TOOLING FOR SWISS-TYPE CNC MACHINES

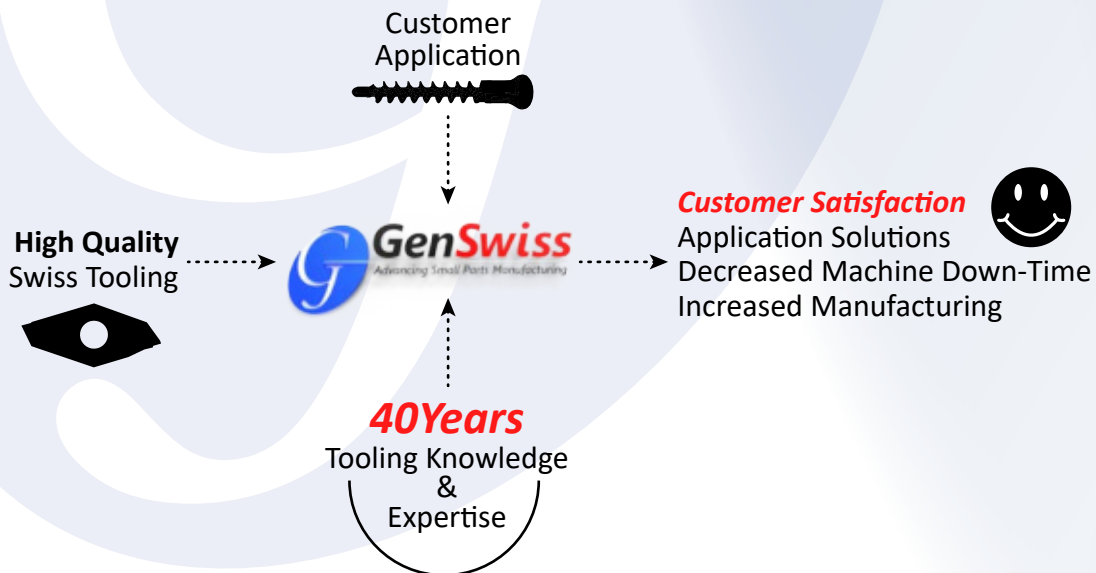

www.genswiss.com

Westfield, MA, USA

Genevieve Swiss Industries, Inc. brings to market unique high precision tools and accessories, advancing small parts manufacturing and enhancing Swiss-type machine processes. Our high quality product line of cutting tools, machine tool holders, and live spindles are imported from Switzerland's primarily world-class manufacturers UTILIS AG and PCM Willen SA.

With more than 40-years of experience in the industry, GenSwiss aims to improve distribution efficiencies and increase manufacturing productivity. We strive to deliver products which meet or exceeds customer expectations, providing a reliable service with application solutions for YOUR critical small parts manufacturing.

Precision Tools

- High quality for extended tool life
- Quick setup times
- Low TIR's and tight tolerances
- Thousands of tools available
- Signature Series made in-house
- Custom tooling available

Customer Service & Sales Team

- Our skilled staff is dedicated to providing you with the tooling and assistance you require
- The GenSwiss team visits our distributor network to support our partners and learn how we can better provide or improve the GenSwiss experience
- Instant access to inventory allows our team to provide immediate lead times and pricing

Tooling Application Assistance

- 40 years of industry experience
- Knowledge of the benefits and disadvantages for all available tooling systems
- GenSwiss will find the right combination of tools for your application to optimize the best tool life with cost savings

Live Tooling Repairs & Restoration

- Live swiss machine attachments restored to factory specification
- PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS
- \$50.00 evaluation & inspection
- Save money by shipping to GenSwiss instead of overseas

GenSwiss E-Commerce

- See product inventory 24/7
- Get instant pricing 24/7
- Track orders
- Place custom tooling orders via online forms

ROTARY BROACHING

GUIDE

Rotary Broaching is a fast and easy method of producing polygonal drive features in turned parts. Genevieve Swiss offers Premium Rotary Broaching products from PCM, the European industry leader in rotary broaching tools.

A Guide To Internal Rotary Broaching

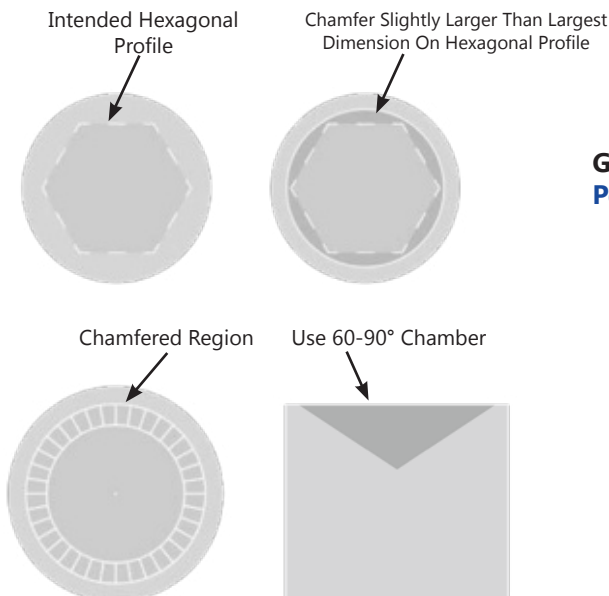

During the rotary broach operation, the broach tool approaches the work piece at a small angle. The tool spins synchronously with the part, creating a wobble effect that causes the leading cutting edge to rotate in and out of the cut like a cam. This method shapes internal and external polygonal profiles at a single-point. Compared to punch forming, which shapes the entire profile at once, rotary broaching requires 80% less force, offers increased tool life, and lowers machine maintenance cost over time.

The advantages offered by rotary broaching result from proper preparation prior to the broaching operation. The most important part of this preparation includes drilling a hole which allows for broached material to accumulate, preventing damage to the broach tool and machine. Continue with the guide below for some important tips on rotary broaching.

Preparing To Broach A Hole

First, prepare the hole with a 60° - 90° chamfer slightly bigger than the largest dimension of the broach tool. A chamfer provides a guide for the broach tool.

GenSwiss Spot Drills
Pgs. 46-47

Drilling The Hole

For internal broaching, the diameter of the hole should be 1 percent larger than the diameter across the flats of the broach's hex shape and drilled as deep as possible. A depth of 1.3 to 1.5 times the depth of the broached profile is recommended. Drilling to this depth is vital, leaving room for material accumulation during the broaching process. If material accumulates during the drilling process, re-drill the hole with a smaller drill.

If Drill Radius Is Not Allowed

Many medical and aerospace applications do not allow for a drill radius along the broached walls of the part. When exact concentricity is required, chamfer, drill, and then pre-bore the hole. Using a micro-bore allows for extra control and accuracy. The use of a drill might lead to inaccuracies due to deflection and other conditions.

NOTE: Broaching into a tight hole will not allow air or coolant to escape, resulting in a build up of pressure. This can cause the part or tool to push back, damaging the tool or machine. Use a GenSwiss broach that has a pressure relief vent.

Broaching The Hole

Rotary broach holders hold the broach tool at a 1° angle relative to the centerline of the workpiece. As the broach holder rotates, the broach tool is pushed into the pre-drilled hole. During the beginning of broaching, when the broach is touching the material, the edges could break if the speed is too high.

For best results, start the broach operation at a slow rotation, and then increase the speed when it is in full contact. We recommend for the first 1mm a reduced speed of 500 rpm max.

The feed rate mainly depends on the material characteristics. In mild steel, 0.0012 to 0.0024 inches per revolution is recommended. If the machine thrust force is sufficient, the feed can be doubled as machinability increases. In most cases the maximum feed rate should not exceed 0.03 times the profile diameter. A slower feed rate will produce an improved finish with finer lines along the sidewalls of the broached hole. By increasing the feed rate, the cutting cycle will be faster, but the broaching lines will be more pronounced, leaving a coarse finish. **We do not recommend speeds over 2,000 rpm.**

Call us 413-562-4800 for more information on Rotary Broaching

The Original Swiss-Type Rotary Broach Holder

- Max thrust force: 2250lbs
- Uses 8x28mm broaches
- Recommended profile size .050" to .375"

2160 Series Rotary Broach Holder

The ORIGINAL and best choice for Swiss machines and precision lathes! The 2160 series Swiss-type rotary broach holder is the premier choice for performing broaching applications in your Swiss-type CNC machine or gang-style lathe. It eliminates the need to indicate for center location. The recommended profile size range for this holder is .050" to .375"

Key Features

- No center indicating required
- Ideal for medical & aerospace fastener applications
- Low profile; fits machines with minimal interference
- Shank length is customizable, No need for bushings
- Short head length is ideal for sub-spindle applications
- Longer OAL broach tools can be used by adjusting X-axis

6180 / 6181 Series Holder

- Adjustable broaching holder designed for CNC Lathes & Turning centers
- Can be adapted with a special die to produce external broach forms such as splines
- Max thrust force: 2700lbs
- Uses 8mm shank broaches

Hex cap screws enable easier locking of adjustment settings

Four quadrant micro adjustability enables easiest center locating for better broach results

6190 / 6191 Series Holder

- Adjustable broaching holder designed for the largest of turning centers and CNC lathes
- This broaching holder features a robust bearing configuration to withstand the high forces required to attain some of the largest of broach profiles
- Max thrust force: 9000lbs
- Uses 12mm shank broaches

Static Punch Holders

When special ID forms are required on your Swiss-style machining jobs, look to our static punch broach holders for ease of use, repeatability and rigidity. Our holders are able to position a broach form tool at a known location for timing or positioning of the broached profile.

