**WORLD'S FINEST HOOKS
2023 CATALOG**

2023 NEW PRODUCTS

G-Finesse Feathered Treble MH

Based largely on the input of Major League Fishing pro Aaron Martens, the G-Finesse feathered trebles feature either white or chartreuse premium feathers and complementary tinsel, hand selected by Martens to tempt even the most finicky fish. The G-Finesse feathered trebles feature TGW (Tournament-Grade Wire) construction, which is thinner, stronger and sharper than the standard wire. That means anglers will use fewer of them while ensuring better hook up percentages as the fishing day goes. To complete the job, they come with a Nano-Coat finish that makes penetration even easier. *Page 22.*

G-Finesse Drop Shot - Nano Smooth Coat, size addition. *Page 21.*

Big River Bait Barbless - NS Black, size addition. *Page 45.*

Stiletto

Gamakatsu teamed up with crappie legend Wally Marshall and his "Mr. Crappie" brand, the leading name in the crappie world, to design the Gamakatsu Mr. Crappie Premium Stiletto hooks. The Stiletto hook design is perfect for fishing live or dead bait due to its large gap for increased hook-ups and special bend with an acute angle providing better holding power, locking fish in place when hooked. The hooks are made from light, super-strong wire and are available in sizes from 6 through 1/0 for various applications. *Page 54.*

Sticker

Gamakatsu teamed up with crappie legend Wally Marshall and his "Mr. Crappie" brand, the leading name in the crappie world, to design the Gamakatsu Mr. Crappie Premium Sticker hooks. The Sticker is a traditional Aberdeen-style hook that utilizes Gamakatsu's premium grade of high carbon steel and features a perfectly conical point unequalled in sharpness. They come in gold, red and NS black, available in sizes 4 through 1/0. *Page 54.*

Trout Stinger

The Trout Stinger Hook is an incredible offering for anglers looking for a hook with a straight eye, and a wide gap. Built with durability, and sharpness in mind, the Trout Stinger is ideal for multiple species of fish from its namesake the freshwater Trout, all Panfish, Crappie, even small in-shore saltwater fish like Croakers, or Mullet. The no-shine black finish blends into most designs, drawing attention to the bait and not the hook. *Page 54.*

Power Drop Superline EWG

The Power Drop series is uniquely built around a solid ring that connects the premium hook, swivel and a 3.5-inch dropper wire. The Superline EWG is considered the gold standard in high-performance wide-gap hook designs; this option features our Superline EWG 744XX series hooks. The premium Gamakatsu swivel completes each rig to prevent line twists. Simply add the desired weight to the dropper wire then bend the end of the shaft with a pair of needle nose pliers to secure in place. *Page 68.*

Power Drop Superline Round Bend

The Power Drop series is uniquely built around a solid ring that connects the premium hook, swivel and a 3.5-inch dropper wire. The Superline Offset Round option offers a larger bite area that's perfect for any worm presentation. It features the Superline Round Bend 3984XX series hooks. The premium Gamakatsu swivel completes each rig to prevent line twists. Simply add the desired weight to the dropper wire then bend the end of the shaft with a pair of needle nose pliers to secure in place. *Page 69.*

Power Drop w/ Hybrid Worm

The Power Drop series is uniquely built around a solid ring that connects the premium hook, swivel and a 3.5-inch dropper wire. The G-Finesse Hybrid Worm's unique feature here is the distinctive acute hook angle, designed to align baits perfectly. It features the G-Finesse Hybrid Worm 3622XX series hooks. The premium Gamakatsu swivel completes each rig to prevent line twists. Simply add the desired weight to the dropper wire then bend the end of the shaft with a pair of needle nose pliers to secure in place. *Page 79.*

Tungsten Hybrid Swing Head

With a head design that unites the benefits of both a cobra head, for passing through grass, and a football head, for snag resistance on a hard bottom, the Tungsten Hybrid Swing Head creates a natural looking, slithering action that draws major attention from nearby bass. Ideal for slow swimming retrieves, the head increases the action of any plastic bait along the bottom. The precision wire harness is tuned to exacting tolerances and a recessed line tie helps it stay weedless. For easy identification the weight size is stamped into the side of each weight. *Page 78.*

G-Shield Tungsten Worm Weight

The G-Shield Tungsten Worm Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The worm weight is the all-purpose champ, best for casting into light cover or dragging plastics across bare lake and river bottoms when subtlety is essential and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight. *Page 94.*

G-Shield Tungsten Flipping Weight

The G-Shield Tungsten Flipping Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The flipping weight is slightly wider and excels when flipped or pitched into heavy cover and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight. *Page 94.*

G-Shield Tungsten Punch Weight

The G-Shield Tungsten Punch Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The punch weight will penetrate thick overhead canopies that resist other shapes. It's bulbous at the front, creating a weight-forward design that builds inertia when it first contacts likely bass-holding cover and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight. *Page 94.*

Kraken Circle Monster

The Kraken Circle Monster was developed for use with larger chunk baits and provides the strength and size to target giant fish. The circle hook is a time-tested and proven design, and the wide gap ensures reliable hook-ups even with the largest jawed fish. Their monster-sized eye provides anglers a range of rigging options including heavy tuna cord, mono, fluoro and even wire. The straight eye design offers the option of snelling or crimping. *Page 100.*

Kraken Outbarb Circle

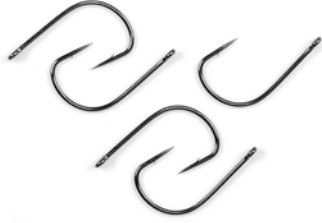

The Kraken Outbarb Circle's distinctive outside barb provides several advantages when targeting giant sized fish. One is straight holding power, because the outbarb cannot back out like a traditional barbed hook, and hook damage typically occurs on the opposite side of the hook, further reducing potential pull-out. Another is better, easier penetration because the barb is opposite the side of the hook doing most of the work. It's also less likely anglers' line will catch on the barb if it wraps around the hook on the drop or cast. *Page 100.*

2023 NEW PRODUCTS

S25S Trout Stinger

S25S Trout Stinger Fly Hook is an incredible offering for fly anglers tying and presenting flies with a straight eye. Built with durability, sharpness and presentation in mind, the S25S is ideal for various patterns, including streamers, large nymphs and bead heads to name a few. The no-shine black finish blends into most designs, drawing attention to the fly and not the hook. *Page 125.*

Double Down Spring Lock

The Double Down Spring Lock features not one but two retaining wires wound in parallel, so soft plastics stay rigged as intended. Add the simple-to-rig double wire rig to a favorite Gamakatsu hook and holding power is maximized. Simply twist on your favorite soft plastic bait and know that it will stay locked on allowing it to run straight and true cast after cast. *Page 134.*

Hybrid Duffel Backpack 110L

Gamakatsu's water-resistant Hybrid Duffel Backpack offers 110 liters of space to take gear wherever anglers may roam. The innovative pack can be carried in three different ways, thanks to the removable backpack straps, shoulder strap, or side-carrying handle. The main opening provides easy access to the pack's contents. The large, zippered internal pocket and zippered mesh pocket inside the main compartment opening keeps everything organized. The exterior zippered storage pocket and MOLLE-type webbing for attaching and securing gear further add to the organizing potential. The pack folds into itself for compact storage when not in use. *Page 147.*

Rolling Gear Duffel 90L

For those that prefer to roll along, Gamakatsu offers the Rolling Gear Duffel. The pair of sturdy wheels allow for easy transport of 90 liters of belongings. When anglers decide to pick it up, use the adjustable, removable padded shoulder strap or padded handles to carry in comfort. An external zippered pocket and a large inner zippered pocket keep things tidy. Water-resistant construction keeps the elements at bay, so anglers won't have to worry about rain clouds or rough boat rides. A convenient carrying case allows compact storage when anglers are not on the road or at the lake. *Page 147.*

Gear Duffel 30L

When anglers don't have a ton of stuff to tote around, Gamakatsu's water-resistant 30-liter Gear Duffel would be the best to pack up. The large main opening is secured with heavy-duty zippers for easy access, with an external zippered pocket that keeps oft-needed items at the ready. A separate, outer zippered access compartment for dirty clothes or gear keeps anglers clean stuff clean. An adjustable, padded removable shoulder strap lets anglers carry stuff hands-free, though the hook and loop fastener on the main carrying handles works as well. *Page 147.*

G-Bag EWM 5000 H Tackle Bag

The G-Bag EWM 5000 H Tackle Bag features an Extra Wide Mouth (EWM) opening for easy access. An internal wire frame keeps the main compartment in the open position allowing anglers to sort through their tackle and find that perfect bait with ease. Anglers can fit up to five Gamakatsu G-Box 3700 or eight 3600 utility cases inside. A quick-access magnetic front pocket flap also stays in an open position, letting anglers effortlessly grab often needed items from the handy pocket. The durable, 1680 denier polyester construction stands up to a rough life on the water, with a water- and slip-resistant EVA molded base that protects the contents against moisture. *Page 144.*

G-Bag EWM 300 Tackle Bag

The G-Bag EWM 300 is the largest size in the lineup and is designed to carry a variety of tackle comfortably, thanks to the adjustable, padded removable shoulder strap. The generous 13 x 8.5 x 11-inch bag lets anglers stockpile all of their finesse baits and power fishing lures in the same place so they can be prepared for anything. Stuff up to four Gamakatsu G-Box 3600 or eight 3200 utility cases into the G-Bag EWM 300 using the innovative Extra Wide Mouth opening. *Page 144.*

Fishing Pliers 9" 45 Degree

Gamakatsu introduces the longest-length pliers to join the lineup, the 9-inch pliers. These pliers are similar to the popular 6 and 7-inch pliers, but Gamakatsu added a 45-degree angle to provide a comfortable position for various tasks. Say goodbye to awkward angles and hello to an ergonomic, reliable tool. The precision split ring feature on the needle nose tool makes changing or replacing split rings easy. The multi-tasking jaws on the pliers utilize an outside cutter and are able to cut braid, mono or fluorocarbon, and also feature a PTFE coating to aid against corrosion and rust. The handles feature a non-slip grip that helps you hold on during wet conditions. Included is a lanyard and sheath so the pliers are right where you need them. *Page 150*

EDC Knife GMKT2

Gamakatsu introduces their new series of Every Day Carry (EDC) Knives. The most carry-friendly Gamakatsu knife is the GMKT2 EDC knife at 2.75-inches. This knife has a drop point blade, a two-toned satin finish, and a plain edge. The handle material is stainless steel with an attractive blue-wash finish. Features a tough, highly wear resistant D2 high-carbon tool steel constructed blade with excellent edge retention. The custom-designed GMKT2 utilizes an assisted opening action with flipper mechanism for fast and easy opening. *Page 154.*

EDC Knife GMKT1

The GMKT1 EDC knife is 3.25-inches, sports a drop point blade with a plain edge, stonewash finish, and a black-wash stainless steel handle. The blade is constructed of D2 high-carbon tool steel that is very wear resistant and offers excellent edge retention. The custom-designed GMKT1 is comfortable to hold and the black wash finish on the handle hides hard use scratches for years of everyday use. The assisted opening action with flipper mechanism allows for fast and easy opening every time. *Page 154.*

EDC Knife GMKT4

The GMKT4 features a 3.5-inch Tanto style blade made from D2 high-carbon tool steel, with a black oxide finish and a plain edge. It features a G10/carbon fiber overlay and black oxide steel handle that's extremely strong but light in weight. The custom-designed GMKT4 features an assisted opening action with flipper mechanism so it's ready for action for any task. *Page 154.*

EDC Knife GMKT3

The largest EDC knife in the lineup is the GMKT3, it has a 3.625-inch stonewash finish blade that is partially serrated, combining the advantages of the plain edge with those of a serrated edge for the best of both worlds. It features a G10 front handle scale and stonewash black steel back handle. The custom-designed GMKT3 features an assisted opening action with flipper mechanism. The blade is constructed of D2 high-carbon tool steel that offers excellent edge retention and is very wear resistant. *Page 155.*

2023 NEW PRODUCTS

6" Fillet Knife GMKT6F

The 6" Gamakatsu fillet knife is the smallest size in the lineup and is designed for precise handling in smaller fish. The custom-designed fillet knife features the G-Grip handle for ultimate handling and non-slip performance. The blade features a DLC coating and provides anglers with premium performance, offering high wear resistance, reduced friction and enhanced hardness. The included blade protector keeps the edge protected when the knife is stored. *Page 155.*

7" Fillet Knife with Spoon GMKT7FS

The 7" Gamakatsu fillet knife with spoon is designed for fast work of bloodline removal, thanks to the integrated stainless-steel spoon. The custom-designed fillet knife features the G-Grip handle designed for ultimate handling and non-slip performance. The DLC coating on the blade provides anglers with premium performance, offering high wear resistance, reduced friction and enhanced hardness. The included blade protector keeps the edge protected when the knife is stored. *Page 155.*

Fillet Knife 7.5"

The 7.5" Gamakatsu fillet knife is the middle size in the lineup and is designed to be more flexible, thanks to the thin profile blade. This is the perfect size for a large variety of fish. The custom-designed fillet knife features the G-Grip handle that is extremely comfortable during extended use and offers non-slip performance and handling. The Diamond-Like Carbon (DLC) coating on the blade provides anglers with premium performance, offering high wear resistance, reduced friction and enhanced hardness. The included blade protector keeps the edge protected when the knife is stored. *Page 156.*

Fillet Knife 9"

The 9" Gamakatsu curved fillet knife is the largest blade in the lineup and is the perfect size for larger freshwater fish, saltwater fish and a wide variety of game. The custom-designed fillet knife features the G-Grip handle that is extremely comfortable during extended use and offers non-slip performance. The blade features a DLC finish and provides anglers with premium performance, offering high wear resistance, reduced friction and enhanced hardness. The included blade protector keeps the edge protected when the knife is stored. *Page 156.*

HISTORY OF GAMAKATSU

Invention of hooks

20,000 years ago, the invention of the fish hook marked the beginning of sport fishing. The first hooks were made of wood or bones. As technology improved, so did the hooks. Records show that copper hooks were made in Banchen 7,000 years ago and artificial flies were used in Egypt 4,000 years ago. Fishing was also a popular form of entertainment in ancient China.

Today, modern materials and manufacturing techniques have resulted in hundreds of styles of extremely high quality hooks, designed for specific types of fish and fishing methods.

Quality of hooks

Gamakatsu hooks are the corner stone of the Gamakatsu company, and are famous worldwide. Material and technology are what makes these hooks superior to all other brands. The Gamakatsu company, in conjunction with a material manufacturer, developed a material known as High Carbon steel specifically for the manufacture of fish hooks. This material not only contains a higher percentage of carbon, but also has very few impurities. As a result, GAMAKATSU has earned Anglers' trust throughout the world. The life of a fish hook is measured by the sharpness, hardness, and viscosity of the point. Using low quality materials results in points that are weak and not truly sharp. In order to use High Carbon steel, Gamakatsu developed a unique electronic tempering process which enables hooks to be tempered in a stable condition. As a result, Gamakatsu is able to manufacture consistently high quality, extremely sharp hooks in large quantities.

Hook producing

The methods used in creating Gamakatsu hooks is what makes it so superior to all other brands. First, only the most premium grade of high carbon steel is used. This insures against any blemishes in the metal which can weaken the hook.

Secondly, Gamakatsu has the most advanced tempering system in the world. Every hook is heated to the exact temperature that is perfect for that particular style and size then cooled in oil. This process produces hooks which are super strong, but not brittle. It is extremely difficult to achieve a balance between strength and flexibility, and it took many years for Gamakatsu to perfect this process.

Finally, and perhaps most importantly, our sharpening process is the most modern in the world, and results in a perfectly conical point that is unequalled in sharpness.

Simply the best

Gamakatsu's dedication to producing the highest quality fish hook made, as well as the innovation they bring to the industry has kept the company at the forefront of the premium hook market. Among the innovative ideas that Gamakatsu has introduced are:

- **Durability** - A unique tempering process allowing us to make a hook of superior strength and durability.
- **Strength** - Hooks made of high carbon steel for superior strength.
- **Sharpness** - Conically needle honed points that are sharp from the package and stay sharp.
- **Color Variation** - Colored hooks in red, blue, green, gold, nickel, Bronze, black, shrimp and fluorescent colors F-red, F-chartreuse, F-pink, F-orange, F-glow, F-green, F-purple to match the color of your lure or bait.
- **Style Variation** - Innovative hook designs like the extra wide gap (EWG) that hook and hold fish better.

Gamakatsu makes a hook for any and every fishing situation. So go ahead, tie on a Gamakatsu because it is "Simply the best!"

HISTORY OF GAMAKATSU

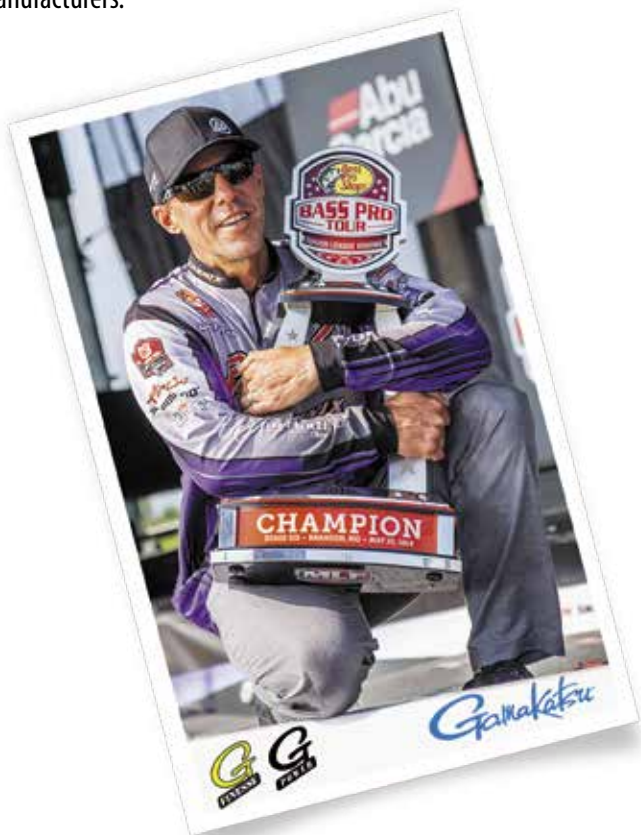

Gamakatsu started producing fish hooks in 1955. At that time, they were the smallest hook manufacturer in Japan and all of their hooks were made by hand. In 1963 they introduced a new automated heating facility which catapulted them to the forefront of the Japanese market. In 1974, they introduced fully automated hook making machines and found it necessary to build a second factory in order to meet the demand they had created.

In 1976, being well established as the leading Japanese hook manufacturer, Gamakatsu started building a new factory to produce high quality fishing rods for the Japanese market.

After upgrading the hook manufacturing machines in 1986, they expanded their product line. As a result, Gamakatsu Co. Ltd became a major manufacturer with a full line of high quality fishing rods, hooks, apparel, and fishing related items by 1987.

In 1988, after upgrading the automated tempering facilities and expanding the hook factory, Gamakatsu Co. Ltd opened Gamakatsu International Co., Ltd. in Thailand and Gamakatsu Shantou Co. Ltd. in China in 1989.

When anglers purchase Gamakatsu hooks, they are buying an original product made by GAMAKATSU. Many hook suppliers are using fabricated Japanese sounding names bought from several different manufacturers.

Market Leader GAMAKATSU

Gamakatsu is the leading fish hook manufacturer in Japan. They are constantly testing new materials, trying to improve their product which already sets the standard for the rest of the industry.

In 1992 Gamakatsu USA Inc. was established to provide Gamakatsu brand hooks to the U.S. market. Obviously, Gamakatsu is well on it's way of achieving their goal of becoming the market leader in the USA and the world!

