UK Economic Accounts

A quarterly supplement to Economic Trends

The third quarter 1994

**Key economic developments
UK national accounts and
balance of payments**

Proposals for reproduction of tables or contents should be addressed to the Deputy Commercial Manager, Room 64A/3, CSO, Government Buildings, Great George Street, London, SW1P 3AQ. Telephone 0171-270 4627 or fax 0171-270 6019.

Central Statistical Office

The Central Statistical Office is the government agency responsible for preparing the United Kingdom's national accounts, for the collection of data from businesses, and for the compilation of a wide range of official statistics - including the retail prices index and the overseas trade figures.

CSO began life in 1941 on the orders of Winston Churchill who wanted better statistics to manage the war-time economy. It remained part of the Cabinet Office until mid-1989, when it became a separate government department responsible to the Chancellor of the Exchequer. In November 1991 it became a Government Executive Agency.

Today, anyone can benefit from the following:

- * A range of statistical publications. The *Monthly Digest*, *Economic Trends* and *Social Trends* are among the best known. Details from HMSO bookshops (0171-873 0011).
- * Public inquiry services in London (0171-270 6363/6364) and Newport (01633 812973). Call London for details of how to subscribe to CSO first releases, how to phone 'talking' release notices, or how to receive release notices by Fax. Call Newport for inquiries on business statistics and details of *Business Monitors*. Call either with general inquiries about government statistics.
- * A wide range of data on disk. See page iv for details.

Government Statistical Service

A service of statistical information and advice is provided to Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Department concerned.

The sources of the series published in this volume and further information about them are shown in the index. Current telephone numbers of these sources as well as general information about *Economic Trends* can be obtained from the Central Statistical Office, Great George Street, London SW1P 3AQ. Telephone: 0171-270 6363/6364.

Enquiries about orders and subscriptions for *Economic Trends* and other Central Statistical Office publications should be made to:

HMSO, PO Box 276, London SW8 5DT
(Telephone: 0171-873 8499 for subscriptions; 0171-873 9090 for orders)

“Our mission is to improve decision making, stimulate research and inform debate within government and the wider community by providing a quality statistical service”

UK Economic Accounts

**a quarterly supplement
to Economic Trends**

No 8

January 1995

London: HMSO

"Our mission is to improve decision making, stimulate research and inform debate within government and the wider community by providing a quality statistical service"

Central Statistical Office

The Central Statistical Office is a government agency responsible for providing the principal statistical information for the government, for the public, and for the business community. It also provides statistical information for the private sector and the public.

The Office is a non-departmental public body, established in 1968, and is part of the Home Office. It is headed by the Chief Statistician, who is appointed by the Secretary of State for the Home Office.

UK Economic Accounts a quarterly supplement to Economic Trends

The UK Economic Accounts is a quarterly supplement to Economic Trends, providing a comprehensive overview of the UK economy. It includes data on output, income, and expenditure, as well as detailed information on the manufacturing and services sectors.

The supplement is published quarterly, in January, April, July, and October. It is available in both print and electronic formats. The print edition is available for purchase, while the electronic edition is available free of charge on the Central Statistical Office website.

For more information, please contact the Central Statistical Office, 100 Victoria Road, Newport, South Wales, NP23 7TA. Telephone: 01495 344000. Fax: 01495 344001.

UK Economic Accounts: The third quarter of 1994	7

Introduction

UK Economic Accounts is a quarterly supplement to *Economic Trends*. It brings together recently published data on national and financial accounts and the balance of payments for the United Kingdom. The supplement replaces the articles on the National Accounts and Balance of Payments previously included in *Economic Trends*. It contains two articles incorporating text, charts and tables.

A short description of the United Kingdom national accounts is given as the introduction to the 1994 edition of *United Kingdom National Accounts*, the *CSO Blue Book*. More detailed information is available in *United Kingdom National Accounts: Sources and Methods* (HMSO 1985). Subsequent changes to sources, methods and definitions are described in the methodological notes to the 1994 *CSO Blue Book*. Details of the balance of payments accounts are given in the 1994 edition of the *Pink Book*. Further information on the financial accounts is in the *Financial Statistics* and the *Financial Statistics Explanatory Handbook*.

Article 1 - Key economic developments:

The third quarter of 1994

This article brings together a range of economic statistics on the latest quarter and highlights key developments in the economy.

Article 2 - UK Economic Accounts:

The third quarter of 1994

This article presents annual and quarterly estimates of national accounts, including balance of payments. It includes charts and tables showing output, expenditure and income approaches to gross domestic product (GDP) and balance of payments. Detailed analysis of consumers' expenditure, fixed investment and stockbuilding are shown together with accounts of personal income, companies and general government. Summary financial accounts for each sector are also included. There is an extended section covering the balance of payments.

Appendix Tables

The tables in the Appendix give series of quarterly figures back to 1990 and annual figures back to 1985. The data in these tables can be obtained in computer readable form via the CSO Databank Service. For details see box below.

CSO Databank

Virtually all the series in *UK Economic Accounts: A quarterly supplement to Economic Trends* may be obtained as part of the CSO Databank Service on tape or disc. The appropriate four digit identifier is included at the top of the column or start of a row of figures. This enables users to obtain (in computer-readable form) a much more comprehensive and up-to-date set of long run macro-economic time series data than can be included in the publication. The tape format, unlabelled EBCDIC, is the same for all datasets. The discs, either 3½" or 5¼" are written in ASCII text which can be loaded as spreadsheets and viewed using standard spreadsheet packages, such as LOTUS or SMART.

Details of the service offered and the schedule of charges may be obtained from Databank Marketing, Room 131/4, Central Statistical Office, Government Buildings, Great George Street, London, SW1P 3AQ. Telephone: 071-270 6081 or Fax: 071-270 4986. CSO does not offer direct on-line access for these data but a list of host bureaux offering such a facility is available on request from the CSO.

Comments

CSO is keen to receive comments on this publication. Comments should be sent to Carole Rennie, National Accounts and Economic Assessment Branch, Room 71/1, Government Buildings, Great George Street, London SW1P 3AQ. (Tel: 071-270 5783).

Notes on the tables

1. Most quarterly data are available seasonally adjusted; those not seasonally adjusted are indicated by NSA.
2. Rounding may lead to inconsistencies between the sum of constituent parts and the total in some tables.
3. "Billion" denotes one thousand million.
4. There is no single correct definition of *money*. Consequently, several definitions of money stocks are widely used:

M0 the narrowest measure consists of notes and coin in circulation outside the Bank of England and bankers' operational deposits at the Bank.

M2 comprises notes and coin in circulation with the public *plus* sterling retail deposits held by the UK private sector with UK banks and building societies.

M4 comprises notes and coin in circulation with the public, together with all sterling deposits (*including certificates of deposit*) held with UK banks and building societies by the rest of the private sector.

5. **DM** - Deutschmark

6. **ERM** - Exchange Rate Mechanism

7. **ERI** - Exchange Rate Index

8. Symbols used:

.. not available

- nil or less than half the final digit shown

+ indicates that the data has been revised since the last edition: the period marked is the earliest in the table to have been revised.

KEY ECONOMIC DEVELOPMENTS: THE THIRD QUARTER OF 1994

ECONOMIC BACKGROUND

Markets and monetary developments

Base rates rose from 5.25 in the second quarter of 1994 to 5.75 per cent from 12th September 1994.

Sterling's effective exchange rate index (ERI) fell 1.0 per cent between the second and third quarters of 1994. Against the major European currencies it fell - by 2.1 per cent against the ECU, 3.1 per cent against the Deutschemerk and 3.0 per cent against the Franc. The pound also fell against the Yen, by 1.1 per cent, but rose against the US Dollar, by 3.1 per cent.

The **FT 100 share index**, shown in chart 1, recovered slightly in the third quarter, after a sharp fall in the second quarter. The index rose by 1.2 per cent between 1994 Q2 and 1994 Q3.

Chart 1

FT 100 share index and GDP at constant market prices

Average annual growth of **narrow money (M0)** accelerated from 6.6 per cent in the year to 1994 Q2 to 6.7 per cent in the year to 1994 Q3. Over the same period, the average annual growth of **broad money (M4)** fell from 5.3 per cent to 4.7 per cent.

Prices and wages

Signs of inflationary pressures remained mixed in 1994 Q3.

The **implied gross domestic product deflator** at factor cost, an indicator of domestic costs, rose by 0.7 per cent

between 1994 Q2 and 1994 Q3. It rose by 1.6 per cent in the year to 1994 Q3.

The **retail prices index** rose by 2.3 per cent in the year to 1994 Q3. **Excluding mortgage interest payments**, the index rose by 2.2 per cent over the same period - down from the 2.4 per cent rise recorded in the year to 1994 Q2.

The **producer price of output of manufacture for home sales, seasonally adjusted, (excluding food, beverages, tobacco and petroleum)** rose by 2.3 per cent in the year to 1994 Q3 - the same as the rate in the year to 1994 Q2. **Prices of materials and fuel purchased by manufacturing industry** rose by 6.6 per cent in the year to 1994 Q3 - up slightly from the annual growth of 6.5 per cent in 1994 Q2.

Annual growth in underlying wage earnings for Great Britain for the whole economy remained at 3¾ per cent in 1994 Q3.

Labour Market, productivity and unit wage costs

Figures from the **Labour force survey (LFS)** suggest a similar fall in **ILO unemployment** of 14,000 in Great Britain between the Spring (March to May) and Summer (June to August). More timely figures on **UK claimant unemployment**, seasonally adjusted, shows that it fell from 9.5 per cent of the work force in 1994 Q2 to 9.3 per cent in 1994 Q3. The numbers of claimant unemployed have fallen in every quarter since the peak in December 1993.

The LFS reported a rise in **employment** of 65,000 to 25.051 million between the spring and summer surveys of 1994 and a rise of 294,000 since the trough of winter 1992/93. Chart 2 shows the fall in full-time employment and rise in part-time employment since 1989. **The UK workforce in employment** also rose - by 145,000 between the second and third quarters of this year.

Labour productivity for the whole economy rose by 0.3 per cent between 1994 Q2 and 1994 Q3 and by 4.0 per cent in the year to 1994 Q3. **Unit wage costs** rose by 0.4 per cent between 1994 Q2 and 1994 Q3, but remained unchanged in the year to 1994 Q3.

