Features and Capabilities

C. Quality of Life

1. Military Housing

(a) Family Housing:

(1) Do you have mandatory assignment to on-base housing? **No.**

(2) For military family housing in your locale provide the following information:

Type of Quarters	Number of Bedrooms	Total number of units	Number Adequate	Number Substandard	Number Inadequate
Officer	4+	13	13	0	0
Officer	3	69	69	0	0
Officer	1 or 2	50	50	0	0
Enlisted	4+	102	102	0	0
Enlisted	3	174	174	0	0
Enlisted	1 or 2	112	112	0	0
Mobile Homes	0	0	0	0	0
Mobile Home lots	0	0	0	0	0

(3) In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means". For all the categories above where inadequate facilities are identified provide the following information:

No inadequate facilities.

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

Features and Capabilities

C. Quality of Life (cont.)

(4) Complete the following table for the military housing waiting list.

Pay Grade	Number of Bedrooms	Number on List ²	Average Wait
O-6/7/8/9	1	NA	NA
	2	NA	NA
	3	0	0
	4+	0	0
O-4/5	1	NA	NA
	2	NA	NA
	3	0	6-9 months
	4+	0	12-18 months
O-1/2/3/CWO	1	NA	NA
	2	5	1-4 months
	3	0	1-3 months
	4+	1	9-12 months
E7-E9 SEE NOTE BELOW. GR Manley CWT N443 30 APR 94	1	NA	NA
	2	NA	NA
	3	0	0-2 months
	4+	0	0-1 month
E1-E6 SEE NOTE BELOW. CR Manley CWT N443 30 APR 94	1	NA	NA
	2	6*	0-2 months
	3	1	0-2 months
	4+	0	0-1 month

* 4 are deferred due to lease agreements and 2 have not reported to area.

NOTE: E1-E9s are all assigned to same type housing units from the same waiting list.

²As of 31 March 1994.

Features and Capabilities

C. Quality of Life (cont.)

(5) What do you consider to be the top five factors driving the demand for base housing? Does it vary by grade category? If so provide details.

Top Five Factors Driving the Demand for Base Housing	
1	Risky market due to fear of base closure
2	Cost
3	Location/Convenience
4	School District
5	Appearance

(6) What percent of your family housing units have all the amenities required by "The Facility Planning & Design Guide" (Military Handbook 1190 & Military Handbook 1035-Family Housing)? 100 %

(7) Provide the utilization rate for family housing for FY 1993.

Type of Quarters	Utilization Rate
Adequate	96.03
Substandard	NA
Inadequate	NA

(8) As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 98% (or vacancy over 2%), is there a reason?

YES
V

[Handwritten signature]
CMATRA N61

Due to contracting of aircraft maintenance services for AIMD and VT squadrons, enlisted personnel loading has decreased. As a result NAS has redesignated 44 units for student pilot officers, permitted families to retain housing if the service member was going to sea duty, and permit E1-E3 to compete equally for housing with all enlisted.

Features and Capabilities

C. Quality of Life (cont.)

(b) BEQ:

(1) Provide the utilization rate for BEQs for FY 1993.

Type of Quarters	Utilization Rate
Adequate	51%
Substandard	16%
Inadequate	0

(2) As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

No change.

(3) Calculate the Average on Board (AOB) for geographic bachelors as follows:

AOB = 63.

$$\text{AOB} = \frac{\text{\# Geographic Bachelors} \times \text{average number of days in barracks}}{365}$$

(4) Indicate in the following chart the percentage of geographic bachelors (GB) by category of reasons for family separation. Provide comments as necessary.

Reason for Separation from Family	Number of GB	Percent of GB	Comments
Family Commitments (children in school, financial, etc.)	21	33%	
Spouse Employment (non-military)	8	13%	
Other	34	54%	
TOTAL	63	100	

(5) How many geographic bachelors do not live on base?
Information is not available.

Features and Capabilities**C. Quality of Life (cont.)**(c) **BOQ:**

(1) Provide the utilization rate for BOQs for FY 1993.

Type of Quarters	Utilization Rate
Adequate	58%
Substandard	0
Inadequate	0

(2) As of 31 March 1994, have you experienced much of a change since FY 1993? If so, why? If occupancy is under 95% (or vacancy over 5%), is there a reason?

No change.

(3) Calculate the Average on Board (AOB) for geographic bachelors as follows:

AOB = 9.

$$\text{AOB} = \frac{(\# \text{ Geographic Bachelors} \times \text{average number of days in barracks})}{365}$$

(4) Indicate in the following chart the percentage of geographic bachelors (GB) by category of reasons for family separation. Provide comments as necessary.

Reason for Separation from Family	Number of GB	Percent of GB	Comments
Family Commitments (children in school, financial, etc.)	2	22%	
Spouse Employment (non-military)	2	22%	
Other	5	56%	
TOTAL	9	100	

(5) How many geographic bachelors do not live on base?

Information is not available.

Features and Capabilities**C. Quality of Life (cont.)**

2. For on-base MWR facilities³ available, complete the following table for each separate location. For off-base government owned or leased recreation facilities indicate distance from base. If there are any facilities not listed, include them at the bottom of the table.

11. Spousal Employment Opportunities

Provide the following data on spousal employment opportunities.

Skill Level	Number of Military Spouses Serviced by Family Service Center Spouse Employment Assistance			Local Community Unemployment Rate
	1991	1992	1993	
Professional	3	12	22	See note *
Manufacturing	0	9	11	*
Clerical	42	110	231	*
Service	28	68	164	*
Other	2	5	10	*

* Note: The following unemployment rates were obtained from the Labor Market Division, Department of Labor, Jackson, MS and were not broken down by skill levels.

- 1991: 7.8%
- 1992: 7.0%
- 1993: 5.5%
- FEB 94: 5.5%

12. Do your active duty personnel have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

No.

MEDICAL CARE: Active duty personnel do not have difficulty with access to medical care either in the military or civilian health care system. Primary care is provided at NAS Meridian's Medical Branch Clinics. Access to care beyond NASMER's capabilities is available at the Naval Hospital, Pensacola; Keesler Air Force Base Medical Center, Biloxi; or at Columbus Air Force Base Hospital including speciality care. If an emergency arises, personnel have access to three local civilian hospitals for immediate medical care. NAS Meridian can then access the MEDEVAC system to transfer the member to a military medical treatment facility if applicable.

DENTAL CARE: Meridian Branch Dental Clinic provides general dental care and specialty services in Oral Surgery, Prosthodontics, Endodontics, Restorative Dentistry and Periodontics for active duty military personnel. Complicated Oral Surgery, Endodontics, and Periodontics patients are referred to Dental Services, Naval Hospital or Naval Dental Center, Pensacola, FL.

13. Do your military dependents have any difficulty with access to medical or dental care, in either the military or civilian health care system? Develop the why of your response.

No.

MEDICAL CARE: Military dependents do not have difficulty with access to medical care. Primary care is provided at NAS Meridian's Medical Branch Clinic for beneficiaries within 24 to 36 hours after calling for an appointment. Specialty care is available from local physicians and hospitals under CHAMPUS. Appointments by consultation at military medical treatment facilities is available depending on specialists availability; however, transportation is the responsibility of the beneficiary.

DENTAL CARE: Meridian's Branch Dental Clinic provides emergency dental treatment for dependents of active duty military personnel. Remaining treatment is covered under the Delta Dental Plan. There are enough private dentists honoring the Delta Dental Plan that access to treatment for dependents is easy. Military retirees receive dental cleaning, emergency care and restorative treatment on standby basis.

Features and Capabilities

C. Quality of Life (cont.)

14. Complete the table below to indicate the crime rate for your air station for the last three fiscal years. The source for case category definitions to be used in responding to this question are found in NCIS - Manual dated 23 February 1989, at Appendix A, entitled "Case Category Definitions." Note: the crimes reported in this table should include 1) all reported criminal activity which occurred on base regardless of whether the subject or the victim of that activity was assigned to or worked at the base; and 2) all reported criminal activity off base.

NOTE: Data from off-base sources is not included. Data will be forwarded later.

NOTE: Security Department is only required to retain records for two years, so data is not available prior to MAR 92. However, NIS records were available for FY91 and FY92.

Features and Capabilities

D. Ability for Expansion

1. Does the operational infrastructure (e.g., parking apron, fuel and munitions storage, warehouse space, hangar space) provide capabilities for future expansion or change in mission?

Yes.

2. What is the availability of off-station acreage for possible future air station development?

Due to the rural location with no encroachment, unlimited acreage is available surrounding the base.

3. Provide the following information for air station infrastructure related facilities and functions. If these or other base infrastructure attributes may be a determining factor for base loading and expansion, provide additional comments and capacity measures as appropriate.

Type of Facility or Capability	On Base Capacity	Off Base Long Term Contract	Normal Steady State Load	Peak Demand
Electricity (KW)	12,500 *	12,500	5,950	7,908
Water (GPD)	1,500,000	None	600,000	1,200,000
Sewage (GPD)	1,400,000	None	425,000	1,200,000
Natural Gas (CFH)	41,667 **	33,000 *** 100,000	20,000	33,000
Short Term Parking	0			
Long Term Parking	0			

* UTILITY COMPANY TRANSFORMER SIZE CAPACITY.

** OFF BASE CAPACITY (33,000 CFH) PLUS ON STATION PROPANE PLANT GENERATING CAPACITY (8,667 CFH).

*** 33,000 CFH ON SPOT GAS RATES AND 100,000 CFH ON FIRM CONTRACT RATES.

Features and Capabilities

D. Ability for Expansion

1. Does the operational infrastructure (e.g., parking apron, fuel and munitions storage, warehouse space, hangar space) provide capabilities for future expansion or change in mission?

Yes.

2. What is the availability of off-station acreage for possible future air station development?

Due to the rural location with no encroachment, unlimited acreage is available surrounding the base.

3. Provide the following information for air station infrastructure related facilities and functions. If these or other base infrastructure attributes may be a determining factor for base loading and expansion, provide additional comments and capacity measures as appropriate.

Type of Facility or Capability	On Base Capacity	Off Base Long Term Contract	Normal Steady State Load	Peak Demand

Features and Capabilities

D. Ability for Expansion (cont.)

4. Identify in the table below the real estate resources which have the potential to facilitate future development and for which you are the plant account holder or into which, though a tenant, your activity could reasonable expect to expand. Complete a separate table for each individual site, i.e., main base, outlying airfields, special off-site areas, off base housing, etc. Unit of measure is acres. Developed are is defined as land currently with buildings, roads, and utilities that prevent it from being further developed without demolition of existing infrastructure. Include in "Restricted" areas that are restricted for future development due to environmental constraints (e.g. wet lands, landfills, archaeological sites), operational restrictions (e.g. ESQD arcs, HERO, HERP, HERF, AICUZ ranges) or cultural resources. Identify the reason for the restriction when providing the acreage in the table below. Specify any other entry in "Other" (e.g. submerged lands).

5. Identify the features of this air station that make it a strong candidate for basing/training other types of aircraft/aircrews and other operational units in the future.

RUNWAY DESIGN: Designed specially for jet training, simultaneous IFR departure and recovery.

NAS LOCATION: Proximity to three readily accessible overland airspace Military Operating Areas (MOAs).

TARGET RANGE/R4404 A,B,C: Controlling authority for SEARAY Target Range with 29 NM and newly installed electronic scoring equipment to meet current fleet and US Air Force needs.

OLF JOE WILLIAMS FIELD: Controlling authority for modern outlying field with embedded carrier deck lighting.

LOW AIRSPACE DENSITY: Rural location allows for excellent training conditions eliminating mid-air collision potential and creating hazard free airspace for training.

T-45 CAPABLE: With the T-45 renovation MILCON project completion in FY94, NAS Meridian is one of only two Air Stations with T-45 training capabilities.

EXCELLENT RUNWAY CONDITION: Airfield surveys of the concrete was good to excellent; however, all runways are being grooved to improve runway friction coefficient.

LOW CORROSIVE ATMOSPHERE: Inland location allows for less aircraft corrosion control maintenance and less downtime.

NO ENCROACHMENT: Air Station located in rural setting with no airspace or property encroachment problems.

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

TRAINING AIR STATION DESIGN: Specially designed for jet training with Administrative and Housing facilities located 3 to 5 miles outside accepted AICUZ.

GEOGRAPHIC SIZE AND LOCATION: Greater than 8,000 acres located and surrounded by rural woodlands; ample room for future expansion and development.

USN/USAF JOINT-USE TRAINING: Close proximity of Navy and Air Force (Columbus AFB) jet pilot training bases allows for maximum utilization of facilities. Currently the Navy and Air Force have agreements for joint use of the Navy's SEARAY Target Range and the Air Force's OLF Gunshy (ALPHA).

NAVAL TECHNICAL TRAINING CENTER FACILITIES: NTTTC is the only location that teaches Navy and Marine Corps entry level in-rate training to junior personnel in supply, administrative, and religious program rates with the exception of Mess Specialists.

COUNTERDRUG TRAINING FACILITIES: Newly established counterdrug training facilities, including a mock village for counterdrug tactics application, allows for one of a kind law enforcement training for civilian law officers and security forces.

Features and Capabilities

E. Unique features

1. Identify any unique (one of a kind) features (function, equipment, ranges, etc.) possessed by this training air station. Please list each feature separately and provide a narrative explanation of the importance of the unique feature.

AIR STATION DESIGN: NAS Meridian was specially designed for carrier jet pilot training with the Centroid/airfield area located 3 miles from the Administrative Area and 5 miles from the Housing Area so that these areas do not impact or constrain airfield operations and will not constrain any increase or change in mission. The staggered parallel runway layout was designed to provide optimum training efficiency and safety; and also allows for simultaneous IFR departures and recoveries maximizing airfield capacity. The multi-purpose SEARAY Target Range provides bombing and strafing training for jet pilot syllabus and is located 29 NM north of the main station in a rural area with no encroachment problems. The station's outlying field (OLF) located 21 NM northwest has an 8,000 foot runway with a lighted carrier deck layout.

T-45 CAPABLE: With the T-45 renovation MILCON project completion in FY94, NAS Meridian is one of only two Air Stations with T-45 training capabilities.

AIRSPACE RANKING: NAS Meridian is located 25 miles from the nearest terminal control zone, Meridian Municipal Airport. There is only one airway (V18) that passes over NAS Meridian above 25,000 feet. The Meridian control zone, approaches, and airways have no impact on NAS Meridian. Ninety to ninety-five percent of Navy aircraft are given unrestricted climbs through Meridian RATCF. NAS Meridian's airspace provides maximum flexibility and capacity. NAS Meridian has AICUZ ordinances with both Lauderdale and Kemper Counties.

FOREIGN PILOT TRAINING: NAS Meridian is the only base providing Strike jet training for foreign pilots from France, Italy, Kuwait, Singapore, Spain and Argentina.

NO ENCROACHMENT: Due to the base's rural setting and location 15 miles from the City of Meridian, there is no threat of encroachment either by land or air.

NO ENVIRONMENTAL PROBLEMS: There are no existing or potential environmental problems that have or will affect the accomplishment of the station's mission.

BRAC-95 DC 3/NAS MERIDIAN MS/UTC: 63043

CONDITION OF FACILITIES: Since NAS Meridian is one of the newest Naval bases commissioned in 1961, the facilities are in good to excellent condition with most requiring only normal maintenance to preserve their condition. Less than five percent of the Annual Inspection Summary (AIS) is critical backlog deficiencies. MILCON projects have recently been approved to renovate and upgrade the bachelor quarters.

HURREVAC SITE: Due to the inland location, NAS Meridian is hurricane evacuation site for weather threatened aircraft and personnel based at coastal locations.

NAVAL TECHNICAL TRAINING CENTER MERIDIAN (NTTC): NTTC is the only location that teaches entry level in-rate training to junior personnel in supply, administrative, and religious program rates with the exception of Mess Specialists. The Yeoman "A" School is the only Flag Writer's School in the Navy training personnel in shorthand, protocol, and correspondence. The AZ "A" School also supports training for foreign countries such as South Korea and Saudi Arabia.

NTTC schools and facilities are in place, fully functional and well equipped to provide efficient and effective training. NTTC recently completed recertification with the Southern Association of Colleges and Universities and fully renovated eight barracks complexes. All required equipment including state of the art computers are installed and operational. Laboratory and mock-up displays to enhance student training and understanding are already in place and extensively utilized. Facilities and equipment are in superb condition.

NTTC was commissioned in 1973, so the facilities are in excellent condition. Training facilities, Building 330 and 362 are well designed, well maintained, and well equipped with all supplies, equipment and furnishings required to provide efficient and effective training. They are physically located very close to berthing, messing, exchange, and recreational facilities. They are large enough to easily accommodate anticipated student loading. They provide comfortable, roomy, clean surroundings that are conducive to the learning environment. They have excellent heating and air conditioning systems which can provide a comfortable environment for up to 1200 students. They contain modern classrooms, equipped with modern equipment and teaching aids.

REGIONAL COUNTERDRUG TRAINING ACADEMY: NAS Meridian houses the only Regional Counterdrug Training Academy which provides civilian law enforcement personnel training in counterdrug procedures. This includes a large mock village for on hands application in the field.

NAS MERIDIAN DOES NOT HAVE PIERS/WHARFS**ANNEX A: Berthing Capacity**

1. For each Pier/Wharf at your facility list the following structural characteristics. Indicate the additional controls required if the pier is inside a Controlled Industrial Area or High Security Area. Provide the average number of days per year over the last eight years that the pier was out of service (OOS) because of maintenance, including dredging of the associated slip:

Table 1

Pier/ Wharf & Age ¹	CCN ²	Moor Length (ft)	Design Dredge Depth ³ (ft) (MLLW)	Slip Width ⁴ (ft)	Pier Width (ft) ⁵	CIA/Security Area? (Y/N) ⁶	ESQD Limit ⁷	# Days OOS for maint.
NA								

¹Original age and footnote a list of MILCON improvements in the past 10 years.

²Use NAVFAC P-80 for category code number.

³Comment if unable to maintain design dredge depth

⁴Water distance between adjacent finger piers.

⁵Indicate if RO/RO and/or Aircraft access. Indicate if pier structures limit open pier space.

⁶Describe the additional controls for the pier.

⁷Net explosive weight. List all ESQD waivers that are in effect with expiration date.

NAS MERIDIAN DOES NOT HAVE PIERS/WHARFS

2. For each Pier/Wharf at your facility list the following ship support characteristics:

Table 2

Pier/ Wharf	OPNAV 3000.8 (Y/N)	Shore Pwr (KVA) & 4160V (KVA)	Comp. Air Press. & Capacity ¹	Potable Water (GPD)	CHT (GPD)	Oily Waste ¹ (gpd)	Steam (lbm/hr & PSI) ²	Fendering limits ³
NA								

¹List only permanently installed facilities.

²Indicate if the steam is certified steam.

³Describe any permanent fendering arrangement limits on ship berthing.

NAS MERIDIAN DOES NOT HAVE PIERS/WHARFS

3. For each pier/wharf listed above state today's normal loading, the maximum capacity for berthing, maximum capacity for weapons handling evolutions, and maximum capacity to conduct intermediate maintenance.

Table 3

Pier/ Wharf	Typical Steady State Loading ¹	Ship Berthing Capacity	Ordnance Handling Pier Capacity ²	IMA Maintenance Pier Capacity ³
NA				

¹Typical pier loading by ship class with current facility ship loading.

²List the maximum number of ships that can be moored to conduct ordnance handling evolutions at each pier/berth without berth shifts. Consider safety, ESQD and access limitations.

³List the maximum number of ships that can be serviced in maintenance availabilities at each pier without berth shifts because of crane, laydown, or access limitations.

NAS MERIDIAN DOES NOT HAVE PIERS/WHARFS

4. For each pier/wharf listed above, based on Presidential Budget 1995 budgeted infrastructure improvements in the Presidential Budget 1995 through FY 1997 and the BRAC-91 and BRAC-93 realignments, state the expected normal loading, the maximum capacity for berthing, maximum capacity for weapons handling evolutions, and maximum capacity to conduct intermediate maintenance.

Table 4

Pier/ Wharf	Typical Steady State Loading ¹	Ship Berthing Capacity	Ordnance Handling Pier Capacity ²	IMA Maintenance Pier Capacity ³
NA				

¹Typical pier loading by ship class with current facility ship loading.

²List the maximum number of ships that can be moored to conduct ordnance handling evolutions at each pier/berth without berth shifts. Consider safety, ESQD and access limitations.

³List the maximum number of ships that can be serviced in maintenance availabilities at each pier without berth shifts because of crane, laydown, or access limitations.

NAS MERIDIAN DOES NOT HAVE PIERS/WHARFS

5.a. How much pier space is required to **berth and support ancillary craft** (tugs, barges, floating cranes, etc.) currently at your facility? Indicate if certain piers are uniquely suited to support these craft.

NA

5.b. What is the average pier loading in ships per day due to **visiting ships** at your base. Indicate if it varies significantly by season.

NA

5.c. Given **no funding or manning limits**, what modifications or improvements would you make to the waterfront infrastructure to increase the cold iron ship berthing capacity of your installation? Provide a description, cost estimates, and additional capacity gained.

NA

5.d. Describe any **unique limits or enhancements** on the berthing of ships at specific piers at your base.

NA

ANNEX B: Weapons and Munitions

Please answer the following questions if your activity performs any stowage or maintenance on any of the following ordnance commodities types:

ORDNANCE COMMODITY TYPES		
Mines	Expendables	LOE: Rockets
Torpedoes	INERT	LOE: Bombs
Air Launched	CADS/PADS	LOE: Gun Ammo (20mm-16")
Threat	Strategic Nuclear	LOE: Small Arms (up to 50 cal.)
Surface Launched	Tactical Nuclear	LOE: Pyro/Demo
Threat		Grenades/Mortars/Projectiles

1. Ordnance Stowage and Support

1.1 Provide present and predicted inventories (coordinate with inventory control manager) and maximum rated capability of all stowage facilities at each weapons storage location controlled by this activity. In predicting the out year facility utilization, distribute overall ordnance complement to the most likely configuration. The maximum rated capability is also an out year projection taking into account any known or programmed upgrades that may increase current stowage capacity. When listing stowage facilities, group by location (e.g. main base, outlying field, special area).

Table 1.1: Total Facility Ordnance Stowage Summary

Facility Number	PRESENT INVENTORY		PREDICTED INVENTORY FY 2001		MAXIMUM RATED CAPABILITY	
	TONS	SQ FT	TONS	SQ FT	TONS	SQ FT
2-00017	.50	144	.70	144	.72	144
2-00018	.50	144	.70	144	.72	144
2-00019	1.67	68	2.0	68	2.45	68
2-00020	1.67	68	2.0	68	2.45	68
2-00153	0.0	400	0.0	400	SEE NOTE	400
2-00154	1.67	598	2.0	598	2.45	598
2-00155	0.0	750	0.0	750	SEE NOTE	750
TOTAL	6.01	2172	7.4	2172	8.79	2172

NOTE: 2-00153 IS USED FOR INERT STOWAGE ONLY. 2-00155 IS USED FOR AMMUNITION BUILD-UP ONLY, NO STOWAGE.

ANNEX B: Weapons and Munitions (continued)

1.2 For each Stowage facility identified in question 1.1 above, identify the type of facility (specify if "igloo", "box", etc.). Identify the type of ordnance commodity (from the list above) which are currently stowed in that facility and all other ordnance types which, given existing restrictions, could be physically accommodated in that stowage facility. Specify below if such additional accommodation would require a modification of the facility (e.g. enhanced environmental controls, ESQD waiver).

- Identify the reason(s) for which this ordnance is stored at your facility from the following list: own activity use (training); own activity use (operational stock); Receipt/Segregation/Stowage/Issue (RSSI); transshipment/awaiting issue; deep stow (war reserve); deep stow (awaiting Demil); other. Explain each "other" entry in the space provided, including ordnance stowed which is not a DON asset.

Table 1.2: Total Facility Ordnance Stowage Summary

Facility Number/Type	Currently Stowed Commodity Type(s)	Reason for Stowage at your Activity	Commodity Type(s) Which Can Be Stowed
2-00017/CORBETTA	SMALL ARMS	OWN ACTIVITY USE (PILOT TRAINING & SECURITY FORCES)	SMALL ARMS
2-00018/CORBETTA	CAD/APES	OWN ACTIVITY USE (FLIGHT PERSONNEL SAFETY)	CAD/APES
2-00019/READY SERVICE LOCKER	GUN AMMO/CAD	OWN ACTIVITY USE (PILOT TRAINING & SECURITY FORCES)	GUN AMMO/CAD

BRAC-95/DC 3/AMEND 1/NAS MERIDIAN MS/UIC: 63043

ANNEX C: Maintenance, Repair and Equipment Expenditures

1. Identify the facility and equipment values for your activity in the Table below, as executed and budgeted for the period requested. As applied herein:

• Maintenance of Real Property (MRP) is the budgetary term gathering the expenses or budget requirements for facility work and includes recurring maintenance, major repairs and minor construction (non-MILCON) inclusive of all Major Claimant funded Special Projects. It is the amount of funds spent on or budgeted for maintenance and repair of real property assets to maintain the facility in satisfactory operating condition. For purposes of this Data Call, MRP includes all M1/R1 and M2/R2 expenditures.

• Current Plant Value (CPV) referred to incorporates Class 2 Real Property and is the hypothetical dollar amount required to replace a Class 2 facility in kind at today's dollars (e.g.: the cost today to replace an existing wood frame barracks with another barracks, also wood frame).

• Acquisition Cost of Equipment (ACE) reports the total cumulative acquisition cost of all "Personal Property" equipment which includes the cost of installed equipments directly related to mission execution (such as lab test equipment). Class 2 installed capital equipment which is integral to the facility should not be reported as ACE.

