 4/ After Milnor spill ends on April 27, 1987. 187,603.3 (187,603.3 + 26,148 unaccounted for storage + 30,843 Walcott)
 5/ Other storage is equal to the contents of Milnor (18,100.0)

Footnotes to 1987 District 1 Reservoir Fill + Carry-over Table

1. After Maximum reservoir accrual to end of year.
 $(836,617.6 - 730,339.2) + 26,148$ Unaccounted Late Fill
 $+ 30,843$ Walcott draft.
2. Stored Divisions minus Willow Creek correction, minus
 exchange pumping, $(2,532,568.2 - (-790.2) - 2,229.3)$.
3. Previous Column less discrepancy due to gain averaging.
 (Equals Oct. 31 actual contents) $(\Delta = -25,905.6)$
 $+ 49,200 = +23,294$
4. After Milner spill ends on April 27, 1987
 $187,603.3 + 26,148$ unaccounted storage $+ 30,843$ Walcott.
5. Other storage is equal to the contents of Milner.
6. June 30th - Milner Oct. 31, 1986 = $730,339.2 - 30,900$
 $= 699,439.2 -$ April 27th Restart $(711,921.7) = -12,482.5$
7. $30,843$ Winter Draft $+ 66,157$ Late Fill = $97,000$
8. $30,843$ Walcott Draft $+ 67,098$ accounted Late Fill $+ 5,924$
 unaccounted Late Fill $- 97,000 = 6,865$
9. $18,100 - 30,900 = -12,800$
10. $18,916$ Late Fill $+ .3722(3,128)$ Unaccounted $+ 337$ Adjustment
 to 1st Run = $20,417$
Late Fill

4/19/88

1987 Late-Season Fill

Late Season Fill was computed by zeroing the the^{Res.} Storage Rights on Oct. 15th and restarting the accounting run this allows the 2nd fill to accumulate in their respective rights. A correction to these stored rights is needed to keep track of the storage passing Milner that is accounted for as natural flow.

| | <u>Stored Flow + Adj.</u> | | = | <u>Late Season Fill</u> | |
|-------|---------------------------|----------------------|---|-------------------------|-------------------------|
| JCK | 5,017 | | | 5,017 | |

Should have seen on HC February

1) Change to Salem union

1) Change to Woodmansee Johnson

~~(4) Re-assign contracts~~

(5) Charge to Fall River Canal

(6) combine w/ Canyon CK Canal

(7) Adjust for Right Bought from ESPLIN

Ron Carlson, Watermaster
Water District No. 1
150 Shoupe, Suite 15
Idaho Falls ID 83403

Subject: Allocation Procedures (Reservoir)

Dear Ron:

I am writing to confirm the agreements made concerning 1987 carryover storage and 1988 accrual when we met on September 7, 1988. The information is from the flip charts used during the meeting. This letter was drafted soon after the meeting and was misplaced. Please accept my apology for the delay.

Storage diverted by users, who understood they were diverting natural flows because the Lorenzo gage was not corrected in the real-time data provided to Water District No. 1 by the Bureau of Reclamation, will be given to those users as natural flow. All storage in American Falls and Palisades Reservoirs will be charged a loss, proportional to reservoir capacity, to provide that storage. The total use of 17,789 acre-feet will be divided as follows: 10,358 will be charged to American Falls Reservoir and 7431 to Palisades Reservoir.

Credit to the diverters is justified in this case for 1987 carryover because of the long period over which the gage was not corrected, and the large correction that should have been applied. I do not believe that this correction procedure should be implemented in the future unless exceptional conditions exist. As we have become aware in recent weeks, the final streamflow data does not weight individual streamflow measurements as heavily as we usually do in the real-time data. In general, not applying shifts would make our data more consistent with the final data. Year end processing of diversion data usually adjusts for growth of weeds in diversion channels and reduces storage diverted by most entities leaving them with more carryover than anticipated by real-time data. For those entities that use more storage than intended water bank purchases or reduced carryover should be expected.

The division of responsibility in determining water usage seems clear:

Water District No. 1:

Determine use of storage by diversion.

Determine accrual of water to storage rights.

Bureau of Reclamation:

Determine carryover for each contract.

Determine carryover for each reservoir.

Determine allocation of new storage accrual by contract.

