A WORD ABOUT EPCO...

Elevator Products Corporation is dedicated to the elevator industry and offers the finest selection of elevator accessories available. For over fifty years, we've provided architects and consultants with the right products to meet their special requirements.

The EPCO staff includes highly skilled engineers and technicians, cost conscious buyers and extremely capable and dedicated sales and customer service personnel.

Strict control is maintained over all aspects of manufacturing. Every phase of design and fabrication follows our stringent quality process. EPCO has been ISO-9001 Certified since 1995, ensuring the highest standards of quality.

No matter what your needs are, our flexibility in design, expertise in custom equipment and innovative atmosphere will assure complete satisfaction for every order. EPCO offers the highest quality service in our industry. Our company is continuously developing new products to serve a variety of applications. Our complete line of elevator accessories will meet or exceed even the tightest specification, and can stand up to the abuse often found in many installations.

The technical information contained herein is included to assist you in choosing the correct elevator parts for the job. If there is a requirement not outlined within these pages, please contact our office at: 973-341-8000. Our highly trained sales professionals are available to assist with any questions.

Emergency Light Power Supplies (Cont'd)

- Designed expressly for use with Epco emergency light fixtures
- Exceeds Elevator Safety Code A17.1
- Approved by CSA
- Certified by the State of California
- Designed for Tamperproof, Remote Installation on Cab Top
- Engineered Reliability in Maximum Temperature Range
- Independent circuitry for each of two incandescent lamps
- Unit shipped wired for 110/120 VAC, 60 Hz (Other voltages available on special order)
- Automatically recovers maximum power after use

Part # for 24V: 66B20G03

FLEXILITE EFP
FLEXIBLE EMERGENCY LIGHTING

The EFP is a unique system which, when required, converts normal cab lighting of <u>either</u> incandescent or fluorescent lamps to emergency lighting.
The Flexilite EFP-1 will, under emergency conditions, light either two incandescent lamps, or two fluorescent lamps - up to 100 watts at 115 VAC.
The Flexilite system meets or exceeds the ANSI code requirements for elevator emergency lighting.
The Flexilite is CSA approved.
The Flexilite EFP can also be used as emergency power for a ventilation fan, or even a combination light and fan. This capability is especially useful for outside glass elevators exposed to sunlight.

ORDER INFORMATION:

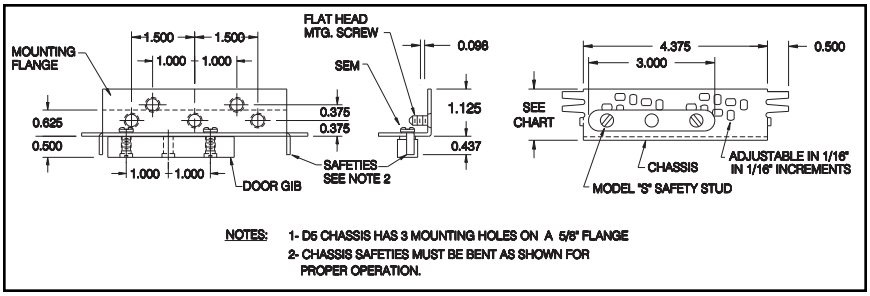
STANDARD PACKAGE - 100 sets per carton
Carton contains:
100 Nylon Gibs, 100 Chassis, 200 Sems (1-box)
200 Safety Studs (1-box), 300 Mounting Screws (1-box)

200 - Sems XS8P01
200 - Safety Studs XS8P02
300 - Mounting Screws XS8P03



CHASSIS, GIBS, STUDS, SEMS AND MOUNTING SCREWS ARE AVAILABLE SEPARATELY AS REPLACEMENTS PARTS.

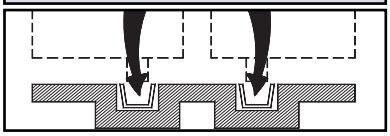
NOTE: Epco's powerful locking mechanism you won't find anywhere else.

SPECIAL NYLON FORMULATION **DOOR SADDLE INSERTS**

PRESSURE FITS - 1/2" or 9/16" tracks. Available in 6', 7' or 9' lengths.
RELINES WORN TRACKS - eliminates expensive door saddle replacements.
PROTECTS new tracks during construction. When installed upside-down reduces costly clean-up labor and time.
EASILY REMOVED for cleaning.
REDUCES FRICTION for easier, smoother, quieter door operation.
Adds longer life to Door Gibs.