Table A: Expenditures and Equipment Values

FY	MRP (\$ K)	CPV (\$ K)	ACE (\$ K)

PAGE ADDED - 28 OCT 94

ANNEX C: Maintenance, Repair and Equipment Expenditures

1. Identify the facility and equipment values for your activity in the Table below, as executed and budgeted for the period requested. As applied herein:

- Maintenance of Real Property (MRP) is the budgetary term gathering the expenses or budget requirements for facility work and includes recurring maintenance, major repairs and minor construction (non-MILCON) inclusive of all Major Claimant funded Special Projects. It is the amount of funds spent on or budgeted for maintenance and repair of real property assets to maintain the facility in satisfactory operating condition. For purposes of this Data Call, MRP includes all M1/R1 and M2/R2 expenditures.
- Current Plant Value (CPV) referred to incorporates Class 2 Real Property and is the hypothetical dollar amount required to replace a Class 2 facility in kind at today's dollars (e.g.: the cost today to replace an existing wood frame barracks with another barracks, also wood frame).
- Acquisition Cost of Equipment (ACE) reports the total cumulative acquisition cost of all "Personal Property" equipment which includes the cost of installed equipments directly related to mission execution (such as lab test equipment). Class 2 installed capital equipment which is integral to the facility should not be reported as ACE.

FOR NAVAL TECHNICAL TRAINING CENTER (NTTC) MERIDIAN ONLY:

NOTE: THESE MRP ESTIMATES ARE BASED ON SQUARE FOOTAGE PERCENTAGE OF NTTC'S TRAINING FACILITIES (65% OF TOTAL STATION TRAINING SF, MRP COST ACCOUNT 7110) AND BARRACKS FACILITIES (42% OF TOTAL STATION BARRACKS SF, MRP COST ACCOUNT 7170) AND OTHER MINOR MRP WORK (COST ACCOUNT 7820). THIS IS MRP FUNDING NAS MERIDIAN EXPENDS ON FACILITIES OCCUPIED BY NTTC. THESE FACILITIES ARE ON NAS MERIDIAN'S PLANT PROPERTY RECORDS. THESE AMOUNTS ARE INCLUDED IN THE TOTAL STATION AMOUNTS ON THE PRECEDING PAGE.

Table A: Expenditures and Equipment Values

FY	MRP (\$ K)	CPV (\$ K)	ACE (\$ K)

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

Mission Requirements

b. Flight Training (cont.)

3. Give the total number of flight operations (i.e., take-offs, landings, and approaches without landings) and the minimum number of night flight operations required per student for each type and level of pilot training (and trainer aircraft). Include only those flight operations that are conducted at your air station and outlying/auxiliary fields. Do not include flight ops required by the syllabus but conducted at other sites (e.g., on detachments to other air stations or on a carrier). To complete the below table, give the historical average for day and night (1) flight operations required per graduate at the air station and OLFs, (2) overhead¹ flight operations per student, and (3) total flight operations at the air station and OLFs attributed to each student. Also verify the type(s) of trainer aircraft for each type and level of training, and make corrections where necessary.

R

Type of Pilot Training	Level of Pilot Training	Trainer Aircraft	Flight Operations per Student					
			Student		Overhead ¹		Total	
			Day	Night	Day	Night	Day	Night
Strike	Intermediate	T-2	638	70	103	11	741	81
	Advanced	TA-4J	1063	146	157	22	1220	168
	Intermediate/ Advanced	T-45 ²	NA	NA	NA	NA	NA	NA

NOTE: Overhead air operations derived using CNO planning factors.

¹Overhead includes extra flights due to unsatisfactory performance, maintenance flights, incomplete flights, instructor training, flights, warm-up flights, and instrument check flights.

Mission Requirements**b. Flight Training (cont.)**

Facilities

a. Airfield

Provide the following information for the home field and each OLF currently used to support undergraduate flight training (18 questions).

1. Airfield Name: NAS MERIDIAN (NMM)

Location: East central Mississippi in Lauderdale County

Type and Level of Training Supported: Intermediate and Advanced Strike Pilot

Ownership: Navy

Airfield Name: OLF JOE WILLIAMS FIELD (BRAVO)

Location: East central Mississippi in Kemper County

Type and Level of Training Supported: Intermediate and Advanced Strike Pilot

Ownership: Navy

For OLF: Distance from home field 21 NM northwest of NAS Meridian

BRAC-95 DC 2/NAS MERIDIAN MS/UIC: 63043

2. Complete the table below to describe the airfield's annual operations.

NAS MERIDIAN, MCCAIN FIELD

		FY 1991	FY 1992	FY 1993
Operational Events	Student Training	162,014	151,551	197,967
	Instructor Training	14,695	13,746	17,957
	Maintenance Flights	6,570	6,180	8,033
	Station Hops	218	370	344
	Proficiency Flights	2,726	2,448	3,095
	NATOPS	1,186	1,108	1,430
	Transient	1,486	1,920	1,802

OLF JOE WILLIAMS FIELD (BRAVO)

		FY 1991	FY 1992	FY 1993

Revision 1

BRAC-95 DC 2/NAS MERIDIAN MS/UIC: 63043

12. Discuss the factors that constrain the number of available student flying hours per day (e.g., AICUZ agreements).

No constraints.

13. Assuming that airfield operations are not constrained by operational funding (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, aircraft mix, etc., what additional capacity (in flight operations per hour) could be gained? Provide details and assumptions for all calculations¹.

Based on CNATRA data with 81 flight operations per hour at NAS Meridian and 53 at OLF Joe Williams Field, the limiting PTR factor is runway capacity. Based on the following calculations Training Air Wing ONE PTR capacity is 236.

	<u>T-2/TA-4J</u>	<u>T-45</u>
Annual Work Days	237	237
NASMER Op Hr/Day	12.1	12.1

¹Answer for each independent runway complex.

REVISED 25 AUG 94
BRAC-95 DC 2/NAS MERIDIAN MS/UTC: 63043

12. Discuss the factors that constrain the number of available student flying hours per day (e.g., AICUZ agreements).

No constraints.

13. Assuming that airfield operations are not constrained by operational funding (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, aircraft mix, etc., what additional capacity (in flight operations per hour) could be gained? Provide details and assumptions for all calculations⁵.

Based on CNATRA data with 81 flight operations per hour at NAS Meridian and 53 at OLF Joe Williams Field, the limiting PTR factor is runway capacity. Based on the following calculations Training Air Wing ONE PTR capacity is 236.

	<u>T-2/TA-4J:</u>	<u>T-45</u>
Annual Work Days	237	237
NASMER Op Hr/Day	12.1	12.1
OLF Op Hr/Day	11.6	11.6
NAS Annual Hrs	2867.7	2867.7
OLF Annual Hrs	2749.2	2749.2
NAS Ops/Hr	81 *	81 *
OLF Ops/Hr	53 *	53 *
NAS Ops/Yr	232283	232283
OLF Ops/Yr	145707	145707
Total Ops/Yr	377990	377990
Ops/PTR	1598 *	1452 *
PTR Capacity	236	260

NOTE: Data based on use of all daylight hours.

NAS Meridian calculated capacity using FAA AC150/5060-5 criteria is 81 air operations per hour; OLF Joe Williams calculated capacity is 53 air operations per hour. Using regular field hours (16) and annual flying days (237) yields 3,792 annual hours of operations. In FY93 230,627 air operations were logged at NAS Meridian. That averages 60.8 air operations per hour at NAS Meridian. Historic air operations per hour at NAS Meridian vary from a low of 37 air operations per hour to a high of 198 air operations per hour depending on which stage of training or what type of flying the Air Wing is doing. Employing similar methodology for OLF Joe Williams, 10.5 hours a day, 237 flying days or 2,488.5 hours annual hours of operation, FY93 traffic count of 64,463, yields 25.9 air operations per hour. By comparing the postulated maximum air operations per hour to historic data, a 25% increase in air operations would be achievable at NAS Meridian and a 52% increase at OLF Joe Williams Field.

* Data provided by CNATRA N334.

14. List and explain the limiting factors that further funding for personnel, equipment, facilities, etc. cannot overcome (e.g., airspace size/availability, AICUZ restrictions, environmental restrictions, land areas). **NONE.**

Facilities

b. Airspace (cont.)

5. List all the General and Special Use Airspace (SUA) (e.g., alert areas, restricted areas, warning areas, and MOAs) and airspace-for-special-use (e.g., ranges and low level training routes) within 100 n.mi. of the air station that are used for flight training. For each airspace provide the following information (seven questions):

THE FOLLOWING (a) - (f) QUESTIONS ARE ANSWERED BELOW BY AIRSPACE:

(a) Provide the type, name, location, size (nmi. x nmi. x ft), available times, airspace controlling activity, scheduling activity, method of scoring/ recording, and proximity to airport traffic areas.

ON PROXIMITY TO AIRPORT TRAFFIC AREAS (ATA) NOTE: Airport Traffic Areas (ATAs) no longer exist, class "D" airspace (surface to 2500 AGL) does not interfere with any airspace used by CTW-1.

(b) Is the airspace under radar and/or communications coverage/control? If so, who provides the services?

(c) Does the Navy own the land below the training airspace under your cognizance? If not, do you control any real property interest? If so, describe the agreements and when these agreements are up for renewal?

(d) What is the distance and time en route?

(e) Are there any environmental limitations in or surrounding any of the training areas that impede the mission? If so, provide details.

(f) Is land and/or air encroachment an issue which endangers long term availability of any training areas? If so, provide details.

BRAC-95 DC 2/NAS MERIDIAN MS/UTC: 63043

(g) In the event that it became necessary to increase base loading at your installation, does the airspace overlying and adjacent to your installation have the capacity to assume an additional workload? Estimate the percentage of the possible increase. Provide the basis/calculations for these estimates.

Yes, airspace available for training use by CTW-1 units would allow a 240% increase in Advanced Strike and 170% increase in Intermediate Strike over the FY 95 PTR of 182 Advanced Strike and 241 Intermediate Strike.

ASSUMPTIONS:

237 flying days per year
18% cancellation rate for weather

A-4 (.905) T-2 (.907) overhead factor for IUT/PMCF
A-4 (.93) T-2 (.95) attrition factor
12 hrs daytime training available during summer months
10 hrs daytime training available during winter months

Calculations are based on the following formula:

- 237 flying days x (wx cancellation factor) = annual VFR flyable days
- annual flyable days ÷ 2 = number of days summer or winter
- number of days summer or winter x summer hrs (12) and winter hrs (10) = available MOA day hrs (summer and winter) per year. Available MOA hrs may vary if the airspace is not available for use during all daylight hrs.
- available MOA hrs annually multiplied by x's (student sorties) per hr = annual number of X's (student sorties) possible in specific airspace
- annual number of MOA X's divided by number of X's in stage = PTR capacity
- PTR multiplied by overhead factors = airspace PTR capacity

Meridian 1 West MOA

237 flyable days x 82% = 194
194 ÷ 2 = 97 summer days/97 winter days
97 summer days x 12 hrs/day = 1164 hrs
97 winter days x 10 hrs/day = 970 hrs
total = 2134 hrs annually

2
CNATRA N3

6. Is the available General and SUA/airspace-for-special-use within 100 n.mi. of your installation sufficient to satisfy all present and projected training requirements?

Yes.

7. If deployments/detachments to other domestic locations are required to satisfy these shortfalls, provide the following information:

(a) Where do these units/squadrons deploy?

**NAS KEY WEST, FL
NAS MIRIMAR, CA
NAS NORTH ISLAND, CA
NAS CECIL FIELD, FL
MCAS BEAUFORT, SC**

(b) How far from your installation?

NAS KEY WEST, FL	650 NM
NAS MIRIMAR, CA	1500 NM
NAS NORTH ISLAND, CA	1500 NM
NAS CECIL FIELD, FL	375 NM
MCAS BEAUFORT, SC	400 NM

BRAC-95 DC 2/NAS MERIDIAN MS/UIC: 63043

(c) Reasons for deployment (e.g., adverse weather, airspace saturation, training versatility, etc.)

NAS KEY WEST, FL	CARRIER QUALIFICATION
NAS MIRIMAR, CA	CARRIER QUALIFICATION
NAS NORTH ISLAND, CA	CARRIER QUALIFICATION
NAS CECIL FIELD, FL	CARRIER QUALIFICATION
MCAS BEAUFORT, SC	CARRIER QUALIFICATION

(d) Annual TAD costs incurred for deployments due to adverse weather.

2
~~\$16,500 PER DEPLOYMENT.~~ NONE
CNATRA N3

(e) Annual TAD costs incurred for deployments due to airspace nonavailability.

ZERO.

(f) Annual TAD costs incurred for deployments due to insufficient training versatility (e.g., lack of low level training routes etc.)

ZERO.

237 days (CNATRA Planning Factor)

237 days x 8 hours/day = 1896 hours per facility available.

1896 hours available x 60 student capacity = 113,760 student hr/yr.

CCN 171-35 - Operational Training Building:

237 days (CNATRA Planning Factor)

237 days x 15 hours/day = 3555 hours per facility available.

3555 hours available x 12 student capacity = 42,660 student hr/yr.

NOTE: 6 2F101 Trainers (Intermediate Strike) and

6 2F90A Trainers (Advance Strike)

(Each trainer is scheduled 6 times per day for 2.5 hours = 15 hours per day).

72 sorties per day.

2F101 Trainers are only used for Intermediate Strike

2F90A Trainers are only used for Advanced Strike

R

Type Training Facility	Total Number	Design Capacity (PN)	Capacity (Student HRS/YR)
Observation Towers at the Target Range, 2-00139 & 2-00144	2	Does not apply	NA

2. For the Student HRS/YR value in the preceding table, describe how that entry was derived.

CCN 171-10 - Academic Instruction Building and

CCN 171-20 - Applied Instruction Building:

237 days (CNATRA Planning Factor)

237 days x 8 hours/day = 1896 hours per facility available.

1896 hours available x 60 student capacity = 113,760 student hr/yr.

CCN 171-35 - Operational Training Building:

237 days (CNATRA Planning Factor)

237 days x 15 hours/day = 3555 hours per facility available.

3555 hours available x 12 student capacity = 42,660 student hr/yr.

NOTE: 6 2F101 Trainers and

6 2F90A Trainers

(Each trainer is scheduled 6 times per day for 2.5 hours = 15 hours per day).

72 sorties per day.

Facilities

c. Ground Training (cont.)

3. Assuming that the ground school training facility is not constrained by operational funding (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, etc., what additional capacity (in student hours) could be gained? Provide details and assumptions for all calculations.

Student capacity is based on available usage of 8 hours, but that could be increased to 16 or 24 hours per day, doubling or tripling the capacity.

Both CCN: 171-10 & 171-20, Academic Classroom & Applied Training Bldg #266 would increase capacity as follows:

8 HR/DAY = 113,760 STUDENT HRS
16 HR/DAY = 227,520 STUDENT HRS
24 HR/DAY = 341,280 STUDENT HRS

CCN: 171-35, Operational Simulator Training Bldg #150 would increase capacity as follows:

15 HR/DAY = 42,660 STUDENT HRS

4. List and explain the limiting factors that further funding for personnel, equipment, facilities, etc. cannot overcome.

No limiting factors.

Facilities

c. Ground Training (cont.)

6. By Category Code Number (CCN), complete the following table for all training facilities aboard the installation in which undergraduate pilot and/or NFO training is not conducted. Include all 171-xx, 179-xx CCN's and any other applicable CCN.

For example: in the category 171-10, a type of training facility is academic instruction classroom. If you have 10 classrooms with a capacity of 25 students per room, the design capacity would be 250. If these classrooms are available 8 hours a day for 300 days a year, the capacity in student hours per year would be 600,000.

CCN: 171-10

Type Training Facility	Total Number	Design Capacity (PN) ²	Capacity (Student HRS/YR)
Regional Counterdrug Training Academy, Bldg 219	4 3	140 100	237,120 200,000

HEARD
CNET N-4433
28 APR 94
ATA

CCN: 171-20

Type Training Facility	Total Number	Design Capacity (PN)	Capacity (Student HRS/YR)
NTTC Supply Schools Building 330	32	800	1,600,000
NTTC Admin Schools Building 361	30	739 750	1,478,000 1,500,000

HEARD
CNET N-4433
28 APR 94
ATA

7. For the Student HRS/YR value in the preceding table, describe how that entry was derived.

FOR CCN-171-20:
 8 HRS/DAY X 250 DAYS/YR UTILIZED = 2000 HRS/YR
 25 STUDENTS PER ROOM CAPACITY X NUMBER OF ROOMS = TOTAL STUDENTS PER YEAR
 2000 HR/YR X STUDENTS PER YEAR = CAPACITY (STUDENT HRS/YR)

FOR CCN-171-10:
 8 HRS/DAY X 250 DAYS/YR = 2000 HRS/YR.
 30 STUDS PER ROOM CAPACITY X 2 ROOMS = 60 STUDS
 40 STUDS PER ROOM CAPACITY X 1 ROOM = 40 STUDS
 2000 HR/YR X 100 STUDS PER YR = CAPACITY (STUD HRS/YR)

HEARD
CNET N-4
28 APR
ATA

2 Design Capacity (PN) is the total number of seats available for students in spaces used for academic instruction; applied instruction; and seats or positions for operational trainer spaces and training facilities other than buildings, i.e., ranges. Design Capacity (PN) must reflect current use of the facilities.

Facilities

c. Ground Training (cont.)

8. Assuming that the ground school training facility is not constrained by operational funding (personnel support, increased overhead costs, etc.), with the present equipment, physical plant, etc., what additional capacity (in student hours) could be gained? Provide details and assumptions for all calculations.

Student capacity is based on available usage of 8 hours per day, but could be increased to 16 or 24 hours per day, tripling the capacity if required.

CCN: 171-10, Counterdrug Training would increase capacity as follows:

- 8 HR/DAY = 237,120 STUDENT HRS
- 16 HR/DAY = 474,240 STUDENT HRS
- 24 HR/DAY = 711,360 STUDENT HRS

CCN: 171-20, NTTC BLDG 330 would increase capacity as follows:

- 8 HR/DAY = 1,600,000 STUDENT HRS
- 16 HR/DAY = 3,200,000 STUDENT HRS
- 24 HR/DAY = ~~6,400,000~~ STUDENT HRS
4,800,000

*HEARD N-4433
CRET 28 APR 94
ATA*

CCN: 171-20, NTTC BLDG 361 would increase capacity as follows:

- 8 HR/DAY = 1,478,000 STUDENT HRS
- 16 HR/DAY = 2,956,000 STUDENT HRS
- 24 HR/DAY = 4,434,000 STUDENT HRS

9. List and explain the limiting factors that further funding for personnel, equipment, facilities, etc. cannot overcome.

No limiting factors.

10. What percentage of the FY 2001 gross excess capacity (GEC) for each CCN in which undergraduate pilot and/or NFO training is **not** conducted could be utilized for additional training? Calculate GEC as follows:

NONE.

GEC = Capacity [A] - Total Requirements [B]

Key: [A] -- Capacity (Student Hrs/Yr) taken from Facilities question c.6.

[B] -- Sum of Other Ground Training Requirements identified in Mission Requirements question d.2

Facilities

d. Aircraft Parking, Maintenance, and Supply (cont.)

4. Using the types (and mix) of aircraft currently stationed at your installation, project the maximum number of these aircraft that could be housed in your hangars. Provide two estimates:

(a) NAVFAC P-80 standard measures

(b) Real world planning factors to accommodate a surge demand for space (maintaining safe operating procedures).

Aircraft Type	# of Aircraft		Comments
	(a)	(b)	
T-2	40	42	BOTH HANGARS FULL OF T-2s
TA-4J	55	59	BOTH HANGARS FULL TO TA-4Js
UH-1N	2	3	
UC-12B	1	1	

5. Provide the details of your calculations, including your assumptions on the minimum separation between aircraft, folding of aircraft wings and any obstructions that may limit the placement of aircraft in the hangars.

NAVFAC P-80 parks aircraft wing tip to wing tip. Hangar at NAS Meridian, due to depth of structure, allows staggered parking of aircraft. Required hangar width (RHW) formula modified to account for different structure:

$$RHW = N(W) + (N-1) D$$

Hangar Width-East Bay: 448', T-2 wing span 38.1', yield 18 aircraft.

Hangar Width-East Bay: 448', TA-4J wing span 27.5', yield 25 aircraft.

Hangar Width-West Bay: 484', TA-4J wing span 27.5', yield 26 aircraft.

Hangar Width-West Bay: 484', T-2 wing span 38.1', yield 19 aircraft.

Corrosion Control Hangar: Yields 4 TA-4J aircraft.

Yields 3 T-2 aircraft.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**BRAC-95 DATA CALL 2
NAS MERIDIAN MS**

ANSWERS TO BSAT QUESTIONS

- a. Page 28/29, Question a.15/17 - Are both sets of carrier deck lighting at the OLF?

Answer: Yes. Data certified by Public Works Facilities Manager, Perry Davis, 02 AUG 94.

- b. Page 50-53, Question d.2-7 - These questions must be answered for the T-45 aircraft that is scheduled to arrive beginning in FY97.

Answer: See attached revised pages 50 - 53 with T-45 aircraft added. Data provided by LCDR Dave Moore, CTW-1 Ops Officer.

- c. Page 59/62, Question b.1/3 - What is the number of beds that can be put in the substandard rooms?

Answer: 16 beds in substandard and 7 beds in adequate. Information certified by Assistant CBQ Manager, MSCM Rivers, 02 AUG 94.

- d. Page 55, Question e.1 - The SF for CCN 600-xx is significantly less than the SF reported for CCN 610-10 in question b.3, page 28 of Data Call 3. Why?

Answer: Error made in calculations of Data Call 2 square footage (SF). CCN 600-xx, page 55, Question e.1 should be 84,479 Adequate SF and 8,678 Substandard SF. Data Call 3, Question b.3, page 28, CCN 610-10 total of 88,596 SF is correct. These do not equal as Data Call 2 CCN 600-xx includes all CCN in 600 series and Data Call 3 is for CCN 610-10 only. Square footage verified by Public Works Plant Account holder, Sue Van Court, 02 AUG 94.

- e. Page 48, Question c.11 - The SF for CCN 171-35 is significantly less than the SF reported in Quest B.3, Page 28 of Data Call 3. Why?

Answer: Both Data Calls 2 and 3 are in error. Data Call 2, CCN 171-35 SF did not include the new addition under construction as the facility has not been completed to date. Data Call 3 SF was an estimation of the new square footage calculated wrong. The correct calculation for CCN 171-35 is 33,534 SF for the old portion and 16,690 SF for the new addition of Facility 2-00150, totaling 50,224 Adequate SF. Calculations prepared by Public Works Engineering Technician, Mike Easterwood on 02 AUG 94.

f. Per CNATRA memo of 05 AUG 94, Data Call 19, A.1 and A.2, Housing and Messing Section, e.i, breakdown of BQ rooms, Page 57 and 58, Question b.1 - Any changes to Columns "Adequate, Substandard, Inadequate"? Reverified by Facility Planning Document dated MAY 94.

Answer: Page 57, Facility 206, CCN 721-11: Change "Beds: 84 and Sq Ft: 20530" from Adequate column all to Substandard column.

Page 58, Facility 392, CCN 721-13: Deduct "3 Beds and 982 Sq Ft" from Adequate column and add to Substandard column; leaving in Adequate column: 62 Beds and 20121 Sq Ft.

g. Per CNATRA memo of 05 AUG 94, Can NAS Meridian load munitions on training aircraft at the installation?

Answer: YES. NAS Meridian loads 20 MM, Mark 76's, practice bombs and rockets. Data provided by Ordnance Division of Air Operations Department.

DATA CALL 66
INSTALLATION RESOURCES

UIC: 43324

Activity Information:

Activity Name:	PERSUPPDET Meridan
UIC:	43324
Host Activity Name (if response is for a tenant activity):	Naval Air Station Meridan
Host Activity UIC:	63043

General Instructions/Background. A separate response to this data call must be completed for each Department of the Navy (DON) host, independent and tenant activity which separately budgets BOS costs (regardless of appropriation), and, is located in the United States, its territories or possessions.

1. Base Operating Support (BOS) Cost Data. Data is required which captures the total annual cost of operating and maintaining Department of the Navy (DON) shore installations. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Two tables are provided. Table 1A identifies "Other than DBOF Overhead" BOS costs and Table 1B identifies "DBOF Overhead" BOS costs. These tables must be completed, as appropriate, for all DON host, independent or tenant activities which separately budget BOS costs (regardless of appropriation), and, are located in the United States, its territories or possessions. Responses for DBOF activities may need to include both Table 1A and 1B to ensure that all BOS costs, including those incurred by the activity in support of tenants, are identified. If both table 1A and 1B are submitted for a single DON activity, please ensure that no data is double counted (that is, included on both Table 1A and 1B). The following tables are designed to collect all BOS costs currently budgeted, regardless of appropriation, e.g., Operations and Maintenance, Research and Development, Military Personnel, etc. Data must reflect FY 1996 and should be reported in thousands of dollars.

a. Table 1A - Base Operating Support Costs (Other Than DBOF Overhead). This Table should be completed to identify "Other Than DBOF Overhead" Costs. Display, in the format shown on the table, the O&M, R&D and MPN resources currently budgeted for BOS services. O&M cost data must be consistent with data provided on the BS-1 exhibit. Report only direct funding for the activity. Host activities should not include reimbursable support provided to tenants, since tenants will be separately reporting these costs. Military personnel costs should be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Add additional

b. **Funding Source.** If data shown on Table 1A reflects more than one appropriation, then please provide a break out of the total shown for the "3. Grand-Total" line, by appropriation:

<u>Appropriation</u>	<u>Amount (\$000)</u>
O&MN	450
MPN	646

c. **Table 1B - Base Operating Support Costs (DBOF Overhead).** This Table should be submitted for all current DBOF activities. Costs reported should reflect BOS costs supporting the DBOF activity itself (usually included in the G&A cost of the activity). For DBOF activities which are tenants on another installation, total cost of BOS incurred by the tenant activity for itself should be shown on this table. It is recognized that differences exist among DBOF activity groups regarding the costing of base operating support: some groups reflect all such costs only in general and administrative (G&A), while others spread them between G&A and production overhead. Regardless of the costing process, all such costs should be included on Table 1B. The Minor Construction portion of the FY 1996 capital budget should be included on the appropriate line. Military personnel costs (at civilian equivalency rates) should also be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Also ensure that there is no duplication between data provided on Table 1A. and 1B. These two tables must be mutually exclusive, since in those cases where both tables are submitted for an activity, the two tables will be added together to estimate total BOS costs at the activity. Add additional lines to the table (following line 21., as necessary, to identify any additional cost elements not currently shown). Leave shaded areas of table blank.