Environment has our attention

Since 1955, Gamakatsu has strictly stuck to the theme of "Nature and Technology". We work hard to develop new, hi-tech products that benefit the outdoorsman without adversely effecting the environment.

Gamakatsu's policy of technical development has always been "the best of quality". We are always searching for new ways to make our existing products better in addition to constantly looking for unique products which are not yet available. We believe that only this attitude can give our customers the best they deserve!

All over the world

Gamakatsu products are used worldwide. With offices located around the world, Gamakatsu is able to research its markets and develop unique products that meet the needs of even the most demanding anglers.

Remembering Aaron Martens

Aaron Marten's history with Gamakatsu began over 30 years ago. At age 16 Aaron began split-shotting with Gamakatsu hooks he acquired from Japan. Since that time Gamakatsu enjoyed a special relationship with one of the most talented and beloved anglers the sport has ever known. Aaron's spirit lives on as we remember our friend and honor his legacy.

*Gamakatsu continues to forge new paths by combining exciting new hook designs with industry-leading technology. The Gamakatsu **G-Finesse** and **G-Power** hooks are a perfect example of the brand's commitment to innovation.*

*The **G-Series** is a result of endless hours of product testing from some of the world's leading pro anglers. Every hook in this premium line was designed with a specific application, utilizing critical input from our professional fishing team. As a result, not only are these hooks, sharper, stronger and more durable, but they also create pro-type fishing advantages as seen in an increase in hook-ups, fewer lost fish, and overall superior fishability.*

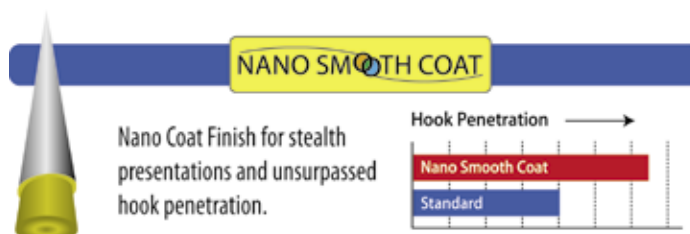

The G-Finesse hooks are designed for technical and finesse fishing applications whereas the G-Power hooks are better suited for heavy cover and power techniques. Both G-Finesse and G-Power feature Tournament Grade Wire and Nano Smooth Coating.

Hook a few thousand bass a year and you know what works and what doesn't. That's exactly what Gamakatsu's pro team does year-in and year-out. Every cast, every hookset can be a game-changer... and that was the genesis of the **G-Series**. Designed and tested by bass fishing's top pro's, **G-Series** takes hook design, "sharp" and "strong" to new and unimagined levels of excellence. The top professionals' livelihoods depend on being the best and using the best equipment available and with G-Series, they have the competitive edge.

Gamakatsu's long held the reputation as the sharpest hooks on the water and the **G-Series** takes that to a whole new level. Using an ultra-strong material called **TGW (Tournament Grade Wire)**, that's thinner, stronger and sharper, Gamakatsu has been able to achieve what no other hook company has, the world's most effective fishing hooks.

But TGW is only part of the **G-Series** story. Gamakatsu's exclusive **Nano Smooth Coat** finish reduces resistance for superior penetration. A slicker, faster penetrating hook surface enhances the design and material attributes of the **G-Series**.

G-Series is more than an innovative, revolutionary, new hook material and finish. Gamakatsu's exclusive, proprietary design makes these singularly unique hooks even better!

G-FINESSE

SpaMakatsu[®]

G-FINESSE BY AARON MARTENS

G-Finesse... A Ground-Breaking Achievement In Hook Design

Gamakatsu entered the market on the promise of the sharpest hooks produced. It was Gamakatsu that created the "super sharp" hook category and continues to add new application-specific hooks to its offering every year.

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. Gamakatsu's New G-Finesse Series combine Ultra Sharp Tournament Grade Wire with Nano Smooth Technology for the ultimate in hook penetration. This new technology will take my finesse fishing to a whole new level". ~ Aaron Martens

G-Finesse Heavy Cover Worm

Aaron Martens Signature G-Finesse Heavy Cover Worm hook does what others can't. Extreme versatility.

Martens says it best, "This hook let's me do so much, easily the most versatile soft plastics hook on the market".

Featuring Aaron's custom designed keeper that holds plastics tight for endless casts without rips or tears. The rock solid keeper is made of non-corrosive tin, not plastic or lead, so it won't wear out or add unwanted weight. Like all G-Finesse hooks, tournament grade wire and Nano Smooth Coat finish perfect the design.

Available in sizes 2, 1, 1/0, 2/0, 3/0, 4/0.

G-Finesse Treble Hook

Thinner, Stronger, Sharper, Better. Gamakatsu continues to expand its ground-breaking G-Finesse series hooks with the G-Finesse Treble Hook. Designed by Tournament pro, Aaron Martens, the G-Finesse Treble redefines "sharp" and "effective".

Gamakatsu's G-Finesse Treble Hook is patterned after traditional O'Shaughnessy style hooks. Aaron has long been a proponent of the O'Shaughnessy hook style with its distinctive acute angle at the bottom of the hook. Martens believes the addition of the O'Shaughnessy bend, hooks and holds fish better than round bend designs. He should know, a past B.A.S.S. Angler of the Year, had three second place finishes in Bassmaster's Classics and is always in the hunt on the pro tours. When you fish as much as Aaron does, small details make a big difference. *The G-Finesse Treble Hooks is available in sizes 6,5,4,3,2, 1, 1/0. Nano Smooth Coat finish.*

G-Finesse Treble Hook MH Hook

G-Finesse for big, tough fish that live in the heaviest cover. Aaron Martens frequently chases them and he asked us for medium heavy G-Finesse treble to meet those needs.

We answered. The new G-Finesse Treble MH features a tougher medium heavy, tournament grade wire for additional strength. The same Nano Smooth Coat finish and short shank promote instant hook penetration. Available in Sizes 6, 5, 4, 3, 2, 1, 1/0.

G-Finesse Drop Shot Hook

Martens has been instrumental in the development of Gamakatsu's new G-Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's new G-Finesse series is a giant leap forward in fishing hook technology.

G-Finesse Feathered Treble MH

Based largely on the input of Major League Fishing pro Aaron Martens, the G-Finesse feathered trebles feature either white or chartreuse premium feathers and complementary tinsel, hand selected by Martens to tempt even the most finicky fish. The G-Finesse feathered trebles feature TGW (Tournament-Grade Wire) construction, which is thinner, stronger and sharper than the standard wire. That means anglers will use fewer of them while ensuring better hook up percentages as the fishing day goes. To complete the job, they come with a Nano-Coat finish that makes penetration even easier. Sizes 6, 4, 2, 1, 1/0

NEW

Martens has been instrumental in the development of Gamakatsu's G-Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's G-Finesse series is a giant leap forward in fishing hook technology. "The G-Finesse Drop Shot Hook is like Gamakatsu's standard Drop Shot Hook except that I had them pull the point more towards the eye to open up the gap. Also, the hook wire, called TGW (Tournament Grade Wire) is a smaller diameter, but just as strong as their other hooks." Gamakatsu's G-Finesse Drop Shot Hooks are available in sizes, 2, 1, 1/0 and 2/0. Nano Smooth Coat finish.

G-FINESSE BY SHINICHI FUKAE

G-Finesse Swivel Shot

Drop-shot fishing for bass is nothing new but Gamakatsu's approach to it is. Our Swivel Shot eliminates line twist that's commonly associated with drop shotting and vastly improves rigging efficiency. Gamakatsu's produced a revolutionary "Twist Free" design using a premium swivel above the hook. The hook, a super-sharp Gamakatsu offset point Octopus hook, is strong enough to winch big bass out of slop --- another unique attribute of their Swivel Shot system. The Easy-Change weight system below the hook improves rigging efficiency and easy leader length adjustments without retying your rig. Pro Shinichi Fukae was instrumental in the development and testing of Gamakatsu's Swivel Shot and shared that it has been an essential element in his tournament success. Without a doubt, the Swivel Shot is an enormous leap forward in drop shot fishing that's sure to maximize angler's efficiency, increase hook-ups and land trophy-sized bass without the worry posed by conventional drop shot hooks and rigging.

Available in NS Black. Sizes: 2 - 3/0

G-Finesse Swivel Shot Drop Shot

The original G-Finesse Swivel Shot changed the game and professional anglers were eager to play. Some, like Shin Fukae, recognized the G-Finesse advantage but didn't want to break from tradition entirely. The G-Finesse Swivel Shot Drop Shot features our top of the line Tournament Grade Wire Drop Shot hook. Both the hook and swivel system feature the benefits of a Nano Smooth Coat finish. *Available in sizes 2, 1, 1/0 and 2/0.*

G-Finesse Swivel Shot Worm

This design is the origination of a revolutionary new technique made possible by Gamakatsu's industry-changing G-Finesse series. Pro Staff Shinichi Fukae spent the over a year perfecting the concept and proving its power. We've combined our G-Finesse Worm Light w/ Tin Keeper hook with the G-Finesse Swivel Shot System to create the Swivel Shot Worm. Unique in form, function and finesse. Texas Rig the Swivel Shot Worm to be fished in and around cover. The light wire allows for threading extremely small diameter worms, held firmly in place by the near weightless, tin keeper. The hook also features our unique Nano Smooth Coat Finish. Adding the "twist-free" advantage of the Swivel Shot allows super fast rigging without tangles. You can be assured the presentation is always perfect, and that translates into more strikes and more bent rods.

Available in sizes 1, 1/0, 2/0. Nano Smooth Coat finish.

Shinichi Fukae

G-Finesse Tricky Head.

From the master finesse magician himself, Shin Fukae, comes the Tricky Head jig head. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it. *Available in black or plain lead, in sizes 1/16, 3/32, 1/8 or 3/16 oz.*

G-Finesse Weedless Wacky

Gamakatsu's Tournament-winning Pro Staffer, Shinichi Fukae, never rests. He worked tirelessly with Gamakatsu's engineers to develop the G-Finesse Weedless Wacky hook. Look closely and you'll see, it's not an ordinary weedless design. The weed guards are not plastic, they're titanium wire—solidly encased and directly molded to the hook shank. They won't come loose and they don't vibrate or add resistance. The extremely thin gauge wire retains its shape, yet is flexible enough to compress with even the gentlest nibbles. Bass won't feel a thing, until of course, the precision sharpened Gamakatsu hook does its job. The G-Finesse Weedless Wacky hook features Gamakatsu's exclusive Nano Smooth Coat finish to add stealth and reduce friction for effortless hook penetration. The hook itself features Tournament Grade Wire (TGW) that is a smaller diameter, yet stronger, than other Drop Shot hooks. *Available in sizes 2, 1, 1/0, 2/0 and 3/0*

G-Finesse Worm Light with Tin Keeper

When conditions require finesse, the pros use G-Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G-Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective. *Available in sizes 1, 1/0, and 2/0, all with Nano Smooth Coat Finish.*

G-Finesse Cover Neko

By combining Gamakatsu's legendary quality and the design of Major League Fishing pro Shin Fukae, the perfect Neko hook now exists for this popular technique. The Cover Neko Hook consists of a shiner-style straight eye hook with an attached swivel to prevent line twist. There's also a strong, 90-degree wire keeper to lock plastics in place. Taken together, it's a tool that will let anglers easily fish through brush, laydowns and grass while maximizing hook-up percentages. *Available in sizes 1, 1/0 and 2/0.*

G-FINESSE BY SHINICHI FUKAE continued.

G-Finesse Gamakatsu Tournament Snap

Gamakatsu's Tournament Snap is better by design. Primarily used on plugs for bass, walleye, salmon, stripers, steelhead, trout, panfish and other species, Gamakatsu's Tournament Snap is stainless steel and enables a full range of movement, enhancing the effectiveness of whatever plug is used. Better yet, and unlike other plug snaps, Gamakatsu's Tournament Snap will not accidentally open. The clever design of the Tournament Snap stays closed at all times as the plug eye is threaded onto the snap. It's easy and effective! Tested extensively and used under rigorous tournament conditions. *Gamakatsu's Tournament Snaps are available in two sizes, (M) Medium and (L) Large.*

G-Finesse Jig Head Wacky

Gamakatsu's Jig Head Wacky is a vast improvement over other wacky jigs. The nickel/titanium weed guard is the first indication that Gamakatsu's raised the bass fishing bar. This weed guard is small but mighty as it effectively clears hazards yet maintains its shape and rigidity under the most demanding use. The jig head is an improvement as well. Better designed to resist snags the hook eye is recessed to prevent getting hung-up in structure. Even the hook is different, a custom addition that's based on a shiner hook but modified for the Jig Head Wacky. The result is a much higher ratio of hook-ups and landed fish than any other comparable brand. *Available in Black and Green Pumpkin. Sizes: 1/0-1/16, 1/0-3/32, 1/0-1/8, 1/0-3/16*

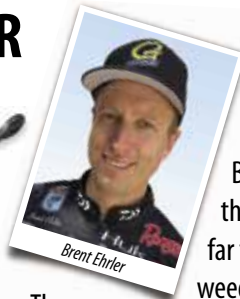

G-FINESSE BY BRENT EHRLER

G-Finesse Stinger

Tournament pro and Gamakatsu pro staff, Brent Ehrler, developed and fine-tuned the G-Finesse

Stinger for use with the popular Neko and Wacky rig techniques. The G-Finesse Stinger follows in the footsteps of similar, game-changing G-Finesse hooks engineered by Gamakatsu. It features Tournament Grade Wire (TGW) which is thinner and stronger than anything else on the market, and an application of Nano Smooth Coat to decrease penetration resistance. This hook can be perfectly positioned exactly where you want it, and even moved, without damaging the bait. When the bite is tough, G-Finesse opens new ways to stick it to'em. *Available in size 6 through 1/0.*

G-Finesse Weedless Stinger

We heard from pro staff, Brent Ehrler, and many others, that anglers were spending far too much time tying custom weed guards with wire or heavy monofilament on their Neko rigs... because they couldn't find the right finesse hook with the right weed guard already attached. Problem solved! The G-Finesse Stinger Weedless is just what the tournament trail needed. Titanium wire weed guard, Nano Smooth Coat and Tournament Grade Wire. *Available in size 6 through 1/0.*

G-FINESSE BY MIKE MCCLELLAND

Mike McClelland Inspired G-Finesse Hybrid Worm

The G-Finesse Hybrid Worm is the brainchild of pro-staffer; Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic.

Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new

acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself. *The G-Finesse Hybrid Worm is available in sizes 1/0 to 8/0.*

G-FINESSE BY AARON MARTENS

"Over my entire career fishing Gamakatsu I envisioned making the best finesse hook in the world. **Gamakatsu's G-Finesse Series combine Ultra Sharp Tournament Grade Wire with Nano Smooth Technology for the ultimate in hook penetration.** This technology will take my finesse fishing to a whole new level." ~ Aaron Martens

G-Finesse Drop Shot

Martens has been instrumental in the development of Gamakatsu's G-Finesse Drop Shot Hook. Completely "pro-designed", Gamakatsu's new G-Finesse series is a giant leap forward in fishing hook technology.

G-Finesse Tricky Head

From the master finesse magician himself, Shin Fukae, comes the Tricky Head jig head. Designed to be fished with the popular shaky head technique, it brings several additional advantages to the tackle box. The Tricky Head is snag free. The weighted lead head is uniquely shaped to remain vertical during presentation, allowing the jig to bounce in and around structure while the worm or swimbait is held firmly in place by a lockdown tin keeper. You've got to see it to believe it. Available in black or plain lead.

SIZES		3/0-1/16	3/0-3/32	3/0-1/8	3/0-3/16

- A. Weedless Keel shape design glides effortlessly over and through structure
- B. Lock Down Keeper won't tear finesse plastics. Rig straight and secure every time

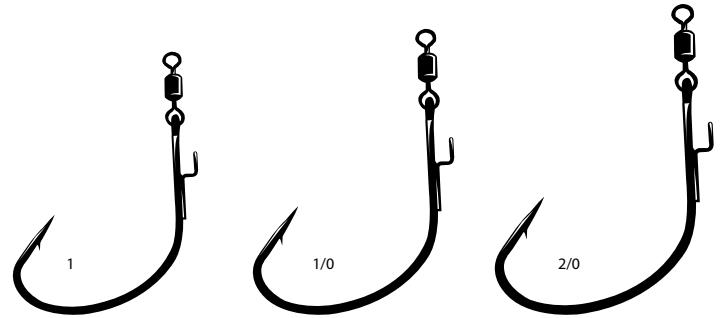

G-FINESSE BY SHINICHI FUKAE

G-Finesse Cover Neko

By combining Gamakatsu's legendary quality and the design of Major League Fishing pro Shin Fukae, the perfect Neko hook now exists for this popular technique. The Cover Neko Hook consists of a shiner-style straight eye hook with an attached swivel to prevent line twist. There's also a strong, 90-degree wire keeper to lock plastics in place. Taken together, it's a tool that will let anglers easily fish through brush, laydowns and grass while maximizing hook-up percentages.

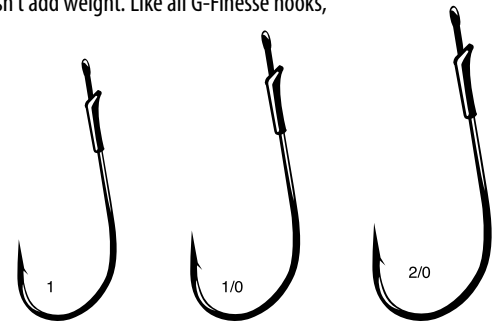

SIZES	1	1/0	2/0
NS Black	LS 423410(3)	423411(3)	423412(3)

G-Finesse Worm Light with Tin Keeper

When conditions require finesse, the pros use G-Finesse Worm Light hooks. The light wire allows for threading of extremely small diameter worms with ease. Even the most fragile plastics are less likely to tear, saving on baits and increasing fishing time. The non-corrosive tin keeper doesn't add weight. Like all G-Finesse hooks, the Worm Light hook penetrates with significantly less force making them substantially more effective.

SIZES	1	1/0	2/0
Nano Smooth Coat	LS 358210(4)	358211(4)	358212(4)

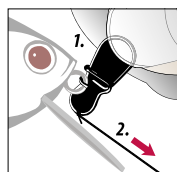

G-Finesse Tournament Snap

SIZES	Medium (60 lb.)	Large (80 lb.)
LS	333000-M(10)	333000-L(10)

Tournament Snap design intensifies the lures swimming action

High quality stress relieved stainless steel.

1. TWIST & CLICK - Hook the open end of the Tournament Snap inside the lure eye. Twist and click into place.

2. PULL - Keep you line tight and pull at a 90 degree angle away from the lure to finish setting.

G-FINESSE BY MIKE MCCLELLAND

Gamakatsu Hybrid Worm is the definitive choice for all of my soft plastic rigs on tour. The unique hybrid design helps me hook and land more fish than ever before. When combined with Tournament Grade Wire and Nano Smooth Coat technology, Hybrid Worm is the ultimate fish catching machine.

~ Mike McClelland

G-Finesse Hybrid Worm

The G-Finesse Hybrid Worm is the brainchild of pro-staffer; Mike McClelland. He's spent more than a few hours on the water, competing in over 234 tournaments, including 10 times at the Bassmaster Classic. Mike knows the subtleties of rigging worms and soft plastic like no one else, so he and Gamakatsu's designers combined the best of his current favorite Gamakatsu worm hook and incorporated a distinctive new acute hook angle to keep baits aligned perfectly straight. Hence, the "Hybrid" name. The Nano Smooth Coat finish makes it easy to thread the thinnest finesse baits or the fattest Senkos with ease. Add industry-changing Tournament Grade Wire (TGW) to the package and things couldn't be more perfect. Take our word for it, or better yet, fish it yourself.

