---

## **2019 – ANNUAL OPERATIONS REPORT**

### **HAKES C&D DISPOSAL**

**4376 Manning Ridge Road  
Painted Post, New York 14870**

**Prepared for:**

**Casella Waste Management of NY, Inc.  
25 Greens Hill Lane  
Rutland, VT 05701**

**Prepared by:**

**McMahon & Mann Consulting Engineering and Geology, P.C.  
2495 Main Street  
Suite 432  
Buffalo, New York 14214**

**Permit Number: 8-4630-00010/00001-0  
Facility Number SW # 51D03**

**FEBRUARY 2020**

# ACTIVE CONSTRUCTION AND DEMOLITION (C&D) DEBRIS LANDFILL ANNUAL/QUARTERLY REPORT

**Submit the Annual Report no later than March 1, 2020**

- A. This annual report is for the year of operation from January 01, 2019 to December 31, 2019  
 B. Quarterly Report for:  Quarter 1  Quarter 2  Quarter 3  Quarter 4

## SECTION 1 – FACILITY INFORMATION

FACILITY INFORMATION			
<b>FACILITY NAME:</b> Hakes C&D Landfill			
<b>FACILITY LOCATION ADDRESS:</b> 4376 Manning Ridge Road	<b>FACILITY CITY:</b> Painted Post	<b>STATE:</b> NY	<b>ZIP CODE:</b> 14870
<b>FACILITY TOWN:</b> Campbell	<b>FACILITY COUNTY:</b> Steuben	<b>FACILITY PHONE NUMBER:</b> 607-937-6044	
<b>FACILITY NYS PLANNING UNIT:</b> (A list of NYS Planning Units can be found at the end of this report). Steuben County			<b>NYSDEC REGION #:</b> 8
<b>360 PERMIT #:</b> 8-4630-00010/00001-0	<b>DATE ISSUED:</b> Nov. 11, 2013	<b>DATE EXPIRES:</b> Nov. 10, 2023	<b>NYS DEC ACTIVITY CODE OR REGISTRATION NUMBER:</b> 51D03
<b>FACILITY CONTACT:</b> Larry Shilling	<input type="checkbox"/> public <input checked="" type="checkbox"/> private	<b>CONTACT PHONE NUMBER:</b> 585-466-7271	<b>CONTACT FAX NUMBER:</b> 585-466-3206
<b>CONTACT EMAIL ADDRESS:</b> Larry.Shilling@casella.com			
OWNER INFORMATION			
<b>OWNER NAME:</b> Hakes C&D Disposal, Inc.	<b>OWNER PHONE NUMBER:</b> 607-937-6044	<b>OWNER FAX NUMBER:</b> 607-937-6089	
<b>OWNER ADDRESS:</b> 4376 Manning Ridge Road	<b>OWNER CITY:</b> Painted Post	<b>STATE:</b> NY	<b>ZIP CODE:</b> 14870
<b>OWNER CONTACT:</b> Larry Shilling	<b>OWNER CONTACT EMAIL ADDRESS:</b> Larry.Shilling@casella.com

**Did you operate in 2019?**  Yes; Complete this form.  
 No; Complete and submit Sections 1 and 18. If you no longer plan to operate and wish to relinquish your permit/registration associated with this solid waste management activity, also complete the "Inactive Solid Waste Management Facility or Activity Notification Form" located at:  
<http://www.dec.ny.gov/chemical/52706.html> .

## SECTION 2 - SITE LIFE

1. Landfill Capacity Utilized Last Year (reporting year).

- a. What is the estimated landfill capacity that was utilized during the reporting year?

544,038

Cubic Yards of Airspace

- b. What is the estimated in-situ waste density for the reporting year?

0.71

Tons/Cubic Yard

Please do not report units as pounds per cubic yard.

2. Remaining Constructed Capacity

- a. What is the remaining capacity of the landfill that is already constructed?

292,804

Cubic Yards of Airspace

- b. What is the estimated remaining life of the constructed capacity?

0 Years 5 Months

at 466,000 Tons/Year.\*

\* Please note that this tonnage rate must include all materials placed in the landfill, i.e., waste, soil, cover, alternative daily covers, etc.

- c. The tonnage rate reported under 2.b. is based on (select one):

The amount of materials placed in the landfill in the reporting year

Estimated future disposal

Permit limit

Other (explain): \_\_\_\_\_

3. Permitted Capacity Still to be Constructed

- a. What is the remaining but not yet constructed landfill capacity that is authorized by a Part 360 permit?

2,688,000

Cubic Yards of Airspace

- b. What is the projected life of capacity reported in 3a.?

4 Years 1 Months

at 466,000 Tons/Year.\*

\* Please note that this tonnage rate must include all materials disposed in the landfill, i.e., waste, and soil and alternative daily covers.

- c. The tonnage rate reported under 3.b. is based on (select one):

The amount of materials placed in the landfill in the reporting year

Estimated future disposal

Permit limit

Other (explain): \_\_\_\_\_

4. Capacity Proposed in a Part 360 Permit Application

What is the capacity of any expansion proposed in a Part 360 permit application that has been submitted to the Department but not authorized by a permit as of the end of the reporting period?

0

Cubic Yards of Airspace

5. Estimated Potential Future Capacity Not Permitted or in an Application (optional)

What is the estimated capacity of any potential future expansion at the facility that is not yet authorized by a permit or proposed in a Part 360 permit application that has been submitted to the Department?

Cubic Yards of Airspace

### SECTION 3 - PRIMARY LEACHATE

Name of off-site leachate treatment facility(s) utilized: Steuben County WWTP

Does the landfill have a constructed liner and a leachate collection system?  Yes  No

Enter the quantity of primary leachate that was collected, removed for on-site and off-site treatment, and recirculated each month, and the corresponding **Acreage, by Cell**:  
(Note: For double-lined landfills this should not include the volume of leachate collected from secondary leachate collection and removal systems.)

For **each cell**, please report the **acreage** and the **primary leachate** amount.

	PRIMARY LEACHATE COLLECTED (GALLONS)						PRIMARY LEACHATE TREATED OFF SITE (GALLONS)					
	Cells 1 through 8						Cells 1 through 8					
January	208,592.74						159,273.38					
February	202,894.95						247,925.67					
March	191,104.86						129,455.66					
April	236,402.67						237,474.83					
May	214,371.48						268,515.56					
June	170,625.06						192,604.34					
July	169,139.51						131,613.91					
August	131,594.97						183,594.73					
September	146,846.76						133,980.84					
October	154,060.40						140,122.32					
November	164,187.27						139,527.59					
December	226,662.15						260,971.27					
<b>ANNUAL</b>	2,216,482.82						2,225,060.10					

	PRIMARY LEACHATE RECIRCULATED (GALLONS)						PRIMARY LEACHATE TREATED ON SITE (GALLONS)					
	Cells 1 through 8						Cells 1 through 8					
January	0						0					
February	0						0					
March	0						0					
April	0						0					
May	0						0					
June	0						0					
July	0						0					
August	0						0					
September	0						0					
October	0						0					
November	0						0					
December	0						0					
<b>ANNUAL</b>	0						0					

Submit (attached to this form) a copy of the maintenance logs which document compliance with the Operation and Maintenance Manual's schedule for the routine annual flushing and inspection of the primary leachate collection and removal system. List required submissions that have been attached to this form or the reason for not attaching a required piece of information:

Jamko Technical Solutions, Inc. cleaned the leachate lines, tanks, manholes, sumps, and load out pads in September and October 2019. This information is included in Attachment 1.

Submit (attached to this form) a tabulated compilation of the semi-annual primary leachate quality data collected throughout the year including a summary comparing this year's data with the previous year's data and a summary discussion of results. This list should identify sample location(s) and method of analysis. List required submissions that have been attached to this form or the reason for not attaching a required piece of information:

On-Site Geological Services, D.P.C. (On-Site) provided a tabulated compilation of the semi-annual primary leachate quality data and the other monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

Please report total cost for the year, not cost/gal.

Leachate Cost: (including transportation if appropriate) during the calendar year for leachate treatment: \$ 181,812.40

Total quantity treated: 2,225,060.10 gal

## SECTION 4 – BENEFICIAL USE DETERMINATION MATERIALS AND ALTERNATIVE OPERATING COVER MATERIALS

For each type of waste material that the Department has approved for use as alternative operating cover (AOC), intermediate cover, or other landfill material, provide the annual weight in tons, use (i.e., operating cover, intermediate cover, etc.), and source of material. (If material is from a solid waste facility also provide facility name, address, NYS Planning Unit, County/ Province, and State/Country.) Refer to the list of NYS Planning Units that can be found at the end of this report.

Type of Solid Waste	Weight (tons/year)	Use	NYS Planning Unit (See Attached List of NYS Planning Units)	County or Province	State or Country	Source (Facility and Address)
Aggregate/Concrete	0					
Processed C&D	0					
Contaminated Soil	0					
Other (specify)						
<b>Total AOC</b>	<b>0</b>					
<b>Total Beneficial Use Determination Materials</b>	<b>0</b>					

### Percent Alternative Operating Cover (AOC) Calculation

AOC Calculations: Total Tons AOC/Total Tons Waste Disposed x 100 = \_\_\_\_\_

Please note the calculation **is**: Tons AOC (from table above)/Tons Solid Waste (from table in Section 6) x 100 and **Not**: Tons AOC / (Tons Solid Waste + AOC) x 100

## SECTION 6 – SERVICE AREA OF C&D DEBRIS RECEIVED

**Please identify where the waste is coming from.** The total tons received reported below should equal the total tons received in Section 5 (Construction & Demolition (CD) Debris Disposed). **DO NOT REPORT IN CUBIC YARDS!**

- If the waste **WAS** received from another solid waste management facility, please write in the name *and address* of the facility along with the appropriate state, county and planning unit/municipality.
- If the waste **WAS NOT** received from another solid waste management facility, please write in “**Direct Haul**” along with the appropriate state, county and planning unit/municipality where the waste was generated.

Specify transport method and percentages of total waste transported by each:

100 % Road                      \_\_\_\_\_ % Rail  
 \_\_\_\_\_ % Water                      \_\_\_\_\_ % Other (specify: \_\_\_\_\_)

Explain which waste types and service areas below are included in these transport methods \_\_\_\_\_

SERVICE AREA OF SOLID WASTE RECEIVED					
TYPE OF SOLID WASTE	SOLID WASTE MANAGEMENT FACILITY FROM WHICH IT WAS RECEIVED (Name & Address) OR “Direct Haul”	SERVICE AREA STATE OR COUNTRY	SERVICE AREA COUNTY OR PROVINCE	SERVICE AREA NYS PLANNING UNIT (See Attached List of NYS Planning Units)	TONS RECEIVED
<b>Construction and Demolition Debris (mixed)</b>	See Attachment 3 - Waste Origin				
<b>Other (specify)</b>					
<b>TOTAL RECEIVED (tons):</b> _____					

## SECTION 7 – UNAUTHORIZED SOLID WASTE

Has unauthorized solid waste been received at the facility during the reporting period?

Yes  No If yes, give information below for each incident (attach additional sheets if necessary):

Date Received	Type Received	Date Disposed	Disposal Method & Location
March 11, 2019	Bags and Carpet	This material was rejected from disposal when observed at the scale house.	
July 8, 2019	Bags	This material was rejected from disposal when observed at the working face.	
Between 1/1/19 and 12/31/19	Tires	Tires were removed and placed in a dumpster and disposed of off-site.	

