

## Migrate your customers from AirWave to Aruba Central. Receive a cash-back on your Central purchase.

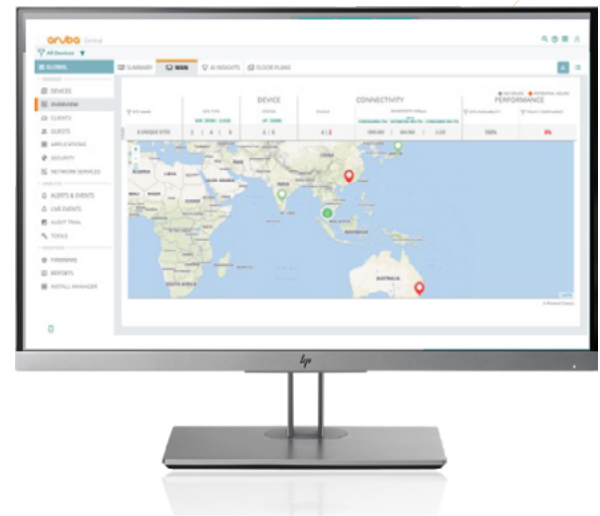

To help existing AirWave customers make the transition to Aruba Central – whether deployed in the cloud or on-premises – an **AirWave Trade In** promotion is now available.

Please refer to the information in this document to help position Aruba Central and discuss the promotion with customers. The second page contains key reasons why customers should migrate from AirWave to Aruba Central, and can be used to help frame your sales conversations.

**Please register and find full details here:**

[www.hpe.com/eu/tradein](http://www.hpe.com/eu/tradein)

### Offer and eligibility

- ✔ Customers can apply for a cash-back incentive for the trade in of their AirWave platforms.
- ✔ The Aruba Trade In Program will now include eligible Airwave SKUs and will offer a cash-back.
- ✔ See the list of eligible SKUs/part numbers below.
- ✔ The offer is applicable to 1, 3, and 5-year Central Foundation license terms.
- ✔ Aruba Central includes 24x7 Technical Assistance Center (TAC) support for managed devices and this offer includes the option to add Next Business Day Exchange or 4-Hour Onsite hardware replacement (e.g., HJOJ2E: Aruba 1 Year Foundation Care Next business day Exchange Hardware Only 3810M 16G SFP Switch Service).

### Terms and conditions

- ✔ This offer is available in Europe, Middle East and Africa only, terms may vary by country.
- ✔ The offer is valid through 7th May 2023.
- ✔ Aruba & HPE reserve the right to terminate, alter, or modify these terms at any time.
- ✔ Offer cannot be combined with any other promotional offer.
- ✔ This is an end-user customer specific promotion
- ✔ Only Aruba Partner Ready for Networking Program partners are eligible for this offer.
- ✔ Offer cannot be combined with any other promotional offer.
- ✔ Central purchases will have discount limits applied where this offer is being availed of; please work with your distributor or Sales Rep on pricing.
- ✔ Customer must have an active AirWave support contract to be eligible for this offer. Proof of an active support contract is required.

## Process steps for trade in

- ✔ Submit your NGQ quote for your new Central purchase
- ✔ Once approved, please log your trade in request at [www.hpe.com/eu/tradein](http://www.hpe.com/eu/tradein)
- ✔ Include your **NGQ/ I.Q 2.0 Quote ID** in the trade in request, as well as your **Support Contract ID**
- ✔ The named country approver (usually the Category Manager) receives notification on new applications and reviews eligibility, resulting in:
  - Approved application
  - Escalated for 2nd level approval if needed (Country Manager / Geo Lead)
  - Rejected request
- ✔ After purchase of the new products, the application is converted to a trade-in request & additional information is validated (order info, invoice etc)
- ✔ Payment is prepared and issued after a final approval

## Participants

- ✔ Channel Partners to raise applications to participate before purchase of the new Aruba product

## Products

Purchase of a Central product is a pre-requisite to participate with the program per the defined list of eligible products

## Trade in teams

- ✔ Applications are reviewed by Aruba and confirmed with the final refund allowance. Refunds proposed before Aruba approval are not binding!
- ✔ Approved quote remains valid for 90 days
- ✔ Within that period, recommended right after receipt of the new Aruba product, the request for restitution is completed and submitted by the beneficiary.
- ✔ After the AirWave contract is validated and reviewed, the payment will be issued within maximum 45 days to the bank account of the participant.
- ✔ Please see full terms and conditions at [www.hpe.com/eu/tradein](http://www.hpe.com/eu/tradein)

## Timelines

- ✔ Apply before purchase
- ✔ Approved quotes remain valid for a period of 90 days  
Payments will be made within 45 days of support contract validation

Local terms apply, please refer to the program terms at:

[www.hpe.com/eu/tradein](http://www.hpe.com/eu/tradein)

## 9 reasons to migrate from Airwave to Aruba Central

REASON TO MIGRATE	ARUBA CENTRAL CAPABILITIES	APPLICABLE MODELS
1. Your network is expanding with more sites, users, and connected devices.	Central On-Premises delivers 6x higher device scale than AirWave, while the cloud-hosted version of Central offers virtually unlimited scale.	Cloud and On-Prem
2. Nearly half of IT orgs use 11+ tools to manage their networks <sup>1</sup> , which increases the likelihood of service problems or outages.	Single pane of glass and unified management of Aruba APs, switches, and more greatly simplifies network operations and improves IT efficiency.	Cloud and On-Prem
3. AirWave has served your network well but has performance limitations when managing large deployments.	Improve performance with a microservices architecture and web-scale design.	Cloud and On-Prem
4. Network uptime is critical – you need a management system that’s equally resilient.	Built-in redundancy for continuous operations means no more service disruptions due to server appliance failures.	Cloud and On-Prem
5. Your teams spend too much time troubleshooting issues – nearly 60% of IT’s time is spent in triage mode. <sup>2</sup>	Aruba AIOps automatically surfaces issues and pinpoints root cause with 95% accuracy, reducing troubleshooting time by up to 90%.	Cloud
6. Non-stop change windows can overwhelm IT, and 35% of network downtime is due to human error. <sup>3</sup>	Advanced config options and more intuitive workflows – including a multi-editor for Aruba CX switches – to reduce errors and the likelihood of performance or downtime events.	Cloud and On-Prem
7. 50% of employees will continue to work from home post-COVID, but 70% of businesses have remote users who experience IT performance issues multiple times a week. <sup>4</sup>	Real-time monitoring and troubleshooting of clients connected to VPNs or Aruba Remote Access Points helps IT keep network issues and employee disruptions to a minimum.	Cloud
8. Lines of business often deploy IoT devices without IT’s knowledge. Nearly 80% find devices they didn’t install <sup>5</sup> , creating new security risks.	AI-powered device fingerprinting for all devices, including IoT and BYOD, provides IT with better visibility into device usage and behavior.	Cloud
9. Like 77% of IT orgs <sup>6</sup> , you’re placing a high priority on network automation – what tools should you use to start?	A rich library of APIs and webhooks make it easy to create programmable workflows between Aruba Central and other leading IT platforms such as ServiceNow, Ansible, Slack, and more.	Cloud and On-Prem