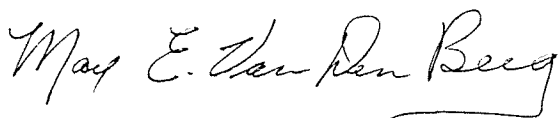

The order of use of water for users with storage in more than one reservoir is as follows:

- 1) Water rented from the Upper Snake River Water Bank.
- 2) Palisades Water Users Incorporated shares if assigned to a canal by the owner of the storage.
- 3) The users proportionate share, by total Jackson Lake space, of the release required each year to maintain 200,000 acre-feet of space for winter flood control.
- 4) Lake Walcott storage contracted by the user.
- 5) American Falls storage contracted by the user.
- 6) Palisades Reservoir storage including Palisades Water Users Inc. shares if diverted by the owner.
- 7) Jackson Lake storage beyond the 200,000 acre feet released for flood control.

On the North Fork Snake River, Island Park Reservoir, and Grassy Lake have the same priority date. Grassy Lake is more difficult to fill. Henry's Lake also has an early priority, but is difficult to fill and its right would be damaged by Island Park Reservoir's filling if Henry's Lake carryover were held in Island Park Reservoir. I do not presently have enough information to determine carryover by reservoir on the North Fork. American Falls storage contracted to North Fork users should be used prior to their use of any North Fork storage.

I am waiting for your final report of storage use. It is my only source of Palisades Water Users Inc. distribution, water bank transactions, and North Fork allocation by diversion. As soon as I receive that data, we will complete our allocation computations.

Sincerely,

Max E. Van Den Berg
Project Superintendent

Ron Carlson, Watermaster
Water District No. 1
150 Shoupe, Suite 15
Idaho Falls ID 83403

Subject: Allocation Procedures (Reservoir)

Dear Ron:

I am writing to confirm the agreements made concerning 1987 carryover storage and 1988 accrual when we met on September 7, 1988. The information is from the flip charts used during the meeting. This letter was drafted soon after the meeting and was misplaced. Please accept my apology for the delay.

Storage diverted by users, who understood they were diverting natural flows because the Lorenzo gage was not corrected in the real-time data provided to Water District No. 1 by the Bureau of Reclamation, will be given to those users as natural flow. All storage in American Falls and Palisades Reservoirs will be charged a loss, proportional to reservoir capacity, to provide that storage. The total use of 17,789 acre-feet will be divided as follows: 10,358 will be charged to American Falls Reservoir and 7431 to Palisades Reservoir.

Credit to the diverters is justified in this case for 1987 carryover because of the long period over which the gage was not corrected, and the large correction that should have been applied. I do not believe that this correction procedure should be implemented in the future unless exceptional conditions exist. As we have become aware in recent weeks, the final streamflow data does not weight individual streamflow measurements as heavily as we usually do in the real-time data. In general, not applying shifts would make our data more consistent with the final data. Year end processing of diversion data usually adjusts for growth of weeds in diversion channels and reduces storage diverted by most entities leaving them with more carryover than anticipated by real-time data. For those entities that use more storage than intended water bank purchases or reduced carryover should be expected.

The division of responsibility in determining water usage seems clear:

Water District No. 1:

Determine use of storage by diversion.

Determine accrual of water to storage rights.

Bureau of Reclamation:

Determine carryover for each contract.

Determine carryover for each reservoir.

Determine allocation of new storage accrual by contract.

The order of use of water for users with storage in more than one reservoir is as follows:

- 1) Water rented from the Upper Snake River Water Bank.
- 2) Palisades Water Users Incorporated shares if assigned to a canal by the owner of the storage.
- 3) The users proportionate share, by total Jackson Lake space, of the release required each year to maintain 200,000 acre-feet of space for winter flood control.
- 4) Lake Walcott storage contracted by the user.
- 5) American Falls storage contracted by the user.
- 6) Palisades Reservoir storage including Palisades Water Users Inc. shares if diverted by the owner.
- 7) Jackson Lake storage beyond the 200,000 acre feet released for flood control.

On the North Fork Snake River, Island Park Reservoir, and Grassy Lake have the same priority date. Grassy Lake is more difficult to fill. Henry's Lake also has an early priority, but is difficult to fill and its right would be damaged by Island Park Reservoir's filling if Henry's Lake carryover were held in Island Park Reservoir. I do not presently have enough information to determine carryover by reservoir on the North Fork. American Falls storage contracted to North Fork users should be used prior to their use of any North Fork storage.