### SECTION 8 - COST ESTIMATES AND FINANCIAL ASSURANCE DOCUMENTS

Are there required cost estimates and financial assurance documents for closure and post-closure care?

Yes  No If yes, attach additional sheets reflecting annual adjustments for inflation and any changes to the Closure Plan? Previously submitted to NYSDEC Region 8 and no changes are required.

### SECTION 9 – PROBLEMS

Were any problems encountered during the reporting period (e.g., specific occurrences which have led to changes in facility procedures)?

Yes  No If yes, attach additional sheets identifying each problem and the methods for resolution of the problem.

### SECTION 10 – CHANGES

Were there any changes from approved reports, plans, specifications, and permit conditions?

Yes  No If yes, attach additional sheets identifying changes with a justification for each change.

### SECTION 11 – LANDFILL OPERATOR TRAINING

Name of trained landfill operator: Charles Plank

Name and location of training course: Landfill Operator Certification at Sheraton in Niagara Falls, NY

Date completed: 3/18/18

## **SECTION 12 - ANALYTICAL RESULTS**

Submit (attached to this form) tables showing the sample collection date, the analytical results [including all peaks even if below the Method Detection Limits (MDL)], designation of upgradient wells and location number for each environmental monitoring point sampled, applicable water quality standards, and groundwater protection standards if established, MDL's, and Chemical Abstracts Service (CAS) numbers on all parameters. List submissions (required by this section) that have been attached to this form or the reasons for not attaching a required piece of information:

On-Site provided a tabulated compilation of the monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

## **SECTION 13 - COMPARING DATA**

Submit (attached to this form) tables or graphical representations comparing current water quality with existing water quality and with upgradient water quality. These comparisons may include Piper diagrams, Stiff diagrams, tables, or other analyses. List submissions (required by this section) that have been attached to this form or the reasons for not attaching a required piece of information:

On-Site provided a tabulated compilation of the monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

## **SECTION 14 - DISCUSSION OF RESULTS**

Submit (attached to this form) a summary of any contraventions of State water quality standards, significant increases in concentrations above existing water quality, any exceedances of groundwater protection standards, and discussion of results, and any proposed modifications to the sampling and analysis schedule necessary to meet the Existing, Operational and Contingency water quality monitoring requirements. List submissions (required by this section) that have been attached to this form or the reasons for not attaching a required piece of information:

On-Site provided a tabulated compilation of the monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

## **SECTION 15 - DATA QUALITY ASSESSMENT**

Submit (attached to this form) any required data quality assessment reports. List submissions (required by this section) that have been attached to this form or the reasons for not attaching a required piece of information:

On-Site provided a tabulated compilation of the monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

## **SECTION 16 - SUMMARIES OF MONITORING DATA**

Submit (attached to this form) a summary of the water quality information presented in Sections 13 and 14 for the year of operation for which the Annual Report is made, noting any changes in water quality which have occurred throughout the year. List submissions (required by this section) that have been attached to this form or the reasons for not attaching a required piece of information:

On-Site provided a tabulated compilation of the monitoring data required in Sections 12 through 16. This information is included in Attachment 2.

## SECTION 17 - SURFACE IMPOUNDMENTS

Does this landfill have a surface impoundment?

Yes  No If yes, repeat Sections 12 through 15 above for Quarterly Reports and Section 16 above for Annual report. Attach additional submissions required by this section.

## SECTION 18 - PERMIT/CONSENT ORDER REPORTING REQUIREMENTS

Are there any additional permit/consent order reporting requirements not covered by the previous sections of this form?

Yes  No If yes, attach additional sheets identifying the reporting requirements with their respective responses.

See Attachment 5

## SECTION 19 - SIGNATURE AND DATE BY OWNER OR OPERATOR

Owner or Operator must sign, date and submit one completed form to the appropriate Regional Office (See attachment for Regional Office addresses, email addresses and Materials Management Contacts).

The Owner or Operator must also submit one copy by email, fax or mail to:

**New York State Department of Environmental Conservation  
Division of Materials Management  
Bureau of Solid Waste Management  
625 Broadway  
Albany, New York 12233-7260  
Fax 518-402-9041  
Email address: SWMFannualreport@dec.ny.gov**

I certify, under penalty of law, that the data and other information identified in this report have been prepared under my direction and supervision in compliance with a system designed to ensure that qualified personnel properly and accurately gather and evaluate this information. I am aware that any false statement I make in such report is punishable pursuant to section 71-2703(2) of the Environmental Conservation Law and section 210.45 of the Penal Law.

**Appendix A** – Field Sampling Forms

**Appendix B** – Laboratory Analytical Reports

## **Overview**

This report summarizes calendar year 2019 and details the fourth quarter 2019 operational water quality monitoring activities completed at the Hakes C & D Landfill, located in the town of Campbell, New York. Sampling and reporting activities were performed by On-Site Geological Services, D.P.C. (On-Site) of Wellsville, New York. Sample analysis was performed by ALS Environmental (ALS), located in Rochester, New York. 2019 quarterly monitoring was conducted as required in accordance with the *Hakes Construction and Demolition Debris Landfill Environmental Monitoring Plan*, dated April 2015.

On December 19, 2019, an updated solid waste management permit was issued for the Hakes facility. Therefore starting first quarter 2020, as required by the new permit, environmental monitoring will transition to 6 NYCRR Part 363 regulations as detailed in *Hakes Construction and Demolition Debris Landfill Expansion Project 6 NYCRR Part 360 Permit Modification Application Appendix C – Environmental Monitoring Plan*, dated September 2019.

This report addresses Sections 1, 3, and 11 through 18 of the New York State Department of Environmental Conservation (NYSDEC) annual report form and includes the following.

- Tables
- Figures
- Appendix A – Field Sampling Forms
- Appendix B – Laboratory Analytical Reports

## **Section 1 – Owner/Facility Information**

Facility Name: Hakes C&D Landfill Town: Campbell County: Steuben NYSDEC Region #: 8

Facility Location: 4376 Manning Ridge Road, Campbell State: NY Zip: 14870

Facility Contact: Chuck Plank Phone #: (607) 937-6044 Fax #: (607) 937-6089

360 Permit #: 8-4630-00010/00001-0 Issued: 11/11/2013 Expires: 11/10/2023

Owner Name: Hakes C&D, Inc. Phone #: (607) 937-6044

Mailing Address: Same as above

## **Section 3 – Primary Leachate (Analytical Results Only)**

2019 primary leachate sampling was conducted during the second and fourth quarterly monitoring events. A second quarter leachate sample was collected and analyzed for parameters included in 6 NYCRR Part 360 Expanded Parameter List (expanded parameters). A fourth quarter leachate sample was collected and analyzed for parameters included in 6 NYCRR Part 363 Expanded Parameter List (363 expanded parameters). The samples were collected directly from a leachate tank with analytical results typical of historic Site leachate samples. Site leachate generally exhibits significantly lower contaminate concentrations than observed at typical

municipal solid waste landfills. Analytical results for the last five leachate samples are presented in Table 1. Primary leachate organic detections for 2019 are shown in the table below.

<b>Date Sampled</b>	<b>Parameter</b>	<b>Result mg/L</b>
01-May-19	2,4-Dimethylphenol	0.015
01-May-19	Dibenzofuran	0.0021 J
01-May-19	Acetophenone	0.0097
01-May-19	Acenaphthene	0.0051 J
01-May-19	3/4-Methylphenol	0.082
01-May-19	2-Methylphenol	0.0097
01-May-19	2-Methylnaphthalene	0.0047 J
01-May-19	1,2-Dichloroethane	0.0021 J
01-May-19	Phenol	0.041
01-May-19	m&p-Xylene	0.0041 J
01-May-19	Toluene	0.0031 J
01-May-19	Ethyl benzene	0.0026 J
01-May-19	Carbon disulfide	0.0026 J
01-May-19	Benzene	0.0037 J
01-May-19	Acetone	1.2
01-May-19	4-Methyl-2-pentanone	0.06 J
01-May-19	2-Hexanone	0.013 J
01-May-19	2-Butanone (MEK)	0.55
01-May-19	o-Xylene	0.0023 J
20-Nov-19	2-Methylnaphthalene	0.009 J
20-Nov-19	2-Chloronaphthalene	0.0013 J
20-Nov-19	1,4-Dioxane	0.12 *
20-Nov-19	2-Methylphenol	0.0079 J
20-Nov-19	3/4-Methylphenol	0.096 D
20-Nov-19	Acenaphthene	0.0089 J
20-Nov-19	Acetophenone	0.012
20-Nov-19	bis(2-Chloroethyl) ether	0.0052 J
20-Nov-19	Dibenzofuran	0.0037 J
20-Nov-19	Diethylphthalate	0.0013 J
20-Nov-19	Fluorene	0.0023 J
20-Nov-19	2,4-Dimethylphenol	0.015
20-Nov-19	m&p-Xylene	0.0074 J
20-Nov-19	Toluene	0.008 J
20-Nov-19	Ethyl benzene	0.0037 J
20-Nov-19	Carbon disulfide	0.0027 J
20-Nov-19	Benzene	0.0069 J
20-Nov-19	Acetone	3 D
20-Nov-19	4-Methyl-2-pentanone	0.12

Date Sampled	Parameter	Result mg/L
20-Nov-19	2-Hexanone	0.019 J
20-Nov-19	Phenol	0.072
20-Nov-19	o-Xylene	0.0043 J
20-Nov-19	2-Butanone (MEK)	1.3

### Section 11 – Analytical Results

The fourth quarter 2019 quarterly sampling event was conducted between November 18 and 20, 2019. Landfill gas monitoring was conducted on December 13, 2019. Laboratory analysis was performed by ALS. Tables presenting the fourth quarter 2019 field parameters and analytical results are included with the appropriate NYSDEC water quality standards as follows:

- Table 2 – Fourth Quarter 2019 Groundwater Analytical Results;
- Table 3 – Fourth Quarter 2019 Surface Water Analytical Results; and
- Table 4 – Fourth Quarter 2019 Groundwater Suppression Systems Analytical Results.

A narrative of comparing data to standards is provided in Section 12 and a discussion of results is presented in Section 13. A data quality assessment is provided in Section 14 and a summary of data is referenced in Section 15.

### Section 12 – Comparing Data

Site specific Existing Water Quality Values (EWQVs) have been established for the facility since 2000 with periodic revisions associated with landfill expansions. The current EWQVs were submitted to the NYSDEC on May 28, 2008. These most recent EWQVs incorporate previous pre-operational data with the addition of pre-operational data from Cells 5 and 6 wells MW-L, MW-M and MW-N. The table below presents a summary of the pre-operational data collection associated with the current EWQVs. The current EWQVs are utilized for data comparison beginning in the second quarter 2008.

Wells	Parameter Group	Number of Samples	Date Range
MW-1, MW-2, MW-3D, MW-6 <sup>1</sup>	Wet Chemistry	83	3/94-6/99
MW-A, MW-B, MW-C, MW-D <sup>1</sup>	Field Parameters	8	12/99-3/00
	Inorganic Compounds		
	Wet Chemistry		
MW-E <sup>1</sup>	Field Parameters	3	2/02-8/02
	Inorganic Compounds		
	Wet Chemistry		
MW-F, MW-G <sup>1</sup>	Field Parameters	6	8/03-5/04
	Inorganic Compounds		
	Wet Chemistry		
Wells	Parameter Group	Number of Samples	Date Range
MW-L, MW-M, MW-N <sup>2, 3</sup>	Field Parameters	19	5/07-2/08
	Inorganic Compounds		
	Wet Chemistry		

Notes:

<sup>1</sup> – Pre-operational groundwater data from monitoring wells associated with Cells 1 through 4.