NATIONAL ACCOUNTS

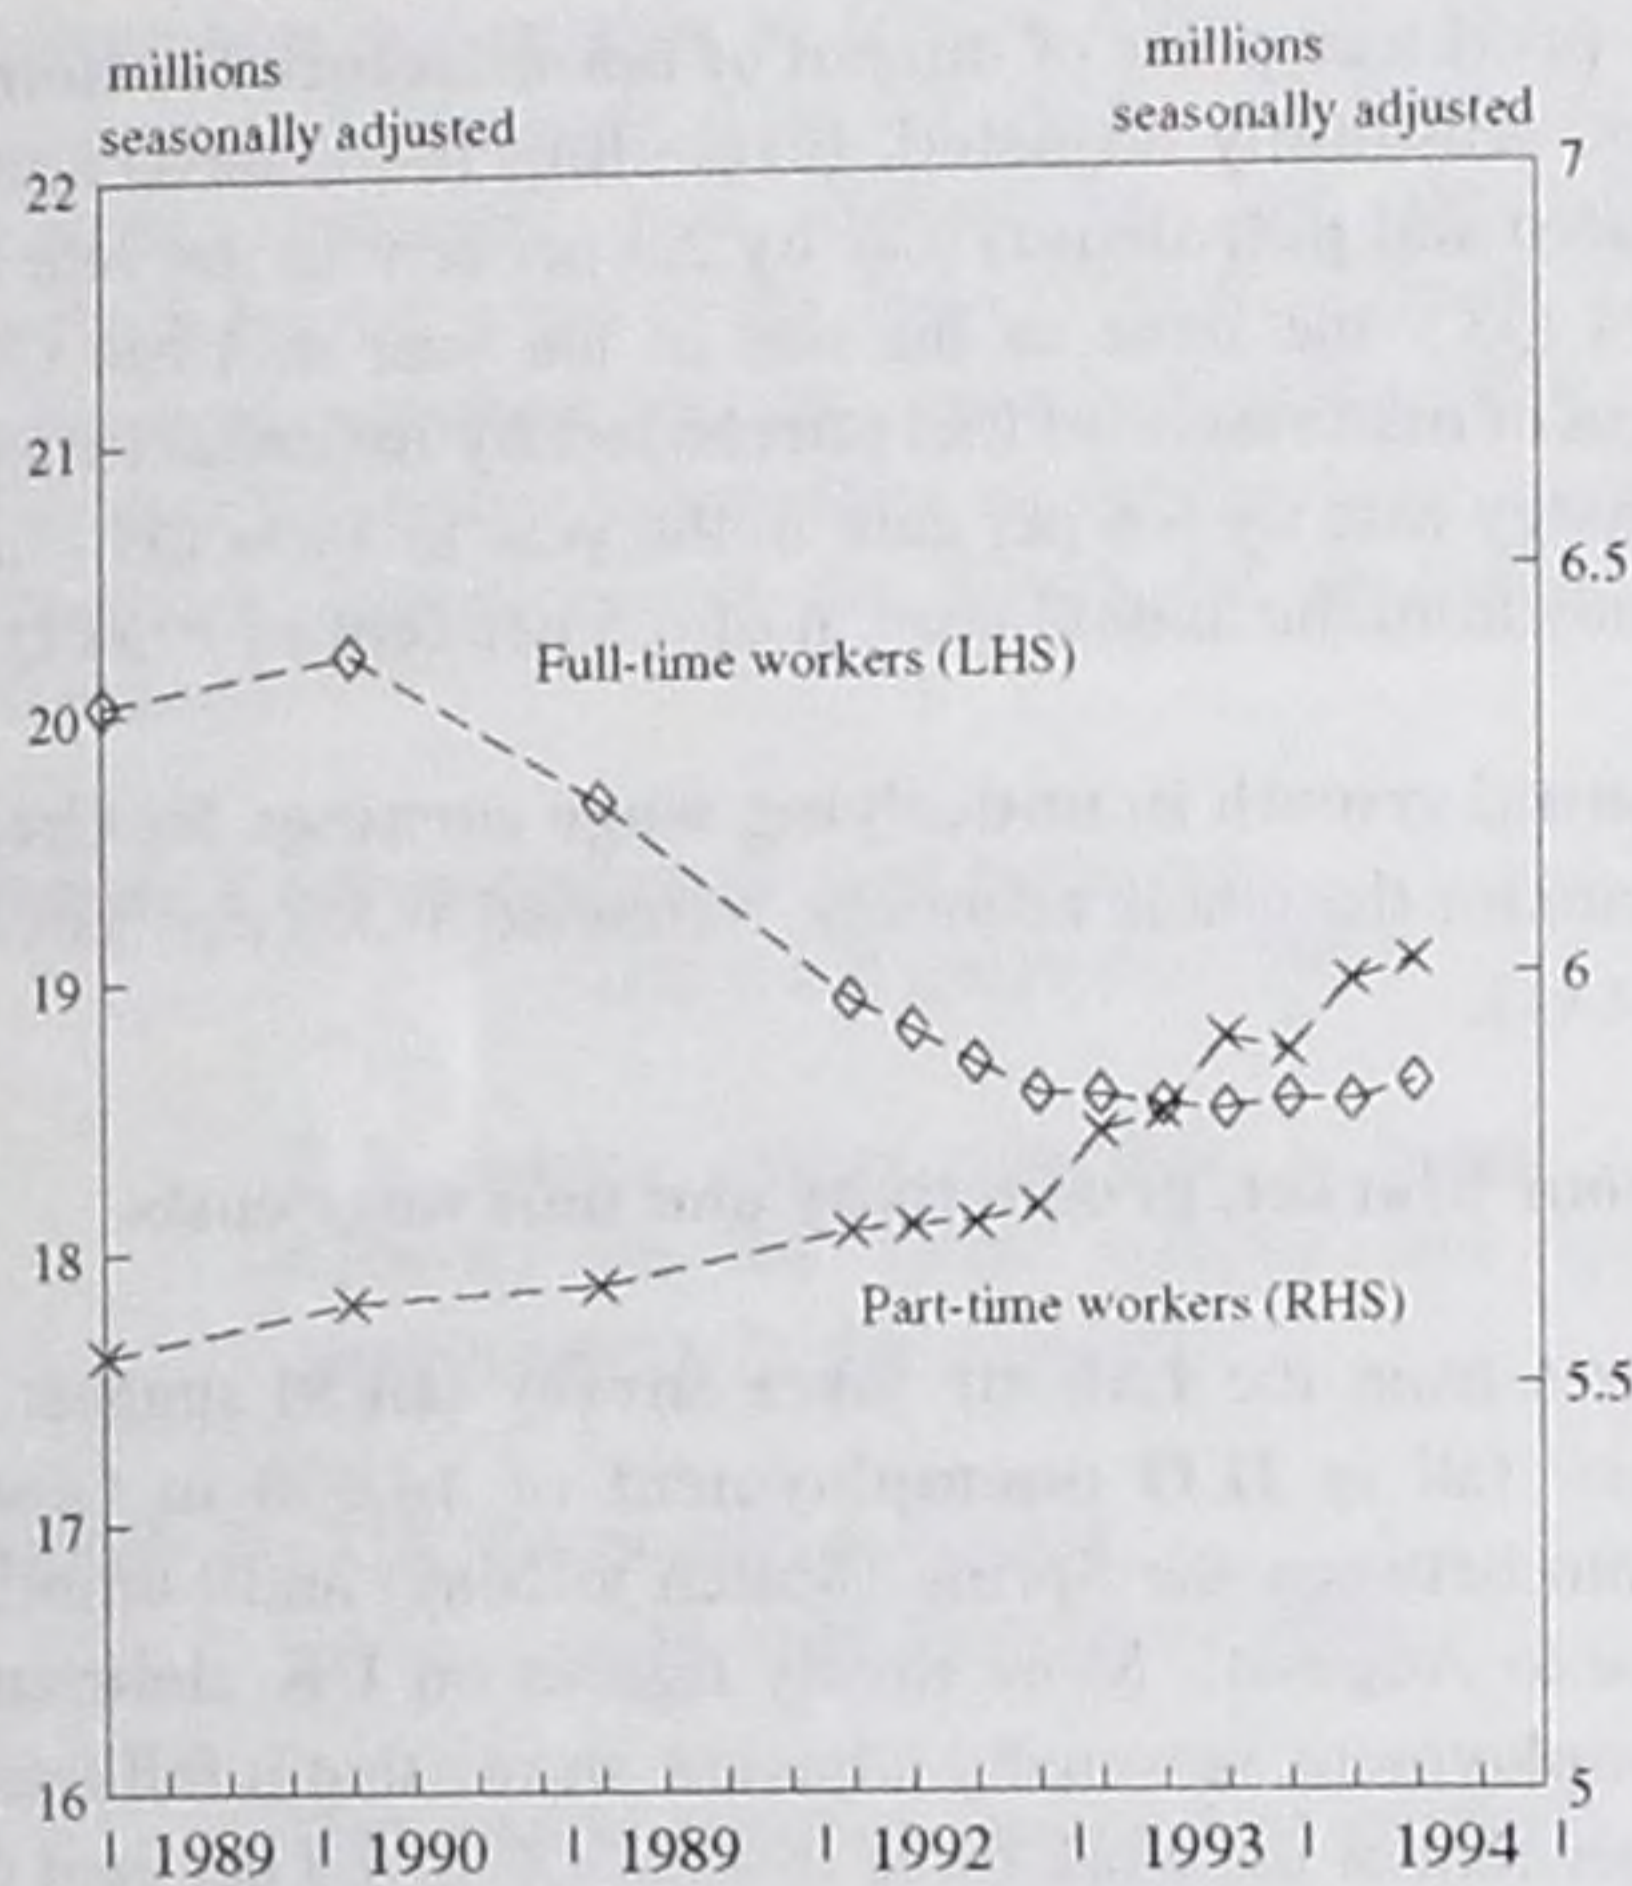

Output and expenditure

Gross domestic product, at constant factor cost rose as it has done since 1992 Q2 - the quarter in which the CSO's coincident cyclical indicator provisionally located a trough. It rose by 0.8 per cent between the second and third quarters of 1994. **Excluding oil and gas extraction**, GDP also rose by 0.8 per cent over this period.

The **volume of output** rose in all sectors bar construction and agriculture, which fell by 1.3 per cent and 0.3 per cent respectively, between 1994 Q2 and 1994 Q3.

The volume of domestic expenditure, at constant prices, fell slightly between 1994 Q2 and 1994 Q3 - the first quarterly fall since 1992 Q1. Rises in consumer's expenditure, of 0.5 per cent, and general government consumption, of 0.3 per cent, were offset by a fall in fixed investment, of 0.6 per cent, and an increase in stocks below that recorded in the second quarter. GDP was stimulated by the increase in net exports of goods and services, which contributed 0.8 per cent to the growth in GDP.

Labour force survey

The sectoral accounts

Overview

The private sector (the personal, industrial and commercial and financial sectors combined) consolidated its position as its financial surplus, seasonally adjusted, rose from £8.4 billion in 1994 Q2 to £10.9 billion in 1994 Q3.

A counterpart to this was a small rise in the general government deficit from £10.3 billion to £10.4 billion.

The overseas sector's position, relative to the UK, was reversed from a surplus of £1.1 billion to a deficit of £0.8 billion. Sectoral financial balances are shown in chart 3.

Sector accounts - current transactions

Personal disposable income rose by 2.2 per cent between 1994 Q2 and 1994 Q3. Growth across all the income categories, particularly other personal income which rose by 4.7 per cent, was only partially offset by a rise in UK taxes on income of 4.4 per cent. Consumers expenditure at current prices, rose at a lower rate, 1.1 per cent, which resulted in a rise in the savings ratio from 9.6 per cent to 10.5 per cent. Real disposable income rose by 1.5 per cent over the period, more than reversing the falls in 1994 Q1 and 1994 Q2.

Chart 3
Sectoral financial balances

Gross trading profits of companies and financial institutions rose by 2.9 per cent between the second and third quarters of this year. This was largely due to increases in gross trading profits of non-north sea industrial and commercial companies which increased their profits by 5.1 per cent over this period. Companies and financial institutions increased dividends payments, up 7.5 per cent on 1994 Q2. Profits due abroad also rose strongly, by 19.0 per cent on the previous quarter, although it was 2.6 per cent lower than the third quarter last year. Over the same period, UK taxes on income rose by 7.6 per cent, despite a fall in advanced corporation taxes of 15.0 per cent.

The balance of undistributed income of UK companies and institutions rose from to £20.7 billion in 1994 Q3.

Sector accounts - capital transactions

A fall in gross domestic fixed capital formation and a lower increase in the book value of stocks of ICC's resulted in a rise in the combined company sector financial surplus from £3.8 billion in 1994 Q2 to £4.9 billion in 1994 Q3.

Public sector gross domestic fixed capital formation rose slightly as falls in capital expenditure by public corporations and central government were offset by an increases in local authorities. Together with the fall in the overall current deficit, the resultant combined government deficit rose from £10.3 billion in 1994 Q2 to £10.4 billion in 1994 Q3.

In the overseas sector, a fall in the UK visible deficit of £0.9 billion between 1994 Q2 and 1994 Q3 contributed to the reversal on the current account from a deficit of £1.1 billion to a surplus of £0.8 billion. Elsewhere, a rise in the surplus on services was offset by a fall in net investment income from abroad.

UK ECONOMIC ACCOUNTS: THE THIRD QUARTER OF 1994

This publication presents UK national accounts, including balance of payments accounts, for the third quarter of 1994. These estimates were first released on 22 December 1994.

A. GROSS DOMESTIC PRODUCT

GDP at current and constant prices

Gross domestic product (GDP) at constant 1990 factor cost in the third quarter of 1994 was 0.8 per cent higher than in the previous quarter and 4.1 per cent higher than in the third quarter of 1993.