Tournament Grade Wire

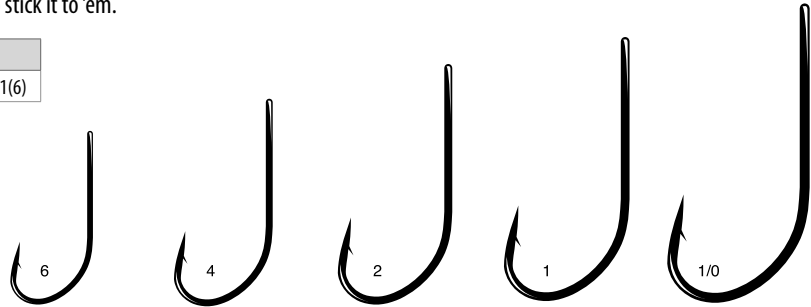

G-FINESSE BY BRENT EHRLER

G-Finesse Stinger

Tournament pro and Gamakatsu pro staff, Brent Ehrler, developed and fine-tuned the G-Finesse Stinger for use with the popular Neko and Wacky rig techniques. The G-Finesse Stinger follows in the footsteps of similar, game-changing G-Finesse hooks engineered by Gamakatsu. It features Tournament Grade Wire (TGW) which is thinner and stronger than anything else on the market, and an application of Nano Smooth Coat to decrease penetration resistance. This hook can be perfectly positioned exactly where you want it, and even moved, without damaging the bait. When the bite is tough, G-Finesse opens new ways to stick it to 'em.

G-Finesse Weedless Stinger

We heard from pro staff, Brent Ehrler, and many others, that anglers were spending far too much time tying custom weed guards with wire or heavy monofilament on their Neko rigs... because they couldn't find the right finesse hook with the right weed guard already attached. Problem solved! The G-Finesse Weedless Stinger is just what the tournament trail needed. Titanium wire weed guard, Nano Smooth Coat and Tournament Grade Wire.

G-POWER

SpaMakatsu[®]

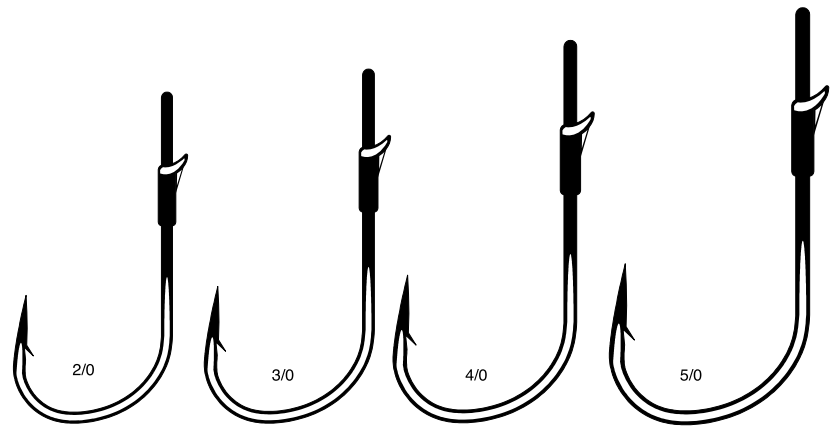

G-POWER BY AARON MARTENS

G-Power Heavy Cover Flip and Punch

Designed by Aaron Martens, Gamakatsu has developed the new G-Power Heavy Cover Flip and Punch Hook. A step up from the G-Finesse Heavy Cover Hook, for serious flipping and punching with Heavy fluorocarbon and braid. The TGW (Tournament Grade Wire) hook, paired with its welded eye, make this the strongest Heavy Cover hook in Gamakatsu's G-Series lineup. Ideal for larger baits and weights, punching through grass mats and flipping into heavy timber. G-Power Flip and Punch ideally matches to all types of cover and able to withstand extreme conditions.

SIZES	2/0	3/0	4/0	5/0

G-Power Stinger Trailer

The new G-Power Stinger Trailer Hook brilliance comes from Gamakatsu's famous B10S series of fly hooks and the expertise of Professional Bass angler Aaron Martens. The Stinger Trailer has a strategically designed eye angle. This allows the hook to run straight through the water column at any retrieve speed which produces more hookups. To make this stinger hook even more efficient, Gamakatsu paired it with a silicone stopper to be placed just above the eye, preventing the hook from sliding over the barb of the main hook. Featuring Tournament Grade Wire, Nano Smooth Coat finish and the new silicone stopper, the G-Power Stinger Trailer Hook is a game-changer.

TREBLE HOOKS

Spawkaatsu[®]

Treble SP Medium Heavy Hypershield

The Treble SP Medium Heavy Hypershield features TGW (Tournament Grade Wire) which is thinner, stronger and sharper than standard wire. Hypershield coating dramatically increases corrosion resistance allowing anglers to spend more time fishing and less time changing out old rusty hooks. Hypershield also keeps hooks sharper longer, making it the perfect treble hook for big, toothy fish. The Treble SP MH is paired with the iconic ME (Magic Eye), making it extremely simple to replace existing hooks on to any split ring of a crankbait or plug.

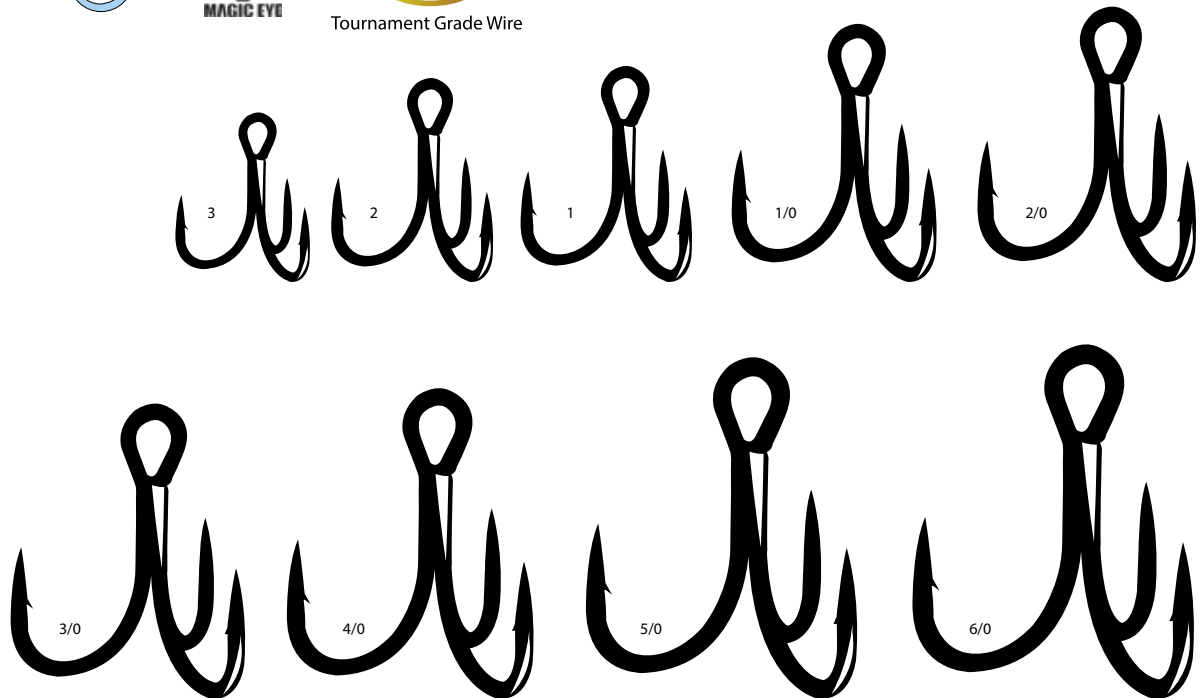

SIZES		6	4	2	1	1/0	2/0
Hyper Shield	LS	390807(6)	390808(6)	390809(5)	390810(5)	390811(4)	390812(4)

Treble SP XH

Replacing factory hooks on inshore plugs, jigs and spoons with Gamakatsu's heavy-duty SP XH treble hooks is an instant upgrade. The Tournament Grade Wire (TGW) construction is thinner, stronger and sharper than standard wire, making these Gamakatsu's strongest treble ever. Plus, the short shank design eliminates leverage that can lead to worn jaws and pulled hooks.

Treble EWG, Short Shank, (Magic Eye)

For crankbaits of all types --- there's nothing better --- it's the perfect replacement hook. First, we opened the points of this treble up slightly for even better hooking performance. The Short Shank EWG Treble converts those fish that slash at your bait into sure hook-ups. The shorter shank and wide gap design provides less room for fish to throw the hook. In fact, this attribute actually wedges the fish between the hook and the crankbait...it's the ultimate in fish holding, which means fish landing performance. That's not all. It also features Gamakatsu's exclusive "Magic Eye" that makes changing hooks a breeze. The hook's inline points run parallel to the bait creating a perfect balance point so your crankbaits run true.

TGW OCTOPUS

The TGW (Tournament Grade Wire) Octopus utilizes Gamakatsu's ultra-strong TGW wire that's thinner, sharper and stronger than the standard wire and ensures the hook point stays sharper, longer. This is combined with Gamakatsu's Nano Smooth Coat finish to provide a faster, deeper penetrating hook. The hook's all-purpose shape and forged construction makes it ideal for a variety of presentations. The TGW Octopus Hook also features an upturned eye to ease snelling or knotting directly to the eye.

Nano Smooth Coat	LS 424207(8)	424208(8)	424209(6)	424210(6)	424211(5)	424212(5)

Octopus Light

Gamakatsu answered the call for a fine wire Octopus hook, the Octopus Light for use in drop shot and trout fishing. Gamakatsu's Octopus Light features an offset beak point for optimal penetration with bait or plastics. The smaller diameter hook wire enhances hook penetration and is a certain advantage when fishing timid or light-biting fish.

Octopus Straight Eye

West coast anglers love salmon. Salmon love herring. Herring love to rip and tear apart when you rig them with traditional hooks. Hence, the reason we designed the Octopus Straight Eye hook. The ultra-thin, yet ultra-strong, wire slides through soft baits without damaging the tender tissue. The hook eye is narrower and smoother too, so it can slide through as well. The result is a herring with that perfect spin, followed by a chrome bright chinook or coho in the net shortly thereafter.

Octopus Circle Out Barb, 1x Strong

Will Gamakatsu's Octopus Circle "Outbarb" 1x Strong hook change angling forever? There's a strong possibility, and for good reason. Traditional hooks place the barb on the inside of the hook bend. With certain techniques, like jigging, chunk baiting, and bottom fishing, if your line becomes limp or goes slack it could get entangled by the hook barb and possibly be nicked or cut. The outbarb design eliminates that risk. But there's more. Tests have proven that when an outbarb is combined with Gamakatsu's circle hook design, it results in deeper penetration and a higher hook retention rate. Think about it: a barb on the inner side of a hook bend is somewhat protected. A barb on the outside of the hook bend will come into contact with whatever flesh it touches and prevent movement in the opposite direction from which it entered. Consistently, Gamakatsu researchers and prostaffers documented increased retention of hooked species.

Octopus Circle 4x Strong, Straight Eye (Inline-point), TOURNAMENT LEGAL

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS Black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

Big River Bait Open Eye

The reception to our Big River Bait Hook has been so strong that angler's immediately began asking for a siwash-style hook they could use on their spinners, spoons and plugs for salmon. The answer... this fast penetrating hook holds better than conventional hook designs. When fished barbless (which requires pinching the barb down) it's the best barbless hook you'll find. The unique Big River hook design locks fish in place when hooked. Forged for exceptional strength and built Gamakatsu sharp the Big River Open Eye is sure to make great lures even better.

Spawakatsu[®]

Spin Bait

Walleye anglers across the Midwest have become dependent upon the spin style hooks for walleye rigs. The Spin Bait hook can be rigged behind spinner blades, prop blades or used alone with just a simple bead in front of them. It's unique design incorporates Gamakatsu swivels that is independent of the hook, giving the hook more freedom to spin while reducing line twist. The Spin Bait hook features Nano Smooth Coat for stealth presentations and unsurpassed hook penetration and the bait keeper barbs on the shank hold live and plastic baits on more securely.

Stiletto

Gamakatsu teamed up with crappie legend Wally Marshall and his "Mr. Crappie" brand, the leading name in the crappie world, to design the Gamakatsu Mr. Crappie Premium Stiletto hooks. The Stiletto hook design is perfect for fishing live or dead bait due to its large gap for increased hook-ups and special bend with an acute angle providing better holding power, locking fish in place when hooked. The hooks are made from light, super-strong wire and are available in sizes from 6 through 1/0 for various applications.

Sticker

Gamakatsu teamed up with crappie legend Wally Marshall and his "Mr. Crappie" brand, the leading name in the crappie world, to design the Gamakatsu Mr. Crappie Premium Sticker hooks. The Sticker is a traditional Aberdeen-style hook that utilizes Gamakatsu's premium grade of high carbon steel and features a perfectly conical point unequaled in sharpness. They come in gold, red and NS black, available in sizes 4 through 1/0.

Trout Stinger

Trout Stinger Hook is an incredible offering for anglers looking for a hook with a straight eye, and a wide gap. Built with durability, and sharpness in mind, the Trout Stinger is ideal for multiple species of fish from it's namesake the freshwater Trout, all Panfish, Crappie, even small in-shore saltwater fish like Croakers, or Mullet. The no-shine black finish blends into most designs, drawing attention to the bait and not the hook.

ICE FISHING-SERIES

Gamakatsu Micro Gap hooks

Offering sport fisherman the ultimate in design, the finest quality forged steel and unparalleled workmanship. Originally designed for finesse presentations for ice fishing, the Micro Gap selections are perfectly suited to many fly tying techniques as well. The fine wire design penetrates with less pressure, lessening tissue damage allowing for easier removal in catch and release fisheries. All Micro Gap hooks are finished in NS Black.

The Micro Perfect Gap hook has an up-eye design for easy snelling and optimal gap for minnows or small plastics.

The Micro Wide Gap features a straight hook eye for minnow and soft plastics.

The Micro V Gap also features a straight hook eye, but adds a deep V bend to improve retention.

G-CARP SERIES

Gamakatsu G-Carp Hooks

We've dialed in our carp hook selection to make it the best selling line of hooks in many European countries. There's two simple points that are critical for carp – hide the hook and hold the bait. That's why we've carefully shaped all the new G-Carp hooks to hide perfectly concealed within every type of bait. Furthermore, we've included unique micro barbs to grab onto soft dough balls and putty baits and hold them in place.

All G-Carp hooks are forged for strength and feature the innovative **Nano Smooth Coat** for fast penetration.

CATFISH SERIES

Big Cat Circle

There's a new dog in the fight for cat fishermen. The Gamakatsu Big Cat Circle Hook is designed specifically for tough-lipped, thick-mouthed catfish. The offset, precision sharpened hook point penetrates quickly even with light hook sets. It features an "up eye" so snelling is fast and easy. 2X strong forged steel is plenty of power for the biggest Blues -- even Wels and Mekong cats if you ever get the opportunity. It's the right hook for the job because it never stops working

WORM HOOKS

Spinnaker[®]

Worm, Extra Wide Gap (EWG)

Our most popular and versatile hook, the legendary EWG worm hook is the gold standard in high performance wide gap hook designs. This hook fishes a Senko to perfection. Use it to pitch a Brush Hog or Sweet Beaver to shoreline targets. It's great for Texas rigging or Carolina rigging a 10" worm. A soft plastic jerkbait fisherman's dream hook.

Worm, Superline Extra Wide Gap (EWG)

An EWG on steroids. This high carbon heavy wire hook was designed to fish braided line in heavy cover. For serious flipping in the tules', overhead mats, or pads. The EWG Superline will increase your strike to hook ratio when you need to get nasty. Perfect when you require a quicker descent rate without increasing size or adding weights. Want to turn up the heat with a Senko? Go with a Superline for that deadly quick descent!

SuperLine

Worm, Superline EWG With Ring

There are times when calling up fish requires a little something extra. For this purpose we designed the EWG Ringed Superline. Need to fish a Horny Toad in the slop and want it to walk? Our solid piece ring allows the bait to swing freely. Fishing a Fluke for schooling smallmouth or big spots and want that super erratic action? This is your hook. Handles braided line and heavy monofilament with ease.

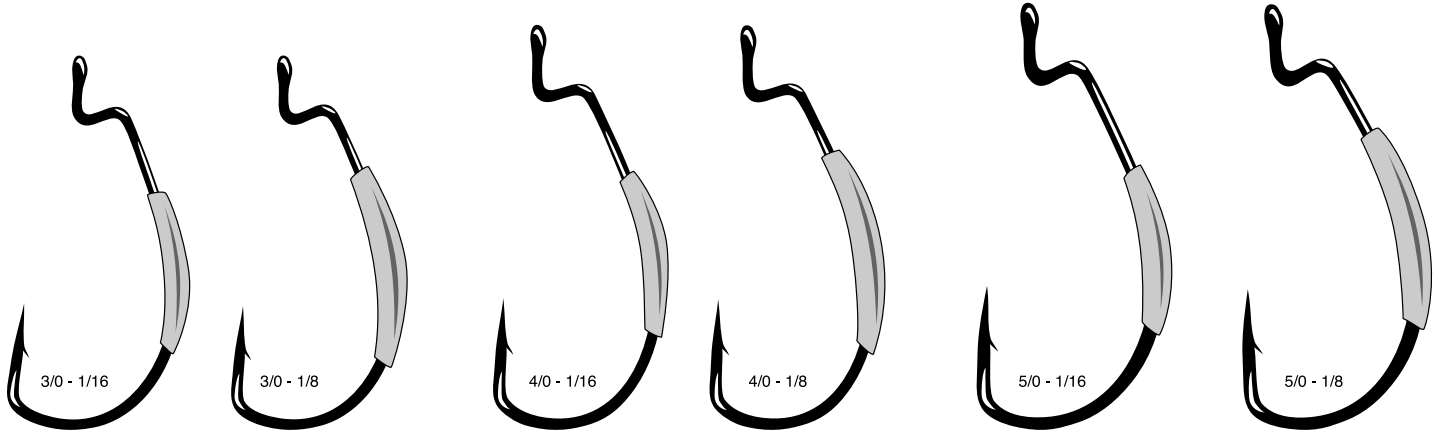

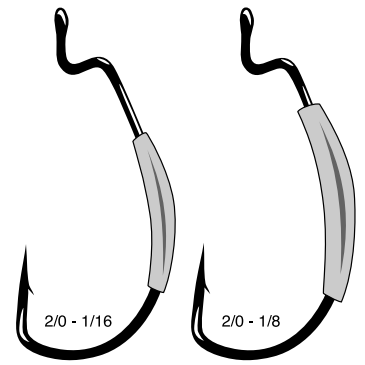

SIZES		2/0	4/0
NS Black	LS	74412R(4)	74414R(4)

Worm, Superline EWG Weighted

The Weighted EWG Superline is a perfect compliment to the EWG arsenal. Do you need more casting distance with a soft plastic frog? This hook will get you back in the junk. Want to flip into heavy cover without the hassle of pegging a bullet sinker? Consider the EWG Weighted Superline your new best friend. The Lead is strategically placed and milled to perfection.

Worm, Superline, Offset, Round Bend

Gamakatsu's Superline Offset Round Bend is designed with a heavier Superline wire best suited for heavy braided and fluorocarbon lines. This popular design in heavy wire enables anglers to fish any plastic in the heaviest of cover with no worries. The Round Bend offers a larger bite area perfect for any worm presentation while increasing your hook-up ratios. The newly enhanced Z-Bend holds your plastics on the hook longer, reducing the number of pull-offs and reducing damage to plastics. A more durable worm hook designed for heavier lines that hold your bait on longer.

