Get a free 90 days trial of the ZCentral Remote Boost Software to keep your business up and running

HP ZCENTRAL REMOTE BOOST

SOFTWARE THAT SETS YOUR POWER USERS FREE

GET IT NOW

Behind the innovation

Remote Boost & ZCentral

THE SOLUTION

The world's first single-sourced remote workstation solution.

The power to work from everywhere.

WORKSTATION ACCESS FROM ANYWHERE

ZCentral Remote Boost Software

Integrated Collaboration Tools

Exceptional frame rate

Superb Image quality

CENTRALIZED WORKSTATION MANAGEMENT MADE EASY

ZCentral Connect Software
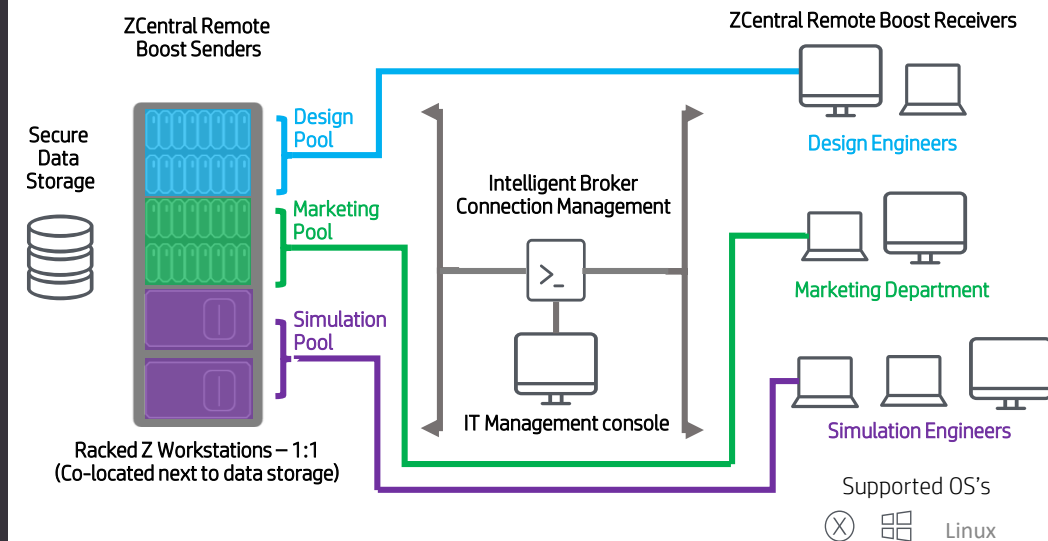

One-Click Access

Centralized Power On/Off

Manage Connections Remotely

SIMPLE & FAST

- ✓ Choose your own device to access workstation power
- ✓ Connect device through VPN and use local devices like mouse & Keyboard
- ✓ Experience smooth graphics on even a very low bandwith with possibility to share screen and collaborate with others

HOW IT WORKS

ZCentral Remote Boost Senders

ZCentral Remote Boost Receivers

Secure Data Storage

Design Pool

Marketing Pool

Intelligent Broker Connection Management

IT Management console

Design Engineers

Marketing Department

Simulation Engineers

Racked Z Workstations – 1:1 (Co-located next to data storage)

Supported OS's

X   Linux

HP *Remote* Boost

FEATURES

DYNAMIC RESIZING

Power users and those they remotely collaborate with can dynamically resize the content to match the resolution of the device they're working on, or match it to the centralized hardware they're tapping into[3].

4K[4] & MULTI-DISPLAY SUPPORT

ZCentral Remote Boost supports 4K[4] and multi-display setups, so your users can have the flexibility to work from almost any end-point device[5].

GRAPHICS HARDWARE ACCELERATION

Achieve optimal performance, even with low network bandwidth. With Advanced Video Compression (AVC), the pixels being sent over the network are compressed to improve your frame rate[6].

HP VELOCITY

Break free of your network limitations with HP Velocity. Our software improves latency in wide area networks and increases network traffic tolerance, for solid performance even over poor connections.

TOUCH GESTURES[7]

Zoom, tap and swipe your way to productivity with the ability to control any application.

REMOTE USB

With local control and access, you can virtually attach or block a USB device to a remote system[8].

OPERATING SYSTEMS

Our software is compatible with most desktop operating systems including Windows, MacOS and Linux®. No need to install any extra drivers or app updates for supported operating systems.

SOFTWARE INCLUDED[1]

You don't need any additional infrastructure costs to start working and collaborating remotely. ZCentral Remote Boost is included on all Z devices[1] and supported on most operating systems.

Remote *Boost* & ZCentral

- Faster access to **large data files** between locations

- Streamlined **IT management** of multiple office sites, devices and platforms*

- Enable **open office environments** or **remote locations** for power users

- **Trusted** data security & encryption

- On-demand dedicated performance & **access for users** when they need it

- **Lower cost** compared to workstation in cloud or virtualized desktop alternatives

* Only available with ZCentral Connect Software