Chart 1
Gross domestic product
at constant factor cost

GDP at current market prices - money GDP - increased by 1.5 per cent between the latest two quarters to reach a level 6.1 per cent higher than a year earlier.

The implied GDP deflator at factor cost - also known as the index of total home costs - increased by 0.7 per cent between the second and third quarters of 1994 and rose by 1.6 per cent compared to a year earlier.

Gross national disposable income, which measures the real income of the United Kingdom, rose by 1.2 per cent between the second and third quarters of 1994. This is more than the rise in GDP as there was an improvement in the UK's terms of trade.

Estimates of GDP and related series are shown in Table A. Further information is given in Table A1 of the Appendix.

Expenditure components of GDP (Tables A2, A5, A6, A7 and A8)

Between the second and third quarters 1994, total domestic expenditure at constant prices remained broadly unchanged. There were increases in consumers' expenditure and general government final consumption, but a fall in fixed investment. There was stockbuilding in the third quarter of 1994, but at a slower rate than in the previous quarter. Within general government final consumption, there were rises in spending by central government and local authorities. Net imports fell from £1.9 billion in the second quarter of 1994 to £0.8 billion in the latest quarter, equivalent to a rise of 0.8 per cent in GDP.

Chart 2
Consumers' expenditure
at constant 1990 prices

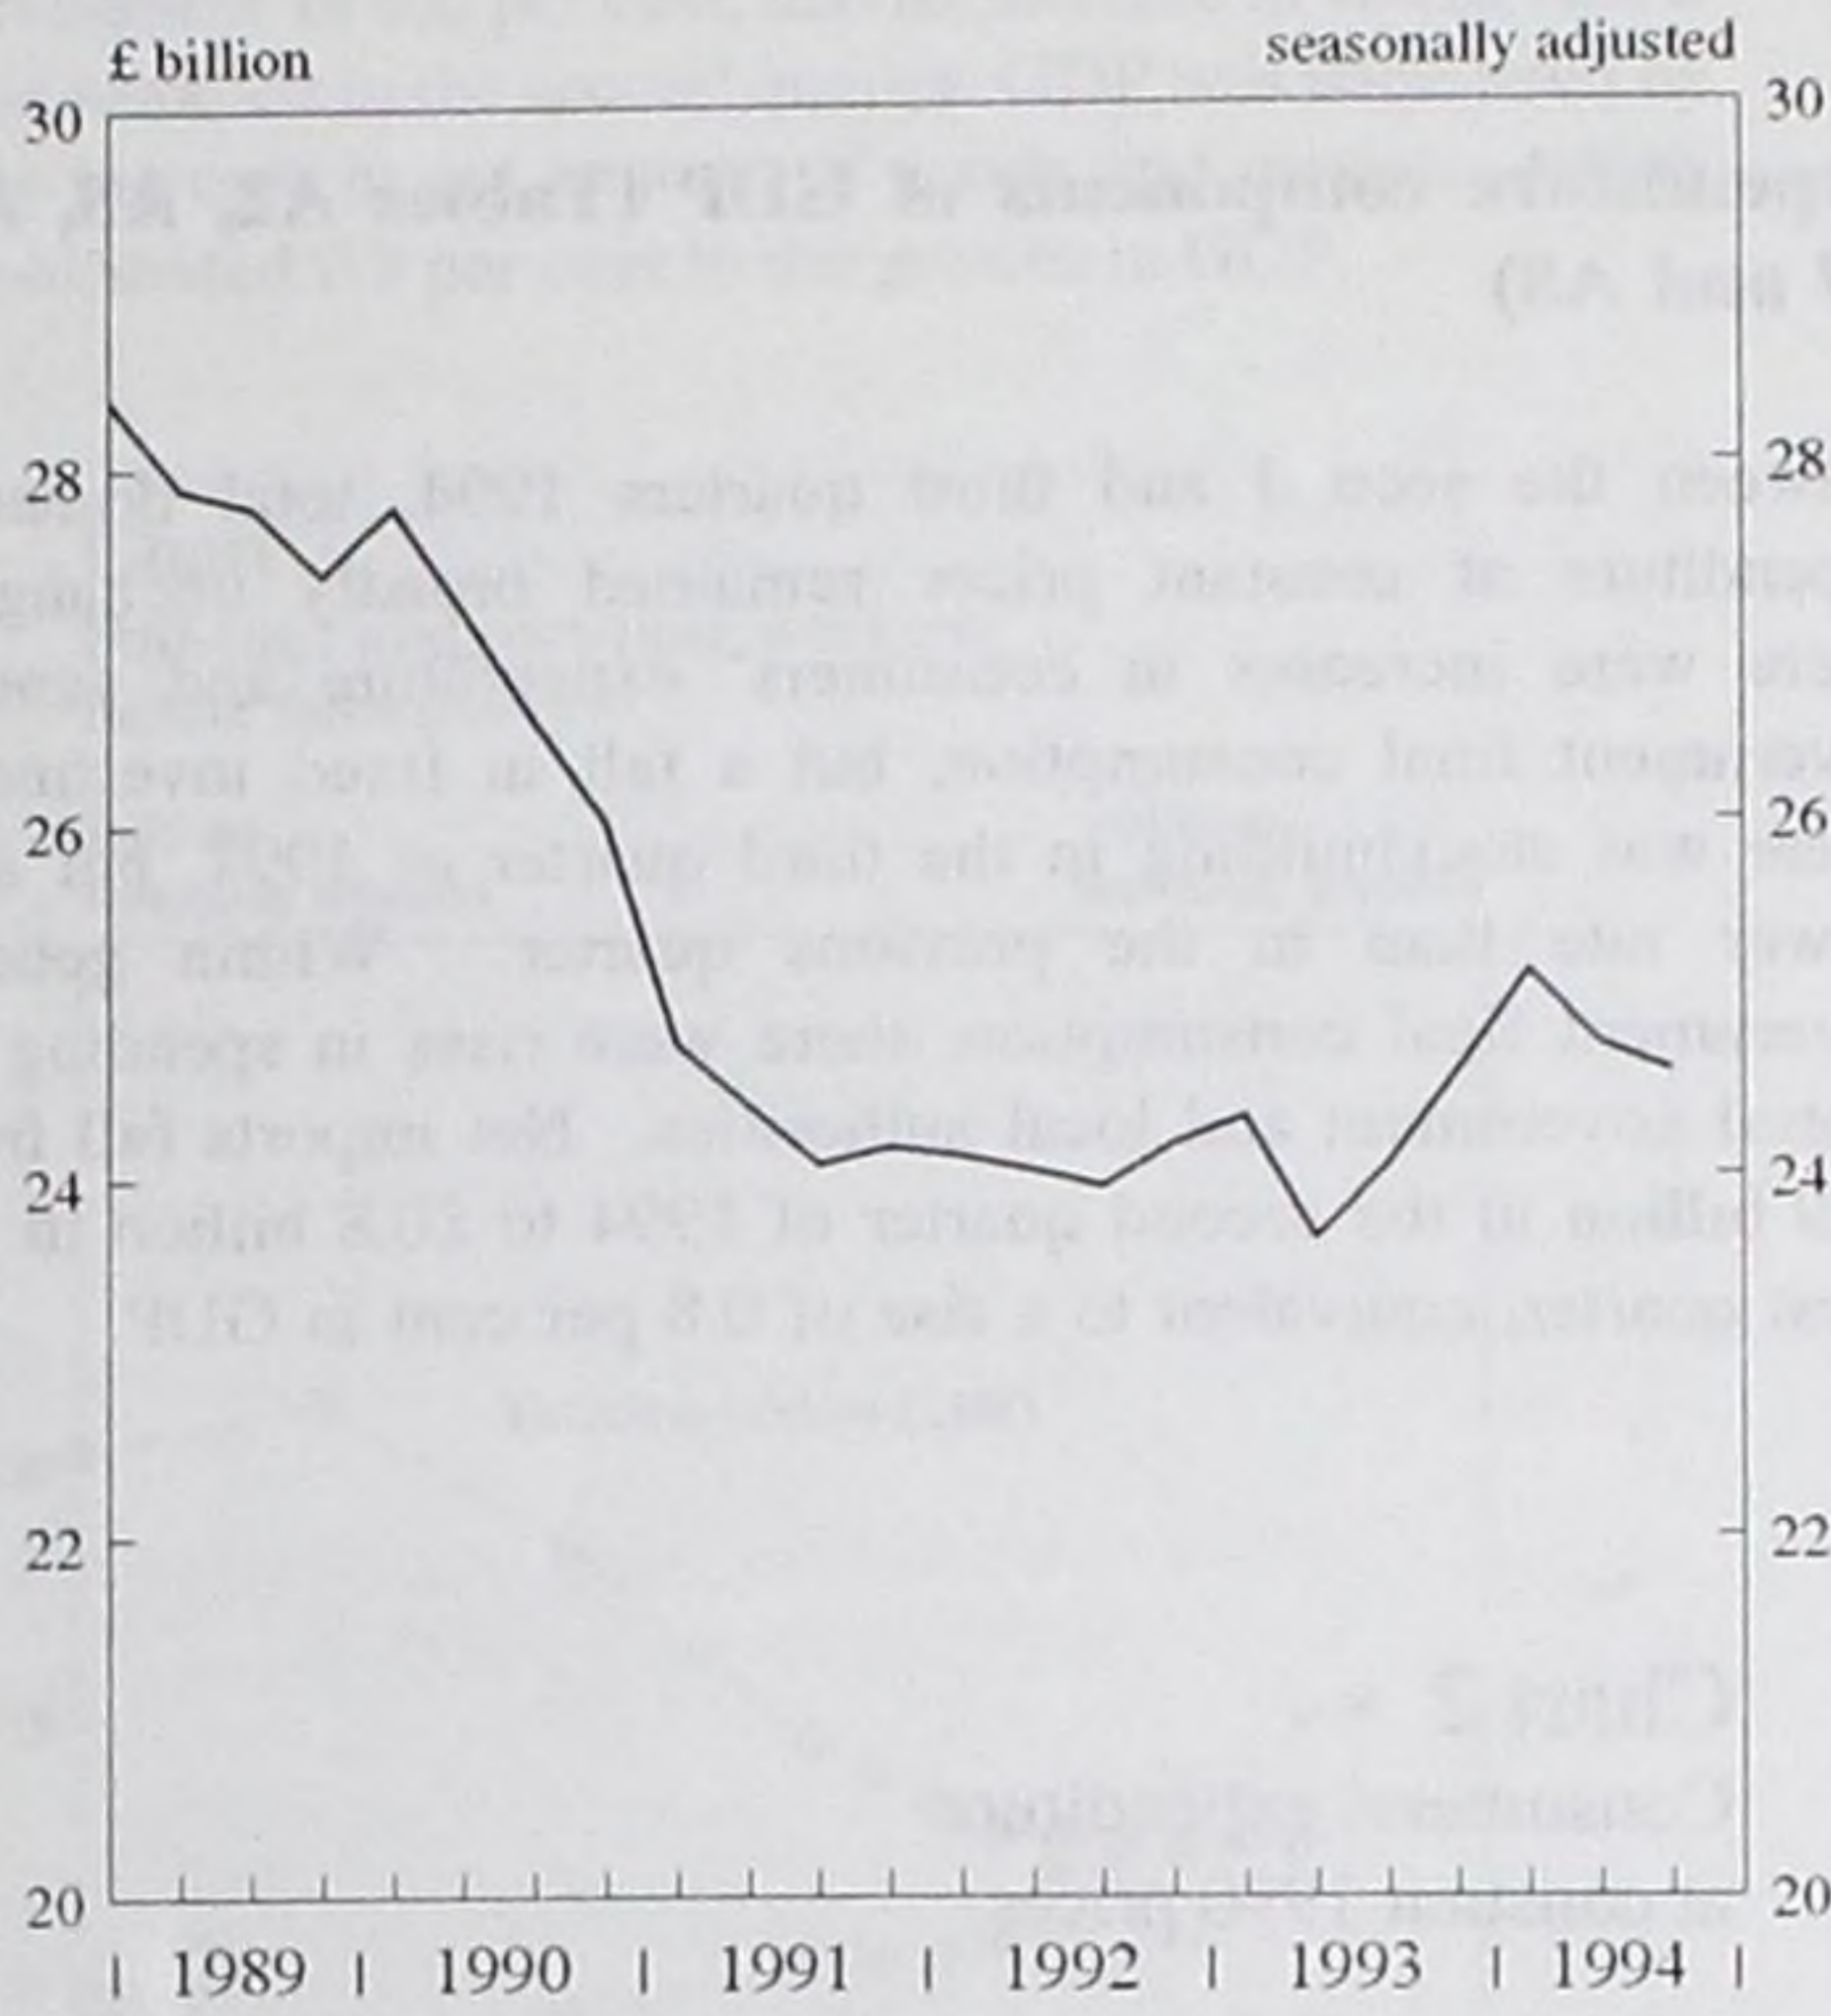

Consumers' expenditure (Table A5)

Consumers' expenditure at constant 1990 prices increased by 0.5 per cent between the second and third quarters of 1994. Consumers' expenditure is now 6.3 per cent above its trough in the first quarter of 1992. Spending on durable goods increased by 0.8 per cent between the latest quarters, this included a rise of 0.8 per cent in spending on vehicles. There was a rise of 0.2 per cent in spending on non-durable goods, with a rise of 1.5 per cent in spending on clothing and footwear. Spending on services increased by 0.6 per cent, including an increase of 1.7 per cent in spending on catering.

