CLOSED LOOP STEPPING SYSTEMS

PB

Vol.2

E

ENGLISH

SANYO DENKI

Hybrid system offers the best of both worlds: the ease-of-use of a stepping motor, and the reliability of a servo motor

SANMOTION PB CLOSED LOOP STEPPING SYSTEMS

PB-R Generic Input type (RS-485+PIO)

PB-P Pulse Stream Control type

Greater speed, smaller profile

High-Speed Positioning

PB-R PB-P

High torque in the low-speed rotation range allows shorter positioning time with short stroke - high hit rate resolution.

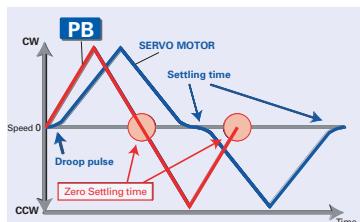

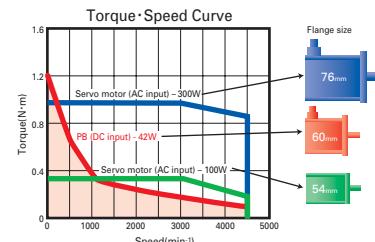

Image of switchover from forward to reverse rotation

Space Saving Profile

PB-R PB-P

Uses high torque continuously in the low-speed range, which allows for smaller systems compared to regular servo motors.

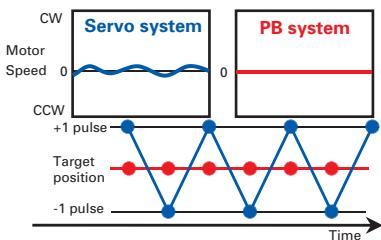

Reliable stopping power

Stable Stopping

PB-R PB-P

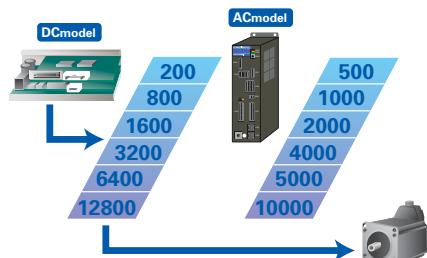

Capable of a complete stop using the holding torque feature, the same as a typical stepping motor.

High Resolution

PB-R PB-P

The unit for positioning command can be subdivided over a wide range of pulse ratios.

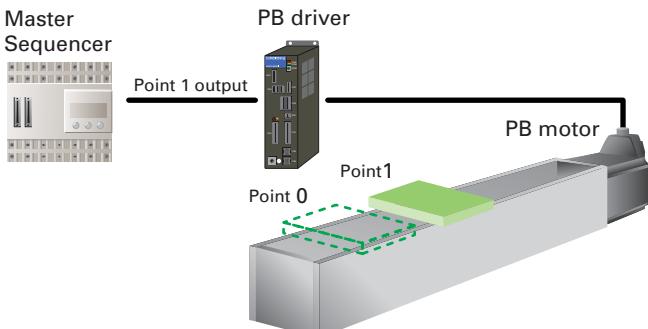

Simple control protocol

General Purpose I/O Input

PB-R

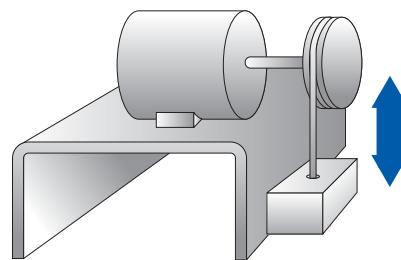

The system can easily be controlled by specifying preset point numbers or program numbers using the general purpose I/O.

Supports a Wide Variety of Applications

PB-R

Thrust, point specification, programming, and zero-return function are all embedded in the driver. The driver also provides added versatility with features like holding brake control and limit sensor input.

