaffirming the test set out in *County of Los Angeles* (1987) 43 Cal.3d 46, 56).

4. The mandated activity is new when compared with the legal requirements in effect immediately before the enactment of the test claim statute or executive order and it increases the level of service provided to the public.⁷¹
5. The mandated activity results in the local agency or school district incurring increased costs, within the meaning of section 17514. Increased costs, however, are not reimbursable if an exception identified in Government Code section 17556 applies to the activity.⁷²

The Commission is vested with the exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6 of the California Constitution.⁷³ The determination whether a statute or executive order imposes a reimbursable state-mandated program is a question of law.⁷⁴ In making its decisions, the Commission must strictly construe article XIII B, section 6 of the California Constitution, and not apply it as an “equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”⁷⁵

A. The Commission has fully complied with all procedural due process requirements; the claimants received notice and a full opportunity to protect their interests and present the reasons opposing the proposed dismissal of their Test Claim. In addition, the claimants have the burden to prove they are eligible to claim reimbursement and have incurred costs mandated by the State under article XIII B, section 6 of the California Constitution.

In its comments on the notice of proposed dismissal, the claimants argue: “Commission staff’s bare, uncertified, and apparently unprecedented assertion is inadequate to constitute “notice” of why Commission staff believe the joint test claim should be dismissed. . . . Commission staff should have provided Claimants with a more fulsome explanation of the proposed dismissal of the joint test claim”⁷⁶

The Commission disagrees. The protections of procedural due process apply to the Commission’s adjudicative proceedings. Although Government Code section 17533 states that Chapter 4.5, beginning with section 11400 of the Administrative Procedures Act (the

⁷¹ *San Diego Unified School Dist.* (2004) 33 Cal.4th 859, 874-875, 878; *Lucia Mar Unified School District v. Honig* (1988) 44 Cal3d 830, 835.

⁷² *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1265, 1284; Government Code sections 17514 and 17556.

⁷³ *Kinlaw v. State of California* (1991) 53 Cal.3d 482, 487.

⁷⁴ *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 109.

⁷⁵ *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1265, 1280 [citing *City of San Jose v. State of California* (1996) 45 Cal.App.4th 1802, 1817].

⁷⁶ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 1.

administrative adjudicative procedures under the APA), does not apply to a hearing by the Commission, the note by the Law Revision Commission states that “Nothing in section 17533 excuses compliance with procedural protections required by due process of law.”⁷⁷

Due process noticing requirements are not formulaic; they vary depending on the competing interests involved in each situation.⁷⁸ However, prior notice of a potentially adverse decision is constitutionally required and that notice must, at a minimum, be reasonably calculated to afford affected persons the realistic opportunity to protect their interests and present the reasons opposing the proposed decision.⁷⁹

In this case, the claimants were provided notice of the proposed dismissal that Commission staff issued February 22, 2022,⁸⁰ which stated the reasons therefore, and the claimants have had the full opportunity to provide both written and (at the hearing) oral comments before the Commission. Section 1183.1(g) of the Commission’s regulations provides that any test claim that “the Commission lacks jurisdiction to hear for any reason” . . . “may be rejected or dismissed by the executive director with a written notice stating the reasons therefor.” It also requires the Commission to follow the process of section 1187.14(b) for a test claim filed by “a local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution.”⁸¹

Section 1187.14(b) requires the Commission to provide notice and an opportunity to comment as follows:

[S]erve written notice to initiate dismissal of the test claim to everyone on the mailing list for the matter. The notice shall announce that another local agency or school district may take over the claim by substitution of parties within 60 days of the issuance of the notice. The notice shall also announce the opportunity to file written comments on the proposed dismissal of the test claim. A copy of the notice shall also be posted on the Commission's website.

[¶] . . . [¶]

⁷⁷ See also Government Code section 17559, which allows a claimant to commence a proceeding to set aside a decision of the Commission pursuant to Code of Civil Procedure section 1094.5. Section 1094.5(b) states that the inquiry extends to the questions whether there was a fair trial and whether there was any prejudicial abuse of discretion. Abuse of discretion is established if the respondent has not proceeded in the manner required by law.

⁷⁸ *Linovitz Capo Shores LLC v. California Coastal Commission* (2021) 65 Cal.App.5th 1106, 1123, citing *Horn v. County of Ventura* (1979) 24 Cal.3d 605, 617.

⁷⁹ *Horn v. County of Ventura* (1979) 24 Cal.3d 605, 617; *Gilbert v. City of Sunnyvale* (2005) 130 Cal.App.4th 1280.

⁸⁰ Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022.

⁸¹ California Code of Regulations, title 2, section 1183.1(b).

(3) If no other local agency or school district takes over the test claim by substitution of parties within 60 days of the issuance of the notice, the Commission shall hear the proposed dismissal of the test claim.

(4) The hearing on a dismissal of a test claim shall be conducted in accordance with article 7 of these regulations.⁸²

Commission staff complied with these requirements by issuing the Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim on February 22, 2022.⁸³ This notice specifically identified the reasons for the proposed dismissal as follows:

Upon review, Commission staff rejects this Test Claim pursuant to Commission regulation section 1183.1(a) because neither Turlock Irrigation District nor Modesto Irrigation District are local governments subject to the tax and spend limitations of the California Constitution, and therefore they are not eligible for mandate subvention under article XIII B, section 6 of the California Constitution.⁸⁴

The notice also gave the claimants 60 days to file written comments before the matter would be heard by the Commission in accordance with article 7 of the Commission's regulations, and provided the tentative hearing date,⁸⁵ affording the claimants the opportunity to attend the hearing and comment or testify. This notice was also sent to the mailing list and was posted on the Commission's website.⁸⁶

In addition, Commission staff provided the claimants' authorized representative, via his public records request of March 4, 2022, with over one hundred Commission documents regarding whether a local agency is subject to the tax and spend provisions of article XIII B of the California Constitution and relating to article XIII B, section 8 of the California Constitution.⁸⁷ Documents responsive to this request were provided on March 14, 2022 and April 8, 2022.⁸⁸

⁸² California Code of Regulations, title 2, section 1187.14(b).

⁸³ Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022.

⁸⁴ Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022, page 1.

⁸⁵ Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022, page 2.

⁸⁶ Exhibit B, Notice of Opportunity to File Written Comments on Proposed Dismissal of Test Claim, issued February 22, 2022, pages 3-8. See <https://csm.ca.gov/matters/21-TC-02.php>.

⁸⁷ Exhibit E (8), Public Records Request, March 4, 2022.

⁸⁸ Exhibit E (9), Public Records Request Response Part 1, March 14, 2022; Exhibit E (10), Public Records Request Response Part 2, March 28, 2022; Exhibit E (11), Public Records Request Response Part 3, April 8, 2022.

Further, under section 1181.9 of the Commission’s regulations, the hearing notice and agenda is issued at least ten days before the Commission hearing and, in this case, was issued to the claimants on May 4, 2022.⁸⁹ In addition the Proposed Decision was issued to the claimants on May 13, 2022. Thereafter, any party may request to postpone the hearing for good cause, which includes the complexity of the issues.⁹⁰

Accordingly, the Commission has fully complied with all procedural due process requirements, and the claimants have received notice and a full opportunity to protect their interests and present the reasons opposing the proposed dismissal.

The claimants also argue that the Commission has the burden of proof, stating:

If, notwithstanding Commission staff’s insistence that the issue here is solely one of law, staff now intends to assert that MID and TID do not as a factual matter receive any proceeds of taxes, Commission staff have the initial burden to establish those facts. Only if Commission staff meet that initial burden can MID and TID be expected to understand why their joint test claim is proposed for dismissal and to properly appreciate what kind of factual showing they should prepare in response.⁹¹

However, the burden of bringing a claim and showing that the claimant is eligible to claim reimbursement and has incurred costs mandated by the State under article XIII B, section 6 is with the test claimant.⁹² Whether a local agency is entitled to reimbursement under article XIII B, section 6 is a question of law.⁹³

B. Turlock Irrigation District and Modesto Irrigation District are not subject to the taxing and spending limitations of articles XIII A and XIII B because they are funded by other than proceeds of taxes, are not subject to the appropriations limit of article XIII B, and are therefore not entitled to reimbursement under article XIII B section 6 of the California Constitution.

Article XIII B, section 6 of the California Constitution requires in relevant part that “[w]henver the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse the local government for the costs of the program or increased level of service,” with exceptions as specified. The reimbursement requirement in article XIII B, section 6 “was included in

⁸⁹ Exhibit E (3) Commission May 27, 2022 Hearing Agenda Notice, issued May 4, 2022.

⁹⁰ California Code of Regulations, title 2, section 1187.9(b).

⁹¹ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 3.

⁹² Evidence Code section 500; Government Code sections 17551, 17553.

⁹³ *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 282 [finding the two bases for decision, including whether the claimant is eligible to claim reimbursement under section 6, presents pure questions of law].

recognition of the fact ‘that articles XIII A and XIII B severely restrict the taxing and spending powers of local government.’”⁹⁴

1. Article XIII A imposes limits on the power to adopt and levy taxes and article III B restricts the growth of appropriations financed by “proceeds of taxes.” Special districts that existed on January 1, 1978 and did not have the power to levy or did not collect ad valorem property taxes in fiscal year 1977-1978, and those districts created later are totally funded by revenues “other than the proceeds of taxes,” and so are not subject to the appropriations limit of article XIII B.

Article XIII A was adopted in 1978 by Proposition 13 to impose a limit on state and local power to adopt and levy taxes. Article XIII A, section 1 limits ad valorem tax on real property to one percent of the cash value of that property, which section 2 provides is assessed at the time of purchase, new construction, or change of ownership; and can increase no more than two percent per year. Article XIII A, section 3 requires that “Any change in state statute which results in any taxpayer paying a higher tax must be imposed by an act passed by not less than two-thirds of all members elected to each of the two houses of the Legislature, except that no new ad valorem taxes on real property, or sales or transaction taxes on the sales of real property may be imposed.” Similarly, article XIII A, section 4 eliminates the right of local entities (cities, counties, and special districts) to impose ad valorem taxes on real property or transaction or sales taxes on the sale of real property. To prevent local taxing entities from circumventing these tax limitations, article XIII A, section 4 further requires that any new or increased special tax proposed by a county, city or special district must be approved by a two-thirds vote of the local electorate.⁹⁵

As explained by the courts, special districts were hard hit by Proposition 13 and the Legislature thereafter encouraged special districts to rely on user fees and charges for raising revenue since article XIII A eliminated their ability to raise revenue directly from property taxes:

Hard hit by Proposition 13 were many special districts, concerning which the Legislature also declared that: “The Legislature finds and declares that many special districts have the ability to raise revenue through user charges and fees and that their ability to raise revenue directly from the property tax for district operations has been eliminated by Article XIII A of the California Constitution. It is the intent of the Legislature that such districts rely on user fees and charges for raising revenue due to the lack of the availability of property tax revenues after

⁹⁵ Article XIII A, section 4 states: “Cities, Counties and special districts, by a two-thirds vote of the qualified electors of such district, may impose special taxes on such district, except ad valorem taxes on real property or a transaction tax or sales tax on the sale of real property within such City, County or special district.” See also *Borikas v. Alameda Unified School Dist.* (2013) 214 Cal.App.4th 135, 142.

the 1978-79 fiscal year. Such districts are encouraged to begin the transition to user fees and charges during the 1978-79 fiscal year.” (Gov. Code, § 16270, eff. June 24, 1978; and see § 16279.1.)⁹⁶

In 1979, article XIII B, also known as the Gann Limit or the appropriations limit, was adopted by Proposition 4 to “restrict[] the amounts state and local governments may appropriate and spend each year from the ‘proceeds of taxes.’”⁹⁷ Article XIII B, section 8 defines the scope of local government entities’ “appropriations subject to limitation” to mean “any authorization to expend during a fiscal year the proceeds of taxes levied by or for that entity and the proceeds of state subventions to that entity (other than subventions made pursuant to Section 6)”⁹⁸ “Proceeds of taxes,” in turn, is defined to “include, but not be restricted to, *all tax revenues* and the proceeds to an entity of government, from (i) regulatory licenses, user charges, and user fees to the extent that such proceeds *exceed* the costs reasonably borne by such entity in providing the regulation, product, or service, and (ii) the investment of tax revenues.”⁹⁹ Such “excess” proceeds from licenses, charges, and fees are considered taxes.¹⁰⁰

Article XIII B was not intended to reach beyond taxation and does not restrict the growth in appropriations financed from nontax sources, such as bond funds, user fees based on reasonable costs, or revenues from local assessments.¹⁰¹ In *County of Placer v. Corin*, the court explained that article XIII B’s limitation on the expenditure of “proceeds of taxes” does not limit the ability to expend government funds from all sources:

[A]rticle XIII B does not limit the ability to expend government funds collected from all sources. Rather, the appropriations limit is based on “appropriations subject to limitation,” which consists primarily of the authorization to expend during a fiscal year the “proceeds of taxes.” (§ 8, subd. (a).) As to local governments, limits are placed only on the authorization to expend the proceeds of taxes levied by that entity, in addition to the proceeds of state subventions (§ 8,

⁹⁶ *Marin Hospital Dist. v. Rothman* (1983) 139 Cal.App.3d 495, 499. In 1996, the voters approved Proposition 218, which added article XIII C, section 2 to the California Constitution to clarify that “Special purpose districts or agencies, including school districts, shall have no power to levy general taxes.”

⁹⁷ *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 762, citing *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 58-59.

¹⁰¹ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; and *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 451, finding that revenues from a local special assessment for the construction of public improvements are not “proceeds of taxes” subject to the appropriations limit.)

subd. (c)); no limitation is placed on the expenditure of those revenues that do not constitute “proceeds of taxes.”¹⁰²

In 1991, the California Supreme Court reiterated that article XIII B was not intended to reach beyond taxation:

Article XIII B of the Constitution, however, was not intended to reach beyond taxation. That fact is apparent from the language of the measure. It is confirmed by its history. In his analysis, the Legislative Analyst declared that Proposition 4 “would not restrict the growth in appropriations financed from other [i.e., nontax] sources of revenue, including federal funds, bond funds, traffic fines, user fees based on reasonable costs, and income from gifts.” (Ballot Pamp., Proposed Stats. and Amends. to Cal. Const. with arguments to voters, Special Statewide Elec. (Nov. 6, 1979), analysis by Legislative Analyst, p. 16.)¹⁰³

Article XIII B and the statutes that implement it further make clear that special districts that are funded entirely by “other than proceeds of taxes” (such as from bond funds, or fee or assessment revenue) are not subject to the appropriations limit at all. Article XIII B, section 9(c) provides that “appropriations subject to limitation” do *not* include those appropriations of any special district that existed on January 1, 1978, and did not levy ad valorem property taxes as of the 1977-1978 fiscal year, or those that existed or were created later and are funded entirely by “other than the proceeds of taxes,” as follows:

Appropriations subject to limitation” for each entity of government do not include: [¶] . . . [¶]

(c) Appropriations of any special district which existed on January 1, 1978, and which did not as of the 1977–78 fiscal year levy an ad valorem tax on property in excess of 12½ cents per \$100 of assessed value; or the appropriations of any special district then existing or thereafter created by a vote of the people, which is totally funded by other than the proceeds of taxes.

Government Code section 7901(e), which implements article XIII B,¹⁰⁴ clarifies that the local agencies that existed on January 1, 1978, and either did not possess the power to levy a property tax at that time or did not levy a property tax in excess of 12 ½ cents per \$100 of assessed value in fiscal year 1977-1978, fall within the provisions of article XIII B, section 9(c) and are not “local agencies” at all for purposes of article XIII B:

“Local agency” means a city, county, city and county, special district, authority or other political subdivision of the state, except a school district, community college district, or county superintendent of schools. The term “special district” shall not

¹⁰² *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 447.

¹⁰³ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487.

¹⁰⁴ Government Code section 7900(a) states: “The Legislature finds and declares that the purpose of this division is to provide for the effective and efficient implementation of Article XIII B of the California Constitution.”

include any district which (1) existed on January 1, 1978, and did not possess the power to levy a property tax at that time or did not levy or have levied on its behalf, an ad valorem property tax rate on all taxable property in the district on the secured roll in excess of 12 ½ cents per one hundred dollars (\$100) of assessed value for the 1977-78 fiscal year, or (2) existed on January 1, 1978, or was thereafter created by a vote of the people, and is totally funded by revenues other than the proceeds of taxes as defined in subdivision (c) of Section 8 of Article XIII B of the California Constitution.

There are some special districts, however, that had the authority to levy property taxes before article XIII A was enacted and levied property taxes in fiscal year 1977-1978, and continue to receive property tax revenue subject to the appropriations limit. Government Code section 7910 requires the governing body of these districts, by resolution, to establish their appropriations limits each year and make other necessary determinations for the following fiscal year pursuant to article XIII B of the California Constitution at a regularly scheduled meeting or noticed special meeting. Section 7910 further requires that fifteen days prior to the meeting, documentation used in the determination of the appropriations limit and other necessary determinations shall be made available to the public. In addition, some special districts have the authority to levy special taxes and other “proceeds of taxes,” which would be subject to the appropriations limit of article XIII B.

2. Local agencies that are funded by other than proceeds of taxes are not subject to the appropriations limit of article XIII B, and are not entitled to reimbursement under section 6 and, any test claim filed by these local agencies shall be dismissed.

Article XIII B, section 6 was specifically designed to protect the tax revenues of local governments from state mandates that would require the expenditure of such revenues. The purpose is to prevent “the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill-equipped’ to assume increased financial responsibilities *because of the taxing and spending limitations that articles XIII A and XIII B impose.*”¹⁰⁵ Thus, the courts have made clear that article XIII B, section 6 requires subvention only when the costs in question can be recovered solely from tax revenues:

Section 6 was included in article XIII B in recognition that article XIII A of the Constitution *severely restricted the taxing powers* of local governments. (See *County of Los Angeles, supra*, 43 Cal.3d at p. 61.) The provision was intended to preclude the state from shifting financial responsibility for carrying out

¹⁰⁵ *Department of Finance v. Commission on State Mandates* (2016) 1 Cal.5th 749, 763, quoting *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81 (emphasis added); see also, *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81; *County of Sonoma v. Commission on State Mandates* (2000) 84 Cal.App.4th 1264, 1283; *County of Los Angeles v. Commission on State Mandates* (2003) 110 Cal.App.4th 1176, 1185, holding that reimbursement under article XIII B, section 6 is only required when a mandated new program or higher level of service forces local government to incur “increased actual expenditures of limited tax proceeds that are counted against the local government’s spending limit.”

governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6.) Specifically, it was designed to protect the *tax revenues* of local governments from state mandates that would require expenditure of such revenues. Thus, although its language broadly declares that the “state shall provide a subvention of funds to reimburse ... local government for the costs [of a state-mandated new] program or higher level of service,” read in its textual and historical context section 6 of article XIII B requires subvention only when the costs in question can be recovered solely from tax revenues.¹⁰⁶

As indicated above, agencies that are funded by revenues other than “proceeds of taxes” are not subject to the appropriations limit of article XIII B. These local agencies cannot accept the benefits of an exemption from article XIII B’s spending limit while asserting an entitlement to reimbursement under article XIII B, section 6.¹⁰⁷ Therefore, the Commission’s regulations make it clear that a test claim filed by local agency that is not eligible to seek reimbursement because it is not subject to the taxing and spending limitations of article XIII A and B of the California Constitution shall be dismissed.¹⁰⁸

3. Turlock and Modesto Irrigation Districts are funded by other than proceeds of taxes, are not subject to the appropriations limit of article XIII B, and are therefore not entitled to reimbursement under section 6.

As indicated above, special districts that existed on January 1, 1978, and did not possess the power to levy a property tax at that time or did not levy or have levied on its behalf¹⁰⁹ an ad valorem property tax rate on all taxable property in the district on the secured roll in excess of 12 ½ cents per one hundred dollars (\$100) of assessed value for the 1977-1978 fiscal year, are not subject to the appropriations limit. Moreover, if these districts are later funded by revenues other than “proceeds of taxes,” they are not subject to the appropriations limit of article XIII B and, thus not entitled to reimbursement under article XIII B, section 6.

Based on the law and documents in the record, the claimants are wholly funded by bond revenue, assessments, fees and charges, which are *not* “proceeds of taxes” subject to the appropriations limit of article XIII B. Therefore, the claimants are not eligible to claim reimbursement under article XIII B, section 6.

¹⁰⁶ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; see also, *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 280.

¹⁰⁸ California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

¹⁰⁹ The phrase “taxes levied by or for an entity,” which is contained in the definition of “appropriations subject to limitation” in article XIII B, section 8, requires the local government, for whom the taxes are levied, to have the taxing power itself. (*Bell Community Redevelopment Agency v. Woosley* (1985) 169 Cal.App.3d 24, 32-33.)

The claimants existed on January 1, 1978. Turlock Irrigation District was founded on June 6, 1887.¹¹⁰ Modesto Irrigation District was founded in July 1887.¹¹¹ These districts are governed by Division 11 of the Water Code (The Irrigation District Law, codified at Water Code sections 20500 et seq.),¹¹² the history of which is explained in *Turlock Irrigation Dist. v. Hetrick* (1999) 71 Cal.App.4th 948:

In 1887, the California Legislature enacted the Wright Act, which gave irrigation districts the power to construct and maintain irrigation and drainage systems. The Wright–Bridgeford Act was passed 10 years later. The principal purpose of this legislation “was to put water to agricultural use. Powers were adequate for securing a water supply and furnishing it to included lands.” (Henley, *The Evolution of Forms of Water Users Organizations in California* (1957) 45 Cal.L.Rev. 665, 668; Harding, *Background of California Water and Power Problems* (1950) 38 Cal.L.Rev. 547, 555.) In 1919, the Wright–Bridgeford Act was amended to permit irrigation districts to engage in the generation, distribution and sale of electricity. (Stats. 1919, ch. 370, § 1, p. 778.) In 1943, a new set of enabling statutes known as the Irrigation District Law, codified at Water Code section 20500 et. seq., was enacted. This legislation granted irrigation districts authority to “do any act necessary to furnish sufficient water in the district for any beneficial use.” (Wat. Code, § 22075.) In 1949, irrigation districts were granted power to acquire rock quarries and other projects for the preparation of sand and cement. (Gov. Code, § 55500.) These statutes remain in force today.¹¹³

As stated above, the Irrigation District Law was added by the Legislature in 1943, and replaced earlier laws governing irrigation districts.¹¹⁴ As the courts have made clear, irrigation districts have only those powers granted to them under the enabling legislation, including the power to tax.¹¹⁵

Provident Irrigation Dist.* (1938) 12 Cal.2d 389, 394 [“An irrigation district is a public body, and under the Wright law has only such powers as are given to it by that act. Such powers are enumerated in the act”]; *Santa Clara County Local Transportation Authority v. Guardino* (1995) 11 Cal.4th 220, 247-248 [“The power of a county or other public corporation to impose any tax is only that which is granted by the legislature, and its exercise must be within the limits and in the manner so conferred.”]; and *County of Los Angeles v. Sasaki* (1994) 23 Cal.App.4th 1442, 1454 [The

The Irrigation District Law authorizes irrigation districts to levy annual assessments;¹¹⁶ issue bonds;¹¹⁷ charge fees or tolls for specified services, such as water and electricity;¹¹⁸ and (as of 1991) levy special taxes for specific purposes in accordance with article XIII A of the California Constitution, which must be approved by a two-thirds vote of the local electors.¹¹⁹ But the Irrigation District Law, as originally enacted in 1943 and as the code sections exist today, does not authorize irrigation districts to levy property taxes or other taxes that raise general revenues, and it does not appear that the law ever did.¹²⁰ That would explain why in 1895, the California Supreme Court explained at considerable length how the assessment authority of irrigation districts is distinguished from the taxing power.¹²¹

power of a local government to tax is not inherent. “The power is derived from the Constitution upon authorization by the Legislature. (Art. XIII, § 24.)”].

¹¹⁶ Water Code sections 25650 et seq., added by Statutes 1943, chapter 372.

¹¹⁷ Water Code sections 24950 et seq., added by Statutes 1943, chapter 372.

¹¹⁸ Water Code sections 22280 et seq., added by Statutes 1943, chapter 372.

¹¹⁹ Water Code section 22078.5 (Stats. 1991, ch. 70), which is in Article 1, states: “A district may impose a special tax pursuant to Article 3.5 (commencing with Section 50075) of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code. The special taxes shall be applied uniformly to all taxpayers or all real property within the district, except that unimproved property may be taxed at a lower rate than improved property.”

Government Code section 50075 states: “It is the intent of the Legislature to provide all cities, counties, and districts with the authority to impose special taxes, pursuant to the provisions of Article XIII A of the California Constitution.”

Government Code section 50075.1 states: “On or after January 1, 2001, any local special tax measure that is subject to voter approval that would provide for the imposition of a special tax by a local agency shall provide accountability measures that include, but are not limited to, all of the following: (a) A statement indicating the specific purposes of the special tax. (b) A requirement that the proceeds be applied only to the specific purposes identified pursuant to subdivision (a). (c) The creation of an account into which the proceeds shall be deposited. (d) An annual report pursuant to Section 50075.3.”

¹²⁰ Exhibit E (1), 1943 Irrigation District Act (Stats. 1943, chs. 368, 372).

¹²¹ *City of San Diego v. Linda Vista Irrigation Dist.* (1895) 108 Cal.189, 192-193. The Court said, “. . . the act under which said irrigation district was organized provides for an annual assessment upon the real property of the district; ‘and all the real property in the district shall be and remain liable to be assessed for such payments, as hereinafter provided.’ St. 1887, p. 37, § 17.” The court held that “The lands assessed and sold by appellants were municipal lands, situated within the city limits, and are exempt from taxation under section 1 of article XIII of the constitution.” (*City of San Diego v. Linda Vista Irrigation Dist.* (1895) 108 Cal.189.)

In an 1898 Supreme Court decision, the Court describes the authorized revenue sources for irrigation districts to include bonds, assessments, fees, and charges, but no authority to levy taxes as follows:

The irrigation act specifically provides for three funds. The first is the ‘Bond Fund,’ provided in section 22, as amended in 1889 (St. 1889, p. 16). This fund is raised by assessment upon the district, and is to be applied to the payment of the interest on the bonds and their ultimate redemption. Another fund is designated by section 15 (St. 1891, p. 147) as the ‘Construction Fund,’ which is to be applied to the purchase of necessary property, and constructing canals and works, which fund is derived, originally at least, from the sale of bonds. There is another source of revenue provided for in section 37 of the act (St. 1887, p. 43), but no name is given to it. So much of said section as is material here is as follows: ‘The cost and expense of purchasing and acquiring property, and constructing the works and improvements herein provided for, shall be wholly paid out of the construction fund. For the purpose of defraying the expenses of the organization of the district, and of the care, operation, management, repair and improvement of such portion of said canal and works as are completed and in use, including salaries of officers and employés [sic], the board may either fix rates of toll and charges, and collect the same from all persons using said canal for irrigation and other purposes, or they may provide for the payment of said expenditures by a levy of assessments therefor, or by both said tolls and assessments.’ . . .

[¶] . . . [¶]

. . . The tolls and charges made against the consumers, and the assessments, are each and both for the same purpose, viz. to defray the expenses ‘of the care, operation, management, repair, and improvement of such portions of the said canal and works as are completed and in use, including salaries of officers and employés.’ [sic] These expenses may be provided for either by tolls or by assessments, or by both; . . .¹²²

In a 1930 case, a court distinguished between irrigation district assessments and other local (municipal utility district) taxes as follows:

In the Municipal Utility District Act, St.1921, p. 245, the distinction between assessments and taxes is entirely eliminated. Under that act its so-called assessments become taxes and are collected with other taxes. While county taxes are made up of a composite rate for general purposes, for road districts, for school districts, and for a number of other purposes, *irrigation taxes are not included*. It

¹²² *Mitchell v. Patterson* (1898) 120 Cal.286, 288-289. See also 65 Opinions of the California Attorney General 187, 1982, page 1. “To pay the bond charges, and to raise maintenance and operation charges, a district is authorized to levy ‘assessments’ (pt. 10 [commencing with § 25500] of div. 11 of the Wat. Code) or, in lieu thereof, to levy charges (§§ 20541, 22280, 25655) on the users of the services supplied by the district.”

is true, however, that such assessments are levied by an agency created by the state for a public purpose, and under an authority delegated by the state.¹²³

In 1967, another court described Turlock Irrigation District’s powers to make assessments and impose charges:

The district, therefore, is formed to provide a service which can be and often is provided by a quasi-public corporation. Furthermore, in accomplishing its purpose it does not exercise general powers of government; in fact, with a few possible exceptions, its powers are essentially administrative and ministerial in character. It possesses the right to make assessments but even this right is limited to assessments against land exclusive of improvements or personal property. [FN omitted.] . . . It possesses the right to impose charges for its services but this right is inherent in private and quasi-public corporations. [¶] ... [¶]

Assessments for revenue purposes are limited to the land and may not include improvements or personal property.¹²⁴

In 2001, California’s Attorney General opined that a county auditor may not allocate a portion of property tax revenue to an irrigation district that levied only an ad valorem *assessment* prior to fiscal year 1978-1979, but not an ad valorem tax.¹²⁵ The opinion explains that the Legislature adopted Government Code section 26912 in response to article XIII A, section 1, which restricted property tax revenue to one percent of the value of the property and required counties to apportion the revenue in accordance with the law. Government Code section 26912(a) expressly provides that “For the purposes of this section, a local agency includes a city, county, city and county, and special district . . . *if such local agency levied a property tax during the 1977-78 fiscal year or if a property tax was levied for such local agency for such fiscal year.*”¹²⁶ The opinion finds that “The Irrigation District Law authorizes irrigation districts to levy “assessments” (see, e.g., Wat. Code, §§ 25650, 25652, 25653) and “charges” for services (Wat. Code, § 22280), but not “taxes.”¹²⁷ Thus, article XIII A did not allow the county auditor to apportion property tax revenue to the irrigation district.¹²⁸

¹²³ *Bolton v. Terra Bella Irr. Dist.* (1930) 106 Cal.App. 313, 317. Emphasis added. That sometimes irrigation assessments are described as “irrigation taxes” was explained by the U.S. Supreme Court in *Fallbrook Irrigation Dist. v. Bradley* (1896) 164 U.S. 112, 176: “Although there is a marked distinction between an assessment for a local improvement and the levy of a general tax, yet the former is still the exercise of the same power as the latter, both having their source in the sovereign power of taxation.”

¹²⁴ *Thompson v. Board of Directors of Turlock Irrigation Dist.* (1967) 247 Cal.App.2d 587, 593.

¹²⁵ 84 Opinions of the California Attorney General 81 (Cal.A.G.), 2001.

¹²⁶ Statutes 1978, chapter 292 (emphasis added).

¹²⁷ 84 Opinions of the California Attorney General 81 (Cal.A.G.), 2001.

¹²⁸ 84 Opinions of the California Attorney General 81 (Cal.A.G.), 2001; see also *Marin Hospital Dist. v. Rothman* (1983) 139 Cal.App.3d 495, a case filed by a hospital district seeking a writ of

Turlock Irrigation District asserts, however, that it collected property taxes in 2018, 2019, 2020, and 2021.¹²⁹ The claimants submitted a copy of a check from Stanislaus County to the Turlock Irrigation District, dated May 6, 2022, for \$723,805.15, with the description of “current secured taxes.”¹³⁰ And the 2020 and 2019 Turlock Irrigation District Financial Audit mentions “TID levies ad valorem property taxes on property located in the counties of Stanislaus and Merced.”¹³¹ However, the law does not authorize them to levy a property tax. That Turlock Irrigation District’s revenue is mislabeled a “tax” is explained by the State Controller’s County Tax Collectors’ Reference Manual, which states:

When an irrigation district elects to transfer the duties of tax collection to the county (Wat. Code §26650), any assessments levied are collected at the same time and in the same manner as other county taxes. Once collected, the assessments are deposited into the county treasury and later transferred to the district.¹³²

Moreover, Turlock Irrigation District’s budgets for 2017 through 2021 show that their revenue came from retail electric, wholesale electric, gas and oil revenue, wholesale wind revenue, “BABs” revenue, and water operating revenues.¹³³ These budget documents do not show that the district received any revenue from taxes or established an appropriations limit. Neither

mandate compelling the county to apportion real property tax revenue to the district for the 1979-1980 fiscal year. The hospital district was authorized by law to levy a tax upon real property within its territorial limits, but had not levied any property taxes for the 1977-1978 fiscal year, nor had a tax been levied for it. (*Marin Hospital Dist. v. Rothman* (1983) 139 Cal.App.3d 495, 497.) The court denied the writ, holding that Government Code section 26912 was constitutionally valid and clear, and was properly applied to the hospital district. (*Marin Hospital Dist. v. Rothman* (1983) 139 Cal.App.3d 495, 502.)

There is a presumption that the claimants’ budget documents are valid and that their official duties have been regularly performed. (Evid. Code, § 664.)

district reported an appropriations limit to the State Controller in fiscal year 2009-2010, the last year for which the reports are available online.¹³⁴

In addition, according to Turlock Irrigation District’s 2020 and 2019 financial audit report, “TID has maintained rates for electric service that have been sufficient to provide for all operating and maintenance costs and expenses, debt service, repairs, replacements and renewals and to provide for base capital additions to the system.”¹³⁵

In the history available on its website, the Modesto Irrigation District reports that it discontinued its “irrigation tax” in 1959, it remains tax-free today, and adopted a water-user charge in 1976:

Starting in 1938, power revenues were transferred annually to the irrigation department. . . . The transfer of power revenues permitted a steady reduction of irrigation taxes. . . . In 1935 the taxes were slashed from \$6.40 per \$100 assessed valuation of property to \$2.76. Three years later, taxes were down to \$2.40 and soon thereafter to \$1.50. This rate prevailed for 16 years throughout World War II and the post war years when other districts were increasing water charges repeatedly. At the same time, assessed valuations of only \$80 per acre had been unchanged since 1915, even though the land was selling for as much as \$1,000 per acre. Thus, irrigators were receiving their annual supplies of water for a bare \$1.20 per acre.

In 1959 irrigation taxes were canceled. . . . Today the district remains tax free, although in 1976 an irrigation water-user charge was adopted.¹³⁶

Although Modesto Irrigation District’s website mentions an “irrigation tax” last imposed in 1959, the Irrigation District Law, as stated earlier, did not provide the authority to levy property taxes. The claimants only had the authority to levy an assessment on the property, and other fees and charges.¹³⁷ In addition, Modesto Irrigation District’s budget for 2018 through 2021 shows water revenues, electric revenues, and other revenues, but no tax revenues - and no appropriations limit is identified.¹³⁸

¹³⁷ Exhibit E (1), 1943 Irrigation District Act (Stats. 1943, chs. 368, 372).

¹³⁸ Exhibit E (5), Modesto Irrigation District 2020 Detailed Budget, <https://www.mid.org/about/budget/documents/2020Budget.pdf> (accessed on April 20, 2022), page 3.

The claimants also allege that they have authority to collect property tax revenue pursuant to Water Code section 25701.¹³⁹ Water Code section 25701 authorizes irrigation districts to levy assessments, but not taxes as follows: “The board may at any time call an election to submit to the voters a proposal to levy a particular purpose *assessment* to be applied to any of the purposes of the district.” (Emphasis added.) Even though the county may collect the assessment on behalf of an irrigation district, and sometimes as part of the property tax bill,¹⁴⁰ taxes and assessments are different. As explained by the California Supreme Court in the 1895 decision in *City of San Diego v. Linda Vista Irrigation Dist.*, assessments are imposed on specific property for a specific purpose, and taxes are imposed on all property for general purposes.

But the assessment to satisfy which the lands in question were sold is not a tax, within the meaning of said provision of the constitution. The act under which the Linda Vista [Irrigation] District was organized authorizes the formation of districts where the lands of the different owners are ‘susceptible of one mode of irrigation from a common source, and by the same system of works.’ The district, when formed, is a local organization, to secure a local benefit, to be derived from the irrigation of lands from the same source of water supply, and by the same system of works. It is, therefore, a charge upon lands benefited, or capable of being benefited, by a single local work or improvement, and from which the state, or the public at large, derives no direct benefit, but only that reflex benefit which all local improvements confer. In *Taylor v. Palmer*, 31 Cal. 241, 255, the court defined the term “assessment,” as distinguished from “taxation,” thus: “It is not a power to tax all the property within the corporation for general purposes, but the power to tax specific property for a specific purpose. It is not a power to tax property generally, founded upon the benefits supposed to be derived from the organization of a government for the protection of life, liberty, and property, but a power to tax specific property founded upon the benefits supposed to be derived by the property itself from the expenditure of the tax in its immediate vicinity.”¹⁴¹

In *County of Placer v. Corin*, the court explained the difference between taxes and assessments as follows:

Taxes are levied by the Legislature, or by counties and municipalities under their delegated power, for the support of the state, county, or municipal government. [Citations omitted.] Special or local assessments, on the other hand, are imposed on property within a limited area for payment of a local improvement allegedly enhancing the value of the property taxed. [Citations omitted.] Special

¹³⁹ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, page 4.

¹⁴⁰ See Water Code sections 26650 et seq. (authorizing an irrigation district to transfer the duties of collector to the county tax collector) and Government Code section 29304 (costs added to the assessment to pay for the county’s collection of the assessment).

¹⁴¹ *City of San Diego v. Linda Vista Irrigation Dist.* (1895) 108 Cal.189, 193.

assessments can be levied only on the specific property benefited and not on all the property in the district. [Citations omitted.]

In *County of Fresno v. Malmstrom* [(1979) 94 Cal. App. 3d 974], the question presented was whether special assessments were "special taxes" within the provisions of article XIII A. While noting that the terms "tax," "special tax," and "special assessment" have at times become hopelessly entangled in judicial opinions, legislative and legal treatises, the Malmstrom court recognized and followed the long standing precedent that strictly speaking, special assessments are not taxes at all. (Id at pp. 982-983 [remaining citations omitted].)

In *Solvang Mun. Improvement Dist. v. Board of Supervisors* (1980) 112 Cal.App.3d 545 [unofficial cite omitted], the court adopted the reasoning of the Malmstrom court in determining special assessments levied to benefit specific properties within a specified district were not includable in the 1 percent of assessed value limitation imposed on ad valorem taxes by article XIII A, section 1 of the California Constitution. The problem in Solvang, supra, resulted from an incongruity in the language of subdivisions (a) and (b) of section 1. Subdivision (a) imposed the 1 percent limitation on ad valorem taxes. Subdivision (b) exempted from the 1 percent limitation ad valorem taxes or special assessments to pay interest and redemption charges on indebtedness approved by the voters prior to the effective date of article XIII A. At issue were nonvoted special assessments for a public parking district created pursuant to general and special statutory authority. Bonds were issued and special assessments to pay the principal and interest were levied annually by the board of supervisors against the benefited properties. The board interpreted article XIII A, section 1 to prohibit such assessment. The court first determined such an application of article XIII A would retroactively deprive the bondholders of their contractual right to repayment and such impairment of contract was constitutionally impermissible. Next, the court decided that special assessments designed to directly benefit the property assessed and make it more valuable were not within the 1 percent limitation and the reference to "special assessments" in section 1, subdivision (b) was mere surplusage.¹⁴²

Proposition 218, adopted by the voters in 1996, continues the distinction between assessments and taxes. Article XIID, section 2(b) defines "assessment" to "mean[] any levy or charge upon real property by an agency for a special benefit conferred upon the real property. "Assessment" includes, but is not limited to, "special assessment," "benefit assessment," "maintenance assessment" and "special assessment tax." And Article XIII D, section 3 distinguishes between ad valorem property taxes imposed pursuant to Article XIII and Article XIII A; special taxes receiving a two-thirds vote pursuant to Section 4 of Article XIII A; assessments; and fees or charges. The claimants contend their authority to impose fees are actually taxes under Proposition 218 because the alleged mandate is intended to benefit lands outside district

¹⁴² *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 450-451.

boundaries and does not benefit their customers.¹⁴³ Whether or not a fee or charge becomes a tax under Proposition 218 is a question that must be determined by the courts.¹⁴⁴ The claimants have submitted no evidence that a court has determined that their fees or charges are, in fact, taxes.

Thus, the claimants did not possess the power to levy a property tax on January 1, 1978, and were funded by charges, fees, and assessments; revenues other than “proceeds of taxes.” Thus, pursuant to article XIII B, section 9(c) and Government Code section 7901(e), they are not subject to the appropriations limit of article XIII B.

“Proceeds of taxes” also include revenue from special taxes, however. Article XIII B, section 8 states that “proceeds of taxes” subject to the appropriations limit shall include “all tax revenues.”¹⁴⁵ As indicated above, the Legislature enacted Water Code section 22078.5 in 1991 (Stats. 1991, ch. 70), to authorize irrigation districts to levy a special tax. Section 22078.5 states:

A district may impose a special tax pursuant to Article 3.5 (commencing with Section 50075) of Chapter 1 of Part 1 of Division 1 of Title 5 of the Government Code. The special taxes shall be applied uniformly to all taxpayers or all real property within the district, except that unimproved property may be taxed at a lower rate than improved property.

Government Code section 50075 states the legislative intent “to provide all cities, counties, and districts with the authority to impose special taxes, pursuant to the provisions of Article XIII A of the California Constitution.”¹⁴⁶ Government Code section 50075.1 further provides that special taxes can only be levied for specific purposes identified to the voters and if approved by a two-thirds vote of the local electorate in accordance with article XIII A, the revenue can only be applied to that specific purpose.

On after January 1, 2001, any local special tax measure that is subject to voter approval that would provide for the imposition of a special tax by a local agency shall provide accountability measures that include, but are not limited to, all of the following:

- (a) A statement indicating the specific purposes of the special tax.
- (b) A requirement that the proceeds be applied only to the specific purposes identified pursuant to subdivision (a).
- (c) The creation of an account into which the proceeds shall be deposited.

¹⁴³ Exhibit C, Claimants’ Comments on the Notice of Proposed Dismissal of Test Claim, filed April 18, 2022, pages 4-5.

¹⁴⁴ *Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 873-874; *Bay Area Cellular Telephone Co. v. City of Union City* (2008) 162 Cal.App.4th 686, 693.

¹⁴⁵ California Constitution, article XIII B, section 8(b), (c).

¹⁴⁶ Government Code sections 50075 et seq. were originally added by Statutes 1979, chapter 903, in response to article XIII B.

(d) An annual report pursuant to Section 50075.3.¹⁴⁷

Therefore, any special taxes proposed by an irrigation district and approved by two-thirds of the voters would be considered “proceeds of taxes” subject to the appropriations limit. Government Code section 7902.8, while not directly applicable because it addresses only special districts formed during fiscal year 1978-1979 that were totally funded by other than the proceeds of taxes, and later imposed a special tax during the 1980-1981 fiscal year (based on the authority in Government Code sections 50075 et seq.), is nonetheless helpful in understanding how the appropriations limit for special taxes is established and calculated:

[T]he appropriations limit of such an entity [special district], unless otherwise established pursuant to law, shall be deemed established by the electors at the election approving the special tax as that amount equal to the proceeds of taxes received during the first full fiscal year in which proceeds of taxes were received, and shall thereafter be adjusted in any manner which may be required or permitted by Article XIII B of the California Constitution.¹⁴⁸

As stated above, there is no evidence in the record that the claimants have levied any special taxes and they have no authority to levy other types of taxes. Rather, their budget documents show that they are fully funded with bond revenue, assessments, fees and charges, none of which are “proceeds of taxes” subject to the appropriations limit of article XIII B.¹⁴⁹

Accordingly, based on the law and evidence in the record, Turlock Irrigation District and Modesto Irrigation District are not subject to the taxing and spending limitations of articles XIII A and XIII B. Instead, they are funded by other than proceeds of taxes, are not subject to

¹⁴⁷ See also Government Code section 50077, which establishes the procedure for imposing a special tax. This is consistent with article XIII C, section 2(a) of the California Constitution, which states that “Special purpose districts or agencies, including school districts, shall have no power to levy general taxes.”

¹⁴⁸ See also *City of San Diego v. Shapiro* (2014) 228 Cal.App.4th 756, 764, in which the special tax put to the voters established an appropriations limit.

the appropriations limit of article XIII B, and are therefore not entitled to reimbursement under section 6.¹⁵⁰

V. Conclusion

Based on the foregoing analysis, the Commission dismisses this Test Claim pursuant to California Code of Regulations, title 2, sections 1183.1(g) and 1187.14.

Subject: Response of Turlock Irrigation District and Modesto Irrigation District to
Proposed Decision to Dismiss Joint Test Claim 21-TC-02

Dear Commissioners:

Now that staff have explained their thinking behind proposing dismissal of this test claim, it is apparent they have missed the issue. The Proposed Decision rests on the conclusion that Claimants have fee authority but not taxing authority. Even if that were correct (which it is not¹), fees that go too far become taxes—as they would for the Mandate here. Proposition 26 establishes that **all fees start from the presumption they are taxes**, and the party asserting that specific fees are not taxes bears the burden of proving it. (Cal. Const., art. XIII A § 3(d) (“[t]he State bears the burden of proving by a preponderance of the evidence that a levy, charge, or other exaction is not a tax”); art. XIII C § 1(e) (“[t]he local government bears the burden of proving by a preponderance of the evidence that a levy, charge, or other exaction is not a tax”).) Only if the fee is

¹ Irrigation districts can collect special taxes under Water Code 22078.5, as the Proposed Decision acknowledges (page 27 note 119). The Commission has also found that some irrigation districts also collect property taxes, as the Proposed Decision admits (page 13 note 58). (See also Proposed Decision at 28, quoting *Mitchell v. Patterson* (1898) 190 Cal. 286, 288-289 (describing irrigation district assessments “upon the district” that would likely qualify as a property tax today).) Claimant Turlock Irrigation District has submitted a declaration and receipt from Stanislaus County showing that TID likewise collects property taxes. The Proposed Decision’s speculation, at page 28, that this property tax is “misabeled” is not substantial evidence. (See Evidence Code § 664 (“It is presumed that official duty has been regularly performed”).)

shown to be “no more than necessary to cover the reasonable costs of the governmental activity, and ... the manner in which those costs are allocated to a payor bear a fair and reasonable relationship to the payor’s burdens on, or benefits received from, the governmental activity” is the fee not a tax. (Cal. Const., arts. XIII A § 3(d), XIII C § 1(e).) Claimants’ argument is that the Mandate at issue, by its nature, could only be funded by fees that are also taxes—but the Proposed Decision dodges the issue.

The Mandate would require Claimants to construct a multimillion-dollar riparian and floodplain restoration project outside their boundaries that is intended to benefit other areas of the State rather than Claimants’ fee payors. The joint test claim explained: “the Mandate will not provide, and is not intended to provide, benefits tailored to the Districts’ customers (the putative fee payors)”, including because: (i) “the Districts’ legal boundaries exclude riparian parcels” and so “the immediate riparian and floodplain benefits the Mandate is intended to achieve are for the benefit of lands outside the Districts, rather than for the Districts’ customers”, and (ii) the Mandate is intended to benefit the “Bay-Delta Estuary”, which is in “another region of the state entirely”. (Joint Test Claim, section 5 at page 13.) Because the Mandate would not benefit, and is not intended to benefit, the Claimants’ fee payors, the joint test claim concluded Claimants “do not appear to have the authority” to impose fees to pay for the Mandate:

Because fees, charges, or assessments that might be imposed on the Districts’ customers to subsidize significant benefits for riparian lands outside the Districts, or for the Delta Estuary and the rest of the State far downstream, would not bear a “fair or reasonable relationship” (Art. XIII C § 1(e)) to the (non-existent) benefits the Districts’ local customers would receive in return, or would not be “proportionate” to those customers’ (non-existent) specific benefits (Art. XIII D §§ 4(f), 6(b), subparas. (3)-(5)), the Districts do not appear to have the authority to impose them.

(Joint Test Claim, section 5 at page 14.)

To this argument, the 36-page Proposed Decision devotes a total of only three

sentences:

The claimants contend their authority to impose fees are actually taxes under Proposition 218 because the alleged mandate is intended to benefit lands outside district boundaries and does not benefit their customers. Whether or not a fee or charge becomes a tax under Proposition 218 is a question that must be determined by the courts. [*Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 873-874; *Bay Area Cellular Telephone Co. v. City of Union City* (2008) 162 Cal.App.4th 686, 693.] The claimants have submitted no evidence that a court has determined that their fees or charges are, in fact, taxes.

(Proposed Decision at 33-34.) These three sentences are wrong, for four reasons.

First, whether a fee or charge is a tax is *not* a question that must be determined by the courts. Under Proposition 26, all fees and charges are *presumed* to be taxes. (Cal. Const., arts. XIII A § 3(d), XIII C § 1(e).) No court determination is required. Here, this presumption is buttressed by the evidence offered in the joint test claim that the Mandate is not intended to, and would not, benefit the Claimants' fee payors, and thus any fees imposed on them to pay for the Mandate would not bear a "fair or reasonable relationship to the payor's burdens on, or benefits received from, the governmental activity" sufficient to save them from being taxes. (*Id.*) Proposition 26 requires the Commission to presume (as would a court) that Claimants would pay for the Mandate from fees amounting to taxes, even without a court determination.

Second, the two cases cited in the Proposed Decision do not hold that a court determination is required; they simply recite the legal standard of review courts apply: "The cases agree that whether impositions are 'taxes' or 'fees' is a question of law for the appellate courts to decide on independent review of the facts" (*Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 873-874; *Bay Area Cellular Telephone Co. v. City of Union City* (2008) 162 Cal.App.4th 686, 693 (same)). A more recent California Supreme Court decision, *California Farm Bureau Federation v. State Water Resources Control Board* (2011), cites this passage from *Sinclair Paint Co.* in the "Standard of

Review” section of the opinion, and says nothing about requiring a court determination. (51 Cal.4th 421, 436 (“Whether [a statute] imposes a tax or a fee is a question of law decided upon an independent review of the record [citing *Sinclair Paint Co.*]”).) Merely because an issue presents a “question of law” that the courts on appeal “decide on independent review of the facts” does not mean the Commission on State Mandates has no jurisdiction to consider the issue when presented in a test claim. No case has held that the Commission lacks jurisdiction in adjudicating a test claim to consider whether a fee is also a tax. The Proposed Decision simply misreads these two cases.

Third, rather, the Legislature has mandated that the Commission shall first “hear and decide upon a claim ... that the local agency ... is entitled to be reimbursed” for a State mandate. (Gov. Code § 17551(a).) The Legislature has also given the Commission jurisdiction, under Government Code section 17556(d), to determine whether a claimant has non-tax fee authority such that reimbursement is unavailable. The Commission has exercised this authority in other cases to decide whether particular fees constitute taxes entitling the local agency to reimbursement. (*E.g.*, *Municipal Storm Water and Urban Runoff Discharges*, Nos. 03-TC-04, 03-TC-19, 03-TC-20, 03-TC-21 (31 July 2009), Statement of Decision, pages 58-59 (agreeing claimants lack authority to “assess fees on property owners or businesses for the cost of transit trash receptacles because doing so would collect more than the actual cost of the collection and thereby create a special tax”), and page 67 (finding “a local regulatory fee for stormwater would not be a ‘special tax’”).) Similarly here, Claimants argue they are entitled to be reimbursed for the Mandate because it would require them to impose a fee amounting to a tax. The Commission has jurisdiction to hear and decide that argument here, just as it has heard and decided it in the past.

Fourth, the Proposed Decision is wrong to suggest that Claimants have not met their burden. There is no dispute Claimants have authority to levy fees. The real issue is whether parties *opposing* this joint test claim can overcome the presumption that the fees Claimants would have to impose to fund the Mandate would also constitute taxes. (*See* Cal. Const., arts. XIII A § 3(d), XIII C § 1(e).) The Proposed Decision offers no evidence to overcome the presumption the Mandate would have to be funded by fees constituting taxes.

BRISCOE IVESTER & BAZEL LLP
Commission on State Mandates
19 May 2022
Page 5

That question—whether the presumption that funding the Mandate would require fees constituting taxes—is one for the Commission to resolve on the merits, not for the Commission to ignore and then dismiss this test claim at an initial stage. The Proposed Decision should be rejected, and this case should proceed to adjudication on the merits without further delay.

Sincerely,

BRISCOE IVESTER & BAZEL LLP

- Name in certificate 20230. In the certificate instead of "California Districts Securities Commission" there shall appear "County Waterworks Districts Securities Commission."
- Non-applicable provisions 20231. Articles 1, 2, 5, and 6 of Chapter 1 of this division do not apply either to the construction of this chapter or to action taken pursuant to it.

DIVISION 11. IRRIGATION DISTRICTS

(Division 11 added by Stats. 1943, Ch. 372, as part of codification.)

PART 1. INTRODUCTORY PROVISIONS

CHAPTER 1. SHORT TITLE

- Title 20500. This division shall be known and may be cited as the Irrigation District Law.

CHAPTER 2. DEFINITIONS

- Governing provisions 20510. Unless the context otherwise requires, the provisions of this chapter shall govern the construction of this division.
- Application of definition 20511. The definition of a word applies to any of its variants.
- "Include" 20512. "Include" except when used in relation to the inclusion of land into a district does not necessarily exclude matters not enumerated.
- "District" 20513. "District" means any irrigation district formed pursuant to any law of this State or to this division except the Palo Verde Irrigation District.
- "Improvement district" 20514. "Improvement district" means an improvement district formed pursuant to the Irrigation District Improvement Act or to this division.
- "Commission" 20515. "Commission" means the California Districts Securities Commission.
- "Rules" 20516. "Rules" include "regulations."
- "Land" 20517. "Land" except in Article 4 of Chapter 1 of Part 5 and Chapter 2 of Part 11 means land in the district or proposed district involved.
- "Principal county" 20518. "Principal county" means the county in which all the land is situated, or if the land is situated in more than one county, the county in which the greatest portion of the area of the land is situated.
- "Affected county" 20519. "Affected county" means any county in which land is situated.
- "Office county" 20520. "Office county" means the county in which the office of a district is kept.
- "Board" 20521. "Board" means the board of directors of a district.
- "President" 20522. "President" means the president of the board.
- "Secretary" 20523. "Secretary" means the secretary of the board.
- "Elective officers" 20524. "Elective officers" irrespective of the method of selection in any particular instance are:
- (a) A director from each division except as otherwise provided in this division.

(b) An assessor.

(c) A collector.

(d) A treasurer.

20525. "General election" is the district election required to be held in each odd-numbered year. "General election"

20526. "Bond election" means an election provided for in Chapter 4 of Part 4. "Bond election"

20527. "Elector," "voter," and "precinct board" have respectively the same meaning as in the Elections Code, but an "elector" or "voter" shall also be a resident of the district or proposed district involved. "Elector," "voter," and "precinct board"

20528. "Holder of title" includes a holder of evidence of title and, also, a holder of land under a possessory right acquired by entry or purchase from the United States or the State of California. "Holder of title"

20529. "Property" except in Part 10 embraces all real and personal property, including water, water rights, works, franchises, concessions and rights. "Property"

20530. "Works" includes dams, reservoirs, wells, conduits, pumps, power houses, power generating equipment, power lines, and their appurtenances. "Works"

20531. "Conduits" include canals, laterals, ditches, flumes, pipes, and their appurtenances. "Conduits"

20532. "Acquire" includes construct, purchase, lease, exchange, condemn, jointly acquire when joint acquisition is permitted, and contract to acquire. "Acquire"

20533. "Dispose" includes lease, sell, contract to lease, contract to sell, and the making of any instrument necessary therefor. "Dispose"

20534. "Operate" includes use, maintain, and repair. "Operate"

20535. "Assessee" means the person to whom property is assessed. "Assessee"

20536. "Assessment book" includes any substantial record showing the information required to be kept in it, whether in the form of bound volumes or of cards arranged and kept to provide a record of the assessments. "Assessment book"

20537. "Completion assessment" means an assessment levied pursuant to Article 2 of Chapter 2 of Part 10. "Completion assessment"

20538. "Particular purpose assessment" means an assessment levied pursuant to Article 3 of Chapter 2 of Part 10. "Particular purpose assessment"

20539. "Emergency assessment" means an assessment levied pursuant to Article 4 of Chapter 2 of Part 10. "Emergency assessment"

20540. "Limited assessments" means any or all of the following: "Limited assessments"

(a) Completion assessment.

(b) Particular purpose assessment.

(c) Emergency assessment.

20541. "Charges" includes tolls. "Charges"

20542. "Refund" includes fund. "Refund"

20543. "Road" includes streets, highways, and alleys. "Road"

CHAPTER 3. GENERAL PROVISIONS

- Districts subject to provisions Existing districts 20560. Districts, regardless of the date of formation, are subject to the provisions of this division.
- Manner of publishing notice 20561. Nothing in this division impairs the validity of any district formed prior to the effective date of this division, its rights, or obligations.
- Time acts may be performed 20562. Whenever by this division a notice is required to be published for a designated number of weeks or once a week for a designated number of weeks, the notice need be published on only one day of each week and for only the same number of times as the number of weeks designated.
- Effect of acknowledgment 20563. Whenever any act is required to be done or proceeding taken on the first Tuesday in any month, the act may be done or proceeding had upon the day of the month otherwise specified for the regular meeting of the board.
- Who shall acknowledge 20564. Whenever an instrument provided for in this division is acknowledged or proved, it shall have the same effect as evidence as a conveyance of real property which has been acknowledged and in case of any petition under this division is evidence of the fact of place of residence of a petitioner as stated by him on the petition.
- Petition by guardian, executor, etc. 20565. Whenever an instrument is by this division required to be acknowledged, each signer shall acknowledge the instrument, or his signature shall be proved, in the manner provided by law before his signature shall be effective.
- Effect of assessment to unknown or fictitiously named owners 20566. A guardian, executor, administrator, or other person holding property in a trust capacity under appointment of court may sign any petition provided for in this division, when authorized by an order of court, which order may be made without notice.
- Petition by owner of undivided interest 20567. If any land is assessed on any assessment book to unknown or fictitiously named owners, or to unnamed owners in addition to any owner or owners named thereon, the land has, for the purposes of any petition provided for in this division, but one owner in addition to any owner or owners whose true name or names may be purported to be given on the assessment book.
- Determination of value of land and holders of title 20568. The holder of title to an undivided interest in any land may sign any petition provided for in this division. Undivided interests shall be counted and valued as though they were separate interests. If the assessment book fails to indicate the extent of any undivided interest, the holders of title whose undivided interests in any land are not specifically defined have, for the purposes of this division, equal shares therein.
20569. The value of any land and the holders of title to the land are conclusively determined, for the purpose of any petition provided for in this division, by the district assessment book last equalized at the time of the presentation of the petition.

When no assessment book of the district has been equalized, the county assessment roll of the county in which the land is

situated last equalized at the time of the presentation of the petition is conclusive evidence of the value and title.

However, for the purposes of a petition to form a district the county assessment roll of the county in which the land is situated, last equalized at the time of the first publication of the petition is conclusive evidence of the value and title.

CHAPTER 4. STATE PUBLIC LAND

20590. As used in this chapter "public land" is limited to land belonging to the State which is subject to entry or has been entered and for which no certificate of purchase has been issued.

Limitation

20591. Public land is subject to all of the provisions of law relating to districts to the same extent and in the same manner as land in private ownership.

Applicable provisions

20592. When public land is affected, all notices required by this division shall promptly after issuance be served upon the State Lands Commission by mailing to its office a copy inclosed in a sealed envelope with postage prepaid.

Service of notice on State Lands Commission

20593. Nothing in this chapter creates any obligation against the State to pay any assessments or charges.

Nonliability for assessments or charges

20594. No public land which was unentered at the time any assessment was levied against it by any district shall be sold for the delinquency of the assessment, but the assessment shall be and continue a lien upon the land, and no patent shall be issued therefor until the applicant presents a certificate from the collector stating that no unpaid assessments or charges are delinquent upon it.

Sale for delinquency

Patent requirements

CHAPTER 5. INFORMATION BY DEPARTMENT

20625. The Department of Public Works shall give information so far as it may be practicable to persons contemplating the formation of districts.

To whom given

20626. Whenever the department deems it in the public interest that preliminary surveys and field investigations of a proposed district project should be made at the expense of the State, the department shall make the surveys and field investigations.

Preliminary surveys and field investigations

20627. Pending the completion of the preliminary surveys and field investigations, the State Engineer may withhold from appropriation any unappropriated water likely to be needed by the district.

Same. Withholding appropriation of unappropriated water

PART 2. FORMATION

CHAPTER 1. PETITION FOR FORMATION

Article 1. Petitioners and Land

20700. A majority in number of the holders of title to land susceptible of irrigation from a common source and by the same system of works, including pumping from subsurface

Formation petition

or other water, who are also the holders of title to a majority in value of the land may propose the formation of a district under the provisions of this division; or the formation of the district may be proposed by not less than 500 petitioners, each of whom is an elector residing in the proposed district or the holder of title to land therein and which petitioners include the holders of title to not less than 20 per cent in value of the land included within the proposed district.

Contiguous
not required

20701. The land proposed to be formed into a district need not consist of contiguous parcels.

Article 2. Petition

Contents
of petition

20720. A petition for the formation of a district shall contain:

- (a) Generally, a description of the land.
- (b) Generally, the sources, which may be in the alternative, from which the land is proposed to be irrigated.
- (c) The name of a person to whom notice of the final hearing on the petition may be sent.
- (d) A prayer that the land described be formed into a district.

Requests

(e) Signatures of the petitioners.
20721. A petition for the formation of a district may request any of the following:

- (a) Three divisions in the proposed district.
- (b) Election of the directors of the proposed district by the district at large.
- (c) Consolidation of any offices allowed to be consolidated.

Duplicate
instruments

20722. The petition may consist of any number of separate instruments, which shall be duplicates except as to signatures.

Undertaking

20723. The petition shall be accompanied by a sufficient undertaking, to be approved by the board of supervisors, in double the amount of the probable cost of forming the district, conditioned that the sureties shall pay all of the costs in case the formation is not effected.

Withdrawal
of signatures

20724. Signatures to the petition may be withdrawn at any time before its publication is commenced, by filing a declaration, signed and acknowledged by the petitioner, with the board of supervisors of the principal county, stating that it is the intention of the petitioner to withdraw therefrom.

Article 3. Publication

Publication
of petition
and notice

20740. The petition and a notice of the time of the meeting at which it will be presented shall be published for at least two weeks before the time at which it is to be presented. Publication shall be in a newspaper of general circulation printed and published in the principal county and in a newspaper published in each other affected county. The notice shall be signed by the county clerk of the principal county.

20741. When the petition consists of a number of separate instruments, only one need be published, but the names attached to all of the instruments shall appear in the publication.

Petition consisting of several separate instruments

20742. No defect in the form or contents of the published notice, title to it, or petition, nor failure to publish or error in publishing any signature to the petition shall vitiate the proceedings.

Validity of proceedings

CHAPTER 2. HEARINGS ON FORMATION

Article 1. Preliminary Hearing

20800. The formation petition shall be presented to the board of supervisors of the principal county.

Formation petition Presentation

20801. The petition shall be presented at a regular meeting of the board of supervisors.

Same When presented

20802. The board of supervisors shall hear all competent and relevant testimony offered in support of or in opposition to the sufficiency of the petition and the publication of the notice.

Hearing

20803. The hearing may be adjourned from time to time, but not exceeding two weeks in all.

Adjournment

20804. At the hearing the board of supervisors shall determine by resolution whether or not the petition and notice comply with Chapter 1 of this part.

Compliance with Chapter 1

20805. If the board of supervisors determines that any of the requirements for the formation petition or notice were not complied with, the petition shall be dismissed without prejudice to the right of the proper number of persons to present a new petition covering the same matter or to present the same petition with additional signatures if additional signatures are necessary to comply with the requirements of Chapter 1 of this part.

Noncompliance Dismissal without prejudice

20806. If the board of supervisors determines that the requirements for the formation petition and notice have been complied with, the resolution so determining shall be known as the preliminary formation resolution.

Compliance Preliminary formation resolution

Article 2. Reference to Department

20820. On or before the day on which the petition is presented to the board of supervisors, a copy of the petition shall be filed in the office of the Department of Public Works.

Filing copy of petition

20821. Upon the adoption of the preliminary formation resolution the board of supervisors shall send a copy of the resolution to the department.

Filing copy of preliminary formation resolution

20822. Upon receiving a copy of the resolution, the department shall make such preliminary investigation as may be practicable to determine the feasibility of the proposed project.

Preliminary investigation

20823. The department shall report in writing to the board of supervisors as soon as practicable, but at all events within 90 days from the date of the adoption of the preliminary formation resolution, except that upon receiving a written

Time limit for report

request from the department the board of supervisors may before the expiration of the 90 days grant to the department not more than 90 days additional time in which to make the report.

Reasons for
continuance;
hearing

20824. If the department reports within the specified time that the supply of water available for the use of the proposed district or that may be acquired by any practicable means, including the condemnation of existing rights, is not sufficient or that the project is not feasible for any other reason, the hearing of the petition shall be continued for not more than two months and shall then be dismissed unless within the period of the continuance either:

Reasons for
not dismissing
petition

(a) The board of supervisors is petitioned in writing by three-fourths of the holders of title to land to grant the petition.

(b) The board of supervisors, if not so petitioned, modifies the project proposed in the petition to conform to the recommendations made by the department for the proposed district.

Article 3. Final Hearing

Time of final
hearing

20840. The board of supervisors not later than its first regular meeting after the occurrence of any one of the following shall set a time for the final hearing of the formation petition:

(a) Receipt of a favorable report from the department.

(b) Modification of the project by the board to conform to the recommendations made by the department.

(c) Receipt of the requisite petition after an adverse report by the department.

(d) Expiration of the time allowed for the making of a report by the department when the report has not been received within the time allowed.

Restriction
on time

20841. The time set for the final hearing shall not be less than one week from the meeting at which the time is set.

Notice

20842. Notice of the time of the final hearing shall be given either by:

(a) Registered mail to the person designated for that purpose in the petition.

(b) Publication for at least three days in one daily newspaper published in the principal county.

Effect of
failure to
give notice
Adjourn-
ments

20843. Failure to give notice of the final hearing shall not affect the validity of subsequent proceedings.

20844. On a final hearing the board of supervisors may adjourn from time to time, but at no time for a longer period than three days, until a determination of the matter is reached.

Determina-
tion of land
included
Exclusions

20845. At the final hearing the board of supervisors shall determine the land to be formed into the proposed district:

(a) Land shall be excluded which will not in the judgment of the board of supervisors be benefited by the project.

(b) No land included by the petition in the proposed district or in the modified project as the case may be which is susceptible of irrigation from any of the proposed, or if modified,

the modified sources shall be excluded unless the owner consents to the exclusion.

(c) Riparian land and land already subject to irrigation may be included if in the judgment of the board of supervisors, it will either be benefited or the rights to the water used on it should be acquired by the proposed district.

(d) Land not included in the original formation petition, susceptible of irrigation from any of the proposed sources, may in the discretion of the board of supervisors be included on application by its owner.

20846. At the final hearing no evidence shall be heard against the genuineness or sufficiency of the petition or notice unless it is shown to the satisfaction of the board of supervisors that new evidence which if uncontradicted would disprove the genuineness or sufficiency of the petition or notice has been discovered since the board adopted the preliminary formation resolution. In case any new evidence is admitted, full opportunity shall be given for the introduction of evidence in rebuttal.

20847. At the conclusion of the final hearing on the petition the board of supervisors shall make an order containing all of the following:

(a) Reaffirmance, when it is consistent with its conclusions, of the sufficiency of the petition and of the notice of the preliminary hearing.

(b) Recital that a report on the proposed district has been made by the department if it was in fact made, and if that be so, that it is on file in the records of the board.

(c) Description of the land as determined by the board.

(d) Name for the proposed district, which shall contain "Irrigation District."

20848. The order on final hearing shall also contain all of the following:

(a) Division of the district into the following number of divisions, which shall be as nearly equal in size as may be practicable:

(1) Five divisions unless otherwise requested, numbered from one to five respectively.

(2) Three divisions when requested in the petition, numbered from one to three respectively.

(b) Statement, when requested in the petition, that the directors of the proposed district are to be elected at large.

(c) Statement, when and as requested in the petition, of the consolidated district offices.

20849. The order on final hearing shall be entered in full upon the minutes of the board of supervisors.

20850. A finding of the board of supervisors in favor of the genuineness and sufficiency of the petition and notice shall be conclusive against all persons except the State upon suit by the Attorney General commenced within one year after the order of the board of supervisors declaring the district formed.

CHAPTER 3. ELECTION ON FORMATION

Article 1. Calling of Election

Purposes	20890. Upon making the order on final hearing of the formation petition, the board of supervisors shall call and give notice of a formation election to be held in the proposed district for the purpose of determining whether or not it shall be formed and electing persons to fill the offices of the proposed district if it is formed.
Contents of notice	20891. The notice of the formation election shall contain: <ol style="list-style-type: none"> (a) Date and hours of election. (b) Place of polls in each precinct. (c) Description of the land. (d) Name of the proposed district. (e) Offices for which candidates shall be elected at the election.
Publication	20892. Notice of the formation election shall be published once a week for three weeks previous to the election, in a newspaper published in each affected county.

Article 2. Conduct of Election

Establishment of election precincts	20910. For the purposes of the formation election the board of supervisors shall establish a convenient number of election precincts in the proposed district and define their boundaries.
Appointment of precinct board, nomination of candidates, etc	20911. The precinct board for the formation election shall be appointed, candidates for the offices of the proposed district shall be nominated, ballots and other supplies shall be provided and the election shall be conducted as nearly as practicable in accordance with the provisions concerning general elections except as to: <ol style="list-style-type: none"> (a) Notice of the election. (b) Other inconsistent provisions in this chapter.
Substitution of powers	20912. The board of supervisors shall act in place of the board, and the clerk of the board of supervisors shall act in place of the secretary.
Officers to be elected	20913. At the formation election the elective officers of the district shall be elected, but only one person shall be elected to fill the offices consolidated, if any.
Form of proposition on ballot	20914. On the ballots provided for the formation election shall be printed a proposition substantially as follows: "Shall the proposed-----Irrigation District be formed?" followed by the words "Yes" and "No" with inclosed voting spaces thereafter.
Canvass of votes	20915. The board of supervisors shall meet on the second Monday following the formation election to canvass the votes cast, and only if upon the canvass it appears that a majority of all the votes cast at the formation election are "Irrigation District—Yes" shall the board canvass the votes for the candidates for the district offices and declare the persons receiving respectively the highest number of votes to be elected.

20916. No informalities in the conduct of the formation election or in any related matters shall invalidate the election or the result if notice was given substantially as provided and the election was fairly conducted. Substantial compliance

Article 3. Contest of Election

20930. The formation election may be contested by any person owning property liable to assessment within the proposed district. Election contests

20931. No contest shall be brought more than 20 days after the canvass of the vote of the election by the board of supervisors. Time limit

20932. The directors elected at the formation election shall be parties defendant in an election contest. Parties defendant

20933. The election contest shall be brought in the superior court of the county where the formation proceedings were had. Jurisdiction of court

20934. If more than one contest is pending, they shall be consolidated and tried together. Consolidation of pending contests

20935. The court shall speedily try the election contest. Speedy trial

20936. The determination of the election contest shall be based on whether or not the election was conducted fairly and in substantial compliance with the requirements of this chapter. Judgment shall be entered accordingly. Basis of determination

20937. An appeal may be taken by any party to an election contest within 30 days from entry of judgment. Appeal

20938. The appeal shall be heard and determined within 60 days from the time of filing the notice of appeal. Same Hearing and determination

CHAPTER 4. ESTABLISHMENT OF DISTRICT

20960. If upon the canvass of the formation election it appears that a majority of all the votes cast are "Irrigation District—Yes," the board of supervisors shall by an order entered on its minutes declare the territory formed as a district under the name designated for it. Majority vote
Order

20961. The board of supervisors shall immediately file for record in the office of the county recorder of each affected county a certified copy of the order declaring the district formed and shall also immediately forward a copy to the clerk of the board of supervisors of each affected county. Filing copies of order

20962. From the filing for record of the order declaring the district formed the formation of the district is complete. Formation completed

20963. The board of supervisors of any county in which any land embraced in a district is situated shall not after its formation allow another district to be formed including any portion of the same land without the consent of the board of the district in which the land is situated. Prohibition

CHAPTER 5. CHANGE OF NAME

20980. Whenever any district has been formed under the same name as that of another district previously formed, the Change by last formed district

board of the last formed district shall by a resolution spread on its minutes change the name of the district.

Recording
resolution

20981. Certified copies of the resolution changing the name of the district shall be recorded in the office of the county recorder in each affected county and sent to the State Engineer and to the commission.

PART 3. INTERNAL ORGANIZATION

CHAPTER 1. OFFICERS

Article 1. Qualification and Tenure

Directors

21100. Each director shall, except as otherwise provided in this division, be a voter and a freeholder of the district and a resident of the division which he represents.

Elective
officers

21101. Elective officers, irrespective of the method of their selection, take office as soon as they qualify, except that officers elected at a general election take office at noon on the regular monthly meeting day of the board in March next following their election.

Same: Taking
and filing
official oath

21102. Within 20 days after receiving his certificate of election, or being appointed, each elective officer shall take and subscribe the official oath and file it in the office of the district and execute the bond required of him.

Staggered
tenure of
directors

21103. The directors elected at the formation election shall at their first meeting classify themselves by lot into two classes as nearly equal in number as possible. The term of office of the class having the lesser number shall expire at noon on the regular monthly meeting day of the board in March of the first odd-numbered year thereafter. The term of office of the class having the greater number shall expire at noon on the regular monthly meeting day of the board in March of the second odd-numbered year after the year in which the first meeting was held.

Tenure of
elective
officers

21104. The term of office of each elective officer subsequent to the officers elected at the formation election is four years.

Assessor,
collector and
treasurer

21105. The terms of office of the assessor, collector, and treasurer elected at the formation election expire at the same time as the terms of the original directors of the class having the greater number.

Continuation
in office

21106. Each elective officer shall hold office until his successor qualifies.

Article 2. Consolidation and Segregation

Consoli-
dation

21120. A board may consolidate any two or more of the offices of assessor, collector, and treasurer.

Order of con-
solidation

21121. The order of consolidation shall be made at least 30 days prior to a general election and shall take effect at the next succeeding election.

Segregation
of consoli-
dated offices

21122. A board may at least 30 days before a general election segregate consolidated offices, and each office so segregated shall be filled at the election.

Article 3. Official Bonds

21140. Each director shall execute a bond in the sum of five thousand dollars (\$5,000). Directors' bonds

21141. When not otherwise provided by the board the bonds to be given by the following officers shall be in the following sums: Officers' bonds

- (a) Assessor: Five thousand dollars (\$5,000).
- (b) Collector: Twenty thousand dollars (\$20,000).
- (c) Treasurer: One hundred thousand dollars (\$100,000).

21142. The board may fix the bonds to be given by the following officers and persons to suit the conditions of the district within the following sums: Other officers and persons

- (a) Treasurer: Five thousand dollars (\$5,000) to one hundred thousand dollars (\$100,000).
- (b) Collector: Five thousand dollars (\$5,000) to twenty thousand dollars (\$20,000).
- (c) Secretary: Any sum.
- (d) Custodian of a special fund: Any sum.