*Only applies when standard 2110 series or 0828 series broaches are used

SIGNATURE SERIES ROTARY BROACH TOOLS

GenSwiss' premium rotary broach tools deliver consistent high-performance cutting for industries requiring the highest degree of standards. Each tool is precision ground to ultra-high standards and features geometries designed specifically for the material type in which each broach will be used. These tools are engineered and manufactured to be utilized in the aerospace industry, medical industry, or any industry requiring the highest standards for inspection.

UTILIS
multidec[®]
 swiss type tools
Micro-Bore

Multi-Faceted Neck Reduces Vibration, Allowing Deeper Penetration

Over 15 Different Cutting Geometries Available

Precision Holder Enables High Repeatability, Less Than .0004"

All Micro-Bore Tools are Coolant-Thru

Fine Pitch Threaded Nut Only Requires Hand Tightening

**Now Available In
 UHM 20 TX+**

Complete Micro-Boring System

The multidec[®] micro-bore system is a complete I.D. working system that can perform boring, grooving, profiling, chamfering, threading and more.

GenCut[®] Spot Drills

Highly repeatable, carbide ground inserts make old fashioned center drills obsolete for performing spotting operations. Precision ground carbide inserts repeat within +/- .0004", thus eliminating the need to adjust the axial location of the tool, unlike conventional spot tooling held by collets. The system also simplifies tool changing in that it only requires a torx wrench for insert removal. This eliminates the need for collet wrenches, reducing the chance of accidental tool breakage or personal injury.

Versatile tools that can:

Insert Sizes:

All 60° inserts feature a radial relief grind for spotting of small holes starting with an ID of .010". Note: 60° inserts do not conform to the standard insert max Ø and are intended for micro spotting only.

Reduces the Need for Collet Wrenches During Routine Tool Changes

Example Ordering Nomenclature: SDI-2060-PRF-TiN Spot Drill Insert, #2 Size, 60 Degree Point Angle, Positive Geometry, Right Hand, (Fine).005" Web Thickness, TiN coated

**True
 Orbital/
 Float**

- Simplifies Small Hole Reaming
- Prevents Breakage of Expensive Micro Reamers
- Fits Into the Smallest Swiss Machines
- Compensates for Hole Misalignment

Designed with "True Orbital Float" capability, the micro reamer holder aligns the reamer perfectly to the drilled hole enabling better size control, reduces "bell-mouthing", and increases tool life.

ADVANCED PRECISION MICRO TOOL HOLDERS

TIR <.0002 inch

Perfect Concentricity For Micro Drills

Look to **GenSwiss Micro Drill Holders** for a new standard in holding micro drills in CNC Swiss Machines and Precision Lathes.

Take the **NEXT STEP** in precision micro drilling performance to meet today's ever changing demands for high performance, tight tolerance, micro parts production.

Advanced Precision Collet Sleeves

Nut

Item No.	Description
1017-000100	CN-CHK

Wrench

Item No.	Description
1035-000114	CW-CHK 14mm

****Note: (1) Clamping Nut and Wrench Required****

MICRO DRILLS

GenSwiss Micro Drills are a cost-effective solution for hard-to-find small diameter solid carbide micro drills and micro spotting tools. Swiss-style precision ensures maximum reliability, accuracy and finish results. When consistency of hole tolerance control is paramount, look to GenSwiss Micro Drills.

Sizes From .1mm (.004in) Up To 3mm (.1181in)

Precision Ground & Finished

Makes Use Of Readily Available ER Collets

Micro Drill Series Descriptions

Series	Material	Depth	Flute Ø	Flute Length	Drill Point	Helix	# of Flutes	Tolerance	Coolant-Thru
3610	HSS	2-3 x Ø	0.20-3.0mm	0.6-5.3mm	120°	35°	2	h6	No

See the following pages for part numbers and sizes

Ti-Loc Tool Holder

- Enables micro tools to clear the guide bushing
- Maintains exceptional TIR at extended length
- Solves deflection and chatter issues
- Available in ER8, ER11, ER16, ER20, & ER25 sizes

See Page 108

SIGNATURE SERIES

Mini Boring System

with Anti-Vibration Technology

Multiple Insert Types

35 and 80 degree rhombic and trigon inserts available with several coating types.

Adaptable Shank Sizes

Coolant-thru bushings are available to fit boring holders to almost any static tool holder diameter.

Coolant-Thru

Every insert-style boring holder has coolant-thru capability.

GenSwiss' new mini boring line provides a method of creating ID features that utilize easy to change ISO style turning inserts and round shank holders.

Inserts come in 3 geometries: 35 degree rhombic, 80 degree rhombic, and 80 degree trigon. Several chip breaker geometries and coatings are available, ideal for cutting materials such as carbon alloy steels, stainless steels, cast iron, and aluminum alloys.

Available solid carbide insert holders provide enhanced vibration dampening to ensure tool cutting accuracy. Each holder features coolant-thru outlets and shank diameters down to 4.8mm. Boring holders can be paired with a GenSwiss bushing for easy mounting to static round shank tool holders.

Holders Are Available With Various Cutting Angles

Down to Min bore diameter .189 inch (4.8mm)

MULTIDEC[®] - THREAD MILL

multidec[®] thread mill tools are a versatile way for creating metric or UNC/UNF spec threaded forms. Since thread milling uses helical-interpolation tool paths, the same thread mill can be used to create left or right handed threads. multidec[®] thread mill tools come standard with 3 flutes and have the options for 1 or 2 teeth with long or short shanks. Strengthened shank mill tools are available for increased rigidity and decreased deflection.

The GenBore[®]-mini

The GenBore-mini is an excellent solution for when you need to incorporate additional small ID tools into your setup. Low profile and interference-free in most Swiss machines, the GenBore-mini is ideal for small ID spotting, drilling, and boring.

- Effective solution for increasing ID tools capacity
- Interference-free design for smaller machines
- Accurately locates small shank ID tooling
- Custom options available - call for details

SIGNATURE SERIES COLLET SLEEVES

ER-style precision collet sleeves provide rigid and accurate holding for ID tooling. Machined from medium carbon alloy steel. These collet sleeves feature ground shanks and tapers. Mini-nuts are used to reduce interference and to make setup and tool changing easier than other collet sleeves with hexagonal clamping nuts.

Coolant-thru Internal Stop Screw
Prevents Tool Pushback

DRILL BUSHINGS

GenSwiss drill sleeves are a new product designed and manufactured by GenSwiss. These sleeves have precision ground inch and metric shanks and are a robust method for holding drills to tight tolerances. Each GenSwiss drill sleeve features coolant-thru holes, enabling coolant delivery to your coolant-thru drills. Standard tool bore sizes range from 3-8mm, but drill sleeves can be made to order.

GENQUICK

QUICK-CHANGE TOOL HOLDING SOLUTIONS

The GenQuick tooling system helps new users as well as seasoned veterans achieve faster setups and tool changes through the use of tool holder adaptors and quick-change modules that can be preset and are based on the ER standard tool holding system.

These collet sleeves are cost effective solutions to tool holding and are available in a variety of both inch and metric sized shank diameters, and feature a solid shank for rigidity and a side coolant port for connection to a high-pressure coolant delivery system. Every unit has a notched collet taper for easy tool orientation when combined with quick-change boring bar adapters.

QUICK-CHANGE COLLET ADAPTERS

Quick-Change collet adapters make it easier to control quality in your shop. These adapters make it simple to have preset tooling available, eliminating the need to touch off the tool after a routine change. This also enables less experienced machine operators to be more productive.

- Simplifies setup
- Decreases downtime

QUICK-CHANGE BORING ADAPTERS

Quick-Change Boring adaptors make it fast and simple to locate center position for boring bars when combined with notched ER holders. A simple locating pin rests within the notched holder ensuring accurate centering. These solid bushings utilize the ER collet system to securely hold a boring bar in a rigid fashion. Axial length can be easily set using any form of presetting device.

- Easily locates boring bar axial & radial position

EzR Swiss Clamp System

Upgrade your current tool holders with "EzR Swiss Clamp" ER Collet clamping nuts from GenSwiss.

- Eliminates wrench slippage
- Prevents accidental tool breakage
- Prevents injury to machine operator
- Eliminates the loss of clamping nuts

Clamping Nut

Wrench Adapter

The EzR wrench adapter engages and locks to the EzR clamping nut using a specialized cam system.

Extended Wrench Adapter

Specialized cam system delivers positive torque to the nut while eliminating slipping of the wrench.

EzR extended wrench adapter clears sharp tooling, keeping your hands safe from injury while enabling accurate tightening of ER Tooling.

EzR Swiss clamp nuts can be tightened using standard box wrenches or 3/8" drive ratcheting socket wrenches when combined with the positive locking EzR extended wrench adapters or EzR wrench adapters.

NEVER drop an ER clamping nut
in your machine sump again!

EzR Swiss Clamp Nuts

Replaces standard Mini-Nuts.

Swiss Made by

Tapping Collets

PCM floating tapping collets are an economical solution to replace expensive tapping sleeves and eliminate tapping error. Ideal for use on machines that do not have a rigid tapping function.

The ET1 floating tap collets can also be used with rigid tapping function to compensate for pitch error due to the torsional stress that can occur on small taps eliminating the difference between the tap and the CNC.

IMPORTANT!

ER11 Hi-Q® Mini nuts feature built-in coolant seal. Specify tool diameter when ordering - Available Size Range: 3mm - 7mm

Collet Reductions

Enables reduction of collet sizes while also presetting tools. These collet reductions come with REGO-FIX Mini Nuts.