I am waiting for your final report of storage use. It is my only source of Palisades Water Users Inc. distribution, water bank transactions, and North Fork allocation by diversion. As soon as I receive that data, we will complete our allocation computations.

Sincerely,

Max E. Van Den Berg
Project Superintendent

- a) Progressive Irrigation District use on Willow Creek (16263 AF) less Lorenzo gaging credit (2313 af).
- b) Credit for Lorenzo gaging error.
- c) Lorenzo gaging credit (2591 af) minus 465 af transfer (g).
- d) Storage transfer from W Labelle and Long Island to Taylor.
- e) Storage transfer from Lenroot to Robison.
- f) Storage transfers from Butte & Market L to various users.
- g) Storage transfers from Burgess to various users.
- h) Porter storage combined with Great Western.
- i) Idaho Canal use on Willow Creek.
- j) Lorenzo gaging credit (1435 af) minus 89 af transfers (k).
- k) Storage transfers from Snake R Valley to Hill and Cannon.
- l) Storage transfers from Fort Hall Michaud to Reservation.
- m) Storage transfers from Corbett to Nielson-Hansen.
- n) Storage transfers from Riverside to Lambert.
- o) Storage transfers from Minidoka to City of Burley.
- p) Storage transfers from Milner Low Lift to Glendale Farms.
- q) Storage draft from American Falls past Milner.
- r) Island Park storage reverts to Fremont-Madison.
- s) Storage transfer from E G Howell #3 to E G Howell #1.
- t) Reverted Island Park (10 AF) plus 6 AF transfer (s).
- u) Supplied from private pond (99 AF) plus 92 AF transfer (zb).
- v) Storage transfer from Marysville.
- w) Supplied from private ponds on Snow Creek.
- x) Storage transfer from Fall River Canal.
- y) Reverted Island Park (3258 af) plus 4 af transfer (za).
- z) Storage transfer from Salem Union to J Harris.
- za) Storage transfer to St Anthony Union.
- zb) Reverted Island Park (599 af) plus 1223 af transfers (v).
- zc) Reverted Island Park (59 af) plus 21 af transfer (zd).
- zd) Storage transfer from E Hessman #1.
- ze) Loosli storage transfers.
- zf) Storage transfer from Conant Cr Canal to D Zundell.
- zg) Supplied from Bergman and Indian Reservoirs.
- zh) Credit for acquired natural flow right.
- zi) Reverted Island Park (2856 AF) plus 4163 AF transfer (x).
- zj) Supplied through groundwater exchange.
- zk) Reverted Island Park (38 af) plus 689 af transfer (zn).
- zl) Transfer to R B Ricks.
- zm) Groundwater exchange (407 af) plus 111 af transfer (zl).
- zn) Groundwater exchange (279 af) plus 689 af transfer (zk).
- zo) Credit for local inflow.
- zp) Flow credit (1091 af) less 78 af reverted Island Park.
- zq) Reverted Island Park (288 af) plus 51 af transfer (zr).
- zr) Transfer from Woodmansee-Johnson.
- zs) Snake River excess use.
- zt) Reverted Island Park (25665 af) less 14438 af excess Henrys Fork use plus 56 af unmeasured water bank use plus 317 af excess groundwater exchange less 1006 af local storage credit less 1354 af local inflow credit.
- zu) Ririe Reservoir and Willow Creek stored flow losses.
- zv) Unmeasured Snake River water bank use.

COMMITTEE OF NINE

2/1/89

RECOMMENDATIONS -- 10/27/88

1. Chuck Brockway suggested a co-op study between University of Idaho Water Resources Research Institute and Water District 01 to insure water levels in aquifer and flows are not infringed by present state of development or future development.

*Ask for Committee meeting so that Brockway can present proposal. District should support research so water rights can be better protected. May also be co-op programs with the U.S.G.S.

2. Water Accounting -- Carlson's seminar in January was supposed to explain reasons for deviations in flow measurements. We should continue to monitor. (Attached is Frank Hitchcock's memo from that seminar.)

3. Fiscal Accounting -- Convert our accounting year for Water District to either the calendar year or the water year. The audit we get at the annual meeting in March 1989 is for the year ending March of 1988.

A. Set out in Resolution #1 a breakdown in salaries for all District employees. Specifically set out how much of Carlson's salary is paid by the state and how much is paid by the District.