Chart 3

Gross domestic fixed capital formation
at constant 1990 prices

Gross domestic fixed capital formation (Tables A6 to A7)

Total fixed investment fell by 0.6 per cent between the second and third quarters of 1994. Investment by the public sector rose by 0.4 per cent but there was a fall of 0.8 per cent in the private sector.

Between the third quarters of 1993 and 1994 investment rose by 4.0 per cent in the private sector but fell by 5.1 per cent in the public sector.

The analysis by type of asset shows increases in plant and machinery and other new buildings and works, but falls in vehicles, ships and aircraft and dwellings. By industry as a whole, there was an increase of 0.8 per cent, this included rises in manufacturing and other industries. There were falls in mining and quarrying and electricity, gas and water supply in the latest quarter.

Value of physical increase in stocks and work in progress (Table A8)

There was stockbuilding in the third quarter of 1994, but at a slower rate than in the previous quarter. Within manufacturing as a whole, there was greater stockbuilding than in the previous quarter. In electricity, gas and water supply and wholesale distribution there was destocking.

Income components of GDP (Table A3)

Total domestic income increased by 1.8 per cent between the second and third quarters of 1994. There was a rise of 1.0 per cent in income from employment and of 5.3 per cent in corporate profits, which include companies and public corporations. Other components of income also showed increases.

Output components of GDP (Table A4)

The output of the production industries increased by 1.2 per cent between the second and third quarters of 1994, including a rise in electricity, gas and water supply of 2.1 per cent. There was also a 1.2 per cent rise in manufacturing. Output of the service industries rose by 0.8 per cent between the second and third quarters of 1994. However, there were falls in construction and agricultural output.

1 Financial year estimates are an approximation, since GDP and hence GNP are estimated only in seasonally adjusted form, constrained to calendar years. The estimates given in this table for each financial year are devised by summing over the appropriate four seasonally adjusted quarters.

THE SECTOR ACCOUNTS

The sector accounts for the third quarter show that the personal sector financial surplus was £6.0 billion, £0.9 billion higher than in the second quarter, and the industrial and commercial companies sector financial surplus was £2.7 billion, an increase of £0.8 billion on the same comparison. These movements are reflected in the switch from a balance of payments current account deficit of £1.1 billion in the second quarter to a surplus of £0.8 billion in the third quarter.

The increase in the personal sector financial surplus is primarily due to higher dividend receipts by life assurance and pension funds. These are reinvested by the funds, so contributing to personal sector saving. The industrial and commercial companies sector has now recorded a large financial surplus in each of the last four quarters, reflecting strong growth in profits but little change in capital expenditure.

Personal sector (Tables A9, A17 and A19)

Seasonally adjusted total personal income, before deductions, increased by 2.2 per cent in the third quarter of 1994, to a level 5.3 per cent above that in the same quarter of 1993. Following a fall in the previous quarter, wages, salaries and forces pay rose by 1.0 per cent in the third quarter to a level 3.6 per cent higher than the third quarter in the previous year. Current grants from general government rose by 3.0 per cent. Other personal income (mainly income from self-employment and from investments) was 4.7 per cent higher in the latest quarter than in the previous quarter, mainly due to an increase in receipts of company dividends.

Deductions from income increased by 2.3 per cent between the second and third quarters including a rise of 4.4 per cent in income tax payments. Social security contributions fell slightly. The movements in income and deductions resulted in an increase of 2.2 per cent in personal disposable income. Consumers' expenditure at current prices increased by 1.1 per cent. Therefore, there was an increase in the saving ratio from 9.6 per cent in the second quarter to 10.5 per cent in the third. This follows a decrease in the ratio in each of the five previous quarters. Real personal disposable income rose by 1.5 per cent in the third quarter.

Fixed investment increased from £6.5 billion in the second quarter to £6.9 billion in the third quarter. Together with the increase in saving, this resulted in a financial surplus of £6.0 billion in the third quarter, £0.9 billion higher than in the second quarter.

The sector's total financial transactions (not seasonally adjusted) is estimated at £4.3 billion in the second quarter, £0.4 billion more than in the previous quarter. Borrowing from banks (other than borrowing secured on dwellings) increased by £1.2 billion, the second successive period of significant net increase in borrowing. Other borrowing from banks and from other institutions, mainly loans secured on dwellings, were also higher: at £6.0 billion this was the highest figure for three years.

Net investment in British government securities was £2.7 billion in the third quarter. On the other hand, there was a disinvestment of £1.7 billion in UK company securities in the third quarter, following a net investment of £2 billion in the second quarter. Within the figure, purchases of unit trust units of £1.2 billion were lower than in any period since the fourth quarter of 1992.

Chart 4
Personal sector saving ratio
per cent

Industrial and commercial companies (Tables A11, A17 and A20)

The income of industrial and commercial companies continued to grow in the third quarter of 1994, showing a 3.7 per cent increase on the previous quarter. The largest contributor to the latest increase was the profits of non-North sea companies which increased by 5.1 per cent in the latest quarter. In contrast, the profits of north sea companies fell sharply from the exceptionally high second quarter figures but showed a 17.4 per cent increase compared with the third quarter of 1993.

Profits allocated to foreign direct investors remained high in the third quarter at £2.3 billion. Dividend payments to United Kingdom shareholders showed a slight decrease on the previous quarter, but were 10.1 per cent higher than in the third quarter of 1993. Although there was an increase in payments of taxes on income, allocation of income in total grew more slowly than income so that saving increased by £0.7 billion during the third quarter.

There was a slight increase in gross domestic fixed capital formation during the third quarter of 1994, and stock-building was only slightly less than in the second quarter, which was the highest since 1989. The financial surplus of industrial and commercial companies was £2.7 billion in the third quarter, an increase on the revised £2.0 billion second quarter surplus.

The net borrowing requirement of industrial and commercial companies was £4.4 billion in the third quarter of 1994, up from £1.9 billion in the previous quarter. Since the start of 1993, ICCs have substantially reduced their bank borrowing, but the net repayment of £1.4 billion in the third quarter was the smallest since the fourth quarter of 1992. ICCs had also been building up

their financial assets in 1993 and the first half of 1994, but in the third quarter there were net disposals of financial assets of £0.9 billion. Industrial and commercial companies raised £1.9 billion in net capital issues in the third quarter (included in other borrowing in Table B), which was substantially down from £5.7 billion in the second quarter. The fall is attributable to lower market issues and to buy-backs of equity and debt, mainly by privatised companies.

The net effect of a one per cent change in interest rates on industrial and commercial companies' finances is estimated to be just over £½ billion in the first year following a change. This estimate is based on industrial and commercial companies' holdings of interest-bearing financial assets and liabilities at the end of the third quarter of 1994, with the most important components being industrial and commercial companies' bank lending and bank deposits.

Financial companies and institutions (Tables A12, A17 and A21)

Financial companies' savings in the third quarter, at £4.2 billion, were little different from the record levels in the first half of the year. There was a further small increase in financial companies' gross trading profits in the third quarter and an increase of £0.7 billion in net income from abroad. However, these were more than offset by lower net dividends and interest receipts and higher taxes on income.

The quarterly path of financial companies' capital expenditure can be rather volatile. In the third quarter it fell back to £2.1 billion from the record £2.5 billion in the second quarter. In the first three quarters of 1994 their capital expenditure increased to £6.4 billion compared with just £2.9 billion in the same period of last year. In spite of the high level of capital expenditure financial companies continued to have a large financial surplus which rose to £2.2 billion in the third quarter.

Financial companies' total financial transactions, which is not seasonally adjusted, rose sharply to £7.3 billion in the third quarter, up from £2.2 billion in the second quarter. Within the total, financial companies' net investment in British Government Securities fell back to £4.8 billion in the third quarter, compared with £7.1 billion of net investment in the second quarter, and net disposals of £1.2 billion in the first quarter. Financial companies made a further net disinvestment in company securities of £2.6 billion but this was substantially smaller than in the first half of the year when there was a total disinvestment of nearly £31 billion as securities dealers reduced their exposure to overseas securities.

Sterling and foreign currency deposits with banks increased further in the third quarter, by £9.5 billion and £12.8 billion respectively, after much smaller increases in the previous quarter. The net increase in bank lending in the third quarter was £18.2 billion, compared with £11.9 billion in the second quarter and £5.8 billion in the first quarter. This is in contrast to net repayments of £18.3 billion in 1993 as a whole.

Public sector (Tables A13 to A15, A17 and A22 to A24)