Other Notes: All costs of operating the five Major Range Test Facility Bases at DBOF activities (even if direct RDT&E funded) should be included on Table 1B. Weapon Stations should include underutilized plant capacity costs as a DBOF overhead "BOS expense" on Table 1B..

2. Services/Supplies Cost Data. The purpose of Table 2 is to provide information about projected FY 1996 costs for the purchase of services and supplies by the activity. (Note: Unlike Question 1 and Tables 1A and 1B, above, this question is not limited to overhead costs.) The source for this information, where possible, should be either the NAVCOMPT OP-32 Budget Exhibit for O&M activities or the NAVCOMPT UC/FUND-1/IF-4 exhibit for DBOF activities. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Break out cost data by the major sub-headings identified on the OP-32 or UC/FUND-1/IF-4 exhibit, disregarding the sub-headings on the exhibit which apply to civilian and military salary costs and depreciation. Please note that while the OP-32 exhibit aggregates information by budget activity, this data call requests OP-32 data for the activity responding to the data call. Refer to NAVCOMPTINST 7102.2B of 23 April 1990, Subj: Guidance for the Preparation, Submission and Review of the Department of the Navy (DON) Budget Estimates (DON Budget Guidance Manual) with Changes 1 and 2 for more information on categories of costs identified. Any rows that do not apply to your activity may be left blank. However, totals reported should reflect all costs, exclusive of salary and depreciation.

3. Contractor Workyears.

a. **On-Base Contract Workyear Table.** Provide a projected estimate of the number of contract workyears expected to be performed "on base" in support of the installation during FY 1996. Information should represent an annual estimate on a full-time equivalency basis. Several categories of contract support have been identified in the table below. While some of the categories are self-explanatory, please note that the category "mission support" entails management support, labor service and other mission support contracting efforts, e.g., aircraft maintenance, RDT&E support, technical services in support of aircraft and ships, etc.

Table 3 - Contract Workyears	
Activity Name: PERSUPPDET Meridan	UIC: 43324
Contract Type	FY 1996 Estimated Number of Workyears On-Base
Construction:	
Facilities Support:	
Mission Support:	
Procurement:	
Other:*	
Total Workyears:	0

* **Note:** Provide a brief narrative description of the type(s) of contracts, if any, included under the "Other" category.

DATA CALL 66
INSTALLATION RESOURCES

UIC: 43324

b. Potential Disposition of On-Base Contract Workyears. If the mission/functions of your activity were relocated to another site, what would be the anticipated disposition of the on-base contract workyears identified in Table 3.?

1) Estimated number of contract workyears which would be transferred to the receiving site (This number should reflect the number of jobs which would in the future be contracted for at the receiving site, not an estimate of the number of people who would move or an indication that work would necessarily be done by the same contractor(s)):

N/A; no contract workyears

2) Estimated number of workyears which would be eliminated:

N/A; no contract workyears

3) Estimated number of contract workyears which would remain in place (i.e., contract would remain in place in current location even if activity were relocated outside of the local area):

N/A; no contract workyears

**DATA CALL 66
INSTALLATION RESOURCES**

UIC: 43324

c. "Off-Base" Contract Workyear Data. Are there any contract workyears located in the local community, but not on-base, which would either be eliminated or relocated if your activity were to be closed or relocated? If so, then provide the following information (ensure that numbers reported below do not double count numbers included in 3.a. and 3.b., above): No.

No. of Additional Contract Workyears Which Would Be Eliminated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)
None	

No. of Additional Contract Workyears Which Would Be Relocated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)
None

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

CULTURAL RESOURCES	6
ENVIRONMENTAL FACILITIES	7
AIR POLLUTION	11
ENVIRONMENTAL COMPLIANCE	14
INSTALLATION RESTORATION	16
LAND/AIR/WATER USE	18
WRAP-UP	26

ENVIRONMENTAL DATA CALL

Responses to the following questions provide data that will allow an assessment of the potential environmental impact associated with the closure or realignment of a Navy shore activity. This criterion consists of:

- Endangered/Threatened Species and Biological Habitat
- Wetlands
- Cultural Resources
- Environmental Facilities
- Air Pollution
- Environmental Compliance
- Installation Restoration
- Land/Air/Water Use

As part of the answers to these questions, a *source citation* (e.g., 1993 base loading, 1993 base-wide Endangered Species Survey, 1993 letter from USFWS, 1993 Base Master Plan, 1993 Permit Application, 1993 PA/SI, etc.) must be included. It is probable that, at some point in the future, you will be asked to provide additional information detailing specifics of individual characteristics. In anticipation of this request, supporting documentation (e.g., maps, reports, letters, etc.) regarding answers to these questions should be retained. Information needed to answer these questions is available from the cognizant EFD Planning and Real Estate Divisions, and Environment, Safety, and Health Divisions; and from the activity Public Works Department, and activity Health Monitoring and Safety Offices.

For purposes of the questions associated with land use at your base is *defined as land* (acreage owned, withdrawn, leased, and controlled through easements); *air* (space controlled through agreements with the FAA, e.g., MOAs); *and water* (navigation channels and waters along a base shoreline) *under the control of the Navy*.

AMENDMENT 2

1. ENDANGERED/THREATENED SPECIES AND BIOLOGICAL HABITAT

1a. For federal or state listed endangered, threatened, or category 1 plant and/or animal species on your base, complete the following table. Critical/sensitive habitats for these species are designated by the U. S. Fish and Wildlife Service (USFWS). A species is present on your base if some part of its life-cycle occurs on Navy controlled property (e.g., nesting, feeding, loafing). Important Habitat refers to that number of acres of habitat that is important to some life cycle stage of the threatened/endangered species that is not formally designated.

SPECIES (plant or animal)	Designation (Threatened/ Endangered)	Federal/ State	Critical / Designated Habitat (Acres)	Important Habitat (acres)
NA				

NOTE: No federal or state listed endangered, threatened, or category 1 plant and/or animal species occur on NAS Meridian; however, a red cockaded woodpecker colony (*Picoides borealis*, threatened, Federal) occurs between 1/4 and 1/2 mile east of the edge of Navy property on land belonging to Georgia-Pacific Corporation. Of 634 acres of Navy land at the Target Range, 522 acres are cleared and hold no habitat for the woodpecker. The remaining 112 acres is timbered but is 3/4 to 1 mile from the colony. The U.S. Fish and Wildlife Service considers 1/2 mile to be the outside limit for foraging distance. It has been determined that Naval operations in the area do not adversely affect the colony.

Source Citation: TOM BURST, WILDLIFE BIOLOGIST, SOUTHNAVFACENGCOM, 1994

1b.

Have your base operations or development plans been constrained due to: - USFWS or National Marine Fisheries Service (NMFS)? - State required modifications or constraints? If so, identify below the impact of the constraints including any restrictions on land use.	NO
Are there any requirements resulting from species not residing on base, but which migrate or are present nearby? If so, summarize the impact of such constraints.	NO

BRAC-95 DC 33/NAS MERIDIAN MS/UIC: 63043

1c. If the area of the habitat and the associated species have not been identified on base maps provided in Data Call 1, submit this information on an updated version of Data Call 1 map.

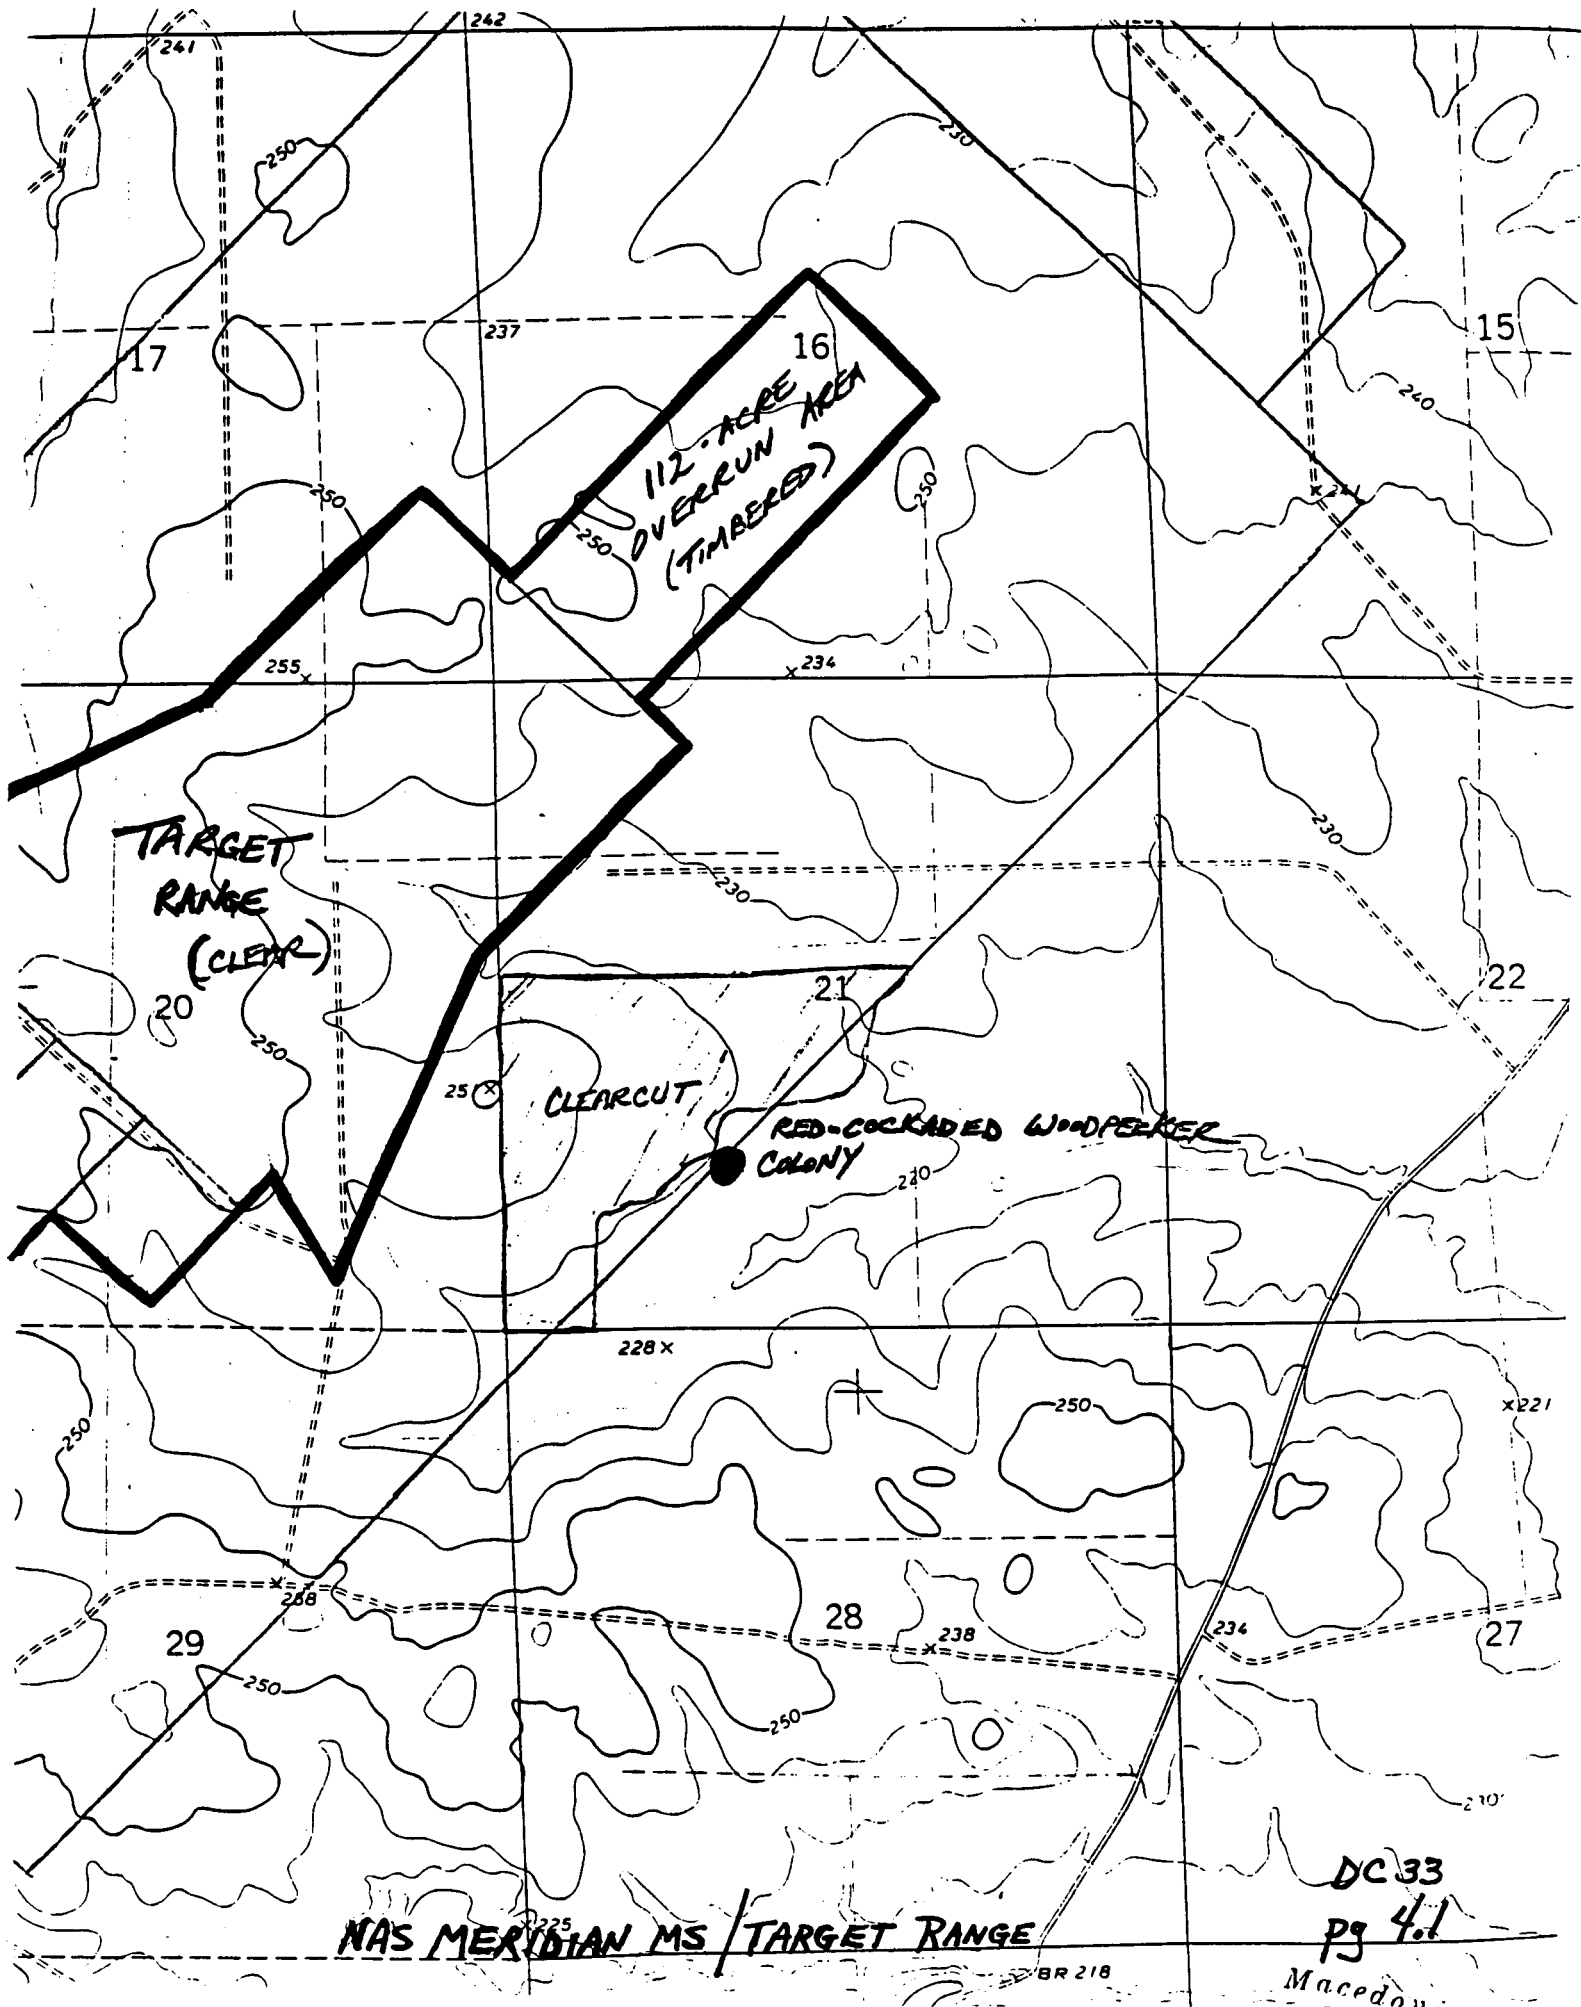

SEE PAGE 4.1, MAP OF NASMER TARGET RANGE.

1d.

Have any efforts been made to relocate any species and/or conduct any mitigation with regards to critical habitats or endangered/threatened species? Explain what has been done and why.	NO
--	-----------

1e.

Will any state or local laws and/or regulations applying to endangered/threatened species which have been enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain.	NO
---	-----------

NAS MERIDIAN MS / TARGET RANGE

DC 33

Macedonia

BR 218

2. WETLANDS

Note: Jurisdictional wetlands are those areas that meet the wetland definitional criteria detailed in the Corps of Engineers (COE) Wetland Delineation Manual, 1987, Technical Report Y-87-1, U.S. Army Engineer Waterway Experiment Station, Vicksburg, MS or officially adapted state definitions.

2a.

Does your base possess federal jurisdictional wetlands?	YES
Has a wetlands survey in accordance with established standards been conducted for your base?	YES
When was the survey conducted or when will it be conducted?	JUN 89
What percent of the base has been surveyed?	100%
What is the total acreage of jurisdictional wetlands present on your base?	1,564

Source Citation: TOM BURST, WILDLIFE BIOLOGIST, SOUTHNAVFACENGCOM, 1994

2b. If the area of the wetlands has not been identified on base maps provided in Data Call 1, submit this on an updated version of Data Call 1 map.

SEE PAGES 5.1 - 5.3, MAP PHOTOS OF WETLANDS. (SEE TAB A)

HEARD
CME7 N-4433
ATA 7 July 94

2c. Has the EPA, COE or a state wetland regulatory agency required you to modify or constrain base operations or development plans in any way in order to accommodate a jurisdictional wetland? NO. If YES, summarize the results of such modifications or constraints.

3. CULTURAL RESOURCES

3a.

<p>Has a survey been conducted to determine historic sites, structures, districts or archaeological resources which are listed, or determined eligible for listing, on the National Register of Historic Places? If so, list the sites below.</p>	<p>YES</p>
---	-------------------

NO sites eligible.

3b.

<p>Has the President's Advisory Council on Historic Preservation or the cognizant State Historic Preservation Officer required you to mitigate or constrain base operations or development plans in any way in order to accommodate a National Register cultural resource? If YES, list the results of such modifications or constraints below.</p>	<p>YES</p>
---	-------------------

NOTE: In JAN 94 clay fragments from a pottery kiln operated from 1870 to 1900 were uncovered by a government bulldozer operator while digging in a dirt borrow pit. The State of Mississippi Historic Preservation Officer and SOUTHNAVFACENGCOM were notified immediately. Work has been stopped on this dirt borrow pit pending the outcome of a Reconnaissance Survey which began 06 MAY 94 by a State approved archaeologist. No delays to work have resulted as borrow material is available from other pits on station.

3c.

<p>Are there any on base areas identified as sacred areas or burial sites by Native Americans or others? List below.</p>	<p>NO</p>
--	------------------

4. ENVIRONMENTAL FACILITIES

Notes: If your facility is permitted for less than maximum capacity, state the maximum capacity and explain below the associated table why it is not permitted for maximum capacity. Under "Permit Status" state when the permit expires, and whether the facility is operating under a waiver. For permit violations, limit the list to the last 5 years.

4a.

Does your base have an operating landfill?					NO
ID/Location of Landfill	Permitted Capacity (CYD)		Maximum Capacity (CYD)	Contents ¹	Permit Status
	TOTAL	Remaining			
NA					

¹ Contents (e.g. building demolition, asbestos, sanitary debris, etc)

Are there any current or programmed projects to correct deficiencies or improve the facility.

NA

4b. If there are any non-Navy users of the landfill, describe the user and conditions/agreements.

NA

4c.

Does your base have any disposal, recycling, or incineration facilities for solid waste?					NO
Facility/Type of Operation	Permitted Capacity	Ave Daily Throughput	Maximum Capacity	Permit Status	Comments
NA					

List any permit violations and projects to correct deficiencies or improve the facility.

NA

NOTE: Although NAS Meridian does not have a recycling facility, a recycling program is in progress on station and includes a curbside pick up in the Family Housing area. Paper and aluminum products are collected by base personnel and sold to a vendor off station for processing.

4d.

Does your base own/operate a Domestic Wastewater Treatment Plant (WWTP) ?					YES
ID/Location of WWTP	Permitted Capacity	Ave Daily Discharge Rate	Maximum Capacity	Permit Status	Level of Treatment/ Year Built
MS0020010 NAS MERIDIAN MS	0.78 MGD	0.425 MGD	1.4 MGD	EXP:31 MAR 96 NO WAIVERS	AEROBIC DIGESTER/ TRICKLING FILTER/1961

PERMITTED CAPACITY IS DETERMINED BY STATE OF MISSISSIPPI BOARD OF POLLUTION CONTROL WHICH USES POPULATION, COMMERCIAL AND INDUSTRIAL INPUTS, AND CAPACITY OF DISCHARGE STREAM. PERMITTED CAPACITY IS NORMALLY TWICE AVERAGE DAILY DISCHARGE. MAXIMUM CAPACITY IS THE DESIGN CAPACITY BASED ON DESIGN CAPACITY OF POTABLE WATER TREATMENT FACILITY.

List permit violations and discuss any projects to correct deficiencies.

NO permit violations.

SOUTHNAVFACENGCOM completed a Environmental Compliance Evaluation APR 94 identifying no projects required.

4e. If you do not have a domestic WWTP, describe the average discharge rate of your base to the local sanitary sewer authority, discharge limits set by the sanitary sewer authority (flow and pollutants) and whether the base is in compliance with their permit. Discuss recurring discharge violations.

NA

4f.

Does your base operate an Industrial Waste Treatment Plant (IWTP)?					NO
ID/Location of IWTP	Type of Treatment	Permitted Capacity	Ave Daily Discharge Rate	Maximum Capacity	Permit Status
NA					

List any permit violations and projects to correct deficiencies or improve the facility.

NA

4g. Are there other waste treatment flows not accounted for in the previous tables? Estimate capacity and describe the system.

Water Pollution Control Permit No. MS0024503 for OLF Joe Williams Field covers septic tank/stormwater drainage system. Monthly flow is .003 MGD with maximum flow design .012 MGD. System properly working. No problems or violations.

4h.

Does your base operate drinking Water Treatment Plants (WTP)?				YES	
ID/Location of WTP	Operating (GPD)		Method of Treatment	Maximum Capacity (GPD)	Permit Status
	Permitted Capacity	Daily Rate			
MS0001422 NAS MERIDIAN MS	1,200,000	600,000	Sand Filter Settling Basin	1,500,000	EXP: 31MAR96 NO WAIVERS

PERMITTED CAPACITY IS DETERMINED BY STATE OF MISSISSIPPI DEPARTMENT OF PUBLIC HEALTH WHICH USES POPULATION, COMMERCIAL AND INDUSTRIAL REQUIREMENTS, AND OTHER POTABLE WATER NEEDS. PERMITTED CAPACITY IS TWICE DAILY OPERATING RATE (GPD). MAXIMUM CAPACITY IS THE DESIGN CAPACITY BASED ON SIZES OF DEEP WATER WELLS AND STORAGE TANKS.

List permit violations and projects/actions to correct deficiencies or improve the facility.

NO permit violations.

4i. If you do not operate a WTP, what is the source of the base potable water supply. State terms and limits on capacity in the agreement/contract, if applicable.

NAS Meridian's main station operates a WTP.

OLF Joe Williams Field purchases water from cooperative, Northwest Kemper Water Association.

4j.

Does the presence of contaminants or lack of supply of water constrain base operations. Explain.	NO
--	----

4k.

Other than those described above does your base hold any NPDES or stormwater permits? If YES, describe permit conditions.	NO
If NO, why not and provide explanation of plan to achieve permitted status.	

NAS MERIDIAN applied through SOUTHNAVFACENGCOM in FY92 for the Navy-wide group stormwater permit involving the four other outfalls on station. NAVFACENGCOM is presently testing and studying several bases before permitting all applicants.

4l.

YES/NO

Does your base have bilge water discharge problem?	NO
Do you have a bilge water treatment facility?	NO

Explain: NA

4m.

Will any state or local laws and/or regulations applying to Environmental Facilities, which have been enacted or promulgated but not yet effected, constrain base operations or development plans beyond those already identified? Explain.	NO
---	----

4n. What expansion capacity is possible with these Environmental Facilities? Will any expansions/upgrades as a result of BRACON or projects programmed through the Presidents budget through FY1997 result in additional capacity? Explain.

Ample expansion capacity is available. No expansions or upgrades will be required for any BRAC action.