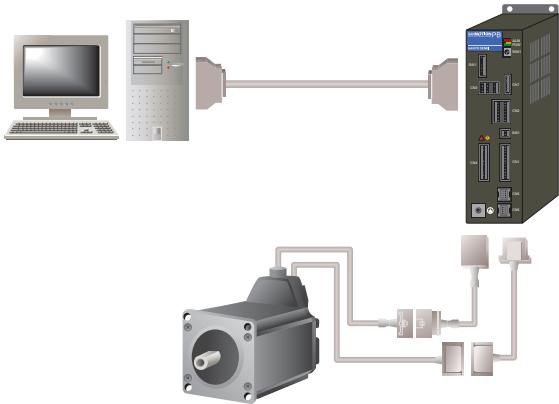

Reduces the cost and time needed for system construction

Optional cables available

PB-R PB-P

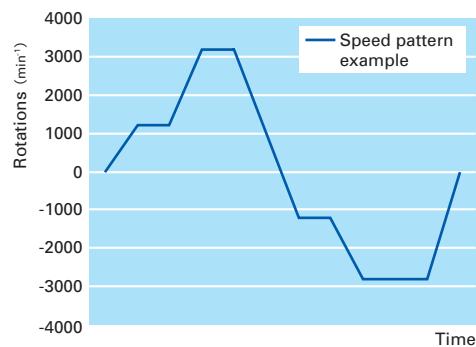

Cables for master/driver and driver/motor connections are available, for hassle-free setup.

Built-in pulse generation

PB-R

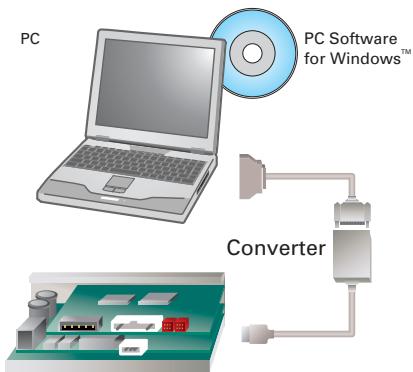

The PB-R system's built-in pulse generation receives numeric speed and position data from the upper device. This data is converted to internal driver commands to automatically generate the optimal speed pattern, making external pulse generators unnecessary and reducing overall system cost.

PC Interface Capability

PB-R PB-P

The bundled setup software allows for parameter configuration, data editing, and position and speed monitoring.

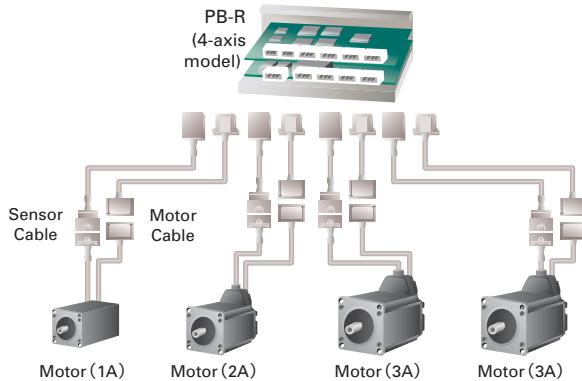

Support for up to 4-axes

PB-R

Our multiple axis system allows for reduced size and weight.

- 1A, 2A, and 3A can be selected by software switches.
- Available only on DC power input models.

Approved for use worldwide

US Compliant

SANMOTION PB

CLOSED LOOP STEPPING SYSTEMS

Choose the control method best for you:

- The PB series offers 3 different control methods -

Point
Command
Control using
PLC I/O

Network
Control using
serial comm.
(RS-485 standard)

Control

Standard Model

The standard model includes a PB Series driver and a PB Series motor

[Available in the following flange sizes: [sizes shown in "mm(NEMA)" sizes]

AC - 42(17) | - 60 | - 86(34) | ► P19

DC - 28(11) | - 42(17) | - 50 | - 56(23) | - 60 | ► P25

Low Backlash Gear Model

This model includes a low-backlash gear that engages the final stage with a tapered gear.

[Motor flange sizes shown in "mm(NEMA)" sizes]

AC - 42(17) | - 60 | ► P21

DC - 42(17) | - 56(23) | - 60 | ► P27

REDUCTION GEAR RATIO

Spur Gear Model

This model utilizes a spur gear design for gear reduction.

