

DVI to DisplayPort Adapter with USB Power - 1920 x 1200

Product ID: DVI2DP2

This DVI to DisplayPort adapter lets you connect a DVI video source, such as your desktop computer, to your DisplayPort (DP) monitor or projector.

Get hassle-free DVI-D to DP conversion

The DVI to DisplayPort converter is USB powered, giving you the freedom to power it using a USB port on your computer, unlike some converters that require bulky external power adapters. USB powered devices don't require an AC outlet, so you can connect a DVI computer to a DP projector or display where power outlets are limited or inaccessible, such as your boardroom or workstation.

The DVI to DP adapter also supports plug-and-play installation, so you won't need to load any drivers or software on your computer.

Be more productive

Using the DVI to DisplayPort adapter, you can connect a secondary monitor through a vacant DVI port on your computer. The added screen space makes it easier to multitask, so you can work more efficiently and accomplish more in less time. It's perfect for office use, or wherever you view documents, spreadsheets, or web pages across multiple screens.

Keep your high-definition video quality

With support for display resolutions up to 1920x1200 or 1080p, the DVI to DisplayPort adapter lets you take full advantage of the single-link DVI-D capabilities that are built into your computer's graphics card.

The DVI2DP2 is backed by a StarTech.com 2-year warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Connect your DVI-enabled laptop or desktop computer to a DisplayPort monitor
- Use in your office or at a hot desk to connect a secondary display
- Share your DVI computer with a DisplayPort projector in a boardroom or conference setting

Features

- Bridge compatibility between your DVI computer and your DisplayPort monitor
- Easy setup with USB power and plug-and-play installation
- Increase productivity by using your DVI output to connect another display for multitasking
- Get high-definition video with support for resolutions up to 1920x1200
