

Financial Services Canada provides a single-source approach to identifying and researching Canadian financial services companies and organizations. The book is organized with the user in mind. Categorized listings and four easy-to-use indexes allow you to find an institution or contact by company name, location, name of a senior officer, or service offered.

The Eight Sections

Section 1 - Banks & Depository Institutions

The first section presents the Canadian banking, trust and cooperative industry in the following sub-sections: Domestic Banks (Schedule I), Foreign Banks (Schedule II), Foreign Bank Branches (Schedule III), Foreign Bank Representative Offices, Savings Banks, Trust Companies, and Credit Unions/Caisses Populaires. Within each sub-section, the entries are arranged alphabetically. Listings may include an institution's Canadian branches, arranged alphabetically by city or town.

Section 2 - Non-Depository Institutions

Information about non-deposit-taking financial institutions is split into the following sub-sections: Financing & Loan Companies, Bond Rating Agencies, Collection Agencies, Credit Card Companies, and Trustees in Bankruptcy. Companies are arranged alphabetically within each sub-section. Concise information about branch offices may also be featured.

Section 3 - Investment Management Firms

The following sub-sections are presented in this section: Financial Planning & Investment Management Companies, Holding & Other Investment Companies, Investment Dealers, Investment Fund Companies, Pension & Money Management Companies, and Stock Exchanges. Companies in this section often fall under more than one of the sub-sections.

Section 4 - Insurance Companies

The fourth section is a guide to the insurance industry in Canada. Companies are compiled alphabetically by name. Federally and provincially incorporated insurance companies, reinsurance companies, mutual benefit companies, fraternal benefit societies, and reciprocal exchanges are presented. Class of insurance offered by each company is given.

Section 5 - Accounting & Law

Accountants, Actuarial Consultants, and Law Firms are the sub-sections of Section 5. Major Canadian accounting and law firms are listed here. Where provided, details of lawyers' areas of financial practice are included, as well as their contact information.

Section 6 - Major Canadian Companies

Canada's major private, public, or Crown corporations are found in this section. For each company, key financial contacts and a brief description of the business are highlighted.

Section 7 - Associations

This section focuses on associations and institutes for the financial services sector.

Section 8 - Financial & Technology Services

This recently added section details major Canadian companies involved in financial software, payroll services, digital payment processing and tax preparation, among other technical areas.

The Indexes

The **Entry Name Index** sorts every main office entry in the directory alphabetically by name of company or association. If searching for a specific company, but unsure of which section to check, begin here. The index directs you to the appropriate section and page number. When an office is listed in more than one section, each section, with its page number, is indicated.

The **Executive Name Index** lists all officers, directors, and senior personnel alphabetically by surname. Executives are accompanied by their title and organization name. If an executive has multiple positions within a company, or has roles with several companies, all are given.

The **Geographic Index** breaks down the location of financial institutions and their branches by town or city. Listings are arranged by province, followed by place names in alphabetical order. This index provides a quick and simple method of finding companies in any given place across Canada. The index supplies the page number to see the complete entry for each organization. When an institution has several locations in a single city, its name appears once after the city name. The section and page number refers to the beginning of the listing.

The **Insurance Class Index** helps you find a company by one of 17 different types of insurance, from Accident to Theft.

Most of the information in *Financial Services Canada* is in databases that can be sorted and combined to provide you with mailing labels by category or subject interest. Lists are provided in printed or electronic form (see details at the back of the book or phone Grey House Publishing Canada at 1-866-433-4739).

Services Financiers au Canada fournit une ressource unique pour identifier et retrouver les entreprises et organisations dans les services financiers au Canada. Ce livre est organisé à l'attention de l'utilisateur. Spotlight on Canadians and debt Who's vulnerable?

Debt-to-income ratios in Canada continued to rise since the 2008–2009 recession, while they declined in the United States over the same period.

In Victoria, Vancouver and Toronto, debt-to-income ratios exceeded 200% in 2016, which means a household with \$50,000 in after-tax income had over \$100,000 in debt.

Debt-to-income ratios were relatively high for those at the bottom of the income distribution in CMAs where housing prices have increased over the last few years.

Over the last 5 years, home prices have **increased** notably in large CMAs

Did you know?

8.4% of Canadian families had less than \$500 in net worth in 2016.¹

18.6% of those in the lowest income quintile had less than \$500 in net worth in 2016.

Stay tuned for more insights on Canadians and debt through our analytical publications.

¹ Calculated for economic families and persons not in an economic family that have less than \$500 in net worth, excluding registered pension assets.

Note: Throughout this infographic, the term 'Canadian families' is used to describe economic families and persons not in economic families. Debt-to-income ratios at the national level were calculated based on concepts from the Macroeconomic Accounts and using disposable income. Note that estimates also include data from non-profit institutions serving households. Debt-to-income ratios by after-tax income quintile and census metropolitan area were calculated using after-tax income, based on concepts from the Survey of Financial Security, which defines after-tax income as total income (market income and government transfer payments) less income taxes (federal and provincial).
