

HP ZBook Create G7 Notebook PC (1J3R8EA)

Overview

The new standard for the serious creator

Real-time rendering. Sleek design. This device does it all. Ready for a workflow revolution? With NVIDIA® GeForce® graphics combined with the remarkable power of Z, pro-grade performance has never looked or felt better.

The performance a pro deserves

For the first time, Z power and performance meets NVIDIA® GeForce® graphics. Offering up to 32GB memory, Intel® processors and up to 2TB NVMe storage, you can design, edit, render, game and stream from anywhere.[2] No matter how complex your workflow.

Intuitive. Innovative. Inspired.

Ingenious engineering meets deliberate design. Create and game at max performance with breakthrough vapor chamber cooling and liquid-crystal polymer thermals. Our astonishingly quiet, comfortable keyboard now comes with an optional creative layout.

Engineered to go mobile

Introducing HP smallest 15" laptop for creating and gaming. Our groundbreaking design packs a nearly borderless screen and long-lasting battery life into a lightweight, scratch-resistant aluminum frame.

Features

Windows 10 Pro 64

Work without compromising on performance or security with Windows 10 Pro, powered by HP's collaboration and connectivity technology.

Intel® Core™ i7 processor

Run several CPU-heavy programs simultaneously without sacrificing performance with an Intel® Core™ i7 processor.^[1]

HP Z Turbo Drive High-speed Storage

Work without limits in any location with local PCIe storage that's up to 6x faster than SATA SSD, and up to 21x faster than traditional HDD storage.^[4]

HP Fast Charge

Ultra-fast recharge takes you from zero to 50% charge in just 30 minutes.^[5]

Spill-resistant Keyboard

Accidents happen - which is why we designed our keyboard with a drain hole, so minor spills flow out the bottom for easy cleanup.

Industry-leading security features

Advanced security features come standard. System safeguards like HP Sure Start – the industry's first self-healing BIOS – mean your device is locked down tight, so your data and identity are too.

[1] Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

[2] Optional, configurable features.

[4] For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 30GB (for Windows 10) of system disk is reserved for system recovery software.

[5] Recharges the battery up to 50% within 30 minutes when the system is off or in standby mode. Power adapter with a minimum capacity of 65 watts is required. After charging has reached 50% capacity, charging will return to normal. Charging time may vary +/-10% due to System tolerance.