Item No.	Description	Shank / Live Tooling Size	ER Collet Size	Nut Type
1045-000299	CQS-ER11-8M	ER11	ER8	Mini Nut
1045-000256	CQS-ER16-11M	ER16	ER11	Mini Nut
1045-000301	CQS-ER20-16M	ER20	ER16	Mini Nut
1045-000218	CQS-ER25-16M	ER25	ER16	Mini Nut
1045-000295	CQS-ER25-20M	ER25	ER20	Mini Nut

Ti-Loc® Mill Extension Shown

ReCool Nut

Enables coolant-thru capability for non-coolant-thru holders and live tooling. REGO-FIX's ReCool Nut pairs well with GenSwiss' Ti-Loc® endmill extensions. The coolant input requires a G1/8 fitting.

ER11, ER16, ER20, ER25, & ER32 Sizes Available

Collet Sleeve Bushings

Precision Reduction Sleeves are an inexpensive alternative to purchasing additional collet holders & tooling.

multidec®-Cut 3000 Series

Swiss Made UTILIS World Class tools deliver proven production performance and extended tool life. All 3000 series inserts feature a wide variety of chip breaker geometries and will fit the same holder, reducing tooling costs. The unique insert holding design absorbs machining forces providing one of the most rigid Swiss-turning systems available to the industry today.

- For all turning application processes
- Repeatable within .0004"
- All insert styles fit the same holder
- Holder design absorbs cutting forces
- Ideal for tough applications

Type-GS Chip Breaker Cut-Off Inserts

The CUT3000 type-GS chip breaker is an evolution of Swiss-type cut off tooling. By using a new carbide forming technology, these inserts require less grinding to be produced while offering a decrease in overall cost of use. 'Type GS EN' grade offers supreme performance in carbon steels while the Type GS FN grade offers excellent performance in Stainless and Titanium applications.

Type-SPT Chip Breaker Cut-Off Inserts

The multidec® CUT3002 cut off inserts with type-SPT chip breaker feature a positive rake intended for use in soft and stringy materials. The SPT chip breaker comes in three different angles described by the product number suffix below.

SPT: 20° rake - Plastics Such As Delrin
SPT06: 6° rake - Good For Stainless
SPT12: 12° rake - Aluminum

Type-SC Chip Breaker Cut-Off Inserts

Cut-off inserts armed with the type-SC chip breaker are ideal for hard materials. This chip breaker is quite universal, used in roughing, finishing, and micro finishing.

Type-SP Chip Breaker Front & Back Turning Inserts

Front and back turning inserts with the type-SP chip breaker are ideal for finishing and micro finishing on materials such as aluminum, breaking up chips and preventing stringy chips from forming.

Type-CP Chip Breaker Front & Back Turning, Grooving Inserts

When creating deep features during front turning, back turning, or grooving, the type-CP chip breaker is vital for chip removal. The sharp articulated geometry will peel chips away and keep features clear of material during finishing and micro finishing operations.

Type-GS12 Chip Breaker Cut-Off Inserts

A neutral chip control geometry offering wear-resistant sharp cutting edges enabling better chip control. Ideal for high cutting speeds.

Type-GT20 Chip Breaker Cut-Off Inserts

Compared to the GS12 chip breaker geometry, the GT20 chip breaker has a sharp and slightly rounded cutting edge. It provides excellent chip flow, creating short chips and resulting in a smooth finish. These results can be experienced at higher feed rates also.

Type-GA20 Chip Breaker Front Turning Inserts

Based on the multidec TOP insert technology, this optimized version enables turning in three directions. Perfect chip control is maintained during facing, turning, grooving, and back turning. Inherited from the TOP insert technology, the GA20 enables up to 100% higher feed rate.

Type-GB20 Chip Breaker Back Turning Inserts

Armed with an extremely sharp cutting edge with multi-stage chip breakers, the GB20 chip breaker enhances the creation of back turned profiles with process-reliable chip formation at low and high cutting depths as well as across low and high feed rates.

Type-GC20 Chip Breaker Grooving & Turning Insert

Providing good results in almost any material while facing, grooving, or turning, the GC20 chip breaker can turn in three directions with at extremely low and high cutting depths and across low and high feed rates. Excellent chip control results can also be observed in lead-free brass.

Ideal Cutting Materials

- Preferred Application
- Possible Application
- Application Not Recommended

3002 Cutoff

Cut: Standard

Geometry: Slim & Deep

Great for getting super close to the guide bushing to cut off very short parts while reducing deflection.

Repeatability = R: ■ <10μm, ■ <20μm

4005-000111
 Connects to side ports on ALL shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104
 Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

Features (5) connection ports for simple connection to your oil delivery system: (4) Side ports and (1) one end port making connection possible on most machine tool positions.

multidec® CUT 3000 Offset Shank & Insert Holders

Shifted holders enable the cutting of short parts by enabling the cutting edge to move closer to the guide bushing thus reducing the chance for deflection.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. multidec® 1600, 3000, ISO VC, & ISO VP series inserts are currently available.

See Pg. 302 For Full Details

3000 Series Insert Shown

multidec[®]-Cut, Gold Line

The multidec[®] Cut, Gold Line tool holder was developed using a special manufacturing process with the goal of enabling even more efficient machining for cutoff and grooving on automatic lathes. The newly designed cooling system makes it possible to double the lifetime of the cutting edges as well as increase the cutting parameters without having to accept higher wear.

Two types are available. One "IC+" (IC-Plus) is equipped with chip breaker and clearance angle cooling. The other type "IC-FK" is a version exclusively equipped with clearance angle cooling, which enables the combination with the innovative multidec[®]-LUBE coolant-thru wedges.

This tool is available for grooving inserts with a minimum width of 2mm.

ADVANTAGES

- New Manufacturing Technology allows for never-before-seen Coolant-thru Spray Patterns
- Chip Breaker Cooling to Optimize Chip Control, Reduce Built-Up Edge and Improve Tool Life
- Increases Tool Life Tremendously
- PVD Coating for Highest Wear and Corrosion Protection

Check out this new series of products from UTILIS!

GenSwiss is the exclusive dealer of the multidec® Cut, Gold Line Tool Holder available for the multidec® CUT 3000 style inserts (see pg 116-146)

Predetermined breaking point
to avoid damage to the machine tool if the plate brakes

Cut-off Insert
Radial depth of cut up to 10mm with a minimum cut width of 2 mm.

Stop Surface
Stop surface to optimize quick change set-up times

Coolant Blade Jet
Optimized open-surface cooling to increase service life by up to 185%.

Cutting Surface Cooling
Cutting face cooling to optimize chip control, reduce built-up edge and improve tool life.

Connections
5X coolant connections to increase flexibility of connection to coolant system and tool holder.

Enhanced coolant pathways appear in blue.
Pictured below are the 3D print prototype examples (for catalog view only).

Gold Line holders feature additional coolant jets from below the cutting edge, further extending the life of your cutting tools.

Contact sales@genswiss.com or call 413-562-4800 for more information.

SUCCESS STORY

Starting situation – Tool life test

Two different tool holders were tested:

– **Reference product / conventional**, but with cooling from the multidec® LUBE wedge on chip breaker.

– **3000- 12-100 (GOLD LINE IC+)** with cooling from holder to chip breaker and clearance angle.

A 3002-2.0-10 LN SPT06 UHM20 TX+ was used for parting off.

Testing took place in accordance with the "Standardized testing process" R&D (research & development).

Type of machine	Star SR20
Material No.	1.4435 (316L), stainless steel
Diameter	12 mm
Operation	Parting off
Coolant	Oil
Cutting speed (Vc)	120m/min
Feed (f)	0.04mm /U

Performance Comparison

The line diagram shows the development of the free face wear on the basis of the test result. The quantity (parts) was shown for illustration purposes.

Execution of holder/insert

The side on which the insert is located determines whether it is a "left" or "right-hand" holder. For this purpose, the holder is viewed with the insert pointing towards the observer.

Left hand holder

Neutral holder

Right hand holder

The right-hand version of the tools is usually shown. (Exceptions are possible).

multidec® CUT 1600 Series UTILIS®

Tooling for High Technology

UTILIS multidec® 1600 Series Swiss Tools are designed for micro turning and grooving operations in Swiss-type CNC machines. Perfectly designed for the smallest of Swiss machines the 1600 series excels at work under .125" in diameter. Tough UHM30 grade carbide combined with a variety of coatings enhances tool life in tough materials typically machined in Swiss-type applications.

- Highly repeatable cutting edge
- .05mm to 2.75mm (.0019" - .1082") insert widths
- Micro grooving, front turning, back turning, micro threading, & cut off operations

Series	Operation
1602	Part Cut Off
1603	Front Turning
1604	Back Turning
1605	Groove & Turning
1606	Threading
1607	Full Radius Grooving
1610	Micro Grooving
1611	Axial Grooving
1612	Chamfering

Classic multidec® Precision Ground Chip Breakers

Type-SPT Chip Breaker Cut-Off Inserts

The multidec® CUT1602 cut off inserts with type-SPT chip breaker feature a positive rake intended for use in soft and stringy materials. The SPT chip breaker comes in three different angles described by the product number suffix below.

- SPT: 20° rake - Plastics Such As Delrin
- SPT06: 6° rake - Good For Stainless
- SPT12: 12° rake - Aluminum

Type-SC Chip Breaker Cut-Off Inserts

Cut-off inserts armed with the type-SC chip breaker are ideal for hard materials. This chip breaker is quite universal, used in roughing, finishing, and micro finishing.