<sup>2</sup> – Pre-operational groundwater data from monitoring wells associated with Cell 5.

<sup>3</sup> – Due to insufficient water recovery, not all samples were tested for metals and wet chemistry.

According to 6 NYCRR Part 360-2.11 (c) (5) (ii) (d) (2) a significant increase has occurred if the current water quality for a parameter at a monitoring well exceeds the EWQV of that parameter by three standard deviations or the test result for a parameter at a monitoring well exceeds the water quality standard for that parameter. It is noted that there are instances where parameters exceed the 6 NYCRR Part 360 criteria due to natural conditions.

A comparison of groundwater analytical results to EWQVs and Class GA Standards is provided in Table 5. Parameters that may indicate a significant increase are shaded in color in Table 5. If the value exceeded both the EWQV (mean) and the Class GA Standard, then the value is shaded in yellow. Test results were also compared to the mean plus three standard deviations. If an analytical result exceeds these criteria, then it is shaded in green. If the test result exceeded both of criteria mentioned above, the value is shaded in blue. Additionally, results in bold but not color shaded exceed Class GA Standards but are below EWQVs. A discussion of results is provided in Section 13.

### **Section 13 – Discussion of Results**

This section includes a narrative pertaining to results greater than EWQVs and/or Class GA Standards, significant changes in water quality and a general discussion of results.

Operational water quality monitoring has been ongoing at the Site since December 1999. The fourth quarter 2019 quarterly operational water quality event is a NYSDEC 6 NYCRR Part 360 Routine Parameter List (routine parameters) event. Representatives of On-Site conducted this monitoring event with scheduled sampling of groundwater, surface water and groundwater suppression systems. Please see Figure 1 for sampling locations. Non-dedicated bladder pumps were utilized following low-flow purging techniques for monitoring well purging and sampling with the following exceptions. Low yielding monitoring wells MW-D, MW-GR and MW-N were each purged to the bottom with a dedicated bailer and allowed time to recover prior to sampling with a dedicated bailer. Field sampling forms are included in Appendix A. The table below provides the locations and dates sampled for the fourth quarter 2019 sampling event.

<b>Hakes C&amp;D Landfill Fourth Quarter 2019 Sample Summary</b>		
<b>Location</b>	<b>Description</b>	<b>Sample Date</b>
<b>Upgradient Monitoring Wells</b>		
MW-L	Upgradient well	11/18/2019
MW-H	Upgradient well	11/18/2019
MW-Q	Upgradient well	11/20/2019
<b>Downgradient Monitoring Wells</b>		
MW-CR	Downgradient well	11/18/2019
MW-D	Downgradient well	11/18 & 11/19/2019
MW-E	Downgradient well	11/19/2019
MW-F	Downgradient well	11/19/2019
MW-GR	Downgradient well	11/18 & 11/19/2019
MW-J	Downgradient well	11/19/2019
MW-N	Downgradient well	11/18 & 11/19/2019
MW-O	Downgradient well	11/18/2019
MW-P	Downgradient well	11/19/2019
<b>Surface Water</b>		
SW-1	Tributary 4 Upstream of landfill	11/18/2019
SW-1A	Tributary 4 upstream of landfill at property line	11/18/2019
SW-2	Tributary 4 downgradient	11/18/2019
SW-2A	Erwin Hollow Creek down-stream Tributary 4 convergence	11/18/2019
SW-3A	Pond 5 discharge	11/18/2019
SW-4 <sup>2</sup>	Pond 1 discharge	11/18/2019
SW-4A <sup>2</sup>	Pond 1 discharge to sand filter	11/18/2019
SW-5A <sup>2</sup>	Pond 3 discharge	11/18/2019
SW-6 <sup>2</sup>	Pond 4 discharge	11/18/2019
SW-7	Erwin Hollow Creek Tributary 4upstream Convergence	11/18/2019
SW-8 <sup>1</sup>	Tributary 4 Ditch convergence	11/18/2019
SW-9 <sup>1</sup>	East pond discharge	11/18/2019
<b>Groundwater Suppression System</b>		
GSS-1 <sup>1</sup>	Gravity pipe to Pond 1	11/18/2019
GSS-1A	Hose in riser pipe	11/18/2019
GSS-2 <sup>1</sup>	Gravity pipe to creek	11/18/2019
GSS-3	Gravity pipe to creek	11/18/2019
GSS-4	Gravity pipe to creek	11/18/2019
GSS-5	Gravity pipe to creek	11/18/2019
GSS-6	Discharge pipe while pumping	11/18/2019
GSS-8	Discharge pipe while pumping	11/18/2019

<sup>1</sup> Dry or insufficient water volume. No sample collected.

<sup>2</sup> No flow at pond discharge location as flow is diverted to next pond. No sample collected.

Tables 2, 3 and 4 provide analytical results for the fourth quarter 2019 sampling event. Analytical results for the last five quarters are presented in Tables 5 through 7. Analytical results from the fourth quarter 2019 sampling event appear generally consistent with historic results. Some sampling locations, including upgradient monitoring wells, continue to exhibit concentrations above EWQVs and/or NYSDEC Standards. These exceedances do not appear to be a result of site operations but rather a factor of ambient water quality.

The fourth quarter 2019 landfill gas monitoring was conducted on December 13, 2019 in general accordance with *Hakes C&D Landfill, Landfill Gas Monitoring Plan* dated April 2010. Locations monitored include: 1) gas wells GW-1 through GW-19; 2) gas vents GV-1 through GV-11; 3) horizontal gas wells GH-1 through GH-5; 4) one upwind and three downwind landfill perimeter locations; and 5) one location at cell 6 west side. Monitoring was conducted using a GEM 5000 landfill gas meter to measure Oxygen, Methane, Carbon Dioxide, Balance gas, gas temperature, barometric pressure, relative pressure, Hydrogen Sulfide (H<sub>2</sub>S) and Carbon Monoxide (CO). Hydrogen Sulfide RAE detector tubes with a range of 0.1-2% were used at locations where the GEM 5000 indicated Hydrogen Sulfide over instrument limit.

Please see Table 10 for fourth quarter 2019 landfill gas monitoring results and Figure 2 for gas monitoring locations.

#### ***Discussion of Fourth Quarter Groundwater Monitoring Results***

Groundwater samples were scheduled to be collected and analyzed for routine parameters at 12 operational wells during the fourth quarter 2019. These samples were collected between November 18 and 19, 2019. With the exception of low-yielding wells MW-D, MW-GR and MW-N, groundwater sampling was conducted following low-flow sampling procedures utilizing non-dedicated bladder pumps. The low-yielding wells were purged dry with dedicated bailers and allowed time to recover prior to bailing samples. Fourth quarter monitoring results are consistent with historic data. A discussion of results is provided below.

#### ***Upgradient Monitoring Wells***

Upgradient monitoring well MW-H fourth quarter 2019 results are consistent with previous analytical results. MW-H fourth quarter results show Sodium at 32.5 mg/L exceeding Class GA Standards and EWQVs. The remaining results are within EWQVs and Class GA Standards.

Fourth quarter 2019 upgradient monitoring well MW-L analytical results are generally consistent with previous samplings. MW-L analytical results show Turbidity at 11.6 NTU and Iron at 0.77 mg/L exceeding the Class GA Standards. Sodium at 29.8 mg/L, exceeds Class GA Standard and EWQV. Remaining MW-L results are below Class GA Standards and EWQVs.

Upgradient monitoring well MW-Q shows fourth quarter 2019 results comparable to previous samplings. Fourth quarter results exhibit Sodium at 57.6 mg/L and Chloride at 112 mg/L, which are above the EWQVs and the Class GA Standards. Field pH at 5.37 S.U. is not within Class GA Standard and EWQV plus three standard deviations. Remaining results at MW-Q are within Class GA Standards and EWQVs.

### Downgradient Monitoring Wells

Downgradient monitoring well MW-CR fourth quarter 2019 results are consistent with previous analytical results and with the exception of Turbidity are within EWQVs and Class GA Standards. Turbidity at 5.52 NTU exceeds Class GA Standard.

Monitoring well MW-D is low-yielding and is sampled with a dedicated bailer. Fourth quarter 2019 downgradient well MW-D results are consistent with previous data and show Iron at 0.38 mg/L, exceeding Class GA Standard while remaining below EWQV. The remaining results are below EWQVs and Class GA Standards.

Fourth quarter 2019 analytical results from downgradient well MW-E are comparable to previous samplings. Sodium at 22.2 exceeds the Class GA Standard but remains below the EWQV. The remaining results are below EWQVs and Class GA Standards.

Fourth quarter 2019 analytical results from downgradient well MW-F are generally consistent with historic results. Turbidity at 11 NTU and Iron at 0.43 mg/L, both exceeded Class GA Standards but remain below EWQVs. Field pH at 6.34 S.U. is not within Class GA Standard and EWQV. The remaining results are within EWQVs and Class GA Standards.

During the fourth quarter 2019, downgradient well MW-GR was sampled using a dedicated bailer. MW-GR fourth quarter results are within EWQVs and Class GA Standards.

Fourth quarter 2019 downgradient well MW-J results are consistent with historic data and show Turbidity, Iron and Manganese exceeding Class GA Standards at 7.62 NTU, 0.81 mg/L and 0.316 mg/L, respectively. Total Dissolved Solids at 662 mg/L exceeds EWQV and Class GA Standard. Chloride exceeds the EWQV plus three standard deviations at a concentration of 166 mg/L. Sodium at 114 mg/L exceeds the Class GA Standard and EWQV plus three standard deviations. The remaining results are within EWQVs and Class GA Standards.

Downgradient monitoring well MW-N was sampled during the fourth quarter 2019 using a dedicated bailer. Results are consistent with previous samplings. Field pH and Turbidity both exceed Class GA Standards at concentrations of 6.37 S.U. and 19.7 NTU, respectively. Iron at 2.4 mg/L and Total Dissolved Solids at 579 mg/L exceed both the EWQVs and Class GA Standards. Alkalinity exceeds EWQV plus three standard deviations at a concentration of 492 mg/L. Manganese at 4.35 mg/L exceeds the Class GA Standard and EWQV plus three standard deviations. The remaining results are within EWQVs and Class GA Standards.

Downgradient well MW-O fourth quarter 2019 results are below EWQVs and Class GA Standards, and are consistent with past samplings.

Fourth quarter 2019 analytical results from downgradient well MW-P show Manganese at 0.98 mg/L and Sodium at 23.2 mg/L, both exceeding Class GA Standards. The remaining results are within EWQVs and Class GA Standards.

#### ***Discussion of Fourth Quarter Surface Water Monitoring Results***

In November 2019, surface water locations were tested and analyzed for field parameters, air temperature, routine parameters and Total Suspended Solids (TSS) from two location (SW-1A, SW-2); three locations (SW-1, SW-2A, SW-7) for field parameters, air temperature and TSS; and one location (SW-3A) for field parameters, air temperature, routine parameters, oil and grease, Total Nitrogen and TSS. No flow conditions were observed at two surface water sampling locations (SW-8, SW-9) and therefore not sampled. Four locations (SW-4, SW-4A, SW-5A and SW-6) were not sampled due to no flow conditions attributed to the pond discharge being diverted to the inlet of the next pond. Locations SW-1, SW-1A, SW-2, SW-2A, SW-7 and SW-8 are stream sampling locations, while SW-3A, SW-4, SW-4A, SW-5A, SW-6 and SW-9 are pond discharge locations (please see Figure 1).