21143. All bonds shall be in the form prescribed for the official bonds of county officers, and the premiums may be paid by the district. Form and premiums

21144. Bonds of directors shall be approved by a judge of the superior court of the county where the district's formation was effected, recorded in the office of the county recorder of the same county, and filed with the secretary. Approval and recordation of directors' bonds

21145. All bonds other than bonds of directors shall be approved by the board. Approval of other bonds

21146. Each officer herein named shall be liable upon his bond for his wilful violation of any express duty. Liability

21147. If any district is appointed fiscal agent of or by the United States in connection with any Federal reclamation project, each officer shall execute an additional bond, in the sum required by the Secretary of the Interior, conditioned for the faithful discharge of the duties of his office and the faithful discharge by the district of its duties under the appointment; and the bond may be sued upon by the United States or any person injured by the failure of the officer or the district to perform promptly and completely his or its respective duties. Additional bond to United States

Article 4. Compensation

21165. The board shall fix the compensation to be paid to all officers. Fixing compensation

21166. A director for sitting on the board or acting under its orders shall receive not exceeding: Director per diem, traveling expense, and other expenses

(a) Eight dollars (\$8.00) per day except in districts containing over 500,000 acres.

(b) Ten cents (\$0.10) per mile for each mile actually traveled between his place of residence and the district office.

(c) Actual and necessary expenses when acting under the orders of the board.

Submission of salary schedule to voters

21167. The board shall upon the petition of 50 or more freeholders within the district, submit to the voters at any general election a schedule of salaries and fees to be paid to officers. The petition shall be presented to the board not less than 20 nor more than 40 days prior to a general election. The result of the election shall be determined and declared in all respects as general elections are determined and declared.

Article 5. Deputies

Duties of board

21185. The board shall:

- (a) Employ agents, officers, and employees as required.
- (b) Prescribe their duties and fix their salaries.

Further duties

21186. The board shall:

- (a) Approve and reject as to number deputies of elective and appointive officers.
- (b) Remove any deputies for good cause or for lack of work or funds.
- (c) Fix and alter the salaries of all deputies.

Treasurer's and collector's deputies

21187. The treasurer and collector may appoint as many deputies within the number allowed by the board as may be necessary for the discharge of the duties of their offices, the deputies to hold office at the pleasure of the appointing officer and subject to the powers of the board. Appointments shall be in writing and filed in the office of the district. These deputies shall take and file an oath in the manner required of their principals before assuming the duties of office.

Assessor's deputies

21188. The board shall allow the assessor as many deputies, to be appointed by him, as will in the judgment of the board enable him to complete the assessment between the first Monday in March and the first Monday in August each year. The compensation fixed by the board shall not exceed five dollars (\$5.00) per day for each deputy for the time actually engaged, nor shall any allowance be made but for work performed between the first Monday in March and the first Monday in August.

Compensation

Article 6. Misconduct

Personal interest in official contracts

21195. No officer named in this division shall in any manner be interested in any contract awarded or to be awarded by the board or in the profits to be derived therefrom. For any violation the officer is guilty of a misdemeanor. Conviction shall work a forfeiture of his office, and he shall be punished by a fine not exceeding five hundred dollars (\$500) or by imprisonment in the county jail not exceeding six months or both.

Penalties for violation

Violation of express duty

21196. For any wilful violation of any express duty herein provided for by any officer herein named he shall be subject to removal from office by proceedings brought in the superior court of the office county by any assessment payer of the district.

CHAPTER 2. SELECTING OFFICERS IN CERTAIN CASES

Article 1. Appointments to Fill Vacancies

21265. The board of supervisors of the office county shall fill by appointment vacancies in the offices of directors. Vacancy Office of director

21266. A board shall fill by appointment vacancies in the offices of assessor, collector, and treasurer. If the board fails to make an appointment within 40 days, the board of supervisors of the office county shall make the appointment. Assessor, collector, and treasurer

21267. An appointment to fill a vacancy pursuant to this article shall be for the unexpired term of the office in which the vacancy exists. Term of appointment

Article 2. Appointments in Default of Election

21285. A petition containing all of the following may be presented to the board of supervisors of the principal county: Appointment in district with small population

- (a) A showing that not more than twenty-five owners of land are residents and electors in the district.
- (b) A showing that no general election was held on the last date on which it should have been held and that no special election was held in its place.
- (c) Verification of the showings.
- (d) Prayer that the board of supervisors appoint directors.
- (e) Signatures of the owners of more than one-half of the land.

(Amended by Stats. 1943, Ch. 945.)

[ORIGINAL SECTION]

21285. A petition containing all of the following may be presented to the board of supervisors of the principal county :

- (a) A showing that not more than five owners of land are residents and electors in the district.
- (b) A showing that no general election was held on the last date on which it should have been held and that no special election was held in its place.
- (c) Verification of the showings.
- (d) Prayer that the board of supervisors appoint directors.
- (e) Signatures of the owners of more than one-half of the land.

21286. The board of supervisors shall set a date for the hearing of the petition and shall give notice of the hearing by publication in at least two issues of a newspaper published in the principal county. Date of hearing and notice by publication

21287. The date of the hearing shall be not less than 10 nor more than 30 days from the presentation of the petition. Date limitations

21288. At the hearing, if the facts alleged in the petition are established to the satisfaction of the board of supervisors, it shall so find by resolution. Establishment of facts by resolution

21289. Upon the adoption of the resolution the board of supervisors shall appoint for the district three directors, each of whom shall be an owner of land within the district but need not be a resident of the district. Appointment of directors

21290. The directors so appointed shall take office as soon as they qualify and shall hold office for a period of four years and thereafter until their successors are elected or appointed and qualify. Term

Director constitute board
Treasurer, collector and assessor

21291. The directors so appointed shall constitute the board of the district.

21292. Upon its organization as a board the board so constituted shall fill by appointment the offices of treasurer, collector, and assessor, and none of the persons so appointed need be residents or landowners within the district.

Article 3. Appointments When Land Tax Deeded

Appointments When land tax deeded

21310. The commission may file a report with the board of supervisors of a principal county informing the board that:

(a) Not less than 90 per cent of the land in the district is deeded for delinquent taxes or assessments to either the State or the district or both.

(b) No election of directors of the district has been held for a period of more than four years next preceding the filing of the report.

(c) In the opinion of the commission the interests of the public will best be served by the appointment of directors pursuant to this article.

Date of hearing and notice by publication

21311. Upon receipt of the report the board of supervisors shall set a date for a hearing on the report and shall promptly give notice by publication in at least two issues of a newspaper published in the principal county of the time and place at which the hearing will be held.

Date limitations

21312. The date of the hearing shall be not less than 10 nor more than 30 days from the first publication of the notice.

Appointment of directors

21313. If at the hearing it appears to the satisfaction of the board of supervisors that not less than 90 per cent of the land is deeded for delinquent taxes or assessments to either the State or the district or both and that no election of directors has been held for more than four years next preceding, the board of supervisors may appoint for the district three directors.

Directors' qualifications

21314. The directors so appointed need not be residents or landowners in the district, but each shall be a resident landowner of a county supervisorial district in which all or a portion of the land in the district is situated.

Tenure

21315. The directors so appointed shall take office as soon as they qualify and shall hold office for a period of four years and thereafter until their successors are elected or appointed and qualify.

Directors constitute board

21316. The directors so appointed shall constitute the board of the district.

Treasurer, collector, and assessor

21317. Upon its organization as a board the board so constituted shall fill by appointment the offices of treasurer, collector, and assessor, and none of the persons so appointed need be residents or landowners within the district.

Article 4. Return to Elective Method

Petition for election

21335. Not more than 60 nor less than 30 days before the first Wednesday in February of any odd numbered year a majority of the electors in a district then having directors

appointed pursuant to Articles 2 or 3 of this chapter may petition the board of the district that an election be held.

21336. The petition shall show all of the following:

Facts to be shown

(a) There are persons who could qualify under Section 21100 as directors representing each division in the district.

(b) There are more than twenty-five owners of land in the district who are residents and electors thereof.

(c) There are sufficient electors in the district to conduct an election.

(Amended by Stats. 1943, Ch. 945.)

[ORIGINAL SECTION]

21336. The petition shall show all of the following:

(a) There are persons who could qualify under Section 21100 as directors representing each division in the district.

(b) There are more than five owners of land in the district who are residents and electors thereof.

(c) There are sufficient electors in the district to conduct an election.

21337. If the board finds the facts alleged in the petition are true, it shall order that a general election be held, at which election a director for each division and all other elective officers shall be elected.

Order for general election

21338. The directors elected shall at their first meeting classify themselves into two groups in the same manner and with the same effect as is provided as to directors elected at a formation election.

Staggered tenure of directors

CHAPTER 3. THE BOARD

21375. On the first Tuesday after the original directors qualify and on the day on which the board holds its regular monthly meeting in March of each year in which a general election is held the directors shall meet and organize as a board and may transact any other business of the district.

Organization meetings

21376. At its organization meeting the board shall elect a president from its members and appoint a secretary, who shall each hold office during the pleasure of the board.

Election and appointment of officers

21377. The board shall hold a regular meeting on the first Tuesday of each month at the district office.

Time and place of regular meetings

21378. The board, however, may by resolution entered upon its minutes fix any day of the month for its regular monthly meeting. The change shall not be effective until the resolution proposing it has been published once a week for two successive weeks in a newspaper published in the office county.

Same Change by resolution

21379. Special meetings of the board may be held when required for the proper transaction of the business of the district and shall be ordered by a majority of the directors.

Special meetings

21380. The order for a special meeting shall be entered of record, and the secretary shall give five days' notice of the order to each director not joining in the order.

Same Order and notice

21381. The order for a special meeting shall specify the business to be transacted, and no other business shall be transacted at the special meeting unless all the members of the board are present and consent.

Limitation on purpose

Public
meetings
quorum

21382. All meetings of the board shall be public.

21383. The number of directors required to constitute a quorum of the board and to concur on all questions except a motion to adjourn or a motion to adjourn to a stated time is three except in districts where there are only three offices of director, in which case the required number is two.

Daily
adjourn-
ments
Power of
board

21384. A smaller number of directors than a quorum may adjourn from day to day.

21385. The board except as otherwise specifically provided has the power and it shall be its duty to manage and conduct the business and affairs of the district.

CHAPTER 4. DISTRICT OFFICE

Place
of office

21400. The office of each district shall be established and kept at a fixed place, determined by its board, which place need not be within the district.

Time open
to public

21401. The board shall fix the time during which the office of the district shall be open to the public.

Records
open to
public
inspection

21402. All records of the district shall be open to public inspection during the hours when the office of the district is open to the public.

Seal

21403. The board shall adopt a seal for the district.

PART 4. ELECTIONS

CHAPTER 1. DIVISIONS AND PRECINCTS

Article 1. Divisions and Methods of Electing Directors

Number of
divisions

21550. Each district shall contain five divisions unless otherwise provided by the more recent of:

- (a) The order on final hearing on the formation petition.
- (b) An order made pursuant to this article.
- (c) An order made pursuant to Article 2 of this chapter.

When
directors
elected by
divisions

21551. Directors shall be elected by the division each represents unless otherwise provided by the more recent of:

- (a) The order on final hearing on the formation petition.
- (b) An order made pursuant to this article.
- (c) An order made pursuant to Article 2 of this chapter.

Changes in
number and
methods

21552. As provided in this article the number of divisions may be changed to three or five or the method of electing directors may be changed to election by the district at large or by divisions, or both changes may be made simultaneously.

Changes by
petition

21553. The board shall order a change in the number of divisions or the method of electing directors or both if a petition therefor, signed by a majority of the holders of title to all of the land who are also the holders of title to a majority in value of the land, is filed in the district office at least 70 days before a general election.

Submission
of proposal
for change
at general
election

21554. The board shall submit at a general election a proposal for a change in the number of divisions or the method of electing directors or both when either:

(a) At least 70 days before the election a petition for the submission of a proposal therefor set forth in the petition,

signed by at least 500 holders of title to land who are also the holders of title to at least 20 per cent in value of all of the land, is filed in the district office.

(b) At least 50 days before the election the board adopts a resolution for the submission of a proposal therefor set forth in the resolution.

21555. In submitting a proposal at an election the notice of election shall contain a statement of the change or changes proposed. Statement in notice of election

21556. Each proposal shall be stated on the ballot, and the method of voting on it shall be as nearly as practicable in conformity with the provisions relating to bond elections. Method of voting

21557. If a proposal receives the approval of a majority of the voters voting on it in the district and also of a majority of the voters voting on it in each of a majority of the divisions, the board shall order the change or changes in accordance with the proposal. Majority approval of change

21558. If an order made pursuant to this article changes the method of electing directors, all directors thereafter elected in the district shall be elected as provided in the order. Change in method of electing directors

21559. If an order made pursuant to this article changes the number of divisions, the board shall forthwith redivide the district into the number of divisions specified in the order. Change in number of divisions

21560. If an order made pursuant to this article changes the number of divisions, the terms of office of all directors shall expire on the regular meeting day of the board in March following the next general election after the order, and the directors elected at that election shall be equal in number to the number of divisions as changed and these directors shall at their first meeting classify themselves and determine the length of their respective terms in the manner provided as to directors elected at a formation election. Same Number of new directors, staggered terms

Article 2. Abolition and Reestablishment of Divisions

21575. Any district having less than 2,500 acres within its boundaries, having less than 25 electors residing within it, and having only three divisions may abolish the divisions in it pursuant to this article. Abolition of divisions

21576. The board of the district may petition the board of supervisors of the principal county for an order by the board of supervisors abolishing the divisions in the district. Petition to abolish

21577. The board of supervisors shall thereupon find whether or not there are less than 2,500 acres in the district, less than 25 electors residing in it, and only three divisions in it. Existence of conditions

21578. If the board of supervisors finds as to all of such matters in the affirmative, it may order that there shall be no divisions in the district. Affirmative findings Divisions abolished

21579. Upon the making of the order, there shall be no divisions in the district, the directors of the district need only be voters and freeholders in the district, and the directors of

the district shall be elected, and appointed to fill vacancies, at large from the whole district.

Number of directors 21580. From the adoption of the order the district shall have three directors, and the offices of the directors shall have the numbers formerly identifying the division represented by each director, or if none, last incumbent director, and candidates for election for director shall be nominated and elected for a particular office.

No change in term 21581. The making of the order does not change any term of office.

Petition to establish divisions 21582. At least 60 days before any general election a majority of the electors in the district having no divisions may file in the district office a petition signed by them requesting the board to establish divisions.

Showing required 21583. The petition shall contain a showing that it is expedient to divide the district into three divisions as nearly equal in area and population as may be practicable and to elect the directors of the district therefrom.

Investigation by board 21584. The board may independently investigate whether or not the facts are consistent with the showing made in the petition and shall hear any evidence produced to sustain or disprove the showing.

Period for determining petition 21585. Within 30 days after the filing of the petition the board shall find whether or not it is expedient to divide the district into three divisions as nearly equal in area and population as may be practicable and to elect the directors of the district therefrom.

Affirmative finding Order 21586. If the board finds in the affirmative, it shall forthwith order the establishment of divisions in the district and divide the district into three divisions as nearly equal in area and population as may be practicable.

Election of directors 21587. At the general election next following the making of the order directors shall be elected at large in the district, one director to represent each division.

Staggered terms of office 21588. The directors so elected shall at their first meeting classify themselves into two groups in the same manner and with the same effect as provided as to directors elected at a formation election, except that the classification shall not affect the term of any offices other than those held by the directors.

Article 3. Division and Precinct Boundaries

Changes 21605. When it deems it advisable for the best interests of the district and the convenience of its voters, the board may, not less than 60 days before an election, change the boundaries of the divisions or election precincts or both. The changes shall be made to keep the divisions as nearly equal in area and population as may be practicable. The changes shall be shown on the minutes of the board.

Reestablishment of boundaries and precincts 21606. When land is excluded from a district after its formation, if the board deems it desirable, but not less than 30 days before an election in the district, it may re-establish

the boundaries of the divisions and election precincts within the district.

21607. When land is included within a district after its formation, its board shall, not less than 30 days before any election in the district, re-establish the boundaries of the divisions and election precincts within the district so as to include the included land therein and so as to make the divisions as nearly equal in size and population as may be practicable.

Inclusion
of after-
acquired land

21608. When land is included within a district after its formation and less than 30 days before an election, the voters in the area included shall not be entitled to vote at the election.

Limitation
on voting

CHAPTER 2. GENERAL ELECTIONS

Article I. Preliminary Procedure and Nominations

21650. A general election shall be held in each district on the first Wednesday in February in each odd-numbered year to choose a successor for each elective officer the term of whose office will expire in the following March.

General
elections

21651. If any offices have been consolidated, only one person shall be elected to fill the consolidated offices.

Consolidated
offices

21652. Prior to the time for giving notice of an election, the board shall by order:

(a) Appoint for each precinct from its electors one inspector, two judges, and two clerks, or one inspector, one judge, and one clerk, who shall in either case constitute a precinct board for the precinct.

Duties prior
to giving
notice

(b) Designate the place within each precinct for its polls.

21653. The board may prior to giving the notice of election fix the hours for the opening and closing of the polls, but the polls shall be kept open for not less than six consecutive hours between 6 a.m. and 7 p.m.

Same Fixing
opening and
closing
of polls

21654. Not less than 30 nor more than 40 days before a general election the secretary shall commence to publish notice once a week for two successive weeks in a newspaper of general circulation published in the district, or if no newspaper of general circulation is published in the district, shall post notices in three public places in each election precinct, of the day, hours, and polling places in each precinct for holding the election.

Publication
or posting
of notice of
election

21655. In either case the secretary shall post the notice in the district office.

Posting in
district office

21656. The ballot and all other supplies used at elections shall be provided by the board.

Ballot and
supplies

21657. The ballots shall have printed on them the names of all candidates properly nominated and a voting square after each name. The names shall be arranged alphabetically under the designation of the office for which each person named is a candidate.

Contents of
ballots

21658. Not less than 15 days before the election a petition signed by 10 or more electors may be filed at the district office requesting that the names of persons specified in the petition be placed on the ballot as candidates for the offices specified.

Petition for
additional
candidates

- Names on ballots, write-ins 21659. Only names of persons properly nominated shall be printed on the ballots, but a blank space shall be left after the names of the candidates for each office, in which voters may write another name if they desire.
- Preservation of nominating petitions 21660. All nominating petitions shall be preserved by the secretary in the district office.

Article 2. Conduct at Precincts

- No board or absent member 21675. If the board fails to appoint a precinct board or the members appointed are not present when the polls open on the day of election, a majority of the electors of the precinct present at that hour, including members of the precinct board, may appoint the precinct board or supply the place of an absent member.
- Inspector is chairman 21676. The inspector is chairman of the precinct board.
- Substitute judge or clerk 21677. If during the election any judge or clerk ceases to act the inspector may appoint a substitute.
- Substitute inspector 21678. If the inspector ceases to act, a majority of the remaining members of the precinct board may appoint a substitute.
- Administering oaths 21679. Any member of a precinct board may administer and certify oaths required to be administered during an election.
- Oath by members 21680. Before opening the polls each member of the precinct board shall take and subscribe an oath to perform faithfully his duties. Any elector of the precinct may administer and certify the oath.
- Polls shall be open 21681. The polls shall be open only during the following hours:
 (a) During the hours fixed by the board pursuant to Section 21653.
 (b) If not fixed by the board, from 6 a.m. until 7 p.m.
- Voting permitted 21682. Voting may commence as soon as the polls are open and may continue during all the time the polls remain open.
- Conduct and canvass Stats 1939, p 49 21683. Voting shall be conducted and the canvass at the polls made, except as otherwise provided, as nearly as practicable in accordance with the provisions of the Elections Code pertaining to general elections.
21684. Only voters shall be entitled to vote at district elections.
- One ballot 21685. A clerk of election shall deliver to each voter one ballot.
- Method of marking 21686. With the rubber stamp provided, each voter shall stamp a cross in the square after the name of each candidate for whom he wishes to vote.
- Certificate of votes for each candidate 21687. In each precinct as soon as all the votes are counted, a certificate shall be drawn up on or attached to at least one of the tally lists, designating for each office voted on the number of votes each candidate for the office has received.
- Same Signature 21688. The certificate shall be signed by each member of the precinct board.

21689. During the counting thereof the voted ballots shall be strung upon a cord or thread by the inspector in the order in which they are entered upon the tally lists by the clerks. Voted ballots to be strung

21690. The voted ballots shall then be sealed in an envelope by the inspector in the presence of the judge and clerk. Sealed in envelope

21691. The envelope, certificate with the roster of voters, tally lists, and the marked copy of index to voters if it is used shall be: Further duties

(a) Sealed in an envelope by the inspector in the presence of the judge and clerk.

(b) Indorsed "Election returns of (naming the precinct) precinct."

(c) Directed to the secretary.

(d) Immediately delivered by the inspector or by a responsible carrier designated by him, to the secretary.

Article 3. Canvass

21705. The envelopes containing the ballots shall except for the purposes of a recount be kept unopened for at least six months from the day of the election. Preservation of envelopes

21706. If any voter by affidavit filed with the board shows facts sufficient reasonably to justify the belief that the vote of any precinct has not been correctly counted to the extent that a recount would change the result of the election, he may appear on the day appointed for the board to open and canvass the returns and demand a recount of the vote of the precinct that is claimed to have been incorrectly counted. Request for recount

21707. The board shall meet at the district office on the first Monday after each election to canvass the returns. If the returns from each precinct have been received, the board shall canvass the return. If the returns from all of the precincts have not been received, the canvass shall be postponed from day to day until all of the returns have been received or until six postponements have been had. Canvass

21708. The canvass shall be made in public and by opening the returns and determining the vote of the district for each person voted for and declaring the result thereof. Character and method of canvass

21709. No roster, tally list, or certificate returned from any election shall be set aside or rejected for want of form if it can be satisfactorily understood. Condition of records

21710. As soon as the result is declared, the secretary shall enter in the records of the district a statement of the result, which statement shall show: Statement of result Contents

(a) The whole number of ballots cast in the district and when directors are elected by divisions, the whole number of ballots cast in each division.

(b) The name of each candidate voted for and the office to fill which he was voted for.

(c) The number of votes cast in each precinct for each candidate.

(d) When directors are elected by divisions the number of votes cast in each division for each candidate for the office of director from that division.

(e) The number of votes cast in the district for each candidate for the offices of assessor, collector, and treasurer, and, when directors are elected at large of director.

Declaration of election

21711. The board shall declare elected to each office the candidate receiving the highest number of votes for that office.

Certificate of election

21712. The secretary shall immediately make and deliver to each person elected a certificate of election signed by the secretary and authenticated with the seal of the district.

Informalities in conduct

21713. No informalities in the conduct of the election or any matters related to it, including the form of ballot used, shall invalidate the election if fairly conducted.

Article 4. Special Elections for Officers

When general election not held

21725. If a general election is not held as required, upon the filing with the secretary of a petition signed by 10 per cent of the voters requesting that a special election be called for the election of officers, the board shall call a special election for the election of officers to offices which should have been filled at a general election or the terms of whose incumbents have expired.

Time of election

21726. The election shall be held not less than 15 nor more than 30 days after the filing of the petition.

Term of officers elected

21727. The term of each officer elected at a special election is the unexpired term in the office to which he is elected.

CHAPTER 3. RECALL ELECTIONS

Article 1. Petition for Recall

Recall

21800. Any elective officer may be recalled.

Limitations

21801. A petition shall not be filed to recall any officer if either:

(a) He has not held office for six months.

(b) A recall election has been determined in his favor within six months.

Petition

21802. In order to recall an officer a petition shall be filed with the secretary containing all of the following:

(a) Request that an election be called to elect a successor to the officer.

(b) A statement solely for the information of the electors of the grounds on which the recall is sought, any insufficiency in the statement not to affect the sufficiency of this petition.

(c) Signatures of voters in the unit by which the officer or his elected predecessor was elected, at least equal in number to 25 per cent of the votes at the next preceding general election for the office to which the officer or his elected predecessor was elected, cast respectively for:

(1) The candidate receiving the greatest number of votes if the officer was elected by the district at large.

(2) All the candidates if the officer was elected by a division.

(d) The date of each signature, the signer's precinct, his place of residence, giving street and number, and if no street or number exists, then a designation of his place of residence which will enable the location to be readily ascertained, all of which shall be affixed by the signer at the time of his signing.

21803. The petition may consist of any number of separate instruments, which shall be duplicates except as to signatures and matters required to be affixed by signers.

Form Requirements

21804. To each duplicate recall petition shall be attached an affidavit of an elector of the district sworn to before an officer competent to administer oaths stating all of the following:

Affidavit of elector

(a) Affiant circulated that copy and saw the appended signatures being written.

(b) According to the best information and belief of the affiant each is the genuine signature of the person whose name purports to be subscribed and of a voter of the district.

21805. One petition is sufficient to propose the recall and election of several elective officials.

Several recalls in one petition

21806. Within 10 days from the filing of a recall petition the secretary shall ascertain from the records of registration whether or not the petition is signed by the requisite number of voters and shall attach to the petition his certificate showing the result of the examination.

Sufficiency to be ascertained

21807. If the certificate of the secretary shows the recall petition to be insufficient, it may be supplemented within 10 days from the date of the certificate by the filing of additional recall instruments, duplicates of the petition filed except as to signatures and matters required to be affixed by signers.

Insufficient Supplemental recall instruments

21808. The secretary shall within 10 days after the supplemental copies are filed make a certificate showing whether or not the petition as supplemented is sufficient.

Ascertainment of sufficiency

21809. If the certificate shows that the petition as supplemented is insufficient, no action shall be taken on it; but the petition shall remain on file as a public record, and the insufficiency shall not bar the filing of a new petition.

Insufficient. Public record New petition

21810. If the certificate of the secretary to the recall petition shows it to be sufficient, the secretary shall submit the petition to the board without delay.

Submission to board if sufficient

Article 2. Calling and Conduct

21825. Upon receiving a recall petition certified as sufficient the board shall forthwith order an election to determine whether or not the voters will recall the officer named in the petition.

Order for election

21826. The election shall be held not less than 35 nor more than 40 days after the making of the order.

Time of recall election

21827. If a general election is to be held not less than 35 nor more than 60 days from the making of the order calling a recall election, the board may submit the recall proposal and candidates at the general election.

Submission at general election

Recall and election together	21828. One election is sufficient for the recall and election of several officials.
Vacancy pending recall	21829. If a vacancy occurs in an office after a recall petition is filed against the vacating officer, the recall election shall nevertheless proceed.
Manner of nominations	21830. Nominations for candidates for any office to be filled at a recall election shall be made in the manner prescribed for nominations for candidates at general elections.
Requisite data on ballots	21831. The following shall appear on recall ballots for each recall petitioned: <p>(a) "Shall (name of person whose recall is being voted on) be recalled from the office of (title of the office)?"</p> <p>(b) To the right of the foregoing question, "Yes" and "No" on separate lines with an inclosed blank space to the right of each.</p> <p>(c) Names of the candidates nominated for the particular office, which shall not include the name of the incumbent officer.</p>
Marking ballot	21832. A voter shall indicate, by stamping a cross (+) in the blank space opposite either "Yes" or "No" his vote respectively for or against the recall proposal.
Voting on recall and election	21833. No vote shall be counted for any candidate for an office if the recall proposal for that office on the particular ballot was not voted upon.
Manner of conduct, canvass, etc.	21834. A recall election shall be conducted, canvassed, and the result declared in substantially the manner provided for a general election.

Article 3. Effect of Recall

Continuation in office	21850. If one-half or more of the votes on a recall proposal are "No," the incumbent shall continue in office.
Majority vote recalls	21851. If a majority of the votes on a recall proposal are "Yes," the incumbent shall be removed from office by the qualification of his successor.
Candidate elected and term	21852. If at a recall election an officer is recalled, the candidate receiving the highest number of votes for the office shall be declared elected for the unexpired term of the recalled officer.
Failure to qualify	21853. If the candidate who received the highest number of votes fails to qualify within 10 days after receiving his certificate of election, the office to which he was elected shall be vacant.

CHAPTER 4. BOND ELECTIONS

Order for bond election	21925. After an order determining the amount of bonds which should be issued, the board shall call a bond election to submit to the voters a proposal of whether or not bonds in the amount determined in the order should be authorized when either: <p>(a) The board so determines.</p>
-------------------------	---

(b) The board receives a petition requesting the election signed by either:

(1) A majority in number of the holders of title to land who are also the holders of title to a majority in value of all of the land.

(2) Five hundred or more persons, each of whom is either an elector or a holder of title to land and which petitioners include the holders of title to not less than 20 per cent in value of all of the land.

21926. Notice of a bond election shall be given by both: Notice

(a) Posting notices in three public places in each election precinct in the district for at least 20 days.

(b) Publication of the notice, in some newspaper published in the office county, once a week for at least three successive weeks.

21927. Notice of a bond election shall specify: Specifications in notice

(a) The day, hours, and polling places in each precinct for holding the election.

(b) The amount of bonds proposed to be issued.

21928. At a bond election several proposals as to the issuance of bonds may be submitted separately on the same ballot if: Several proposals on same ballot

(a) Estimates of the cost of the respective projects have been made.

(b) The commission has reported thereon.

(c) The respective proposals have been stated in the notices of the election.

21929. The ballots shall contain a general statement of the proposals to be voted on, including the amount of bonds proposed to be issued for each purpose, but no informality in the statement shall vitiate the election. Each proposal shall be followed by the words "Yes" and "No" on separate lines with a small inclosed space after each of the two words. Contents of ballots

21930. On bond election ballots there shall be printed under the heading "Instructions to voters": "To vote for a proposal, stamp a cross (+) in the voting space after the word 'Yes' following the proposal. To vote against a proposal, stamp a cross (+) in the voting space after the word 'No' following the proposal." Same instructions to voters

21931. The voters shall vote for or against any proposal at a bond election by stamping a cross (+) in the voting space after the word "Yes" or "No" respectively. Marking ballots

21932. Bond elections shall be held and the result determined and declared as nearly as practicable in conformity with general elections. Conduct

21933. The issuance of bonds is authorized when at a bond election either: Result:

(a) Two-thirds of the votes cast on the proposal are "Yes." Author-ization

(b) A majority of the votes cast on the proposal are "Yes" when the election was called pursuant to a petition sufficient to require it to be called.

Same No: 21934. If the number of votes for any bond proposal is
 authorize. less than the number required to authorize the issuance of the
 Resubmission bonds, the result of the vote shall be entered of record. The
 of proposal. proposal may be again submitted at a bond election upon the
 presentation to the board of a petition for the subsequent elec-
 tion signed as required for the calling of the previous election.

Informalities 21935. No informalities in the conduct of the election shall
 in conduct. invalidate the election if fairly conducted.

PART 5. POWERS AND PURPOSES

CHAPTER 1. POWERS AND PURPOSES GENERALLY

Article 1. Water

Beneficial 22075. A district may do any act necessary to furnish suffi-
 use. cient water in the district for any beneficial use.

Same 22076. A district may do any act in order to put to any
 beneficial use any water under its control.

Fire 22077. A district may deliver water for fire protection
 protection. purposes.

Article 2. Drainage

To provide 22095. A district may provide for any and all drainage
 irrigation. made necessary by the irrigation provided for by the district

Application 22096. All laws respecting irrigation by districts or
 of irrigation respecting districts shall also be so construed and enforced as
 laws. to apply to drainage.

Powers and 22097. The officers, agents, and employees of districts have
 duties the same powers, duties, and liabilities respecting drainage
 conferred. and construction, operation, and control relating to it as they
 have respecting irrigation.

Necessity 22098. Whenever it appears necessary to drain any land
 for drainage. within a district on account of the irrigation which has been
 done or which is intended to be done by the district under laws
 relating to it, whether for the purpose of more beneficially
 carrying on the irrigation or to protect the district from
 liability by reason of the irrigation, its board, if it is reasonable
 from an economic standpoint that the drainage be provided,
 shall provide for the drainage.

Land 22099. No drainage need be provided for land as to which
 excluded. the district is relieved from liability for seepage or flooding by
 reason of grant, waiver, prescription, statute, decree, or con-
 demnation.

Article 3. Electric Power

Powers of 22115. Any district heretofore or hereafter formed may
 district. purchase or lease electric power from any agency or entity,
 public or private, and may provide for the acquisition, opera-
 tion, leasing, and control of plants for the generation, trans-
 mission, distribution, sale, and lease of electric power, including
 sale to municipalities, public utility districts, or persons.

Applicable 22116. All provisions of the California Irrigation District
 provisions. Act, and of all acts amendatory thereof and supplemental
 Stats 1897, n 254

thereto, applying to irrigation shall, as codified in this division, also be so construed and enforced as to apply to electric power.

(Amended by Stats. 1943, Ch. 687.)

[ORIGINAL SECTION]

22116 All provisions of the California Irrigation District Act applying to irrigation shall, as codified in this division, also be so construed and enforced as to apply to electric power.

22117. The officers, agents, and employees of districts have the same powers, duties, and liabilities respecting electric power and the acquisition, operation, and control relating to it as they have respecting irrigation or districts.

Powers and
duties
conferred

22118. The board and the officers, agents, and employees of districts shall do all necessary and proper acts for the construction and operation of its electric power works.

Necessary
and proper
acts

22119. A district may distribute power without regard to any assessments levied by it.

Distribution
of electric
power

22120. A district may sell, dispose of, and distribute electric power for use outside of its boundaries.

Sale, etc.,
outside
boundaries

(Amended by Stats. 1943, Ch. 687.)

[ORIGINAL SECTION]

22120. A district may sell electric power for use outside of its boundaries.

22121. Subject to the conditions in this article a district may in the manner required by law make special appropriations of water for power purposes.

Special
appropriations
of
water

22122. Any use of water for generating electric power at any given time of the year which is in excess of the water appropriated and beneficially used for irrigation purposes by the district at that period of the year shall be subject to all prior existing appropriations by any municipal corporation which is proceeding in good faith in the expenditure of money and the construction of works designed to divert the water appropriated.

Priority of
existing
appropriations
of
municipality

Article 4. Airports and Aviation Schools

22140. This article applies only if all of the following are true:

Conditions
precedent

(a) None of the land proposed to be used for airport or aviation school purposes that may be outside of the district is more than seven miles from the nearest part of the boundaries of the district.

(b) The United States agrees to improve or contribute money for the improvement for airport or aviation school purposes or both of the land proposed to be used.

(c) The board finds that there is no other public agency able and willing to cooperate with the United States in the improvement for airport or aviation school purposes or both of the land proposed to be used.

22141. A district may acquire land by gift or otherwise, or use land already acquired, for an airport or aviation school or both and may improve the land for any of these purposes.

Acquisition
of land

- Cooperation with United States 22142. A district may sponsor any project undertaken by the United States for the improvement of land for airport or aviation school purposes or both.
- Restriction on incurring indebtedness 22143. No district shall ever issue any bonds to acquire or improve any land pursuant to this article, nor shall it incur any indebtedness therefor which can not be paid out of revenue to be derived from its airport or aviation school or the leasing thereof.
- Restriction on acceptance of United States funds 22144. A district may accept the appropriation of any funds by the United States for the improvement of the land for an airport or aviation school on any conditions imposed by the United States if the use of the airport for commercial purposes is not thereby precluded.
- Operation of airport, etc 22145. A district may operate an airport or aviation school or may lease either or both of them on terms its board deems proper.
- Same Acceptance of money or property 22146. Any district having acquired an airport or aviation school or both pursuant to the provisions of this article may accept contributions of money or property or both to be used in connection with the airport or aviation school or both.

CHAPTER 2. POWERS

Article 1. Powers Generally

- Performance of necessary acts 22225. Each district has the power generally to perform all acts necessary to carry out fully the provisions of this division.
- Construction of necessary works 22226. A district may construct the necessary works for the collection of water for the district.
- Storing water, etc. 22227. A district may acquire the right to store water in any reservoir or to carry water through any conduit not owned or controlled by the district and may grant to any owner or lessee of the right to the use of any water the right to store the water in any reservoir of the district or to carry the water through any conduit of the district.
- Contracts for exchange, etc., of water 22228. A district may contract to perform and perform any agreement with any number of persons or public corporations or agencies for the exchange, transfer, or delivery to or by either or both parties of any water right or water.
- Entry on any land 22229. A district may enter upon any land to make surveys and determine the location for its necessary works on any land which may be deemed best for their location.
- Necessary contracts 22230. A district may make and perform any necessary contracts to carry out the purposes of the district.
- Acquisition of equipment 22231. A district by contract may acquire and operate any needed or desirable equipment to put water under its control to any beneficial use.
- Expert in agriculture and other employees 22232. A district may employ an expert in agriculture and related matters and other employees as may be deemed necessary to do any of the following:
- (a) Supervise the construction of works for the irrigation or protection of land.

(b) Advise the owners of land or any persons engaged in farming the land of methods of increasing the productiveness of the land or as to any matters of husbandry.

(c) Conduct experiments as prescribed by the board.

(d) Perform duties for the general welfare of the people of the district as prescribed by the board.

Article 2. Water Distribution

22250. All water distributed by districts for irrigation purposes shall except when otherwise provided in this article be apportioned ratably to each landowner upon the basis of the ratio which the last assessment against his land for district purposes bears to the whole sum assessed in the district for district purposes.

Basis of apportionment

22251. Any landowner may assign for use within the district his right to the whole or any portion of the water apportioned to him pursuant to Section 22250.

Assignment of right

22252. When any charges for the use of water are fixed by a district the water for the use of which the charges have been fixed shall be distributed equitably as determined by the board among those offering to make the required payment.

Equitable distribution

22253. When a mutual water company has been formed to furnish water to certain specified land within a district, the district may contract for the delivery of water for the specified land through the mutual water company only.

Delivery through mutual water company

22254. If a district has contracted to deliver and is delivering water to a mutual water company for distribution to territory served by the latter, the water shall be apportioned on a basis found by the board to be equitable and for the best interests of all persons concerned.

Same Equitable apportionment

22255. When its board deems it in the best interests of the district, the district may regulate the amount of water to be used to irrigate crops within the district when seepage from the irrigation would damage adjacent land inside or outside of the district or may require as a condition precedent to the delivery of water the construction of adequate drainage facilities to prevent damage to the adjacent land.

Regulation of water for irrigation

Drainage facilities

22256. A district may refuse to furnish water to any or all land to which it holds title by virtue of collector's deeds to the district.

Refusal of water

22257. Each district shall establish equitable rules for the distribution and use of water, which shall be printed in convenient form for distribution in the district.

Printed rules

22258. A district required by law or provisions of agreements under which all or part of the water supply of the district was acquired to furnish water outside its boundaries to consumers whose rights to service were at the time the supply of water was acquired by the district enforceable by reason of their status as persons of the class for whose benefit the water was appropriated or dedicated may regulate the use of water so furnished.

Regulation of use outside boundaries

Lease or
sale of
surplus
waters

22259. If its board deems it to be for the best interests of the district, a district may enter into a contract for the lease or sale of any surplus water or use of surplus water not then necessary for use within the district, for use either within or without the district.

Same When
approval
required

22260. Any lease or contract provided for in Section 22259 entered into for a period of more than three years shall not be valid unless approved by the commission.

Sale of
water
rights
Rights not
acquired

22261. Nothing in this article authorizes the sale of any water right.

22262. No right in any water or water right owned by the district shall be acquired by use permitted under this article.

Diversion
of water

22263. Nothing contained in this division authorizes any person to divert the water of any stream or conduit from its channel to the detriment of any person having any interest in the stream, conduit, or the water therein, unless previous compensation be ascertained and paid.

Compensa-
tion

Article 3. Charges

Charges in
lieu of
assessments

22280. Any district may in lieu in whole or in part of levying assessments fix and collect charges for any service furnished by the district, including any or all of the following:

(a) Use, sale, or lease of water, which may include a stand-by charge whether the water is actually used or not.

(b) Delivery of water for irrigation in excess of a specified quantity per unit of land.

(c) Water and the service thereof required by law or provisions of agreements under which all or part of the water supply of the district was acquired to be furnished outside its boundaries to consumers whose rights to service were at the time the supply of water was acquired by the district enforceable by reason of their status as persons of the class for whose benefit the water was appropriated or dedicated.

(d) Use of water for power purposes.

(e) Sale of electric power.

Land subject
to higher
rates

22281. A district may charge higher rates for the service of water to any land that is not subject to assessment by the district than is charged other land in the district for similar service.

Payment in
advance

22282. Whenever any charges for any service provided for by this division have been fixed, they may be made payable in advance.

Rules

22283. A district may prescribe reasonable rules to carry out the provisions of this article.

Article 4. Bids

"Works"

22300. As used in this article "works" is limited to any works to be paid for with the proceeds of the sale of bonds or a limited assessment.

Provisions
governing
contracts

22301. Contracts for the construction of any works shall be made pursuant to the provisions of this article.

22302. The board shall give notice by publication once a week for three successive weeks in a newspaper published in the office county, or if no newspaper is published in that county, in a newspaper the board deems advisable, calling for bids for the construction of the works or of any portion of them.

Publication
of call for
bids

22303. The notice calling for bids shall contain:

Require-
ments of
notice

(a) A statement that the plans and specifications of the works to be constructed may be seen at the district office.

(b) A particular description of the portion of the works advertised if less than the whole works are advertised.

(c) A statement that the board will receive sealed bids for the construction of the works advertised or any portion of them designated by the board.

(d) A statement that the contract or contracts for the works advertised will be awarded to the lowest responsible bidder or bidders, but that any or all bids may be rejected.

(e) A statement of the time and place for opening the bids.

22304. At the time and place appointed the bids shall be opened in public.

Opening
in public

22305. After opening the bids and as convenient the board shall award the contract or contracts for the works either in portions or as a whole to the lowest responsible bidder or bidders, but the board may reject any or all bids and readvertise for proposals or may proceed to construct the works or any part thereof under its own superintendence.

Contract to
lowest
bidder

Rejection

22306. In case of emergency or urgent necessity for any works, the board by unanimous vote of those present at any meeting may award a contract for the works without advertising for bids when the cost of the works does not exceed five hundred dollars (\$500) and an additional amount equal to five cents (\$0.05) for each acre of land.

Conditions
for emer-
gency work
contracts

22307. Contracts for the purchase of material to be furnished or used by the district in the works shall be awarded to the lowest responsible bidder or bidders after such notice as the board deems proper.

Contracts
for purchase
of materials

22308. Any person to whom a contract may be awarded pursuant to this article shall provide a bond with good and sufficient sureties, approved by the board, payable to the district for at least 25 per cent of the estimated contract price, conditioned upon the faithful performance of the contract.

Surety bond
Liability

22309. The works shall be constructed under the direction and to the satisfaction of the engineer of the district and be subject to the approval of the board.

Approval of
works

Article 5. Supervision by Department

22335. During the construction of any works of a district to be paid for out of the proceeds of any bond issue which has been certified by the commission, the department shall have access to all plans, specifications, and records of the construction and shall from time to time make any investigations and

Access-
ibility to
plans, etc

reports to the board the department deems to be in the interest of the public or of the district.

Information
as to con-
struction

22336. During the construction of any work to be paid for out of the proceeds of the sale of any bonds of any district, the secretary shall within one week after each regular meeting of the board forward to the department copies of all reports made to the board as to the progress of the work and a statement of the amounts paid for any part of the work.

Papers to be
forwarded
by board

22337. The board immediately after the publication of the statement of the financial condition of the district each year shall send all of the following papers to the department, which shall examine them and report to the board any suggestions it deems proper:

(a) A copy of the financial statement.

(b) A report stating the general condition of any works constructed or acquired by the district.

(c) A statement of whether or not the plan of irrigation adopted by the district is being successfully carried out.

(d) A statement of any other matters which the board deems proper.

Examination
of affairs

22338. The department may at any time make an examination of the affairs of any district or call upon the authorities of the district for any information it desires and make any report thereon it deems advisable.

CHAPTER 3. PROPERTY

Article 1. Acquisition of Property

Purposes of
acquiring
property

22425. A district may acquire by any means any property or interest in property to carry out its purposes, including any of the following:

Property
included

(a) Property for the construction, improvement, and operation of works in this State or in any other State or in a foreign nation.

(b) Works being constructed.

(c) Stock of domestic or foreign corporations owning water, water rights, canals, waterworks, franchises, concessions, or rights.

(d) Works by which land has been or may be supplied with water for irrigation.

Subject to
encum-
brances

22426. Any property necessary for the purposes of the district may be acquired by the district and held subject to any liens, incumbrances, or obligations on it at the time of its acquisition.

Right to
flood
property

22427. If any road, railroad, canal, or other property subject or devoted to public use will become subject to flooding or other interference by reason of the construction or proposed construction of any works of a district, the district may acquire the right to flood or otherwise interfere with the property, whether or not it is publicly or privately owned.

Relocation
of property

22428. If by a judgment or agreement a district is required to relocate any road, railroad, canal, or other property subject or devoted to public use, the district may acquire all property

necessary to comply with the agreement or judgment and make conveyances of the relocated road, railroad, canal, or other property to comply with the agreement or judgment.

22429. The right is hereby granted to locate, construct, and maintain any of the works of a district on any land which is now or hereafter owned by the State.

Land
owned by
State

22430. There is given, dedicated, and set apart for the uses and purposes of each district all water and water rights belonging to this State within the district.

Water and
water rights
belonging
to State

22431. A district may construct any works across any watercourse, road, railway, conduit, or other property subject or devoted to public use in a manner that will afford security to life and property. The district shall restore the property crossed as near as may be to its former state or so as not to have impaired unnecessarily its usefulness.

Subject to
public use

22432. A district may on terms its board deems for the best interests of the district take a deed or release from any claimant, including any other taxing or assessing agency, to any interest in any property owned or claimed by the district.

Deed or
release from
claimant

22433. A district may purchase pursuant to law property tax sold or tax deeded to the State on which the district has a claim, lien, or deed for unpaid assessments or any right, title, interest, or claim.

Tax sold or
tax deeded
to State

22434. Any district when it appears to its board to be for the best interests of the district may discharge with or without compromise any overlapping tax or assessment liens equal or superior in rank to those of the district existing on any property to which the district has title and may purchase any outstanding tax or assessment titles existing on the property equal or superior in rank to the title of the district.

Discharge of
overlapping
tax or
assessment
liens

22435. A district may notwithstanding any other provisions of this division use any of its funds to carry out the provisions of Section 22434 and may with these funds purchase written evidences of indebtedness of overlapping taxing or assessing agencies for this purpose.

Same Use
of any funds

22436. A district may in its name take conveyances, leases, contracts, or other assurances for all property acquired by it.

Indicia of
title or
other rights

22437. The title to all property acquired by a district is held in trust for its uses and purposes. The district may hold, use, acquire, manage, sell, or lease the property as provided in this division.

Title held
in trust

Article 2. Eminent Domain

22455. Eminent domain proceedings may be brought by a district pursuant to the provisions of Title 7, Part 3 of the Code of Civil Procedure.

Eminent
domain
proceeding

22456. The use of all water, together with all property which may be acquired, which is required to carry out fully the provisions of this division is a public use and may be acquired by the district in eminent domain proceedings.

Public use
defined

22457. If the owner of any land, easement, or franchise to be crossed by works of a district can not agree with the district

Disagree-
ment as to
payment, etc

as to payment, location of the crossing, or any other matters in connection therewith, they shall be determined as in a proceeding in eminent domain.

Order to
relocate
property

22458. If a right to flood or otherwise interfere with any road, railroad, canal, or other property is acquired by eminent domain, the judgment may, if the court finds that the public convenience requires it, direct the district to relocate the road, railroad, canal, or other property in accordance with plans prescribed by the court.

Article 3. Power Lines on Public Property

Construction
and operation

22475. There is granted to every district the right to construct and operate in a manner affording security for life and property electric light and power lines along, over, under, or upon any road or across any railway or conduit which the route of the lines intersects or runs along.

Same
Within
any city

22476. A district may not construct and operate electric light and power lines along, over, under, or upon any road within any city unless permission to do so is granted by the governing body of the city, which in so doing may impose reasonable conditions upon the proposed use.

Same When
permission
not required

22477. Permission pursuant to Section 22476 is not necessary where the road to be used is a convenient part of the route of the lines and at the time construction of the lines was commenced or the plans for them were adopted was located in territory not within an organized city.

Restoration
of road, etc

22478. A district constructing lines pursuant to this article shall restore the road, railway, or conduit intersected to its former state of usefulness as near as possible.

Article 4. Disposition of Property

Sale or
lease of
unnecessary
property

22500. When a board determines by resolution entered upon the minutes that any property of the district is no longer necessary for district purposes, the district may for a valuable consideration sell or lease the property upon terms that appear to the board to be for the best interests of the district.

Lease of
mineral
rights

22501. A district may lease the right to produce any minerals or hydrocarbons in any property held by it upon the terms the board deems most beneficial to the district after the board has found by a resolution entered in its minutes that the lease may be carried out without interfering with the use of the property for district purposes.

Condition

Execution of
conveyances
and leases

22502. All conveyances and leases of district property shall be executed by the secretary and president on behalf of the district in accordance with a resolution of the board.

Acquired
through a
collector's
deed

22503. A district may sell, convey, lease, give and take options and contracts of sale upon, and otherwise deal with property acquired by it through a collector's deed, including sale to a former owner or holder, on terms and at a price approved by its board. Instruments to accomplish the same

shall be executed and acknowledged by the president and secretary.

Article 5. Lease of Works

22525. This article provides an independent method of leasing and its provisions apply only to leases made pursuant to it. Independent method

22526. A district may lease part or all of its works when- ever the leasing will benefit the district. When permitted

22527. When the board contemplates the leasing of the works of the district, it shall give notice thereof at least three weeks prior to the making of the lease, by publication at least once in some newspaper published in the principal county. Notice by publication

22528. The lease shall be made to the highest bidder, but any and all bids may be rejected. To whom

22529. The lease shall not interfere with any prior rights established by law. Noninterference with prior rights

22530. A good and sufficient bond shall be required by the board to secure the faithful performance of the lease by the lessees. Lessee's bond

Article 6. Water Leases for Mechanical Purposes

22550. The provisions of this article apply only to leases made pursuant to it. Limitation of provisions

22551. Whenever a district in the development of its works has the opportunity without increased expenditure to lease for mechanical purposes not inconsistent with the district's purposes the use of water controlled by it, it may do so. Consistent with district's purposes

22552. Whenever the board desires to lease the use of water it shall pass a resolution of intention to do so. Resolution of intention

22553. Immediately after the passage of the resolution the secretary shall give notice of the intention, by publication for at least 20 days in one newspaper published in each affected county if a newspaper is published in it, and, if not, in any newspaper the board selects, and if the board thinks proper, in any other newspapers the board selects. Publication of notice

22554. The notice of intention to lease the use of water shall state all of the following: Contents of notice

- (a) The board will receive sealed proposals for the lease.
- (b) The lease will be let to the highest responsible bidder.
- (c) The time and place of opening the proposals.

22555. At the time and place appointed the board shall open in public the proposals to lease the use of water. Opening of proposals

22556. As soon after opening the proposals as may be convenient the board may let the lease in portions or as a whole to the highest responsible bidder or may reject any or all proposals and readvertise for proposals. Leasing

22557. The rental accruing upon a lease of the use of water may vary from year to year as specified in the lease and shall be payable semi-annually on the thirtieth day of December and thirtieth day of June of each year. Rental

- Penalty 22558. If at any time the rental is not paid on the day fixed, the amount of the rental due shall be doubled, and if not paid within the next succeeding 90 days, the lease shall be forfeited to the district, together with any and all works constructed, owned, used, or controlled by the lessee.
- Forfeiture
- Disposition of moneys 22559. All money collected on a lease shall be paid into the district treasury and be apportioned to any funds the board deems advisable.
- Lessee's bond 22560. Upon the letting of any lease, the board may require the lessee to execute a bond for the faithful performance of the covenants of the lease or give such other guaranty of good faith as in its judgment may be necessary.
22561. The lease may be for a period not exceeding 25 years.

CHAPTER 4. CONTROVERSIES

Article 1. Actions and Proceedings

- May maintain or defend actions 22650. A district may commence and maintain any actions and proceedings to carry out its purposes or protect its interests and may defend in any action or proceeding brought against it.
- In person or by attorneys 22651. In all actions or proceedings the board may sue, appear, and defend in person or by attorneys and in the name of the district.
- Service of summons 22652. Service of summons upon a district may be made by serving it upon either the secretary or a majority of the directors elected.
- Suit by bondholders 22653. Before an action or proceeding by the holders of bonds of a district to compel or restrain the doing of an act by the district or its board may be commenced or maintained, the holders of 10 per cent or more of the outstanding bonds of the district shall join in the action or proceeding as plaintiffs, petitioners, or applicants for the relief sought.

Article 2. Validation of Bonds and Assessments

- Action in superior court of office county 22670. A district may at any time after the authorization of any bonds or the levy of any assessment bring an action in the superior court of the office county to determine the validity of the bonds or of the levy.
- In rem 22671. The action is in rem.
- Service by publication 22672. Jurisdiction of all parties interested may be had by publication of summons for at least once a week for three weeks in a newspaper of general circulation published in the county where the action is pending and designated by the court in which the proceedings are pending.
- When jurisdiction complete 22673. Jurisdiction is complete 10 days after the completion of publication of summons.
- Contest of validity 22674. Anyone interested may before the expiration of the 10 days appear and contest the validity of the bonds or assessments.

22675. If no proceedings have been brought by the district pursuant to this article, any district assessment payer may at any time within 30 days after the levy of any assessment or authorization of any bonds bring an action in the superior court of the office county to determine the validity of the assessment or bonds. The district shall be a defendant.

Action by district assessment payer

22676. If more than one action is pending at the same time concerning similar contests provided for in this article, they shall be consolidated and tried together.

Consolidation of similar contests

22677. The rules of pleading and practice in the Code of Civil Procedure not inconsistent with the provisions of this article are applicable to all actions or proceedings provided for by this article.

Applicable rules of pleading and practice

22678. In a contest provided for by this article the court shall disregard any irregularity or omission which does not affect the substantial rights of the parties.

Irregularity or omission

22679. The action shall be speedily tried.

Speedy trial

22680. The judgment shall declare the bonds or levy either valid or invalid.

Decree of validity or invalidity

22681. When a district has exchanged bonds or has agreed to exchange bonds for any interest in property the court in any proceeding brought by a district pursuant to this article shall by its decree determine both:

Decree affecting exchanged bonds

(a) The validity of all bonds issued or to be issued under any contract or contracts for the exchange of bonds for property interests.

(b) Whether or not the bonds when delivered to the person entitled to them under the terms of the contract will or do constitute valid obligations of the district as against all persons.

22682. The motion for a new trial of any action or proceeding provided by this article shall be heard and determined within 10 days from the filing of the notice of intention.

Motion for new trial

22683. The costs of any hearing or contest provided for in this article may be allowed and apportioned between the parties or taxed to the losing party in the discretion of the court.

Costs

22684. Any party may appeal at any time within 30 days after the rendition of the judgment. The appeal shall be heard and determined within three months from the taking of the appeal.

Appeal

Hearing and determination

Article 3. Limitations

22700. No contest of any thing or matter herein provided shall be made other than in the time and manner herein specified.

No contest other than as provided

22701. In any such action all findings of fact or conclusions of a board or board of supervisors upon all matters shall be conclusive unless the action was instituted within six months after the finding or conclusion was made.

Conclusiveness of findings or conclusions

Article 4. Public Liability

Official liability or administration

22725. No officer shall be personally liable for any damage resulting from the operation of the district or from the negligence or misconduct of any of its officers or employees unless the damage was proximately caused by the officer's own negligence, misconduct, or wilful violation of official duty.

Personal liability

Liability for negligence of agents or employees

22726. No officer or agent shall be liable for the negligence of any agent or employee appointed or hired by him unless he had actual notice that the person appointed or hired was inefficient or incompetent to perform the service for which he was appointed or hired or retains the inefficient or incompetent person after actual notice of the inefficiency or incompetency.

Verified claims for damages

22727. Whenever it is claimed that any person or property has been injured or damaged as a result of any dangerous or defective condition of any property under the control of any district or its officers or employees or the negligence of any officer or employee of a district, a verified claim for damages shall be presented in writing and filed with the officers or employees involved and the secretary within 90 days after the accident or injury has occurred.

Contents of claim

22728. Claims filed pursuant to Section 22727 shall specify the name and address of the claimant, the date and place of the accident or injury, and the nature and extent of the injury or damages claimed.

Condition precedent to bringing suit

22729. Compliance with Sections 22727 and 22728 is a condition precedent to the filing or maintaining of any action for the injury or damages.

District to pay judgment for official liability

22730. When an officer of a district is held liable for any act or omission done or omitted in his official capacity and any judgment is rendered thereon, the district shall pay the judgment without obligation for repayment by the officer.

No new liability

22731. Nothing in the preceding portion of this article shall be construed as creating any liability except as provided in Section 22730 unless it would have existed regardless of this article.

Insurance

22732. Any district may carry and pay for insurance to cover any liability of the district, its officers, employees, or any of them.

Article 5. Settlement of Damages to Water Rights of State Land

Authority of district to make final settlement

22750. In all controversies involving any damage to any and all water rights of any land which is heretofore or hereafter tax-sold or tax-deeded to the State, the State disclaims any interest in the controversy and authorizes the district within which the land is situated to make a final settlement of the controversy.

Damages involved

22751. The damages claimed in a controversy defined by this article are those occurring prior to the execution of the tax deed to the State.

Disposition of settlement money

22752. The money collected in the settlement pursuant to this article shall be paid into the treasury of the district for

district purposes and be apportioned to any funds the board deems advisable.

22753. The settlement of a controversy defined by this article shall be upon terms satisfactory to the district. Satisfactory terms

22754. The tax title of the State to the land involved remains wholly unimpaired by proceedings had pursuant to this article. Unimpairment of State's tax title

CHAPTER 5. PROVISIONS PERTAINING ONLY TO 500,000-ACRE DISTRICTS

Article 1. Introduction

22825. The provisions of this chapter apply only to districts containing 500,000 acres or more. Limitation of application

22826. Except as provided in this chapter every district containing 500,000 acres or more shall be governed by the provisions of this division. Governing provisions

Article 2. Internal Organization

22840. Directors of districts subject to this chapter shall each receive a salary of two hundred dollars (\$200) per month. Salary of directors

22841. The board may fix an additional sum to be paid to the president of the board, which additional compensation shall be subject to termination or change from time to time at the will of the board. Additional sum to president

22842. The board may:

(a) Provide for and create divisions or departments for management and operating purposes. Powers of board

(b) Appoint department heads.

(c) Classify and reclassify employees.

(d) Appoint any director or directors as a department head or to an executive position.

(e) Fix the duties, terms, and time of employment.

(f) Provide for and fix salaries, compensation, and expenses of department heads, executives, and employees.

22843. All department heads, executives, and employees shall hold their employment at the will of the board. Employment at will

22844. Any appointment of a director as a department head or to an executive position or to any other employment while a director shall be subject to termination at the will of the board and shall in no event be for a period longer than the term for which the director was elected. Same Director as employee

22845. Only one director, including the president, may be paid any compensation in excess of two hundred dollars (\$200) per month, exclusive of expenses and mileage, during any one period of time. Limitation on increase of salary

Article 3. Flood Protection

22875. Any district may expend sums that seem necessary to its board for the protection of its canal system or of land from damage by flood and the overflow of rivers. Flood protection

Jointly
with United
States,
or others

22876. The district may contribute funds for the purpose stated in Section 22875 to be expended by or jointly with the United States, other governments, or persons benefited by the same protective works.

Expenditures
authorized
without
election

22877. A district may do all things necessary to insure its canal system and the land from any damage by flood or overflow without holding an election to authorize the expenditure.

Borrowing
to amount
of unsold
bonds

22878. When the issuance of bonds by any district has been authorized by the voters for the purpose of protection against floods but the bonds have not been sold, the district may borrow for that purpose to the amount of the bond issue unsold at a rate of interest not exceeding 7 per cent per year. When the bonds have been sold, the amount borrowed under the provisions of this section shall be repaid.

Same Addi-
tional sur-
s

22879. In addition to the powers conferred by Section 22878 any district may borrow for flood protection purposes in any one year not to exceed two hundred thousand dollars (\$200,000) at a rate of interest not exceeding 7 per cent per year.

Article 4. Power Distribution

22900. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22900. No agreement having for its purpose the disposal of electric power generated in any power plant, except electric power distributed directly by a district to its inhabitants over its own transmission lines, shall be effective for any purpose until 90 days after all of the following occur:

- (a) Execution of the agreement.
- (b) Spreading on the minutes of the board of a copy of the agreement.
- (c) First publication of notice to the voters of the district.

22901. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22901. The notice shall be published in each daily newspaper of the county in which the district is situated for five successive issues of each newspaper, the date of the first publication to be within two days after the date of the spreading of the agreement on the minutes of the board.

22902. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22902. The notice shall state in substance all of the following concerning the agreement:

- (a) Its nature.
- (b) Its consideration.
- (c) Its effective date.
- (d) Brief summary of its contents.

22903. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22903. If within the 90-day period a petition signed by voters of the district, equal in number to 20 per cent of the total number of votes cast for the office of treasurer, assessor, or collector whichever was the highest at the next preceding general election at which these offices were filled, asking that the agreement be submitted to the voters for their approval or rejection, is filed with the secretary, the board shall submit the agreement to the voters for their approval or rejection.

22904. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22904. No agreement described in Section 22900 shall after the filing of the petition go into effect until approved by a majority of the voters voting on the agreement.

22905. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22905. The agreement shall be submitted either at:

(a) The next succeeding general election to be held in the district subsequent to 30 days after the filing of the petition.

(b) An election called by the board in its discretion prior to the general election.

22906. (Repealed by Stats. 1943, Ch. 531.)

[ORIGINAL SECTION]

22906. The provisions of this article do not apply to any agreement which relates to the furnishing of funds to or the purchase of bonds of districts to be used for the development or distribution of electric power.

Article 5. Assessments

22950. Every district by its board, each year within 15 days after the close of its session as a board of equalization, shall levy an assessment sufficient to raise all of the following: Money to be raised by levy

(a) Annual interest on any outstanding bonds of the district except to the extent that provision is otherwise made as permitted by law.

(b) Principal of outstanding bonds of the district as they mature except to the extent that provision is otherwise made as permitted by law.

(c) Obligations of the district due or to become due within the succeeding 12 months except to the extent that provision is otherwise made as permitted by law.

(d) A sum which with the other revenue of the district will meet the estimated current expenses of the district for the succeeding 12 months.

(Amended by Stats. 1943, Ch. 532.)

[ORIGINAL SECTION]

22950. Every district by its board, each year within 15 days after the close of its session as a board of equalization, shall levy an assessment sufficient to raise all of the following:

(a) Annual interest on any outstanding bonds of the district except to the extent that provision is otherwise made as permitted by law

(b) Principal of outstanding bonds of the district as they mature except to the extent that provision is otherwise made as permitted by law.

(c) Obligations of the district due or to become due within the succeeding 12 months.

(d) A sum which with the other revenue of the district will meet the estimated current expenses of the district for the succeeding 12 months

Article 6. Miscellaneous Provisions

(Article 6 added by Stats. 1943, Ch. 686.)

22960. Every district by its board may, in addition to other powers, borrow funds for any lawful purpose at an interest rate not exceeding 5 per cent per year and issue warrants therefor payable at future dates. No election authorizing such Borrowing money Conditions

borrowing or issuance of warrants need be held but the principal amount of such indebtedness unpaid at any time shall not exceed two hundred thousand dollars (\$200,000).

(Added by Stats. 1943, Ch. 686.)

Reserve fund 22961. A reserve fund from assessments or other revenues for emergencies, replacements or other lawful purpose of the district may be provided by the board.

(Added by Stats. 1943, Ch. 686.)

PART 6. COOPERATION

CHAPTER 1. JOINT PROPERTY

Cooperative agreements 23100. A district may make and perform any agreement with the United States, any State, county, district of any kind, public corporation, any person, or any number of them for the joint acquisition, disposition, or operation of any property of a kind which might be acquired by the district.

CHAPTER 2. COOPERATION WITH UNITED STATES

Article 1. General Provisions

Title 23175. This chapter shall be known and may be cited as the Irrigation District Federal Cooperation Law.

Limitation on provisions 23176. The provisions of this chapter apply only to proceedings taken under it and do not apply to district operations unrelated to cooperation with the United States.

Effect on other provisions of this division Except as required expressly or by necessary implication by this chapter all other provisions of this division are unaffected by this chapter.

Applicable definitions 23177. The definitions in Chapter 2 of Part 1 of this division are applicable to this chapter.

Nonapplicable provisions 23178. The provisions of Article 4 of Chapter 2 of Part 5 of this division do not apply in case of any contract between a district and the United States.

Performance of necessary acts 23179. The board shall perform all acts necessary to carry out the enlarged powers enumerated in this chapter.

Article 2. Contracts With United States

Title 43, U S C, Sec 391 23195. Districts may cooperate and contract with the United States under the Federal Reclamation Act of June 17, 1902, and all acts amendatory thereof or supplementary thereto or any other act of Congress heretofore or hereafter enacted permitting cooperation.

Purposes 23196. The cooperation and contract may be for any or all of the following purposes:

(a) Acquisition, extension, or operation of works for irrigation or drainage or development and distribution of electric power or any or all of these purposes.

(b) A water supply.

(c) Assumption as principal or guarantor of indebtedness to the United States on account of district land.

(d) Borrowing or procuring money from the United States to finance any of the operations of the district.

(e) Financing or refinancing obligations of the district, including outstanding warrants or other indebtedness.

(f) Purchasing or refunding bonds of the district.

(g) Accomplishing any of the purposes of the district.

23197. In a contract made pursuant to Section 23196 a district may include provision for either or both of the following: Contract provisions

(a) Delivery and distribution of water for the land in the district under the relevant acts of Congress and the rules and regulations established thereunder.

(b) Conveyance to the United States as partial consideration for the privileges obtained by the district under the contract of any property of the district.

23198. When a contract has been made with the United States, if so provided by the contract and authorized pursuant to this chapter, bonds of the district may be transferred to or deposited with the United States, at not less than 95 per cent of their par value, to the amount or any part thereof to be paid by the district to the United States. The interest or principal or both on the bonds shall be raised by assessment and levy as prescribed in this chapter and shall be regularly paid to the United States and applied as provided in the contract. The bonds may provide for the payment of interest at a rate not exceeding 6 per cent per year, be of the denominations, and call for the repayment of the principal at the times, all as agreed upon. Transfer of district bonds to United States

23199. The contract with the United States may likewise call for the payment of the amount or any part thereof to be paid by the district to the United States, at the times, in the installments, and with interest charges not exceeding 6 per cent per year, all as may be agreed upon, and for assessment and levy as provided in this chapter. Further provision regarding payment

23200. All water, the right to the use of which is acquired by a district under any contract with the United States shall be distributed and apportioned by the district in accordance with the applicable acts of Congress, the rules and regulations of the Secretary of the Interior thereunder, and the provisions of the contract, and provision may be made in the contract for the refusal of water service to any or all land which may become delinquent in the payment of any assessment levied for the purpose of carrying out the contract. Laws governing distribution of water

23201. A district may pursuant to the contract sell or lease water for private land, to entrymen, or to municipalities, in the neighborhood of the district. Permitted sale or lease of water

23202. When a contract pursuant to this chapter has been entered into between the United States and any district, the district shall not be dissolved, nor shall its boundaries be changed, except upon written consent of the Secretary of the Interior filed with the official records of the district. If consent is given and land is excluded, the areas excluded shall be Dissolution of district or change in boundaries

free from all liens and charges for payments to become due to the United States.

May act as
fiscal agent
of United
States

23203. A district may accept an appointment to collect money for or to act as fiscal agent of the United States in connection with any Federal reclamation project, and the district may assume the duties and liabilities incident to this action and do any and all things related to the appointment required by the Federal statutes now or hereafter enacted and by the applicable rules and regulations now or hereafter established by any department of the Federal Government.

Conveyance
of property
to United
States

23204. Any property owned or acquired by a district may be conveyed by it to the United States in so far as the property may be needed for the construction or operation of works by the United States for the benefit of the district pursuant to the contract.

Article 3. Approval of Federal Contracts

When
approval
election
required

23220. A proposal to enter into a contract with the United States shall be authorized at an election if the contract is for any or all of the following:

- (a) Repayment of construction money.
- (b) Repayment of the cost of acquiring any property.
- (c) Issuance of bonds.

Conduct
of election

23221. Proceedings at the election shall be had in so far as applicable in the manner provided in the case of the ordinary issuance of district bonds.

Commission
to examine
proposal

23222. The proposal and, if any, the plan of the project, including a copy of the estimate of cost and the engineer's report, shall be submitted to the commission for its examination and report. The proceedings in that regard shall be in accord with the proceedings provided in Chapter 1 of Part 9 of this division as far as they may be applicable.

Additional
statements
in notice of
election

23223. Notice of the election shall contain in addition to the information required in the case of ordinary bond elections a statement of the maximum amount of money to be payable to the United States for construction purposes and cost of water supply and acquisition of property, exclusive of penalties and interest, and a general statement of the property, if any, to be conveyed by the district pursuant to the contract.

Contents
of ballots

23224. The ballots at the election shall contain a brief statement of the general purpose of the contract substantially as stated in the notice of election and the extent of the obligation to be assumed with the words "Contract—Yes" and "Contract—No" or "Contract and bonds—Yes" and "Contract and bonds—No" whichever may be applicable.

Submission
of contract
and bond
issue to
superior
court

23225. A district may submit any contract or proposed contract and bond issue to the superior court of the county in which is situated the office of the board to determine the validity thereof, the authority of the district to make the contract, and the authority for and validity of the issuance and deposit or transfer of the bonds. The validation pro-

ceedings shall be had as in the ordinary case of the judicial determination of the validity of district bonds and with like effect.

Article 4. Federal Contract Assessments

23240. All payments to the United States under any contract between a district and the United States, including payments of interest and principal on bonds deposited with or transferred to the United States, shall be paid, unless otherwise provided by the contract, from revenue derived from annual assessments, apportioned pursuant to this chapter, upon real property within the district assessable for district purposes under the laws of the State, and the real property shall be and remain liable to be assessed and levied upon for the payments. Source of revenue

23241. The district by its board shall annually levy an assessment sufficient to raise the money necessary to meet all payments when due as provided in the contract. Annual levy

23242. The assessment required in any year to meet the payment due to the United States for all purposes under the contract may be apportioned in accordance with the benefits. In the ascertainment of the benefits there shall be taken into account: Ascertainment of benefits

(a) The provisions of the contract, the applicable Federal laws, and the notices and regulations issued in pursuance of those laws.

(b) In addition, in case the contract is for the assumption by the district as principal or guarantor of indebtedness to the United States theretofore existing on account of district land, the provisions of existing contracts carrying the indebtedness and the amounts of the liens that may be released in pursuance of the contract.

23243. Public land of the United States within any district shall be subject to assessment for all purposes of this chapter to the extent provided for by the act of Congress approved August 11, 1916, entitled "An act to promote reclamation of arid lands," or any other law which may hereafter be enacted by Congress in the same relation, upon full compliance therewith by the district. Public lands of United States assessable Title 43, U.S.C., Sec 621, et seq

23244. Nothing in this chapter relieves any district from its obligation to pay as a district in case of the default of any land unless so provided by the contract. District's obligation to pay

23245. All money collected in pursuance of the contract shall be paid into the district treasury and held in a fund to be known as the "United States Contract Fund" to be used for payments due to the United States under the contract. Disposition of money

Article 5. Construction of Works for United States

23260. When the United States is authorized to construct works for the benefit of any district and the district is obligated to repay the construction cost in whole or in part to District may contract or submit bids

the United States, the district may by resolution of its board enter into a contract with the United States for the construction of the works or may submit bids for the construction of the works the same as any other person may submit bids for the construction of the works.

District's
bond for
performance

23261. If a district is the successful bidder for the construction of the works or any part of them, the district may execute at its expense a bond for the faithful performance of the work and do any and all things required by the United States as would be required of any other successful bidder.

Manner and
regulation of
performance

23262. A district upon the execution with the United States of a contract for the construction of works by the district shall proceed with the work in the same manner and under the same laws and rules and regulations as would apply to the district in the construction of any works which it is authorized to construct.

District
may borrow
money

23263. For the purpose of providing the necessary money to carry on the construction work the district may borrow money for a term not exceeding five years at rates of interest, to be fixed by its board, not exceeding 7 per cent per year and issue notes, warrants, or other evidences of indebtedness therefor. The aggregate amount of the indebtedness shall at no time exceed one-half of the total construction cost as provided in the construction contract.

Application
of install-
ments under
contract

23264. Any money received by a district from the United States under the contract shall first be applied to the retirement of notes, warrants, or other evidences of indebtedness issued pursuant to this article.

Article 6. Borrowing from United States

Purposes

23280. In addition to other powers conferred by this chapter districts may pursuant to this article borrow or procure money from the United States for any of the following purposes:

- (a) Financing any operations or purposes of the district.
- (b) Financing or refinancing any or all of the obligations of the district.
- (c) Refunding or purchasing bonds of the district.

Agreement
regarding
amount
of levy

23281. When the United States has appraised the security underlying the indebtedness of any district or loans any district money to refund any of its indebtedness or to finance any of its operations, the district may in contracting for the loan agree that it will not during the life of the loan levy any assessment for an amount less than required by the contract.

Execution
of contract

23282. Any district, upon being authorized so to do as provided by Article 3 of this chapter as modified in this article, may as evidence of the loan execute a contract with the United States.

Issuance
of bonds

23283. A district may issue bonds if required by the contract or without a contract.

23284. The bonds shall contain any terms and be payable in any manner and from any source of revenue that may be agreed upon between the district and the United States and may bind the district for the payment of the bonds according to the terms thereof.

Same Terms and conditions

23285. The bonds may be serial or sinking fund bonds, may be made callable either by number or by lot, and may be made payable to bearer or to the United States. They shall be in the form and authorized and issued in the manner substantially as provided for refunding bonds of districts.

Same Types; how callable

23286. A proposal to enter into any contract with the United States pursuant to this article need not be submitted to the commission.

Proposal need not be submitted to commission

23287. A majority vote at an election shall be sufficient to authorize the execution of the contract.

Authorization by majority of electors

23288. The notice of election and ballot need contain only the information required in the case of ordinary bond elections.

Contents of notice of election and ballot

23289. Proposals both to enter into a contract and to issue bonds may be voted upon as a single proposition.

Single proposition

Article 7. County Water Districts as Irrigation Districts

23300. As used in this article "county water district" means a county water district which has heretofore executed or shall hereafter execute a contract with the United States for any or all of the following purposes:

"County water districts"

(a) Acquisition, extension, or operation of works for irrigation or drainage or flood control or the development of electric or other power.

Purposes of contract

(b) A water supply.

(c) Assumption as principal or guarantor of indebtedness to the United States

23301. Every such county water district shall, within the meaning of the act of Congress approved August 11, 1916, entitled "An act to promote the reclamation of arid lands" and of the act of Congress approved May 15, 1922, entitled "An act to provide for the application of the reclamation law to irrigation districts," be deemed to be an irrigation district organized and created under the irrigation district laws of this State.

Title 43, U.S.C. Sec 511

23302. Public land of the United States within any such county water district is subject to assessment and taxation for all purposes of such district to the extent provided in said acts of Congress upon full compliance therewith by the county water district.

Public lands of United States subject to assessment and taxation

CHAPTER 3. COOPERATION WITH OTHER DISTRICTS

Article 1. Cooperation With Districts in Other States

23375. The provisions of this chapter do not extend the right of eminent domain to any public use in behalf of which it may not otherwise be exercised.

