

Smart-UPS On-Line 208 V

Unity output power factor single-phase double-conversion, online UPS with advanced management features

A versatile UPS developed for unstable power conditions worldwide

Smart-UPS™ On-Line provides high-density, double-conversion online power protection for servers, voice/data networks, medical labs, and light industrial applications. The Smart-UPS On-Line is capable of supporting loads from 5 kVA to 10 kVA in a rack/tower convertible chassis. The 6 kVA, 8 kVA, and 10 kVA models feature unity output power factor enabling them to support power-hungry blade servers or heavily loaded equipment racks. When business-critical systems require runtime in hours, not minutes, Smart-UPS On-Line can be configured with multiple battery packs to meet aggressive runtime demands.

The included PowerChute™ Network Shutdown management software provides unattended graceful shutdown of network operating systems. All models include an integrated network management card for remote management. The entire Smart-UPS On-Line family provides value to customers with demanding power conditions, including a very wide input voltage window, extremely tight output voltage regulation, frequency regulation, internal bypass, and input power factor correction.

Smart-UPS On-Line

Industry-leading power factor maximizing UPS density

Rackmount and Tower SRT 5 kVA – 10 kVA

[SRT5KXLT shown]

Standard Features

Best-in-class Power Density

More real power in watts, 0.85 pf on 5 kVA, Unity on 6 kVA – 10 kVA units.

High-Efficiency “Green Mode”

Achieves 98% efficiency, which saves utility and cooling costs without compromising performance or reliability. Energy STAR compliant.

Graphical LCD Display With Multicolor Backlight

Intuitive interface provides detailed and accurate information with ability to configure locally.

Intelligent Battery Management

Temperature-compensated charging extends life and advanced algorithms recommend replacement date. The UPS can inform the user which batteries need to be replaced and auto detect when additional battery packs are added.

Built-in Energy Meter

Measures energy use and displays UPS efficiency in various modes of operation for easy energy tracking.

Operate Without Battery

Ability to immediately protect equipment when power returns after a complete discharge of the battery.

Three-year Warranty on Electronics

Additional year of warranty protection for electronics provides peace of mind.

Smart-UPS On-Line

Proven performance with the world's largest installed base of single-phase, double-conversion products

Rackmount and Tower SRT 5 kVA – 10 kVA

[SRT10KXLT shown]

Additional Features

Embedded Network Management Card With Environmental Monitoring

Remote monitoring and control of the UPS and the environment via Ethernet connection while freeing up the SmartSlot™ so customers can add accessories for additional communication options.

Switched Outlet Group(s)

Ability to control a group of output load receptacles independent from the main UPS. Enables:

- Rebooting hung device without cycling the entire UPS.
- Sequenced turn on/off.
- Shedding of noncritical loads based on a variety of parameters (battery time, runtime remaining, and overload).
- Scheduled time off to conserve energy.

Emergency Power Off (EPO)

Remote UPS shutoff in the event of a fire or other emergency. The UPS can accept normally open (NO) or normally closed (NC) contacts.

Communication Ports

Serial, USB, Ethernet, and SmartSlot for network accessory cards.

Communication Protocols

Modbus Serial, USB PowerSummary, HTTP, SNMP, and Telnet.

Smart-UPS On-Line Display

Intuitive, easy-to-use LCD provides clear and accurate information in multiple languages

Backlight screens:

Amber: Indication of condition that requires attention

Red: Indication of UPS alarm that requires immediate attention

Standard Features

LCD Display Screen

Accurately provides real-time status updates in your choice of basic or advanced menus.

UPS Status (Scrolling)

- Output voltage
- Input voltage
- Output frequency
- Run time
- Load
- Battery health

Control

- UPS and outlet group settings
- Bypass control

Configuration

- Output voltage, frequency
- Language, brightness, contrast
- Alarm volume
- IP address

Test and Diagnostics

- Initiate battery and runtime calibration tests

About

- UPS serial number, battery part number
- Battery install and suggested replacement dates