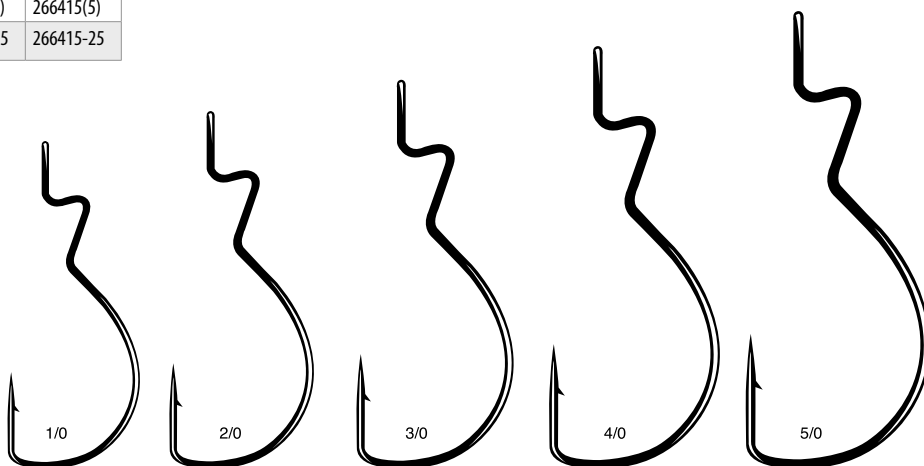

SIZES		2/0	3/0	4/0	5/0
NS Black	LS	398412 (5)	398413(5)	398414(4)	398415(4)

Worm, Skip Gap

There is no better hook for skipping plastics under docks and cover. The Skip Gap is a multiple use hook that is perfect for a variety of soft plastic baits. Top water buzz frogs, Texas rigging, Carolina rigging, the Skip Gap can do it all!

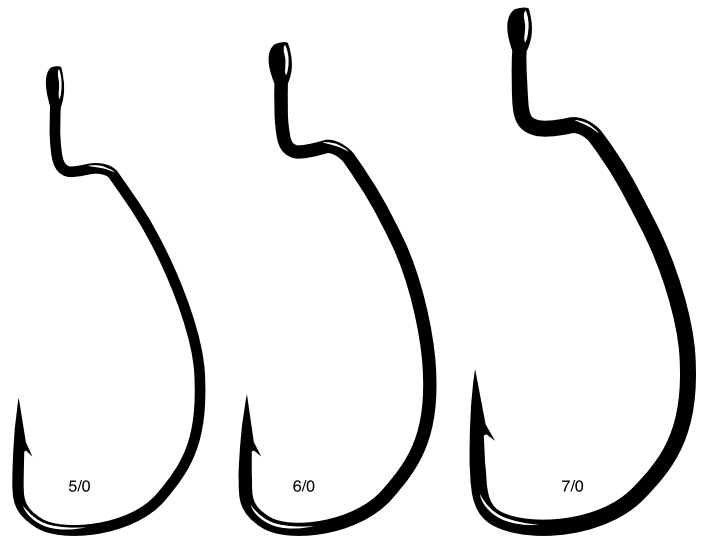

SIZES		1/0	2/0	3/0	4/0	5/0

Extra Wide Gap (EWG) Monster

When only a high carbon heavy wire hook will do your choice should be the EWG Monster. Hard core doesn't even begin to describe the Monster. Slings a Mission Fish back in the cover? We now have the perfect hook. Loading for bear with a giant Gitzit, Double Wide Beaver, or oversized Slug-O? The Monster has you covered. Headed to El Salto, Clear Lake, or the California Delta for double digit behemoths? Gamakatsu Monster is the choice when you are taking no prisoners. Heavy line, heavy rods, big baits, and big fish is EWG Monster time!

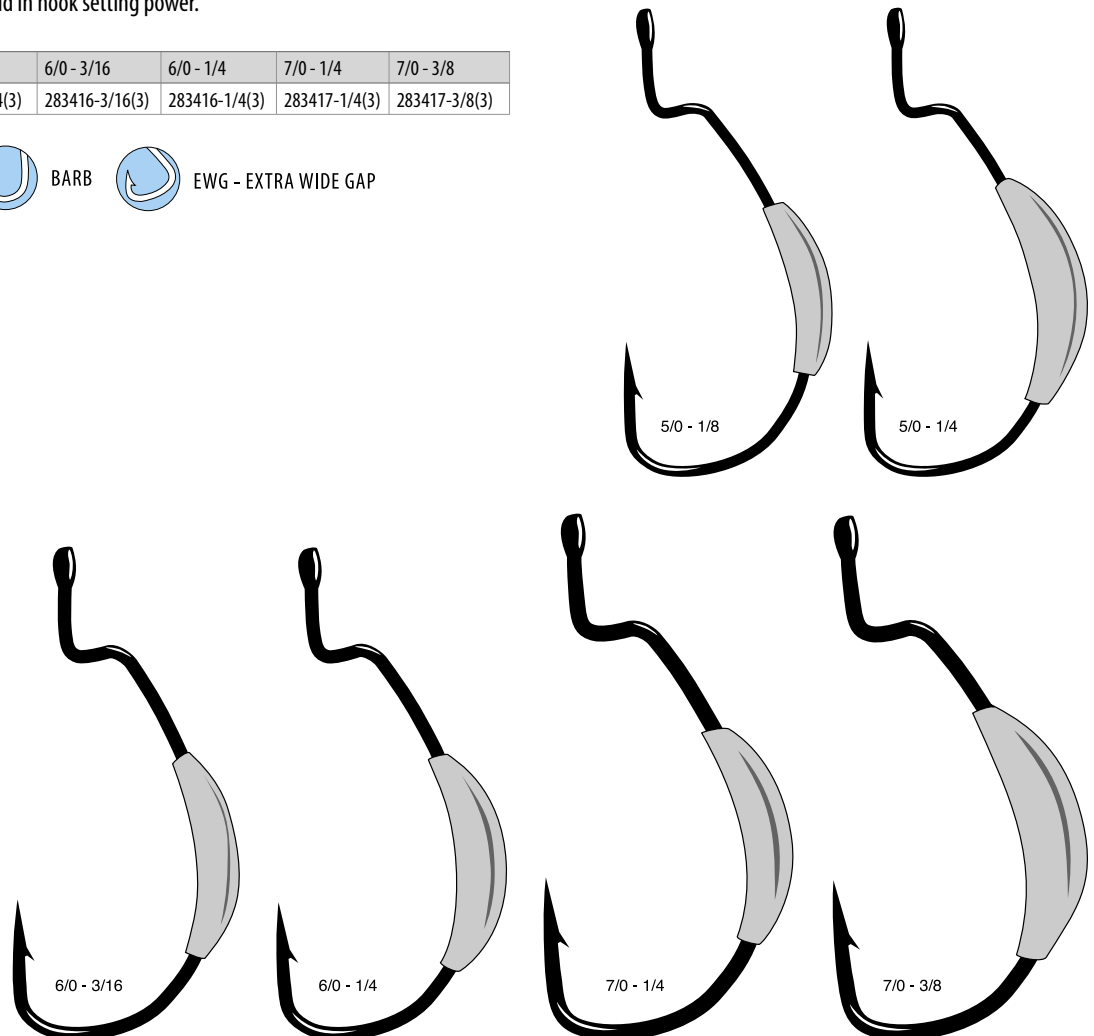

SIZES		5/0	6/0	7/0
NS Black	LS	283415(5)	283416(4)	283417(4)

Extra Wide Gap (EWG) Monster, Weighted

On the heels of the EWG Monster we have introduced the Weighted Monster. When the situation calls for a bulletproof weighted hook, look no further than the Monster Weighted. Strategically placed milled weights are perfectly balanced and serve as a keel for large swimbaits or any oversized offering. The hook also features a slightly higher hook point in relation to the eye to help aid in hook setting power.

Finesse Heavy Cover Worm with Tin Keeper

The Finesse Heavy Cover Worm Hook is a light wire, finesse hook that features the first wide gap straight shank hook for finesse worm fishing. Just like all the Heavy Cover Hooks the Finesse features a welded eye and wire keeper that assures your worm doesn't slide down the hook.

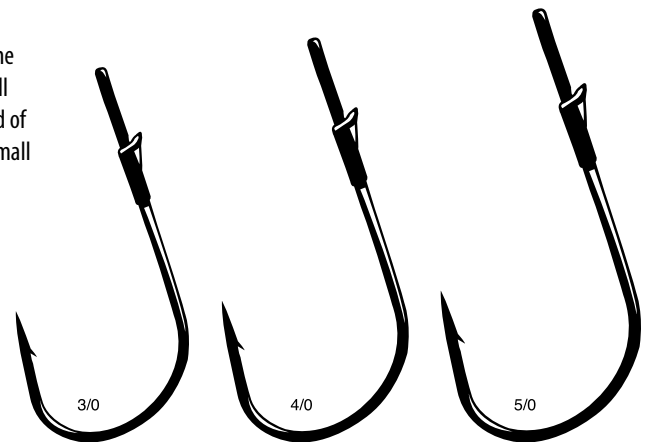

SIZES		1/0	2/0	3/0
NS Black	LS	311411(4)	311412(4)	311413(4)

Heavy Cover Worm with Tin Keeper

The Heavy Cover Worm hook has been built to the highest standards to fight the biggest fish in the heaviest cover. The Heavy Cover Worm features our rock solid welded eye, perfect for tying a Snell knot with braid. Gamakatsu has worked with our top pros to design an improved keeper. Instead of a bulky heat shrink barb, the Heavy Cover Worm features a small wire keeper. The keeper has a small compact profile and is strategically placed for superior holding power.

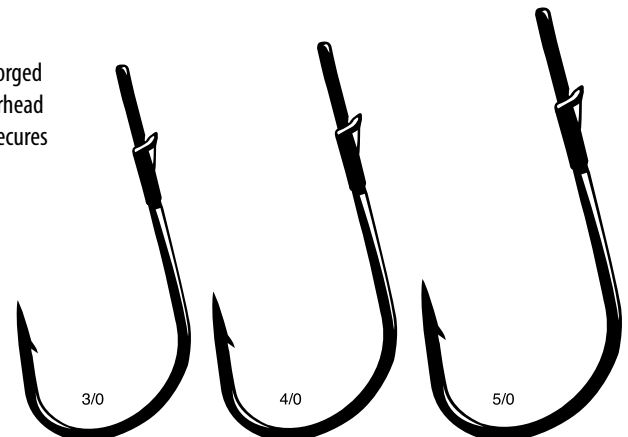

SIZES		3/0	4/0	5/0
NS Black	LS	304413(4)	304414(4)	304415(4)

Super Heavy Cover Worm with Tin Keeper

The Super Heavy Cover Worm Hook is indestructible with a welded eye and extra heavy duty cold-forged hook wire that will not flex. It's perfect for flipping into heavy cover or punching through thick overhead cover. The addition of an oversized barb holds hooked fish solid and the punch wire/keeper firmly secures worms so they stay rigged cast-after-cast.

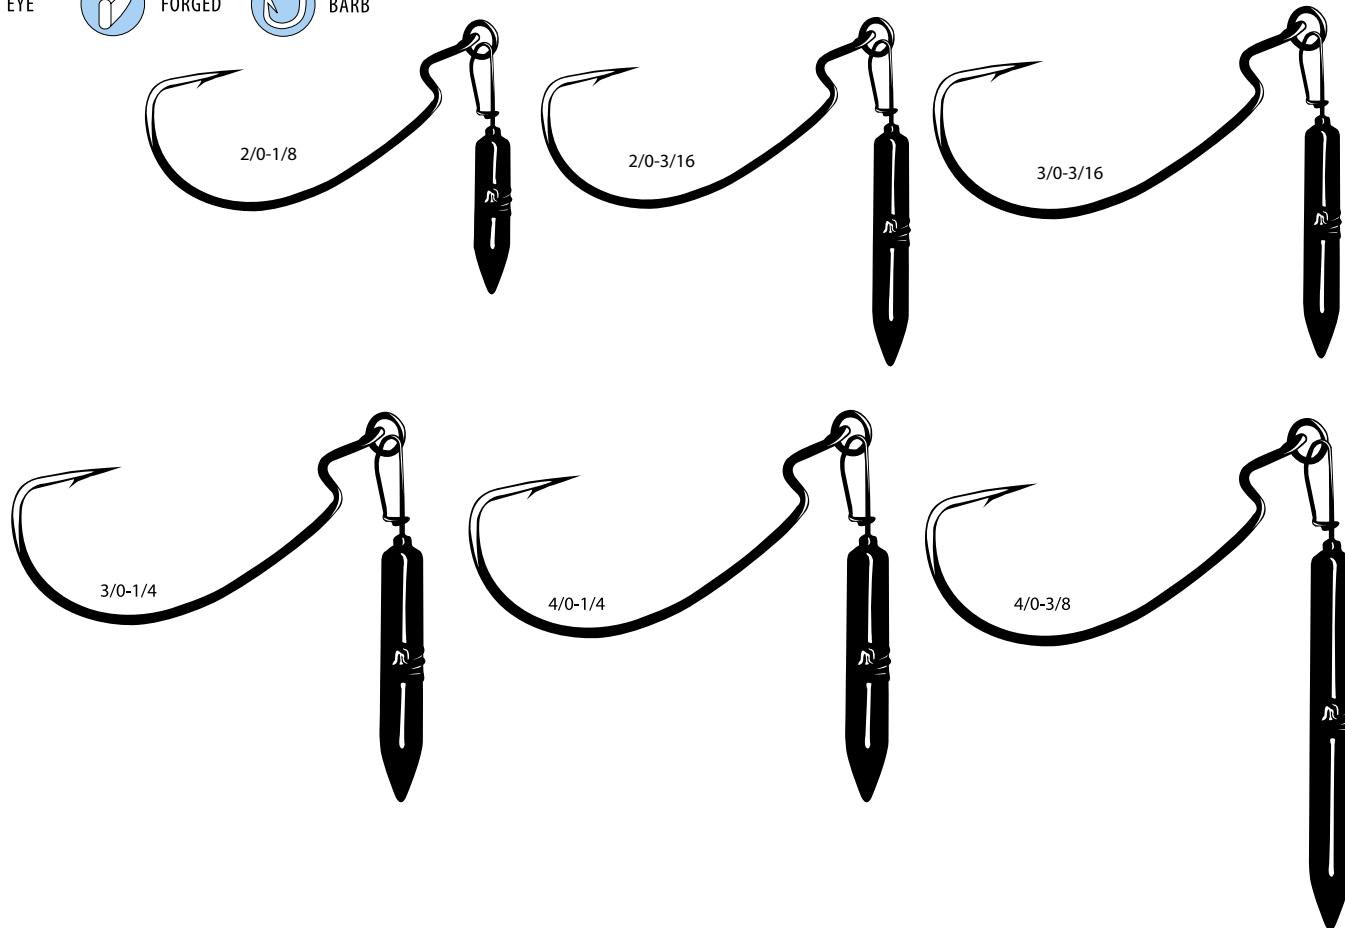

SIZES		3/0	4/0	5/0
NS Black	LS	310413(4)	310414(4)	310415(4)

Gika Rig

Gika Rig combines the natural presentation of finesse fishing with the speed of power fishing. The Gika Rig uses an off-set shank worm hook with an elongated drop shot style weight attached directly to the eye via a solid ring. The position of the weight allows anglers to 'feel' the bottom, detecting transitions in composition and helping find fish-holding structures. Gika Rig produces a natural swimming and dropping motion. The solid ring allows the plastic bait to float freely and rotate from side to side as it descends. It slips through vegetation with ease and grabs the attention of bass.

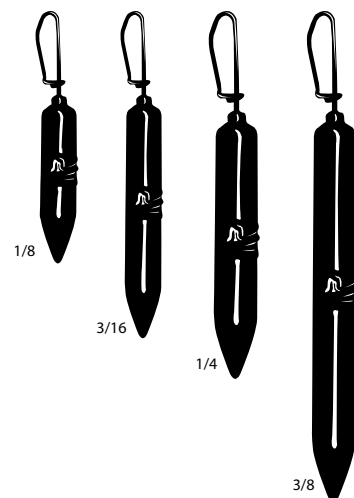

SIZES	2/0-1/8	2/0-3/16	3/0-3/16	3/0-1/4	4/0-1/4	4/0-3/8
Black	LS 399412-1/8 (2)	399412-3/16 (2)	399413-3/16(2)	399413-1/4(2)	399414-1/4 (2)	399414-3/8 (2)

Gika Rig Weight

Gika Rig weights attach directly to the Gika Rig eye via a solid ring. The weight features a snap that allows anglers to quickly change the size of the weight when the situation calls for it and is painted black for stealthy presentations. The weight size is permanently stamped into the side of each weight making it easy to identify when it's time to make a change. Changing weights controls the depth and drop speed of the bait adding to the rig's versatility.

Superline Spring Lock Monster, Weighted

Go big or go home. When conditions call for big baits, Gamakatsu's new Spring Lock Monster is precisely designed to hold and position them perfectly straight and firmly attached. Weighted with 3/8 or 1/2 ounce lead, the Spring Lock Monster stands up to aggressive casts and viciously hard hook sets. The "center point" spring lock is easy to start and tighten. Baits stay straight every time and all the time. 9/0, 10/0 or 12/0 hook sizes await trophy-caliber catches.

Power Drop with Superline EWG

The Power Drop series is uniquely built around a solid ring that connects the premium hook, swivel and a 3.5-inch dropper wire. The Superline EWG is considered the gold standard in high-performance wide-gap hook designs; this option features our Superline EWG 744XX series hooks. The premium Gamakatsu swivel completes each rig to prevent line twists. Simply add the desired weight to the dropper wire then bend the end of the shaft with a pair of needle nose pliers to secure in place.

JIG HOOKS

Спармакатсу[®]

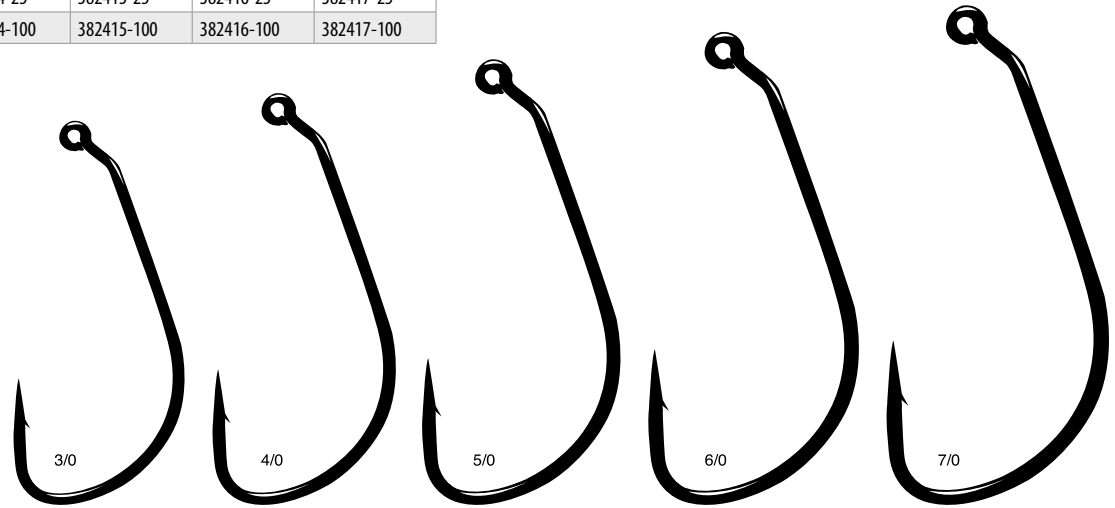

Jig 30° Extra Wide Gap (EWG)

Designed for a wide variety of popular techniques, emerging trends, and do-it-yourself lead jig head pouring. The 30° hook eye angle compliments the 60° and 90° jig hooks that have been the standard for decades. This extra wide gap (EWG) will handle larger baits too. The points are incredibly sticky-sharp right out of the package. Fits most 30° lead molds

Jig 90° Salty HD

In the saltwater world, few jig hooks are built to withstand the hardest fighting fish in the ocean. Hard strikes and wild runs from species like striped bass will test the strength of any hook. The Jig 90 Salty HD is specially made with O'Shaughnessy bend and heavy wire that can hold form against the toughest fish out there. The Jig 90 Salty HD is forged for strength and the NS Black (nickel silver black) coating resists corrosion.