MODEL NO. 500
SIZE 6', 7', or 9' .FT.
FITS 1/2" to 9/16" Track Size.

NOTE
Uses Model S Door Gib



Adjustable Gibs (Cont'd)

Roller Bearing Gibs

EPCO'S FULLY ADJUSTABLE ROLLER BEARING DOOR GIB....

* ACTUAL STEEL ROLLER BEARING
* PROVIDES SAFE AND SURE OPERATION
* EXTENDS DOOR OPERATION LIFE
* ELIMINATES DOOR SILL WEAR
* ASSURES PROPER ALIGNMENT
* ELIMINATES DOOR SIDE PLAY

MODEL BR GIB

ROLLER BEARING DOOR GIB

* Nylon outer face provides quiet, smooth operation. Reduces door operation torque requirements by 20%, thereby extending door operation life.
* 75% Friction reduction
* Special bearing configuration is engineered to compensate for groove variation, reduce friction and eliminate door sill wear.

CHASSIS

* Broad range of designs engineered for variable door thickness and relationship to sill center line.
* Choice of 4 chassis sizes
* Cadmium plated steel construction
* Permanent/ adjustable chassis safeties - 3 position.

* Two door mounting locations - for different door styles.
* Designed with integral safety stud - square shank mates with rectangular chassis hole in such a manner that no amount of vibration can loosen it.
* Roller Bearing Gibs are mounted to chassis with 0.062" offset to provide rolling contact on both sides of the sill groove.

ELEVATOR PRODUCTS CORPORATION

Gibs

Rail Gibs

ZYTEL NYLON

BLACK NYLATRON

The same engineered design and quality construction as the Nylatron-GS Gibs...differs only in material. The finest pure NYLON Rail Gib available...guaranteed to provide a maximum of trouble free, efficient service in all applications.

* EPCO Slipper Guide Rail Gibs are molded of Nylon, which contains a small percentage of Molybdenum Disulfide.
* Nylatron-GS permits operation in higher temperatures, velocity and pressure ranges than pure nylon.
* Nylatron Gibs are designed and engineered with the exclusive Truss-ribbed construction and equal wall thickness to better sustain continuous operational requirements of load, pressure and velocity.

Every Gib is subjected to a “go-no-go” inspection prior being shipped.

Fans & Grills

FANS

Designed to fit any equipment....
4 models in standard and shallow type fans available with blower or exhaust blades.
Self-lubricating motor with welded steel housing
Moves 375 cubic feet of air per minute.
Motor and housing are rubber mounted for sound-vibration isolation.
Motor wired for 115 V two speed.
Uses EPCO standard Grilles. (order separately)

GRILLES

Engineered for maximum air distribution.
Wide choices of finishes:
Simulated Stainless Steel
Simulated Muntz Bronze
Simulated St. Steel w/ white finish
Mounted independent of fan.
Available in two sizes:
12” and 16” diameter.

LIGHTED GRILLES

Combination glare free light and air distribution grille.

Choice of lighting designs:
INCANDESCENT -- four 40 Watts lamps
FLUORESCENT -- one 40 Watts Circleline lamp.
Incandescent design fulfills local codes requiring more than one lamp.
Both designs utilize durable plexiglass light diffuser.
Mounted independent of fan.

ESCALATOR START STATION

- For applications with glass balustrades and or for a special, unique touch, consider mounting any of Epco's escalator safety stations on a custom manufactured pedestal.
- Built using weld construction from the inside to provide an attractive and durable look and feel.
- All that Epco needs is a few dimensions from the existing escalator to provide a unit that will mount adjacent to the handrail in a code compliant position.
- Available in Stainless Steel or Muntz Bronze (special order) finish with liftable lexan cover.
- All stations come with audible signal device.
- All stations meet New York City code.

Handicap Braille Plates

Handicap Plates are available in various finishes, sizes and thickness.

* **Finishes:**
  St/St Characters, Muntz Bronze Characters and White Characters (for California Code).
* **Sizes:**
  Various sizes available, depending on the application required. (see below)
* **Thickness:**
  Thickness varies from 0.031" thick to approximately 0.130" thick. Depending on the application and type of handicap plate used.
* **Applications:**
  Applied - mounted on the surface of the cover plate.
  Recessed - mounted in a swaged pocket in the cover plate. The handicap plate is flush with the surface of the cover plate.
* Special Order available. Please call the office.