Surface water discharge locations were monitored for visual contrast between the discharge water and water in the stream. There was no evidence of visual contrast between the discharge water and the stream. With the exception of site upstream location SW-1A Field pH at 8.62 S.U., fourth quarter 2019 surface water results are within Class C Surface Water Standards. Fourth quarter 2019 surface water analytical results are presented in Table 3; while current plus historic results are shown in Table 6.

#### ***Discussion of Fourth Quarter Groundwater Suppression System Monitoring Results***

As part of the fourth quarter 2019 sampling event, water samples were scheduled to be collected from groundwater suppression systems GSS-1, GSS-1A, GSS-2, GSS-3, GSS-4, GSS-5, GSS-6 and GSS-8 for routine parameters. The gravity drain pipes from GSS-1 and GSS-2 were dry as typical and therefore not sampled. The remainders of the groundwater suppression system samples were collected as scheduled. Fourth quarter 2019 groundwater suppression system analytical results are consistent with historic results and show exceedances of Class GA Standards as follows.

- GSS-1A showed Turbidity at 21.9 NTU and Iron at 0.99 mg/L.
- GSS-3 results remain below Class GA Standards.
- GSS-4 displayed Sodium at 36.3 mg/L.
- GSS-5 results remain below Class GA Standards.
- GSS-6 Turbidity and Iron both exceed Class GA Standards at concentrations of 6.54 NTU and 1.13 mg/L, respectively.
- GSS-8 results show Sodium at 48.8 mg/L exceeding the Class GA Standard.

#### **Section 14 – Data Quality Assessment**

The fourth quarter 2019 sampling event is a routine parameter list event; therefore third party data validation is not required. The laboratory performed internal validation in accordance with NELAC Standards. Laboratory quality control standards were met no significant analyses anomalies were reported. Please see Appendix B for additional details.

The laboratory results were reviewed for compliance with the sampling program including laboratory sample receipt, holding times, matrix spike results and duplicate sample results. Data presented in this report should be considered technically correct and usable.

A discussion of field duplicate and field equipment blank sampling is provided below.

##### Field Duplicate Sample

A field duplicate sample was collected from groundwater well sample location MW-CR, labeled DUP1-1119, and analyzed by the laboratory for routine parameters. Results from MW-CR and the associated duplicate sample compare favorably indicating good sampling and analysis precision. Results are presented in Table 8.

##### Field Equipment Blank Sample

One equipment blank sample was collected to confirm proper cleaning of the bladder pump and tubing used to purge and sample monitoring wells MW-CR, MW-H, MW-L, MW-O, and MW-Q. The equipment blank sample was collected by pumping laboratory provided deionized water through the pump and tubing into laboratory provided sample containers. With the exception of estimated low-level detections of Sodium and Chemical Oxygen Demand, equipment blank results are non-detect. Results are presented in Table 9.

#### **Section 15 – Summaries of Monitoring Data**

Quarterly monitoring was conducted as required in 2019 in accordance with the April 2015 EMP. First, second and fourth quarter 2019 sampling events were conducted for routine parameter analysis, while the third quarter 2019 event was a baseline parameter monitoring event. Please refer to Tables 5 through 7 for water quality results from the last five monitoring events. Each quarterly monitoring event is summarized separately below.

##### *First Quarter 2019*

First quarter 2019 routine sampling of groundwater, groundwater suppression system and surface water sampling was completed as required. Surface water locations SW-4, SW-4A, SW-5A, SW-6, and SW-8 were not sampled either due to dry conditions or water being diverted to a

downstream retention pond. Groundwater suppression system sampling locations GSS-1 and GSS-2 were not sampled due to insufficient water. First quarter results for locations sampled are consistent with historic results.

#### *Second Quarter 2019*

Second quarter 2019 routine sampling of groundwater, groundwater suppression system and surface water was completed as required. Additionally, sampling and analysis of leachate for expanded parameters was completed. Surface water sampling locations SW-4, SW-4A, SW-5A, SW-6 and SW-8 were not sampled in April 2019 due to dry conditions or water being diverted to a downstream retention pond. A sample was not collected from GSS-1 and GSS-2 due to insufficient water. Second quarter 2019 monitoring results are consistent with historic data.

#### *Third Quarter 2019*

Third quarter 2019 baseline monitoring was completed as required. Surface water sampling locations SW-3A, SW-4, SW-4A, SW-5A, SW-6 and SW-8 were not sampled in August 2019 due to dry conditions or water being diverted to a downstream retention pond. Also GSS-1 and GSS-2 were dry therefore not sampled. Third quarter 2019 monitoring results are historically consistent. Third quarter baseline sampling results showed Volatile Organic Compound (VOC) results as non-detect with the exception of a low-level detection of Carbon disulfide (0.0006 J mg/L) at groundwater suppression system GSS-1A. This low-level estimated concentration is likely a sampling and analysis artifact and not representative of site conditions.

#### *Fourth Quarter 2019*

Fourth Quarter 2019 routine parameter sampling and analysis of groundwater, surface water and groundwater suppression systems was completed as required. Additionally, sampling and analysis of leachate for expanded parameters was completed. Surface water sampling locations SW-4, SW-4A, SW-5A, SW-6, SW-8 and SW-9 were not sampled in November 2019 due to either dry conditions or pond flow diverted to a downstream retention pond. Also GSS-1 and GSS-2 were dry and therefore not sampled. Fourth quarter 2019 monitoring results are historically consistent.

### **Section 16 – Surface Impoundments**

This landfill does not have leachate surface impoundments.

### **Section 17 – Permit/Consent Order Reporting Requirements**

A separate quarterly surface water report and a separate quarterly landfill gas monitoring report are required to be submitted in addition to this report.

**Section 18 – Signature and Date by Owner or Operator**

I hereby affirm under penalty of perjury that information provided on this form and attached statement and exhibits was prepared by me or under my supervision and direction and is true to the best of my knowledge and belief, and that I have the authority to sign this report form pursuant of 6 NYCRR Part 360. I am aware that any false statement made herein is punishable as a Class A misdemeanor pursuant to Section 210.45 of the Penal Law.

Total Organic Carbon (TOC)	220	242	31.1	12.8	280
Total Phenolics	0.094	0.128	0.03	0.363	0.426

## Notes:

U - Concentration not detected at specified detection limit

J/UJ - Estimated value

X/UX - Refer to laboratory analytical report for details

E - Inorganics - Estimated due to serial dilution outside control limits

B/BJ - Analyte was detected in the method blank that may have contributed to the sample result

\* - Quality control parameter exceeds laboratory limits

Notes:

U - Concentration not detected at specified detection limit

J/UJ - Estimated value

B/BJ - Analyte detected in associated method blank

\* - Quality control parameter exceeds laboratory limits

<b>100</b>	Parameter in Bold exceeds Class GA water quality standard but not EWQV
<b>100</b>	Parameter exceeds EWQV (mean) and the water quality standard
<b>100</b>	Parameter exceeds EWQV (mean) plus three standard deviations
<b>100</b>	Parameters exceeds the above criteria