Type-SP Chip Breaker Front & Back Turning Inserts

Front and back turning inserts with the type-SP chip breaker are ideal for finishing and micro finishing on many material types, breaking up chips and preventing stringy chips from forming.

Type-CP Chip Breaker Front & Back Turning, Grooving Inserts

When creating deep features during front turning, back turning, or grooving, the type-CP chip breaker is vital for chip removal. The sharp articulated geometry will peel chips away and keep features clear of material during finishing and micro finishing operations.

Insert Geometry & Chip Breakers

G-Line multidec®

Free Form Chip Breakers

- Improved Chip Control
- Longer Tool Life
- Better Cutting Values
- Better Process Reliability

Type-GT20 Chip Breaker Cut-Off Inserts

Compared to the GS12 chip breaker geometry, the GT20 chip breaker has a sharp and slightly rounded cutting edge. It provides excellent chip flow, creating short chips and resulting in a smooth finish. These results can be experienced at higher feed rates also.

[See pages 169-170 for sizes](#)

Type-GA20 Chip Breaker Front Turning Inserts

Based of the multidec TOP insert technology, this optimised version enables turning in three directions. Perfect chip control is maintained during facing, turning, grooving, and back turning. Inherited from the TOP insert technology, the GA20 enables up to 100% higher feed rate.

[See page 172 for sizes](#)

Type-GC20 Chip Breaker Grooving & Turning Insert

Providing good results in almost any material while facing, grooving, or turning, the GC20 chip breaker can turn in three direction with at extremely low and high cutting depths and across low and high feed rates. Excellent chip control results can also be observed in lead-free brass.

[See page 175 for sizes](#)

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

1600 Holder
 Type: Offset Shank
 Coolant-Thru: None

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

1600 Y-Axis Holder

Type: Standard

Coolant-Thru: Side & Rear Coolant Ports

**Superb Chip Control
On Stringy Materials**

Repeatability <10µm

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

To avoid problems, two Y-Axis holders must not be mounted directly next to each other.

Mount a standard tool holder between the Y-Axis holders.

To prevent collisions, move back the holder in accordance with the overhanging length before changing the tool position.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

**See Pg. 302

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSSP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting

Fits Position (d) On Tool Holders Sold Separately

ISO Holder SDJC...U

Features (5) connection ports for simple connection to your oil delivery system: (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting

Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting

**Fits Position (d) On Tool Holders
 Sold Separately**

DNGU carbide inserts are ideal for applications where chip control becomes an issue. The high positive geometry insert with negative tool holder creates an ideal situation for rolling chips in a controlled manner.

- Features 4 cutting edges per insert
- Ideal for stainless steels and materials that produce stringy chips
- Sharp tool nose radius intended to benefit Swiss-style applications

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

ISO Holder SVXC

Type: 91°

Coolant-Thru: None

Repeatability <20µm

UTILIS multidec® swiss type tools TOP Series

- Wiper geometry enables faster feeds while maintaining good surface finish
- Holders especially designed for front turning and back turning in Swiss-type machines
- Versatile cutting geometry and chip breaker enables turning in three directions
- Decreases cycle time by enabling up to 2X feed rate while maintaining surface quality

multidec® TOP series inserts feature a trailing wiper geometry which produces a stronger cutting edge. This allows for faster feeds while simultaneously increasing surface finish by burnishing the high-points of the turn pattern.

The multidec® TOP series line features a sharp tool nose radius of 0mm .08mm and .15mm with chip control geometry and is ideal for precision small parts turning in tough materials.

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
 0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
 0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

ISO Holder SVJP Reinforced

Type: 93°

Coolant-Thru: None

Repeatability <20µm

Features (5) connection ports for simple connection to your oil delivery system: (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111
Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104
Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

ISO TWIN Holder SVJP

Features (5) connection ports for simple connection to your oil delivery system. (4) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

4005-000104

Connects to end port on 5/8" and larger shanks
0° Male Union - 1/8 BSPP to 1/4 JIC Flare Fitting
Fits Position (d) On Tool Holders Sold Separately

Usage notes:

To avoid problems, two Y-AXIS holders must not be mounted directly next to each other.

Mount a standard tool holder between the Y-AXIS holders.

To prevent collisions, move back the holder in accordance with the overhanging length before changing the tool position.

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. **multidec® 1600, 3000, ISO VC, & ISO VP** series inserts are currently available.

See Pg. 302 For Full Details

multidec® SHORT

multidec® SHORT coolant-thru holders enable the use of multidec® turning inserts on commonly available quick change tooling systems. multidec® 1600, 3000, ISO VC, & ISO VP series inserts are currently available.

1600 Series

3000 Series

ISO VP Series

ISO VC Series

Coolant-Thru SHORT Holder 1600

Insert Type: 1600 Series Inserts
Coolant-Thru: Rear & Side Ports

Repeatability <10µm

Left Hand		Right Hand		Dimensions & Features						Coolant Fittings
Item No.	Description	Item No.	Description	h	b	l	x ₁	d	Inserts	Side
7005-143570	1600-12x70 L IC-S	7005-143569	1600-12x70 R IC-S	12	12	70	15.5	M8x1	16...	4005-000111

Features (3) connection ports for simple connection to your oil delivery system: (2) Side ports and (1) one end port making connection possible on most machine tool positions.

4005-000111

Connects to side ports on ALL Shank sizes
0° Male Union - M5-0.8 to 1/4 JIC Flare Fitting
Included With All Coolant-Thru Shanks

Coolant-Thru SHORT Holder 3000

Insert Type: 3000 Series Inserts
Coolant-Thru: Rear & Side Ports

Repeatability <10µm

multidec® LUBE Tool Plate with Integrated Coolant System

Quick Change System

Quick and accurate tool change due to adjustable stops in the tool plate.

Flow Regulator on Coolant-thru Wedge

Targeted regulation of mould cooling with on/off function.

Tool Coolant Outlets on Clamping Wedge

Reduced tool wear due to focused cooling directly at the cutting edge. Integrated coolant system does not require external coolant connections.

Coolant Connections on Panel

A wide range of connection options ensures direct connection to the coolant unit.

Advantages

- Simple installation by replacing the original plate with the complete multidec® LUBE tool plate
- Increased process reliability
- Quick and safe replacement of the insert with integrated stop
- Tool holders without internal cooling (IC) can continue to be used
- No more coolant distributors and tubes required

Designation System for Tool Plates

MLU ST -01 - TPC-IC-6T

multidec® LUBE

Coolant-Thru Wedges for existing original tool plates

multidec® LUBE Integrated Coolant-Thru Wedge from UTILIS® are specifically engineered to work with standard square shank stick tooling thereby effectively making your entire tooling inventory "coolant-thru" capable. Convert your whole gang plate or just one tool station, the choice is yours.

CITIZEN
star
TORNOS

Advantages

- Simple installation through replacement of the original wedge with the multidec® LUBE coolant-thru wedge
- Increased process reliability
- Quick and reliable tool change with integrated stop
- Tool holders without internal cooling (IC) can continue to be used
- Different coolant distributors, tubes and push-in fittings for high and low pressure

Designation system for Coolant-Thru Wedges

MLU CI -12 - R-R IC -F

multidec® LUBE

The newly developed high-pressure solution from UTILIS (up to a maximum of 200 bar or 2900 psi) ensures optimal delivery of coolant to the insert.

The highly compact and robust design and the stainless steel finish are the main features of this product.

The product range includes several straight and pivoting unions with connection diameters of 4mm and several quick connections minimizing machine downtime.

The high-pressure hoses are available in a wide variety of lengths with different connections. Reduction unions, extensions, screw connections, spare parts and coolant distributors round off the product range.

Advantages:

- Flexible enough to be used with all multidec® product lines with internal cooling
- Can be used within a temperature range of –60 to +250 °C or –76 to +482 °F
- Up to a Maximum operating pressure of 200 bar or 2,900 psi

The range associated with the low-pressure solution for operating pressures up to a maximum of 30 bar or 435 psi includes a straight union and a swivel-type union with a connecting diameter of 4 mm when a polyurethane tube is being used.

As with our high-pressure solution, we offer reduction unions, extensions, closingplugs, and sealingrings. A well-balanced range of compact coolant distributors made of light metal completes the offer.

Advantages:

- Flexible enough to be used with all multidec® product lines with internal cooling
- Can be used up to a maximum operating pressure of 30 bar or 435 psi (test pressure of 30 bar or 435 psi)
- Corrosion-resistant and compact design

BACKTOOLS **UTILIS**[®]

multidec[®] BACKTOOL holders enable turning operations to be performed from an ID tool position and are ideal for performing turning operations on the sub-spindle of your machine. Each holder is center height adjustable and is modular to allow usage of a variety of 35, 55 & 80 degree ISO turning inserts; as well as multidec[®] TOP inserts & ALL multidec[®] CUT inserts.

- Center height adjustable to ensure precision setup
- Modular system uses multidec[®] ISO, TOP & CUT series inserts
- Perform turning operations on the subspindle
- Rigid design ensures good finish results as well as extended tool life

Available Backtooling for Turn-Mill Machines & Machine-Based Tool Systems...

- Interchangeable inserts
- Equipped with internal cooling

Tool System For Turn-Mill Machines

multidec[®] Multitask

Machine-Based Tool Systems

High Performance Thread Whirling

Thread whirling is a fast & accurate method of producing long threaded parts on a Swiss-type machine. By employing more cutting teeth, the GenSwiss/UTILIS whirling system greatly enhances productivity by allowing increased speeds and feeds while maintaining rigid finish qualities required by the medical implant industry.