[Motor flange sizes shown in "mm(NEMA)" sizes]

DC - 28(11) | ► P29

REDUCTION GEAR RATIO

Harmonic Gear Model

The harmonic gear provides high torque and eliminates backlash.

[Motor flange sizes shown in "mm(NEMA)" sizes]

AC - 42(17) | - 60 | ► P23

DC - 28(11) | - 42(17) | - 56(23) | - 60 | ► P31

REDUCTION GEAR RATIO

Electromagnetic Brake Model

This model uses a non-excitation electromagnetic brake, capable of maintaining position and supporting a load in vertical operation, even when power is off.

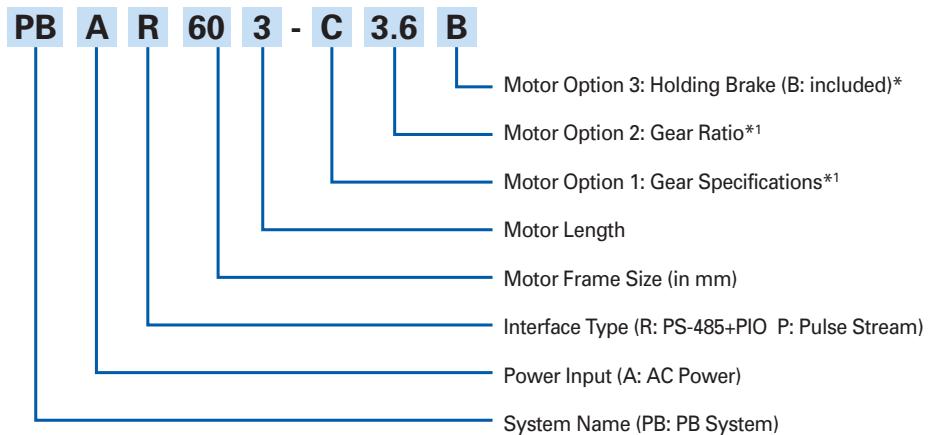

[Motor flange sizes shown in "mm(NEMA)" sizes]

AC - 42(17) | - 60 | ► P23

DC - 28(11) | - 42(17) | - 50 | - 56(23) | - 60 | ► P33

Model Nomenclature

Motor Standard Specifications (common to all models)

