Sinks

Stainless Steel Sinks

Features

- Welded construction for consistent metal gauge thickness throughout
- 12" (304.8 mm) or 14" (355mm) deep tub with 3/4" (19.1 mm) coved radius tub corners
- 9" (228 mm) Back Splash with tile ledge for easy installation.
- Raised 1-5/8" (41.3 mm) diameter rolled edge
- 3-1/2" (88.9 mm) drain size.
- 1-2/3" (42.5 mm) legs with 1" (25.4 mm) adjustable feet .

Materials

- **Top:** 16 Ga. or 18Ga. 300 series stainless steel .
- **Legs:** All sinks furnished with 1-2/3" (42.5 mm) diameter heavy gauge tubing with leg gussets and high impact corrosion resistant fully adjustable 1" (25.4 mm) feet.

Mechanical

- 1-1/8" (28.6mm) faucet holes on 8" (203.2mm) centers.
- 3-1/2" (88.9mm) waste drain opening.

1 Compartment - 12" Series Sinks

300 series stainless steel top, Galvanized or stainless steel legs, 12" Deep Bowls, 3/4" coved corners, 9" back splash, 2-1/2" edge rim, 3-1/2" drain. 1-2/3" legs with adjustable feet. Drainboards are dipped and the bowls are seamlessly welded together. 6 PCS /1 pallet. Pallet covered with protecting film, bubble paper and carton corners.

Optional Upgrade: Model SS (STAINLESS STEEL LEGS)
For Example: CS3-1-2016LRSS-18

Equipment Stands

Features

- Top is furnished with 1.5" hemmed edge splash on rear and both sides.
- Under shelf is adjustable.

Material:

- Top is 400 series stainless steel.
- Galvanized under shelf.
- Galvanized legs are 1-2/3" (42.5mm) diameter with adjustable feet.

Construction:

- All TIG welded. Exposed welding areas finished to match adjacent surfaces.
- Entire Top is mechanically polished to a satin finish and is sound deadened.
- Hat channels are secured to top by means of structural adhesive and weld studs.
- Gussets die-stamped and welded to support hat sections.

Optional upgrade:

300 series top, 400 series under shelf, Stainless steel legs

For example: EQS3-2424-SS

300 series top, Galvanized under shelf, Galvanized legs

For example: EQS3-2424

Supersave Cabinet With Drawers

Features

- 400 series stainless steel.
- Flat top model is furnished with square bend edges on the 4 sides.
- 5" splash model is furnished with square bend edges on the 3 sides and a 5" splash with return on the rear side.
- Sliding doors have recessed handles for ease in opening and closing.
- Seamless welded drawers with high quality sliding rails and recessed handles.
- Exporting carton box with wooden pallet.

Construction

- All TIG welded. Exposed areas finished to match adjacent surfaces.
- Entire Top is mechanically polished to a satin finish and is sound deadened.
- Hat section secured to Top reinforces and maintains level working surface.
- Heavy gauged material welded on the bottom for fixing wheels, adjustable feet is available

Stainless Steel Bun Pan Rack

Features:

200 series stainless steel.
 Fully welded 1" square tubing ladder assembly.
 Six support bars provide strength and durability.
 Plastic end caps, 1-1/8" angles, heavy duty 5" stem bolted swivel casters and two with brake.
 Support 18" X 26" pans.
 Or double quantity of 18" X 13" pans.
 500lb. Capacity.
 Knocked-down structure.

**STAINLESS STEEL WET-BATH TABLE
K.D. STYLE ENCLOSED TABLE**

NOTE:

SNG- Sneeze guards are 200 series SS tubing with tempered Glass. Heat Bulbs not included. Shipped Knocked down. See the SNG models below.

FEATURES:

- 15,000 BTU'S / 2&3 compartments
- 25,000 BTU'S / 4&5&6 compartments
- Single control knob with 3 settings Pilot indicator openings
- Stainless steel dish shelf & under shelf
- 1" thick poly cutting board (8" wide)
- Wet Gas units are perfect for prepared food. It maintains food temperature with hot steam. Add 1-2" of water to the wet bath unit to achieve the correct amount of hot moisture.

OPTIONAL:

Open base under structure available.

MATERIAL:

- TOP: 20 gauge 300 series stainless steel
- BODY: 22 gauge 400 series stainless steel
- Sneeze Guards Frame: 18 gauge, 200 series stainless steel

GAS:

- Available for Natural or Bottled Gas
- 1/2" female NPT connection to regulator
- Infinite Control knobs Indicator lights
- Note: External pressure regulator is required.
- 4" WC pressure in for Natural Gas and
- 10" WC pressure in for LP.

STAINLESS STEEL EXHAUST HOOD

Wall Canopy Hood for use over 450°F, 600°F and 700°F cooking surface temperatures. The aerodynamic design includes a baffle for exceptional capture and containment.