Right of eminent domain not extended

Joint acquisition

23376. Districts may enter into agreements with irrigation districts in adjoining States for the joint acquisition, management, and control of diverting, impounding, or distributing works for irrigating or draining land within the boundaries of the respective districts.

Same: Evidence of agreements

23377. Agreements pursuant to this article may be evidenced by written contracts executed on behalf of the board of directors or trustees of each respective district or by resolutions entered upon their respective minutes.

Same Recordation of contracts and resolutions

23378. The contracts or certified copies of them and certified copies of the resolutions shall be recorded in the office of the county recorder in each county in which is situated any of the land of the districts or any of the reservoir sites or other real property owned by the districts or acquired pursuant to this article.

Same Types of ownership, terms and proportions

23379. Agreements made pursuant to this article may provide for joint ownership, several ownership, or ownership in common of the property convenient for their joint purposes and may provide for the terms under which or the respective proportions in which the property shall be held.

Jurisdiction of courts

23380. Any rights or disputes arising out of or from the agreements may be tried before and enforced by any court of competent jurisdiction in this State.

Place of meetings

23381. Any meeting of a board regularly adjourned to or called substantially in the manner for calling special meetings may be held in conjunction with the board of the cooperating district in the cooperating district in the adjoining State with the same validity as if held at the district office in this State.

Use of water

23382. For the purposes of cooperative action pursuant to this article either district may divert water from either or both States for either or both impounding in the adjoining State or for distribution to the land of either or both cooperating districts.

Title to property outside State

23383. So far as necessary for carrying out the purposes of this article a cooperating district in an adjoining State may hold title to property in this State, and a cooperating district in this State may hold title to property in the adjoining State.

Article 2. Cooperation With County Water Districts

"Districts"

23450. As used in this article "districts" means one or more irrigation districts together with one or more county water districts.

"Contract with the United States"

23451. As used in this article "contract with the United States" means a contract made under the provisions of the Federal Reclamation Law for any or all of the following purposes:

(a) Acquisition, extension, or operation of works for irrigation, drainage, flood control, or development of electric or other power.

(b) A water supply.

(c) Assumption as principal or guarantor of indebtedness to the United States.

23452. As used in this article "power rights" includes power possibilities, power resources, and power privileges. "Power rights"

23453. Districts may contract with each other pursuant to this article only when both: Requisites for contracting

(a) Each of the districts before or after contracting pursuant to this article makes a contract with the United States.

(b) All of the contracting districts propose to divert or carry water for use in the districts by means of a single main canal or system of works.

23454. Any contract between districts made before each of the districts has made a contract with the United States shall be effective when all of the districts have so contracted with the United States. When contracts effective

23455. In any contract between districts they may contract to compromise and settle any controversies existing between them as to the extent or priority of their respective rights and claims to the use of water and agree upon the limitation and definition of the areas within them respectively upon which such water shall be beneficially used. Compromise and settlement of water disputes

23456. Districts may also contract that applications therefore filed by either of them with the Division of Water Resources shall be amended to conform to the provisions of the contract between them and that permits and licenses be issued accordingly. Amendment of applications previously filed

23457. Districts may also contract to compromise and settle any controversies existing between them as to power rights upon the canal or other water system, and for these purposes any of the districts may demise to another of the districts all of the power rights which the demising district has or thereafter obtains. Compromise and settlement of disputes over power rights

23458. The lease may be made for any term not exceeding 99 years and may vest in the lessee the operation, management, development, and control of the power rights and the use, sale, and control of power produced therefrom. The lease may provide for the payment of rentals and any other matters relevant to the leasing of the power rights as the districts may in their discretion deem advisable not in conflict with the Constitution of this State nor with the express terms of the statutes under which the districts are respectively organized and exist. Term of lease of power rights

23459. Districts may also contract that when the lease has been executed, the lessor may be required upon any terms agreed upon to procure for the lessee district contracts or applications for electric power signed by consumers in the lessor district and that the lessee district shall serve electric power in the lessor district at rates and upon terms and conditions prescribed in the contract. Further contractual obligations of lessor

23460. Districts may also contract that they shall cooperate to obtain permits and licenses to appropriate water for power purposes and to construct power facilities from the Division Obtaining permits and licenses

of Water Resources of this State or any Federal agency or both in the manner prescribed in the contract.

Other subject matter
Power to perform contracts

23461. Districts may also contract for any other matters authorized by law.

23462. Districts so contracting have full power to perform and observe the contracts in accordance with the tenor and spirit thereof.

Liberal construction

23463. Contracts made pursuant to this article shall be liberally construed to effectuate them according to their true intent.

Authorization of contract by resolution
Retroactive provisions

23464. The execution of a contract between districts may be authorized by resolution of their respective boards.

23465. Any and all such contracts executed prior to September 13, 1941, by and between such districts and all acts of boards of directors and other officers of such districts leading up to and including the execution of such contract or contracts, are hereby legalized, ratified, confirmed and declared valid to all intents and purposes, and the power of such districts to execute, carry out, perform and observe such contracts and every provision thereof is hereby ratified, confirmed and declared valid and such contracts are hereby declared to be in all respects the legal and binding obligations of, against and in favor of each of such contracting districts.

PART 7. IMPROVEMENT DISTRICTS IN IRRIGATION DISTRICTS

CHAPTER 1. FORMATION

Article 1. Petition for Formation

Requirements of contiguity
Purposes

23600. Contiguous land may be formed into an improvement district for one or more of the following:

(a) Irrigation or domestic water service by a system of pumps or conduits or both.

(b) Drainage.

(c) Acquisition of existing works incidental to a water distribution system separate from or supplemental to the works of the district.

(d) Change or improvement of the water distribution system of the district.

(e) Maintenance of irrigation works of the district and works for water supply or drainage or both in or for the improvement district.

(f) Control of weeds in or along conduits.

Definitions

23601. As used in connection with improvement districts:

(a) "Improvement" includes acquisition of existing works, construction of new works, and change of existing works and excludes operation, maintenance, and weed control.

(b) "Construction" includes change of existing works.

(c) Both "operation" and "maintenance" include weed control.

Petitioners

23602. The formation of an improvement district may be proposed and the petition therefor shall be signed by two-

thirds or more in number of the holders of title to the land in the proposed improvement district.

23603. A petition for the formation of an improvement district shall contain all of the following: Petition
Contents

(a) Statement of the plans of the proposed improvement.

(b) Description of the land in the proposed improvement district.

(c) Names of the owners of all land within the proposed improvement district with their last known addresses.

(d) Description of the land owned in the proposed improvement district by each owner, which shall be according to the next preceding equalized assessment book of the district.

(e) Signatures of the petitioners.

23604. The petition, all proceedings in reference to it, the improvement district, and the land in it shall be designated by a number. Same:
Designation
by number

23605. The petition may consist of any number of separate instruments, which shall be duplicates except as to signatures. Same
Form

23606. A petition to form an improvement district shall be filed with the secretary in the office of the district and may be inspected by all persons interested. Same
Filing and
inspection

Article 2. Plans and Estimate of Assessment

23625. Upon receipt of a petition to form an improvement district the board shall cause a survey to be made of the proposed improvements, if any. Survey

23626. If the survey shows that the improvements are feasible, the board shall cause to be prepared the following: Other data
if improve-
ments
feasible

(a) Plans and specifications of the improvements proposed to be constructed when the petition proposes the construction of improvements.

(b) An estimate of the cost of the proposed improvements.

(c) Statement of the proposed assessment for the cost of the proposed improvements apportioned to each tract of land in the proposed improvement district as the tracts appear on the last equalized district assessment book, which apportionment shall be according to the benefits that will accrue to each tract by virtue of the proposed improvements.

23627. If there are any, the plans and specifications, estimate of cost, and the statement of the proposed assessment shall be filed with the secretary in the office of the district and may be inspected by all persons interested. Same
Filing and
inspection

Article 3. Hearing on Formation

23645. After the filing of the formation petition, and if any, the plans and specifications, the estimate of cost, and statement of the proposed assessment, the board shall give notice of a hearing upon the petition, and if a special assessment is to be levied in the improvement district pursuant to Article 4 of this chapter, the notice shall also state that the Notice of
hearing—
Contents

hearing is called to determine whether or not the special assessment should be levied.

Manner of giving notice 23646. Notice of the hearing shall be given by all of the following:

(a) Posting a notice in three public places within the proposed improvement district.

(b) Publication of the notice once a week for two weeks in a newspaper published in the office county.

(c) Mailing a copy of the notice to the last known address of each of the owners of land in the proposed improvement district to the addresses appearing in the petition.

Time The notices shall be posted and mailed not less than 20 days prior to the date set for the hearing.

Hearing Objections to petition, etc 23647. At the hearing the board shall hear any objections coming before it to any of the following:

(a) The petition.

(b) The formation of the improvement district.

(c) The land to be included within the improvement district.

(d) The plans and specifications.

(e) The estimate of cost.

(f) The proposed assessment.

(g) The apportionment of the assessment.

Same Changes in petition, etc 23648. At the hearing the board shall make any changes in reference to the matters set forth in Section 23647 as it considers proper. The board may exclude any part of the land described in the petition from the proposed improvement district and may include additional land.

Same Continuance if additional land included and notice 23649. If any additional land is included in the proposed improvement district, the hearing shall be continued and the owners of the added land given personal notice of not less than 20 days of the addition of the land to the improvement district.

Article 4. Formation and Assessment

When petition must be denied 23665. Regardless of any findings made by the board if more than one-third in number of the holders of title to land within a proposed improvement district object at the hearing to its formation or the levy of the proposed assessment, the board shall deny the petition, and no further proceeding shall be had on it.

Dismissal without prejudice 23666. If at the hearing the board finds that it would not be for the best interests of the district and the proposed improvement district to form the improvement district the board shall order the proceedings dismissed without prejudice to their renewal.

Order and contents 23667. If the board finds that it would be for the best interests of the district and the proposed improvement district to form the improvement district, it shall make and enter in its minutes a final order:

(a) Approving the petition.

(b) Forming the improvement district.

(c) Levying the assessment if any is provided for and if the assessment is necessary.

(d) Apportioning the assessment, if levied, to the land in the improvement district according to benefits.

23668. The order shall contain a description of the land in the improvement district. Description of land

23669. Any assessment levied pursuant to Section 23667 shall include both of the following sums: Sums included in assessment

(a) An amount equal to interest on any deferred payments at a rate not exceeding 7 per cent each year.

(b) An amount equal to 10 per cent more than all other sums to be raised by the assessment, in order to provide for anticipated delinquencies.

23670. The assessment may be made payable in not more than 10 annual installments. Maximum number of installments

23671. The secretary shall cause a certified copy of the order creating the improvement district to be recorded in the office of the county recorder in each county in which any land of the improvement district is situated. Recording of creating order

23672. The assessment and each installment of it shall be and remain a lien on the land in the improvement district in the same manner as and be a part of the annual assessment of the district. Lien on land

23673. Upon a change or resubdivision upon the assessment book of the district of any parcel of land in an improvement district, the board upon a petition of the owner of the parcel so changed or resubdivided, may reapportion the improvement district assessment upon the parcel, and the order of reapportionment shall be recorded in the same manner as the order levying the original assessment. Reapportionment of assessment
Order to be recorded

CHAPTER 2. ALTERNATIVE PROCEDURE FOR FORMATION

Article 1. Proposal by Board

23750. This chapter provides an alternative procedure for forming an improvement district within a district for the purpose of the construction of improvements in it, or the acquisition, installation, replacement, or extension of existing works for the production and distribution of water, or any number of these if the cost thereof will not exceed the sum of five thousand dollars (\$5,000) and the area of the land to be included in the improvement district does not exceed 100 acres. Limited in cost and acreage

23751. Unless otherwise expressly provided the formation proceedings provided by this chapter shall be conducted in accordance with the provisions of the next preceding chapter. Applicable provisions

23752. No petition is required for the formation of an improvement district pursuant to this chapter. No petition required

23753. The board may by resolution cause a survey of the proposed improvement to be made, which survey shall include each of the following: Survey by resolution of board

- (a) Detailed plans and specifications.
- (b) An estimate of the total cost of the improvement.
- (c) A description of the land to be benefited.

Article 2. Hearing and Formation

Requisites to holding hearing

23770. If the cost of the improvements does not require a special assessment in excess of a total of fifty dollars (\$50) per acre over an area to be improved not in excess of 100 acres, the board may by resolution set a time for a hearing on whether or not to form the improvement district.

Notice of time and place of hearing

23771. The board shall give notice of the time and place of the formation hearing in the same manner as provided for the giving of notice for the hearing of a formation petition pursuant to Chapter 1 of this part except that the notice to be mailed to the property owners shall be addressed to their last known address as shown on the assessment book or other records of the district.

Owners may oppose or support

23772. Owners of the property proposed to be included within the improvement district may be heard either in opposition to or in support of the formation of the improvement district.

Conduct of proceedings

23773. Proceedings at the hearing shall be the same as provided for at a hearing upon the formation petition pursuant to Chapter 1 of this part.

Order of formation, or dismissal of proceedings

23774. Upon the conclusion of the hearing to form an improvement district an order shall be made by the board either dismissing the proceedings or ordering the improvement to proceed in the same manner and with the same effect as provided in Article 4 of Chapter 1 of this part.

Limitation on amount of assessment

23775. If a formation order is made pursuant to this chapter, the land formed into the improvement district shall, for a period not to exceed five years, be assessed in an amount not to exceed ten dollars (\$10) per acre per year in addition to the regular assessments levied on the same land annually for district purposes.

Procedure for levy, collection, etc.

23776. Assessments in an improvement district formed pursuant to this chapter shall be levied, collected, and enforced at the same time and in the same manner as annual assessments for district purposes.

CHAPTER 3. FURTHER ASSESSMENTS AND INCLUSION

Article 1. Supplemental Assessments

Insufficiency of funds

23850. If the assessments levied upon land in an improvement district are insufficient to pay the cost of improvements or the warrants issued for the improvements, a supplemental assessment shall be levied upon all of the land in the improvement district sufficient to pay the cost or the warrants.

Procedure to be followed

23851. The procedure followed in making the supplemental levy shall be substantially the same as for making the original levy, except that no petition is required.

Article 2. Assessment for New Purposes

Petition by title holders

23865. Whenever it is desired to do additional work or acquire additional property in or for an improvement district,

upon the petition of two-thirds in number of the holders of title to the land in the improvement district an additional assessment may be levied substantially in the same manner as the original assessment.

Article 3. Inclusion of Land

23875. If at any time it is desired to include additional land in an improvement district, a petition for inclusion signed by the owners of the land to be included and by two-thirds in number of the holders of title to the land in the improvement district may be filed with the board.

Petition for inclusion

23876. The inclusion petition shall describe the land in the improvement district as enlarged by the proposed inclusions and give the names and addresses of the owners of the additional land in substantially the same manner as in the original petition for forming an improvement district.

Contents of petition

23877. The same proceedings shall be had on the improvement district inclusion petition as upon the original petition for the formation of an improvement district.

Proceedings

CHAPTER 4. FUNCTIONING OF IMPROVEMENT DISTRICTS

Article 1. Improvement District Management

23950. In a district containing an improvement district the board and all of the officers of the district each respectively has all the rights, powers, and privileges as to the improvement district, its land, and the proceedings in relation to the improvement district that each respectively has for the district of which the improvement district is a part, including the right of the district to acquire, own, and hold property.

Rights, powers and privileges

23951. The board may also hold property used or acquired in connection with the improvement in the name of the directors and their successors in office as trustees for the improvement district.

May hold property as trustees

23952. The board of a district in which an improvement district exists may allow on terms that may be agreed upon any person to carry water through any conduit for the improvement of which the improvement district was formed and may cancel the right in the event that payments are not made in accordance with the agreed terms.

Agreement regarding use of water

23953. The work of improvement provided for in this part and the purchase of all supplies, material, and equipment therefor shall be performed by the district, or in the discretion of the board contracts may be made for the work and material after notice calling for bids, as prescribed by the board.

Work and materials

23954. The board of the district may in lieu in whole or in part of levying assessments for the operation of improvement district works fix and collect charges for the use of water or for any other service furnished by means of the improvement district works in the same manner and with the

Charges for water, etc. in lieu of assessments

same effect as charges are made and collected by districts for the use of water or for services.

Article 2. Improvement District Warrants

Limitations on amount of warrant: 23975. A district may issue improvement district warrants signed by its president and secretary in face amount not exceeding in the aggregate the cost of the improvements exclusive of interest and amounts paid prior to the issuance of these warrants on the assessment levied to pay for the improvement.

How payable 23976. Improvement district warrants shall be made payable in amounts and at the times corresponding substantially to the amounts and times of payment of the installments of the improvement district assessment.

Interest 23977. Improvement district warrants shall bear interest at the rate fixed at the time of the levy of the improvement district assessment, and the interest may be made payable semiannually.

Interest coupons 23978. Coupons for the interest on these warrants may be attached to them.

Payees 23979. Improvement district warrants may be made payable to any of the following:

(a) Bearer.

(b) Persons furnishing work, labor, or material.

(c) The contractor if the work of improvement is to be done under contract.

Sale by district 23980. Improvement district warrants may be sold by the district for not less than par at either public or private sale.

Investment by district 23981. Any money held by a district in a sinking or depreciation fund may in the discretion of its board be invested in the warrants of any improvement district within the district.

Article 3. Advance Payment of Assessments

Prepaying of assessments 24000. At any time before improvement district warrants are issued, the amount of any improvement district assessment on any land, exclusive of interest and the 10 per cent added for anticipated delinquencies, may be paid in money.

Remaining liability 24001. Land on which the amount of the improvement district assessment has been paid pursuant to Section 24000 shall not be subject to the annual installments of the assessments levied for the purposes of the improvement, but it shall be and remain liable for any assessments levied for operation and for any supplemental or additional improvement district assessments levied.

Assessment warrants as payment 24002. Any landowner of an improvement district who desires at any time to lessen or remove the lien upon his land of any improvement district assessment may deliver to the district treasurer for cancellation warrants payable out of the assessment.

Same Requirement as to maturity 24003. The board may require warrants delivered to lessen or remove an improvement district assessment lien to be

substantially of the average maturities of the issue of warrants.

24004. The treasurer shall notify the board of the amount of the principal and interest due and to become due on the warrants delivered for cancellation. The board shall thereupon cause the proper cancellation and proper record and credit to be made against the improvement district assessment on the land of the person delivering the warrants.

Cancellation
and record
of payment

Article 4. Actions and Proceedings

24020. All acts, proceedings, conclusions, and findings of fact, including the levy of an assessment, by a board of a district concerning an improvement district therein shall be conclusive except in an action or proceeding instituted within six months after the acts, proceedings, conclusions, or findings were had or made.

Conclusive-
ness of
acts, etc

Exception

24021. The board of a district in which an improvement district is located may, at any time after the levy of any assessment or the issuance of any warrants for the improvement district, bring an action to determine the validity of the assessment or the issuance of the warrants in the same manner and with the same effect as provided for the determination of the validity of district bonds and assessments.

Action to
determine
validity

24022. No irregularity or omission not affecting the substantial rights of the landowners within an improvement district shall affect the validity of any act done or proceeding taken in relation to the improvement district.

Irregulari-
ties or
omissions

Chapter 5. Dissolution of Improvement Districts

24100. At any time prior to the incurring of any indebtedness or upon the full payment of all indebtedness of an improvement district, a petition, signed and acknowledged by not less than the number of holders of title to land constituting the improvement district required to sign a petition to form the improvement district, may be filed with the board requesting that the improvement district be dissolved.

Petition for
dissolution

24101. A hearing on dissolution shall be had in the same manner and after the same notice as is required for the formation of an improvement district.

Hearing

24102. The board may, after the hearing, order the improvement district dissolved.

Order of
dissolution

24103. The order of dissolution shall be recorded in the same manner as the order forming the improvement district.

Same
Recording

PART 8. FINANCIAL ORGANIZATION

CHAPTER 1. GENERAL FINANCIAL PROVISIONS

Article 1. Creation of Liabilities

24250. A district may not incur any debt or liability whatever in excess of the express provisions of this division. Any debt or liability so incurred is absolutely void.

Limiting
provisions
Void debt
or liability

24251. For the purposes of formation or for any other of its purposes a district may, before the levying of the first

Organization
expenses

assessment, incur indebtedness in a total amount not to exceed two thousand dollars, (\$2,000) or, if the district contains more than 4,000 acres, one-half as many dollars as there are acres of land in the district.

Rights not affected

24252. Nothing contained in this article shall be construed to limit the right of a district to enter into any contract or lease for any property necessary in the judgment of its board for any of the uses or purposes of the district and by the lease or contract to bind the district for the payment of the consideration specified in the lease or contract as may be provided therein.

When approval by commission necessary

24253. If the largest payment to be made under any one lease or contract for any property exceeds in any year an amount equal to one-fourth of one per cent of the total valuation of the land in the district according to the assessment next equalized before the making of the lease or contract, the lease or contract shall not be valid unless it is approved by the commission or unless a particular purpose or emergency assessment sufficient to meet all of the principal payments to become due under the lease or contract is authorized.

Further requirement

Article 2. Settlements and Statements

Duties of collector

24270. On the first Monday in each month the collector shall do all of the following:

- (a) Settle with the secretary for all money collected for assessments during the month next preceding.
- (b) Pay the money to the treasurer.
- (c) File in the district office with the secretary the receipt of the treasurer for the money paid.

24271. The collector shall be credited in his settlement with both:

- (a) The amount due to the district on property he sells to the district for delinquent assessments.
- (b) The amount by which any assessment is canceled or modified by order of the board.

Same Further duties

24272. Within six days after he settles with the secretary, the collector shall file in the district office with the secretary a statement under oath, showing:

- (a) An account of all his transactions and receipts during the period for which the settlement was made.
- (b) Payment to the treasurer of all money collected by him as collector during the period for which the settlement was made except redemption money held for assignees of certificates of sale.
- (c) The respective sums of redemption money held by him for assignees of certificates of sale and the names of the persons entitled to receive this money if known to him.

Duties of treasurer

24273. The treasurer shall on the first Monday in each month file in the district office with the secretary a verified written report to the board showing all of the following:

- (a) The amount of money in the district treasury at the close of the month next preceding.

(b) The amount of receipts for the month next preceding.

(c) The amount and items of expenditures for the month next preceding.

24274. The board on or before its regular monthly meeting in March of each year shall render and immediately publish a verified statement of the financial condition of the district showing particularly:

(a) Receipts of the next preceding year and their sources.

(b) Disbursements of the preceding year and their purposes.

24275. Publication of the annual financial statement shall be made at least once a week for two weeks in a newspaper published in the office county.

CHAPTER 2. DEPOSITS

Article 1. Deposits Generally

24350. Any money belonging to a district may be deposited by the officer of the district who has legal custody of the money, in accordance with the general laws governing the deposit of public money.

24351. Where the deposit of money is insured by the Federal Deposit Insurance Corporation no additional security need be required from the bank for the portion of the district's deposits so insured.

24352. Where arrangements have been made by the district with the Reconstruction Finance Corporation for deposit of district funds in the Federal Reserve Bank of the United States, such deposits may be made in that bank or any branch of it without requiring any security or interest.

24353. A district may with the approval of the commission designate any bank or trust company to act as its agent for any or all of the following purposes:

(a) Making payment of the principal or interest or both of any of its bonds.

(b) Receiving any revenue allocated by the board to the payment of either or both the principal and interest, or any part of either, of any bonds for which the allocation was made.

(c) Applying the revenue to the payment of the principal or interest designated.

24354. A district with the consent of the commission may from time to time substitute another bank or trust company in the place of the bank or trust company designated pursuant to Section 24353 and may similarly make resubstitutions.

Article 2. Deposits in County Treasury

24370. The board may draw from time to time from the construction fund and deposit in the county treasury of the office county any money in the construction fund in excess of twenty-five thousand dollars (\$25,000).

County treasurer's responsibility 24371. The county treasurer shall receive and receipt for district money deposited with him and place it to the credit of the district, and he shall be responsible upon his official bond for the safe-keeping and disbursing of the money.

Restrictions on county treasurer 24372. The county treasurer shall pay out district money or any portion of it only to the treasurer of the district and only upon the order of the board signed by the president and attested by the secretary.

Reports by county treasurer 24373. A county treasurer having charge of district money shall report as to it in writing on the second Monday in each month all of the following:

(a) Amount in the county treasury at the close of the month next preceding.

(b) Amounts received in the month next preceding.

(c) Amounts paid out in the month next preceding.

The report shall be verified and filed with the secretary.

Article 3. Special Accounts

Special accounts from general fund 24390. The board may by resolution establish special accounts from the general fund when they are convenient for the efficient and economical operation of the district and designate the person or officer to have custody of the several accounts so established.

Supplied by warrant 24391. Special accounts from the general fund shall severally be supplied from the general fund by warrant in the same manner as in the payment of any claim against the district.

Report by custodian of fund 24392. The person in custody of any special account shall make a verified report in writing to the board between the first and tenth of each month showing all of the following for the month next preceding:

(a) Amount of money received by him for the account in his charge.

(b) Amount and items of expenditures from the account.

The report shall be filed with the secretary.

Restrictions on disbursements 24393. No payment shall be made from any special account except upon the written order of a person designated for the purpose by the board, which order shall indicate the purpose for which and the person to whom payment is to be made.

CHAPTER 3. FUNDS

Article 1. Funds Generally

Creation of funds 24475. The following funds are created to which district money properly belonging shall be apportioned:

(a) Bond principal fund.

(b) Bond interest fund.

(c) Construction fund.

(d) General fund.

Reserve fund 24476. A district may provide for a reserve fund to be used for the payment of the interest or principal of any outstanding bonds.

24477. A district may establish any fund required to comply with the terms of any plan by which any bonds are to be paid.

Funds required by bond plan

24478. To the extent that any fund contains money applicable to a sinking fund provided for in a refunding plan or modification of it, the treasurer shall withdraw the sinking fund money from the fund to the amount and at the times required by the terms of the refunding plan or modification of it and apply the money pursuant to those terms.

Withdrawals for sinking funds

24479. Surplus funds on hand and available for payment into a refunding bond sinking fund may on order of the board be paid into it.

Payments into refunding bond sinking fund

24480. Any money in a refunding bond sinking fund may be invested in bonds of the United States or of this State.

Investment in government or State bonds

24481. Federal and State bonds so purchased with the sinking fund money together with the income from them shall be held as part of the sinking fund until the board determines that it is for the best interests of the district that the bonds or any of them be sold.

Part of sinking fund

24482. The proceeds from the sale of any bonds in which any part of the sinking fund was invested shall be deposited in the sinking fund.

Deposit Proceeds of sale of bonds

24483. The proceeds of the annual assessment shall be paid into the district treasury and be apportioned to the several proper funds.

Same Annual assessments

24484. The proceeds of limited assessments shall be paid into the district treasury for the purpose for which the assessments were respectively authorized.

Same Limited assessments

24485. The proceeds from the lease or sale of any property specifically allocated to the payment of warrants shall be placed in a separate fund and shall not be diverted to any other purpose until the warrants are paid in full.

Same Lease or sale of allocated property

24486. Whenever an object for which money has been specifically provided by district assessment or by bond issue has been accomplished and any money provided therefor remains unexpended, it may be transferred by the board to the general fund and thereafter be available for any district purposes.

Transfer and use of unexpended money

Article 2. Payment and Purchase of Bonds

24500. Upon presentation of any matured bond of the district, the treasurer shall pay it from the bond principal fund.

Payments from bond principal fund

24501. Upon presentation of any matured interest coupon of any bond of the district, the treasurer shall pay it from the bond interest fund.

Matured interest coupon

24502. If the estimate of the amount of the bond issue includes any amount for the payment of interest on the bonds of the issue, on order of the board there may be used for the payment of that interest so much of the proceeds of the sale of the bonds as was approved for that purpose in the report of the commission approving the issuance of the bonds.

Interest payable from proceeds of bond sale

- From special
or sinking
fund 24503. If the principal or interest of any bonds is payable from any special or sinking fund, it shall be payable from that fund.
- Interest
after
maturity 24504. If money is not available in the fund designated for the payment of any matured bond or interest coupon, it shall draw interest at the rate of 7 per cent per year from the date of its presentation for payment until notice is given that funds are available for its payment.
- Procedure
on non-
payment of
bond 24505. A bond presented but not paid shall be stamped and provision made for its payment as in the case of a warrant payable on demand for the payment of which funds are not available on its presentation.
- Purchase of
outstanding
bonds out of
surplus 24506. Whenever there is in any fund of the district money in excess of that required for the purposes of the fund up to the time when any part of the next annual assessment levied or to be levied in the district will become delinquent, the district may purchase with this surplus money or any part of it any of its outstanding bonds not yet due.
- May be
canceled
or held 24507. Bonds so purchased may be canceled or held as a part of the district assets until the board determines that it is for the best interests of the district that the bonds or any of them be sold. Bonds not resold prior to the date of their maturity shall be canceled.

Article 3. Improvement District Funds

- Cost of
improvements 24525. The cost of improvement district improvements shall be paid only out of the proceeds of an improvement district assessment levied upon and collected from the land in the improvement district for improvement purposes.
- Improvement
district
warrants 24526. Improvement district warrants shall be paid only out of the proceeds of an improvement district assessment levied upon and collected from the land within the improvement district for improvement purposes.
- Same
Sole use 24527. Improvement district warrants or their proceeds shall be used solely for making the improvements for which the improvement district was formed and the necessary incidental expenses.
- Formation
under alter-
native pro-
cedure 24528. The cost of the improvement for an improvement district formed pursuant to the alternative procedure may be paid immediately from either the general fund of the district or from any special or construction fund available, the money advanced to be returned to the fund from which taken upon the collection of assessments for the improvement district.
- Funds
available 24529. If the proceeds from any improvement district assessment levied for improvement purposes exceeds the final amount necessary for the purposes for which it was levied, the excess may either be held in a special fund to be used for the operation of the works of the improvement district or be transferred to the general fund of the district to be used as the board deems proper for the benefit of the land in the improvement district.
- Disposition
of excess
assessments

24530. Receipts from assessments levied for the operation of improvement districts and charges in lieu of the assessments, when collected, shall be deposited in a separate fund for the benefit of the improvement district to be used for its operation.

Disposition of other receipts and charges

CHAPTER 4. WARRANTS

Article 1. Payment of Claims

24600. No claim shall be paid by the treasurer until allowed by the board, and only upon a warrant signed by the president and countersigned by the secretary.

Manner of paying claims

24601. All claims against any district presented by any officer or employee for mileage, personal expenses, or for money expended by the claimant for the district shall be filed with the board upon a form furnished by the district.

Mileage, personal expenses, etc

24602. Claims set forth in Section 24601 shall be itemized in detail to show:

Same Requisite data

- (a) Date of each expenditure.
- (b) Place where the expenditure was made.
- (c) Purpose for which any money claimed was expended.
- (d) Miles traveled and purposes of trips for which mileage is claimed.

(e) Any other matters the board may require.

24603. The officer or employee presenting any claim provided for in Section 24601 shall verify it before the secretary, who is authorized to administer oaths for that purpose, or before any person authorized by law to administer oaths.

Same Verification

24604. The verification shall state in substance all of the following:

Statements in verification

(a) The money claimed was actually expended or the mileage stated was actually traveled for the district in pursuance of the duties of the officer or employee presenting the claim.

(b) The claim is presented in good faith and has not been previously paid.

Article 2. Warrants Payable at Future Times

24625. If any contract or lease for the acquisition of property provides for any future payments by the district, warrants may be issued, on order of the board, for the payments, which warrants shall be made payable at the times provided in the contract or lease.

Future payments under contract or lease

24626. When a particular purpose or emergency assessment has been authorized, warrants in an amount equal to the amount of the assessment may be issued on order of the board to carry out the purpose for which the assessment was authorized. These warrants shall be made payable at the time or times that the board estimates that they can be paid from the proceeds of the assessment.

Particular purpose or emergency assessments

Registered warrants	24627. Any outstanding registered warrants and their accrued interest may be refunded by the issuance of warrants payable at stated times fixed by the board. These warrants may be exchanged for the registered warrants or sold for not less than their par value to provide funds for the payment of the registered warrants or any of them and their accrued interest.
Consideration for which issuable	24628. Warrants payable at a future time or times may be issued in consideration of money loaned to the district for the purchase of any of its outstanding bonds or the refinancing or retiring of any outstanding contract. The annual interest payable on these warrants shall be less than the annual interest on the bonds purchased or contract refinanced or retired with the proceeds of the warrants.
Interest requirement	
Purpose for which issuable	24628.5. Warrants payable at a future time or times may also be issued to obtain funds or property for any lawful purpose of the district; provided, that, unless approved by the commission, the total amount of warrants payable in any one year shall not exceed one-fourth of 1 per cent of the total valuation of the land in the district according to the last equalized assessment roll.
Limitation	(Added by Stats. 1943, Ch. 685.)
Interest rate	24629. Any warrant authorized in the preceding sections of this article shall draw interest at a rate to be fixed by the board not to exceed 6 per cent per year payable annually or semiannually as the board may prescribe.
Bearer interest coupons	24630. Coupons payable to bearer in a form and signed as prescribed by the board may be attached to warrants payable at a future date to evidence their interest.
Issuable prior to levy of first district assessment	24631. Warrants of any district may be issued to evidence the indebtedness allowed to be incurred prior to the levy of the first district assessment, bearing interest fixed by the board at not more than 7 per cent per year. These warrants shall be made payable on a date not later than the first day of July next after the first annual assessment in the district is levied.
Payment out of proceeds of sale or lease	24632. If any district owns any property which it is authorized to lease or sell, its board may in the contract providing for the issuance of warrants payable at a future time, agree that the proceeds of the lease or sale of the property, not required by law to be used for other purposes, shall be allocated to the payment of these warrants.
Limitation on maturity	24633. No warrants issued pursuant to this article made payable more than five years from the date of issuance shall be valid unless their issuance is authorized by a majority of the voters voting at an election called by the board for the purpose of determining whether or not the warrants shall be authorized.
When election required	
Conduct of election	24634. Notice of the election shall be given and the election shall be held and the result determined as nearly as practicable in the manner provided for bond elections.

Article 3. Registration of Warrants

24650. The provisions of this article are applicable only to the following types of warrants: Types affected

- (a) Warrants made payable on demand.
- (b) Warrants issued to evidence the indebtedness allowed to be incurred prior to the levy of the first district assessment.

24651. Whenever any warrant of a district is presented to the treasurer for payment when funds are not available for its payment, it shall thereafter draw interest at a rate determined by resolution of the board but not exceeding 7 per cent per year until public notice is given that funds are available for its payment. Presentation when funds unavailable
Interest

24652. Upon the presentation of any warrants for payment when funds are not available to pay them, the treasurer shall indorse on them all of the following: Same Indorsement by treasurer

- (a) "Funds not available for payment."
- (b) Date of presentation.
- (c) Rate of interest that the warrants will thereafter bear.
- (d) His signature.

24653. A warrant so indorsed is a registered warrant. Effect of Indorsement

24654. The treasurer shall keep a record showing all of the following: Duty of treasurer

- (a) Number and amount of each registered warrant.
- (b) Date of its issuance.
- (c) Person in whose favor it was issued.
- (d) Date of its presentation for payment.

24655. Whenever there is sufficient money available in the treasury to pay all outstanding registered warrants or whenever the board orders all registered warrants presented for payment prior to a certain date to be paid and there is sufficient money available for the payments, the treasurer shall give notice to that effect. Notice of available funds

24656. The notice shall state that the treasurer is prepared to pay all registered warrants or all registered warrants presented for payment prior to the date fixed by the board. Statement in notice

No further description of the warrants entitled to payment need be made in the notice.

24657. The notice shall be published in a newspaper published in the district, or if none is published in the district, in a newspaper published in any affected county, or if none is published in any affected county, the treasurer shall post the notice conspicuously at the office of the district. Publication of notice

24658. All warrants designated in the notice shall cease to draw interest at the time of the first publication or posting of the notice. Interest ceases

24659. Upon the presentation of any warrant designated in the notice, the treasurer shall pay it together with the interest due on it from the date of its original presentation for payment to the date of the first publication or posting of the notice. Payment on presentation

Entries by treasurer	24660. The treasurer shall enter all of the following in the record of registered warrants he is required to keep: <ul style="list-style-type: none"> (a) Dates of the payment of the warrants. (b) Names of the persons to whom payments are made. (c) Amount paid to each person.
Limitation on action to enforce payment	24661. No action or proceeding shall be maintained to enforce the payment of any registered warrant or to require the levy of an assessment therefor unless the action or proceeding is commenced within four years from the date of the original presentation of the warrant to the treasurer for payment.
Agreement regarding payment	24662. A district may, subject to the consent of the commission, enter into agreement either individually or collectively with the holder or holders of any registered warrants fixing the time of, method of, and allocation of funds for the payment of the warrants and may in this agreement or otherwise waive the time of commencing any action or proceeding thereon.
Waiver of limitation on action	

CHAPTER 5. PROVISIONS APPLICABLE TO BONDS AND WARRANTS

Article 1. Surrender of Bonds and Warrants

Surrender for cancellation	24735. Any owner of any bonds or warrants of a district may surrender them to the district by giving the bonds or warrants to the secretary for cancellation.
Order to cancel	24736. The board shall then order the bonds or warrants canceled.
Obligation of district ceases	24737. Upon the making of the order, the bonds or warrants shall cease to be an obligation of the district as of the time of their presentation to the secretary.
Other methods of releasing obligations	24738. This article does not restrict any other method of releasing obligations of a district to it.

Article 2. Modification of Bonds and Warrants

Purposes	24760. If a district desires to extend the time or times of maturity of any or all of its bonds or warrants payable at stated times or to reduce the rate of interest thereon or to effect any combination of these, it may either:
Methods	<ul style="list-style-type: none"> (a) Enter into an agreement in writing with the holders of the bonds or warrants affected, specifying the changes in dates of maturity, rate or rates of interest, or both. (b) Propose a plan of composition of its outstanding indebtedness which involves changes in dates of maturity, rate or rates of interest, or both.
Maximum interest rate	24761. The rate of interest specified in the agreement or plan shall not exceed 6 per cent per year.
When interest payable	24762. All interest coupons shall be payable on the first day of January or the first day of July.
Submission of agreement	24763. The agreement or plan may be submitted to the commission.

24764. If the commission approves the agreement or plan, the board may call an election to submit to the voters the question whether or not the bonds or warrants shall be modified as provided in the agreement or plan. Election on question

24765. Notice of the election shall be given and it shall be held and its result declared as nearly as practicable as in the case of bond elections. Conduct of election

24766. If a majority of the votes cast for and against the proposal is in favor of modifying the bonds or warrants, the proposal is approved. Result of vote

24767. An agreement or plan may not be carried out pursuant to this article until a proposal therefor is approved by the voters, and a plan may not be carried out until it is either: Conditions of carrying out plan

(a) Agreed to in writing by all of the holders of bonds and warrants affected.

(b) Confirmed by a decree of any United States District Court in accordance with the provision of the National Bankruptcy Act, as amended.

24768. Upon the presentation to the secretary of any of the bonds or warrants covered by the agreement or plan, he shall indorse on them the date to which their maturity is extended and shall attach to them coupons with his signature or a facsimile of it to evidence the semiannual interest from the time or times of the original maturity of the bonds or warrants to the new maturity date or dates. Indorsement of new terms

24769. If the agreement or plan provides for a reduction in the rate of interest on the bonds or warrants before the original time or times of their maturity, new coupons shall be attached to the bonds or warrants to evidence the reduced interest. Any old coupons evidencing the interest originally provided shall be detached by the secretary from the bonds or warrants and canceled. Reduction in interest rate

24770. Each bond or warrant presented and indorsed shall continue as an obligation of the district and shall not become due until the date specified in the agreement or plan. Date of maturity

24771. This article does not amend, modify, or limit any other provision of law for changing the date or dates of maturity of outstanding obligations of a district, but provides an alternative method of extending any obligations whose date or dates of maturity may be changed under any other provision of law. Effect on other provisions of law

PART 9. BONDS

CHAPTER 1. CONSTRUCTION BONDS

24950. Construction bonds may be authorized for the purposes of acquiring necessary irrigation, drainage, and power development and distribution works, acquiring the necessary property for these works, acquiring any property necessary Authorized purposes

for the purposes of the district, and otherwise carrying out the provisions of this division.

Estimation
of amount
required

24951. The board shall at any of the following times estimate the amount of money it is necessary to raise for the purposes for which construction bonds may be issued:

(a) As soon after the district has been formed as may be practicable.

(b) Whenever the board finds that the construction fund raised by the next preceding bond issue is insufficient or has been exhausted by expenditures therefrom and it is necessary to raise additional money for the purposes for which construction bonds may be authorized.

Surveys,
examina-
tions, etc

24952. The board shall cause any surveys, examinations, and drawings, to be made which will furnish the proper basis for making an estimate of the amount of money necessary to be raised.

Same Who
shall direct

24953. The surveys, examinations, and drawings shall be made under the direction of a competent engineer and shall be certified by him.

Same Pro-
visions for
completion
of work

24954. The surveys, examinations, drawings, and estimate may provide that the works necessary for a completed project shall be constructed progressively during a period of years.

Payment
of interest

24955. The estimate may include a sum sufficient to pay the interest on the proposed construction bonds for three years or less.

Estimated
cost of
inspection

24956. The estimate shall include the estimated cost of inspection required by law of works in course of construction.

Data sub-
mitted to
commission

24957. The board shall then submit to the commission the plan of the project, including a copy of the estimate and the engineer's report.

Duty of
commission

24958. The commission shall forthwith examine the plan and any data in its possession or in the possession of the district and shall make any additional surveys and examinations it deems proper or practicable.

Report of
commission

24959. As soon as practicable thereafter the commission shall make to the board a report, which shall contain any matters which in the judgment of the commission may be desirable.

Conclusions
in report

24960. The report may state generally the conclusions of the commission regarding all of the following:

(a) The supply of water available for the project.

(b) The nature of the soil proposed to be irrigated as to fertility and susceptibility to irrigation, the probable amount of water needed for its irrigation, and the probable need of drainage.

(c) The cost of property necessary for a complete and satisfactory project.

(d) The proper dates of maturity for the bonds proposed to be issued.

(e) Its opinion as to whether or not it is advisable to proceed with the proposed bond issue.

24961. If after examination and investigation the commission deems any of the following to be advisable, it shall so state in its report to the board:

(a) The plans submitted should be modified.

(b) The amount of the bonds proposed to be issued should be changed.

(c) Certain conditions should be prescribed to insure the success of the project.

(d) The proposed bond issue should not be authorized.

24962. After receiving the report of the commission or failing to receive it within 90 days after the submission of the plan, estimate, and engineer's report to the commission, the board, if it declares by resolution that the proposed plan of the project or a modified plan recommended by the commission is satisfactory and that the plan or modified plan is feasible, shall make an order determining the amount of bonds that should be issued in order to raise the money necessary to complete the proposed project.

Order by board determining amount

24963. Construction bonds in an amount fixed in the order determining the amount in which they should be issued shall not be issued unless their issuance is authorized at a bond election, and the bonds in the amount fixed shall be issued when their issuance is authorized at a bond election.

Bond election

24964. When any district issues bonds to carry out any plans approved by the commission pursuant to this chapter, the district shall not make any material change in the plans without the consent of the commission.

Consent to change plans

CHAPTER 2. REFUNDING BONDS

Article 1. General Refunding Provisions

25035. Any district may issue refunding bonds for the purpose of refunding any or all of the outstanding bonds and warrants of the district.

Purpose

(Amended by Stats. 1943, Ch. 684.)

[ORIGINAL SECTION]

25035. Any district may issue refunding bonds for the purpose of refunding any or all of the outstanding bonds of the district

25036. To issue refunding bonds no survey, examination, drawing, plan, estimate, or report of the commission nor any resolution of the board that the proposed plan of the project is satisfactory is required, but in lieu thereof the board desiring to refund any bonds of the district shall submit to the commission its proposed plan for refunding the bonds.

Procedure

25037. Any district may make any expenditures or with the approval of the commission may incur indebtedness and issue warrants therefor for the purpose of paying the expenses incident to the making and execution of any refunding plan or any modification of it.

Payment of incidental expenses

25038. If the refunding plan is approved by the commission, the board shall call an election for the purpose of authorizing the issuance of the refunding bonds.

Election

Conduct of election	25039. Notice of the election shall be given and it shall be held and its result determined and declared substantially in the manner provided for a bond election, except that a majority vote only is required for the authorization of refunding bonds.
Necessary vote	25040. Any issue of refunding bonds may in the discretion of the board mature serially or at one time.
Maturity	25041. The maturities of refunding bonds shall be fixed by the board subject to the approval of the commission.

Article 2. Refunding Bond Sinking Fund

Creation	25060. If any issue of refunding bonds are made to mature at one time, the board prior to or at the time of their issuance shall provide for the creation of and payments into a sinking fund for the payment of the bonds in amounts determined by the board with the approval of the commission.
Modification of amount	25061. The amount of sinking fund payments may be modified from time to time by the board with the approval of the commission.
Redemption. Amount in fund, publication of notice	25062. Whenever the sinking fund contains at least ten thousand dollars (\$10,000), the board may publish notice of redemption at least once a week for three successive weeks in some newspaper published in the office county and may publish it in any other newspaper.
Contents of notice	25063. The notice shall set forth all of the following: <ul style="list-style-type: none"> (a) The amount available for the redemption of the bonds. (b) An invitation for sealed proposals for the sale to the district of any of its outstanding refunding bonds for the payment of which the sinking fund was created. (c) The time and place when the proposals will be opened.
Opening of proposals	25064. All proposals received in response to the notice shall be opened by the board in open meeting at the time specified in the notice or at a time to which the meeting is adjourned.
Rejection	25065. Any or all of the proposals may, in the discretion of the board, be rejected.
Purchase by district at private sale	25066. If no bids are received or if the bids received and accepted are not sufficient to exhaust the money on hand and available for the purpose, the district through its board may purchase at private sale with any available money in the sinking fund any bonds for the payment of which the sinking fund was created.
Maximum sales price	25067. No proposal to sell bonds to the district pursuant to this article at a price in excess of their par value shall be accepted.
Cancellation	25068. All bonds purchased from sinking fund money shall be forthwith canceled.

Article 3. Authorized Refunding Modification

Submission of proposed modification	25090. When one of the terms of a refunding plan approved by the commission reserves the right to modify the plan one or more times and the board thereafter desires to modify the plan, the board shall submit the proposed modification to the commission for approval.
-------------------------------------	---

25091. If the modification of a refunding plan is approved by the commission, the board shall call an election for the purpose of authorizing the modification of the plan. Election upon approval

25092. Notice of the election shall be given and it shall be held and its result determined and declared substantially in the same manner as a bond election, except that a majority vote only is required for the approval of the modification. Conduct of election
Necessary vote

Article 4. Unauthorized Refunding Modification

25110. The provisions of this article are applicable only to refunding plans which both: Refunding plans affected

(a) Were adopted prior to January 31, 1939.

(b) Then contained no provisions for modification.

25111. The terms of any refunding plan and of the refunding bonds outstanding thereunder may be modified from time to time provided the modification is approved in the manner provided in this article by all of the following: Approval necessary for modification

(a) The commission.

(b) The district.

(c) The holders of all of the outstanding refunding bonds affected.

25112. The approval of the modification by the district shall be given by a resolution of its board and by its voters at an election called by the board. Approval by district and voters

25113. Notice of the election shall be given and it shall be held in substantially the same manner as a bond election, except that a majority vote only is required for approval of the modification. Conduct of election

25114. The approval of the commission shall be given by an order of the commission upon application of the board of the district. Approval of commission

25115. The approval of the holders of outstanding refunding bonds affected by the modification shall be evidenced by either of the following: Approval of holders of outstanding refunding bonds

(a) The written consent of all of the owners and holders of the bonds.

(b) A decree of any United States District Court in accordance with the provisions of the National Bankruptcy Act, as amended, which decree provides that the modification is binding upon the holders and owners of all of the outstanding refunding bonds affected.

25116. If the modification is approved in the manner provided in this article, the district need not issue new refunding bonds and coupons in exchange for outstanding bonds and coupons the terms of which have been modified, but in lieu thereof the district may provide for the indorsement on the outstanding refunding bonds and coupons affected of the terms of the modification or a reference to its terms if contained in an instrument of modification or modified refunding plan, all as provided in the modification. Indorsement of modification

25117. If the modification or modified refunding plan provides for the extension of the time of maturity of all or any Indorsement of new maturity date

of the refunding bonds, the district in lieu of issuing new refunding bonds may indorse upon the face of the refunding bonds extended the new date of their maturity and attach to them new interest coupons to evidence interest payments to become due to the extended date of maturity of the refunding bonds.

Effect of indorsements

25118. All refunding bonds the terms of which have been modified shall continue to be binding outstanding bonds of the district and negotiable instruments irrespective of any indorsement of the terms of the modification or of the extension of the time of payment and shall be payable in accordance with their terms and the provisions of the modification.

Provision for subsequent modification

25119. Any modification of any refunding plan adopted pursuant to the provisions of this article may provide for its subsequent modification with the consent of the holders of any specified percentage of the refunding bonds affected by the modification in the manner provided in it.

CHAPTER 3. GENERAL BOND PROVISIONS

Article 1. Bond Terms

'Bonds'

25200. As used in this chapter "bonds" includes both construction and refunding bonds except as otherwise expressly provided.

Form

25201. Subject to the provisions of this article the board shall prescribe the form of the bonds issued by the district and of the attached interest coupons.

'Issue of bonds'

25202. An issue of bonds means all of the bonds issued in accordance with a single proposal approved at an election.

Numbering of issue and bonds

25203. Each issue of bonds shall be numbered consecutively as authorized, and the bonds of each issue shall be numbered consecutively.

Fixing dates

25204. The board shall fix the date of each issue of bonds and may divide any issue into two or more divisions and fix different dates for the bonds of each respective division.

Same Requisites

25205. The date of any bond shall be subsequent to the date of the election at which its issuance was authorized and prior to that of its delivery to a purchaser from the district.

Presumption as to date of issue

25206. The date of issue of any bond shall be deemed to be the date of the bond appearing on its face.

Denominations

25207. The board shall fix the denominations of the bonds, which shall be not less than one hundred dollars (\$100) nor more than one thousand dollars (\$1,000).

Interest

25208. The bonds shall bear interest at a rate not to exceed 6 per cent per year to be fixed by the board.

Same Payment

25209. The interest shall be payable on the first day of January and the first day of July of each year.

Places of payment

25210. The board shall designate the places at which the bonds and the interest thereon shall be payable.

Legal tender

25211. The bonds shall be payable in lawful money of the United States.

25212. Each bond shall be made payable at a given time for its full face value and not for a percentage thereof. When and how payable

25213. The principal on bonds shall be payable on the first day of January or the first day of July of the years designated by the board. Principal payments

25214. In no case shall the maturity of any bond be more than 50 years from its date. Maximum maturity

25215. When bonds are made callable, a statement to that effect shall be set forth on the face of the bond. Callable bonds

25216. Each bond shall be signed by the president and secretary then in office at any time between the date of the bond and its delivery to a purchaser from the district. Signature on bonds

25217. The seal of the district shall be impressed on each bond. Seal

25218. The interest coupons shall be signed by the secretary then in office at any time between the date of the bond and its delivery to a purchaser from the district. The signature of the secretary may be made by facsimile. Signature on interest coupons

25219. Unless otherwise provided in the proceedings for the issuance of the bonds, they and the interest on them shall be paid from money derived from an annual assessment upon land or charges which in the discretion of the board are fixed and collected in lieu thereof and all land shall be and remain liable to be assessed for these payments. Methods of providing payments

Article 2. Payment Solely from Revenue

25240. As used in this article and Article 3 of this chapter "revenue" means all or any part of any source or sources of payment excluding assessments but including the proceeds of any existing or proposed contract or contracts. "Revenue"

25241. If in the judgment of the board it is desirable that the principal or interest or both of any bonds or any part of the principal or interest be payable solely from revenue designated by the board, the board with the approval of the commission may so provide by resolution adopted at or prior to the time of the issuance of the bonds. Provision by resolution

25242. If any or all of the principal of any bonds is made payable only from revenue, the board shall cause a brief statement of the limitations upon the payment of principal or portion thereof to be set forth in the bonds. Statement of payment limitation in bond

25243. If the limitations affect the payment of the interest of the bonds or any part thereof, a brief statement of the limitations shall be set forth in the interest coupons representing the interest and also in the bonds to which the interest coupons are appurtenant. Same in interest coupons

25244. If the limitations affect the payment of only a portion of the interest which will accrue on any bonds, the board may provide either that: Limitation on portion of interest payment

(a) The entire installment of interest payable on any interest payment date shall be represented by a single coupon which shall contain a brief statement as to the portion of interest subject to the limitations.

(b) The portion of interest not subject to the limitations and the portion of interest subject to the limitations shall be represented by separate interest coupons, the coupons representing the portion of the interest as to which limitations exist containing a brief statement of the limitations.

Restrictive liability for payment

25245. If any board with the approval of the commission provides that the principal or interest or both of any bonds or any portion of the principal or interest or both shall be payable solely from designated revenue, neither the district nor any officer thereof shall be held for payment otherwise.

Article 3. Allocation of Revenue to Bond Payment

Allocation of revenue

25260. Any designated revenue may by resolution of the board be allocated to the payment of the whole or any portion of the principal or interest or both of any bonds.

Purposes

25261. The allocation may be for either or both:

(a) Payment of the whole or any part of the principal or interest or both of any bonds payable solely from revenue.

(b) As additional security for the payment of the whole or any part of the principal or interest or both of any bonds payable from assessments.

Sole use of revenue

25262. Until the payment or retirement of the bonds for the benefit of which an allocation was made, the revenue allocated shall be applied solely to the payment of the obligation specified in the allocating resolution.

For whose benefit

25263. An allocation may be made for the exclusive benefit of any one or more issues or portions of issues of bonds of a district designated in the allocating resolutions or in the discretion of its board for the benefit of any bonds of the district at any time issued or outstanding.

Period of irrevocability

25264. Any allocation shall be irrevocable until all of the bonds for which the allocation was made and their appurtenant coupons have been paid or retired.

Article 4. Allocation of Revenue to Reserve Fund

Irrevocable allocation to reserve fund

25280. Any sources of revenue of any district may by order of its board with the approval of the commission be irrevocably allocated to a reserve fund established to pay the interest or principal of any bonds.

Article 5. Callable Bonds

Redemption prior to maturity

25300. With the approval of the commission a district may by resolution of its board adopted at or prior to the time of issuing any bonds then proposed to be issued, provide for the call and redemption prior to their fixed maturity of any of the bonds.

Manner of redemption

25301. Callable bonds may be redeemed in addition to other methods permitted in the following manner:

(a) In numerical order or by lot as prescribed in the resolution.

(b) On any interest payment date prior to their fixed maturity.

(c) At not exceeding their par value and accrued interest or on the terms provided in the resolution.

(Amended by Stats. 1943, Ch. 1054.)

[ORIGINAL SECTION]

25301. Callable bonds may be redeemed in addition to other methods permitted in the following manner:

(a) In numerical order or by lot as prescribed in the resolution.

(b) On any interest payment date prior to their fixed maturity.

(c) At not exceeding their par value and accrued interest.

25302. Notice designating the bonds called for redemption shall be published once a week for three successive weeks in a newspaper of general circulation printed and published in the office county. Notice by publication

25303. The first publication of the redemption notice shall be not less than 30 days nor more than 90 days prior to the date fixed for redemption. Date of first publication

25304. If on the date fixed for redemption the district has provided funds available for the payment of the principal and interest of the bonds called, interest on them ceases. When interest ceases

Article 6. Bond Issuance

25325. A district may sell any bonds from time to time in such quantities as may be necessary and most advantageous to raise money for the purposes for which they were authorized. Authorized purposes

25326. Before any sale the board shall by resolution entered on its minutes set forth all of the following: Contents of resolution

(a) Its intention to sell a specified amount of the bonds.

(b) The day, hour, and place of sale.

25327. The board shall give notice of the sale by publication for at least three weeks in some newspaper published in the office county and in any other newspaper at its discretion. Notice of sale by publication

25328. The notice shall state that sealed proposals will be received by the board at the district office for the purchase of bonds until the day and hour specified in the resolution. Contents of notice

25329. At the time specified the board shall open the proposals and award the purchase of the bonds or any portion of them to the highest responsible bidder or bidders. Awarding purchase

25330. No proposal shall be accepted which is not accompanied by a certified check for a reasonable percentage of the amount of the bid as determined by the board, but in no event less than two per cent, to apply on the purchase price of the bonds. The amount of the check shall be forfeited if after the acceptance of his proposal the bidder refuses to complete his purchase on the terms stated in his proposal. Deposit
Forfeiture

25331. The board may reject any or all bids. Rejection of bids

25332. In case no award is made, the board thereafter may either readvertise the bonds or any part of them for sale or sell them at private sale. Readvertisement of private sale

25333. No sale of bonds at private sale shall be valid unless approved by the commission. Private sale
Approval by commission

Exchange of construction bonds 25334. A district may exchange its construction bonds for any property or interest in property which the district might acquire with the proceeds of the bonds, if sold, or for the capital stock of any corporation owning the property, upon terms the board deems best.

Disposition of refunding bonds 25335. Any refunding bonds may be either:
(a) Sold from time to time in the same manner as other bonds of the district.

(b) Exchanged for other bonds or warrants of the district upon terms approved by the commission.

(Amended by Stats. 1943, Ch. 684.)

[ORIGINAL SECTION]

25335. Any refunding bonds may be either:

(a) Sold from time to time in the same manner as other bonds of the district.

(b) Exchanged for other bonds of the district upon terms approved by the commission.

Cancellation 25336. Any outstanding bonds refunded or exchanged shall be immediately canceled by the treasurer.

Article 7. Bond Cancellation

Resolution 25350. Whenever the whole or any portion of any issue of bonds of any district remains unissued for more than one year after the date of the election at which the bonds were authorized, the board, by a resolution adopted by a two-thirds vote of the membership of the board, may cancel all or any of those bonds and all coupons appurtenant to them.

Same Date of consideration 25351. Whenever a resolution to cancel bonds is offered, its consideration shall be postponed to a date fixed by the board which is subsequent to final publication of the resolution.

Same Publication 25352. The resolution together with a notice stating the time fixed by the board for the consideration of the resolution shall be published once a week for at least two successive weeks in a newspaper published in the office county.

Same Effect of adoption 25353. After the adoption of a resolution to cancel bonds no other bonds shall be issued in pursuance of the proceedings taken in relation to the issuance of the bonds so canceled.

Destruction 25354. Any bonds and coupons so canceled shall be destroyed under the direction of the board.

PART 10. ASSESSMENTS

CHAPTER 1. ASSESSMENT

Article 1. Assessment Book

'Land' 25500. As used in this part "land" includes city and town lots and excepts improvements.

'Improvements' 25501. As used in this part "improvements" includes trees, vines, alfalfa, all growing crops, and all buildings and structures.

Time 25502. Annually, between the first Mondays in March and June the assessor shall assess all land in his district to the persons owning, claiming, possessing, or controlling it, except

Exception

that if all funds required to be raised are raised other than by assessment, no assessment need be levied and no assessment roll need be prepared or equalized.

(Amended by Stats. 1943, Ch. 916.)

[ORIGINAL SECTION]

25502. Annually, between the first Mondays in March and June the assessor shall assess all land in his district to the persons owning, claiming, possessing, or controlling it.

25503. All of the land shall be assessed at its full cash value as of the first Monday in March of that year. Land valuation

25504. The assessor shall prepare an assessment book with appropriate headings, in which shall be listed all of the land. Assessment book

25505. The book shall contain: Contents

(a) The name of the assessee if known to the assessor, and if the name is not known to the assessor, "unknown owners."

(b) A description of the land sufficient to identify it.

(c) An estimate of the number of acres except in the case of city or town lots.

(d) The cash value of the land.

(e) A separate designation and description of any land subject to a different rate of assessment from other land.

(f) A column for showing the changed valuations after equalization.

(g) Any other things required by the board.

25506. Columns with the headings "Lot" and "Block" or either of them may be provided in the assessment book for the designation of lots and blocks or either of them in any city, town, or recorded subdivision. Columns

25507. Land as to which a partial redemption has been effected shall thereafter be separately described on the assessment book. Partially redeemed land

25508. On or before the first Monday in August in each year the assessor shall complete his assessment book and deliver it to the secretary. Completion and delivery

Article 2. Land Escaping Assessment

25525. Any land which should have been assessed escaping the payment of any assessment for any reason shall in addition to its current assessment be entered in the assessment book by the assessor at the valuation which he deems proper for the year of the escaped assessment. Assessing escaped land

25526. The additional assessments on land escaping the payment of an assessment shall be equalized as provided in this part for current assessments. Equalization of additional assessment

25527. At the time of levying the current assessment the district by its board shall levy on land escaping the payment of an assessment an additional assessment at the rate fixed in the year of the escaped assessment. If no rate was legally fixed in that year, the district shall levy an assessment on the land at the rate which should have been computed in that year to raise the amount of money then required by the district. Rate of additional assessment

When payable 25528. The additional assessments shall be payable at the same times as the current assessment, and if not paid, shall be subject to like penalties and proceedings to enforce collection.

Article 3. Equalization

Notice of meeting 25550. Upon receiving the assessment book from the assessor the secretary shall immediately give notice of its receipt and of the time, fixed by the board, when the board acting as a board of equalization will meet to equalize assessments.

Publication of notice 25551. The notice shall be given by publication at least twice in a newspaper published in each affected county and if the office county is not an affected county, also in a newspaper published in the office county.

Date of first publication 25552. The notice shall be first published at least 20 days and not more than 30 days before the time fixed for the first meeting of the board as a board of equalization.

Failure to publish 25553. Failure to publish the equalization notice in any county other than the office county shall not affect the validity of any assessment on land in a county in which notice was published.

Inspection of assessment book 25554. Until the equalization is finished, the assessment book shall remain in the district office in the possession of the secretary for the inspection of all persons interested.

Hearing as board of equalization 25555. On the day specified in the notice of equalization, the board shall meet as a board of equalization to hear and determine objections to the valuation, acreage, or any matter pertaining to the assessment coming before it.

Duration 25556. The board acting as a board of equalization shall continue in session from time to time as long as may be necessary but not to exceed 10 days exclusive of Sundays.

Change in assessment 25557. The board acting as a board of equalization shall order any changes in the assessment that it deems just.

Secretary to make changes 25558. The secretary shall be present during the equalization proceedings and shall make all changes ordered in the assessment book.

Determination of gross assessed valuation 25559. Within 10 days after the close of the equalization session the secretary shall add the total values and determine the gross assessed valuation of the lands after final equalization by the board.

CHAPTER 2. LEVY

Article 1. Amount of Assessments Generally

Time of levy 25650. Each district by its board each year within 15 days after the close of its session as a board of equalization shall levy an annual assessment upon the land within the district in an amount sufficient to raise all of the following:

Amounts (a) Interest due or that will become due on all outstanding bonds of the district and interest which the board believes will become due on district bonds authorized but not sold, all respectively before the close of the next ensuing calendar year.

(b) Principal of all bonds of the district that have matured or that will mature before the close of the next ensuing calendar year.

To the extent that provision is otherwise made as permitted by law for the payment of bond principal and interest, levies for principal and interest pursuant to this section need not be made.

25651. (a) If a refunding bond plan or modification of it provides for the raising of a fixed amount each year to be applied to the payment of interest on or redemption of refunding bonds in the manner provided in the refunding plan or modification of it, the annual assessment shall include a levy in the amount required to be raised by assessment in that year pursuant to the plan or modification of it.

(b) If the proceedings in connection with the issuance of refunding bonds or modification of them provides for the raising of an amount to be paid annually into a sinking fund to pay the principal or interest of the refunding bonds, the annual assessment shall include a levy in an amount sufficient to provide the sinking fund payments for the current year. The amount required to be raised for the sinking fund shall be reduced by the amount of surplus funds from other sources in the sinking fund in excess of the amount required to be therein at the time of levying the current annual assessment.

25652. The annual assessment shall also include a levy sufficient to pay all of the following:

(a) Sums due or that will become due from the district before the close of the next ensuing calendar year on account of rentals or charges for property acquired by the district under lease or contract.

(b) Sums due or that will become due from the district before the close of the next ensuing calendar year on account of contracts for power or fuel for the pumping of water for irrigation within the district, the payment of the cost of which power or fuel has not been provided for in any other manner.

(c) All outstanding warrants of the district due or to become due before the close of the next ensuing calendar year.

(d) All obligations of the district which have been reduced to judgment.

25653. The annual assessment may include a levy sufficient to raise any or all of the following:

(a) The amount that the board determines is necessary for a depreciation fund for the replacement or reconstruction of any specific units of its works.

(b) The amount that the board determines is needed to be raised by assessment for any district purposes not exceeding 2 per cent of the aggregate value of the land according to the latest equalized assessment.

(c) An amount not exceeding 1 per cent of the total assessed value of the land that the board deems proper to pay

into the bond fund to be used for the purchase of bonds of the district not yet due or for payment into a fund to pay such bonds as they become due.

Same 25654. The annual assessment may include a levy on land included by inclusion proceedings subsequent to formation of the district sufficient to pay the obligations as they accrue assumed by the included land in the proceedings including it.

Charges in lieu of assessments 25655. A district may in lieu either in whole or in part of levying the annual assessments for district purposes use any revenue derived prior to or during the next ensuing calendar year from charges which the district may fix and collect pursuant to Section 22280.

Amounts added to assessment 25656. At the time of levying the annual assessment, there shall be added by the board to the annual assessment on land within any improvement district within any district:

(a) The installment, if any, for which the land is liable in that year by reason of an improvement district assessment levied pursuant to Chapter 1 or 2 of Part 7 of this division.

(b) An amount which the board may consider necessary for the operation of the works in or for the improvement district for the ensuing year.

Article 2. Completion Assessments

Conditions for levy 25670. A district shall by levy of a completion assessment provide for the completion of a plan of works adopted and the acquisition of necessary property, water, and water rights therefor when either:

(a) The money raised by the sale of authorized bonds is insufficient and additional bonds are not voted for these purposes.

(b) Bonds voted are unavailable for these purposes and additional bonds are not voted therefor.

Prerequisites 25671. A completion assessment shall not be levied until both:

(a) An estimate of the amount required to complete the plan has been made by the board.

(b) A proposal for making the levy has been approved by the voters.

Order of submission 25672. Before a completion assessment proposal is submitted to the voters, an order of submission shall be entered in the minutes of the board, stating:

(a) The amount to be levied.

(b) The purpose of the levy.

(c) The day of the election.

Notice of election 25673. Notice of the election shall be given by both:

(a) Posting notices in three public places in each election precinct in the district for at least 20 days.

(b) Publication in a newspaper published in the office county, once a week for at least three successive weeks.

Same Contents 25674. The notice of the election shall specify both:

(a) The day, hours, and polling places in each precinct for holding the election.

(b) The amount of assessment proposed to be levied.

25675. At the election the ballots shall contain the words "Assessment—Yes" and "Assessment—No" or equivalent words. Contents of ballots

25676. The election shall be held and the result determined and declared as nearly as practicable in conformity with the provisions governing general elections. Conduct of election

25677. If a majority of the votes cast at the election are "Assessment—Yes," the district by its board shall levy an assessment in the amount stated in the order of submission. Levy upon approval by voters

25678. If a majority of the votes cast are "Assessment—No," the result of the election shall be entered of record. Vote against levy

25679. No informalities in the conduct of the election shall invalidate the election if fairly conducted. Informalities in conduct

Article 3. Particular Purpose Assessments

25700. The amount of an assessment levied under this article is not limited by any other provision of this part. The levy of an assessment under this article does not limit the amount of any other assessment levied under this part. Amounts not limited

25701. The board may at any time call an election to submit to the voters a proposal to levy a particular purpose assessment to be applied to any of the purposes of the district. Submission of proposal at election

25702. The notice of the election shall set forth the following: Notice of election

(a) The day, hours, and polling places in each precinct for holding the election.

(b) The amount of money proposed to be raised by the assessment.

(c) A general statement of the purposes for which it is intended to be used.

(d) If the board so determines, a statement both that the assessment shall be levied in two or three annual installments and the amount of the installment to be levied each year

25703. At the election the ballots shall contain the words "Assessment—Yes" and "Assessment—No," or equivalent words. Contents of ballots

25704. The election shall be held and the result determined and declared as nearly as practicable in conformity with the provisions governing bond elections. Conduct of election

25705. If a majority of the votes cast at the election are "Assessment—Yes," the district by its board shall at the time of the levy of the annual assessments levy a sum sufficient to raise the amount voted or if the notice of election provides for annual installments, then a sum sufficient to raise the amount of the installment provided in the notice to be raised in the particular year. Action on approval by voters

Article 4. Emergency Assessments

25725. In cases of emergency by which the flow of water in a canal or other supply is interrupted, the amount of the cost of the repairs not to exceed in any one year forty thousand dollars (\$40,000) may, in addition to any other assessments, be levied by the adoption of a resolution by at least Conditions of levy

four-fifths of the members of the board at the time of the levying of the annual assessment, without the submission of a proposal for the levy to the voters.

CHAPTER 3. ASSESSMENT RATE

Article 1. Regular Rate

- Where entered** 25800. The secretary annually prior to delivering the assessment book to the collector shall compute and enter in a separate column of the assessment book the respective sums in dollars and cents to be paid as an annual district assessment on the land listed.
- How computed** 25801. The annual rate of assessments shall be equal to the sum to be raised for district purposes divided by 85 per cent of the aggregate equalized assessed value of the land as it appears on the assessment book for the assessment year, the 15 per cent being deducted for anticipated delinquencies.
- Special rate adjustment** 25802. If any land is subject to a special rate of assessment for district purposes, the rates of assessment shall be adjusted to produce the sum to be raised computed upon the 85 per cent of the aggregate equalized assessed value.
- Limited assessments** 25803. Limited assessments shall be computed and entered by the secretary and collected as a part of the annual assessment.
- Improvement district assessment** 25804. Annual installments of an improvement district assessment shall be entered in the assessment book by the secretary.
- Same Operation assessments** 25805. Operation assessments for an improvement district shall be computed upon the same valuation on land within the improvement district and entered in the same manner as the district annual assessment.
- Unpaid charges for water, etc** 25806. In case any charges for water and other services or either remain unpaid at the time specified for the delivery of the assessment book to the collector, the amount of the unpaid charges may be added to and become a part of the annual assessment levied upon the land upon which the water for which the charges are unpaid was used and upon the land subject to the charges for any other district services and shall constitute a lien on that land.
- Lien**
- Same: Addition to first installment** 25807. If the annual district assessment is payable in two installments the unpaid charges may be added to and become a part of the first installment.
- Date of delivery of assessment book** 25808. On or before the first day of November the secretary shall deliver the assessment book to the collector.

Article 2. Special Rate

- Petition Allegations** 25825. Any person having an interest in any land within the district may file with the secretary a verified petition alleging all of the following:
- (a) His land or a described portion of it was when it became a part of the district irrigated from another system of works than the works of or proposed for the district.

(b) It has continued ever since to be exclusively so irrigated.

(c) It is entitled to a special rate of assessment.

25826. The petition shall request that the board determine what proportion of the regular rates of assessment in the district should be used in levying assessments on the land described in the petition. Same Request

25827. A fee of ten dollars (\$10) shall be paid to the secretary before the filing of each petition for a special rate of assessment. The money shall be applied to the cost of the publication of the notice and other expenses of the hearing. If there is any balance after the conclusion of the hearing, it shall be returned to the petitioner or divided among the petitioners contributing thereto in proportion to the respective areas described in their petitions. Same Fee and its disposition

25828. The board shall set a time and place for the hearing of a petition for a special rate of assessment or of all the petitions if more than one has been filed and shall give notice of it in a newspaper published in the office county. Same. Publication of notice of hearing

25829. The notice for a special rate of assessment hearing shall state all of the following: Contents of notice

(a) Petitions have been presented to the board praying for a determination that certain land, which need not be described in the notice, is entitled to a special rate of assessment.

(b) The names of the petitioners.

(c) The time and place set for the hearing.

25830. The board shall meet at the time and place set for the hearing and proceed in the order it deems proper to hear the petitions and shall hear all competent and relevant evidence offered in support of any petition or in opposition to it and may adjourn the hearing from time to time. Hearing

25831. After the conclusion of the hearing, if the board finds that any of the land described in any petition has been irrigated as alleged and is not and will not be benefited by the operations of the district in a manner that would justify its assessment at the regular rate of assessment, the board shall reduce the rate of assessment on the land in an order entered in full upon its minutes. Findings

25832. The order shall: Action of board

(a) Describe the land entitled to a special rate of assessment or the respective parcels of it if separate parcels are to be assessed. Contents of order

(b) Fix the proportion of the regular rate of assessment which shall be applied in levying assessments on the land described or on each parcel of it if various parcels are found to be entitled to different special rates in order that the assessments to be levied on this land will be proportionate with the benefits which it receives or will receive from the operations of the district.

25833. A certified copy of an order determining that any land is entitled to a special rate of assessment shall be delivered to the assessor, and thereafter, until notified of a change Copy to assessor

Duties of
assessor

in the determination, he shall enter the land described in the order separately in the assessment book and designate it so that it may readily be distinguished from other land not entitled to a special rate.

When land
can not be
separately
described

25834. If a determination that any land is entitled to a special rate of assessment is made in any year too late for the land to be separately described in the assessment book but before the annual assessment has been levied, the board shall direct the secretary to make entries in the assessment book that will enable him to compute the assessments at the special rates determined by the board.

Changes in
determina-
tion of board

25835. The determination of the board granting or denying a special rate of assessment shall not be changed unless the board on petition of a party affected consents to another hearing or on its own motion causes notice to be served on the owner of the land to show cause why the determination should not be changed, in either of which cases another hearing shall be advertised and held as provided in this article.

CHAPTER 4. COLLECTION

Article 1. Collection Generally

When lien
attaches

25925. The annual district assessment upon land is a lien against the property assessed from and after the first Monday in March of the year in which the assessment is levied.

Publication
of notice
by collector

25926. The collector within 20 days after receiving the assessment book from the secretary shall start the publication of a notice specifying all of the following:

- (a) The assessments are due and payable.
- (b) The times when these assessments will be delinquent.
- (c) The penalties for delinquency.
- (d) The time and place at which payment of assessments may be made.

Period of
publication

25927. The assessment notice shall be published at least once a week for two successive weeks in a newspaper published in the office county and in a newspaper published in each other affected county.

Failure to
publish

25928. Failure to publish the assessment notice in any county other than the office county shall not affect any assessment on land in a county in which notice was published.

Duty of
collector

25929. The collector shall attend at the time and place specified in the assessment notice to receive assessment payments.

Legal tender

25930. Assessments shall be paid in lawful money of the United States.

Entry of
date of
payment

25931. The collector shall mark the date of payment of any assessment in the assessment book opposite the name of the assessee.

Contents
of receipt

25932. The collector shall give a receipt to the person making payment, specifying:

- (a) The amount of the assessment.

- (b) The amount paid.
- (c) The description of the property assessed.

Article 2. Installments

25950. The board may when it so desires and shall, when a written petition signed by a majority of the assessment payers in the district is filed requesting it, pass a resolution providing that thereafter annual assessments, including improvement district assessments or installments thereof but excepting completion assessments, shall be payable in two installments.