B. Maintain separate accountings for the separate funds the District has authorized.

4. Notice of meetings should include agendas. Ten days written notice of Committee of Nine meetings except in emergencies, then have all members sign waivers. Circulate minutes of meetings as soon as prepared.

5. Request resolutions for annual meetings early, circulate if possible.

6. Invest District funds with state treasurer. District is a political subdivision that qualifies.

7. Support legislation to equalize voting based on assessments paid. (Draft bill enclosed.)

8. Support legislation to formalize Committee of Nine so Committee acts as a board of directors to run District between annual meetings.

- A. We are a political subdivision. No tax ramifications. Board could make decisions between annual meetings as questions come up.
- B. Need better legal framework to protect Committee and Water District. e.g. May need to finance to buy water for settlement of Indian claims. (See Draft legislation -- paragraph (8) p. 3.)

RE: WATER DISTRICT 01 PRESENTATION IN BURLEY -- JANUARY
12, 1989

Ron Carlson, Watermaster for Water District 01, presented an historical background of the District and attempted to explain how deliveries are made and flow measurements accomplished and allocated. Data collection, handling and correction were explained along with the computer accounting set up that the District uses to store and manage all of the incoming information. Final accounting and the water bank set up were explained and the BOR staff attempted to explain carry-over water and the federal perspective on the water bank.

Ron Carlson presented issues affecting the Water District that are items of concern in both the Upper and Lower Valley. They included the Water District budget, information distribution, and the need for a staff attorney/public relations position after a review of the fees charged by law firms handling District business. The issues that are of interest to our firm and its clients were the Lower Valley water supply and water distribution costs. Carlson's comments follow.

Reach gains versus the Newell Formula were presented as well as the proposed changes under the Kjelstrom Formula and the effects each would have on daily distribution. The TFCC right was presented as an example of the baseline for flows and projections of the effect were made verbally by Carlson for each formula. There were several questions from the audience regarding water distribution costs and the percent of participation in the costs of the District, but Carlson refused to answer them saying only that "he would address such questions later". Gary and I were there until the end of the meeting and Carlson did not answer the questions.

Carlson closed the meeting with a discussion of water distribution costs and the services of the watermaster. Again, there were numerous questions regarding policies and procedures for delivering water that Carlson either answered abruptly or seemed to answer incompletely.

I have listed on the following page some of the highlights in comments made by Carlson or the BOR staff that may be of interest to you.

HIGHLIGHTS OF MEETING NOTES:

Carlson emphasized in his remarks about the storage operations on the river that there is no storage right at Milner Dam although the storage of natural flow accumulates to an estimated 30,000 acre feet prior to the irrigation releases. Upstream exchanges of storage water are not charged with transmission losses although the evaporation losses are supposedly figured into the deliveries from storage. Jackson Lake will be filled above the previously agreed-upon limit at the rate of 1/2 foot per day and the storage at those levels will be observed for 30 days to test the loading of the new structure. Since this will make it unlikely that Jackson will fill, the Bureau will continue space in Ririe and Palisades with subpool space still available until Jackson is legally filled to its repaired level.

TFCC was used as an example of the percentage representation within the Water District versus the amount of water diverted. Totals were shown for TFCC and NSCC as a percentage of the Lower Valley deliveries. These slides and graphs were followed by a discussion of the costs to the District as a percentage of diversions with costs stated by Carlson as:

.074 per cfs per day -- Upper Valley

.0499 per cfs per day -- Lower Valley

These figures are, according to Carlson, based on Committee of Nine factoring and the Upper Valley has included the cost of attorneys in their figure according to Carlson.

NOTE: Total of attorneys' fees quoted by Carlson since 1984.

| | |
|-----------------|-----------------|
| Holden, Kidwell | \$191,833.00 |
| Nelson, Rosholt | 28,887.00 |
| Ling, Nielsen | <u>7,798.00</u> |
| | \$228,518.00 |

These figures were cited by Carlson to point up the inefficiency of legal services and to document the need for an on-board attorney.