Jig 90° Big River

The Jig 90 Big River will quickly become a staple for anglers desiring a versatile jig hook capable of performing in different environments and for a variety of species. The large gap and acute bend offer great holding power, locking fish in place when hooked. DIY anglers will like the longer shank to pour heavier jig heads on. This unique design comes in a wide range of sizes for fisherman, targeting everything from steelhead to walleye.

JIG HEADS

Spinnaker[®]

Spring Lock Spinner

The new Spring Lock Spinner from Gamakatsu makes your favorite swimbaits and other soft plastics even more effective by adding flash and vibration to attract fish from even greater distances. The revolutionary design features two retaining wires wound in parallel, making rigging simple and providing even more holding power, so baits won't slip no matter how hard you fish. The new rigging system has innovative features that draw strikes from pressured fish and is built on a premium 2x strong hook to handle the biggest predators. Combining the 28-degree hook eye and premium spring lock allows you to keep your bait in place, so it runs true every cast.

SIZES	3/0-3/16	5/0-1/4	6/0-3/8	7/0-3/8	9/0-3/8	10/0-1/2	12/0-3/4

Under Spin Head Mini

The Under Spin Head Mini features Gamakatsu's premium size 1 Finesse Heavy Cover 60-degree hook, the wide gap design means you can still rig bulkier plastics and have plenty of bite. Ideal for smaller finesse presentations, the head profile is streamlined to glide through cover. Attention-getting recessed lifelike eyes and the small chrome willow leaf blade result in a combination that fish can't resist. Gamakatsu's Spring Lock holds swim baits and other plastics gently but firmly, keeping the presentation straight on the hook.

Under Spin Head

The Under Spin Head features Gamakatsu Heavy Cover 60-degree hook. The heavy wire and wide gap design of the Heavy Cover gives anglers a better hook up ratio and retention when using bulky swim baits. Ideal for heavy braid or fluorocarbon line. The head profile is streamlined to glide through cover. Gamakatsu Spring Lock holds swim baits and other plastics gently but firmly, keeping your presentation straight on the hook. Recessed lifelike eyes on the Under Spin provide a focal point for predators. The small chrome blade is attached to a quality ball-bearing swivel allowing it to spin freely, even at the slowest retrieves, to simulate baitfish and create a subtle trigger.

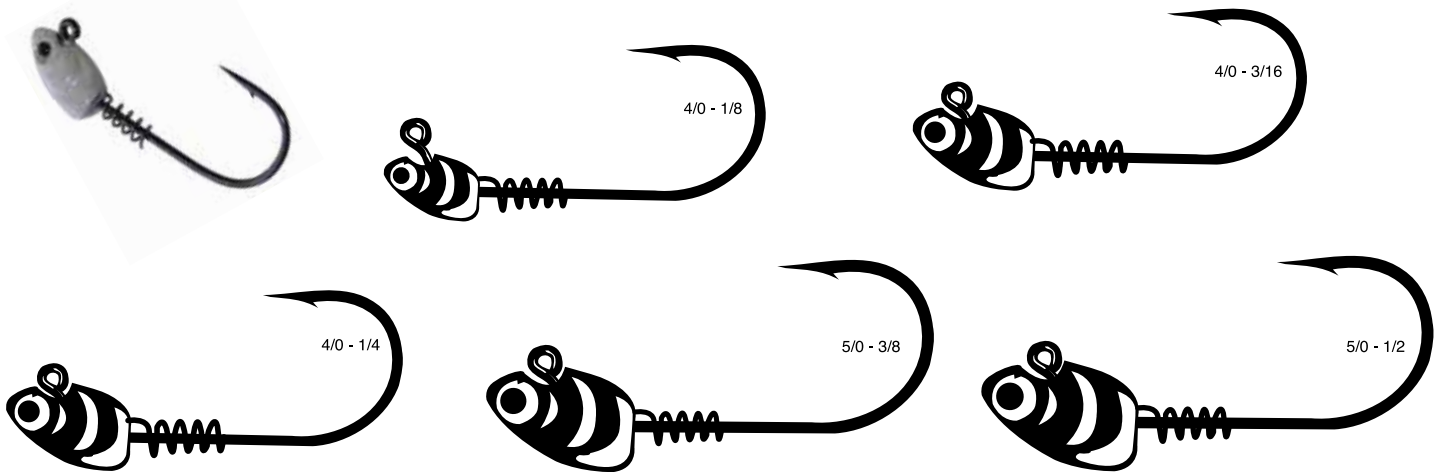

SIZES	4/0-3/16	4/0-1/4	4/0-3/8	4/0-1/2

Superline Swim Bait Head

Until now, you simply couldn't find a premium, swim bait jig head with a premium Gamakatsu hook. The new Superline Swim Bait Head changes all that. The head profile is streamlined for a natural action. Choose premium painted heads or unpainted for anglers that prefer a do-it-yourself custom look. A heavy wire, 60-degree Superline hook performs optimally with braided line and heavy monofilament. Completing the package, The Spring Lock keeper holds all soft plastic swim baits secure and tight.

Tungsten Hybrid Swing Head

With a head design that unites the benefits of both a cobra head, for passing through grass, and a football head, for snag resistance on a hard bottom, the Tungsten Hybrid Swing Head creates a natural looking, slithering action that draws major attention from nearby bass. Ideal for slow swimming retrieves, the head increases the action of any plastic bait along the bottom. The precision wire harness is tuned to exacting tolerances and a recessed line tie helps it stay weedless. For easy identification the weight size is stamped into the side of each weight and features a stealthy smoke-colored finish.

Stand Up Alien Head

Looking for the quintessential stand-up jig head? Gamakatsu's developed the answer with its all-new Stand-Up Alien Head. Perfect for rock or hard bottom fishing, The innovative keeper pin holds plastics without tearing. The benefit is a better presentation, more casts and more mileage out of your plastics. Features a NS Black finesse hook and is available in Green Pumpkin and Black jig heads.

Finesse Jig Head

When new tournament techniques emerge, our pro-staff are usually holding the rod. Case in point, the Finesse Jig Head is designed to optimize the "Ned Rig." It's all about precise positioning of small soft plastics in a manner that translates into that slow, gliding fall that big bass can't resist. The spring keeper and size #1 hook are critical features. Lead heads are unpainted allowing for easy customization.

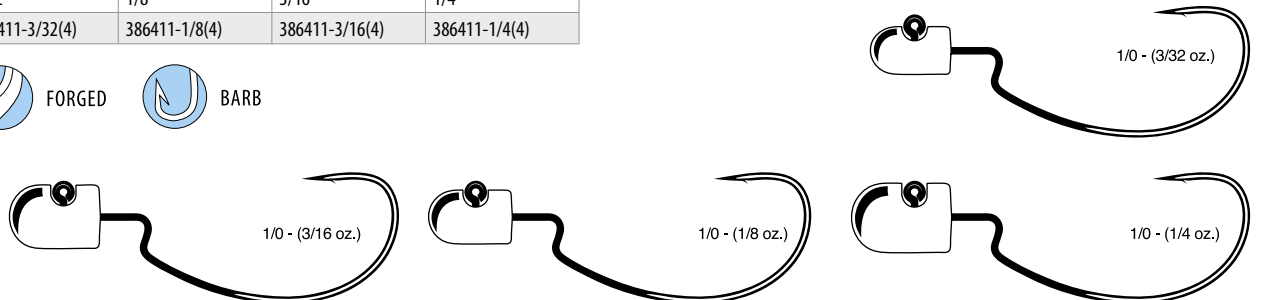

SIZES		1	1	1
WEIGHT	LS	1/16	3/32	1/8
		506410-1/16(4)	506410-3/32(4)	506410-1/8(4)

Finesse Jig Head Offset

If you're familiar with the Ned rig technique, you probably haven't seen this before: An offset eye, countersunk into the jig head, with a premium forged steel Gamakatsu hook. Well, now you have. Reduce time rigging and spend more time fishing. This all-in-one design is tough to beat when bass are spooked or finicky in overfished conditions.

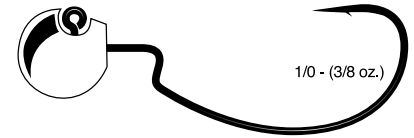

SIZES		1/0	1/0	1/0	1/0

		386411-3/32(4)	386411-1/8(4)	386411-3/16(4)	386411-1/4(4)

Bottom Kicker Offset

Anglers on the other side of the “big pond” have been boasting about the advantages of using an offset bottom kicker for many years now. We put them in the hands of several of our most trusted pros and tackle testers in the U.S. and waited to hear what they had to say. What a surprise, they slay bigmouths here in the States as well. Notice the finesse football head designed for fishing deep structure, and the fact that the hook eye is offset to tantalize the “lay down” action. And of course, the genuine Gamakatsu hook is as sharp as they come.

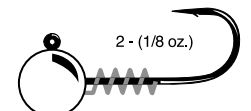

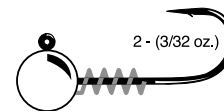

SIZES		1/0	1/0	1/0	1/0
WEIGHT	LS	3/8	1/2	5/8	3/4
		383411-3/8(4)	383411-1/2(4)	383411-5/8(4)	383411-3/4(4)

Crappie Jig Head

Designed for tournament focused crappie anglers. This premium design, specialized Crappie Jig Head, features a sticky sharp Gamakatsu hook fully molded through the lead head. The smooth eye won't burr even the lightest line. A heavy-duty spring lock keeper encircles the shank for nearly half its length. Soft plastics won't move a millimeter with this innovation. #2 light wire jig hooks in NS Black.

MaxEye Jig Pill Head

When it comes to drawing strikes from predatory fish such as walleye Gamakatsu's MaxEye jigs are as good as it gets. This premium jig features highly detailed life-like eyes and a durable paint finish that will not chip or flake. It also boasts a dual offset rebarb wire keeper and collar system, which will safely secure the softest and most-fragile plastics or live bait without tearing. The premium Big River Jig Hook sports an increased gap diameter to increase hook-ups and a special bend with an acute angle to provide better holding power. The MaxEye Pill Head jig has a unique shape which resists snags and imparts a unique action when it contacts the bottom.

LURES

Spinnaker[®]

Spiral Z

Gamakatsu introduces the Spiral Z, a beaded attractor that will grab the attention of sportfish in both fresh and saltwater applications. The Spiral Z is ideal for trout and salmon in lakes or rivers that have grown accustomed to the same old-style attractors while also doing double duty with other species. Anglers employing the Spiral Z attractor to their lures will create an altogether new package with a distinct look, vibration and sound appeal. The attractor is built around a stainless-steel wire with colored beads in a variety of colors and a ball-bearing line swivel to eliminate line twists.

Unlike traditional dodgers and flashers, with the Spiral Z, the entire package rotates, creating an undulating lifelike motion for gamefish of every species. It's an infinitely customizable attractor and can be rigged any distance in front of a favorite lure. Pick the combination of size and color that fits the local fishery, add the lure of choice to complete the profile, and anglers can spin their way to bigger catches than ever before.

DURASCENT

Durable • Scented • Floats • Flexible

Gamakatsu®, the longtime leader in hooks for everything from bluegills to blue marlin, has brought the company's unique talents for innovation into the soft bait market with the introduction of DuraScent baits. Whatever species anglers are chasing, there's a DuraScent offering tailor made for that purpose, with built-in features that outfish and outlast the competition.

All DuraScent baits are made in Japan to strict market standards which are reflected in both their hyper realism and their durability. DuraScent baits are extremely durable, lasting longer than traditional soft plastics which allows them to stand up to the toothiest fish. Super-soft elastomer provides extreme flexibility, allowing DuraScent baits to be stretched out to six times their original length. That means more time fishing, and less time re-rigging. DuraScent baits also float, which allows for a myriad of effective rigging options, taking advantage of natural currents to tempt anglers' prey.

DuraScent plastics are infused with an all-natural blend of fish-attracting scents including shrimp, crab, fish oil and squid. After extended use, the extreme scent in DuraScent baits can be "refreshed" with a good stretch or two. Made with a non-toxic formula that is free of plastisol and phthalates making them environmentally friendly.

XTREME
SCENT

No matter which species is targeted for the day, there's a DuraScent plastic that'll catch them better than anything else. When other soft plastics get overlooked, these get chewed.

DuraScent Shrimp

The DuraScent Shrimp perfectly emulates the favorite food of a wide variety of gamefish, from the natural body shape to the legs and antennae that move and sway in the water with only the slightest current or angler manipulation. Once fish spot it, they'll come in for a closer look, and the powerful shrimp scent will seal the deal. This is a soft plastic lure that can be fished from the top of the water column to the bottom, on weightless weedless hooks or a heavy jig. Rig it below a popping cork to target fish at a particular depth. The super-soft elastomer material floats and is extremely flexible stretching to over six times its length, making it far more durable than the competition, meaning anglers will spend more time reeling fish in and less time baiting hooks.

SIZES	2.3 in
Natural	448000-N(3)
Orange Glitter	448000-OG(3)
Angry Orange	448000-AO(3)

Actual size 2.3 inch.

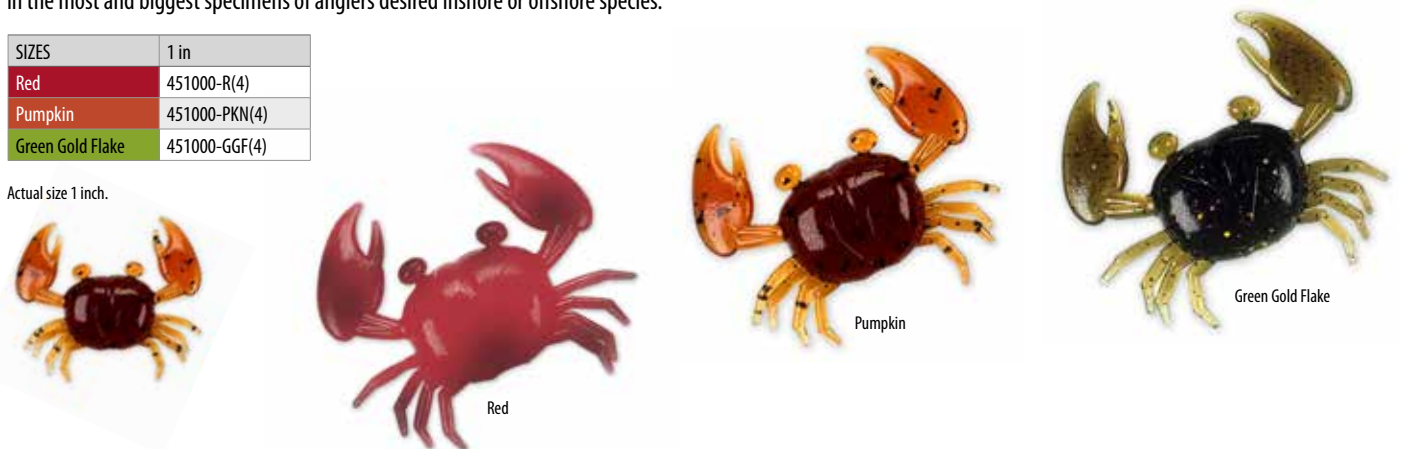

DuraScent Crab

The DuraScent Crab provides the look, smell and feel of the real thing, enough to tempt even the most neutral fish, with a combination of exceptional durability and lifelike characteristics. The super-soft elastomer material is buoyant, allowing the legs and claws to float upward to tempt curious fish from a distance, and once they get within sniffing range, they'll be brought closer by the all-natural crab infused scent. Gamakatsu's DuraScent crab is durable, lasts longer than traditional soft plastic baits and is extremely flexible, stretching up to six times its length. Whether bottom fishing, jigging, using a popping cork or just about any other presentation imaginable, this will bring in the most and biggest specimens of anglers desired inshore or offshore species.

SIZES	1 in
Red	451000-R(4)
Pumpkin	451000-PKN(4)
Green Gold Flake	451000-GGF(4)

Actual size 1 inch.

DuraScent Sandworm

Gamakatsu's DuraScent Sandworm looks, moves, feels and smells like the real thing, providing lifelike motion with only the slightest bit of current or angler manipulation. Once fish see it, they'll be drawn in by the widely dispersed, all-natural fish oil scent, and once they bite, they'll hold on because it feels so lifelike. The super-soft floating elastomer material allows anglers to rig it in a wide variety of ways and is far more durable than traditional soft plastic baits or even actual worms. The DuraScent Sandworm offers extreme flexibility and can stretch to over six times its length. Whether surf fishing or chasing big fish in some other environment, this is the worm imitator anglers can't live without, a true gamechanger.

SIZES	3.3 in
Green Gold Flake	452000-GGF(5)
Blood Red	452000-R(5)
Pumpkin	452000-PKN(5)

Actual size 3 inch.

DuraScent Octopus

The DuraScent Octopus brings eight legs of super durable and energetic action tempting fish with its undulating natural action. It comes in three sizes – 1.5 inches, 4.5 inches and 6 inches – to “match the hatch” and appeal to a wide array of gamefish. DuraScent Octopus are extremely durable lasting longer than traditional soft plastic octopus/hoochie style baits. Super-soft elastomer provides extreme flexibility and stretches to over 6 times its length. Its buoyant material floats, creating a natural look and feel that fish can’t resist. The 1.5 inch size is infused with shrimp scent and is ideal for targeting kokanee, trout, bass and panfish. The 4.5-inch size is infused with an all-natural blend of shrimp scent and is perfect for salmon and other larger species. Rig it behind a dodger or flasher, and the natural action and extreme scent will help trigger more strikes. The 6-inch size excels when targeting a wide variety of bigger bottom fish like halibut.

DuraScent Salmon Eggs

DuraScent Salmon Eggs are so incredibly natural-looking that they're as good as the real thing. In fact, because of their exceptional durability and versatility, they may be better than the real thing. Whether fish are feeding by sight or scent, and whether anglers thread one egg on a hook or tie them in a cluster, the shrimp-infused extreme scent of these replicas will fool a wide variety of species into striking. Buoyant material that floats creates a natural look and feel that's deadly on steelhead, trout, salmon, panfish and just about any other species, versatile in both freshwater and saltwater. Anglers can tie several together using a series of overhand knots to adjust the amount of bait presented. Because of their incredible ability to stretch to over six times their length, anglers will spend less time rigging baits and more time reeling in fish.

WEIGHTS

SpaMakatsu[®]

G-Shield Tungsten Worm Weight

The G-Shield Tungsten Worm Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The worm weight is the all-purpose champ, best for casting into light cover or dragging plastics across bare lake and river bottoms when subtlety is essential and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight.

SIZES	1/8	3/16	1/4	3/8	1/2	3/4
Smoke	446000-1/8(4)	446000-3/16(4)	446000-1/4(4)	446000-3/8(3)	446000-1/2(2)	446000-3/4(2)

NEW

Product shown larger than actual size

G-Shield Tungsten Flipping Weight

The G-Shield Tungsten Flipping Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The flipping weight is slightly wider and excels when flipped or pitched into heavy cover and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight.