Resolution
for install-
ment pay-
ments

25951. The two installments shall be equal unless the resolution specifies different percentages to be paid in each installment, in which case the installments shall be payable as specified in the resolution.

Amount of
installments

25952. The resolution shall be adopted at or prior to the time of the levy of any annual assessment it is to affect.

Time for
adopting
resolution

25953. The resolution may be rescinded or modified only so as to affect any assessment levied subsequent to the rescission or modification.

Restrictions
on rescis-
sion or
modification

Article 3. Segregation before Delinquency

25975. Any person claiming an interest in any parcel of land described on the current assessment book against which there are no delinquent assessments who desires to have the parcel segregated into two or more portions and separately valued and assessed on the current assessment book may file with the collector of the district an application so requesting, with descriptions sufficient for assessment purposes of each portion into which the applicant desires the parcel to be segregated, valued, and assessed.

Application
and sufficient
descriptions

25976. The application may be filed at any time after the current assessment is due but not later than five days prior to the regular meeting of the board in December of the year in which the assessment was levied.

Time for
filing

25977. The application shall be signed, as evidence of their approval, by each of the persons assessed on the current assessment book with the parcel to be segregated.

Signatures
required

25978. Each application shall be accompanied by a fee of fifty cents (\$0.50) for each separate portion into which the applicant desires the parcel to be segregated.

Fee

25979. If the portions into which the applicant desires the land to be segregated have separate valuations shown on the current assessment book, the collector shall upon these valuations determine the amount of the current assessment due on each portion.

Basis for
current
assessment
by collector

25980. If the portions into which the applicant desires the land to be segregated do not have separate valuations shown on the current assessment book, the collector shall submit the descriptions of the portions to the assessor.

Descriptions
to assessors

25981. The assessor shall place a valuation on each described portion, and upon these valuations the collector

Valuation
by assessor

Duty of collector	shall determine the amount of the current assessment due on each portion as segregated.
Reference of data to board	25982. In either case, upon estimating the assessments due on the segregated portions, the collector shall refer to the board the segregated descriptions, valuations, and estimated assessments due.
Action of board	25983. The board may either: (a) Confirm, modify, or set aside the same. (b) Refuse to authorize the segregation, separate valuation, and assessment.
Aggregate valuations of segregated portions	25984. The aggregate of the valuations of the segregated portions shall be the same as the valuation of the parcel before segregation.
Board's decision final	25985. The decision of the board shall be final, and the collector shall conform with it.
Duties of collector upon board's action	25986. If the segregation and separate valuations and assessments are confirmed or modified, the board shall notify the collector, who shall cause the assessment book to be changed to show the segregation and separate valuations and assessments as confirmed or modified by the board, and he shall separately number the portions as segregated.
Assessments payable separately	25987. The assessment may thereafter be paid separately on any of the portions.

Article 4. Modification and Refund of Assessments

Order to collector	26000. A board shall order the collector to cancel or modify, as may be proper, an assessment when it finds that any property has been either: (a) Assessed in any year more than once. (b) Assessed by reason of a clerical error for more than its full cash value. (c) Computed for assessment on an excessive acreage. (d) Assessed while not in the district.
Order to treasurer	26001. On order of the board any assessments, penalties or costs thereon, or portions thereof, shall be refunded by the treasurer if they were either: (a) Paid more than once. (b) Erroneously or illegally collected.
Conditions of order for refund	26002. No order for a refund under this article shall be made except upon a claim both: (a) Verified by the person who paid the assessments, penalties, or costs, his guardian, executor, or administrator. (b) Filed within one year after the making of the payment sought to be refunded.

CHAPTER 5. DELINQUENCY

Article 1. Date and Penalties for Delinquency

Date	26075. Unpaid assessments not payable in installments are delinquent at 5 p.m. on the last Monday in December of the year in which they are levied.
------	---

26076. Whenever assessments are payable in installments, the first installment if unpaid is delinquent at 6 p.m. on the last Monday in December of the year in which the assessment was levied, and the second installment if unpaid is delinquent at 6 p.m. on the last Monday of the following June. The whole amount of completion assessments if unpaid shall become delinquent on the last Monday in December notwithstanding that assessments in the district are payable in installments. Dates for first and second installments

26077. The collector shall collect on delinquent assessments for the use of the district the following penalties: Penalties

(a) When assessments are not payable in installments, 5 per cent.

(b) When assessments are payable in installments:

(1) On the first installment, 10 per cent.

(2) On the second installment, 5 per cent.

26078. Upon the assessment, if not payable in installments, or the second installment of it, if payable in installments, becoming delinquent, the collector shall collect, in addition to the assessments due on the delinquent list and the penalties added, costs in the sum of fifty cents (\$0.50) on each parcel of land separately assessed. Costs

26079. If any duty relating to the assessment, levy, and collection of assessments is performed subsequent to the latest time it should have been performed, the time within which all duties consequent upon the performance of the preceding duty are to be performed shall be extended to allow the elapsing of the intervals required to elapse between the performance of the duties, and assessments shall not become delinquent for at least 30 days after the first publication of notice that the assessments are due and payable. Late performance of duty
Effect on other consequent duties
Delinquency date

26080. The assessment book, a copy of any portion of it certified by the collector, or the published list of delinquencies, showing unpaid assessments against any property is prima facie evidence of the assessment, the property assessed, the delinquency, the amount of assessments due and unpaid, and compliance with all forms of law relating to the assessment, equalization, and levy of the assessments. Prima facie evidence

26081. At any time after any assessment has become delinquent the board may direct the collector not to proceed with the sale of any delinquent property, but to bring suit against the delinquent in the proper court in the name of the district to enforce collection. Suit to enforce collection

26082. The provisions of the Code of Civil Procedure relating to pleadings, proofs, and trials are applicable to proceedings to enforce collection of assessments. Same Applicable provisions

26083. In a suit for assessments the district may recover the amount of the delinquent assessments, penalties, and costs of suit. Amounts recoverable

Article 2. Publication of List of Delinquencies

26100. When assessments are not payable in installments, the collector shall commence to publish the list of delinquencies on or before the first day of February.
26101. When assessments are payable in installments, the first publication of the list of delinquencies shall not be made before the first day of July nor after the first day of August.
26102. The published list of delinquencies shall contain all of the following information relating to each parcel of land separately assessed on which the assessment is delinquent:
- (a) The name of the assessee.
 - (b) The description of the land.
 - (c) The total amount due, which shall be the aggregate of the assessments, penalties, and costs due thereon.
26103. There need be no delinquent list other than the published list of delinquencies.
26104. The collector shall publish with the list of delinquencies a notice, specifying:
- (a) That each parcel separately assessed on which the amount due as shown on the list is not paid will be sold to the district.
 - (b) The time and place of the sale.
26105. The list of delinquencies and notice shall be published once a week for three successive weeks in a newspaper published in the county in which the delinquent property is situated but only information pertaining to and descriptions of land situated in the county need be set forth in the publication in that county.
26106. If any land assessed to the same person lies in more than one county, publication may be made in any county in which any portion of the land lies.
26107. Publication of the list of delinquencies and notice shall be made in the newspaper designated by the board. If assessments are not payable in installments, the designation of the newspaper shall be made by the board on or before the fifteenth day of December of the year in which the assessment was levied. If assessments are payable in two installments, the designation shall be made by the board on or before the fifteenth day of June following the year in which the assessment was levied. If the designation is not made by the board within the time provided in this section, the collector shall select the newspaper.
26108. If any error should occur in the publication of the notice of the sale of any delinquent property or the list of delinquencies which might invalidate a sale and the error is discovered prior to sale, the collector shall at once republish the notice of the sale and the items of the list of delinquency as to the property affected by the error, making the republication conform to this article.

Article 3. Assessment Sale

26125. The place of the delinquent sale shall be at a point, designated by the collector, within the district or at the district office. Place of sale

26126. The time of the delinquent sale shall be not less than 21 nor more than 28 days from the date of the first publication of the list of delinquencies or first republication as to property republished. Time

26127. The collector may postpone the day of the delinquent sale from day to day, but the sale shall be made within three weeks from the day fixed in the notice of the sale. If any sale is stayed by legal proceedings, the time during which the sale is stayed shall not be a part of the time limited for making the sale. Limitation on postponement

26128. On the day fixed for the sale in the published notice or on a subsequent day to which the collector may have postponed it the collector shall sell to the district the whole amount of each parcel of property separately assessed upon which the assessments remain unpaid. Property to be sold to district

26129. Thereupon the collector shall as to each parcel sold make an entry "sold to the district" in the assessment book. Entry of sale

26130. After the delinquent sale the collector shall make out in duplicate and sign a certificate of sale for each parcel separately assessed and sold, setting forth all of the following: Certificate of sale

- (a) A description of the property sold.
- (b) The amount for which it was sold.
- (c) A statement that it was sold for a delinquent assessment.
- (d) When the purchaser will be entitled to a deed.

26131. The certificate of sale may be in substantially the following form, the blanks being filled to show the facts in each case: Form

Certificate of Sale No. --
-----Irrigation District

I, the collector of ----- Irrigation District, certify that on the ----- day of -----, 19---, after giving the required notice, I sold to ----- Irrigation District, the purchaser, for the sum of ----- dollars (\$-----) real property in the county of -----, State of California, described as follows:

(Insert description.)

This land was assessed to -----.

This property was sold for a delinquent assessment levied on it in the year ----- by the district, and the sale price was the sum due and unpaid on the assessment and the penalties and costs.

The purchaser will be entitled to a deed to the property at any time after three years from the date of the sale unless in the meantime the property is redeemed.

Witness my hand and the seal of the district this ----- day of -----, 19---

(District Seal.)

Collector of ----- Irrigation District

- Disposition of duplicates 26132. Of each of the duplicate certificates of sale one shall be retained by the collector and the other shall be filed in the office of the county recorder of the county in which the property is situated.
- Duty of county recorder 26133. On receiving the certificate of sale, the county recorder shall file it and prepare an index in which in separate columns he shall enter all of the following:
 (a) Name of the assessee recited in the certificate.
 (b) Name of the assessing district.
 (c) Date of sale.
- Assignment of certificate 26134. The district as purchaser may assign any certificate of sale for a consideration of not less than the amount of the assessment, penalties, and costs.
- Notice of assignments 26135. The secretary shall notify the collector of assignments of certificates of sale.
- Mistake relating to ownership 26136. When property is sold for assessments imposed on it as the property of a particular person, no misnomer of the owner or supposed owner or any other mistake relating to the ownership of it affects the sale or renders it void or voidable.

CHAPTER 6. REDEMPTION AND ITS TERMINATION

Article 1. Redemption Generally

- Time and manner of redemption 26225. Property sold for delinquent assessments may be redeemed within three years from the date of sale, or thereafter before a collector's deed of the property has been delivered, by payment in lawful money of the United States to the collector of the amount for which the property was sold plus a penalty of three-fourths of 1 per cent per month from the date of sale until redemption.
- Certificates of redemption 26226. On receipt of the redemption money plus the amount of the recorder's fee fixed in this article the collector shall make out duplicate certificates of redemption reciting the payment and stating the date and number of the certificate of sale to which the redemption applies.
- Same To redemptioner 26227. One of the duplicate certificates of redemption shall be given to the redemptioner.
- Same Redemption of part of property 26228. In case of a redemption of part of any property described in a certificate of sale, the part redeemed shall be described in the certificate of redemption.
- Same To county recorder 26229. The collector shall present the other duplicate certificate of redemption to the county recorder in whose office the certificate of sale is on file, and the recorder shall either:
 (a) Attach the certificate of redemption to the certificate of sale to which it relates.
 (b) File the certificate of redemption and mark the word "redeemed" or "partially redeemed," as the case may be, and the date and by whom redeemed on the margin of the certificate of sale.
- Same Fee 26230. The county recorder shall collect a fee of fifty cents (\$0.50) for filing each certificate of redemption and making the marginal notations.

26231. When a certificate of sale has been assigned, the collector shall hold the redemption money for and on demand pay it to the holder of the certificate.

Right of
assignee of
certificate
of sale

26232. No incorrect statement or estimate of assessments due or amount required to redeem is binding upon a district or its officers unless the incorrect statement or estimate was in writing signed by the collector and relied upon in good faith by the party paying the amount designated.

When
incorrect
statements
binding on
district

(Added by Stats. 1943, Ch. 648.)

Article 2. Partial Redemption

26250. Redemption of a portion of any parcel of property separately from the whole parcel of which it is a part may be made as provided in this article at any time prior to the expiration of the period of redemption.

Time limit

26251. If the portion to be separately redeemed has a separate valuation shown on the assessment book, the collector shall determine the amount due according to the valuation shown on the assessment book, and redemption of the portion may be made in the manner provided for in Article 1 of this chapter.

Separate
valuation on
assessment
book

26252. If the portion to be separately redeemed does not have a separate valuation shown on the assessment book, the collector shall submit the description of the portion to the assessor.

When
description
submitted
to assessor

26253. The assessor shall place a valuation on the described property.

Valuation
by assessor

26254. The collector shall determine the amount due according to the valuation so placed upon the portion upon which separate redemption is requested and shall then refer the proposed redemption to the board.

Determina-
tion of
amount due
Reference
to board

26255. The board may either:

Decision
of board

(a) Confirm, modify, or set aside the valuation of the assessor.

(b) Refuse to authorize the separate redemption.

26256. The decision of the board shall be final, and the collector shall conform with it.

Decision
final

26257. Separate redemption, if authorized by the board, may be made in the manner provided for in Article 1 of this chapter.

Manner of
separate
redemption

26258. The redemptioner of a portion of a parcel of property may also pay that part of the current assessment levied against the parcel of land out of which the portion was separately redeemed, as may be determined by the board to be fair, based upon the valuation placed on the parcel as shown on the current assessment book.

Payment of
part of
current
assessment

26259. Upon payment of the amount fixed as the sum to be paid as the current assessment on the portion of land separately redeemed, the collector shall enter on the current assessment book a reference to the order of the board authorizing payment of part of the assessment, the amount paid, and date of payment.

Same
Duty of
collector

Article 3. Deed on Termination of Redemption

Deed to district or its assignee

26275. If property sold for delinquent assessments has not been redeemed and three years have elapsed from the date of its sale, the collector, upon demand, shall deliver a collector's deed to the property to the district or to the assignee holding the certificate of sale.

Contents

26276. Collector's deeds shall contain all of the following: (a) Date of the sale. (b) Statement that no person redeemed the property during the time allowed for its redemption.

Form

26277. The deed made by the collector may be in substantially the following form, the blanks being filled to show the facts in each case:

Collector's Deed

-----Irrigation District

On the-----day of-----, 19----, the collector of-----Irrigation District sold to-----Irrigation District for a delinquent assessment real property situated within the district and in the county of-----, State of California, described as follows:

(Insert description.)

No person has redeemed the property from the sale; the time for redemption has elapsed; and the purchaser has demanded a deed to the property.

Wherefore, I, the collector of-----Irrigation District, grant to-----all of the real property aforesaid.

Witness my hand and the seal of the district this-----day of-----, 19-----

(District Seal.)

----- Collector of ----- Irrigation District

Deed to assignee

26278. If a collector's deed is demanded by an assignee of a certificate of sale, the form of deed shall be amended by striking out the words "the purchaser" and inserting in lieu thereof substantially the following: "----- to whom the certificate of sale has been assigned."

Deed on partial redemption

26279. In case partial redemption has been made, the form of the collector's deed shall be modified to conform to the facts.

Fee for making deed

26280. The collector shall receive from the purchaser for the use of the district two dollars (\$2.00) for making the deed except when the deed is to the district.

District as grantee

26281. When a district is the grantee, the collector shall make duplicate deeds to the property.

Article 4. Effect of Deed

Vests absolute title Exceptions

26300. A collector's deed conveys to the grantee free of all encumbrances the absolute title to the property described in it except when the land is owned by the United States or

this State, in which case it is prima facie evidence of the right of possession.

26301. Where property has been conveyed to a district by a collector's deed, the district shall have the same rights in respect to the property and its rents, issues, and profits as a private purchaser. Rights of district

26302. A collector's deed when acknowledged or proved is prima facie evidence that: Prima facie evidence

- (a) The land was assessed as required by law.
- (b) The land was equalized as required by law.
- (c) The assessments were levied in accordance with law.
- (d) The assessments were not paid.
- (e) At a proper time and place the property was sold as prescribed by law.
- (f) The property was not redeemed.
- (g) The person who executed the deed was the proper officer.

26303. Except as against actual fraud a collector's deed acknowledged or proved is conclusive evidence of the regularity of all of the proceedings from the assessment by the assessor, inclusive, up to the execution of the deed. Conclusive evidence

26304. An action, proceeding, defense, answer, counterclaim, or cross-complaint based on the alleged invalidity or irregularity of any collector's deed executed to the district or based on the alleged ineffectiveness of the deed to convey the absolute title to the property described in it may be commenced or interposed only within one year after the recordation of the deed. Statute of limitations on collector's deed

26305. An action, proceeding, defense, answer, counterclaim, or cross-complaint based on the alleged invalidity or irregularity of any agreement of sale, deed, lease, or option executed by a district in connection with property deeded to it by its collector or based on the alleged ineffectiveness of the instrument to convey or affect the title to the property described in it may be commenced or interposed only within one year after the execution by the district of the instrument. Same on instruments affecting acquired property

26306. The provisions of Sections 26304 and 26305 do not apply in the following cases: Same Exceptions

- (a) Where the assessments for which the property was sold were paid before the sale.
- (b) Where the property was redeemed after the sale.
- (c) Where the land was not subject to assessment at the time it was assessed.
- (d) Where no assessments were due on the land at the time of sale.
- (e) Where fraud is established.
- (f) Where the deed is void on its face
- (g) Where the owner of the land was at the time of the sale a minor or insane person, in which case the earliest time that the statute of limitations begins to run is when the disability is removed.

Burden of proof 26307. The burden of proof shall be upon the party urging the invalidity, irregularity, or ineffectiveness of an agreement, deed, lease, or option described in Sections 26304 and 26305 or of any assessments, sales, or assessment deeds of which he complains to show the invalidity, irregularity, or ineffectiveness, and he shall be required to plead specifically the grounds upon which he urges the invalidity, irregularity, or ineffectiveness.

Article 5. Recordation of Deed to District

Requirement for recording deed 26325. A certificate of the secretary on a collector's deed stating that it has been accepted by the board entitles the deed to be recorded.

Manner 26326. A collector's deed to a district may be recorded in the usual manner of recording deeds or as provided in this article.

Delivery of duplicate deeds to recorder 26327. Both of the duplicate deeds shall be delivered by the collector to the secretary, and the secretary shall deliver them to the county recorder of the county where the property is situated.

Retention of one duplicate 26328. The county recorder shall retain one of the duplicate deeds and use it as a printed form for the purpose of making a record in his office of the recorded collector's deed. This duplicate is a printed form of deed within the meaning of Section 4130 of the Political Code.

Notations 26329. The recorder shall note on the duplicate deed retained in his office all of the following:

- (a) Its filing number.
- (b) Exact time of its reception.
- (c) Name of the person at whose request it was recorded.
- (d) Notation by the comparer that the record has been compared.

Deemed recorded 26330. The duplicate collector's deed retained by the recorder when properly noted as provided by this article and securely placed in the record books of his office is recorded within the meaning of the law and is constructive notice to all persons.

Other duplicate returned 26331. The recorder shall on the other duplicate of each collector's deed make the same notations as on the one retained in his office and return the unrecorded duplicate to the district.

CHAPTER 7. ASSESSMENT AND COLLECTION BY COUNTY

Article 1. Assessment and Levy by County

Levy by board of supervisors 26500. If a board neglects or refuses in any year to levy assessments pursuant to this part, the board of supervisors of the office county shall, as provided in this article, perform the duties of the board of the district in respect to levying assessments in the same manner and with the same effect as if they were performed by the board.

Basis of assessment 26501. The applicable part of the equalized county assessment rolls of the affected counties shall be the basis of

assessment for the district when its assessments are levied pursuant to this article.

26502. If any land subject to assessment for the purposes of the district does not appear upon a county assessment roll used as the basis of assessment for the district, the land omitted shall be forthwith assessed by the county assessor of the county in which it is situated upon an order of the board of supervisors making the assessment, and a description of the property omitted shall be written in the roll prepared for the district assessments.

Land not appearing on county assessment roll

26503. The board of supervisors shall meet and equalize each assessment made pursuant to this article with the assessment of other land in the district. The same notice shall be given by the board of supervisors of a meeting for the purpose of equalizing the assessment to be made as herein directed as is provided to be given by a district secretary when a board is to meet to equalize assessments.

Equalization

26504. All expenses incurred in levying the assessment shall be borne by the district concerned. Unless the expenses are paid within 60 days from the time when a demand for them is made, they shall be collected by an action commenced by the district attorney of the county whose board of supervisors prepared the assessment roll.

Expenses of levying Action for non-payment

Article 2. Collection by County

26525. In case of the neglect or refusal of the collector of any district to perform the duties imposed upon him, the tax collector of the office county shall perform his duties and be accountable therefor upon his official bond.

Collection by county tax collector

26526. When any county tax collector collects any assessments for any district, he shall pay the proceeds to the county treasurer of the office county.

Disposition of assessments collected

26527. As to money collected by the county tax collector and paid to the county treasurer, the county treasurer shall perform the duties ordinarily imposed on the treasurer of a district and be accountable therefor upon his official bond.

Duties of county treasurer

26528. The county treasurer shall place the money of the district in a special fund to the credit of the district and shall disburse it to the proper persons for the purposes for which the assessments raising it were levied.

Same

26529. The county treasurer shall not pay any part of the money to the treasurer of the district until the county treasurer is satisfied that all of the valid obligations for which the assessments were levied and for which payment has been demanded have been paid.

Restrictions on payment to district treasurer

Article 3. Supervision by District Attorney and Attorney General

26550. The district attorney of each office county shall ascertain each year whether the duties relating to the levying and collection of assessments in districts have been performed

Duties of district attorney

or not, and if he learns that the board or any official of any district has neglected or refused to perform any of these duties, he shall notify the board of supervisors or the county official required to perform the duty in the circumstances.

Action to
compel per-
formance

26551. Unless the board of supervisors or county official proceeds to perform the duties he has been notified to perform within 30 days after the receipt of notice, the district attorney shall take action in court to compel performance.

Notice to
other
officials

26552. The district attorney shall give notice to other officials and take any action necessary to secure the performance in their proper sequence of subsequent duties relating to the levying and collection of assessments.

Duty of
Attorney
General

26553. For the enforcement of the levying and collection of any assessment required to be levied and collected for the payment of any debt incurred, when complaint is made to the Attorney General that the district attorney of any county has not performed any duty devolving upon him by the provisions of this article or is not proceeding with due diligence or in the proper manner in the performance of the duty, the Attorney General shall make an investigation. If he finds the charge to be true, the Attorney General shall take any action necessary to enforce the performance of the duties relating to the levying and collection of assessments.

PART 11. CHANGES IN ORGANIZATION

CHAPTER 1. EXCLUSION

Article 1. Petition and Notice

Exclusion
petition

26700. The owners in fee of not less than one-half in area of a tract of land that is a portion of a district may jointly or severally file with the board a petition, praying that the tract be excluded from the district.

Executor,
etc., may
sign

26701. An executor, an administrator, or a guardian of an estate appointed under the laws of this State may on behalf of his ward or the estate which he represents, upon being authorized by the proper court, sign and acknowledge a petition to exclude land.

Acknowl-
edgment
Contents

26702. The petition shall be acknowledged.

26703. A petition for exclusion shall set forth all of the following:

(a) The reasons why it is claimed that the tract should be excluded.

(b) A description of the tract.

(c) A description of the land of each petitioner which is proposed to be excluded, which need not be more particular than is required when the land is entered in the assessment roll by the county assessor.

(d) A description of the land in the tract proposed to be excluded of each owner of record who does not sign the petition together with the name of its owner according to the

records of the county recorder of the county in which the land is situated.

26704. The secretary shall publish a notice of the filing of an exclusion petition for at least two weeks in some newspaper published in the office county and in a newspaper published in each other county containing land proposed to be excluded. If no newspaper is published in any one or more counties in which publication is required, notice shall be posted for the same time in at least three public places in the district, one of which notices shall be posted on the land proposed to be excluded.

Publication of notice of filing

26705. The notice shall contain:

Contents of notice

(a) A statement that a petition for exclusion of land has been filed.

(b) A description of the land proposed to be excluded.

(c) The names of the petitioners.

(d) The time of the hearing.

(e) An announcement that any persons interested in the proposed exclusion may appear at the district office at the time of the hearing and file objections in writing showing cause, if any they have, why the land or any of it should not be excluded.

26706. The time of the hearing specified in the notice shall be the regular meeting of the board next after the giving of the notice is complete.

Time of hearing

26707. Persons who do not at or before the hearing file objections in writing showing cause why the land should not be excluded and the petitioners assent to excluding the land in whole and in part.

Effect of failure to object

Article 2. Hearing and Order

26725. At the time and place mentioned in the notice or at the time to which the hearing of the petition may be adjourned the board shall hear the petition, all of the objections to it presented in writing, and all evidence introduced in support of the petition and objections.

Matters heard

26726. The evidence at an exclusion hearing shall be taken down in shorthand and a record made of it and filed with the board.

Shorthand record of evidence

26727. The expense of giving the notice and of the aforesaid proceedings on exclusion shall be paid by the persons filing the exclusion petition.

Payment of expenses

26728. Upon the hearing of an exclusion petition the board shall order that the petition be denied:

Grounds for denial

(a) Entirely when no evidence in support of the petition is introduced.

(b) As to any land described in the petition as to which the evidence introduced fails to sustain the petition.

(c) As to any land described in the petition which the board deems it not for the best interests of the district to exclude except when the board judges that the land will not be benefited by the operations of the district.

Grounds for
order of
exclusion

26729. The board after the hearing of any exclusion petition shall order the exclusion of all or any part of the land described in it when as to the land to be excluded either:

(a) The board judges that the land will not be benefited by the operations of the district.

(b) The board deems the exclusion to be for the best interest of the district and one of the following is true:

(1) No interested person has filed objections in writing showing cause why the land should not be excluded.

(2) All written objections made to the exclusion have been withdrawn.

(3) No written objection made to the exclusion is sustained at the hearing.

Entry
describing
change

26730. When a board excludes any land from a district, the board shall make an entry in its minutes describing the change so that the new boundary of the district can be ascertained.

Survey

26731. For the purpose of describing the change the board may cause any survey to be made it deems necessary.

Recordation
of copy of
entry of
exclusion

26732. A copy of the entry in the minutes excluding any land, certified by the president and secretary, shall be filed for record in the recorder's office of each affected county.

Effect of
exclusion
On prop-
erty rights

26733. No exclusion of land from any district impairs its existence, its rights, including those in or to property, or its obligations.

Same On
office of
director
from the
division

26734. If the land excluded from any district embraces the greater portion of any division of the district, the office of director from the division shall be vacant at the expiration of 10 days from the final order of the board excluding the land. The vacancy shall be filled by appointment by the board of supervisors of the office county from the district at large. A director so appointed shall hold office until the next general election for the district. A director then elected shall hold office for the unexpired term in the office of director from the division involved.

Article 3. Bondholders' Assent to Exclusion

Bondholders'
assent

26750. If there are outstanding bonds of the district at the time of the filing of an exclusion petition, the holders of the outstanding bonds may severally assent in writing to the exclusion of the land described in the petition or any portion of it that may be excluded from the district by order of its board.

Acknowl-
edgment

26751. The assent shall be acknowledged by each bondholder.

Recording
in minutes

26752. The assent shall be filed with the board and recorded in its minutes.

Minutes
as evidence
of assent

26753. The minutes containing the assent or a copy of them certified by the secretary shall be admissible in evidence with the same effect as the assent.

26754. A certified copy of the assent may be recorded in the office of the county recorder of the county in which the land to be excluded is situated. Recordation

26755. When an assent to the exclusion of any land has been given by any bondholder, no assessments shall thereafter be levied on the land excluded on account of the bonds held by him at the time he gave his assent. Effect of assent

Article 4. Liability of Excluded Land

26775. To the extent provided in Section 26755 the provisions of this article do not apply to outstanding bonds the holders of which have assented to the exclusion of the land from the district. Application of article

26776. Land excluded from a district shall be subject to assessment and be otherwise chargeable for the payment and discharge of all of the obligations outstanding at the time of the filing of the petition for the exclusion of the land as fully as though the land had not been excluded. Outstanding obligations

26777. For the purpose of discharging the obligations outstanding at the time of the filing of the petition for its exclusion, land excluded shall be considered as part of the district the same as though the land had not been excluded. Same: How considered

26778. All provisions which could be used to compel the payment by excluded land of its portion of the outstanding obligations had the exclusion not occurred may be used to compel the payment on the part of the land of the portion of the outstanding obligations of the district for which it is liable. Applicable provisions to compel payment

26779. Excluded land is not subject to assessment or otherwise chargeable for any obligation of any nature or kind incurred after the filing with the board of the petition for the exclusion of the land from the district. Nonliability

26780. If within 10 days of the time of any order excluding any land from a district other land of equal or greater assessable value is included within the district, the excluded land is no longer subject to future levy of assessment by the district, except in the event of proceedings on behalf of bondholders to enforce the payment by the excluded land of its proportionate share of any principal or interest due and unpaid on the district's bonded indebtedness incurred while the excluded land was part of the district. Same: Exception

Article 5. Exclusion of District-Owned Land

26800. If any land has been deeded to the district and the district still holds title to it, the board may by resolution declare its intention to exclude the land if the board determines that the exclusion will be for the best interests of the district. Resolution

26801. The resolution of intention to exclude district-owned land shall: Contents of resolution

- (a) Describe the land proposed to be excluded.
- (b) Give the reasons for the proposed exclusion.

(c) Fix the time for the hearing of the matter, which time shall be not less than 28 days after the date of the adoption of the resolution.

Notice 26802. Thereupon, the secretary shall give notice of the resolution of intention to exclude district-owned land in the manner prescribed for giving notice of a hearing to exclude other land.

Contents of notice 26803. The notice shall:
 (a) State the time of the hearing.
 (b) Describe the land proposed to be excluded.
 (c) Give the reasons for the exclusion stated in the resolution of intention.

(d) Notify all persons interested in the proposed exclusion that they may appear at the district office at the time fixed and file objections in writing showing cause, if any they have, why the land or any part of it should not be excluded as proposed in the resolution.

Conduct of hearing and other proceedings 26804. The proceedings at the hearing and thereafter shall be as provided for in the case of the exclusion of other land from the district, but no evidence need be taken except proof of the giving of the notice unless an objection in writing to the exclusion of all or part of the land is filed with the board at or before the time of the hearing.

CHAPTER 2. INCLUSION

Article 1. Petition and Notice

Land that may be included 26875. Land not a part of the district whether or not contiguous to it may be included within the district.

Qualified petitioners 26876. A majority of the holders of title to any tract of land who are also the holders of title to one-half or more of the area of the tract may file in the district office a petition praying that the tract of land be included within the district.

Owner of undivided interest 26877. If a petitioner is the owner of an undivided interest in land, he shall be deemed to be the owner of that fraction of the total area of the land which his interest bears to the whole.

Signature and acknowledgment by executor, etc 26878. An executor, an administrator, or a guardian of an estate appointed under the laws of this State may on behalf of his ward or the estate which he represents, upon being authorized by the proper court, sign and acknowledge a petition to include land.

Acknowledgment required 26879. The petition shall be acknowledged.

Statements in petition 26880. A petition for inclusion may either or both:

(a) State that if the land described in it is included within the district, it shall not become liable by assessment or otherwise for any of the outstanding obligations of the district and that the land then within the district shall not be liable by assessment or otherwise on account of any expenses for the acquisition of property then used or to be used for the irrigation of the land to be included, but that the land to be included shall be subject to any assessments and charges that may be necessary to provide for all or part of the cost of property

necessary to provide for its irrigation and the cost of maintaining and operating the property or the liability of the land to be included may be limited solely to the fixing and collecting of charges for the use of water on the included land.

(b) Set forth any other terms or conditions with respect to the inclusion of the land described in the petition and the liability of the land for any expenses to be incurred thereafter.

26881. The secretary shall give notice of the filing of an inclusion petition in the same manner and for the same time as notices of bond elections are required to be given. Manner of giving notice

26882. The notice shall contain: Contents of notice

- (a) A statement of the purpose of the petition.
- (b) A description of the land proposed to be included.
- (c) The names of the petitioners.
- (d) The time of the hearing.

(e) An announcement that any persons interested in the proposed inclusion may appear at the district office at the time of the hearing and file objections in writing showing cause, if any they have, why the land or any of it should not be included as proposed in the petition.

26883. The time of the hearing specified in the notice shall be the regular meeting of the board next after the giving of the notice is complete. Time of hearing

26884. The petitioners shall advance to the secretary sufficient money to pay for the publication of the notice of the inclusion hearing. Publication expenses

26885. Persons who do not at or before the hearing file objections in writing showing cause why the land should not be included and the petitioners assent to including the land in whole and in part. Effect of failure to object

Article 2. Hearing and Order

26900. At the time and place mentioned in the notice or at the time to which the hearing of the petition may be adjourned the board shall hear the petition, all of the objections to it presented in writing, and all evidence introduced in support of the petition and objections. Matters heard

26901. No land shall be included within a district unless the board after an inclusion hearing determines that it can be irrigated by means of some of the works of the district or by means of practicable works connecting therewith and will be benefited by the irrigation. Determination as to irrigation

26902. The board to which an inclusion petition is presented may require as a condition precedent to granting it: Conditions precedent to granting petition

(a) Payment by the petitioners severally to the district such respective sums, as nearly as they can be estimated by the board, as the petitioners or their predecessors in title would have been required to pay to the district as assessments had the land of the petitioners been included in the district at the time it was originally formed.

(b) The performance of any other conditions that the board may consider proper.

Grounds for inclusion

26903. The board after the hearing of any inclusion petition shall order the inclusion of all or any part of the land described in it, subject to any conditions that may be prescribed in any manner specified in this chapter, when as to the land to be included the following are true:

(a) The board finds that the petition complies with Article 1 of this chapter.

(b) The board finds that the inclusion of the land will be for the best interests of the district.

(c) Either that:

(1) No sufficient protest against the inclusion has been made by owners of land within the district.

(2) If a sufficient protest has been made, enough signatures have been withdrawn from it so that it is no longer sufficient.

Inclusion subject to conditions

26904. In making an order including land the board may provide that land included within the district shall be subject to the terms and conditions contained, pursuant to Section 26880, in the petition for inclusion.

Dismissal of petition

26905. If the board determines that only a part or parts of the land described in an inclusion petition should be included, the petition shall be dismissed except as to each part the board determines to include as to which either:

Excepted parts

(a) The petitioners include a majority of the holders of title to land in it who also are the holders of title to at least one-half of the area in it.

(b) Within 60 days from the time the determination is made, there is filed with the board the consent in writing of a majority of the holders of title to land in it who also hold title to at least one-half of the area in it.

Consent to inclusion of part of land

26906. A consent to the inclusion of a part of the land originally petitioned to be included shall be acknowledged.

Public lands of United States

26907. Any public land of the United States which can be irrigated by means of any of the works of the district or by any practicable works connecting therewith and will be benefited by the irrigation may be included within any district by order of its board without any petition therefor except as may be required by the laws of the United States.

Same Conditions of inclusion

26908. Agreeable to the laws of the United States and the proper regulations or consent of any authorized department thereof or the laws of this State, as the case may be, any conditions the board deems just may be imposed upon any public land of the United States or of this State as a part of the order of inclusion without the agreement or hearing provided for in Article 3 of this chapter.

Several petitions

26909. If more than one petition for the inclusion of land has been presented, the board may in one order include within the district any number of separate tracts of land.

Description of land in inclusion order

26910. An inclusion order shall describe the land included within the district by the inclusion proceeding.

Same Survey may be made

26911. For the purposes of describing the land the board may cause any survey to be made it deems necessary.

26912. A copy of the inclusion order, certified by the president and secretary, shall be filed for record in the recorder's office of each affected county. Recordation of inclusion order

26913. Upon the filing for record of the copies of the inclusion order, the secretary shall record the inclusion petition in the minutes of the board, and the minutes or a certified copy of them shall be admissible in evidence with the same effect as the petition. Minutes as evidence of petition

26914. No inclusion of land into any district impairs its existence, its rights, including those in or to property, or its obligations. Effect of inclusion

26915. Included land is subject to the provisions of this division except to the extent of any changes made by the conditions of inclusion. Applicable provisions

Article 3. Inclusion Subject to Conditions

26930. When the board finds that the inclusion of any land without condition would work an injury as to the land already within the district, the board may prescribe any conditions upon the inclusion of the land that the board deems just, which may include: Inclusion with conditions

(a) Priority of right to water for the land already in the district.

(b) Payment of an additional annual charge upon the land included.

26931. If any conditions are prescribed by the board, they shall not be effective until adopted in the manner provided by either the main or alternative procedure for including land subject to conditions. When conditions become effective

26932. Sections 26933 to 26936 constitute the main procedure for inclusion of land subject to conditions. Main procedure

26933. All of the owners of the land subject to the conditions shall before an order for its inclusion is made sign an agreement with the district describing the land so to be included and specifying the conditions. Agreement by owners

26934. The agreement shall be acknowledged. Acknowledgment

26935. The agreement shall be filed for record in the office of the county recorder of the county in which the land included is situated. Recordation

26936. Upon the filing for record of the agreement and upon the filing for record of a copy of the order including the land, the land shall become a part of the district subject to the conditions in the agreement. When land becomes part of district

26937. Sections 26938 to 26948 constitute the alternative procedure for inclusion of land subject to conditions. Alternative procedure

26938. The board may adjourn the hearing for not less than 30 nor more than 60 days. Adjournment of hearing

26939. The board shall give notice of the time and place of the adjourned hearing by publication for not less than once a week for three consecutive weeks in a newspaper of general Publication of notice of time and place

circulation published in the office county and in a newspaper of general circulation published in each other county containing land proposed to be included.

Contents of notice 26940. The notice shall set out at length the conditions proposed to be imposed and direct all persons interested to appear at the time and place specified in the notice and show cause in writing, if any they have, why the conditions should not be imposed.

Contents of order 26941. At the hearing or at any further adjournment thereof entered upon the minutes the board may by resolution adopt, reject, or modify the conditions as it deems just, and the order for inclusion shall contain the conditions the board finally adopts.

Final order 26942. The order shall be final when each copy required to be filed for record is filed for record.

Limitation on recording 26943. No certified copy of the order shall be filed for record for a period of 30 days after the making of the order.

Period for filing objections 26944. During the 30 days a majority of the holders of title to the land described in the petition for inclusion who also hold title to more than one-half of the area of that land may file with the secretary a statement or statements in writing signed by them objecting to the inclusion of the land with the conditions imposed thereon.

Acknowledgment of statement 26945. The statement shall be acknowledged.
Objections presented to board 26946. The secretary shall present the objections to the board.

Dismissal of petition 26947. If the board finds the objections to be in the required form and signed by the required number of holders of title, the board shall enter in its minutes an order dismissing the petition for inclusion, and no further proceedings shall be had thereon.

Same Without prejudice 26948. The order of dismissal shall be without prejudice to the filing of other petitions for the inclusion of the same land or any part of it.

Article 4. Protest Against Inclusion

Protest by landholders in district 26965. A protest against the inclusion of land, signed by not less than 3 per cent of the holders of title to the land within the district who are also the holders of title to not less than 3 per cent in value of the land within the district according to the last equalized assessment of the district, may be presented to the board prior to the hearing of the inclusion petition.

Withdrawal of protest or signatures 26966. Prior to or at the hearing of the inclusion petition the protest or any signatures to it may be withdrawn.

Protest or signatures not withdrawn 26967. If prior to or at the hearing the protest is not withdrawn or sufficient signatures to it are not withdrawn so that those remaining constitute less than 3 per cent of the holders of title to all of the land within the district or hold less than 3 per cent in value of the land within the district according to the last equalized assessment of the district, or if the board deems it not for the best interests of the district to include

in it any of the land described in the petition for inclusion, the board shall adopt a resolution stating the facts and describing the land proposed to be included in the district. Resolution

26968. Upon the adoption of the resolution, the board shall order that an inclusion election be held within the district to determine whether or not the land described in the resolution shall be included. Order of inclusion election

26969. Before calling an inclusion election the board may require an undertaking, with sufficient sureties, from the petitioners for the inclusion of the land conditioned that the petitioners or the sureties will pay all the costs of holding the election in case the inclusion is denied. Petitioners' undertaking with sufficient sureties

26970. When a sufficient protest against the inclusion is presented to the board, which is not withdrawn nor made ineffective by the withdrawal of signers from it, but the board declares that the inclusion of the land or a portion of it with conditions imposed will be for the best interest of the district, the proceedings shall continue as if no protest were filed, and the order of inclusion shall be made but shall not be filed for record nor become effective until after both of the following occur in the following order: Order of inclusion despite protest

(a) The conditions are adopted by the owners of or holders of title to the land to be included in the manner provided by either the main or alternative procedure for including land subject to conditions. Conditions for recordation and effectiveness

(b) An inclusion election is ordered and the inclusion upon conditions is approved by a majority of the votes cast at the election.

Article 5. Inclusion Elections

26985. The board shall fix the day for holding an inclusion election and cause notice of it to be given Notice of election

26986. The notice of an inclusion election shall describe the land to be included. Description in notice

26987. The notice of an election upon the inclusion of land with conditions, in addition to other requirements, shall contain a brief statement of the conditions imposed. Statement of conditions

26988. Notice of an inclusion election shall be given, and the election shall be held and conducted, its returns made and canvassed, and its result ascertained and declared in substantially the manner prescribed for a bond election. Manner of conducting election

26989. The ballots at an inclusion election shall contain "For inclusion" and "Against inclusion" or words equivalent thereto. Contents of ballots

26990. When the election is upon the inclusion of land with conditions the ballot shall contain "For inclusion with conditions" and "Against inclusion with conditions" Same inclusion with conditions

26991. If at an inclusion election a majority of all the votes cast are against the inclusion, the board shall order that the petition be denied and shall proceed no further in the matter. Majority vote against

26992. If a majority of the votes at an inclusion election are in favor of the inclusion, the board, except when the inclusion is subject to conditions imposed pursuant to the main or Majority vote for

alternative procedure for including land subject to conditions, shall thereupon order that the land be included in accordance with the resolution adopted by the board.

Land subject to conditions 26993. When the inclusion of land subject to conditions imposed pursuant to the main or alternative procedure is approved at an inclusion election, a certified copy of the order declaring the result of the election shall be filed for record of order with the order of inclusion.

CHAPTER 3. CONSOLIDATION

Article 1. Resolutions for Consolidation

Consolidation 27150. Two or more districts may be consolidated as provided in this chapter.

Preliminary consolidation resolution 27151. The board of a district shall pass a preliminary consolidation resolution when either:

(a) In the judgment of the board it is for the best interest of the district that it be consolidated with one or more other districts.

(b) There is presented to the board a petition requesting consolidation signed by signers equal in number to and possessing the qualifications of signers required to sign a petition for the formation of the district with its then boundaries.

Same Contents 27152. The preliminary consolidation resolution shall contain all of the following:

(a) Recital of the facts requiring the passage of the resolution.

(b) Declaration of the advisability of the consolidation and the willingness of the board to consolidate.

(c) Specification of the elective offices for the consolidated district agreed upon by the board.

(d) Name for the consolidated district agreed upon by the boards.

Same Certified copy to department 27153. Each board passing a preliminary consolidation resolution shall forward a certified copy of it to the department.

Article 2. Reference to Department

Investigation 27175. Upon the receipt of certified copies of the preliminary consolidation resolution adopted by two or more districts, the department shall forthwith make or cause to be made any investigation that it deems necessary.

Report 27176. Upon the completion of the investigation but not more than 90 days after the receipt by the department of a copy of the resolution from the board last adopting it, the department shall submit to each board its report thereon.

Same Contents 27177. The department shall include in the report:

(a) If the department considers advisable the elimination of a portion of the land in any of the districts to be consolidated, a recommendation to that effect and a statement of the reasons of the department therefor.

(b) A description of the land recommended to constitute the proposed consolidated district.

(c) A description of the divisions in the proposed consolidated district, which divisions shall be five in number.

27178. The department shall also include in the report :

Same
Further
contents

(a) If any of the land recommended to be eliminated has theretofore received water from the district in which it is situated, a recommendation of the portion, if any, of the assessments theretofore paid upon the land to the return of which the respective owners are equitably entitled.

(b) A recommendation as to the apportionment to the land in the respective districts of any outstanding indebtedness as the department deems equitable.

Article 3. Consolidation Elections

27200. A consolidation election to submit to the voters in each district the question of the consolidation shall be called by each board which has adopted a preliminary consolidation resolution by an order made either :

Order for
election

(a) Within 10 days after receiving the report on the consolidation from the department in which the department states the consolidation to be desirable.

(b) Upon the adoption by each board of a resolution declaring its determination that the proposed consolidation is desirable after either :

(1) Receiving the report on the consolidation from the department in which the department states the consolidation not to be desirable.

(2) Not receiving the report on the consolidation from the department within 90 days after the submission to it of the copy of the preliminary consolidation resolution from the board last adopting it.

27201. Notice of a consolidation election shall be given for the time and in the manner provided for notice of bond elections.

Notice

27202. The ballots shall contain "Consolidation—Yes" and "Consolidation—No" or words equivalent thereto.

Contents of
ballots

27203. At a consolidation election there shall be elected the directors and other officers of the consolidated district, who shall be nominated and voted for as provided for a general election.

Elective
officers

27204. A consolidation election shall be conducted and the returns canvassed so far as practicable in accordance with the requirements for a general election.

Conduct
and canvass

27205. If a majority of the votes cast in each district at a consolidation election are "Consolidation—Yes," the consolidation is approved.

Majority
vote
required

Article 4. Consolidation Order and Its Effect

27225. If the consolidation is approved at a consolidation election, the consolidation is effective, and the consolidated district under the name specified for it in the preliminary

Effect of
consolidation

	consolidation resolutions succeeds to all of the rights, privileges, and properties of all of the districts participating in the consolidation and shall be subject to all of their indebtedness, bonded and otherwise, as respectively apportioned.
Powers and duties	27226. When consolidated, the consolidated district possesses all of the powers of, is governed by, and is subject to all of the provisions of this division except as in this chapter otherwise provided as though originally formed pursuant to Part 2 of this division.
Qualification and organization of elective officers	27227. If the consolidation is approved at a consolidation election, the directors and other officers elected at the election shall thereupon become the officers of the consolidated district and shall qualify and organize in the manner provided for a newly formed district.
Order and contents	27228. Within 10 days after a consolidation is made, the board of the consolidated district shall make an order: <ol style="list-style-type: none"> (a) Declaring the consolidation effective. (b) Setting out the date that the consolidation became effective. (c) Describing the land in the consolidated district.
Recordation	27229. A copy of the order, certified by the president and secretary of the consolidated district, shall be forthwith filed for record in the office of the county recorder of each affected county.
Right of owners of eliminated land	27230. If any land eliminated from the proposed consolidated district never received water from the district in which it was situated, its owners are entitled to the return of all assessments theretofore paid upon the land.
Apportionment of outstanding indebtedness	27231. The board of a consolidated district within 60 days after the consolidation shall act upon the recommendation of the department as to the apportionment of any outstanding indebtedness, and the board shall apportion to the lands in the consolidated district any outstanding indebtedness as it deems equitable.
Same Levy of future assessments	27232. All future assessments necessary to retire the indebtedness shall be levied in accordance with the apportionment.
Sale of bonds	27233. Any bonds of any districts which have been consolidated, which bonds were authorized prior to the consolidation but which were not issued, may by order of the board of the consolidated district be sold or disposed of in the manner provided in this division, and the proceeds of the sale or disposition shall be applied to the purpose for which the bonds were authorized.

CHAPTER 4. VOLUNTARY DISSOLUTION

Article 1. Petition for Dissolution

Dissolution	27400. Any district may be dissolved in the manner provided in this chapter.
Assent of Secretary of Interior required	27401. When a contract authorized by law has been made between a district and the United States for the construction and operation of necessary works for the delivery of water

or for a water supply, the district shall not be dissolved and no proceedings had in any court or otherwise for the dissolution of the district until the written assent of the Secretary of the Interior is given to the dissolution.

27402. A majority in number of the holders of title to all of the land who are also the holders of title to a majority in value of all of the land according to the equalized assessment of the district for the year next preceding upon which any assessment has been made may propose the dissolution of the district by a petition signed by them. Petition

27403. The petition for dissolution shall set forth all of the following: Contents

(a) The amount of the outstanding indebtedness, if any, which need not include any obligations for the enforcement of which a suit was barred by law prior to filing the petition with the board.

(b) A general description of the indebtedness, showing the amount of each description of indebtedness and the names of the respective owners so far as known.

(c) The estimated cost of the dissolution of the district.

(d) The assets of the district, including works and water rights.

27404. The petition shall also set forth all of the following: Further contents

(a) A detailed statement of all the land sold to the district for assessments.

(b) The amount of the assessments on each parcel of land sold.

(c) All assessments unpaid.

(d) The amount of assessments unpaid upon each parcel of land.

(e) If any proposition has been made by the holders of the indebtedness to settle it, the proposition together with any plan proposed to carry it into execution.

27405. The petition shall be filed with the board. Filing petition

Article 2. Alternative Petition for Dissolution

27420. A petition to dissolve a district pursuant to this chapter shall conform to the provisions of this article if as to the district all of the following are true: Alternative petition

(a) It has no indebtedness except indebtedness a suit for which is barred by law.

(b) It has no assets.

(c) It has ceased to be a going concern.

(d) It has no irrigation system by which it conveys water for irrigation or domestic purposes to any of the residents in it.

27421. The petition shall be signed by two-thirds of the voters residing in the district and by the holders of title to at least 50 per cent of the acreage within the district and 50 per cent in value of all of the land, the value of the land to be determined by the next preceding equalized assessment of the district. Qualified petitioners

- Contents of
petition
27422. The petition for dissolution shall contain all of the following:
- (a) Statements showing the facts described in Section 27420.
 - (b) A statement that it is the desire of the signers of the petition to have the district dissolved.
 - (c) A recital that an application will be made to the superior court in and for the principal county for a decree of dissolution of the district under the provisions of this chapter. The petition need not contain any other matter.
- No plan
required
27423. In a petition prepared pursuant to this article no plan of dissolution is required.
- Filing
petition
27424. The petition shall be filed with the board.

Article 3. Dissolution Elections

- Calling
dissolution
election
27440. Upon the filing of a petition for dissolution the board shall call a dissolution election.
- Questions
submitted
27441. At a dissolution election there shall be submitted to the voters of the district the question of whether or not the district shall be dissolved, its indebtedness liquidated, and its assets distributed in accordance with the plan proposed in the petition for dissolution, or if no plan has been proposed, then in accordance with a plan proposed by the board in the notice of the election.
- No plans
required
27442. It is not necessary that any plan for the dissolution of a district or any plan for the liquidation of its indebtedness or the distribution of its assets be proposed by the board if the petition for its dissolution was prepared pursuant to Article 2 of this chapter.
- Assent of,
or provision
for, creditors
27443. If the district has any outstanding indebtedness a suit for the enforcement of which is not barred by law, the dissolution election shall not be called until the assent of all the known holders of valid indebtedness against the district is obtained or provision is made in the plan for the payment of nonassenting holders.
- Notice of
election
27444. Notice of a dissolution election shall be given by both:
- (a) Posting notices in three public places in each election precinct in the district for at least 20 days.
 - (b) Publication of notice in some newspaper published in the principal county, once a week for at least three successive weeks before the election.
- Contents
of notice
27445. The notice of the dissolution election shall set forth all of the following:
- (a) The time of holding the election.
 - (b) The fact that it is proposed to dissolve the district.
 - (c) A brief summary of the plan, if any, proposed for liquidating the indebtedness of the district and disposing of its assets.
- Conduct
and canvass
27446. A dissolution election shall be held and its result determined and declared as nearly as practicable in conformity with the provisions governing general elections.

27447. At a dissolution election the ballot shall contain "Dissolution of the district—Yes" and "Dissolution of the district—No" or equivalent words.

Contents of ballots

Article 4. Court Proceedings Upon Dissolution

27465. If upon the canvass it is found and declared by the board that two-thirds of the votes cast at the election are in favor of dissolution of the district the district shall file a petition in the superior court of the principal county to determine the validity of the proceedings had and of the proposed plan, if any, for the dissolution of the district.

Validation of proceedings and plan

If no petition is filed by the district within 30 days after the canvass of the vote, then any district assessment payer may file a petition for the same purpose in the superior court of the principal county.

By district assessment payer

27466. Proceedings brought by an assessment payer shall be had in the same manner and with the same effect as if brought by the district.

Conduct and effect

27467. The petition to the superior court shall set forth the facts required to be set forth in the petition for dissolution to the board and all of the proceedings thereon.

Requisite facts in petition

27468. Jurisdiction of all parties interested may be had by publication of a notice of the pendency of the proceeding for at least once a week for three weeks in a newspaper of general circulation published in one newspaper in each affected county. The newspapers shall be designated by the court in which the proceeding is pending.

Acquiring jurisdiction

27469. Jurisdiction shall be complete 30 days after the completion of the publication of the notice.

When jurisdiction completed

27470. When the proceeding is brought by an assessment payer, the district shall be a defendant. Instead of service of summons upon the district notice shall be served personally on all directors who can be found in the State. As to any director who can not be found in the State, service by publication as provided in this article is sufficient.

Procedure in assessment payer's proceedings

27471. The proceeding is in rem.

In rem

27472. The rules of pleading and practice in the Code of Civil Procedure not inconsistent with the provisions of this chapter are applicable to the proceeding.

Applicable rules

27473. The court shall disregard any irregularity or omission which does not affect the substantial rights of the parties.

Irregularities or omissions

Article 5. Dissolution Contests

27490. In the proceeding in the superior court contests may be had as provided in this article.

Dissolution contests

27491. Within 30 days after the completion of publication of notice of the proceedings anyone interested may appear and contest the validity of any or all of the following:

Time within which to appear and contest

(a) The proceedings for dissolution had prior to his appearance.

(b) The plan or any portion of it proposed for the dissolution of the district.

(c) The validity of any portion of the indebtedness set out in the petition for dissolution filed with the board.

Contest barred 27492. No contest of any matter which may be contested pursuant to this article shall be made other than in the time and manner specified in this article.

Speedy trial 27493. Contests shall be speedily tried and judgment rendered.

Costs 27494. The costs of any contest may be allowed and apportioned between the parties or taxed to the losing party in the discretion of the court.

Appeal 27495. Any party to a contest may appeal at any time within 30 days after the entry of judgment. The appeal shall be heard and determined within three months from the taking of the appeal.

Time of hearing and determination

Article 6. Dissolution Decree

Determination of regularity, etc. of proceedings 27510. At the hearing on a petition for dissolution the court shall hear and determine the regularity, legality, and correctness of all proceedings.

Matters determined 27511. The court may determine all of the following:

(a) The validity of any sales for assessments.

(b) The amount of any assessment or assessments due upon the various parcels of real estate within the district.

(c) The amount of any assessment or assessments theretofore paid upon the various parcels and lots of real estate therein.

(d) The rights and liabilities of all parties.

Acts to be performed by court order 27512. The court in its decree may make the orders necessary to do any or all of the following:

(a) Carry out the plan for the discharge of the indebtedness and distribution of the property of the district.

(b) Apportion any indebtedness found due and declare the portions to be liens upon the various parcels and lots of land within the district.

(c) Sell the assets of the district in such manner as may effectuate the plan and as the court may judge best, either in one lot or in parcels as may be provided.

(d) Convey the works, water rights, and any other assets of the district, including certificates of sale held by it and assessments due it.

Lien 27513. The amounts of any assessments found due upon the various parcels of land, other than assessments for which sales have been made to the district, together with legal interest from the time when the assessments became delinquent are liens respectively on the parcels affected thereby.

Same: Foreclosure 27514. A purchaser of the assessments at the sale ordered by the court and the holders of liens apportioned by the court may foreclose the same by action in the superior court and shall in the action join all these assessments and liens held by him and which remain unredeemed.

Redemption 27515. A redemption from these assessments and liens may be made at any time before foreclosure sale by payment of

the amount due to the clerk of the court for the use of the then holders of the assessments and liens and the clerk shall thereupon enter a minute of the payment, which payment shall discharge the lien.

Discharge of lien

27516. When land has been assessment sold by the collector, the manner of its redemption is provided for in Article 7 of this chapter.

Manner of redemption

27517. A corporation may be formed under the general corporation law for the purpose of acquiring the assets of a district, including the irrigation system, if any, dams, reservoirs, canals, franchises, and water rights, which corporation shall have all the powers, rights, and franchises of corporate bodies formed under the general corporation law, and in addition shall have any further powers as may be necessary to possess and carry on the irrigation system and exercise the franchises and water rights.

Formation of corporation to acquire assets

27518. Whenever all the property of a district has been disposed of and all the obligations thereof, if any, have been discharged, the balance of the money of the district shall be distributed to the assessment payers in the district upon the last assessment book in the proportion in which each has contributed to the total amount of the last assessment levied, and the court shall enter a final decree declaring the district to be dissolved.

Distribution of assets

Final decree of dissolution

27519. It shall not be necessary in winding up the affairs of a district to pay any portion of an obligation of the district for the enforcement of which a suit is barred by law.

Payment of barred obligations

Article 7. Redemption and Its Termination Upon Dissolution

27540. The period prescribed for the redemption of property sold for delinquent assessments does not bar the dissolution of any district.

Dissolution not barred

27541. If any land has been sold for delinquent assessments of a district in process of dissolution or in a district which has been dissolved and the time allowed for redemption has not expired, the owner of the property or anyone in interest may redeem it by paying the amount due on it to the county treasurer of the principal county, who shall issue his receipt therefor.

Procedure by owner

27542. The amount due shall be computed as if redemption were being made in a district not dissolved nor being dissolved.

Computation of amount due

27543. Upon the presentation of the receipt and filing fee of fifty cents (\$0.50) the county recorder shall attach it to the certificate of sale to which it relates or file it and mark the word "redeemed," the date, and by whom redeemed on the margin of the certificate of sale.

Duty of county recorder upon payment

27544. When any property has been sold for nonpayment of assessments, and no redemption has been made within the time allowed therefor, and the district has been dissolved before

Deed to purchaser

the expiration of the redemption period, a deed for the property sold and described in the certificate of sale shall upon demand be made to the purchaser by the county treasurer of the county in which the district or the greater part of it is or was situated.

Recitals
in deed

27545. The deed shall contain all the recitals of the certificate of sale and a recital that the district has been dissolved and a deed executed in pursuance of the authority given in this article.

Effect
of deed

27546. A deed so executed shall have the same effect as if executed by the collector of a district not dissolved.

CHAPTER 5. INVOLUNTARY DISSOLUTION

Article 1. Commencement of Proceeding

Involuntary
dissolution

27700. This chapter provides an alternative method for the dissolution of districts and does not prevent dissolution of a district by any other means.

Limited
application

27701. This chapter is limited in application to any district as to which either:

(a) All of the following are true:

(1) Has been organized for more than three years.

(2) Has neglected to secure an adequate water supply.

(3) Does not have a reasonable prospect of securing an adequate water supply for the land of the district without prohibitive cost.

(4) Has neglected to obtain the approval of the State Water Commission or the department of the water supply of the district.

(5) Has neglected to obtain the approval of the State Engineer or the department of the plans of the district.

(6) Has neglected to acquire a system of works or finance them.

(7) Has neglected to obtain the approval of the Irrigation District Bond Commission or the commission.

(b) Or all of the following are true:

(1) Has been organized for more than 10 years.

(2) For more than five years after the acquisition of a system of works has neglected to maintain the works or for more than five years after the works have been acquired has neglected to supply or make available water for the irrigation of more than 10 per cent of the land in the district.

Proceeding
by Attorney
General

27702. Any district may be dissolved by the superior court of the principal county by a proceeding brought by the Attorney General upon his own information in the name of the people of the State of California.

Prior publi-
cation of
notice of
intention to
start suit

27703. Before proceeding by the Attorney General to dissolve a district can be commenced, the Attorney General shall publish for two consecutive weeks in some newspaper published in the principal county a notice to all parties in interest that it is his intention to commence a proceeding for the dissolution of the district.

27704. The rules of pleading and practice in the Code of Civil Procedure not inconsistent with the provisions of this chapter are applicable to the proceeding provided in this chapter. Applicable rules

Article 2. Reference to Department

27725. Before the trial of a proceeding commenced by the Attorney General to dissolve a district the court may direct the department to investigate all the affairs of the district, including: Reference to Department of Public Works

(a) The water supply that may be obtained by the district without prohibitive cost. Matters of investigation

(b) The feasibility and practicability of irrigating all or a reasonable amount of the land.

(c) All other matters which the court may direct or the department may deem pertinent as affecting the possible success or failure of the district as an irrigation enterprise and which may be necessary to enable the court to determine the question of dissolution.

27726. For the purpose of making the investigation, the department shall have access to all the records of the district, and all officers and employees and other persons in any manner connected with or employed by the district shall furnish information which the department may require which has already been obtained or determined, including maps, plans, estimates, field notes, and other data. Access to records, official cooperation

27727. The department shall report its findings and conclusions to the court as soon as practicable and within 90 days or within any further time not exceeding 90 days granted by the court. Findings and conclusions

Article 3. Procedure upon Dissolution

27750. In the judgment of dissolution the court shall determine the amount of indebtedness outstanding against the district, including the costs of the court action in which the district is dissolved. Judgment of dissolution

27751. Upon final judgment of dissolution in a proceeding commenced by the Attorney General to dissolve a district the district shall be dissolved. When district dissolved

27752. Thereafter, the appropriate county officers of the principal county shall act as ex officio officers of the district. The county treasurer shall perform the duties of the district treasurer. The county tax collector shall perform the duties of the district collector. The county assessor shall perform the duties of the district assessor. The county clerk shall perform the duties of the secretary. The board of supervisors shall perform the duties of the board of directors. Ex officio officers

27753. The records and papers of every kind belonging to the district shall be turned over to the appropriate county officers. Disposal of records

Payment of
outstanding
indebtedness
by taxation

27754. The appropriate county officers shall proceed to levy and collect as much taxes as may be necessary upon the land formerly embraced within the district, in the same manner and with the same procedure for nonpayment that county taxes are levied and collected, for the purpose of paying any outstanding indebtedness not provided for by previous assessments.

Sale or
distribution
of property

27755. All property of every kind belonging to the district, including land sold to the district for assessments, shall be sold at public sale or shall be distributed to the owners of land within the district upon the terms and for the consideration the court may impose.

Use of
proceeds

27756. The proceeds, if any, from the public sale or the distribution together with all other moneys of the district on hand shall be used to discharge and pay any and all indebtedness of the district.

Disposition
of surplus
funds

27757. All funds remaining after all outstanding indebtedness has been paid shall be apportioned and paid to the assessment payers according to the last equalized assessment of the district.

Dissolution
not barred
by debts

27758. The outstanding indebtedness of any district shall not operate as a bar to dissolution by the superior court when provision is made for the payment of the indebtedness in the manner provided in this article.

PART 12. REPEALS

Repeals

CHAPTER 369

Stats 1943,
Ch 368,
amended

An act to add Division 5 and Section 150005 to the Water Code, relating to flood control by cities, counties, and the State, including provisions relating to the Reclamation Board, the Sacramento and San Joaquin Drainage District, and to repeal certain acts specified herein.

In effect
August 4,
1943

[Approved by Governor May 13, 1943. Filed with Secretary of State
May 13, 1943.]

Note.—See Stats. 1943, Ch. 368.

CHAPTER 370

Stats 1943,
Ch 368,
amended

An act to add Division 6 to the Water Code, relating to the conservation, development and utilization of the water resources of the State, including provisions relating to the State Water Plan, the Central Valley Project, the San Luis Rey Water Authority, the Colorado River Board, and to repeal certain acts specified herein.

In effect
August 4,
1943

[Approved by Governor May 13, 1943. Filed with Secretary of State
May 13, 1943.]

Note.—See Stats. 1943, Ch. 368.

CHAPTER 371

An act to add Division 10 and Section 150010 to the Water Code, thereby revising and consolidating the law relating to the financial supervision of irrigation and other public districts, including provisions relating to the approval and certification of bonds of such districts as legal investments and as security for the deposit of public money, provisions relating to the obligations and finances of such districts, and provisions relating to the California Districts Securities Commission and other State agencies having powers similar to said commission, and to repeal certain acts specified herein.

Stats 1943,
Ch 368,
amended

[Approved by Governor May 13, 1943. Filed with Secretary of State
May 13, 1943.]

In effect
August 4,
1943

Note.—See Stats. 1943, Ch. 368.

CHAPTER 372

An act to add Division 11 to the Water Code, thereby revising and consolidating the law relating to irrigation districts, including provisions for the supervision, regulation, and conduct of such districts, and to repeal certain acts specified herein.

BEFORE THE
COMMISSION ON STATE MANDATES
STATE OF CALIFORNIA

IN RE TEST CLAIM ON:

10-TC-12

Water Code Division 6, Part 2.55 [Sections 10608 through 10608.64] and Part 2.8 [Sections 10800 through 10853] as added by Statutes 2009-2010, 7th Extraordinary Session, Chapter 4;

Filed on June 30, 2011;

By, South Feather Water and Power Agency, Paradise Irrigation District, Richvale Irrigation District, Biggs-West Gridley Water District, Claimants;

Consolidated with

12-TC-01

Filed on February 28, 2013;

California Code of Regulations, title 23, sections 597, 597.1 597.2, 597.3, and 597.4, Register 2012, No. 28;

By, Richvale Irrigation District, Biggs-West Gridley Water District, Oakdale Irrigation District, Glenn-Colusa Irrigation District, Claimants.

Case Nos.: 10-TC-12 and 12-TC-01

Water Conservation

DECISION PURSUANT TO GOVERNMENT CODE SECTION 17500 ET SEQ.; CALIFORNIA CODE OF REGULATIONS, TITLE 2, DIVISION 2, CHAPTER 2.5, ARTICLE 7.

(Adopted December 5, 2014)

(Served December 12, 2014)

DECISION

The Commission on State Mandates (Commission) heard and decided this test claim during a regularly scheduled hearing on December 5, 2014. Dustin Cooper, Peter Harman, and Alexis Stevens appeared on behalf of the claimants. Donna Ferebee and Lee Scott appeared on behalf of the Department of Finance. Spencer Kenner appeared on behalf of the Department of Water Resources. Dorothy Holzem of the California Special Districts Association and Geoffrey Neill of the California State Association of Counties also appeared on behalf of interested persons and parties.

The law applicable to the Commission's determination of a reimbursable state-mandated program is article XIII B, section 6 of the California Constitution, Government Code sections 17500 et seq., and related case law.

The Commission adopted the proposed decision to deny the test claim by a vote of six to zero.

Summary of the Findings

The Commission finds that the two original agricultural water supplier claimants named in each test claim, Richvale Irrigation District and Biggs-West Gridley Water District, are not eligible to claim reimbursement under article XIII B, section 6, because they do not collect or expend tax revenue, and are therefore not subject to the limitations of articles XIII A and XIII B. However, two substitute agricultural water supplier claimants, Oakdale Irrigation District and Glenn-Colusa Irrigation District, are subject to articles XIII A and XIII B and are therefore claimants eligible to seek reimbursement under article XIII B, section 6. As a result, the Commission has jurisdiction to hear and determine test claims 10-TC-12 and 12-TC-01.

The Commission finds that the Water Conservation Act of 2009 (Act), and the Agricultural Water Measurement regulations promulgated by the Department of Water Resources (DWR) to implement the Act, impose some new required activities on urban water suppliers and agricultural water suppliers, including measurement requirements, conservation and efficient water management requirements, notice and hearing requirements, and documentation requirements, with specified exceptions and limitations.

However, the Commission finds that several agricultural water suppliers are either exempted from the requirements of the test claim statutes and regulations or are subject to alternative and less expensive compliance alternatives because the activities were already required by a regime of federal statutes and regulations, which apply to most agricultural water suppliers within the state.¹

Additionally, to the extent that the test claim statute and regulations impose any new state-mandated activities, they do not impose costs mandated by the state because the Commission finds that urban water suppliers and agricultural water suppliers possess fee authority, sufficient as a matter of law to cover the costs of any new required activities. Therefore, the test claim statute and regulations do not impose costs mandated by the state pursuant to Government Code section 17556(d), and are not reimbursable under article XIII B, section 6 of the California Constitution.

COMMISSION FINDINGS

I. Chronology

- | | |
|------------|---|
| 06/30/2011 | Co-claimants, South Feather Water and Power Agency (South Feather), Paradise Irrigation District (Paradise), Biggs-West Gridley Water District (Biggs), and Richvale Irrigation District (Richvale) filed test claim 10-TC-12 with the Commission. ² |
| 10/07/2011 | Department of Finance (Finance) requested an extension of time to file comments, which was approved. |

¹ See Public Law 102-565 and the Reclamation Reform Act of 1982 and the specific exceptions and alternate compliance provisions in the test claim statutes for those subject to these federal requirements, as discussed in greater detail in the analysis below.

Note that matters are only tentatively set for hearing until the draft staff analysis is issued which actually sets the matter for hearing pursuant to section 1187(b) of the Commission's regulations. Staff inadvertently omitted the word "tentative" in this notice.

¹⁸ Exhibit Q, Draft Proposed Decision.

- 08/14/2014 Glenn Colusa Irrigation District filed a request for an extension of time to comment and postponement of hearing to December 5, 2014, which was granted for good cause shown.
- 10/16/2014 Claimant filed comments on the draft proposed decision.¹⁹
- 10/17/2014 California Special Districts Association (CSDA) filed comments on the draft proposed decision.²⁰
- 10/17/2014 Environmental Law Foundation (ELF) filed comments on the draft proposed decision.²¹
- 10/17/2014 DWR filed comments on the draft proposed decision.²²
- 10/22/2014 Northern California Water Association (NCWA) filed late comments on the draft proposed decision.²³
- 11/07/2014 Claimants filed late comments.²⁴

II. Background

These consolidated test claims allege that Water Code Part 2.55 [Sections 10608 through 10608.64] and Part 2.8 [Sections 10800 through 10853] enacted by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7) (10-TC-12) impose reimbursable state-mandated increased costs resulting from activities required of urban water suppliers and agricultural water suppliers. The claimants also allege that the Agricultural Water Measurement regulations issued by DWR (12-TC-01), codified at California Code of Regulations, title 23, sections 597-597.4, impose additional reimbursable state-mandated increased costs on agricultural water suppliers only.

The Water Conservation Act of 2009, pled in test claim 10-TC-12, calls for a 20 percent reduction in urban per capita water use on or before December 31, 2020, and an interim reduction of at least 10 percent on or before December 31, 2015.²⁵ In order to achieve these reductions, the Act requires urban retail water suppliers, both publicly and privately owned, to develop urban water use targets and interim targets that cumulatively result in the desired 20 percent reduction by December 31, 2020.²⁶ Prior to adopting its urban water use targets, each supplier is required to conduct at least one public hearing to allow community input regarding the supplier's implementation plan to meet the desired reductions, and to consider the economic

²⁶ Water Code section 10608.20 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

impacts of the implementation plan.²⁷ This hearing may be combined with the hearing required under prior law (Water Code 10631) for adoption of the urban water management plan (UWMP).²⁸ An urban retail water supplier is also required to include in its UWMP, which is required to be updated every five years in accordance with pre-existing Water Code section 10621, information describing the baseline per capita water use; interim and final urban water use targets;²⁹ and a report on the supplier's progress in meeting urban water use targets.³⁰

With respect to agricultural water suppliers, the Act requires implementation of specified critical efficient water management practices, including measuring the volume of water delivered to customers and adopting a volume-based pricing structure; and additional efficient water management practices that are locally cost effective and technically feasible.³¹ In addition, the Act requires agricultural water suppliers (with specified exceptions)³² to prepare and adopt, and every five years update, an agricultural water management plan (AWMP),³³ describing the service area, water sources and supplies, water uses within the service area, previous water management activities; and including a report on which efficient water management practices have been implemented or are planned to be implemented, and information documenting any determination that a specified efficient water management practice was not locally cost effective or technically feasible.³⁴

Prior to preparing and adopting or updating an AWMP, the Act requires an agricultural water supplier to notify the city or county within which the supplier provides water that it will be preparing or considering changes to the AWMP;³⁵ and to make the proposed plan available for

³² See Water Code sections 10608.8(d) (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)) [agricultural water suppliers that are parties to the Quantification Settlement Agreement, as defined in Statutes 2002, chapter 617 are exempt from the requirements of Part 2.55 (Water Code sections 10608-10608.64)]; 10608.48(f); 10828 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)) [an agricultural water supplier may meet requirements of AWMPs by submitting its water conservation plan approved by United States Bureau of Reclamation]; 10827 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)) [members of Agricultural Water Management Council and submit water management plans to council pursuant to the Memorandum of Understanding may rely on those plans to satisfy AWMP requirements]; 10829 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)) [adoption of an urban water management plan or participation in an areawide, regional, watershed, or basinwide water management plan will satisfy the AWMP requirements].

³³ Water Code section 10820 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁴ Water Code sections 10608.48; 10820 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁵ Water Code section 10821 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

public inspection and hold a noticed public hearing.³⁶ An agricultural water supplier is then required to implement the AWMP in accordance with the schedule set forth in the AWMP;³⁷ and to submit a copy of the AWMP to DWR and a number of specified local entities, and make the plan available on the internet, within 30 days of adoption.³⁸

Finally, to aid agricultural water suppliers in complying with their measurement requirements and developing a volume-based pricing structure as required by section 10608.48, DWR adopted in 2012 the Agricultural Water Measurement Regulations,³⁹ which are the subject of test claim 12-TC-01. These regulations provide a range of options for agricultural water suppliers to implement accurate measurement of the volume of water delivered to customers. The regulations provide for measurement at the delivery point or farm gate of an individual customer, or at a point upstream of the delivery point where necessary, and provide for specified accuracy standards for measurement devices employed by the supplier, whether existing or new, as well as field testing protocols and recordkeeping requirements, to ensure ongoing accuracy of volume measurements.

To provide some context for how the the test claim statute and implementing regulations fit into the state’s water conservation planning efforts, a brief discussion of the history of water conservation law in California follows.

A. Prior California Conservation and Water Supply Planning Requirements.

1. Constitutional and Statutory Framework of Water Conservation.

Article X, section 2 of the California Constitution prohibits the waste, unreasonable use, unreasonable method of use, or unreasonable method of diversion of water. It also declares that the conditions in the state require “that the waste or unreasonable use or unreasonable method of use of water be prevented, and that the conservation of such waters is to be exercised with a view to the reasonable and beneficial use thereof in the interest of the people and for the public welfare.” Moreover, article X, section 2 provides that “[t]he right to water or to the use or flow of water in or from any natural stream or water course in this State is and shall be limited to such water as shall be reasonably required for the beneficial use to be served, and *such right does not and shall not extend to the waste or unreasonable use or unreasonable method of use or unreasonable method of diversion of water.*”⁴⁰ Although article X, section 2 provides that it is self-executing; it also provides that the Legislature may enact statutes to advance its policy.