NEWELL FORMULA VERSUS REACH GAINS
AND THE KJELSTROM FORMULA

Carlson talked for some time about the Newell Formula as a result of concerns in the early days of the District about distribution process to the Lower Valley users. He stated that there were some gains to Lower Valley users in the upper part of the river, but it was felt that there were also shortages because of the method of determining those gains. He mentioned that the figures for gains in the Blackfoot-Neeley reach were normal this year except for the period from August 1 -- 15. He also explained the on-going controversy about the wind on the reservoir blowing against the gage and mentioned that they use a 15-day running average to buffer out the wind effect upon the figures which it does not do completely.

He stated that the groundwater component is approximately 35 percent of gains to the river. The observation well number that Carlson quoted for the basis of these statements is 5S-31E-27ABAl. He also stated that the Kjelstrom Formula is a "regression equation" that is subject to error. When the physical contents don't match the data, they modify the data to match. He said this means they modify the equation to match the contents.

Carlson stated the following as assumptions:

1. Water evaporation is lost from the basin.
2. All water diverted depletes spring flows below Blackfoot (he says this is a misconception).
3. Pumping of groundwater in the non-trust water area affects flows below Blackfoot.

He went on to say that canals or streams intercept groundwater and that wells cause leakage and recharge to the groundwater table. In the last ten years, gains available to groundwater have increased. He estimates the size of the groundwater supply at 200 million acre feet. This compares to an estimated 4 million acre feet storage in the system that the District manages. The effects of the gains and losses get buffered or spread out and are therefore not observable as independent variables according to Carlson.

In the discussion of costs, Carlson stated that the districts are based on and organized along the historical use of water established in approximately 1919. Diversions have been on the decline over the last ten years and are significantly less in the Upper Valley based systems, although he was not firm on the history or rate of diversions in the Lower Valley.

Department of Water Resources
Eastern District Office

Ron Carlson, Watermaster
Department of Water Resources
150 Shoup Avenue, Suite 15
Idaho Falls ID 83402

Dear Mr. Carlson:

The following are items that, in my opinion, as mentioned to John Rosholt, could use some additional explanation based on your presentation in Burley on January 12, 1989.

1. Gage accuracy and the compilation of figures for flow measurement as a percentage of accuracy versus how much is guess-work due to a variety of inputs.
2. Upstream exchanges as transfers of water between storage facilities and the subsequent transmission losses that would seem to occur.
3. Representation within the water district as far as the amount of water diverted for delivery to accounts in the upper and lower valley and how the cost of attorneys is figured into the percentage of costs per cfs per day.
4. Reach gains versus the Newell Formula that resulted in some shortages and/or gains to lower valley as still being figured into deliveries for lower valley accounts.
5. District formation based on water use since approximately 1919 -- has the percentage of water use by the upper and lower valley users changed substantially since that time?

I hope these will be of help to you in future explanations to water users and delivery groups.

Yours truly,

A handwritten signature in cursive script, appearing to read "Frank".

FRANCIS G. HITCHCOCK
Legal Assistant

RECEIVED
JAN 19 1989

Department of Water Resources

January 16, 1989

Mr. Max Van Den Berg
Project Superintendent
Bureau of Reclamation
1359 Hansen
Burley, ID 83318

Dear Max:

I was pleased with the outcome of our seminar. We have gotten some very encouraging feedback. I think the presentation on storage was especially helpful and your staff is to be commended on a very creative approach to a complex matter.

However, the presentation on storage carry over raised a very serious question in my mind that I believe should be answered before we modify our original 1987 carry over numbers. After thinking about the carry over process you outlined in light of your "bean" presentation, I am convinced that the procedure of allowing paper carry over that is substantially different from the physical contents not only violates the space holder contracts but probably will result in identifiable and actionable injury to certain space holders.

My conclusion is based upon my understanding of the space holder contracts, which may very well be incomplete. But as I understand the contracts, they all specify entitlements as a percentage of the total space in a given reservoir. This, I believe is different from contracting for a unique amount of space, or the "bucket concept."

Also by allowing an earlier priority space holder to carry over his water in the space of a later priority upstream space holder, the Bureau is improperly allocating the new accrual that otherwise would have gone to the latest priority upstream space holders.

This probably can better be illustrated by example. Let us take two hypothetical reservoirs with the earlier priority reservoir (A) being located

Mr. Max Van Den Berg
January 16, 1989
Page 2

downstream. Under the Bureau's policy of storing first as high in the system as possible (in B), with the carry over matching the contents, once reservoir A physically fills all of the water in reservoir B belongs to the space holders of B. However, if the Bureau allows some of reservoir B's water to be carried over in A, then an amount of new accrual equal to the B water carried over in A must be used to move this carry over back upstream to B, thus depriving the space holders in B of that exact amount of storage. This, of course, is what will happen in 1988 if we change the 1987 carry over pursuant to your instructions. I know of nothing in the contracts that allows using some other entities space to hold carry over. In addition, the state took the position at the time the water bank was being developed that water leased for non-irrigation purposes would be the last space to fill in the ensuing year.