- Whirling Rings
- Whirling Inserts
- Whirling Attachments
- Available In Live Tooling

TYPE-A xModular-System

- Whirling ring reduces setup time
- $\pm 0.005\text{mm}$ guaranteed concentricity
- Interchangeable 2-part system

TYPE-B Mono-System

- Compact single component System
- $\pm 0.005\text{mm}$ guaranteed concentricity

TYPE-C Quick-Change System

- Similar to type-A, but ring is rotated to insert or remove
- $\pm 0.005\text{mm}$ guaranteed concentricity

Optional Whirling Rings with advanced or recessed center position are available.
Visit genswiss.com or call us for details.

High-pressure coolant required for adequate chip evacuation in 12 insert configuration.

For Whirling Attachments
See Live Tooling Pg. 423

Double-edge indexable inserts provide excellent tool life

Inserts repeat within .0004"

Custom precision thread forms can be generated in a single pass from barstock diameter

Available in several pocket configurations with up to 12 inserts

Increased surface finish and improved thread quality can be achieved by minimizing cut interruption and vibration

Dummy inserts protect the unused insert slots, keeping them particle free and maintaining accuracy when occupied by a threading insert

Whirling Inserts
Pg. 347-351

4,6, and 8mm
Insert Widths

COMPACT STRADDLE KNURL HOLDERS

for small parts

- Create perfect knurls
- Eliminates workpiece deflection
- Low interference

Specifically designed for Swiss-type machines; our low profile straddle knurl holders keep interference to a minimum within the tooling envelope of most machines while ensuring adjacent tool positions are available to maximize tooling capacity.

AXIAL FEED KNURL HOLDERS

- Ideal for long knurled parts
- Produce straight or diamond patterns
- Adjustable for a range of part diameters

Compact design makes it ideal for use on screw machines and CNC lathes when axial feed knurling from the turret. Parts are self supported and they can extend through the shank for long jobs. We recommend using CONVEX Knurl Dies with this style Knurl Holder. Can also be adapted for burnishing and internal knurling

Compact Self-Centering Three Die Holder with Synchronized Adjustment

- Ideal for complex knurling
- Fitted with three jaws arranged at 120°
- Self-centering mechanism

Compact Self-Centering Three Die Holder Diagram

Fitted with three jaws arranged at 120° which can be adjusted simultaneously by means of a synchronizing ring. This tool has a built-in mechanism that compensates any misalignment between the chuck and turret centerlines.

KNURLING WHEELS

Genevieve Swiss offers a full line of precision knurling tools for Swiss-type applications. Optional wheel geometries are available to suit your specific needs. More options are available in addition to what is listed below.

Call 413-562-4800 for details or to discuss applications.

Standard Knurl Dies For Bump Knurling

Knurl Series	Wheel Dimensions	Straight Tooth	30° Right Hand	30° Left Hand	30° Male	30° Female	Available Pitch Teeth Per Inch (TPI)
	OD x ID x Width						
BP	5/16 x 1/8 x 5/32	KDS-BPS0-	KDR-BPR0-	KDL-BPL0-	KDD-BPM0-	KDD-BPF0-	20, 25, 30, 35, 40, 50, 60, 70, 80, 90, 100
EP	1/2 x 3/16 x 3/16	KDS-EPS0-	KDR-EPR0-	KDL-EPL0-	KDD-EPM0-	KDD-EPF0-	16, 20, 25, 30, 32, 35, 40, 50, 80

All Wheels Also Available in DIAMETRAL PITCH Configurations: 64DP, 96DP, 128DP, 160DP

- Precision lapped tooth forms provide superior knurled surfaces
- HSS vacuum hardened to approximately 63 Rockwell C
- Sides and Bore are Finish Ground to Maintain Close Tolerances
- Available Coated on Request

CONVEX Series Knurl Dies For Axial Feeding - Inch

Knurl Series	Wheel Dimensions	Straight Tooth	30° Right Hand	30° Left Hand	Available Pitch Teeth Per Inch (TPI)
	OD x ID x Width				
EPV	1/2 x 3/16 x 3/16	KDS-EPSV-	KDR-EPRV-	KDL-EPLV-	16, 20, 25, 30, 32, 35, 40, 50, 80

All Wheels Also Available in DIAMETRAL PITCH Configurations: 64DP, 96DP, 128DP, 160DP

- Hi-Cobalt HSS treated with ferritic nitrocarburizing is standard on all CONVEX Knurls.
- Full-form convex relief spreads out forces providing smoother finish
- The ULTIMATE knurling die for Swiss-type straddle knurling

W2 SERIES BUMP-STYLE KNURL HOLDERS (Up To The Shoulder)

The W2 series bump-style knurl tools are manufactured to extremely high standards from premium alloys. Many are available with a lapped tooth form to give longer life and impart a smooth, clean surface to the knurled part. Both sides and the bore of the knurl are finish ground to maintain close tolerance on diameter and side runout. Our standard material is a high-quality grade of high-speed steel which is vacuum hardened, and tempered at least 2 times to a hardness of about 63 Rockwell C.

For severe knurling operations, such as rolling on 303 stainless or semi-hardened steels, we also offer knurls in a premium grade of high-cobalt steel. These knurling tools are slightly harder and, in most applications, deliver a substantial increase in tool life. Multiple coatings such as "TiN" and "Ferritic Nitrocarburizing" are also available if necessary. Our sales representatives will be happy to discuss any aspect of your knurling application and make recommendations on maximizing tool life versus cost for any type of knurling operation.

In addition to the stock knurling die shown above, we can manufacture virtually any size and pitch special knurling tools for standard knurl tooth forms.

All Wheels Also Available in DIAMETRICAL PITCH Configurations: 64DP, 96DP, 128DP, 160DP					

Knurling Speeds and Feeds

For convenience, knurling is often performed at the same speeds used for turning operations when using high speed steel tool bits. But to prevent seizing of the rolls on the pin, we recommend a maximum surface speed of about 150 SFPM (Feet/Min) or 50 m/min. You may find you get longer knurl life and improved appearance by slowing down the spindle to about 50 SFPM (15 m/min) for harder steels and stainless. CARBIDE knurl pins are strongly recommended for all high speed knurl applications. DOWEL pins with a plus tolerance SHOULD NOT be used because of the possibility of the knurls seizing up and breaking.

For BUMP knurling with a SINGLE TOOL HOLDER from the cross-slide, the infeed would normally be .001-.004"/rev (.025 - .1mm) to roll the part complete 5/20 revolutions. When knurling stainless steels, it is important not to roll any longer than necessary as this material work hardens as it is formed. The total amount the tool penetrates into the workpiece is approximately 50% of the tooth depth of the wheel. You may have to travel more than this amount to allow for the flexing of the part or holder due to rolling pressure. Some trial and error will be required.

If you are using a two die STRADDLE HOLDER, the infeed rate should be 5 or 10 times faster because the wheels are coming in tangentially instead of head on. Before knurling, the holder should be set so that the distance between the two wheels is smaller than the workpiece diameter by approximately the depth of the knurl tooth. Then to knurl, move the holder so that the two wheels are as close to the centerline as possible to minimize the knurling pressure on work spindle and cross slide.

Knurling Speeds and Feeds

Material	Recommended SFPM [ft/Min]
Acetal (Delrin)	90-130 SFM [27-40] M/MIN
Aluminum and its alloys	90-130 SFM [27-40] M/MIN
Brass (360 high machining)	90-130 SFM [27-40] M/MIN

Thread Rolling Holders & Dies

Create Rapid Thread Forms At Industry Standards

Thread rolling is a quick way to create standard right hand and left hand metric, UNC, and UNF thread forms. This new line of product compliments bar stocks up to 17mm and come in styles supporting both 2 and 3 dies. VDI, HSK, and straight shank types are available and come in several sizes.

Medical • Automotive • Aerospace

Thread Rolling Die Holders

Part No.	Max Bar Stock Ø	Head Ø	Head Length	Thread Type	Tool Type	# Of Thread Dies	Available Shanks
F001	7.0mm	40mm	65.4mm	Right Hand	Static	3	Straight Shank: 16mm, 20mm, .625in, .75in
F001L	7.0mm	40mm	65.4mm	Left Hand	Static	3	
F0	11.5mm	50mm	46.0mm	Right Hand	Static	2	Straight Shank: 20mm, 25mm, .75in, 1.0in, 1.25in

UNC	1-64 to 12-24	1 or 2
UNF	0-80 to 7/16-20	1 or 2

Left & Right Hand Forms Are Available

High Precision Gun Drills

For Applications That Require Holes Of Extreme Length

When your application requires a precision drilled deep hole up to 256x's the diameter, gun drills are the tool for the job. GenSwiss provides both solid carbide and standard steel standard sized drills with diameters down to 5/64in and OAL's as long as 48in. Custom drills can be ordered and designed with the proper material intended for the application. Gun drills are available with coolant-thru holes for high pressure coolant.

Signature Series Saw Arbors

Combination Saw Arbors - 5015 Series

GenSwiss combination arbors are made from pre-hardened material and exemplify what it means to be called "Swiss Precision". The addition of the combined mill or center drill provides additional tool capacity and setup flexibility. Made in the USA.

Flange Mount Metric Saw Arbors - 5020

These metric flanged saw arbors provide maximum saw balance and stability with the flange mount design. The unique design applies pressure to the outward edge of the flange ensuring the greatest gripping power at the outer most edge to prevent slipping. Uses countersunk screw and flange washer to apply holding force. Measured TIR is less than .0002".