4o. Do capacity limitations on any of the facilities discussed in question 4 pose a present or future limitation on base operations? Explain.

NO.

Rev.

BRAC-95 DC 33/NAS MERIDIAN MS/UIC: 63043
REVISED 25AUG94

5. AIR POLLUTION

5a.

What is the name of the Air Quality Control Areas (AQCA) in which the base is located? <p style="text-align: center;">MISSISSIPPI DEPT OF ENVIRONMENTAL QUALITY</p>
Is the installation or any of its OLFs or non-contiguous base properties located in different AQCA's? <u>NO</u> . List site, location and name of AQCA. NA

R

5b. For each parcel in a separate AQCA fill in the following table. Identify with an "X" whether the status of each regulated pollutant is: attainment/nonattainment/maintenance. For those areas which are in non-attainment, state whether they are: Marginal, Moderate, Serious, Severe, or Extreme. State target attainment year.

Site: NAVAL AIR STATION, MERIDIAN, MS

AQCA: SCAQMD

Pollutant	Attainment	Non-Attainment	Maintenance	Target Attainment Year ¹	Comments ²
CO	X			NA	
Ozone	X			NA	
PM-10	X			NA	
SO ₂	X			NA	
NO ₂	X			NA	
Pb	X			NA	

¹ Based on national standard for Non-Attainment areas or SIP for Maintenance areas.

² Indicate if attainment is dependent upon BRACON, MILCON or Special Projects. Also indicate if the project is currently programmed within the Presidents FY1997 budget.

5. AIR POLLUTION

5a.

What is the name of the Air Quality Control Areas (AQCA) in which the base is located? <p style="text-align: center;">SOUTH COAST AIR QUALITY MANAGEMENT DISTRICT (SCAQMD)</p>
Is the installation or any of its OLFs or non-contiguous base properties located in different AQCA's? <u>NO</u> . List site, location and name of AQCA. NA

5b. For each parcel in a separate AQCA fill in the following table. Identify with an "X" whether the status of each regulated pollutant is: attainment/nonattainment/maintenance. For those areas which are in non-attainment, state whether they are: Marginal, Moderate, Serious, Severe, or Extreme. State target attainment year.

Site: NAVAL AIR STATION, MERIDIAN, MS

AQCA: SCAQMD

Pollutant	Attainment	Non-Attainment	Maintenance	Target Attainment Year ¹	Comments ²
CO	X			NA	
Ozone	X			NA	
PM-10	X			NA	
SO ₂	X			NA	
NO ₂	X			NA	
Pb	X			NA	

¹ Based on national standard for Non-Attainment areas or SIP for Maintenance areas.

² Indicate if attainment is dependent upon BRACON, MILCON or Special Projects. Also indicate if the project is currently programmed within the Presidents FY1997 budget.

5c. For your base, identify the baseline level of emissions, established in accordance with the Clean Air Act. Baseline information is assumed to be 1990 data or other year as specified. Determine the total level of emissions (tons/yr) for CO, NOx, VOC, PM10 for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

FY93 DATA *

Emission Sources (Tons/Year)					
Pollutant	Permitted Stationary	Personal Automobiles	Aircraft Emissions	Other Mobile	Total
CO	9.02	0	0	0	9.02
NOx	11.88	0	0	0	11.88
VOC	33.25	0	0	0	33.25
PM10	8.26	0	0	0	8.26

*** NOTE: DATA NOT AVAILABLE PRIOR TO FY93.
SEE ENCLOSURE (1) FOR CALCULATIONS.**

Source Document:

AIR EMISSIONS COMPLIANCE AUDIT REPORT OF APR 93, SOUTHNAVFACENGCOM

5d. For your base, determine the total FY1993 level of emissions (tons/yr) for CO, NOx, VOC, PM10 for the general sources listed. For all data provide a list of the sources and show your calculations. Use known emissions data, or emissions derived from use of state methodologies, or identify other sources used. "Other Mobile" sources include such items as ground support equipment.

FY93 DATA

Emissions Sources (Tons/Year)					
Pollutant	Permitted Stationary	Personal Automobiles	Aircraft Emissions	Other Mobile	Total
CO	9.02	0	0	0	9.02
NOx	11.88	0	0	0	11.88
VOC	33.25	0	0	0	33.25
PM10	8.26	0	0	0	8.26

SEE ENCLOSURE (1) FOR CALCULATIONS.

Source Document:

AIR EMISSIONS COMPLIANCE AUDIT REPORT OF APR 93, SOUTHNAVFACENGCOM (ENCL (1))

5e. Provide estimated increases/decreases in air emissions (Tons/Year of CO, NO_x, VOC, PM₁₀) expected within the next six years (1995-2001). Either from previous BRAC realignments and/or previously planned downsizing shown in the Presidents FY1997 budget. Explain.

NO increase expected in air emissions. With the programmed conversion to the T-45 aircraft projected to consume less fuel; less air emissions expected.

5f. Are there any critical air quality regions (i.e. non-attainment areas, national parks, etc.) within 100 miles of the base?

NO.

5g. Have any base operations/mission/functions (i.e.: training, R&D, ship movement, aircraft movement, military operations, support functions, vehicle trips per day, etc.) been restricted or delayed due to air quality considerations. Explain the reason for the restriction and the "fix" implemented or planned to correct.

NO.

5h. Does your base have Emission Reduction Credits (ERCs) or is it subject to any emission offset requirements? If yes, provide details of the sources affected and conditions of the ERCs and offsets. Is there any potential for getting ERCs?

NO ERCs or emissions offset requirements.

NO potential for getting ERCs.

6. ENVIRONMENTAL COMPLIANCE

6a. Identify compliance costs, currently known or estimated that are required for permits or other actions required to bring existing practices into compliance with appropriate regulations. Do not include Installation Restoration costs that are covered in Section 7 or recurring costs included in question 6c. For the last two columns provide the combined total for those two FY's.

Program	Survey Completed?	Costs in \$K to correct deficiencies					
		FY94	FY95	FY96	FY97	FY98-99	FY00-01

7. INSTALLATION RESTORATION

7a.

Does your base have any sites that are contaminated with hazardous substances or petroleum products?	YES
Is your base an NPL site or proposed NPL site?	NO

7b. Provide the following information about your Installation Restoration (IR) program. Project list may be provided in separate table format. Note: List only projects eligible for funding under the Defense Environmental Restoration Account (DERA). Do not include UST compliance projects properly listed in section VI.

Site # or name	Type site ¹	Groundwater Contaminated?	Extends off base?	Drinking Water Source?	Cost to Complete (\$M)/Est. Compl. Date	Status ² /Comments
EXCHANGE SERVICE STATION	CA	YES	NO	NOT AFFECTED	1.5M/JUL 96	REMEDIAL ACTION (RA)/DUE JUL 94

¹ Type site: CERCLA, RCRA corrective action (CA), UST or other (explain)

² Status = PA, SI, RI, RD, RA, long term monitoring, etc.

NOTE: No list of IR projects available to date. IR Program has not reached project stage.

** LIST OF IR SITES PROVIDED ON NEXT PAGE BY SODNY [Signature]*

7c. Have any contamination sites been identified for which there is no recognized/accepted remediation process available? List.

NO.

7d.

Is there a groundwater treatment system in place?	NO
Is there a groundwater treatment system planned?	YES

State scope and expected length of pump and treat operation.

As the corrective action at the Navy Exchange Gas Station overflow gasoline spill, a two year pump and treat operation will begin JUL 94.

NAS MERIDIAN

SITE #/NAME	TYPE SITE	GROUNDWATER CONTAMINATION	EXTENDS OFF BASE	DRINKING WATER SOURCE	CIC/COMPLETION DATE	STATUS
01 Old Fire Fighting Training Area	CERCLA	YES	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 94"
02-Jet Engine Test Cell Oil/Water Separator	CERCLA	UNKNOWN	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 95"
03- Lake Martha Landfill and Metal Landfill	CERCLA	YES	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 95"
04-Sewage Treatment Plant Sludge Disposal	CERCLA	UNKNOWN	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 95"
05-Former Pesticide Mixing Area	CERCLA	NO	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 95" IRA scheduled "Dec 94"
06-New Firefighting Training Area	CERCLA	YES	NO	YES	1-2 MIL June 99	"SI" to be complete "Dec 94"

Also, Exchange Service Center, Bldg 228 is listed as a UST on RMIS.

AMENDMENT 2

BRAC-95 DC 33/NAS MERIDIAN MS/UTC: 63043

7e.

Has a RCRA Facilities Assessment been performed for your base?	NO
--	----

7f. Does your base operate any conforming storage facilities for handling hazardous materials? If YES, describe facility, capacity, restrictions, and permit conditions.

NO.

7g. Does your base operate any conforming storage facilities for handling hazardous waste? If YES, describe facility, capacity, restrictions, and permit conditions.

NO. NAS Meridian operates a hazardous waste collection area operating with less than a 90 day storage requirement. No permit required for this type facility.

7h. Is your base responsible for any non-appropriated fund facilities (exchange, gas station) that require cleanup? If so, describe facility/location and cleanup required/status.

YES. The Navy Exchange Gas Station located on the Naval Air Station's main base requires a corrective action clean-up of groundwater contamination caused by contractor overfilling the gasoline underground storage tanks. No leaking USTs have been found by survey and annual leak detection testing. Tanks and piping have been replaced and upgraded. A pump and treat operation will begin in JUL 94.

7i.

Do the results of any radiological surveys conducted indicate limitations on future land use? Explain below.	NO
--	----

7j. Have any base operations or development plans been restricted due to Installation Restoration considerations?

NO.

7k. List any other hazardous waste treatment or disposal facilities not included in question 7b. above. Include capacity, restrictions and permit conditions.

NONE.

7e.

Has a RCRA Facilities Assessment been performed for your base?	NO
--	----

7f. Does your base operate any "Conforming Storage" facilities for handling hazardous materials? If YES, describe facility, capacity, restrictions, and permit conditions.

NO.

7g. Does your base operate any "Conforming Storage" facilities for handling hazardous waste? If YES, describe facility, capacity, restrictions, and permit conditions.

NO. NAS Meridian operates a hazardous waste collection area operating with less than a 90 day storage requirement. No permit required for this type facility.

7h. Is your base responsible for any non-appropriated fund facilities (exchange, gas station) that require cleanup? If so, describe facility/location and cleanup required/status.

YES. The Navy Exchange Gas Station located on the Naval Air Station's main base requires a corrective action clean-up of groundwater contamination caused by contractor overfilling the gasoline underground storage tanks. No leaking USTs have been found by survey and annual leak detection testing. Tanks and piping have been replaced and upgraded. A pump and treat operation will begin in JUL 94.

7i.

Do the results of any radiological surveys conducted indicate limitations on future land use? Explain below.	NO

NO waivers in effect.

Replaced w/ con. P. 5/27/94

NAS MERIDIAN MS
AIRFIELD SAFETY WAIVERS SUMMARIZED
MAY 94

- M-1** To permit obstructions in the 7:1 transitions surface (150' rotating beacon tower). 1960.
- M-3** To permit the following obstructions to remain:
- a. Meteorological group equipment, 14 feet above ground level and located no closer than 740 feet east of the Runway 19L/01R centerline and extending from 525 feet inboard to 1200 feet outboard the Runway 19L end. 1970/revised 1978.
 - b. Meteorological group equipment, 14 feet above ground level, 740 feet west of Runway 19R/01L centerline and extending from 2200 feet to 2700 feet inboard the 01L end.
1970/revised 1978.
- M-4** To permit the following existing violations of flight safety clearance criteria to exist until corrected by MCON programming:
- a. Runway 19L/01R:
 1. Pond and concrete flume located at the west side of Runway 19 end with the nearest point to the runway centerline of 435 feet.
 2. Culvert crossing beneath the runway, 1500 feet inboard from the Runway 01R end with open ends at 400 feet west and 440 feet east from runway centerline.
 3. Open drainage ditch averaging 8.5 feet wide, 2 feet deep, extending along the east side of runway from the Runway 19L end inboard 6500 feet along the side of the runway. The distance varies with the nearest point 250 feet from the runway centerline.
 4. Shoulder grade drop-off on the west side of taxiway at the Runway 01R end with the nearest point of the drop to centerline of taxiway of 50 feet.
 - b. Runway 19R/01L:
 1. Swamp area Runway 01L end, west side, extending 1800 feet inboard the side of the runway with the nearest point to runway centerline of 320 feet.
 2. Culvert crossing beneath the runway, 190 feet inboard the Runway 01L end with open ends 270 feet east and west from the runway centerline.
- All obstructions are to be marked and lighted if feasible.
1975.
- M-5** To permit three windsocks approximately 12 feet high located as follows:
- a. 150 feet west of Runway 01R edge and 150 feet from the centerline of end turnoff and turnoff taxiways.
 - b. 150 feet north of Runway 10R edge and 150 feet from the centerline of the end turnoff and turnoff taxiways.
 - c. 150 feet east of Runway 19R edge and 150 feet from the centerline of the end turnoff and turnoff taxiways.
1971.

NAS MERIDIAN/AIRFIELD SAFETY WAIVERS continued

- M-6** To permit tree stands to remain until eliminated through MCON planning and timber harvesting. Locations are as follows:
- a. Tree line with 55 acres of trees of various heights on the north side of Runway 10/28 beginning at the 28 end and extending 1500 feet inboard the 28 end. The nearest distance to the runway centerline is 275 feet. 1970.
 - b. Tree line containing harvestable trees on the south side of Runway 10/28, beginning approximately 3000 feet inboard the 28 end and extending to the 10 end. The closest distance to the runway centerline is 380 feet.
 - c. Tree line with 60 acres of trees of various heights on both sides of Runway 19L/01R.
 1. 1500 feet inboard the 01R end and extending 8000 feet in a northerly direction and no closer than 475 feet west of the runway centerline.
 2. Extending from 600 feet to 3000 feet inboard the 01R end and no closer than 400 feet east of the centerline.
 - d. Tree line with 122 acres of trees of various heights on both sides of Runway 19R/01L. The tree lines are within 320 feet west of the runway centerline and 290 feet east of the runway centerline. 1975.
- M-7** To permit a trailer mounted RDO unit to be located 175 feet left of the centerline of and 750 feet inboard the approach end of Runways 19L, 28 or 01L in proximity of the runway datum light and mirror only when the unit is manned. 1973.
- M-8** To permit two wind indicators approximately 13 feet high located as follows:
- a. 500 feet inboard the threshold of 01L and 300 feet west of the centerline.
 - b. 3750 feet inboard the threshold of 28L and 300 feet south of the centerline. 1974.
- M-10** To permit wind socks mounted on light tubular aluminum masts to be located as follows:
- a. 636 feet inboard the threshold end of Runway 01L and 169 feet east of the Runway 19R/01L centerline.
 - b. 636 feet inboard the threshold end of Runway 19L and 169 feet east of the Runway 19L/01R centerline.
 - c. 1085 feet inboard the threshold end of Runway 28 and 169 feet south of the Runway 10/28 centerline. 1979.
- M-11** To permit an AN/FPN63 and its associated reflectors to be located as follows:
- a. AN/FPN63 radar - 400 feet west of Runway 01L/19R centerline and 4100 feet inboard the Runway 01L threshold.
 - b. Centerline reflectors - one 978 feet outboard the Runway 01L threshold, the other 1480 feet outboard the Runway 19R threshold, all on the Runway 01L/19R centerlines extended.
 - c. End of runway reflector - 192 feet east of Runway 01L/19R centerline and at Runway 01L threshold.

NAS MERIDIAN/AIRFIELD SAFETY WAIVERS continued

- d. TD reflector - 194 feet west of Runway 01L/19R centerline and 690 feet inboard the Runway 01L threshold.
- e. TD reflector - 404 feet west of Runway 01L/19R centerline and 694 feet inboard the Runway 19R threshold.
1981/revised 1987.

M-12 To permit an AN/FPN63 and its associated reflectors to be located as follows:

- a. AN/FPN63 radar - 375 feet east of Runway 01L/19R centerline and 3500 feet inboard the Runway 19L threshold.
- b. Centerline reflectors - one 1415 feet outboard the Runway 01R threshold, the other 3412 feet outboard the Runway 19L threshold, all on the Runway 01R/19L centerlines extended.
- c. End of runway reflector - 200 feet west of Runway 01R/19L centerline and at Runway 19L threshold.
- d. TD reflector - 374 feet east of Runway 01R/19L centerline and 686 feet inboard the Runway 19L threshold.
- e. TD reflector - 250 feet east of Runway 01R/19L centerline and 686 feet inboard the Runway 01R threshold.
1981/revised 1987.

M-14 To permit an automated weather system to be located at OLF Joe Williams about 2500 feet north of the threshold of Runway 31 and 750 feet southwest of the runway centerline. The applicable requirements of NAVFAC P-80.3 are waived provided the top of the tower is less than 20 feet above the 7:1 transition surface. 1993.

M-15 To permit the construction of the Fire Station addition, MCON P-280. The applicable requirements of NAVFAC P-80.3 are waived for as long as the structure is used only as a fire station. 1994.

M-16 To permit alert crew shelters. 1994.

OLF JOE WILLIAMS FIELD

B-1 To permit two portable LSO vehicles to be located as follows:

- a. 80 feet west of the Runway 14/32 centerline and 607 feet inboard the Runway 32 threshold end.
- b. 80 feet east of the Runway 14/32 centerline and 681 feet inboard the Runway 14 threshold end.

This waiver is issued contingent upon the LSO shelters being moved outside of the primary surface when they are not in use for their intended purpose. These LSO shelters may remain in place when the runway is not in use. 1984.

8e. List the off-base land use *types* (e.g, residential, industrial, agricultural) and *acreage* within Noise Zones 2 & 3 generated by your flight operations and whether it is compatible/incompatible with AICUZ guidelines on land use.

Acreage/Location/ID	Zones 2 or 3	Land Use	Compatible/ Incompatible
NAS MERIDIAN, MCCAIN FIELD 4902 ACRES	2	TIMBERLAND, PASTURELAND, WETLAND, SOME AGRICULTURE & SAND MINING, WITH SCATTERED HOUSES & FARMS	COMPATIBLE

SEARAY TARGET RANGE, # ACRES UNKNOWN	NO AICUZ FOOTPRINT	TIMBERLAND AND PASTURELAND	NA

8f. List the navigational channels and berthing areas controlled by your base which require maintenance dredging? Include the frequency, volume, current project depth, and costs of the maintenance requirement.

NO NAVIGATIONAL CHANNELS OR BERTHING AT NAS MERIDIAN MS

Navigational Channels/ Berthing Areas	Location / Description	Maintenance Dredging Requirement			
		Frequency	Volume (MCY)	Current Project Depth (FT)	Cost (\$M)
NA					

8g. Summarize planned projects through FY 1997 requiring new channel or berthing area dredged depths, include location, volume and depth.

NA

8h.

Are there available designated dredge disposal areas for maintenance dredging material? List location, remaining capacity, and future limitations.	NA
Are there available designated dredge disposal areas for new dredge material? List location, remaining capacity, and future limitations.	NA
Are the dredged materials considered contaminated? List known contaminants.	NA

8i. List any requirements or constraints resulting from consistency with **State Coastal Zone Management Plans**.

NO.

8j. Describe any non-point source pollution problems affecting water quality ,e.g.: coastal erosion.

NO pollution problems exist.

8k.

If the base has a cooperative agreement with the US Fish and Wildlife Service and/or the State Fish and Game Department for conducting a hunting and fishing program, does the agreement or these resources constrain either current or future operations or activities? Explain the nature and extent of restrictions.	NO
---	----

8l. List any other areas on your base which are indicated as protected or preserved habitat other than threatened/endangered species that have been listed in Section 1. List the species, whether or not treated, and the acres protected/preserved.

NO other protected or preserved habitat exist.

9. WRAPUP

9a. Are there **existing or potential environmental showstoppers** that have affected or will affect the accomplishment of the installation mission that have not been covered in the previous 8 questions?

NO.

9b. Are there any **other environmental permits** required for base operations, include any relating to industrial operations.

NO. New permits will be required pending the Oil Pollution Act Spill Plans under CWA and Title V National Air Quality Standards under CAAA90.

9c. Describe any **other environmental or encroachment restrictions** on base property not covered in the previous 8 sections.

NO other environmental or encroachment restrictions exist.

9d. List any **future/proposed laws/regulations** or any **proposed laws/regulations** which will constrain base operations or development plans in any way. Explain.

NONE.

CHAPTER 2. AIR EMISSIONS AUDIT

2.1 FIELD OPERATIONS. After reviewing the facility plot plans, ESE engineers began the project by inspecting air pollution sources in or around the buildings which are listed in a supplement to the Statement of Work (Appendix A). The audit was conducted from September 28 to October 9, 1992. ESE engineers were accompanied by appropriate work area representatives at NAS Meridian, whenever available.

The inspections were conducted to identify all of the potential air emission sources, to collect engineering data necessary to calculate emission estimates, and to gather other relevant data to complete the permit applications. This effort resulted in a final list of 130 air emission sources. For emission inventory purposes, the sources have been grouped into specific industrial source categories. These categories and specific source types are summarized in Table 2-1, along with the pollutants being emitted. More detailed source information is presented in Tables B-1 through B-6 in Appendix B. Miscellaneous sources have been combined into one group.

2.2 EMISSION INVENTORY METHODOLOGY. Emission estimates were calculated using emission factors, material balance principles, and available engineering and historical data. The U.S. Environmental Protection Agency's (EPA's) Compilation of Air Pollutant Emission Factors, commonly referred to as AP-42, was relied on for the emission factor information (EPA, 1985). Additionally, the Air Facility Subsystem Emission Factor (AFSEF) database program (Version 2.0, developed by Pacific Environmental Services for EPA) and the SPECIATE database program (Version 1.4, developed by Radian Corporation for EPA) were also used.

Emission factors are average quantities of pollutants expected to be emitted to the atmosphere from the activities associated with the release of the pollutants. The factors are usually expressed as the weight of a pollutant divided by the unit weight, volume, distance, or duration of the activity (e.g., pounds of particulate produced per ton of fuel burned). In addition to the incorporation of average values found in AP-42, AFSEF, and SPECIATE, the actual process parameters, Material Safety Data Sheets (MSDSs), and control equipment design specifications were used whenever applicable. Tables C-1 through C-6 in Appendix C present specific data used in the emission calculations.

Actual, maximum, and potential emissions were estimated for the air sources at NAS Meridian. The actual emissions are based on the typical operational parameters, and the maximum emissions are calculated considering such factors as the source's physical and operational design, permit restrictions, and historical data. Potential emissions are the uncontrolled emissions assuming continuous operation. The following are some characteristics of potential emission calculations:

1. Potential emissions must be calculated using maximum allowable rather than average hourly emission rate.
2. Emissions must be based on the total hours that a source could operate (i.e., 8,760 hours per year) unless proven impossible.

$$E'_p = \left[\left(\frac{R LF}{1,000} \right) \left(\frac{f H}{2,000} \right) \right] + AHV \quad (2-4)$$

- where: E_p = emission rate for pollutant p [pound per hour (lb/hr)];
 E'_p = emission rate for pollutant p [ton per year (tpy)];
 f = appropriate AP-42 emission factor [pound per thousand gallons (lb/M gal) or pound per million cubic feet (lb/MM ft³)] (see Table C-5a);
 LF = load factor (dimensionless);
 R = rated capacity (MMBtu/hr);
 U = average annual fuel usage [thousand gallons per year (M gal/yr) or million cubic feet per year (MM ft³/yr)];
 H = estimated annual operating hours [hour per year (hr/yr)];
 AHV = average heating value of fuel [British thermal units per thousand gallons (Btu/M gal) or Btu/ft³];
1,000 = unit proportionality constant; and
2,000 = factor for conversion of pounds to tons.

Example Calculation

Given: 2.93 MMBtu/hr boiler (Source ID-F26 on Table B-1)
natural gas usage = 3.70 MM ft³/yr
annual operating hours = 8,760

Find: actual short-term emission rate for NO_x.

Since the fuel usage is known, Equation 2-1 can be used. Emission factors are listed in Table C-6a.

$$E_{NO_x(N.G.)} = 3.70 \frac{MM \text{ ft}^3}{yr} \times \frac{100 \text{ lb}}{MM \text{ ft}^3} \times \frac{1 \text{ yr}}{8,760 \text{ hr}} = 0.042 \frac{\text{lb}}{\text{hr}}$$

2.2.2 Stationary Internal Combustion Sources The stationary internal combustion sources at NAS Meridian include nonutility emergency generators and two gas-fired fire pump engines. The rated powers of these engines range from 6 to 250 kilowatts (kW). They are tested on a regular schedule, typically for about 30 minutes, once a week. The actual operating hours were estimated based on interviews with onsite personnel and historical data. The maximum operating hours were assumed to be no more than 200 hours per year, based on the permitting guidelines of the South Coast Air Quality Management District (SCAQMD). Since the amount of time for emergency usage (which is generally exempt) is unforeseeable, it was not considered for emission estimation purposes. Table B-2 (Appendix B) is a list of the internal combustion sources at NAS Meridian.

The paint booths are equipped with water curtains to control the overspray paint particles. The typical particle control efficiency for such a wet system, if designed properly, is about 95 percent (AP-40, 1973). The particle control efficiency for the new open spraying area (T-45 Hangar Bays) in the Corrosion Control Facility was estimated to be 72 percent in the previous permit application. The amount of overspray is a function of spraying method and type of surface being sprayed. For the painting operations at NAS Meridian, 50 and 70 percent were considered reasonable average overspray estimates for flat surfaces and miscellaneous metal parts, respectively (AP-40, 1992). Most of the VOCs, however, are not removed by the water curtain and escape to the atmosphere. A significant fraction of the volatile organic compounds (VOCs) is released during the drying process of the painted parts.