The Legislature has implemented these constitutional provisions in a number of enactments over the course of many years, which authorize water conservation programs by water suppliers, including metered pricing. For example:

³⁶ Water Code section 10841 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁷ Water Code section 10842 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁸ Water Code sections 10843; 10844 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁹ Code of Regulations, title 23, sections 597-597.4 (Register 2012, No. 28).

⁴⁰ Adopted June 8, 1976. Derivation, former article 14, section 3, added November 6, 1928 and amended November 5, 1974 [emphasis added].

- Water Code section 1009 provides that water conservation programs are an authorized water supply function for all municipal water providers in the state.⁴¹
- Water Code section 1011 furthers the water conservation policies of the state by providing that a water appropriator does not lose an appropriative water right because of water conservation programs.⁴²
- Water Code sections 520 -529.7 require water meters and recognize that metered water rates are an important conservation tool.⁴³
- Water Code section 375(b) provides that public water suppliers may encourage conservation through “rate structure design.” The bill amending the Water Code to add this authority was adopted during the height of a statewide drought. In an uncodified portion of the bill, the Legislature specifically acknowledged that conservation is an important part of the state’s water policy and that water conservation pricing is a best management practice.⁴⁴
- Water Code sections 370-374 provide additional, alternate authority (in addition to a water supplier’s general authority to set rates) for public entities to encourage conservation rate structure design consistent with the proportionality requirements of Proposition 218.⁴⁵
- Water Code section 10631(f)(1)(K) establishes water conservation pricing as a recognized water demand management measure for purposes of UWMPs, and other conservation measures including metering, leak detection and retrofits for pipes and plumbing fixtures.⁴⁶

In addition, the Legislature has long vested water districts with broad authority to manage water to furnish a sustained, reliable supply. For example:

⁴¹ Statutes 1976, chapter 709, p. 1725, section 1.

⁴² Added by statutes 1979, chapter 1112, p. 4047, section 2, amended by Statutes, 1982, chapter 876, p. 3223, section 4, Statutes 1996, chapter 408, section 1, and Statutes 1999, chapter 938, section 2.

⁴³ Added by Statutes 1991, chapter 407 and amended by Statutes 2004, chapter 884, section 3 and Statutes 2005, chapter 22. See especially, Water Code section 521 (b) and (c).

⁴⁴ Statutes 1993, chapter 313, section 1.

⁴⁵ Statutes 2008, chapter 610 (AB 2882). See Exhibit X, Senate Floor Analysis AB 2882; Assembly Floor Analysis AB 2882.

⁴⁶ Water Code section 10631(f)(1)(K) (Stats. 1995, ch. 854 (SB 1011); Stats. 2000, ch. 712 (SB 553); Stats. 2001, ch. 643 (SB 610); Stats. 2001, ch. 644 (AB 901); Stats. 2002, ch. 664 (AB 3034); Stats. 2002, ch. 969 (SB 1384); Stats. 2004, ch. 688 (SB 318); Stats. 2006, ch. 538 (SB 1852)).

- Irrigation Districts have the power to take any act necessary to furnish sufficient water for beneficial uses and to control water.⁴⁷ They have general authority to fix and collect charges for any service of the district.⁴⁸
- County Water Districts have similar power to take any act necessary to furnish sufficient water and express authority to conserve.⁴⁹
- Municipal Water Districts also have broad power to control water for beneficial uses and express power to conserve.⁵⁰

2. Existing Requirements to Prepare, Adopt, and Update Urban Water Management Plans.

The Urban Water Management Act of 1983 required urban water suppliers to prepare and update an UWMP every five years.⁵¹ This Act has been amended numerous times between its original enactment in 1983 and the enactment of the test claim statute in 2009.⁵² The law pertaining to UWMPs in effect immediately prior to the enactment of the test claim statute consisted of sections 10610 through 10657 of the California Water Code, which detail the information that must be included in UWMPs, as well as who must file them.

According to the Act, as amended prior to the test claim statute, “[t]he conservation and efficient use of urban water supplies are of statewide concern; however, the planning for that use and the implementation of those plans can best be accomplished at the local level.”⁵³ The Legislature declared as state policy that:

- (a) The management of urban water demands and efficient use of water shall be actively pursued to protect both the people of the state and their water resources.
- (b) The management of urban water demands and efficient use of urban water supplies shall be a guiding criterion in public decisions.

⁴⁷ Water Code section 22075 added by Statutes 1943, chapter 372 and section 22078 added by Statutes 1953, chapter 719, p. 187, section 1.

⁴⁸ Water Code section 22280, as amended by statutes 2007, chapter 27, section 19.

⁴⁹ Water Code sections 31020 and 31021 added by Statutes 1949, chapter 274, p. 509, section 1.

⁵⁰ Water Code sections 71610 as amended by Statutes 1995, chapter 28 and 71610.5 as added by Statutes 1975, chapter 893, p. 1976, section 1.

⁵¹ Statutes 1983, chapter 1009 added Part 2.6 to Division 6 of the Water Code, commencing at section 10610.

⁵² Enacted, Statutes 1983, chapter 1009; Amended, Statutes 1990, chapter 355 (AB 2661); Statutes 1991-92, 1st Extraordinary Session, chapter 13 (AB 11); Statutes 1991, chapter 938 (AB 1869) Statutes 1993, chapter 589 (AB 2211); Statutes 1993, chapter 720 (AB 892); Statutes 1994, chapter 366 (AB 2853); Statutes 1995, chapter 28 (AB 1247); Statutes 1995, chapter 854 (SB 1011); Statutes 2000, chapter 712 (SB 553); Statutes 2001, chapter 643 (SB 610); Statutes 2001, chapter 644 (AB 901); Statutes 2002, chapter 664 (AB 3034); Statutes 2002, chapter 969 (SB 1384); Statutes 2004, chapter 688 (SB 318); Statutes 2006, chapter 538 (SB 1852); Statutes 2009, chapter 534 (AB 1465).

⁵³ Water Code section 10610.2 (Stats. 2002, ch. 664 (AB 3034)).

(c) Urban water suppliers shall be required to develop water management plans to actively pursue the efficient use of available supplies.⁵⁴

The Act specified that each urban water supplier that provides water for municipal purposes either directly or indirectly to more than 3,000 customers or supplies more than 3,000 acre feet of water annually shall prepare, update, and adopt its urban water management plan at least once every five years on or before December 31, in years ending in five and zero.⁵⁵

a. Contents of Plans

The required contents of an UWMP are provided in sections 10631 through 10635. These statutes are prior law and have not been pled in this test claim. As last amended by Statutes 2009, chapter 534 (AB 1465), section 10631 requires that an adopted UWMP contain information describing the service area of the supplier, reliability of supply, water uses over five year increments, water demand management measures currently being implemented or being considered or scheduled for implementation, and opportunities for development of desalinated water.⁵⁶ Section 10631 further provides that urban water suppliers that are members of the California Urban Water Conservation Council and submit annual reports in accordance with the “Memorandum of Understanding Regarding Urban Water Conservation in California,” may submit those annual reports to satisfy the requirements of section 10631(f) and (g), pertaining to current, proposed, and future demand management measures.⁵⁷

Section 10632 requires that an UWMP provide an urban water shortage contingency analysis, which includes actions to be taken in response to a supply shortage; an estimate of minimum supply available during the next three years; actions to be taken in the event of a “catastrophic interruption of water supplies,” such as a natural disaster; additional prohibitions employed during water shortages; penalties or charges for excessive use; an analysis of impacts on revenues and expenditures; a draft water shortage contingency resolution or ordinance; and a mechanism for determining actual reductions in water use.⁵⁸

Section 10633, as amended by Statutes 2002, chapter 261, specifies that the plan shall provide, to the extent available, information on recycled water and its potential for use as a water source in the service area of the urban water supplier. The preparation of the plan shall be coordinated with local water, wastewater, groundwater, and planning agencies that operate within the supplier's service area, and shall include: a description of wastewater collection and treatment systems; a description of the quantity of treated wastewater that meets recycled water standards; a description of recycled water currently used in the supplier's service area; a description and quantification of the potential uses of recycled water; projected use of recycled water over five year increments for the next 20 years; a description of actions that may be taken to encourage the

⁵⁴ Water Code section 10610.4 (Stats. 1983, ch. 1009; Stats. 1995, ch. 854 (SB 1011)).

⁵⁵ Water Code sections 10617 (Stats. 1996, ch. 1023(SB 1497)); 10621(a) (Stats. 2007, ch. 64 (AB 1376)).

⁵⁶ Water Code section 10631 (Statutes 2009, chapter 534 (AB 1465)).

⁵⁷ Water Code section 10631(i) (Statutes 2009, chapter 534 (AB 1465)).

⁵⁸ Water Code section 10632 (Stats. 1995, ch. 854 (SB 1011)).

use of recycled water; and a plan for optimizing the use of recycled water in the supplier's service area.⁵⁹

As added by Statutes 2001, chapter 644, and continuously in law up to the adoption of the test claim statute, section 10634 requires the UWMP to include, to the extent practicable, information relating to the quality of existing sources of water available to the supplier over the same five-year increments as described in Section 10631(a); and to describe the manner in which water quality affects water management strategies and supply reliability.⁶⁰

And finally, section 10635, added by Statutes 1995, chapter 330, requires an urban water supplier to include in its UWMP an assessment of the reliability of its water service to customers during normal and dry years, projected over the next 20 years, in five year increments.⁶¹

b. Adoption and Implementation of Plans

Sections 10640 through 10645, as added by Statutes 1983, chapter 1009 and Statutes 1990, chapter 355, provide the requirements for adoption and implementation of UWMPs, including public notice and recordkeeping requirements associated with the adoption of each update of the UWMP.

Section 10640 provides that every urban water supplier required to prepare an UWMP pursuant to this part shall prepare its UWMP pursuant to Article 2 (commencing with Section 10630), and shall "periodically review the plan ... and any amendments or changes required as a result of that review shall be adopted pursuant to this article."⁶² Section 10641 provides that an urban water supplier required to prepare an UWMP may consult with, and obtain comments from, any public agency or state agency or any person who has special expertise with respect to water demand management methods and techniques.⁶³

Section 10642 provides that each urban water supplier shall encourage the active involvement of diverse social, cultural, and economic elements of the population within the service area prior to and during the preparation of its UWMP. Prior to adopting an UWMP, the urban water supplier shall make the plan available for public inspection and shall hold a public hearing thereon. Prior to the hearing, notice of the time and place of hearing shall be published within the jurisdiction of the publicly owned water supplier pursuant to section 6066 of the Government Code. A privately owned water supplier is required to provide a similar degree of notice, and the plan shall be adopted after the hearing either "as prepared or as modified..."⁶⁴

Section 10643 provides that an UWMP shall be implemented "in accordance with the schedule set forth in [the] plan."⁶⁵ As amended by Statutes 2007, chapter 628, section 10644 requires an

⁵⁹ Water Code section 10633 (Stats. 2002, ch. 261 (SB 1518)).

⁶⁰ Water Code section 10634 (Stats. 2001, ch. 644 (AB 901)).

⁶¹ Water Code section 10635 (Stats. 1995, ch. 330 (AB 1845)).

⁶² Water Code section 10640 (Stats. 1983, ch. 1009).

⁶³ Water Code section 10640 (Stats. 1983, ch. 1009; Stats. 1995, ch. 854 (SB 1011)).

⁶⁴ Water Code section 10642 (Stats. 1983, ch. 1009; Stats. 1995, ch. 854 (SB 1011); Stats. 2000, ch. 297 (AB 2552)).

⁶⁵ Water Code section 10643 (Stats. 1983, ch. 1009).

urban water supplier to submit to DWR, the State Library, and any city or county within which the supplier provides water supplies, a copy of its plan and copies of any changes or amendments to the plans no later than 30 days after adoption. Section 10644 also requires DWR to prepare and submit to the Legislature, on or before December 31, in the years ending in six and one, a report summarizing the status of the UWMPs adopted pursuant to this part. The report is required to identify the outstanding elements of the individual UWMPs. DWR is also required to provide a copy of the report to each urban water supplier that has submitted its UWMP to DWR.⁶⁶ And lastly, in accordance with section 10645, not later than 30 days after filing a copy of its UWMP with DWR, the urban water supplier and DWR shall make the plan available for public review during normal business hours.⁶⁷

c. Miscellaneous Provisions Pertaining to the UWMP Requirement

While sections 10631 through 10635 provide for the lengthy and technical content requirements of UWMPs, and sections 10640 through 10645 provide the requirements of a valid adoption of a UWMP, several remaining provisions of the Urban Water Management Planning Act provide for the satisfaction of the UWMP requirements by other means, and provide for the easing of certain other regulatory requirements and the recovery of costs.

- Section 10631, as amended by Statutes 2009, chapter 534 (AB 1465), provides that urban water suppliers that are members of the California Urban Water Conservation Council shall be deemed in compliance with the demand management provisions of the UWMP “by complying with all the provisions of the ‘Memorandum of Understanding Regarding Urban Water Conservation in California’ ...and by submitting the annual reports required by Section 6.2 of that memorandum.”⁶⁸ These suppliers, then, are not separately required to comply with sections 10631(f) and (g), which require a description and evaluation of the supplier’s “demand management measures” that are currently or could be implemented.⁶⁹
- Section 10652 streamlines the adoption of UWMPs by exempting plans from the California Environmental Quality Act (CEQA). However, section 10652 does not exempt any project (that might be contained in the plan) that would significantly affect water supplies for fish and wildlife.⁷⁰
- Section 10653 provides that the adoption of a plan shall satisfy any requirements of state law, regulation, or order, including those of the State Water Resources Control Board and the Public Utilities Commission, for the preparation of water

⁶⁶ Water Code section 10644 (Stats. 1983, ch. 1009; Stats. 1990, ch. 355 (AB 2661); Stats. 1992, ch. 711 (AB 2874); Stats. 1995, ch. 854 (SB 1011); Stats. 2000, ch. 297 (AB 2552); Stats. 2004, ch. 497 (AB 105); Stats. 2007, ch. 628 (AB 1420)).

⁶⁷ Water Code section 10645 (Stats. 1990, ch. 355 (AB 2661)).

⁶⁸ Water Code section 10631 (as amended, Stats. 2009, ch. 534 (AB 1465)).

⁶⁹ Water Code section 10631(f-g) (as amended, Stats. 2009, ch. 534 (AB 1465)).

⁷⁰ Water Code section 10652 (Stats. 1983, ch. 1009; Stats. 1991-1992, 1st Ex. Sess., ch. 13 (AB 11); Stats. 1995, ch. 854 (SB 1011)).

management plans or conservation plans; provided, that if the State Water Resources Control Board or the Public Utilities Commission requires additional information concerning water conservation to implement its existing authority, nothing in this part shall be deemed to limit the board or the commission in obtaining that information. In addition, section 10653 provides that “[t]he requirements of this part *shall be satisfied by any urban water demand management plan prepared to meet federal laws or regulations after the effective date of this part*, and which substantially meets the requirements of this part, or by any existing urban water management plan which includes the contents of a plan required under this part.”⁷¹ The plain language of section 10653 therefore exempts an urban retail water supplier that is already required to prepare a water demand management plan from any requirements of an UWMP added by the test claim statutes.

- Section 10654 provides expressly that an urban water supplier “may recover in its rates the costs incurred in preparing its plan and implementing the reasonable water conservation measures included in the plan.” Any best water management practice that is included in the plan that is identified in the “Memorandum of Understanding Regarding Urban Water Conservation in California” (discussed below) is deemed to be reasonable for the purposes of this section.⁷² Therefore, suppliers are expressly authorized to recover the costs of implementing “reasonable water conservation measures” or any “best water management practice...identified in [the MOU for Urban Water Conservation].”
3. Prior Requirements to Prepare, Adopt, and Update Agricultural Water Management Plans, Which Became Inoperative by their own Terms in 1993.

The Agricultural Water Management Planning Act was enacted in 1986 and became inoperative, by its own terms, in 1993.⁷³ The 1986 Act stated in its legislative findings and declarations that “[t]he Constitution requires that water in the state be used in a reasonable and beneficial way...” and that “[t]he conservation of agricultural water supplies are of great concern.” The findings and declarations further stated that “[a]gricultural water suppliers that receive water from the federal Central Valley Water Project are required by federal law to develop and implement water conservation plans,” as are “[a]gricultural water suppliers applying for a permit to appropriate water from the State Water Resources Control Board...” Therefore, the act stated that “it is the policy of the state as follows:”

- (a) The conservation of water shall be pursued actively to protect both the people of the state and their water resources.
- (b) The conservation of agricultural water supplies shall be an important criterion in public decisions on water.

⁷¹ Water Code section 10653 (Stats. 1983, ch. 1009; Stats. 1995, ch. 854 (SB 1011)) [emphasis added].

⁷² Water Code section 10654 (Stats. 1983, ch. 1009; Stats. 1994, ch. 609 (SB 1017)).

⁷³ Statutes 1986, chapter 954 (AB1658). See Former Water Code section 10855 (Stats. 1986, ch. 954 (AB 1658)).

- (c) Agricultural water suppliers, who determine that a significant opportunity exists to conserve water or reduce the quantity of highly saline or toxic drainage water, shall be required to develop water management plans to achieve conservation of water.⁷⁴

Specifically, the 1986 Act provided that every agricultural water supplier serving water directly to customers “shall prepare an informational report based on information from the last three irrigation seasons on its water management and conservation practices...” That report “shall include a determination of whether the supplier has a significant opportunity to conserve water or reduce the quantity of highly saline or toxic drainage water through improved irrigation water management...” If a “significant opportunity exists” to conserve water or improve the quality of drainage water, the supplier “shall prepare and adopt an agricultural water management plan...” (AWMP).⁷⁵ The Act provided, however, that an agricultural water supplier “may satisfy the requirements of this part by participation in areawide, regional, watershed, or basinwide agricultural water management planning where those plans will reduce preparation costs and contribute to the achievement of conservation and efficient water use and where those plans satisfy the requirements of this part.” The requirements of an AWMP or an informational report, where required, included quantity and sources of water delivered to and by the supplier; other sources of water used within the service area, including groundwater; a general description of the delivery system and service area; total irrigated acreage within the service area; acreage of trees and vines within the service area; an identification of current water conservation practices being used, plans for implementation of water conservation practices, and conservation educational practices being used; and a determination of whether the supplier has a significant opportunity to save water by means of reduced evapotranspiration, evaporation, or reduction of flows to unusable water bodies, or to reduce the quantity of highly saline or toxic drainage water.⁷⁶ In addition, an AWMP “shall address all of the following:” quantity and source of surface and groundwater delivered to and by the supplier; a description of the water delivery system, the beneficial uses of the water supplied, conjunctive use programs, incidental and planned groundwater recharge, and the amounts of delivered water that are lost to evapotranspiration, evaporation, or surface flow or percolation; an identification of cost-effective and economically feasible measures for water conservation; an evaluation of other significant impacts; and a schedule to implement those water management practices that the supplier determines to be cost-effective and economically feasible.⁷⁷

The Act further provided that an agricultural water supplier required to prepare an AWMP “may consult with, and obtain comments from, any public agency or state agency or any person who has special expertise with respect to water conservation and management methods and techniques.”⁷⁸ And, “[p]rior to adopting a plan, the agricultural water supplier shall make the plan available for public inspection and shall hold a public hearing thereon.” This requirement

⁷⁴ Former Water Code section 10802 (Stats. 1986, ch. 954 (AB 1658)).

⁷⁵ Former Water Code section 10821 (as added, Stats. 1986, ch. 954 (AB 1658)).

⁷⁶ Former Water Code section 10825 (as added, Stats. 1986, ch. 954 (AB 1658)).

⁷⁷ Former Water Code section 10826 (as added, Stats. 1986, ch. 954 (AB 1658)).

⁷⁸ Former Water Code section 10841 (as added, Stats. 1986, ch. 954 (AB 1658)).

applies also to privately owned water suppliers.⁷⁹ In addition, the Act states that an agricultural water supplier shall implement its AWMP in accordance with the schedule set forth in the plan, and “shall file with [DWR] a copy of its plan no later than 30 days after adoption.”⁸⁰ Finally, the 1986 Act provided for funds to be appropriated to prepare the informational reports and agricultural water management plans, as required, and provided that “[t]his part shall remain operative only until January 1, 1993, except that, if an agricultural water supplier fails to submit its information report or agricultural water management plan prior to January 1, 1993, this part shall remain operative with respect to that supplier until it has submitted its report or plan, or both.”⁸¹

As noted above, the AWMP requirements provided by the Agricultural Water Management Planning Act became inoperative as of January 1, 1993,⁸² and therefore do not constitute the law in effect immediately prior to the test claim statute, even though, as shown below, the test claim statute reenacted substantially similar plan requirements. However, the federal requirement to submit water conservation plans to the United States Bureau of Reclamation pursuant to either the federal Central Valley Project Improvement Act (Public Law 102-565) or the federal Reclamation Reform Act of 1982, remained the law throughout and does constitute the law in effect immediately prior to the test claim statute, with respect to those suppliers subject to one or both federal requirements.⁸³

4. The Water Measurement Law, Statutes 1991, chapter 407, applicable to Urban and Agricultural Water Suppliers.

The Water Measurement Law (Water Code sections 510-535) requires standardized water management practices and water measurement, and is applicable to Urban and Agricultural Water Suppliers, as follows:⁸⁴

- Every water purveyor that provides potable water to 15 or more service connections or 25 or more yearlong residents must require meters as a condition of *new* water service.⁸⁵
- Urban water suppliers, except those that receive water from the federal Central Valley Project, must install meters on all municipal (i.e., residential and governmental) and industrial (i.e., commercial) service connections on or before January 1, 2025 and shall charge each customer that has a service connection for which a meter has been installed based on the actual volume of deliveries beginning on or before January 1, 2010 service. A water purveyor, including an

⁷⁹ Former Water Code section 10842(as added, Stats. 1986, ch. 954 (AB 1658)).

⁸⁰ Former Water Code sections 10843 and 10844 (as added, Stats. 1986, ch. 954 (AB 1658)).

⁸¹ Former Water Code sections 10853; 10854; 10855 (as added, Stats. 1986, ch. 954 (AB 1658)).

⁸² Former Water Code section 10855 (Stats. 1986, ch. 954 (AB 1658)).

⁸³ See Water Code section 10828 (added, Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

⁸⁴ The Water Measurement Law was added by Statutes 1991, chapter 407.

⁸⁵ Section 525 as amended by statutes 2005, chapter 22.

urban water supplier, may recover the cost of the purchase, installation, and operation of a water meter from rates, fees, or charges.⁸⁶

- Urban water suppliers receiving water from the federal Central Valley Project (CVP) shall install water meters on all residential and non-agricultural commercial service connections constructed prior to 1992 on or before January 1, 2013 and charge customers for water based on the actual volume of deliveries, as measured by a water meter, beginning March 1, 2013, or according to the CVP water contract. Urban water suppliers that receive water from the CVP are also specifically authorized to “recover the cost of providing services related to the purchase, installation, and operation and maintenance of water meters from rates, fees or charges.”⁸⁷
- Agricultural water providers shall report annually to DWR summarizing aggregated farm-gate delivery data, on a monthly or bi-monthly basis. However, the Water Measurement Law does not require implementation of water measurement programs or practices that are not locally cost effective.⁸⁸

The test claim statute, as noted above, requires agricultural water suppliers to measure the volume of water delivered to customers and to adopt a volume-based pricing structure. However, the test claim statute also contemplates a water supplier that is both an agricultural and an urban water supplier, by definition: section 10829 provides that an agricultural water supplier may satisfy the AWMP requirements by adopting an UWMP pursuant to Part 2.6 of Division 6 of the Water Code; and the definitions of “agricultural” and “urban retail” water suppliers in section 10608.12 are not, based on their plain language, mutually exclusive. The record on this test claim is not sufficient to determine how many, if any, agricultural water suppliers are also urban retail water suppliers,⁸⁹ and consequently would be required to install water meters on new and existing service connections in accordance with Water Code sections 525-527, and to charge customers based on the volume of water delivered. In addition, the record is not sufficient to determine whether and to what extent some agricultural water suppliers may already have implemented water measurement programs which were locally cost effective, in accordance with section 531.10. However, to the extent that an agricultural water supplier is also an urban water supplier, sections 525-527 may constitute a prior law requirement to accurately measure water delivered and charge customers based on volume, and the test claim statute may not impose new requirements or costs on some entities. And, to the extent that water measurement programs or practices were previously implemented pursuant to section 531.10, some of the activities required by the test claim statute and regulations may not be newly required, with respect to certain agricultural suppliers. These caveats and limitations are noted where relevant in the analysis below.

⁸⁶ Section 527 as amended by statutes 2005, chapter 22.

⁸⁷ Section 526 as amended by Statutes 2004, chapter 884.

⁸⁸ Section 531.10 as added by Statutes 2007, chapter 675.

⁸⁹ See Water Code section 10608.12, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7) for definitions of “agricultural water supplier” and “urban retail water supplier.”

III. Positions of the Parties

A. Claimants' Positions:

The four original claimants together alleged a total of \$72,194.48 in mandated costs for fiscal year 2009-2010 (although Paradise maintains a different fiscal year than the remaining claimants). In addition, claimants project that program costs for fiscal year 2010-2011, and for 2011-2012, will be “higher,” but claimants allege that they are unable to reasonably estimate the amount.

South Feather Water and Power Agency and Paradise Irrigation District

South Feather and Paradise allege that they are urban retail water suppliers, as defined in Water Code section 10608.12. As such, they allege that they are required to establish urban water use targets “by July 1, 2011 by selecting one of four methods to achieve the mandated water conservation.” South Feather and Paradise further allege that they are “mandated to adopt expanded and more detailed urban water management plans in 2010 that include the baseline daily per capita water use, urban water use target, interim urban water use target, compliance daily per capita water use, along with the bases for determining estimates, including supporting data.”⁹⁰ South Feather and Paradise allege that thereafter, UWMPs are to be updated “in every year ending in 5 and 0,” and the 2015 plan “must describe the urban retail water supplier’s progress towards [*sic*] achieving the 20% reduction by 2020.”⁹¹ Finally, South Feather and Paradise allege that they are required to conduct at least one noticed public hearing to allow community input, consider economic impacts, and adopt a method for determining a water use baseline “from which to measure the 20% reduction.”⁹²

Prior to the Act, South Feather and Paradise allege that there was no requirement to achieve a 20 percent per capita reduction in water use by 2020. They allege that they were required to adopt UWMPs prior to the Act, but not to include “the baseline per capita water use, urban water use target, interim urban water use target, and compliance daily per capita water use, along with bases for determining those estimates, including supporting data.”⁹³ And they allege that “[f]inally, prior to the Act, there was no requirement to conduct at least one public hearing to allow for community input regarding conservation, consider economic impacts...or to adopt a method for determining an urban water use target.”⁹⁴

Biggs-West Gridley Water District and Richvale Irrigation District

Richvale and Biggs allege that they are required to “measure the volume of water delivered to their customers using best professional practices to achieve a minimum level of measurement accuracy at the farm-gate,” in accordance with regulations adopted by DWR pursuant to the Act.⁹⁵ They further allege that they are required to adopt a pricing structure for water customers

⁹⁰ Exhibit A, 10-TC-12, page 3.

⁹¹ *Ibid.*

⁹² Exhibit A, 10-TC-12, page 4.

⁹³ Exhibit A, 10-TC-12, pages 7-8.

⁹⁴ Exhibit A, 10-TC-12, page 8.

⁹⁵ Exhibit A, 10-TC-12, page 4.

based on the quantity of water delivered, and that “[b]ecause Richvale and Biggs are local public agencies, the change in pricing structure would have to be authorized and approved by its [sic] customers through the Proposition 218 process.”⁹⁶

In addition, Richvale and Biggs allege that “[i]f ‘locally cost effective’ and technically feasible, agricultural water suppliers are required to implement fourteen additional efficient management practices,” as specified. They additionally allege that on or before December 31, 2012, they are required to prepare AWMPs that include a report on the implementation and planned implementation of efficient water management practices, and documentation supporting any determination made that certain conservation measures were held to be not locally cost effective or technically feasible.⁹⁷ Finally, Richvale and Biggs allege that prior to adoption of an AWMP, they are required to notice and hold a public hearing; and that after adoption the plan must be distributed to “various entities” and posted on the internet for public review.⁹⁸

Prior to the Act, Richvale and Biggs assert, agricultural water suppliers “were not required to have a pricing structure based, at least in part, on the quantity of water delivered.” In addition, prior to the Act, “there was no requirement to implement up to 14 additional conservation measures if locally cost effective and technically feasible.” And, Richvale and Biggs allege that prior to the Act the number of agricultural water suppliers subject to the requirement to develop an AWMP was significantly fewer, and now the “contents of the plans” are “more encompassing than plans required under the former law.”⁹⁹ Richvale and Biggs allege that “[f]inally, prior to the Act, there was no requirement to conduct at least one public hearing prior to adopting the plan, make copies of it available for public inspection, or to publish the time and place of the hearing once per week for two successive weeks in a newspaper of general circulation.”¹⁰⁰

As discussed below, in the early stages of Commission staff’s review and analysis of these consolidated test claims, it became apparent that Richvale and Biggs, the two claimants representing agricultural water suppliers, are not subject to the revenue limits of article XIII B, and do not collect or expend “proceeds of taxes,” within the meaning of articles XIII A and XIII B.¹⁰¹ After additional briefing and further review, it was concluded that Richvale and Biggs are indeed not eligible for reimbursement under article XIII B, section 6. The Commission’s executive director therefore issued a notice of pending dismissal and offered an opportunity for another eligible local claimant, subject to the tax and spend limitations of articles XIII A and XIII B, to take over the test claim.¹⁰² Richvale and Biggs filed an appeal of that decision, and maintain that they are eligible local government claimants pursuant to Government Code section 17518, and that the fees or assessments that the districts would be required to establish or increase to comply with the requirements of the test claim statute and regulations would be

⁹⁶ *Ibid.*

¹⁰² Exhibit K, Notice of Pending Dismissal.

characterized as taxes under article XIII B, section 8, because such fees or assessments would exceed the reasonable costs of providing water services.¹⁰³ This decision addresses these issues.

Glenn-Colusa Irrigation District and Oakdale Irrigation District

Glenn-Colusa and Oakdale requested to be substituted in as parties to these consolidated test claims, in place of Richvale and Biggs.¹⁰⁴ Both Glenn-Colusa and Oakdale submitted declarations asserting that they receive an annual share of property tax revenue, and therefore are subject to articles XIII A and XIII B of the California Constitution. Both additionally allege that they incur at least \$1000 in increased costs as a result of the test claim statute and regulations, and that they are subject to the requirements of the test claim statutes and regulations as described in the test claim narrative.¹⁰⁵

Claimants' Collective Response to the Draft Proposed Decision

In comments on the draft proposed decision, the claimants focus primarily on the findings regarding the ineligibility of Richvale and Biggs to claim reimbursement based on the evidence in the record indicating that neither agency collects or expends tax revenues subject to the limitations of articles XIII A and XIII B. The claimants also address the related findings that all claimants have sufficient fee authority under law to cover the costs of the mandate, and thus the Commission cannot find costs mandated by the state, pursuant to section 17556(d).

Specifically, the claimants argue that “[f]ees and charges for sewer, water, or refuse collection services are excused from the formal election process, but not from the majority protest process.”¹⁰⁶ Therefore, claimants conclude that “[a]gencies that provide water, sewer, or refuse collection services, including Claimants, lack sufficient authority to unilaterally impose new or increased fees or charges in light of Proposition 218’s majority protest procedure.”¹⁰⁷

In addition, claimants note the Commission’s analysis in 07-TC-09, *Discharge of Stormwater Runoff*, and argue that the Commission should not “ignore a prior Commission decision that is directly on point...” The claimants assert that “as this Commission has already recognized...” Proposition 218 “created a legal barrier to establishing or increasing fees or charges...” and as a result claimants “can do no more than merely propose new or increased fees for customer approval and the customers have the authority to then accept or reject...” a fee increase.¹⁰⁸

The claimants assert that the reasoning of the draft proposed decision “would prohibit state subvention for every enterprise district in the state that is subject to Proposition 218...”¹⁰⁹ and “would create a class of local agencies that are per se ineligible for reimbursement under this test

¹⁰³ Exhibit L, Appeal of Executive Director’s Decision.

claim, all potential future test claims, and all previous test claims dating back to Proposition 218's passage in 1996.”¹¹⁰ The claimant calls this a “sea change in Constitutional interpretation...”¹¹¹

The claimants argue, based on this interpretation of the effect of Proposition 218, that the draft proposed decision inappropriately excluded Richvale and Biggs from subvention, “because they do not currently collect or expend tax revenues.”¹¹² The claimants argue that “this additional ‘requirement’ [is] based on an outdated case that predates Proposition 218 and on an inapplicable line of cases that apply only to redevelopment agencies, while ignoring the strong policy underlying the voters’ approval of the subvention requirement.”¹¹³ The claimants argue that after articles XIII C and XIII D, “assessments and property-related fees and charges have joined tax revenues as among local entities’ ‘increasingly limited revenue sources...”¹¹⁴

The claimants further argue that: “Agencies like Richvale and Biggs that need additional revenue to pay for new mandates but are subject to the limitations of Proposition 218 are faced with three problematic options: (a) do not implement the mandates in light of revenue limitations; (b) implement the mandates with existing revenue; or (c) propose a new or increased fee or charge, assessment, or special tax to implement the mandates.”¹¹⁵ The claimants argue for the Commission to take action to expand the scope of reimbursement: “the subvention provision should be read in harmony with later Constitutional enactments and protect not just tax revenue, but assessment and fee revenue as well.”¹¹⁶

Finally, in late comments, the claimants challenge DWR’s reasoning, including the figures cited by the department, that due to the existence of a substantial number of private water suppliers, the test claim statutes do not impose a “program” within the meaning of article XIII B, section 6.¹¹⁷

B. State Agency Positions:

Department of Finance

Finance maintains that “the Act and Regulations do not impose a reimbursable mandate on local agencies within the meaning of Article XIII B, section 6.”¹¹⁸ Finance asserts that each of the claimants is a special district authorized to charge a fee for delivery of water to its users, and therefore has the ability to cover the costs of any new required activities.¹¹⁹ Finance further

¹¹⁸ Exhibit C, Finance Comments, page 1.

¹¹⁹ Exhibit C, Finance Comments, page 1.

asserts that the conservation efforts required by the test claim statute and regulations will result in surplus water accruing to the claimant districts, which are authorized to sell water. Finance concludes that “each district will likely have the opportunity to cover all or a portion of costs related to implementation of the Act or Regulations with revenue from surplus water sales.”¹²⁰ Moreover, Finance argues that “special districts are only entitled to reimbursement if they are subject to the tax and spend limitations under articles XIII A and XIII B...*and only when the mandated costs in question can be recovered solely from the proceeds of taxes.*”¹²¹ Finance argues that the claimants “should be directed to provide information that will enable the Commission on State Mandates to determine if they are subject to tax and spending limitations.”¹²² Finance did not submit comments on the draft proposed decision.

State Controller’s Office

In response to Commission staff’s request for additional information regarding the uncertain eligibility of the test claimants, the SCO submitted written comments confirming that the “Butte County Auditor-Controller has confirmed for fiscal years 2010-2011, 2011-2012, and 2012-2013,” that South Feather and Paradise both received proceeds of taxes, but Richvale and Biggs did not.¹²³ However, the SCO also noted that none of the four claimants reported an appropriations limit for fiscal years 2010-2011, 2011-2012, and 2012-2013. The SCO stated that “Government Code section 7910 requires each local government entity to annually establish its appropriations limit by resolution of its governing board,” and that “Government Code section 12463 requires the annual appropriations limit to be reported in the financial transactions report submitted to the SCO.” However, the SCO noted that it “has the responsibility to review each report for reasonableness, yet we are not required to audit any of the data reported.” The SCO concluded, therefore, that “we are unable to determine which special district is subject to report an annual appropriations limit.” The SCO did not comment on the draft proposed decision.

Department of Water Resources

DWR argues, in comments on the consolidated test claims, first, that the Water Conservation Act of 2009 applies to public and private entities alike, and is therefore not a “program” within the meaning of article XIII B, section 6. In addition, DWR argues that the Act is not a “new program,” because it is “a refinement of urban and agricultural water conservation requirements that have been part of the law for years.” DWR further asserts that even if the Act “were an unfunded state mandate, it would not be reimbursable since the water suppliers have sufficient non-tax sources to offset any implementation costs.” And, DWR asserts that the test claim regulations on agricultural water measurement do not impose any requirements on water suppliers because “they are free to choose alternative measurement methods.” And finally, DWR argues that the Act does not impose any new programs or higher levels of service “because what is required is compliance with general and evolving water conservation standards based on

¹²⁰ Exhibit C, Finance Comments, page 2.

¹²¹ Exhibit C, Finance Comments, page 2 [emphasis in original].

¹²² Exhibit C, Finance Comments, page 2.

¹²³ Exhibit J, SCO Comments, pages 1-2.

the foundational reasonable and beneficial water use principle dating from before the 1928 amendment – Article X, section 2 – to California’s Constitution revising water use standards.”¹²⁴

In comments on the draft proposed decision, DWR “concur[s] with and fully supports the ultimate conclusion reached...”, but reiterates and expands upon its earlier comments with respect to whether the alleged test claim requirements constitute a new program or higher level of service that is uniquely imposed upon local government.¹²⁵ DWR argues that “a law that governs private and public entities alike is not a ‘program’ for purposes of article XIII B...”¹²⁶ DWR continues:

Claimants, in their Rebuttal Comments, ignore DWR’s reference to the language of the Water Conservation Act, which by its plain terms is made applicable to both public and private entities. Instead, Claimants seek to shift attention away from the nature of the activity and focus instead on the number of entities engaged in that activity. Claimants concede that the law and regulations adopted pursuant to that law do in fact apply to both private and public entities, but argue that because (according to their calculation) “only 7.67%” of urban retail water suppliers are private, the requirements of the Water Conservation Act ought to be treated as reimbursable “programs” because those requirements “fall overwhelmingly on local governmental agencies.”¹²⁷

DWR maintains that “there are, in fact, 72 private wholesale and retail suppliers out of a total of 369...so the proportion of private water suppliers is actually 16.3 percent.” And, “based on data submitted in the 2010 urban water management plans, it turns out that private retail water suppliers serve 19.7 percent of the population and account for 17.3 percent of water delivered.”¹²⁸

DWR acknowledges that there are more public than private water suppliers, but asserts that “[u]nder the Supreme Court’s test in *County of Los Angeles v. State of California* the question is not whether an activity is more likely to be undertaken by a governmental entity, but whether the activity implements a state policy and imposes unique requirements on local governments, but is one that does not apply generally to all residents and entities in the state.”¹²⁹ DWR explains that “generally,” in this context, is not synonymous with “commonly,” and therefore the prevalence of public water suppliers as to private is not relevant to the issue; rather, “generally” refers to

laws of general application, meaning “those that apply to all persons or entities of a particular class.”¹³⁰ The Water Conservation Act, DWR maintains, “does just that.”¹³¹

In addition, DWR disputes that the provision of water services is a “classic governmental function,” as asserted by the claimants.¹³² The California Supreme Court has held that reimbursement should be limited to new “programs” that carry out the governmental function of providing services to the public.¹³³ DWR maintains that there is an important distinction between public purposes, and private or corporate purposes, and that that distinction should control in the analysis of a new program or higher level of service. In particular, DWR identifies the provision of utilities to municipal customers as a corporate activity, rather than a governmental purpose:

Of the myriad services provided by government, although some may be difficult to categorize, at either end of the spectrum the categories are fairly clear. At one end, such things as police and fire protection have long been recognized as true governmental functions, those that implicate the notion of the “government as sovereign.” At the other end, however, are public utilities such as power generation, and, of particular significance to this claim, municipal water districts.¹³⁴

DWR argues that “California law thus draws a distinction between the many utilitarian services that could as easily be (and often are) undertaken by the private sector, and those that implicate the unique authority vested in the state and its political subdivisions.” DWR continues: “Maintaining a police force, for instance, is easily understood as something fundamental to the government *as government*.” “On the other hand,” DWR reasons, “there is nothing intrinsically governmental about a government entity operating a utility and providing services such as electricity, natural gas, sewer, garbage collection, or water delivery.”¹³⁵

DWR thus “urges the Commission to give full consideration to the fact that the Water Conservation Act is a law of general application that applies to private as well as public water

¹³⁵ Exhibit U, DWR Comments on Draft Proposed Decision, page 6.

suppliers alike.” And, DWR reiterates: “contrary to Claimants’ suggestion, water delivery, while clearly an important service, is not a classic “governmental function” in the constitutional sense.”¹³⁶

C. Interested Person Positions:¹³⁷

California Special Districts Association

CSDA asserts that “the Proposed Decision fails to appropriately analyze the provisions of Article XIII B Section 6...as amended by Proposition 1A in 2004...”¹³⁸ CSDA argues that the draft proposed decision “rather analyzes the original language of Article XIII B Section 6 adopted as Proposition 4 in 1978, before the adoption of Proposition 218 adding articles XIII C and XIII D to the Constitution and before the adoption of Proposition 1A amending Article XIII B Section 6.”¹³⁹

CSDA argues that the plain language of article XIII B, section 6, as amended by Proposition 1A, “indicates that the mandate provisions are applicable to all cities, counties, cities and counties, and special districts without restriction.”¹⁴⁰ CSDA further asserts that “[t]he plain language also mandates the state to appropriate the ‘full payment amount’ of costs incurred by local government in complying with state mandated programs, without any qualification as to the types of revenues utilized by local governments in paying the costs of such compliance.”¹⁴¹ CSDA reasons that “there are no words of limitation indicating that suspension of mandates is only applicable to those local government agencies which receive proceeds of taxes and expend those proceeds of taxes in complying with state mandated programs.” Therefore, absent “such limiting language, the holding of the Proposed Decision which limits eligibility for claiming reimbursement...to those local agencies receiving proceeds of taxes is contradicted by the mandate provisions of Proposition 1A, and is therefore incorrect as a matter of law.”¹⁴²

CSDA also argues that the voters’ intent and understanding in adopting Proposition 1A is controlling, and can be determined by examining the LAO analysis in the ballot pamphlet.¹⁴³ CSDA argues that “[t]he LAO analysis of Proposition 1A in the ballot pamphlet fails to mention any restriction or limitation on state mandates to be reimbursed or suspended, and such analysis is totally silent as to any requirement that reimbursable mandates be limited to those mandates imposed on local governments which receive and expend proceeds of taxes...” In fact, CSDA argues, the LAO analysis indicates that Proposition 1A “expand(s) the circumstances under

¹³⁶ Exhibit U, DWR Comments on Draft Proposed Decision, page 7.

¹³⁷ “Interested person” is defined in the Commission’s regulations to mean “any individual, local agency, school district, state agency, corporation, partnership, association, or other type of entity, having an interest in the activities of the Commission.” (Cal. Code Regs., tit. 2, § 1181.2(j).)

¹³⁸ Exhibit S, CSDA Comments on Draft Proposed Decision, page 6.

¹³⁹ Exhibit S, CSDA Comments on Draft Proposed Decision, page 6.

¹⁴² Exhibit S, CSDA Comments on Draft Proposed Decision, page 8.

¹⁴³ Exhibit S, CSDA Comments on Draft Proposed Decision, page 8.

which the state is responsible for reimbursing cities, counties and special districts for complying with state mandated programs by including all programs for which the state even had partial financial responsibility before such transfer.”¹⁴⁴ CSDA maintains that “[t]herefore the voters who approved Proposition 1A by 82% of the popular vote had no understanding of this limitation on reimbursement of state mandates to local governments which is the basic holding of the Proposed Decision.”¹⁴⁵ CSDA relies on the language of the ballot pamphlet, which states: “if the state does not fund a mandate within any year, the state must eliminate local government’s duty to implement it for that same time period.”¹⁴⁶ CSDA concludes that “[t]he plain words of Proposition 1A support this voter intent to require the state to fully reimburse the costs incurred by all cities, counties, cities and counties and special districts in implementing any state program in which the complete or partial financial responsibility for that program has been transferred from the state to local government, not just those cities, counties, cities and counties, and special districts which receive proceeds of taxes.”¹⁴⁷

In addition, CSDA argues that the Commission’s analysis must read together and harmonize articles XIII A, XIII B, XIII C, and XIII D.¹⁴⁸ Specifically, CSDA argues that pursuant to article XIII C, added by Proposition 218, property-related fees are subject to “majority protest procedures” and “may not be expended for general governmental services...which are available to the public at large in substantially the same manner as they are to property owners...”¹⁴⁹ And, revenues from property-related fees “may not be used for any purpose other than that for which the fee was imposed;” and “may not exceed the costs required to provide the property related service.”¹⁵⁰ In addition, CSDA asserts that the amount of a property-related fee must not exceed the proportional cost of providing the service to each individual parcel subject to the fee.¹⁵¹ CSDA also notes that “Article XIII D includes similar provisions restricting the ability of local governments to raise and expend assessment revenue.”¹⁵² CSDA argues that “[a]nalyzed together, all of these restrictions on the raising and expenditure of property related fees and charges by local government agencies specified in Articles XIII C and D of the Constitution severely limit the ability of local government agencies to utilize revenue for property related fees and charges to fund the costs of state mandated programs.”¹⁵³ CSDA goes on to argue that “[t]hose restrictions are more onerous and stringent than the restrictions imposed on local government agencies in expending proceeds of taxes by virtue of the appropriations limit in

Article XIII B.”¹⁵⁴ CSDA concludes that “[t]he Proposed Decision should be modified to recognize these restrictions imposed by Articles XIII C and D.”¹⁵⁵

Environmental Law Foundation Position

ELF states, in its comments, that it agrees with the draft proposed decision, however, “[t]o aid the Commission in developing its final decision, we would like to present an additional ground upon which the Commission could rely in denying the test claim...”¹⁵⁶ ELF asserts that “the Commission should find that charges for irrigation water are not ‘property-related fees’ for the purposes of Article XIII D of the California Constitution.”¹⁵⁷ Specifically, ELF agrees that the test claim statutes are exempt from the voter-approval requirements of article XIII D, section 6(c);¹⁵⁸ however, ELF also argues that “charges for irrigation water are not ‘property-related fees’ at all.” ELF reasons: “As a result, raising them does not trigger the substantive or procedural requirements contained in Article XIII D, and the claimant districts may increase them free of any constitutional obstacle.”¹⁵⁹

ELF continues: “Article XIII D, § 3 restricts local governments’ ability to levy a new “assessment, fee, or charge” without complying with the substantive and procedural requirements of section 4 (assessments) and section 6 (property-related fees).” However, ELF asserts that “Section 2 of Article XIII D makes Proposition 218’s relatively limited reach abundantly clear.”¹⁶⁰ ELF notes that section 2 defines a fee or charge as “any levy other than an ad valorem tax, a special tax, or an assessment, imposed by an agency upon a parcel or upon a person as an incident of property ownership, including a user fee or charge for a property related service.”¹⁶¹ ELF therefore reasons that “[f]ees that are not ‘imposed upon a parcel’ or that are not imposed upon a ‘person as an incident of property ownership’ or that are not a ‘user fee or charge for a property related service’ are not subject to Article XIII D.”¹⁶² ELF notes that in *Apartment Association of Los Angeles County v. City of Los Angeles*¹⁶³ the court held that an inspection fee imposed upon landlords was not imposed upon them as property owners, but as business owners and, therefore the fee was not subject to article XIII D.¹⁶⁴ The court, ELF

¹⁶⁴ Exhibit T, ELF Comments on Draft Proposed Decision, page 4.

explains, found that this type of fee was “not ‘property related’ because it was dependent on the property’s use – it was not imposed on the property simply as an incident of ownership.”¹⁶⁵

ELF goes on to note that “no case has squarely addressed the issue...” but the courts have recognized that not all water service charges are necessarily subject to article XIII D. In *Pajaro Valley Water Management Agency v. Amrhein*,¹⁶⁶ the court held that a groundwater augmentation charge was a property-related fee, but “it rested that conclusion on the fact that the majority of users were residential users, not large-scale irrigators.”¹⁶⁷ And, ELF notes, other cases have found that domestic water use is “necessary for ‘normal ownership and use of property.’”¹⁶⁸ ELF concludes that these cases, and others, “present no obstacle to the conclusion that irrigation water is not a property-related service.”¹⁶⁹ ELF concludes that fees for irrigation water are not “property-related” but a business-related fee, and that therefore the Commission should deny this test claim.¹⁷⁰

Northern California Water Association Position

In late comments on the draft proposed decision, NCWA seeks to “highlight and emphasize how onerous and expensive these new state mandates are in the Sacramento Valley.”¹⁷¹ NCWA argues that “[t]hese statewide benefits, achieved through implementation of incredibly expensive mandates, ought to be funded by the state and not borne exclusively by the impacted local agencies’ landowners.”¹⁷² NCWA continues: “The draft proposed decision, in an effort to circumvent the clear requirements to reimburse for these types of state mandates, has attempted to avoid reimbursement by exerting exclusions that are not appropriate for the facts before the Commission.”¹⁷³ NCWA denies that any “exemptions” apply to the test claim statutes, and “urge[s] the Commission to modify the draft proposed decision to reimburse these and other similarly affected water suppliers.”¹⁷⁴

IV. Discussion

Article XIII B, section 6 of the California Constitution provides in relevant part the following:

¹⁶⁵ Exhibit T, ELF Comments on Draft Proposed Decision, page 4.

Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the state shall provide a subvention of funds to reimburse such local government for the costs of such programs or increased level of service, except that the Legislature *may, but need not*, provide a subvention of funds for the following mandates:

- (1) Legislative mandates requested by the local agency affected.
- (2) Legislation defining a new crime or changing an existing definition of a crime.
- (3) Legislative mandates enacted prior to January 1, 1975, or executive orders or regulations initially implementing legislation enacted prior to January 1, 1975.

The purpose of article XIII B, section 6 is to “preclude the state from shifting financial responsibility for carrying out governmental functions to local agencies, which are ‘ill equipped’ to assume increased financial responsibilities because of the taxing and spending limitations that articles XIII A and XIII B impose.”¹⁷⁵ Thus, the subvention requirement of section 6 is “directed to state-mandated increases in the services provided by [local government] ...”¹⁷⁶

Reimbursement under article XIII B, section 6 is required when the following elements are met:

1. A state statute or executive order requires or “mandates” local agencies or school districts to perform an activity.¹⁷⁷
2. The mandated activity either:
 - a. Carries out the governmental function of providing a service to the public; or
 - b. Imposes unique requirements on local agencies or school districts and does not apply generally to all residents and entities in the state.¹⁷⁸
3. The mandated activity is new when compared with the legal requirements in effect immediately before the enactment of the test claim statute or executive order and it increases the level of service provided to the public.¹⁷⁹
4. The mandated activity results in the local agency or school district incurring increased costs, within the meaning of section 17514. Increased costs, however, are not

¹⁷⁵ *County of San Diego v. State of California* (1997) 15 Cal.4th 68, 81.

¹⁷⁷ *San Diego Unified School Dist. v. Commission on State Mandates (San Diego Unified School Dist.)* (2004) 33 Cal.4th 859, 874.

¹⁷⁸ *Id.* at 874-875 (reaffirming the test set out in *County of Los Angeles, supra*, 43 Cal.3d 46, 56).

¹⁷⁹ *San Diego Unified School Dist., supra*, 33 Cal.4th 859, 874-875, 878; *Lucia Mar Unified School District v. Honig* (1988) 44 Cal.3d 830, 835.

reimbursable if an exception identified in Government Code section 17556 applies to the activity.¹⁸⁰

The determination whether a statute or executive order imposes a reimbursable state-mandated program is a question of law.¹⁸¹ The Commission is vested with exclusive authority to adjudicate disputes over the existence of state-mandated programs within the meaning of article XIII B, section 6.¹⁸² In making its decisions, the Commission must strictly construe article XIII B, section 6, and not apply it as an “equitable remedy to cure the perceived unfairness resulting from political decisions on funding priorities.”¹⁸³

The parties raise the following issues in their comments:

- The test claim statute and executive order do not impose a new program or higher level of service that is subject to article XIII B, section 6 because the Water Conservation Law and implementing regulations apply to both public and private water suppliers alike, and do not impose requirements uniquely upon local government.
- The test claim statute and executive order do not impose a new program or higher level of service because the provision of water and other utilities is an activity that could be, and often is, undertaken by private enterprise, and is therefore not a quintessentially governmental service in the manner that police and fire protection are generally accepted to be.
- The test claim does not result in costs mandated by the state for agricultural water suppliers because fees or charges for the provision of irrigation water are not “property-related” fees or charges subject to the limitations of articles XIII C and XIII D.

As described below, the Commission denies this claim on the grounds that most of the code sections and regulations pled do not impose new mandated activities, and all affected claimants have sufficient fee authority as a matter of law to cover the costs of any new requirements. Therefore, this decision does not make findings on the additional potential grounds for denial raised in comments on the draft proposed decision summarized above.

A. South Feather Water and Power Agency, Paradise Irrigation District, Oakdale Irrigation District, and Glenn-Colusa Irrigation District are Subject to the Revenue Limitations of Article XIII B, and are Therefore Eligible for Reimbursement Pursuant to Article XIII B, Section 6.

1. To be eligible for reimbursement, a local agency must be subject to the taxing and spending limitations of articles XIII A and XIII B.

¹⁸⁰ *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487; *County of Sonoma v. Commission on State Mandates* (Cal. Ct. App. 1st Dist. 2000) 84 Cal.App.4th 1265, 1284; Government Code sections 17514 and 17556.

¹⁸³ *County of Sonoma, supra*, 84 Cal.App.4th 1265, 1280 [citing *City of San Jose, supra*].

An interpretation of article XIII B, section 6 requires an understanding of articles XIII A and XIII B. “Articles XIII A and XIII B work in tandem, together restricting California governments’ power both to levy and to spend taxes for public purposes.”¹⁸⁴

In 1978, the voters adopted Proposition 13, which added article XIII A to the California Constitution. Article XIII A drastically reduced property tax revenue previously enjoyed by local governments by providing that “the maximum amount of any ad valorem tax on real property shall not exceed one percent (1%) of the full cash value of such property,” and that the one percent (1%) tax was to be collected by counties and “apportioned according to law to the districts within the counties...”¹⁸⁵ In addition to limiting the property tax, section 4 also restricts a local government’s ability to impose special taxes by requiring a two-thirds approval by voters.¹⁸⁶

Article XIII B was adopted by the voters as Proposition 4 less than 18 months after the addition of article XIII A to the state Constitution, and was billed as “the next logical step to Proposition 13.”¹⁸⁷ While article XIII A is aimed at controlling ad valorem property taxes and the imposition of new special taxes, “the thrust of article XIII B is toward placing certain limitations on the growth of appropriations at both the state and local government level; in particular, Article XIII B places limits on the authorization to expend the ‘proceeds of taxes.’”¹⁸⁸

Article XIII B established an “appropriations limit,” or spending limit for each “entity of local government” beginning in fiscal year 1980-1981.¹⁸⁹ Specifically, the appropriations limit provides as follows:

The total annual appropriations subject to limitation of the State and of each local government shall not exceed the appropriations limit of the entity of government for the prior year adjusted for the change in the cost of living and the change in population, except as otherwise provided in this article.¹⁹⁰

No “appropriations subject to limitation” may be made in excess of the appropriations limit, and revenues received in excess of authorized appropriations must be returned to the taxpayers within the following two fiscal years.¹⁹¹ Article XIII B does not limit the ability to expend government funds collected from *all sources*; the appropriations limit is based on “appropriations subject to limitation,” which means, pursuant to article XIII B, section 8, “any authorization to

¹⁹¹ California Constitution, article XIII B, section 2 (added, Nov. 7, 1979).

expend during a fiscal year the *proceeds of taxes* levied by or for that entity.”¹⁹² Appropriations subject to limitation do not include “local agency loan funds or indebtedness funds”; “investment (or authorizations to invest) funds...of an entity of local government in accounts at banks...or in liquid securities”;¹⁹³ “[a]ppropriations for debt service”; “[a]ppropriations required to comply with mandates of the courts or the federal government”; and “[a]ppropriations of any special district which existed on January 1, 1978 and which did not as of the 1977-78 fiscal year levy an ad valorem tax on property in excess of 12 [and one half] cents per \$100 of assessed value; or the appropriations of any special district then existing or thereafter created by a vote of the people, which is totally funded by other than the proceeds of taxes.”¹⁹⁴

Proposition 4 also added article XIII B, section 6 to require the state to reimburse local governments for any additional expenditures that might be mandated by the state, and which would rely solely on revenues subject to the appropriations limit. The California Supreme Court, in *County of Fresno v. State of California*,¹⁹⁵ explained:

Section 6 was included in article XIII B in recognition that article XIII A of the Constitution severely restricted the taxing powers of local governments. (See *County of Los Angeles I, supra*, 43 Cal.3d at p. 61.) The provision was intended to preclude the state from shifting financial responsibility for carrying out governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6.) Specifically, it was designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues. Thus, although its language broadly declares that the “state shall provide a subvention of funds to reimburse ... local government for the costs [of a state-mandated new] program or higher level of service,” read in its textual and historical context section 6 of article XIII B requires subvention only when the costs in question can be recovered *solely from tax revenues*.¹⁹⁶

Not every local agency is subject to the restrictions of article XIII B, and therefore not every local agency is entitled to reimbursement. Redevelopment agencies, for example, have been identified by the courts as being exempt from the restrictions of article XIII B. In *Bell Community Redevelopment Agency v. Woolsey*, the Second District Court of Appeal concluded that a redevelopment agency’s power to issue bonds, and to repay those bonds with its tax increment, was not subject to the spending limit of article XIII B. The court reasoned that to construe tax increment payments as appropriations subject to limitation “would be directly contrary to the mandate of section 7,” which provides that “[n]othing in this Article shall be construed to impair the ability of the state or of any local government to meet its obligations with

¹⁹² California Constitution, article XIII B, section 8 (added, Nov. 7, 1979; amended by Proposition 111, June 5, 1990) [emphasis added].

¹⁹³ California Constitution, article XIII B, section 8.

¹⁹⁴ California Constitution, article XIII B, section 9 (added, Nov. 7, 1979; amended by Proposition 111, June 5, 1990).

¹⁹⁵ *County of Fresno, supra*, (1991) 53 Cal.3d 482.

¹⁹⁶ *Id.*, at p. 487. Emphasis in original.

respect to existing or future bonded indebtedness.”¹⁹⁷ In addition, the court found that article XVI, section 16, addressing the funding of redevelopment agencies, was inconsistent with the limitations of article XIII B:

Article XVI, section 16, provides that tax increment revenues “may be irrevocably pledged” to the payment of tax allocation bonds. If bonds must annually compete for payment within an annual appropriations limit, and their payment depend upon complying with the such limit [*sic*], it is clear that tax allocation proceeds cannot be irrevocably pledged to the payment of the bonds. Annual bond payments would be contingent upon factors extraneous to the pledge. That is, bond payments would be revocable every year of their life to the extent that they conflicted with an annual appropriation limit. The untoward effect would be that bonds would become unsaleable because a purchaser could not depend upon the agency having a sure source of payment for such bonds.¹⁹⁸

The court therefore concluded that redevelopment agencies could not reasonably be subject to article XIII B, and therefore upheld Health and Safety Code section 33678, and ordered that the writ issue to compel Woolsey to publish the notice.

Accordingly, in *Redevelopment Agency of San Marcos v. Commission on State Mandates*,¹⁹⁹ the court held that redevelopment agencies were not eligible to claim reimbursement because Health and Safety Code section 33678 exempted tax increment financing, their primary source of revenue, from the limitations of article XIII B.

Because of the nature of the financing they receive, tax increment financing, redevelopment agencies are not subject to this type of appropriations limitations or spending caps; they do not expend any “proceeds of taxes.” Nor do they raise, through tax increment financing, “general revenues for the local entity.” The purpose for which state subvention of funds was created, to protect local agencies from having the state transfer its cost of government from itself to the local level, is therefore not brought into play when redevelopment agencies are required to allocate their tax increment financing in a particular manner...

For all these reasons, we conclude the same policies which support exempting tax increment revenues from article XIII B appropriations limits also support denying reimbursement under section 6... [The] costs of depositing tax increment revenues in the Housing Fund are attributable not directly to tax revenues, but to the benefit received by the Agency from the tax increment financing scheme, which is one step removed from other local agencies’ collection of tax revenues.²⁰⁰

¹⁹⁷ (1985) 169 Cal.App.3d 24, at p. 31 [quoting article XIII B, section 7].

¹⁹⁸ *Id.*, at p. 31.

¹⁹⁹ (1997) 55 Cal.App.4th 976.

²⁰⁰ *Redevelopment Agency of San Marcos, supra*, 55 Cal.App.4th at pp. 986-987 [internal citations omitted].

In 2000, the Third District Court of Appeal, in *City of El Monte v. Commission on State Mandates*, affirmed the reasoning of the *San Marcos* decision, holding that a redevelopment agency cannot accept the benefits of an exemption from article XIII B's spending limit while asserting an entitlement to reimbursement under article XIII B, section 6.²⁰¹

Therefore, pursuant to the plain language of article XIII B, section 9 and the decisions in *County of Fresno, supra*, *Redevelopment Agency of San Marcos, supra*, and *City of El Monte, supra*, a local agency that does not collect and expend "proceeds of taxes" is not subject to the tax and spend limitations of articles XIII A and B, and therefore is not entitled to claim reimbursement pursuant to article XIII B, section 6.

Nevertheless, claimants argue that *County of Fresno* and the redevelopment agency cases do not apply in this case. Specifically, claimants argue that *County of Fresno, supra*, predates Proposition 218, which added articles XIII C and XIII D to the California Constitution, and is factually distinguishable from this test claim because the test claim statute at issue in *County of Fresno* specifically authorized user fees to pay for the mandated activities. With respect to the redevelopment cases (*Bell Community Redevelopment Agency, Redevelopment Agency of San Marcos, and City of El Monte*), the claimants argue that the courts' findings rely on Health and Safety Code section 33678, which specifically excepts the revenues of redevelopment agencies from the scope of revenue-limited appropriations under article XIII B.²⁰² In addition, the claimants argue that the above reasoning "would prohibit state subvention for every enterprise district in the state that is subject to Proposition 218..." and "would create a class of local agencies that are per se ineligible for reimbursement under this test claim, all potential future test claims, and all previous test claims dating back to Proposition 218's passage in 1996."²⁰³ In addition, both the claimants and CSDA suggest that the Commission broaden the scope of reimbursement eligibility under article XIII B, section 6, beyond that articulated by the courts, and beyond the plain language of articles XIII A and XIII B.²⁰⁴ The claimants and CSDA urge the Commission to consider the restrictions placed on special districts' authority to impose assessments, fees, or charges by articles XIII C and XIII D to be part of the "increasingly limited revenues sources" that subvention under section 6 was intended to protect. The claimants and CSDA would have the Commission broadly interpret and extend the subvention requirement and treat fee authority subject to proposition 218 as proceeds of taxes, "to advance the goal of 'preclud[ing] the state from shifting financial responsibility for carrying out governmental functions onto local entities that [are] ill equipped to handle the task."²⁰⁵

²⁰¹ (2000) 83 Cal.App.4th 266, 281-282 (*El Monte*).

²⁰² Exhibit R, Claimant Comments on Draft Proposed Decision, pages 17-18.

²⁰³ Exhibit R, Claimant Comments on Draft Proposed Decision, pages 14-15.

²⁰⁴ See Exhibit R, Claimant Comments on Draft Proposed Decision, page 21; Exhibit S, CSDA Comments on Draft Proposed Decision, pages 10-12 [Arguing that the restrictions of articles XIII C and XIII D are more onerous than the revenue limits of article XIII B, and the Commission should "recognize these restrictions..." and "Articles XIII A, B, C, and D should be read together and harmonized..."].

²⁰⁵ Exhibit R, Claimant Comments on Draft Proposed Decision, page 21 [quoting *County of Fresno, supra* 53 Cal.3d, at p. 487.].

The claimant's comments do not alter the above analysis. The factual distinction that claimants allege between this test claim and *County of Fresno* is not dispositive.²⁰⁶ Specific fee authority provided by the test claim statute is not necessary: so long as a local government's statutory fee authority can be legally applied to alleged activities mandated by the test claim statute, there are no *costs mandated by the state* within the meaning of Government Code section 17514 and article XIII B, section 6, to the extent of that fee authority.²⁰⁷ If the local entity is not compelled to rely on *appropriations subject to limitation* to comply with the alleged mandate, no reimbursement is required.²⁰⁸

The claimant's comments addressing the redevelopment cases are similarly unpersuasive. Those cases are discussed above not as analogues for the types of special districts represented in this test claim, but only to demonstrate that *not all local government entities* are subject to articles XIII A and XIII B, and that an agency that is not bound by article XIII B cannot assert an entitlement to reimbursement under section 6.²⁰⁹

Moreover, enterprise districts, and indeed any local government entity funded exclusively through user fees, charges, or assessments, *are* per se ineligible for mandate reimbursement. This is so because only a mandate to expend revenues that are subject to the appropriations limit, as defined and expounded upon by the courts,²¹⁰ can entitle a local government entity to mandate reimbursement. In other words, a local agency that is funded solely by user fees or charges, (or tax increment revenues, as discussed above), or appropriations for debt service, or any combination of revenues "other than the proceeds of taxes" is an agency that is not subject to the appropriations limit, and therefore not entitled to subvention.²¹¹

This interpretation is supported by decades of mandates precedent and is consistent with the purpose of article XIII B. As discussed above, "Section 6 was included in article XIII B in recognition that article XIII A...severely restricted the *taxing* powers of local governments."²¹² Article XIII B "was not intended to reach beyond taxation..." and "would not restrict the growth in appropriations financed from other [i.e., nontax] sources of revenue..."²¹³ The issue, then, is

²⁰⁹ *City of El Monte, supra*, (2000) 83 Cal.App.4th 266, 281-282 [citing *Redevelopment Agency of San Marcos, supra*, (1997) 55 Cal.App.4th 976].

²¹⁰ See *Placer v. Corin* (1980) 113 Cal.App.3d 443; *Bell Community Redevelopment Agency, supra* (1985) 169 Cal.App.3d 24; *County of Fresno, supra* (1991) 53 Cal.3d 482; *Redevelopment Agency of San Marcos, supra*, (1997) 55 Cal.App.4th 976.

²¹¹ California Constitution, article XIII B, section 9 (Adopted Nov. 6, 1979; Amended June 5, 1990).

²¹² See *County of Fresno, supra*, 53 Cal.3d at p. 487 [emphasis added].

²¹³ *Ibid.*

not *how many* different sources of revenue a local entity has at its disposal, as suggested by claimants;²¹⁴ it is whether and to what extent those sources of revenue (and the appropriations to be made) are *limited* by articles XIII A and XIII B. Based on the foregoing, nothing in claimants' comments alters the above analysis.

The Commission also disagrees with the interpretation offered by CSDA. CSDA argues in its comments that Proposition 1A, adopted in 2004, made changes to article XIII B, section 6, which must be considered by the Commission, and that the voters' intent and understanding when adopting Proposition 1A should weigh heavily on the Commission's interpretation of the amended text.²¹⁵ However, the amendments made by Proposition 1A require the Legislature to either pay or suspend a mandate for local agencies, and expand the definition of a new program or higher level of service. The plain language of Proposition 1A does not address which entities are eligible to claim reimbursement, and does not require reimbursement for all special districts, including those that do not receive property tax revenue and are not subject to the appropriations limitation of article XIII B.²¹⁶ CSDA's comments do not alter the above analysis.

Based on the foregoing, a local agency that does not collect and expend "proceeds of taxes" is not subject to the tax and spend limitations of articles XIII A and B, and therefore is not entitled to claim reimbursement pursuant to article XIII B, section 6.

2. Biggs-West Gridley Water District and Richvale Irrigation District are not subject to the taxing and spending limitations of articles XIII A and XIII B, and are therefore not eligible for reimbursement under article XIII B, section 6 of the California Constitution. However, Oakdale Irrigation District and Glenn-Colusa Irrigation District are subject to the taxing and spending limitations, have been substituted in as claimants for both of the consolidated test claims, and are eligible for reimbursement under article XIII B, section 6 of the California Constitution.

10-TC-12 was originally filed by four co-claimants: South Feather, Paradise, Biggs, and Richvale.²¹⁷ 12-TC-01 was filed by Richvale and Biggs only,²¹⁸ and the two test claims were consolidated for analysis and hearing and renamed *Water Conservation*. Based on the analysis herein, the Commission finds that Richvale and Biggs are ineligible to claim reimbursement under article XIII B, section 6, and test claim 12-TC-01 would have to be dismissed for want of an eligible claimant.²¹⁹ However, Oakdale and Glenn-Colusa have requested to be substituted in on both test claims in the place of the ineligible claimants.²²⁰ The analysis below will therefore address the eligibility of each of the six co-claimants, and will show that South Feather, Paradise,

²¹⁹ See Exhibit K, Notice of Pending Dismissal.

²²⁰ Exhibit N, Request for Substitution of Parties by Oakdale Irrigation District; Exhibit O, Request for Substitution of Parties by Glenn-Colusa Irrigation District.

Oakdale, and Glenn-Colusa are all eligible to claim reimbursement under article XIII B, section 6, and therefore the Commission maintains jurisdiction over both of the consolidated test claims.

a. Biggs-West Gridley Water District and Richvale Irrigation District are not eligible to claim reimbursement under article XIII B, section 6.

The Districts have acknowledged that “Richvale and Biggs do not receive property tax revenue.”²²¹ With respect to Richvale, that statement is consistent with the original test claim filing, in which Richvale stated that it “does not receive an annual share of property tax revenue.”²²² However, Biggs had earlier stated in a declaration by Karen Peters, the District’s Executive Administrator, that “Biggs receives an annual share of property tax revenue,” and for “Fiscal Year 2011 the amount of property tax revenue is expected to be approximately \$64,000.”²²³ Biggs has since determined that the Peters declaration was in error, and a more recent declaration from Eugene Massa, the District’s General Manager, states that “[t]hat revenue estimate actually reflects Biggs’ *assessment*, equating to \$2 per acre within Biggs’ boundaries.” Mr. Massa goes on to state that “Biggs does not currently receive any share of ad valorem *property tax* revenue.”^{224,225}

Even though Richvale and Biggs acknowledge that they receive no property tax revenue, they argue that they and “other similarly situated public agencies should not be deemed ineligible for subvention due to a historical quirk that resulted in those agencies not receiving a share of ad valorem property taxes.”²²⁶ The “historical quirk” to which Richvale and Biggs refer, it is assumed, is the fact that Richvale and Biggs either did not exist or did not share in ad valorem property tax revenue as of the 1977-78 fiscal year, which would render at least some portion of

²²² Exhibit A, South Feather Water and Power Test Claim, page 22.

²²³ Exhibit A, 10-TC-12, page 30.

²²⁴ Exhibit I, Claimant Response to Request for Additional Information, page 393 [emphasis added].

²²⁵ See also Exhibit X, Special Districts Annual Report 2010-2011, pages 184; 389; 1051 [The Special Districts Annual Report for 2010-2011 is consistent with Richvale’s statement that it does not receive property tax revenue. Table 8 indicates no property tax receipts, and Table 1 does not indicate an appropriations limit. Biggs did not submit the necessary information to the SCO, and therefore does not appear in Tables 1 or 8 of the 2010-2011 Special Districts Annual Report. Based on that report, and the admissions of the Districts, a notice of dismissal was issued on November 12, 2013 for test claim 12-TC-01, for which Richvale and Biggs were the only named claimants. In response to the Notice of Pending Dismissal, the Districts submitted an Appeal of Dismissal, in which they argue that Proposition 218 undermines a local agency’s fee authority, and that the Districts are eligible for reimbursement “for the reasons already explained in the Districts’ ‘Claimants’ Response to Request for Additional Information 10-TC-12 and 12-TC-01.’” (Exhibit K, Notice of Pending Dismissal; Exhibit L, Appeal of Executive Director’s Decision)].

²²⁶ Exhibit R, Claimant Comments on Draft Proposed Decision, page 20.

their revenues subject to the appropriations limit, in accordance with article XIII B, section 9.²²⁷ They argue that all public agencies are ill-equipped to cover the costs of new mandates, whether they are subject to the tax and spend limits of articles XIII A and XIII B, or the fee and assessment restrictions of articles XIII C and XIII D.²²⁸ In addition, Richvale and Biggs assert that to the extent they do have authority to raise revenues other than taxes, any increased fees or assessments necessary to cover the costs of the required activities would, by definition, be classified as proceeds of taxes under article XIII B, section 8.²²⁹

The Districts' reasoning is both circular and fundamentally unsound. Article XIII B, section 8 provides that "proceeds of taxes" includes "all tax revenues and the proceeds to an entity of government from (1) regulatory licenses, user charges, and user fees *to the extent that those proceeds exceed the costs reasonably borne by that entity in providing the regulation, product, or service*, and (2) the investment of tax revenues."²³⁰ The districts argue, therefore, that "proceeds of taxes" includes not only revenues directly derived from taxes, "but also revenues exceeding the costs to fund the services provided by the agency." The Districts argue that Richvale and Biggs are unable, under Proposition 218, to impose new fees as a matter of law, and must reallocate existing fees, which constitute "proceeds of taxes" under article XIII B, section 8. But Proposition 218 added article XIII D to expressly provide that fees or charges "*shall not be extended, imposed, or increased*" if revenues derived from the fee or charge exceed the funds needed to provide the property-related service; and "shall not be used for any purpose other than that for which the fee or charge was imposed."²³¹ Therefore, Proposition 218 imposes an absolute bar to raising fees beyond those necessary to provide the property-related service, or "reallocating" fees for a purpose other than that for which the fee or charge was imposed.

Moreover, Richvale and Biggs' reasoning that such fees *would automatically and by definition* constitute proceeds of taxes under article XIII B, section 8, rests on the initial presumption that such fees or charges would "exceed" those necessary to provide the service. In other words, the Districts presume that the costs of the mandate are unrelated to, or exceed, the costs of providing water service to the districts' users.²³² On the contrary, any fees or charges, whether *new or existing*, imposed by Richvale and Biggs are imposed for the purpose of providing irrigation water. The alleged mandated activities imposed upon irrigation districts by the test claim statute and regulations are required for those districts to *continue* providing irrigation water. Therefore, utilizing revenues from fees or charges to comply with the alleged new requirements is not

²²⁷ Section 9 states that appropriations subject to limitation do not include: "Appropriations of any special district which existed on January 1, 1978, and which did not as of the 1977-78 fiscal year levy an ad valorem tax on property in excess of 12 1/2 cents per \$100 of assessed value; or the appropriations of any special district then existing or thereafter created by a vote of the people, which is totally funded by other than the proceeds of taxes."

²²⁸ Exhibit R, Claimant Comments on Draft Proposed Decision, page 20.

²²⁹ Exhibit I, Claimant Response to Request for Additional Information, page 3.

²³⁰ Exhibit I, Claimant Response to Request for Additional Information, page 3 [citing California Constitution, article XIII B, section 8 (emphasis added)].

²³¹ Article XIII D, section 6(b) (added November 5, 1996, by Proposition 218).

²³² Exhibit I, Claimant Response to Request for Additional Information, pages 4-5.

“divert[ing] existing revenues from their authorized purposes...”²³³ Rather, the increased or reallocated fees are merely being used to ensure that claimants can continue to provide water service consistently with all applicable legal requirements. Claimants’ assertion that an increase or reallocation of fees alters the legal significance of such fees pursuant to article XIII B, section 8 is not supported by the law or the record.