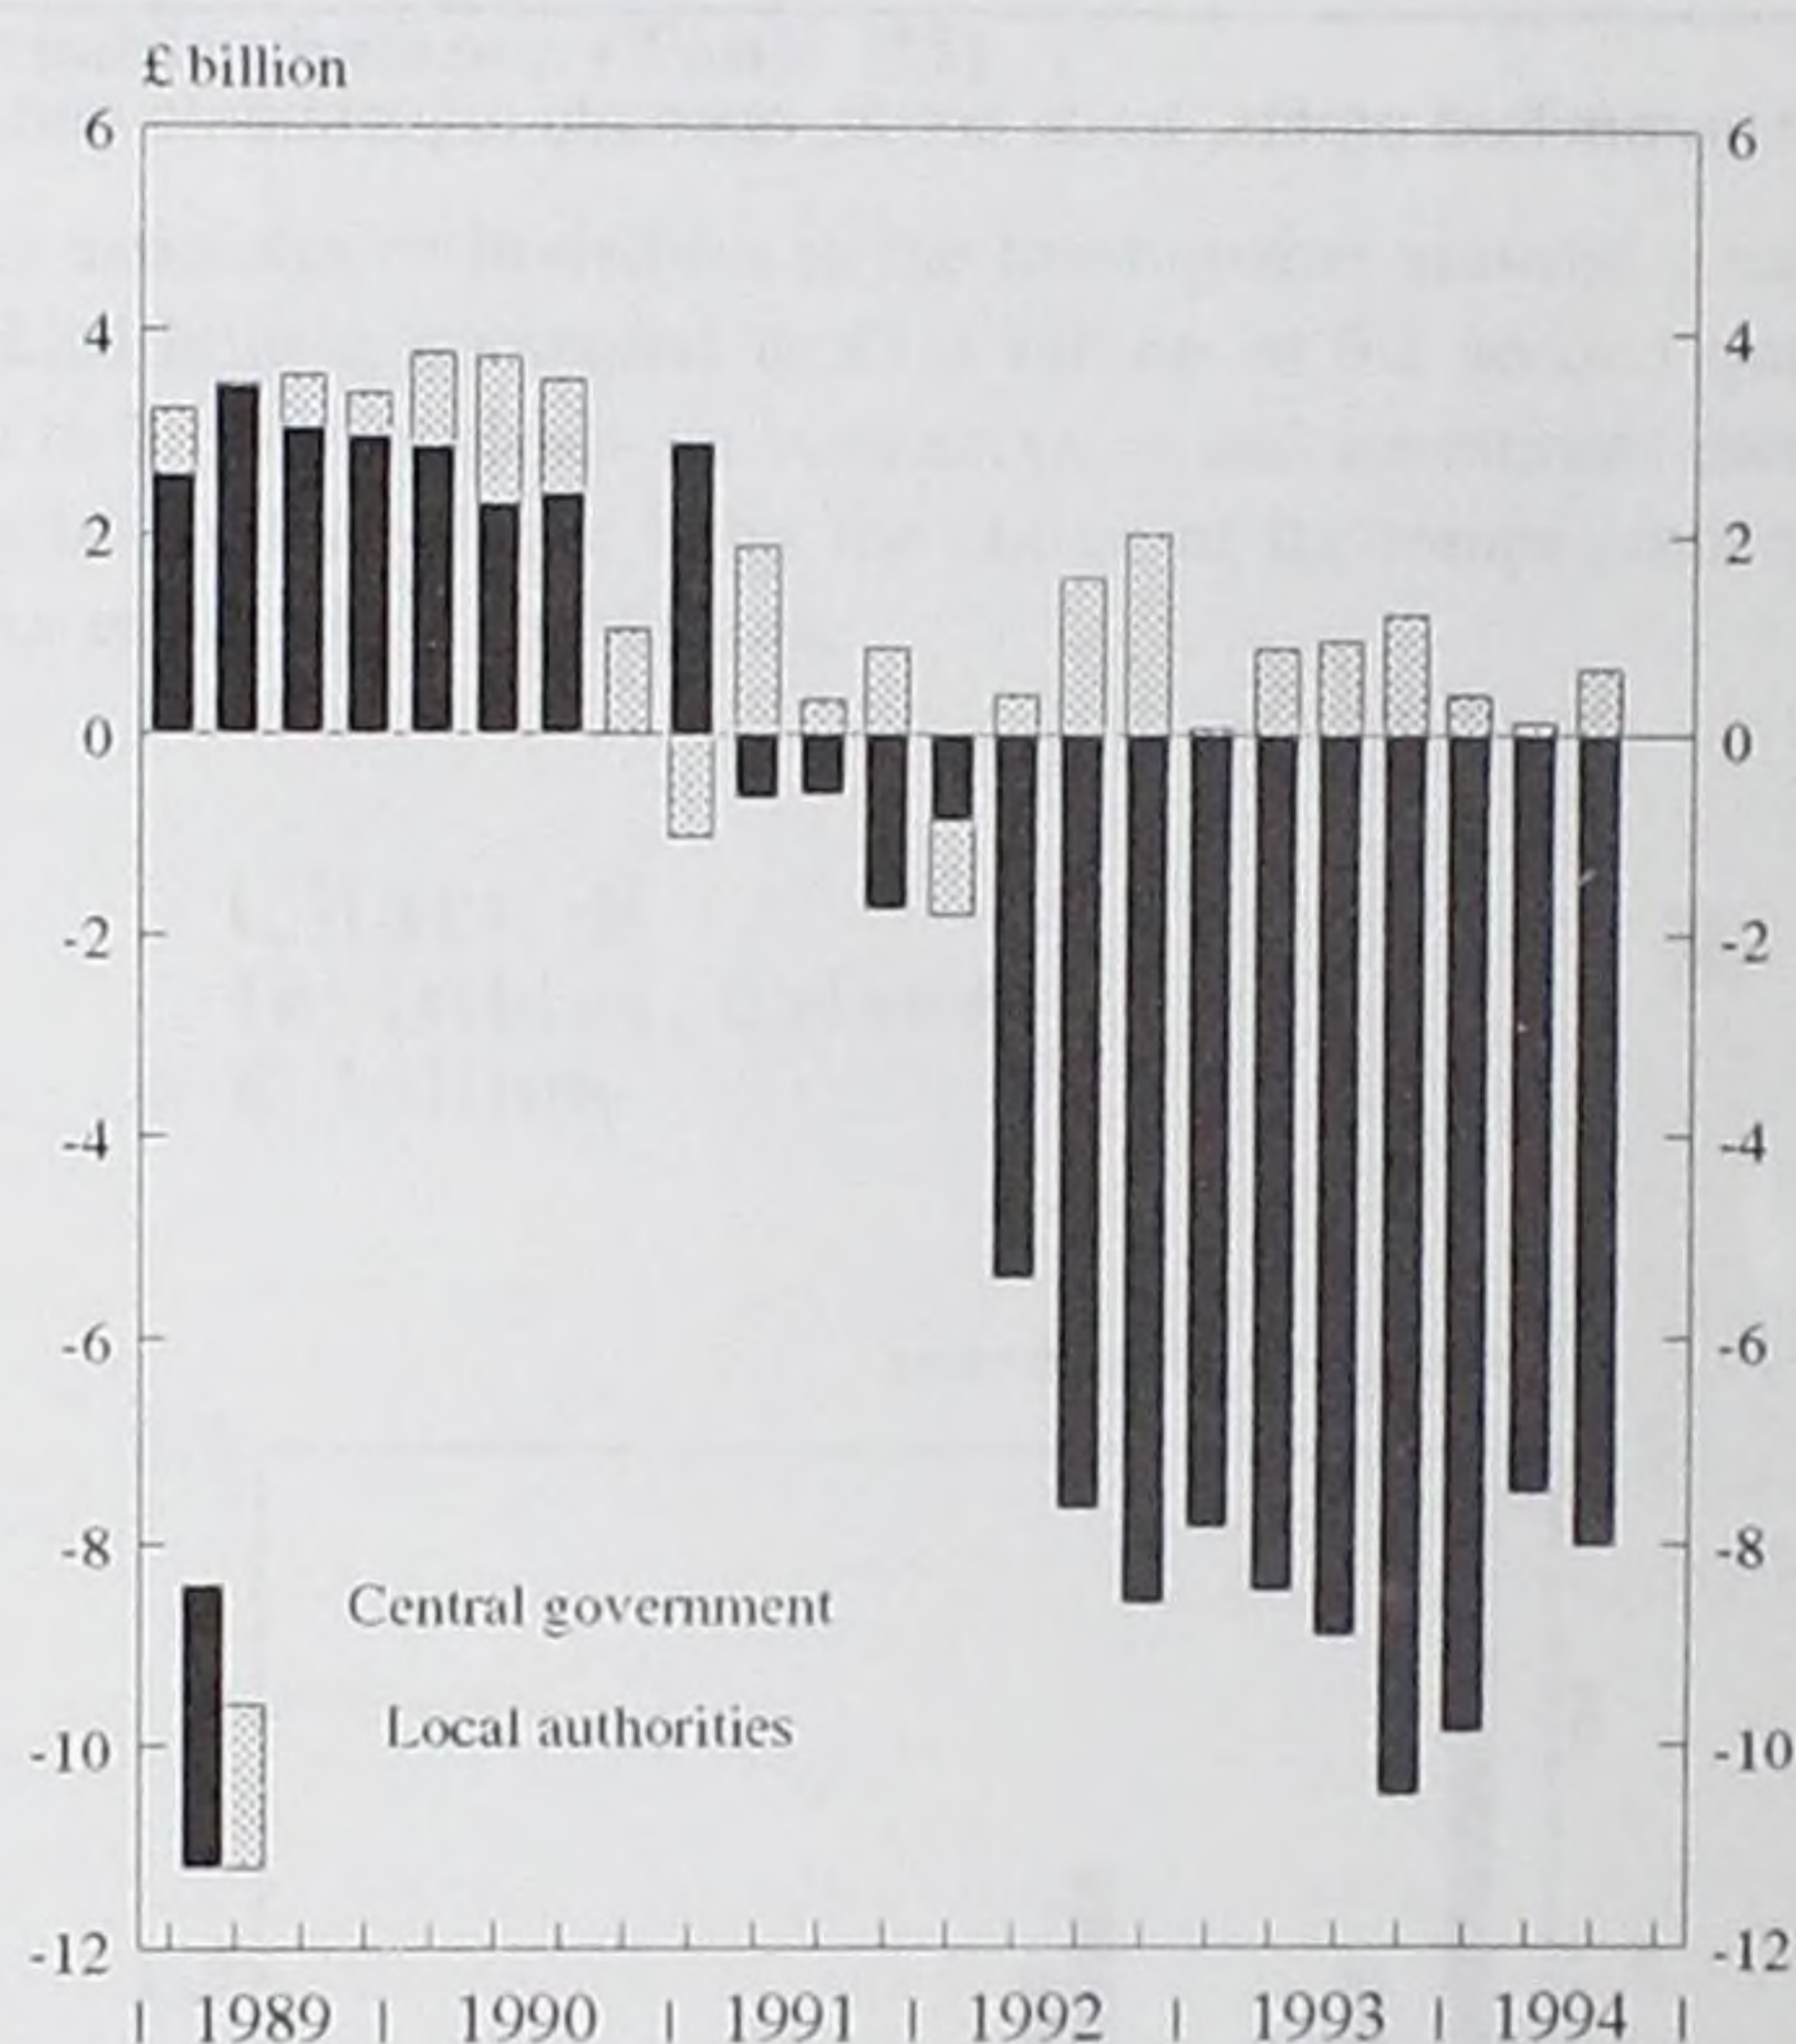

Central government current receipts continued to rise steadily, by 2.5 per cent, an increase of £1.4 billion. £0.9 billion of this increase was in taxes on income which were boosted by early receipts of corporation tax due on 1 October. Taxes on expenditure and receipts of interest and dividends both rose by around £0.3 billion.

Total current expenditure rose by 3.0 per cent following the fall of 1.5 per cent in the previous quarter. Payments of social security benefits rose by 4.5 per cent having fallen in the previous two quarters. Final consumption rose by 1.3 per cent, driven by increases in expenditure on services other than health and defence.

Current grants to local authorities rose by 4.8 per cent, having fallen in the first part of 1994. Other local authorities' current receipts were about the same as in the previous quarter. Total current expenditure by local authorities rose only slightly, but gross domestic fixed capital formation rose from £1.3 billion to £1.5 billion.

Chart 5

Central and local government
balance on current account

Public corporations' gross trading surplus rose by 12.9 per cent. Subsidies fell by £0.1 billion but payments of interest and dividends rose by £0.3 billion.

The public sector financial deficit was £11 billion not seasonally adjusted. Net issues of British Government Securities were £6.1 billion, a similar level to the previous quarter. Privatisation proceeds were £1.6 billion. Both local authorities and public corporations made net repayments of borrowing in the third quarter.

B. BALANCE OF PAYMENTS

Current Account (Table B1)

The **current account** was in surplus by £0.8 billion, compared to a revised estimate of a deficit of £1.1 billion in the second quarter.

Chart 6
Current balance
£ billion

Visible balance (Table B2)

The **visible trade deficit** in the third quarter decreased to £1.5 billion, having been £2.4 billion in the second quarter. The decrease was due mainly to a 5 per cent rise in the value of exports between the second and third quarter while imports rose by just 2 per cent. The volume of exports showed an increase of 2½ per cent between these quarters while the volume of imports was unchanged.

Chart 7
Visible trade balance
£ billion

Invisibles balance (Table B4)

First estimates of **invisibles** in the third quarter showed a surplus of £2.4 billion, compared to £1.3 billion in the second quarter, due to higher surpluses on both services and investment income. The invisibles balance is by the nature of its components much more erratic than visible trade.

Chart 8
Invisibles balance
£ billion

Services (Table B5)

The surplus on **services** rose to £1.4 billion in the third quarter compared to £0.8 billion in the second quarter. The rise was partially due to a higher surplus on the financial and other services account, with higher earnings on insurance. There were lower deficits on the civil aviation, travel, sea transport and government services accounts.

