

TÜV Product List 2400-A-465

The TÜV Certificate is a hallmark of assured product safety. The items featured on this TÜV Product List undergo rigorous testing in accordance with prevailing standards for product safety.

The testing process adheres to either VSS-3 or VSS-5 levels:

VSS-3: Products are scrutinized, ensuring they withstand up to **three times** the specified maximum weight load.

VSS-5: Products undergo thorough testing, demonstrating their resilience under loads **up to five times** the specified maximum weight limit.

Kindly be aware that the absence of your product from this list may indicate that it has not undergone testing in accordance with the TÜV testing procedure. Alternatively, it could imply that the maximum weight load is not pertinent or applicable to your particular product. If you have any concerns or inquiries regarding the testing status or weight load relevance for your product, we recommend reaching out to our Quality department for further clarification: qcmail@vogels.com

The TÜV Certificate is a hallmark of assured product safety. The items featured on this TÜV Product List undergo rigorous testing in accordance with prevailing standards for product safety.

The testing process adheres to either VSS-3 or VSS-5 levels:

VSS-3: Products are scrutinized, ensuring they withstand up to **three times** the specified maximum weight load.

VSS-5: Products undergo thorough testing, demonstrating their resilience under loads **up to five times** the specified maximum weight limit.

Kindly be aware that the absence of your product from this list may indicate that it has not undergone testing in accordance with the TÜV testing procedure. Alternatively, it could imply that the maximum weight load is not pertinent or applicable to your particular product. If you have any concerns or inquiries regarding the testing status or weight load relevance for your product, we recommend reaching out to our Quality department for further clarification: qcmail@vogels.com