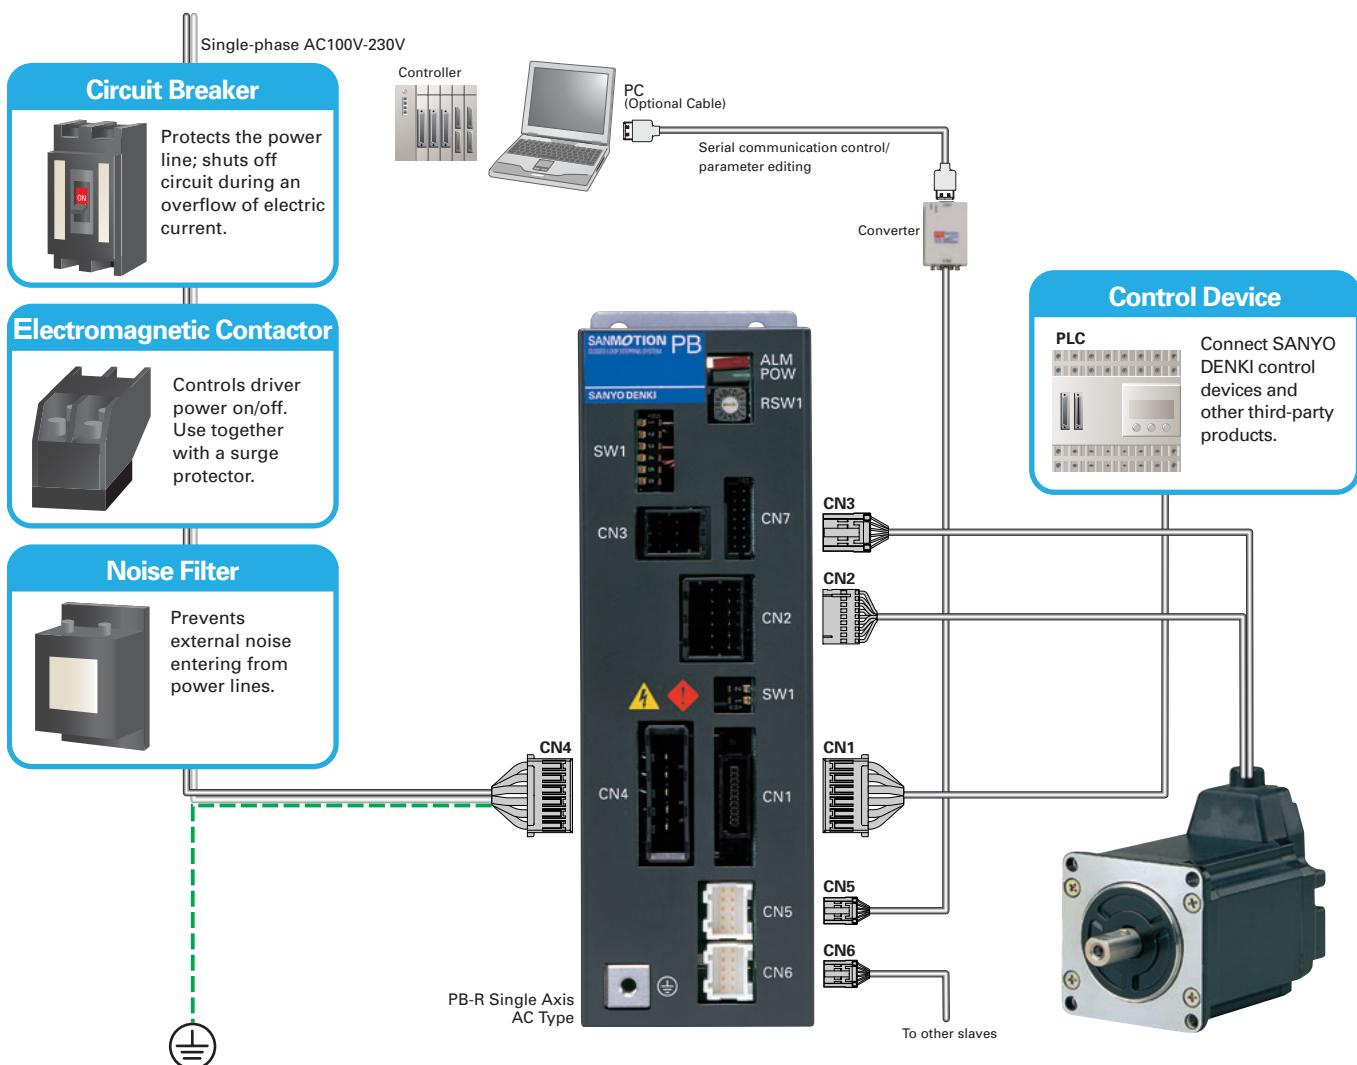

Input type	AC Power	DC Power
Motor model	PBM423F,PBM60○F,PBM86○F	PBM28○D,PBM423D,PBM503D PBM565D,PBM60○D
Insulation class	Class B(130°C)	Class B(130°C)
Withstand Voltage	AC1500V 50／60Hz for 1minute	AC500V 50／60Hz for 1minute
Insulation resistance	DC500V 100MΩ MIN.	DC500V 100MΩ MIN.
Degrees of protection	IP40	
Vibration resistance	15G (Frequency range 10 to 70Hz amplitude 1.52m 70 to 2000 acceleration 15G) Sweep time 15minute / Sweep recurrence rate The x, y and z are each tested 12 times.	
Impact resistance	30G(half sine wave with 11 ms duration) The x, y and z are each tested three times for each direction for a total of 18 tests.	
Ambient temperature	−10°C to +40°C (With Harmonic Gear : 0°C to +40°C)	
Ambient humidity	20 to 90%RH (No Condensation)	

※The user should not test the insulation resistance or insulation withstand voltage, because a capacitor has been inserted between the encoder output ground line and the frame to prevent noise.