Chart 9
Services balance
£ billion

Investment income (Table B6)

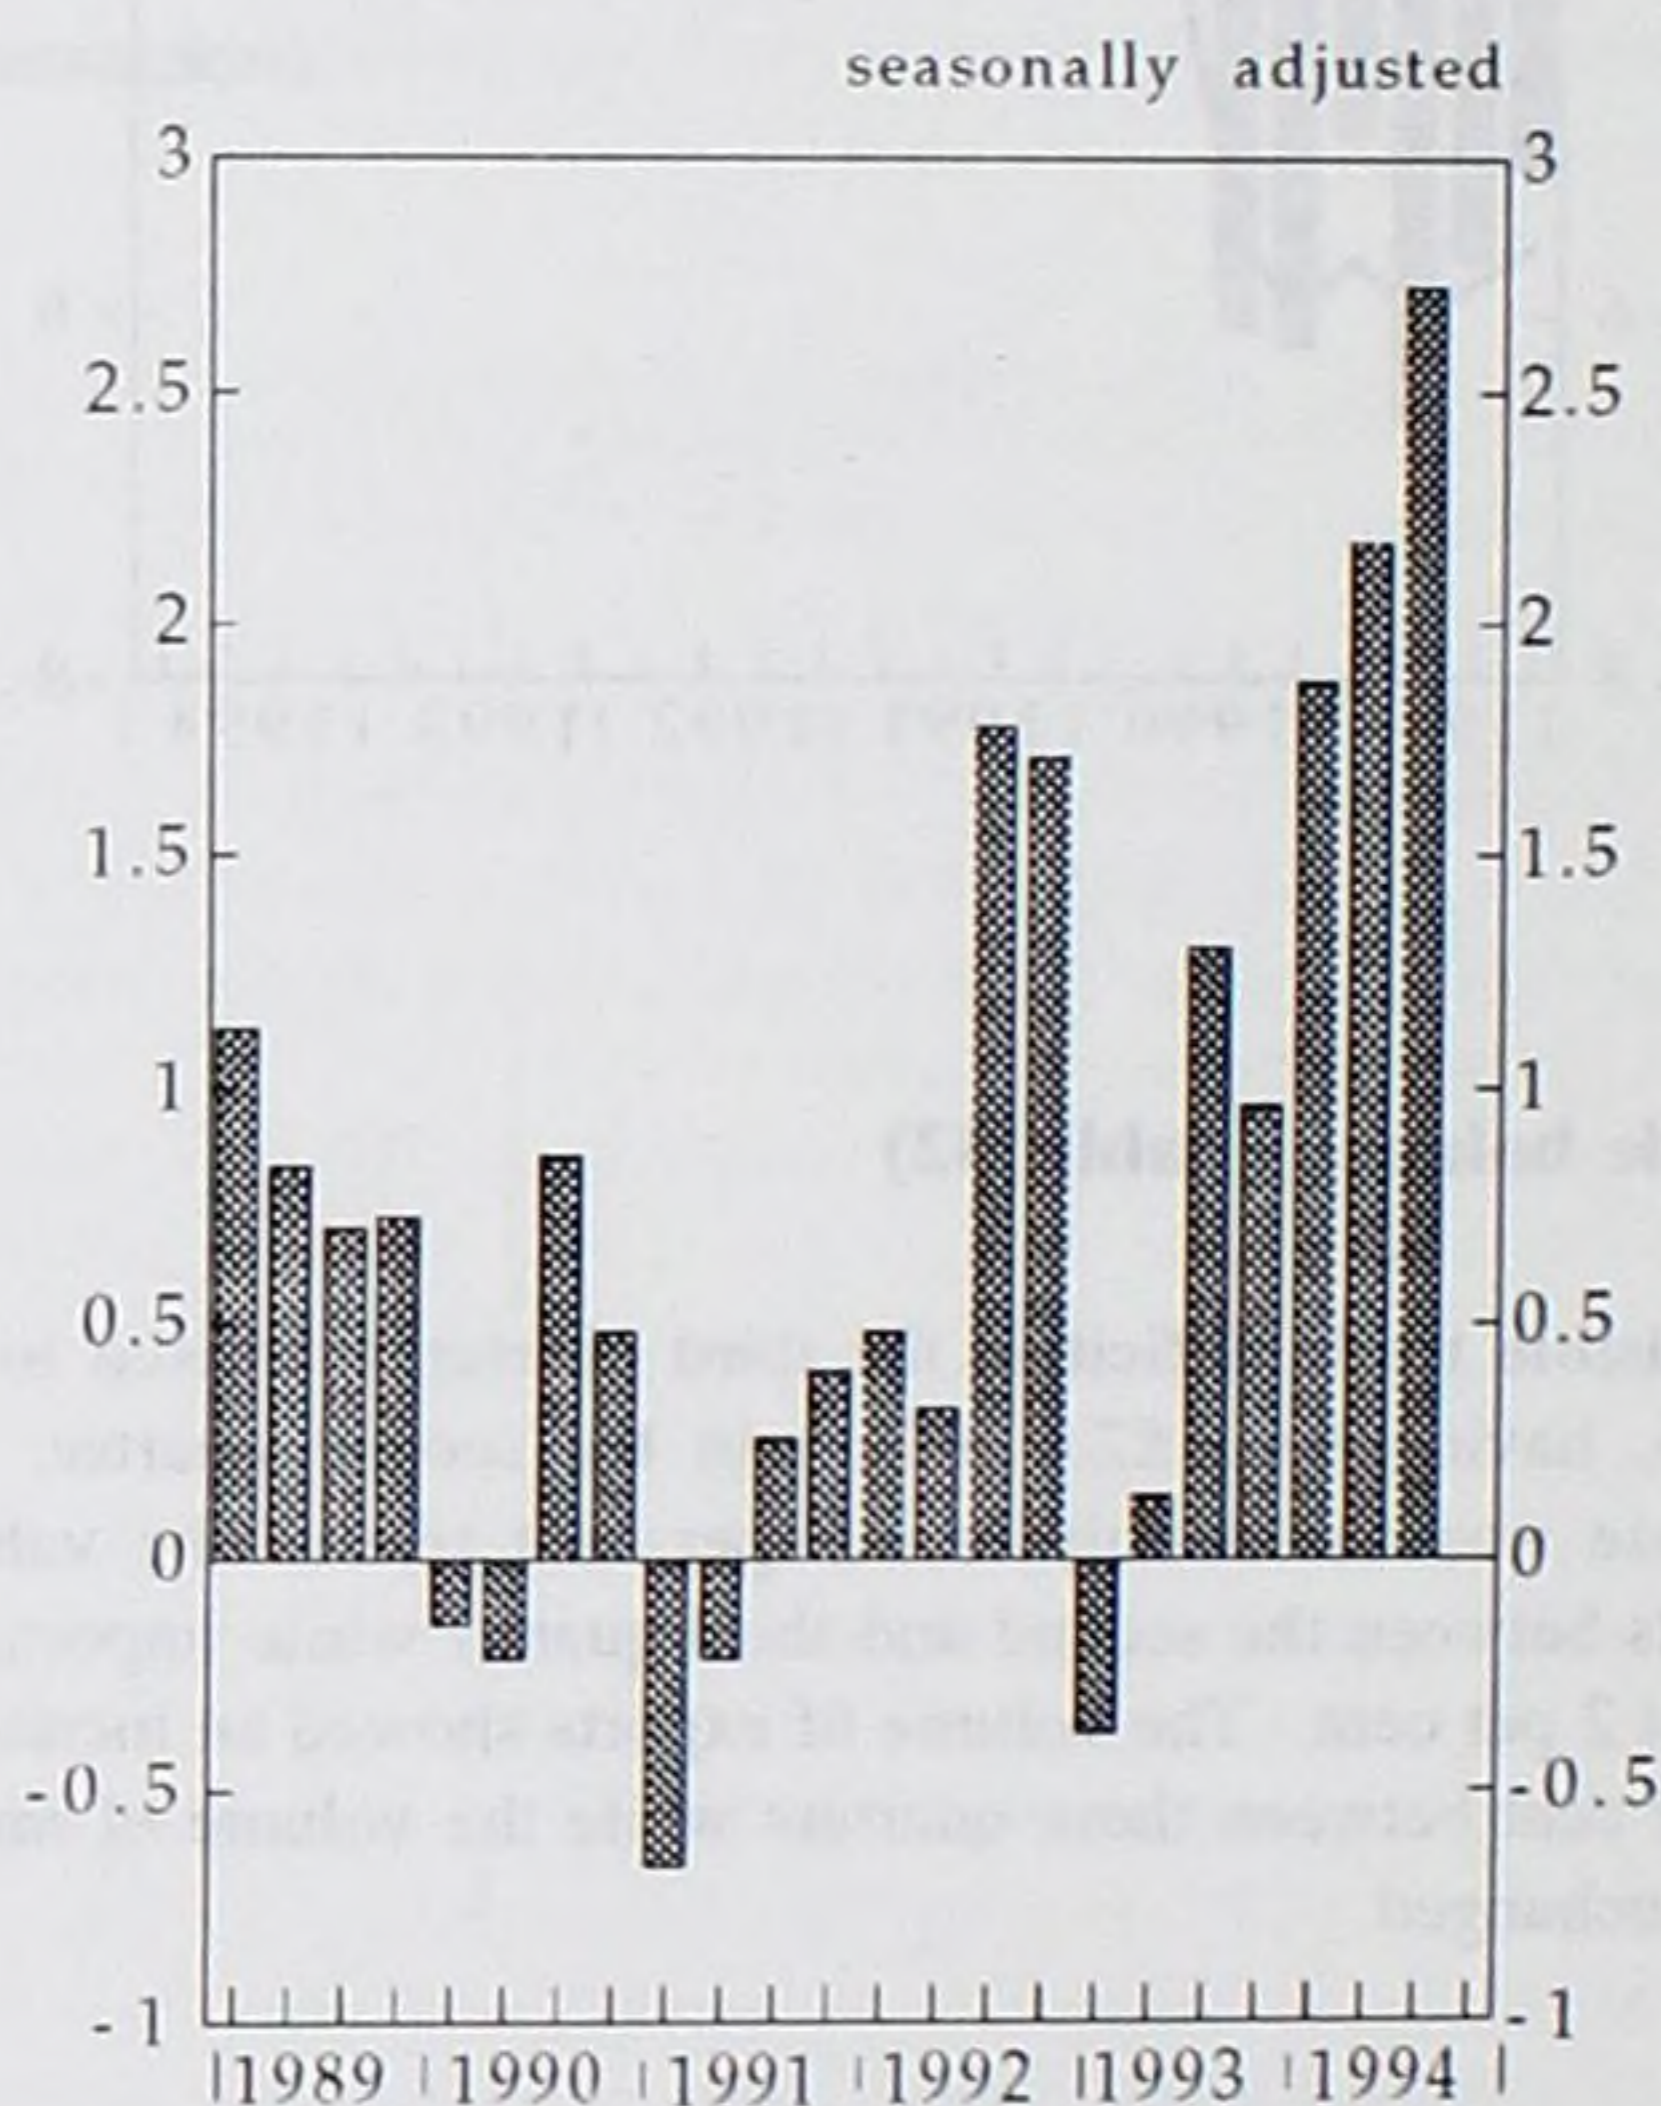

Investment income showed a surplus of £2.7 billion in the third quarter, compared to a net surplus of £2.2 billion in the second quarter. The net direct investment income surplus, at £2.9 billion, was slightly lower than that in the second quarter, £3.0 billion. Net interest payments by UK banks showed a surplus of £0.1 billion, compared to a deficit of £0.8 billion in the second quarter. The deficit on lending and borrowing by UK residents other than banks and general government rose slightly to £1.6 billion, compared to £1.4 billion in the second quarter.

Direct investment income credits increased to £5.5 billion in the third quarter, compared to £5.2 billion in the second quarter. This was due mainly to increased earnings from overseas subsidiaries of industrial and commercial companies (other than oil companies). Debits rose slightly to £2.7 billion, compared to £2.3 billion in the second quarter. This was due mainly to an increase in earnings of the banking sector which doubled from the total recorded in the second quarter.