The following equations were used to estimate the emissions from the surface coating operations:

$$E_{\text{voc}} = \frac{8.34 U SG C}{H} \quad (2-7)$$

$$E'_{\text{voc}} = \frac{U p C}{2,000} = \frac{U V_c}{2,000} \quad (2-8)$$

$$E_{\text{pm}} = \left[\frac{U \rho (1 - C) O}{H} \right] \left[\frac{100 - \eta}{100} \right] \quad (2-9)$$

where:

- E_{voc} = VOC emission rate (lb/hr);
- E'_{voc} = VOC emission rate (tpy);
- E_{pm} = particulate emission rate (lb/hr);
- U = annual material usage [gallon per year (gal/yr)];
- SG = specific gravity (dimensionless);
- ρ = density [pound per gallon (lb/gal)];
- H = annual operating hours (hr/yr);
- C = volatile fraction (weight percent/100);
- V_c = VOC content (lb/gal);
- O = overspray (percent/100);
- η = control efficiency (percent);
- 8.34 = density of water (lb/gal); and
- 2,000 = conversion factor, pounds to ton.

The coatings typically consist of several constituents, some of which are hazardous air pollutants (HAPs). The HAP emissions were calculated in a similar manner, based on the amounts contained in the coatings. In conjunction with the Material Safety Data

drained back into the drum through a filter to catch small parts and coarse dirt. A circulating pump inside the drum provides continuous circulation. The tanks are usually covered when not in use. Based on interviews with the base personnel and the available MSDSs, evaporative losses were conservatively assumed to be 5 to 10 percent of the solvent usage. VOC and HAP emissions were calculated using the same equations as those for the surface coating operations and material balance principles. Details on the solvent use operations are shown in Table C-4.

Example Calculation

Given: paint stripping tank using methylene chloride (Source ID-P9)
amount replenished per year = 20 gallons

Find: annual VOC emissions.

From MSDS,

$$\rho_{\text{methylene chloride}} = 11.18 \frac{\text{lb}}{\text{gal}}$$

Using Equation 2-8,

$$E_{\text{methylene chloride}} = \frac{20 \text{ gal}}{\text{yr}} \times \frac{11.18 \text{ lb}}{\text{gal}} \times \frac{\text{tons}}{2,000 \text{ lb}} = 0.11 \text{ tpy}$$

2.2.5 Fuel Storage Tanks and Related Operations The main fuel tank farm, located halfway between the Centroid and Administration Areas, contains three 1,000,000-gallon aboveground JP-5 storage tanks, a 25,000-gallon underground Mogas (gasoline) storage tank, and a 25,000-gallon underground waste fuel storage tank. Fuel supply to the farm comes from a contractor-owned 100,000-barrel offstation tank by an underground pipeline. Fuel is then transported to a tanker truck unloading stand (located next to the Control Tower) by another underground pipeline. The 8,000-gallon tanker trucks then deliver an average of 50,000 gallons of JP-5 fuel per day to the aircraft on the flightline. Mogas is transferred from the fuel tank farm directly to the Mogas fuel trucks and transported to the fueling stations.

The OLF BRAVO fuel tank farm is located on a remote field in Kemper County, approximately 35 miles northwest of NAS Meridian. There are three 10,000-gallon aboveground JP-5 tanks, a 5,000-gallon fiberglass oil/water separator, a 500-gallon Mogas tank, and a 500-gallon diesel tank (used for space heating and emergency backup generator). JP-5 is loaded and unloaded using Navy 4,500-gallon tanker trucks.

The jet engine test cell area, located across the north runway, accommodates a 5,000-gallon skid-mounted JP-5 tank, a 2,000-gallon skid-mounted JP-5 tank, a

0.0010 = constant.

Emissions from horizontal tanks are calculated by adjusting the parameters in the previous fixed-roof equations as follows:

$$D_E = \sqrt{\frac{DL}{0.787}} \quad (2-13)$$

$$H_{VO} = \frac{1}{2} D \quad (2-14)$$

where: D_E = effective tank diameter (ft),
 D = actual tank diameter (ft),
 L = length of tank (ft), and
0.787 = constant.

Internal floating-roof tanks have both a permanent fixed roof and a floating deck inside. VOC emissions from these tanks are the sum of withdrawal losses and standing storage losses. The withdrawal losses occur as the floating roof is lowered, and some liquid remains attached to the tank surface and evaporates. The standing losses include rim seal, deck fitting, and deck seam losses. The applicable emission calculating equations are as follows:

$$L_T = L_R + L_{WD} + L_F + L_D \quad (2-15)$$

$$L_R = K_R P^* D M_V K_C \quad (2-16)$$

$$L_{WD} = \frac{(0.943)QCW_L}{D} \left[1 + \left(\frac{NcFc}{D} \right) \right] \quad (2-17)$$

$$L_F = F_F P^* M_V K_C \quad (2-18)$$

$$L_D = K_D S_D D^2 P^* M_V K_C \quad (2-19)$$

$$P^* = \frac{P_{VA} / P_A}{[1 + (1 - [P_{VA} / P_A])^{0.5}]^2} \quad (2-20)$$

where: L_T = total loss (lb/yr),
 L_R = rim seal loss (lb/yr),
 L_{WD} = withdrawal loss (lb/yr),
 L_F = deck fitting loss (lb/yr),
 L_D = deck seam loss (lb/yr),

From AP-42 and using Equation 2-21,

$$L_1 = \frac{12.46 (1.45)(7.6)(62)}{525^\circ R} = 16.22 \frac{lb}{10^3 gal}$$

$$E = 150 \times \frac{10^3 gal}{yr} \times \frac{16.22 lb}{10^3 gal} \times \frac{tons}{2,000 gal} = 1.22 tpy$$

2.2.6 Miscellaneous Sources A summary of the miscellaneous air pollution sources is contained in Table B-6. Approximately 120 J-52 engines (for A-4 combat aircraft) and 60 J-85 engines (for T-2 aircraft) are tested annually on a schedule of 5 hours/day, 5 days/week, all year round. On the average, approximately 1 hour is required to test an engine, with 20 percent at idle and 80 percent above idle (i.e., takeoff, climbout, and approach).

At the woodworking areas, individual woodworking machines are connected to a common duct directed into a cyclone. Such cyclones are designed to effectively collect large particles (i.e., >40 microns in diameter) but are not effective at controlling small particles such as particulate matter 10 (PM-10). The overall particulate removal efficiency was assumed to be approximately 80 percent (EPA, 1981).

Emissions were estimated using historical technical data and/or back calculating based on wood wastes generated. Typical algorithms are as follows:

$$E = \frac{(W [(1-\eta)/\eta])}{H} \quad (2-22)$$

$$E = \frac{P (1 - \eta) (f)}{H} \quad (2-23)$$

where:

- E = emission rate (lb/hr);
- P = process rate (lb/yr);
- f = applicable emission factors (lb/lb);
- W = waste generated (lb/yr);
- η = control efficiency, percent/100; and
- H = annual operating hours.

Emission factors were used whenever available (see Table C-6c). Because emission factors for welding operations are still being developed at this time, emissions from these operations were estimated using emission factors for metal/alloy melting.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**BRAC DATA CALL NUMBER 64
CONSTRUCTION COST AVOIDANCE**

Information on cost avoidance which could be realized as the result of cancellation of on-going or programmed construction projects is provided in Tables 1 (MILCON) and 2 (FAMILY HOUSING). These tables list MILCON/FAMILY HOUSING projects which fall within the following categories:

1. all programmed construction projects included in the FY1996 - 2001 MILCON/FAMILY HOUSING Project List,
2. all programmed projects from FY1995 or earlier for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995, and,
3. all programmed BRAC MILCON/FAMILY HOUSING projects for which cost avoidance could still be obtained if the project were to be canceled by 1 OCT 1995.

Projects listed in Tables 1 and 2 with potential cost avoidance were determined as meeting any one of the following criteria:

Projects with projected Work in Place (WIP) less than 75% of the Current Working Estimate (CWE) as of 1 OCT 1995 .

Projects with projected completion dates or Beneficial Occupancy Dates subsequent to 31 March 1996.

Projects with projected CWE amount greater than \$15M.

The estimated cost avoidance for projects terminated after construction award would be approximately one-half of the CWE for the remaining work. Close-out, claims and other termination costs can consume the other half.

"TENANT ACTIVITIES"
CNATRA N61
JLC
2/2*

BRAC-95 DC 1/NAS MERIDIAN MS/63043

2. PLANT ACCOUNT HOLDER:

- Yes X No _____ (check one)

3. ACTIVITY TYPE: Choose most appropriate type that describes your activity and completely answer all questions.

• **HOST COMMAND:** A host command is an activity that provides facilities for its own functions and the functions of other (tenant) activities. A host has accountability for Class 1 (land), and/or Class 2 (buildings, structures, and utilities) property, regardless of occupancy. It can also be a tenant at other host activities.

- Yes X No _____ (check one)

• **TENANT COMMAND:** A tenant command is an activity or unit that occupies facilities for which another activity (i.e., the host) has accountability. A tenant may have several hosts, although one is usually designated its primary host. If answer is "Yes," provide best known information for your primary host only.

- Yes _____ No X (check one)

- Primary Host (current) UIC: 63043
- Primary Host (as of 01 Oct 1995) UIC: 63043
- Primary Host (as of 01 Oct 2001) UIC: 63043

• **INDEPENDENT ACTIVITY:** For the purposes of this Data Call, this is the "catch-all" designator, and is defined as any activity not previously identified as a host or a tenant. The activity may occupy owned or leased space. Government Owned/Contractor Operated facilities should be included in this designation if not covered elsewhere.

- Yes _____ No X (check one)

BRAC-95 DC 1/NAS MERIDIAN MS/63043

4. **SPECIAL AREAS:** List all Special Areas. Special Areas are defined as Class 1/Class 2 property for which your command has responsibility that is not located on or contiguous to main complex.

Name	Location	UIC
JOE WILLIAMS FIELD (OLF BRAVO)	21 NM northwest of NAS Meridian's main station in Kemper County	63043
SEARAY TARGET RANGE	29 NM north of NAS Meridian's main station in Noxubee County	63043

5. **DETACHMENTS:** If your activity has detachments at other locations, please list them in the table below.

Name	UIC	Location	Host name	Host UIC
NA				

6. **BRAC IMPACT:** Were you affected by previous Base Closure and Realignment decisions (BRAC-88, -91, and/or -93)? If so, please provide a brief narrative.

**DUE TO THE BRAC-91 CLOSURE OF NAS CHASE FIELD IN TEXAS,
CTW-1's PILOT TRAINING RATE (PTR) INCREASED SLIGHTLY.**

BRAC-95 DC 1/NAS MERIDIAN MS/63043

7. **MISSION:** Do not simply report the standard mission statement. Instead, describe important functions in a bulletized format. Include anticipated mission changes and brief narrative explanation of change; also indicate if any current/projected mission changes are a result of previous BRAC-88, -91,-93 action(s).

Current Missions

- **Maintain and operate facilities.**
- **Provide services and material to support operations of aviation activities of the Naval Air Training Command and other activities designated by the Chief of Naval Operations.**
- **Major aviation training commands supported include:**
 - **Commander, Training Air Wing ONE (CTW-1)**
Administers, coordinates, and supervises flight and associated academic training and support programs conducted by NAS Meridian, Training Squadron NINETEEN and Training Squadron SEVEN.

Trains Navy, Marine Corps and international student aviators in Intermediate and Advanced Strike curriculum employing the T-2C Buckeye and TA-4J Skyhawk aircraft.

Foreign Military Pilot Training includes strike students from Argentina, France, Italy, Kuwait, Singapore and Spain.
 - **Training Squadron NINETEEN (VT-19)**
Intermediate Strike Pilot Training
Curriculum stages include: basic instruments, radio instruments, airways navigation, familiarization, out of control, formation, night familiarization, air-to-air gunnery and carrier qualification.
 - **Training Squadron SEVEN (VT-7)**
Advanced Strike Pilot Training
Curriculum stages include: basic instruments, radio instruments, airways navigation, familiarization, basic formation, night familiarization/formation, tactical formation, operational navigation, air-to-ground weapons, air combat maneuvering and carrier qualifications.

Current Missions - continued

- **Major training commands designated by CNO:**
 - **Naval Technical Training Center, Meridian**
 - **Marine Aviation Training Support Group, Meridian**

- **Other major activities supported:**
 - **Regional Counterdrug Training Academy**

Projected Missions for FY 2001

- **CTW-1: Currently undergoing a \$14.6M MILCON to accommodate the T-45 aircraft. The T-45 Goshawk has been designated the replacement aircraft for both the T-2C Buckeye and TA-4J Skyhawk. Mission will remain the same, student naval aviation flight training. However, the aircraft, simulators and academic support equipment will change.**

- **Above is not a result of previous BRAC.**

8. **UNIQUE MISSIONS:** Describe any missions which are unique or relatively unique to the activity. Include information on projected changes. Indicate if your command has any National Command Authority or classified mission responsibilities.

Current Unique Missions

* Pen & ink change

- NAS Meridian maintains and operates facilities and provides services and materials to support operations of the following major tenant commands and activities:

- **Naval Technical Training Center (NAVTECHTRACEN or NTTC), Meridian**

Primary training for enlisted administrative and supply schools:

"A" Schools

Aviation Storekeeper (AK)
Disbursing Clerk (DK)
Ship's Serviceman (SH)
Storekeeper (SK)
Personnelman (PN)
Yeoman (YN)
Religious Program Specialist (RP)
Aviation Maintenance Administrationman (AZ)

"C" Schools

Yeoman Staff/Flagwriters
Religious Program Specialist

- **Marine Aviation Training Support Group (MATSG), Meridian**

Primary training for enlisted support schools:

Aviation Operations Specialist (AOS)
Aviation Supply Mechanized (MARA-K-C1)
Aviation Supply Management (MARA-K-C7)
Aviation Logistics Computer Operator (ALCO)

- **Regional Counterdrug Training Academy (RCTA)**

Provide enforcement level counterdrug training program to civilian law enforcement officers in Alabama, Mississippi, and Louisiana.

- **NAS Meridian has no National Command Authority or classified mission responsibilities.**

SVC
03 FEB 94
NAS MERIDIAN
PW ADMIN

Projected Unique Missions for FY 2001

- **NTTC Meridian is being considered for establishment/relocation of DOD Joint Services Chaplain and Religious Program Schools.**
- **NTTC Meridian's expansion of Supply "A" Schools to include courses for Naval Aviation Logistics Command Information System (NALCOMIS) and Shipboard Non-Tactical ADP Program (SNAP).**
- **NTTC Meridian to establish a "Center for Cooperative Learning".**
- **Regional Counterdrug Training Academy is being considered for expansion to the National Counterdrug Training Academy.**
- **Naval Reserve Center at Jackson, MS is considering relocating to NAS Meridian due to the costly maintenance required to their present facilities.**
- **Department of Veterans Affairs is considering establishing a VA Counseling Center on NAS Meridian to assist veterans in the east Mississippi area.**

9. IMMEDIATE SUPERIOR IN COMMAND (ISIC): Identify your ISIC. If your ISIC is not your funding source, please identify that source in addition to the operational ISIC.

- Operational name UIC
Commander, Training Air Wing ONE 09251

- Funding Source UIC
Chief of Naval Air Training (CNATRA) 63110

BRAC-95 DC 1/NAS MERIDIAN MS/63043

10. **PERSONNEL NUMBERS:** Host activities are responsible for totalling the personnel numbers for all of their tenant commands, even if the tenant command has been asked to separately report the data. The tenant totals here should match the total tally for the tenant listing provided subsequently in this Data Call (see Tenant Activity list). (Civilian count shall include Appropriated Fund personnel only.)

On Board Count as of 01 January 1994

	Officer / Students	Enlisted / Students	Civilian (Approp)	
• Reporting Command	<u>30 / 0</u>	<u>393 / 0</u>	<u>262</u> ²⁵¹	<i>Ad CMT N15 2/8/94</i>

BRAC-95 DC 1/NAS MERIDIAN MS/63043

12. **TENANT ACTIVITY LIST:** This list must be all-inclusive. Tenant activities are to ensure that their host is aware of their existence and any "subleasing" of space. This list should include the name and UIC(s) of all organizations, shore commands and homeported units, active or reserve, DOD or non-DOD (include commercial entities). The tenant listing should be reported in the format provide below, listed in numerical order by UIC, separated into the categories listed below. Host activities are responsible for including authorized personnel numbers, as of **30 September 1994**, for all tenants, even if those tenants have also been asked to provide this information on a separate Data Call. (Civilian count shall include Appropriated Fund personnel only.)

ALL REAL ESTATE OCCUPIED IS GOVERNMENT-OWNED INCLUDING BOTH CLASS 1 AND CLASS 2 PROPERTIES. NO TENANT LEASES OR SUB-LEASES EXIST.

• **Tenants residing on main complex (shore commands)**

13. **REGIONAL SUPPORT:** Identify your relationship with other activities, not reported as a host/tenant, for which you provide support. Again, this list should be all-inclusive. The intent of this question is capture the full breadth of the mission of your command and your customer/supplier relationships. Include in your answer any Government Owned/Contractor Operated facilities for which you provide administrative oversight and control.

Activity name	Location	Support function (include mechanism such as ISSA, MOU, etc.)
Columbus AFB, 14th Flying Trg Wing (ATC)	Columbus AFB, MS	USAF/USN Joint-use of SEARAY Target Range/ISSA (owned by Navy) and OLF ALPHA (owned by Air Force)/LTR of Agreement.
Columbus Air Force Base, MS	Columbus, MS	Provides Search and Rescue (SAR) services as required.
Navy Reserve Center	Jackson, MS	NASMERs ROICC Office provides contract administration.
Army Reserve Centers	Alabama & Mississippi	NASMERs ROICC Office provides Small Purchase Contract administration for contracts under \$25K.
Lauderdale Emergency Management Agency (LEMA)	Lauderdale County, MS and east central MS	Provides evacuation and search and rescue (SAR) services in natural disasters, as deemed necessary by CTW-1.
Mississippi Air National Guard components	Meridian, MS	NASMERs Navy Oceanographic Command Detachment provides DD-175 flight plan briefs via telephone.
Meridian Municipal Airport; Air National Guard unit, 186th Air Refueling Group; and flights from Columbus AFB	Meridian and Columbus, MS	NASMERs Federal Aviation Administration (FAA) provides ATC support. FAA radar tower located at NAS Meridian.
Drug Enforcement Agency (DEA)	Varies	DEA aircraft routinely stage out of NAS Meridian during counterdrug operations.
MS ANG 186th Air Refueling Group / ISSA	Key Field, Meridian, MS	Provides housing, space available; munitions storage; subsistence during authorized; oil analysis; fuel, oils, lubs, chemicals; and supply support.
US Army Jackson Dist Recruiting Cmd / ISSA	East central MS	Provides housing, space available; alcohol/ drug testing; and medical/dental.
US Air Force 3548th Recruiting Squadron / ISSA	East central MS	Provides housing, space available; and medical/dental.

<p>Cities of Meridian, Marion, and DeKalb, MS; Kemper and Lauderdale Counties, MS; and Mississippi Forestry Commission.</p>	<p>East central MS</p>	<p>Provides firefighting and emergency MEDIVAC support.</p>
<p>CNATRA Squadrons</p>	<p>Varies</p>	<p>Provides TA-4 aircraft maintenance support on carrier qualification dets.</p>
<p>Air National Guard, Key Field</p>	<p>Meridian, MS</p>	<p>Provides aircraft parking support.</p>
<p>Transient reserve/ military units</p>	<p>Units enroute thru east central MS</p>	<p>Provides lodging and refueling point.</p>
<p>Various coastal bases located in Florida, Texas, Louisiana, Mississippi, Georgia, South Carolina, etc.</p>	<p>Various locations</p>	<p>Provides hurricane evacuation point for weather threatened aircraft and personnel.</p>

BRAC-95 DC 1/NAS MERIDIAN MS/63043

14. **FACILITY MAPS:** This is a primary responsibility of the plant account holders/host commands. Tenant activities are not required to comply with submission if it is known that your host activity has complied with the request. Maps and photos should not be dated earlier than 01 January 1991, unless annotated that no changes have taken place. Any recent changes should be annotated on the appropriate map or photo. Date and label all copies.

- **Local Area Map.** This map should encompass, at a minimum, a 50 mile radius of your activity. Indicate the name and location of all DoD activities within this area, whether or not you support that activity. Map should also provide the geographical relationship to the major civilian communities within this radius. (Provide 12 copies.)

- **Installation Map / Activity Map / Base Map / General Development Map / Site Map.** Provide the most current map of your activity, clearly showing all the land under ownership/control of your activity, whether owned or leased. Include all outlying areas, special areas, and housing. Indicate date of last update. Map should show all structures (numbered with a legend, if available) and all significant restrictive use areas/zones that encumber further development such as HERO, HERP, HERF, ESQD arcs, agricultural/forestry programs, environmental restrictions (e.g., endangered species). (Provide in two sizes: 36"x 42" (2 copies, if available); and 11"x 17" (12 copies).)

- **Aerial photo(s).** Aerial shots should show all base use areas (both land and water) as well as any local encroachment sites/issues. You should ensure that these photos provide a good look at the areas identified on your Base Map as areas of concern/interest - remember, a picture tells a thousand words. Again, date and label all copies. (Provide 12 copies of each, 8½"x 11".)

- **Air Installations Compatible Use Zones (AICUZ) Map.** (Provide 12 copies.)

* **ENCLOSURES (12 EACH):**

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

IN REPLY REFER TO

1542
Ser N889JG/4U661666
20 Jul 1994

From: Chief of Naval Operations
Subj: PILOT AND NAVAL FLIGHT OFFICER TRAINING RATES, FY 94-99
Ref: (a) CNO ltr 1542 Ser N889J6/3U658748 of 20 Sep 1993
Encl: (1) Pilot Training Rates (PTR), FY 94-99
(2) Naval Flight Officer Training Rates (NFOTR), FY 94-99

1. This letter modifies and supersedes reference (a). Enclosures are effective on receipt and reflect planned production goals for FY 94-99. These goals are intended to resolve current pool excesses, balance ongoing transitions and new production with FRS output and return to steady state force mix of 10 CVWs, 12 VP Squadrons and appropriate force support for 330 ships in FY 97.

2. Significant changes include:

- Increase VFA pilot manning from 17 to 19/squadron
- Reduction from 15 to 12 VP squadrons
- Decom of VAW 122
- Realignment of E2/C2 pilot career paths
- Adjustment for Helo pools
- WSO curriculum approved/20 to 40 plus up of FMS NFOTR

3. OPNAV point of contact is Captain Scott Krajnik, N889G/J, A/V 224-6010/6013, commercial 703-614-6010/3.

**BRAC-95 DATA CALL 65
ECONOMIC AND COMMUNITY INFRASTRUCTURE DATA**

Activity Identification: Please complete the following table, identifying the activity for which this response is being submitted.

Activity Name:	NAVAL AIR STATION, MERIDIAN, MS
UIC:	63043
Major Claimant:	CNATRA/CNET

General Instructions/Background:

Information requested in this data call is required for use by the Base Structure Evaluation Committee (BSEC), in concert with information from other data calls, to analyze both the impact that potential closure or realignment actions would have on a local community and the impact that relocations of personnel would have on communities surrounding receiving activities. In addition to Cost of Base Realignment Actions (COBRA) analyses which incorporate standard Department of the Navy (DON) average cost factors, the BSEC will also be conducting more sophisticated economic and community infrastructure analyses requiring more precise, activity-specific data. For example, activity-specific salary rates are required to reflect differences in salary costs for activities with large concentrations of scientists and engineers and to address geographic differences in wage grade salary rates. Questions relating to "Community Infrastructure" are required to assist the BSEC in evaluating the ability of a community to absorb additional employees and functions as the result of relocation from a closing or realigning DON activity.

Due to the varied nature of potential sources which could be used to respond to the questions contained in this data call, a block appears after each question, requesting the identification of the source of data used to respond to the question. To complete this block, identify the source of the data provided, including the appropriate references for source documents, names and organizational titles of individuals providing information, etc. Completion of this "Source of Data" block is critical since some of the information requested may be available from a non-DoD source such as a published document from the local chamber of commerce, school board, etc. Certification of data obtained from a non-DoD source is then limited to certifying that the information contained in the data call response is an accurate and complete representation of the information obtained from the source. Records must be retained by the certifying official to clearly document the source of any non-DoD information submitted for this data call.

General Instructions/Background (Continued):

The following notes are provided to further define terms and methodologies used in this data call. Please ensure that responses consistently follow this guidance:

Note 1: Throughout this data call, the term "activity" is used to refer to the DON installation that is the addressee for the data call.

Note 2: Periodically throughout this data call, questions will include the statement that the response should refer to the "area defined in response to question 1.b., (page 3)". Recognizing that in some large metropolitan areas employee residences may be scattered among many counties or states, the scope of the "area defined" may be limited to the sum of:

- those counties that contain government (DoD) housing units (as identified in 1.b.2)), and,
- those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.

Note 3: Responses to questions referring to "civilians" in this data call should reflect federal civil service appropriated fund employees.

1. Workforce Data

a. **Average Federal Civilian Salary Rate.** Provide the projected FY 1996 average gross annual appropriated fund civil service salary rate for the activity identified as the addressee in this data call. This rate should include all cash payments to employees, and exclude non-cash personnel benefits such as employer retirement contributions, payments to former employees, etc.

Average Appropriated Fund Civilian Salary Rate:	32,250 \$ 32,140.00
---	-----------------------------------

*

AM
CHATRA N72
7/14/94

Source of Data (1.a. Salary Rate): Data provided by Comptroller, NAS Meridian using projected FY96 Object Class II.

* ACTUAL FY93 CPRRS DATA, CIVILIAN PAY RAISES FOR FY94 (3.9%), FY95 (1.6%), FY96 (2.2%)

BRAC-95 DC 65/NAS MERIDIAN MS/UTC: 63043

b. Location of Residence. Complete the following table to identify where employees live. Data should reflect current workforce.

1) Residency Table. Identify residency data, by county, for both military and civilian (civil service) employees working at the installation (including, for example, operational units that are homeported or stationed at the installation). For each county listed, also provide the estimated average distance from the activity, in miles, of employee residences and the estimated average length of time to commute one-way to work. For the purposes of displaying data in the table, any county(s) in which 1% or fewer of the activity's employees reside may be consolidated as a single line entry in the table, titled "Other".