Simply put, Richvale and Biggs do not impose or collect taxes²³⁴ and the Commission cannot say, as a matter of law, that fees increased or imposed to comply with the alleged mandate would constitute proceeds of taxes, within the meaning of article XIII B, section 8. Unless or until a court determines that article XIII B, section 8 can be applied in this manner, the Commission must presume that only those local government entities that collect and expend proceeds of taxes, within the meaning of article XIII A, are subject to the spending limits of article XIII B, including section 6.

Based on the foregoing, the Commission finds that Richvale Irrigation District and Biggs-West Gridley Water District are not subject to the taxing and spending limitations of articles XIII A and XIII B, and are therefore not eligible to claim reimbursement under article XIII B, section 6.

b. South Feather Water and Power Agency and Paradise Irrigation District are eligible to claim reimbursement under article XIII B, section 6.

Claimants state that “South Feather and Paradise receive property tax revenue,” and “are in the process of establishing their appropriations limits for their current fiscal years.”²³⁵

Declarations attached to claimants’ response state that both South Feather and Paradise are in the process of determining and adopting an appropriations limit. Kevin Phillips, Finance Manager of Paradise, stated that during his tenure, “I have not calculated or otherwise established Paradise’s appropriation limit as set forth in Proposition 4.” Mr. Phillips further states that “[a]t the request of Paradise’s legal counsel, I have begun working to establish Paradise’s appropriation limit and intend...to ask Paradise’s Board of Directors to adopt a resolution...for its current fiscal year.”²³⁶ Similarly, Steve Wong, Finance Division Manager of South Feather, states that he has not “calculated or otherwise established South Feather’s appropriation limit” during his employment with South Feather. Mr. Wong further states that “[a]t the request of South Feather’s legal counsel, I have begun working to establish South Feather’s appropriation limit and intend, after the requisite public review period, to ask South Feather’s Board of Directors to adopt a resolution establishing South Feather’s appropriation limit for its current fiscal year.”²³⁷

²³³ See Exhibit I, Claimant Response to Request for Additional Information, pages 4-5.

²³⁴ Note that special districts generally have statutory authorization to impose special taxes, but only with two-thirds voter approval (See article XIII A, section 4). However, there is no evidence in the record indicating that Richvale or Biggs currently collects or expends special taxes.

²³⁵ Exhibit I, Claimant Response to Request for Additional Information, pages 1-2.

²³⁶ See Exhibit I, Claimant Response to Request for Additional Information, page 394.

²³⁷ See Exhibit I, Claimant Response to Request for Additional Information, page 427.

Based on the foregoing, the Commission finds that both South Feather and Paradise are subject to the tax and spend limitations of articles XIII A and XIII B, and are therefore eligible to claim reimbursement under article XIII B, section 6.

3. Oakdale Irrigation District and Glenn-Colusa Irrigation District are eligible to claim reimbursement under article XIII B, section 6 and are thus substituted in as claimants in the consolidated test claims in place of Biggs-West Gridley Water District and Richvale Irrigation District.

Pursuant to the Notice of Pending Dismissal, Oakdale submitted a request to be substituted in as a party on 10-TC-12 and 12-TC-01 on January 13, 2014. Oakdale states that it is subject to the tax and spend limitations of articles XIII A and XIII B, and that it is an agricultural water supplier “subject to the mandates imposed by the Agricultural Water Measurement Regulations...and the Water Conservation Act of 2009.”²³⁸ The declaration of Steve Knell, Oakdale’s General Manager, attached to the Request for Substitution, states that Oakdale “receives an annual share of ad valorem property tax revenue from Stanislaus and San Joaquin counties.” The declaration further states that the District “received \$5,701,730 in property taxes for 2011-2013 and expects to receive approximately \$1.9 million in 2014.”

The Special Districts Annual Reports for 2010-2011 and 2011-2012 do not indicate an appropriations limit for Oakdale in Table 1,²³⁹ but they do indicate that Oakdale received property tax revenue in Table 8 for 2010-2011 and 2011-2012.²⁴⁰

Similarly, Glenn-Colusa submitted a request to be substituted in as a party on both test claims. Glenn-Colusa asserted in its request that it “is subject to the tax and spend limitations of Articles XIII A and XIII B of the California Constitution,” and is an agricultural water supplier, subject to “the mandates imposed by the Water Conservation Act of 2009...and the Agricultural Water Measurement Regulations.”²⁴¹ In declarations attached to the Request for Substitution, Thaddeus Bettner, General Manager of Glenn-Colusa, asserts that the District “received \$520,420 in property taxes in 2013 and expects to receive \$528,300 in 2014.”²⁴²

Table 8 of the Special Districts Annual Report indicates that Glenn-Colusa collected property taxes in 2010-2011 and 2011-2012,²⁴³ but Table 1 does not indicate an appropriations limit for the district.²⁴⁴

²³⁸ Exhibit N, Request for Substitution of Parties by Oakdale Irrigation District, page 2.

²³⁹ Exhibit X, Special Districts Annual Reports for 2010-2011 and 2011-2012, pages 159 and 157, respectively.

²⁴⁰ Exhibit X, Special Districts Annual Reports for 2010-2011 and 2011-2012, pages 381 and 379, respectively.

²⁴¹ Exhibit O, Request for Substitution of Parties by Glenn-Colusa Irrigation District, pages 1-2.

²⁴² Exhibit O, Request for Substitution of Parties by Glenn-Colusa Irrigation District, page 7.

²⁴³ Exhibit X, Special Districts Annual Report, 2010-2011 and 2011-2012, pages 357 and 355, respectively.

²⁴⁴ Exhibit X, Special Districts Annual Report, 2010-2011 and 2011-2012, pages 104 and 101, respectively.

Based on the evidence in the record, including the declarations of the General Managers of Oakdale and Glenn-Colusa, as well as the information reported to the SCO in the Special Districts Annual Reports for fiscal years 2010-2011 and 2011-2012, both the substitute claimants collect some amount of property tax revenue. In turn, because property tax revenue is subject to the appropriations limit, both claimants also expend revenues subject to the appropriations limit, in accordance with article XIII B. A local government entity that is subject to both articles XIII A and XIII B is eligible for subvention under article XIII B, section 6, and is an eligible claimant before the Commission.

The Commission concludes that both Oakdale and Glenn-Colusa are subject to article XIII B as a matter of law, because they have authority to collect and expend property tax revenue.

Based on the foregoing, the Commission finds that Oakdale and Glenn-Colusa are subject to the tax and spend limitations of articles XIII A and XIII B, and are therefore eligible to claim reimbursement under article XIII B, section 6.

B. Some of the Test Claim Statutes and Regulations Impose New Requirements on Urban Retail Water Suppliers.

Test claim 10-TC-12 alleged all of Part 2.55 of Division 6 of the Water Code, which consists of sections 10608 through 10608.64. The following analysis addresses only those sections of Part 2.55 containing mandatory language, and those sections specifically alleged in the test claim narrative. Sections 10608.22, 10608.28, 10608.36, 10608.43, 10608.44, 10608.50, 10608.56, 10608.60, and 10608.64 are not analyzed below, because those sections were not specifically alleged to impose increased costs mandated by the state, and because they do not impose new requirements on local government.

1. Water Code sections 10608, 10608.4(d), 10608.12(a; p), and 10608.16(a), as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), do not impose any new requirements on local government.

Water Code section 10608 states the Legislature’s findings and declarations, including: “Water is a public resource that the California Constitution protects against waste and unreasonable use...” and “Reduced water use through conservation provides significant energy and environmental benefits, and can help protect water quality, improve streamflows, and reduce greenhouse gas emissions.” Subdivision (g), specifically invoked by the claimants,²⁴⁵ states that “[t]he Governor has called for a 20 percent per capita reduction in urban water use statewide by 2020.”²⁴⁶ The plain language of this section establishes a goal, but does not, itself, impose any new requirements on local government.

Water Code section 10608.4 as added, states the “intent of the legislature,” including, as highlighted by the claimants,²⁴⁷ to “[e]stablish a method or methods for urban retail water suppliers to determine targets for achieving increased water use efficiency by the year 2020, in

²⁴⁵ Exhibit A, Test Claim 10-TC-12, page 3.

²⁴⁶ Water Code section 10608(a; d; g) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁴⁷ Exhibit A, Test Claim 10-TC-12, page 3.

accordance with the Governor’s goal of a 20 percent reduction.”²⁴⁸ The plain language of this section expresses legislative intent, and does not impose any new activities on local government

Water Code section 10608.16(a), as added, states that “[t]he state shall achieve a 20 percent reduction in urban per capita water use in California on or before December 31, 2020.” In addition, section 10608.16(b) provides that the state “shall make incremental progress towards the state target specified in subdivision (a) by reducing urban per capita water use by at least 10 percent on or before December 31, 2015.”²⁴⁹ The plain language of this section is directed to the State generally, and does not impose any new mandated activities on local government.

Water Code section 10608.12 provides that “the following definitions govern the construction of this part:” An “urban retail water supplier “ is defined as “a water supplier, either publicly or privately owned, that directly provides potable municipal water to more than 3,000 end users or that supplies more than 3,000 acre-feet of potable water annually at retail for municipal purposes.”²⁵⁰ The claimants allege that the Water Conservation Act imposes unfunded state mandates on urban retail water suppliers, and that South Feather and Paradise “are ‘urban retail water suppliers,’ as defined.”²⁵¹ Likewise, under section 10608.12, an “agricultural water supplier” is defined as “a water supplier, either publicly or privately owned, providing water to 10,000 or more irrigated acres, excluding recycled water.”²⁵² The claimants allege that this definition “expanded the definition of what constitutes an agricultural water supplier,” and thus required a greater number of entities to adopt AWMPs and perform other activities under the Water Code.²⁵³ However, whatever new activities may be required by the test claim statutes, the plain language of amended section 10608.12 does not impose any new requirements on urban retail water suppliers or agricultural water suppliers; section 10608.12 merely prescribes the applicability and scope of the other requirements of the test claim statutes.

Based on the foregoing, the Commission finds that sections 10608, 10608.4 10608.12, and 10608.16, pled as added, do not impose any new requirements on local government, and are therefore denied.

2. Water Code sections 10608.20(a; b; e; and j), 10608.24, and 10608.40, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7) impose new required activities on urban water suppliers.

Prior law required the preparation of an urban water management plan, and required urban water suppliers to update the plan every five years. The test claim statutes add additional information related to conservation goals to that required to be included in a supplier’s UWMP, and authorize an extension of time from December 31, 2010 to July 1, 2011 for the adoption of the next UWMP. As added by the test claim statute, section 10608.20 provides, in pertinent part:

²⁴⁸ Water Code section 10608.4 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁴⁹ Water Code section 10608.16(a; b) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵⁰ Water Code section 10608.12(p) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵¹ Exhibit A, 10-TC-12, page 2.

²⁵² Water Code section 10608.12(a) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵³ Exhibit A, 10-TC-12, page 8.

(a)(1) Each urban retail water supplier shall develop urban water use targets and an interim urban water use target by July 1, 2011. Urban retail water suppliers may elect to determine and report progress toward achieving these targets on an individual or regional basis, as provided in subdivision (a) of Section 10608.28, and may determine the targets on a fiscal year or calendar year basis.

(2) It is the intent of the Legislature that the urban water use targets described in subdivision (a) cumulatively result in a 20-percent reduction from the baseline daily per capita water use by December 31, 2020.

(b) An urban retail water supplier shall adopt one of the following methods for determining its urban water use target pursuant to subdivision (a):

(1) Eighty percent of the urban retail water supplier's baseline per capita daily water use.

(2) The per capita daily water use that is estimated using the sum of the following performance standards:

(A) For indoor residential water use, 55 gallons per capita daily water use as a provisional standard. Upon completion of the department's 2016 report to the Legislature pursuant to Section 10608.42, this standard may be adjusted by the Legislature by statute.

(B) For landscape irrigated through dedicated or residential meters or connections, water efficiency equivalent to the standards of the Model Water Efficient Landscape Ordinance set forth in Chapter 2.7 (commencing with Section 490) of Division 2 of Title 23 of the California Code of Regulations, as in effect the later of the year of the landscape's installation or 1992. An urban retail water supplier using the approach specified in this subparagraph shall use satellite imagery, site visits, or other best available technology to develop an accurate estimate of landscaped areas.

(C) For commercial, industrial, and institutional uses, a 10-percent reduction in water use from the baseline commercial, industrial, and institutional water use by 2020.

(3) Ninety-five percent of the applicable state hydrologic region target, as set forth in the state's draft 20x2020 Water Conservation Plan (dated April 30, 2009). If the service area of an urban water supplier includes more than one hydrologic region, the supplier shall apportion its service area to each region based on population or area.

(4) A method that shall be identified and developed by the department, through a public process, and reported to the Legislature no later than December 31, 2010...²⁵⁴

In addition, section 10608.20(e) provides that an urban retail water supplier "shall include in its urban water management plan due in 2010...the baseline daily per capita water use, urban water

²⁵⁴ Water Code section 10608.20 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

use target, interim urban water use target, and compliance daily per capita water use, along with the bases for determining estimates, including references to supporting data.”²⁵⁵

And, section 10608.20(j) provides that an urban retail water supplier “shall be granted an extension to July 1, 2011...” to adopt a complying water management plan, and that an urban retail water supplier that adopts an urban water management plan due in 2010 “that does not use the methodologies developed by the department pursuant to subdivision (h) shall amend the plan by July 1, 2011 to comply with this part.”²⁵⁶

Section 10608.40 provides that an urban retail water supplier shall also “report to [DWR] on their progress in meeting their urban water use targets as part of their [UWMPs] submitted pursuant to Section 10631.”²⁵⁷

Section 10608.24 provides that each urban retail water supplier “shall meet its interim urban water use target by December 31, 2015,” and “shall meet its [final] urban water use target by December 31, 2020.”²⁵⁸

As discussed above, prior law required the adoption of an UWMP, which, pursuant to section 10631, included a detailed description and analysis of water supplies within the service area, including reliability of supply in normal, dry, and multiple dry years, and a description and evaluation of water demand management measures currently being implemented and scheduled for implementation.²⁵⁹ Pursuant to existing section 10621, that plan was required to be updated “once every five years...in years ending in five and zero.”²⁶⁰ And, existing section 10631(e) also required identification and quantification of past, current and projected water use over a five-year period including, but not necessarily limited to, all of the following uses:

- (A) Single-family residential.
- (B) Multifamily.
- (C) Commercial.
- (D) Industrial.
- (E) Institutional and governmental.
- (F) Landscape.
- (G) Sales to other agencies.
- (H) Saline water intrusion barriers, groundwater recharge, or conjunctive use, or any combination thereof.

²⁵⁵ Water Code section 10608.20(e) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵⁶ Water Code section 10608.20(j) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵⁷ Water Code section 10608.40 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵⁸ Water Code section 10608.24(a; b) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁵⁹ Water Code section 10631 (Stats. 2009, ch. 534 (AB 1465)).

²⁶⁰ Water Code section 10621 (Stats. 2007, ch. 64 (AB 1376)).

(I) Agricultural.²⁶¹

However, nothing in prior law required the adoption of urban water use targets, baseline information on a per capita basis (as opposed to on a type of use basis), interim and final water use targets, assessment of present and proposed measures to achieve the targeted reductions, or a report on the supplier's progress toward meeting the reductions.

Based on the foregoing, the Commission finds that Water Code sections 10608.20, 10608.24, and 10608.40, as added by the test claim statute, impose new requirements on urban retail water suppliers, as follows:

- Develop urban water use targets and an interim urban water use targets by July 1, 2011.²⁶²
- Adopt one of the methods specified in section 10608.20(b) for determining an urban water use target.²⁶³
- Include in its urban water management plan due in 2010 the baseline daily per capita water use, urban water use target, interim urban water use target, and compliance daily per capita water use, along with the bases for determining those estimates, including references to supporting data.²⁶⁴
- Report to DWR on their progress in meeting urban water use targets as part of their UWMPs.²⁶⁵
- Amend its urban water management plan, by July 1, 2011, to allow use of technical methodologies developed by the department pursuant to subdivisions (b) and (h) of section 10608.20.²⁶⁶
- Meet interim urban water use target by December 31, 2015.²⁶⁷
- Meet final urban water use target by December 31, 2020.²⁶⁸

The activities required to meet the interim and final urban water use targets are intended to vary significantly among local governments based upon differences in climate, population density, levels of per capita water use according to plant water needs, levels of commercial, industrial, and institutional water use, and the amount of hardening that has occurred as a result of prior conservation measures implemented in different regions

²⁶¹ Water Code section 10631 (Stats. 2009, ch. 534 (AB 1465)).

²⁶² Water Code section 10608.20(a) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶³ Water Code section 10608.20(b) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶⁴ Water Code section 10608.20(e) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶⁵ Water Code section 10608.40 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶⁶ Water Code section 10608.20(i) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶⁷ Water Code section 10608.24(a) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁶⁸ Water Code section 10608.24(b) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

throughout the state. Local variations, therefore, are not expressly stated in the test claim statutes.

3. Water Code section 10608.26, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), requires urban water suppliers to conduct at least one public hearing to allow community input regarding an urban retail water supplier's implementation plan.

Section 10608.26 provides that “[i]n complying with this part,” an urban retail water supplier shall conduct at least one public hearing “to accomplish all of the following:” (1) allow community input regarding the urban retail water supplier’s implementation plan; (2) consider the economic impacts of the urban retail water supplier’s implementation plan; and (3) adopt one of the four methods provided in section 10608.20(b) for determining its urban water use target.²⁶⁹

The claimants assert that “prior to the Act, there was no requirement to conduct at least one public hearing to allow for community input regarding conservation, consider economic impacts of the implementing the 20% reduction [*sic*], or to adopt a method for determining an urban water use target.”²⁷⁰

Section 10642, added by Statutes 1983, chapter 1009, required a public hearing prior to *adopting an UWMP*, as follows:

Prior to adopting a plan, the urban water supplier shall make the plan available for public inspection and shall hold a public hearing thereon. Prior to the hearing, notice of the time and place of hearing shall be published within the jurisdiction of the publicly owned water supplier pursuant to Section 6066 of the Government Code...²⁷¹

However, section 10608.26 requires a public hearing for purposes of allowing public input regarding an implementation plan, considering the economic impacts of an implementation plan, or adopting a method for determining the urban water supplier’s water use targets, as required by section 10608.20(b). DWR, the agency with responsibility for implementing the Water Conservation Act, has interpreted these two requirements as only requiring one hearing.²⁷² As the implementing agency, DWRs interpretation of the Act is entitled to great weight.²⁷³

Based on the foregoing, the Commission finds that section 10608.26 imposes a new and additional requirement on urban retail water suppliers, as follows:

²⁶⁹ Water Code section 10608.26(a) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁷⁰ Exhibit A, 10-TC-12, page 8 [citing Water Code section 10608.26(a)(1-3)].

²⁷¹ Water Code section 10642 (Stats. 1983, ch. 1009) [citing Government Code section 6066 (Stats. 1959, ch. 954), which provides for publication once per week for two successive weeks in a newspaper of general circulation].

²⁷² Exhibit X, Department of Water Resources, *Guidebook to Assist Urban Water Suppliers to Prepare a 2010 Urban Water Management Plan*, pp. A-2 and 3-4.

²⁷³ *Yamaha Corporation of America v. State Board of Equalization* (1998) 19 Cal.4th 1, 10-11.

Include in the public hearing on the adoption of the UWMP an opportunity for community input regarding the urban retail water supplier's implementation plan; consideration of the economic impacts of the implementation plan; and the adoption of a method, pursuant to section 10608.20(b), for determining urban water use targets.²⁷⁴

4. Water Code section 10608.42, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), does not impose any new requirements on local government.

Section 10608.42 provides:

The department shall review the 2015 urban water management plans and report to the Legislature by December 31, 2016, on progress towards achieving a 20-percent reduction in urban water use by December 31, 2020. The report shall include recommendations on changes to water efficiency standards or urban water use targets in order to achieve the 20-percent reduction and to reflect updated efficiency information and technology changes.²⁷⁵

The claimants allege that section 10608.42 requires an UWMP, adopted by an urban retail water supplier, to "describe the urban retail water supplier's progress toward achieving the 20% reduction by 2020."²⁷⁶ However, the plain language of this section is directed to DWR, and does not, itself, impose any new activities or requirements on local government.

Based on the foregoing, the Commission finds that section 10608.42 does not impose any new requirements on local government, and is therefore denied.

5. Water Code sections 10608.56 and 10608.8, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), do not impose any new requirements on local government.

Section 10806.56 provides that "[o]n and after July 1, 2016, an urban retail water supplier is not eligible for a water grant or loan awarded or administered by the state unless the supplier complies with this part."²⁷⁷ The plain language of this section does not impose any new requirements on local government; the section only states the consequence of failing to comply with all other requirements of the Act.

Section 10608.8 provides that "[b]ecause an urban agency is not required to meet its urban water use target until 2020 pursuant to subdivision (b) of Section 10608.24, an urban retail water supplier's failure to meet those targets shall not establish a violation of law for purposes of any state administrative or judicial proceeding prior to January 1, 2021."²⁷⁸ The plain language of

²⁷⁴ Water Code section 10608.26 ((Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)). See also Exhibit X, Department of Water Resources, *Guidebook to Assist Urban Water Suppliers to Prepare a 2010 Urban Water Management Plan*, pp. A-2 and 3-4.

²⁷⁶ Exhibit A, 10-TC-12, page 3.

²⁷⁷ Water Code section 10608.56 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁷⁸ Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

this section does not impose any new requirements on local government; rather, the section states that no violation of law shall occur until after the date that urban water use targets are supposed to be met.

The claimants allege that Water Code section 10608.56 imposes reimbursable state-mandated costs, alleging that “[f]ailure to comply with the aforementioned mandates by South Feather and Paradise will result, on and after July 1, 2016, in ineligibility for water grants or loans awarded or administered by the State of California.” In addition, the claimants allege that “a failure to meet the 20% target shall be a violation of law on and after January 1, 2021,” citing Water Code section 10608.8.²⁷⁹ The plain language of sections 10608.8 and 10608.56, as described above, do not impose any new activities or tasks on local government; the provisions that the claimants allege only state the consequences of failing to comply with all other requirements of the Act.

Based on the foregoing, the Commission finds that sections 10806.56 and 10806.8 do not impose any new requirements on local government, and are therefore denied.

C. Some of the Test Claim Statutes and Regulations Impose New Requirements on Non-exempt Agricultural Water Suppliers.

Chapter 4 of Part 2.55 of Division 6 of the Water Code consists of a single code section that addresses water conservation requirements for agricultural water suppliers: section 10608.48. The remaining provisions of the test claim statute addressing agricultural water suppliers were added in Part 2.8 of Division 6 of the Water Code, consisting of sections 10800-10853, and address agricultural water management planning requirements. Sections 10608.8 and 10828 provide for exemptions from the requirements of Part 2.55 and Part 2.8, respectively, under certain circumstances, which are addressed where relevant below.

1. Water Code section 10608.48(a-c), as amended by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), imposes new requirements on some agricultural water suppliers to implement efficient water management practices, including measurement and a pricing structure based in part on quantity of water delivered; and to implement up to fourteen other efficient water management practices, if locally cost effective and technically feasible.

Section 10608.48 provides for the implementation by agricultural water suppliers of specified critical efficient water management practices, including measurement and volume-based pricing; and *additional* efficient water management practices, where locally cost effective and technically feasible, as follows:

- (a) On or before July 31, 2012, an agricultural water supplier shall implement efficient water management practices pursuant to subdivisions (b) and (c).
- (b) Agricultural water suppliers shall implement *all of the following critical efficient management practices*:
 - (1) Measure the volume of water delivered to customers with sufficient accuracy to comply with subdivision (a) of Section 531.10 and to implement paragraph (2).

²⁷⁹ Exhibit A, 10-TC-12, page 4.

(2) Adopt a pricing structure for water customers based at least in part on quantity delivered.

(c) Agricultural water suppliers shall implement *additional efficient management practices*, including, but not limited to, practices to accomplish all of the following, *if the measures are locally cost effective and technically feasible*:

- (1) Facilitate alternative land use for lands with exceptionally high water duties or whose irrigation contributes to significant problems, including drainage.
- (2) Facilitate use of available recycled water that otherwise would not be used beneficially, meets all health and safety criteria, and does not harm crops or soils.
- (3) Facilitate the financing of capital improvements for on-farm irrigation systems.
- (4) Implement an incentive pricing structure that promotes one or more of the following goals:
 - (A) More efficient water use at the farm level.
 - (B) Conjunctive use of groundwater.
 - (C) Appropriate increase of groundwater recharge.
 - (D) Reduction in problem drainage.
 - (E) Improved management of environmental resources.
 - (F) Effective management of all water sources throughout the year by adjusting seasonal pricing structures based on current conditions.
- (5) Expand line or pipe distribution systems, and construct regulatory reservoirs to increase distribution system flexibility and capacity, decrease maintenance, and reduce seepage.
- (6) Increase flexibility in water ordering by, and delivery to, water customers within operational limits.
- (7) Construct and operate supplier spill and tailwater recovery systems.
- (8) Increase planned conjunctive use of surface water and groundwater within the supplier service area.
- (9) Automate canal control structures.
- (10) Facilitate or promote customer pump testing and evaluation.
- (11) Designate a water conservation coordinator who will develop and implement the water management plan and prepare progress reports.
- (12) Provide for the availability of water management services to water users. These services may include, but are not limited to, all of the following:
 - (A) On-farm irrigation and drainage system evaluations.

- (B) Normal year and real-time irrigation scheduling and crop evapotranspiration information.
 - (C) Surface water, groundwater, and drainage water quantity and quality data.
 - (D) Agricultural water management educational programs and materials for farmers, staff, and the public.
- (13) Evaluate the policies of agencies that provide the supplier with water to identify the potential for institutional changes to allow more flexible water deliveries and storage.
- (14) Evaluate and improve the efficiencies of the supplier’s pumps.²⁸⁰

The claimants allege that section 10608.48 requires agricultural water suppliers (Oakdale and Glenn-Colusa) to “measure the volume of water delivered to their customers using best professional practices to achieve a minimum level of measurement accuracy at the farm-gate.” In addition, they allege, agricultural water suppliers are required to “adopt a pricing structure for water customers based on the quantity of water delivered.” The claimants further allege that “[i]f ‘locally cost effective’ and technically feasible, agricultural water suppliers are required to implement fourteen additional efficient management practices” specified in section 10608.48(c).²⁸¹

The claimants argue that prior to the test claim statute, agricultural water suppliers “were not required to have a pricing structure based, at least in part, on the quantity of water delivered,” and were not required to measure the volume of water delivered if it was not locally cost effective to do so. The claimants assert that “[w]hile subdivision (a) of Water Code section 531.10 was a preexisting obligation, subdivision (b) of that same section gave an exception to the farm-gate measurement requirement if the measurement devices were not locally cost effective.” The claimants conclude that now “[t]he Act requires compliance with subdivision (a) regardless of whether it is locally cost effective.”²⁸² In addition, the claimants assert that prior to the Act, “there was no requirement to implement up to 14 additional conservation measures if locally cost effective and technically feasible.”²⁸³

Section 531.10 of the Water Measurement Law, as added by Statutes 2007, chapter 675 provides, in its entirety:

- (a) An agricultural water supplier shall submit an annual report to the department that summarizes aggregated farm-gate delivery data, on a monthly or bimonthly basis, using best professional practices.
- (b) Nothing in this article shall be construed to require the implementation of water measurement programs or practices that are not locally cost effective.

²⁸⁰ Water Code section 10608.48(a-c) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)) [emphasis added].

²⁸¹ Exhibit A, Test Claim 10-TC-12, page 4.

²⁸² Exhibit A, 10-TC-12, page 8.

²⁸³ Exhibit A, 10-TC-12, page 8.

(c) It is the intent of the Legislature that the requirements of this section shall complement and not affect the scope of authority granted to the department or the board by provisions of law other than this article.

The plain language of section 531.10 required agricultural water suppliers to submit an annual report to DWR summarizing aggregated data on water delivered to individual agricultural customers using best professional practices, but only if water measurement programs or practices were locally cost effective.²⁸⁴ Therefore, to the extent that water measurement programs or practices *were* locally cost effective, such activities were required to comply with prior law. Section 10608.48(b), in turn, does not impose a *new* requirement to “[m]easure the volume of water delivered to customers with sufficient accuracy to comply with [section 531.10(a),]” if such water measurement activities were already performed. However, section 10608.48(b) also requires an agricultural water supplier, *regardless of local cost-effectiveness*, to “[m]easure the volume of water delivered to customers with sufficient accuracy to comply with subdivision (a) of Section 531.10 *and to implement paragraph (2),*” which requires suppliers to implement a pricing structure based at least in part on volume of water delivered. Therefore, section 10608.48(b) imposes a new requirement to the extent that prior law activities were not sufficient to also implement a pricing structure based at least in part on quantity of water delivered.

Moreover, Water Code section 10608.8 provides that “[t]he requirements of this part do not apply to an agricultural water supplier that is a party to the Quantification Settlement Agreement” (QSA), as defined in Statutes 2002, chapter 617, section 1, for as long as the QSA remains in effect.²⁸⁵ The local agency parties to the QSA include the San Diego County Water Authority, Coachella Valley Water District, Imperial Irrigation District, and Metropolitan Water District of Southern California.²⁸⁶ As a result, by the plain language of Water Code section 10608.8 those entities are exempt and are not mandated by the state to comply with the requirements of Part 2.55 of Division 6 of the Water Code, including section 10608.48.

Based on the foregoing, the Commission finds that section 10608.48 imposes new requirements on agricultural water suppliers, except those that are parties to the Quantification Settlement Agreement, as defined in Statutes 2002, chapter 617, section 1, for as long as QSA remains in effect, as follows:

- Measure the volume of water delivered to customers with sufficient accuracy to (1) comply with subdivision (a) of Water Code section 531.10, which previously imposed the requirement, with specified exceptions, for agricultural water suppliers to submit an annual report summarizing aggregated farm-gate delivery data, on a monthly or bi-monthly basis, using best professional practices; and (2) implement a pricing structure for water customers based at least in part on quantity of water delivered.²⁸⁷

²⁸⁴ Water Code section 531.10 (Stats. 2007, Ch. 675 (AB 1404)).

²⁸⁵ Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

²⁸⁶ Exhibit X, Quantification Settlement Agreement, dated October 10, 2003.

²⁸⁷ Water Code section 10608.48(b)(1) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

*This activity is only newly required if measurement of farm-gate delivery data was not previously performed by the agricultural water supplier pursuant to a determination under section 531.10(b) that such measurement programs or practices were not locally cost effective, or if measurement data was not sufficient to implement a pricing structure based at least in part on quantity of water delivered.*²⁸⁸

- Implement a pricing structure for water customers based at least in part on quantity of water delivered.²⁸⁹
- *If the measures are locally cost effective and technically feasible*, implement additional efficient management practices, including, but not limited to, practices to accomplish all of the following:
 - (1) Facilitate alternative land use for lands with exceptionally high water duties or whose irrigation contributes to significant problems, including drainage.
 - (2) Facilitate use of available recycled water that otherwise would not be used beneficially, meets all health and safety criteria, and does not harm crops or soils.
 - (3) Facilitate the financing of capital improvements for on-farm irrigation systems.
 - (4) Implement an incentive pricing structure that promotes one or more of the following goals:
 - (A) More efficient water use at the farm level.
 - (B) Conjunctive use of groundwater.
 - (C) Appropriate increase of groundwater recharge.
 - (D) Reduction in problem drainage.
 - (E) Improved management of environmental resources.
 - (F) Effective management of all water sources throughout the year by adjusting seasonal pricing structures based on current conditions.
 - (5) Expand line or pipe distribution systems, and construct regulatory reservoirs to increase distribution system flexibility and capacity, decrease maintenance, and reduce seepage.
 - (6) Increase flexibility in water ordering by, and delivery to, water customers within operational limits.

²⁸⁸ Water Code section 531.10(a-b) previously required reporting annually to the Department of Water Resources aggregated farm-gate delivery data, summarized on a monthly or bi-monthly basis, unless such measurement programs or practices were not locally cost effective. If an agricultural water supplier had not determined that such practices were not locally cost effective, then the prior law, Section 531.10(a) would have required measurement, and the activity is not therefore new.

²⁸⁹ Water Code section 10608.48(b)(2) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

- (7) Construct and operate supplier spill and tailwater recovery systems.
 - (8) Increase planned conjunctive use of surface water and groundwater within the supplier service area.
 - (9) Automate canal control structures.
 - (10) Facilitate or promote customer pump testing and evaluation.
 - (11) Designate a water conservation coordinator who will develop and implement the water management plan and prepare progress reports.
 - (12) Provide for the availability of water management services to water users. These services may include, but are not limited to, all of the following:
 - (A) On-farm irrigation and drainage system evaluations.
 - (B) Normal year and real-time irrigation scheduling and crop evapotranspiration information.
 - (C) Surface water, groundwater, and drainage water quantity and quality data.
 - (D) Agricultural water management educational programs and materials for farmers, staff, and the public.
 - (13) Evaluate the policies of agencies that provide the supplier with water to identify the potential for institutional changes to allow more flexible water deliveries and storage.
 - (14) Evaluate and improve the efficiencies of the supplier's pumps.²⁹⁰
2. Water Code sections 10608.48(d-f) and 10820-10829, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), impose new requirements on agricultural water suppliers, as defined pursuant to section 10608.12, to prepare and adopt on or before December 31, 2012, and to update on or before December 31, 2015, and every five years thereafter, an agricultural water management plan, as specified. However, many agricultural water suppliers, including all participants in the Central Valley Project and United States Bureau of Reclamation water contracts, are exempt from the requirement to *prepare and adopt an agricultural water management plan* pursuant to 10826, because they were already required by existing federal law to prepare a water conservation plan, which they may submit to satisfy this requirement.

As noted above, the test claim statute repealed and added Part 2.8 of Division 6 of the Water Code, commencing with section 10800. While a number of the activities alleged in these consolidated test claims were required by the prior provisions of the Water Code that were repealed and replaced by the test claim statute, those provisions were by their own terms no longer operative immediately prior to the effective date of the test claim statute. Former Water Code section 10855, as added by Statutes 1986, chapter 954, provided that “[t]his part shall

²⁹⁰ Water Code section 10608.48(c) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

remain operative only until January 1, 1993...” Therefore, the provisions added by the test claim statute, which became effective on February 3, 2010, impose new requirements or activities.²⁹¹

Section 10820, as added, provides that all agricultural water suppliers *shall prepare and adopt* an AWMP on or before December 31, 2012, and shall update that plan on December 31, 2015, and on or before December 31 every five years thereafter.²⁹²

Section 10826, as added, provides that the plan “shall do all of the following:”

(a) Describe the agricultural water supplier and the service area, including all of the following:

- (1) Size of the service area.
- (2) Location of the service area and its water management facilities.
- (3) Terrain and soils.
- (4) Climate.
- (5) Operating rules and regulations.
- (6) Water delivery measurements or calculations.
- (7) Water rate schedules and billing.
- (8) Water shortage allocation policies.

(b) Describe the quantity and quality of water resources of the agricultural water supplier, including all of the following:

- (1) Surface water supply.
- (2) Groundwater supply.
- (3) Other water supplies.
- (4) Source water quality monitoring practices.
- (5) Water uses within the agricultural water supplier’s service area, including all of the following:
 - (A) Agricultural.
 - (B) Environmental.
 - (C) Recreational.
 - (D) Municipal and industrial.
 - (E) Groundwater recharge.
 - (F) Transfers and exchanges.

²⁹¹ Bills introduced in an extraordinary session take effect 91 days after the final adjournment of that extraordinary session. (Cal. Const. Art. IV, Sec. 8(c)(1).) The 7th Extraordinary Session concluded on November 4, 2009. Thus, the effective date of SB X7 7 is February 3, 2010.

²⁹² Water Code section 10820 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

- (G) Other water uses.
- (6) Drainage from the water supplier’s service area.
- (7) Water accounting, including all of the following:
 - (A) Quantifying the water supplier’s water supplies.
 - (B) Tabulating water uses.
 - (C) Overall water budget.
- (8) Water supply reliability.
- (c) Include an analysis, based on available information, of the effect of climate change on future water supplies.
- (d) Describe previous water management activities.
- (e) Include in the plan the water use efficiency information required pursuant to Section 10608.48.²⁹³

Meanwhile, section 10608.48(d) provides that agricultural water suppliers “shall include in the agricultural water management plans required pursuant to [section 10820] a report on which efficient water management practices have been implemented and are planned to be implemented, an estimate of the water use efficiency improvements that have occurred since the last report, and an estimate of the water use efficiency improvements estimated to occur five and 10 years in the future.”²⁹⁴

Furthermore, section 10608.48 provides that if a supplier “determines that an efficient water management practice is not locally cost effective or technically feasible, the supplier shall submit information documenting that determination.”²⁹⁵ And, the section further provides that “[t]he data shall be reported using a standardized form developed pursuant to Section 10608.52.”²⁹⁶

In addition, section 10828 provides that:

- (a) Agricultural water suppliers that are required to submit water conservation plans to the United States Bureau of Reclamation pursuant to either the Central Valley Project Improvement Act (Public Law 102-575) or the Reclamation Reform Act of 1982, or both, *may submit those water conservation plans to satisfy the requirements of Section 10826, if both of the following apply:*
 - (1) The agricultural water supplier has adopted and submitted the water conservation plan to the United States Bureau of Reclamation within the previous four years.
 - (2) The United States Bureau of Reclamation has accepted the water conservation plan as adequate.

²⁹³ Water Code section 10826 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁹⁴ Water Code section 10608.48(d) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁹⁵ Water Code section 10608.48(d) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁹⁶ *Ibid.*

(b) This part does not require agricultural water suppliers that are required to submit water conservation plans to the United States Bureau of Reclamation pursuant to either the Central Valley Project Improvement Act (Public Law 102-575) or the Reclamation Reform Act of 1982, or both, to prepare and adopt water conservation plans according to a schedule that is different from that required by the United States Bureau of Reclamation.²⁹⁷

And, section 10829 provides that an agricultural water supplier may satisfy the requirements “of this part” by adopting an UWMP pursuant to Part 2.6 or by participating in areawide, regional, watershed, or basinwide water management planning, so long as those plans meet or exceed the requirements of this part.²⁹⁸

Based on the plain language of section 10828, those local agencies who are CVP or USBR contractors may submit a copy of their water conservation plan already submitted to USBR in satisfaction of the requirements of section 10826 (which provides for the contents of an AWMP). In addition, section 10828(b) provides that CVP or USBR contractors are not required to adhere to the “schedule” for preparing and adopting AWMPs, as provided in section 10820, above. Therefore, the requirements of section 10820, to prepare and adopt an AWMP on or before December 31, 2012, and to update the AWMP on or before December 31, 2015 and every five years thereafter, do not apply to CVP or USBR contractors, who may instead rely on the schedule for updating and readopting their water conservation plans.

Both Glenn-Colusa and Oakdale are contractors with the United States Bureau of Reclamation (USBR) and as a result are required by federal law to prepare water conservation plans. Glenn-Colusa and Oakdale are also CVP contractors, as are dozens of other local agencies.²⁹⁹

As noted above, Water Code section 10608.8 provides that “[t]he requirements of this part do not apply to an agricultural water supplier that is a party to the Quantification Settlement Agreement” (QSA), as defined in Statutes 2002, chapter 617, section 1 for as long as QSA remains in effect.³⁰⁰ Therefore, a supplier that is a party to the QSA is not mandated by the state to include the water use efficiency reporting requirements in the plan pursuant to section 10680.48.

Additionally, section 10608.48(f) provides that an agricultural water supplier “may meet the requirements of subdivisions (d) and (e) by submitting to [DWR] a water conservation plan submitted to the United States Bureau of Reclamation that meets the requirements described in Section 10828.”³⁰¹ Therefore, the requirements to include in a supplier’s AWMP a report on efficient water management practices and documentation on those practices determined not to be cost effective or technically feasible, pursuant to section 10608.48(d-e), do not apply to CVP or

²⁹⁷ Water Code section 10828 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁹⁸ Water Code section 10829 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

²⁹⁹ Exhibit X, Bureau of Reclamation, Mid-Pacific Region, Central Valley Project (CVP) Water Contractors, dated March 4, 2014.

³⁰⁰ Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁰¹ Water Code section 10608.48(e; f) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

USBR contractors that prepare and submit water conservation plans to USBR.³⁰² The *Guidebook to Assist Agricultural Water Suppliers to Prepare a 2012 Agricultural Water Management Plan*, issued by DWR, “encourages” suppliers to file certain “documentation as an attachment with the USBR-accepted water management/conservation plan.”³⁰³ However, the plain language of section 10608.48(f) states that a supplier may satisfy the requirements of section 10608.48(d) and (e) by submitting to DWR its water conservation plan prepared for USBR. And, section 10828, as shown above, exempts CVP and USBR contractors from the requirement to prepare an AWMP in the first instance. Finally, pursuant to section 10829, the requirement to adopt an AWMP in the first instance does not apply if the supplier adopts a UWMP, or participates in regional water management planning.

Based on the foregoing, the Commission finds that newly added sections 10820 and 10826, and 10608.48(d-f), impose the following new requirements on agricultural water suppliers, except for suppliers that adopt a UWMP or participate in areawide, regional, watershed, or basinwide water management planning, and CVP and USBR contractors:

- On or before December 31, 2012, prepare and adopt an agricultural water management plan in accordance with section 10826.³⁰⁴
- On or before December 31, 2015, and every five years thereafter, update the agricultural water management plan, in accordance with section 10820 et seq.³⁰⁵
- If a supplier becomes an agricultural water supplier, as defined, after December 31, 2012, that agricultural water supplier shall prepare and adopt an agricultural water management plan within one year after the date that it has become an agricultural water supplier.³⁰⁶
- Include in the agricultural water management plans required pursuant to Water Code section 10800 et seq. a report on which efficient water management practices have been implemented and are planned to be implemented, an estimate of the water use efficiency improvements that have occurred since the last report,

³⁰² Water Code section 10608.48(f) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁰³ Exhibit X, *Guidebook to Assist Agricultural Water Suppliers to Prepare a 2012 Agricultural Water Management Plan*, page 11, “The agricultural water suppliers that submit a plan to USBR may meet the requirements of section 10608.48 (d) and (e) [report of EWMPs implemented, planned for implementation, and estimate of efficiency improvements, as well as documentation for not locally cost effective EWMPs] by submitting the USBR-accepted plan to DWR. “DWR encourages CVPIA/RRA water suppliers to also provide a report on water use efficiency information (required by section 10608.48(d);see Section 3.7 of this Guidebook).” Emphasis added.

³⁰⁴ Water Code sections 10820; 10826 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁰⁵ Water Code sections 10820; 10826 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁰⁶ Water Code section 10820 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

and an estimate of the water use efficiency improvements estimated to occur five and 10 years in the future.³⁰⁷

*In addition, an agricultural water supplier that is a party to the Quantification Settlement Agreement (QSA), as defined in Statutes 2002, chapter 617, section 1 is not subject to this requirement for as long as the QSA remains in effect.*³⁰⁸

- If an agricultural water supplier determines that an efficient water management practice is not locally cost effective or technically feasible, the supplier shall submit information documenting that determination.³⁰⁹

*In addition, an agricultural water supplier that is a party to the Quantification Settlement Agreement (QSA), as defined in Statutes 2002, chapter 617, section 1 is not subject to this requirement for as long as the QSA remains in effect.*³¹⁰

- Report the data using a standardized form developed pursuant to Water Code section 10608.52.³¹¹

*An agricultural water supplier that is a party to the Quantification Settlement Agreement (QSA), as defined in Statutes 2002, chapter 617, section 1 is not subject to this requirement for as long as the QSA remains in effect.*³¹²

3. Section 10608.48(g-i), as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), does not impose any new activities on local government.

Section 10608.48(g) provides that on or before December 31, 2013, DWR shall submit to the Legislature a report on agricultural efficient water management practices that have been implemented or are planned to be implemented, and an assessment of those practices and their effects on agricultural operations. Section 10608.48(h) states that DWR “may update the efficient water management practices required pursuant to [section 10608.48(c)],” but only after conducting public hearings. Section 10608.48(i) provides that DWR “shall adopt regulations that provide for a range of options that agricultural water suppliers may use or implement to comply with the measurement requirement” of section 10608.48(b).

The plain language of these sections section 10608.48(g-i) is directed to DWR, and does not impose any activities or requirements on local government.

4. Sections 10821, 10841, 10842, 10843, and 10844, as added by Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), impose new requirements on agricultural water suppliers.

³⁰⁷ Water Code section 10608.48(d) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁰⁸ Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³⁰⁹ Water Code section 10608.48(d) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹⁰ Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³¹¹ Water Code section 10608.48(e) (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹² Water Code section 10608.8 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

Water Code section 10821, as added, provides that an agricultural water supplier required to prepare an AWMP pursuant to this part, “shall notify each city or county within which the supplier provides water supplies that the agricultural water supplier will be preparing the plan or reviewing the plan and considering amendments or changes to the plan.”³¹³

In addition, newly added section 10841 requires that the plan be made available for public inspection and that a public hearing shall be held as follows:

Prior to adopting a plan, the agricultural water supplier shall make the proposed plan available for public inspection, and shall hold a public hearing on the plan. Prior to the hearing, notice of the time and place of hearing shall be published within the jurisdiction of the publicly owned agricultural water supplier pursuant to Section 6066 of the Government Code. A privately owned agricultural water supplier shall provide an equivalent notice within its service area and shall provide a reasonably equivalent opportunity that would otherwise be afforded through a public hearing process for interested parties to provide input on the plan...³¹⁴

Section 10842 provides that an agricultural water supplier shall implement its AWMP “in accordance with the schedule set forth in its plan.”³¹⁵

Following adoption of an AWMP, section 10843 requires an agricultural water supplier to submit a copy of its AWMP, no later than 30 days after adoption, to DWR and to the following affected or interested entities:

- (2) Any city, county, or city and county within which the agricultural water supplier provides water supplies.
- (3) Any groundwater management entity within which jurisdiction the agricultural water supplier extracts or provides water supplies.
- (4) Any urban water supplier within which jurisdiction the agricultural water supplier provides water supplies.
- (5) Any city or county library within which jurisdiction the agricultural water supplier provides water supplies.
- (6) The California State Library.
- (7) Any local agency formation commission serving a county within which the agricultural water supplier provides water supplies.³¹⁶

Finally, newly added section 10844 requires an agricultural water supplier to make its water management plan available for public review via the internet, as follows:

³¹³ Water Code section 10821 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹⁴ Water Code section 10841 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹⁵ Water Code section 10842 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹⁶ Water Code section 10843 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

- (a) Not later than 30 days after the date of adopting its plan, the agricultural water supplier shall make the plan available for public review on the agricultural water supplier's Internet Web site.
- (b) An agricultural water supplier that does not have an Internet Web site shall submit to [DWR], not later than 30 days after the date of adopting its plan, a copy of the adopted plan in an electronic format. [DWR] shall make the plan available for public review on [its] Internet Web site.³¹⁷

The prior provisions of the Water Code pertaining to the adoption and implementation of AWMPs, as explained above, were inoperative by their own terms as of January 1, 1993.³¹⁸ Therefore, the requirements to hold a public hearing, to implement the plan in accordance with the schedule, to submit copies to DWR and other specified local entities, and to make the plan available by either posting the plan on the supplier's web site, or by sending an electronic copy to DWR for posting on its web site, are new activities with respect to prior law.

However, section 10828, as discussed above, provides that USBR or CVP contractors may satisfy the requirements of section 10826 by submitting their water conservation plans adopted within the previous four years pursuant to the Central Valley Improvement Act or the Reclamation Reform Act of 1982.³¹⁹ This section does not expressly exempt CVP or USBR contractors from all requirements of Part 2.8, but only from the content requirements of the plan itself, and the requirement to adopt according to the "schedule" set forth in section 10820, as discussed above. Accordingly, DWR's *Guidebook to Assist Agricultural Water Suppliers to Prepare a 2012 [AWMP]* provides:

All agricultural water suppliers required to prepare new agricultural water management/conservation plans must prepare and complete their plan in accordance with Water Code Part 2.8, Article 1 and Article 3 requirements for notification, public participation, adoption, and submittal (refer to Section 3.1 for details). *The federal review process may incorporate many requirements specified in Part 2.8, Articles 1 and 3; as such the federal process may meet the requirements of Part 2.8, otherwise, the agricultural water supplier would have to complete those requirements in Part 2.8, Articles 1 and 3 that are not already a part of the federal review process.*³²⁰

Article 1 of Part 2.8 includes section 10821, which requires an agricultural water supplier to notify the city or county that it will be preparing an AWMP. Therefore, to the extent that the "federal process" of adopting a water conservation plan for USBR or CVP also requires notice to the city or county, this activity is not newly required. Article 3 of Part 2.8 includes sections 10840-10845, pertaining to the adoption and implementation of AWMPs. Those requirements include, as discussed above, noticing and holding a public hearing; implementing the plan in

³¹⁷ Water Code section 10844 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³¹⁸ See former Water Code sections 10840-10845; 10855 (Stats. 1986, ch. 954).

³¹⁹ Water Code section 10828 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²⁰ Exhibit X, *Guidebook to Assist Agricultural Water Suppliers to Prepare a 2012 Agricultural Water Management Plan*, page 94 [emphasis added].

accordance with the schedule set forth in the plan; submitting a copy of the AWMP to specified state and local entities within 30 days after adoption; and making the AWMP available on the supplier's website, or submitting the AWMP for posting on DWR's website. To the extent that the "federal process" satisfies those requirements, they are not newly required by the test claim statutes.

In addition, as noted above, section 10829 provides that an agricultural water supplier may satisfy the requirements "of this part" by adopting an UWMP pursuant to Part 2.6 or by participating in areawide, regional, watershed, or basinwide water management planning, so long as those plans meet or exceed the requirements of this part.³²¹ That exception would include all of the notice and hearing requirements identified below.

Based on the foregoing, the Commission finds that Water Code sections 10821, 10841, 10842, 10843, and 10844 impose new requirements on agricultural water suppliers, except those that adopt an UWMP or participate in areawide, regional, watershed, or basinwide water management planning, and except to the extent that suppliers that are USBR or CVP contractors have water conservation plans that satisfy the AWMP adoption requirements, as follows:

- Notify the city or county within which the agricultural supplier provides water supplies that it will be preparing the AWMP or reviewing the AWMP and considering amendments or changes.³²²
- Prior to adopting a plan, the agricultural water supplier shall make the proposed plan available for public inspection, and shall hold a public hearing on the plan.³²³
- Prior to the hearing, notice of the time and place of hearing shall be published in a newspaper within the jurisdiction of the publicly owned agricultural water supplier once a week for two successive weeks, as specified in Government Code 6066.³²⁴
- Implement the AWMP in accordance with the schedule set forth in the AWMP.³²⁵
- An agricultural water supplier shall submit to the following entities a copy of its plan no later than 30 days after the adoption of the plan. Copies of amendments or changes to the plans shall be submitted to the entities identified within 30 days after the adoption of the amendments or changes.
 - DWR.
 - Any city, county, or city and county within which the agricultural water supplier provides water supplies.
 - Any groundwater management entity within which jurisdiction the agricultural water supplier extracts or provides water supplies.

³²¹ Water Code section 10829 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²² Water Code section 10821(Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²³ Water Code section 10841 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²⁴ Water Code section 10841 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²⁵ Water Code section 10842 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

- Any urban water supplier within which jurisdiction the agricultural water supplier provides water supplies.
 - Any city or county library within which jurisdiction the agricultural water supplier provides water supplies.
 - The California State Library.
 - Any local agency formation commission serving a county within which the agricultural water supplier provides water supplies.³²⁶
 - An agricultural water supplier shall make its agricultural water management plan available for public review on its web site not later than 30 days after adopting the plan, or for an agricultural water supplier that does not have a web site, submit an electronic copy to the Department of Water Resources not later than 30 days after adoption, and the Department shall make the plan available for public review on its web site.³²⁷
5. Agricultural Water Measurement Regulations, California Code of Regulations, Title 23, Division 6, sections 597 through 597.4, Register 2012, Number 28.

California Code of Regulations, title 23, section 597 provides that under authority included in Water Code section 10608.48(i), DWR is required to adopt regulations that provide for a range of options that agricultural water suppliers may use or implement to comply with the measurement requirements of section 10609.48(b).³²⁸ The plain language of this section does not impose any new activities or requirements on local government.

Section 597.1 provides that an agricultural water supplier providing water to less than 10,000 irrigated acres, excluding acres that receive only recycled water, is not subject to this article, and a supplier providing water to 10,000 or more irrigated acres but less than 25,000 irrigated acres, excluding acres that receive only recycled water, is not subject to this article unless sufficient funding is provided pursuant to Water Code section 10853. A supplier providing water to 25,000 irrigated acres or more, excluding acres that receive only recycled water, is subject to this article. A supplier providing water to wildlife refuges or habitat lands, as specified, is subject to this article. A *wholesale* agricultural water supplier is subject to this article at the location at which control of the water is transferred to the receiving water supplier, but the wholesale supplier is not required to measure the ultimate deliveries to customers. A canal authority or other entity that conveys water through facilities owned by a federal agency is not subject to this article. An agricultural water supplier that is a party to the QSA, as defined in Statutes 2002, chapter 617, section 1, is not subject to this article. And finally, DWR is not subject to this article.³²⁹ None of the above-described provisions of section 597.1 impose any new requirements or activities on local government.

³²⁶ Water Code section 10843 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²⁷ Water Code section 10844 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³²⁸ Code of Regulations, title 23, section 597 (Register 2012, No. 28).

³²⁹ Code of Regulations, title 23, section 597.1 (Register 2012, No. 28).

Section 597.2 provides definitions of “accuracy,” “agricultural water supplier,” “approved by an engineer,” “best professional practices,” “customer,” “delivery point,” “existing measurement device,” “farm-gate,” “irrigated acres,” “manufactured device,” “measurement device,” “new or replacement measurement device,” “recycled water,” and “type of device.”³³⁰ Based on the plain language of 597.2, the definitions provided in section 597.2 do not impose any new requirements or activities on local government.

Section 597.3 requires an agricultural water supplier to measure surface water and groundwater that it delivers to its customers and provides a range of options to comply with section 10608.48(i), as follows:

An agricultural water supplier subject to this article shall measure surface water and groundwater that it delivers to its customers pursuant to the accuracy standards in this section. The supplier may choose any applicable single measurement option or combination of options listed in paragraphs (a) or (b) of this section. Measurement device accuracy and operation shall be certified, tested, inspected and/or analyzed as described in §597.4 of this article.

(a) Measurement Options at the Delivery Point or Farm-gate of a Single Customer

An agricultural water supplier shall measure water delivered at the delivery point or farm-gate of a single customer using one of the following measurement options. The stated numerical accuracy for each measurement option is for the volume delivered. If a device measures a value other than volume, for example, flow rate, velocity or water elevation, the accuracy certification must incorporate the measurements or calculations required to convert the measured value to volume as described in §597.4(e).

- (1) An existing measurement device shall be certified to be accurate to within +12% by volume,
and,
- (2) A new or replacement measurement device shall be certified to be accurate to within:
 - (A) ±5% by volume in the laboratory if using a laboratory certification;
 - (B) ±10% by volume in the field if using a non-laboratory certification.

(b) Measurement Options at a Location Upstream of the Delivery Points or Farm-gates of Multiple Customers

- (1) An agricultural water supplier may measure water delivered at a location upstream of the delivery points or farm-gates of multiple customers using one of the measurement options described in §597.3(a) if the downstream individual customer's delivery points meet either of the following conditions:

³³⁰ Code of Regulations, title 23, section 597.2 (Register 2012, No. 28).

- (A) The agricultural water supplier does not have legal access to the delivery points of individual customers or group of customers needed to install, measure, maintain, operate, and monitor a measurement device.
 - (B) An engineer determines that, due to small differentials in water level or large fluctuations in flow rate or velocity that occur during the delivery season at a single farm-gate, accuracy standards of measurement options in §597.3(a) cannot be met by installing a measurement device or devices (manufactured or on-site built or in-house built devices with or without additional components such as gauging rod, water level control structure at the farm-gate, etc.). If conditions change such that the accuracy standards of measurement options in §597.3(a) at the farm-gate can be met, an agricultural water supplier shall include in its Agricultural Water Management Plan, a schedule, budget and finance plan to demonstrate progress to measure water at the farm-gate in compliance with §597.3(a) of this article.
- (2) An agricultural water supplier choosing an option under paragraph (b)(1) of this section shall provide the following current documentation in its Agricultural Water Management Plan(s) submitted pursuant to Water Code §10826:
- (A) When applicable, to demonstrate lack of legal access at delivery points of individual customers or group of customers downstream of the point of measurement, the agricultural water supplier's legal counsel shall certify to the Department that it does not have legal access to measure water at customers delivery points and that it has sought and been denied access from its customers to measure water at those points.
 - (B) When applicable, the agricultural water supplier shall document the water measurement device unavailability and that the water level or flow conditions described in §597.3(b)(1)(B) exist at individual customer's delivery points downstream of the point of measurement as approved by an engineer.
 - (C) The agricultural water supplier shall document all of the following criteria about the methodology it uses to apportion the volume of water delivered to the individual downstream customers:
 - (i) How it accounts for differences in water use among the individual customers based on but not limited to the duration of water delivery to the individual customers, annual customer water use patterns, irrigated acreage, crops planted, and on-farm irrigation system, and;
 - (ii) That it is sufficient for establishing a pricing structure based at least in part on the volume delivered, and;

- (iii) That it was approved by the agricultural water supplier's governing board or body.³³¹

Thus, one option under these regulations, in order to measure the volume of water delivered, as required by section 10608.48, is measurement “at the delivery point or farm-gate of a single customer” using an existing measurement device certified to be accurate to within 12 percent by volume, or a new measurement device certified to be accurate within 5 percent if certified in a laboratory or within 10 percent if certified in the field. Another option is to measure upstream of a delivery point or farm gate if the supplier does not have legal access to the delivery point for an individual customer, or if the standards of measurement cannot be met due to large fluctuations in flow rate or velocity during the delivery season. If this option is chosen, appropriate documentation explaining the option must be provided, as described above.

The claimants allege that section 597.3 requires agricultural water suppliers to measure at a delivery point or farm gate “by either (1) using an existing measurement device, certified to be accurate within $\pm 12\%$ by volume or (2) a new or replacement measurement device, certified to be accurate within $\pm 5\%$ by volume in the laboratory if using a laboratory certification or $\pm 10\%$ by volume in the field if using a non-laboratory certification.” In addition, the claimants allege that the regulations provide for “limited exceptions” if the supplier is unable to measure at the farm-gate, which allow, in certain circumstances, for upstream measurement.³³² The claimants assert that prior to these regulations, “there was no requirement to measure water delivered to the farm-gate of *each* single customer, with limited exception.”³³³

DWR argues that these regulations merely provide options, and are not therefore a mandate. Specifically, DWR asserts that “[n]o local government is required to comply with those regulations.” DWR asserts that “the regulations exist as a resource for agricultural water suppliers who wish to comply with certain requirements...described in the 2009 Water Law.” DWR concludes that “[the regulations] are optional, and the suppliers are free to comply with the law in other ways.”³³⁴

Section 10608.48(i) provides that DWR “shall adopt regulations that provide for a range of options that agricultural water suppliers may use or implement” to comply with the measurement requirements of subdivision (b).³³⁵ The phrase “may use or implement” suggests that the regulations provide a choice for agricultural water suppliers, rather than a mandate.

However, Section 10608.48(b) states that agricultural water suppliers “shall implement all of the following critical efficient management practices...(1) Measure the volume of water delivered to customers with sufficient accuracy to comply with subdivision (a) of Section 531.10 and to [adopt a pricing structure based in part on quantity of water delivered].”³³⁶ Moreover, the plain language of section 597.3 of the regulations, as cited above, states that an agricultural water

³³¹ Code of Regulations, title 23, section 597.3 (Register 2012, No. 28).

³³² Exhibit B, 12-TC-01, page 4.

³³³ Exhibit B, 12-TC-01, page 6.

³³⁴ Exhibit D, DWR Comments, page 11.

³³⁵ Water Code section 10608.48 (Stats. 2009-2010, 7th Ex. Sess., ch. 4 (SBX7 7)).

³³⁶ *Ibid.*

supplier “shall measure surface water and groundwater that it delivers to customers pursuant to the accuracy standards in this section.” The language states that the supplier “may choose any applicable single measurement option or combination of options listed in paragraphs (a) or (b) of this section.”³³⁷ There is no express provision for choosing a measurement option or combination of options not listed in section 597.3. Although an agricultural water supplier may pick which one of the regulatory options to comply with, it “shall” pick one of them based on the plain language of section 597.3. As a result, most agricultural water suppliers are required to implement one of the measurement options provided by 597.3. As discussed above though, there are several water suppliers exempt from this requirement, including parties to the QSA, suppliers providing water to less than 10,000 irrigated acres, excluding acres that receive only recycled water, and suppliers providing water to more than 10,000 irrigated acres but less than 25,000 irrigated acres, excluding acres that receive only recycled water, unless sufficient funding is provided pursuant to Water Code section 10853. Thus, section 597.3 requires the following for those agencies which are not exempt:

- Measure water delivered at the delivery point or farm-gate of a single customer using one of the following options.
 - An existing measurement device certified to be accurate to within $\pm 12\%$ by volume.
 - A new or replacement measurement device certified to be accurate to within:
 - $\pm 5\%$ by volume in the laboratory if using a laboratory certification;
 - $\pm 10\%$ by volume in the field if using a non-laboratory certification.

If a device measures a value other than volume (e.g., flow rate, velocity or water elevation) the accuracy certification must incorporate the measurements or calculations required to convert the measured value to volume.³³⁸

- Measure water delivered at a location upstream of the delivery points or farm-gates of multiple customers if:
 - The supplier does not have legal access to the delivery points of individual customers or group of customers needed to install, measure, maintain, operate, and monitor a measurement device; or
 - An engineer determines that, due to small differentials in water level or large fluctuations in flow rate or velocity that occur during the delivery season, accuracy standards of measurement cannot be met by installing a measurement device or devices.³³⁹
- And, when a supplier chooses to measure water delivered at an upstream location:

³³⁷ Code of Regulations, title 23, section 597.3 (Register 2012, No. 28).

³³⁸ Code of Regulations, title 23, section 597.3(a) (Register 2012, No. 28).

³³⁹ Code of Regulations, title 23, section 597.3(b) (Register 2012, No. 28).

- Provide, where applicable, documentation to demonstrate the lack of legal access at delivery points of individual or groups of customers downstream of the point of measurement; or documentation of the water measurement device unavailability and that water level or flow conditions exist that prohibit meeting accuracy standards, as approved by an engineer.
- Document the following about its apportionment of water delivered to individual customers:
 - How the supplier accounts for differences in water use among individual customers based on the duration of water delivery to the individual customers, annual customer water use patterns, irrigated acreage, crops planted, and on-farm irrigation system;
 - That it is sufficient for establishing a pricing structure based at least in part on the volume of water delivered; and
 - That it was approved by the agricultural water supplier’s governing board or body.³⁴⁰

Section 597.4, also alleged in this consolidated test claim, requires that measurement devices be certified and documented as follows:

(a) Initial Certification of Device Accuracy

The accuracy of an existing, new or replacement measurement device or type of device, as required in §597.3, shall be initially certified and documented as follows:

(1) For existing measurement devices, the device accuracy required in section 597.3(a) shall be initially certified and documented by either:

(A) Field-testing that is completed on a random and statistically representative sample of the existing measurement devices as described in §597.4(b)(1) and §597.4(b)(2). Field-testing shall be performed by individuals trained in the use of field-testing equipment, and documented in a report approved by an engineer.

Or,

(B) Field-inspections and analysis completed for every existing measurement device as described in §597.4(b)(3). Field-inspections and analysis shall be performed by trained individuals in the use of field inspection and analysis, and documented in a report approved by an engineer.

(2) For new or replacement measurement devices, the device accuracy required in sections 597.3 (a)(2) shall be initially certified and documented by either:

³⁴⁰ Code of Regulations, title 23, section 597.3(b) (Register 2012, No. 28).

- (A) Laboratory Certification prior to installation of a measurement device as documented by the manufacturer or an entity, institution or individual that tested the device following industry-established protocols such as the National Institute for Standards and Testing (NIST) traceability standards. Documentation shall include the manufacturer's literature or the results of laboratory testing of an individual device or type of device.

Or,

- (B) Non-Laboratory Certification after the installation of a measurement device in the field, as documented by either:
 - (i) An affidavit approved by an engineer submitted to the agricultural water supplier of either (1) the design and installation of an individual device at a specified location, or (2) the standardized design and installation for a group of measurement devices for each type of device installed at specified locations.

Or,

- (ii) A report submitted to the agricultural water supplier and approved by an engineer documenting the field-testing performed on the installed measurement device or type of device, by individuals trained in the use of field testing equipment.

(b) Protocols for Field-Testing and Field-Inspection and Analysis of Existing Devices

- (1) Field-testing shall be performed for a sample of existing measurement devices according to manufacturer's recommendations or design specifications and following best professional practices. It is recommended that the sample size be no less than 10% of existing devices, with a minimum of 5, and not to exceed 100 individual devices for any particular device type. Alternatively, the supplier may develop its own sampling plan using an accepted statistical methodology.
- (2) If during the field-testing of existing measurement devices, more than one quarter of the samples for any particular device type do not meet the criteria pursuant to §597.3(a), the agricultural water supplier shall provide in its Agricultural Water Management Plan, a plan to test an additional 10% of its existing devices, with a minimum of 5, but not to exceed an additional 100 individual devices for the particular device type. This second round of field-testing and corrective actions shall be completed within three years of the initial field-testing.
- (3) Field-inspections and analysis protocols shall be performed and the results shall be approved by an engineer for every existing measurement device to demonstrate that the design and installation standards used for the installation of existing measurement devices meet the accuracy standards

of §597.3(a) and operation and maintenance protocols meet best professional practices.

(c) Records Retention

Records documenting compliance with the requirements in §597.3 and §597.4 shall be maintained by the agricultural water supplier for ten years or two Agricultural Water Management Plan cycles.

(d) Performance Requirements

- (1) All measurement devices shall be correctly installed, maintained, operated, inspected, and monitored as described by the manufacturer, the laboratory or the registered Professional Engineer that has signed and stamped certification of the device, and pursuant to best professional practices.
- (2) If an installed measurement device no longer meets the accuracy requirements of §597.3(a) based on either field-testing or field-inspections and analysis as defined in sections 597.4 (a) and (b) for either the initial accuracy certification or during operations and maintenance, then the agricultural water supplier shall take appropriate corrective action, including but not limited to, repair or replacement to achieve the requirements of this article.

(e) Reporting in Agricultural Water Management Plans

Agricultural water suppliers shall report the following information in their Agricultural Water Management Plan(s):

- (1) Documentation as required to demonstrate compliance with §597.3 (b), as outlined in section §597.3(b)(2), and §597.4(b)(2).
- (2) A description of best professional practices about, but not limited to, the (1) collection of water measurement data, (2) frequency of measurements, (3) method for determining irrigated acres, and (4) quality control and quality assurance procedures.
- (3) If a water measurement device measures flow rate, velocity or water elevation, and does not report the total volume of water delivered, the agricultural water supplier must document in its Agricultural Water Management Plan how it converted the measured value to volume. The protocols must follow best professional practices and include the following methods for determining volumetric deliveries:
 - (A) For devices that measure flow-rate, documentation shall describe protocols used to measure the duration of water delivery where volume is derived by the following formula: $\text{Volume} = \text{flow rate} \times \text{duration of delivery}$.
 - (B) For devices that measure velocity only, the documentation shall describe protocols associated with the measurement of the cross-sectional area of flow and duration of water delivery, where volume is

derived by the following formula: Volume = velocity x cross-section flow area x duration of delivery.

- (C) For devices that measure water elevation at the device (e.g. flow over a weir or differential elevation on either side of a device), the documentation shall describe protocols associated with the measurement of elevation that was used to derive flow rate at the device. The documentation will also describe the method or formula used to derive volume from the measured elevation value(s).
- (4) If an existing water measurement device is determined to be out of compliance with §597.3, and the agricultural water supplier is unable to bring it into compliance before submitting its Agricultural Water Management Plan in December 2012, the agricultural water supplier shall provide in its 2012 plan, a schedule, budget and finance plan for taking corrective action in three years or less.

Thus, the plain language of section 597.4 requires agricultural water suppliers to certify and document the initial accuracy of “existing, new or replacement measurement device[s],” as specified.³⁴¹ In addition, section 597.4 provides that field-testing “shall be performed” following “best professional practices,” and either sampling “no less than 10% of existing devices,” as recommended by the department, or developing a “sampling plan using an accepted statistical methodology.” Then, if field testing results in more than a quarter of any particular devices failing the accuracy criteria described in section 597.3(a), above, the supplier “shall provide in its Agricultural Water Management Plan, a plan to test an additional 10% of its existing devices...”³⁴² In addition, section 597.4 provides that records documenting compliance “shall be maintained...for ten years or two Agricultural Water Management Plan cycles.”³⁴³ Section 597.4 further provides that “all measurement devices shall be correctly installed, maintained, operated, inspected, and monitored,” and if a device no longer meets the accuracy requirements of section 597.3, the supplier “shall take appropriate corrective action,” including repair or replacement, if necessary.³⁴⁴ And finally, section 597.4 requires agricultural water suppliers to report additional information regarding their compliance and “best professional practices” for water measurement in their agricultural water measurement plan.³⁴⁵

As noted above, some agricultural water suppliers may have been required pursuant to section 531.10 to measure farm-gate water deliveries.³⁴⁶ To the extent that those measurement programs or practices satisfy the requirements of these regulations, the regulations do not impose new activities.³⁴⁷ In addition, for any agricultural water supplier that is also an urban water supplier,

³⁴¹ Code of Regulations, title 23, section 597.4(a) (Register 2012, No. 28).

³⁴² Code of Regulations, title 23, section 597.4(b) (Register 2012, No. 28).

³⁴³ Code of Regulations, title 23, section 597.4(c) (Register 2012, No. 28).

³⁴⁴ Code of Regulations, title 23, section 597.4(d) (Register 2012, No. 28).

³⁴⁵ Code of Regulations, title 23, section 597.4(e) (Register 2012, No. 28).

³⁴⁶ Water Code section 531.10 (Stats. 2007, ch. 675 (AB 1404)).

³⁴⁷ See discussion above addressing section 10608.48(a-c).

existing sections 525 through 527 required those entities to install water meters on new and existing service connections, as specified.³⁴⁸ To the extent that any such water meter on an agricultural service connection satisfies the measurement requirements of these regulations, the regulations do not impose any new activities or requirements.

Based on the foregoing, the Commission finds that section 597.4 imposes new requirements on agricultural water suppliers not exempt from the water measurement requirements, and not already required by existing law to take part in the programs or practices of water measurement, discussed above, that would satisfy the accuracy standards of these regulations, as follows:

- Certify the initial accuracy of existing measurement devices by either:
 - Field-testing that is completed on a random and statistically representative sample of the existing measurement devices, performed by individuals trained in the use of field-testing equipment, and documented in a report approved by an engineer; or
 - Field inspections and analysis for every existing measurement device, performed by individuals trained in the use of field inspection and analysis, and documented in a report approved by an engineer.³⁴⁹
- Certify the initial accuracy of new or replacement measurement devices by either:
 - Laboratory certification prior to installation of the device as documented by the manufacturer or an entity, institution, or individual that tested the device following industry-established protocols such as the National Institute of Standards and Testing traceability standards. Documentation shall include the manufacturer's literature or the results of laboratory testing of an individual device or type of device; or
 - Non-laboratory certification after installation of a measurement device in the field, documented by either:
 - An affidavit approved by an engineer submitted to the agricultural water supplier of either (1) the design and installation of an individual device at a specified location, or (2) the standardized design and installation for a group of measurement devices for each type of device installed at specified locations; or
 - A report submitted to the agricultural water supplier and approved by an engineer documenting the field-testing performed on the installed measurement device or type of device, by individuals trained in the use of field testing equipment.³⁵⁰
- Ensure that field-testing is performed as follows:

³⁴⁸ Section 525 as amended by statutes 2005, chapter 22; Section 527 as amended by statutes 2005, chapter 22; Section 526 as amended by Statutes 2004, chapter 884.

³⁴⁹ Code of Regulations, title 23, section 597.4(a)(1) (Register 2012, No. 28).

³⁵⁰ Code of Regulations, title 23, section 597.4(a)(2) (Register 2012, No. 28).

- Field-testing shall be performed for a sample of existing measurement devices according to the manufacturer’s recommendations or design specifications and following best professional practices.
- If more than one quarter of the samples for any particular device type do not meet the accuracy criteria specified in section 597.3(a), the supplier shall provide in its Agricultural Water Management Plan a plan to test an additional 10% of its existing devices, with a minimum of 5, but not to exceed 100 additional devices for the particular device type, and shall complete the second round of field-testing and corrective actions within three years of the initial field-testing.
- Field inspections and analysis protocols shall be performed and the results shall be approved by an engineer for every existing measurement device to demonstrate that the design and installation standards used for the installation of existing measurement devices meet the accuracy standards specified in section 597.3(a) and that operation and maintenance protocols meet best professional practices.³⁵¹
- Maintain records documenting compliance with the requirements of sections 597.3 and 597.4 for ten years or two Agricultural Water Management Plan cycles.³⁵²
- Ensure that all measurement devices are correctly installed, maintained, operated, inspected, and monitored as described by the manufacturer, the laboratory or the registered Professional Engineer that has signed and stamped certification of the device, and pursuant to best professional practices.³⁵³
- If an installed measurement device no longer meets the accuracy requirements of section 597.3(a) based on either field-testing or field-inspections and analysis for either the initial accuracy certification or during operations and maintenance, take appropriate corrective action, including but not limited to, repair or replacement of the device.³⁵⁴
- Report the information listed below in its Agricultural Water Management Plan(s). :
 - Documentation, as required, to demonstrate that an agricultural water supplier that chooses to measure upstream of a delivery point or farm-gate for a customer or group of customers has complied justified the reason to do so, and has taken appropriate steps to ensure that measurements can be allocated to the customer or group of customers sufficiently to support a pricing structure based at least in part on quantity of water delivered.

³⁵¹ Code of Regulations, title 23, section 597.4(b) (Register 2012, No. 28).

³⁵² Code of Regulations, title 23, section 597.4(c) (Register 2012, No. 28).

³⁵³ Code of Regulations, title 23, section 597.4(d)(1) (Register 2012, No. 28).

³⁵⁴ Code of Regulations, title 23, section 597.4(d)(2) (Register 2012, No. 28).