SIZES	3/8	1/2	5/8	3/4	1	1 1/4
Smoke	444000-3/8(3)	444000-1/2(2)	444000-5/8(2)	444000-3/4(1)	444000-1(1)	444000-1 1/4(1)

G-Shield Tungsten Punch Weight

The G-Shield Tungsten Punch Weight features a specially designed composite insert that not only protects an angler's line, but also provides 360-degree protection for the knot. The insert is wider at the base than at the insertion hole so the hook can recess itself into the weight, creating a more compact, lifelike and snag resistant offering. The punch weight will penetrate thick overhead canopies that resist other shapes. It's bulbous at the front, creating a weight-forward design that builds inertia when it first contacts likely bass-holding cover and features a stealthy smoke colored finish. For easy identification the weight size is stamped into the side of each weight.

Nautilus Light

A light wire hook that was developed for fishing fragile live baits. Produced from forged high carbon steel, it features a straight eye and offset point for superior hooking performance. The unique circle hook shape is designed to hook and hold which is precisely why more saltwater anglers make Gamakatsu their hook-of-choice. Superior strength, sharpness and design add-up to make a sure bet for live bait and chunk bait anglers from coast-to-coast.

Nautilus Circle Heavy Duty

To go ringed or not to go ringed... that is the question! And we've got the answer, whichever you prefer. The standard Nautilus HD hook features a ringless eye and 30% heavier wire than the regular Nautilus. (Roughly 50% less heavy than the Super Nautilus.) Whether you simply prefer the stealthiness of having less metal in the water or just have great confidence in the loop knots you've tied for years, the standard Nautilus HD hook will do the trick. You can feel the superiority by just holding it in your hand. Be careful when checking the sharpness; it doesn't differentiate between fish or fingers.

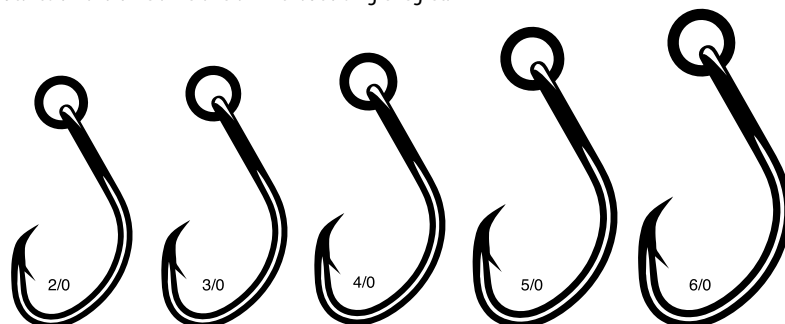

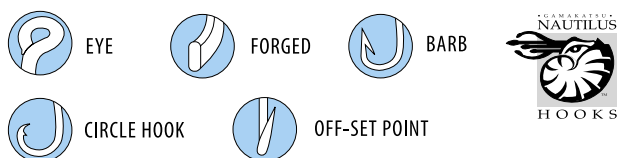

SIZES	2/0	3/0	4/0	5/0	6/0
NS Black	LS 377412(7)	377413(6)	377414(6)	377415(5)	377416(5)
	25 377412-25	377413-25	377414-25	377415-25	377416-25

Nautilus Circle Heavy Duty With Solid Ring

The new solid, one-piece ringed version of the Nautilus HD hook allows live bait to swim more freely, keeping it alive longer and enticing more prey to engulf its goodness. At that point, the finest high carbon steel penetrates deep and locks in tight for the battle ahead. The Ringed Nautilus HD features 30% heavier wire than the regular Nautilus and 50% less than the Super Nautilus. While its core credibility has been proven in the southern California Bluefin Tuna fisheries, there is absolute evidence of its prowess in many other heavyweight bouts with monster gamefish worldwide. Therefore, you owe it to yourself to try the Nautilus HD Ringed for all live bait techniques and bottomfish applications. Big blues and channel cats? Absolutely! Sturgeon? Oh yeah. Halibut? It's a no-brainer. Tie one on without a single regret.

Super Nautilus Circle

Made of high carbon steel, it's a heavier wire hook than our standard "Nautilus" and forged for quality and added strength. This hook has become a favorite amongst demanding saltwater fishermen.

SIZES	10/0	11/0
NS Black LS	272420(3)	272421(2)

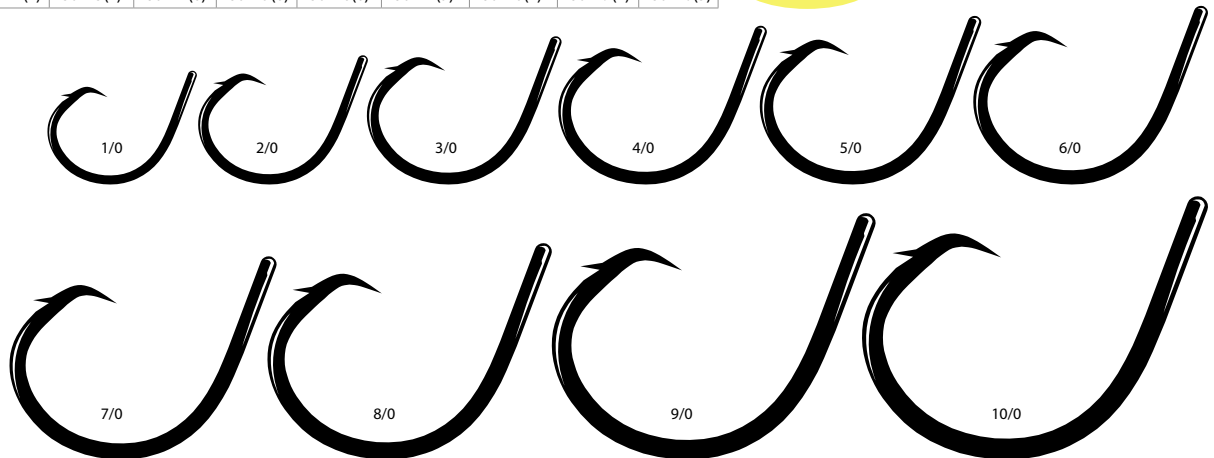

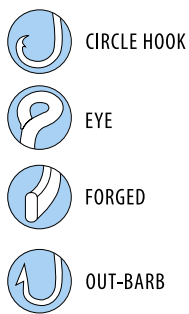

Kraken Outbarb Circle (Inline-point) **TOURNAMENT LEGAL**

The Kraken Outbarb Circle's distinctive outside barb provides several advantages when targeting giant sized fish. One is straight holding power, because the outbarb cannot back out like a traditional barbed hook, and hook damage typically occurs on the opposite side of the hook, further reducing potential pull-out. Another is better, easier penetration because the barb is opposite the side of the hook doing most of the work. It's also less likely anglers' line will catch on the barb if it wraps around the hook on the drop or cast.

Octopus Circle, 4x Strong, Straight Eye (Inline-point) **TOURNAMENT LEGAL**

To comply with new angling regulations in the Gulf of Mexico, we've redesigned and reinforced our most popular circle hook. The new 4X Strong Circle Hook is built for the toughest battles in the deep sea. The straight eye, NS Black finish and inline point (not offset) complies with the new rules, but doesn't reduce the hook's effectiveness. This is the new "go-to" hook charter captains and professional anglers are using for deep dropping and reef and wreck fishing. Heavy up your rods, reels and line, because the 4X Strong Circle Hook will never give up when it comes to pulling snapper and monster grouper out of their fortified hangouts.

Magic Eye Tuna Plug 3X

You've likely heard about the advantages of using tandem Gamakatsu double, single-point hooks instead of factory trebles on your favorite tuna plugs. Hookup ratios increase and releases are far kinder to our finned friends. Magic Eye Tuna Plug 3X Hooks make rigging the system dramatically easier because the hook eyes are beveled so they slide right on a split ring without needing special pliers or tools. It's faster, easier and foolproof. Attach with hook points opposed.

MAGIC EYE

Tuned Tuna Plug with Ring

Angler preferences can differ on whether to use a ringed hooked or not. And that's just fine with us because we manufacture both. Our Tuned Tuna Plug hook is now available with a welded ring. The ring provides more freedom for the hook(s) to swing unencumbered. Anglers have also found success using the ringed Tuned Tuna Plug hook for stiff rigs, thus eliminating the need for a shackle. Without reservation, they're ready for battle.

ASSIST HOOKS

Spalkatsu[®]

Double Assist 520

New vertical jigging techniques like “slow pitch” and “shore” jigging are gaining attention at a rapid rate. Many of the top anglers are using two assist hooks instead of one. Think about it, you’re doubling your odds of hooking short or soft biters. Gamakatsu’s Double Assist hooks are designed for fast and easy replacement on all types of butterfly, flat fall and “iron” jigs. The 6” super strong braided line loop can be adjusted to position each hook at the exact desired length, even or offset. Red heat shrink tubing on the hook shank is an added attractor and prevents chafing and bite-offs. And there’s no concern of knots coming undone. Hooks are forged and barbed. Available in 2/0 and 4/0 in packages of two.

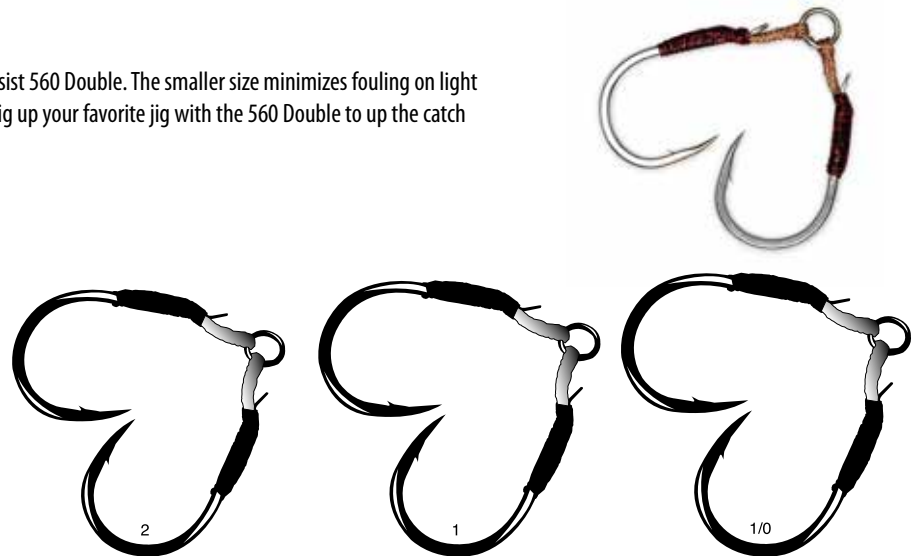

SIZES		2/0	4/0
Tin	LS	368512(2)	368514(2)

Assist 560 Double

If fishing smaller profile jigs is your thing, check out the new Assist 560 Double. The smaller size minimizes fouling on light tackle and micro jigging applications. When the bass go deep, rig up your favorite jig with the 560 Double to up the catch rates with lethargic biters.

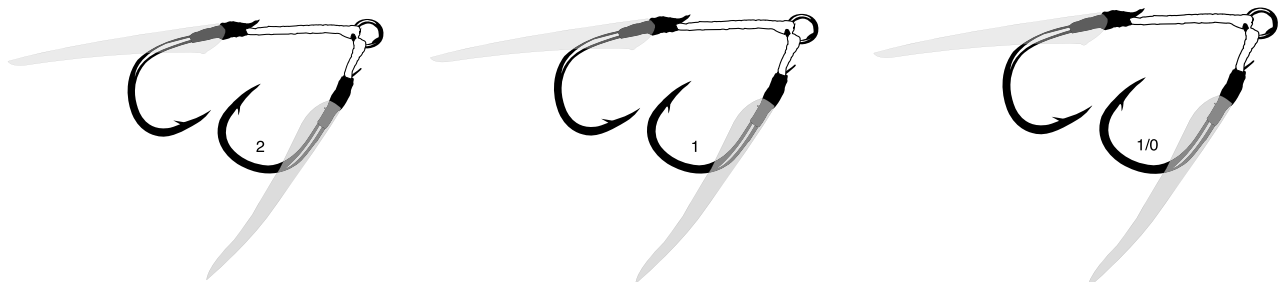

SIZES		2	1	1/0
Tin	LS	428509(2)	428510(2)	428511(2)

Assist 540 Double Bait Plus

For light tackle, micro jigging in saltwater, and vertical jig fishing for bass, Gamakatsu developed the new Assist 540 Double Bait Plus. For added attraction, Gamakatsu utilized a fish skin dressing. Each flashes just like your favorite sabiki rig, drawing strikes from the most reluctant fish. The leader is shorter on one side to increase visibility of each hook for maximum drawing power. This also further decreases the possibility of tangles, even with the most vigorous jigging techniques.

SIZES		2	1	1/0
Tin	LS	427509(2)	427510(2)	427511(2)

Assist 700 Double NSC

If you're targeting larger fish, outfit your jigs with the Assist 700 Double. This rig doubles up on the standard slow pitch assist hooks to maximize hookups. Gamakatsu also applied their Nano Smooth Coat to the hooks; this super slick coating reduces resistance for deeper penetration.

SIZES		3/0	4/0	5/0
Nano Smooth Coat	LS	425213(2)	425214(2)	425215(2)

Assist 530 Double Short and Double Long

The new Assist 530 Double comes in both long and short versions to suit various jig lengths. The polyethylene braided line features a fluorocarbon core making it stiffer, which reduces tangles and promotes deeper penetration when a fish is hooked.

SIZES		1/0	2/0	3/0
Tin SHORT	LS	426511-S(2)	426512-S(2)	426513-S(2)

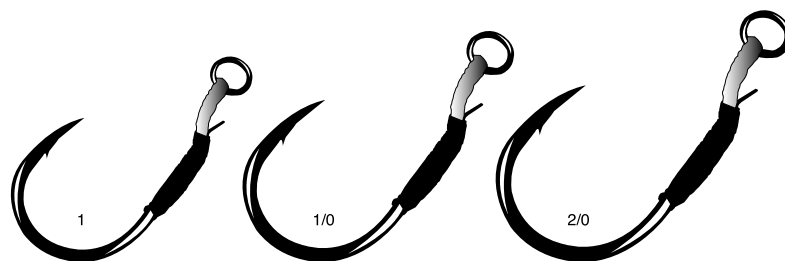

SIZES		1/0	2/0	3/0
Tin LONG	LS	426511-L(2)	426512-L(2)	426513-L(2)

Assist 550 Short

The new Assist 550 Short provides the brawn needed to land pelagic gamefish on lures typically reserved for inshore species. Unlike the long metal shanks on treble hooks, the flexible leader doesn't act like a lever to give fish a mechanical advantage that can defeat even the stoutest hook hangers. You can replace light-wire trebles with the heavier duty Assist 550 Short and retain the action that makes your favorite plug so effective

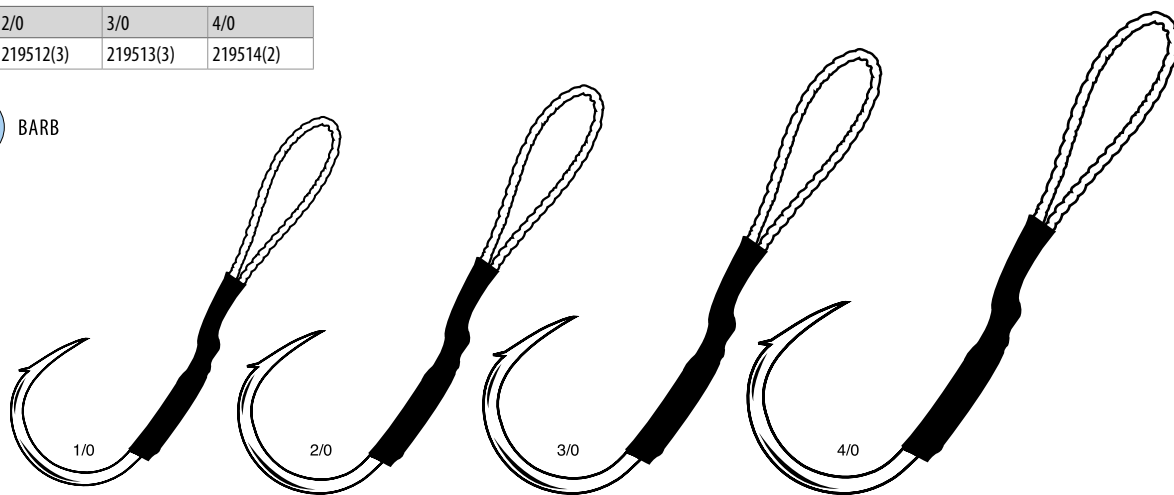

SIZES		1	1/0	2/0
Tin	LS	429510(2)	429511(2)	429512(2)

Assist 510

The Assist 510 features a curved point with an outbarb that will not nick the leader if it were to catch the line. No vertical jig should be fished without one. The super strong braided line loop easily attaches to any jig. One of the first Assist hooks introduced in this country and still the best designed.

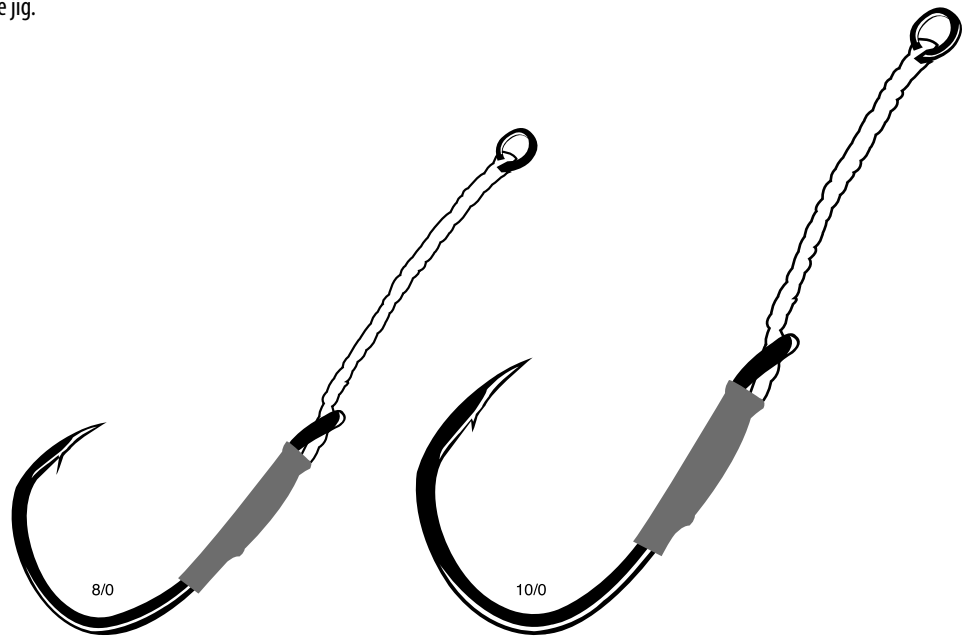

SIZES		1/0	2/0	3/0	4/0
Tin	LS	219511(4)	219512(3)	219513(3)	219514(2)

Tuned Assist HD

This addition to our Assist hook line up is for deep jigging and big fish. These heavy duty assist hooks come in two sizes, 8/0 and 10/0 with 270lb braided line. Both feature a solid ring at the top for easy and secure attachment to the jig.