County of Residence	State	No. of Employees Residing in County		Percentage of Total Employees	Average Distance From Base (Miles)	Average Duration of Commute (Minutes)
		Military	Civilian			
LAUDERDALE	MS	767	291	94%	18	20-25
KEMPER	MS	1	32	3%	20	25-30
NEWTON	MS	2	19	2%	30	35-45
OTHERS (CLARKE/NESHOBA/NOXUBEE/WINSTON/ETC)	MS	2	16	1%	25-35	30-50

= 100%

As discussed in Note 2 on Page 2, subsequent questions in the data call refer to the "area defined in response to question 1.b., (page 3)". In responding to these questions, the scope of the "area defined" may be limited to the sum of: a) those counties that contain government (DoD) housing units (as identified below), and, b) those counties closest to the activity which, in the aggregate, include the residences of 80% or more of the activity's employees.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

2) Location of Government (DoD) Housing. If some employees of the base live in government housing, identify the county(s) where government housing is located:

LAUDERDALE COUNTY, MS

Source of Data (1.b. 1) & 2) Residence Data): 1.B.1: Military data provided by PSD Meridian. Civilian data provided by David Litton, Human Resources Officer, NAS Meridian. 1.B.2 Data on Plant Account Records filed at Public Works Dept, NAS Meridian.

c. Nearest Metropolitan Area(s). Identify all major metropolitan area(s) (i.e., population concentrations of 100,000 or more people) which are within 50 miles of the installation. If no major metropolitan area is within 50 miles of the base, then identify the nearest major metropolitan area(s) (100,000 or more people) and its distance(s) from the base.

City	County	Distance from base (miles)
JACKSON, MS	HINDS	111
TUSCALOOSA, AL	TUSCALOOSA	111

Source of Data (1.c. Metro Areas): Mileage provided by PSD from official Table of Distances.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

d. Age of Civilian Workforce. Complete the following table, identifying the age of the activity's civil service workforce.

Age Category	Number of Employees	Percentage of Employees
16 - 19 Years	4	1.1
20 - 24 Years	13	3.6
25 - 34 Years	51	14.3
35 - 44 Years	95	26.5
45 - 54 Years	122	34.1
55 - 64 Years	64	17.9
65 or Older	9	2.5
TOTAL	358	100 %

Source of Data (1.d.) Age Data): Data provided by David Litton, Human Resources Officer, NAS Meridian.

e. Education Level of Civilian Workforce

1) Education Level Table. Complete the following table, identifying the education level of the activity's civil service workforce.

Last School Year Completed	Number of Employees	Percentage of Employees
8th Grade or less	0	0
9th through 11th Grade	6	1.7
12th Grade or High School Equivalency	175	48.8 48.9
1-3 Years of College	134	37.5 37.4
4 Years of College (Bachelors Degree)	30	8.4
5 or More Years of College (Graduate Work)	13	3.6
TOTAL	358	100 %

*Started
CWER
N443X
7/19/94*

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

2) Degrees Achieved. Complete the following table for the activity's civil service workforce. Identify the number of employees with each of the following degrees, etc. To avoid double counting, only identify the highest degree obtained by a worker (e.g., if an employee has both a Master's Degree and a Doctorate, only include the employee under the category "Doctorate").

Degree	Number of Civilian Employees
Terminal Occupation Program - Certificate of Completion, Diploma or Equivalent (for areas such as technicians, craftsmen, artisans, skilled operators, etc.)	9
Associate Degree	29
Bachelor Degree	27
Masters Degree	10
Doctorate	2

Source of Data (1.e.1) and 2) Education Level Data): Data provided by David Litton, Human Resources Officer, NAS Meridian
--

f. Civilian Employment By Industry. Complete the following table to identify by "industry" the type of work performed by civil service employees at the activity. The intent of this table is to attempt to stratify the activity civilian workforce using the same categories of industries used to identify private sector employment. Employees should be categorized based on their primary duties. Additional information on categorization of private sector employment by industry can be found in the Office of Management and Budget Standard Industrial Classification (SIC) Manual. However, you do not need to obtain a copy of this publication to provide the data requested in this table.

Note the following specific guidance regarding the "Industry Type" codes in the first column of the table: Even though categories listed may not perfectly match the type of work performed by civilian employees, please attempt to assign each civilian employee to one of the "Industry Types" identified in the table. However, only use the Category 6, "Public Administration" sub-categories when none of the other categories apply. Retain supporting data used to construct this table at the activity-level, in case questions arise or additional information is required at some future time. **Leave shaded areas blank.**

Industry	SIC Codes	No. of Civilians	% of Civilians
1. Agriculture, Forestry & Fishing	01-09	1	.3
2. Construction (includes facility maintenance and repair)	15-17	21	5.9

g. Civilian Employment by Occupation. Complete the following table to identify the types of "occupations" performed by civil service employees at the activity. Employees should be categorized based on their primary duties. Additional information on categorization of employment by occupation can be found in the Department of Labor Occupational Outlook Handbook. However, you do not need to obtain a copy of this publication to provide the data requested in this table.

Note the following specific guidance regarding the "Occupation Type" codes in the first column of the table: Even though categories listed may not perfectly match the type of work performed by civilian employees, please attempt to assign each civilian employee to one of the "Occupation Types" identified in the table. Refer to the descriptions immediately following this table for more information on the various occupational categories. Retain supporting data used to construct this table at the activity-level, in case questions arise or additional information is required at some future time. Leave shaded areas blank.

Source of Data (1.g.) Classification By Occupation Data): Data provided from the Efficiency Review of JUN 94 by Barbara Pearson, Management Analyst, NASMER.

BRAC-95 DC 65/NAS MERIDIAN MS/UTC: 63043

Description of Occupational Categories used in Table 1.g. The following list identifies public and private sector occupations included in each of the major occupational categories used in the table. Refer to these examples as a guide in determining where to allocate appropriated fund civil service jobs at the activity.

1. **Executive, Administrative and Management.** Accountants and auditors; administrative services managers; budget analysts; construction and building inspectors; construction contractors and managers; cost estimators; education administrators; employment interviewers; engineering, science and data processing managers; financial managers; general managers and top executives; chief executives and legislators; health services managers; hotel managers and assistants; industrial production managers; inspectors and compliance officers, except construction; management analysts and consultants; marketing, advertising and public relations managers; personnel, training and labor relations specialists and managers; property and real estate managers; purchasing agents and managers; restaurant and food service managers; underwriters; wholesale and retail buyers and merchandise managers.
2. **Professional Specialty.** Use sub-headings provided.
3. **Technicians and Related Support.** Health Technologists and Technicians sub-category - self-explanatory. Other Technologists sub-category includes aircraft pilots; air traffic controllers; broadcast technicians; computer programmers; drafters; engineering technicians; library technicians; paralegals; science technicians; numerical control tool programmers.
4. **Administrative Support & Clerical.** Adjusters, investigators and collectors; bank tellers; clerical supervisors and managers; computer and peripheral equipment operators; credit clerks and authorizers; general office clerks; information clerks; mail clerks and messengers; material recording, scheduling, dispatching and distributing; postal clerks and mail carriers; records clerks; secretaries; stenographers and court reporters; teacher aides; telephone, telegraph and teletype operators; typists, word processors and data entry keyers.
5. **Services.** Use sub-headings provided.
6. **Agricultural, Forestry & Fishing.** Self explanatory.
7. **Mechanics, Installers and Repairers.** Aircraft mechanics and engine specialists; automotive body repairers; automotive mechanics; diesel mechanics; electronic equipment repairers; elevator installers and repairers; farm equipment mechanics; general maintenance mechanics; heating, air conditioning and refrigeration technicians; home appliance and power tool repairers, industrial machinery repairers; line installers and cable splicers; millwrights; mobile heavy equipment mechanics; motorcycle, boat and small engine mechanics; musical instrument repairers and tuners; vending machine servicers and repairers.
8. **Construction Trades.** Bricklayers and stonemasons; carpenters; carpet installers; concrete masons and terrazzo workers; drywall workers and lathers; electricians; glaziers; highway maintenance; insulation workers; painters and paperhangers; plasterers; plumbers and pipefitters; roofers; sheet metal workers; structural and reinforcing ironworkers; tilesetters.
9. **Production Occupations.** Assemblers; food processing occupations; inspectors, testers and graders; metalworking and plastics-working occupations; plant and systems operators, printing occupations; textile, apparel and furnishings occupations; woodworking occupations; miscellaneous production operations.
10. **Transportation & Material Moving.** Busdrivers; material moving equipment operators; rail transportation occupations; truckdrivers; water transportation occupations.
11. **Handlers, Equipment Cleaners, Helpers and Laborers** (not included elsewhere). Entry level jobs not requiring significant training.

BRAC-95 DC 65/NAS MERIDIAN MS/UTC: 63043

h. Employment of Military Spouses. Complete the following table to provide estimated information concerning **military spouses** who are also employed in the area defined in response to question 1.b., above. **Do not fill in shaded area.**

1. Percentage of Military Employees Who Are Married:	69%
2. Percentage of Military Spouses Who Work Outside of the Home:	50%
3. Break out of Spouses' Location of Employment (Total of rows 3a. through 3d. should equal 100% and reflect the number of spouses used in the calculation of the "Percentage of Spouses Who Work Outside of the Home".	
3a. Employed "On-Base" - Appropriated Fund:	11%
3b. Employed "On-Base" - Non-Appropriated Fund:	19%
3c. Employed "Off-Base" - Federal Employment:	3%
3d. Employed "Off-Base" - Other Than Federal Employment	67%

<p>Source of Data (1.h.) Spouse Employment Data): Survey conducted JUN 94 by NASMER BRAC Coordinator to obtain data. PSD Meridian provided listing identifying married and single personnel. <u>NOTE:</u> Survey was completed by only 740 MILPERS available out of 767 total. 240 MILPERS are single.</p>
--

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

2. Infrastructure Data. For each element of community infrastructure identified in the two tables below, rate the community's ability to accommodate the relocation of additional functions and personnel to your activity. Please complete each of the three columns listed in the table, reflecting the impact of various levels of increase (20%, 50% and 100%) in the number of personnel working at the activity (and their associated families). In ranking each category, use one of the following three ratings:

- A - Growth can be accommodated with little or no adverse impact to existing community infrastructure and at little or no additional expense.
- B - Growth can be accommodated, but will require some investment to improve and/or expand existing community infrastructure.
- C - Growth either cannot be accommodated due to physical/environmental limitations or would require substantial investment in community infrastructure improvements.

Table 2.a., "Local Communities": This first table refers to the local community (i.e., the community in which the base is located) and its ability to meet the increased requirements of the installation.

Table 2.b., "Economic Region": This second table asks for an assessment of the infrastructure of the economic region (those counties identified in response to question 1.b., (page 3) - taken in the aggregate) and its ability to meet the needs of additional employees and their families moving into the area.

For both tables, annotate with an asterisk (*) any categories which are wholly supported on-base, i.e., are not provided by the local community. These categories should also receive an A-B-C rating. Answers for these "wholly supported on-base" categories should refer to base infrastructure rather than community infrastructure.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

a. **Table A: Ability of the local community to meet the expanded needs of the base.**

1) Using the A - B - C rating system described above, complete the table below.

Category	20% Increase	50% Increase	100% Increase
Off-Base Housing	A	B	B
Schools - Public	A	A	A
Schools - Private	A	A	A
Public Transportation - Roadways	A	A	A
Public Transportation - Buses/Subways	A	A	A
Public Transportation - Rail	A	A	A
Fire Protection	A	A	A
Police	A	A	A
Health Care Facilities	A	A	A
Utilities:	A	A	A
Water Supply	A	A	A
Water Distribution	A	A	A
Energy Supply	A	A	A
Energy Distribution	A	A	A
Wastewater Collection	A	A	A
Wastewater Treatment	A	A	A
Storm Water Collection	A	A	A
Solid Waste Collection and Disposal	A	A	A
Hazardous/Toxic Waste Disposal	A	A	A
Recreational Activities	A	A	A

Remember to mark with an asterisk any categories which are wholly supported on-base.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

2) For each rating of "C" identified in the table on the preceding page, attach a brief narrative explanation of the types and magnitude of improvements required and/or the nature of any barriers that preclude expansion.

NO "C" RATINGS.

Source of Data (2.a. 1) & 2) - Local Community Table): Provided by the Meridian/Lauderdale County Partnership, Dorothy Allen, and the City of Meridian, Maureen Lofton.

b. **Table B: Ability of the region described in the response to question 1.b. (page 3) (taken in the aggregate) to meet the needs of additional employees and their families relocating into the area.**

1) Using the A - B - C rating system described above, complete the table below.

Category	20% Increase	50% Increase	100% Increase
Off-Base Housing	A	A	B
Schools - Public	A	A	A
Schools - Private	A	A	A
Public Transportation - Roadways	A	A	A
Public Transportation - Buses/Subways	A	A	A
Public Transportation - Rail	A	A	A
Fire Protection	A	A	A
Police	A	A	A
Health Care Facilities	A	A	A
Utilities:	A	A	A
Water Supply	A	A	A
Water Distribution	A	A	A
Energy Supply	A	A	A
Energy Distribution	A	A	A
Wastewater Collection	A	A	A
Wastewater Treatment	A	A	A
Storm Water Collection	A	A	A
Solid Waste Collection and Disposal	A	A	A
Hazardous/Toxic Waste Disposal	A	A	A
Recreation Facilities	A	A	A

Remember to mark with an asterisk any categories which are wholly supported on-base.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

2) For each rating of "C" identified in the table on the preceding page, attach a brief narrative explanation of the types and magnitude of improvements required and/or the nature of any barriers that preclude expansion.

NO "C" RATINGS.

Source of Data (2.b. 1) & 2) - Regional Table): Provided by the Meridian/Lauderdale County Partnership and the City of Meridian.

3. Public Facilities Data:

- a. **Off-Base Housing Availability.** For the counties identified in the response to question 1.b. (page 3), in the aggregate, estimate the current average vacancy rate for community housing. Use current data or information identified on the latest family housing market analysis. For each of the categories listed (rental units and units for sale), combine single family homes, condominiums, townhouses, mobile homes, etc., into a single rate:

Rental Units:

The latest Apartment Survey dated September 1989 showed a 4.6% vacancy rate in apartments within commuting distance of the base. Since that time the apartment assets have increased from 1822 units to 1992 units due to the construction of new apartment complexes. At the present time there are less than 1% available for rent. Combining all types/categories of rental units available (houses, apartments, townhouses, etc.), there are 64 units available for rent in Lauderdale County.

Units for Sale:

Based on information received from the Meridian Board of Realtors, there are 228 houses listed for sale on the Multiple Listing and 28 other houses listed in the newspaper and Housing Referral Services listings within Lauderdale County bringing the total housing units available for sale to 256.

Source of Data (3.a. Off-Base Housing): Data provided by NASMER Family Housing Office staff through contact with and referencing the Meridian Board of Realtors, the Meridian Star newspaper, Housing Referral Office listings, Apartment Complex and Mobile Home Park listings.

b. Education.

1) Information is required on the current capacity and enrollment levels of school systems serving employees of the activity. Information should be keyed to the counties identified in the response to question 1.b. (page 3).

School District	County	Number of Schools			Enrollment		Pupil-to-Teacher Ratio		Does School District Serve Gov't Housing Units?
		Elementary	Middle	High	Current	Max. Capacity	Current	Max. Ratio	
MERIDIAN	LAUDERDALE	7	4	1	7,529	10,000	STATE REQ **	STATE REQ **	NO
LAUDERDALE COUNTY	LAUDERDALE	4	2	4	7,500	8,519	STATE REQ **	STATE REQ **	YES

* Answer "Yes" in this column if the school district in question enrolls students who reside in government housing.

**** PUPIL-TO-TEACHER RATIO AS REQUIRED BY THE STATE OF MISSISSIPPI:**

K-4: 27/1

5-12: 33/1

7-12: MAXIMUM 150 STUDENTS

Source of Data (3.b.1) Education Table): Data provided by Diane Crawford with the Meridian City Schools and Nancy Byrd with the Lauderdale County School Superintendent's Office.

2) Are there any on-base "Section 6" Schools? If so, identify number of schools and current enrollment.

NO.

Source of Data (3.b.2) On-Base Schools): No schools exist on-base.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

3) For the counties identified in the response to question 1.b. (page 3), in the aggregate, list the names of undergraduate and graduate colleges and universities which offer certificates, Associate, Bachelor or Graduate degrees :

**MERIDIAN COMMUNITY COLLEGE
MISSISSIPPI STATE UNIVERSITY - MERIDIAN BRANCH
UNIVERSITY OF SOUTHERN MISSISSIPPI - MERIDIAN NURSING PROGRAM**

Source of Data (3.b.3) Colleges): Data provided by the Navy Campus for Achievement Office, NAS Meridian.

4) For the counties identified in the response to question 1.b. (page 3), in the aggregate, list the names and major curriculums of vocational/technical training schools:

**MERIDIAN COMMUNITY COLLEGE - VOCATIONAL/TECHNICAL PROGRAMS
INCLUDES BUSINESS, HEALTH, AND INDUSTRIAL PROGRAMS.**

Source of Data (3.b.4) Vo-tech Training): Data provided by Mrs. Goodman, Dean of Occupational Education at MCC VO/Tech.

c. **Transportation.**

1) Is the activity served by public transportation?

	<u>Yes</u>	<u>No</u>
Bus:	X	
Rail:		X **
Subway:		X **
Ferry:		X **

**** NOTE: RAIL IS NOT AVAILABLE DIRECTLY TO THE BASE, BUT IS AVAILABLE IN DOWNTOWN MERIDIAN. SUBWAY AND FERRY NOT APPLICABLE AT NAS MERIDIAN.**

Source of Data (3.c.1) Transportation): Sue Van Court, Public Works Dept, NAS Meridian.

2) Identify the location of the nearest passenger railroad station (long distance rail service, not commuter service within a city) and the distance from the activity to the station.

MERIDIAN RAILROAD DEPOT IS LOCATED IN DOWNTOWN MERIDIAN, 16.7 MILES FROM NAS MERIDIAN.

Source of Data (3.c.2) Transportation): Measured by Sue Van Court, Public Works Dept, NAS Meridian.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

3) Identify the name and location of the nearest commercial airport (with public carriers, e.g., USAIR, United, etc.) and the distance from the activity to the airport.

MERIDIAN REGIONAL AIRPORT IS LOCATED 22 MILES FROM NAS MERIDIAN.

Source of Data (3.c.3) Transportation): Measured by Sue Van Court, Public Works Dept, NAS Meridian.

4) How many carriers are available at this airport?

TWO CARRIERS: ASA and NORTHWEST AIR LINK.

Source of Data (3.c.4) Transportation): Data provided by Meridian Regional Airport Manager's Officer.

5) What is the Interstate route number and distance, in miles, from the activity to the nearest Interstate highway?

INTERSTATE 20/59 IS 16.3 MILES FROM NAS MERIDIAN.

Source of Data (3.c.5) Transportation): Measured by Sue Van Court, Public Works Dept, NAS Meridian.

6) Access to Base:

a) Describe the quality and capacity of the road systems providing access to the base, specifically during peak periods. (Include both information on the area surrounding the base and information on access to the base, e.g., numbers of gates, congestion problems, etc.)

EXCELLENT FOUR LANE ACCESS AND CONDITIONS IN A RURAL SETTING. NO TRAFFIC CONGESTION DURING PEAK PERIODS. PER ENVIRONMENTAL ASSESSMENT DATED FEB 92, THE INSTITUTE OF TRANSPORTATION ENGINEERS (ITE) REPORTED LOCAL ROADWAYS ARE CURRENTLY OPERATING AT ACCEPTABLE LEVELS OF SERVICE IN THE VICINITY OF THE BASE.

b) Do access roads transit residential neighborhoods?

NO.

c) Are there any easements that preclude expansion of the access road system?

NO.

d) Are there any man-made barriers that inhibit traffic flow (e.g., draw bridges, etc.)?

NO.

Source of Data (3.c.6) Transportation): Data provided by the Engineering Division, Public Works Dept, NAS Meridian.

- d. **Fire Protection/Hazardous Materials Incidents.** Does the activity have an agreement with the local community for fire protection or hazardous materials incidents? Explain the nature of the agreement and identify the provider of the service.

YES. NAS MERIDIAN HAS FIVE MUTUAL AID FIRE FIGHTING ASSISTANCE AGREEMENTS WITH THE CITY OF MERIDIAN, THE CITY OF MARION, THE CITY OF DEKALB, THE COUNTY OF LAUDERDALE, AND THE COUNTY OF KEMPER.

Source of Data (3.d. Fire/Hazmat): Data provided by NAS Meridian's Fire Chief with copies of the agreements on file.

e. **Police Protection.**

1) What is the level of legislative jurisdiction held by the installation?

PROPRIETARY INTEREST (REGULATORY AUTHORITY) PER U.S. CODE 40, SECTION 255.

2) If there is more than one level of legislative jurisdiction for installation property, provide a brief narrative description of the areas covered by each level of legislative jurisdiction and whether there are separate agreements for local law enforcement protection.

N/A. ONLY ONE LEVEL.

3) Does the activity have a specific written agreement with local law enforcement concerning the provision of local police protection?

NO. CONCURRENT JURISDICTION IN CRIMINAL MATTERS.

4) If agreements exist with more than one local law enforcement entity, provide a brief narrative description of whom the agreement is with and what services are covered.

N/A.

5) If military law enforcement officials are routinely augmented by officials of other federal agencies (BLM, Forest Service, etc.), identify any written agreements covering such services and briefly describe the level of support received.

STATE GAME WARDEN PER NASMERINST 1710.5M. ALL GAME VIOLATIONS ARE TURNED OVER TO STATE GAME WARDENS WITH COMMANDING OFFICER APPROVAL.

<p>Source of Data (3.e. 1) - 5) - Police): Data provided by NAS Meridian's Security Officer.</p>

f. **Utilities.**

1) Does the activity have an agreement with the local community for water, refuse disposal, power or any other utility requirements? Explain the nature of the agreement and identify the provider of the service.

YES.

WATER: ALTHOUGH NAS MERIDIAN HAS A GOVERNMENT OWNED AND OPERATED POTABLE WATER PLANT WHICH PROVIDES ALL STATION WATER NEEDS, NORTH LAUDERDALE WATER ASSOCIATION HAS AN INTERCONNECTION AGREEMENT WHICH ALLOWS WATER SERVICES WHEN REQUIRED TO BE TRANSFERRED BETWEEN THE BASE AND THE LOCAL WATER SUPPLIER WHICH INCLUDES TRANSFERS FROM THE BASE TO THE LOCAL WATER SUPPLIER.

ELECTRICITY: NAS MERIDIAN CONTRACTS WITH EAST MISSISSIPPI ELECTRIC POWER COMPANY FOR ELECTRICAL POWER SERVICES.

NATURAL GAS: NAS MERIDIAN CONTRACTS WITH MISSISSIPPI VALLEY GAS USING THE SPOT GAS RATE.

REFUSE DISPOSAL: WASTE MANAGEMENT OF MISSISSIPPI IS THE CONTRACTOR FOR REFUSE COLLECTION AND DISPOSAL SERVICES.

2) Has the activity been subject to water rationing or interruption of delivery during the last five years? If so, identify time period during which rationing existed and the restrictions imposed. Were activity operations affected by these situations? If so, explain extent of impact.

NO.

3) Has the activity been subject to any other significant disruptions in utility service, e.g., electrical "brown outs", "rolling black outs", etc., during the last five years? If so, identify time period(s) covered and extent/nature of restrictions/disruption. Were activity operations affected by these situations? If so, explain extent of impact.

NO.

Source of Data (3.f. 1) - 3) Utilities): Contracts, agreements and records on file at Public Works Dept, NAS Meridian.

BRAC-95 DC 65/NAS MERIDIAN MS/UIC: 63043

- 4. Business Profile.** List the top ten employers in the geographic area defined by your response to question 1.b. (page 3), taken in the aggregate, (include your activity, if appropriate):

Employer	Product/Service	No. of Employees
1. NAVAL AIR STATION, MERIDIAN	U.S. NAVY PILOT TRAINING BASE	3337
2. PEAVEY ELECTRONICS	ELECTRONIC INSTRUMENT MFG	1200
3. RUSH FOUNDATION HOSPITAL	HOSPITAL	1068
4. MERIDIAN PUBLIC SCHOOLS	EDUCATION	1051
5. EAST MISSISSIPPI STATE HOSPITAL	HOSPITAL	940
6. JEFF ANDERSON REGIONAL MEDICAL CENTER	HOSPITAL	808
7. LAUDERDALE COUNTY SCHOOLS	EDUCATION	800
8. RILEY MEMORIAL HOSPITAL	HOSPITAL	782
9. DELCO AMERICA	AUTOMOTIVE PARTS MFG	584
10. CITY OF MERIDIAN	MUNICIPAL SERVICES	580

Source of Data (4. Business Profile): Data provided by the Meridian/Lauderdale County Partnership.

- 5. Other Socio-Economic Impacts.** For each of the following areas, describe other recent (past 5 years), on-going or projected economic impacts (both positive and negative) on the geographic region defined by your response to question 1.b. (page 3), in the aggregate:

- a. Loss of Major Employers:

GENERALLY CAUSED BY CUTBACKS IN PRODUCT NEED.

- b. Introduction of New Businesses/Technologies:

ESTABLISHED JOB RELATED TRAINING PROGRAM BETWEEN MERIDIAN COMMUNITY COLLEGE AND PEAVEY ELECTRONICS.

ESTABLISHED BUSINESS TECHNOLOGY CENTER.

NUMEROUS SMALL BUSINESSES HAVE BEEN AND CONTINUE TO BE ESTABLISHED.