I recognize that it will be awkward to change the carry over numbers after handing out the 1987 carry over numbers in the meetings in Burley and Idaho Falls. But I am now concerned that the space holders have not agreed to allowing their space to be used for someone else's carry over and that the resulting injury is easily identified and probably cannot be defended in court.

I believe there is a good reason why the Bureau instructed us years ago to make carry over match the physical reservoir contents. Palisades Water Users Inc. is only one organization that would likely seek damages from the federal government if the carry over for 1987 is allocated as you are proposing.

I suggest you reconsider your instructions before we use the revised 1987 carry over numbers in our 1988 accounting.

Very truly yours,

RONALD D. CARLSON
Watermaster

- a) Progressive Irrigation District use on Willow Creek.
- b) Storage transfer from M Newby #1 to #3.
- c) Storage transfers from Burgess to various users.
- d) Storage transfers from Butte & Market L to various users.
- e) Stored water released past Milner.
- f) Porter storage combined with Great Western.
- g) Idaho Canal use on Willow Creek.
- h) Storage transfers from Snake R Valley to Hill and Cannon.
- i) Storage transfers from Fort Hall Michaud to Reservation.
- j) Storage transfers from Peoples to Adams.
- k) Storage transfers from Corbett to Nielson-Hansen.
- l) Storage transfers from Riverside to Lambert.
- m) Gaging error credit.
- n) Island Park storage reverts to Fremont-Madison.
- o) Combined with Fall River Canal.
- p) Credit for natural flow right.
- q) Reverted Island Park (2758.4 af) plus 107.1 af transfer (r).
- r) Storage transfer from St Anthony Union.
- s) Storage transfer from Sturm #1 to #2.
- t) Supplied from Bergman and Indian Reservoirs.
- u) Natural flow debit (268 af) plus 8407.2 af transfer (o).
- v) Supplied through groundwater exchange.
- w) Reverted Island Park (133.6 af) plus 685.5 af flow credit.
- x) Reverted Island Park (60.3 af) plus 1424.2 af flow credit.
- y) Reverted Island Park (193.3 af) plus 533.6 af transfer (y).
- z) Transfer from Woodmansee-Johnson.
- za) Snake River excess use.
- zb) Reverted Island Park (12616.2 af) less 24694.8 af excess Henrys Fork use plus 10863.1 af groundwater exchange plus 2262.9 af Ririe storage (zc).
- zc) Ririe Reservoir and Willow Creek stored flow losses (5315.1 af) plus 2262.9 af to Fremont-Madison (zb).
- zd) Unmeasured Snake River water bank use (2410.0 af) plus 1023.7 af excess groundwater exchange plus 1343 af storage use debits minus 7492.7 af storage use credits.

TO PUT DATA ON TAPE:

CAUTION!! ↴

\$ ALLOC MSAO:

`$ INIT/DENS = 6250 ^ MSAO: ^ WRO478`

(note use this only if using scratch tape - this erases all existing save sets on tape!!!)

\$ MOUNT/FOR ^ MTAO:
S

↗ /IGNORE=LABEL

FOR WD 01 IT IS A GOOD IDEA TO MAKE NEW TAPE EACH YEAR.

\$ BACKUP/NOASSIST/VERIFY/LIST = WDST01.LIS ^ SNKA88.* ^ MSAO: SNK1988.BC

\$ PRINT ^ WDST63.LIS

\$ DISM ^ MSAO:

\$ DEAL ^ MSAO:

THEN IT IS A GOOD IDEA TO RETRIEVE DATA SETS TO CHECK IF COPY WAS SUCCESSFUL. GO TO ANOTHER DIR + RETRIEVE

\$ BACKUP/REW/LOG ^ MSAO: */SAVE-SET/SEL = SNKA88.* ^ *.*

NOTE: IF MESSAGE SAYS WRONG LABEL, ANSWER 'OVERWRITE'

NO, PUT /IGNORE=LABEL/