Hydrogen Sulfide Range: 0.1-2%	%	NM	NM	0.6	1.7	NM

**Footnotes:**

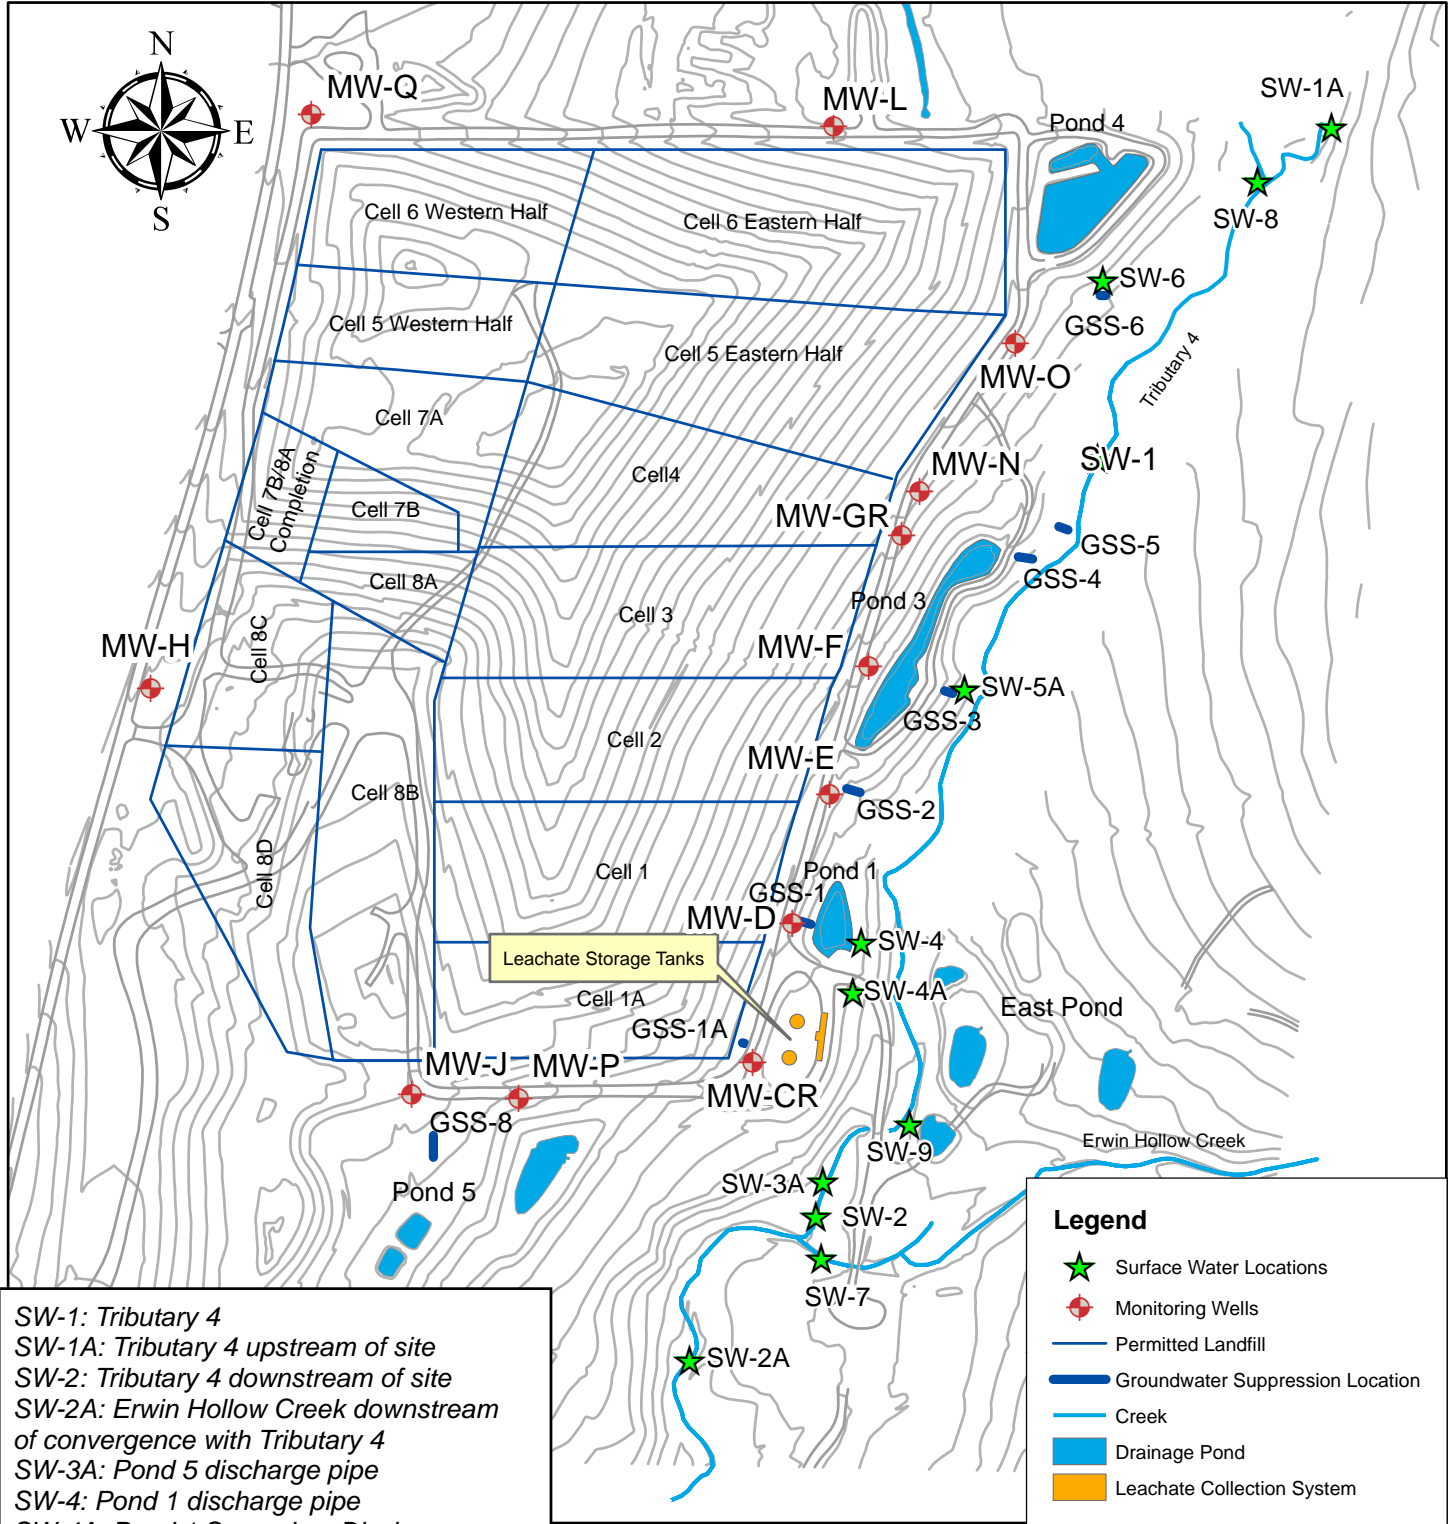

- <sup>1</sup> Gas well readings measured from port at top of well
- <sup>2</sup> Gas vent reading measured from port near base of vent
- <sup>3</sup> Reading represents value above instrument background
- \* GW-15 unable to get RAE H<sub>2</sub>S reading. Sample port full

**Acronyms**

NM - Not measured  
 OL - Over instrument limit

## **Laboratory Analytical Reports**

December 04, 2019

Service Request No:R1911350

Russell Anderson  
Casella Waste Systems - Hakes Billing  
4 Chenell Drive Suite 200  
Concord, NH 03301

**Laboratory Results for: Hakes C&D Landfill - 363 Routine Parameters**

Dear Russell,

Enclosed are the results of the sample(s) submitted to our laboratory November 20, 2019  
For your reference, these analyses have been assigned our service request number **R1911350**.

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

Please contact me if you have any questions. My extension is 7472. You may also contact me via email at [Janice.Jaeger@alsglobal.com](mailto:Janice.Jaeger@alsglobal.com).

Respectfully submitted,

**ALS Group USA, Corp. dba ALS Environmental**

# Narrative Documents

**ALS Environmental—Rochester Laboratory**  
1565 Jefferson Road, Building 300, Suite 360, Rochester, NY 14623  
Phone (585) 288-5380 Fax (585) 288-8475  
[www.alsglobal.com](http://www.alsglobal.com)

**Client:** Casella Waste Systems (Hampden ME)  
**Project:** Hakes C&D Landfill - 363 Routine Parameters  
**Sample Matrix:** Water

**Service Request:** R1911350  
**Date Received:** 11/19/2019 - 11/21/2019

#### CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

#### Sample Receipt:

Fourteen water samples were received for analysis at ALS Environmental on 11/19/2019 - 11/21/2019. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

#### Metals:

Method 6010C, 11/22/2019: The control limits for matrix spike recovery of one or more of the spiked analytes are not applicable and have been flagged with a "#". The concentration of the analyte(s) in the parent sample is more than 4x the spike concentration. No further corrective action was required.

#### General Chemistry:

No significant anomalies were noted with this analysis.

A handwritten signature in black ink, appearing to read "Samantha", is written over a horizontal line.

## REPORT QUALIFIERS AND DEFINITIONS

<p><b>U</b> Analyte was analyzed for but not detected. The sample quantitation limit has been corrected for dilution and for percent moisture, unless otherwise noted in the case narrative.</p> <p><b>J</b> Estimated value due to either being a Tentatively Identified Compound (TIC) or that the concentration is between the MRL and the MDL. Concentrations are not verified within the linear range of the calibration. For DoD: concentration &gt;40% difference between two GC columns (pesticides/Aroclors).</p> <p><b>B</b> Analyte was also detected in the associated method blank at a concentration that may have contributed to the sample result.</p> <p><b>E</b> Inorganics- Concentration is estimated due to the serial dilution was outside control limits.</p> <p><b>E</b> Organics- Concentration has exceeded the calibration range for that specific analysis.</p> <p><b>D</b> Concentration is a result of a dilution, typically a secondary analysis of the sample due to exceeding the calibration range or that a surrogate has been diluted out of the sample and cannot be assessed.</p> <p><b>*</b> Indicates that a quality control parameter has exceeded laboratory limits. Under the "Notes" column of the Form I, this qualifier denotes analysis was performed out of Holding Time.</p> <p><b>H</b> Analysis was performed out of hold time for tests that have an "immediate" hold time criteria.</p> <p><b>#</b> Spike was diluted out.</p>	<p><b>+</b> Correlation coefficient for MSA is &lt;0.995.</p> <p><b>N</b> Inorganics- Matrix spike recovery was outside laboratory limits.</p> <p><b>N</b> Organics- Presumptive evidence of a compound (reported as a TIC) based on the MS library search.</p> <p><b>S</b> Concentration has been determined using Method of Standard Additions (MSA).</p> <p><b>W</b> Post-Digestion Spike recovery is outside control limits and the sample absorbance is &lt;50% of the spike absorbance.</p> <p><b>P</b> Concentration &gt;40% difference between the two GC columns.</p> <p><b>C</b> Confirmed by GC/MS</p> <p><b>Q</b> DoD reports: indicates a pesticide/Aroclor is not confirmed (&gt;100% Difference between two GC columns).</p> <p><b>X</b> See Case Narrative for discussion.</p> <p><b>MRL</b> Method Reporting Limit. Also known as:</p> <p><b>LOQ</b> Limit of Quantitation (LOQ) The lowest concentration at which the method analyte may be reliably quantified under the method conditions.</p> <p><b>MDL</b> Method Detection Limit. A statistical value derived from a study designed to provide the lowest concentration that will be detected 99% of the time. Values between the MDL and MRL are estimated (see J qualifier).</p> <p><b>LOD</b> Limit of Detection. A value at or above the MDL which has been verified to be detectable.</p> <p><b>ND</b> Non-Detect. Analyte was not detected at the concentration listed. Same as U qualifier.</p>

### Rochester Lab ID # for State Certifications<sup>1</sup>

Connecticut ID # PH0556	Maine ID #NY0032	Pennsylvania ID# 68-786
Delaware Approved	New Hampshire ID # 2941	Rhode Island ID # 158
DoD ELAP #65817	New York ID # 10145	Virginia #460167
Florida ID # E87674	North Carolina #676	

<sup>1</sup> Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state or agency requirements. The test results meet requirements of the current NELAP/TNI standards or state or agency requirements, where applicable, except as noted in the case narrative. Since not all analyte/method/matrix combinations are offered for state/NELAC accreditation, this report may contain results which are not accredited. For a specific list of accredited analytes, contact the laboratory or go to <https://www.alsglobal.com/locations/americas/north-america/usa/new-york/rochester-environmental>

## Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

Concord, NH 03301

**Laboratory Results for: Hakes C&D Landfill - 363 Routine Plus Parameters**

Dear Russell,

Enclosed are the results of the sample(s) submitted to our laboratory November 19, 2019  
For your reference, these analyses have been assigned our service request number **R1911351**.

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

Please contact me if you have any questions. My extension is 7472. You may also contact me via email at [Janice.Jaeger@alsglobal.com](mailto:Janice.Jaeger@alsglobal.com).

Respectfully submitted,

**ALS Group USA, Corp. dba ALS Environmental**

**Client:** Casella Waste Systems (Hampden ME)  
**Project:** Hakes C&D Landfill - 363 Routine Plus Parameters  
**Sample Matrix:** Water

**Service Request:** R1911351  
**Date Received:** 11/19/2019

**CASE NARRATIVE**

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier II level requested by the client.

**Sample Receipt:**

Twelve water samples were received for analysis at ALS Environmental on 11/19/2019. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

**Metals:**

No significant anomalies were noted with this analysis.

**General Chemistry:**

No significant anomalies were noted with this analysis.

A handwritten signature in black ink, appearing to read "Samanta", is written over a horizontal line.