Precision Saw Arbors - 5025 Series

Our most popular style of slitting saw arbor is available in guaranteed TIR grade SAP (border .0002" TIR) and the extended journal version SAPE. When ULTRA Precision is required the SAP guide is suggested as they are held to stringent quality standards required by discerning Swiss-type machinists. Made in the USA.

SOLID CARBIDE SAW BLADES

Genevieve Swiss Industries carries a full line of solid carbide slitting saws directly imported from Switzerland. Available from stock in fine and extra-fine tooth configurations with tooth counts ranging from 40-120 teeth per saw.

Our Solid Carbide Saws Feature:

- Precision ground accuracy
- Superior surface finish
- High tooth count for cutting hard metals
- Hollow ground side clearance
- Full radius, V-cutter, & staggered versions available
- Designed and manufactured to the highest quality & standards

Application Selection Guide

GenSwiss Signature Series Saw/Arbors

YES 	NO 
<p>When using a slitting saw, 2 to 3 teeth in the material with the proper feedrate is ideal.</p>	<p>You do not want to have too many teeth engaging the workpiece. There will be chip clearing issues. Not having enough teeth on the work piece will cause vibration and will add premature wear to the saw blade.</p>

GenGrip

Drill Bushings & Hydraulic Clamping

GenSwiss® coolant-thru drill bushings and precision hydraulic clamping ID tool holders feature rigid holding at multiple price points. GenSwiss® drill and boring sleeves feature precision ground inch and metric shanks and are a robust method for holding drills and boring bars to tight tolerances.

The GenSwiss® hydraulic clamping system is perfect for micro tools, extending tool life with vibration dampening and exceptional TIRs down to .00004in. An array of coolant-thru reduction sleeves further increases the compatibility of this rigid tool holding system and fits shank sizes down to 3mm.

- **Set Screws For Large Tool Bores & Economy**
- **Easy Clamping Hydraulic System For Micro Tools**
- **Maintains Exceptional TIR Down To (.00004in)**
- **Activate Clamping From Front Or Rear Of Tool Block**
- **Extended Tool Life With Vibration Dampening**
- **High Boring Bar Positioning Accuracy**
- **Coolant-Thru**

GenGrip Keeps Your ID Tool Straight And On Center

GenGrip - Drill Bushings

GenSwiss drill sleeves are a new product designed and manufactured by GenSwiss. These sleeves have precision ground inch and metric shanks and are a robust method for holding drills to tight tolerances. Each GenSwiss drill sleeve features coolant-thru holes, enabling coolant delivery to your coolant-thru drills. Standard tool bore sizes range from 3-8mm, but drill sleeves can be made to order.

SWISS SILVER

Signature Series Cutting Oil

Formulated For CNC Swiss-Type Machines

Swiss Silver is formulated from a highly refined mineral base oil that is as crystal clear as pure water. Low viscosity makes it perfect for Swiss-type machines and small parts manufacturing as it provides superior penetration on micro parts and better flow to the cutting tool.

- NO STAINING RESINS - Your machine stays cleaner
- HIGH FLASH POINT - Reduces possibility of machine fires
- LOW MIST - Good for high pressure delivery
- LOW VISCOSITY - Reduces air entrapment
- INCREASED VISIBILITY - Easier to see into the machine

A B

TYPEA - Most Metals

TYPEB - Ferrous & Tough Alloys

Type A is for all metals, including copper and brass. It can also be used on plastics.

Type B contains an additive that increases tool life performance on ferrous metals and tough alloys, but can tarnish brass or copper unless parts are cleaned immediately.

USES:

Swiss Silver low-viscosity cutting oils are designed for machining operations in a CNC Swiss machine. Our fluids provide exceptional visibility during operation, while allowing optimum operating speeds and stock removal. The lower viscosity allows for excellence in precision micromachining, drilling and milling operations, and more, which results in better heat dissipation, improved chip removal and the ability to dig deeper holes.

QUALITY:

Our oils are perfected to a lower viscosity with minimal reduction in flash point. The low foaming qualities and high performance make this fluid ideal for high-pressure coolant delivery systems. Utilizing state-of-the-art technology, Swiss Silver excels on all workable materials. In long-term usage, it provides high performance on all metals. It also out-performs conventional oils previously recommended by machine manufacturers. Provided in type A (all metals) and type B (ferrous and tough metals).

SAFE:

The flash point of Swiss Silver provides maximum safety. This fluid will not cause operator skin irritations and is non-hazardous. It contains no nitrites or ethanolamines.

PROPERTIES:

Swiss Silver is a clear, low-viscosity oil. The unique formulation of this product results in a low-foam, low-smoke fluid that is cleaner than standard oils used in Swiss-style CNC turning machines. Since it is a clear liquid, it provides optimum visibility for the machine operator.

STORAGE AND HANDLING:

Swiss Silver can easily be handled under ordinary commercial conditions. Storage tanks should be mild steel. Glass-lined or stainless tanks are also acceptable.

APPLICATION:

Swiss Silver is designed for circulating systems associated with Swiss-style CNC turning machines.

PACKAGING:

Swiss Silver is sold in 5-gallon pails, 55-gallon drums, and 275-gallon totes.

Swiss Silver Premium - Most Metals

Our standard premium HIGH PERFORMANCE product, ideal for all Swiss-type machines or small parts turning centers. Provides extended tool life in ferrous and non-ferrous applications. Minimal air entrainment reduces misting under medium pressure coolant delivery.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000100	LCO-SS00-A00-MGS
A (Most Metals)	5 Gallon	2505-000107	LCO-SS00-A00-M-5G

B (Ferrous & Tough Alloys)	5 Gallon	2505-000118	LCO-SS00-B00-M-5G

Swiss Silver AB - Aluminum & Brass

Specifically formulated for enhanced surface finish results in aluminum, brass & copper applications. Prevents tarnishing of yellow metals. Features low air entrainment for low mist under medium pressure coolant delivery.

Type	Size	Item No.	Description
Standard	55 Gallon	2505-000102	LCO-SSAB-000-MGS
Standard	5 Gallon	2505-000113	LCO-SSAB-000-M-5G

High Pressure	5 Gallon	2505-000119	LCO-SSHP-AB0-M-5G

Swiss Silver HM - Hard Metals

A special formulation of Swiss Silver designed to enhance the machining of "hard metals" such as high nickel materials, inconel, hastelloy, and other tough-to-machine exotic alloys. Includes the tool life enhancing additives and low misting agents offered in other Swiss Silver variants.

Type	Size	Item No.	Description
B (Ferrous & Tough Alloys)	55 Gallon	2505-000103	LCO-SSHM-B00-MGS
B (Ferrous & Tough Alloys)	5 Gallon	2505-000120	LCO-SSHM-B00-M-5G

Swiss Silver HP - High Pressure Delivery Formula

An enhanced formula of the standard premium cutting oil product that greatly reduces the mist and air entrainment under high pressure pump coolant delivery applications found in many Swiss-type machining operations.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000104	LCO-SSHP-A00-MGS
A (Most Metals)	5 Gallon	2505-000108	LCO-SSHP-A00-M-5G

Swiss GD- Gold

Low foaming oil with maximum visibility, Swiss Gold is ideal for high pressure systems, providing a mix of low viscosity and a high flash point. Excels on stainless steel, tough alloys, titanium, brass, and aluminum. Long term use provides high performance on all metals.

Type	Size	Item No.	Description
A (Most Metals)	55 Gallon	2505-000129	LCO-SSGA-A00-MGS

Special formulations are also available for custom applications.

Low or no chlorine formulas available on request.

Way Lube also available.

SWISS SILVER

Signature Series Bar Feed Oil

USES:

Swiss Silver Bar Feed Oils are premium rust and oxidation inhibited lubricants that are typically described as circulating, turbine, hydraulic and bearing oil. It can be used as low pressure hydraulic, circulating, gear, and compressor oil. It is specially formulated with high quality base stock and thermally stable additives. This oil offers excellent resistance to rust, oxidation, foam, and sludge formation.

QUALITY:

Our oils are made from high VI Group II paraffinic base stock that provide outstanding thermal and oxidative stability, low copper activity, excellent rust protection, good hydrolytic stability, good demulsifying capability and good antifoam characteristics. These fluids contain no sulfur or zinc-type additives which helps eliminate the formation of biofilms when exposed to water-based metalworking fluids. These oils are suitable for N/C machine tools and other high output equipment where sustained heat is prevalent. These oils exhibit superior hydrolytic stability in the presence of water and will not contribute to either the formation of metal-etching acids or corrosive reactants.

SAFE:

They are inhibited against rusting in both fresh and sea water and pass both A and B Sequences of the ASTM D 665 Turbine Oil Rust Test. These oils are approved against stringent performance requirements including Cincinnati Milacron P-38, P-45, P-54, P-55, P-57, P-62, Parker Hannifin France HF-1, DIN 51524 Part 1, MIL-H-17672C, US Steel 126, and AFNOR E-46-800 HL. ISO 100 Bar Feed Oil resist foaming and will not foster abnormal air entrainment in properly designed hydraulic circuits. The oils also readily and rapidly separate water permitting sump drain-off of the contaminating water.

PROPERTIES:

Swiss Silver is a clear, low-viscosity oil. The unique formulation of this product results in a low-foam, low-smoke fluid that is cleaner than standard oils used in Swiss-style CNC turning machines. Since it is a clear liquid, it provides optimum visibility for the machine operator.

STORAGE AND HANDLING:

Swiss Silver can easily be handled under ordinary commercial conditions. Storage tanks should be mild steel. Glass-lined or stainless tanks are also acceptable.

