HP Air Force NETCENTS-2

Printers, Multi-Function Printers, and Scanners

The world's most secure printers.¹

Get more for your budget dollars while helping meet all of your printing requirements. HP offers printers at significantly lower costs than GSA pricing on the NETCENTS-2 Contract.

Enclosed are the products that were previously available on DPI PSC 2018² and the appropriate part numbers to reference on your NETCENTS-2 Request for Quotes (RFQs).

A device decision is a security decision

Print security is more than document security. Today's threats require attention to data in-transit and endpoint devices on the network. HP printers can stop an attack the moment it starts and HP Enterprise models can self-heal with unique security features like HP Sure Start with its self-healing BIOS, whitelisting, and run-time intrusion detection. HP CAC enabled MFPs increase security with FIPS 140-2 validated cryptographic modules to help secure email and secure PDF.

Referenced below are the part numbers needed for inclusion on RFQs submitted as part of NETCENTS-2.

Shop HP's secure line-up of printers, MFPs, and scanners and stay a step ahead of cyber threats.

Print only function—fast, consistent, and clear—virtually every time

HP LaserJet Enterprise M507dng Printer (Monochrome)

Finish tasks faster with a printer that starts right away and helps conserve energy.³ Multi-level device security helps protect from threats.

1. Based on HP review of 2018 published security features of competitive in-class printers. Only HP offers a combination of security features that can monitor to detect and automatically stop an attack then self-validate software integrity in a reboot. For a list of printers, visit <http://www.hp.com/go/PrintersThatProtect>. For more information: <http://www.hp.com/go/printersecurityclaims> 2. The HP LaserJet Enterprise M507dng replaces the HP LaserJet Enterprise M506 and the HP Color LaserJet Enterprise Flow M528c replaces the HP Color LaserJet Enterprise Flow M527c from the DPI PSC-2018 contract. 3. HP Auto-On/Auto-Off Technology capabilities are subject to printer and settings. 4. Measured using ISO/IEC 24734, excludes first set of test documents. For more information see hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity. 5. Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups. 6. HP Service levels and response times for HP Care Pack Services may vary depending on your geographic location and product model. Service starts on the date of hardware purchase. Restrictions and limitations may apply. For details, visit: hp.com/services/carepack. 7. Some features require additional purchase. A FutureSmart service pack update may be required to activate security features. Learn more at <http://www.hp.com/go/printsecurity>. 8. Scan speeds of up to 50 ipm (25 ppm) measured at 300 dpi (black and white, grayscale, and color). Actual processing speeds may vary depending on scan resolution, network conditions, computer performance, and application software. 9. Scan speed measured at 300 dpi (black-and-white, grayscale, and color). Actual processing speeds may vary depending on scan resolution, network conditions, computer performance, and application software.