Portfolio investment income credits rose slightly in the third quarter to £4.1 billion from £4.0 billion in the second quarter. Portfolio investment income payable abroad also rose slightly in the third quarter to £3.0 billion, compared to £2.9 billion in the second quarter. This was due mainly to higher interest payments on British government stocks and UK company securities.

UK banks' earnings on borrowing and lending were in surplus by £0.1 billion in the third quarter, compared to a deficit of £0.8 billion in the second quarter. Credits rose by £1.0 billion to £8.0 billion in the third quarter, debits rose by £0.2 billion to £7.9 billion. There were net gains on interest rate swaps in the third quarter. The net gains were substantially larger at £0.7 billion than those in the previous four quarters.

Chart 10
Investment income balance
£ billion

Transfers (Table B7)

The deficit on **transfers**, at £1.8 billion was slightly higher than the revised deficit of £1.7 billion in the second quarter. Credits were higher at £1.5 billion compared to £1.1 billion in the second quarter and debits were higher at £3.2 billion, compared to £2.8 billion in the second quarter. The figures reflect higher receipts by general government from EC institutions and higher payments by general government to international organizations, including EC institutions.

Chart 11
Transfers balance
£ billion

Capital account (Transactions in assets and liabilities) (Table B8)

Identified transactions in assets and liabilities in the third quarter amounted to £26.1 billion in assets and £25.1 billion in liabilities, both substantially higher than the levels recorded in the first and second quarters. There was a net outflow of £1.0 billion in the third quarter, compared to a net inflow of £4.9 billion in the second quarter.

Direct investment overseas was £4.4 billion in the third quarter, the same as in the second quarter. An increase in the value of unremitted profits was offset by a decrease in the value of net acquisitions of new share and loan capital.

Overseas direct investment in the UK at £2.4 billion was significantly lower than the £4.1 billion recorded in the second quarter. This is due mainly to the repayment of money lent by overseas parent companies to their UK subsidiaries, and a reduction in the value of new acquisitions.

Direct investment acquisitions and disposals in the third quarter of 1994 included:

Outward acquisitions (of overseas companies):
Smiths Industries acquired the American pharmaceutical company Pharmacia Deltec for a reported £100 million.
Gardner Merchant acquired Morrison Restaurants of the US for a reported £66 million.

Outward disposals (of overseas companies):
There were no major outward disinvestments.

Inward acquisitions (of UK companies):
The American company Blockbuster Entertainment Corporation Inc increased its stake in Virgin Interactive Entertainment plc by 55 per cent for a reported £81 million.

Inward disposals (of UK companies):
There were no major inward disinvestments.

Portfolio investment overseas showed investment of £0.9 billion in the third quarter, compared to disinvestment of £9.7 billion in the second quarter. UK banks showed investment of £5.0 billion compared to disinvestment of £1.3 billion in the second quarter. Other financial institutions showed continuing disinvestment in overseas securities of £4.3 billion, following disinvestment of £8.1 billion in the second quarter. Within the total, investment in overseas bonds and preference shares amounted to £2.8 billion, compared to a disinvestment of £13.5 billion in the second quarter.

Overseas portfolio investment in the UK was higher at £5.8 billion, compared to £4.8 billion in the second quarter. There was investment in UK companies' securities of £6.7 billion in the third quarter, compared to £5.0 billion in the second quarter. There was a £1.2 billion disinvestment in British government stocks, following a disinvestment of £1.6 billion in the second quarter.

UK banks' transactions (Table B11)

UK banks' transactions other than direct and portfolio investment showed a net inflow (borrowing) of £4.5 billion in the third quarter, an inflow of £6.1 billion in sterling being partially offset by an outflow of £1.6 billion in foreign currency, following a net outflow (lending) of £9.8 billion in the second quarter, comprised of outflows of £9.0 billion in foreign currency and £0.8 billion in sterling.

Transactions of general government (Table B13)

Official reserves increased slightly by £0.2 billion, compared to £0.3 billion in the second quarter. There were no privatisation receipts paid into the official reserves during the third quarter.

Balancing item (Table B1)

Errors and omissions in the **third quarter**, representing unidentified net inflows over the current and capital accounts, were £1.0 billion, compared to unidentified outflows of £2.7 billion in the second quarter.

Net external assets (Tables B14 and B15)

The balance of identified **external assets over external liabilities** at the end of the third quarter was £25.3 billion, compared to £32.5 billion at the end of the second quarter and £21.6 billion at the end of 1993. This reflected changes in security prices and exchange rates as well as capital flows. The estimates are based on recording direct investments at book values and other assets and liabilities at estimated market values and is likely in some respects to be deficient in scope and coverage. Quarterly estimates tend to be less reliable because they are based on cumulated flows and not reported levels.

NOTES

The methodology for deriving the best central estimate of GDP is described in CSO's National Accounts Blue Book, 1994 edition. To aid users who wish to use individual measures, based separately on the income, expenditure or output approaches estimates are given in Table A27.

The CSO quarterly publication *Consumers' Expenditure: Business Monitor MQ24* was published on 22 December 1994. The publication contains over 150 different expenditure headings from 1986 onwards and a broad summary of consumers' expenditure, in annual terms, from 1963 onwards.

As well as the data presented in this publication, many other series are also available quarterly. More detailed quarterly and monthly financial data are shown in *Financial Statistics* and various *CSO Bulletins*. Many series shown in the *United Kingdom National Accounts - the CSO Blue Book* - are available quarterly either from the CSO Databank Service or on paper. The following lists gives, for each Blue Book chapter, the availability of quarterly data.

Chapter 1 National income, product and expenditure

All tables except for series on capital consumption and aggregates such as net national product which exclude capital consumption.

Chapter 2 Industrial and sector analyses

Table 2.4 only

Chapter 3 Summary sector accounts

All tables except table 3.6 for which capital consumption is not available

Chapter 4 Personal sector and its subsectors

All tables except tables 4.4, 4.9 and 4.10

Chapter 5 Companies and financial institutions

All tables except tables 5.3, 5.6 and 5.9

Chapter 6 Public corporations

Tables 6.2, 6.3 (other than the industrial breakdown of gross domestic fixed capital formation) and 6.4

Chapter 7 Central government

Tables 7.1, 7.2 (receipts only) and 7.4

Chapter 8 Local authorities

Tables 8.1, 8.4

Chapter 9 General government

Table 9.1

Chapter 10 International transactions

All tables

Chapter 11 Sector financial accounts

All tables

Chapter 12 Balance sheets

The financial balance sheet data are available quarterly - only physical assets are not available

Chapter 13 Gross domestic fixed capital formation

All tables except table 13.8

Chapter 14 Capital consumption and stock of fixed capital
Not available

Chapter 15 Change in book value of stocks at market prices

Chapter 16 Percentage distributions and growth rates
All tables except 16.4

Chapter 17 Production, population and employment
Table 17.2

Chapter 18 Input-output balance for the United Kingdom
Not available

Balance of payments

Visible trade statistics are compiled from two separate sources. Those for trade with countries outside the EC are based on customs declarations while statistics for trade with other EC members comes from a Community-wide system (INTRASTAT) introduced at the beginning of 1993 and linked to the collection of VAT. The EC component of the figures continues to have a greater margin of error and to be subject to more revision than the non-EC component. The INTRASTAT estimates are now based on responses representing 95%, in most months, of the value of EC trade.

Figures have been revised back to the first quarter of 1993. The current account deficit was revised up by £0.4 billion in the second quarter and by £0.9 billion in 1993. The 1993 revisions were predominantly to investment income while revisions to services and transfers offset each other. The revisions to 1993 data are largely due to the inclusion of the results of annual inquiries to insurance companies and pension funds and covering direct investment by companies other than banks. The visible trade figures are the same as those published in the visible trade First Release of 8 December.

Net transactions in assets and liabilities should, with reversal of sign, equal the (unadjusted) balance on the current account. In practice, because the information comes from different sources, there is a discrepancy - the balancing item. This mismatch between identified current transactions and their (capital account) financing reflects errors and omissions which are likely, to varying degrees, to affect most entries in the accounts.

Interpretation of estimates at current market prices

GDP estimates, and those for consumers' expenditure, have been affected since the second quarter of 1989 by the abolition of domestic rates in Great Britain and the introduction of the community charge/council tax. In national accounts, domestic rates are classified as a tax on expenditure whereas the community charge/council tax is treated as a deduction from income.

Estimates of consumers' expenditure, GDP and GNP aggregate at current market prices for the second quarter of 1989 onwards are therefore lower than they would have been if the community charge had not replaced domestic rates. A fuller description of the change in the series appeared in the August 1989 issue of *Economic Trends* (No 430).

Interpretation of constant price estimates

In the interpretation of quarterly and annual national accounts estimates, special attention needs to be paid to the higher margins of error attaching to series estimated at constant prices when the rate of inflation is changing significantly. Movements in exchange rates may also affect the valuation of international transactions.

Sign conventions

The domestic sector financial accounts (Tables A19 to A24) and the equivalent balance of payments summary of transactions in UK external assets and liabilities (Table B8) have opposite sign conventions.

In the balance of payments presentation used in Section B, acquisitions of assets by UK residents are considered to be a form of expenditure and shown as negative. Increases in UK liabilities are thought of as giving rise to receipts and shown as positive. When all transactions throughout the balance of payments accounts are totalled, the result should be zero.

On the other hand, throughout the sector financial accounts of Section A, the acquisition of assets is shown as positive and the incurring of liabilities as negative. The total of such financial transactions should equal the difference between the income and expenditure items in the current and capital accounts.

When it comes to the overseas sector financial account (Table A25) the perspective is that of non-residents, not that of the UK. As a result, the financial transactions series in the overseas sector financial account have the same sign as those in the balance of payments.

In Table A18 there is a column for the overseas sector. All the figures in this column, in particular the current transactions, are shown from an overseas perspective. This means, for example, that a positive figure in the "net exports of goods and services" line indicates positive net receipts for the overseas sector, meaning that UK imports exceed UK exports.

Quarterly alignment adjustments

To improve the coherence of the quarterly accounts, some adjustments are made to quarterly estimates of both the expenditure and income analyses of GDP for 1983 onwards. These adjustments, which sum to zero across each of the years 1983 to 1993, are attributed to the stockbuilding component of GDP analysed by expenditure and to gross trading profits of companies in the income analysis, where accurate measurements are most difficult. These quarterly adjustments modify the aggregates derived from expenditure or income components so that they better reflect the quarter to quarter paths suggested by output.

The alignment adjustments included in GDP estimates in this publication are as follows:

		Alignment Adjustments		
		£ million		
		Value of physical increase in stocks and work in progress	Gross trading profits of companies

1 Estimates are given to the nearest £ million and in case of indices to one decimal place but cannot be regarded as accurate to this degree. Estimates at current market prices are affected by the abolition of domestic rates and the introduction of the community charge.

2 Equals taxes on expenditure less subsidies.

3 The factor cost estimate of GDP is obtained from the market price estimate by subtracting the factor cost adjustment.

4 Gross national product equals Gross domestic product plus Net property income from abroad.

5 Represents Taxes on expenditure less Subsidies both valued at 1990 prices.

Data in this table update those contained in CSO Blue Book table 1.1.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 These estimates are given to one decimal place but this does not imply that they can be regarded as accurate to the last digit shown.

2 "Money GDP".

3 Also known as Real national disposable income (RNDI).

4 Based on sum of expenditure components of GDP at current and constant prices.

5 Also known as the Index of total home costs.

Data in this table update those contained in CSO Blue Book table 1.1.