FEATURES:

- All fabricated with 400 series stainless steel.
- Superior exhaust flow rates. Available in single or back-to-back configurations.
- Insulated, double-wall rigid front has aerodynamic design that reduces radiant heat into kitchen, prevents condensation and provides exceptional capture and containment of cooking vapors.
- Incandescent light fixtures and globes shall be installed and pre-wired to a junction box. The light fixtures shall be installed with a maximum of 36" spacing on center.
- Polished stainless steel on the interior and exterior of the front enhance aesthetics.
- All hoods come standard with stainless steel filters and a deep grease trough which allows for easy cleaning. Grease drain system with removable cup for easy cleaning.
- Standard built in 3" rear standoff to meet NFPA 96 requirements, when installed in a wall application.

It is the Responsibility of the Architect/Owner to Ensure that the Clearance Local Code Requirements is in Compliance with and Combustible Materials from Limited-Combustible

Module Bar Solution

We may change design according to your feedback. This page just for reference now. We need your floor plan for bar section. Hope you can send your information to us. Many thanks.

Features:

- Removable modules.
- Easier assembly with different modules according to your idea.
- Top and wall sides can be assembled with your customized material like stone, wood etc.
- Standard wall and connected with screws.
- Removable cover board on the bottom.

Material:

- 18ga. 300 series stainless steel.
- Or 18ga. 300 series stainless steel top and 400 series bottom cover.
- 16 ga. Galvanized standard wall.

Function:

- Standard wall will suite for electrical conduit, beer/soda line, plumbing lines, drain conduit.

Spare parts

FAU-4C12S-BS

Wall mounted 4" faucet
With swing spout

FAU-4C12S

Wall mounted 4" faucet

3-1/2" drainer

What Is Stainless Steel?

Unlike iron or steel that readily corrodes, stainless steel contains additional metals like chromium and nickel. Don't confuse stainless steel with galvanized steel--galvanized steel is plain steel with a layer of zinc deposited on the surface.

While there are many different "series" (different compositions) of stainless steel, two of the most common ones you'll see in the food service industry are 400 series and 300 series.

- ★ 400 Series stainless steel contains chromium
- ★ 300 Series stainless steel contains both chromium and nickel

Without getting too technical, adding these metals in specific percentages to the steel itself change its makeup all the way down at the atomic level, and form an invisible film on the surface, which protects the metal against corrosion.

Because this film is only millionths of an inch thick, it can be damaged if abused. Three basic things can damage this protective layer and allow corrosion to take hold:

1. Mechanical Abrasion--Anything that can scratch the steel's surface including steel wool, wire brushes, and scrapers
2. Deposits & Water- -Hard water left sitting on the surface will leave water spots and can break down the layer of protection, as well as food deposits
3. Chlorides--Found in water, food, table salt, but mainly found in many household and industrial cleaners

Care & Cleaning Tips for Work Tables, Sinks, and Equipment Is Stainless Steel?

1. Use the right cleaning tools: Soft cloths, microfiber, sponges, or plastic scouring pads are best. The microfiber buying guide shows the best cleaning methods and products to ensure your stainless steel maintains its appearance. Avoid using scrapers, wire brushes, steel wool, or anything else that might scratch the surface.
2. Clean with the polish lines: Stainless steel usually has a "grain" that you can see running in one direction or another. If you can see the lines, it's always best to scrub or wipe parallel to them. This is especially important if you do have to use something more abrasive than a cloth or wiper.
3. Use the right cleaning chemicals: The best cleaner for stainless steel will contain alkaline, alkaline chlorinated, or non-chloride chemicals. Noble Chemical offers a variety of stainless steel cleaners and polishes specifically designed for stainless steel.
 - ★ Excel is a water-based aerosol cleaner / polish that won't attract dirt like an oil-based cleaner can. It's great for commercial kitchen equipment!
 - ★ Spiffy Shine is an oil-based liquid stainless steel cleaner. While it will give the most brilliant shine of these three products, it is not the best for use in your commercial kitchen. We don't recommend it for use around heavy grease areas like near a fryer, because it will actually attract grease and dust. Also, you should thoroughly wash any food-contact surfaces after using it on them.

They not only clean and shine, but also help enhance the protective film. It's also a good idea to clean and sanitize frequently, using chemicals at the required strength. Noble's QuikSan is a ready-to-use sanitizer that won't damage stainless steel and is great for sanitizing work tables, and other surfaces around your commercial kitchen. Cleaning stainless steel regularly also prevents dirt or spills from drying onto the surface so you won't have to work as hard to clean anyway!

For other types of cleaners including citrus-based cleaners, bleach, and deliming agents, the key is to rinse them off thoroughly after use.

4. Minimize the impact of hard water: If you have hard water, having a water softening system is probably the best option, but may not be practical in every situation. If you have hard water and aren't able to treat it throughout your entire facility, it's a good idea to not let water stand on your stainless steel surfaces for extended periods.