APPLICATION:

These Oils are recommended for service in vane, piston, and gear pumps when used in accordance with the manufacturer's recommendations. They are designed to provide maximum service life to these pumps as well as to other circuit components such as motors and servos. These oils are also recommended for use as gear and bearing lubricants in industrial applications where rust and oxidation inhibited oils are required.

PACKAGING:

Swiss Silver is sold in 5-gallon pails, 55-gallon drums, and 275-gallon totes.

GenSwiss MicroCoolant Kit

- No more searching for proper fittings!
- Everything in one kit with all connections!
- Precision Copper sealing gaskets!
- High pressure hose with quick disconnect!
- Wrenches included for all fittings!

GenSwiss MicroCoolant Kit

Flexible tube 102mm (Stocked) 152mm / 203mm (Available upon request) with quick connection fittings.

Quick Connection Fittings:

(1) Quick connection fitting MICRO with M8x1(M) on one end.

Flexible Distribution Tubes:

(1) M8x1(M), flexible tube OD: 8 mm, L: 4", 6" or 8" (102, 152 or 203 mm), M8x1(M)

Connectors And Adaptors:

(2) Adaptor M8x1 (H) to BSPP 1/8" (M)
(1) Adaptor M8x1 (H) to M6x1 (M)
(1) Spacer H:10mm M8x1 (M)-M8x1 (F)
(1) Short banjo M8x1 (F)
(1) Banjo bolt M8x1 (M)

Locking And Connecting Plugs:

(1) Quick connection fitting NANO to M8x1(F)
(1) Sealing plug with quick connection fitting MICRO

Sealing Gaskets:

(2) Sealing gasket in copper for M6
(6) Sealing gasket in copper for M8
(1) Sealing gasket in copper for M10 & BSPP 1/8"

Fastening Keys For Coolant Distribution Fittings:

(2) Wrench for assembly on the universal hexagon used in the MICRO program.

Connectors and Adaptors

- Fluid pump
- MiJet unit

MAGNETIC FINISHING

No Feature Is Too Small

- Edge rounding of .002-.003in
- Removes micro burrs
- Improves surface finishes

Contact Us For A FREE Applications Trial

Magnetic Finishers remove micro burrs and improve surface finishes on Non-Ferrous materials and some stainless steels. Small steel pins with diameters ranging from .007in -.050in are spun at a high-speed by a magnetic wheel. The size of the pins enable them to travel through fragile parts to remove microscopic burrs that would normally be removed by hand. The non-aggressive burnishing action enables desirable edge rounding of .002-.003" without part damage to threads, knurls, or other fine edge surfaces.

Complete Sets - Includes Stainless Finishing Media & Supplies

Item No.	Description	Bowl Size	Includes:
1505-000134	FR-CMF-610-S	6in	Includes Base, Turbo Finishing Pins, Burnishing Solution, & Magnetic Separator - 120V or 230V

GenSwiss Signature Series Micro Inspection Vice Blocks

GenSwiss Signatures Series micro inspection vice blocks are a compact solution for holding the round shanks of micro tools and parts during inspection. Each block features precision ground datum surfaces so you can get accurate measurements and no tool or part movement in the block.

- **Special "V" block geometry for excellent hold on round micro parts and tools**
- **Ground datum surfaces for positioning**
- **Can be used on inspection tables and precision surfaces**
- **Holds shanks from 0.5mm to 6.0mm**

GenSwiss Micro Inspection Vice Blocks

5540-000486

- Block Length - 52mm
- Block Width - 20mm
- Block Height - 31mm

SIGNATURE SERIES

Collets & Guide Bushings

Introducing GenSwiss' Signature Series Collets and Guide Bushings. Our collection of precision ground collets and guide bushings provides your stock material with exceptional stability. Get the dependability that you require when rigidity and repeatability are paramount. GenSwiss Signature Series Collets and Guide Bushings have you covered from the moment that your bar stock enters the machine.

- **Barfeed collets, sub-spindle collets, guide bushings**
- **Minimize the risk of error in your runs**
- **Regular & extended nose**
- **Available for all major machine models**

- Exceptionally Accurate Spindle Concentricity
- Hardened & Ground Gearing For Smooth & Quiet Service Life
- Innovative Sealing System Protects Internals From Debris & Oil Contamination
- Maintenance Friendly Designs Are Serviceable.

Genevieve Swiss Industries, Inc. was founded on Live Tools more than 20 years ago. We have the largest selection of Live Tools available and we have been selling Live Tools longer than any other company in the Swiss-Machine Industry.

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **\$50 evaluation and inspection**
- **Repaired by factory trained professionals**

Call Us @ 413-562-4800

Max Tool Ø: 63mm
Max Tool Thickness: 6mm

**GDF-1501-II
Tool Holder**
Tool Size: Ø1in
Coolant-Thru

**GDF1502-IK
Tool Holder**
Tool Size: Ø3/4in
Int cooling 200 bar,
Ext cooling 100 bar,
Independent shutoff
valves

**R432-OF5xØ25.4-KAI
Tool Holder**
Tool Size: Ø1in
Internal cooling

**GSW-250
Thread Whirling**
Ring: Utilis
Output: 3:2
3,9, or 12 insert cutter,
Adjustable 0 - 25°
6mm Flight Circle
Fits manual B-Axis

**GSW-255
Thread Whirling**
Ring: Utilis
Output: 3:2
3,9, or 12 insert cutter,
Adjustable 0 - 25°
6mm Flight Circle
For Programmable B-Axis

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **\$50 evaluation & inspection (fee waived if repaired or replaced by us)**
- **Repaired by factory trained professionals**

Call Us At: 1-413-562-4800

Output: 2:1
External cooling,
Reduced speed
2,500 RPM,
Drill depth 44.5mm

**KSE-510-KAI
End Drill/Mill**
Collet Size: ER16
Output: 1:1
Int & Ext cooling
Drill depth 35mm
Y-Axis Required

**KSF-130
Polygon Milling**
Collet Size: Ø16
Output: 1:1
Adjustable ±20°

**KSF-130-ER
Polygon Milling**
Collet Size: ER11
Output: 1:1
Adjustable ±20°

**KSH132-25
Gear Hobbing**
ID Size: Ø13mm
Output: 1:1
External cooling
100 bar,
Hobb OD: Ø32mm
Hobb Width: 40mm
Adjustable ±25°

**KSH-132-27-17
Gear Hobbing**
ID Size: Ø10mm
Output: 1.588:1
Hobb OD: Ø32mm
Hobb Width: 7mm
Adjustable 0-20°

**KSH-132-27-17-08
Gear Hobbing**
ID Size: Ø8mm
Output: 1.588:1
Hobb OD: Ø32mm
Hobb Width: 7mm
Adjustable 0-20°

**KSH-132-27-17-II
Gear Hobbing**
ID Size: Ø16mm
Output: 1.588:1
Hobb OD: Ø32mm
Hobb Width: 7mm
Adjustable 0-20°

**KSH-132-27-17-III
Gear Hobbing**
ID Size: Ø10mm
Output: 1.588:1
Hobb OD: Ø32mm
Hobb Width: 7mm
Adjustable 0-20°

**KSH-132-27-17-L
Gear Hobbing**
ID Size: Ø13mm
Output: 1.588:1
Hobb OD: Ø32mm
Hobb Width: 7mm
Adjustable 0-20°
Long version

**KSH-133-035
Gear Hobbing**
ID Size: Ø3.5mm
Output: 1.588:1
Hobb OD: Ø10mm
Hobb Width: 6mm
Adjustable 0-30°
Requires 2 positions

**CDF101
Tool Holder**
Tool Size: Ø1in
Drill depth 73mm

**CDF101-AR-1
Tool Holder**
Tool Size: Ø1in
Int & Ext cooling
Drill depth 79mm

**CDF101-HP
Tool Holder**
Tool Size: Ø1in
Internal cooling
Max 150 bar,
Drill depth 48mm

**CDF101-HP-10
Tool Holder**
Tool Size: Ø10mm
Internal cooling,
For gun drilling

**CDF101-SP
Tool Holder**
Tool Size: Ø1in
Drill depth 113mm

Turret

CDF-201-AR Tool Holder

Tool Size: Ø1in
External cooling,
Drill depth 40mm

CDF-201-HP Tool Holder

Tool Size: Ø1in
Int & Ext cooling
Max 150 bar,
Drill depth 40mm

CDF-201-Jauge Gauge

High precision gauge
for centering turret
position

CDF-301 Tool Holder

Tool Size: Ø1in
Drill depth 70mm

CDF-301-AR Tool Holder

Tool Size: Ø1in
External cooling,
Drill depth 70mm

CDF-301-HP Tool Holder

Tool Size: Ø1in
Internal cooling
Max 100 bar,
Drill depth 70mm

CDF-401 Tool Holder

Tool Size: Ø1in
Drill depth 73mm

CDF-401-AR Tool Holder

Tool Size: Ø1in
Internal cooling
on bottom position,
Drill depth 73mm

CDF401-AR-II Tool Holder

Tool Size: Ø1in
Internal cooling
on both positions,
Drill depth 73mm

CDF401-HP Tool Holder

Tool Size: Ø1in
Internal cooling
on bottom position,
External cooling
on both positions
Drill depth 73mm

CDF901-AR Tool Holder

Tool Size: Ø1in
External cooling,
Drill depth 75mm,
Y-Axis Required

CDF901-IK Tool Holder

Tool Size: Ø1in
Int & Ext cooling
Max 100 bar,
Drill depth 75mm,
Y-Axis Required

CDF901-IK-T Tool Holder

Tool Size: Ø1in
External cooling
Attaches to CDF-901-IK,
Y-Axis Required

CDF-901-IK-T-HP Tool Holder

Tool Size: Ø1in
Ext & Int cooling
Attaches to CDF-901-IK
High Pressure 150 Bar
Requires Y-Axis