## REPORT QUALIFIERS AND DEFINITIONS

<p><b>U</b> Analyte was analyzed for but not detected. The sample quantitation limit has been corrected for dilution and for percent moisture, unless otherwise noted in the case narrative.</p> <p><b>J</b> Estimated value due to either being a Tentatively Identified Compound (TIC) or that the concentration is between the MRL and the MDL. Concentrations are not verified within the linear range of the calibration. For DoD: concentration &gt;40% difference between two GC columns (pesticides/Aroclors).</p> <p><b>B</b> Analyte was also detected in the associated method blank at a concentration that may have contributed to the sample result.</p> <p><b>E</b> Inorganics- Concentration is estimated due to the serial dilution was outside control limits.</p> <p><b>E</b> Organics- Concentration has exceeded the calibration range for that specific analysis.</p> <p><b>D</b> Concentration is a result of a dilution, typically a secondary analysis of the sample due to exceeding the calibration range or that a surrogate has been diluted out of the sample and cannot be assessed.</p> <p><b>*</b> Indicates that a quality control parameter has exceeded laboratory limits. Under the "Notes" column of the Form I, this qualifier denotes analysis was performed out of Holding Time.</p> <p><b>H</b> Analysis was performed out of hold time for tests that have an "immediate" hold time criteria.</p> <p><b>#</b> Spike was diluted out.</p>	<p><b>+</b> Correlation coefficient for MSA is &lt;0.995.</p> <p><b>N</b> Inorganics- Matrix spike recovery was outside laboratory limits.</p> <p><b>N</b> Organics- Presumptive evidence of a compound (reported as a TIC) based on the MS library search.</p> <p><b>S</b> Concentration has been determined using Method of Standard Additions (MSA).</p> <p><b>W</b> Post-Digestion Spike recovery is outside control limits and the sample absorbance is &lt;50% of the spike absorbance.</p> <p><b>P</b> Concentration &gt;40% difference between the two GC columns.</p> <p><b>C</b> Confirmed by GC/MS</p> <p><b>Q</b> DoD reports: indicates a pesticide/Aroclor is not confirmed (&gt;100% Difference between two GC columns).</p> <p><b>X</b> See Case Narrative for discussion.</p> <p><b>MRL</b> Method Reporting Limit. Also known as:</p> <p><b>LOQ</b> Limit of Quantitation (LOQ) The lowest concentration at which the method analyte may be reliably quantified under the method conditions.</p> <p><b>MDL</b> Method Detection Limit. A statistical value derived from a study designed to provide the lowest concentration that will be detected 99% of the time. Values between the MDL and MRL are estimated (see J qualifier).</p> <p><b>LOD</b> Limit of Detection. A value at or above the MDL which has been verified to be detectable.</p> <p><b>ND</b> Non-Detect. Analyte was not detected at the concentration listed. Same as U qualifier.</p>
---	---

### Rochester Lab ID # for State Certifications<sup>1</sup>

Connecticut ID # PH0556	Maine ID #NY0032	Pennsylvania ID# 68-786
Delaware Approved	New Hampshire ID # 2941	Rhode Island ID # 158
DoD ELAP #65817	New York ID # 10145	Virginia #460167
Florida ID # E87674	North Carolina #676	

<sup>1</sup> Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state or agency requirements. The test results meet requirements of the current NELAP/TNI standards or state or agency requirements, where applicable, except as noted in the case narrative. Since not all analyte/method/matrix combinations are offered for state/NELAC accreditation, this report may contain results which are not accredited. For a specific list of accredited analytes, contact the laboratory or go to <https://www.alsglobal.com/locations/americas/north-america/usa/new-york/rochester-environmental>

## Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

## INORGANIC PREPARATION METHODS

The preparation methods associated with this report are found in these tables unless discussed in the case narrative.

### Water/Liquid Matrix

Analytical Method	Preparation Method
200.7	200.2
200.8	200.2
6010C	3005A/3010A
6020A	ILM05.3
9014 Cyanide Reactivity	SW846 Ch7, 7.3.4.2
9034 Sulfide Reactivity	SW846 Ch7, 7.3.4.2
9034 Sulfide Acid Soluble	9030B
9056A Bomb (Halogens)	5050A
9066 Manual Distillation	9065
SM 4500-CN-E Residual Cyanide	SM 4500-CN-G
SM 4500-CN-E WAD Cyanide	SM 4500-CN-I

### Solid/Soil/Non-Aqueous Matrix

Analytical Method	Preparation Method
6010C	3050B
6020A	3050B
6010C TCLP (1311) extract	3005A/3010A
6010 SPLP (1312) extract	3005A/3010A
7196A	3060A
7199	3060A
9056A Halogens/Halides	5050
300.0 Anions/ 350.1/ 353.2/ SM 2320B/ SM 5210B/ 9056A Anions	DI extraction

For analytical methods not listed, the preparation method is the same as the analytical method reference.

Service Request No:R1911491

Russell Anderson  
Casella Waste Systems - Hakes Billing  
4 Chenell Drive Suite 200  
Concord, NH 03301

**Laboratory Results for: Hakes C&D Landfill - Part 363 Expanded Parameters**

Dear Russell,

Enclosed are the results of the sample(s) submitted to our laboratory November 21, 2019  
For your reference, these analyses have been assigned our service request number **R1911491**.

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

Please contact me if you have any questions. My extension is 7472. You may also contact me via email at [Janice.Jaeger@alsglobal.com](mailto:Janice.Jaeger@alsglobal.com).

Respectfully submitted,

**ALS Group USA, Corp. dba ALS Environmental**

Janice Jaeger  
Project Manager

**Sample Matrix:** Water

**Service Request:** R1911491  
**Date Received:** 11/21/2019

### CASE NARRATIVE

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples for the Tier level IV requested by the client.

#### Sample Receipt:

Three water samples were received for analysis at ALS Environmental on 11/21/2019. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The samples were stored at minimum in accordance with the analytical method requirements.

#### Semivolatiles by GC/MS:

Method 8270D, 12/05/2019: The lower control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). Since there were no detections of the analyte(s) above the MRL in the associated field samples, the quantitation is not affected. The data quality was not significantly affected and no further corrective action was taken.

Method 8270D, 11/28/2019: The upper control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte(s) in question above the Method Reporting Limit (MRL). Since the exceedance equates to a potential high bias, the data quality was not significantly affected and no further corrective action was taken.

Method 8270D, 11/28/2019: The lower control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). Since there were no detections of the analyte(s) above the MRL in the associated field samples, the quantitation is not affected. The data quality was not significantly affected and no further corrective action was taken.

8270D: An MDL and LCS/LCSD recovery cannot be determined for p-Phenylenediamine. p-Phenylenediamine is degraded in the extraction procedure. The compound has been flagged with an "X" and should be considered as indeterminate.

N-Nitrosodiphenylamine and Diphenylamine identity cannot be distinguished since N-Nitrosodiphenylamine breaks down to diphenylamine in the injection port of the instrument. Quantitation provided for either compound is from the instrument response of both compounds.

Method 8270D SIM,661766:The analysis was initially performed within the recommended holding time. Re-extraction and Reanalysis at a dilution was required. The reanalysis was performed past the recommended holding time. Sample R1911491-001.

Method 8270D SIM: The lower control limit was exceeded for one or more surrogates in one or more samples in this report. The elevated recovery equates to a low bias. The result is reported and the sample is to be re-extracted out of recommended holding time.

#### Semivolatile GC:

dMethod 8081B, 12/10/2019: The upper control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte(s) in question above the Method Reporting Limit (MRL). Since the exceedance equates to a potential high bias, the data quality was not significantly affected and no further corrective action was taken.

Method 8081B, 662956s: The control limits were exceeded for one or more surrogates due to matrix interferences. A re-extraction and reanalysis was performed, but produced similar results. The re-extraction was performed out of holding time. No further corrective action was required.

Method 8081B, 12/10/2019: The lower control limit for the spike recovery of the Laboratory Control Sample (LCSD) was exceeded for one or more analyte. There were no detections of the analyte(s) in the associated field samples. The discrepancy

A handwritten signature in black ink, appearing to read "Samantha".

Approved by \_\_\_\_\_

Date 12/31/2019

associated with reduced recovery equates to a potential low bias. The analytes affected are flagged in the LCS Summary. Passes in the LCS.

Method 8081B, 12/03/2019: The upper control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte(s) in question above the Method Reporting Limit (MRL). Since the exceedance equates to a potential high bias, the data quality was not significantly affected and no further corrective action was taken.

kepone has been reported as zero percent recovery in the LCS/LCSD due to a limitation in LIMs. kepone was detected at 8% and 7% recovery, respectively, outside laboratory limits. The LCS/LCSD is unacceptable and should be flagged on the summary form. The precision is also outside laboratory control limits.

Method 8082A, 12/09/2019: The upper control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). The field samples analyzed in this sequence did not contain the analyte(s) in question above the Method Reporting Limit (MRL). Since the exceedance equates to a potential high bias, the data quality was not significantly affected and no further corrective action was taken.

Method 8082A, 12/09/2019: The lower control limit for the spike recovery of the Laboratory Control Sample (LCS) was exceeded for one or more analyte. There were no detections of the analyte(s) in the associated field samples. The discrepancy associated with reduced recovery equates to a potential low bias. Additional analysis of the associated field samples could not be performed because insufficient sample remained for testing. The analytes affected are flagged in the LCS Summary. Lcsd worked.

Method 8082A, 662687s: The control limits were exceeded for one or more surrogates due to matrix interferences. A re-extraction and reanalysis was performed, but produced similar results. No further corrective action was required.

Method 8082A, 12/09/2019: The control limit was exceeded for one or more surrogates in the Continuing Calibration Verification (CCV). The surrogates were not within acceptance limits for the associated field samples. They were re-extracts confirming surr out low ccv failed high. The data quality was not significantly affected and no further corrective action was taken.

#### **Metals:**

No significant anomalies were noted with this analysis.

#### **General Chemistry:**

Method 7196A: One or more samples were received with insufficient hold time remaining to complete the analysis within the recommended limit. The analysis was performed as soon as possible after receipt by the laboratory. The data is flagged to indicate the holding time exceedance.

Method 7196A, R1911941-001: The Method Reporting Limit (MRL) was elevated due to color and reactivity of sample.

#### **Subcontracted Analytical Parameters:**

One or more samples were subcontracted to another laboratory for testing. The certified analytical report from the subcontractor has been included in its entirety at the end of this report and includes the name and address of the subcontracted laboratory.

#### **Volatiles by GC/MS:**

Method 8260C, 12/02/2019: The lower control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). Since there were no detections of the analyte(s) above the MRL in the associated field samples, the quantitation is not affected. The data quality was not significantly affected and no further corrective action was taken.

Method 8260C, 11/27/2019: The lower control limit was exceeded for one or more analytes in the Continuing Calibration Verification (CCV). Since there were no detections of the analyte(s) above the MRL in the associated field samples, the quantitation is not affected. The data quality was not significantly affected and no further corrective action was taken.

A handwritten signature in black ink, appearing to read "Samanta", is written over a horizontal line.

## REPORT QUALIFIERS AND DEFINITIONS

<p><b>U</b> Analyte was analyzed for but not detected. The sample quantitation limit has been corrected for dilution and for percent moisture, unless otherwise noted in the case narrative.</p> <p><b>J</b> Estimated value due to either being a Tentatively Identified Compound (TIC) or that the concentration is between the MRL and the MDL. Concentrations are not verified within the linear range of the calibration. For DoD: concentration &gt;40% difference between two GC columns (pesticides/Aroclors).</p> <p><b>B</b> Analyte was also detected in the associated method blank at a concentration that may have contributed to the sample result.</p> <p><b>E</b> Inorganics- Concentration is estimated due to the serial dilution was outside control limits.</p> <p><b>E</b> Organics- Concentration has exceeded the calibration range for that specific analysis.</p> <p><b>D</b> Concentration is a result of a dilution, typically a secondary analysis of the sample due to exceeding the calibration range or that a surrogate has been diluted out of the sample and cannot be assessed.</p> <p><b>*</b> Indicates that a quality control parameter has exceeded laboratory limits. Under the "Notes" column of the Form I, this qualifier denotes analysis was performed out of Holding Time.</p> <p><b>H</b> Analysis was performed out of hold time for tests that have an "immediate" hold time criteria.</p> <p><b>#</b> Spike was diluted out.</p>	<p><b>+</b> Correlation coefficient for MSA is &lt;0.995.</p> <p><b>N</b> Inorganics- Matrix spike recovery was outside laboratory limits.</p> <p><b>N</b> Organics- Presumptive evidence of a compound (reported as a TIC) based on the MS library search.</p> <p><b>S</b> Concentration has been determined using Method of Standard Additions (MSA).</p> <p><b>W</b> Post-Digestion Spike recovery is outside control limits and the sample absorbance is &lt;50% of the spike absorbance.</p> <p><b>P</b> Concentration &gt;40% difference between the two GC columns.</p> <p><b>C</b> Confirmed by GC/MS</p> <p><b>Q</b> DoD reports: indicates a pesticide/Aroclor is not confirmed (&gt;100% Difference between two GC columns).</p> <p><b>X</b> See Case Narrative for discussion.</p> <p><b>MRL</b> Method Reporting Limit. Also known as:</p> <p><b>LOQ</b> Limit of Quantitation (LOQ) The lowest concentration at which the method analyte may be reliably quantified under the method conditions.</p> <p><b>MDL</b> Method Detection Limit. A statistical value derived from a study designed to provide the lowest concentration that will be detected 99% of the time. Values between the MDL and MRL are estimated (see J qualifier).</p> <p><b>LOD</b> Limit of Detection. A value at or above the MDL which has been verified to be detectable.</p> <p><b>ND</b> Non-Detect. Analyte was not detected at the concentration listed. Same as U qualifier.</p>