※The ○ symbol in the motor model number indicates the length of the motor.

Options

PC Interface Description

Driver Type	Power model	Communications Specifications	RS-232C/RS-485 Converter Unit	Software
PB-RType (Single-axis)	AC model	RS-485/Full duplex	PBFM-U3	SPBA1W-01
	DC model	RS-485/Half duplex	PBFM-U2	
PB-R(Multi-axis)	DC model	RS-485/Half duplex	PBFM-U2	
PB-PType	AC model	RS-232C/Half duplex	Not necessary	
	DC model	RS-485/Full duplex	PBFM-U1	

PC Interface Software Display Screens

1:Program Input Screen

2:Point Input Screen

3:Parameter Input Screen

PB-R PC Interface Software Functions

Functions

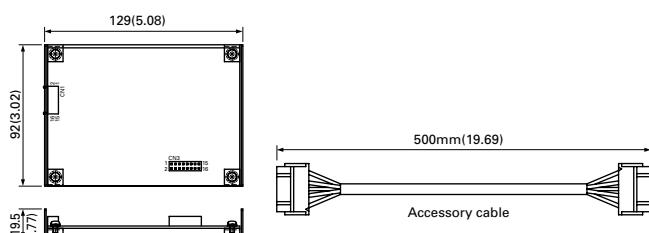

- Direct command capability
- Point data editing/execution
- Program data editing/execution
- Current position/Alarm/Amplifier status monitoring
- Lead Pitch Conversion
- Off-line Editing
- Teaching Function, etc

Program Functions

- Various branching conditions (Position, Input Port, Direct, Motor Stop)
- Timer Wait
- Subroutine Structure
- Loop Counter, etc.

Speed Monitor Unit (All PB-R Types)

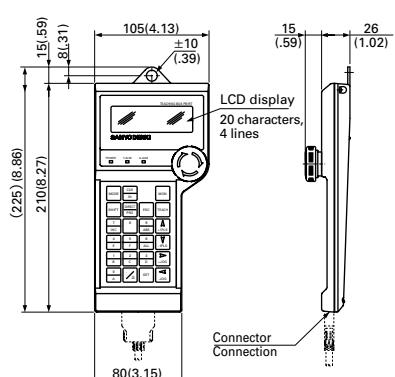

Model number: PBFV-U2

Teaching Box (supports the PB-R Single-axis DC model)

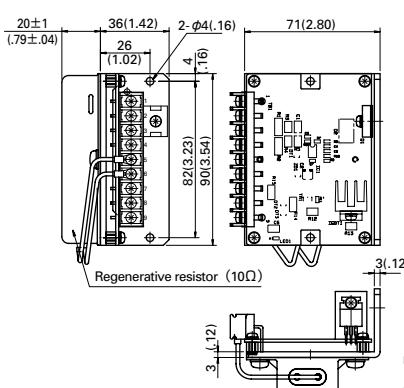

Main unit model number: PB1RT-01

Cable model number: PBC1X0020A (2m)

External Regeneration Unit (for the PB-R Multi-axis model)

Model number: PBFE-01

Note 1 : TB1-Connector block wiring screw M3
Tightening torque 0.6 Nm

Note 2 : The external regenerative resistor is mounted on the rear surface.

■ Precautions For Adoption

Cautions

Failure to follow the precautions on the right may cause moderate injury and property damage, or in some circumstances, could lead to a serious accident.
Always follow all listed precautions.

Cautions

- Read the accompanying Instruction Manual carefully prior to using the product.
- If applying to medical devices and other equipment affecting people's lives, please contact us beforehand and take appropriate safety measures.
- If applying to equipment that can have significant effects on society and the general public, please contact us beforehand.
- Do not use this product in an environment where vibration is present, such as in a moving vehicle or shipping vessel.
- Do not perform any retrofitting, re-engineering, or modification to this equipment.
- The drivers presented in this catalog are meant to be used for general industrial applications. If using for special applications related to aviation and space, nuclear power, electric power, submarine repeaters, etc., please contact us beforehand.

* For any question or inquiry regarding the above, contact our Sales Department.
