INF6502WBAG

Interactive Whiteboard and Display with Capacitive Touch and Anti-Glare
Part #: INF6502WBAG

InFocus

Stop taking photos of your old dry-erase board and step up to a digital whiteboard. You'll never lose an idea and your meetings will be more efficient and productive. The JTouch Whiteboard is durable, affordable, and creates an engaging, interactive experience that everyone can see.

Key Features

◆ 65-inch 1080p touch display
◆ Built-in, full-featured interactive whiteboard
◆ Wirelessly cast from any device, browse the web, or view documents
◆ Multi-point capacitive touchscreen with sleek bezel-less design and effortless gestures
◆ Display a PC, Mac or Chromebook via HDMI and enable touch via USB
◆ Anti-glare screen is smooth to the touch and eliminates distracting reflections
◆ No calibration required

This model is available outside the Americas, and to K-12 schools in the US. If you are in the Americas and not a K-12 school, the INF6502WBAGp is the model for you.

Interactive Whiteboard

Draw, write, and capture notes on a multi-screen canvas, with room for free-form drawings, diagrams, and more. Multiple people can write or draw at the same time with a complete collection of digital pens, highlighters, shapes, lines, and colors, then view and annotate over PowerPoint, Word, or images.

"I frequently teach from the [JTouch] whiteboard. The students get a chance to pop up and do a problem, too. They beg to go up to show off their skills. The learning is very engaging and I am seeing a greater mastery in our multiplication unit." -- 4th Grade Teacher and JTouch Whiteboard User

"In addition to saving time, installing the interactive displays in-house also saved the district money. The only cost of the

installation involved purchasing a mounting bracket for each display." -- K-12 TechDecisions Magazine

LightCast Wireless Collaboration

Use the LightCast Key to easily connect and share content from your Apple, Windows, Android, or Chrome devices. Access the internet with a built-in web browser, and view or present documents, videos, and photos.

Full Touch Control

Display your PC, Mac, or Chromebook via HDMI, VGA, or component video, then control it from the display via touch. Just enable touch from the computer via USB and easily extend the reach of your computer's USB ports with the easily accessible 4-port USB hub.

Projected Capacitive Touch (PCAP)

The ultra-responsive and sleek bezel-less technology found in tablets and smart phones is now available in the JTouch Whiteboard. Draw or write smoothly with your finger, a stylus, or with medical grade gloves.

Specifications*

Display	INF6502WBAG
Diagonal Size	65"
Resolution — Native	Full HD (1920 x 1080)
Display Technology	Direct WLED backlight
Touch Screen Features	Projected capacitive, Multi-touch, Anti-glare