### Rochester Lab ID # for State Certifications<sup>1</sup>

Connecticut ID # PH0556	Maine ID #NY0032	Pennsylvania ID# 68-786
Delaware Approved	New Hampshire ID # 2941	Rhode Island ID # 158
DoD ELAP #65817	New York ID # 10145	Virginia #460167
Florida ID # E87674	North Carolina #676	

<sup>1</sup> Analyses were performed according to our laboratory's NELAP-approved quality assurance program and any applicable state or agency requirements. The test results meet requirements of the current NELAP/TNI standards or state or agency requirements, where applicable, except as noted in the case narrative. Since not all analyte/method/matrix combinations are offered for state/NELAC accreditation, this report may contain results which are not accredited. For a specific list of accredited analytes, contact the laboratory or go to <https://www.alsglobal.com/locations/americas/north-america/usa/new-york/rochester-environmental>

## Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

## Case Narrative

---

### **ALS Environmental**

R1911491

Work Order Number: 1911577

1. This report consists of the analytical results and supporting documentation for two water samples received by ALS on 11/23/2019.
2. These samples were prepared and analyzed according to EPA method 903.1. The analyses were completed on 12/30/2019.
3. The analysis results for these samples are reported in units of pCi/L. Sample 1911577-2 was filtered through a 0.45 micron filter and preserved prior to analysis. Sample 1911577-1 was not filtered prior to analysis.
4. Sample volume was insufficient to allow preparation of a duplicate. A laboratory control sample duplicate (LCSD) was prepared in lieu of a client sample duplicate.
5. ALS uses the following convention for reporting significant digits in the TPU and MDC results. The TPU value is rounded to two significant digits. The MDC value is rounded to the same decimal place as the TPU value. In practice, this could result in an MDC reported value of zero for samples with significant activity, including the batch laboratory control sample.
6. No anomalous situations were encountered during the preparation or analysis of these samples. All quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

1. Are airbills / shipping documents present and/or removable?		DROP OFF	<input checked="" type="radio"/> YES	NO		
2. Are custody seals on shipping containers intact?		NONE	<input checked="" type="radio"/> YES	NO *		
3. Are custody seals on sample containers intact?		NONE	YES	NO *		
4. Is there a COC (chain-of-custody) present?			<input checked="" type="radio"/> YES	NO *		
5. Is the COC in agreement with samples received? (IDs, dates, times, # of samples, # of containers, matrix, requested analyses, etc.)			<input checked="" type="radio"/> YES	NO *		
6. Are short-hold samples present?			YES	<input checked="" type="radio"/> NO		
7. Are all samples within holding times for the requested analyses?			<input checked="" type="radio"/> YES	NO *		
8. Were all sample containers received intact? (not broken or leaking)			<input checked="" type="radio"/> YES	NO *		
9. Is there sufficient sample for the requested analyses?			<input checked="" type="radio"/> YES	NO *		
10. Are samples in proper containers for requested analyses? (form 250, Sample Handling Guidelines)			<input checked="" type="radio"/> YES	NO *		
11. Are all aqueous samples preserved correctly, if required? (excluding volatiles)		N/A	YES	<input checked="" type="radio"/> NO *		
12. Are all samples requiring no headspace (VOC, GRO, RSK/MEE, radon) free of bubbles > 6 mm (1/4 inch) diameter? (i.e. size of green pea)		<input checked="" type="radio"/> N/A	YES	NO		
13. Were the samples shipped on ice?			YES	<input checked="" type="radio"/> NO		
14. Were cooler temperatures measured at 0.1-6.0°C?	IR gun used*:	#3	#5	<input checked="" type="radio"/> RAD ONLY	YES	NO
Cooler #: <u>1</u> <u>2</u> <u>3</u>						
Temperature (°C): <u>AMB</u> <u>AMB</u> <u>AMB</u>						
# of custody seals on cooler: <u>1</u> <u>1</u> <u>1</u>						
External mR/hr reading: <u>10</u> <u>9</u> <u>9</u>						
Background mR/hr reading: <u>11</u>						
Were external mR/hr readings ≤ two times background and within DOT acceptance criteria? <input checked="" type="radio"/> YES / NO / NA (If no, see Form 008.)						

\* Please provide details here for NO responses to gray boxes above - for 2 thru 5 & 7 thru 12, notify PM & continue w/ login.

1) all sample bottles have initial pH 7  
... 577 - all bottles added 2ml HNO<sub>3</sub>, final pH < 2 | lot #: 228685

Were unpreserved bottles pH checked? YES  NO

All client bottle ID's vs ALS lab ID's double-checked by: EE

If applicable, was the client contacted? YES / NO / NA  Contact: \_\_\_\_\_ Date/Time: \_\_\_\_\_

# **SAMPLE RESULTS SUMMARY**

# Radium-226 by Radon Emanation - Method 903.1 Sample Results Summary

**Client Name:** ALS Environmental  
**Client Project Name:**  
**Client Project Number:** R1911491  
**Laboratory Name:** ALS -- Fort Collins  
**PAI Work Order:** 1911577

**Page:** 1 of 1  
**Reported on:** Monday, December 30, 2019  
 3:33:22 PM

Lab Sample ID	Client Sample ID	Sample Type	Nuclide	Result +/- 2 s TPU	MDC	DL	Units	Matrix	Prep Batch	Date Analyze	Flags
1911577-1	LCS-1119	Sample	Ra-226	0.62 +/- 0.56	0.81	NA	pCi/l	WATER	RE191219-1	12/30/2019	U
1911577-2	LCS Diss-1119	Sample	Ra-226	1.83 +/- 0.79	0.58	NA	pCi/l	WATER	RE191219-1	12/30/2019	

## Comments:

**Data Package ID:** RE1911577-1

### Qualifiers/Flags:

- U - Result is less than the sample specific MDC.
- LT - Result is less than Requested MDC, greater than sample specific MDC.
- Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
- Y2 - Chemical Yield outside default limits.
- M - The requested MDC was not met.
- M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

### Abbreviations:

- TPU - Total Propagated Uncertainty
- MDC - Sample specific Minimum Detectable Concentration
- BDL - Below Detection Limit

## Case Narrative

---

### **ALS Environmental**

R1911491

Work Order Number: 1911577

1. This report consists of the analytical results and supporting documentation for two water samples received by ALS on 11/23/2019.
2. These samples were prepared according to EPA method 904.0.
3. The samples were analyzed for the presence of  $^{228}\text{Ra}$  by low background gas flow proportional counting of  $^{228}\text{Ac}$ , which is the ingrown progeny of  $^{228}\text{Ra}$ , according to EPA method 904.0. The analyses were completed on 12/16/2019.
4. The analysis results for these samples are reported in units of pCi/L. The samples were filtered prior to analysis. Sample 1911577-2 was filtered through a 0.45 micron filter and preserved prior to analysis.
5. Sample volume was insufficient to allow preparation of a duplicate. A laboratory control sample duplicate (LCSD) was prepared in lieu of a client sample duplicate.
6. To reduce matrix interference, reduced aliquots were used for the preparation of these samples. Consequently, the requested MDC was not met for these samples. The reported activity exceeds the achieved MDC. These samples are identified with an "M3" qualifier on the final reports.
7. No further anomalous situations were noted during the preparation and analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

# **SAMPLE RESULTS SUMMARY**

# Radium-228 Analysis by GFPC Sample Results Summary

**Client Name:** ALS Environmental  
**Client Project Name:**  
**Client Project Number:** R1911491  
**Laboratory Name:** ALS -- Fort Collins  
**PAI Work Order:** 1911577

**Page:** 1 of 1  
**Reported on:** Monday, December 23, 2019  
 9:25:09 AM

Lab Sample ID	Client Sample ID	Sample Type	Nuclide	Result +/- 2 s TPU	MDC	DL	Units	Matrix	Prep Batch	Date Analyze	Flags
1911577-1	LCS-1119	Sample	Ra-228	2.38 +/- 0.96	1.49	NA	pCi/l	WATER	RA191203-1	12/16/2019	M3
1911577-2	LCS Diss-1119	Sample	Ra-228	2.16 +/- 0.97	1.62	NA	pCi/l	WATER	RA191203-1	12/16/2019	M3

## Comments:

**Data Package ID:** RA1911577-1

### Qualifiers/Flags:

- U - Result is less than the sample specific MDC.
- LT - Result is less than Requested MDC, greater than sample specific MDC.
- Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
- Y2 - Chemical Yield outside default limits.
- M - The requested MDC was not met.
- M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

### Abbreviations:

- TPU - Total Propagated Uncertainty
- MDC - Sample specific Minimum Detectable Concentration
- BDL - Below Detection Limit

# Total Uranium Case Narrative

---

## ALS Environmental

R1911491

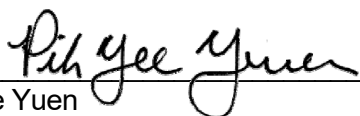

Work Order Number: 1911577

1. This report consists of the analytical results and supporting documentation for two water samples received by ALS on 11/23/2019.
2. These samples were prepared according to EPA method 908.0.
3. The samples were analyzed for the presence of isotopic and total uranium according to EPA method 908.0. The analyses were completed on 12/20/2019.
4. The total uranium results were determined by adding the isotopic results, and are displayed as the analyte 'URANIUM, TOTAL' for each sample.
5. The analysis results for these samples are reported in units of pCi/L. Sample 1911577-2 was filtered through a 0.45 micron filter and preserved prior to analysis. Sample 1911577-1 was not filtered prior to analysis.
6. This analytical method quantifies U-235 alpha activity in a specific region of interest corresponding to emission energies between those of U-234 and U-238. A potential limitation of this method is that measurable amounts of U-234 in the sample may cause a small amount of characteristic activity in the U-235 region of interest due to poorly resolved alpha activity at the boundary between the two regions. To minimize the potential for a high bias in the U-235 analytical results, the U-235 region of interest has been narrowed and limited to a lower energy region. An 85.1% abundance correction has been made to the final U-235 results.
7. ALS uses the following convention for reporting significant digits in the TPU and MDC results. The TPU value is rounded to two significant digits. The MDC value is rounded to the same decimal place as the TPU value. In practice, this could result in an MDC reported value of zero for samples with significant activity, including the batch laboratory control sample.

8. Uranium-235 and URANIUM, TOTAL activity is reported in the associated method blank above the minimum detectable concentration value, as indicated with a "B3" qualifier on the final reports. The measured blank activity is below the requested MDC. Results are acceptable according to the current revision of SOP 715 and are submitted without further qualification.
9. No further anomalous situations were encountered during the preparation or analysis of these samples. All remaining quality control criteria were met.

The data contained in the following report have been reviewed and approved by the personnel listed below. In addition, ALS certifies that the analyses reported herein are true, complete and correct within the limits of the methods employed.