- c. Natural Disasters:

THE MOST COMMON NATURAL DISASTERS IN THE AREA ARE TORNADOS. WHILE DEVASTATING TO INDIVIDUALS, IN THE POSITIVE SENSE, LOCAL CONTRACTORS AND MERCHANTS PROFIT DUE TO THE REBUILDING REQUIRED.

- d. Overall Economic Trends:

THE REGION'S ECONOMY REFLECTS THE ECONOMY OF THE COUNTRY; HOWEVER, OUR UNEMPLOYEMENT HAS REMAINED STABLE (LAUDERDALE COUNTY IS 6.5% AS OF JUN 94). SINCE MERIDIAN/LAUDERDALE COUNTY'S FOCUS IS ON THE CONTINUED DEVELOPMENT OF SMALL TO MEDIUM SIZED BUSINESSES, THE ECONOMIC TREND OUTLOOK IS EXCELLENT.

Source of Data (5. Other Socio/Econ): Data provided by Meridian/Lauderdale County Partnership.

6. **Other.** Identify any contributions of your activity to the local community not discussed elsewhere in this response.

NAS Meridian is Lauderdale County's largest employer and represents an influx of millions of dollars to the local economy each year. Navy personnel at NAS Meridian and the residents of Lauderdale county have enjoyed a cooperative relationship since the base's creation in 1962. The military families assigned to NAS Meridian are active members of the community participating in many civic projects and events, affiliating with local churches and organizations, and supporting the local schools which their children attend.

The Naval Air Station provides helicopter search and rescue and medical evacuation services to the civilian community.

Two civic groups, the Military Liaison Committee of the Meridian Partnership Organization and the Meridian Navy League, make a concerted effort to keep the communication lines with station officials open. These groups do not operate in competition, but rather in consonance with each other. Whenever an occasion of mutual interest involving the Naval Air Station arise, the two organizations meet jointly so that all parties can be equally visible for the good of the base. They are major players in lobbying for the base.

The Navy sponsors "open house" events to acquaint area residents with the activities on the base. The Naval Air Station's 1992 Air Show was one of the largest successes in recent years with an attendance estimated at over 20,000.

The Naval Air Station provides multimillion dollar projects for small business contractors. The East Central Mississippi's Contract Procurement Center, funded by the Meridian community, assists small businesses in obtaining federal contracts and has been instrumental in expanding the contract support base at the base.

Military Spouse Employment Program is active in providing qualified skilled and unskilled labor to the City of Meridian.

The aircraft maintenance, pilot training, and other support contracts on the Naval Air Station provide the retired military community with excellent job opportunities.

NTTC sponsors the SHIPMATES Program (Staff and Students Helping Interesting People of the Meridian Area Through Enthusiastic Services). Since its origination in 1981, Navy personnel have performed thousands of hours of community service. NTTC has outlined the policy and guidance for the program which is designed to give staff and students an additional option to constructively fill their off-duty hours, become involved in the community, establish new friendships, and combat the feeling of isolation for those away from home for the first time. At the same time, personnel foster good

community relations for the Navy by providing service to the community. A partial list of the organizations and facilities they have helped includes: various community hospitals and schools, Merrehope Historical Foundation, Head Start Programs, Museum of Art, Meridian Archives, East Mississippi State Hospital, disaster victims, etc.

The Naval Air Station has adopted and actively supports three different public schools, providing many education benefits and services to the community ranging from physical improvements to facilities by base Seabees to tutoring students. One of the favorite projects of the year is providing judges for the various science fairs. Navy professionals delight in participating in the various job fairs, including those at the college level.

The base provides numerous public affairs appearances in the community, from fly-overs and SAR demonstrations to participation at the annual business expo or "Main Event" as it is called. Numerous events request the presence of the Naval Air Station's color guard and ceremonial detail squad.

The community can always count on base personnel to lift the spirits of the needy during the holiday season with the various base organizations providing food and gift drives. Navy personnel are also readily available to lend a helping hand during disasters such as tornado, flood and fire relief.

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

**DATA CALL 66
INSTALLATION RESOURCES**

Activity Information:

Activity Name:	Activity Providing Telephone Service (APTS) Meridian
UIC:	N33280
Host Activity Name (if response is for a tenant activity):	Naval Air Station, Meridian
Host Activity UIC:	N63043

General Instructions/Background. A separate response to this data call must be completed for each Department of the Navy (DON) host, independent and tenant activity which separately budgets BOS costs (regardless of appropriation), and, is located in the United States, its territories or possessions.

1. Base Operating Support (BOS) Cost Data. Data is required which captures the total annual cost of operating and maintaining Department of the Navy (DON) shore installations. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Two tables are provided. Table 1A identifies "Other than DBOF Overhead" BOS costs and Table 1B identifies "DBOF Overhead" BOS costs. These tables must be completed, as appropriate, for all DON host, independent or tenant activities which separately budget BOS costs (regardless of appropriation), and, are located in the United States, its territories or possessions. Responses for DBOF activities may need to include both Table 1A and 1B to ensure that all BOS costs, including those incurred by the activity in support of tenants, are identified. If both table 1A and 1B are submitted for a single DON activity, please ensure that no data is double counted (that is, included on both Table 1A and 1B). The following tables are designed to collect all BOS costs currently budgeted, regardless of appropriation, e.g., Operations and Maintenance, Research and Development, Military Personnel, etc. Data must reflect FY 1996 and should be reported in thousands of dollars.

a. Table 1A - Base Operating Support Costs (Other Than DBOF Overhead).

This Table should be completed to identify "Other Than DBOF Overhead" Costs. Display, in the format shown on the table, the O&M, R&D and MPN resources currently budgeted for BOS services. O&M cost data must be consistent with data provided on the BS-1 exhibit. Report only direct funding for the activity. Host activities should not include reimbursable support provided to tenants, since tenants will be separately reporting these costs. Military personnel costs should be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Add additional lines to the table (following line 2j., as necessary, to identify any additional cost elements not currently shown). Leave shaded areas of table blank.

**DATA CALL 66
INSTALLATION RESOURCES**

Table 1A - Base Operating Support Costs (Other Than DBOF Overhead)			
Activity Name: APTS Meridian			UIC: N33280
Category	FY 1996 BOS Costs (\$000)		
	Non-Labor	Labor	Total
1. Real Property Maintenance Costs:			
1a. Maintenance and Repair			
1b. Minor Construction			
1c. Sub-total 1a. and 1b.			
2. Other Base Operating Support Costs:			
2a. Utilities			
2b. Transportation			
2c. Environmental			
2d. Facility Leases			
2e. Morale, Welfare & Recreation			
2f. Bachelor Quarters			
2g. Child Care Centers			
2h. Family Service Centers			
2i. Administration			
2j. Other (Specify)			
2k. Sub-total 2a. through 2j:			
3. Grand Total (sum of 1c. and 2k.):	0	0	0

**DATA CALL 66
INSTALLATION RESOURCES**

b. Funding Source. If data shown on Table 1A reflects more than one appropriation, then please provide a break out of the total shown for the "3. Grand-Total" line, by appropriation:

<u>Appropriation</u>	<u>Amount (\$000)</u>
----------------------	-----------------------

c. Table 1B - Base Operating Support Costs (DBOF Overhead). This Table should be submitted for all current DBOF activities. Costs reported should reflect BOS costs supporting the DBOF activity itself (usually included in the G&A cost of the activity). For DBOF activities which are tenants on another installation, total cost of BOS incurred by the tenant activity for itself should be shown on this table. It is recognized that differences exist among DBOF activity groups regarding the costing of base operating support: some groups reflect all such costs only in general and administrative (G&A), while others spread them between G&A and production overhead. Regardless of the costing process, all such costs should be included on Table 1B. The Minor Construction portion of the FY 1996 capital budget should be included on the appropriate line. Military personnel costs (at civilian equivalency rates) should also be included on the appropriate lines of the table. Please ensure that individual lines of the table do not include duplicate costs. Also ensure that there is no duplication between data provided on Table 1A. and 1B. These two tables must be mutually exclusive, since in those cases where both tables are submitted for an activity, the two tables will be added together to estimate total BOS costs at the activity. Add additional lines to the table (following line 21., as necessary, to identify any additional cost elements not currently shown). Leave shaded areas of table blank.

Other Notes: All costs of operating the five Major Range Test Facility Bases at DBOF activities (even if direct RDT&E funded) should be included on Table 1B. Weapon Stations should include underutilized plant capacity costs as a DBOF overhead "BOS expense" on Table 1B..

**DATA CALL 66
INSTALLATION RESOURCES**

Table 1B - Base Operating Support Costs (DBOF Overhead)

**DATA CALL 66
INSTALLATION RESOURCES**

2. Services/Supplies Cost Data. The purpose of Table 2 is to provide information about projected FY 1996 costs for the purchase of services and supplies by the activity. (Note: Unlike Question 1 and Tables 1A and 1B, above, this question is not limited to overhead costs.) The source for this information, where possible, should be either the NAVCOMPT OP-32 Budget Exhibit for O&M activities or the NAVCOMPT UC/FUND-1/IF-4 exhibit for DBOF activities. Information must reflect FY 1996 budget data supporting the FY 1996 NAVCOMPT Budget Submit. Break out cost data by the major sub-headings identified on the OP-32 or UC/FUND-1/IF-4 exhibit, disregarding the sub-headings on the exhibit which apply to civilian and military salary costs and depreciation. Please note that while the OP-32 exhibit aggregates information by budget activity, this data call requests OP-32 data for the activity responding to the data call. Refer to NAVCOMPTINST 7102.2B of 23 April 1990, Subj: Guidance for the Preparation, Submission and Review of the Department of the Navy (DON) Budget Estimates (DON Budget Guidance Manual) with Changes 1 and 2 for more information on categories of costs identified. Any rows that do not apply to your activity may be left blank. However, totals reported should reflect all costs, exclusive of salary and depreciation.

Table 2 - Services/Supplies Cost Data	
Activity Name: APTS Meridian	UIC: N33280
Cost Category	FY 1996 Projected Costs (\$000)

Other Purchases (Contract support, etc.):	167
Total:	168

**DATA CALL 66
INSTALLATION RESOURCES**

3. Contractor Workyears.

a. On-Base Contract Workyear Table. Provide a projected estimate of the number of contract workyears expected to be **performed "on base"** in support of the installation during FY 1996. Information should represent an annual estimate on a full-time equivalency basis. Several categories of contract support have been identified in the table below. While some of the categories are self-explanatory, please note that the category "mission support" entails management support, labor service and other mission support contracting efforts, e.g., aircraft maintenance, RDT&E support, technical services in support of aircraft and ships, etc. N/A

Table 3 - Contract Workyears	
Activity Name:	UIC:
Contract Type	FY 1996 Estimated Number of Workyears On-Base
Construction:	
Facilities Support:	
Mission Support:	
Procurement:	
Other:*	
Total Workyears:	

* **Note:** Provide a brief narrative description of the type(s) of contracts, if any, included under the "Other" category.

**DATA CALL 66
INSTALLATION RESOURCES**

b. Potential Disposition of On-Base Contract Workyears. If the mission/functions of your activity were relocated to another site, what would be the anticipated disposition of the on-base contract workyears identified in Table 3.?

1) Estimated number of contract workyears which would be transferred to the receiving site (This number should reflect the number of jobs which would in the future be contracted for at the receiving site, not an estimate of the number of people who would move or an indication that work would necessarily be done by the same contractor(s)):

N/A

2) Estimated number of workyears which would be eliminated:

N/A

3) Estimated number of contract workyears which would remain in place (i.e., contract would remain in place in current location even if activity were relocated outside of the local area):

N/A

**DATA CALL 66
INSTALLATION RESOURCES**

c. "Off-Base" Contract Workyear Data. Are there any contract workyears located in the local community, but not on-base, which would either be eliminated or relocated if your activity were to be closed or relocated? If so, then provide the following information (ensure that numbers reported below do not double count numbers included in 3.a. and 3.b., above):

No. of Additional Contract Workyears Which Would Be Eliminated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)
0	

No. of Additional Contract Workyears Which Would Be Relocated	General Type of Work Performed on Contract (e.g., engineering support, technical services, etc.)

BRAC-95 CERTIFICATION

Reference: SECNAVNOTE 11000 of 08 December 1993

In accordance with policy set forth by the Secretary of the Navy, personnel of the Department of the Navy, uniformed and civilian, who provide information for use in the BRAC-95 process are required to provide a signed certification that states "I certify that the information contained herein is accurate and complete to the best of my knowledge and belief."

The signing of this certification constitutes a representation that the certifying official has reviewed the information and either (1) personally vouches for its accuracy and completeness or (2) has possession of, and is relying upon, a certification executed by a competent subordinate.

Each individual in your activity generating information for the BRAC-95 process must certify that information. Enclosure (1) is provided for individual certifications and may be duplicated as necessary. You are directed to maintain those certifications at your activity for audit purposes. For purposes of this certification sheet, the commander of the activity will begin the certification process and each reporting senior in the Chain of Command reviewing the information will also sign this certification sheet. This sheet must remain attached to this package and be forwarded up the Chain of Command. Copies must be retained by each level in the Chain of Command for audit purposes.

I certify that the information contained herein is accurate and complete to the best of my knowledge and belief.

TRAINING AIR STATION LISTING:

Type	Title	Location
AIR STATION	NAS PENSACOLA	PENSACOLA FL
AIR STATION	NAS CORPUS CHRISTI	CORPUS CHRISTI TX
AIR STATION	NAS MERIDIAN	MERIDIAN MS
AIR STATION	NAS KINGSVILLE	KINGSVILLE TX
AIR STATION	NAS WHITING FIELD	MILTON FL

Mission Requirements**A. Undergraduate Pilot/NFO Training**

1. Indicate in the table below the types of undergraduate pilot and NFO training currently conducted at your air station. Also give the number of pilots and NFOs trained in FY 1991, FY 1992, and FY 1993 at your air station .

Level/Type Training	Yes/No	PTR/NFOTR		
		FY 91	FY 92	FY 93
Officer Candidate Training	No			
Aviation Pre-flight Indoc	No			
Primary Pilot	No			
Intermediate Strike	Yes	119	202	159
Advanced Strike	Yes	125	92	123
Intermediate E2/C2	No			
Advanced E2/C2	No			
Intermediate Maritime (T-34C)	No			
Advanced Maritime	No			
Intermediate Helo (T-34C)	No			
Advanced Helo	No			
Primary NFO	No			
Intermediate NFO	No			
Tactical Navigator (TN/BN)	No			
Radar Intercept Officer (RIO)	No			
Overwater Jet Navigator (OJT)	No			

NOTE: PTR DATA PROVIDED BY CNATRA.

Mission Requirements**A. Undergraduate Pilot/NFO Training (cont.)**

2. Indicate in the table below which other types of undergraduate pilot and NFO training (if any) were conducted at your air station during the past ten years (i.e., since FY 1984) and give the year when each type training ended.

Type/Level Training	Yes/No	Year Training Ended
Officer Candidate Training	No	
Aviation Pre-flight Indoc	No	
Primary Pilot	No	
Intermediate Strike	Yes	Ongoing
Advanced Strike	Yes	Ongoing
Intermediate E2/C2	No	
Advanced E2/C2	No	
Intermediate Maritime (T-34C)	No	
Advanced Maritime	No	
Intermediate Helo (T-34C)	No	
Advanced Helo	No	
Primary NFO	No	
Intermediate NFO	No	
Advanced Navigator (NAV)	No	
Tactical Navigator (TN/BN)	No	
Radar Intercept Officer (RIO)	No	
Overwater Jet Navigator (OJT)	No	
Airborne Tactical Data System (ATDS)	No	

Mission Requirements

B. Other Training

1. Using the categories identified below, list all other officer training (i.e., non-undergraduate pilot/NFO training) by activity conducted at your air station. For each type training, give the FY 1993 throughput in terms of number of students trained that year. Also give the average number of students on board (AOB) for each activity.

CTW-1

Other Officer Training							
Activity Name	FY 1993 Throughput (students per year)						AOB
	OA	IS	SP	FO	PD	Other	
IUT - INTERMEDIATE	0	0	0	16	0	0	2.7
IUT - ADVANCED	0	0	0	25	0	0	5.6
TEST PILOT SCHOOL (TPS)	0	0	0	0	6	0	.8
FLEET REFRESHER PILOT	0	0	0	4	0	0	.88

Training Categories:

OA (Officer Acquisition) IS (Initial Skills) PD (Professional Development)
 SP (Skills Progression) FO (Functional Officer)

*Heard
 CNET N4433
 AWA
 30 APR 94*

Use the following formula to calculate "AOB:"

$$\frac{\text{Activity Throughput (OA+IS+SP+FO+PD)} \times \text{Avg Number of days each student was aboard}}{250}$$

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

Mission Requirements

B. Other Training (cont.)

2. Using the categories given below, list all enlisted training conducted at your air station. For each type training, give the FY 1993 throughput in terms of number of students trained that year. Also give the average number of students on board (AOB) for each activity.

NOTE: THE FOLLOWING SCHOOLS ARE ATTACHED TO NAVAL TECHNICAL TRAINING CENTER, MERIDIAN

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

Mission Requirements

C. Operational Squadron Support (cont.)

4. Provide the average daily number of flight operations conducted by non-training military aircraft assigned to this station and the total number of days during which these operations were conducted. If data is not normally recorded, include estimates (and identify as such). A flight operation is defined as a take-off, landing, or approach without a landing.

FY	Main Airfield		Auxiliary Field		Auxiliary Field		Auxiliary Field	
	No. Ops	No. ¹ Days	No. Ops	No. Days	No. Ops	No. Days	No. Ops	No. Days
1991	1680	237	152	50	NA	NA	NA	NA
1992	1680	237	132	50				
1993	1845	237	158	50				
1994 ²	808	119	66	25				

NOTE: These flight ops were conducted by NASMER's C-12 and UH-1.

5. List deployable aviation support units (e.g., Command & Control, Expeditionary Base Support, and Air Defense) stationed at this installation. For each type unit, give the number assigned, its mission and primary equipment items (eg., radars, trucks, etc.).

NOTE: ONLY NON-DEPLOYABLE UNITS ASSIGNED TO NAS MERIDIAN AT THIS TIME.

Type of Unit	Number of Units	Mission	Equipment Items
NA			

¹Include only days when the air station operates at normal training levels (Do not include weekends and holidays if the training rate is at minimal levels).

²Include FY 1994 data through 31 March 1994.

Mission Requirements

D. Managed Training Areas

1. List the air-to-ground training ranges, outlying airfields, auxiliary airfields, special use airspace and areas for special use that are actively managed (scheduled or controlled) by the air station.

Managed Training Assets	Management Role
SEARAY Target Range	Scheduling/Controlling Authority
OLF Joe Williams Field (BRAVO)	Scheduling/Controlling Authority
Pinehill West MOA	Scheduling Authority
Pinehill East MOA	Scheduling Authority
R-4404 A, B, C	Originating/Scheduling Authority
VR 1030, 1031, 1032, 1033	Originating/Scheduling Authority
IR 044	Originating/Scheduling Authority
Meridian One West MOA	Originating/Scheduling Authority

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

2. List other candidate installations (DoD and non-DoD) that could be considered for performing these management duties.

Asset	Installation	Reason for Consideration
R-4404 A,B,C	Columbus AFB, MS	Proximity/Mission
VR 1030,1031, 1032,1033	NAS Pensacola, FL	Utilization/Mission UTILIZATION/
IR 044	NAS Pensacola, FL	Utilization/Mission UTILIZATION/
OLF BRAVO	Columbus AFB, MS	Utilization/Mission
Meridian ONE EAST/WEST MOA	Columbus AFB, MS	Utilization/Mission

Mission Requirements

E. General Military Support

1. Does this air station currently support any joint services (i.e. counter-narcotics) air operations? If so, explain.

Yes.

CTW-1 and 14th FTW, Columbus AFB, jointly use SEARAY Target Range (R-4404). NAS Meridian provides support for Drug Enforcement Agency (DEA) detachments.

(a) If applicable, give the type and number of aircraft based at your air station that conduct these operations and the total number of sorties flown during FY 1993 in support of these operations.

Aircraft Type	Number of Aircraft	# Sorties Flown in FY 1993
NA	NA	NA

(b) If applicable, list special equipment and facility (e.g., radar surveillance systems) at your air station that directly support these operations.

Equipment/Facility	Function
NA	

2. Does this air station have a role in national air defense or any other war or peace time defense plans? If so, explain.

~~No~~ Yes.

CIATRA N3

1. AIR STATION IS COVERED UNDER "OPEN SKIES" TREATY.
2. UNDER SCATANA, A PLAN EXIST TO DEACTIVATE NAVIGATIONAL AIDS.

Mission Requirements

E. General Military Support (cont.)

3. Does this air station directly support a military or civilian area control and surveillance mission (e.g., FACSFAC, FAA support)? If so, provide details.

Yes. Meridian Regional Air Traffic Control Facility (MEI RATCF) FAA provides departure and arrival service to NAS Meridian. The RATCF also provides control service to Meridian Municipal Airport, Key Field, for arrivals and departures of military (all branches), commuters, and general aviation and air carriers. RATCF IS LOCATED ON BASE.

CNATRA N3

4. Describe the role this air station plays in the Logistics Support and Mobilization Plan (LSMP).

None.

5. List any other military support missions currently conducted at/from this air station (e.g., port of embarkation for MC personnel, other active duty/reserve personnel or logistics transfer missions).

None.

6. Are any new military missions planned for this air station?

Naval Reserve Center, Jackson, MS is programmed to relocate to NAS Meridian in FY95.

Small Arms Pistol Range programmed FY94 MILCON P-276 to support training for Regional Counterdrug Training Academy, Mississippi National Guard and other security forces.

Mission Requirements

F. Other Support

1. Does the air station have a role in a disaster assistance plan, search and rescue, or local evacuation plan? If so, describe.

Yes.

Under cooperative agreement with the Lauderdale Emergency Management Agency (LEMA), NAS Meridian provides assistance with evacuation of local civilian personnel during natural disasters. NAS Meridian will provide Emergency Response Teams capable of responding to emergencies as organizational units established along existing functional lines (i.e. medical, supply, security, public works, etc.) Included in this plan is Emergency Medical Evacuation services.

SAR and MEDEVAC: Inland search and rescue (SAR) and MEDEVAC procedures are provided for CTW-1 and are also provided for the civilian community when deemed necessary. A formal agreement for these services (MAST/Military Assistance to Safety and Transportation) is being negotiated.

HURREVAC: Under agreements with the Commanding Officer of NAS Cecil Field, FL and Commanding Officer of the 437th MAW/DOXC, Charleston AFB, SC, NAS Meridian would receive 85 FA-18s and 10 C-141s respectively if weather conditions forced an evacuation of the two bases. Other coastal facilities have also required safe haven at NAS Meridian as deemed necessary.

FIREFIGHTING ASSISTANCE: NAS Meridian has mutual aid firefighting assistance agreements with the Mississippi Forestry Commission, Lauderdale County, Kemper County, the City of Meridian, the City of Marion, and the City of DeKalb.

2. Does the air station provide any direct meteorological support to local civilian, governmental or military agencies? If so, describe.

NOCD provides weather service for Training Air Wing One operations

Yes. A Navy Oceanographic Command Detachment provides DD-175 flight plan briefs via telephone to Mississippi Air National Guard components.

*2
CNA/TRA
NS*

3. Are any new civilian or other non-DoD missions planned for this air station? If so, describe.
Yes.

Regional Counterdrug Training Academy which is operated by the National Guard is being considered for a National Counterdrug Training Academy.

BRAC-95 DC 3/NAS MERIDIAN MS/UTC: 63043

3. Describe the major air traffic structure (routes, terminal control areas, approaches, etc.) within 50 NM of each air-to-ground range, airspace, and airfield. (Provide annotated diagram if appropriate)

See diagram attached.

4. Are air station operations currently affected by the major air traffic structures within 50 NM of each air-to-ground range, airspace, and airfield? If so, describe the effect.

No.

5. Are there planned changes to the major air traffic structures in the region? If so, will these changes affect air station operations. Describe the effect.