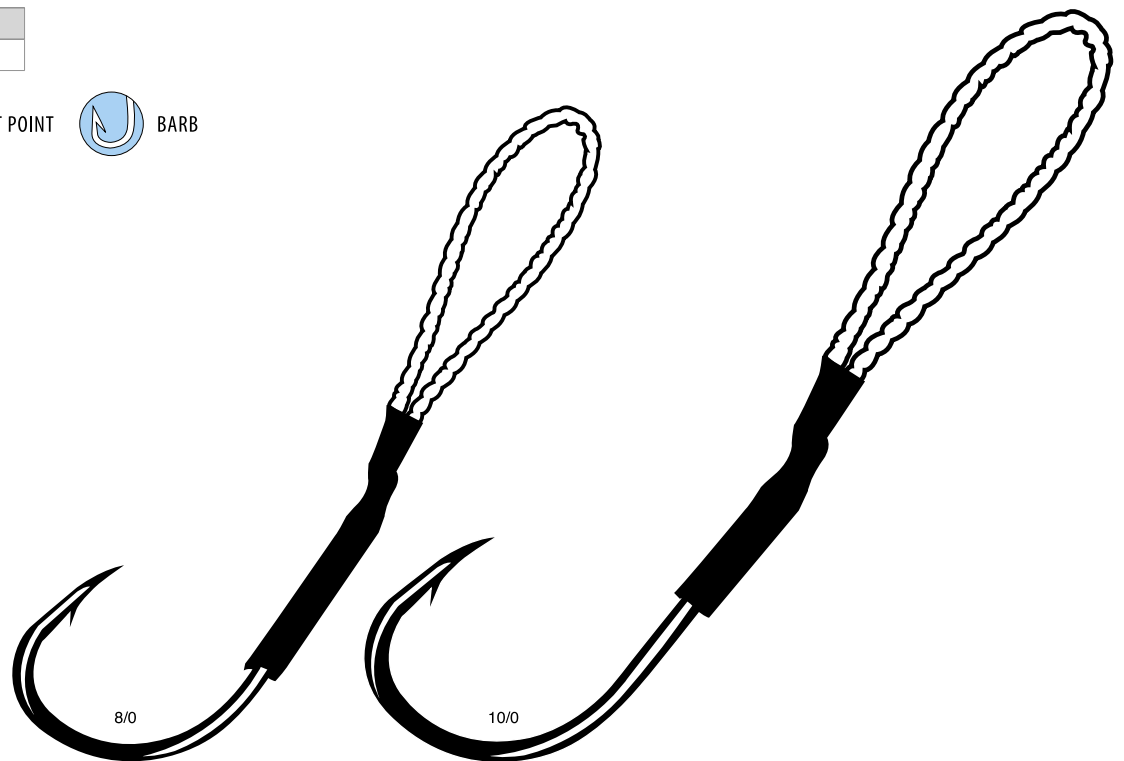

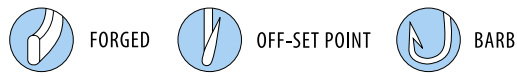

SIZES		8/0	10/0
Tin	LS	270518(1)	270520(1)

Magnum Assist

Featuring a 200lb. braided line loop and our 4x Strong Octopus hook in 8/0 and 10/0, the Magnum Assist is perfect for larger Halibut jigs and deep drop speed jigs.

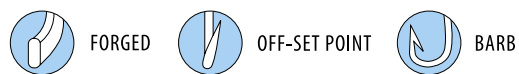

SIZES		8/0	10/0
NS Black	LS	256418(2)	256420(2)

Steel Assist with Magic Eye Swivel

Don't sacrifice your favorite jig to toothy fish like Wahoo and Mackerel. This Assist Hook features our Magic Eye Swivel for fast and easy attachment to the split ring on any jig. No pliers needed. 90lb. wire and a 4x Strong Straight Eye Octopus hook make this the ultimate big game, toothy fish Assist hook. Comes in a 3/0 short version and 5/0 long version for bigger jigs.

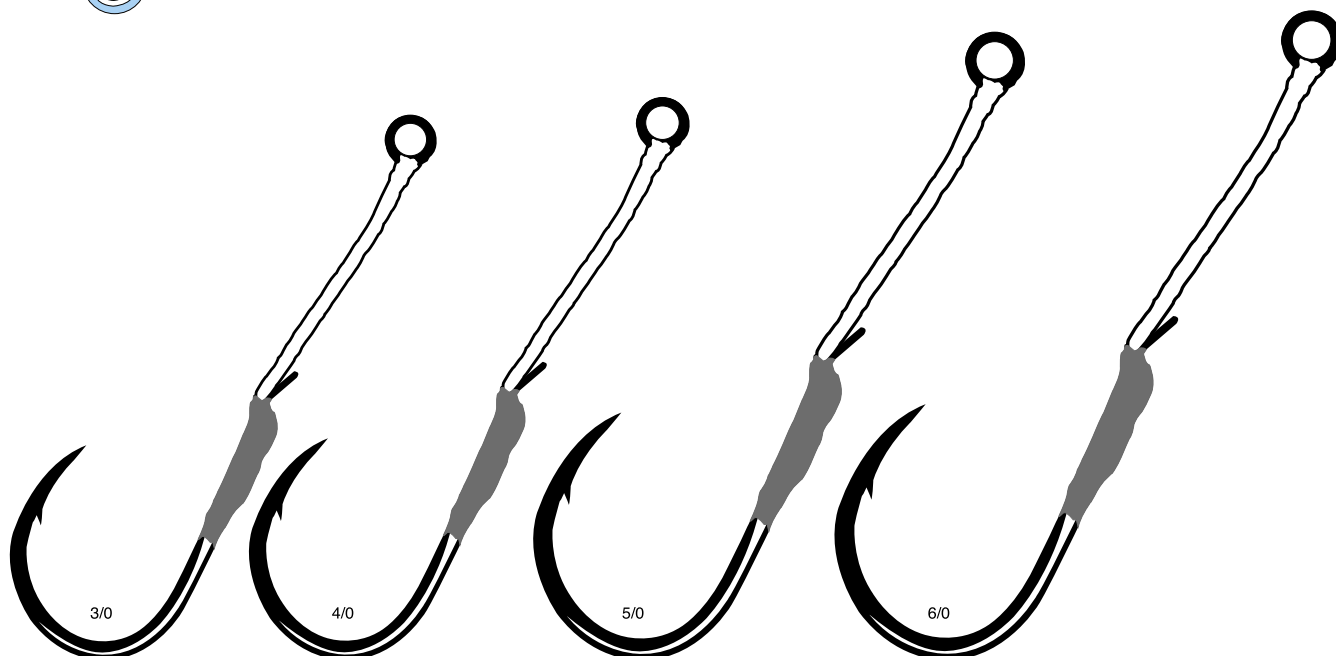

SIZES	3/0	5/0
NS Black LS	269413(2)	269415(2)

Assist 520, Ringed

In our relentless pursuit of perfection, and simplicity, we added a welded ring to our tournament-winning Assist 520 hook. The constant jigging motion is tough on looped monofilament, fluorocarbon, and braid. We took every nuance of uncertainty out of the technique by adding a welded ring. Not only is it nearly unbreakable, but the ring is also much faster and easier to connect to the jig eye using a split ring. *Rigged with 160 lb. (3/0, 4/0) and 220 lb. (5/0, 6/0) braided line.*

SIZES	3/0	4/0	5/0	6/0
Tin LS	380513(2)	380514(2)	380515(2)	380516(2)

Assist 620 Heavy Duty with Solid Ring

When you pursue the fish of a lifetime, chances are it's going to be really, really big; and have really, really, really sharp teeth. Take no chances! We call these "heavy-duty" Assist 620 hooks but they'll live up to tenacious-duty, gargantuan-duty or leviathan-duty equally as well. There's nothing stronger. One-piece solid rings make connections easy. Rigged with 270 lb. (5/0, 6/0) and 400 lb. (7/0, 8/0) braided line.

SIZES		5/0	6/0	7/0	8/0
Hypershield	LS	381515(1)	381516(1)	381517(1)	381518(1)

Assist 720 Heavy Duty

Gamakatsu calls the Assist 720 hooks "heavy-duty," but that's an understatement with these bruisers! Gamakatsu's Assist 720 Heavy Duty is the ultimate in big game fish rigging and uses an ultra-strong, incredibly sharp Gamakatsu saltwater hook. A four-strand braid of abrasion-resistant polyethylene cord provides a whopping 880-lb combined test strength, while the ring makes it fast and easy to connect the assist hook to the jig eye using a split ring.

SIZES		10/0	11/0	12/0

Treble Stinger Rig, Wire Leader

It's widely known that trailing stinger rigs are the ticket for catching short-biting walleyes when jigging in cold water conditions. For years, seasoned anglers have painstakingly tied their own stinger rigs using premium Gamakatsu hooks. Now, we've done all the work for you. Gamakatsu Treble Hook Stinger Rigs are 100% ready to use and will outlast most others on the market. A coated steel wire is machine crimped and then dipped in a durable rubberized coating; allowing it to hang perfectly behind your jig or bait. And since they're connected to a premium Gamakatsu treble hook, they'll stay sticky sharp, fish after fish, after fish. Save time. Save money. Keep fishing longer with Gamakatsu Treble Hook Stinger Rigs.

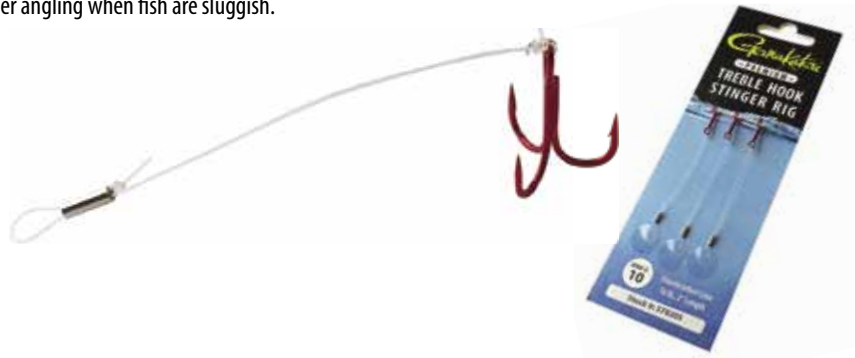

Hook Size	12	10	8	6
NS Black	364404(3)	364405(3)	364406(3)	364407(3)

Treble Stinger Rig, Fluorocarbon Leader

Bass and walleye will certainly grab hold of this stealthier version of our trailing stinger rig. We've pre-tied two inches of premium, 16-pound test fluorocarbon line instead of the coated steel wire. It works well with a wide variety of baits; however, it is most suited for trolling baits or any scenarios where fish are coming from behind and just striking the tail of the bait. Many anglers consider it mandatory for cold weather angling when fish are sluggish.

Hook Size	12	10	8
Red	378304(3)	378305(3)	378306(3)

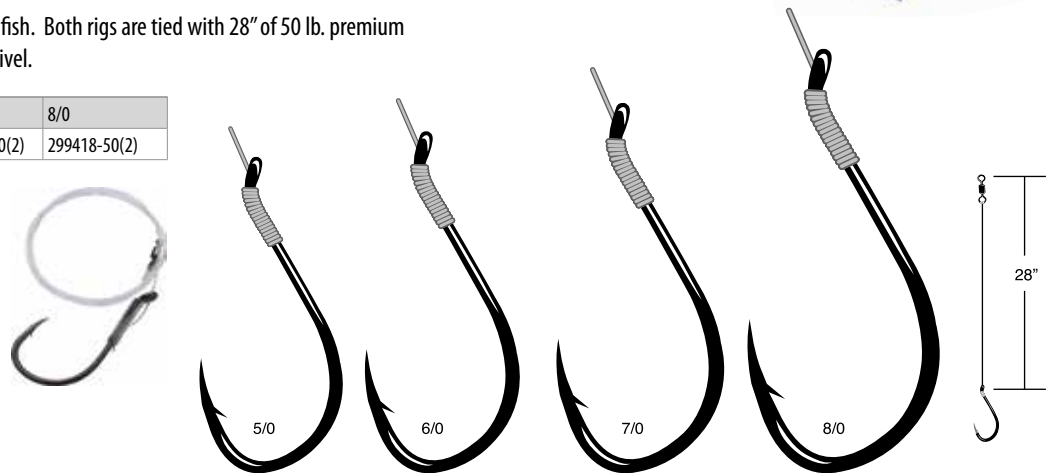

Catfish Rig

Gamakatsu has been making premium quality hooks since 1955. Every hook is made using Gamakatsu's own high quality, high carbon steel and is meticulously crafted to the highest of standards. Unlike other hook manufacturers, Gamakatsu hooks are made in their own facility which is one of the most technologically advanced in the world and their consistency is unmatched. What you'll find in this catalog are super sharp, super strong fly hooks made for the serious fly tyer and fly angler who will settle for nothing but the best. While an investment in a good fly rod, fly reel, fly line and the knowledge on how to properly use them can enhance the fly fishing experience, the hook is the one piece of equipment at the end of it all that has to hang on to the object of pursuit. Don't settle for anything less than Gamakatsu quality.

The Executive Series - The most advanced fly hook available.

Executive Series fly hooks offer some very unique designs like the R10B Retainer Bend and the C13U Keel Balance. Hooks like the S10 series of hooks have beak points that allow for effortless penetration, especially with light tippets and a slightly wider gap. They also have a shank length just a little longer than standard dry fly hooks. While the R10B and C13U are matte black, the B10S Stinger hooks and the rest of the Executive series have a beautiful NS Black finish that not only looks good, but is also very corrosion resistant. There's no other hook series like it.

- Corrosion Resistant NS Black Finish
- Beak Points
- Unique Designs

**Traditional Series - A necessity for patterns of time honored tradition.**

The Traditional Series hooks are mostly all Bronze finished, have needle points, and are designed to match up in style and size with other popular hook brands. The key difference being the quality of the steel used in them and the sharpness of the hook. The Traditional Series hooks also feature the traditional Salmon/Steelhead tapered loop up eye hooks, but in non-traditional finishes like Red in addition to the traditional NS Black finish. The styles all match, but the quality is unmatched.

- Traditional Sizing
- Traditional Bronze Finish
- Gamakatsu Strength and Sharpness

**Saltwater Series - The most complete line of saltwater fly hooks.**

By far and away the finest selection of Saltwater fly hooks available. Multiple styles featuring our most popular SC15 and other hooks ranging in sizes from 18 to 10/0. The SC15 is used for many different patterns but is also a great hook for tube flies. The SP11-3L3H makes a great popper hook. There's a hook style for every saltwater application imaginable. Every Saltwater Series fly hook is made from the highest quality high carbon steel and has a durable tin plating or NS Black finish for corrosion resistance. Because of the steel used, even the 3x strong hooks are surprisingly light for their size and their strength is unparalleled. These hooks will hold a point much better than stainless steel hooks and are sticky sharp right out of the bag. No sharpening is ever needed before fishing with a Gamakatsu hook and because they're not stainless, they will eventually corrode out of a fish's mouth if the hook is taken deep and cannot be removed. From the flats to blue water, there's no hook selection better than this.

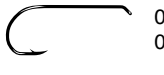

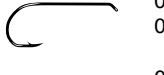

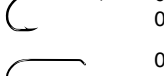

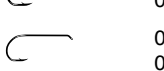

- Corrosion Resistant Tin Finish
- Multiple styles to choose from
- Innovative designs

S25S Trout Stinger Hook is an incredible offering for anglers tying and presenting flies with a straight eye.

Built with durability, sharpness and presentation in mind, the S25S is ideal for various patterns, including streamers, large nymphs and bead heads to name a few. The no-shine black finish blends into most designs, drawing attention to the fly and not the hook.

Numbering System

1) STYLE OF BEND

(S) Sproat (L) Limerick (P) Perfect (T) Tapered (C) Curve
(R) Retainer (B) Bend

B10S Stinger • Fluorescent

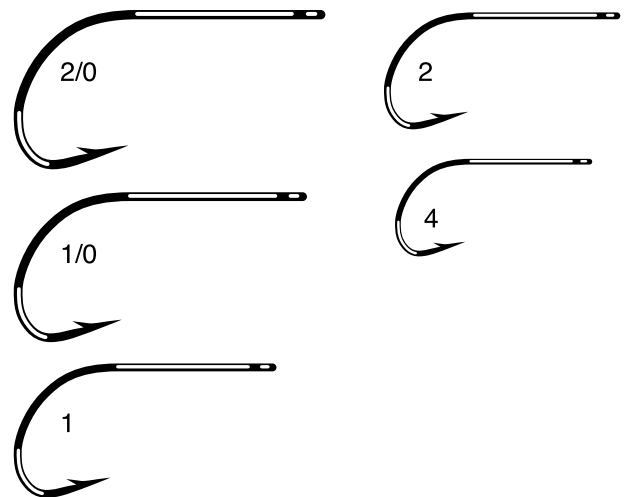

Stinger, 1x Strong Forged

Hair Bugs, Streamers

The B10S Stinger is one of Gamakatsu's most popular fly hooks and it just got better with the addition of fluorescent colors. The fluorescent UV coating provides a subtle glow which has been scientifically proven to attract fish and provides a focal point when they decide to eat.

The B10S Stinger is beneficial in both freshwater and saltwater fly patterns and the 1X strong wire gives you that extra confidence when a trophy fish is on the line.

TERMINAL

SpaMakatsu[®]

Spring Lock

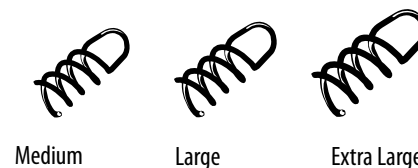

The new Gamakatsu Spring Lock makes rigging plastics easy with the stress relieved stainless steel center point. The center point makes it easy to find the exact midpoint of the bait. It's then just a simple matter of twisting the plastic on to the Spring Lock where it stays fastened and secure. Lures stay centered and run straight and true.

SIZES	Large	Extra Large
Stainless Steel	397000-L(5)	397000-XL(5)

Double Down Spring Lock

The Double Down Spring Lock features not one but two retaining wires wound in parallel, so soft plastics stay rigged as intended. Add the simple-to-rig double wire rig to a favorite Gamakatsu hook and holding power is maximized. Simply twist on your favorite soft plastic bait and know that it will stay locked on allowing it to run straight and true cast after cast.

SIZES	Medium	Large	Extra Large
Stainless Steel	431000-M(8)	431000-L(8)	431000-XL(8)

Silicone Stopper

The premium quality Silicone Stopper aids in keeping a trailer hook from getting tangled in the skirt when fishing spinnerbaits and buzzbaits. It prevents the hook from sliding up and down the hook shank, and ensures that when bass bite, they get hooked. Although designed for spinnerbaits and buzzbaits, the Silicone Stopper can be used with Texas-rigged worms, too. The only limit to their application is your imagination.

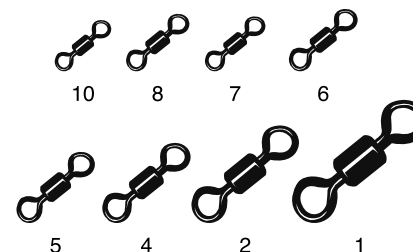

SIZES	Medium	Large	Extra Large	X Extra Large
Black	393000-M(12)	393000-L(12)	393000-XL(10)	393000-XXL(10)

Superline Swivel

The Superline Swivel is manufactured from premium components offering a superior strength to size ratio and an NS Black (nickel silver black) coating is applied for a stealthy finish that resists corrosion. Swivels are available in sizes 10 to 1, with break strengths of 35 to 330 pounds. Whether you chase Bluegill or Bigeye, Gamakatsu has a swivel for you.

