#### Notes:

- HPE Apollo 2000 Gen10 Chassis- The increasing power of new high-performance processor technology requires increased cooling efficiency for rack-mounted servers. For maximum cooling, HPE racks are recommended to allow these racks to be fully loaded with servers using the latest processors. For detail information please see Apollo 2000 System User Guide
- For more information on HPE rack enclosures, review the QuickSpecs at:  
<https://www.hpe.com/us/en/product-catalog/servers/server-racks.hits-12.html>.

#### Cautions:

- If a third-party rack is used, observe the following additional requirements to ensure adequate airflow and to prevent damage to the equipment.
- Always use blanking panels to fill all remaining empty front panel U-spaces in the rack. This arrangement ensures proper airflow. Using a rack without blanking panels will result in improper cooling that can lead to thermal damage.