CDF-905-AR Tool Holder

Tool Size: Ø.50in, Ø.75in
Coolant-Thru
*Second Position
Is Half Index
*Designed For
M₃32 Only

CDF905-HP Tool Holder

Tool Size: Ø.50in, Ø.75in
External cooling
Max 100 bar

CDF-ER16 Tool Holder

Tool Size: ER16
Internal cooling
Max 100 bar,

CTF-1116 Tool Holder

Tool Size: 16x16mm
External cooling,
Holds OD turning tools
Y-Axis Required

CTF1116-D Tool Holder

Tool Size: 16x16mm
External cooling,
Holds OD turning tools
Y-Axis Required
Short version

CTF116-HP Tool Holder

Tool Size: 16x16mm
External cooling
Max 150 bar,
Holds OD turning tools

778-CTF-116-R-AR-HP Tool Holder

Tool Size: 5/8x5/8in
External cooling
Max 150 bar,
Holds OD turning tools,
Reversible wedge

KSW-101 Thread Whirling

Ring: Utilis
Output: 2:1
3, 9, or 12 insert cutter,
Adjustable ±10°

Citizen M₅32

Gang Slide Attachments (Machine's Live Tooling 8,000 RPM Rating)

Operation	Item No.	Description	(#Tools) Size	Output	Other
Cross Drilling / Milling	5505-000435	BSC1107-4X	(1) ER11	1:3.8	High speed up to 30,000 RPM

REPAIRS & RESTORATION

One of the benefits of buying live tooling and spindles from GenSwiss, is knowing we will repair them too. We will repair your spindle at a fraction of the cost to purchase a brand new one and have your Swiss-style CNC running again in no time.

- **Live Swiss machine attachments restored to factory specification**
- **PCM and major OEM brands: CITIZEN, STAR, TSUGAMI, TORNOS**
- **\$50 evaluation & inspection (fee waived if repaired or replaced by us)**
- **Repaired by factory trained professionals**

Call Us At: 1-413-562-4800

P03-GSP-218
Polygon Milling
Arbor Size: $\varnothing 8\text{mm}$
Output: 1:1
Max Tool \varnothing : 45mm
Adjustable $\pm 2.5^\circ$
Cutter Offset
Machine: P034H

P03-GSP-318
Polygon Milling
Arbor Size: $\varnothing 8\text{mm}$
Output: 1:1
Max Tool \varnothing : 45mm
Y Adjustable $\pm 1.5^\circ$
X Adjustable $\pm 2.5^\circ$
Machine: P034H

P03-GSW-220
Thread Whirling
Ring: Utilis
Output: 1:1
9 or 12 Insert Cutter,
Adjustable 0-20°
Machine: P034H

P03-GDF-416
Static Tool Holder
Tool Size: $\varnothing 16\text{mm}$
Machine: P034H

P03-GDF-516
Static Tool Holder
Tool Size: $\varnothing 16\text{mm}$
Machine: P034H

P03-GTF-018
Static Tool Holder
Tool Size: 8mmx8mm
Machine: P034H

P03-GSC-117-S
Main Block Tool Holder
Collet Size: ER11
Output: 1:2
Tool N°01 cutter carrier 8mm x 8mm
Tool N°02 cutter carrier 8mm x 8mm
Tool N°03 high frequency $\varnothing 25$
Tool N°04 in ER11 with RPM 16'000.
Tool N°05 is a modular quick change for different operation.
Machine: P034H

Terms & Conditions of Sale

Prices	All prices are in U.S. dollars. Prices are valid for 30 days after quotation, then subject to change. Sales & Use Tax due is the consumer responsibility and payable as State regulations require.
Credit	Credit approval may take several weeks after returning the completed Credit Application and signed Terms & Conditions Agreement. Changes to Genevieve Swiss Industries, Inc. ("GSI") standard Terms and Conditions made by the applicant are grounds for credit denial. GSI reserves the right to change or deny credit at any time based upon late payment or changes to your DNB rating.
Orders	Upon receipt of your purchase order, GSI will provide a sales order confirmation. The customer accepts responsibility to notify GSI of any error or changes that are required.
Cancellation	Order cancellation must be provided to GSI in writing. Cancelled orders are subject to a minimum \$25.00 process fee and a production upcharge depending upon product completion.
Delivery	Product availability is subject to prior order regardless of stock condition at the time of quotation. GSI policy is to partial ship the order if any item is out of stock unless otherwise instructed. The customer is responsible for all shipping charges. The customer accepts responsibility to notify GSI in writing of orders that must ship complete.
Quantity	For special orders, the customer agrees to a delivered quantity +/-10% at the per piece cost.
Blanket Order	At the end of the agreed term, the customer agrees to accept the open balance of the blanket order. Any deviation to this agreement must be in writing by GSI. If GSI agrees to a contract adjustment and where quantity discounts were applied, a change in quantity will affect the price per piece of the complete order. The customer accepts a back charge on any previously shipped quantity.
Payment	Invoices are payable within GSI established terms. Interest will be charge on overdue accounts at 1.5% per month, 18% per annum. Returned checks will incur a \$50 charge. Credit Card payments are due when the item ships. Credit card payments made after 30 days of invoice or later are subject to a 2.75% fee or 1.5% per month at the option of GSI.
Shipping	All freight and packing cost will be paid by the customer and shown separately on the invoice. Shipments will be insured at sale value and included in the shipping cost. A maximum 20% packing fee may be added at the discretion of GSI. Shipments are FOB Westfield Massachusetts.
Warranty	Products are covered by the original manufacturer warranty where applicable. Live Tool Holders are guaranteed by the manufacturer for a period of 12 months or 2000 hours whichever comes first to be free of material defect or poor workmanship. A copy of the manufacturer's full guaranty is available upon request. GSI warrants that its products are free of material defect or poor workmanship ("Defect") for a period of 12 months from delivery. In the event GSI receives written notice of an alleged defect within the warranty period, GSI has a reasonable opportunity to inspect the relevant product and GSI determines that there is a Defect, GSI will repair or replace the product at GSI's option. EXCEPT FOR THE WARRANTY SET FORTH IN THIS SECTION, GSI MAKES NO OTHER WARRANTIES, WHETHER BY STATUTE OR EXPRESS OR IMPLIED, INCLUDING ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR THAT THE DESIGN OF THE FINISHED PRODUCT WILL MEET CUSTOMER REQUIREMENTS. ALL OTHER WARRANTIES AS TO THE QUALITY, CONDITION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY EXPRESSLY DISCLAIMED. THE REMEDIES SET FORTH IN THIS SECTION SHALL CONSTITUTE YOUR SOLE AND EXCLUSIVE REMEDIES, AND GSI'S SOLE AND EXCLUSIVE LIABILITY, IN CONNECTION WITH ANY WARRANTY CLAIM ARISING HEREUNDER.
Limitation of Liability	EXCEPT FOR ACTS OF GROSS NEGLIGENCE OR WILLFUL MISCONDUCT, TO THE MAXIMUM EXTENT PERMITTED BY LAW, NEITHER GSI, NOR ITS RESPECTIVE OFFICERS, DIRECTORS, EMPLOYEES, AND AGENTS SHALL BE LIABLE TO CUSTOMER FOR ANY INCIDENTAL, CONSEQUENTIAL, INDIRECT, SPECIAL, RELIANCE OR PUNITIVE DAMAGES OR LOST PROFITS OR OPPORTUNITIES, IRRESPECTIVE OF ANY NOTICE OR ACT CONSTITUTING NOTICE OF THE POSSIBILITY OF ANY SUCH CLAIM. THE AGGREGATE CUMULATIVE LIABILITY THAT GSI SHALL HAVE FOR ANY AND ALL CLAIMS ARISING IN CONNECTION WITH THIS PURCHASE, WHETHER BASED ON CONTRACT, TORT, STRICT OR PRODUCTS LIABILITY, WARRANTY, INFRINGEMENT OR OTHERWISE, SHALL NOT EXCEED ALL PAYMENTS MADE BY CUSTOMER AND RECEIVED BY GSI UNDER CUSTOMER'S ORDER.
Returns	We will replace or accept for return items that are not what was ordered or are found to be defective. Claims must be submitted within 30 days and will not be accepted without an approved GSI Return Authorization Form. Items must be returned in new condition and properly packaged. Returned items that are damaged, used or are missing parts may be refused for return or subject to repair charges and restocking fee. Items returned without cause will incur a \$25.00 process fee and or up to 20% restocking charge. No credit will be issued for items returned after 90 days. Special orders cannot be returned. Any credit due will be issued as a merchandise credit and applied towards future purchases.
Collection	In the event of non-payment within the terms, the customer will be responsible for all costs of collection including, but not limited to, attorneys' fees incurred by GSI in connection with any delinquent account.
Disputes	This Agreement and dispute arising from or related to this Agreement, the sale of goods or any other transactions between the parties shall be governed exclusively by Massachusetts law. Any court action by either party shall be brought exclusively in the appropriate state or federal court in Hampden County, Massachusetts. The customer hereby agrees to submit to the jurisdiction of such court.

I understand the terms and conditions set forth by Genevieve Swiss Industries, Inc. and agree to the conditions in whole as they are stated above in exchange for the goods and service rendered from Genevieve Swiss Industries, Inc. No amendment or modification of these terms and conditions is effective unless agreed to in writing by an officer of Genevieve Swiss Industries, Inc.