- A description of best professional practices about, but not limited to, the (1) collection of water measurement data, (2) frequency of measurements, (3) method for determining irrigated acres, and (4) quality control and quality assurance procedures.
- If a water measurement device measures flow rate, velocity or water elevation, and does not report the total volume of water delivered, the agricultural water supplier must document in its Agricultural Water Management Plan how it converted the measured value to volume. The protocols must follow best professional practices and include the following methods for determining volumetric deliveries:
 - For devices that measure flow-rate, documentation shall describe protocols used to measure the duration of water delivery where volume is derived by the following formula: $\text{Volume} = \text{flow rate} \times \text{duration of delivery}$.
 - For devices that measure velocity only, the documentation shall describe protocols associated with the measurement of the cross-sectional area of flow and duration of water delivery, where volume is derived by the following formula: $\text{Volume} = \text{velocity} \times \text{cross-section flow area} \times \text{duration of delivery}$.
 - For devices that measure water elevation at the device (e.g. flow over a weir or differential elevation on either side of a device), the documentation shall describe protocols associated with the measurement of elevation that was used to derive flow rate at the device. The documentation will also describe the method or formula used to derive volume from the measured elevation value(s).
- If an existing water measurement device is determined to be out of compliance with §597.3, and the agricultural water supplier is unable to bring it into compliance before submitting its Agricultural Water Management Plan in December 2012, the agricultural water supplier shall provide in its 2012 plan, a schedule, budget and finance plan for taking corrective action in three years or less.³⁵⁵

D. The Test Claim Statutes and Regulations do not Result in Increased Costs Mandated by the State, Because the Claimants Possess Fee Authority Sufficient as a Matter of Law to Cover the Costs of any New Mandated Activities.

As the preceding analysis indicates, many of the requirements of the test claim statutes are not new, at least with respect to *some* urban or agricultural water suppliers, because suppliers were previously required to perform substantially the same activities under prior law. Additionally, many of the alleged test claim statutes do not impose any requirements at all, based on the plain language. However, even if the new requirements identified above could be argued to mandate a new program or higher level of service, the Commission finds that the costs incurred to comply

³⁵⁵ Code of Regulations, title 23, section 597.4(e) (Register 2012, No. 28).

with those requirements are not costs mandated by the state, within the meaning of article XIII B, section 6 and Government Code section 17514, because all affected entities have fee authority, sufficient as a matter of law to cover the costs of any mandated activities.

Government Code section 17556(d) provides that the Commission shall not find costs mandated by the state, as defined in section 17514, if the local government claimant “has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service.” The California Supreme Court upheld the constitutionality of Government Code section 17556, subdivision (d), in *County of Fresno v. State of California*.³⁵⁶ The Court, in holding that the term “costs” in article XIII B, section 6 excludes expenses recoverable from sources other than taxes, stated:

Section 6 was included in article XIII B in recognition that article XIII A of the Constitution severely restricted the taxing powers of local governments. (See *County of Los Angeles I, supra*, 43 Cal.3d at p. 61.) The provision was intended to preclude the state from shifting financial responsibility for carrying out governmental functions onto local entities that were ill equipped to handle the task. (*Ibid.*; see *Lucia Mar Unified School Dist. v. Honig* (1988) 44 Cal.3d 830, 836, fn. 6 [244 Cal.Rptr. 677, 750 P.2d 318].) Specifically, it was designed to protect the tax revenues of local governments from state mandates that would require expenditure of such revenues. Thus, although its language broadly declares that the “state shall provide a subvention of funds to reimburse ... local government for the costs [of a state-mandated new] program or higher level of service,” read in its textual and historical context section 6 of article XIII B requires subvention only when the costs in question can be recovered *solely from tax revenues*.³⁵⁷

Accordingly, in *Connell v. Superior Court of Sacramento County*,³⁵⁸ the Santa Margarita Water District, among others, was denied reimbursement based on its authority to impose fees on water users. The water districts submitted evidence that funding the mandated costs with fees was not practical: “rates necessary to cover the increased costs [of pollution control regulations] would render the reclaimed water unmarketable and would encourage users to switch to potable water.”³⁵⁹ The court concluded that “[t]he question is whether the Districts have authority, i.e., the right or power, to levy fees sufficient to cover the costs.” Water Code section 35470 authorized the levy of fees to “correspond to the cost and value of the service,” and “to defray the ordinary operation or maintenance expenses of the district and for any other lawful district purpose.”³⁶⁰ The court held that the Districts had not demonstrated “that anything in Water Code section 35470 limits the authority of the Districts to levy fees ‘sufficient’ to cover their costs,”

³⁵⁶ *County of Fresno v. State of California, supra*, 53 Cal.3d 482.

³⁵⁷ *Id.*, at p. 487 [emphasis added].

³⁵⁸ (Cal. Ct. App. 3d Dist. 1997) 59 Cal.App.4th 382.

³⁵⁹ *Id.*, at p. 399.

³⁶⁰ *Ibid.*

and that therefore “the economic evidence presented by SMWD to the Board [of Control] was irrelevant and injected improper factual questions into the inquiry.”³⁶¹

Likewise, in *Clovis Unified School District v. Chiang*, the court found that the SCO was not acting in excess of its authority in reducing reimbursement claims to the full extent of the districts’ authority to impose fees, even if there existed practical impediments to collecting the fees. In making its decision the court noted that the concept underlying Government Code sections 17514 and 17556(d) is that “[t]o the extent a local agency or school district ‘has the authority’ to charge for the mandated program or increased level of service, that charge cannot be recovered as a state-mandated cost.”³⁶² The court further noted that, “this basic principle flows from common sense as well.” The court reasoned: “As the Controller succinctly puts it, ‘Claimants can choose not to require these fees, but not at the state’s expense.’”³⁶³

1. The claimants have statutory authority to levy fees or charges for the provision of water.

Both Finance and DWR asserted, in comments on the test claim, that the test claim statutes are not reimbursable pursuant to section 17556(d). Finance argued that the claimants are “statutorily authorized to charge a fee for the delivery of water,” and thus “each of these water agencies has the ability to cover any potential initial and ongoing costs related to the Act and Regulations with fee revenue.”³⁶⁴ DWR asserted that “Senate Bill 1017, which amended the [Urban Water Management Act] in 1994,” provides authority for an urban water supplier “to recover the costs of preparing its [urban water management plan] and implementing the reasonable water conservation measures included in the plan in its water rates.”³⁶⁵

For the following reasons, the Commission finds that the claimants have statutory authority to establish and increase fees or assessments for the provision of water services.

Water Code section 35470 provides generally that “[a]ny [water] district formed on or after July 30, 1917, may, in lieu in whole or in part of raising money for district purposes by assessment, make water available to the holders of title to land or the occupants thereon, and may fix and collect charges therefor.” Section 35470 further provides that “[t]he charges may vary in different months and in different localities of the district to correspond to the cost and value of the service, and the district *may use so much of the proceeds of the charges as may be necessary to defray the ordinary operation or maintenance expenses of the district and for any other lawful purpose.*”³⁶⁶ In addition, section 50911 provides that an irrigation district may “[a]dopt a schedule of rates to be charged by the district for furnishing water for the irrigation of district lands.”³⁶⁷

³⁶¹ *Connell, supra*, (1997) 59 Cal.App.4th at p. 401.

³⁶² *Clovis Unified School Dist. v. Chiang* (2010) 188 Cal.App.4th 794, at p. 812.

³⁶³ *Ibid.*

³⁶⁴ Exhibit C, Finance Comments on Test Claim, page 1.

³⁶⁵ Exhibit D, DWR Comments on Test Claim, pages 8-9 [citing Water Code section 10654].

³⁶⁶ Water Code section 35470 (Stats. 2007, ch. 27 (SB 444)) [emphasis added].

³⁶⁷ Water Code section 50911 (Stats. 2007, ch. 27 (SB 444)).

More specifically, and pertaining to the requirements of the test claim statutes, Water Code section 10654 permits an urban water supplier to “recover in its rates” for the costs incurred in preparing and implementing water conservation measures.³⁶⁸ And, section 10608.48 expressly requires agricultural water suppliers to “[a]dopt a pricing structure for water customers based at least in part on quantity delivered.”³⁶⁹ This provision indicates that the Legislature intended user fees to be an essential component of the water conservation practices called for by the Act. And finally, Water Code section 10608.32, as added *within the test claim statute*, provides that all costs incurred pursuant to this part may be recoverable in rates subject to review and approval by the Public Utilities Commission.³⁷⁰

Based on the foregoing, the Commission finds that both agricultural and urban water suppliers have statutory authority to impose or increase fees to cover the costs of new state-mandated activities.

2. Nothing in Proposition 218, case law, or any prior Commission Decision, alters the analysis of the claimants’ statutory fee authority.

The claimants argue that both Finance and DWR cite *Connell v. Superior Court* and “ignore the most recent rulings on the subject of Proposition 218 where their exact arguments were considered and overruled by the Commission in *Discharge of Stormwater Runoff*, 07-TC-09.” The claimants argue that “under Proposition 218, Claimants’ customers could reject the Board’s action to establish or increase fees or assessments, yet Claimants would still be obligated to implement the mandates.”³⁷¹ In comments on the draft proposed decision, the claimants reiterate, more urgently:

The Commission should not accept its staff’s invitation to ignore a prior Commission decision that is directly on point, and which was based on a plain reading of the California Constitution, all in order to reject the test claim here. To do so would undermine the Commission’s credibility, eviscerate the Commission’s Constitutional duty to reimburse agencies for new state mandates, and have far-reaching negative effects.³⁷²

For the following reasons, the claimant’s argument is unsound. In *Connell v. Superior Court*, *supra* the court held that “[t]he question is whether the Districts have authority, i.e., the right or power, to levy fees sufficient to cover the costs,” and that the economic viability of the necessary rate increases “was irrelevant and injected improper factual questions into the inquiry.”³⁷³ *Connell* did not address the possible impact of Proposition 218 on the districts’ fee authority, because the districts did not “contend that the services at issue...are among the ‘many services’

³⁶⁸ Water Code section 10654 (Stats. 1994, ch. 609 (SB 1017)).

³⁶⁹ Water Code section 10608.48 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁷⁰ Water Code section 10608.32 (Stats. 2009-2010, 7th Ex. Sess. ch. 4 (SBX7 7)).

³⁷¹ Exhibit E, Claimant Rebuttal Comments, pages 11-12 [citing *Discharge of Stormwater Runoff*, 07-TC-09, page 107].

³⁷² Exhibit R, Claimant Comments on Draft Proposed Decision, page 14.

³⁷³ *Connell*, *supra*, (1997) 59 Cal.App.4th at p. 401.

impacted by Proposition 218.”³⁷⁴ The claimants here argue that *Connell* is no longer good authority, because Proposition 218 has changed the landscape of special districts’ legal authority to impose fees or charges.

Proposition 218, adopted by the voters in 1996, also known as the “Right to Vote on Taxes Act,” declared its purpose to protect taxpayers “by limiting the methods by which local governments exact revenue from taxpayers without their consent.” Proposition 218 added articles XIII C and XIII D to the Constitution;³⁷⁵ article XIII C addresses assessments, while article XIII D addresses user fees and charges. The claimants allege that article XIII D, section 6, specifically, imposes a legal or constitutional hurdle to imposing or increasing fees, which undermines any analysis of statutory fee authority under Government Code section 17556(d).

The requirements of article XIII D, section 6 to which claimants refer provide as follows:

Property Related Fees and Charges. (a) Procedures for New or Increased Fees and Charges. An agency shall follow the procedures pursuant to this section in imposing or increasing any fee or charge as defined pursuant to this article, including, but not limited to, the following:

(1) The parcels upon which a fee or charge is proposed for imposition shall be identified. The amount of the fee or charge proposed to be imposed upon each parcel shall be calculated. The agency shall provide written notice by mail of the proposed fee or charge to the record owner of each identified parcel upon which the fee or charge is proposed for imposition, the amount of the fee or charge proposed to be imposed upon each, the basis upon which the amount of the proposed fee or charge was calculated, the reason for the fee or charge, together with the date, time, and location of a public hearing on the proposed fee or charge.

(2) The agency shall conduct a public hearing upon the proposed fee or charge not less than 45 days after mailing the notice of the proposed fee or charge to the record owners of each identified parcel upon which the fee or charge is proposed for imposition. At the public hearing, the agency shall consider all protests against the proposed fee or charge. *If written protests against the proposed fee or charge are presented by a majority of owners of the identified parcels, the agency shall not impose the fee or charge.*

[¶...¶]

(c) Voter Approval for New or Increased Fees and Charges. *Except for fees or charges for sewer, water, and refuse collection services*, no property related fee or charge shall be imposed or increased unless and until that fee or charge is submitted and approved by a majority vote of the property owners of the property subject to the fee or charge or, at the option of the agency, by a two-thirds vote of the electorate residing in the affected area. The election shall be conducted not less than 45 days after the public hearing. An agency may adopt procedures

³⁷⁴ 59 Cal.App.4th at p. 403.

³⁷⁵ Exhibit X, Text of Proposition 218.

similar to those for increases in assessments in the conduct of elections under this subdivision.³⁷⁶

The claimants have acknowledged that they have fee authority, absent the restrictions of articles XIII C and XIII D: “Claimants do not deny that, before the passage Proposition 218, the Water Code would have provided Claimants sufficient authority, pursuant to their governing bodies’ discretion, to unilaterally establish or increase fees or charges for the provision of water services.”³⁷⁷ After Proposition 218, the claimants argue they are now “authorized to do no more than *propose* a fee increase that can be rejected” by majority protest.³⁷⁸ Furthermore, the claimants maintain that the Commission’s decision in *Discharge of Stormwater Runoff* recognized the limitations imposed by article XIII D, section 6, and the effect on local governments’ fee authority: “[f]inding *Connell* inapposite, the Commission observed that ‘The voting requirement of Proposition 218 does not impose a mere practical or economic hurdle, as in *Connell*, but a legal and constitutional one.’”³⁷⁹

However, claimants’ reliance on the Commission’s prior action is misplaced, and claimants’ assertions about the effect of Proposition 218 on the law of *Connell* are overstated. Commission decisions are not precedential, and in any event the current test claim is distinguishable from the analysis in *Discharge of Stormwater Runoff*. The Commission, in *Discharge of Stormwater Runoff*, deviated from the rule of *Connell*, and found that Proposition 218, as *applied to the claimants and the mandated activities in that test claim*, constituted a legal and constitutional barrier to increasing fees. The test claim was brought by the County of San Diego and a number of cities, and alleged various mandated activities and costs related to reducing stormwater pollution.³⁸⁰ The Commission found that although the County and the Cities had a generalized fee authority based on regulatory and police powers,³⁸¹ “[w]ith some exceptions, local government fees or assessments that are incident to property ownership are subject to voter approval under article XIII D of the California Constitution, as added by Proposition 218 in 1996.”³⁸² The Commission reasoned that “it is possible that the local agency’s voters or property owners may never adopt the proposed fee or assessment, but the local agency would still be required to comply with the state mandate,”³⁸³ and that “[a]bsent compliance with the Proposition 218 election and other procedures, there is no legal authority to impose or raise fees within the meaning of Government Code section 17556, subdivision (d).”³⁸⁴ Thus, the

³⁷⁶ California Constitution, article XIII D, section 6 (added, November 5, 1996, by Proposition 218) [emphasis added].

³⁸⁰ Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 1.

³⁸¹ Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 103.

³⁸² Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 105.

³⁸³ Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 106.

³⁸⁴ Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 107.

Commission concluded that “[t]he voting requirement of Proposition 218 does not impose a mere practical or economic hurdle, as in *Connell*, but a legal and constitutional one.”³⁸⁵

Here, Proposition 218 does not impose a legal and constitutional hurdle, because fees for the provision of water services are expressly exempt from the voter approval requirements of Proposition 218.³⁸⁶ The Proposition 218 Omnibus Implementation Act, enacted specifically to construe Proposition 218, defines “water” as “any system of public improvements intended to provide for the production, storage, supply, treatment, or distribution of water.”³⁸⁷ Thus, an urban or agricultural water supplier that undertakes measures to ensure the conservation of water, to produce more water, and enhance the quality and reliability of its supply, is providing water service, within the meaning of the Omnibus Act. The statutory and regulatory metering and other conservation practices required of the claimants therefore describe “water service.” Unlike the test claimants in *Discharge of Stormwater Runoff* (cities and counties), the services for which fees or charges would be increased are expressly exempt from the voter approval requirements in article XIII D, section 6(c), and the decision and reasoning of the Commission in *Discharge of Stormwater Runoff* is not relevant. Therefore, the Commission’s earlier decision is distinguishable on the very same ground that renders *Connell* significantly poignant. The claimants cannot rely on the unwillingness of voters to raise fees, because the fees in question fall, based on the plain language of the Constitution, outside voter-approval requirement of article XIII D, section 6(c).

Claimants acknowledge that fees for water service “are excused from the formal election requirement under article XIII D section 6(c), [but] the majority protest provision in subdivision (a)(2) still applies and constitutes a legal barrier to Claimants’ fee authority.”³⁸⁸ Claimants therefore argue that they “find themselves required to implement and pay for the newly mandated activities, yet are authorized to do no more than *propose* a fee increase that can be rejected by a simple majority of affected customers.”³⁸⁹

However, the so-called “majority protest provision,” which claimants allege constitutes a legal barrier to claimants’ fee authority, presents either a mixed question of fact and law, which has not been demonstrated based on the evidence in the record, or a legal issue that is incumbent on the courts first to resolve. In order for the Commission to make findings that the claimants’ fee authority has been diminished, or negated, pursuant to article XIII D, section 6(a), the claimants would have to provide evidence that they tried and failed to impose or increase the necessary fees,³⁹⁰ or provide evidence that a court determined that Proposition 218 represents a

³⁸⁵ Exhibit X, Statement of Decision, *Discharge of Stormwater Runoff*, 07-TC-09, page 107 [citing *Connell v. Superior Court, supra*, 59 Cal.App.4th 382, at p. 401].

³⁸⁶ See California Constitution, article XIII D, section 6(c).

³⁸⁷ Government Code section 53750(m) (Stats. 2002, ch. 395).

³⁸⁸ Exhibit R, Claimant Comments on Draft Proposed Decision, page 14.

³⁸⁹ Exhibit R, Claimant Comments on Draft Proposed Decision, page 15.

³⁹⁰ If a claimant were to provide evidence that it had tried and failed to impose or increase fees, that evidence could constitute costs “first incurred,” within the meaning of Government Code section 17551, and a claimant otherwise barred from reimbursement under section 17556(d) could thus potentially demonstrate that it had incurred costs mandated by the state, as defined in

constitutional hurdle to fee authority as a matter of law. The Commission cannot now say, as a matter of law, that the claimants' fee authority is insufficient based on the speculative and uncertain threat of a "written protests against the proposed fee or charge [being] presented by a majority of owners of the identified parcels..."³⁹¹

Based on the foregoing analysis, the Commission cannot find costs mandated by the state, within the meaning of Government Code section 17514, because the claimants have sufficient fee authority, as a matter of law, to establish or increase fees or charges to cover the costs of any new required activities.

V. Conclusion

Based on the foregoing analysis, the Commission finds that the Water Conservation Act of 2009, enacted as Statutes 2009-2010, 7th Extraordinary Session, chapter 4 (SBX7 7), and the Agricultural Water Measurement Regulations issued by the Department of Water Resources, found at Code of Regulations, title 23, section 597 et seq., do not impose a reimbursable state-mandated program on urban retail water suppliers or agricultural water suppliers within the meaning of article XIII B, section 6 of the California Constitution and Government Code section 17514. The Commission therefore denies this test claim.

section 17514. The Commission does not make findings on this issue, but merely observes the potentiality.

RE: Decision

Water Conservation, 10-TC-12 and 12-TC-01.

Water Conservation Act of 2009 et al.

South Feather Water and Power Agency, Paradise Irrigation District,

Oakdale Irrigation District, and Glenn-Colusa Irrigation District, Claimants

On December 5, 2014, the foregoing decision of the Commission on State Mandates was adopted in the above-entitled matter.

Heather Halsey, Executive Director

Dated: December 12, 2014

May 4, 2022

TO: ALL INTERESTED PERSONS
FROM: Heather Halsey, Executive Director *H.H.*
RE: Notice and Agenda

On Friday, May 27, 2022, the Commission on State Mandates (Commission) will conduct its next regular meeting and hearing in person at 10:00 a.m., at Park Tower, 980 9th Street, Second Floor Conference Room, Sacramento, California, 95814.

COVID-19 Precautions. The Park Tower Building Management requires that no person will enter the Second Floor Conference Room having tested positive for COVID-19 within the last 30 days or having been exposed to someone who tested positive for COVID-19 or is believed to have contracted COVID-19 within the last 30 days. In addition, the Park Tower Building Management requires that no person will enter the Second Floor Conference Room having any of the following known symptoms of COVID-19: fever, chills, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea. Persons attending this in-person meeting will be required to certify the above prior to entering the Second Floor Conference Room. Additionally, while the mask mandate has been lifted, some Commission staff and potentially other meeting participants are at high risk of severe COVID-19 complications or have autoimmune conditions and may not be protected by the vaccine but are required to attend this in-person meeting. Therefore, you are strongly encouraged to wear a mask to the meeting to protect yourself and your family and to provide a safe workplace for those who are more vulnerable and who will also be in attendance. Masks will be made available at the meeting for anyone who would like one.

Testimony at the Commission Hearing. If you plan to address the Commission on an agenda item, please notify the Commission Office **not later than noon on the Wednesday prior to the hearing.** Please also include the names and email addresses of the people who will be speaking for inclusion on the witness list. When calling or emailing, identify the item you want to testify on and the entity you represent. The Commission Chairperson reserves the right to impose time limits on presentations as may be necessary to complete the agenda.

If you plan to file any written document for Commission member review, please note that Commission staff will include written comments filed at least 15 days in advance of the hearing in the Commissioners' hearing binders. Additionally, staff will transmit written comments filed between 15 and five days prior to a meeting to the Commission members, if possible. However, comments filed less than five days prior to a meeting or submitted at the meeting will not be included in the Commissioners' hearing binders and the commenter shall provide 12 paper copies of the comments to Commission staff at the meeting for such late filings. Commission staff shall provide copies of late comments submitted at the hearing to the Commission members and shall place a copy on a table for public review at the hearing (Cal. Code Regs., tit. 2, § 1181.10(b)(1)). Please also file the PDF document provided via the Commission's dropbox at <https://csm.ca.gov/dropbox.php> prior to the hearing.

Agenda Materials. Agenda materials are available at the Commission office, located at 980 9th Street, Suite 300, Sacramento, California, 95814 during regular business hours by appointment only, with a two-business-day advance notice. However, members of the public who have access to the internet are urged to obtain these materials online rather than by visiting the

Commission’s physical office, to reduce potential exposures and reduce the spread of COVID-19. Please call (916) 323-3562 or email at csminfo@csm.ca.gov for an appointment. All supporting documentation for items on the agenda for the public portion of Commission meetings is available for public inspection on the Commission’s website at <https://www.csm.ca.gov/agendas/052722.php>.

Website. Agenda items are available on the Commission’s website at www.csm.ca.gov. After reaching the site's home page, click on "Hearings" on the top of the page for the hearing agenda. Generally, Commission staff upload the items two weeks before the meeting and they may be accessed from links on the agenda. If an item on this agenda is postponed prior to the meeting, notice will be posted on a revised agenda. Following the meeting, staff will post Commission actions on the Commission’s website and will serve and post the adopted decisions within 10 days of the meeting.

To find the adopted minutes and transcripts of Commission meetings since January 2004 on the website in PDF format, click “Hearings” on the top of the home page.

Reasonable Accommodation. Any person requesting accommodations in accordance with the Americans with Disabilities Act or for language assistance, please contact the Commission office as soon as possible but at least five to seven *working* days prior to the meeting.

AGENDA¹

Meeting of the Commission on State Mandates

Park Tower, 980 9th Street, Second Floor Conference Room
Sacramento, California

Friday, May 27, 2022

10:00 a.m.

Reminder: *Commission staff includes written comments filed at least 15 days in advance of the meeting in the Commissioners' hearing binders. If you plan to testify and would like the Commissioners to review any document not filed 15 days in advance of the hearing, please bring 12 double-sided copies of the document or section of the document to the meeting. Please also file the PDF document via the Commission’s dropbox at <https://csm.ca.gov/dropbox.php> prior to the hearing.*

I. CALL TO ORDER AND ROLL CALL

II. APPROVAL OF MINUTES (action)

Item 1 March 25, 2022

III. PUBLIC COMMENT FOR MATTERS NOT ON THE AGENDA (info)

Please note that the Commission may not take action on items not on the agenda. However, it may schedule issues raised by the public for consideration at future meetings.

¹ This public meeting Notice and Agenda is available on the Commission’s website at www.csm.ca.gov.

IV. PROPOSED CONSENT CALENDAR FOR ITEMS PROPOSED FOR ADOPTION ON CONSENT PURSUANT TO CALIFORNIA CODE OF REGULATIONS TITLE 2, ARTICLES 7 AND 8 (action)

If there are no objections to any of the following action items designated by an asterisk (*), the Executive Director will include each one on the Proposed Consent Calendar that will be presented at the hearing. The Commission will determine which items will remain on the Consent Calendar.

V. HEARINGS AND DECISIONS PURSUANT TO CALIFORNIA CODE OF REGULATIONS, TITLE 2, ARTICLE 7 (GOV. CODE, § 17551, 17557, 17559, and 17570) (action)

A. APPEALS OF EXECUTIVE DIRECTOR DECISIONS PURSUANT TO CALIFORNIA CODE OF REGULATIONS, TITLE 2, SECTION 1181.1(c) (info/action)

Item 2 Appeal of Executive Director Decisions

Note: This item will only be taken up if an appeal is filed and set for this hearing.

B. TEST CLAIMS

Item 3* Dismissal: *Floodplain Restoration Condition (no. 12) of Water Quality Certification for Turlock Irrigation District and Modesto Irrigation District – Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, 21-TC-02*

Water Quality Certification for Federal Permit or License, Turlock Irrigation District and Modesto Irrigation District Don Pedro Hydroelectric Project and La Grange Hydroelectric Project, Federal Energy Regulatory Commission Project Nos. 2299 and 14581, Condition 12, Riparian, Spawning, and Floodplain Management, Adopted by the State Water Resources Control Board on January 15, 2021

Turlock Irrigation District and Modesto Irrigation District, Claimants

C. INCORRECT REDUCTION CLAIMS

Item 4 *Municipal Storm Water and Urban Runoff Discharges, 19-0304-I-05*

Los Angeles Regional Water Quality Control Board Order No. 01-182; Permit CAS004001, Part 4F5c3

Fiscal Years: 2002-2003, 2003-2004, 2004-2005, 2005-2006, 2006-2007, 2007-2008, 2008-2009, 2009-2010, 2010-2011, 2011-2012

City of La Puente, Claimant

VI. HEARINGS ON COUNTY APPLICATIONS FOR FINDINGS OF SIGNIFICANT FINANCIAL DISTRESS PURSUANT TO WELFARE AND INSTITUTIONS CODE SECTION 17000.6 AND CALIFORNIA CODE OF REGULATIONS, TITLE 2, ARTICLE 2 (info/action)

Item 5 Assignment of County Application to Commission, a Hearing Panel of One or More Members of the Commission, or to a Hearing Officer

Note: This item will only be taken up if an application is filed.

VII. INFORMATIONAL HEARINGS PURSUANT TO CALIFORNIA CODE OF REGULATIONS, TITLE 2, ARTICLE 8 (action)

A. ADOPTION OF ORDER TO ADOPT RULEMAKING

Tentative: Electronic Signature (Order 22-03), Proposed Amendments to California Item 6* Code of Regulations, Title 2, Division 2, Chapter 2.5, Articles 1, 2, 3, 5, 6, and 7

B. REPORTS (info/action)

Item 7 Legislative Update (info)

Item 8 Chief Legal Counsel: New Filings, Recent Decisions, Litigation Calendar (info)

Item 9 Executive Director: Budget, Workload Update, and Tentative Agenda Items for the July 2022 and September 2022 Meetings (info)

VIII. CLOSED EXECUTIVE SESSION PURSUANT TO GOVERNMENT CODE SECTIONS 11126 AND 11126.2 (info/action)

A. PENDING LITIGATION

To confer with and receive advice from legal counsel, for consideration and action, as necessary and appropriate, upon the following matters pursuant to Government Code section 11126(e):

Trial Courts:

None

Courts of Appeal:

1. ***On Remand from the Third District Court of Appeal, Case No. C070357***
State of California Department of Finance, State Water Resources Control Board, and California Regional Water Quality Board, San Diego Region v. Commission on State Mandates and County of San Diego, et al. (petition and cross-petition)
Third District Court of Appeal, Case No. C092139
Sacramento County Superior Court Case No. 34-2010-80000604
[*Discharge of Stormwater Runoff*, Order No. R9-207-000 (07-TC-09), California Regional Water Control Board, San Diego Region Order No. R9-2007-001, NPDES No. CAS0108758, Parts D.1.d.(7)-(8), D.1.g., D.3.a.(3), D.3.a.(5), D.5, E.2.f, E.2.g, F.1, F.2, F.3, I.1, I.2, I.5, J.3.a.(3)(c) iv-vii & x-xv, and L]

NEW FILINGS

March 17, 2022 through May 4, 2022

There were no new filings for this period.

Founded on June 6, 1887...

...by people with the vision and foresight of what this area could become and the courage to stake livelihoods and personal properties on the outcome, TID became the first irrigation district in California.

Our history begins along the Tuolumne River and is one of great ambition and hard work that transformed a vast, seasonably dry land into one of the world's most productive landscapes. The introduction of irrigation to this region allowed for its transformation from large, dry farmed grain crops totally dependent on plentiful and well-timed rainfall, to small, family-owned farms that could sustain permanent crops and withstand the periods of drought that have occurred over millennia.

With the advent of a water storage project on the Tuolumne River at Don Pedro's Bar, we began to generate and sell electricity in the same manner which we provided irrigation water; on a not-for-profit basis.

Our story is one of vision, innovation, persistence, fortitude and occasionally, conflict. Like all epic success stories there were periods of triumph and tragedy, success and setbacks but ultimately, the dreams of our visionary forefathers have materialized and this region has been transformed into one of the most fertile and productive the world has ever known.

We're proud of our heritage and mindful of the challenges that lie ahead and we invite you to learn more about Turlock Irrigation District and our role in the region's storied past and

its optimistic future.

The Irrigationist

from [Turlock Irrigation District](#)

1:01:44

Back in 1887, frustrated by the lack of reliable river water but optimistic about future farming opportunities, the region formed TID in the hope of bringing prosperity to a dry land nestled between the Tuolumne, Merced and San Joaquin rivers. It was a lofty goal, but

one worthy of pursuit. Some said greening this land couldn't be done. Others outright opposed irrigation.

More than 130 years later, it's tough to imagine where this region would be without the perseverance, sacrifice and hard work of those visionary forefathers who formed TID. They wanted a better life. They didn't give up on their dream. They pressed on at all costs. And now the dream of irrigation continues to be a reality for the thousands of farmers who receive water from TID – water that helps produce crops that are the lifeblood of our region. Add the generation and distribution of public power beginning in 1923 and what exists is a pair of services – water and power – that have benefited the region many times over.

To celebrate our historic founding as California's first irrigation district, we produced a coffee table book in 2017 with historic photos. Books are \$30 each can be purchased from our Customer Service office in Turlock.

Additionally, we have DVDs and Blu-ray discs of our film *The Irrigationist* available for purchase. DVDs are \$10 and Blu-rays are \$15 each and can be purchased from our Customer Service offices in Turlock, Ceres and Patterson.

Safety

Safety is one of our core values as we work to deliver water and power to customers. Our philosophy surrounding safety is not a motto, tagline or slogan; it's a commitment to being vigilant and maintaining a safe environment for our employees, our customers and the general public.

To help you stay safe around electricity and water, we've put together some useful links and emergency preparedness information. Please take the time to review and share it with your family. [Click here to learn more about safety.](#)

Totals	1,993,311	2,122,659	1,121,890	1,095,672	-47%

Project Description: McClure Generation Station supplies the District with 120 MWs of internal peak power generation from two combustion turbine generators.

Notes: Materials and Supplies: Decreased to reflect actual historical expenses. Outside Services: Decrease due to an additional \$1.1 million that was added to the 2019 budget to cover overhaul of the McClure Unit 1 turbine. Administrative and General: Increase due to fees for permits.

MID Equipment	0	0	0	0	0%
Totals	4,229,760	4,525,677	4,469,400	4,433,503	-1%

Project Description: Provide operation and maintenance for the Woodland Generation Station Plant to maintain reliability of electric supply.

Notes: Materials and Supplies: Decrease due to reduced chemical usage. Outside Services: Increase due to WECC testing for all 9 generators. Administrative and General: Decrease due to lower plant electricity costs.

2020 O&M Budget Project Detail

Division: ELECTRIC RESOURCES DIVISION
Project Number: 3XX182

Department: 6072 Woodland Generation
Project Title: PRJ - Woodland Maintenance

	2018	2019	2020	2021	% Change

Totals	3,879,311	5,831,146	6,117,006	10,050,081	5%

Project Description: Provide operation and maintenance for the Woodland Generation Station plant to maintain reliability of electric supply.

Notes: Outside Services category is 5% higher in 2020 as the Woodland 3 Units begin the major overhaul cycle at 16,000 hours. The Woodland 2 Unit will hit the major overhaul milestone in 2021 which will almost double the Outside Services budget for that year.

2020 O&M Budget Project Detail

Division: ELECTRIC RESOURCES DIVISION
Project Number: 3XX185

Department: 6071 McClure & Ripon Generation
Project Title: PRJ - Ripon O&M

	2018	2019	2020	2021	% Change
	Actual	Budget	Adopted Budget	Proposed Budget	Current Budget
Labor & Benefits	1,064,737	1,203,479	1,272,482	1,308,539	6%
Materials & Supplies	166,118	217,000	217,000	217,000	0%

Totals	1,519,547	1,829,879	1,896,852	1,987,909	4%

Project Description: Ripon Generation Station supplies the District with up to 100 MWs of internal peak power generation from two combustion generators.

Notes: Administrative and General: Increase due to fees for permits. Outside Services: The largest expense is for the portable demin trailers which is a cost savings over on-site demineralization. This category has come down in 2020 because last year the WECC/NERC generation testing was performed (required every 5 years).

Totals	2,054,427	2,264,040	2,324,458	2,390,416	3%

Project Description: This account is for tracking line patrols, NERC FAC.003-4, CPUC G.O. #165 patrols and inspections, storm duty, trouble calls, switching and general overhead and underground repairs and maintenance.

Notes: Materials & Supplies: increase due to possible rental of Trouble Truck when multiple trucks are in the shop for testing or repairs; increased cost of repairing tools and repair parts due to aging equipment; all small tools are now budgeted in this account. Outside Services: includes the cost of helicopter patrol for 230kV twice per year. A&G: includes mobile GIS and a small budget for annual avian permit renewal. MID Equipment: adjusted budget closer to actual cost.

Applicable Policy: NERC Standard FAC-003 and MID Operating Bulletins 27 and 42.

CAP - 40 CAP - INFORMATION TECHNOLOGY DIVISION	1,287,900

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 7XX101

Department: 4010 Information Technology
Project Title: PRJ - Server Hardware/Software

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	370,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	370,000

Project Description	Planned replacement of computer server hardware, software and related server equipment. Systems/equipment includes servers, disk drives, memory, host bus adapters, fiber switches, Power Distribution Units and other related systems/equipment.
Project Justification	To maintain the District's technology infrastructure. Replace or upgrade equipment based on functional reliability, availability, cost-effectiveness, application requirement or redundancy. Recycle technology elsewhere in the District whenever feasible. 2020 includes replacement of end-of life equipment including the server hosting virtual servers at the backup data center, GIS/Mapping servers, File Storage servers and Financial Information System servers.
Applicable Policy	District Mission - Technology Goal.

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 7XX102

Department: 4010 Information Technology
Project Title: PRJ - Network Hardware/Software

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	270,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	270,000

Project Description	Planned replacement of network hardware and software such as routers, switches and other related equipment.
Project Justification	Much of the District's network infrastructure is reaching end-of-life and will need to be replaced in order to maintain reliability and security. 2020 includes continued replacement of 23 end-of-life Substation network switches.
Applicable Policy	District Mission - Technology Goal.

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 7XX103

Department: 4010 Information Technology
Project Title: PRJ - Printers/Scanners/Projector

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	70,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	70,000

Project Description	Planned replacement of computer peripheral and related systems equipment. Systems/equipment includes printers, plotters, scanners, projectors and other related systems/equipment.
Project Justification	Replace or upgrade based on functional reliability, availability, cost-effectiveness, application required, or redundancy to support District operations. Recycle technology elsewhere in the District whenever feasible. In 2020, we will be replacing 15 end-of-support copier/scanner/printers and replacing conference room digital projectors with more energy efficient and reliable large format monitors.
Applicable Policy	District Mission - Technology Goal.

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 7XX119

Department: 4010 Information Technology
Project Title: PRJ - Comm Equip Upgrade

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	190,500
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	190,500

Project Description	Planned routine capital replacement of small communications equipment such as low capacity microwave and telecommunication equipment.
Project Justification	To maintain the District's technology communications infrastructure. Replace or upgrade equipment based on functional reliability. 2020 includes replacement of mobile radios at Ripon Generation Plant; upgrades to the microwave link at New Hogan Dam; backup generator for the Woodland Service Center Communication Tower; replacement and expansion of fiber optic patch panels in the Primary Backup Data Centers.
Applicable Policy	District Mission - Technology Goal; Reliability; Security.

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 7XX138

Department: 4010 Information Technology
Project Title: PRJ - IT Security Infrastructure

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	243,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	243,000

Project Description	Planned information security improvements and upgrades required to address ongoing and increasing security concerns and meet North American Electric Reliability Corporation (NERC) compliance requirements.
Project Justification	To maintain and upgrade the District's IT security software and hardware infrastructure as required to address both compliance and security threats to the District. The 2020 budget includes replacing multiple end-of-life NERC Critical Infrastructure Protection (CIP) electronic access control and monitoring (EACM) servers with virtualized infrastructure and replacing multiple end-of-life network firewalls at the District's Bulk Electric System (BES) substations.
Applicable Policy	District Mission - Technology Goal.

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 720201

Department: 4010 Information Technology
Project Title: PRJ - Cyber Security Compliance Automation

Estimated Amount Required in Future Budget Cycles	280,000
Total Project Budget Inception to Completion	405,000

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	0
Outside Services	25,000
Seminars & Meetings	0
Administrative & General	100,000
MID Equipment	0
Totals	125,000

Project Description	Two year project to automate NERC CIP security and compliance processes. Currently, NERC CIP compliance tasks consume two full time employees, leaving little time for other high value cyber security tasks and projects. In addition, current processes are manual and therefore run the risk of human error. This project will reduce staff workload, improve security, and ensure compliance. This will free up staff to implement higher value cyber security controls.
Project Justification	As an electric utility participating in the Bulk Electric System (BES), the District must comply with NERC CIP standards. NERC CIP is designed to protect the cyber assets that control the BES and consists of 10 standards and 45 requirements. These requirements include multiple bi-weekly, monthly, quarterly and annual processes and tasks. The District's NERC CIP compliance program is based heavily on manual processes which consumes valuable staff time and presents a risk of human error.
Applicable Policy	Reliability

2020 Capital Budget Project Detail

Division: INFORMATION TECHNOLOGY DIVISION
Project Number: 720202

Department: 4010 Information Technology
Project Title: PRJ - Main Office Cell Signal Boosters

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	19,400
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	19,400

Project Description	Capital project to install two cell signal boosters in the basement and control room areas of the Main Office.
Project Justification	The District issues cell phones to employees that have critical communication needs. The downtown office building has areas where cell phone coverage is spotty, including the basement and areas around the control room, making it difficult to receive phone calls and text messages in a timely fashion. This project will add cell signal boosters to improve cell phone coverage in these areas.
Applicable Policy	Reliability and Safety

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720203

Department: 5031 Buildings & Grounds
Project Title: PRJ - Main Office Asphalt

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	290,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	290,000

Project Justification

The asphalt in our main office parking lots--main parking lot and secured parking--is past its prime. There are several locations that have potholes that require constant care and correction. Cracks also continue to form even after patching and sealing.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720204

Department: 5031 Buildings & Grounds
Project Title: PRJ - Warehouse Roof Restoration

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	132,250
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	132,250

Project Justification

The warehouse roof is worn and deteriorating and has begun to form leaks. Since the roof has two different systems (one on top of another), the cost to completely replace the roof would be extremely high. If we recondition the roof now and pay for annual maintenance, the roof would have a longer life span and be covered under warranty for an additional 20 years.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720205

Department: 5031 Buildings & Grounds
Project Title: PRJ - Cool Roof Coat

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	37,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	37,000

Project Justification

At the Service Center there are two metal buildings; one known as the Metal Shop and the other the Carpenter Shop. These buildings have metal roofs that have developed leaks. These roofs do not have any form of insulation or any type of heat barrier to keep the building cool. By installing a cool roof coating that also seals the roof and acts as a water barrier, we can increase the longevity of our roof and also aid in keeping staff cool in the warm summer months.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720206

Department: 5031 Buildings & Grounds
Project Title: PRJ - Seal MPR Exterior Deck

	2020 Adopted Budget
Labor & Benefits	0

Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	32,000

Project Justification

The deck that surrounds the exterior of the Multi Purpose Room and is above our HR Office and Lobby has begun to deteriorate and requires a top coat be installed to ensure it can withstand rain in future years. Without treating this area we will likely experience leaks inside our facility that could potentially lead to major damage.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720207

Department: 5031 Buildings & Grounds
Project Title: PRJ - Woodland Service Center Storm Drainage Improvements

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	93,150
Outside Services	34,850
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	128,000

Project Description Expansion of the existing storm drainage system at the northern most part of the Woodland Service Center storage area. This project includes extension of existing French drain, installation of manholes, and installation of three dry wells.

Project Justification The storm drainage system was originally designed to extend the French drain to the north boundary line and discharge into a small storm drain basin. However, the system was never completed. The current design concept aims to install three dry wells in lieu of constructing a basin in an effort to better utilize limited space.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720208

Department: 5033 Fleet Maintenance

Totals	145,000

Project Description 140 is a 1981 Chevrolet Flatbed Dump truck assigned to Irrigation.

Project Justification Vehicle will be 40 years old with approximately 96,000 miles in 2020. The truck was removed from service this year as its engine went out and repairs are too costly. Vehicle was previously used as a sandblasting truck. Irrigation would like to replace the truck with F550 size 4wd vehicle with service body to serve as a general construction support truck.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720216

Department: 5033 Fleet Maintenance
Project Title: PRJ - Replace Vehicle 224

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	36,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	36,000

Project Description	224 is a 2005 Ford Taurus assigned to Electric Resources.
Project Justification	Vehicle will be 15 years old with approximately 102,000 miles in 2020. Ideally, vehicle will be replaced with like for like. However, we are hearing that full size cars may not be readily available on the market next year so we are budgeting for a small SUV just in case.
Applicable Policy	Vehicle Replacement Policy.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720217

Department: 5033 Fleet Maintenance
Project Title: PRJ - Replace Vehicie 267

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	40,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	40,000

Project Description 267 is a 2005 Ford E350 Cargo Van assigned to Meter Department.

Project Justification Vehicle will be 15 years old with approximately 100,000 miles in 2020. Vehicle will be replaced with like for like.

Applicable Policy Vehicle Replacement Policy.

Project Title: PRJ - Replace Vehicle 060

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	34,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	34,000

Project Description 060 is a 2010 Ford 1/2 ton extended cab 2 wheel drive truck assigned to Irrigation.

Project Justification Vehicle will be 9 years old with approximately 150,282 miles in 2020. Vehicle will be replaced with like for like.

Applicable Policy Vehicle Replacement Policy.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720213

Department: 5033 Fleet Maintenance
Project Title: PRJ - Replace Vehicle 127

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	100,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	100,000

Project Description 127 is a 2007 Ford F550 truck with flatbed and cargo storage boxes assigned to the Line Construction Department.

Project Justification Vehicle will be 13 years old with approximately 80,000 miles in 2020. However, the vehicle was just removed from service with a bad engine. This vehicle will be replaced with like for like.

Applicable Policy Vehicle Replacement Policy does not apply yet as the truck has not hit the age or mileage limits. However, the cost to replace the engine justifies replacing the truck 2 years ahead of schedule.

2020 Capital Budget Project Detail

Division: FINANCE DIVISION
Project Number: 720220

Department: 5033 Fleet Maintenance
Project Title: PRJ - Replace Unit 414

	2020 Adopted Budget
Labor & Benefits	0
Materials & Supplies	180,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	180,000

Project Description 414 is a 2002 Kamatsu 15,000 lb forklift assigned to Purchasing/Material Handling.

Project Justification This lift will be 17 years old with approximately 12,500 hours in 2020. The Purchasing Department along with Line Construction is requesting we replace this lift with a 20,000 lb capacity lift so we have a piece of equipment at the Service Center that can lift the new 18,000 lb transformers.

Materials & Supplies	0
Outside Services	678,000
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	678,000

Project Description	Engineering studies and preliminary design for turbine/generation upgrades associated with relicensing.
Project Justification	The existing turbine/generator sets are near the end of their user lifecycles after 45 years of service. The generation equipment will need to be upgraded/replaced to continue reliable service for another 30-40 years. Delays in the FERC relicensing have pushed the schedule out for engineering design associated with repowering the Don Pedro facility.
Applicable Policy	Reliability of Power Supply, meet MID's long term resource goals, Don Pedro Operating Agreement.

2020 Capital Budget Project Detail

Totals	817,884

Project Description	Provide labor, materials, and equipment needed to design and construct electric line relocations necessary as a result of a County or City road project conducted for the safety of the traveling public.
Project Justification	By agreement of legal staffs of City, County, and MID - MID is legally obligated to pay for City and County pole relocations when those poles are located in City or County road right of way and are needed for the safety of the traveling public.
Applicable Policy	Legal Requirement

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX109

Department: 7072 Line Construction
Project Title: PRJ - Conduit Installations

	2020 Adopted Budget
Labor & Benefits	524,100
Materials & Supplies	175,000
Outside Services	400,000
Seminars & Meetings	0
Administrative & General	0
MID Equipment	80,000
Totals	1,179,100

Project Description	Install conduits for direct buried primary and secondary cable throughout the District.
Project Justification	In the mid-1990's, the first round of cable injection work was performed on direct buried primary cable. Once cables are injected they cannot be injected again, therefore when the cables fail they need to be repaired or replaced. This project is to install conduits at these locations in order to replace the failed cables. This project may also address installing conduits for direct buried secondary services.
Applicable Policy	Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX111

Department: 7072 Line Construction
Project Title: PRJ - Pole Replace/Restorations

	2020 Adopted Budget
Labor & Benefits	339,696
Materials & Supplies	35,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0

Totals	379,696

Project Description Replace or restore old wood poles which have deteriorated to the point where they can no longer safely function.

Project Justification To comply with General Order 165.

Applicable Policy Compliance with General Order 165; Public Safety.

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX113

Department: 7072 Line Construction
Project Title: PRJ - Contaminated Transf. Repl.

	2020 Adopted Budget
Labor & Benefits	101,199
Materials & Supplies	40,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	5,000
Totals	146,199

Project Description	From time to time distribution transformers are discovered with levels of contamination not suited for their application. These transformers are associated with a specific manufacturer during certain time periods.
Project Justification	Replacement of the transformers as they are discovered reduces the cost of transformer replacements because the work can usually be scheduled during normal District business hours. Replacements before rupture also reduces the cost of contamination clean up.
Applicable Policy	MID Business Plan (environmental protection)

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX123

Department: 7072 Line Construction
Project Title: PRJ - Primary System Improvements

	2020 Adopted Budget
Labor & Benefits	84,321
Materials & Supplies	50,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	10,000
Totals	144,321

Project Description	Various improvements to the primary system (12kV, 17kV, 21kV) throughout the District service territory.
Project Justification	This project is to make improvements on the distribution system that are identified and materialize throughout the year. Some of these improvements include switch installations, reframing poles, minor reconductors, and possible wildlife protection implementation. These are intended to improve system reliability and reduce outages.
Applicable Policy	Reliability; Public Safety

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX130

Department: 7072 Line Construction
Project Title: PRJ - OH #6 Copper Replacements

	2020 Adopted Budget
Labor & Benefits	926,675
Materials & Supplies	100,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	10,000
Totals	1,036,675

Project Description Replace #6 copper overhead primary cable with #4 ACSR overhead primary cable.

Project Justification Replace #6 copper overhead primary cable with #4 ACSR cable for reliability and safety.

Applicable Policy Reliability; Public Safety

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX132

Department: 7072 Line Construction
Project Title: PRJ - UG Cable Installation

	2020 Adopted Budget
Labor & Benefits	301,387
Materials & Supplies	75,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	5,000
Totals	381,387

Project Description	Install underground primary cable throughout the District.
Project Justification	Underground conduit systems have been installed throughout the District in years past. These conduits were installed in areas that originally had direct buried primary cable installed and may have been injected. As of today, the majority of the conduits have not been populated by new primary cable, having the original direct buried cable still providing service. This project is for the installation of new primary cable in these conduit systems.
Applicable Policy	T&D Five-Year Plan; Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX139

Department: 7072 Line Construction
Project Title: PRJ - Cap Bank Refurbishments

	2020 Adopted Budget
Labor & Benefits	139,690
Materials & Supplies	185,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	10,000
Totals	334,690

Project Description	Replace locally controlled distribution line capacitor banks with new automated controlled capacitor banks.
Project Justification	The existing distribution system line capacitors are locally controlled and can only be interrogated in the field. This project will make the line capacitors operable from the Control Room and will improve the system reliability while reducing system losses. It will reduce field inspections and interrogations since the data and status will be accessible via SCADA. It will also be easier to identify which banks become inoperable for quicker repairs.
Applicable Policy	T&D Five-Year Plan; Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 719949

Department: 7072 Line Construction
Project Title: PRJ - 230kV Pole Painting-Joint Section

Approved Budget in Prior Years	1,000,000		2020
Additional Amount Requested in Current Budget Year	1,000,000		Adopted
Estimated Amount Required in Future Budget Cycles	3,000,000		Budget
Total Project Budget Inception to Completion	5,000,000		
		Labor & Benefits	0
		Materials & Supplies	0
		Outside Services	1,000,000
		Seminars & Meetings	0
		Administrative & General	0
		MID Equipment	0
		Totals	1,000,000

Project Description	Paint poles and repair miscellaneous hardware issues with the Westley/Walnut/Parker 230kV transmission line. This project is for MID/TID jointly-owned poles from Westley Station to Redwood Junction. TID will manage the project for this jointly-owned section.
Project Justification	Due to large-scale corrosion issues identified on the tubular steel poles, repainting will extend the life of the Districts' assets. The project will encompass installation of scaffolding, shrink-wrapped containment, abrasive blasting, and coating with a three-coat paint system with a 30-year life expectancy and a 10-year warranty. The painting work will be performed by a contractor. Any necessary pole line hardware repairs discovered as part of the project will be performed as part of this project.
Applicable Policy	T&D Five-Year Plan

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 720234

Department: 7072 Line Construction
Project Title: PRJ - Mariposa B48 OH Line Extension

	2020 Adopted Budget
Labor & Benefits	43,239
Materials & Supplies	10,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	1,000
Totals	54,239

Project Description	Extend the existing overhead Mariposa B48 circuit east along Leckron Road with 636 AA wire.
Project Justification	Due to the continued growth and lack of offload options in the southeast part of the industrial tract, the Mariposa B48 line extension is needed to improve the Claus and Mariposa substation contingencies and the Claus B48 feeder contingency. Reliability is key for this area because the majority of the load is industrial.
Applicable Policy	T&D Five-Year Plan; Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX124

Department: 7082 Substation
Project Title: PRJ - Substation Improvements

	2020 Adopted Budget
Labor & Benefits	178,897
Materials & Supplies	151,000
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	4,000
Totals	333,897

Project Description	Improvements to various substation equipment that experience unexpected failures.
Project Justification	Substation equipment throughout the District experience unexpected failures throughout the year that cannot be captured within the planned replacement process, such as circuit breakers, substation batteries, LTC controllers, and capacitor banks, which must be capitalized.
Applicable Policy	Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 720235

Department: 7082 Substation
Project Title: PRJ - East Side 115kV Line Diff Relays

	2020 Adopted Budget
Labor & Benefits	139,493
Materials & Supplies	34,580
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	174,073

Project Description	Install line current differential relays on the Standiford-Claus and Standiford-Santa Cruz 115kV lines.
Project Justification	The Standiford-Claus and Standiford-Santa Cruz 115kV lines are Bulk Electric System lines and do not have high-speed tripping. NERC PRC-004 violations will be avoided. The proposed current differential relays would provide high-speed tripping, easier coordination, and reclosing functionality. With high-speed tripping, less stress exists on the 69kV and 115kV systems and higher reliability is achieved. The East Side Fiber Ring 7 was partly justified by the high-speed protection needs.
Applicable Policy	T&D Five-Year Plan; Reliability; NERC Compliance

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 719956

Department: 7082 Substation
Project Title: PRJ - Claus Synch Scopes and Synch Check Relays

Approved Budget in Prior Years	204,895			2020	
Additional Amount Requested in Current Budget Year	179,848			Adopted	
Total Project Budget Inception to Completion	384,743			Budget	
		Labor & Benefits		168,848	
		Materials & Supplies		0	
		Outside Services		7,000	
		Seminars & Meetings		0	
		Administrative & General		0	
		MID Equipment		4,000	
		Totals		179,848	

Project Description	Install Synch Scopes and Synch-Check Relays at Claus Substation on the 69kV system.
Project Justification	Allow Dispatch to synch the 69kV system at various locations when systems are islanded or separated. This allows Dispatch to synch possible islands and possible large separations of the system without dropping substation loads. Power Operations requested this project as part of their annual system assessment.
Applicable Policy	Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 719963

Department: 7082 Substation
Project Title: PRJ - Remote Access to Substation Relays RTUs LTCs

Approved Budget in Prior Years	684,706			2020
Additional Amount Requested in Current Budget Year	348,861			Adopted
Estimated Amount Required in Future Budget Cycles	335,087			Budget
Total Project Budget Inception to Completion	1,368,654			<hr/>
		Labor & Benefits	299,461	
		Materials & Supplies	9,000	
		Outside Services	40,400	
		Seminars & Meetings	0	
		Administrative & General	0	
		MID Equipment	0	
		Totals	<hr/> 348,861	

Project Description	Add remote access for all Substation Relays, Remote Terminal Units (RTUs), and Load Tap Changers (LTCs) and add Satellite-Synchronized Clocks at each station for these devices.
Project Justification	Establishing remote access to these devices will provide event records, fault locations, access to equipment settings and the ability to troubleshoot problems remotely. Currently, in order to obtain this information, Substation personnel must physically go to the Substation in question and manually collect the information. Having remote access will allow for immediate access to greater details during an event. This will improve the reliability on the system and eliminate the need to send personnel on site to obtain the information. The clocks are needed to analyze the correct operation of protective relays, breakers, LTCs, communication equipment, generators, and capacitors during faults and disturbances. The relays and RTUs will all be on the same time so multiple event reports can be analyzed concurrently. All utilities have their intertie substations with their relays and RTUs on satellite clocks for proper synchronization of events.
Applicable Policy	Reliability

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 720236

Department: 7082 Substation
Project Title: PRJ - Paradise B54 12kV OCBreaker Repl

	2020 Adopted Budget
Labor & Benefits	77,023
Materials & Supplies	36,000
Outside Services	5,000
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	118,023

Project Description	Removal of existing 12kV oil circuit breaker B54 at Paradise Substation and replacing it with a newer technology vacuum circuit breaker.
Project Justification	The circuit breaker has come towards the end of its useful life. It has a history of ongoing and repetitive issues. Maintaining it has become increasingly difficult and spare parts are obsolete or unavailable.
Applicable Policy	Reliability; T&D Five-Year Plan

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX143

Department: 7082 Substation
Project Title: PRJ - Ground Grid Improvements

	2020 Adopted Budget
Labor & Benefits	395,657
Materials & Supplies	314,075
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	709,732

Project Description	This project will address the recommendation of ground grid evaluation - such as crushed rocks, installation and bonding of ground mat, bonding of fences, providing isolation between MID and non-MID fences, replacement of damaged grounding conductors, use of effective connectors, etc.
Project Justification	Ground grids have not been evaluated since they were built. This project will reinforce the effectiveness of the existing ground grids inside the substation. It will help to eliminate any potential hazards for employees and the public.
Applicable Policy	Public Safety; T&D Five-Year Plan

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 7XX144

Department: 7082 Substation
Project Title: PRJ - Battery Replacements

	2020 Adopted Budget
Labor & Benefits	149,962
Materials & Supplies	65,600
Outside Services	0
Seminars & Meetings	0
Administrative & General	0
MID Equipment	0
Totals	215,562

Project Description	Remove existing valve regulated lead acid (VRLA) and nickel cadmium (NiCd) batteries and replace them with new, vented lead acid (VLA) batteries at various substations.
Project Justification	Some VLRA batteries in MID substations have failed load tests. They have been known to fail abruptly. VRLA batteries also have passed their useful life. NiCd batteries have been known to have discharge issues and thermal runaway. Characteristics of both types of batteries make them unpredictable and unreliable and they will be replaced by VLA batteries. Batteries are a critical component of substations for proper and safe operation.
Applicable Policy	Reliability; T&D Five-Year Plan; Public Safety

2020 Capital Budget Project Detail

Division: ELECTRIC TRANSMISSION AND DISTRIBUTION DIVISION
Project Number: 720239

Department: 7082 Substation
Project Title: PRJ - Beard Tract Substation-SUB

Estimated Amount Required in Future Budget Cycles	2,205,015	
Total Project Budget Inception to Completion	7,752,484	

	2020 Adopted Budget
Labor & Benefits	159,469

The Greening of Paradise Valley

The First 100 Years of the Modesto Irrigation District

The Fruits of Victory - Chapter 14

[Print version of chapter](#)

Long before the battle for full retail distribution of energy had ended, the Modesto Irrigation District began to harvest the fruits of victory.

Less than four years after MID power first was delivered to Modesto homes, farms and businesses, net profits from the district's electrical sales were being used to retire the bonds which had financed the development of the irrigation and electrical systems.

In 1954 as Stanislaus County's centennial year marked the transformation of a desert into one of the nation's most prosperous farming areas, the final payment was made on more than \$5 million in MID bonds accumulated over nearly three-quarters of a century.

Virtually all of the principal had been paid from power revenues. Electrical profits were first applied to the retirement of irrigation and electrical bonds in 1927 with a \$10,000 transfer. By July 1, 1954, when the final bond redemption payment was made, \$4,817,808 in energy sale profits had been committed to retiring the bonded debt.

Financing the operations of the district has ranged from the initial out-of-pocket contributions by Robert McHenry, its first board president, and others to get things started to the \$18.5-million bond issue floated in 1961 for the construction of New Don Pedro Dam.

In the first 67 years after the MID's formation, voters had approved 14 bond issues to finance the development of irrigation and electrical systems. The first was on December 14, 1887, and \$800,000 issue whose value was almost destroyed by the subsequent battle royal over the very life of the district. After the turn of the century when pro-irrigationists recaptured control of the district, a second issue had to be voted to refinance those original bonds.

Following that, an even-dozen bond issues were approved between 1909 and 1934. The final payments made in 1954 were on a 1914 issue totaling \$610,000, which had financed the first major upgrading of the irrigation system undertaken by the MID after the basic works were completed in 1904.

The district's excellent record of retiring debt by power revenue profits was so successful and well known that when the \$18.5 million bond issue for New Don Pedro went to a vote on November 7, 1961, the voters' approval, 11,231 yes to 328 no, set a record that stands today, a 97 percent majority. Overwhelming approval also was given the most

recent bond issue proposed - \$14.2 million for the second unit of the McClure Generation Station in a June 5, 1979, election, 5,361 yes to 573 no.

At the same time that retail power revenues were retiring electrical and irrigation system bonds, even larger amounts of the electrical profits were subsidizing irrigation operations and maintenance.

Starting in 1938, power revenues were transferred annually to the irrigation department. Sixteen years later when the district celebrated its freedom from bonded indebtedness, \$5,367,229 from this source had been invested in irrigation development and operation. The policy continues to this day.

The transfer of power revenues permitted a steady reduction of irrigation taxes.

In 1935 the taxes were slashed from \$6.40 per \$100 assessed valuation of property to \$2.76. Three years later, taxes were down to \$2.40 and soon thereafter to \$1.50. This rate prevailed for 16 years throughout World War II and the post war years when other districts were increasing water charges repeatedly. At the same time, assessed valuations of only \$80 per acre had been unchanged since 1915, even though the land was selling for as much as \$1,000 per acre. Thus, irrigators were receiving their annual supplies of water for a bare \$1.20 per acre.

In 1959 irrigation taxes were canceled.

"It was more an *irritation* tax than an irrigation tax," explained Thomas K. Beard, who early in his 16 years as a director representing the Modesto division led the effort to eliminate the tax. He reasoned:

The amount of money generated by the tax was less than the cost of collecting it. So, it just made good business sense to eliminate an irritation, although the \$1.50 to \$2.50 a year they were taxed probably was the only reminder that the people of the City of Modesto had that they were a part of the MID .

Today the district remains tax free, although in 1976 an irrigation water-user charge was adopted.

In most years since 1961 the investment of electrical profits in irrigation operations has exceeded \$1 million, some years nearly \$2 million.

The retirement of irrigation and electrical bonds and the support of the irrigation operations through power revenues were accomplished while the MID maintained one of the lowest electrical rate schedules in the nation.

A 1957 Federal Power Commission survey revealed that Modestans were using more energy and paying less for it than most other Californians. Electrical rates in the MID were well below state and national levels, even though rates had not changed since the mid-1930s. During that time, the cost of living rose 18 percent in the postwar decade.

Even when San Francisco increased its wholesale charges for Hetch Hetchy power by 33 percent in 1960, the MID was able to hold the line on rates. The first retail electrical rate increase in the 50-year history of the department came in January 1974, based on recommendations of a

financial consultant who urged that the revenue from electrical sales be increased. Ironically, after a half century of no increases, the weather forced rate increases in each of the next four years. The prolonged drought forced the MID to turn to expensive PG&E power purchases to meet the local consumer demands.

Rates were reduced once the drought was over and today remain well below state and national averages.

The revenue gains were due entirely to the rapid rise in the number of MID power users and their ever-increasing energy consumption. This growth increased steadily in spite of the great depression. In 1938, for instance, a record-breaking gain was attributed primarily to the installation that year of 408 new electric ranges and 135 new electric water heaters in homes served by the MID .

Throughout the postwar years, energy consumption overall increased 10 percent per year. By 1950, the electrical department was showing a \$1 million-a-year net profit.

As the district reached its debt-free milestone, nearly five times more meters were in place than in the first full year of operation. Each consumer, furthermore, was using seven times more energy. Whereas the average annual consumption on 5,045 meters in 1924 was 1,100 kilowatt hours, 23,047 consumers used 7,700 kilowatt hours each during 1953.

This boom in the use of electrical energy was a measure of pride for the district, something for which it worked diligently. In recent years, however, the emphasis has been reversed as conservation became necessary.

The technological revolution that produced electric clothes washers and dryers, food freezers, dishwashers, television sets, air conditioners, food processors, hair dryers, razors, computers and even toothbrushes contributed greatly to the lifestyle changes of that period.

The fact that MID consumers paid lower energy rates than those served by private utilities and even by most other public agencies meant these useful and convenient electrical "aids" of the 20th Century became affordable here much sooner than elsewhere.

This pattern of expanding electrification likewise put increasing demands on the MID to produce and distribute the accelerated levels of power being used. Meeting this power need has become a priority objective of the district.

Energy purchased from private utilities was expensive, and in the quest for lower-cost sources the MID appealed to its old adversary, the City and County of San Francisco.

An MID offer to buy surplus Hetch Hetchy power was rejected by San Francisco in the mid-1930s. San Francisco had been wholesaling to PG&E the Hetch Hetchy energy not used for its streetcar lines and other municipal purposes since July 1925. Apparently San Francisco considered the giant private utility a more stable customer than the Valley irrigation district, which had fought San Francisco so vigorously over the Hetch Hetchy issue.

The legality of selling Hetch Hetchy power to PG&E was questionable, however.

In 1925 when the city entered into an agreement with the private utility, *the San Francisco Examiner* called it more than questionable. It editorialized that:

It was a wrongful and shameful policy "Hetch Hetchy is the peoples". They paid for it. Its profits and benefits ought to remain with the people. This transfer of Hetch Hetchy power to PG&E is a subversion of the public grant.

Over the years, San Francisco voters eight times had rejected bond issues to purchase the PG&E distribution system in the city, which was the home of PG&E's headquarters. Under President Franklin D. Roosevelt, Secretary of Interior Harold Ickes began to breathe down San Francisco's neck. Ickes forced two more unsuccessful elections in attempts to win approval of local distribution of Hetch Hetchy power. The "Old Curmudgeon" took an active role in these campaigns.

Construction of the Riverbank Ammunitions plant on the Hetch Hetchy transmission line by the World War II Defense Plant Corporation temporarily prevented the U. S. Department of Interior from forcing compliance with the Raker Act by attempting to shut down San Francisco's Moccasin Creek power plant.

Secretary Ickes, however, still demanded a plan to dispose of Hetch Hetchy power without selling to PG&E.

Negotiations between the city and the Modesto and Turlock districts were reopened. A scheme was devised by which the irrigation districts would take all surplus Hetch Hetchy power, then sell to PG&E any that they did not need. This caused a furor. Secretary Ickes charged that San Francisco still was trying to circumvent the Raker Act.

Ickes' contention was supported by *The Modesto Bee* and Frank Andrews, a Modesto electrician and hard-working campaigner for the retail distribution of power by the MID. Andrews turned against the district, however, and formed the Modesto Water and Power Users Association when the MID became aligned with San Francisco.

Modesto Irrigation District Chief Engineer Clifford Plummer undertook a personal effort to resolve the issue.

The MID was buying substantial amounts of energy from PG&E and Plummer knew that considerable savings could be achieved through the purchase of Hetch Hetchy power instead. A direct appeal to Undersecretary of Interior Abe Fortas, later to become a U. S. Supreme Court justice, won from Fortas an admission that the MID made a "very compelling case" for its need for energy at costs lower than what it was paying PG&E. Interior Secretary Ickes, however, was unmoved, still insisting that the proposal was illegal and violated the Raker Act.

After Ickes formally rejected the scheme in January 1945, San Francisco asked the federal courts to ratify the proposed contract with the districts as being in "reasonable compliance" with the Raker Act. The courts, instead, issued an injunction against the further sale of Hetch Hetchy power to PG&E. San Francisco had no alternative but to work out a deal with the irrigation districts. The city needed a market and the MID needed a supplier.

PG&E purchases of power from the Turlock district, which at first saw no reason for it to become involved in the negotiations, proved to be a stumbling block to any agreement. The Department of the Interior refused to allow the TID to become a conduit of Hetch Hetchy power to the private utility.

The compromise finally approved by Secretary Ickes and the courts called upon the TID to agree that whenever it received electricity from the Hetch Hetchy system, it would not sell to PG&E more power than it sold in 1944 when the TID was wholesaling only its surplus Don Pedro energy. The TID agreed reluctantly, but it was not many years before that district found itself using all of its Don Pedro power and TID sales to PG&E ended.

Federal Judge Michael Roche found this arrangement to be in compliance with the Raker Act on July 9, 1945.

A few days later the MID signed a nine-year contract with San Francisco. Because of the need for new substations and interconnecting transmission lines, Hetch Hetchy energy was not received in Modesto until 1946.

The contract was expected to save the MID \$112,000 per year since the cost of Hetch Hetchy power was just half what the district had been paying PG&E. Five years after the agreement was implemented, Plummer reported the district already had saved \$2.5 million.

The agreement was to be the target of a new investigation a decade later when Tuolumne County Water District No. 2, with the assistance of Congressman Clair Engle, sought to take over a Tuolumne River powerhouse site authorized for San Francisco as a part of the original Raker Act development program.

For some years the Tuolumne County water agency had been eyeing power sites on the Tuolumne River. In 1954 Representative Engle introduced legislation to amend the Raker Act to permit the mountain county water district to build a \$20-million power project using San Francisco's still-undeveloped Early Intake site. The reasoning was that San Francisco had "sat" on the site for 40 years without using it and it should be put to work. "Playing dog in the manger with a vengeance" was how Engle described San Francisco's inaction.

The Raker Act had forced cooperative development on the Tuolumne River, which by then included five operating reservoirs. A sixth was under construction and the seventh was in the planning stage.

Noting this, the Valley irrigation districts were quick to object to the takeover. Projections showed that energy generated at all district and San Francisco power plants would be needed to meet future demands.

The irrigation districts also were concerned that the move might push San Francisco into building the Early Intake project ahead of the next scheduled powerhouse, which would use water stored behind the then under-construction Cherry Valley Dam. The reason for this concern was an agreement that the districts would receive 35 percent of the Cherry Valley-generated power at cost and the balance at minimal profits for the city. No such arrangement applied to the Early Intake powerhouse, so if the mountain water district actions forced a change in schedules, power costs for the Valley districts would be affected adversely.

The fiscal concerns, however, were not stated in the formal declaration issued by the irrigation districts in May 1954:

The introduction of a third agency on the river for the generation of power could hamper the coordinated releases for water supply, power and flood control. With all power plants under one control, certain plants could be idle while the remaining plants operated to meet the load demand. In this manner, Hetch Hetchy Reservoir releases could be discontinued at times to increase Hetch Hetchy storage and other similar adjustments made over the watershed.

Tuolumne County had no firm market for the power to be generated and Engle urged that it be sold to the U. S. Bureau of Reclamation Central Valleys Project. Up to that point, the CVP had not purchased any power. In fact, 47 percent of the energy then being generated at Bureau of Reclamation powerhouses was being sold to PG&E.

At hearings held by the House of Representatives Subcommittee on Irrigation and Reclamation which Democrat Engle chaired, Congressman John Saylor of Pennsylvania, the senior Republican member of the committee, charged that the only reason a powerhouse would be feasible at the location was San Francisco's earlier construction of Hetch Hetchy Reservoir. Saylor called San Francisco's long-range development plan sound and likened Congressman Engle's "dog in the manger" charge similar to a "case where a wise and provident father who when he builds a house puts on an extra bedroom in anticipation of future growth of the family. Then a complete outsider comes along and say, "You're not using that bedroom and I'm going to move in."

At these hearings the Tuolumne agency admitted that its \$75-million power and irrigation development plan would force San Francisco to maintain a constant discharge from Hetch Hetchy and would serve only 12,000 people irrigating 40,000 acres. The mountain district confirmed it had no idea where it would sell the 400 million kilowatts of power generated there and at powerhouses proposed in a number of other filings. That volume would rival the output of the great Shasta Dam on the Sacramento River.

Engle refused to give up, however, and called in the U. S. General Accounting Office, Congress' independent watchdog agency.

The General Accounting Office investigation was opened in August 1955 and 10 months later Comptroller General Joseph Campbell found San Francisco to be "in reasonable compliance" with the Raker Act. He also declared that all future power development would be required to meet the needs of various public agencies, including the MID and TID.

By the time the report was filed, the voters of San Francisco had approved a \$54 million bond issue to proceed immediately with both power plants. The Cherry Dam Powerhouse, built first, was completed in 1960, with the Canyon facility constructed the following year. The Modesto district once again was assured of an adequate supply of Hetch Hetchy energy.

The alliance of the MID and its partners on the Tuolumne River, Turlock and San Francisco, also proved effective in the mid-20th Century

struggles to keep federal and state agencies from moving in on the electrical energy resources of the watershed.

The U. S. Bureau of Reclamation conceived a plan to develop 8.1 billion kilowatt hours of energy a year, enough to serve 5,182,000 homes. The 38 reservoirs involved included one at Jacksonville on the Tuolumne River, first inventoried by the bureau in 1944 as part of an ambitious \$3 billion program to develop the water resources of 17 Western states. The scheme would make supplemental water available to some 2 million acres then under irrigation and provide water to 3 million other acres not being irrigated.

The three partners on the Tuolumne wanted no interference with their own energy and water development and irrigators especially feared that federal involvement would impose the 160-acre limitation on lands receiving Bureau of Reclamation water.

The districts and San Francisco, therefore, opposed the inclusion of the Tuolumne River in any such program, including the Central Valleys Project. The CVP's Delta-Mendota Canal, which ultimately went down the west side of Stanislaus County, bypassed the Modesto and Turlock Districts. The proposed East Side Canal may never be built.

The districts also bluntly told State Water Resources Director Harvey Banks to keep his hands off the Tuolumne River in developing his State Water Plan.

While it prevented the intrusion of federal, state and local governments on the Tuolumne watershed, the Modesto district carried on a major expansion of its electrical transmission and distribution system to meet ever-growing demands for more and more energy.

Continual modernization of the electrical distribution system is essential.

"If you don't believe it," comments retiring Chief Executive Officer H. L. Brooks, "experience a power loss during the World Series. You're in big trouble!" Brooks also recalls the time years ago when a homemaker sued the irrigation district for \$1 for the loss of a cake which was in the oven when there was a power loss.

As it observes its 100th anniversary, the Modesto Irrigation District's electrical distribution system has 25 substations, more than 18 miles of 115,000-volt transmission lines, 207 miles of 69,000-volt transmission lines and 1,102 miles of distribution lines, of which 266 miles are underground. Electrical lines in all new residential subdivisions now are being placed underground.

Today the electrical distribution system represents a capital investment in plant and equipment of \$117,131,000. More than 74,000 electrical customers being served use nearly 1.5 billion kilowatt hours of energy annually. The gross revenue for the electrical department exceeds \$70 million annually.

The generation and distribution of electrical energy which had been started as a by-product of the district's irrigation operations has become the dominant function. Not only was the district's "cash crop" highly profitable, it made the MID less political entity than a commercial enterprise.

This was verified by the California State Supreme Court as early as 1953 in a case brought by Andrews' Modesto Water and Power Users Association over the purchase of transformers and other electrical equipment. Andrews had protested that these were not purchased through competitive bidding.

The Supreme Court ruled against Andrews' contention and found that an irrigation district engaged in the generation, transmission and the sale of electrical energy is the operator of a proprietary enterprise and as such did not have to seek competitive bids in purchasing routine equipment. MID Attorney Vernon Gan explained this made the electrical operation "more of a business than a government entity, free from some of the restrictions ordinarily applicable to an irrigation district" but at the same time "losing some of the immunities with which an irrigation district ordinarily is clothed by law."

There was no question but that the Modesto Irrigation District had become big business, dealing in retail electrical energy and agricultural water.

JUDGE: Hon. Timothy M. Frawley
DEPT. 29
Petition Filed: February 10, 2015

TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD:

NOTICE IS HEREBY GIVEN that on February 23, 2016, the court entered judgment in the above-captioned matter denying the Petition for Writ of Mandate. A true and correct copy of the Judgment is attached to this Notice.

Dated: February 26, 2016

Respectfully submitted,

MATTHEW B. JONES
Attorney for Respondent Commission on State
Mandates

CASE NO.: 34-2015-80002016
[PROPOSED] JUDGMENT
DENYING PETITION FOR WRIT
OF ADMINISTRATIVE MANDATE
JUDGE: Hon. Timothy M. Frawley
DEPT. 29
Petition Filed: February 10, 2015

23 This matter was regularly scheduled for hearing on February 5, 2016, in Sacramento
24 County Superior Court, Department 29, the Honorable Timothy M. Frawley presiding. Peter C.
25 Harman and Dustin C. Cooper, of Minasian, Meith, Soares, Sexton & Cooper, LLP, appeared on
26 behalf of Petitioners Paradise Irrigation District, Oakdale Irrigation District, Richvale Irrigation
27 District, and South Feather Water and Power Agency. Alexis K. Stevens, of Somach Simmons
28 & Dunn, appeared on behalf of Petitioners Biggs-West Gridley Water District and Glenn-Colusa
Irrigation District. Peter H. Chang, Deputy Attorney General, appeared on behalf of Real Parties
Department of Water Resources and Department of Finance. Matthew B. Jones appeared on
behalf of Respondent Commission on State Mandates.