## Comments:

Data Package ID: *UT1911577-1*

### Qualifiers/Flags:

- U - Result is less than the sample specific MDC.
- LT - Result is less than Requested MDC, greater than sample specific MDC.
- Y1 - Chemical Yield is in control at 100-110%. Quantitative Yield is assumed.
- Y2 - Chemical Yield outside default limits.
- M - The requested MDC was not met.
- M3 - The requested MDC was not met, but the reported activity is greater than the reported MDC.

### Abbreviations:

- TPU - Total Propagated Uncertainty
- MDC - Sample specific Minimum Detectable Concentration
- BDL - Below Detection Limit

**Analytical Report for Service Request No: R1911491**

Janice Jaeger  
ALS Environmental  
1565 Jefferson Rd, Building 300  
Suite 360  
Rochester, NY 14623

**RE: Hakes C&D Landfill - Part 363 Expanded Parameters**

Dear Janice Jaeger,

Enclosed are the results of the sample(s) submitted to our laboratory November 23, 2019  
For your reference, these analyses have been assigned our service request number **R1911491**.

All testing was performed according to our laboratory's quality assurance program and met the requirements of the TNI standards except as noted in the case narrative report. Any testing not included in the lab's accreditation is identified on a Non-Certified Analytes report. All results are intended to be considered in their entirety. ALS Environmental is not responsible for use of less than the complete report. Results apply only to the individual samples submitted to the lab for analysis, as listed in the report. The measurement uncertainty of the results included in this report is within that expected when using the prescribed method(s), and represented by Laboratory Control Sample control limits. Any events, such as QC failures or Holding Time exceedances, which may add to the uncertainty are explained in the report narrative or are flagged with qualifiers. The flags are explained in the Report Qualifiers and Definitions page of this report.

Please contact me if you have any questions. My extension is 3275. You may also contact me via email at [Chris.Leaf@ALSGlobal.com](mailto:Chris.Leaf@ALSGlobal.com).

Respectfully submitted,

**ALS Group USA, Corp. dba ALS Environmental**

for Chris Leaf  
Project Manager

## Acronyms

ASTM	American Society for Testing and Materials
A2LA	American Association for Laboratory Accreditation
CARB	California Air Resources Board
CAS Number	Chemical Abstract Service registry Number
CFC	Chlorofluorocarbon
CFU	Colony-Forming Unit
DEC	Department of Environmental Conservation
DEQ	Department of Environmental Quality
DHS	Department of Health Services
DOE	Department of Ecology
DOH	Department of Health
EPA	U. S. Environmental Protection Agency
ELAP	Environmental Laboratory Accreditation Program
GC	Gas Chromatography
GC/MS	Gas Chromatography/Mass Spectrometry
LOD	Limit of Detection
LOQ	Limit of Quantitation
LUFT	Leaking Underground Fuel Tank
M	Modified
MCL	Maximum Contaminant Level is the highest permissible concentration of a substance allowed in drinking water as established by the USEPA.
MDL	Method Detection Limit
MPN	Most Probable Number
MRL	Method Reporting Limit
NA	Not Applicable
NC	Not Calculated
NCASI	National Council of the Paper Industry for Air and Stream Improvement
ND	Not Detected
NIOSH	National Institute for Occupational Safety and Health
PQL	Practical Quantitation Limit
RCRA	Resource Conservation and Recovery Act
SIM	Selected Ion Monitoring
TPH	Total Petroleum Hydrocarbons
tr	Trace level is the concentration of an analyte that is less than the PQL but greater than or equal to the MDL.

### **Inorganic Data Qualifiers**

- \* The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
- E The result is an estimate amount because the value exceeded the instrument calibration range.
- J The result is an estimated value.
- U The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.  
*DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
- i The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
- X See case narrative.
- Q See case narrative. One or more quality control criteria was outside the limits.
- H The holding time for this test is immediately following sample collection. The samples were analyzed as soon as possible after receipt by the laboratory.

### **Metals Data Qualifiers**

- # The control limit criteria is not applicable. See case narrative.
- J The result is an estimated value.
- E The percent difference for the serial dilution was greater than 10%, indicating a possible matrix interference in the sample.
- M The duplicate injection precision was not met.
- N The Matrix Spike sample recovery is not within control limits. See case narrative.
- S The reported value was determined by the Method of Standard Additions (MSA).
- U The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.  
*DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.
- W The post-digestion spike for furnace AA analysis is out of control limits, while sample absorbance is less than 50% of spike absorbance.  
  - i The MRL/MDL or LOQ/LOD is elevated due to a matrix interference.
- X See case narrative.
- + The correlation coefficient for the MSA is less than 0.995.
- Q See case narrative. One or more quality control criteria was outside the limits.

### **Organic Data Qualifiers**

- \* The result is an outlier. See case narrative.
- # The control limit criteria is not applicable. See case narrative.
- A A tentatively identified compound, a suspected aldol-condensation product.
- B The analyte was found in the associated method blank at a level that is significant relative to the sample result as defined by the DOD or NELAC standards.
- C The analyte was qualitatively confirmed using GC/MS techniques, pattern recognition, or by comparing to historical data.
- D The reported result is from a dilution.
- E The result is an estimated value.
- J The result is an estimated value.
- N The result is presumptive. The analyte was tentatively identified, but a confirmation analysis was not performed.
- P The GC or HPLC confirmation criteria was exceeded. The relative percent difference is greater than 40% between the two analytical results.
- U The analyte was analyzed for, but was not detected ("Non-detect") at or above the MRL/MDL.  
*DOD-QSM 4.2 definition* : Analyte was not detected and is reported as less than the LOD or as defined by the project. The detection limit is adjusted for dilution.  
  - i The MRL/MDL or LOQ/LOD is elevated due to a chromatographic interference.
- X See case narrative.
- Q See case narrative. One or more quality control criteria was outside the limits.

### **Additional Petroleum Hydrocarbon Specific Qualifiers**

- F The chromatographic fingerprint of the sample matches the elution pattern of the calibration standard.
- L The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of lighter molecular weight constituents than the calibration standard.
- H The chromatographic fingerprint of the sample resembles a petroleum product, but the elution pattern indicates the presence of a greater amount of heavier molecular weight constituents than the calibration standard.
- O The chromatographic fingerprint of the sample resembles an oil, but does not match the calibration standard.
- Y The chromatographic fingerprint of the sample resembles a petroleum product eluting in approximately the correct carbon range, but the elution pattern does not match the calibration standard.
- Z The chromatographic fingerprint does not resemble a petroleum product.

Analyses were performed according to our laboratory's NELAP-approved quality assurance program. A complete listing of specific NELAP-certified analytes, can be found in the certification section at [www.ALSGlobal.com](http://www.ALSGlobal.com) or at the accreditation bodies web site.

Please refer to the certification and/or accreditation body's web site if samples are submitted for compliance purposes. The states highlighted above, require the analysis be listed on the state certification if used for compliance purposes and if the method/analyte is offered by that state.

**Sample Matrix:** Water

**Service Request:** R1911491  
**Date Received:** 11/23/2019

**CASE NARRATIVE**

All analyses were performed consistent with the quality assurance program of ALS Environmental. This report contains analytical results for samples designated for Tier II data deliverables. When appropriate to the method, method blank results have been reported with each analytical test. Surrogate recoveries have been reported for all applicable organic analyses. Additional quality control analyses reported herein include: Laboratory Duplicate (DUP), Matrix Spike (MS), Matrix/Duplicate Matrix Spike (MS/DMS), Laboratory Control Sample (LCS), and Laboratory/Duplicate Laboratory Control Sample (LCS/DLCS).

**Sample Receipt:**

One water sample was received for analysis at ALS Environmental on 11/23/2019. Any discrepancies upon initial sample inspection are annotated on the sample receipt and preservation form included within this report. The sample was stored at minimum in accordance with the analytical method requirements.

**Organic LC:**

Method PFC/537M, 12/07/2019: The upper control criterion was exceeded for 13C2-8:2 FTS in sample LCS-1119. The associated native analyte was not detected above the Method Reporting Limit (MRL) in this sample. The error associated with an elevated recovery equated to a high bias. Assuming the native analyte performed similar to the labeled analog, the effect on the reported results was minimal. The quality of the sample data was not significantly affected. No further corrective action was appropriate.

Method PFC/537M, 12/07/2019: The upper control criterion was exceeded for one or more surrogates in Method Blank KQ1917781-06. No target analytes were detected in the Method Blank. Since the apparent problem equates to a high bias, the data quality was not significantly affected. No further corrective action was appropriate.

Approved by     *Nae D. Dora*

**ATTACHMENT 5 – ADDITIONAL PERMIT REPORTING REQUIREMENTS**

**SPECIAL CONDITION 51:**

***Annual reports shall be submitted to both the Region 8 Regional Solid and Hazardous Materials Engineer, 6274 East Avon-Lima Road, Avon, NY 14414 and the Central Office no later than 60 days after the first day of January following each year of operation. The reports shall be in accordance with the requirements of Part 360-7.5(b) and include the following information:***

- (a) Complaints received;***
- (b) An evaluation of all water and leachate quality data collected throughout the year. The Department may request at any time that this information be provided in a computer-compatible format to be specified by the Department;***
- (c) Evaluations of the landfill gas collection and control system, monitoring system, and monitoring data collected throughout the year. A description of proposed and/or actual changes to the landfill gas collection and control system, monitoring system, and monitoring plan shall be included;***
- (d) A completed copy of the Radiation Monitor Alarm Record form for each instance in which the radiation detector alarms due to an incoming load of waste.***

**Responses:**

- (a) Please see Attachment 6 (Complaint Log)
- (b) Please see Attachment 2 (Water Quality data). Computer-compatible formats are available upon request.
- (c) In 2019, quarterly landfill gas content monitoring (i.e. carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), and hydrogen sulfide (H<sub>2</sub>S)) was conducted. The test results are included in Attachment 2.

In addition, an annual H<sub>2</sub>S surface scan was conducted on November 1, 2019. The scan was conducted along the perimeter of the landfill, along a grid pattern on the landfill, at gas collection wells and pipe protrusions, and at three locations outside the perimeter of the landfill. Based on the results, H<sub>2</sub>S was not detected at the site. Refer to the Annual Hydrogen Sulfide Surface Emissions Monitoring (SEM) Report submitted on December 4, 2019 to the New York State Department of Environmental Conservation for further details.

Six gas wells were installed in May 2019, designated as GW-14 through GW-19. In addition, to the six gas wells, lateral collection pipes and a new header gas pipe were installed in order to connect the six gas wells to the existing gas collection system. No changes were made to the monitoring system and monitoring plan.

The gas collection system is functioning properly as of February 2020. Hakes is currently evaluating proposed modifications to the gas collection system in 2020.

- (d) The radiation detectors did not go off during 2019.

**ATTACHMENT 6 – COMPLAINT LOG**

HAKES C&D LANDFILL				
Complaint Log 2019				
Date	Time	Type of Complaint	Contact Info.	Notes and Resolved by Hakes C&D Landfill
		(Odor/Dust/Noise/Road)		
2/8/2019	7:30am	Odor	Dave Franzen	The Franzen's called about odors, went over within 5 minutes. Did not find any odors. Gave Dave Franzen a tour of the facility. 40 degrees wind speed 0-1 wind direction SW
2/13/2019	7:11am	Trucks on road before/after time	Town of Campbell / Tom Austin	Tom Austin called to state that the first Kris truck where up the hill late last night after 9pm.