A2 Gross domestic product: by category of expenditure¹

£ million

Domestic expenditure on goods and services at market prices

	Consumers' expenditure ²	General government final consumption			Gross domestic fixed capital formation	Value of physical increase in stocks and work in progress ³	Exports of goods and services	Total final expenditure	less Imports of goods and services	Statistical discrepancy (expenditure)	Gross domestic product at market prices	less Taxes on expenditure	Subsidies	Gross domestic product at factor cost	
		Central government	Local authorities	Total

1 Estimates are given to the nearest £ million but cannot be regarded as accurate to this degree.

2 This series is affected by the abolition of domestic rates and the introduction of the community charge.

3 Quarterly alignment adjustment included in this series. For description of adjustment see notes.

Data in this table update those contained in CSO Blue Book tables 1.2 and 1.3.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

A2 Gross domestic product: by category of expenditure¹

continued

£ million

Domestic expenditure on goods and services at market prices															
	General government final consumption				Gross domestic fixed capital formation	Value of physical increase in stocks and work in progress ²	Total	Exports of goods and services	Total final expenditure	less Imports of goods and services	Statistical discrepancy (expenditure)	Gross domestic product at market prices	less Factor cost adjustment ³	Gross domestic product at factor cost	
	Consumers' expenditure	Central government	Local authorities	Total

1 Estimates are given to the nearest £ million but cannot be regarded as accurate to this degree.

2 Quarterly alignment adjustment included in this series. For description of adjustment see Notes.

3 Before providing for depreciation and stock appreciation.

4 Including financial institutions.

5 Figures reflect privatisations.

6 Income from rent and from self-employment, and the imputed charge for the consumption of non-trading capital.

7 The sum of the factor incomes before deducting Stock appreciation.

Data in this table update those contained in CSO Blue Book table 1.4.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

A4 Index numbers of output at constant factor cost¹

1990 = 100

	Production					Service industries						Gross domestic product at factor cost ²	Gross domestic product excl. oil and gas extraction
	Agriculture, forestry, and fishing	Mining & quarrying inc oil & gas extraction	Manufacturing (revised definition)	Electricity, gas and water supply	Total	Construction	Distribution hotels and catering; repairs	Transport storage communication	Financial and business services	Government and other services	Total

1 Estimates cannot be regarded as accurate to the last digit shown.
 2 Embraces an implicit statistical discrepancy compared with the sum of the previous columns, because GDP takes account of other information based on incomes and expenditures.

Data in this table update those contained in CSO Blue Book tables 1.6 and 2.5.
 Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 More detailed estimates of Consumers' Expenditure appear in *Consumers' Expenditure: Business Monitor MQ24* published by HMSO for the CSO. Any queries relating to this data should be directed to the Consumers Expenditure Section on 0171-270 6207.

2 This series is affected by the abolition of domestic rates and the introduction of the community charge (see notes at end of the article).

3 Including the adjustments for international travel, etc., and final expenditure by private non-profit-making bodies. Data in this table update those contained in CSO Blue Book table 4.5 and 4.6.

1 Estimates are given to the nearest £ million but cannot be regarded as accurate to this degree.

2 The industry analysis of Gross domestic fixed capital formation includes vehicles, ships and aircraft, plant and machinery as well as new buildings and works other than dwellings. It excludes fixed investment in dwellings and the transfer costs of land and existing buildings.

3 Including transfer costs of land and existing buildings.

Data in this table update those contained in CSO Blue Book tables 13.1 and 13.7.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 For years up to and including 1985, the totals differ from the sum of the components because of the method used to rebase on 1990 prices.

2 Further details are given in the *Monthly Digest of Statistics*.

3 Wholesaling and retailing estimate excludes motors trades.

4 Quarterly alignment adjustment is included in this series. For description of this adjustment, see notes.

5 Differences between totals and the sum of constituent parts of manufacturing are due to rounding.

6 Book values of stocks on left hand side, constant 1990 prices on right.

Data in this table update those contained in CSO Blue Book tables 15.2 and 15.3.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Before providing for depreciation and stock appreciation.

2 Equals total personal income before tax less payments of taxes on income, social security contributions and other current transfers.

3 Before providing for depreciation, stock appreciation and additions to tax reserves.

4 This series is affected by the abolition of domestic rates and the

introduction of the community charge (see notes at the end of the article). Council tax from April 1993.

5 Personal saving as a percentage of total personal disposable income.

6 Personal disposable income revalued by the implied consumers' expenditure deflator (1990 = 100).

Data in this table update those contained in CSO Blue Book table 4.1.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

A10 Current account of companies and financial institutions¹

£ million

	Income						Allocation of income

¹ Figures reflect privatisation of British Telecom with effect from 28 November 1984, British Gas from 3 December 1986, British Airways from 6 February 1987, Royal Ordnance from 22 April 1987, BAA from 16 July 1987, British Steel from 2 December 1988, water companies from 12 December 1989, electricity distribution companies from 11 December 1990, electricity generating companies from 12 March 1991 and Scottish electricity generating companies from 18 June 1991.

² Quarterly alignment adjustment included in this series. For description of this adjustment, see Notes.

³ Before providing for depreciation.

⁴ Dividend payments on ordinary and preference shares are net of tax; the advance corporation tax in respect of such payments is included in 'UK taxes on income'. Excludes dividends and debenture

interest paid by UK subsidiaries to their overseas parents.

⁵ Including royalties and licence fees on oil and gas production and other current transfers. Franchise payments to ITC are also included from 1993.

⁶ Mainly payments of corporation tax (including advance corporation tax), petroleum revenue tax and supplementary petroleum tax.

⁷ Before providing for depreciation, stock appreciation and additions to reserves.

Data in this table update those contained in CSO Blue Book table 5.4.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Figures reflect privatisation of British Telecom with effect from 28 November 1984, British Gas from 3 December 1986, British Airways from 6 February 1987, Royal Ordnance from 22 April 1987, BAA from 16 July 1987, British Steel from 2 December 1988, water companies from 12 December 1989, electricity distribution companies from 11 December 1990, electricity generating companies from 12 March 1991 and Scottish electricity generating companies from 18 June 1991.

2 Before providing for depreciation.

3 Quarterly alignment adjustment included in this series. For description of adjustment, see Notes.

4 Dividend payments on ordinary and preference shares are net of tax; the advance corporation tax in respect of such payments is included

in 'UK taxes on income'. Excludes dividends and debenture interest paid by UK subsidiaries to their overseas parents.

5 Including royalties and licence fees on oil and gas production and other current transfers. Franchise payments to ITC are also included from 1993.

6 The difference between all companies payments and financial companies and institutions' payments of taxes on income. The former include payments of corporation tax (including advance corporation tax), petroleum revenue tax, and supplementary petroleum tax.

7 Before providing for depreciation, stock appreciation and additions to reserves.

Data in this table update those contained in CSO Blue Book table 5.1.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Before providing for depreciation and stock appreciation.

2 This represents the contribution of financial companies and institutions to the gross domestic product. It is the difference between bank charges, commissions, etc., on the one hand and management expenses (wages and salaries and payments for current expenses) on the other.

3 Dividend payments on ordinary and preference shares are net of tax; the advance corporation tax in respect of such payments is

included in 'UK taxes on income'. Excludes dividends and debenture interest paid by UK subsidiaries to their overseas parents.

4 Before providing for depreciation, stock appreciation and additions to reserves.

Data in this table update those contained in CSO Blue Book table 5.7.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Figures reflect privatisation of British Telecom with effect from 28 November 1984, British Gas from 3 December 1986, British Airways from 6 February 1987, Royal Ordnance from 22 April 1987, BAA from 16 July 1987, British Steel from 2 December 1988, Regional Water Authorities from 12 December 1989, Girobank from 2 July 1990, electricity distribution companies in England and Wales from 11 December 1990, electricity generating companies in England and Wales from 12 March 1991 and Scottish electricity companies from 18 June 1991. The figures include National

Health Service Trusts from their establishment in April 1991.
 2 Before providing for depreciation.
 3 Including royalties and licence fees on oil and gas production.
 4 Corporation tax, petroleum revenue tax and supplementary petroleum tax.
 5 Before providing for depreciation, stock appreciation and additions to reserves.

Data in this table update those contained in GSO Blue Book table 6.2.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Tax receipts less tax credits.

2 Includes, from second quarter 1990 accruals of National Non-domestic Rates which are treated as a central government tax.

3 This series is affected from second quarter 1990 by change in the non-domestic rating system (see notes).

4 These include contributions to the Maternity Pay Fund and contributions from employees.

5 Before providing for depreciation and stock appreciation.

6 Including royalties and licence fees on oil and gas production.

7 Includes contributions received towards the UK's cost of the Gulf conflict from 1990 Q3 to 1992 Q1.

Data in this table update those contained in CSO Blue Book table 7.1

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Accruals for the quarter. From April 1990 rates relate to district councils in Northern Ireland.
 2 Replaced domestic rates in Scotland from April 1989 and in England and Wales from April 1990. Council tax from April 1993.
 3 Before providing for depreciation and stock appreciation.

Data in this table update those contained in CSO Blue Book table 8.1.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

MEMO: Residual error			2 678				

1 Unadjusted

2 Before providing for depreciation, stock appreciation & additions to tax reserves.

3 The entries in this row sum, with changed sign, to the Residual error (unadjusted) in table A17.

4 Acquisition of assets or reduction in liabilities is shown positive; sale of assets or increase in liabilities negative.

Data in this table update those contained in CSO Blue Book tables A and 11.1.

Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

¹ Estimates of imports of goods and services and taxes on expenditure (which is the main part of the adjustment to factor cost) are deducted in arriving at gross domestic product at factor cost. The effect of revisions to these estimates on the total therefore involves reversing the sign. A similar situation applies in the case of stock appreciation and the income components of gross domestic product.

A27 Gross domestic product at factor cost: individual measures

1 The Residual error is, by convention, the amount by which the expenditure-based approach to measuring GDP exceeds the income-based estimate. It is also the sum of two components: Statistical discrepancy (expenditure) with sign reversed, and the Statistical discrepancy (income) with natural sign.

2 Income data deflated by the implied GDP deflator at factor cost, based on expenditure data.

1 Unadjusted

2 Differences between totals and sums of components are due to rounding.

3 The numbers immediately after each row heading are the instrument row numbers.

4 Then National Balance Sheet is consistent with levels of identified external assets and liabilities in the Balance of Payments, apart from the treatment of special drawing rights. These are recorded as (CG) liabilities in the central government and national balance sheets in the financial accounts, but are not recorded as a UK external liability in the Balance of Payments.

Data in this table update those contained in CSO Blue Book table 12.1 Some additional quarterly data are available on the CSO's Databank. These data can also be provided on paper - for details see notes on additional data.

1 Current price value as a percentage of value at 1990 prices. Shows the price difference compared with 1990 for the current pattern of trade.

2 Shows the price difference compared with 1990 for the 1990 pattern of trade (the 1980 pattern up to 1982). Not available for services.

3 Export unit value indices as a percentage of import unit value indices. These values are shown against "exports" for convenience.

¹ This series does not have the same coverage as that shown in Table 68 in the *Departmental Report of the Chancellor of the Exchequer's Departments and Net Payments to European Community Institutions 1993-94 to 1995-96 (Cm 1918)*. The main differences are that the latter excludes the United Kingdom's contribution to the Community Budget expenditure on overseas aid (which is attributed to the aid programme) and includes the services credits shown in Table B5.

² Includes contributions towards the UK's cost of the Gulf conflict of £2m in 1990q3, £36m in 1990q4, £574m in 1991q1, £1139m in 1991q2, £279m in 1991q3 and £113m in 1991q4 and £9m in 1992q1.

B8 Summary of transactions in UK external assets and liabilities¹

£ million, not seasonally adjusted

1 UK assets: increase-/decrease+. UK liabilities: increase+/decrease-.

2 Prior to 1979 foreign currency lending abroad (other than certain export credit extended) is recorded on a net basis under liabilities. Prior to 1982 includes transactions by "other financial institutions", which are subsequently included in transactions by UK residents other than banks and general government.

3 Only partial coverage for the most recent quarter - see Table B12.

1 The figure for the most recent quarter is based on less information than earlier quarters, for which, in particular, "cross border" data of overseas banks are also available via the IMF, which are estimated for the most recent quarter.

2 Includes securities dealers' transactions with non-banks abroad from the second quarter of 1989.

3 UK assets: increase-/decrease+. UK liabilities: increase+/decrease-.