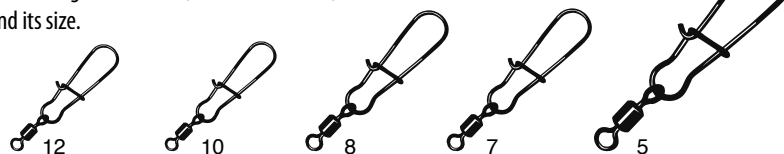

SIZES	10 (35 lb)	8 (50 lb)	7 (75 lb)	6 (80 lb)	5 (120 lb)	4 (130 lb)	2 (230 lb)	1 (330 lb)
NS Black	405400-10(10)	405400-8(8)	405400-7(8)	405400-6(8)	405400-5(8)	405400-4(8)	405400-2(6)	405400-1(5)

Duo Lock Snap with Superline Swivel

Freshwater anglers, and those employing light tackle out in saltwater will gravitate toward the lightweight Duo Lock Snap with Superline Swivel, rated from 35- to 120-pound test, in sizes from 12 to 5. Featuring an NS Black (nickel silver black) coating that provides stealth and corrosion resistance with strength beyond its size.

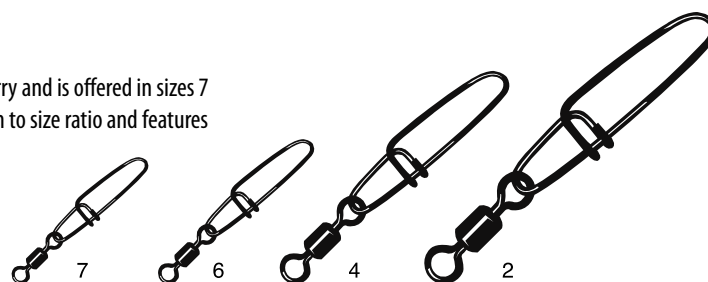

SIZES	12 (35 lb)	10 (35 lb)	8 (50 lb)	7 (75 lb)	5 (120 lb)
NS Black	406400-12(5)	406400-10(5)	406400-8(5)	406400-7(5)	406400-5(5)

Cross Lock Snap with Superline Swivel

The Cross Lock Snap with Superline Swivel was designed for anglers chasing larger quarry and is offered in sizes 7 through 2 rated from 75 to 230 pounds. This heavy-duty version offers superior strength to size ratio and features an NS Black (nickel silver black) coating providing a stealthy presentation.

SIZES	7(75 lb)	6(80 lb)	4(130 lb)	2(230 lb)
NS Black	407400-7(4)	407400-6(4)	407400-4(4)	407400-2(4)

Superline Split Ring

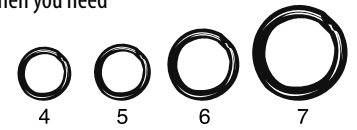

The new Superline Split Ring is available in sizes to outfit everything from panfish spinners to baits intended for hard-chargers such as roosterfish. The Japanese-made split ring is constructed of high strength stainless steel giving you confidence that it can handle that trophy catch. All of the edges are rounded, preventing wear on your line during the most intense battle.

SIZES	1 (10 lb)	2 (18 lb)	3 (44 lb)	4 (48 lb)	5 (97 lb)	6 (130 lb)	7 (180 lb)	8 (255 lb)
Stainless Steel	408000-1(12)	408000-2(12)	408000-3(12)	408000-4(10)	408000-5(9)	408000-6(8)	408000-7(7)	408000-8(5)

Superline Solid Ring

Gamakatsu's new Superline Solid Ring is the perfect complement to their line of assist hooks, providing a solid connection that even the most headstrong tuna can't bust. The solid ring is completely rounded to keep your line in good shape as the battle enters extra innings. When you need to apply extra pressure on that fish of a lifetime, the welded high strength stainless steel construction won't let you down.

SIZES	4 (200 lb)	5 (350 lb)	6 (400 lb)	7 (700 lb)
Stainless Steel	409000-4(10)	409000-5(8)	409000-6(7)	409000-7(6)

- Easily opened with one hand.
- Does not open when dropped.
- Tackle stays in place and does not go to other compartments.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3200

Micro Rib System - Micro Adjustable Dividers

**G-Box 3200D Deep Utility Case**

The G-Box 3200D Deep Utility Case features the single-hand, easy-open lid clasp and offers adjustable storage with micro-slit compartmental dividers. This feature allows the angler to adjust each bin size to fit specific gear. Tight tolerances ensure that small terminal tackle doesn't jump from one compartment to the other. The 3200D is made in Japan and is an excellent storage solution for both terminal tackle and lures.

- Size 8.1" x 5.7" X 2.4"
- Great for terminal tackle and small lures.
- Micro Rib System- Micro Adjustable Dividers.
- Easily opened with one hand.
- Does not open when dropped.
- Tackle stays in place and does not go to other compartments.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3200D

**G-Box Reversible 3200 Utility Case**

Gamakatsu takes tackle storage to the next level with the new G-Box 3200 Reversible Utility Case. The innovative design places a lid on both sides of the box, effectively creating two separate containers in one unit. Each side of the G-Box 3200 Reversible Utility Case has its own lid, doubling tangle-free storage space in each container. The new design features V-shaped dividers that keep saltwater jigs, crankbaits and other favorites organized and ready to go. Stash a different type of lure on each side and switch fishing styles with a flip of a box. Wide, locking latches keep the boxes securely shut even if they bounce along in the boat or your bag.

- Size 8.1" x 5.7" X 2"
- Opens on both sides of the box
- Easily opened with one hand.
- Does not open when dropped.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3200RV

G-Box 3500D Deep Utility Case

The G-Box 3500 is nearly 2.4" deep, so big-lipped and fat-bodied, baits fit with ease. It's 7.4" wide to accommodate stick baits, long spinners and spinner blades. The clear top lets you see what's inside and the one-handed, easy-opening design makes access exceptionally convenient. Of course, the dividers are fully adjustable too

- Size 10" x 7.4" x 2.4".
- Great for plastic baits and hardbaits.
- Micro Rib System- Micro Adjustable Dividers.
- Easily opened with one hand.
- Does not open when dropped.
- Adjustable Layout Vertically and Horizontally.
- Tackle stays in place and does not go to other compartments.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3500D

G-Box 3600, Utility Case

- Size 10.8" x 7.4" x 1.7".
- Great for plastic baits and hardbaits.
- Micro Rib System- Micro Adjustable Dividers.
- Easily opened with one hand.
- Does not open when dropped.
- Adjustable Layout Vertically and Horizontally.
- Tackle stays in place and does not go to other compartments.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3600

G-Box Reversible 3600 Utility Case

Gamakatsu takes tackle storage to the next level with the new G-Box 3600 Reversible Utility Case. The innovative design places a lid on both sides of the box, effectively creating two separate containers in one unit. Each side of the G-Box 3600 Reversible Utility Case has its own lid, doubling tangle-free storage space in each container. The new design features V-shaped dividers that keep saltwater jigs, crankbaits and other favorites organized and ready to go. Stash a different type of lure on each side and switch fishing styles with a flip of a box. Wide, locking latches keep the boxes securely shut even if they bounce along in the boat or your bag.

- Size 10" x 7.5" x 2.4"
- Opens on both sides of the box
- Easily opened with one hand.

**G-Box 3700D Deep Utility Case**

The G-Box 3700D Deep Utility Case is perfect for those larger bulky lures and features the single-hand, easy-open lid clasp. Adjustable storage with micro-slit compartmental dividers allows the angler to adjust each bin size to fit specific gear. Tight tolerances ensure that small terminal tackle doesn't jump from one compartment to the other. The 3700D is made in Japan and is an excellent storage solution for a variety of larger tackle.

- 14" x 9" x 3.2"
- Great for terminal tackle and small lures.
- Micro Rib System- Micro Adjustable Dividers.
- Easily opened with one hand.
- Does not open when dropped.
- Tackle stays in place and does not go to other compartments.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3700D

**G-Box 3700D2 Deep Utility Case**

The G-Box 3700D2 Deep Utility Case features an open box layout with no dividers so anglers can easily stash bulky items like pliers, de-hooking tools, or bulk soft plastics. The hard shell keeps items protected, while the single-hand, easy-open lid clasp allows for easy access. In addition, the lid's tight tolerances ensure even small items can't work their way out when the boat encounters some chop or the road turns rough.

- 14" x 9" x 3.2"
- Great for large bulky items.
- Easily opened with one hand.
- Does not open when dropped.
- Rounded corners easy to get out of tackle bags or boat compartments.

Item #G3700D2

Item #G388DD

G-Case 7000

The G-Case 7000 is an ultra-durable, hard-sided tackle storage case that is compatible with G-Boxes in all sizes, creating a flexible system that has endless storage configuration possibilities. The G-Case 7000 utilizes a strong, sturdy handle and the lid can be opened from either side, allowing for quick access. The interior has an open tray for loose items like line spools and tools. Add the optional rod stand, jig compartment, and shoulder strap to transform the G-Case 7000 into a real-time fishing asset.

- Size 19" x 13" x 13"

Item #G7000

G-Case 7000 Jig Compartment

Anglers are always changing lures and cycling through gear, and the optional exterior side mounted jig compartment attaches securely to the G-Case 7000 and offers an open, top-slotted compartment for quick access to your go-to lures. Store and dry them after use as well before moving lures back into permanent G-Box utility cases. This exterior storage option is a time saver when quick changes are needed in the field.

- Size 10 x 5.7 x 2.2

Item #G7000-JC

G-Case 7000 Rod Stand

The G-Case 7000 has three different positions on either side to attach the optional rod stand. A simple mounting bracket makes a firm connection, transforming the case into a rod holder with a permanent locking mechanism. The rod stand offers rod height adjustments to hold a variety of rod types. In addition, the rod stand features an adjustable foot, making it a sturdy base for the G-Case.

- Size 2.6 x 2.8 x 13

Item #G7000-RS

G-Case 7000 Shoulder Strap

If you need to free up your hands while trying to carry all your gear simply add the optional shoulder strap to make carrying the G-Case 7000 a breeze.

- Size 1.5" x 79"

Item #G7000-SS

G-Bag EWM 5000 H Tackle Bag

The G-Bag EWM 5000 H Tackle Bag features an Extra Wide Mouth (EWM) opening for easy access. An internal wire frame keeps the main compartment in the open position allowing anglers to sort through their tackle and find that perfect bait with ease. Anglers can fit up to five Gamakatsu G-Box 3700 or eight 3600 utility cases inside. A quick-access magnetic front pocket flap also stays in an open position, letting anglers effortlessly grab often needed items from the handy pocket. The durable, 1680 denier polyester construction stands up to a rough life on the water, with a water- and slip-resistant EVA molded base that protects the contents against moisture.

16" x 11" x 13.25" • Item #GB-EWM-5000H

NEW

G-Bag EWM 300 Tackle Bag

The G-Bag EWM 300 is the largest size in the lineup and is designed to carry a variety of tackle comfortably, thanks to the adjustable, padded removable shoulder strap. The generous 13 x 8.5 x 11-inch bag lets anglers stockpile all of their finesse baits and power fishing lures in the same place so they can be prepared for anything. Stuff up to four Gamakatsu G-Box 3600 or eight 3200 utility cases into the G-Bag EWM 300 using the innovative Extra Wide Mouth opening. 13 x 8.5 x 11 • Item #GB-EWM-300

NEW

G-Bag EWM 200 Tackle Bag

The G-Bag EWM 200 Tackle Bag stows more gear using the same innovative easy-access stay-open top. The 9.5 x 5 x 7-inch size easily accommodates magnum packs of soft plastics and oversized bulk bags, so that anglers can stash their largest swimbaits or enough tubes for the season in one convenient location. In addition, there's enough space to store a wide variety of tackle and gear, so anglers can keep rigging tools and other essentials handy as well. 9.5 x 5 x 7 • Item #GB-EWM-200

NEW

**G-Bag EWM 100 Tackle Bag**

The G-Bag EWM 100, is the perfect size for holding a variety of soft plastic packs. The Extra Wide Mouth (EWM) provides easy access to the interior, and the internal wire frame keeps the top open while finding the right bait. The 8 x 4 x 6-inch size stows easily in other bags, and anglers can take as many as needed while remaining organized. Pick up a few and keep all smaller items organized and ready.

8 x 4 x 6 • Item #GB-EWM-100

NEW

Shoulder Bag Tackle Storage

The perfect mobile storage solution when you're on the go and need fast, easy access to your gear. Designed for over-the-shoulder carrying: Swing bag to your chest for access, swing around to your back when walking, casting or battling fish. Includes two (2) G3200 G-Boxes in the main compartment and features multiple, heavy-duty zippered pockets to store everything else. The 1680 denier ballistic nylon is tough so it will hold up for years of use and the padded shoulder strap is adjustable for length.

Item #BAG006

Backpack Tackle Storage

When you need to carry enough tackle for wherever your angling adventure may lead you, strap on our Backpack Tackle Storage solution. Made from 1680 Denier Ballistic Nylon, it's tough, light and easy to carry. The interior pouch can be adjusted from one large compartment to two smaller ones. Exterior carry pockets on both sides are designed to hold fishing rods or water bottles. Includes two (2) G3600 and one (1) G3500D G-Boxes.

- Dimensions: 17" x 12" x 8".
- Backpack design with adjustable waist strap.
- Comfortable 3d mesh padding.

Item #BAG005

G-Finesse Dry Bag Backpack

Secure your gear and keep it dry with our Waterproof Backpack. Double sealed seams are impervious to moisture even when submerged. The top closures open wide for easy access, then roll down tight and buckles quick to protect contents. Padded shoulder straps and waist belt complete the package.

- Waterproof PVC Material.
- Backpack design with adjustable waist strap.
- Velcro and latch closure cinches down for water tight transport.

Item #BAG001

Hybrid Duffel Backpack 110L

Gamakatsu's water-resistant Hybrid Duffel Backpack offers 110 liters of space to take gear wherever anglers may roam. The innovative pack can be carried in three different ways, thanks to the removable backpack straps, shoulder strap, or side-carrying handle. The main opening provides easy access to the pack's contents. The large, zippered internal pocket and zippered mesh pocket inside the main compartment opening keeps everything organized. The exterior zippered storage pocket and MOLLE-type webbing for attaching and securing gear further add to the organizing potential. The pack folds into itself for compact storage when not in use.

30 x 15.5 x 13 • Item #GB-DF-110

NEW

Rolling Gear Duffel 90L

For those that prefer to roll along, Gamakatsu offers the Rolling Gear Duffel. The pair of sturdy wheels allow for easy transport of 90 liters of belongings. When anglers decide to pick it up, use the adjustable, removable padded shoulder strap or padded handles to carry in comfort. An external zippered pocket and a large inner zippered pocket keep things tidy. Water-resistant construction keeps the elements at bay, so anglers won't have to worry about rain clouds or rough boat rides. A convenient carrying case allows compact storage when anglers are not on the road or at the lake.

27 x 15.5 x 13 • Item #GB-DF-90

NEW

Gear Duffel 30L

When anglers don't have a ton of stuff to tote around, Gamakatsu's water-resistant 30-liter Gear Duffel would be the best to pack up. The large main opening is secured with heavy-duty zippers for easy access, with an external zippered pocket that keeps oft-needed items at the ready. A separate, outer zippered access compartment for dirty clothes or gear keeps anglers clean stuff clean. An adjustable, padded removable shoulder strap lets anglers carry stuff hands-free, though the hook and loop fastener on the main carrying handles works as well.

Item #GB-DF-30

NEW

Tuna Dry Bag Backpack

Designed specifically for teams competing in the Los Cabos Tuna Jackpot, these highly-coveted drybag backpacks are now available for all. This mid-sized, extra-tough, ultra-dry backpack is perfect for storing clothes and gear on those wet and wild offshore runs. Made from ballistic nylon, it will take a beating without putting the contents in jeopardy. The interior pouch is wide open to fit boots, rain gear, bulky jackets or heaps of tackle. Easy to carry with padded straps and waist belt. Compacts tightly for storage when not in use.

- Waterproof PVC Material.
- Backpack design with adjustable waist strap.
- Velcro and latch closure cinches down for water tight transport.

Item #BAG002

TOOLS AND ACCESSORIES

Spinnaker[®]

Fishing Pliers 6"

Made of stainless steel to ward off corrosion and rust, Gamakatsu's heavy-duty pliers will become the tool you reach for whether you're an avid salt or freshwater angler. The Gamakatsu Stainless Steel Pliers have precise crimping jaws to fit various sizes of sleeves. The precision split ring feature on the needle nose tool makes changing or replacing split rings easy. The multi-tasking jaws on the pliers are able to cut braid, mono or fluorocarbon, and also feature a PTFE coating to aid against corrosion and rust. The handles feature a non-slip grip that helps you hold on during wet conditions. Included is a lanyard and sheath so the pliers are right where you need them. Item #P002

Fishing Pliers 7"

Made of stainless steel to ward off corrosion and rust, Gamakatsu's heavy-duty pliers will become the tool you reach for whether you're an avid salt or freshwater angler. The Gamakatsu Stainless Steel Pliers have precise crimping jaws to fit various sizes of sleeves. The precision split ring feature on the needle nose tool makes changing or replacing split rings easy. The multi-tasking jaws on the pliers utilize an outside cutter and are able to cut braid, mono or fluorocarbon, and also feature a PTFE coating to aid against corrosion and rust. The handles feature a non-slip grip that helps you hold on during wet conditions. Included is a lanyard and sheath so the pliers are right where you need them. Item #P003

Fishing Pliers 9" 45 Degree

Gamakatsu introduces the longest-length pliers to join the lineup, the 9-inch pliers. These pliers are similar to the popular 6 and 7-inch pliers, but Gamakatsu added a 45-degree angle to provide a comfortable position for various tasks. Say goodbye to awkward angles and hello to an ergonomic, reliable tool. The precision split ring feature on the needle nose tool makes changing or replacing split rings easy. The multi-tasking jaws on the pliers utilize an outside cutter and are able to cut braid, mono or fluorocarbon, and also feature a PTFE coating to aid against corrosion and rust. The handles feature a non-slip grip that helps you hold on during wet conditions. Included is a lanyard and sheath so the pliers are right where you need them. Item #P005

Micro Split Ring Plier

The 5-inch long pliers are made from stainless steel and feature a premium non-slip grip giving anglers a secure hold for fine operations like manipulating split rings. A spring in the handle holds the pliers open during use, and a corresponding lock keeps them closed for storage. Its precision micro-tip grips and opens super small split rings, and it is just as effective on large ones, too. A built-in braided line cutter cleanly shears tough fishing line. Item #P004

Folding Braid Scissors w/ Split Ring Opener

The Folding Braid Scissors with Split Ring Opener is a compact multi-function fishing scissor with similar construction elements as other Gamakatsu fishing tools. Its sharp stainless-steel blades will provide years of hard use snipping mono and cutting braided fishing line. The scissor’s tips feature a handy split ring opener. The blades fold safely into the tool’s blue handles for safe storage. When open, the 4-inch scissors proudly display the Gamakatsu name. A quality tool at a value-price.

Item #SC001

Gamakatsu Microfiber Towel

Gamakatsu throws in the towel on fish slime, scales and other grime that can prevent you from getting a solid grip on your rod. Keep your hands clean and ready to fish with Gamakatsu’s new Microfiber Towel. The absorbent microfiber construction of the Microfiber Towel efficiently cleans and dries hands in one pass, so that you can get back to fishing quickly. 12” x 12” Item #TW30

Gamakatsu Fingertip Protector

Protects your finger from the abuse of stripping line all day. One size.

Updated with new Kevlar reinforced finger protection.

Item #GF003(1)

Gamakatsu Luxxe Fishing Line

A PE based filament, that is much stronger than classic braided line. It is a 4 strand braided line, along with the PE fibers makes it more abrasion resistant and has less memory. In turn the benefits are less tangles, and better casting distances. Available in the following test # 8, 10, 12, 14, 16.