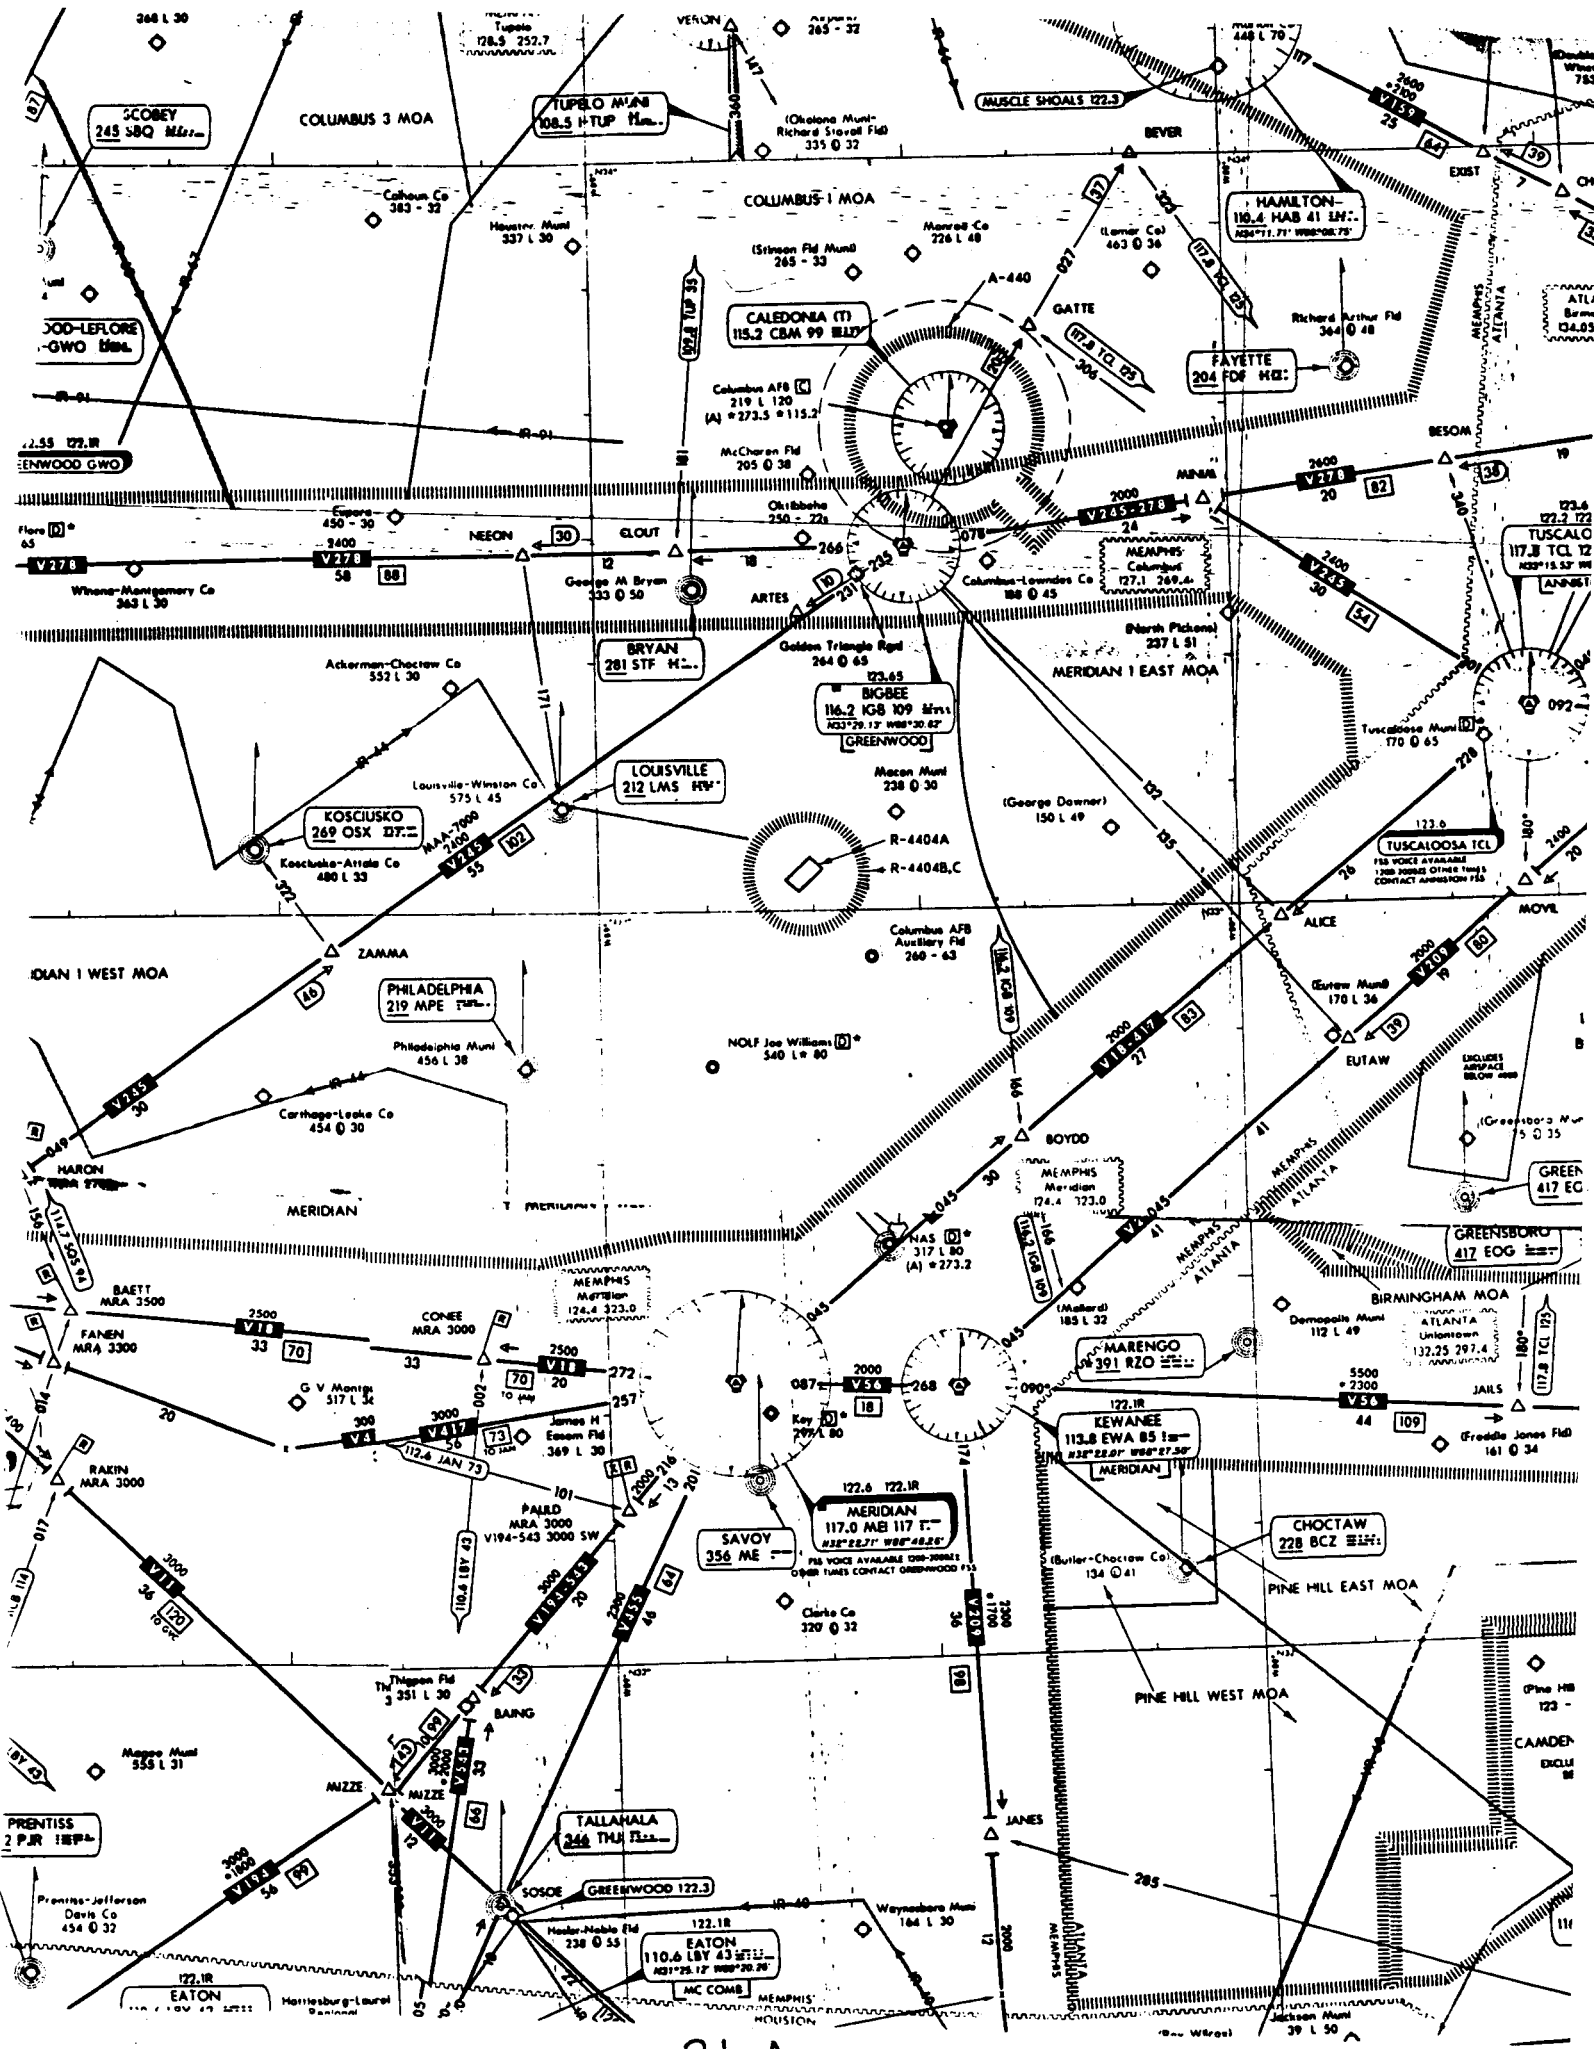

No.

6. Does the current system of air traffic control (ATC) routes limit aircraft flights between the air station and all associated training areas? If so, describe these limitations.

No.

7. Does the air station experience any ATC delays on a regular basis? If so, describe the recurring causes for these delays and give the average duration.

No.

8. Are there any air traffic control constraints/procedures listed in the current Air Ops manual/AICUZ study that currently, or may in the future, limit air station operations?

No.

9. Does the current airspace which you schedule/control permit Advanced Strike training? If not, explain why.

Yes.

10. Is there airspace within 50 NM which permits Advanced Strike training?

Yes.

11. Does the current airspace configuration permit helicopter training? If not, explain why.

Yes. Some general use airspace would need to be designated "ALERT AREAS" if flight operations exceeded 250,000 operations per year.

12. Does the airspace configuration prohibit other types of undergraduate pilot training? If so, explain why.

No. To complete NFO training, 4 surface search (over-water) sorties are required per student. Those sorties, when conducted in conjunction with airway navigation sorties, could be flown out of NAS Meridian to NAS Pensacola, re-fuel, then to W-155 and vice versa. All air intercept sorties required for NFO training can be conducted at NAS Meridian. R

B. Airfields

1. For the main airfield(s) and each auxiliary and outlying field, provide the following data

Airfield Name: MCCAIN FIELD, NAS MERIDIAN

a. Location: **NAS MERIDIAN IN EAST CENTRAL MISSISSIPPI IN LAUDERDALE COUNTY**

b. Distance from main field: **THIS IS THE MAIN FIELD**

c. Does the airfield have more than one runway complex that can conduct independent (i.e., concurrent) flight operations? **YES, see Note 1**

d. Does the airfield have parallel or dual offset runways? **YES**

e. If the airfield has parallel or dual offset runways, do they permit dual IFR flight operations? **NO Yes, see Note 2.**

e. Does the airfield have full-length parallel taxiways? **YES NO, see Note 3**

f. Does the airfield have high speed taxiways? **NO**

g. Does the airfield have a crosswind runway? **YES**

h. If conditions force the use of this runway, does the airfield lose in terms of number of flight ops/hour capacity? **NO. THIS Runway is used, by itself, less than 4% of time.**

i. How much capacity is lost? **NONE**

j. What percent of the time do conditions force the crosswind runway to be used? **8.4% 3.7%**

k. Is the airfield equipped to support IFR flight operations? **YES**

l. Is the airfield owned by the navy or leased? **OWNED BY NAVY**

m. Discuss any runway design features that are specific to particular types of training aircraft (e.g., are the airfield facilities designed primarily for helo, prop. or jet train aircraft).

Parallel runways are 8000' x 200' with high intensity runway lighting (HIRL) and centerline lighting in order to support jet aircraft. The crosswind runway is 6400' x 200' with medium intensity runway lighting and is capable of supporting jet operations. The unique design of the airfield layout allows for easy/rapid access to and from all runways from the ramp. Airfield configuration supports simultaneous instrument arrivals and departures.

Note 1. NAS Meridian runway centerlines are separated by 3900 feet. The Thresholds are displaced by 4000 feet.

Note 2. Dual IFR flight arrivals vs. departures are permitted by runway design.

Note 3. In normal configuration mode, full length taxiways connect the centroid ramp area to all arrival and departure thresholds.

Airfield Name: OLF JOE WILLIAMS FIELD (BRAVO)

- a. Location: **19.3 NM NORTHWEST OF NAS MERIDIAN IN KEMPER COUNTY**
 - b. Distance from main field: **19.3 NM NORTHWEST**
 - c. Does the airfield have more than one runway complex that can conduct independent (i.e., concurrent) flight operations? **NO**
 - d. Does the airfield have parallel or dual offset runways? **NO**
 - e. If the airfield has parallel or dual offset runways, do they permit dual IFR flight operations? **NO**
 - e. Does the airfield have full-length parallel taxiways? **YES**
 - f. Does the airfield have high speed taxiways? **NO**
 - g. Does the airfield have a crosswind runway? **NO** *NONE required. Single runway covers wind 96.3% of time.*
 - h. If conditions force the use of this runway, does the airfield lose in terms of number of flight ops/hour capacity? **NA**
 - i. How much capacity is lost? **NA**
 - j. What percent of the time do conditions force the crosswind runway to be used? **NA**
 - k. Is the airfield equipped to support IFR flight operations? **YES. LOCALLY**
- ~~PUBLISHED INSTRUMENT APPROACHES ARE CURRENTLY USED FOR IFR TRAFFIC INTO AND OUT OF OLF JOE WILLIAMS FIELD.~~ *See note 1.*
- l. Is the airfield owned by the navy or leased? **OWNED BY NAVY**
 - m. Discuss any runway design features that are specific to particular types of training aircraft (e.g., are the airfield facilities designed primarily for helo, prop. or jet train aircraft).

8000' X 150' RUNWAY WHICH SUPPORTS JET TRAFFIC.

Note 1. ~~IFR~~ There is a published instrument approach (Local) for OLF BRAVO. Minimums are 1000' ceiling and 3 miles visibility or VFR. IFR departures are authorized as long as NATOPS weather minimums are met.

2. In accordance with NAVFACINST 11010.44E, an inadequate facility cannot be made adequate for its present use through "economically justifiable means." For all the categories above where inadequate facilities are identified provide the following information:

No facilities are inadequate.

Facilities

D. Aircraft Maintenance Facilities

1. Complete the following table for each type of aircraft which can be maintained at your air stations. Place an "x" in the applicable columns for each type of aircraft.

Aircraft Types	Level of Maintenance			Source	
	Depot	Intermediate	Organizational	DOD	Contract
T-2	Field Team *	X	X		X
TA-4J	Field Team *	X	X		X
C-12			X		X
UH-1			X	X	

* Scheduled and major ^{depot} rework repair not accomplished ~~on site~~. AT assigned NAVAL Aviation Depots. Minor field repairs completed on site by depot field repair teams.

BB
CNATRA NS

Facilities

NO SHIPS OR PIERS AT NAS MERIDIAN

E. Ship Berthing and Maintenance Facilities

1. List all ships (military and other) scheduled to be homeported at this facility through Fiscal Year 1997.

Ship name (hull number)	Military/Other	Arrival/Departure or Decommission Date
NA		

2. List the ship maintenance facilities located at or near this air station.

Organization (military/private)	Level of Maintenance (shipyard/depot/intermediate)	Drydock (capacity)
NA		

3. In the following table, provide the optimum ship berthing configurations available at the installation.

Ship Class	Configuration					Comments
	option 1	option 2	option 3	option 4	option 5	
NA						

4. Describe restrictions and limitations on homeporting different types of ships.

Ship Class	Comments on Limitations and Restrictions
NA	

Facilities

F. Special Military Facilities

1. List all facilities and equipment that play a special role in military operations (e.g., radar, communications, command and control, oceanographic facilities) of the aircraft at the installation.

Type of Facility	Operational Mission of Facility
AN/FPN-63	Precision Approach Radar
AN/URN-25	Tactical Air Navigation
AN/GRT-21-22	Communications Ground-to-Air
AN/GRR-23-24	Communications Ground-to-Air
AN/FRN-39	Nondirectional Beacon
RATCC	Air Traffic Control
NEXRAD	WSR88D PUP Weather Radar
FM Crash Net	Command Control
FM Security Net	Command Control
FM Public Works Net	PWD Maintenance Control
FM Structural/ Medical Net	Command Control
ASR-8	Surveillance Radar
ASOS	Automatic Surface Observation System
GRC 171	Communications Ground-to-Air
GRC 211	Communications Ground-to-Air

BRAC-95 DC 3/NAS MERIDIAN MS/UTC: 63043

2. List any weapons storage and handling facilities located at the air station.

Type of Facility	Location	Mission and Capability of Facility
Magazine #1 2-00017	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Magazine #2 2-00018	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Ready Ammo Magazine 2-00019	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Ready Ammo Magazine 2-00020	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Ready Ammo Magazine 2-00153	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Ready Ammo Magazine 2-00154	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.
Ready Ammo Magazine 2-00155	NAS Meridian	Storage of weapons and ejection seat explosive devices for student aviation training.

BRAC-95 DC 3/NAS MERIDIAN MS/UIC: 63043

Facilities

G. Non-DON Facility Support Arrangements

1. List all arrangements (e.g., inter-service support agreements) that involve supporting military (non-DON) activities at the air station.

Activity Name / Military Service	Description of Activity Role and Degree of Support
Regional Counterdrug Training Academy	Counterdrug law enforcement training. NASMER provides facilities & utilities, police, admin, communications, custodial, refuse, maintenance, galley, medical, housing, supply & purchasing, fire protection, printing, laundry, chaplain, library, & MWR.
14th Flying Training Wing (ATC)/Columbus AFB/Air Force	USAF/USN Joint-Use of SEARAY Target Range ISSA (Range owned by Navy). NASMER provides common use fac, fire protection, equipment maintenance, explosive ordinance, & training services.
14th Flying Training Wing (ATC)/OLF Gunshy/Columbus AFB/Air Force	USAF/USN Joint-Use OLF Gunshy, Letter of Agreement (OLF owned by AF). NASMER provides facilities, maintenance, and medical services.
437 MAW/DOXC, Charleston AFB/SC/Air Force	Hurricane Evacuation (HURREVAC) site for 10 C-141s.
NAS Cecil Field, Jacksonville, FL/Navy	Hurricane Evacuation (HURREVAC) site for 85 FA-18s.
3390th US Army Reserves Forces School/Army	Army Reserve Schools Command. NASMER provides facilities & utilities, police, admin, communications, maintenance, galley, medical, housing, supply & purchasing, disaster preparedness, chaplain, clubs.
186th Air Refueling Group/MS ANG	NASMER provides communications, galley, housing, supply & purchasing, other support.
US Army Jackson District Recruiting Command/Army	Military Recruiting Office. NASMER provides command element, medical, & housing.
3548 USAF Recruiting Squadron/RSR/Air Force	Military Recruiting Office. NASMER provides housing & medical.
England AFB, LA/Air Force	NASMER provides transportation services.
150th Quartermaster Battalion, MS ANG/MS Army Natl Guard	NASMER provides housing.
121st US Army Reserve Command/Army	Army Reserve Command. NASMER's ROICC Office provides Small Purchase Contract administration for contracts under \$25K. Chaplain, command element, MWR, education services, housing, galley, medical, legal, personnel, purchasing, & transportation.

Facilities**e. Non-DON Facility Support Arrangements**

2. List all formal support agreements and other arrangements that involve supporting other governmental agencies (federal, state, local or international) or civilian activities at the air station.

Activity / Sponsor / Government Affiliation	Description of Activity Role and Support Level
Lauderdale County & City of Meridian	Search and Rescue (SAR) and Medical Evacuation (MEDIVAC) services are provided to the civilian community as deemed necessary by CTW-1.
Citizens National Bank	Fire protection, police services, & communications.
Mississippi State University, NAS Branch	Command element, common use facilities, fire protection, police services, custodial, education services, facility & equipment maintenance, supply, & utilities.
East MS Community College	Command element, common use facilities, fire protection, police services, custodial, education services, facility & equipment maintenance, supply, & utilities.
Meridian Community College	Command element, common use facilities, fire protection, police services, custodial, education services, facility & equipment maintenance, supply, & utilities.
Meridian Naval Federal Credit Union	Fire protection, police, communications, facilities, facility maintenance, & utilities.
FAA - Southern Region	Fire protection, police, communications, custodial, maintenance, supply services & utilities.
City of Meridian, City of Marion, City of DeKalb, Lauderdale County, Kemper County	Fire protection support.
United Blood Services	Other support.
Red Cross	Common use facilities activities.
AFGE	Command element, common use facilities activities, fire protection, police, admin services, printing & reproduction, & utilities.
MS Forestry Commission	Fire protection services.
MS State Fish & Game Commission	Police services and purchasing/contracting services.

Location

A. Proximity to Operational Mission Areas

1. Does the location of the air base have any strategic role at the present time or in future plans (include both location and attributes available at that location, e.g., waterfront space). Discuss alternate military/civilian facilities that could fulfill the same strategic role.

None known.

Location

B. Proximity to Training Areas

1. Does the location of the air station permit any specialized training with other operational units (e.g. Battle Groups or Joint forces)? If so, provide details.

Currently the mission, Undergraduate Pilot Training does not involve Battle Group operations nor joint operations. However, NAS Meridian is ideally located to support such operations with adequate runways, arresting gear and ramp space.

2. Describe the plan for conducting carrier and helicopter landing trainer qualifications. Will ship deploy to training squadron site or will squadrons deploy?

CNATRA Air Wings deploy to various locations on both the east and west coast for carrier qualifications.

3. How far (nmi.) is the air station from a designated naval operations area where an aircraft carrier would conceivably operate ?

NAS Meridian is located 150-180 NM from designated carrier qualification operating areas in the Gulf or Mexico.

4. If the aircraft carrier deploys to an area within operating range of training air squadrons, would CQ training usually conducted directly from the air station or on a detachment basis?

Yes. Historically when an aircraft carrier operated in the northern Gulf of Mexico, CNATRA TA-4J units operated from NAS Meridian and T-2 units from NAS Pensacola.

CNATRA
N3

Location**C. Proximity to Other Support Facilities**

1. List other airfields (currently not used for undergraduate pilot and/or NFO training) in the local flying area that are available for training and emergency uses.

Airfield Name	Major Use / Capability	Location / Distance
Columbus AFB, MS	Military Emergency Divert Field/USAF	Northeast MS/ 66 NM
Key Field, Meridian, MS	Civilian Airfield and ANG Field/Emergency OLF	Meridian, MS/ 16 NM

2. What other military facilities located in the vicinity are/could be used to support the air station's and tenants' mission?

Military Facility Name	Actual / Proposed Use	Distance
Columbus AFB, MS	Active USAF Base/Support Base	63 NM
USAF OLF Gunshy	Active USAF OLF/Navy OLF	23 NM
NAS New Orleans, LA	Naval Reserve Base/Support Base	180 NM
NAS Pensacola, FL	Active NAS/Support Base	156 NM

3. What civilian owned facilities located in the vicinity are/could be used to support the air station's and tenants' mission?

Facility Name	Actual / Proposed Use	Distance
Key Field, Meridian, MS	Civilian and Air National Guard Base/Emergency OLF	16 NM

Features and Capabilities**A. Weather**

1. What percentage of the time (on average, by month), does the local weather affect training operations and restrict airfield sortie rates. Use the following chart and add any further descriptions on how weather generally impacts airfield and training operations (recurring wind or fog conditions, etc.).

Local Field: **NAS MERIDIAN**

Month	% of Hours ¹ VFR	% of Hours IFR	% of Hours Below 500 ft Ceilings and 1.0 Mile Visibility	Annual Number of Daylight Flying Hours Rescheduled/ Canceled Due to Weather
Jan.	81	19	7	34.7
Feb.	87	13	4	36.9
Mar.	90	10	3	35.7
Apr.	92	8	2	23.5
May	92	8	2	29.9
June	93	7	2	27.0
July	92	8	2	26.4
Aug.	90	10	3	26.7
Sept.	87	13	3	23.7
Oct.	89	11	3	25.7
Nov.	87	13	5	25.3
Dec.	83	17	7	19.0

BASED

1. Environmental conditions are based on field operating hours of 0700 (L) - 2300 (L).
2. Environmental data is extracted from International Station Meteorological Climate Summary (Ver 2.0).
3. Monthly daylight cancellation rate based on ATSS monthly weather cancellations and 10 hr/day of daylight. ATSS does not record day or night weather cancellations.

2
CHARTER N3

¹Percentage of total normal operating hours that specified weather conditions were observed (include list of normal operating hours used for this calculation).

Features and Capabilities

A. Weather (cont.)

2. Give the official planning factor for percent of sorties lost due to weather (based on historic data).

~~17.8% (six year average)~~ 18% for T-2 $\frac{2}{\text{CNATRA N3}}$
17% for TA-4

3. Do the normal weather conditions at the most frequently used training areas pose a chronic problem for scheduling training sorties? If so, are alternate training areas used? Does the use of alternate training facilities involve relocating aircraft and support personnel to other air stations during certain times of the year?

During winter months contingency weather detachments are planned to maintain student flow. ~~Historically VT-7 has executed one two week air to ground weapons detachment annually.~~

$\frac{2}{\text{CNATRA N3}}$

Features and Capabilities

B. Encroachment

1. Are there any known plans for a commercial airline to hub at an airport within 100 nmi. of your air station? If so, describe.

No.

2. Have there been any ATC delays (15 minutes or greater) between initial take-off request and actual take-off during the past three years as a result of civilian traffic? If so, please complete the following table.

NOTE: No ATC delays.

Fiscal Year	Average Delay (minutes)	Number of Delays	% of Total Flight Operations Scheduled
1991	NA		
1992			
1993			

3. How many times during each of the past three years have any of your low level training routes or any of the low level training routes you used been modified to accommodate construction and/or noise complaints?

None.

Fiscal Year	Number of changes
1991	0
1992	0
1993	0

Features and Capabilities

B. Encroachment (cont)

4. Is the existing AICUZ study encoded in local zoning ordinances?

Yes.

a. Attach a copy of any applicable sections of the air station's AICUZ plan and those for OLFs used, and note any recent modifications.

See attached AICUZ footprints for both NAS Meridian's McCain Field and OLF Joe Williams Field.

b. Provide a description of local zoning ordinances and their impact on future encroachment, restricted flight hours and details of any litigation history.

There are no zoning ordinances or restrictions that impact NAS Meridian's operations and no history of litigation exist.

5. Do current estimates of population growth and development or environmental constraints pose problems for existing or planned mission?

No.

6. Provide a copy of the current and proposed land development plans for the area surrounding the air station (i.e., the local government's comprehensive land-use plan).

Local government does not have a comprehensive land use plan in ~~effect~~.

EFFECT