1
Judgment Denying Writ of Mandate, Case No. 34-2015-80002016

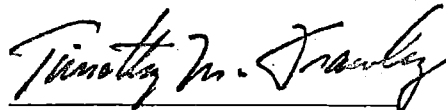

1 The Court, having considered the record of the administrative proceedings, the pleadings,
2 and evidence offered by all parties; having issued a tentative ruling on February 4, 2016, denying
3 the petition for writ of mandate; having taken the matter under submission following oral
4 argument on February 5, 2016; and having issued a Ruling on Submitted Matter and Statement
5 of Decision, affirming the tentative ruling with modifications on February 12, 2016, a copy of
6 which is attached as Exhibit A and incorporated into this Judgment,

7 IT IS ORDERED, ADJUDGED and DECREED that:

- 8 1. The Petition for Writ of Administrative Mandate is DENIED.
- 9 2. Each party to bear their own costs.

10 Dated: FEB 23, 2016

EXHIBIT A

SUPERIOR COURT OF CALIFORNIA

COUNTY OF SACRAMENTO

**PARADISE IRRIGATION DISTRICT, et
al.,**

v.

**COMMISSION ON STATE
MANDATES, et al.,**

**DEPARTMENT OF WATER
RESOURCES, et al.**

Case Number: 34-2015-80002016

**RULING ON SUBMITTED MATTER &
STATEMENT OF DECISION**

Date: February 5, 2016

Time: 9:30 a.m.

Dept.: 29

Judge: Timothy M. Frawley

On February 4, 2016, the court issued a tentative ruling in the above-entitled proceeding. On February 5, 2016, at 9:30 a.m., the matter came on for hearing with counsel present as indicated on the record. The matter was argued and submitted. Having taken the matter under submission, the court now affirms its tentative ruling, with modifications, as set forth below.

At the hearing, counsel for Petitioners orally requested a statement of decision. Without conceding that a statement of decision is required, (see, e.g., *City of Carmel-by-the-Sea v. Board of Supervisors* (1986) 183 Cal.App.3d 229, 236), the court directs that this ruling shall constitute its statement of decision.

Introduction

Article XIII B, § 6, of the California Constitution requires reimbursement to local governments for any "new program or higher level of service" mandated by the State. A local government initiates the process for reimbursement under article XIII B, section 6, by filing a "test claim" with the Commission on State Mandates. The Commission must then determine whether a state mandate exists and, if so, the amount of reimbursement due the local entity.

This case challenges a decision of the Commission denying consolidated test claims seeking reimbursement for costs incurred by urban and agricultural water suppliers to comply with the Water Conservation Act of 2009 and implementing regulations.

The Commission found that two of the named claimants – namely, Richvale Irrigation District and Biggs-West Gridley Water District – are not eligible to claim reimbursement because they are not subject to the taxing and spending limitations imposed by California Constitution articles XIII A and XIII B. As to the remaining claimants, the Commission found the costs incurred by the agencies are not reimbursable because the agencies have sufficient authority to pass the costs onto parcel owners through increased fees or charges for water service. Petitioners (supported by “Friend of the Court” California Special Districts Association) challenge both of these findings. The petition is opposed by the Commission, the Department of Water Resources, and the Department of Finance.

While the court agrees with Petitioners that the Commission abused its discretion in dismissing the test claims of Richvale and Biggs-West, the court shall deny the petition because Petitioners have failed to show they incurred reimbursable state-mandated costs.

Background Law

Overview of Restrictions on Taxation and Spending

In 1978, the voters adopted Proposition 13, adding article XIII A to the California Constitution.¹ Section 1 of the act curbed the power of cities, counties, and special districts to levy *ad valorem* real property taxes. It limited the maximum amount of any *ad valorem* tax on real property to one percent of the property's full cash value. It also reduced property taxes by rolling back the assessed value of real property to the value shown on the 1975-76 tax rolls, and restricting annual increases to an inflation factor, not to exceed 2% per year. It prohibited reassessment of a new base year value except in cases of purchase, new construction, or change in ownership. (Cal. Const., Art. XIII A, §§ 1, 2.)

To prevent the imposition of new taxes to make up for the decrease in real property tax revenues, the act prohibited new *ad valorem* real property taxes and new sales or

¹ Proposition 13 was not the first legislation to limit the ability of government to levy taxes. For example, several years earlier the State had enacted the Property Tax Relief Act of 1972 with the intent to limit the ability of local agencies and school districts to levy taxes.

transaction taxes on the sale of real property. It also imposed additional restrictions on state and local taxes. Article XIII A, Section 3 restricted state taxes by prohibiting any change in state taxes "enacted for the purpose of increasing revenues" unless approved by not less than two-thirds of the members of the Legislature. Article XIII A, Section 4 imposed a similar restriction on local taxes, requiring that special taxes be approved by a two-thirds vote of the electorate. (Cal. Const., Art. XIII A, §§ 3, 4.)

In 1979, in the wake of Proposition 13, California voters enacted Proposition 4 to limit the growth of government spending. Commonly known as the "Gann Limit," Proposition 4 added Article XIII B to the California Constitution, placing limits on government appropriations of the proceeds of taxes. (Cal. Const., Art. XIII B, § 1.)

In 1980, California enacted legislation to further implement the limits on appropriations established by Article XIII B. (Cal. Gov. Code § 7900 *et seq.*) Taken together, the sections explain and define the state and local government appropriation limits and the appropriations subject to limitation.

In 1986, voters enacted Proposition 62, placing still more restrictions on local taxes. (Cal. Gov. Code 53720 *et seq.*) Proposition 62 classifies all taxes as either special (imposed for specific purposes) or general (imposed for general governmental purposes). Proposition 62 restated that special taxes must be approved by a two-thirds vote, and added the requirement that local general taxes must be approved by a majority vote.

In 1996, voters adopted Proposition 218, which added the Right to Vote on Taxes Act (Articles XIII C and XIII D) to the California Constitution. Article XIII C reiterated the requirements of Proposition 62, making them part of the Constitution, while also making clear that the restrictions apply to taxes imposed by charter cities.

Article XIII D restricted local power to levy assessments and to impose new or increased property-related fees and charges. Article XIII D generally requires local governments to obtain voter approval for new or increased assessments, which is a levy or charge on real property for a special benefit conferred on that property. Under Article XIII D, an assessment imposed on a parcel or property must be proportional to, and no greater than, the special benefit conferred on the parcel. (Cal. Const., Art. XIII D, § 4.)

Property-related fees and charges are subject to similar restrictions. Under Article XIII D, property-related fees or charges (including charges for property-related services) must meet all of the following requirements: (1) revenues derived from the fee or charge must be used for the purpose for which the fee or charge was imposed, and

must be less than or equal to the funds required to provide the property-related service; (2) the amount of the fee or charge must not exceed the proportional cost of the service attributable to the parcel; (3) the service for which the fee or charge is imposed must actually be used by, or available to, the owner of the property; and (4) the fee or charge may not be imposed for general governmental services. (Cal. Const., Art. XIII D, § 6(b).)

New or increased fees and charges are subject to voter approval at two stages. First, local governments must give notice and conduct a public hearing on the proposed fee or charge. If a majority of owners protest against the proposed fee or charge, the fee or charge cannot be imposed. (Cal. Const., Art. XIII D, § 6.) Second, except for fees or charges for sewer, water, and refuse collection services, a proposed fee or charge must be submitted to and approved by a majority vote of the affected property owners or by a two-thirds vote of the electorate residing in the affected area. (*ibid.*)

Proposition 218 buttressed Proposition 13's limitations on property taxes and special taxes by incorporating restrictions on local taxes and by imposing new restrictions on special assessments and property-related fees and charges. (See *Apartment Association of Los Angeles County v. City of Los Angeles* (2001) 24 Cal.4th 830, 837.) Together, Proposition 13 and 218 affect taxes, as well as most property-related assessments, fees, and charges. However, they do not materially affect other compulsory fees and charges (such as regulatory fees and user fees), which are not imposed as an incident of property ownership.

Following the enactment of Propositions 13 and 218, there was concern that local governments were disguising new taxes as "fees" to raise revenue without complying with the constitutional restrictions. Thus, in order to ensure the effectiveness of the existing constitutional limitations, in 2010, the voters adopted Proposition 26.² The measure amended and broadened the definition of "tax" in Article XIII A and XIII C to mean "any levy, charge, or exaction of any kind imposed by the State," except:

- (1) A charge imposed for a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the State of conferring the benefit or granting the privilege to the payor.
- (2) A charge imposed for a specific government service or product provided directly to the payor that is not provided to those not charged, and which does

² Proposition 26 is not retroactive; it does not apply to legislation enacted before its effective date (November 3, 2010.)

not exceed the reasonable costs to the State of providing the service or product to the payor.

- (3) A charge imposed for the reasonable regulatory costs to the State incident to issuing licenses and permits, performing investigations, inspections, and audits, enforcing agricultural marketing orders, and the administrative enforcement and adjudication thereof.
- (4) A charge imposed for entrance to or use of state property, or the purchase, rental, or lease of state property, except charges governed by Section 15 of Article XI.
- (5) A fine, penalty, or other monetary charge imposed by the judicial branch of government or the State, as a result of a violation of law. (Cal. Const., Art. XIII A, § 3(b); Art. XIII C, § 1(e).)

Proposition 26 also shifted to the State or local government the burden of demonstrating that a levy, charge, or other exaction is not a tax. (*ibid.*) In this manner, Proposition 26 attempts to ensure that government cannot circumvent the constitutional restrictions on "taxes" simply by referring to them as "fees."

Reimbursement for Unfunded State Mandates

As laws were enacted to limit government taxation and spending, additional laws were enacted to prevent the State from shifting the cost of governmental programs from the State to local agencies. This was accomplished primarily by requiring the State to compensate local governments for mandated state costs.

The concept of reimbursement originated with the Property Tax Relief Act of 1972, generally known as "SB 90." The chief purpose of SB 90 was to limit the authority of local agencies and school districts to levy taxes. However, to offset those limitations, SB 90 required the State to reimburse local governments for the cost of unfunded state mandates. (See *City of Sacramento v. California* (1984) 156 Cal.App.3d 182, 188, overruled on other grounds in *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46.)

In 1975, the State created a statutory process for reviewing unfunded mandate claims. The legislation authorized the State Board of Control to conduct hearings and decide whether local agencies should be reimbursed for costs mandated by the State. The statutory process was codified in Revenue and Taxation Code, Section 2201 *et seq.*

Former Revenue and Taxation Code Section 2231(a) provided that the State "shall reimburse each local agency for all 'costs mandated by the state,' as defined in Section 2207." Former Section 2207, in turn, defined such costs as "any increased costs which a local agency is required to incur as a result of . . . [any] law enacted after January 1, 1973, which mandates a new program or an increased level of service of an existing program"³ (*County of Los Angeles v. State of California* (1984) 153 Cal.App.3d 568, 571; see also *City of Sacramento v. State of California* (1990) 50 Cal.3d 51, 57-58.)

In 1979, with the adoption of Proposition 4, the voters added Article XIII B, Section 6, which superseded SB 90 and provided constitutional support for the prohibition of unfunded mandates. Article XIII B, Section 6 was based on the process established by SB 90. (See *Department of Finance v. Commission on State Mandates* (2003) 30 Cal.4th 727, 736-737.) Section 6 provides:

Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse such local government for the costs of such program or increased level of service (Cal. Const, Art. XIII B, § 6.⁴)

Under Section 6, the Legislature is not required to provide subvention of funds for (i) legislative mandates requested by the local agency, (ii) legislation defining a crime, (iii) legislation enacted prior to January 1, 1975 (or regulations implementing such legislation), and (iv) legislation within the scope of California Constitution, Article I, Section 3(b)(7).

Section 6 was included in recognition that Article XIII A and B severely restricted the taxing and spending powers of local governments. (See *County of Fresno v. State of California* (1991) 53 Cal.3d 482, 487.) The provision was intended to preclude the State from shifting financial responsibility for governmental programs onto local entities that were "ill equipped to handle the task." (*Ibid.*) The concern which prompted Article XIII B, Section 6 was the perceived attempt by the State to shift to local agencies the fiscal responsibility for providing public services. (*County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, 56.) In the ballot arguments, the proponents of Article XIII B

³ In 1989, the Legislature repealed former Section 2207.

⁴ In 2004, Proposition 1A amended this language to eliminate the word "such." As amended, Section 6 provides: "Whenever the Legislature or any state agency mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service"

explained to the voters: "Additionally, this measure: . . . Will not allow the state government to force programs on local governments without the state paying for them." (*Ibid.*)

In 1984, the Legislature enacted Government Code Sections 17500 through 17630 to implement Article XIII B, Section 6. The legislation created the Commission on State Mandates to replace the State Board of Control as the quasi-judicial body charged with resolving state mandate claims. (Cal. Gov. Code § 17525; see also *Kinlaw v. State of California* (1991) 54 Cal.3d 326, 331.) Under the legislation, the Commission is vested with exclusive authority to hear and decide claims that a local government is entitled to reimbursement for "costs mandated by the state" under Article XIII B, Section 6. (Cal. Gov. Code § 17525.)

A local government initiates the process for reimbursement by filing a "test claim" with the Commission. The Commission then must determine whether a state mandate exists and, if so, the amount of reimbursement due the local entity. (Cal. Gov. Code §§ 17551, 17557, 17558.) Judicial review of the Commission's decision is available through a petition for writ of mandate under Code of Civil Procedure section 1094.5. (*Kinlaw, supra*, 54 Cal.3d at p.332; Cal. Gov. Code § 17559.)

The legislation defines "costs mandated by the state" as "any increased costs which a local agency or school district is required to incur . . . as a result of any statute . . . or any executive order implementing any statute . . . , which mandates a new program or higher level of service of an existing program within the meaning of Section 6 of Article XIII B of the California Constitution." (Cal. Gov. Code § 17514.) However, in Section 17556 subdivision (d), the Legislature declared that the Commission shall not find costs to be mandated by the state if the local agency "has the authority to levy service charges, fees, or assessments sufficient to pay for the mandated program or increased level of service." (Cal. Gov. Code § 17556(d).)

In 2004, voters adopted Proposition 1A. Among other things, the Proposition added subdivisions (b) and (c) to Article XIII B, Section 6. (Cal. Const., Art. XIII B, § 6 (b) and (c).)

Background Facts and Procedure

The test claims at issue in this writ proceeding arise from the Water Conservation Act of 2009 and its implementing regulations (the Agricultural Water Measurement regulations). (See Cal. Water Code §§ 10608-10608.64 and 10800-10853; 23 C.C.R. § 597-597.4.) The test claim statutes and regulations (collectively, the "test claim

statutes") require large agricultural water suppliers to implement "critical" water management practices, including measuring the volume of water delivered to customers and adopting a pricing structure based at least in part on the quantity of water delivered, as well as other cost effective and technically feasible management practices.⁵ (Cal. Water Code § 10608.48.) The test claim statutes also subject large agricultural water suppliers to new agricultural water management plan requirements. (*Ibid.*) In addition, urban water suppliers must comply with new urban water management plan requirements and achieve mandatory water conservation goals.

On June 30, 2011, Petitioners Richvale Irrigation District, Biggs-West Gridley Water District, Paradise Irrigation District, and South Feather Water and Power Agency filed a test claim with the Commission contending that the Water Conservation Act contained reimbursable state mandates. On February 28, 2013, Petitioners Richvale and Biggs-West filed a second test claim challenging the implementing regulations. The two test claims were consolidated for analysis and hearing.

Prior to the hearing on the merits, the Commission determined that Richvale and Biggs-West were ineligible to claim reimbursement for state-mandated costs because they did not currently receive any "tax" revenue. Thus, the Commission gave notice that it intended to dismiss their test claim unless other local agencies agreed to substitute in as claimants in their place. Petitioners Oakdale Irrigation District and Glenn-Colusa Irrigation District agreed to substitute in, and were accepted as the claimants in Test Claim 12-TC-01 in place of Richvale and Biggs-West.

In December 2014, after Commission staff issued a Proposed Decision recommending denial of the test claims, the Commission held its hearing on the test claims. The Commission received evidence and heard arguments from the claimants, Commission staff, the Department of Water Resources, the California Special Districts Association, and the California State Association of Counties. After hearing, the Commission voted to adopt the Proposed Decision as its Decision, denying the test claims.

In its Decision, the Commission concluded that reimbursement is not required. The Commission determined that most of the challenged code sections and regulations do not impose new mandated activities. Further, even if the statutes and regulations impose new state-mandated activities, the costs incurred to comply with those requirements are not costs mandated by the State because the claimants have authority to charge fees sufficient to cover such costs, defeating their claim of a reimbursable

⁵ Large suppliers are those serving 25,000 or more irrigated acres.

mandate. The Commission also affirmed that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend tax revenue.

In response to the Commission's Decision, Petitioners filed their Petition for Writ of Administrative Mandamus. Petitioners contend that the Commission abused its discretion by concluding that the petitioning local agencies have sufficient fee "authority" to pay for the costs of the new mandates. Petitioners argue that the procedural limitations of Proposition 218 – in particular, the "majority protest" provisions – divested local agencies of "authority" to establish or increase property-related fees or charges. Petitioners argue that the Commission cannot require local agencies to "try and fail" to impose new or increased fees or charges before seeking subvention.

Petitioners also challenge the Commission's determination that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend property tax revenue. Petitioners contend that the Commission has added a new eligibility requirement for subvention which violates the unambiguous constitutional language providing that subvention is available to "any local government."

Standard of Review

The court must determine whether the Commission proceeded without, or in excess of, jurisdiction; whether the parties received a fair hearing; and whether there was a prejudicial abuse of discretion. (Code Civ. Proc. § 1094.5) Abuse of discretion is established if the Commission did not proceed in the manner required by law, its order or decision is not supported by the findings, or the findings are not supported by the evidence. (*ibid.*)

The Commission's factual findings are reviewed under the substantial evidence test. (*City of Richmond v. Commission on State Mandates* (1998) 64 Cal.App.4th 1190, 1194-1195; Cal. Gov. Code § 17559.) Under the substantial evidence test, the court does not reweigh the evidence, views the evidence in the light most favorable to the Commission's findings, and indulges all reasonable inferences in support thereof. (*Camarena v. State Personnel Bd.* (1997) 54 Cal.App.4th 698, 701; *Hosford v. State Personnel Bd.* (1977) 74 Cal.App.3d 302, 306-07.) The court may not overturn a finding of fact simply because a contrary finding would have been more reasonable. (*Borefa Enterprises, Inc. v. Department of Alcoholic Beverage Control* (1970) 2 Cal.3d 85, 94; *Wilson v. State Personnel Bd.* (1976) 58 Cal.App.3d 865, 870.)

However, in addition to examining whether the Commission's findings are supported by substantial evidence, the court must determine whether the Commission committed any

errors of law. The court must independently assess pure questions of law. (*Jenron Corp. v. Dept. of Social Services* (1997) 54 Cal.App.4th 1429, 1434.) The determination of whether a statute or regulation imposes a reimbursable state mandate is a question of law, as is the interpretation of a statute or constitutional provision. (*County of San Diego v. State of California* (1997) 15 Cal.4th 68, 109; *State Building & Construction Trades Council of California v. City of Vista* (2012) 54 Cal.4th 547, 558.)

While an agency's interpretation of the meaning and legal effect of a governing law is entitled to consideration and respect, agency interpretations are not binding or authoritative. (*Bonnell v. Medical Board* (2003) 31 Cal.4th 1255, 1264.) It is the duty of the courts to state the true meaning of the law finally and conclusively, even if this requires the courts to overturn an erroneous administrative construction. (*Yamaha Corp. of America v. State Bd. of Equalization* (1998) 19 Cal.4th 1, 7.)

The weight accorded to an agency's interpretation is "fundamentally situational," and turns on a "legally informed, commonsense assessment of [its] contextual merit." (*Bonnell, supra*, 31 Cal.4th at p.1264.) Depending on context, the agency's interpretation may be helpful, enlightening, or convincing. Other times, it may be of little worth. (*Yamaha, supra*, 19 Cal.4th at pp.7-8.)

In determining how much weight to give an agency interpretation, courts must analyze two broad categories of factors: those indicating that the agency has a comparative interpretive advantage over the courts, and those indicating that the interpretation in question is probably correct. (*Id.* at p.12.) In the first category are factors indicating the agency has special expertise or technical knowledge, especially where the legal text to be interpreted is technical, complex, or entwined with issues of fact, policy, and discretion. (*Ibid.*) In the second category are factors suggesting that the agency gave careful consideration to its interpretation (such as adoption of a formal interpretive rule under the APA), factors indicating that the agency's interpretation was adopted contemporaneous with the legislative enactment being interpreted, and factors showing that the agency has consistently maintained the interpretation over time. (*Id.* at pp.12-13.)

Whatever the force of administrative construction, final responsibility for the interpretation of the law rests with the courts. (*State Bd. of Equalization v. Board of Supervisors* (1980) 105 Cal.App.3d 813, 820.)

In interpreting the scope of a constitutional provision, courts apply the same principles that govern statutory construction. The court's fundamental task in construing a law is to determine and effectuate the intent of those who enacted it. To determine intent, the

reviewing court turns first to the language of the provision, giving the words their usual and ordinary meanings. When the language is clear and unambiguous, there is no need for construction and courts should not indulge in it. (*Morgan v. Imperial Irrigation Dist.* (2014) 223 Cal.App.4th 892, 905-906; *Arden Carmichael, Inc. v. County of Sacramento* (2000) 79 Cal.App.4th 1070, 1075.) If the words are ambiguous and open to more than one meaning, the court may refer to extrinsic indicia of the intent, such as the legislative history of the measure and its impact on public policy. (*Morgan, supra*, 223 Cal.App.4th at pp.905-06; see also *Mejia v. Reed* (2003) 31 Cal.4th 657, 663.)

Discussion

Petitioners contend the Commission's Decision constitutes an abuse of discretion in the following two respects. First, the Commission erroneously determined that Richvale and Biggs-West are not eligible to claim reimbursement because only local agencies that collect and spend "proceeds of taxes" are entitled to claim reimbursement for state mandates. Second, the Commission erroneously determined that Government Code Section 17556 bars reimbursement because Petitioners have sufficient fee authority to pay for the costs of any new mandates.

Eligibility to Claim Reimbursement

The Commission determined that Richvale and Biggs-West are not eligible to claim reimbursement because they do not collect or expend "proceeds of taxes" subject to the tax and spend limitations of Articles XIII A and B. Relying on the California Supreme Court's opinion in *County of Fresno v. State of California*, the Commission concluded that reimbursement for a state mandate is required only if a local agency is compelled to rely on "proceeds of taxes" to meet the mandate. If an agency does not collect or expend proceeds of taxes, it is not subject to the appropriations limitation of Article XIII B, and therefore is not eligible for reimbursement under Article XIII B, Section 6. Because Richvale and Biggs-West do not receive any property tax revenues, the Commission determined they are not eligible for reimbursement.

Petitioners (and CSDA) argue that the plain language of Article XIII B, Section 6 -- as amended by Proposition 1A -- indicates that reimbursement is available to "any local government," without qualification. Petitioners argue that the Commission's reliance on *County of Fresno* is misplaced because that case was decided prior to Proposition 218, when there were no constitutional restrictions on nontax sources of local revenues. Thus, the Court focused on "tax revenues" as the only constitutionally-limited local revenue sources.

With the adoption of Proposition 218, assessments and fees joined taxes as limited revenue sources. Thus, Petitioners argue that the subvention requirement should protect local government revenues derived from assessments and fees in the same manner it protects tax revenues. Petitioners contend that this construction is consistent with the purpose of Article XIII B, Section 6, which is to prevent the State from shifting financial responsibility for carrying out governmental programs to local entities that are "ill equipped" to handle the task.

This court concludes that the Commission properly interpreted the Supreme Court's decision in *County of Fresno*, but misapplied that decision to the facts of this case. In reaching this conclusion, the court acknowledges that Petitioners' "plain language" argument has intellectual appeal. However, the court cannot ignore the constraints imposed by the doctrine of *stare decisis*.

The doctrine of *stare decisis* expresses a fundamental policy of law that courts exercising inferior jurisdiction must accept the law declared by courts of superior jurisdiction. (*Cuccia v. Superior Court* (2007) 153 Cal.App.4th 347, 353.) A decision of an appellate court is binding on a lower court even if the lower court believes it was wrongly decided. Application of the doctrine here means this court is bound by the Supreme Court's decision in *County of Fresno*.

In *County of Fresno*, the Supreme Court rejected a "plain meaning" interpretation of Section 6. *County of Fresno* involved a facial constitutional challenge to Government Code Section 17556. As discussed above, Section 17556(d) provides that the Commission shall not find costs to be mandated by the State if the local agency has authority to levy charges, fees, or assessments sufficient to pay for the mandated program or increased level of service. The petitioner argued that the provision was facially unconstitutional because it conflicted with the language of Article XIII B, Section 6, which contains no such exception. The Court disagreed.

In reaching its decision, the Court acknowledged that Section 6 "broadly declares that the 'state shall provide a subvention of funds to reimburse . . . local government for the costs [of a state-mandated new] program or higher level of service,' subject only to the exceptions enumerated in the initiative. (*County of Fresno, supra*, 53 Cal.3d at p.487.) Nevertheless, the Court concluded that Section 6, "read in its textual and historical context," was intended to protect only the "tax revenues" of local governments. Thus, the term "costs" in Article XIII B, Section 6, implicitly excludes expenses that are recoverable from sources other than "taxes." (*Id.* at pp.487-88.)

Although Section 17556(d) only refers to charges, fees, and assessments, the Supreme Court's reasoning is broad enough to cover any non-tax sources of revenue. Thus, the Court ruled that subvention is required "only when the costs in question can be recovered *solely from tax revenues.*" (*ibid.*) Based on this analysis, the Court found the statute to be facially constitutional. Because such expenses are outside the scope of the constitutional provision, the Legislature did not unlawfully create a new exception to the subvention requirement.⁶

Petitioners may criticize the decision in *County of Fresno* for failing to abide by the rules of statutory construction. It is hornbook law that courts are bound to give effect to constitutional provisions according to the usual, ordinary import of the language used. If the language is clear and unambiguous, the plain meaning controls and courts should not resort to extrinsic aids to determine intent. (*Delaney v. Superior Court* (1990) 50 Cal. 3d 785, 801-02; *Silicon Valley Taxpayers' Assn., Inc. v. Santa Clara County Open Space Authority* (2008) 44 Cal.4th 431, 444; see also *Morgan, supra*, 223 Cal.App.4th at pp.905-906.)

Courts must avoid unnecessarily changing a law in the name of "construing" it. If the words are clear, a court may not alter them to accomplish a purpose that does not appear on its face. (*People v. Savala* (1981) 116 Cal.App.3d 41, 61.) Generally a court may not read an exception into a statute or constitutional provision unless it must be implied in order not to violate an established rule of public policy. (*People v. Goodson* (1990) 226 Cal.App.3d 277, 281.)

As the Supreme Court observed in *County of Fresno*, the plain language of Section 6 broadly declares that "[w]henver the [State] mandates a new program or higher level of service on any local government, the State shall provide a subvention of funds to reimburse that local government for the costs of the program or increased level of service," with only three designated exceptions. In *County of Fresno*, the Court did not expressly find this language ambiguous, but it nevertheless resorted to extrinsic sources to determine voter intent.

In addition, the paramount goal of constitutional interpretation is to ascertain the intent of the lawmakers – in this case, the voters -- so as to effectuate the purpose of the law. (*Delaney, supra*, 50 Cal.3d at p.798.) The term "purpose" refers not to the subjective

⁶ Because *County of Fresno* was decided prior to the adoption of Proposition 218, the Court assumed that costs of state-mandated programs always are recoverable, either from tax revenues or from other (non-tax) sources of revenues such as fees, charges, and assessments. In limiting subvention to expenses that are recoverable "solely from taxes," the Court assumed that expenses determined to be outside the scope of subvention would be recoverable from other sources, such as fees, charges, and assessments. After Propositions 218 and 26, this is not necessarily correct, which may justify the Court revisiting the broad rule established in *County of Fresno*.

motivation of those who enacted the initiative, but to the intended result or effect of the legislation. (See *Board of Supervisors v. Superior Court* (1995) 32 Cal.App.4th 1616, 1623.) The relevant inquiry is: What purpose was the law intended to achieve?

In *County of Los Angeles v. State of California* (1987) 43 Cal.3d 46, the Supreme Court declared the purpose of Section 6 was to preclude a shift of financial responsibility for carrying out governmental functions from the State to local agencies. The apparent inspiration or motivation for the provision was the recognition that local agencies had their taxing powers restricted by the enactment of Article XIII A in the preceding year and therefore were "ill equipped" to take responsibility for new programs. (*Id.* at pp. 56-57, 61.) In *County of Fresno*, the Court arguably merged these concepts and determined that the "purpose" of Section 6 was to protect local "tax revenues," even though Section 6 (as originally enacted) did not mention taxes, tax revenues, or the taxing limitations imposed by Article XIII A.⁷

However, it is not for this court to reconsider whether *County of Fresno* was rightly decided. As a court exercising inferior jurisdiction, this court is bound by the doctrine of *stare decisis* to follow the decisions of courts exercising superior jurisdiction. A lower court may not overrule the "holding" of a higher court. (*Auto Equity Sales v. Superior Court* (1962) 57 Cal.2d 450, 455.)

There can be no dispute that the "tax revenue" language in *County of Fresno* is part of the Court's holding, because it consists of statements of law necessary to the decision. (*In re Marriage of Boswell* (2014) 225 Cal.App.4th 1172, 1176-77.) Thus, if the construction of Section 6 in *County of Fresno* is to be overruled, it is up to the California Supreme Court to do it.⁸

This disposes of the argument that Section 6 applies by its "plain language" to any local agency, without qualifications. The Supreme Court has construed Article XIII B, Section 6 as designed to protect the proceeds of "taxes." It construed the term "costs" in Article

⁷ The fact that Section 6, as originally enacted, did not refer to "taxes" or "appropriations subject to limitation," raises an issue about whether the voters intended the subvention requirement to incorporate subsequent changes to the law governing the definition of "taxes" and "appropriations subject to limitation." Normally, this question is answered by looking at the terminology used to determine whether the lawmakers intended the law to grow with changes in jurisprudence, or intended instead that the law remain frozen as originally enacted. This is not a trivial consideration. In 1990, Proposition 111 created additional exemptions from the category of appropriations subject to limitation. *County of Fresno* provides no express guidance on whether such amendments should be considered in determining the scope of subvention required by Section 6, though it is difficult to conceive how such amendments could be considered without also considering the amendments made by Proposition 218. (See *Old Homestead Bakery, Inc. v. Marsh* (1925) 75 Cal.App.247, 259 [discussing rule of *in pari materia* with regard to revenue and taxation statutes].)

⁸ The addition of Article XIII B, Section 6(c) by Proposition 1A in 2004 does not alter this analysis.

XIII B, Section 6 as excluding expenses that are recoverable from sources other than taxes. This court cannot ignore that decision and reinterpret the term costs to include expenses that are recoverable from sources other than taxes.

Nevertheless, the language used in *County of Fresno* should not be taken out of context, for even the "devil can cite Scripture for his purpose." (Shakespeare, Merchant of Venice, act I, scene 3, cited in *Harris v. Superior Court* (1992) 3 Cal.App.4th 661, 666.) Expressions used in judicial opinions are always to be construed and limited by reference to the matters under consideration. (*Estate of Miller* (1951) 104 Cal.App.2d 1, 17; *People v. Smith* (2003) 110 Cal.App.4th 1072, 1106 fn.73.)

Construed in context, it is clear that the Court in *County of Fresno* used the term "taxes" as that term is defined in Article XIII B. (*County of Fresno, supra*, 53 Cal.3d at pp.486-87.) For local agencies, Article XIII B defines "proceeds of taxes" to include, "*but not be restricted to,*" all tax revenues and proceeds from (1) regulatory charges and fees, to the extent such proceeds exceed the costs reasonably borne by government in providing the product or service; (2) the investment of tax revenues; and (3) subventions received from the State (other than pursuant to Section 6).⁹ (Cal. Const. Art. XIII B, § 8 [emphasis added].)

The Commission, in contrast, interpreted the term "taxes" to mean "local property tax revenues." It concluded that if a local agency does not currently receive local property tax revenues, the agency is *per se* ineligible for subvention.¹⁰ This does not follow. Article XIII B clearly defines "proceeds of taxes" as including,¹¹ without limitation, "all tax revenues,"¹² excessive regulatory fees and user charges, proceeds from the investment

⁹ Under Article XIII B, state financial assistance to local government generally is not subject to the state appropriations limit, but is subject to the local appropriations limit. In contrast, funds provided to reimburse local governments for state mandates are not subject to the local appropriations limit, but are subject to the state appropriations limit. (Cal. Const. Art. XIII B, § 8.) Because Article XIII B distinguishes between the two types of subvention, it is clear that voters intended local governments to receive funding for state mandates separate and apart from whatever other financial assistance they may receive from the State.

¹⁰ In other parts of its Decision, the Commission seems to acknowledge that the reasoning of *County of Fresno* potentially extends beyond local property taxes: "If the local entity is not compelled to rely on appropriations subject to the limitation to comply with the alleged mandate, no reimbursement is required." (Decision, p.34; see also p.35 [the issue is "to what extent [an agency's] sources of revenue (and the appropriations to be made) are limited by articles XIII A and XIII B."])

¹¹ The word "including" is a term of enlargement, (*Bighorn-Desert View Water Agency v. Verjil* (2006) 39 Cal.4th 205, 216-217), suggesting that other revenue sources (beyond "subventions" and "tax revenues") might qualify as "proceeds of taxes" under Article XIII B. It is unclear whether the California Supreme Court considered this argument in *County of Fresno*.

¹² While the term "tax" traditionally had no fixed meaning, a tax frequently was defined as a compelled contribution levied to raise revenue for the general support of government. (*Sinclair Paint Co. v. State Bd. of Equalization* (1997) 15 Cal.4th 866, 874.) Courts suggested that any compelled contribution levied to raise revenues for the general support of government may qualify as a "tax" within the meaning of

of tax revenues, as well as most subventions from the State. (See *County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 448-50.) Thus, a local government may be subject to the Article XIII B appropriations limit even if it is not currently receiving any *ad valorem* property taxes.

The redevelopment cases cited by the Commission do not compel a different conclusion. The analysis in those cases is specific to tax increment financing under Article XVI, § 16. Pursuant to Health and Safety Code Section 33678, the funds a redevelopment agency receives from tax increment financing are not "proceeds of taxes" subject to the Article XIII B appropriations limit. The constitutional validity of Section 33678 was upheld in *Brown v. Community Redevelopment Agency* (1985) 168 Cal.App.3d 1014. Thus, as a matter of law, tax increment revenues received by redevelopment agencies are not "proceeds of taxes" within the meaning of Article XIII B. Because tax increment revenues are not "proceeds of taxes," *County of Fresno* dictates that subvention is not required when redevelopment agencies are mandated to use tax increment revenues for state-mandated programs. (*Redevelopment Agency of the City of San Marcos v. California Commission on State Mandates* (1997) 55 Cal.App.4th 976, 986-87; *City of El Monte v. Commission on State Mandates* (2000) 83 Cal.App.4th 266, 281-82.)

Richvale and Biggs-West are not redevelopment agencies. They are not funded solely by tax increment financing. Thus, the redevelopment cases have no application here.

It well may be that Richvale and Biggs-West do not (and cannot) receive "proceeds of taxes" and therefore are not actually entitled to reimbursement for mandated costs, but the court cannot make this determination based on the record presented.¹³ Here, the Commission never determined whether Richvale and Biggs-West receive any "proceeds of taxes" within the meaning of Article XIII B, and therefore never determined whether

Article XIII B. (*County of Placer v. Corin* (1980) 113 Cal.App.3d 443, 449-50; see also *Redevelopment Agency of the City of San Marcos v. California Commission on State Mandates* (1997) 55 Cal.App.4th 976, 983, 986.)

Proposition 26 subsequently amended the California Constitution to define the term "tax" to mean "any levy, charge, or exaction of any kind" imposed by government, except those that meet one of seven specified exemptions. (Cal. Const. Art. XIII C, § 1(e).) Thus, levies enacted after the effective date of Proposition 26 are more likely to be classified as "taxes."

At minimum, taxes received by local governments may include, in addition to property taxes, sales taxes, utility taxes, transient occupancy taxes, business taxes, parcel taxes, and documentary transfer taxes. It is unclear from the record whether Richvale and Biggs-West collect any of these other taxes.

¹³ Determining whether Richvale and Biggs-West receive "proceeds of taxes" will require a comprehensive account of the revenues received by them, and a subsequent determination as to whether those revenues constitute "taxes" within the meaning of Article XIII B. No simple feat.

they would be compelled to rely on limited appropriations to satisfy the mandates at issue.

Based on the record presented, the court agrees that the Commission abused its discretion in determining that Richvale and Biggs-West are "ineligible" to claim reimbursement merely because they do not "receive *ad valorem* property tax revenue."

Sufficient Fee Authority

As described above, Government Code Section 17556(d) precludes finding costs to be mandated by the State if the local agency has authority to levy charges, fees, or assessments sufficient to pay for the mandated program. (Cal. Gov. Code § 17556(d).) The California Supreme Court upheld the facial constitutionality of Section 17556(d) in *County of Fresno*. Relying on Section 17556(d) and *County of Fresno*, the Commission denied the test claims, concluding the test claim statutes do not impose any reimbursable "costs" because the claimants possess fee authority sufficient as a matter of law to cover the costs of any new mandated activities.

Petitioners admit that, but for Proposition 218, they would have sufficient authority to establish or increase fees or charges to recover the costs of any new mandates. However, Petitioners contend that Proposition 218 removed their authority to establish or increase property-related fees or charges. Petitioners contend that under Proposition 218, a local agency only has authority to "propose" a fee or charge. The local agency then must provide written notice by mail of the proposed fee or charge to each affected landowner, who may file a written protest. If a majority of the owners file protests against the proposed fee or charge, the fee or charge cannot be imposed. (Cal. Const., Art. XIII D, § 6.) Thus, Petitioners argue, the ultimate decision-making authority rests with the landowners, not the agency.

Petitioners argue that the Commission correctly recognized the impact of Proposition 218 in an earlier test claim decision, *Discharge of Stormwater Runoff*, Test Claim No. 07-TC-09, Mar. 26, 2010. In *Stormwater*, the Commission determined that Government Code Section 17556(d) did not apply because the agency's authority to impose a fee was contingent on the outcome of Proposition 218's voting and majority protest procedures. The Commission concluded the local agency did not have "sufficient" authority to pay for the mandated program. (AR, at GSM_2318 through GSM_2334.)

In the Decision, the Commission recognized that Petitioners' fee authority is subject to limitations, including the majority protest provision of Proposition 218. However, the Commission ruled that for the majority protest provision to constitute a legal barrier,

either Petitioners "would have to provide evidence that they tried and failed" to impose or increase the necessary-fees, or a court would have to determine that the threat of a majority protest is a constitutional barrier to fee authority as a matter of law. (Decision, pp.78-79.) The "speculative and uncertain threat" of a majority protest by itself cannot defeat Petitioners' fee authority.

The Commission attempted to distinguish its earlier decision in *Stormwater* by claiming that Petitioners' fees are exempt from the voter approval requirement, whereas the fees in *Stormwater* were not. (AR, at CSM_84.) But that claim is flatly contradicted by the record. (AR, at CSM_2333.)

In *Stormwater*, the Commission considered some fees that are subject to Proposition 218's voter-approval requirement, and some that are not. (AR, at CSM_2333.) The Commission concluded that a local agency does not have sufficient fee authority if the fee is subject to voting or majority protest requirements under Proposition 218. The Commission concluded that these requirements strip the local agency of authority to impose the fee. (See AR, at CSM_2324 through CSM_2325 and CSM_2332 through CSM_2334.) The Commission rejected an argument of the State Water Board that the voting and majority protest requirements are equivalent to the practical/economic infeasibility hurdles discussed in *Connell v. Superior Court* (1997) 59 Cal.App.4th 382. (See AR, at CSM_2324 through CSM_2325.)

In this case, the Commission reversed course, determining that a majority protest provision is not a legal barrier to fee authority, but merely a practical or economic hurdle, as in *Connell*. (See AR, at CSM_83 through CSM_85.) It follows that the *Stormwater* decision is not "distinguishable;" it is simply inconsistent – as the Commission now seems to concede in its Opposition brief. (See Opposition, p.17.)

The fact that the Commission's Decision is inconsistent with *Stormwater* does not, by itself, render it invalid. Commission decisions are not precedential, and the Commission may depart from its reasoning in a prior test claim, provided its action is not arbitrary or capricious. (Cal. Gov. Code §§ 17533, 11425.60.) An agency has the power to "change its mind." (*Citicorp N. Am. v. Franchise Tax Bd.* (2000) 83 Cal.App.4th 1403, 1419-20.) However, a new interpretation which conflicts with an earlier interpretation is entitled to considerably less deference. (*Yamaha Corp. of America v. State Board of Equalization* (1998) 19 Cal.4th 1, 14; see also *City of Oakland v. Public Employees' Retirement System* (2002) 95 Cal.App.4th 29, 57 [an administrative decision, even if not designated precedential, properly informs as an administrative interpretation of the law].)

Because the court itself is the ultimate arbiter of the interpretation of the law, the court must decide which Commission interpretation is correct: its initial determination that a majority protest provision is a legal barrier to an agency's fee authority, or its subsequent determination that it is not (at least until the agency has "tried and failed" to impose the necessary fees.) (See *East Peninsula Educ. Council, Inc. v. Palos Verdes Peninsula Unified Sch. Dist.* (1989) 210 Cal.App.3d 155; 165 [use of an erroneous legal standard constitutes a failure to proceed in the manner required by law].)

The court concludes that the Commission's more recent interpretation is correct. The mere threat of a majority protest provision is not a legal barrier to an agency's fee authority. A majority protest requirement is not a legal barrier until it is exercised.

Section 17556(d) precludes reimbursement where a local agency has the authority – i.e., the right or power – to levy fees sufficient to cover the costs of the state-mandated program. Nothing in the language of the statute indicates that an agency's fee authority must be absolute; it merely must be "sufficient."

Case law also supports the view that an agency's fee authority need not be absolute. In *County of Placer, supra*, 113 Cal.App.3d 443, which was cited with approval in *County of Fresno*, the Court of Appeal held that governmental spending restrictions imposed under Article XIII B do not limit a local agency's ability to expend funds collected from non-tax sources, such as special assessments. In reaching this determination, the Court noted that most special assessment acts contain a majority protest provision. Nevertheless, the Court held that special assessments are not the type of exaction intended to be included within the limitations of Article XIII B. (*Id.* at pp.453-55.)

Similarly, in *County of Fresno*, the County did not possess unlimited fee authority. Both the Health and Safety Code and Article XIII B limited the County to collecting fees in an amount sufficient to pay for the costs of the services provided. The County was prohibited from charging "excess" fees. Yet this did not prevent application of Section 17556(d). (*County of Fresno, supra*, 53 Cal.3d 482, 485-87; see also *Connell, supra*, 59 Cal.App.4th 382 [Districts had authority to levy fees sufficient to cover the costs at issue].)

Petitioners are correct that the authority of local agencies to recover costs through charges, fees, and assessments was impacted by Proposition 218. However, the mere specter of a majority protest should not, by itself, negate a local agency's fee authority. While it is possible that a majority of the owners will protest a proposed fee, it is also possible that they will not.

Petitioners argue that if a voter-approval requirement divests an agency of fee authority, a majority protest requirement should as well. Petitioners contend there is no material distinction between the voter approval and majority protest requirements for purposes of subvention. The court, however, sees a material distinction. Under the voter approval requirement, the agency has no authority to establish or increase fees unless the fee is approved by an affirmative majority vote of the affected property owners. (Cal. Const., Art. XIII D, § 6(c).) Under the majority protest requirement, the agency has authority to levy a fee unless there is a majority protest.¹⁴ The agency is prohibited from imposing the fee only if a majority of owners present written protests. If owners do nothing, the agency may proceed with its plans to impose the fee. A majority protest functions more like a veto than an affirmative voter approval requirement.

Under Proposition 218, a local agency lacks authority to impose a fee for water services if it is actually protested by a majority of the affected owners. But, like the Commission, this court is unwilling to conclude that Petitioners lack "sufficient" fee authority based on the speculative and uncertain threat of a majority protest. Thus, in the absence of a showing that Petitioners have "tried and failed" to impose or increase the necessary fees, the Commission properly concluded that Petitioners have sufficient fee authority to cover the costs of any mandated programs.

The court does not agree with Petitioners that requiring such a showing will bar agencies from timely filing test claims. Under Government Code Section 17551, test claims must be filed within 12 months following the effective date of a statute or executive order, or within 12 months of incurring increased "costs" as a result of a statute or executive order, *whichever is later*. (Cal. Gov. Code § 17551 [emphasis added].)

According to *County of Fresno*, the Legislature has construed the term "costs" as excluding expenses that are recoverable from sources other than taxes. Thus, until an agency knows whether expenses are recoverable from sources other than taxes, it does not know whether it has incurred any "costs." Logically then, the limitations period for filing a test claim cannot begin to run until after the agency has "tried and failed" to recover the costs through fees or charges subject to a majority protest requirement.

Further, given the relatively short deadline for owners to file a protest, the agency generally should know within one year whether a particular fee or charge has been blocked by a majority protest. In that rare case where it takes longer than one year to

¹⁴ The court acknowledges that Proposition 218 refers to fees "proposed for imposition," but this does not alter the court's analysis of how the majority protest requirement functions – as notice with an opportunity to object (sometimes referred to colloquially as a "scream or die" notice).

enact a fee to cover a new mandate, the court has little difficulty concluding that the time period for submitting a test claim should (at minimum) be equitably tolled while the agency completes the majority protest procedures.¹⁵ If, as the Commission concluded in its Decision, claimants must show that they "tried and failed" to impose the necessary fees, (see Decision, at CSM_84), then claimants must have a means to submit their test claims to the Commission *after* fulfilling the majority protest requirement. To conclude otherwise would produce the unacceptable result that a claimant would have no means of seeking reimbursement even for expenses that are indisputably "costs mandated by the State." That cannot be the law.

In this litigation, the Commission distanced itself from the "try and fail" language in its Decision, arguing that even if voters or landowners block a proposed fee increase, subvention is not required because the resulting costs were imposed by the voters/landowners, rather than the State. This argument borders on the absurd, conflating the "costs" mandated by the State with the "fees" levied to cover such costs. By its plain terms, Article XIII B, Section 6 requires subvention "[w]hensoever the Legislature or any state agency mandates a new program or higher level of service on any local government," to reimburse that local government for the costs of the program or increased level of service. In Section 17556(d), the Legislature recognized an exception to the reimbursement requirement when mandated "costs" are recoverable from sources other than taxes (namely, from charges, fees, or assessments). But the mandate itself still originates from the State, not the voters or landowners who may exercise their constitutional right to block the agency from imposing new fees or assessments.

This should be obvious from the language of Article XIII B, Section 6. But if there remains any doubt, it is dispelled by Government Code Section 17514, which defines "costs mandated by the state" to mean "increased costs which a local agency . . . is required to incur . . . as a result of any statute . . . or any executive order implementing any statute . . . ; which mandates a new program or higher level of service of an existing program" The test claims in this proceeding arise from the Water Conservation Act of 2009 and its implementing regulations. Petitioners filed the test claims because they will incur costs to comply with the requirements of the new statute and regulations. Petitioners may seek to cover these costs through increased fees or charges, but if such efforts fail due to lack of voter or landowner approval, the costs still cannot be attributed to the voters or landowners because *they did not mandate the new program or higher level of service* -- the State did.

¹⁵ To ensure its rights are preserved, the agency also could file its test claim before the rate-setting process is complete, and request the Commission stay the claim pending the outcome of the majority protest process.

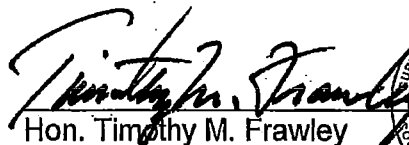

The Commission also suggests that this court should find as a matter of law that Petitioners have sufficient authority merely because they have statutory authority to establish or increase fees. This argument is a non-starter. The court cannot simply ignore the constitutional limitations on Petitioners' fee authority. A statute cannot trump the Constitution. Wherever statutes conflict with constitutional provisions, the latter must prevail. (*Delaney v. Superior Court* (1990) 50 Cal.3d 785, 801.) Statutory fee authority is not "sufficient to pay for the mandate program or increased level of service" if it cannot be applied due to constitutional limitations.

Disposition

The court concludes that the Commission abused its discretion in dismissing Richvale and Biggs-West as eligible claimants. However, because the court finds the Commission correctly denied the test claims because Petitioners have not (yet) incurred any costs mandated by the State, the court shall deny the petition. This ruling shall be without prejudice to Petitioners' ability to file a new test claim if fees/charges proposed to recover the costs of the programs are blocked by a majority protest.

Counsel for the Commission is directed to prepare a formal judgment, consistent with this ruling; submit it to opposing counsel for approval as to form; and thereafter submit it to the court for signature and entry of judgment in accordance with Rule of Court 3.1312.

Dated: February 8, 2016

Hon. Timothy M. Frawley
California Superior Court Judge
County of Sacramento

Case Number: 34-2015-80002016
Case Title: Paradise Irrigation v. CSM/DWR

Subject: Public Records Act request
Date: Friday, March 4, 2022 10:17:18 AM

CAUTION: This email originated from outside the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Dear Commission on State Mandates:

This is a Public Records Act request for all documents related to: (i) any analysis of which, if any, local agencies are not subject to the tax and spend limitations of the California Constitution, (ii) section 8 of Article XIII B of the California Constitution, or (iii) the 2021 amendments to section 1183.1(g) of the Commission's regulations.

If you have trouble understanding this request, I request assistance in reformulating it in a way that is more understandable. If this request is not addressed correctly, please forward it to the appropriate person in your office who handles Public Records Act requests. I also request that documents available in electronic format be produced in their electronic format.

Government Code section 6253(c) requires, within 10 days, the Commission to determine whether it has any disclosable public records, and to promptly notify me.

Please contact me with any questions.

Thanks.

San Francisco, CA 94104

Re: Public Records Act Request Response

Dear Mr. Prows,

On March 4, 2022, the Commission on State Mandates (Commission) received your Public Records Act (PRA) Request for all documents related to:

- (i) any analysis of which, if any, local agencies are not subject to the tax and spend limitations of the California Constitution,
- (ii) section 8 of Article XIII B of the California Constitution, or
- (iii) the 2021 amendments to section 1183.1(g) of the Commission's regulations.

You also requested that “documents available in electronic format be produced in their electronic format.”

Government Code section 6253(f) authorizes compliance with PRA requests by making records available on the public agency's website. Attached is a list of links to records available on the Commission's website that satisfy your request.

In addition, Government Code section 6253(c) authorizes an extension of the deadline to respond to a PRA request for up to 14 days when there is a “need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request.” (Gov. Code, § 6253(c)(2)). The Commission has historic records that have not been uploaded to its website, including records related to litigation, which may be responsive to your request regarding (i) and (ii) above. These records are voluminous, some are in storage, and many will require review and possible redaction of portions not subject to disclosure. These matters date back to the Commission's establishment in 1985, and before the Commission began saving documents in electronic format. You will find reference to several of the potentially relevant litigation cases cited in the analyses linked below and may wish to also review those court decisions, all of which can be found on the internet. We will provide a subsequent letter with respect to any additional Commission records that may be responsive to your request by March 28, 2022.

Mr. Prows

Re: Public Records Act Request Response

Dear Mr. Prows,

On March 4, 2022, the Commission on State Mandates (Commission) received your Public Records Act (PRA) Request for all documents related to:

- (i) any analysis of which, if any, local agencies are not subject to the tax and spend limitations of the California Constitution,
- (ii) section 8 of Article XIII B of the California Constitution, or
- (iii) the 2021 amendments to section 1183.1(g) of the Commission's regulations.

You also requested that "documents available in electronic format be produced in their electronic format."

On March 14, 2022, we provided a list of documents available on our website pursuant to Government Code section 6253(f) that are responsive to your request.

We also indicated that we would need an extension of time, pursuant to Government Code section 6253(c), to further respond to your request due to the "need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records that are demanded in a single request." (Gov. Code, § 6253(c)(2)).

On March 21, 2022, you spoke with the Commission's Chief Legal Counsel, Camille Shelton, and agreed that any responsive litigation briefs, court orders and decisions that are saved electronically to the Commission's computer system would satisfy your request, and that for now you are not requesting that we continue our search for records that may be responsive to your request that are kept in hard copy in the Commission's office, or in off-site storage. We anticipate being able to provide you with electronic copies of litigation briefs, court orders and decisions that may be responsive to your request by the week of April 4, 2022, as we have only one IT professional at the Commission and there is significant work for him to do to be able to make the documents available to you.

Please feel free to contact us if you have any questions or need additional information.

Sincerely,

Heather Halsey
Executive Director

JOHN CHIANG
California State Controller

December 13, 2011

To the Citizens, Governor, and Members of the Legislature of the State of California:

I am pleased to present the 60th edition of the *Special Districts Annual Report*, for the fiscal year ended June 30, 2010. This report is a compilation of financial data provided by county auditors and special district officials.

Information in this report was compiled from standardized reports utilizing accounting and reporting procedures in accordance with the Uniform Accounting Systems of Special Districts, prescribed in section 1113.1 of the California Code of Regulations. The exceptions are special districts engaged in electric and hospital activities. These special districts are required to use accounting systems prescribed by the California Public Utilities Commission, the Federal Power Commission, or the Office of Statewide Health Planning and Development. They are, therefore, exempt from the provisions of the California Code of Regulations.

Following are highlights of the financial activities of California's special districts for the fiscal year (FY) ended June 30, 2010:

- Total revenues decreased by 0.57% from \$40.32 billion in FY 2008-09 to \$40.09 billion in FY 2009-10. Non-Enterprise General Purpose transactions, mainly property taxes and the proceeds of long-term debt, accounted for the largest portion of reported revenues, increasing from \$12.52 billion to \$12.63 billion, a 0.86% increase.
- Total expenditures increased by 0.24% from \$40.85 billion in FY 2008-09 to \$40.95 billion in FY 2009-10. Non-Enterprise General Purpose transactions, mainly salaries, wages and benefits, and fixed assets, accounted for the largest portion of reported expenditures, increasing from \$11.82 billion to \$12.28 billion, a 3.84% increase.
- Total outstanding long-term debt decreased by 0.25% from \$75.14 billion in FY 2008-09 to \$74.95 billion in FY 2009-10. Revenue Bonds accounted for the largest portion of the debt, increasing from \$47.79 billion to \$46.66 billion, a 2.35% decrease.

I would like to thank the many government representatives who assisted in providing my office with this information in a timely manner. Their contributions and the dedicated work of my staff provide the Legislature and taxpayers with detailed information on the financial activities of California's special districts.

Sincerely,

Original signed by:

Introduction

California Government Code section 12463.1 requires the California State Controller to annually compile and publish the financial transactions of special districts within California.

Special districts are defined as legally-constituted governmental entities that are not cities, counties, redevelopment agencies, or school districts. Pursuant to Government Code section 12463.1, special districts include joint powers agencies (JPAs) formed under Government Code section 6500, as well as certain nonprofit corporations.

Special districts have substantially the same general governmental powers as most other local governments under the California State Constitution and statutes. Most commonly, these powers include autonomy and corporate powers. Special districts may acquire funds through bonds, taxes, or user charges and can spend funds to provide specified services and facilities. Special districts, including JPAs, may sue and be sued, acquire real and personal property or any interest therein, exercise the right of eminent domain, and enter into and perform contracts.

In contrast to most other governmental entities, a special district may cover only a small portion of a city or county, or it may have a multi-city or multi-county jurisdiction. Its territory may be contiguous or non-contiguous. It may be limited to a single function or permitted to perform a multitude of functions.

This publication includes financial data for the 2009-10 fiscal year, as reported to the California State Controller by 4,792 special districts in California. Special districts may have different fiscal periods. This publication includes data for fiscal periods that ended between July 1, 2009, and June 30, 2010. The data are based upon, and presented according to, specific activities performed by each special district. Except as stated below, all data published herein comply with the applicable Uniform Accounting System for Special Districts, as prescribed in section 1113.1 of the California Code of Regulations.

Special districts engaged in electric and hospital activities are required to use accounting systems prescribed by the California Public Utilities Commission, the Federal Power Commission, or the California Office of Statewide Health Planning and Development; electric- or hospital-related special districts are therefore exempt from the above provisions of the California Code of Regulations. Note that the information contained in this publication has not been audited.

Special districts operate under various statutes; 53 major statutory types apply to special districts. Each statutory authorization enumerates the legal provisions that apply to that type of special district. Statutory authorization information, including California code and section number, is found in Appendix A of this report.

Publication Organization

This publication is divided into three major sections: Introduction, Financial Section, and Supplemental Information.

The **Introduction** provides general information about special districts. This section also provides guidance on how to use or locate information in the publication.

The **Financial Section** presents the financial data as submitted by the special districts, grouped into five major categories.

General Information – Table 1 presents general information relating to the principal county, statutory type code, governing body, and appropriations limit for each special district. Table 1 also summarizes total revenues, expenditures, and debt by activity.

Enterprise Activities – Tables 2 through 8 present detailed transactions by special districts for the seven enterprise activities, which include airport, electric, harbor and port, hospital, transit, waste disposal, and water utility activities.

Non-Enterprise Activities – Table 9 presents summarized transactions for the non-enterprise activities by governmental fund. Tables 10 through 12 present detailed non-enterprise transactions by special district.

Long-Term Debt – Table 13 presents summarized long-term debt by type of debt. Table 14 presents detailed debt information by special district, purpose, and activity.

Taxes Allocated and Levied – Tables 15 and 16 present, by county and type respectively, the amount of ad valorem taxes allocated and voter-approved taxes levied. Table 17 presents detailed tax information by special district. This information applies to the 2010-11 fiscal year.

The **Supplemental Information** includes four appendices relating to special districts.

Appendix A lists the statutory authority under which special districts in this publication operate, and the applicable type code for each district. The type code shown is a system devised by the California State Controller's Office to provide some codification for identification purposes.

Appendix B lists the number of special districts by type code and governing body.

Appendix C lists definitions that are used in the reporting forms and instructions in the preparation of the annual financial transactions report.

Appendix D lists the special districts that failed to file their financial transactions reports for the 2009-10 fiscal year.

Locating Information for a Special District

Information pertaining to a specific special district can be located using Table 1, which is organized in alphabetical order. General information such as the principal county, statutory type code, and governing body is provided in Table 1. Listed with each special district are its reported activities and the total revenues, expenditures, and debt of the special district. To find detailed financial transactions for a specific special district, note the activities listed in Table 1; then refer to the Table of Contents to locate the page number of the applicable tables.

A number of special districts exist but have become inactive, meaning they reported no balances or transactions during the fiscal year. Inactive special districts are listed in Table 1 with “Inactive” noted in the column entitled “Activity.” In addition, some special districts had no revenues or expenditures during the fiscal year but showed fund balances. Table 1 is designed to provide a comprehensive summary of all special districts; therefore, Table 1 shows no revenue or expenditure amounts for districts that report only fund balances. A special district may no longer receive revenues nor provide services, yet it maintains a fund balance until the special district is dissolved.

For the 2009-10 fiscal year, 32 special districts failed to file financial transaction reports. They are listed in Appendix D.

Governing Body

A special district's governing body may consist of the county board of supervisors, the city council of the city within which the special district is located, or a special district board whose members are independently elected or appointed. Figure 1 reflects the number of special districts operating under the various types of governing bodies. See Table 1 for information relating to each special district.

Figure 1

Number of Special Districts by Governing Body

Governing Board	Number of Special Districts
Board of Supervisors	1,565
City Council	195
Special District Elected or Appointed	3,032
Total Number of Special Districts	4,792

Special District Trends

During the 2009-10 fiscal year, a total of 50 new districts were formed and 27 were dissolved. During the fiscal year, there was a net gain of 23 special districts reporting financial transactions to the California State Controller.

Figure 2 indicates the trend in the number of special districts over the last five years. JPAs and nonprofit corporations comprise approximately 19.91% of all special districts.

Figure 2

Special District Five-Year Trend			
Fiscal Year	JPAs and Nonprofit Corporations	Other Special Districts	Total Number of Special Districts
2005-06	906	3,844	4,750
2006-07	915	3,863	4,778
2007-08	920	3,856	4,776
2008-09	926	3,843	4,769
2009-10	954	3,838	4,792

Activities

For reporting purposes, special districts must file financial transaction reports by activity. The activity designates a specific function or service provided by a special district. A special district may perform one or more activities. The revenues and expenditures for each activity are accounted for separately. Activities are grouped into two major categories: enterprise and non-enterprise. Figures 3 and 4 provide a summary of financial transactions of enterprise and non-enterprise special districts, categorized by the purpose of the transactions resembling the fund type, as discussed below.

Enterprise

Enterprise activities are accounted for in a manner similar to a private business, such as a water utility. The acquisition, operation, and maintenance of governmental facilities and services are entirely or predominantly self-supporting through user charges or fees. For the purposes of this publication, enterprise activities are separated into seven categories: airport, electric, harbor and port, hospital, transit, waste disposal, and water utility. Information relating to revenues and expenses for these enterprise activities is contained in Tables 2 through 8.

Non-Enterprise

A non-enterprise activity is an activity that has an accounting system organized on a governmental fund basis. Non-enterprise activity categories include general-purpose, debt service, and capital project.

The general-purpose category represents the financial transactions of a special district’s General Fund and Special Revenue Funds. These transactions include general operations and administration of a special district that is financed by taxes and general revenues as well as the transactions involving special revenues earmarked for specific purposes. These transactions are presented in Tables 9 and 10.

The debt service category accounts for the resources devoted to the payment of interest and principal on long-term debt. These transactions are presented in Tables 9 and 11.

The capital projects category represents the revenues, expenditures, and financing sources and uses for the purpose of acquiring capital facilities. These transactions are presented in Tables 9 and 12.

This report contains the following 24 non-enterprise activities:

Air Pollution Control	Local and Regional Planning or
Ambulance Service	Development
Animal Control	Memorial
Cemetery	Parking
Drainage and Drainage Maintenance	Pest Control
Financing or Constructing Facilities	Police Protection and Personal Safety
Fire Protection	Recreation and Park
Flood Control and Water Conservation	Self Insurance
Governmental Services	Soil Conservation
Health	Streets and Roads – Construction and
Land Reclamation	Maintenance
Library	Television Translator Station Facilities
Lighting and Lighting Maintenance	Underground Electric and Communication
	Facilities

Revenues

Revenues are defined as additions to net current assets that do not increase liabilities and do not include fund transfers in or reimbursements of expenditures. In the 2009-10 fiscal year, special districts reported revenues totaling \$40.09 billion. Figures 3 and 5 summarize special district revenues for the last five fiscal years.

Expenditures

Expenditures are defined as the cost of operations, maintenance, interest on debt, and other charges that benefit the current fiscal period. Special district expenditures for the 2009-10 fiscal year totaled \$40.95 billion. Figures 4 and 5 summarize special district expenditures for the last five fiscal years.

Long-Term Debt

Figure 6 shows the unmatured ending balances of long-term debt by type of debt, as reported by special districts, for the last five fiscal years.

Prior to the 2000-01 fiscal year, information relating to financing or constructing facilities activity was not included in the introductory section of this publication.

Total.....	\$ 74,954,918	100.00 %

Lease Obligations

Tables 13 and 14 provide information about future lease obligations and outstanding special assessment act bonds. In these tables, the term "lease obligation" refers to property leased for a term of more than ten years where the local agency is the lessee and acquires ownership at the end of the lease.

Tables 13 and 14 include the outstanding special assessment act bonds that were initiated by or through a special district. It should be noted that these bonds are not obligations of the special districts. The bonds are direct liens against the land receiving the improvement. The bonds must be reported under Government Code section 53892.2.

Financing or Constructing Facilities Activity

Certain JPAs and nonprofit corporations engage in the financing or construction of public facilities. Local governments create these agencies to finance capital projects, such as the construction of libraries, city halls, and other buildings, or for the purchase of items such as vehicles and computer equipment.

The JPAs or nonprofit corporations construct and lease facilities back to the respective local governments that created them (i.e., city, county, school district, or special district). Lease revenues are used by these financing agencies to pay the principal and interest on long-term debt.

Since the 2000-01 fiscal year, the revenues and expenditures of the JPAs and nonprofit corporations have been included throughout this publication. The summary of financial transactions is reported in Table 9, and detailed information is reported in Tables 10 through 12. The summary of long-term debt information is reported in Table 13, and detailed information is reported in Table 14.

Taxation

In June 1978, California voters passed Proposition 13, known as the Jarvis-Gann Initiative, which added Article XIII A to the State Constitution. Article XIII A was designed to limit the amount of ad valorem property taxes levied. In the 2009-10 fiscal year, property tax revenues amounted to \$5.0 billion, a 3.65% decrease from the 2008-09 fiscal year. A five-year comparison is provided in Figure 8. The total includes the county allocation of ad valorem taxes on real property, voter-approved taxes, property assessments, and special assessments.

Educational Revenue Augmentation Fund

Assembly Bill 2115, Chapter 610, Statutes of 2004 (AB 2115), required a \$350 million reduction of property tax revenues from special districts in California in each of the 2004-05 and 2005-06 fiscal years. The reduction was calculated at 40% of enterprise property tax revenue plus 10% of non-enterprise property taxes. In all cases, the total property tax reduction to any given district could not exceed 10% of that district's total revenues. The reduced amounts were redirected to the Educational Revenue Augmentation Fund (ERAF) of each county, and used to augment property tax revenues to school districts within each respective county.

Figure 8**Tax Revenues for Last Five Fiscal Years**

(Amounts in thousands)

	2009-10	2008-09	2007-08	2006-07	2005-06
Non-Enterprise					
General Purpose	\$ 3,485,147	\$ 3,621,325	\$ 3,523,037	\$ 3,318,756	\$ 2,940,386
Debt Service.....	78,455	92,998	94,496	47,043	49,112
Enterprise	1,471,260	1,511,251	1,446,884	1,336,785	972,527
Total	\$ 5,034,862	\$ 5,225,574	\$ 5,064,417	\$ 4,702,584	\$ 3,962,025

Taxes allocated and voter-approved taxes levied for the 2010-11 fiscal year are summarized by county in Table 15, by major statutory type of district in Table 16, and by special district in Table 17.

Appropriations Limit

In November 1979, California voters passed Proposition 4, known as the Gann Limit, which added Article XIII B to the State Constitution. Article XIII B was designed to limit the spending of local governments, including special districts. As a result, each special district, unless otherwise exempted, is required to compute a 1978-79 "base year" appropriations limit. Once the base year is calculated, subsequent years are computed using the previous year's limit, factoring in cost-of-living and population changes, and making other adjustments.

Neither Article XIII B nor subsequent legislation assigned responsibility to the State or any local agency for ensuring compliance with the mandate. In 1987, the Legislature enacted Senate Bill 813, Chapter 1025, requiring each special district to include its appropriations limit and the total appropriations subject to that limit in its annual report to the California State Controller.

Special districts required to report an appropriations limit are listed in Table 1. The information has not been audited; it is presented as submitted by the special districts.

Enterprise Activities

Enterprise activities include airport, electric, harbor and port, hospital, transit, waste disposal, and water utility activities, which are accounted for in a manner similar to that of a private business.

Airport Enterprise Activity

Eighteen special districts reported airport enterprise activity. These special districts reported operating revenues of \$238.6 million and operating expenses of \$277.8 million, resulting in an operating loss of \$39.2 million. Non-operating revenues totaled \$150.5 million and non-operating expenses equaled \$46 million, resulting in a non-operating income of \$104.5 million and a net income of \$65.3 million. See Table 2 for detailed information.

Net Income (Loss)	\$ 52,450		\$ 65,331		24.56 %

¹ The decrease resulted from the Southern California Logistics Airport Authority reporting \$21.8 million in the 2009-10 fiscal year and \$75.6 million in the 2008-09 fiscal year.
² The decrease resulted from the Southern California Logistics Airport Authority reporting \$145.2 thousand in the 2009-10 fiscal year and \$18.1 million in the 2008-09 fiscal year.

Electric Enterprise Activity

Sixty-seven special districts reported electric enterprise activity. These special districts reported operating revenues of \$4.1 billion and operating expenses of \$3.6 billion, resulting in an operating income of \$520 million. Non-operating revenues totaled \$192.1 million and non-operating expenses equaled \$499.2 million, resulting in a non-operating loss of \$307.1 million and a net income of \$212.8 million. See Table 3 for detailed information.

¹ The increase resulted from the Power and Water Resources Pooling Authority reporting \$46.5 million for the first year in the 2009-10 fiscal year.

² The decrease resulted from the Turlock Irrigation District reporting zero in the 2009-10 fiscal year and \$158.1 million in the 2008-09 fiscal year.

³ The increase resulted from the Northern California Gas Authority No. 1 reporting \$28 million in the 2009-10 fiscal year and zero in the 2008-09 fiscal year.

Harbor and Port Enterprise Activity

Fourteen special districts reported harbor and port enterprise activity. These special districts reported operating revenues of \$188.8 million and operating expenses of \$206.4 million, resulting in an operating loss of \$17.7 million. Non-operating revenues totaled \$34.7 million and non-operating expenses equaled \$20.6 million, resulting in a non-operating income of \$14.1 million and a net loss of \$3.6 million. See Table 4 for detailed information.

¹ The increase resulted from the Port San Luis Harbor District reporting \$12.3 thousand in the 2009-10 fiscal year and zero in the 2008-09 fiscal year.

² The decrease resulted from the San Diego Unified Port District reporting \$12.3 million in the 2008-09 fiscal year primarily due to the Environmental Department.

³ The decrease resulted from the San Diego Unified Port District reporting \$2.4 million in the 2009-10 fiscal year and reporting \$6.6 million in the 2008-09 fiscal year.

Hospital Enterprise Activity

Sixty-three special districts reported hospital enterprise activity. These special districts reported operating revenues of \$4.0 billion and operating expenses of \$4.1 billion, resulting in an operating loss of \$95.3 million. Non-operating revenues totaled \$338.5 million and non-operating expenses equaled \$58.1 million, resulting in a non-operating income of \$280.4 million. Extraordinary items cost \$1.1 million, resulting in a net income of \$186.2 million. See Table 5 for detailed information.

¹ The decrease resulted from the Palomar Pomerado Hospital District reporting \$15 thousand in the 2009-10 fiscal year and \$409 thousand in the 2008-09 fiscal year.

² The decrease resulted from the West Contra Costa Healthcare District reporting zero in the 2009-10 fiscal year and \$12.6 million in the 2008-09 fiscal year.

Transit Enterprise Activity

Sixty-five special districts reported transit enterprise activity. These special districts reported revenues of \$4.6 billion and expenses of \$5.7 billion, resulting in an operating loss of \$1.0 billion. The loss on the disposal of fixed assets totaled \$1.4 million. The capital additions to equity equaled \$2.0 billion. The net operating loss and capital additions to equity totaled \$829.9 million. During the 2009-10 fiscal year, there were no new transit districts formed. See Table 6 for detailed information.

¹ The decrease in Other Operating Expense resulted primarily from several districts reclassifying the expense in the 2009-10 fiscal year.

² The decrease in Operating Loss resulted primarily from several districts reporting an increase in Charges for Services in the 2009-10 fiscal year.

³ The decrease in Interest Income resulted from the several County Sanitation Districts of Los Angeles County reporting a significant decrease in the 2009-10 fiscal year.

Water Utility Enterprise Activity

A total of 887 special districts reported water utility enterprise activity. These special districts reported operating revenues of \$6.5 billion and operating expenses of \$6.9 billion, resulting in an operating loss of \$441.5 million. Non-operating revenues totaled \$1.4 billion and non-operating expenses equaled \$708.8 million, resulting in a non-operating income of \$670.6 million and a net income of \$229.1 million. See Table 8 for detailed information.

¹ The decrease in Net Income resulted from several districts reporting an increase in operating expense of Source of Supply in the 2009-10 fiscal year.

Non-Enterprise Activities

Non-enterprise activities are organized on a governmental fund type basis, in accordance with the Uniform Accounting System of Special Districts, as prescribed in section 1113.1 of the California Code of Regulations.

General Purpose Transactions

A total of 2,925 special districts reported non-enterprise general-purpose transactions. These special districts reported revenues of \$12.6 billion and expenditures of \$12.3 billion, resulting in revenues over expenditures of \$351.1 million. See Table 9 for activity summary and Table 10 for detailed information.

Figure 16 provides the total revenue and expenditure transactions under the general-purpose category (General Fund and special revenue funds), reflecting the inflow and outflow of current financial resources. Non-routine inflows such as proceeds of long-term debt are considered financing sources, while non-routine outflows are considered financing uses. See Table 9 for a summary by activity and Table 10 for individual special district information relating to financing sources and uses.

Debt Service Fund Transactions

A total of 325 special districts reported non-enterprise debt service transactions. These special districts reported revenues of \$2.0 billion and expenditures of \$2.9 billion, resulting in revenues under expenditures of \$856.4 million. See Table 9 for activity summary and Table 11 for detailed information.

Figure 17 provides the total revenue and expenditure transactions under the debt service category, reflecting the inflow and outflow of current financial resources. Non-routine inflows such as proceeds of refunding debt are considered financing sources, while non-routine outflows are considered financing uses and are not presented in Figure 17. See Table 9 for a summary by activity and Table 11 for individual special district information relating to financing sources and uses.

¹ The increase resulted from the Santa Clara County Open-Space Authority reporting \$33.2 million in the 2009-10 fiscal year and \$17.2 thousand in the 2008-09 fiscal year.

¹ The decrease resulted from the San Bernardino County Financing Authority reporting \$938.4 thousand in the 2009-10 fiscal year and \$13.5 million in the 2008-09 fiscal year.

Capital Projects Fund Transactions

A total of 245 special districts reported non-enterprise capital projects transactions. These special districts reported revenues of \$173.8 million and expenditures of \$561.5 million, resulting in revenues under expenditures of \$387.7 million. See Table 9 for activity summary and Table 12 for detailed information.

Figure 18 provides the total revenues and expenditures transactions under the capital projects category, reflecting the inflow and outflow of current financial resources. Non-routine inflows such as proceeds of long-term debt are considered financing sources, while non-routine outflows are considered financing uses and are not presented in Figure 18. See Table 9 for a summary by activity and Table 12 for individual special district information relating to financing sources and uses.

¹ The decrease resulted from the Sacramento Area Flood Control Agency reporting zero in the 2009-10 fiscal year and \$4.1 million in the 2008-09 fiscal year.

² The increase resulted from the Sacramento Area Flood Control Agency reporting \$84.2 million in the 2009-10 fiscal year and \$49.2 million in the 2008-09 fiscal year.

³ The increase resulted from the San Diego Regional Building Authority reporting zero in the 2009-10 fiscal year and \$67.1 million in the 2008-09 fiscal year due to a construction project.

⁴ The increase resulted from the Monterey County Water Resource Agency reporting zero in the 2009-10 fiscal year and \$26.6 million in the 2008-09 fiscal year.
